1/ From Biennial Reports of the Superintendent of Banks, except payments fund in the first 17 cases from other worksheets (from data in Supl. office).
2/ Computed from percentage and amount of dividends for banks for which these data are available. For other banks taken as deposits at time of failure. ~~For other banks~~ ^{For other banks} ~~less offset and deductions~~ ^{where this figure is given which is only for ~~total~~ part of the banks for which deposits were paid in full by the fund.} Figures in this column not to be used for first 17 banks (i.e. those paid in full by fund).

3/ For banks with guaranteed deposits paid in full (or 50%) by fund. Loss to fund from worksheets in Superintendent of Banks office. See other worksheet. For other common claims, estimated from recoveries data published in the Biennial Reports of the Superintendent of Banks, as follows: (a) for banks with 75 and amount of dividends paid reported, total common claims estimated from these figures, and loss or difference, except in a few cases where total claims thus estimated are smaller than guaranteed deposit claims for which the latter are substituted; (b) for banks with no dividends paid to date or formal liquidation, total common claims estimated as deposits at date of suspension less preferred claims paid, because the preferred claims appear to be for accounts regarded as deposits at date of suspension, and total common claims against unpaid (though some may have been paid by offset); (c) for banks fully liquidated by mid-1934, for which final statement shows unpaid deposit liability, this figure is used as loss, on assumption that amount shown as paid includes any paid by offset or as preferred claims (in these cases the percentage dividend paid is not given); (d) in a few cases where bank was targeted for private liquidation, total common claims estimated as deposits at date of suspension less preferred claims paid and ~~percentage~~ loss estimated from the percentage loss shown on guaranteed deposit claims; (e) in a few cases with no dividends, where method (b) gives a total common claims figure less than the guaranteed deposit claim, the latter plus "common claims allowed" as shown in the statement in the 1934 report is used as total common claims and therefore as the loss or amount not paid by bank.

4/ Computed as difference between C.I.s issued and dividends from liquidation, as shown on other worksheet

Data from Biennial Reports of Superintendent of Banks, or computed

Re Fairburn - Both total deposits and dividends paid as shown in the 1930 report, are less than the C I's issued and the dividends paid thereon as shown by the guaranty fund records prepared for payment of the two fund dividends. Hence the ~~latter~~ ^{are} ~~data~~ ^{substituted} larger amounts, thus assuming no common claims except the guaranteed deposits.

Re Sioux Falls - International State Bank. The ^{amount of} dividends paid shown in the 1938 report is less than the amount paid on C I's issued as shown by the guaranty fund records (which show 30%), and the total common claims as estimated from the 1938 report data looks too small as compared with the deposits at suspension as shown in the 1934 report. Hence the larger dividend figure, at the amount of C I's issued are substituted, thus assuming no common claims except the guaranteed deposits.

Re Egan. The first report after closing (in the 1924 report, p. 82) shows total liabilities (not counting capital accounts or amount due the Depositors Insurance Fund) of \$161,913.98, of which \$25,718.51 was bills payable. Apparently, the latter was included as deposits in some subsequent reports, but not the one showing the first dividend.

Re Wagner. 45% paid, with amount of \$56,818.66, ~~before~~ as shown in 1930 report, before turned over to local liquidator, these figures being used to compute the total common claims. But other worksheet shows 55% paid on C.I.'s issued, so 10% presumed paid ~~for~~ later and added to former amount paid, and loss estimated accordingly.

Re Agnew. Data in 1932 Biennial report are inconsistent with data re kindred on guaranteed deposits from other worksheet. Use of percentage dividend shown for guaranteed claims gives a figure very close to ~~that~~ the revised figure here, which is an assumption of clerical error in the data in the 1932 report.

Re Tulare. Data are inconsistent - in that loss on all deposits appears to be smaller than loss on guaranteed claims. But difference is so small that no attempt at correction is made here.

Re Albee. Deposit liability estimated for 1932 kindred is smaller than C.I.'s issued. Hence total common claim estimated for deposits at suspension is prepared claim paid.

