STUDY OF EMPLOYMENT, GROWTH, AND PRICE LEVELS
(Pursuant to S. Con. Res. 13, 86th Cong., 1st sess.)

OTTO ECKSTEIN, Technical Director
JOHN W. LEHMAN, Administrative Officer
JAMES W. KNOWLES, Special Economic Counsel
LETTERS OF TRANSMITTAL

December 30, 1960.

To Members of the Joint Economic Committee:

For the assistance of members of the Joint Economic Committee and other users of the materials prepared under the “Study of Employment, Growth, and Price Levels” there is transmitted herewith a consolidated index of the 13 volumes of the hearings, and tables of contents of the study papers and reports.

Paul H. Douglas,
Chairman, Joint Economic Committee.

Hon. Paul H. Douglas,
Chairman, Joint Economic Committee,
U.S. Senate, Washington, D.C.

Dear Senator Douglas: Transmitted herewith is a consolidated index of the “Hearings on Employment Growth, and Price Levels” with tables of contents of the study papers and the reports prepared as part of that same study.

This index is designed to provide users with ready identification of materials and subjects of discussion by broad economic areas, with appropriate subdivisions. The tables of contents of the study papers and reports provide additional information in somewhat lesser detail. Since the papers were prepared on individual subjects no attempt has been made at consolidation. The list of witnesses, statements, and exhibits of each of the hearings is included for those who wish a ready reference for number and kinds of witnesses included in a particular hearing.

The index has been prepared by Mrs. Viola Ure of the committee staff. Miss Mona Salyer, from the Vassar-Wellesley intern program, assisted with parts 1 and 2.

John W. Lehman,
Clerk and Acting Executive Director.
FOREWORD

From March 20, 1959, to January 1960, the Joint Economic Committee held 10 sets of hearings in connection with its "Study on Employment, Growth, and Price Levels." The printed testimony covers 3,486 pages published in 13 volumes.

A consolidated index of these hearings has been prepared to assist members of the Joint Economic Committee and others by making more readily available the valuable materials and views submitted by the witnesses on the many aspects of this complex subject.

In addition to the hearings, there were 23 study papers published in 16 committee prints, a staff report, and a committee report (S. Rept. 1043, 86th Cong., 2d sess.). While it has not been possible at this time to prepare a similar index for the study papers and reports, there are included with the index of hearings in this committee print the quite detailed tables of contents of the various papers and reports.

The materials are arranged as follows:

1. Consolidated index of the hearings.
2. List of witnesses, statements, and exhibits of the hearings, parts and subparts 1 through 10.
3. Tables of contents of study papers 1 through 23.
4. Table of contents of the staff report.
5. Table of contents of the committee report.

Stabilizing. 2866–2868, 3221–3222

Tax as a measure of. 100–102, 119, 167, 3086–3087, 3109–3110, 3152–3155

Tax reform. 65–66, 154, 1374, 1476, 2507, 2511

Fisher, Irving and the 100-percent reserve system. 1459, 3032, 3047–3050

**Foreign Exchange (see also Balance of payments):**

- "The Gold Shortage, the Dollar Glut, and the Future of Convertibility." 2918–2925

**Foreign policy:**

- And the Common Market. 1018

Council of Foreign Relations. 902–904

Economic aid to underdeveloped countries. 892–894, 919–921, 953, 958, 974–976, 978–982

Implications for U.S. 1065

International influences on the American economy, part 5. 889–1086

Trade. 891, 1060, 2216, 2784, 2789, 2812, 2814–2817, 3073–3074, 3028

Fortune magazine, item-by-item analysis re components of U.S. balance of payments (reference to). 947

Friedman, Milton:

- "Quantity Theory of Money—A Restatement." 649–668
- Statement of, on prices and changes in effective supply of money. 605–606
- Statement of, on reconciling and attaining economic objectives. 3019–3063
Fringe benefits:
And decline in labor turnover. 589, 597-600
And reemployment opportunities. 592-593, 596-600
As percent of payroll. 330-331
Impact of nonwage collective bargaining practices on economic growth. 2583-2628
Understate real earnings. 365, 373

Gass, Oscar, statement submitted by, on management of the public debt. 3444-3450

GATT. 896, 900, 999, 1006, 1022, 1025-1026, 1044-1046, 1071-1074, 2907, 2913, 2923, 2947-2948

General Motors. 2011, 2021, 2090, 2101

Gilmartin, Maurice A., Jr., statement of, on dealings of Charles E. Quincey & Co. in Government securities. 1643-1658

Ginsberg, Eli, statement of, on manpower aspects of the service sector of the economy. 2661-2670

Goals (economic):
A restatement of economic purpose. 95-97
Causes of economic losses. 113-132
Departure from. 97-113
Policy and program recommendations for. 152-164
Reconciling and attaining economic objectives (pts. 9A and 9B). 2757-3239
Gold, Nathan J., statement of views of National Retail Merchants Association, on attaining economic objectives. 3225-3230

Gold (see also Balance of payments):
And U.S. dollar settlements, 1950-58 (table). 967
Dumping of, on foreign markets. 626
German accumulation of. 977
Holdings, United States, 1949-58 (table). 970
Inflow of. 1317, 1319
Monetary, and dollar holdings, 1949-59 (table). 2917
Outflow of. 625, 942-950, 954-958, 1189
Price of. 626, 938-945, 974
Purchases of, by Treasury, from foreign central banks. 3414-3416
Reserves, and liquid dollar holdings of foreign countries (chart). 942
Standard, and U.S.S.R. 626, 988
Stock, size of. 948
The gold shortage, the dollar glut, and the future of convertibility. 2918-2925
The international monetary position of the United States. 2905-2917
United States and foreign dollar holdings (chart). 2930

Goldfinger, Nat, letter to Otto Eckstein and reply, regarding steel and post-war inflation. 3471-3477

Goldsmith, Raymond W.:
Statement of, on long-term trends in national product and income. 230-279
Letter to the chairman transmitting table and additional information. 3455-3456

Gordon, Robert A., statement of, on reconciling and attaining economic objectives. 2955-2988

Government, Federal:
As sector, in the private economy. 3108-3109
Borrowing by, compared with State and local. 1095-1098
Effects of high interest and tight money on State and local facilities. 3368
Expenditures, increase in. 159, 2121, 2463, 2460-2461, 2484, 2491, 2507
Expenditures, reduction of. 117, 129, 1374, 1589-1590, 3061-3063
Financing and debt management policies. 1338-1339
Management of monetary, fiscal, and debt operations. 1087-1976, 3241-3486
Policies of. 4, 18, 100-102, 112, 200-203, 569-570, 780, 2483, 2499, 2633, 2639-2647, 2686-2869, 3085, 3197, 3151-3156

Programs. (See Government programs.)
Securities. (See Government securities; dealers, security.)

Government programs:
And monopoly. 2099
Expenditures for. 2465-2469, 2501-2503, 3152
Farm programs out of control (chart). 3072
Farm subsidy. 1163, 2502, 2963, 3063, 3072-3073
FHA and VA mortgages. 1376, 1380-1381, 1385-1387, 1475
FNMA. 1447-1448, 1598-1599
Government programs—Continued

- Aggregate difference in income, 1958-64 as a whole, between high and low growth rates .......................................................... 123
- Averages and average changes for selected economic indicators, various periods—arithmetic average of annual percentage changes, selected periods .......................................................................................................................... 183
- Budgetary outlays and the public debt in relation to GNP—1953-58 and projected 1960 and 1964 goals .......................................................... 195
- Consumer prices continued to rise throughout the recession, consumer price increases, September 1957 to June 1958 .......................................................... 145
- Consumption lagged behind investment in means of production, 1953-57 and 1955-57 .......................................................... 115
- Deficiency in consumption is our basic economic trouble .......................................................... 116
- Deficits in GNP and components, 1947-53 and 1953-58 .......................................................... 185
- Deficits in personal income 1947-58 .......................................................... 186
- Differences between low and high growth rates—employment, unemployment, GNP .......................................................... 188
- Differences between low and high growth rates—GNP and components .......................................................... 189
- Differences between low and high growth rates—GNP, national income, personal income .......................................................... 190
- Differences between low and high growth rates—personal income .......................................................... 191
- Downturn in heavy industries accompanied by price hikes, changes in production and in wholesale prices, January 1957 to June 1958 .......................................................... 145
- During period 1929-58, most inflation due to war—average annual change in prices .......................................................... 133
- During relatively full prosperity productivity rose as rapidly as average hourly wage rates—but when the economy was slack, productivity gains slowed down—and when recession developed, productivity was hard hit and wage rates moved slower .......................................................... 150
- Economic growth needed for economic health .......................................................... 107
Keyserling, Leon H., former Chairman—Continued

