# CONDITION AND EARNINGS OF MEMBER BANKS ELEVENTH FEDERAL RESERVE DISTRICT 

## To the Member Banks in the

## Eleventh Federal Reserve District:

Net profits of member banks in the Eleventh Federal Reserve District rose to a record high of $\$ 67,626,000$ during 1957, reflecting a gain of almost 20 percent over the preceding year. The year-end volume of earning assets also reached a record level in 1957, but total assets declined slightly.

The year's expansion in earning assets occurred primarily in loan accounts, which rose $\$ 143,803,000$ to a total of $\$ 4,164,572,000$. Increased lending to individuals accounted for slightly more than half of the loan expansion, while the remainder of the loan increase was concentrated in commercial and industrial borrowings. Agricultural loans, real-estate loans, and securities loans showed only modest growth. Loan expansion during the year was paralleled by a $\$ 27,485,000$ increase in investments, with the addition to non-Government securities more than offsetting the decline in holdings of Government obligations. Notwithstanding the increase in loans and investments, total assets declined $\$ 33,742,000$, as cash and balances due from banks were reduced $\$ 208,995,000$.

Most demand deposit categories contracted during 1957. The demand balances of individuals and businesses showed the largest decline, and this decrease was accompanied by a substantial reduction in interbank accounts. The reduction in demand balances more than offset a $\$ 235,119,000$ increase in time accounts, producing a $\$ 101,114,000$ decline in total deposits.

Capital accounts continued to rise during 1957. Additions to these accounts during the year amounted to $\$ 62,647,000$, raising year-end capital accounts to $\$ 799,080,000$.

Yours very truly,
Watrous H. Irons
President
