

FEDERAL RESERVE BOARD

WASHINGTON

January 24, 1921.
St.1753.

SUBJECT: Weekly report of holdings of subsidiary silver and minor coin.

Dear Sir:

In connection with the Treasury instructions of October 30, 1920 relating to the exchange, replacement and redemption of U.S. coin, the Secretary of the Treasury has requested the Federal Reserve Board to furnish the Treasury Department with weekly reports of subsidiary silver and minor coin, by denominations, held by each Federal Reserve Bank and Branch. We are therefore enclosing copies of form St.1752 for use in making the desired reports.

It is requested that the figures, which represent the total amount of each denomination of subsidiary and minor coin held by each Federal Reserve Bank (head office) and Branch as at close of business on Fridays, be telegraphed to the Board each Saturday morning. Reports of coin held by branches may be telegraphed direct to the Board by the branches, or if preferred all data may be assembled and telegraphed to the Board from the head office. In the latter case, however, separate figures should be telegraphed for the parent bank and each branch.

Very truly yours,

R. G. Emerson,
Assistant to Governor.

(Letter sent to each F. R. Agent)
