BUREAU OF ECONOMIC ANALYSIS

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis This report was prepared in the Statistical Indicators Division, Bureau of Economic Analysis. Technical staff and their responsibilities for the publication are—

Morton Somer—Selection of seasonal adjustment methods,

Betty F. Tunstall—Collection and compilation of basic data. (Telephone 301-763-5448)

Editorial assistance is provided by Maureen Padgett of the Publications Services Division, Social and Economic Statistics Administration.

The cooperation of various government and private agencies which provide data is gratefully acknowledged. The agencies furnishing data are indicated in the list of series and sources at the back of this report.

This publication is prepared under the general guidance of a technical committee established by the Office of Management and Budget. The committee consists of the following persons:

Julius Shiskin, Chairman
Office of Management and Budget

Murray F. Foss, Council of Economic Advisors, Executive Office of the President

George Hay Brown, Bureau of the Census, Department of Commerce

George Jaszi, Bureau of Economic Analysis, Department of Commerce

Geoffrey H. Moore, Bureau of Labor Statistics, Department of Labor

Kenneth Williams, Federal Reserve Board

U. S. DEPARTMENT OF COMMERCE

Peter G. Peterson, Secretary

James T. Lynn, Under Secretary

Harold C. Passer, Assistant Secretary for Economic Affairs and Administrator,

Social and Economic Statistics Administration

Morris R. Goldman, Deputy Director
Feliks Tamm. Editor

NATIONAL INCOME AND PRODUCT accounts summarize both receipts and final expenditures for the personal, business, foreign, and government sectors of the economy and provide useful measures of total economic activity. The total of the final expenditures, which equals the total of the receipts, is known as gross national product, the most comprehensive single measure of aggregate economic output. GNP is defined as the total market value of the final output of goods and services produced by the Nation's economy.

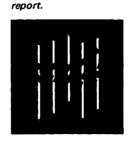

CYCLICAL **INDICATORS** are economic time series which have been singled out as leaders, coinciders, or laggers in relation to movements in aggregate economic activity. In this report, the series on the NBER's list of cyclical indicators are classified by economic process and by cyclical timing. These indicators were selected primarily on the basis of their cyclical behavior, but they have also proven useful in forecasting, measuring, and interpreting other short-term fluctuations in aggregate economic activity.

AND INTENTIONS data provide information on the plans of businessmen and consumers regarding their major economic activities in the near future. This information is considered to be a valuable aid to economic forecasting either directly or as an indication of the state of confidence concerning the economic outlook. A number of surveys by various organizations and government agencies have been developed in recent vears to ascertain anticipations and intentions. The results of some of these surveys, expressed as time series, are presented in this

ANTICIPATIONS

This monthly report brings together many of the economic time series found most useful by business analysts and forecasters. Its predecessor, Business Cycle Developments, emphasized the cyclical indicators approach to the analysis of business conditions and was based largely on the list of leading, roughly coincident, and lagging indicators maintained by the National Bureau of Economic Research, Inc. Some other approaches commonly used by students of economic conditions include econometric models and anticipations and intentions data. The econometric model concept utilizes historical and mathematical relationships among consumption, private investment, government, and various components of the major aggregates to generate forecasts of gross national product and its composition. Anticipations and intentions data express the expectations of businessmen and the intentions of consumers. Most of the content of Business Cycle Developments has been retained in this new report and additional data reflecting the emphasis of other approaches have been added to make it more generally useful to those concerned with an evaluation of current business conditions and prospects.

The use of the National Bureau's list of indicators and business cycle turning dates in the cyclical indicators section of this report, as well as the use of other concepts, is not to be taken as implying endorsement by the Bureau of Economic Analysis or any other government agency of any particular approach to economic analysis. This report is intended only to provide statistical information so arranged as to facilitate the analysis of the course of the Nation's economy.

Almost all of the basic data presented in this report have been published by their source agencies. A series finding guide, as well as a complete list of series titles and data sources, is shown at the back of this report.

Subscription price, including supplements, is \$15 a year (\$3.75 additional for foreign mailing). Single issues are \$1.50. Airmail delivery is available at an additional charge. For information about domestic or foreign airmail delivery, write to the Superintendent of

Documents (address below), enclosing a copy of your address label. Make checks payable to the Superintendent of Documents. Send to U.S. Government Printing Office, Washington D.C. 2002.

NEW FEATURES AND CHANGES FOR THIS ISSUE

nanges in this issue are as follows:

1. The series on factory labor turnover (series 2 and 3) and number of job vacancies in manufacturing (series 50) have been 'evised to reflect the source agency's annual updating of the penchmark and seasonal adjustment of establishment employment statistics.

Further information concerning this revision may be obtained from the U.S. Department of Labor, Bureau of Labor Statistics, livision of Industry and Employment Statistics.

- 2. The series on consumer installment credit (series 66 and 13) have been revised for the period 1965 to date. These revisions incorporate the source agency's adjustment of sample-based estimates to reflect recent benchmarks and computation of new seasonal factors. Additional information concerning these revisions may be obtained from the Board of Governors of the Federal Reserve System, Division of Research and Statistics, Mortgage, Agricultural, and Consumer Finance Section.
- 3. Appendix C includes historical data for series 6, 20, 29, 31, 50, 56, 65, 71, 250, 252, 253, 515, 517, 519, 521, 522, 536 537, 540-547, and 851.
- 4. Appendix D contains descriptions for series 39, 93, 72, and 112.
- 5. Appendix G contains recovery comparisons charts for series 43, 47, 85, 114, 115, 741, 781c, and 858.

The December issue of <u>BUSINESS CONDITIONS DIGEST</u> is scheduled for release on December 29.

A limited number of changes are made from time to time to incorporate recent findings of economic research, newly available time series, and revisions made by source agencies in concept, composition, comparability, coverage, seasonal adjustment methods, benchmark data, etc. Changes may result in revisions of data, additions or deletions of series, changes in placement of series in relation to other series, changes in composition of

indexes, etc.

4 SESA PROJECTS on economic fluctuations

BUSINESS CONDITIONS DIGEST

DEFENSE INDICATORS

LONG TERM ECONOMIC GROWTH

COMPUTER PROGRAMS FOR TIME SERIES ANALYSIS

A monthly report for analyzing economic fluctuations over a short span of years.

This report brings together approximately 600 monthly and quarterly economic time series in a form which is convenient for analysts whether their approach to the study of current business conditions and prospects is the national income model, the leading indicators. anticipations and intentions, or a combination of these. Other types of data such as foreign trade, Federal government activities, and international comparisons of consumer prices, stock prices, and industrial production are included to facilitate a more complete analysis. Data are presented in charts and tables, and appendixes are included which provide historical data, series descriptions, seasonal adjustment factors, and measures of variability. Also, a computer tape containing data for most of the series in the report is available for purchase.

A monthly report for analyzing the current and prospective impact of defense activity on the national economy.

This report brings together the principal time series on defense activities which influence short-term changes in the national economy. These include series on obligations, contracts, orders, shipments, inventories, expenditures, employment, and earnings. The approximately 50 time series included are grouped in accordance with the time at which the activities they measure occur in the defense order-production-delivery process. Most are monthly series, although a few are quarterly. This publication provides original and seasonally adjusted basic data in monthly, quarterly, and annual form. Charts and analytical tables are included to facilitate interpretation.

A report for the study of economic fluctuations over a long span of years, 1860–1965.

This report has been developed from available statistics to provide a comprehensive, long-range view of the U.S. economy. It has been planned, prepared, and published as a basic research document for economists, historians, investors, teachers, and students. It brings together for the first time under one cover, in meaningful and convenient form, the complete statistical basis for a study of long-term economic trends. It is a unique presentation of the full range of factors required for an understanding of our country's economic development. Some of the statistical series go back to 1860. A computer tape file of the time series included in the report is available for purchase.