Exhibits—Continued

Economic trends during first years of the Korean war, 1949–51 (prices, production, and employment, and Government expenditures and private money supply) .................................................. 139

Economic trends during reconversion, 1945–48 (prices, production, and employment, and Government expenditures and private money supply) .................................................. 137

Economic trends during the period of "the new inflation," 1952–58 (prices, production, and employment, and Government expenditures and private money supply) .................................................. 140

Economic trends during World War II, 1939–45 (prices, production, and employment, and Government expenditures and private money supply) .................................................. 135

Farmers' income deficiency as part of consumer-income deficiency .................................................. 118

Federal budget as percent of total national production (GNP) .................................................. 127

Federal conventional budget—actual fiscal 1955–60 and goals for calendar 1960 and 1964 .................................................. 193

Federal outlays should be geared to growing needs and capabilities .................................................. 129

Goals for full prosperity, 1960 and 1964, 1960 and 1964 goals compared with estimated 1958 .................................................. 125

Goals for total Federal budget with expansion to meet main needs .................................................. 126

Growth rates, U.S. economy, 1920–58—average annual rates of change in gross national product .................................................. 105

High growth rate, 1958–64, would yield $400 billion, more total production than low rate .................................................. 121

High growth rate would provide employment for many more people .................................................. 121

Inflation of wholesale prices severest among giant industries—and the bigger price jumps have yielded high profits .................................................. 144

Large losses to all economic groups .................................................. 109

Large national economic deficits during 6-year period, 1953–58 .................................................. 109

National debt as percent of total national production (GNP) .................................................. 127

$152 billion lag in total economic activity, 1953–58, stunted vital domestic programs and defense .................................................. 111

Our productivity—the average output per man-hour—is rising at a faster rate .................................................. 149

Personal income, disposable income, and saving, actual 1953–57, estimated 1958, and goals for 1960 and 1964 .................................................. 192

Price increases brought big profits .................................................. 142

Production has lagged .................................................. 107

Proposed calendar 1960 and 1964 budgetary outlays, compared with fiscal 1954–59, 1959, and 1960 .................................................. 194

Selected economic indicators and their year-to-year change, 1929–58 .................................................. 181, 182

Summary of budget expenditures, per capita (1957 dollars) and as percent of GNP—total, national security and selected welfare items .................................................. 196

Supply of GNP—actual 1956–57, estimated 1958, and goals for 1960 and 1964 .................................................. 188

"The new inflation" after 1955—average annual change in prices .................................................. 133

"True" unemployment, 1953–58 .................................................. 184

Unemployment has risen .................................................. 107

Wage and salary deficiency as part of consumer income deficiency .................................................. 118

Wage increases needed to expand consumption, lagged far behind investment in means of production, first quarter 1956 to third quarter 1957 in current dollars .................................................. 148

Wage increases needed to expand consumption, lagged far behind profits feeding investment boom, first three quarters 1956, to first three quarters 1957, in current dollars .................................................. 147

We have the productive resources for full economic expansion—1960 and 1964 goals compared with estimated 1958 .................................................. 120
Keyserling, Leon H., former Chairman—Continued
Exhibits—Continued
When sales of some big concerns rose rapidly, they lifted prices instead of holding them steady, percentage increase in sales of large corporations and in wholesale prices in these industries, first half of 1956 to first half of 1957—but emerging production slowdown did not bring price restraint. Page 146
Slichter, Sumner H., Harvard University. 2
Exhibits:
Changes in compensation of employees per man-hour in private industry, changes in real product per man-hour, and changes in prices during the last 11 years. 7
Comparison of the consumer price index, 1948-53 and 1953-57. 12
Comparison of unemployment rates among young males in several recent Januarys. 3
Increase in the consumer price level and increase in real product per capita in 15 countries. 11

ADDITIONAL INFORMATION
Maximum monthly dollar benefits and benefits adjusted for price increases for a single retired worker. 52
Wage earners now receive record share of U.S. income, article in the Birmingham News, March 18, 1959. 46
Your money’s worth: Social Security “Illusion,” article in the Washington Star, March 16, 1959. 52

PART 2—HISTORICAL AND COMPARATIVE RATES OF PRODUCTION, PRODUCTIVITY, AND PRICES. 229-466

WITNESSES IN ORDER OF APPEARANCE
Raymond W. Goldsmith, professor of economics, New York University. 230
Solomon Fabricant, director of research, National Bureau of Economic Research, Inc., and professor of economics, New York University. 281
George Rogers Taylor, professor of economics, Amherst College, and chairman, Council of Research in Economic History. 379
Ethel D. Hoover, Chief of the Commodities and Services Branch, Bureau of Labor Statistics. 384
Moses Abramovitz, National Bureau of Economic Research, and professor of economics, Stanford University. 411

STATEMENTS AND EXHIBITS
Abramovitz, Moses, National Bureau of Economic Research, and professor of economics, Stanford University. 411
Exhibits:
Additions to the total labor force, immigration and nonfarm unemployment rates; average reference-cycle standings, 1871-1955. 449
Amplitude of long swings in rates of growth of GNP and its major components, 1871-1950. 436
Amplitude of long swings in rates of growth of physical output, total input and productivity, 1892-1953. 439
Changes in natural increase, net immigration and total population increase, overlapping decades, 1877-1947. 448
Chronology of severe contractions compared with peaks and troughs of long swings in capital formation. 439
Chronology of the peaks and troughs in five basic aspects of the long swings in economic growth. 440
Gross capital formation and its components (1929 prices) average reference-cycle standings, 1871-1951. 451
Gross national product in 1929 prices, 1869-1953; annual data and average reference-cycle standings. 441
Abramovitz, Moses, National Bureau of Economic Research—Continued

Exhibits—Continued

Gross national product in 1929 prices; rates of growth per annum
between average reference-cycle standings ___________________________ 442
Immigrants from all countries; average reference-cycle standings,
1824-51 .......................................................................................... 450
Net additions to population by nativity and net immigration,
overlapping decades, 1875-1950. .................................................. 447
Output, input and productivity, rates of growth per annum
between average reference-cycle standings, 1892-1953. .................... 453
Peaks and troughs in the rate of growth, economic activity and
in the volume of additions to capital stock:
Pre-Civil War period ................................................................. 437
Post-Civil War period ............................................................... 438
Peaks and troughs of long swings in the rate of growth of output
and economic activity—duration of the long swings, 1815-1940. .......... 435
Peaks and troughs of long swings in the rates of growth of output,
input and productivity, 1892-1953 .................................................. 439
Rate of growth of economic activity—peaks and troughs of rates
of change between average reference-cycle standings, selected
series:
1860-1948 ..................................................................................... 434
1800-1860 .................................................................................... 435
Relative timing of peaks and troughs of long swings in rate of
growth of economic activity or output—additions to total labor
force and immigration, 1846-1940. ............................................... 437
Residential construction and capital expenditures by railroads and
public utilities (1929 prices) and additions to population, aver-
age reference-cycle standings, 1871-1955 ...................................... 452
Selected indicators of economic activity, 1860-1950; rates of
growth per annum between average reference-cycle standings.... 443
Share of changes in net immigration and natural increase in
changes in total population increase, overlapping decades,
1870-1955. .................................................................................. 436

Exhibits:
Business declines 1837-1915 (ranked by relief load rise), percentage change in......................... 585
Business dollar declines 1900-54 (ranked by unemployment rises), percentage change......................... 585
Long, Clarence D., professor of economics, the Johns Hopkins University........................................ 539
Exhibits:
Association between labor force participation rates of females and males: 5 countries, various years, 1890-1951......................... 565
Germany, including the Saar, Austria, and the Sudetenland: population and labor force by sex, 1939-44......................... 558
Labor force compared with Armed Forces and the unemployed, United States, 1940-56 (labor force per 1,000 in same population group)......................... 559
Labor force of native white, foreign-born white, and colored persons: United States, census dates, 1890-1950......................... 564
Number of persons by which the labor force during the severe unemployment of April 1940 differed from the average of the moderately high-employment census dates April 1930 and 1950, in relation to population and unemployment by sex and age group, United States and its urban and rural areas......................... 557
Number of persons by which the labor force of the depression years 1934-36 differed from that of the April 1930 and 1940 average in relation to population and unemployment, by sex and age group, four States......................... 556
Long, Clarence D., professor of economics—Continued

