This publication is prepared under the general guidance of a technical committee established by the Office of Management and Budget. The committee consists of the following persons:

Edgar R. Fiedler, *Chairman*

Department of the Treasury

Jack W. Carlson, Office of Management and Budget

Murray F. Foss, Council of Economic Advisers,

Executive Office of the President

George Jaszi, Bureau of Economic Analysis,

Department of Commerce

Julius Shiskin, Bureau of Labor Statistics,

Department of Labor

Kenneth Williams, Federal Reserve Board

NATIONAL INCOME AND PRODUCT accounts summarize both receipts and final expenditures for the personal, business, foreign, and government sectors of the economy and provide useful measures of total economic activity. The total of the final expenditures, which equals the total of the receipts, is known as gross national product, the most comprehensive single measure of aggregate economic output. GNP is defined as the total market value of the final output of goods and services produced by the Nation's economy.

CYCLICAL INDICATORS are economic time series which have been singled out as leaders, coinciders, or laggards in relation to movements in aggregate economic activity. In this report, the series on the NBER's list of cyclical indicators are classified by economic process and by cyclical timing. These indicators were selected primarily on the basis of their cyclical behavior, but they have also proven useful in forecasting, measuring, and interpreting other short-term fluctuations in aggregate economic activity.

ANTICIPATIONS AND INTENTIONS data provide information on the plans of businessmen and consumers regarding their major economic activities in the near future. This information is considered to be a valuable aid to economic forecasting either directly or as an indication of the state of confidence concerning the economic outlook. A number of surveys by various organizations and government agencies have been developed in recent years to ascertain anticipations and intentions. The results of some of these surveys, expressed as time series, are presented in this report.

This monthly report brings together many of the economic time series found most useful by business analysts and forecasters. Its predecessor, *Business Cycle Developments*, emphasized the cyclical indicators approach to the analysis of business conditions and was based largely on the list of leading, roughly coincident, and lagging indicators maintained by the National Bureau of Economic Research, Inc. Some other approaches commonly used by students of economic conditions include econometric models and anticipations and intentions data. The econometric model concept utilizes historical and mathematical relationships among consumption, private investment, government, and various components of the major aggregates to generate forecasts of gross national product and its composition. Anticipations and intentions data express the expectations of businessmen and the intentions of consumers. Most of the content of *Business Cycle Developments* has been retained in this new report and additional data reflecting the emphasis of other approaches have been added to make it more generally useful to those concerned with an evaluation of current business conditions and prospects.

The use of the National Bureau's list of indicators and business cycle turning dates in the cyclical indicators section of this report, as well as the use of other concepts, is not to be taken as implying endorsement by the Bureau of Economic Analysis or any other government agency of any particular approach to economic analysis. This report is intended only to provide statistical information so arranged as to facilitate the analysis of the course of the Nation's economy.

All of the basic data presented in this report have been published by their source agencies. A series finding guide, as well as a complete list of series titles and data sources, is shown at the back of this report.

Subscription price, including supplements, is \$45.80 a year (\$11.45 additional for foreign mailing. Single issues are \$3.70. Airmail delivery is available at an additional charge. NEW FEATURES
AND CHANGES
FOR THIS ISSUE

A limited number of changes are made from time to time to incorporate recent findings of economic research, newly available time series, and revisions made by source agencies in concept, composition, comparability, coverage, seasonal adjustment methods, benchmark data, etc. Changes may result in revisions of data, additions or deletions of series, changes in placement of series in relation to other series, changes in composition of indexes, etc.

Changes in this issue are as follows:

Appendix C contains historical data for series 1-3, 21, 41, 63, 226, 227, 230-234, 230A, 236, 237, 240-250, 241A, 244A, 245A, 250A, 252, 253, 260, 262, 262A, 740, 745, 746, 770, and 858.

The October issue of BUSINESS CONDITIONS DIGEST is scheduled for release on October 31.

6 SESA PROJECTS for economic analysis

BUSINESS CONDITIONS DIGEST A monthly report for analyzing economic fluctuations over a short span of years.

This report brings together approximately 600 economic time series in a form convenient for analysts whether their approach to the study of current business conditions and prospects is the national income model, the leading indicators, anticipations and intentions, or a combination of these. Other types of data such as foreign trade, Federal Government activities, and international series are included to facilitate a more complete analysis.

Data are presented in charts and tables. Appendixes provide historical data, series descriptions, seasonal adjustment factors, and measures of variability. A computer tape containing data for most of the series is available for purchase.

DEFENSE INDICATORS A monthly report for analyzing the current and prospective impact of defense activity on the national economy.

This report brings together the principal time series on defense activities which influence short-term changes in the national economy. These include series on obligations, contracts, orders, shipments, inventories, expenditures, employment, and earnings. The approximately 60 time series included are grouped in accordance with the time at which the activities they measure occur in the defense order-production-delivery process. Charts and analytical tables facilitate interpretation.

LONG TERM ECONOMIC GROWTH A report for the study of economic trends over a long span of years, 1860-1970.

This report has been developed from available statistics to provide a comprehensive, long-range view of the U.S. economy. It is a basic research document for economists, historians, investors, teachers, and students. It brings together under one cover, in meaningful and convenient form, the complete statistical basis for a study of long-term economic trends. A computer tape file of the time series included in the report is available for purchase.

COMPUTER PROGRAMS FOR TIME SERIES ANALYSIS The source statements for FORTRAN IV programs used by SESA in its analysis of time series are available on a single computer tape.

SEASONAL ADJUSTMENT PROGRAMS.—Two variants of the Census computer program for measuring and analyzing seasonal, trading-day, cyclical, and irregular fluctuations. They are particularly useful in analyzing economic fluctuations which take place within a year. The X-11 variant is used for adjusting monthly data and the X-11Q for quarterly data. These programs make additive as well as multiplicative adjustments and compute many summary and analytical measures.

DIFFUSION INDEX PROGRAM.—A computer program for computing diffusion indexes, cumulated diffusion indexes, and summary measures of the properties of each index.

SURVEY OF CURRENT BUSINESS A monthly report for analyzing current economic developments.

This report provides a useful combination of current data for more than 2,500 statistical series and significant articles analyzing economic developments. These data and analyses include such areas as the national income and product accounts, the balance of payments accounts, plant and equipment expenditures, regional personal income, and the input-output accounts.

BUSINESS STATISTICS A biennial reference volume containing statistical series reported currently in the *Survey of Current Business*.

This report provides historical data back to 1947 for nearly 2,500 time series. The series are accompanied by concise descriptions as to their composition, methods of compilation, comparability, revisions, and availability. Also listed are the names and addresses of organizations which provide the basic data for the series.

METHOD OF PRESENTATION

THIS REPORT is organized into six major subject sections, as follows:

- A. National Income and Product
- B. Cyclical Indicators
- C. Anticipations and Intentions
- D. Other Key Indicators
- E. Analytical Measures
- F. International Comparisons

Each of these sections is described briefly in this introduction. Data for each of the above sections are shown both in Part I (charts) and in Part II (tables) of the report. Most charts begin with 1952 (except in section C where they begin with 1957); the tables contain data for only the last few years. Except for section F, the charts contain shading which indicates periods of recession in general business activity.

In addition to the charts and tables described above, each issue contains a summary table which shows the current behavior of many of the series, and several appendixes which present historical data, series descriptions, seasonal adjustment factors, and measures of variability. An index appears at the back of each issue. It should be noted that the series numbers used are for identification purposes only and do not reflect relationships or order.

Seasonal Adjustments

Adjustments for average seasonal fluctuations are often necessary to bring out the underlying trends of time series. Such adjustments allow for the effects of repetitive intrayear variations resulting primarily from normal differences in weather conditions and from various institutional arrangements. Variations attributable to holidays are usually accounted for by the seasonal adjustment process; however, a separate holiday adjustment is occasionally required for holidays with variable dates, such as Easter. An additional adjustment is sometimes necessary for series which contain considerable variation due to the number of working or trading days in each month. As used in this report, the term "seasonal adjustment" includes trading-day and holiday adjustments where they have been made.

Most of the series in this report are presented in seasonally adjusted form and, in most cases, these are the official figures released by the source agencies. However, for the special purposes of this report, a number of series not ordinarily published in seasonally adjusted form are shown here on a seasonally adjusted basis.

MCD Moving Averages

Month-to-month changes in a series are often dominated by erratic movements. MCD (months for cyclical dominance) is an estimate of the appropriate span over which to observe cyclical movements in a monthly series. (See appendix A.) It is the smallest span of months for which the average change in the cyclical factor is greater than that in the irregular factor. The more erratic a series is, the larger the MCD will be; thus, MCD is 1 for the smoothest series and 6 for the most erratic. MCD

moving averages (that is, moving averages of the period equal to MCD) tend to have about the same degree of smoothness for all series. Thus, a 5-term moving average of a series with an MCD of 5 will show its cyclical movements about as clearly as the seasonally adjusted data for a series with an MCD of 1.

