FEDERAL RESERVE BANK OF NEW YORK

Fiscal Agent of the United States

[Circular No. 3877] July 15, 1952]

REVISED SERIES E SAVINGS BOND STOCK

To all Issuing Agents in the Second Federal Reserve District Qualified for Sale of United States Savings Bonds, Series E:

The Treasury Department has advised us that it hopes to have a sufficient supply of the revised Series E Savings bonds in our hands for an initial distribution to issuing agents some time during August.

Until the new stock is available and further instructions have been received, issuing agents should continue to issue bonds from their present stock. It is urged, however, that each agent permit its stock of old type bonds to decline by not replenishing such stock beyond minimum requirements. Your cooperation in this respect will reduce the amount of work you will have to do when you return your stock of old style bonds to us for credit, upon delivery of a supply of the new bonds to you. It will also assist us by keeping down the number of returned old style E bonds that we will have to process. In this connection, we should like to point out that any E bond issued and bearing issue dates of May 1952 and subsequent months will carry all of the privileges and conditions of the revised Series E bond. Purchasers who receive old style bonds, however, may exchange such bonds for the revised type, after the new stock is available, only at a Federal Reserve Bank or Branch or the Treasury Department.

Instructions for preparing your final report of sales of old style E bonds and the return of all unissued stock of such bonds will be sent to you at a later date, probably at the same time that we send you a special form to be used in requisitioning your stock of the revised Series E bond.

Allan Sproul,

President.