Exhibits—Continued

Persons 14 years and older in the labor force per 1,000 in same population group: Five countries, various years, 1890-1951; and standardized for age and sex. 562, 563

Variation in the proportion of the labor force to population and the corresponding range of error in the labor force sample estimates, United States and Canada, 1946-52 (per 1,000 population of same sex and age). 560

Morse, Gerry E., vice president, industrial relations, Minneapolis-Honeywell Corp. 595

Silbert, Myron S., vice president of Federated Department Stores, Cincinnati, Ohio (also chairman, Committee on Manpower and Employment Statistics, Business Research Advisory Counsel to U.S. Bureau of Labor Statistics) 527

PART 4—THE INFLUENCE ON PRICES OF CHANGES IN THE EFFECTIVE SUPPLY OF MONEY 605-887

WITNESSES IN ORDER OF APPEARANCE

Milton Friedman, University of Chicago and National Bureau of Economic Research 605

Richard T. Selden, research associate, National Bureau of Economic Research, and associate professor of banking, Columbia University 671

Robert Eisner, professor, Northwestern University 767

John G. Gurley, senior staff member, Brookings Institution 847

STATEMENTS AND EXHIBITS

Eisner, Robert, professor, Northwestern University 767

Exhibits:

- Article reprinted from the Economic Journal, the quarterly journal of the Royal Economic Society 829
- Employment and price levels 803
- Hypothetical aggregate supply and demand functions 796
- Hypothetical aggregate supply and demand functions after reduction in cost of capital and increase in assets stemming from increase in quantity of money 799
- Hypothetical aggregate supply and demand functions after reduction in cost of capital stemming from increase in quantity of money 798
- Unemployment equilibrium rates of growth 811

Friedman, Milton, University of Chicago and National Bureau of Economic Research 605

Exhibits:

- Demand deposit turnover rates, 1943-58 643
- Deposits and currency, all banks in the United States—June and December through 1942, end of month 1943-46, last Wednesday of month 1947 641
- Elements of the equation of exchange, quarterly, 1947-58 642
- Flow of funds sector velocities, 1939-56 644
- Four measures of aggregate monetary velocity 640
- Money Stock, income, and income Velocity, 1869-1957 638
- Monthly rate of change in money stock, 1907-58 639
- Sector Velocity components, statistics of income, 1931-56 645
- Selected asset size velocities, nonfinancial corporations, statistics of income, 1946-55 648
- Selected sector velocities by major industry groups, statistics of income, 1946-56 646
- The Quantity Theory of Money—A Restatement 649

Judging the appropriateness of a "sense of Congress" action relating to the techniques of a monetary policy_________ 1165
Net profits by banks on securities—calendar years 1955-58.____ 1143
Offerings of public marketable securities other than regular weekly Treasury bills................................................. 1171
Ownership of U.S. Government securities, December 31, 1958.... 1113
Question of commercial banks paying interest on Treasury accounts................................................................. 1201
Question of deposits to be maintained in commercial banks____ 1202
Question of Treasury requirements of banks to pay interest on minimum balance maintained by the Treasury.____ 1191
Question whether law which prohibits commercial banks from paying interest on demand deposits should be repealed... 1204
Questions Representative Patman has asked the Treasury to answer................................................................. 1185
Anderson, Hon. Robert B., etc.—Continued

Exhibits—Continued

| Selling Treasury securities through auction | 1150 |
| Selling U.S. Government direct and guaranteed issues by tender | 1156 |
| Summary by investor class—all districts | 1108 |
| Taxes subject to the individual income tax | 1207 |

Exhibits:

| Capital funds available from principal savings sources, 1947-58 | 1356 |
| Comparative yields of U.S. savings bonds, marketable bonds, and savings deposits | 1370 |
| Holdings by type of investor of long-term Treasury bonds (due or callable in 10 years or over) as percent of total outstanding, 1945-59 | 1365 |
| Hypothetical Federal debt transactions during a year | 1364 |
| Long-term Treasury bonds, by type of investor, 1945-59 (due or callable in 10 years or over) | 1365 |
| Net uses of funds in selected investments of corporate pension funds, 1947-58 | 1368 |
| Net uses of funds in selected investments of life insurance companies, 1947-58 | 1369-70 |
| Net uses of funds in selected investments of mutual savings banks, 1947-58 | 1366-67 |
| Uses of capital funds in corporate financing, 1947-58 | 1359-60 |
| Uses of capital funds in residential mortgages, commercial mortgages and corporate securities, 1947-58 | 1361-62 |
| Uses of capital funds in the real estate mortgage market, 1957-49 | 1363-64 |

Martin, Hon. William McChesney, Jr., Chairman, Board of Governors of the Federal Reserve System, accompanied by Ralph A. Young, Director, Division of Research, Federal Reserve Board; Winfield W. Pieffer, assistant to the Chairman, Federal Reserve Board; and Robert Poosa, vice president, New York Federal Reserve Bank | 1231, 1451 |

Exhibits:

| Basic commodity price indexes in relation to price analysis | 1485 |
| Demand for credit | 1400 |
| Differences in techniques between raising or lowering money supply to counteract cyclical changes and raising the money supply in relation to long-range secular growth | 1496 |
| Federal Reserve policy actions | 1460, 1491 |
| Profits, recoveries, and losses on securities—member banks, 1951-58 | 1238 |
| Ratio of outstanding E and H savings bonds to gross public debt, 1954-59 | 1283 |
| What constitutes disorderly conditions in the Government securities market | 1278 |
| Wholesale commodity prices | 1489 |

Ohlenbusch, John M., senior vice president, Bowery Savings Bank, New York City; accompanied by Saul B. Klamann, director of research, National Association of Mutual Savings Banks, New York City | 1410 |

Exhibits:

| Balance sheets reflecting assumed bank's position before and after bond transactions described in text | 1425 |
| Holdings and transactions in U.S. Government securities | 1449 |
| Officers | 1423 |
| Statement of condition as of June 30, 1959 | 1424 |
| Summary—bond income, profits and losses, 1946-58 | 1426 |
| Transactions of the Bowery Savings Bank in U.S. Government obligations | 1450 |
ADDITIONAL INFORMATION

Analysis of the recommendations on debt management of the Committee on Government Borrowing of the American Bankers Association to the Secretary of the Treasury ................................................................. 1229

Average maturity of the Federal marketable interest-bearing public debt: semiannually, December 1949 through December 1958. ................................................................. 1098

Corporations' securities issues: by purpose of issue, 1945–58 ................................................................. 1097

Federal Government issues of certificates, notes, and bonds: by purpose of issue, 1945–58 ................................................................. 1098

Government’s management of its monetary, fiscal, and debt operations ................................................................. 1245

Interest payments in proportion to the total economy ................................................................. 1208

Member bank earning assets—potential expansion arising from reduction in reserve requirements, July 1, 1953, to June 30, 1959 ................................................................. 1331

Member bank reserve requirements ................................................................................................. 1317

Sources and uses of member bank reserves, 1914 to 1952 ................................................................................................. 1300

State and local governments' securities issues: by purpose of issue, 1945–58 ................................................................. 1096

Total debt and Federal debt: Selected years, 1929–58 ................................................................. 1098

Total securities issues of the Federal Government, State and local governments, and corporations, by purpose of issue, 1945–58 ................................................................. 1097

### Exhibits—Continued

- **Percent unemployment at peak years in the business cycle**
- **Ratio scale**
- **Saving-output ratios**
- **The economic framework of a theory of growth**
- **Unemployment and changes in wage rates**

### Ruggles, Richard, Yale University

**Exhibits:**
- Average hourly earnings, output per full time equivalent employee, and the implicit deflator of the gross national product, 1934-37 and 1955-58 (percentage change from preceding year)
- Behavior of costs and prices, 1956-58 (percentage change from preceding year)
- Components of the cost of living index, 1947-49=100
- Implicit price deflators for gross national product, 1946-59
- Industrial integration, prices and output
- Wages and salaries paid by corporations and corporate profits, 1955-58 (seasonally adjusted totals of annual rates)

