^a For domestic bills running at least three months upon the same place, or any other bank place.

^b The loan rate of the Reichsbank is generally 1 per cent higher than its discount rate. From March, 1884, to July, 1897, loans upon imperial and state obligations were given a preferential rate only one-half per cent higher than the discount rate. For the occasional loans upon precious metals interest is reckoned at the official discount rate.

^c In the years from 1880 to 1890, and 1892 to 1896, the Reichsbank bought especially qualified bills, for not less than 3,000 marks, which had at least six full weeks to run, and whose indorsement represented a significant credit, at a frequently changing preferential rate, the so-called "private rate" of the Reichsbank. In art. 7, sec. 1, of the Law of June 7, 1899, the Reichsbank was especially permitted to discount under the officially published rates, but only when this rate is below 4 per cent. As indicated, bills have not been bought at a preferential rate since 1896.

^d The private discount is granted upon so-called "prime bills;" that is to say, those of recognized solid banks and bankers. They must be payable at a bank place, i. e., in Berlin or some other town with a branch of the Reichsbank. They must call for at least 5,000 marks, and have at least fifty-six days and at the most three months to run.

^e Rate for loans for a month fixed.

NOTE.—The above table presents the first attempt at a systematic statistical presentation of the capital, surplus, and deposits of all German joint stock banks since the establishment of a uniform monetary standard throughout the Empire in 1876. There are included all of the general credit banks. Special banks, such as the note banks, mortgage banks, foreign banks, fidelity companies, etc., are not included. The tables are based upon the reports of the individual banks as they are published in the "*Reichsanzeiger*," and these publications were but fragmentary and appeared irregularly in the earlier years, especially before 1889, and as, on the other hand, only these original materials can be employed for the preparation of reliable statistics, the above table can make no claim of completeness for the years before 1889.

A similar table covering the years 1888-1907 was prepared for the Commission by the *Deutsche Oekonomist* and will be found on a later page.

^a There are no statistical data for the savings and loan banks, affiliated with the Raiffeisen Union covering the same period. After the amalgamation of that union with the Imperial Federation in 1905 the respective figures for the Raiffeisen Union (for the first time in 1906) are contained in the statistics of the savings and loan banks of the agricultural societies belonging to the Imperial Federation.