The charts for sections B and D include centered MCD moving averages for all series with an MCD greater than 4. The seasonally adjusted data are also plotted to indicate their variation about the moving averages and to provide observations for the most recent months.

Reference Turning Dates

The historical business cycle turning dates used in this report are those designated by the National Bureau of Economic Research, Inc. (NBER). They mark the approximate dates when, according to the NBER, aggregate economic activity reached its cyclical high or low levels. As a matter of general practice, neither new reference turning dates nor the shading for recessions will be entered on the charts until after both the new reference peak and the new reference trough bounding the shaded area have been designated. This policy is followed because of the conceptual and empirical difficulties of designating a current recession and the practical difficulties of terminating the shading of a current recession without including part of a new expansion.

SECTION A

NATIONAL INCOME AND PRODUCT

The national income and product accounts, compiled by the Bureau of Economic Analysis (BEA) summarize both receipts and final expenditures for the personal, business, foreign, and government sectors of the economy and provide useful measures of total economic activity. The total of the final expenditures (including additions to business inventories), which equals the total of the receipts (mainly incomes), is known as gross national product (GNP). GNP is defined as the total market value of the final output of goods and services produced by the Nation's economy. It is the most comprehensive single measure of aggregate economic output.

Gross national product consists of four major components: (1) Personal consumption expenditures, (2) gross private domestic investment, (3) net exports of goods and services, and (4) government purchases of goods and services.

Personal consumption expenditures is the market value of goods (durable and non-durable) and services purchased by individuals and nonprofit institutions and the value of food, clothing, housing, and finan-

cial services received by them as income in kind. The total purchase cost is covered, including sales taxes. Home purchases are excluded, but the estimated rental value of owner-occupied homes is included.

Gross private domestic investment combines gross fixed investment and net changes in business inventories. Fixed investment consists of producers' durable equipment and private (as opposed to government) structures, including owner-occupied residential units. The estimates are gross in the sense that there is no deduction for capital consumption. The inventory component measures the change in the physical volume of inventories valued at current replacement cost.

Net exports of goods and services measures the excess of exports over imports. Exports include receipts from domestic output sold abroad, transportation, travel, other services, fees and royalties and income on investments in foreign areas. Imports include purchases of foreign goods, payments for transportation, travel and other services, military expenditures as well as payments of income on foreign investments in the United States. More detail on U.S. balance of payments is provided in Section D.

Government purchases of goods and services includes general government expenditures for compensation of employees, net purchases from business and from abroad, payments to private nonprofit institutions for research and development, and the gross fixed investment of government enterprises. Not included are current outlays of government enterprises, acquisitions of land, transfer payments, subsidies, loans, and interest payments to domestic creditors.

A breakdown of the goods portion of GNP, covering durable and nondurable goods and both final sales and changes in business inventories, is also included in section A. Other major aggregates taken from the national income and product accounts are described below.

National income is the total earnings arising from the current production of goods and services and accruing to the labor and property employed in production. The components of national income are compensation of employees, proprietors' income, rental income of persons, corporate profits and the inventory valuation adjustment, and net interest.

Personal income measures the current income of individuals, owners of unincorporated businesses, nonprofit institutions, private trust funds, and private health and welfare funds. It consists of wage and salary disbursements, other labor income, proprietors' income, rental income of persons, dividends, personal interest income, and transfer payments to persons, less personal contributions for social insurance.

Disposable personal income is the personal income available for spending or saving. It consists of personal income less personal taxes and other nontax payments to general government.

Gross saving represents the difference between income and spending during an

accounting period. It is the total of personal saving, undistributed corporate profits, corporate inventory valuation adjustment, the excess of wage accruals over disbursements (usually negligible), government surplus or deficit, and capital consumption allowances.

Most of the series in this section are on a current-dollar basis, but some are shown on a constant (1958) dollar basis so that the effects of price changes are eliminated. The implicit price deflator (computed by dividing the current-dollar data by the constant-dollar data) for total GNP is also shown.

SECTION B

CYCLICAL INDICATORS

The business cycle is generally described as consisting of alternating periods of expansion and contraction in aggregate economic activity; that is, the complex of activities represented by such concepts as total production, employment, income, consumption, trade, and the flow of funds. Although a recurrent pattern has been characteristic of American economic history, many economists do not consider it inevitable.

One of the techniques developed in business cycle research is widely used as a

tool for analyzing current economic conditions and prospects. This is the cyclical indicators concept, which singles out certain economic time series as being leaders, coinciders, or lagers in relation to movements in aggregate economic activity. The NBER has, since 1938, maintained a list of such indicators and has periodically subjected the list to extensive review. Their most recent (1966) list of 73 cyclical indicators is the basis for this section of BCD. These indicators were selected primarily for their cyclical behavior, but they have also proven useful in forecasting, measuring, and interpreting other short-term fluctuations in aggregate economic activity.

The NBER employs a dual classification scheme which groups the indicators by cyclical timing and by economic process, and this report uses the same classification groupings. The diagram below summarizes the cross-classification system used in this section. The 80 cyclical indicators are presented with economic process as the principal basis of classification and cyclical timing as the secondary basis. The major processes are divided into minor processes which exhibit rather distinct differences in cyclical timing. The timing classification takes into account a series' historical record of timing at business cycle peaks and troughs. Leading indicators are those which usually reach peaks or troughs before the corresponding turns in aggregate economic activity; roughly coincident indicators are direct measures of aggregate economic activity or move roughly together with it; lagging indicators usually reach their turning points after the turns in aggregate economic activity.

The NBER has also specified a "short list" of indicators. This more selective and substantially unduplicated group of principal indicators is drawn from the full list and provides a convenient summary of the current situation. The short list consists of 26 series: 12 leading, eight roughly coincident, and six lagging. Only five of these are quarterly series; the rest are monthly. The short list is classified only by timing and is shown separately in chart B8.

Included in this section are a number of composite indexes which provide simple summary measures of the average behavior of selected groups of indicators. Each component of an index is weighted according to its value in forecasting or identifying short-term movements in aggregate economic activity. The components are standardized so that each has, aside from its weight, an equal opportunity to influence the index. Each index is standardized so that its average month-to-month percent change is 1 (without regard to sign).

The composite indexes presented in this report are based on groups of indicators selected by timing. Thus, there is an index of leading indicators, another of coincident indicators, and a third of lagging indicators. In addition, there are five indexes based on leading indicators which have been grouped by economic process. These indexes indicate the underlying cyclical trends of each group of indicators and the relative magnitude of their short-term changes. The index of 12 leading indicators has been "reverse trend adjusted" so that its long-run trend parallels that of the coincident index. This facilitates

Cross-Classification of Cyclical Indicators by Economic Process and Cyclical Timing

Economic Process \ Cyclical Timing	I. EMPLOYMENT AND UNEMPLOYMENT (14 series)	II. PRODUCTION, INCOME, CONSUMPTION, AND TRADE (9 series)	III. FIXED CAPITAL INVESTMENT (14 series)	IV. INVENTORIES AND INVENTORY INVESTMENT (9 series)	V. PRICES, COSTS, AND PROFITS (14 series)	VI. MONEY AND CREDIT (20 series)
LEADING INDICATORS (40 series)	Marginal employment adjustments (5 series)		Formation of business enterprises (2 series) New investment commitments (8 series)	Inventory investment and purchasing (7 series)	Sensitive commodity prices (1 series) Stock prices (1 series) Profits and profit margins (5 series) Cash flows (2 series)	Flows of money and credit (7 series) Credit difficulties (2 series)
ROUGHLY COINCIDENT INDICATORS (27 series)	Job vacancies (2 series) Comprehensive employment (3 series) Comprehensive unemployment (3 series)	Comprehensive production (3 series) Comprehensive income (2 series) Comprehensive consumption and trade (4 series)	Backlog of investment commitments (2 series)		Comprehensive wholesale prices (2 series)	Bank reserves (1 series) Interest rates (5 series)
LAGGING INDICATORS (13 series)	Long-duration unemployment (1 series)		Investment expenditures (2 series)	Inventories (2 series)	Unit labor costs (3 series)	Outstanding debt (2 series) Interest rates (3 series)

comparisons among the leading, coincident, and lagging indexes and tends to shorten the leads of the leading index at business cycle peaks while lengthening them at troughs; it also reduces the variability of the leads and lags.