The source statements for FORTRAN IV programs which are used by the Bureau in its analysis of time series are available from the Bureau on a single computer tape.

SEASONAL ADJUSTMENT PROGRAMS.—Two variants of the Census computer program for measuring and analyzing seasonal, tradingday, cyclical, and irregular fluctuations and the relations among them. They are particularly useful in analyzing economic fluctuations which take place within a year. The X-11 variant is used for adjusting monthly data and the X-11Q for quarterly data. These programs can make additive as well as multiplicative adjustments and compute many summary and analytical measures of the behavior of each series.

DIFFUSION INDEX
PROGRAM.—A computer
program for computing diffusion indexes, cumulated
diffusion indexes, and
summary measures of the
properties of each index.

METHOD OF PRESENTATION

THIS REPORT is organized into six major subject sections, as follows:

- A. National Income and Product
- B. Cyclical Indicators
- C. Anticipations and Intentions
- D. Other Key Indicators
- E. Analytical Measures
- F. International Comparisons

Each of these sections is described briefly in this introduction. Data for each of the above sections are shown both in Part I (charts) and in Part II (tables) of the report. Most charts begin with 1950 (except in section C where they begin with 1957); the tables contain data for only the last few years. Except for section F, most charts contain shading which indicates periods of recession in general business activity.

In addition to the charts and tables described above, some issues contain a summary table which shows the current behavior of many of the series, and several appendixes which present historical data, series descriptions, seasonal adjustment factors, and measures of variability. An index appears at the back of each issue. It should be noted that the series numbers used are for identification purposes only and do not reflect relationships or order.

Seasonal Adjustments

Adjustments for average seasonal fluctuations are often necessary to bring out the underlying trends of time series. Such adjustments allow for the effects of repetitive intrayear variations resulting primarily from normal differences in weather conditions and from various institutional arrangements. Variations attributable to holidays are usually accounted for by the seasonal adjustment process; however, a separate holiday adjustment is occasionally required for holidays with variable dates, such as Easter. An additional adjustment is sometimes necessary for series which contain considerable variation due to the number of working or trading days in each month. As used in this report, the term "seasonal adjustment" includes trading-day and holiday adjustments where they have been made.

Most of the series in this report are presented in seasonally adjusted form and, in most cases, these are the official figures released by the source agencies. However, for the special purposes of this report, a number of series not ordinarily published in seasonally adjusted form are shown here on a seasonally adjusted basis.

MCD Moving Averages

Month-to-month changes in a series are often dominated by erratic movements. MCD (months for cyclical dominance) is an estimate of the appropriate span over which to observe cyclical movements in a monthly series. (See appendix A.) It is the smallest span of months for which the average change in the cyclical factor is greater than that in the irregular factor. The more erratic a series is, the larger the MCD will be; thus, MCD is 1 for the smoothest series and 6 for the most erratic. MCD

moving averages (that is, moving averages of the period equal to MCD) tend to have about the same degree of smoothness for all series. Thus, a 5-term moving average of a series with an MCD of 5 will show its cyclical movements about as clearly as the seasonally adjusted data for a series with an MCD of 1.

The charts for sections B and D include centered MCD moving averages for all series with an MCD greater than 4. The seasonally adjusted data are also plotted to indicate their variation about the moving averages and to provide observations for the most recent months.

Reference Turning Dates

The historical business cycle turning dates used in this report are those designated by the National Bureau of Economic Research, Inc. (NBER). They mark the approximate dates when, according to the NBER, aggregate economic activity reached its cyclical high or low levels. As a matter of general practice, neither new reference turning dates nor the shading for recessions will be entered on the charts until after both the new reference peak and the new reference trough bounding the shaded area have been designated. This policy is followed because of the conceptual and empirical difficulties of designating a current recession and the practical difficulties of terminating the shading of a current recession without including part of a new expansion.

SECTION A

NATIONAL INCOME AND PRODUCT

The national income and product accounts, compiled by the Bureau of Economic Analysis (BEA) summarize both receipts and final expenditures for the personal, business, foreign, and government sectors of the economy and provide useful measures of total economic activity. The total of the final expenditures (including additions to business inventories), which equals the total of the receipts (mainly incomes), is known as gross national product (GNP). GNP is defined as the total market value of the final output of goods and services produced by the Nation's economy. It is the most comprehensive single measure of aggregate economic output.

Gross national product consists of four major components: (1) Personal consumption expenditures, (2) gross private domestic investment, (3) net exports of goods and services, and (4) government purchases of goods and services.

Personal consumption expenditures is the market value of goods (durable and non-durable) and services purchased by individuals and nonprofit institutions and the value of food, clothing, housing, and finan-

cial services received by them as income in kind. The total purchase cost is covered, including sales taxes. Home purchases are excluded, but the estimated rental value of owner-occupied homes is included.

Gross private domestic investment combines gross fixed investment and net changes in business inventories. Fixed investment consists of producers' durable equipment and private (as opposed to government) structures, including owner-occupied residential units. The estimates are gross in the sense that there is no deduction for capital consumption. The inventory component measures the change in the physical volume of inventories valued at current replacement cost.

Net exports of goods and services measures the excess of exports over imports. Exports include receipts from domestic output sold abroad, transportation, travel, other services, fees and royalties and income on investments in foreign areas. Imports include purchases of foreign goods, payments for transportation, travel and other services, military expenditures as well as payments of income on foreign investments in the United States. More detail on U.S. balance of payments is provided in Section D.

Government purchases of goods and services includes general government expenditures for compensation of employees, net purchases from business and from abroad, payments to private nonprofit institutions for research and development, and the gross fixed investment of government enterprises. Not included are current outlays of government enterprises, acquisitions of land, transfer payments, subsidies, loans, and interest payments to domestic creditors.

A breakdown of the goods portion of GNP, covering durable and nondurable goods and both final sales and changes in business inventories, is also included in section A. Other major aggregates taken from the national income and product accounts are described below.

National income is the total earnings arising from the current production of goods and services and accruing to the labor and property employed in production. The components of national income are compensation of employees, proprietors' income, rental income of persons, corporate profits and the inventory valuation adjustment, and net interest.

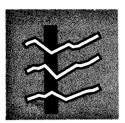

Personal income measures the current income of individuals, owners of unincorporated businesses, nonprofit institutions, private trust funds, and private health and welfare funds. It consists of wage and salary disbursements, other labor income, proprietors' income, rental income of persons, dividends, personal interest income, and transfer payments to persons, less personal contributions for social insurance.

Disposable personal income is the personal income available for spending or saving. It consists of personal income less personal taxes and other nontax payments to general government.

Gross saving represents the difference between income and spending during an

accounting period. It is the total of personal saving, undistributed corporate profits, corporate inventory valuation adjustment, the excess of wage accruals over disbursements (usually negligible), government surplus or deficit, and capital consumption allowances.

Most of the series in this section are on a current-dollar basis, but some are shown on a constant (1958) dollar basis so that the effects of price changes are eliminated. The implicit price deflator (computed by dividing the current-dollar data by the constant-dollar data) for total GNP is also shown.

SECTION B

CYCLICAL **INDICATORS**

The business cycle is generally described as consisting of alternating periods of expansion and contraction in aggregate economic activity; that is, the complex of activities represented by such concepts as total production, employment, income, consumption, trade, and the flow of funds. Although a recurrent pattern has been characteristic of American economic history, many economists do not consider it inevitable.

One of the techniques developed in business cycle research is widely used as a tool for analyzing current economic conditions and prospects. This is the cyclical indicators concept, which singles out certain economic time series as being leaders, coinciders, or laggers in relation to movements in aggregate economic activity. The NBER has, since 1938, maintained a list of such indicators and has periodically subjected the list to extensive review. Their most recent (1966) list of 73 cyclical indicators is the basis for this section of BCD. These indicators were selected primarily for their cyclical behavior, but they have also proven useful in forecasting, measuring, and interpreting other short-term fluctuations in aggregate economic activity.