Re. Henry Amount of dividends shown in 1934 report is less than amount shown on other worksheet as paid on C.I.'s issued.
Percentage paid on C.I.'s (1.7%) is therefore used to estimate total ~~payments~~ ^{dividends}, and loss computed accordingly.

Re Kimball - Only guaranteed deposit to be included in calculation.

Location	Name	Percentage dividend paid creditors	Amount dividends paid creditors	Reason for failure (common disbursements) (not paid by bank)	Estimated total common claims	Less (20.15% paid by bank) by bank deposit	Less on unguaranteed common claims	Preferred claims paid	Bills payable and rediscounts paid	Biennial Report - year and page

1 From "Register of guaranty fund dividend checks" - ^{except fund dividend from} ~~per~~ large volumes in office of the Superintendent of Banks (data transcribed by Cw Sept 17-18, 1936). Register also shows for each depositor the "dividend paid by bank" - but this column is not totaled. Original totals dated about the time of the 3 1/2% dividend, are shown and also revised totals after additional entries to about 1938.

2 Cases marked "not shown" are presumably those in which receiver paid no dividend. ^{but other banks} ~~At least~~ this is verified in the Bank of Hevick (First State Bank of Hevick) for which final figures on liquidation payments are given in the 1936 Report of the Superintendent of Banks, p. 230. Also by fact that the 3 1/2% was computed on the unpaid balance. Consequently, the full "original amount" has been entered here in the "Unpaid balance" column. In most cases this is also confirmed by the total of the "original amount" also being marked "not".

3 Amounts transcribed are after deduction of checks for less than 25¢ that are noted as "reverted." There are two entries for reverted items: one for checks of 10¢ and under, entered below the original totals and not dated; the other for checks of 11¢ to 24¢ inclusive, and noted as "Reverted May 1939." The latter entry is below the last total shown and has been deducted by Cw. In a few cases other items have also been entered as reverted in 1939 and have also been deducted by Cw. For first 17 banks, amounts shown are payments by the fund - full amount of guaranteed deposits in the first 16, and 50% in the Fort Pierre bank.

4 Figures entered from register. ^{in "original amount" column} For cases checked & the same figure is shown in an undated summary worksheet under the heading "C.D.'s issued." In cases where the latter figure differs it is entered under the column with this heading. Fort Pierre amount from court case (see bottom of this sheet).

5 From "Register of guaranty fund dividend checks" - ^{stamped "guaranty fund dividend checks"} three large volumes in office of the Superintendent of Banks (data transcribed by Cw Sept 19, 1936).

6 From "Register of guaranty fund dividend checks" - ^{showing final dividend checks} Differences from amounts in register for the 3 1/2% dividend ^{in apparently} ~~are~~ ^{due to omissions of} claims on which the dividend would be less than 23¢. [Note: if explanation is found in minutes, this note will be amended.]

7 Figures for the failures prior to April 1923 are for banks paid in full or 50% from guaranty fund and headings in the boxes do not apply. Data for these 17 banks - amount of dividends, amount repaid to fund or subrogated claims, and loss - are from undated summary worksheets in office of Superintendent of Banks. See notes.

8 From undated summary worksheet (apparently prepared about 1938 - see notes re these worksheets). These figures presumably refer, respectively, to dividends by receivers to the holders of certificates of indebtedness (i.e. on guaranteed deposits), and to the loss on the guaranteed deposits after dividends by both the receivers and the guaranty fund. **Added note. Corrected figures for a few banks (original crossed out in red)** are cases where additional dividends were paid subsequent to 1938 & as shown by data in the 1938 and 1940 & 1942 biennial reports (see page reference to first report in other worksheets).

9 ^{figures} ~~figures~~ and original ink figures after mid-year 1936 from FR. Ink figures for the first three banks, and inserted ink figures for others are from minutes of the Depositors Guaranty Fund Commission. ^{check indicates Commission minutes show same date as FR.}

10 Deposits at date of closing are from the biennial report of the Superintendent of Banks for 1934, pages 105-359, except for those showing an earlier year in the marginal column, which are from the following reports: 1932, pp.