SECTION C

ANTICIPATIONS AND INTENTIONS

Most businessmen and many individual consumers have some type of plans as to their major economic activities in the near future. Information on these plans is regarded as a valuable aid to economic forecasting either directly or as an indication of the state of confidence concerning the economic outlook. In recent years, much progress has been made in compiling such information, and a number of surveys by various organizations and government agencies ascertain anticipations and intentions of businessmen and consumers. The results of some of these surveys, expressed as time series, are presented in this section of the report.

The business analyst who uses these series should be aware of their limitations. These data reflect only the respondents' anticipations (what they expect others to do) or intentions (what they plan to do), not firm commitments. Among both businessmen and consumers, some responses may not be very reliable; that is, the plans may be conjectural or the respondent may make little effort to reply accurately to the survey questions. Also, many plans are subject to modification or even complete abandonment due to unforeseen and uncontrollable developments. In some cases, the anticipations (or intentions) may have a systematic bias; for example, the anticipations (or intentions) data may tend to be lower than the subsequent actual data under certain economic conditions and higher under other conditions. Sometimes they merely project what has already occurred and hence appear to lag behind actual changes. Actual data are included in this section to indicate their historical relationship to the anticipations and intentions. Some of the series are diffusion indexes, a concept explained in the description for section E.

SECTION D

OTHER KEY INDICATORS

Many economic series are available which, although not included in the three main sections of the report, are nevertheless important for an overall view of the economy. This section presents a number of such series, though by no means a com-

prehensive selection. In general, these series reflect processes which are not direct measures of economic activity but which do have a significant bearing on business conditions.

The foreign trade and payments series include data on imports and exports and their balance, export orders, and the balance of payments. Many of the components of the balance-of-payments accounts are shown. Some are charted in a manner which emphasizes the balance between receipts and expenditures for each component; for example, comparisons of exports of goods and services with imports of goods and services, and income on U.S. investments abroad with payments on foreign investments in the United States. In addition, balances are shown for U.S. Government grants and capital transactions and for capital transactions of the private sector (banks and U.S. residents other than banks). Finally, cumulative changes are shown for other components; for example, U.S. liquid liabilities to all foreigners and U.S. official reserve assets.

The Federal Government activities series include Federal receipts and expenditures, and their balance, and selected defense activities. The receipts and expenditures data are from the national income and product accounts. The defense series are only a few of the many available. For a more comprehensive picture of defense activities, see *Defense Indicators*, a monthly Bureau of Economic Analysis publication.

Three other groups of series are included in this section. The price movements series consist of consumer and wholesale price indexes and their major components. The series on wages and productivity include measures of hourly earnings and output per man-hour and also rates of change for most of these measures. The final group of series measures the civilian labor force and its major components, including unemployment rates for selected segments of the labor force.

SECTION E

ANALYTICAL MEASURES

This section begins by comparing gross national product in constant dollars with a measure of potential GNP. In effect, these two series reflect the relationship between the economy's productive capacity and total demand, the excess of potential over actual GNP indicating the degree to which potentially productive resources are not fully utilized. The measure of potential GNP, developed by the Council of Economic Advisers in the early 1960's, takes into account increases in both available man-hours and output per man-hour.

The NBER list of cyclical indicators includes some series which measure the relationship between different economic variables (for example, the series on labor cost

per unit of output). There are, however, additional analytical ratios which have proven useful in evaluating business conditions and prospects. A number of such ratios are shown in the second part of this section.

The third part presents a selection of diffusion indexes. Many series in this report are aggregates compiled from a number of components. A diffusion index is a summary measure expressing, for a particular aggregate, the percentage of components rising over a given timespan (half of the unchanged components are considered rising). Cyclical changes in diffusion indexes tend to lead those of the corresponding aggregates. Since diffusion indexes are highly erratic, long-term (6- or 9-month span) indexes are used to indicate underlying trends and short-term (1-month span) indexes are used to show recent developments. Most of the indexes are constructed from components of series shown in section B, and these indexes have the same identification numbers as the corresponding aggregates. The diffusion indexes are classified by the cyclical timing of the aggregates to which they relate. Recent data and directions of change for many of the components are shown in table E4.

The final part (E5) presents, in chart form, rates of change for a selected group of economic series. Percent changes are shown for 1- and 3-month spans or for 1-quarter spans.

SECTION F

INTERNATIONAL COMPARISONS

Because this report is designed as an aid to the analysis of U.S. business conditions, all previous sections are based on data which relate directly to that purpose. But many business analysts examine economic developments in other important countries with a view to their impact on the United States. This section is provided to facilitate a quick review of basic economic conditions in six of the nations with which we have important trade relationships.

Data on consumer prices, industrial production, and stock prices are shown for Canada, the United Kingdom, France, West Germany, Japan, and Italy and are compared with the corresponding U.S. series. Also included is an industrial production index for the European countries in the Organization for Economic Cooperation and Development. The industrial production series provide a comprehensive measure of output and the consumer price indexes measure an important sector of prices, while stock prices tend to be important as leading indicators. In this section, the U.S. business cycle shading has been omitted from the charts.

HOW TO READ CHARTS

Peak (P) of cycle indicates end of expansion and beginning of Recession (shaded areas) as designated by NBER.

(May) (Feb.)

Basic Data

Trough (T) of cycle indicates end of recession and beginning of Expansion as designated by NBER.

Series numbers are for identification only and do not reflect series relationships or order.

Solid line indicates monthly data. (Data may be actual monthly figures or MCD moving averages.*)

Broken line indicates actual monthly data for series where an MCD moving average* is plotted.

Parallel lines indicate a break in continuity (data not available, changes in series definitions, extreme values, etc.).

Solid line with plotting points indicates quarterly data.

Arabic number indicates latest month for which data are plotted. ("6" = June)

Roman number indicates latest quarter for which data are plotted. ("IV" = fourth quarter)

Dotted line indicates anticipated data.

Various scales are used to highlight the patterns of the individual series. "Scale A" is an arithmetic scale, "scale L-1" is a logarithmic scale with 1 cycle in a given distance, "scale L-2" is a logarithmic scale with 2 cycles in that distance, etc. The scales should be carefully noted because they show whether the plotted lines for various series are directly comparable.

Diffusion Indexes

Solid line indicates monthly data over 6- or 9-month spans.

Broken line indicates monthly data over 1-month spans.

Solid line with plotting points indicates quarterly data over various spans.

*Many of the more irregular series are shown in terms of their MCD moving averages as well as their actual monthly data. In such cases, the 4-, 5-, or 6-term moving averages are plotted 1½, 2, or 2½ months, respectively, behind the actual data. See appendix A for a description of MCD moving averages.

Scale shows percent of components rising.

Arabic number indicates latest month for which data are used in computing the indexes. ("6" = June)

Roman number indicates latest quarter for which data are used in computing the indexes. ("I" = first quarter)

Broken line with plotting points indicates quarterly data over various spans.

NOTE: Some of the charts of anticipations and intentions data (section C) and balance of payments data (section D) do not conform to the above method of presentation. Deviations are adequately explained as they occur.

HOW TO LOCATE A SERIES

1. See **ALPHABETICAL INDEX-SERIES FINDING GUIDE** in the back of the report where series are arranged alphabetically according to subject matter and key words and phrases of the series titles, or

2. See **TITLES AND SOURCES OF SERIES** where series are listed in numerical order according to series numbers within each of the Digest's six sections.

Table 1. Summary of Recent Data and Current Changes for Principal Indicators

Series title	Unit of measure	Basic data ¹								Percent change			Series number	
		Average			1st Q 1973	2d Q 1973	3d Q 1973	4th Q 1973	1st Q 1974	2d Q 1974	3d Q to 4th Q 1973	4th Q to 1st Q 1974		1st Q to 2nd Q 1974
		1971	1972	1973

NOTE: Series are seasonally adjusted except for those indicated by (U), which appear to contain no seasonal movement. *Series included in the 1966 NBER "short list" of indicators. NA = not available. a = anticipated. EOP = end of period. S/A = seasonally adjusted (used for special emphasis). For complete series titles (including composition of composite indexes) and sources, see "Titles and Sources of Series" in the back of HCD.

¹For a few series, data shown here have been rounded to fewer digits than those shown in the tables in part II. Where available, annual figures are those published by the source agencies; otherwise, they (and the quarterly figures for monthly series) are averages of the data as shown in part II.

²Differences rather than percent changes are shown for this series.

³Index for the latest month excludes series 12, 16, 31, and 113, for which data are not yet available.

⁴Inverted series. Since this series tends to move counter to movements in general business activity, signs of the changes are reversed.

⁵End-of-period series. The annual figures (and quarterly figures for monthly series) are the last figures for the period.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ①. Current high values are indicated by ^H; for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 44, 45, and 93), current low values are indicated by ^H. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators (chart 88). The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 30, 31, 32, 40, and 42.