The NBER employs a dual classification scheme which groups the indicators by cyclical timing and by economic process, and this report uses the same classification groupings. The diagram below summarizes the cross-classification system used in this section. The 78 cyclical indicators are presented with economic process as the principal basis of classification and cyclical timing as the secondary basis. The major processes are divided into minor processes which exhibit rather distinct differences in cyclical timing. The timing classification takes into account a series' historical record of timing at business cycle peaks and troughs. Leading indicators are those which usually reach peaks or troughs before the corresponding turns in aggregate economic activity; roughly coincident indicators are direct measures of aggregate economic activity or move roughly together with it; lagging indicators usually reach their turning points after the turns in aggregate economic activity.

The NBER has also specified a "short list" of indicators. This more selective and substantially unduplicated group of principal indicators is drawn from the full list and provides a convenient summary of the current situation. The short list consists of 26 series: 12 leading, eight roughly coincident, and six lagging. Only five of these are quarterly series; the rest are monthly. The short list is classified only by timing and is shown separately in chart B8.

Included in this section are a number of composite indexes which provide simple summary measures of the average behavior of selected groups of indicators. Each component of an index is weighted according to its value in forecasting or identifying short-term movements in aggregate economic activity. The components are standardized so that each has, aside from its weight, an equal opportunity to influence the index. Each index is standardized so that its average month-to-month percent change is I (without regard to sign).

The composite indexes presented in this report are based on groups of indicators selected by timing. Thus, there is an index of leading indicators, another of coincident indicators, and a third of lagging indicators. In addition, there are five indexes based on leading indicators which have been grouped by economic process. These indexes indicate the underlying cyclical trends of each group of indicators and the relative magnitude of their short-term changes. The index of 12 leading indicators has been "reverse trend adjusted" so that long-run trend parallels that coincident index. This facilitates

Cross-Classification of Cyclical Indicators by **Economic Process and Cyclical Timing**

Economic Process Cyclical Timing	I. EMPLOYMENT AND UNEMPLOYMENT (14 series)	II. PRODUCTION, INCOME, CONSUMPTION, AND TRADE (9 series)	III. FIXED CAPITAL INVESTMENT (14 series)	IV. INVENTORIES AND INVENTORY INVESTMENT (9 series)	V. PRICES, COSTS, AND PROFITS (14 series)	VI. MONEY AND CREDIT (18 series)
LEADING INDICATORS (40 series)	Marginal employment adjustments (5 series)		Formation of business enterprises (2 series) New investment commitments (8 series)	Inventory investment and purchasing (7 series)	Sensitive commodity prices (1 series) Stock prices (1 series) Profits and profit margins (5 series) Cash flows (2 series)	Flows of money and credit (7 series) Credit difficulties (2 series)
ROUGHLY COINCIDENT INDICATORS (26 series)	Job vacancies (2 series) Comprehensive employment (3 series) Comprehensive unemployment (3 series)	Comprehensive production (3 series) Comprehensive income (2 series) Comprehensive consumption and trade (4 series)	14. The state of t		Comprehensive wholesale prices (2 series)	Bank reserves (1 series) Money market interest rates (4 series)
LAGGING INDICATORS (12 series)	Long-duration unemployment (1 series)		Investment expenditures (2 series)	Inventories (2 series)	Unit labor costs (3 series)	Outstanding debt (2 series) Interest rates on business loans and mortgages (2 series)

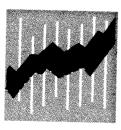

comparisons among the leading, coincident, and lagging indexes and tends to shorten the leads of the leading index at business cycle peaks while lengthening them at troughs; it also reduces the variability of the leads and lags.

SECTION C

ANTICIPATIONS AND INTENTIONS

Most businessmen and many individual consumers have some type of plans as to their major economic activities in the near future. Information on these plans is regarded as a valuable aid to economic forecasting either directly or as an indication of the state of confidence concerning the economic outlook. In recent years, much progress has been made in compiling such information, and a number of surveys by various organizations and government agencies ascertain anticipations and intentions of businessmen and consumers. The results of some of these surveys, expressed as time series, are presented in this section of the report.

The business analyst who uses these series should be aware of their limitations. These data reflect only the respondents' anticipations (what they expect others to do) or intentions (what they plan to do), not firm commitments. Among both businessmen and consumers, some responses may not be very reliable; that is, the plans may be conjectural or the respondent may make little effort to reply accurately to the survey questions. Also, many plans are subject to modification or even complete abandonment due to unforeseen and uncontrollable developments. In some cases, the anticipations (or intentions) may have a systematic bias; for example, the anticipations (or intentions) data may tend to be lower than the subsequent actual data under certain economic conditions and higher under other conditions. Sometimes they merely project what has already occurred and hence appear to lag behind actual changes. Actual data are included in this section to indicate their historical relationship to the anticipations and intentions. Some of the series are diffusion indexes, a concept explained in the description for section E.

SECTION D

OTHER KEY INDICATORS

Many economic series are available which, although not included in the three main sections of the report, are nevertheless important for an overall view of the economy. This section presents a number of such series, though by no means a com-

prehensive selection. In general, these series reflect processes which are not direct measures of economic activity but which do have a significant bearing on business conditions.

The foreign trade and payments series include data on imports and exports and their balance, export orders, and the balance of payments. Many of the components of the balance-of-payments accounts are shown. Some are charted in a manner which emphasizes the balance between receipts and expenditures for each component; for example, comparisons of exports of goods and services with imports of goods and services, and income on U.S. investments abroad with payments on foreign investments in the United States. In addition, balances are shown for U.S. Government grants and capital transactions and for capital transactions of the private sector (banks and U.S. residents other than banks). Finally, cumulative changes are shown for other components; for example, U.S. liquid liabilities to all foreigners and U.S. official reserve assets. Because these data are influenced by foreign as well as domestic conditions, the cyclical shading has been omitted from the balance-of-payments charts.

The Federal Government activities series include Federal receipts and expenditures and their balance, and selected Federal defense activities. The receipts and expenditures data are from the national income and product accounts, but are not shown in section A of this report. The defense series included are only a few of the many available. For a more comprehensive picture of defense activities, see Defense Indicators, a monthly Bureau of Economic Analysis publication.

The price movements series consist of consumer and wholesale price indexes and their major components. Additional data on prices and costs are shown in several other sections.

SECTION E

ANALYTICAL MEASURES

This section begins by comparing gross national product in constant dollars with a measure of potential GNP. In effect, these two series reflect the relationship between the economy's productive capacity and total demand, the excess of potential over actual GNP indicating the degree to which potentially productive resources are not fully utilized. The measure of potential GNP, developed by the Council of Economic Advisers in the early 1960's, takes into account increases in both available man-hours and output per man-hour.

The NBER list of cyclical indicators includes some series which measure the relationship between different economic variables (for example, the series on labor cost per unit of output). There are, however, additional analytical ratios which have proven useful in evaluating business conditions and prospects. A number of such ratios are shown in the second part of this section.

The third part presents a selection of diffusion indexes. Many series in this report are aggregates compiled from a number of components. A diffusion index is a summary measure expressing, for a particular aggregate, the percentage of components rising over a given timespan (half of the unchanged components are considered rising). Cyclical changes in diffusion indexes tend to lead those of the corresponding aggregates. Since diffusion indexes are highly erratic, long-term (6- or 9-month span) indexes are used to indicate underlying trends and short-term (1month span) indexes are used to show recent developments. Most of the indexes are constructed from components of series shown in section B, and these indexes have the same identification numbers as the corresponding aggregates. The diffusion indexes are classified by the cyclical timing of the aggregates to which they relate. Recent data and directions of change for many of the components are shown in table E4.