### Schultze, Charles L., department of economics, Indiana University

**Exhibits:**
- Changes in manufacturing costs and prices
- Changes in output, employment, and wage rates; manufacturing, May–June 1955 to May–June 1957
- Changes in prices and output
- Indexes of capacity, employment and output in manufacturing industries

### Smithies, Arthur, Harvard University

**Exhibits:**
- Changes in manufacturing costs and prices
- Behavior of costs and prices, 1956-58 (percentage change from preceding year)
- Components of the cost of living index, 1947-49=100
- Implicit price deflators for gross national product, 1946-59
- Industrial integration, prices and output
- Wages and salaries paid by corporations and corporate profits, 1955-58 (seasonally adjusted totals of annual rates)

### Weston, J. Frederick, University of California, Los Angeles, Calif

**Exhibits:**
- Changes in manufacturing costs and prices
- Changes in output, employment, and wage rates; manufacturing, May–June 1955 to May–June 1957
- Changes in prices and output
- Indexes of capacity, employment and output in manufacturing industries

### INDEX TO HEARINGS

**PART 8—THE EFFECT OF INCREASES IN WAGES, SALARIES, AND THE PRICES OF PERSONAL SERVICES, TOGETHER WITH UNION AND PROFESSIONAL PRACTICES UPON PRICES, PROFITS, PRODUCTION, AND EMPLOYMENT**

**WITNESSES IN ORDER OF APPEARANCE**

- **Colin C. Clark, director of research, the Econometric Institute, Inc.; accompanied by Peter W. Hoguet, president, and Mrs. Ruth Gomulicka, researchist**
- **Carl P. Christ, University of Chicago**
- **John R. Meyer, Harvard University**
- **Daniel B. Suits, University of Chicago**
- **Lloyd Ulman, professor of economics and industrial relations, University of California, Berkeley, Calif.**
- **Edward C. Budd, assistant professor of economics, Yale University**
- **George H. Hildebrand, professor of economics and director, Institute of Industrial Relations, University of California, Los Angeles, Calif.**
- **Oscar A. Ornati, associate professor of economics, and director of labor education center, New School for Social Research, New York, N.Y.**
- **Mark L. Kahn, Wayne State University**
- **George W. Taylor, professor of industry, Wharton School, University of Pennsylvania**
- **Jaak Steiber, Labor and Industrial Relations Center, Michigan State University**

INDEX TO HEARINGS

Triffin, Robert, professor of economics, Yale University

Exhibits:
- Balance of payments of the United States, 1952-59 and 1949-59
- Monetary gold and dollar holdings, 1949-59
- The gold shortage, the dollar glut, and the future of convertibility
- U.S. balance of payments on current account and net exports of U.S. capital, 1949-59
- U.S. gold and foreign dollar holdings

ADDITIONAL INFORMATION

Resolutions of the AFL-CIO re international trade

PART 9B—CONSTRUCTIVE SUGGESTIONS FOR RECONCILING AND SIMULTANEOUSLY OBTAINING THE THREE OBJECTIVES OF MAXIMUM EMPLOYMENT, AN ADEQUATE RATE OF GROWTH, AND SUBSTANTIAL STABILITY OF THE PRICE LEVEL

Materials Submitted by 12 Organizations at the Invitation of the Joint Economic Committee:

American Bankers Association
- Farm programs out of control, budget estimates and expenditures for stabilization of farm prices and farm income
- How spending programs grow; expenditures other than national security, international affairs and debt service
- Inflation in construction costs, selected price indexes: 1948-58
- Our inflationary Federal budget, budget surpluses (plus) and deficits (minus) fiscal years 1950-59
- The mounting short-term debt, marketable treasury debt due within 1 year

American Farm Bureau Federation
- Extract from Farm Bureau's 1959 policies on monetary and tax matters

American Federation of Labor and Congress of Industrial Organizations
- Areas of substantial labor surplus (unemployment of 6 percent or more of the labor force)
- Average family personal income before and after Federal individual income tax liability
- How family income was shared by income fifths and by the top 5 percent, 1935-36, 1944, 1954, 1957
- Operating rates as percent of capacity
- The slow-down in economic growth 1947-53, 1953-59
- Wage and salary jobs

Chamber of Commerce of the United States

Committee for Economic Development

Cooperative League of the United States of America

Investment Bankers Association of America

Life Insurance Association of America

National Association of Manufacturers
- Export prices expressed in U.S. dollars, 1953-100
- Net corporate debt
- Ratio of money supply to annual output of privately purchased goods and services in current prices
- Retained profits in the post-war period showing amounts required to maintain inventory and to make good the deficiency in depreciation
- Trends in unit labor cost
- Trends in unit profit
- Wholesale price indexes for economic sectors, 1947-49=100
- Wholesale prices in the United States, 1850-59=100

National Association of Mutual Savings Banks
INDEX TO HEARINGS

PART 10—ADDITIONAL MATERIALS SUBMITTED FOR THE RECORD. 3241-3486

Letter of Hon. Wright Patman, to chairman ........................................ 3241

Answers by the Secretary of the Treasury to questions submitted during the committee hearings by the vice chairman, Congressman Wright Patman ................................................................. 3241-3344

Answers by the Chairman of the Board of Governors of the Federal Reserve System to questions submitted during the committee hearings by the vice chairman, Congressman Wright Patman ................................................................. 3345-3418

Material completing the record of part 6 of the hearings—"the Government's Management of its Monetary, Fiscal, and Debt Operations"—3451

Income velocity and interest rates—a pragmatic approach, by Henry A. Latané, University of North Carolina ................................................................. 3435

Statement submitted by Oscar Gass, consulting economist, Washington, D.C. ................................................................. 3444

Letter of Hon. William McChesney Martin, Jr., Chairman of the Board of Governors of the Federal Reserve System, to chairman ................................................................. 3453

Letter and enclosures of Raymond W. Goldsmith, National Bureau of Economic Research, Inc., to chairman ................................................................. 3455

"Private Affluence and Public Poverty," by Horace M. Gray, excerpt from Illinois Business Review ................................................................. 3456

Letters and enclosures of Paul V. Beck, Tulsa, Okla., to chairman ................................................................. 3460

Letter of Nat Goldfinger, assistant director of research, AFL-CIO, to Otto Eckstein, technical director, "Study of Employment, Growth, and Price Levels" ................................................................. 3471

Reply ................................................................. 3477

Letter of David J. McDonald, president, United Steelworkers of America, to chairman ................................................................. 3477

Reply ................................................................. 3479

Letter of Lazare Teper, director, research department, International Ladies' Garment Workers' Union, AFL-CIO, to Otto Eckstein, technical director, "Study of Employment, Growth, and Price Levels" ................................................................. 3480

Reply ................................................................. 3482

Letter of Casimir A. Sienkiewicz, chairman, committee for economic growth without inflation, to chairman ................................................................. 3483

Letter of Jesse W. Tapp, chairman economics policy commission, The American Bankers Association, to chairman ................................................................. 3484
Chapter 5. The nature of inflation, 1955-57

Some phenomena to be explained

Prices, expenditures and output

The pattern of demands

Changes in final goods prices; GNP categories

Industrial prices, wages, and output

Summary

The behavior of wages

Summary

Overhead costs

Factor inputs and unit costs

Consumer prices

Food prices

Service prices

Some implications

Appendix A. Notes and sources for charts and tables

LIST OF CHARTS

Chart 3-1. Relationship between wage changes and unemployment, 1900-1958

Chart 3-2. Relationship between wage changes and unemployment, selected periods

Figure 3. Wholesale price index (finished products)—Comparison of all items in actual index with index if steel prices had risen only as much as average of all other prices ................................................................. 10
### STUDY PAPER NO. 3, "AN ANALYSIS OF THE INFLATION IN MACHINERY PRICES," BY THOMAS A. WILSON