Re State Bank of Winifred
In case reaching ^{State} Supreme Court, 224 NW 770 - opinion shows that bank was reorganized as Bank of Winifred, ^{which made} ~~with~~ payments to depositors of old bank as was remitted as follows:
\$200,000 in assets from the State Bank of Winifred (with agreement fund would pay balance in cash.)
85,000 in cash from fund Dec. 1, 1922, but bank claimed an additional \$57,417.62 which was disputed in court and sustained.
12,500 " " " " Dec. 18, 1930, on judgment - due as of Dec. 1, 1922
12,833.90 by offset against " " ^{against a deposit in Bank of Winifred to credit of guaranty fund commission [bearing \$32,183.72 still due on judgment]}
410,333.90
32,183.72 - ordered paid by State Supreme Court decision ^(dated 11/15/32) with interest ^{(at 5% interest after Dec. 1, 1922), which circuit court had computed at \$21,372.11} prior to general final distribution of guaranty fund to certificate holders, and presumably paid soon thereafter.
442,517.62
31,372.11 - interest as computed by circuit court to May 10, 1930 - presumably paid after 11/15/32 before final distribution of balance in 9-1.
463,889.93
22,874.11 - balance to make up total as shown in dept record (over). ^{Additional interest (about 2 1/2 yrs) at 5%, would be about \$4000.}
486,764.04 - total as shown over

This raises question about recovery of fund. Should \$300,000 be added to amount derived from Dept. record?
Re Pierre - Court case State v. Smith, 206 NW 233, states that certificates of indebtedness issued were \$507,993.01, ^{case of State v. Smith, 234 NW 764, gives} and the amount of payment thereon as \$254,025.

Re Zell. Data ^{as entered} is inconsistent with the percentage paid, and with the data re results of
liquidation published in the biennial report of 7th Sept. It appears that the two figures must have
been interchanged.

Federal Reserve Act shows re
Kimbell: Kimball State Bank
Closed 11-27-25 with deposits of \$289,000
Reopened 5-15-26.

But for guaranty fund data tabulation only the
deposits consistent covered by guaranty -
presumably those not assigned by
Kimbell Bank. - are used
in 17/56

Re Alton. Amount of dividends is inconsistent with percentage, and with data for all claims in Decennial Report. Assumed to be
copying error.

Re Flanagan. Amount of dividend as originally given inconsistent with percentage, and with data for all claims in Decennial Report. Assumed
to be copying error.

Re Henry Citizens State Bank. Amount of dividend is far less than the percentage would indicate. Also dividend is shown
in 1938 Decennial Report as 25.78%. Adjusted figure ^{used here} is apparently that percentage of certificates issued.

Feb 1927
 Add to clearing 4504.81
 in Dittland 1.86

a Figure for original amount not shown in Register. Assumed to be same as unpaid balance - especially since worksheet shows same figure for C.D.'s issued.

Je Carrot. Amount of interest appears to be too small - assumed to be copying error.

Should recovery and
loss be reversed (by
\$300,000) for case 9, State
Bank of Winfred. No

Should deposit claims (original
amount) be reversed for First
Pine, case A

[Signature]

South Dakota - ^{State} Banks with ^{\$}2 million or more deposit.
In July 1922 Km 5-16
thousands

1/14/24

Minnehaha
County

Sioux Falls: Sioux Falls Savings Bank
Described as "South Dakota's largest commercial Bank."

5000 5200
5686 as of
6/30/23

Must have changed name to Sioux Falls Tr. & Savings Bank (but not noted on 5-16/23)

- (1) As Jeannette completes est. plan. on ET's issued, - Check for cases where total loss is estimable is less than on ET's, and adjust, (dmg) ~~7-p~~ ~~13~~.

- (3) These computations ^{by years} loss on common claims
not guaranteed. Done ~~on~~ Thursday Dec 13

This should complete data
for South Dakota for Tables 7 & 8