The final part (E5) presents, in chart form, rates of change for a selected group of economic series. Percent changes are shown for 1- and 3-month spans or for 1-quarter spans.

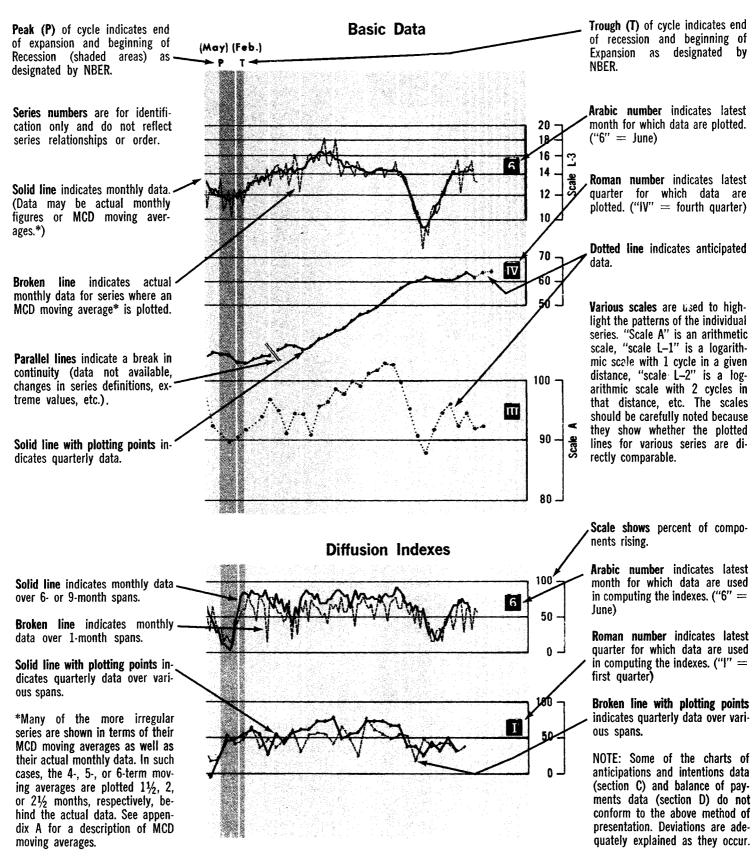

SECTION F

INTERNATIONAL COMPARISONS

Because this report is designed as an aid to the analysis of U.S. business conditions, all previous sections are based on data which relate directly to that purpose. But many business analysts examine economic developments in other important countries with a view to their impact on the United States. This section is provided to facilitate a quick review of basic economic conditions in six of the nations with which we have important trade relationships.

Data on consumer prices, industrial production, and stock prices are shown for Canada, the United Kingdom, France, West Germany, Japan, and Italy and are compared with the corresponding U.S. series. Also included is an industrial production index for the European countries in the Organization for Economic Cooperation and Development. The industrial production series provide a comprehensive measure of output and the consumer price indexes measure an important sector of prices, while stock prices tend to be important as leading indicators. In this section, the U.S. business cycle shading has been omitted from the charts.

HOW TO READ CHARTS

HOW TO LOCATE A SERIES

- See ALPHABETICAL INDEX—SERIES FINDING GUIDE in the back of the report where series are arranged alphabetically according to subject matter and key words and phrases of the series titles,
- See TITLES AND SOURCES OF SERIES where series are listed in numerical order according to series numbers within each of the Digest's six sections.

NOTE: Series are seasonally adjusted except for those indicated by ①, which appear to contain no seasonal movement. *Series included in the 1966 NBER "short list" of indicators. NA = not available.

a = anticipated. EOP = end of period. S/A = seasonally adjusted (used for special emphasis). For complete series titles (including composition of composite indexes) and sources, see "Titles and Sources of Series" in the back of BCD.

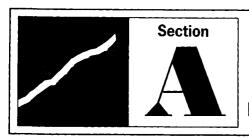

¹For a few series, data shown here have been rounded to fewer digits than those shown in the tables in part II. Where available, annual figures are those published by the source agencies; otherwise, they (and the quarterly figures for monthly series) are averages of the data as shown in part II.

²Differences rather than percent changes are shown for this series.

³Index for the latest month excludes 12, 16, 31, and 113, for which data are not yet available.

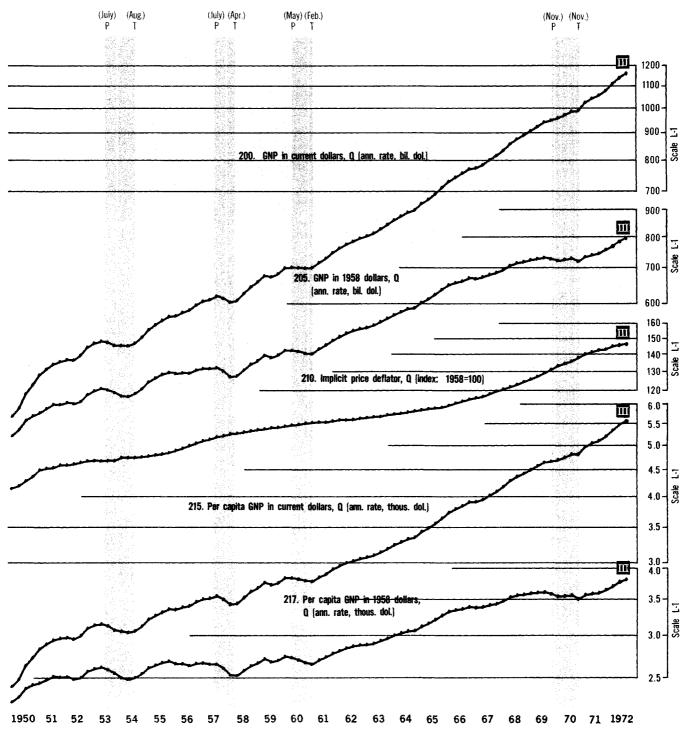

⁴Inverted series. Since this series tends to move counter to movements in general business activity, signs of the changes are reversed.

⁵End-of-period series. The annual figures (and quarterly figures for month series) are the last figures for the period.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by (a). Current high values are indicated by (B); for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 44, 45, and 93), current low values are indicated by (B). Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators (chart B8). The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "MA" not available. Greeks of these series are shown on page 25.24 and 42.

See "New Features and Changes for This Issue," page iii.

NOVEMBER 1972 BCD

and "NA", not available. Graphs of these series are shown on pages 35, 36 and 42.

¹No current high. The survey in which these data are collected was revised, beginning with the 1st quarter 1971; thus, data from that point are not strictly comparable with earlier data. ³Average for weeks ended November 1, 8, and 15.⁴Average for weeks ended November 2, 9, and 16.

Sale November 2, 9, and 16.

Sale November 3, 10, and 17.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ①. Current high values are indicated by ①; for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 44, 45, and 93), current low values are indicated by ①. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators (chart B8). The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 37 and 38.

Federal Reserve Bank of St. Louis

Reverse trend adjusted index of 12 leaders contains the same trend as the index of 5 coincident indicators.

Data beginning with January 1971 are not strictly comparable with earlier data because of technical changes in the collection of data for one of the components (series 67).

Excludes series 12, 16, 31, and 113 for which data are not yet available.

Excludes series 56 for which data are not yet available.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ①. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on page 62.

¹Beginning with January 1972, the 1970 Census is used as the benchmark for computing the unemployment component of this series. Prior to January 1972, the 1960 Census is used as the benchmark.

NOTE: Figures are the percent of series components rising (half of the unchanged components are considered rising). Data are centered within spans: 1-month indexes are placed on latest month and 9-month indexes are placed on the 6th month of span; 1-quarter indexes are placed on the 1st month of the 2d quarter and 3-quarter indexes are placed on the 1st month of the 3d quarter. Seasonally adjusted components are used except in index D19 which requires no adjustment and index D34 which is adjusted only for the index. Table E4 identifies the components for most of the indexes shown. The "r" indicates revised; "p", preliminary; and "NA", not available. Graphs of these series are shown on page 63.