I. A theory of inflation generation as a result of sectoral demand pressure
   The transmission of excess demands to the capital goods sector
II. Empirical analysis of the 1954-58 inflation in machinery prices
   1. Machinery prices and wages and material costs
   2. The behavior of overtime hours worked
   3. Plant and equipment expenditures and capital appropriations
   4. Capacity and output relative to previous peak
   5. Orders data and prices for machinery
   6. Additional evidence suggesting demand pressure hypothesis—movements in prices of machinery compared with movements in steel prices—concentration indexes
      Summary of empirical analysis of demand pressure and machinery prices
III. Machinery inflation over more than one cycle

Study Paper No. 3—Continued

IV. The significance of a capital goods inflation for price level stability and economic growth

1. the direct impact of machinery prices upon two measures of the general level of industrial prices... 54
2. Indirect effect of machinery prices upon other prices
   (i) wage effects 56
   (ii) Current input cost effects 57
   (iii) Capital cost effects 58
3. A capital goods inflation and economic growth 59

V. Conclusions

1. The role of demand pressure 61
2. Machinery inflation over more than one cycle 61
3. More general price implications of the machinery inflation 61
4. The effect of high machinery prices upon growth 61
5. Policy implications 61

STUDY PAPER NO. 5, "TRENDS IN THE SUPPLY AND DEMAND OF MEDICAL CARE," BY MARKLEY ROBERTS

Introduction and summary 47
Chapter 1. Demand for medical care
Total demand 49
Health consciousness 49
Total spending 50
Private demand 52
Total personal consumption spending 52
Family medical care spending 55
Growth of prepayment 56
Health needs of older people 59
Public spending 60
Public support for health and medical care 60
Federal support for research 61
Demand for hospital services 62
Trend to hospitals for health care 62
Hospitalization insurance 62
Utilization by older people 64
Mental illness and chronic diseases 64
Chapter 2. Supply of medical care
Organization of medical services 65
Quality changes in medical care 66
Supply of medical personnel 67
Physicians (medical doctors) 67
Dentists 68
Nurses 68
Other health workers 71
Supply of hospital facilities 72
Increases and shortages 72
Types of hospitals 73
Distribution of hospitals 75
Hospital services and costs 76
Hospital construction 77
Chapter 3. The price index of medical care
Trends 78
Limitations 80
Chapter 4. A look ahead
Expanding demand for medical care 83
Inadequacies of supply 83
Continuing price inflation 84
Providing an adequate supply of medical care 84

STUDY PAPER NO. 7, “THE INCIDENCE OF INFLATION: OR WHO GETS HURT?” BY SEYMOUR E. HARRIS, HARVARD UNIVERSITY, CAMBRIDGE, MASS.

Chapter 1. General summary. 1
Inflation and growth. 2
Kind of inflation. 2
Incidence of inflation on Government. 3
Welfare programs: Old-age insurance. 4
Unemployment compensation. 6
Other income maintenance programs. 7
Mortgages and the inflationary process. 9
Wages, other shares, and prices. 10
Attempts to beat inflation. 11
Some international aspects. 12
Chapter 2. The problem. 12
Chapter 3. Inflation and growth. 14
Introductory. 14
Inflation, a necessary cost of growth? 15
The case for growth. 16
Growth and prices: the historical record. 18
Prices and output—by countries. 20
Prices and per capita output in recent years. 21
Creeping inflation leads to what? 22
INDEX TO STUDY PAPERS

Study Paper No. 7—Continued

Chapter 4. Recent movements of prices and output in individual countries. 23
  The incidence of inflation on Government. 24
  Introductory. 24
  Distribution of tax burdens among different levels of Government. 26
  Percentage of changes in assessed valuation of real and personal property in large cities, 1940–53. 33
  Some empirical material on the responses of taxes to income and price changes. 34
  Inflation and the yield of income tax. 36
  Some conclusions. 37

Chapter 5. Welfare programs and inflation. 38
  Introductory. 38
  Adjustment of benefits to rising prices and incomes. 40
  Raising maximum covered wages. 42
  Minimum and maximum benefits and prices. 43
  Increased benefits through increased coverage of family members. 46
  Old-age assistance and other assistance programs. 48
  Some comments on old-age insurance and assistance. 55

Chapter 6. Unemployment compensation. 56
  Introductory. 56
  Conclusion. 65

Chapter 7. Income maintenance payments with particular reference to veterans' programs. 66
  Workmen's compensation. 66
  Long-term commitments. 68
  Veterans' benefits. 69
  Pension funds. 74

Chapter 8. Assets and inflation. 76

Chapter 9. Mortgages, installment payments, and the inflationary process. 80

Chapter 10. Wages, other shares, and prices. 83
  Introductory: the causes of inflation. 83
  Relation of price movements and other variables. 86
  Some historical evidence. 88
  Teachers. 89
  Productivity, prices, and wages. 91
  The share going to labor. 96
  Inflation and depreciation. 98
  Prices and wages in cycles. 99
  Conclusion. 103

Chapter 11. Attempts to beat inflation. 104

Chapter 12. Some international aspects. 109

STUDY PAPER NO. 12, “THE LOW INCOME POPULATION AND ECONOMIC GROWTH,” BY ROBERT J. LAMPMAN

Chapter I. Introduction and summary .................................................. 3
  Introduction .................................................................................. 3
  Summary ..................................................................................... 4
Chapter II. Who are the low-income people? .................................... 5
  Numbers below a selected income level ..................................... 5
  Composition of the low-income group ....................................... 5
    Size of consumer unit ............................................................. 6
    Age ...................................................................................... 6
    Rural-farm residence ............................................................. 7
    Nonwhite color ..................................................................... 8
    Southern region ..................................................................... 8
    Consumer units headed by females ....................................... 8
    Educational attainment of family head .................................. 9
    Employment status and occupation of family head ............... 10
    Industry of family head ......................................................... 10
  Summary statement on composition of low-income population .. 11
Chapter III. How has the low-income problem changed in 10 years? 13
  Smaller share of population in low-income status ................. 13
  Process by which change occurred ........................................... 14
    Factors encouraging increase in number of low-income persons 14
      Change among consumer-unit size groups ......................... 14
      Change in age ................................................................... 15
      Changing participation in employment ............................. 15
    Factors encouraging reduction of low-income units ............ 21
      Summary of changes ......................................................... 23
Chapter IV. The future of the low-income problem ....................... 24
  Projections for the future of numbers in low-income status ...... 24
  Will reduction of poverty be slower in the future? ................. 24
  Evaluation of the Galbraith thesis ........................................... 25
  What groups do not benefit by economic growth? ................. 26
  Low-income group's share of income .................................... 28
  Changes in economic inequality ............................................. 29
  Government policy toward inequality ................................... 30
  Possibilities for the future ....................................................... 30
  A program to hasten the reduction of poverty ....................... 31
Appendix. How many low-income persons are there in the United States? ................................................................. 33
  Alternative estimates ............................................................. 33
    Number under $2,000 minimum ......................................... 33
    Minimum income varying with family size ......................... 34
    Income defined as personal income ................................... 35
    The range of estimate ......................................................... 36

TABLES

Table 1. Distribution of low income persons by family size, based on minimum income varying with family size, 1957 ............. 6
Table 2. Distribution of families with income under $2,000 and unattached individuals with income under $1,000, by age of head, 1957 ............... 8

STUDY PAPER NO. 16, "INTERNATIONAL EFFECTS OF U.S. ECONOMIC POLICY," BY EDWARD M. BERNSTEIN

Chapter I. Summary and conclusions. 1
The United States and the world economy. 1
Trade and investment. 3
Aid and Government expenditures abroad. 5
Economic policy and international objectives. 6
Chapter II. The United States in the world economy. 7
Role of the United States. 7
United States and world trade. 9
Importance of other areas. 12
Service transactions. 13
Investment, aid, and Government expenditures. 14
U.S. payments and transfers. 15
Chapter III. Fluctuations in prices and production. 17
Fluctuations in prices. 17
Fluctuations in production and employment. 20
Stabilizing effect of the world economy. 22
Responsibility of individual countries. 24
Chapter IV. Economic growth and world payments. 26
Growth in the United States and other regions. 26
Capital, technology and growth. 29
Increase in trade and investment. 31
Payments effects of economic growth. 33
Chapter V. International trade policy. 36
U.S. reciprocal trade policy. 36
Restrictions and discriminations. 38
Regional preferences and multilateral trade. 40
Future trade policy. 42
Chapter VI. Food and raw materials problems. 44
Surplus disposal program. 45
Agricultural import policy. 47
Long-term position of primary products. 48
Fluctuations in prices of primary products. 52
Stabilization of prices and export receipts. 54
Chapter VII. U.S. private foreign investment. 55
Direct investment. 56
Portfolio investment and other private credit. 59
International Bank for Reconstruction and Development. 61
Cyclical fluctuations in capital flow. 61
Restraint on foreign investment. 65
Chapter VIII. U.S. aid and Government expenditures. 67
International payments through Government account. 67
U.S. military expenditures and military grants. 69
Economic aid and Government loans. 71
Exports and aid. 74
Chapter IX. The problem of monetary reserves. 76
Geographic distribution of monetary reserves. 77
Reserve position of the United States. 78

