March 24, 2014

Federal Reserve issues full corrected results for the 2014 Dodd-Frank Act stress test

For immediate release

[Share](#)

The Federal Reserve on Monday issued full corrected results for the 2014 Dodd-Frank Act stress test.

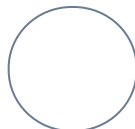

As announced on Friday, the Federal Reserve adjusted the stress test results to address inconsistencies in the treatment of the fourth quarter 2013 actual capital actions and assumptions about preferred and employee compensation-related issuance over the course of the planning horizon.