3 Average for November 6 and 14.

Federal Reserve Bank of St. Louis

¹This is a copyrighted series used by permission; it may not be reproduced without written permission from The Conference

Board.

Based on 75 components through March 1970, on 73 components through May 1970, on 72 components through August 1972, and on 71 components thereafter. Component data are not shown in table E4 but are available from the source agency.

NOTE: Figures are the percent of series components rising (half of the unchanged components are considered rising). Data are centered within spans: 1-month indexes are placed on latest month, 6-month indexes are placed in the 4th month, and 9-month indexes are placed on the 6th month of span. Seasonally adjusted components are used except in index D58 which requires no adjustment. Table E4 identifies the components for the indexes shown. The "r" indicates revised; "p", preliminary; and "NA", not available. Unadjusted series are indicated by.

NOVEMBER 1972 BCD

Graphs of these series are shown on pages 63 and 64.

1 Component data are not available for publication and therefore are not shown in table E4.

² Data entered for 1972 are not strictly comparable with earlier data. See "New Features and Changes for This Issue," page iii of the October 1972 issue.

³ Data beginning with August 1971 are not comparable with earlier data due to a revised sample.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ①. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 67 and 68.

BRIEF DEFINITIONS OF MEASURES SHOWN IN PART 1

The following are brief definitions; more complete explanations appear in Electronic Computers and Business Indicators, by Julius Shiskin, issued as Occasional Paper 57 by the National Bureau of Economic Research, 1957 (reprinted from Journal of Business, October 1957).

" $\overline{\text{Cl}}$ " is the average quarter-to-quarter percentage change, without regard to sign, in the seasonally adjusted series or, if the series contains no measurable seasonal, in the unadjusted series.

" \overline{C} " is the same for the cyclical component, a smooth, flexible moving average of the seasonally adjusted series.

"I" is the same for the irregular component, obtained by dividing the cyclical component into the seasonally adjusted series.

"QCD" (quarters for cyclical dominance) provides an estimate of the appropriate time span over which to observe cyclical movements in a quarterly series. It is small for smooth series and large for irregular series. In deriving QCD, percentage changes are computed separately for the irregular component and the cyclical component over 1-quarter spans (1st quarter-2d quarter, 2d quarter-3d quarter, etc.), 2-quarter spans (1st quarter-3d quarter, 2d quarter-4th quarter, etc.), up to 4-quarter spans. Averages, without regard to sign, are then computed for the changes over each span. QCD is the shortest span in quarters for which the average percentage change (without regard to sign) in the cyclical component is larger than the average percentage change (without regard to sign) in the irregular component,

and remains so. Thus, it indicates the point at which fluctuations in the seasonally adjusted series became dominated by cyclical rather than irregular movements. All series with a QCD greater than "2" are shown as "3"

" $\overline{I}/\overline{C}$ " is a measure of the relative smoothness (small values) or irregularity (large values) of the seasonally adjusted series. It is shown for 1-quarter spans and for spans of the period of QCD, When QCD is "3", no $\overline{I}/\overline{C}$ ratio is shown for the QCD period.

"Average Duration of Run" (ADR) is another measure of smoothness and is equal to the average number of consecutive quarterly changes in the same direction in any series of observations. When there is no change between 2 quarters, a change in the same direction as the preceding change is assumed. The ADR is shown for the seasonally adjusted series CI, irregular component I, cyclical component C, and the QCD curve. The QCD curve is an unweighted moving average (with the number of terms equal to QCD) of the seasonally adjusted series.

A comparison of these measures of ADR with the expected ADR of a random series gives an indication of whether the changes approximate those of a random series. Over 1-quarter intervals in a random series, the expected value of the ADR is 1.5. The actual value of ADR falls between 1.36 and 1.75 about 95 percent of the time. Over 1-quarter intervals in a moving average (QCD) of a random series, the expected value of ADR is 2.0. For example, the ADR of CI is 1.47 for the series on the ratio of personal saving to disposable personal income (series 854). This indicates that 1-quarter

changes in the seasonally adjusted series, on the average, reverse sign about as often as expected in a random series. The ADR measures shown in the next two columns, 1.30 for I and 3.63 for C, suggest that the seasonally adjusted series has been successfully separated into an essentially random component and a cyclical (nonrandom) component. Finally, ADR is 3.24 for the QCD moving average. This indicates that a 2-quarter moving average of the seasonally adjusted series

(2 quarters being the QCD span) reverses direction, on the average, about every 3 quarters. The increase in the ADR from 1.47 for CI to 3.24 for the QCD moving average indicates that, for this series, quarter-to-quarter changes in the QCD moving average usually reflect the underlying cyclical trend movements of the series, whereas the quarter-to-quarter changes in the seasonally adjusted series usually do not.

^{*}Series included in the 1966 NBER "short list" of 26 indicators. when QCD is "3."

BRIEF DEFINITIONS OF MEASURES SHOWN IN PART 2

These measures are computed by an additive method. This method is used for series with zero or negative data and for other series where it seems appropriate, such as series expressed in percent.

Thus, " $\overline{\text{Cl}}$ " is the average quarter-to-quarter change in the seasonally adjusted series. This average is computed without regard to sign and is expressed in the same unit of measure as the series itself.

" \overline{C} " is the same for the cyclical component, which is a moving average of the seasonally adjusted series.

" $\overline{1}$ " is the same for the irregular component, which is determined by subtracting the cyclical component from the seasonally adjusted series.

All other measures have the same meaning as in part 1.

⁽¹⁾ Measures are based on unadjusted data.

NOTE: These series are not published in seasonally adjusted form by the source agency (except series 13 and D34). Seasonal adjustments were made by the Bureau of Economic Analysis or the National Bureau of Economic Research, Inc. They are kept current by the Bureau of Economic Analysis. Seasonally adjusted data prepared by the source agency will be substituted whenever they are published. For a description of the method used to compute these factors, see Bureau of the Census Technical Paper No. 15, The X-11 Variant of the Census Method II Seasonal Adjustment Program.

¹Factors are products of seasonal and trading-day factors.

²Quarterly series; figures are placed in middle month of quarter.

³These quantities, in millions of dollars, are to be subtracted from the month-to-month net change in the unadjusted monthly totals to yield the seasonally adjusted net change. They were computed by the additive version of the X-ll variant of the Census

Method II seasonal adjustment program.

*Bimonthly series. Factors are for even-numbered months (February, April, June, August, October, and December).

51-quarter diffusion index: Figures are placed in the 1st month of the quarter. The unadjusted diffusion index is computed and the factors, computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program, are subtracted to yield the seasonally adjusted index.

C. Historical Data for Selected Series

This appendix contains historical data (back to 1945 if available) for selected <u>BCD</u> series. Data are published here for (a) series which have been added to the report, (b) series which have been revised, and (c) series which have not been shown here for a long time. See the "Index-Series Finding Guide" for the latest issue in which historical data were published for each series. Data are seasonally adjusted unless the symbol @ (indicating unadjusted

data) follows the series title. Official source agency annual figures are shown if available. Such figures are often based on data with more digits or on data which have not been seasonally adjusted; therefore, they may differ slightly from annual figures based on the monthly or quarterly data shown here. Current figures are shown in the basic data tables of the report and may be used to update the tables below.

 $^1{\rm This}$ series contains revisions beginning 1966. $^2{\rm This}$ series contains revisions beginning 1960.