¹ Data beginning with the 4th quarter 1973 are not comparable with earlier data due to a change in the definition of profits and the consolidating of rules for reporting.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ^U. Current high values are indicated by ^H; for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 44, 45, and 93), current low values are indicated by ^L. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators (chart B8). The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 37 and 38.

¹ Reverse trend adjusted index of 12 leaders contains the same trend as the index of 5 coincident indicators.

² Excludes series 12, 16, 31, and 113 for which data are not yet available.

³ Excludes series 56 for which data are not yet available.

Special Note on Potential GNP

The following note has been provided by the Council of Economic Advisers regarding potential GNP.

The idea of potential GNP has had a long history. Its measurement by the Council of Economic Advisers was started in the *Economic Report of the Council* in 1962. Since that time, it has been used as a standard with which to evaluate the past and future behavior of the economy.

Potential GNP purports to measure what the economy would produce if all of its resources were fully utilized given the technology and institutional arrangements that have existed at the time. "Fully utilized" has never meant the kind of utilization that would prevail, say, under wartime conditions but rather the utilization that could be expected under conditions of reasonable price stability. This has always been less than complete utilization. Under ordinary circumstances, some unemployment is present because some workers are in the process of changing jobs; similarly, some old plants are idle because market conditions do not permit them to operate profitably. In the past, this degree of utilization has been reflected in an overall unemployment rate of 4 percent. The rate of inflation associated with that degree of unemployment has typically not been specified. Furthermore, notions of what constitutes reasonable price stability can vary over time.

Potential GNP is not something ordinarily observable. In practice, the

Council in 1962 made the judgment that the economy was operating at 100 percent of potential in mid-1955. Since that time potential GNP has been estimated to grow at differing annual rates, as follows: 3.5 percent from the first quarter of 1952 to the fourth quarter of 1962, 3.75 percent from the fourth quarter of 1962 to the fourth quarter of 1965, 4 percent from the fourth quarter of 1965 to the fourth quarter of 1969. At the beginning of 1970, the Council estimated that after the fourth quarter of 1969 potential was growing at an annual rate of 4.3 percent, reflecting a rise of 1.8 percent in the potential labor force, a 0.2 percent decline in annual hours of work, and a 2.7 percent rise in output per manhour at potential. Drawing on a new study by the Bureau of Labor Statistics ("The United States Economy in 1985", *Monthly Labor Review*, December 1973), the Council has lowered its estimate of potential growth after 1969 to 4 percent per annum, reflecting the following component changes: labor force, 1.8 percent; annual hours, -0.3 percent; output per manhour, 2.5 percent.

Although potential is presented in the chart on page 61 and the table above as a point estimate each quarter, it is clearly subject to a margin of error and consequently, as with any measure of capacity, should be used with considerable caution. There are uncertainties regarding both the growth and the level of potential. It cannot be reasonably assumed that potential grows in each year or quarter at the same annual rate. Some qualifications about the measure of potential appear on pages 64-65 of the 1974 *Economic Report*.

NOTE: Figures are the percent of series components rising (half of the unchanged components are considered rising). Data are centered within spans: 1-month indexes are placed on 2d month and 9-month indexes are placed on the 6th month of span; 1-quarter indexes are placed on the 1st month of the 2d quarter and 3-quarter indexes are placed on the 1st month of the 3d quarter. Seasonally adjusted components are used except in index D19 which requires no adjustment and index D34 which is adjusted only for the index. Table E4 identifies the components for most of the indexes shown. The "r" indicates revised; "p", preliminary; and "NA", not available. Unadjusted series are indicated by ⑩.

Graphs of these series are shown on page 63.

¹Based on 20 components (excluding ordnance and accessories) through June 1974 and on 21 components thereafter.

²This is a copyrighted series used by permission; it may not be reproduced without written permission from The Conference Board.

³Based on 72 components through August 1972, on 71 components through January 1973, on 69 components through April 1973, on 68 components through October 1973, on 67 components through April 1974, and on 66 components thereafter. Component data are not shown in table E4 but are available from the source agency.

⁴Average for September 3, 10, and 17.

NOTE: Figures are the percent of series components rising (half of the unchanged components are considered rising). Data are centered within spans: 1-month indexes are placed on the 2d month, 6-month indexes are placed on the 4th month, and 9-month indexes are placed on the 6th month of span. Seasonally adjusted components are used except in index D58 which requires no adjustment. Table E4 identifies the components for most of the indexes shown. The "r" indicates revised; "p", preliminary; and "NA", not available. Unadjusted series are indicated by ①. Graphs of these series are shown on pages 63 and 64.

¹Component data are not available for publication and therefore are not shown in table E4.

E4 Selected Diffusion Index Components: Basic Data and Directions of Change

Diffusion index components	1974							
	January	February	March	April	May	June	July ^r	August ^p
D1. AVERAGE WORKWEEK OF PRODUCTION WORKERS, MANUFACTURING ¹ (Average weekly hours)								
All manufacturing industries	- 40.3	+ 40.5	- 40.4	- 39.3	+ 40.3	- 40.1	+ 40.2	+ 40.3
Percent rising of 21 components ²	(12)	(75)	(25)	(8)	(88)	(45)	(33)	(50)
Durable goods industries:								
Ordnance and accessories	(NA)	(NA)	(NA)	(NA)	(NA)	r41.9	- 41.7	- 41.0
Lumber and wood products	- 40.4	+ 40.6	- 40.3	- 40.1	o 40.1	r40.1	- 39.9	o 39.9
Furniture and fixtures	+ 39.8	- 39.7	- 39.5	- 38.8	+ 39.4	o r39.4	o 39.4	- 38.6
Stone, clay, and glass products	- 41.6	+ 41.9	- 41.7	- 41.2	+ 41.6	- r41.4	o 41.4	o 41.4
Primary metal industries	- 41.8	- 41.4	+ 41.5	- 41.2	+ 41.6	o 41.6	o 41.6	+ 41.9
Fabricated metal products	- 41.0	+ 41.2	+ 41.3	- 39.6	+ 41.1	- 40.9	- 40.8	o 40.8
Machinery, except electrical	- 42.3	+ 42.5	- 42.4	- 40.7	+ 42.3	+ r42.4	- 41.9	+ 42.6
Electrical equipment and supplies	- 39.6	+ 40.2	- 39.9	- 39.0	+ 40.0	+ r40.1	- 40.0	- 39.9
Transportation equipment	- 40.0	+ 40.6	- 40.3	- 38.9	+ 40.5	- r39.7	+ 40.5	+ 41.3
Instruments and related products	- 40.6	+ 40.8	- 40.5	- 39.4	+ 40.3	o r40.3	- 40.2	+ 40.7
Miscellaneous manufacturing industries	- 38.3	+ 39.0	- 38.9	- 37.6	+ 38.9	o r38.9	o 38.9	- 38.4
Nondurable goods industries:								
Food and kindred products	- 40.8	o 40.8	- 40.4	- 39.8	+ 40.6	- 40.5	o 40.5	o 40.5
Tobacco manufactures	+ 39.5	- 38.8	- 37.7	+ 38.8	o 38.8	- r36.8	o 36.8	- 34.9
Textile mill products	- 40.6	+ 40.7	- 40.4	- 39.2	+ 40.2	o r40.2	o 40.2	- 39.7
Apparel and other textile products	- 35.2	+ 35.6	- 35.5	- 34.5	+ 35.6	- 34.7	+ 35.5	+ 35.6
Paper and allied products	o 42.8	- 42.5	+ 42.6	- 41.7	+ 42.3	+ r42.4	- 42.3	- 42.2
Printing and publishing	- 37.7	o 37.7	- 37.6	- 37.1	+ 37.8	- r37.6	- 37.4	+ 37.8
Chemicals and allied products	- 41.8	+ 42.0	- 41.8	o 41.8	o 41.8	o r41.8	+ 41.9	o 41.9
Petroleum and coal products	- 42.5	+ 42.6	+ 42.8	- 42.5	- 42.2	+ 42.5	- 42.0	- 41.6
Rubber and plastic products, n.e.c.	- 40.6	+ 40.9	- 40.8	- 39.3	+ 40.3	+ r40.6	o 40.6	+ 40.7
Leather and leather products	- 37.2	+ 37.8	+ 38.1	- 37.3	+ 37.6	o 37.6	- 37.0	+ 37.4
D6. VALUE OF MANUFACTURERS' NEW ORDERS, DURABLE GOODS INDUSTRIES ¹ ³ (Millions of dollars)								
All durable goods industries	+ 41,515	+ 42,267	- 41,974	+ 44,124	+ 46,730	+ 46,848	+ 47,476	+ 48,783
Percent rising of 35 components	(66)	(57)	(57)	(57)	(66)	(47)	(57)	(46)
Primary metals	- 5,956	+ 6,624	+ 6,930	+ 7,510	+ 9,002	+ 9,293	- 8,724	+ 9,903
Fabricated metal products	- 5,144	+ 5,410	- 5,165	+ 5,557	+ 5,694	+ 5,923	+ 6,119	- 5,635
Machinery, except electrical	- 7,087	+ 7,427	+ 8,018	- 7,734	+ 8,087	- 8,021	+ 8,612	- 8,161
Electrical machinery	+ 6,269	- 6,180	- 5,751	+ 6,204	+ 6,548	- 5,920	- 5,615	- 5,569
Transportation equipment	+ 9,345	- 8,822	- 7,998	+ 8,758	+ 9,095	+ 9,329	+ 10,496	+ 11,462
Other durable goods industries	- 7,714	+ 7,804	+ 8,112	+ 8,361	- 8,304	+ 8,362	- 7,910	+ 8,053

