The Federal Financial Institutions Examination Council (FFIEC) has announced that the September 1991 Uniform Bank Performance Report (UBPR) is ready for distribution and sale to the public. The quarterly UBPR is designed for use by bank examiners, financial analysts, and bank managers and permits both summary and in-depth analysis of the performance of commercial banks as well as Federal Deposit Insurance Corporation-insured savings banks. Computer tapes of the UBPR data are again available.

In addition, the FFIEC is also making available the September 1991 version of the UBPR Peer Group Ratio Distribution Report and the UBPR State Average Ratio Distribution Report. These reports provide users with a complete ratio distribution ranging from the 1st percentile through the 99th percentile for all UBPR ratio values. The ratio values are presented for each UBPR group, using the same definitions that are used in the UBPR Bank Report.

**General Information**

The Uniform Bank Performance Report (UBPR) is an analytical tool created for bank supervisory purposes. In a concise format, it shows the impact of management decisions and economic conditions on a bank's performance and balance-sheet composition and is produced for each insured commercial bank and FDIC insured savings bank (Insured Bank) in the United States. The UBPR is computer-generated from the FDIC data base, contains several years worth of data, and the data is presented in ratio, percentage, and dollar formats.

**Data Formats**

The typical UBPR format consists of the following:

- ♦ **Year-End** - Five consecutive year-end periods (e.g., December 1986 through December 1990).
- ♦ **Non-Year-End** - Current period, one-year ago from the current period, and three year-end periods (e.g., March 1991, March 1990, December 1990, December 1989 and December 1988).

**Data Types**

The typical UBPR Publication presents three types of data for each of five periods:

- ♦ **Bank-Level Ratio and Dollar Values:** The source of all bank financial data in all of the UBPR publications is the FFIEC Call Reports, which are filed on a calendar quarter basis.
- ♦ **Peer Group Averages:** The UBPR system classifies insured commercial banks into 25 unique Peer Groups and FDIC insured savings banks into four unique Peer Groups to show how a group of banks with similar characteristics has performed (both groups have national figures). This information can be used as a benchmark to assess an individual bank's asset and liability structure, earnings level and off-balance sheet exposure.

- ♦ **Bank Percentile Ranks:** Based on the UBPR Peer Groups, the UBPR system ranks each bank ratio within each Peer Group in an ascending order. The resulting percentile rank, ranging from 0 to 99, provides the user an institution's relative position within its UBPR peer group for each measure.

**UBPR Data Availability**

Each quarter, approximately 90 days after the Call Report date, each Insured Bank will automatically receive a copy of its own UBPR Bank Report free of charge. If you have misplaced your bank's UBPR Bank Report an additional copy may be purchased (through the FDIC Disclosure Group). In addition, you may also purchase the Bank Report on your competitors or any other UBPR product by using the order form on the reverse side of this page.