(NOVEMBER 1972)

C. Historical Data for Selected Series-Continued

This appendix contains historical data (back to 1945 if available) for selected <u>BCD</u> series. Data are published here for (a) series which have been added to the report, (b) series which have been revised, and (c) series which have not been shown here for a long time. See the "Index--Series Finding Guide" for the latest issue in which historical data were published for each series. Data are seasonally adjusted unless the symbol @ (indicating unadjusted

data) follows the series title. Official source agency annual figures are shown if available. Such figures are often based on data with more digits or on data which have not been seasonally adjusted; therefore, they may differ slightly from annual figures based on the monthly or quarterly data shown here. Current figures are shown in the basic data tables of the report and may be used to update the tables below.

(NOVEMBER 1972)

C. Historical Data for Selected Series-Continued

This appendix contains historical data (back to 1945 if available) for selected <u>BCD</u> series. Data are published here for (a) series which have been added to the report, (b) series which have been revised, and (c) series which have not been shown here for a long time. See the "Index--Series Finding Guide" for the latest issue in which historical data were published for each series. Data are seasonally adjusted unless the symbol (1) (indicating unadjusted

data) follows the series title. Official source agency annual figures are shown if available. Such figures are often based on data with more digits or on data which have not been seasonally adjusted; therefore, they may differ slightly from annual figures based on the monthly or quarterly data shown here. Current figures are shown in the basic data tables of the report and may be used to update the tables below.

C. Historical Data for Selected Series

This appendix contains historical data (back to 1945 if available) for selected <u>BCD</u> series. Data are published here for (a) series which have been added to the report, (b) series which have been revised, and (c) series which have not been shown here for a long time. See the "Index-Series Finding Guide" for the latest issue in which historical data were published for each series. Data are seasonally adjusted unless the symbol (1) (indicating unadjusted

data) follows the series title. Official source agency annual figures are shown if available. Such figures are often based on data with more digits or on data which have not been sea-sonally adjusted; therefore, they may differ slightly from annual figures based on the monthly or quarterly data shown here. Current figures are shown in the basic data tables of the report and may be used to update the tables below.

C. Historical Data for Selected Series-Continued

This appendix contains historical data (back to 1945 if available) for selected <u>BCD</u> series. Data are published here for (a) series which have been added to the report, (b) series which have been revised, and (c) series which have not been shown here for a long time. See the "Index--Series Finding Guide" for the latest issue in which historical data were published for each series. Data are seasonally adjusted unless the symbol ① (indicating unadjusted

data) follows the series title. Official source agency annual figures are shown if available. Such figures are often based on data with more digits or on data which have not been seasonally adjusted; therefore, they may differ slightly from annual figures based on the monthly or quarterly data shown here. Current figures are shown in the basic data tables of the report and may be used to update the tables below.

C. Historical Data for Selected Series-Continued

This appendix contains historical data (back to 1945 if available) for selected <u>BCD</u> series. Data are published here for (a) series which have been added to the report, (b) series which have been revised, and (c) series which have not been shown here for a long time. See the "Index-Series Finding Guide" for the latest issue in which historical data were published for each series. Data are seasonally adjusted unless the symbol ① (indicating unadjusted

data) follows the series title. Official source agency annual figures are shown if available. Such figures are often based on data with more digits or on data which have not been seasonally adjusted; therefore, they may differ slightly from annual figures based on the monthly or quarterly data shown here. Current figures are shown in the basic data tables of the report and may be used to update the tables below.

²This series contains no revisions but is reprinted for the convenience of the user.
³This series contains revisions beginning with 1967.
⁴This series contains revisions beginning with 1968.

D. Descriptions and Sources of Series

39. Delinquency Rate, 30 Days and Over, Total Installment Loans

This series measures the number of delinquent bank-held consumer installment loans as a percent of the total number of bank-held consumer installment loans outstanding. Installment loans are those requiring repayment in two or more scheduled payments. A delinquent loan is defined as one having an installment past due for 30 days or more. Prior to September 1963, the data were simple averages of delinquency rates for six types of consumer installment loans: Personal, FHA Title I, home appliance, automobile-direct, automobile-indirect, and property improvement. Beginning in October 1963, the data are a weighted average of these types of loans. Also mobile-home loans are included in the data starting with August 1970.

Each of the above types of loans falls into one of the four principal classes of installment credit: Automobile paper, other consumer goods paper, repair and modernization loans, and personal loans.

"Automobile paper" and "other consumer goods paper" represent credit extended for the purpose of purchasing automobiles or other consumer goods and, in most cases, secured by the items purchased. "Repair and modernization loans" include both FHA insured and uninsured loans made to finance the maintenance and/or improvement of owner-occupied dwelling units. "Personal loans" include all other loans for consumer purposes, such as consolidation of consumer debts, payments of taxes and medical, educational, or travel expenses, etc. Some personal loans are used for the purchase of consumer goods; but since they are not secured by the goods, they are not reported as commodity paper under automobile or other consumer goods.

The survey sample for this series includes approximately 500 banks selected to provide coverage in the 50 States and the District of Columbia. For the most part, the reporting banks are the larger banks in the major metropolitan centers.

Beginning in December 1964, data for this series represent the percent of installment loans delinquent at the end of bimonthly periods ending in February, April, June, August, October, and December. Data for January 1948 through October 1964 represent the delinquency rate as of the last day of each month.

This series is inversely related to general business fluctuations; i.e., it moves upward during periods of business decline and downward during periods of business expansion.

The data are seasonally adjusted by the means of the Census X-11 seasonal adjustment program.

Source: The American Bankers Association.

72. Commercial and Industrial Loans Outstanding

This series measures the average dollar amount of business loans outstanding at the end (last Wednesday) of each month. Included are data on all loans for commercial and industrial purposes except those secured by real estate. Loans to financial institutions and loans for the purpose of purchasing or carrying securities are excluded.

The data are based on reports to the Federal Reserve System by approximately 330 banks. Included in the reports are data on the amount of commercial and industrial loans outstanding as of Wednesday of each week and the amount of loans sold outright during each week to their own sub-

sidiaries, foreign branches, holding companies, other affiliates, and to other institutions except banks.

For <u>BCD</u>, a weekly series is derived by summing the amount of commercial and industrial loans and the amount of loans sold outright as reported to the Federal Reserve System. The monthly series is the arithmetic mean of weekly data. The data beginning with November 1968 are seasonally adjusted by means of the Census X-11 seasonal adjustment program. Prior to that date, the National Bureau of Economic Research seasonally adjusted the data.

Commercial and industrial loans outstanding is classified as a lagging indicator in BCD.

Source: Board of Governors of the Federal Reserve System.

112. Net Change in Bank Loans to Businesses

This series measures the change during the month in the amount of commercial and industrial loans outstanding (series 72). These changes are obtained by subtracting the figure for a given month from that for the following month. This change is put at annual rate and entered on the later month.

Change in business loans is classified as a leading indicator in $\ensuremath{\mathsf{BCD}}$.

Source: Board of Governors of the Federal Reserve System.

93. Free Reserves (member bank excess reserves minus borrowings)

This series measures the difference between excess reserves of member banks and member bank borrowings from the Federal Reserve System, or equivalently, is the difference between member bank reserve balances and the sum of their required reserves and their borrowings from the System. When total borrowings of some banks exceed surpluses of others the difference is termed "net borrowed reserves." Conversely when surpluses exceed borrowings it is termed "free reserves." Free reserves is a partial reflection of the credit potential of the banking system.

Data on free reserves are reported by the approximately 5,800 banks which are members of the Federal Reserve System. Required reserves are minimum balances required to be maintained by member banks pursuant to Federal Reserve regulations. These reserve requirements which vary from time to time, are measured as a percent of deposit liabilities and depend upon the type and amount of deposits. Prior to December 1959, the only permissible legal reserves were balances with the Federal Reserve Banks; since then, the inclusion of vault cash has been allowable.

Weekly and monthly data are averages of daily figures reported to the Federal Reserve weekly by member banks. Beginning with January 1964 estimates of vault cash and reserve balances have been computed by the Federal Reserve Board and used until final figures from member banks become available.