INDEX TO STUDY PAPERS

STUDY PAPER NO. 17, "PRICES AND COSTS IN MANUFACTURING INDUSTRIES," BY CHARLES L. SCHULTZE AND JOSEPH L. TRYON

I. Introduction
   Basic method ........................................ 3
   Food and kindred products .......................... 6
   Data and statistical methods used .................. 7
   Warnings on the use of the unit cost indexes ...... 8

II. The pattern of changes in output, prices, and costs
   Output .............................................. 10
   Prices and costs .................................... 15
   Unit labor costs, average earnings, and demands 39
   Wages, productivity, and unit labor costs .......... 42
   Unit labor costs and "product mix" ................ 45
   Prices and costs in recession and recovery ....... 46
   Summary of conclusions ............................ 52

Appendixes:
   Appendix A. Sources of data and derivation of basic series for cost indexes .......... 54
   Wages and salaries ................................. 54
   Net business income ............................... 54
   Capital consumption allowances .................... 55
   Indirect business taxes ............................ 55
   Index of physical output .......................... 56
   Appendix B. The adjustment of aggregates to convert from a company reporting basis to an establishment reporting basis 56
   Table B-1. Percent of gross product originating subtracted from and added to each industry to shift the basic series from company reporting basis to establishment reporting basis, 1954 .... 58

TABLES

Table 1. Percent of total change in manufacturing output contributed by various industries .................. 14
Table 2. Unit cost indexes for all manufacturing except petroleum and coal products ..................... 17
Table 3. Point contribution of each industry to unit cost index for all manufacturing ...................... 18
Table 4. Year to year changes in points of manufacturing industries in unit and cost index for all manufacturing .............................................................. 19
Table 5. Cost indexes for manufacturing industries ................................................................. 20
Table 6. Percent changes in prices, component costs per unit, gross margins, and output in manufacturing, 1948-56 ................................................. 32
Table 7. Relationship of changes in demands, unit labor costs and gross margins, 1948-56 ......... 34
Table 8. Consistency of actual behavior with expectations, 19 manufacturing industries, 1948-56 .... 35
Table 9. Relationship of change in employment to change in average hourly earnings of production workers ................................................................. 40
Table 10. Relationship of changes in output to changes in average hourly earnings of production workers ................................................................. 40
Table 11. Relationship of changes in employment to change in average annual earnings (wage and salary workers) ..................................................... 42
Table 12. Percent changes in compensation per employee, output per man-hour, and unit labor costs, manufacturing industries, 1948-56 .......... 43
Table 13. Comparison of unit labor costs, average compensation, and productivity, 15 manufacturing industries, 1948-56 ................................................. 44
Table 14. Comparison of productivity, average compensation, and unit labor costs, 15 manufacturing industries, 1948-56 ................................................. 44
Table 15. Comparison of 2 indexes of unit labor costs, all manufacturing industries ........................ 46
STUDY PAPER NO. 17—Continued

Table 16. Changes in various prices in postwar recessions .................. 47
Table 17. Changes in prices and unit costs in postwar recessions, manufac-
    turing industries .................................................... 49

    declines and recoveries in output .................................. 51

STUDY PAPER NO. 18, "NATIONAL SECURITY AND THE AMERICAN 
ECONOMY IN THE 1960's," BY HENRY ROWEN

Acknowledgments ______________________________________________________ 1
Summary ______________________________________________________ _________ 1

PART I. OUR SECURITY PROSPECTS IN THE 1960's

A. Our major military objectives ........................................ 8
   Deterring direct attack on the United States ....................... 9
   Limiting damage and obtaining best war outcome if deterrence 
   fails ............................................................................. 13
   Defense of major allies ................................................. 17
   Defense of other allies and of the free world ....................... 18
B. The evolution of U.S. postwar military policy—challenge and response. 20
   The strength of Russian ground forces ................................ 20
   The nuclear breakthrough and beginnings of strategic air power .. 21
   The development of thermonuclear weapons and advances in 
   rocketry ........................................................................ 24
C. The future of general war .................................................. 26
   The world annihilation view .......................................... 26
   The mutual suicide view .............................................. 29
   The deterrence-plus-insurance view .................................. 37
   The extended deterrence view ....................................... 40
   The massive retaliation view ....................................... 43
D. The direct defense of peripheral areas .................................. 45
   Dependence on tactical nuclear forces .............................. 45
   Establishment of independent nuclear forces ..................... 48
   Use of nonnuclear forces .............................................. 51
E. The arms race and its control ........................................... 53
F. Outline for a defense policy ............................................. 60

PART II. DEFENSE AND THE ECONOMY

A. How much defense should we buy? ..................................... 63
   Budget first versus strategy first .................................... 64
   A balanced view ...................................................... 65
   How much defense can we stand ..................................... 68
   Allied defense budgets ............................................... 71
B. The significance of GNP for war ....................................... 72
C. Implications of Communist growth ................................... 75
D. Some alternative budget trends ........................................ 77

STUDY PAPER NO. 19, "DEBT MANAGEMENT IN THE UNITED STATES," 
BY WARREN L. SMITH

Summary ................................................................. 1
Chapter I. The Federal debt in perspective .............................. 17
   Introduction ............................................................ 17
   Budget and debt accounts .......................................... 18
   The Federal Reserve and debt management ....................... 24
   Net claims against the Federal Government ..................... 26
   Debt management and monetary policy ............................ 27
   Changes in the public debt since World War II ................. 28
   Appendix to Chapter I: The economic significance of the trust funds 40
Chapter II. Present debt management techniques ..................... 43
   Regular bill financing .............................................. 43
   Tax anticipation financing ......................................... 44
   Other cash offerings ................................................ 46
Study Paper No. 19—Continued

Refunding operations
Concluding comment
Chapter III. Recent debt management experience and problems
Survey of recent debt operations
The competitive position of Government securities
Other recent problems
Chapter IV. Economic effects of debt operations
Interest cost to the Treasury
Effects on the level of private expenditures
Debt management as a species of selective control
The outstanding debt as an automatic stabilizer
Combining interest cost and stabilization effects
The handling of budget deficits and surpluses
Appendix to chapter IV
Chapter V. Federal Reserve open market operations
An evaluation of the bills-only policy
Advantages of a more flexible open market policy
Conclusion
Chapter VI. Some suggestions concerning debt management policy
A suggested approach to debt management
Relation of debt management to other policies
Possible innovations in debt management technique
The interest rate ceiling

STUDY PAPER NO. 20, "THE POTENTIAL ECONOMIC GROWTH IN THE UNITED STATES," BY JAMES W. KNOWLES

PART I

Chapter I. The nature and significance of potential economic growth 1
The Employment Act goals 2
A dynamic economy 4
Economic growth 4
Current economic performance 5
Potential output versus capacity 6
The rate of employment 8
The measurement of potential growth 9

Chapter II. The determinants of potential economic growth 11
Supply, demand, growth, and output 11
Capacity and growth 12
The production function 13
Production in the individual plant versus the total economy 13
The design of an aggregate production function 16

Chapter III. The statistical analysis of output 19
The variables and their measurement 19
Three transformations 22
Fitting the production function to the historical data 28
The final equation 31
Interpreting the production function in economic terms 33
Potential output: 1909-60 35

Chapter IV. Potential growth: Prospects and problems 38
Alternative assumptions: 1959-75 38
The alternative projections 40
Implications of the projections 43