NOTE: To facilitate interpretation, the month-to-month directions of change are shown along with the numbers: (+) = rising, (o) = unchanged, and (-) = falling. The "r" indicates revised; "p", preliminary; and "NA", not available.

¹ Data are seasonally adjusted by the source agency.

² Percent rising is based on 20 components (excluding ordnance and accessories) through June 1974 and on 21 components thereafter.

³ Data for most of the 35 diffusion index components are not available for publication; however, they are all included in the totals and directions of change for six major industry groups shown here.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by [Ⓐ]. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 66 and 67.

625. Military prime contract awards in U.S.	91.3	83.2	97.2	72.0	78.1	176.9	112.3	98.5	102.4	100.1	84.9	103.3
D34. Profits, manufacturing (FNCB) ⁶	-9	...	...	16	...	...	-10	...	...	3	...	...

NOTE: These series are seasonally adjusted by the Bureau of Economic Analysis or the National Bureau of Economic Research, Inc., rather than by the source agency. Seasonal adjustments are kept current by the Bureau of Economic Analysis. Seasonally adjusted data prepared by the source agency will be used in Business Conditions Digest whenever they are available. For a description of the method used to compute these factors, see Bureau of the Census Technical Paper No. 15, The X-11 Variant of the Census Method II Seasonal Adjustment Program.

¹ Factors are the products of seasonal and trading-day factors.

² Quarterly series; factors are placed in the middle month of the quarter.

³ This series is derived from seasonally adjusted components; it is further adjusted by these factors to remove residual seasonal variation.

⁴ These quantities, in millions of dollars, are subtracted from the month-to-month net change in the unadjusted monthly totals to yield the seasonally adjusted net change. These factors are computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program.

⁵ Bimonthly series; factors are for even-numbered months (February, April, June, August, October, and December).

⁶ 1-quarter diffusion index; factors are placed in the first month of the quarter. The unadjusted diffusion index is computed and these factors, computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program, are subtracted to yield the seasonally adjusted index.

C. Historical Data for Selected Series

This appendix provides historical data (back to 1945 if available) for selected BCD series. Data are shown for series which (a) have recently been added to the report, (b) have recently been revised, or (c) have not been shown here for a long time. By keeping these tables, the user can acquire a complete set of historical data. Each time a series is included in this appendix, it is footnoted to indicate the extent of any revisions since it was last shown. See the "Alphabetical Index—Series Finding Guide" for the latest issue in which historical data were published for

each series. Current figures are shown in the basic data tables (month and may be used to update these historical tables).

Series shown here are seasonally adjusted except for those, indicated by (U), which appear to contain no seasonal movement. Official source agency annual figures are shown if available. Such figures are often derived from data with more digits or from data which have not been seasonally adjusted; therefore, they may differ slightly from annual figures computed from the monthly or quarterly data shown.

Note: Unless otherwise noted, these series contain revisions beginning with 1971.

¹Year-to-year percent changes are computed from annual data.

²This series contains revisions beginning with 1970. Percent changes are centered within the spans. Annual figures are averages of the centered changes.

September 1974

Note: Unless otherwise noted, these series contain revisions beginning with 1971.

¹Year-to-year percent changes are computed from annual data.

²This series contains revisions beginning with 1970. Percent changes are centered within the spans. Annual figures are averages of the centered changes.

(September 1974)

G. Experimental Data and Analyses

There has been considerable interest in recent months about the impact of price changes on the leading indicators and, in particular, on the composite index of 12 leading indicators, BCD series 810. In response to that interest, this appendix presents two experimental leading composite indexes designed to supplement series 810. These new indexes divide the 12 leading components into

two subgroups: one group consists of the seven components measured in, or related to, current-dollar units; the other group consists of the five components measured in nonmonetary units. These new indexes should be viewed as experimental tools for research. They are not to be viewed as substitutes for the leading index but rather as supplements to it.

NOTE: The experimental indexes are not shown for the current month because less than two-thirds of the current-dollar components were available by the publication deadline.

¹ Original trend replaced by trend of undeflated coincident index (series 820).

² Original trend replaced by trend of deflated coincident index (series 825).

*Denotes series on the 1966 NURE "Short List" of indicators. #The "number" for this series title was changed since its publication date shown. BOP means balance of payments; CI, charges to income; DI, data in table; GDP, gross private domestic investment, and NIA, national income and product account.

ES AND SOURCES OF SERIES

Each of the report's six sections, series are listed in alphabetical order according to series numbers. The series numbers are for identification purposes only and do not indicate series relationships or order. To find chart and table numbers, historical data, and series descriptions, consult the Alphabetical Index—Series Finding Guide."

Alphabetic-numeric designations following each series number indicate the charts and tables in which the series may be found. See the table of contents for the chart and table titles and page numbers. "M" indicates monthly series; "Q" indicates quarterly series. Data apply to the whole period except for series designated by "EOM" (end of month) or "EOQ" (end of quarter).

"A" following a series number indicates a component series (same number) as a percent of an aggregate series, such as GNP or national income. The series in section B preceded by an asterisk (*) are included in the 1966 NBER "short list" cyclical indicators, chart B8. The "D" preceding a number indicates a diffusion index.

National Income and Product

Gross national product in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A1, B2, B8, E5)

Gross national product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A1, B2, B8, E1, E5)

Implicit price deflator, gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A1)

Per capita gross national product in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (A1)

Per capita gross national product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (A1)

National income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)

Personal income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)

Disposable personal income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)

Disposable personal income in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)

Per capita disposable personal income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)

Per capita disposable personal income in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)

Personal consumption expenditures, total, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

A. Personal consumption expenditures as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

Personal consumption expenditures, total, in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3, A10)

Personal consumption expenditures, durable goods, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

233. Personal consumption expenditures, durable goods except automobiles, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

234. Personal consumption expenditures, automobiles, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

236. Personal consumption expenditures, nondurable goods, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

237. Personal consumption expenditures, services, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

240. Gross private domestic investment, total (Q).—Department of Commerce, Bureau of Economic Analysis (A4)

241. Gross private domestic fixed investment, total nonresidential (Q).—Department of Commerce, Bureau of Economic Analysis (A4)

241A. Gross private domestic fixed investment, total nonresidential as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

242. Gross private domestic fixed investment, nonresidential structures (Q).—Department of Commerce, Bureau of Economic Analysis (A4)

243. Gross private domestic fixed investment, producers' durable equipment (Q).—Department of Commerce, Bureau of Economic Analysis (A4)

244. Gross private domestic fixed investment, residential structures (Q).—Department of Commerce, Bureau of Economic Analysis (A4)

244A. Gross private domestic fixed investment, residential structures as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

245. Gross private domestic investment, change in business inventories after valuation adjustment, all industries (Q).—Department of Commerce, Bureau of Economic Analysis (A4, B4)

245A. Change in business inventories as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

246. Gross private domestic investment, change in business inventories, all industries, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

247. Gross private domestic fixed investment, total nonresidential, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

248. Gross private domestic fixed investment, residential structures, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

249. Gross auto product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

250. Net exports of goods and services, excluding transfers under military grants (Q).—Department of Commerce, Bureau of Economic Analysis (A5, D2)

250A. Net exports of goods and services as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

252. Exports of goods and services, excluding transfers under military grants (Q).—Department of Commerce, Bureau of Economic Analysis (A5, D2)

253. Imports of goods and services (Q).—Department of Commerce, Bureau of Economic Analysis (A5, D2)

260. Government purchases of goods and services, total (Q).—Department of Commerce, Bureau of Economic Analysis (A6)

262. Federal Government purchases of goods and services, total (Q).—Department of Commerce, Bureau of Economic Analysis (A6)