The monthly estimates that are published in <u>BCD</u> are computed by averaging data for weeks to date ending on Wednesday.

In BCD the series is classified as a roughly coincident economic indicator.

G. Recovery Comparisons: Current and Selected Historical Patterns

These charts show graphically, for selected indicators, the path of the most recent business contraction (beginning with the cyclical peak in November 1969) and the recovery and subsequent expansion (beginning with the business cycle trough in November 1970). To set the current cyclical movements into historical perspective,

HOW TO READ CYCLICAL (RECOVERY) COMPARISON CHARTS

cyclical paths over generally similar historical periods are shown. presentations of the data for the selected period are superimposed according to a special chart design. The explanatory statements below provide a key to this chart

design.

1. The objective of the chart is to compare the pattern of the current recovery with historical recovery patterns to facilitate critical assessment of the amplitude, duration, and vigor of the indicators' current

2. The vertical line represents reference trough dates. The current recovery phase, beginning with the business cycle trough in November 1970, and the selected historical recovery phases, beginning with the troughs in October 1949, August 1954, April 1958, and February 1961 are presented graphically so that their trough dates are placed along this vertical line.

3. The horizontal line represents the level of the data at the beginning point of the most recent business contraction, November most recent business contraction, November 1969, the business cycle peak that preceded the most recent trough. It also represents data levels at other business cycle peaks (November 1948, July 1953, July 1957, and May 1960) that precede the troughs used for this analysis. The peak levels, which also are called recovery levels--i.e., the levels at which recoveries from the preceding contraction are achieved -- are aligned along the horizontal line for each business cycle depicted.

4. To facilitate comparison, deviations from the previous peak level are computed and plotted for each cycle (consisting of the contraction and portions of the subsequent recovery and expansion). These deviations peak levels may be either percent changes or differences in original series units depending upon the nature of the time series. For most series percent changes are used. For series containing negative values (such as percent changes) and series measured in percent units (such as interest rates) deviations are shown in terms of differences. The same type of series could be, and in many instances are, plotted as actual data in original series units rather than deviations from preceding peak levels.

5. The influence of excessive irregular fluctuations in series with MCD of 3 or more is modified by using the average for the 3 months centered on the peak as the reference peak level.

6. For series that move counter to movements in general business activity (e.g., the unemployment rate), an inverted scale is used; i.e., declines in the data are shown as upward movements in the plotted lines, and increases in data as downward movements in plotted lines.

7. For each chart, four curves and two sets of points are shown. One curve describes the current recovery (heavy solid line: To facilitate historical comparison and avoid overcrowding on the chart, the median pattern of the four post-World War II recoveries (those beginning in 1949, 1954, 1958, and

latest quarter for timing classifiwhich data are plotted ("III" = cation for the series. third quarter). This scale shows deviations (per-Devi-Actual cent or unit difations data ferences) from from for reference peak 7 preced. current levels. For units peak cycle of measure see **★** '49 Percent comparison table Series number Fies title on the chart. 1961-63 ●135 Coincident 18 **●**130 This scale shows +4 actual series units (See current 1958-60 data table in 0 chart for the unit of measure) and **●**120 applies only to -4 the current business cycle (heavy **•**115 solid line). -8 Current data (Index: 1967=100) ●110 -12 '54 Nov. '70 cates recoveries and expansions. comparison table shows deviations (percent or unit This time scale differences) from the preceding reference peak levels or the shows calendar actual data for specified number of months or quarters after months or quarters reference trough dates. The median is determined as described corresponding to in statement 7. the current contraction, recovery Symbols ★ and O mark levels of the 1949 and 1954 recoveries, and expansion. respectively, at selected time periods. (See statement 7.) P = Current business cycle (reference) peak

Arabic number in-

July); Roman num-

dicates latest calendar month of data plotted ("7"

ber indicates

is shown as another curve (heavy broken line: ---). The curve representing the historical median pattern passes through the median points of the four individual recovery (Median is defined here as the average of the two middle points). The two most recent individual recoveries (those beginning in 1958 and 1961 are also shown as plotted lines (solid line: ----, and knotted line: -----, respectively). The two sets of points display the relative levels for the remaining two recoveries (those beginning in 1949 (*) and 1954 (*)) at four points in time (trough date, 12 and 24 months after trough date, and at the same time point as the latest month plotted).

T = Current business cycle (reference) trough

8. The business cycle peaks and troughs use throughout the recovery comparison chart are those designated by the National Burea Economic Research and are shown below The Roman numerals in parentheses indicat the peak and trough quarters used for timin quarterly data:

^{*}Denotes series on the 1966 NBER "short list" of indicators. #The "number" for this series title was changed since the publication date shown. NIA means National Income and Product Accounts.

Titles and Sources of Series

Within each of the report's six sections, series are listed in numerical order according to series numbers. The series numbers are for identification purposes only and do not reflect series relationships or order. To find chart and table page numbers, historical data, and series descriptions, consult the "Alphabetical Index—Series Finding Guide."

The alphabetic-numeric designations following each series title and source indicate the charts and tables in which the series may be found. See the table of contents for the chart and table titles and page numbers. "M" indicates monthly series; "Q" indicates quarterly series. Data apply to the whole period except for series designated by "EOM" (end of month) or "EOQ" (end of quarter).

The "A" following a series number indicates a component series (same number) as a percent of an aggregate series, such as GNP or national income. The series in section B preceded by an asterisk (*) are included in the 1966 NBER "short list" of cyclical indicators, chart B8. The "D" preceding a number indicates a diffusion index.

A National Income and Product

- 200. Gross national product in current dollars (Q).—
 Department of Commerce, Bureau of Economic
 Analysis (A1, B2, B8, E5)
- 205. Gross national product in 1958 dollars (Q).—
 Department of Commerce, Bureau of Economic
 Analysis (A1, B2, B8, E1, E5)
- 210. Implicit price deflator, gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A1)
- 215. Per capita gross national product in current dollars
 (Q).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (A1)
- 217. Per capita gross national product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (A1)
- National income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis
 (A2)
- 222. Personal income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis
- 224. Disposable personal income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)
- 225. Disposable personal income in 1958 dollars
 (0).—Department of Commerce, Bureau of Economic Analysis (A2)
- 226. Per capita disposable personal income in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)
- 227. Per capita disposable personal income in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A2)
- 230. Personal consumption expenditures, total, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)
- 230A. Personal consumption expenditures as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
- Personal consumption expenditures, total, in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3, A10)
- 232. Personal consumption expenditures, durable goods, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)

- 233. Personal consumption expenditures, durable goods except automobiles, in current dollars (Q).—
 Department of Commerce, Bureau of Economic Analysis (A3)
- 234. Personal consumption expenditures, automobiles, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)
- 236. Personal consumption expenditures, nondurable goods, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)
- 237. Personal consumption expenditures, services, in current dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A3)
- 240. Gross private domestic investment, total (Q).—
 Department of Commerce, Bureau of Economic
 Analysis (A4)
- 241. Gross private domestic fixed investment, total nonresidential (Q).—Department of Commerce, Bureau of Economic Analysis (A4)
- 241A. Gross private domestic fixed investment, total nonresidential as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
- 242. Gross private domestic fixed investment, nonresidential structures (Q).—Department of Commerce, Bureau of Economic Analysis (A4)
- 243. Gross private domestic fixed investment, producers' durable equipment (Q).—Department of Commerce, Bureau of Economic Analysis (A4)
- 244. Gross private domestic fixed investment, residential structures (Q).—Department of Commerce, Bureau of Economic Analysis (A4)
- 244A. Gross private domestic fixed investment, residential structures as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
- 245. Gross private domestic investment, change in business inventories after valuation adjustment, all industries (Q).—Department of Commerce, Bureau of Economic Analysis (A4, B4)
- 245A. Change in business inventories as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
- 246. Gross private domestic investment, change in business inventories, all industries, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)
- Gross private domestic fixed investment, total nonresidential, 1958 dollars (Ω).—Department of Commerce, Bureau of Economic Analysis (A10)
- 248. Gross private domestic fixed investment, residential structures, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (A10)
- 249. Gross auto product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis
- 250. Balance on goods and services, excluding transfers under military grants (Q).—Department of Commerce, Bureau of Economic Analysis (A5, D2)
- 250A. Net exports of goods and services as a percent of gross national product (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
- 252. Exports of goods and services, excluding transfers under military grants (Q).—Department of Commerce, Bureau of Economic Analysis (A5, D2)