PART II

Technical materials 45

   G. Policies to strengthen long-term growth ....................................... 31

VI. The problems of American agriculture ............................................. 32

Chapter 2. Economic Growth in the Long Run

I. The measurement of economic growth ............................................. 33
II. The long-run record of growth ..................................................... 34
   A. The growth of output ............................................................ 34
   B. The growth of consumption ..................................................... 34
   C. The rate of growth of output has been uneven ................................ 34
   D. The allocation of growth: Uses of GNP ........................................ 38

III. Factors in our growth .............................................................. 40
   A. The growth of supply versus demand ......................................... 40

IV. The long run growth of supply .................................................... 41
   A. Expansion of labor force ......................................................... 41
   B. Shortening number of hours of work ......................................... 41
   C. Rising productivity .............................................................. 44
   D. Capital ..................................................................................... 44
   E. The rising quality of the labor force ......................................... 45
      1. Education ............................................................................. 45
      2. Increasing skills ................................................................. 47
      3. Improving health .................................................................. 47
   F. Technological progress ............................................................ 48
   G. Resources ............................................................................... 48
   H. Interindustry shifts ................................................................... 50
   I. Concluding comment on the long-run increase in the supply of output ........................................................................ 50

V. The long run growth of demand ....................................................... 50

VI. Longrun policies for growth .......................................................... 52
   A. Provision for an adequate growth of demand ............................... 53
   B. Improvement of the labor force: The potential of education .......... 53
   C. Improvement of the labor force: Health ....................................... 56
   D. Maintaining the rate of productivity advance: Facilitating the introduction of new technology ................................................................. 56
   E. Maintaining the rate of productivity advance: Raising skills ........ 58
   F. The promotion of science and technology ..................................... 59
   G. Accelerating the accumulation of capital ..................................... 63
   H. Resource policy ........................................................................ 64
   I. Strengthening the competitiveness of the economy and improving the allocation of resources ................................................................. 64
   J. Preservation of a stable political and economic system ................. 65
   K. Encouragement of individual initiative ......................................... 65
   L. Provision of public services and investments ................................ 65

Chapter 3. The Slowing Down of the Economy During Recent Years

I. Introduction .................................................................................... 67
II. The magnitude and cyclical characteristics of the decline in growth .... 67
III. Further evidence of weakness: underutilization of labor and capital .. 70
   A. Capital ..................................................................................... 70
   B. Labor ..................................................................................... 71
   C. Underutilization of labor and capital in the 1958-59 recovery ....... 74
INDEX TO STAFF REPORT

IV. Causes of the decline: Trouble in the goods sectors

A. Why growth slowed down at the end of 1955

B. The shift toward service

1. Demographic changes

2. The erosion of the growth of consumers purchasing power

(a) The growth of disposable income has slowed down

(b) Service expenditures as family overhead costs

C. Summary of trouble in the goods sectors

V. Results of the trouble in the goods sector: Underutilization and slowed growth of productivity

A. The absorption of labor by the services and trade sectors

1. Was labor pulled into services and trade by demand

2. Services as a sponge for labor

3. Meaning of shift for growth

B. The decline in the growth of aggregate productivity

1. The effect of labor shifting between sectors

2. The behavior of productivity between sectors

C. Summary of analysis of productivity growth

VI. Summary and policy implications

A. Summary

B. Policy implications

Chapter 4.—Potential Growth

The determinants of potential economic growth

1. Labor

2. The stock of capital

3. The age of capital

4. All other variables

The potential economic growth to 1975

Chapter 5.—The Postwar Inflation

The historical record

Some problems of the price indexes

The gains and losses from inflation

The distribution of income

The distribution of wealth

The volume of real output and its rate of growth

Theories of the inflationary process

Demand-pull inflation

Market-power inflation

Structural inflation

The complex real world

The Product market

Manufacturing

Steel

Machinery

Other manufacturing

Construction

The Service industries

The diverse nature of the Service industries

Medical care

Unskilled services

Skilled services

Summary

The labor market:

The movement of industrial wages

The structure of wages

Wage trends in nonmanufacturing industries

Wage “patterns” in the postwar period

Developments during 1955-58

General conclusions

Summary
## Chapter 6.—The Problem of Unemployment

**Introduction**

- The historical record
- Long-term trends
- Postwar experience
- Effect of recessions
- Unemployment in prosperous times
- Unemployment of long duration
- Who are the unemployed
  - By age
  - By sex
  - By major occupation group
- Unemployment a growing problem
- Structural unemployment rising

**Chronically depressed areas**

- Major areas with chronic labor surpluses
- Causes of chronically depressed conditions
- Outlook for depressed areas
- Difficulties of business revival

**Long-term unemployment not merely a problem of depressed areas**

**Policies for dealing with unemployment**

- Reduction of frictional unemployment
- Policies for cyclical unemployment
- Policies relating to structural unemployment
  - (a) Relocation of workers
  - (b) Training and retraining workers
  - (c) Income maintenance for persistent unemployment
  - (d) Aid for chronically depressed areas

**Federal policy: What has been done?**

**State and local efforts**

**Outlines of Federal policy for depressed areas**

## Chapter 7. The Problems of American Agriculture

**Introduction**

- I. The problems of overproduction
- III. Falling farm incomes
- II. The stability of farm incomes
- IV. Poverty in agriculture
- V. The accumulation of surpluses and the drain on the Federal budget
- VI. Agriculture and the price level
- VII. Policies for American agriculture

**Policies for dealing with overproduction and falling farm incomes**

**Policies for low-income farmers**

## Chapter 8. Fiscal Policy

**I. Fiscal policy and the Employment Act's objectives**

- A. Dimensions of fiscal policy
  - 1. Short-run economic stabilization
  - 2. Secular focus on economic growth
- B. Constraints against the use of fiscal policy to achieve the Employment Act's objectives
- C. The mechanics of fiscal policy
  - (1) Basic budget-income relationships
  - (2) Differences in effects on income of different types of expenditures and revenue sources
  - (3) Built-in fiscal stabilizers
  - (4) Repercussions of fiscal developments on monetary conditions
  - (5) The impact of Government orders on economic activity
INDEX TO STAFF REPORT

II. The record of postwar fiscal policy

A. The stabilization record

1. Postwar reconversion and expansion: 1946–48
   (a) Reconversion: 1946
   (b) Expansion: 1947
   (c) The 1948 boomlet and tapering off
   (d) Overall appraisal of fiscal policy, 1946–48

2. The recession of 1949

4. The 1953–54 recession

   (a) Recovery in 1954
   (b) The 1955 boom

6. Inflation on the level: 1956–57

7. Recession again: 1957–58

B. Secular changes in the Federal fiscal framework

1. The decline in fiscal restraint

2. The change in mix of fiscal and monetary policies

3. Secular trends in the Federal tax structure

4. Implications of secular trends in Federal expenditures for economic stability

III. Improving Federal fiscal policy for economic growth and stability

A. Increasing the contribution of Federal fiscal policy to economic stability

B. Changes in the framework of Federal fiscal policy in the interest of a higher rate of growth

Chapter 9. Monetary Policy and Debt Management

I. Monetary policy and debt management since 1946

A. Preaccord monetary debt policy

   The wartime background
   The immediate postwar situation
   Monetary-debt policy in 1947–48
   The 1949 recession
   Recovery and the beginning of the Korean war
   The Treasury-Federal Reserve controversy and the Douglas committee report

B. Monetary-debt policy since the Treasury-Federal Reserve accord

   Immediate postaccord policies
   The 1950 boom in residential construction
   Monetary policy in 1951–52
   The 1953 changes in open-market policy: the adoption of bills only
   The new administration’s attitudes toward debt management
   Monetary-debt policies in the first half of 1953
   The recession of 1953–54
   Debt management during the recession
   Easy money and the expansion in residential construction
   The beginning of restrictive monetary policy in early 1955
   Residential construction in 1955–57
   Consumer credit and the automobile boom in 1955
   Monetary and economic developments during 1955–57
   Commercial bank adjustments, 1955–57
   Fiscal policy and debt management in 1955–57
   The recession of 1957–58
   The beginning of recovery in 1958
   Debt management in 1957–58
   The speculative episode of mid-1958
   Interest rate adjustments in 1958–59
   Monetary policy in 1958–59
   Summary of monetary-debt policy since the accord
II. Some limitations on the overall effectiveness of monetary policy 

A. The effects of commercial bank portfolio adjustments 
B. Adjustments in corporate liquidity 
C. Effects of financial intermediaries on velocity 
D. Changes in holdings of Treasury securities by investor groups 
E. Other offsets to monetary controls 
F. Why can't induced velocity changes be offset? 