262A. Federal Government purchases of goods and services as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

263. Federal Government purchases of goods and services, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

264. Federal Government purchases of goods and services, national defense (Q).—Department of Commerce, Bureau of Economic Analysis (A6, D3)

266. State and local government purchases of goods and services, total (Q).—Department of Commerce, Bureau of Economic Analysis (A6)

266A. State and local government purchases of goods and services as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

267. State and local government purchases of goods and services, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

270. Final sales, durable goods (Q).—Department of Commerce, Bureau of Economic Analysis (A7)

271. Change in business inventories, durable goods (Q).—Department of Commerce, Bureau of Economic Analysis (A7)

273. Final sales (series 205 minus series 246), 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)

274. Final sales, nondurable goods, (Q).—Department of Commerce, Bureau of Economic Analysis (A7)

275. Change in business inventories, nondurable goods (Q).—Department of Commerce, Bureau of Economic Analysis (A7)

280. Compensation of employees (Q).—Department of Commerce, Bureau of Economic Analysis (A8)

280A. Compensation of employees as a percent of national income (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

282. Proprietors' income (Q).—Department of Commerce, Bureau of Economic Analysis (A8)

282A. Proprietors' income as a percent of national income (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

284. Rental income of persons (Q).—Department of Commerce, Bureau of Economic Analysis (A8)

284A. Rental income of persons as a percent of national income (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

286. Corporate profits and inventory valuation adjustment (Q).—Department of Commerce, Bureau of Economic Analysis (A8)

286A. Corporate profits and inventory valuation adjustment as a percent of national income (Q).—Department of Commerce, Bureau of Economic Analysis (A11)

TITLES AND SOURCES OF SERIES—Continued

288. Net interest (Q).—Department of Commerce, Bureau of Economic Analysis (A8)
- 288A. Net interest as a percent of national income (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
290. Gross saving—private saving plus government surplus or deficit (Q).—Department of Commerce, Bureau of Economic Analysis (A9)
292. Personal saving (Q).—Department of Commerce, Bureau of Economic Analysis (A9)
294. Undistributed corporate profits plus inventory valuation adjustment (Q).—Department of Commerce, Bureau of Economic Analysis (A9)
296. Capital consumption allowances, corporate and noncorporate (Q).—Department of Commerce, Bureau of Economic Analysis (A9)
298. Government surplus or deficit, total (Q).—Department of Commerce, Bureau of Economic Analysis (A9)

B Cyclical Indicators

- *1. Average workweek of production workers, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1, B8, E3, E4)
2. Accession rate, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1)
3. Layoff rate, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1)
- *5. Average weekly initial claims for unemployment insurance, State programs (M).—Department of Labor, Manpower Administration; seasonal adjustment by Bureau of Economic Analysis (B1, E3)
- *6. Value of manufacturers' new orders, durable goods industries (M).—Department of Commerce, Bureau of the Census (B3, B8, E3, E4)
8. Index of construction contracts, total value (M).—McGraw-Hill Information Systems Company. (Used by permission. This series may not be reproduced without written permission from the source.) (B3)
9. Construction contracts awarded for commercial and industrial buildings, floor space (M).—McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (B3)
- *10. Contracts and orders for plant and equipment (M).—Department of Commerce, Bureau of the Census, and McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of the Census and Bureau of Economic Analysis (B3, B8)
11. Newly approved capital appropriations, 1,000 manufacturing corporations (Q).—The Conference Board (B3, E3)
- *12. Index of net business formation (M).—Department of Commerce, Bureau of Economic Analysis; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (B3, B8)
13. Number of new business incorporations (M).—Dun and Bradstreet, Inc.; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (B3)
14. Current liabilities of business failures (M).—Dun and Bradstreet, Inc. (B6)

15. Profits (after taxes) per dollar of sales, all manufacturing corporations (Q).—Federal Trade Commission and Securities and Exchange Commission; seasonal adjustment by Bureau of Economic Analysis (B5)
- *16. Corporate profits after taxes (Q).—Department of Commerce, Bureau of Economic Analysis (B5, B8)
- *17. Index of price per unit of labor cost—ratio, index of wholesale prices of manufactured goods (unadjusted) to seasonally adjusted index of compensation of employees (sum of wages, salaries, and supplements to wages and salaries) per unit of output (M).—Department of Commerce, Bureau of Economic Analysis; Department of Labor, Bureau of Labor Statistics; and Board of Governors of the Federal Reserve System (B5, B8)
18. Corporate profits after taxes, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (B5)
- *19. Index of stock prices, 500 common stocks (M).—Standard and Poor's Corporation (B5, B8, E3, F3)
20. Change in book value of manufacturers' inventories of materials and supplies (M).—Department of Commerce, Bureau of the Census (B4)
21. Average weekly overtime hours of production workers, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1)
22. Ratio of profits (after taxes) to income originating in corporate business (Q).—Department of Commerce, Bureau of Economic Analysis (B5)
- *23. Index of industrial materials prices (M).—Department of Labor, Bureau of Labor Statistics (B5, B8, E3, E4)
24. Value of manufacturers' new orders, capital goods industries, nondefense (M).—Department of Commerce, Bureau of the Census (B3)
25. Change in manufacturers' unfilled orders, durable goods industries (M).—Department of Commerce, Bureau of the Census (B4)
26. Buying policy—production materials, percent of companies reporting commitments 60 days or longer (M).—National Association of Purchasing Management (B4)
28. New private housing units started, total (M).—Department of Commerce, Bureau of the Census (B3)
- *29. Index of new private housing units authorized by local building permits (M).—Department of Commerce, Bureau of the Census (B3, B8)
- *31. Change in book value of manufacturing and trade inventories, total (M).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (B4, B8)
32. Vendor performance, percent of companies reporting slower deliveries (M).—Purchasing Management Association of Chicago (B4)
33. Net change in mortgage debt held by financial institutions and life insurance companies (M).—Institute of Life Insurance; Federal National Mortgage Association; Department of Housing and Urban Development, Government National Mortgage Association; National Association of Mutual Savings Banks; U.S. Savings and Loan League; and Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of Economic Analysis (B6)
34. Net cash flow, corporate, current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (B5)
35. Net cash flow, corporate, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (B5)
37. Percent of companies reporting higher inventories of purchased materials (M).—National Association of Purchasing Management; seasonal adjustment by Bureau of Economic Analysis (B4)
38. Percent of consumer installment loans delinquent 30 days and over (1 QM).—American Bankers Association; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (Bimonthly since December 1964) (B5)
40. Unemployment rate, married males, spouse (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census
- *41. Number of employees on nonagricultural payroll, establishment survey (M).—Department of Labor, Bureau of Labor Statistics (B1, B8, E3, E4)
42. Total number of persons engaged in nonagricultural activities, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census
- *43. Unemployment rate, total (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (B8)
- *44. Unemployment rate, 15 weeks and over (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (B1, E4)
45. Average weekly insured unemployment rate, State programs (M).—Department of Labor, Manpower Administration
46. Index of help-wanted advertising in newspaper (M).—The Conference Board
- *47. Index of industrial production (M).—Board of Governors of the Federal Reserve System (B2, B8, E3, E4)
48. Man-hours in nonagricultural establishments (M).—Department of Labor, Bureau of Labor Statistics
50. Number of job vacancies in manufacturing (E).—Department of Labor, Bureau of Labor Statistics
- *52. Personal income (M).—Department of Commerce, Bureau of Economic Analysis (B2, E4)
53. Wage and salary income in mining, manufacturing and construction (M).—Department of Commerce, Bureau of Economic Analysis
- *54. Sales of retail stores (M).—Department of Commerce, Bureau of the Census (B2, B8, E4)
55. Index of wholesale prices, industrial commodities (M).—Department of Labor, Bureau of Labor Statistics (B2)
- *56. Manufacturing and trade sales (M).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (B2)
57. Final sales (series 200 minus series 245) (Q).—Department of Commerce, Bureau of Economic Analysis
58. Index of wholesale prices, manufactured (M).—Department of Labor, Bureau of Labor Statistics (B5, D4)
59. Sales of retail stores, 1967 dollars (M).—Department of Commerce, Bureau of Economic Analysis
- *61. Business expenditures for new plant and equipment (Q).—Department of Commerce, Bureau of Economic Analysis (B3, B8, E4)
- *32. Index of labor cost per unit of output, manufacturing—ratio, index of compensation of employees in manufacturing (the sum of wages, salaries and supplements to wages and salaries) index of industrial production, manufacturing (M).—Department of Commerce, Bureau of Economic Analysis, and the Board of Governors of the Federal Reserve System (B5, E4)

