

Records of the Federal Reserve System

A Finding Aid to Record Group 82 at the National Archives and Records Administration,
NARA II, College Park, MD

Compiled by
Pamela D. Campbell

Research Library
Federal Reserve Bank of St. Louis
2013

Revised April 2021

Introduction

This finding aid is compiled from various sources (listed below) and provides in one document detailed information on the contents of the Records of the Federal Reserve System, Record Group 82 at the National Archives and Records Administration.

The Series Detail section provides two levels of information for each series in Record Group 82 as follows: The first level, labeled by series name, provides a broad overview of the series, including its location, size, access information, a general description of the record and media types included, and links to items available digitally. The second level, labeled "Container List," provides (as available) lists of the contents of the boxes in the series, including specific file and volume titles. The second level was compiled primarily from two lists that were scanned and read with optical character recognition (OCR) software and then linked together to create a list of contents for each box. OCR errors may exist.

Scope and Content	This series consists of summary reports from members of the Board of Governors and the presidents of the Federal Reserve Banks regarding projections for economic growth, unemployment, and inflation in the United States over time periods including the current year, the next two years and over the long term. These reports were created to summarize current and projected economic conditions throughout the United States to assist the Federal Open Market Committee (FOMC) in the development of prudent monetary policy. The economic projections within these reports are released to the public as an addendum to the FOMC meeting minutes after approval by its members.

Scope and Content	This series consists of narrative reports providing comments on economic conditions and economic outlooks. The reports discuss the economic status of various industries, including retail, construction, manufacturing, banking, agriculture, recreation, and energy. The reports also cover other economic factors such as unemployment, inflation, and consumer spending. The committee created these reports to report on regional economic conditions prior to committee meetings.
Comments	Also known as the "Redbook."

Scope and Content

This series consists of statements prepared by the Board of Governors of the Federal Reserve System for mortgage lending institutions, using data found in the loan/application register. The disclosure statements include general information including mortgage type, applicant demographics, name of lending institution, and the acceptance, denial, or incompleteness of mortgage applications. The information found in the disclosure statements is provided by the lending institutions and made public under the Home Mortgage Disclosure Act (HMDA).

Comments

The Federal Reserve Board created these statements under Regulation C of the Home Mortgage Disclosure Act (HMDA) to help determine whether lending institutions are serving the needs of the community, assist public officials in distributing public-sector investments, and identify any possible discriminatory lending practices.

Scope and Content	This series contains records on home purchase and home improvement loans and refinancings, and contains information about loan originations, loan purchases, and denied, incomplete or withdrawn applications. The data was reported by banks, savings and loan associations, credit unions, and mortgage and consumer finance companies that met the criteria for coverage (based upon the lender's asset size, whether the lender has an office in a metropolitan statistical area/metropolitan division (MSA/MD), and the extent of the lender's housing-related lending activity). The information was recorded on the loan application register (LAR), which itemizes reportable transactions by application and loan. The LAR was submitted along with the transmittal sheet (TS) data which contains information about the reporting institution. Reporting panel data includes information about the lending institutions. There are two categories of the data, final and ultimate. Final data is a frozen snapshot of the data from which disclosure and aggregate reports are generated. The reports are in the series "Home Mortgage Disclosure Reports." Ultimate data includes adjustments to the data incorporated in the 18 months following the reporting deadline.
Comments	Financial institutions submitted these data to the agency and the agency maintained, operated, and managed the database on behalf of all participating agencies. The agency used the data to prepare disclosure forms, compile aggregate data, and aggregate the data by metropolitan statistical area/metropolitan division (MSA/MD).

Scope and Content	This series consists of data files that were compiled by the Board of Governors of the Federal Reserve System using information that was submitted by mostly large financial institutions under the Home Mortgage Disclosure Act (HMDA) and the Community Reinvestment Act (CRA). These files include general information that includes family income, racial/ethnic demographics, housing types, and number of occupants per dwelling. The series also includes additional information beginning in 1996 on poverty level percentages, languages spoken in the home and the ability to speak English, sources of income, number of persons employed in the armed forces, and group quarters that consist of correctional facilities, nursing homes, colleges, and homeless shelters.
Comments	The Federal Reserve Board created these data files under the Home Mortgage Disclosure Act (HMDA) and the Community Reinvestment Act (CRA) to assist in determining whether financial institutions are meeting the credit needs of the communities in which they operate. Also known as Home Mortgage Disclosure Act (HMDA) / Community Reinvestment Act (CRA) Combined Census Data Files.

Scope and Content	This series contains reports generated from the series "Home Mortgage Disclosure Data Files" (ARC Identifier 2456161). The reports, which are sorted by metropolitan statistical area/metropolitan division (MSA/MD), aggregates the mortgage and home improvement lending information within an MSA/MD, regardless of whether the institution has a home or branch office in that MSA/MD. These reports include the Aggregate and National Aggregate reports.
Comments	The agency generated these reports under Regulation C of the Home Mortgage Disclosure Act to meet the current reference requirement for the data, that they be useful, understandable, and standardized.