1. Need to keep the financial market on an even keel 
2. Debt management problems 
3. Uncertainty 
4. Uneven incidence of monetary policy 

Summary of limitations on overall effectiveness of monetary policy

III. The effect of general credit controls on the major sectors of the economy

A. Residential construction 
B. Business plant and equipment expenditures: General 
C. Plant and equipment: Public utilities 
D. Effects on small versus large firms 
E. State and local government expenditures 
F. Consumer durable goods 
G. Inventory investment 
H. Lags in monetary policy 
I. Concluding comment 

Summary

IV. Possibilities of making monetary policy more effective

A. Policies directed at stable growth of output 
1. Increasing the influence of the interest rate 
2. Other possibilities 
Consumer durable goods 
Inventory investment 
Residential construction 

Summary

B. Monetary policy and inflation

C. Alternative proposals for monetary policy 
1. Steady growth of the money supply 
2. Continuation of present policies 

D. Techniques and administration of monetary controls 
1. The discount rate 
2. Reserve requirement changes 
3. Open market operations 
4. Administrative arrangements 

Summary of suggestions for making monetary policy more effective

V. Debt management

The size of the debt 
Interest cost of the debt 
Volume of debt operations 
Composition of the debt 
Ownership of the debt 
1. Investors whose holdings have declined steadily 
2. Investors whose holdings have increased steadily 
3. Investors whose holdings have fluctuated substantially 
The competitive position of Government securities 

Principles of debt management

1. Interest-rate effects 
2. Liquidity effects 

Interest cost of the debt as a policy consideration 
Combining economic stabilization and cost minimization 
Present debt management techniques 
Bill financing 
Fixed-price issues 
Underwriting of short-term cash offerings 
Refunding operations
V. Debt management—Continued

A program for improved debt management

Reducing the magnitude of the problem

1. Less restrictive monetary policy
2. A better “mix” of monetary policies
3. Greater reliance on selective credit controls
4. Open market operations versus reserve requirement changes

Possible improvements in debt management

1. Auctioning of longer term securities
2. Frequent small offerings
3. Regularizing debt operations
4. More effective underwriting
5. Better selling organization
6. Elimination of erratic fluctuations in bond prices
7. Advance refunding
8. Call features
9. Purchasing-power bonds

The interest-rate ceiling

Summary concerning debt management

Chapter 10.—Public Policy and Market Power

Three alternative approaches

Policies to reduce market power and increase competition

Antitrust action

Recommendations for strengthening antitrust

Reductions of tariffs

The antitrust laws and labor unions

Policies to encourage businessmen and labor to restrain their use of market power

Greater Government participation in the price-wage setting process

Summary

Chapter 11. U.S. Position in the World Economy

Introduction

The postwar behavior of the U.S. balance of payments

1. The accounting framework

2. An overall view of the postwar record 1946–58

The U.S. overall payments balance

The gold drain

The export balance

Net governmental expenditures abroad

Private capital balances

Errors and omissions

Net private capital flows

Net Government capital outflows

Summary of changes in the items in the balance of payments

Some relationships among the items in the balance of payments

The U.S. trade position in the postwar period

1. The overall behavior of the trade balance

2. The U.S. share of world trade

3. Distribution of U.S. merchandise trade by area, 1946–58

4. Distribution of U.S. merchandise exports by kind, 1946–50

5. Changes in the market shares of U.S. exports

Wage-price comparisons

The special case of steel

The financial structure of U.S. private foreign investment, 1946–58

U.S. foreign investment in the postwar period

The value of U.S. direct foreign investments, 1950–58

U.S. Government foreign expenditure balances

Economic grants

Government net capital outflow

U.S. military expenditures abroad

Defense expenditures abroad for goods and services by major category
The impact of inadequate international liquidity upon the U.S. balance of payments

The impact of transitory factors upon the U.S. balance of payments, 1947-58

Other special factors of major importance

The growth of regionalism

Review and discussion of the findings

1. The gold outflow
2. U.S. export competitiveness
3. The problem of international liquidity
4. The alternative
5. The functions and problems of a key currency nation
6. The problem of international liquidity
7. The problem of regionalism
8. Conclusions

Charts

Chart 2-1 Aggregate gross national product—Current and constant (1929) prices
Chart 2-2. Real gross national product (1929 prices)—Aggregate and per head
Chart 2-3. Personal consumption expenditures (1929 prices)—Aggregate and per full consumer
Chart 2-4. GNP and its allocation
Chart 2-5. Persons engaged, 1929=100
Chart 2-6. Average weekly hours—Production workers, manufacturing
Chart 3-1. GNP in constant (1954) dollars, index numbers
Chart 3-2. Capacity and output in manufacturing, 1948-59
Chart 3-3. Unemployment rate, 1946-59 (quarterly, seasonally adjusted)

INDEX TO COMMITTEE REPORT

REPORT OF THE JOINT ECONOMIC COMMITTEE (S. REPT. 1043)

Introduction .............................................................................................................. 1
Conclusions ................................................................................................................. 2
Policies ......................................................................................................................... 4
I. The Nation's economic objectives
   Economic growth ....................................................................................................... 7
   High and stable rate of employment ......................................................................... 9
   Stability in the general level of prices ..................................................................... 9
II. Past performance and future potential of the U.S. economy
   The record on growth .............................................................................................. 11
   Employment ............................................................................................................ 13
   The recent behavior of prices .................................................................................. 15
   Our growth potential ............................................................................................... 16
III. Fiscal policy .......................................................................................................... 19
IV. Monetary policy ..................................................................................................... 29
   The purpose of the Treasury-Federal Reserve accord of 1951 ................................... 29
   Policies since the accord ......................................................................................... 29
   Reasons for the shortcomings ................................................................................. 30
   A broader range of monetary tools ......................................................................... 32
   Expansion of money and credit for longrun growth ................................................. 33
   Truth in the cost of money ....................................................................................... 34
   Summary of policy recommendations ..................................................................... 34
V. Debt management .................................................................................................... 35
   Introduction .............................................................................................................. 35
   Recommendations for improved debt management .................................................. 36
   The interest rate ceiling ......................................................................................... 36
VI. Policies to improve the structure of the economy
   Reducing the exercise of market power .................................................................... 49
   Strengthening antitrust policy .................................................................................. 50
   Reduction of tariffs .................................................................................................... 52
   Patents ....................................................................................................................... 53
   Voluntary restraint .................................................................................................... 53
   Government participation in key price-wage decisions ................................................. 53
   Other changes to improve the structure of the economy ............................................. 54
VII. The farm problem ................................................................................................... 55
     Program for commercial agriculture ....................................................................... 56
VIII. America's changing position in the world economy
     The causes of the balance-of-payments deficit ......................................................... 59
     Recommendations .................................................................................................. 60
Note by Senator William J. Fulbright ........................................................................... 61
Supplemental views of Representative Wright Patman .................................................. 63
Minority views .............................................................................................................. 73
Additional views of Senator John Marshall Butler ......................................................... 93
Additional views of Senator Jacob K. Javits .................................................................. 135

APPENDIXES

Text of S. Con. Res. 13 ............................................................................................. 143
Hearings, study papers, and reports prepared under Study of Employment, Growth, and Price Levels ................................................................. 145
Recommendations of the American Bankers Association Advisory Committee to the Treasury, 1952–59. (Excerpt from Hearings, pp. 1221–1228.) ................................................................. 149

CHART

Unemployment rate, seasonally adjusted, January 1948 to date ......................... 14
TABLES

Table 1.—Difference in gross national product in selected years if the economy grows at 2.5 percent, 3.5 percent, or 4.5 percent.  
Table 2.—Comparative rates of growth of gross national product in the United States by varying periods.  
Table 3.—United States of America compared with other advanced countries—annual average growth rates.  
Table 4.—Selected indicators of economic growth potentials, 1959-75.  
Table 5.—U.S. average annual growth rates, 1909-59.  
Table 6.—Disposition of advice of the American Bankers Association to the Treasury with respect to new issues, 1952-59.  
Table 7.—Reductions in member bank reserve requirements and comparisons with equivalent open-market purchases by Federal Reserve System, July 1, 1953, to December 31, 1959.