TLES AND SOURCES OF RIES—Continued

β. Index of unit labor cost, total private economy (Q).—Department of Labor, Bureau of Labor Statistics (B5)

35. Manufacturers' inventories of finished goods, book value, all manufacturing industries (EOM).—Department of Commerce, Bureau of the Census (B4)

36. Consumer installment debt (EOM).—Board of Governors of the Federal Reserve System. FRS seasonally adjusted net change added to seasonally adjusted figure for previous month to obtain current figure (B6)

Bank rates on short-term business loans, 35 cities (Q).—Board of Governors of the Federal Reserve System (B6, B8)

68. Labor cost (current dollars) per unit of gross product (1958 dollars), nonfinancial corporations—ratio of current-dollar compensation of employees to gross corporate product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (B5)

Manufacturers' machinery and equipment sales and business construction expenditures (industrial and commercial construction put in place) (M).—Department of Commerce, Bureau of the Census (B3)

71. Manufacturing and trade inventories, total book value (EOM).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (B4, B8)

Commercial and industrial loans outstanding, weekly reporting large commercial banks (M).—Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of Economic Analysis (B6, B8)

Change in U.S. money supply (demand deposits plus currency) [M1] (M).—Board of Governors of the Federal Reserve System (B6)

8. Free reserves (member bank excess reserves minus borrowings) (M).—Board of Governors of the Federal Reserve System (B6)

96. Manufacturers' unfilled orders, durable goods industries (EOM).—Department of Commerce, Bureau of the Census (B3)

37. Backlog of capital appropriations, manufacturing (EOQ).—The Conference Board (B3)

Change in U.S. money supply plus time deposits at commercial banks other than large CD's [M2] (M).—Board of Governors of the Federal Reserve System (B6)

13. Change in U.S. money supply, plus time deposits at commercial banks other than large CD's, plus deposits at nonbank thrift institutions [M3] (M).—Board of Governors of the Federal Reserve System (B6)

9. Average prime rate charged by banks (M).—Board of Governors of the Federal Reserve System (B6)

0. Total funds raised by private nonfinancial borrowers in credit markets (Q).—Board of Governors of the Federal Reserve System (B6)

2. Net change in bank loans to businesses (M).—Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of Economic Analysis (B6)

3. Net change in consumer installment debt (M).—Board of Governors of the Federal Reserve System (B6, B8)

1. Discount rate on new issues of 91-day Treasury bills (M).—Board of Governors of the Federal Reserve System (B6)

Yield on long-term Treasury bonds (M).—Treasury Department (B6)

Yield on new issues of high-grade corporate bonds (M).—First National City Bank of New York and Treasury Department (B6)

Yield on municipal bonds, 20-bond average (M).—The Bond Buyer (B6)

118. Secondary market yields on FHA mortgages (M).—Department of Housing and Urban Development, Federal Housing Administration (B6)

119. Federal funds rate (M).—Board of Governors of the Federal Reserve System (B6)

*200. Gross national product in current dollars (Q). See in section A.

*205. Gross national product in 1958 dollars (Q). See in section A.

245. Change in business inventories (GNP component) (Q). See in section A.

810. Twelve leading indicators—reverse trend adjusted composite index (includes series 1, 5, 6, 10, 12, 16, 17, 19, 23, 29, 31, and 113) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

811. Twelve leading indicators—composite index prior to reverse trend adjustment (includes series 1, 5, 6, 10, 12, 16, 17, 19, 23, 29, 31, and 113) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

813. Marginal employment adjustments—leading composite index (includes series 1, 2, 3, and 5) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

814. Capital investment commitments—leading composite index (includes series 6, 10, 12, and 29) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

815. Inventory investment and purchasing—leading composite index (includes series 23, 25, 31, and 37) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

816. Profitability—leading composite index (includes series 16, 17, and 19) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

817. Sensitive financial flows—leading composite index (includes series 33, 85, 112, and 113) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

820. Five coincident indicators—composite index (includes series 41, 43, 47, 52, and 56) (M).—Department of Commerce, Bureau of Economic Analysis (B7, E5)

825. Five coincident indicators—deflated composite index (includes series 41, 43, 47, 52D, and 56D) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

830. Six lagging indicators—composite index (includes series 44, 61, 62, 67, 71, 72) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

C Anticipations and Intentions

61. Business expenditures for new plant and equipment, all industries (Q). See in section B.

410. Manufacturers' sales, total value (Q).—Department of Commerce, Bureau of the Census (C1)

412. Manufacturers' inventories, total book value (EOQ).—Department of Commerce, Bureau of the Census (C1)

414. Percent of total book value of inventories held by manufacturers classifying their holdings as high, less percent classifying holdings as low (EOQ).—Department of Commerce, Bureau of the Census (C1)

416. Percent of total gross capital assets held by companies classifying their existing capacity as inadequate for prospective operations over the next 12 months, less percent classifying existing capacity as excessive (EOQ).—Department of Commerce, Bureau of Economic Analysis (C1)

420. Current income of households compared to income a year ago (percent higher, lower, and unchanged) (Q).—Department of Commerce, Bureau of the Census (C1)

425. Mean probability (average chances in 100) of substantial changes (increase, decrease, and increase less decrease) in income of households (Q).—Department of Commerce, Bureau of the Census (C1)

430. Number of new cars purchased by households (Q).—Department of Commerce, Bureau of the Census (C1)

435. Index of consumer sentiment (Q).—University of Michigan, Survey Research Center (C1)

D440. New orders, manufacturing (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D442. Net profits, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D444. Net sales, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D446. Number of employees, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D450. Level of inventories, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D460. Selling prices, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D462. Selling prices, manufacturing (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D464. Selling prices, wholesale trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D466. Selling prices, retail trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)

D Other Key Indicators

55. Index of wholesale prices, industrial commodities (M). See in section B.

58. Index of wholesale prices, manufactured goods (M). See in section B.

211. Fixed weighted price index, gross private product (Q).—Department of Commerce, Bureau of Economic Analysis (D4)

250. Balance on goods and services; U.S. balance of payments (Q). See in section A.

252. Exports of goods and services, excluding transfers under military grants; U.S. balance of payments (Q). See in section A.

253. Imports of goods and services; U.S. balance of payments (Q). See in section A.

264. Federal Government purchases of goods and services, national defense (Q). See in section A.

500. Merchandise trade balance (Series 502 minus series 512) (M).—Department of Commerce, Bureau of the Census (D1)

502. Exports, excluding military aid shipments, total (M).—Department of Commerce, Bureau of the Census (D1)

TITLES AND SOURCES OF SERIES—Continued

506. Manufacturers' new orders for export, durable goods except motor vehicles and parts (M).—Department of Commerce, Bureau of the Census (D1)
508. Index of export orders for nonelectrical machinery (M).—McGraw-Hill, Department of Economics (D1)
512. General imports, total (M).—Department of Commerce, Bureau of the Census (D1)
515. Balance on goods, services and remittances; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
517. Balance on current account; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
519. Balance on current account and long term capital; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
521. Net liquidity balance; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
522. Official reserve transactions balance; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
530. Liquid liabilities (excluding military grants) to all foreigners, total outstanding; U.S. balance of payments (EOQ).—Department of Commerce, Bureau of Economic Analysis (D2)
532. Liquid and certain nonliquid liabilities (excluding military grants) to foreign official agencies, total outstanding; U.S. balance of payments (EOQ).—Department of Commerce, Bureau of Economic Analysis (D2)
534. U.S. official reserve (assets) position, excluding military grants; U.S. balance of payments (EOQ).—Department of Commerce, Bureau of Economic Analysis (D2)
536. Merchandise exports, adjusted, excluding military grants; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
537. Merchandise imports, adjusted, excluding military; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
540. U.S. investment income, military sales, and other services exports, excluding military grants; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
541. Foreigners' investment income, military expenditures and other services imports; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
542. Income on U.S. investments abroad; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
543. Income on foreign investments in the U.S.; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
544. Receipts from foreign travelers in the U.S.; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
545. Payments by U.S. travelers abroad; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
546. Military sales to foreigners; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
547. U.S. military expenditures abroad; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
548. Receipts for transportation and other services; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
549. Payments for transportation and other services; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
560. Foreign direct investments in the U.S.; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
561. U.S. direct investments abroad; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
564. Foreign purchases of U.S. securities; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
565. U.S. purchases of foreign securities; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
570. Government grants and capital transactions, net; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
575. Banking and other capital transactions, net; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
600. Federal Government surplus or deficit, national income and product accounts (Q).—Department of Commerce, Bureau of Economic Analysis (D3)
601. Federal Government receipts, national income and product accounts (Q).—Department of Commerce, Bureau of Economic Analysis (D3)
602. Federal expenditures, national income and product accounts (Q).—Department of Commerce, Bureau of Economic Analysis (D3)
616. Defense Department obligations incurred, total, excluding military assistance (M).—Department of Defense, Fiscal Analysis Division; seasonal adjustment by Bureau of Economic Analysis (D3)
621. Defense Department obligations incurred, procurement (M).—Department of Defense, Fiscal Analysis Division; seasonal adjustment by Bureau of Economic Analysis (D3)
625. Military prime contract awards to U.S. business firms and institutions (M).—Department of Defense, Directorate for Statistical Services; seasonal adjustment by Bureau of Economic Analysis (D3)
647. New orders, defense products industries (M).—Department of Commerce, Bureau of the Census (D3)
648. New orders, defense products (M).—Department of Commerce, Bureau of the Census (D3)
740. Index of average hourly earnings of production workers, private nonfarm economy—adjusted for overtime (in manufacturing only), interindustry employment shifts, and seasonality (M).—Department of Labor, Bureau of Labor Statistics (D5)
741. Index of real average hourly earnings of production workers, private nonfarm economy—adjusted for overtime (in manufacturing only), interindustry employment shifts, and seasonality (M).—Department of Labor, Bureau of Labor Statistics (D5)
745. Index of average hourly compensation, all employees, private nonfarm economy (Q).—Department of Labor, Bureau of Labor Statistics (D5)
746. Index of real average hourly compensation, all employees, private nonfarm economy (Q).—Department of Labor, Bureau of Labor Statistics (D5)
748. Negotiated wage and benefit decisions, all industries—first year average (mean) changes (I).—Department of Labor, Bureau of Labor Statistics (D)
749. Negotiated wage and benefit decisions, all industries—average (mean) changes over life of contract (Q).—Department of Labor, Bureau of Labor Statistics (D)
750. Index of wholesale prices, all commodities (M).—Department of Labor, Bureau of Labor Statistics (D4)
751. Index of wholesale prices, processed foods and feeds (M).—Department of Labor, Bureau of Labor Statistics (D4)
752. Index of wholesale prices, farm products (M).—Department of Labor, Bureau of Labor Statistics (D4)
770. Index of output per man-hour, total private (Q).—Department of Labor, Bureau of Labor Statistics (D)
781. Index of consumer prices (M).—Department of Labor, Bureau of Labor Statistics (D4, E5, F1)
782. Index of consumer prices, food (M).—Department of Labor, Bureau of Labor Statistics (D)
783. Index of consumer prices, commodities less food (M).—Department of Labor, Bureau of Labor Statistics (D)
784. Index of consumer prices, services (M).—Department of Labor, Bureau of Labor Statistics (D)
841. Total civilian labor force, labor force (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
842. Total civilian employment, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
843. Number of persons unemployed, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
844. Unemployment rate, males 20 years and over, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
845. Unemployment rate, females 20 years and over, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
846. Unemployment rate, both sexes 16-19 years of age, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
847. Unemployment rate, white, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
848. Unemployment rate, Negro and other races, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D)
856. Index of output per man-hour, total private nonfarm (Q).—Department of Labor, Bureau of Labor Statistics (D)
859. Real spendable average weekly earnings of production or nonsupervisory workers (with 3 dependents on private nonagricultural payrolls, 1967 dollars) (M).—Department of Labor, Bureau of Labor Statistics (D)

TITLES AND SOURCES OF SERIES—Continued

E Analytical Measures

47. Index of industrial production (M). See in section B.
48. Man-hours in nonagricultural establishments (M). See in section B.
200. GNP in current dollars (Q). See in section A.
205. Gross national product in 1958 dollars (Q). See in section A.
206. Potential level of gross national product in 1958 dollars (Q).—Council of Economic Advisers (E1)
207. Gap—the potential GNP (series 206) less the actual GNP (series 205) (Q).—Council of Economic Advisers (E1)
820. Five coincident indicators—composite index (includes series 41, 43, 47, 52, and 56) (M). See in section B.
850. Ratio, output to capacity, manufacturing (Q).—Board of Governors of the Federal Reserve System, Department of Commerce, and McGraw-Hill Economics Department (E2)
851. Ratio, inventories (series 71) to sales (series 56), manufacturing and trade total (EOM).—Department of Commerce, Bureau of Economic Analysis (E2)

Ratio, manufacturers' unfilled orders (series 96) to shipments, durable goods industries (EOM).—Department of Commerce, Bureau of the Census (E2)
53. Ratio, production of business equipment to production of consumer goods (M).—Board of Governors of the Federal Reserve System. (Based upon components of the Federal Reserve index of industrial production.) (E2)
854. Ratio, personal saving to disposable personal income (series 292 divided by series 224) (Q).—Department of Commerce, Bureau of Economic Analysis (E2)

857. Vacancy rate in rental housing—unoccupied rental housing units as a percent of total rental housing (Q).—Department of Commerce, Bureau of the Census (E2)
860. Ratio, help-wanted advertising in newspapers (series 46) to total number of persons unemployed (M).—The Conference Board, and Department of Labor, Bureau of Labor Statistics (E2)

The "D" preceding a number indicates a diffusion index. Diffusion indexes and corresponding aggregate series bear the same number and are obtained from the same sources. See section B for titles and sources of D1, D5, D6, D11, D19, D23, D41, D47, D54, D58, D61, and section C for D440, D442, D444, D446, D450, D460, D462, D464, D466, and D480. Sources for other diffusion indexes are as follows:

- D34. Profits, manufacturing, FNCB (Q).—First National City Bank of New York; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (E3)

F International Comparisons

19. United States, index of stock prices, 500 common stocks (M). See in section B.
47. United States, index of industrial production (M). See in section B.
121. Organization for Economic Cooperation and Development, European Countries, index of industrial production (M).—Organization for Economic Cooperation and Development (Paris) (F2)
122. United Kingdom, index of industrial production (M).—Central Statistical Office (London) (F2)
123. Canada, index of industrial production (M).—Dominion Bureau of Statistics (Ottawa) (F2)
125. West Germany, index of industrial production (M).—Statistisches Bundesamt (Wiesbaden); seasonal adjustment by OECD (F2)

126. France, index of industrial production (M).—Institut National de la Statistique et des Etudes Economiques (Paris) (F2)
127. Italy, index of industrial production (M).—Istituto Centrale di Statistica (Rome) (F2)
128. Japan, index of industrial production (M).—Ministry of International Trade and Industry (Tokyo) (F2)
132. United Kingdom, index of consumer prices (M).—Ministry of Labour (London) (F1)
133. Canada, index of consumer prices (M).—Dominion Bureau of Statistics (Ottawa) (F1)
135. West Germany, index of consumer prices (M).—Statistisches Bundesamt (Wiesbaden) (F1)
136. France, index of consumer prices (M).—Institut National de la Statistique et des Etudes Economiques (Paris) (F1)
137. Italy, index of consumer prices (M).—Istituto Centrale di Statistica (Rome) (F1)
138. Japan, index of consumer prices (M).—Office of the Prime Minister (Tokyo) (F1)
142. United Kingdom, index of stock prices (M).—The Financial Times (London) (F3)
143. Canada, index of stock prices (M).—Dominion Bureau of Statistics (Ottawa) (F3)
145. West Germany, index of stock prices (M).—Statistisches Bundesamt (Wiesbaden) (F3)
146. France, index of stock prices (M).—Institut National de la Statistique et des Etudes Economiques (Paris) (F3)
147. Italy, index of stock prices (M).—Istituto Centrale di Statistica (Rome) (F3)
148. Japan, index of stock prices (M).—Tokyo Stock Exchange (Tokyo) (F3)
781. United States, index of consumer prices (M). See in section D.

HOW'S BUSINESS?

To get the answer ... read the monthly **SURVEY OF CURRENT BUSINESS**

published by the Bureau of Economic Analysis, Social and Economic Statistics Administration, U.S. Department of Commerce.

SURVEY is for businessmen, government administrators, trade association executives, union officials, economists, statisticians, market researchers, and anyone else who wants to know, month by month, the state of the Nation's economy.

SURVEY carries articles on special subjects, such as State personal incomes, corporate profits, business programs for new plant and equipment, foreign trade, Federal Government receipts and expenditures, and current price developments.

SURVEY issues show more than 2,500 statistical series for each month of the past year or for each quarter over the past several years, plus annual data for recent years.

SURVEY is the official source of the Gross National Product statistics and the statistics on the U. S. Balance of Payments.

12 monthly issues averaging 70 pages, including about 40 of tabular material. And, at no extra cost, a weekly four-page supplement to keep the subscriber posted on current figures as they become available to the Bureau of Economic Analysis.