- 253. Imports of goods and services (Q).—Department of Commerce, Bureau of Economic Analysis
- 260. Government purchases of goods and services, tot (Q).—Department of Commerce, Bureau of Economic Analysis (Af
- 261. Government purchases of goods and services total 1958 dollars (Q).—Department of Commerce, Breau of Economic Analysis (A10)
- 262. Federal Government purchases of goods and ser ices, total (Q).—Department of Commerce, Burea of Economic Analysis (A6
- 262A. Federal Government purchases of goods and ser ices as a percent of gross national produit (Q).—Department of Commerce, Bureau of Economic Analysis (A1
- 264. Federal Government purchases of goods and ser ices, national defense (Q).—Department of Cor merce, Bureau of Economic Analysis (A6, D:
- 266. State and local government purchases of goo and services, total (Q).—Department of Commerc Bureau of Economic Analysis (A
- 266A. State and local government purchases of goods at services as a percent of gross national produ (Q).—Department of Commerce, Bureau of Economic Analysis (A1
- 270. Final sales, durable goods (Q).—Department Commerce, Bureau of Economic Analysis (A
- 271. Change in business inventories, durable god (Q).—Department of Commerce, Bureau of Economic Analysis (A
- 273. Final sales (series 205 minus series 246), 19 dollars (Q).—Department of Commerce, Bureau Economic Analysis (A1
- 274. Final sales, nondurable goods, (Q).—Department Commerce, Bureau of Economic Analysis (A
- 275. Change in business inventories, nondurable god (Q).—Department of Commerce, Bureau of En nomic Analysis (A
- 280. Compensation of employees (Q).—Department Commerce, Bureau of Economic Analysis (A
- 280A. Compensation of employees as a percent of grational product (Q).—Department of Commer Bureau of Economic Analysis (A
- 282. Proprietors' income (Q).—Department of Commerce, Bureau of Economic Analysis (#
- 282A. Proprietors' income as a percent of gross natio product (Q).—Department of Commerce, Bureau Economic Analysis (A
- 284. Rental income of persons (Q).—Department Commerce, Bureau of Economic Analysis (
- 284A. Rental income of persons as a percent of gunational product (Q).—Department of Commer Bureau of Economic Analysis (A
- 286. Corporate profits and inventory valuation adj ment (Q).—Department of Commerce, Bureau Economic Analysis (.
- 286A. Corporate profits and inventory valuation adj ment as a percent of gross national prod (Q).—Department of Commerce, Bureau of E nomic Analysis (A

Fitles and Sources of Series Continued)

- 88. Net interest (Q).—Department of Commerce, Bureau of Economic Analysis (A8)
- 88A. Net interest as a percent of gross national product
 (Q).—Department of Commerce, Bureau of Economic Analysis (A11)
- Gross saving—private saving plus government surplus or deficit (0).—Department of Commerce, Bureau of Economic Analysis (A9)
- 32. Personal saving (0).—Department of Commerce, Bureau of Economic Analysis (A9)
- Undistributed corporate profits plus inventory valuation adjustment (Q).—Department of Commerce, Bureau of Economic Analysis (A9)
- 36. Capital consumption allowances, corporate and noncorporate (Q).—Department of Commerce, Bureau of Economic Analysis (A9)
- Government surplus or deficit, total (Q).—Department of Commerce, Bureau of Economic Analysis (A9)

Cyclical Indicators

- Average workweek of production workers, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1, B8, E3, E4)
- Accession rate, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1)
- Layoff rate, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1)
- Average weekly initial claims for unemployment insurance, State programs (M).—Department of Labor, Manpower Administration; seasonal adjustment by Bureau of Economic Analysis (B1, E3)
- Value of manufacturers' new orders, durable goods industries (M).—Department of Commerce, Bureau of the Census (B3, B8, E3, E4)
- B. Index of construction contracts, total value (M).—McGraw-Hill Information Systems Company. (Used by permission. This series may not be reproduced without written permission from the source.) (B3)
- 3. Construction contracts awarded for commercial and industrial buildings, floor space (M).—McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (B3)
- Contracts and orders for plant and equipment (M).—Department of Commerce, Bureau of the Census, and McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of Economic Analysis May 1970 and by source agency thereafter. (B3, B8)
- Newly approved capital appropriations, 1,000 manufacturing corporations (Q).—The Conference Board (B3. E3)
- Index of net business formation (M).—Department of Commerce, Bureau of Economic Analysis; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (B3, B8)
- Number of new business incorporations (M).—Dun and Bradstreet, Inc.; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc.
 (B3)
- Current liabilities of business failures (M).—Dun and Bradstreet, Inc. (B6)

- Profits (after taxes) per dollar of sales, all manufacturing corporations (0).—Federal Trade Commission and Securities and Exchange Commission; seasonal adjustment by Bureau of Economic Analysis (B5)
- *16. Corporate profits after taxes (Q).—Department of Commerce, Bureau of Economic Analysis (B5, B8)
- *17. Index of price per unit of labor cost—ratio, index of wholesale prices of manufactured goods (unadjusted) to seasonally adjusted index of compensation of employees (sum of wages, salaries, and supplements to wages and salaries) per unit of output (M).—Department of Commerce, Bureau of Economic Analysis; Department of Labor, Bureau of Labor Statistics; and Board of Governors of the Federal Reserve System (B5, B8)
- Corporate profits after taxes, 1958 dollars (Q)—
 Department of Commerce, Bureau of Economic Analysis (B5)
- *19. Index of stock prices, 500 common stocks (M).— Standard and Poor's Corporation (B5, B8, E3, F3)
- Change in book value of manufacturers' inventories
 of materials and supplies (M).—Department of Commerce, Bureau of the Census (B4)
- 21. Average weekly overtime hours of production workers, manufacturing (M).—Department of Labor, Bureau of Labor Statistics (B1)
- 22. Ratio of profits (after taxes) to income originating, corporate, all industries (Q).—Department of Commerce, Bureau of Economic Analysis (B5)
- *23. Index of industrial materials prices (M).—Department of Labor, Bureau of Labor Statistics (B5, B8, E3, E4)
- Value of manufacturers' new orders, capital goods industries, nondefense (M).—Department of Commerce, Bureau of the Census (B3)
- 25. Change in manufacturers' unfilled orders, durable goods industries (M).—Department of Commerce, Bureau of the Census (B4)
- Buying policy-production materials, percent of companies reporting commitments 60 days or longer (M).—National Association of Purchasing Management (B4)
- 28. New private housing units started, total (M).—Department of Commerce, Bureau of the Census (B3)
- *29. Index of new private housing units authorized by local building permits (M).—Department of Commerce, Bureau of the Census (B3, B8)
- *31. Change in book value of manufacturing and trade inventories, total (M).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (B4, B8)
- 32. Vendor performance, percent of companies reporting slower deliveries (M).—Purchasing Management Association of Chicago (B4)
- 33. Net change in mortgage debt held by financial institutions and life insurance companies (M).—
 Institute of Life Insurance; Federal National Mortgage Association; Department of Housing and Urban Development, Government National Mortgage Association; National Association of Mutual Savings Banks; U.S. Savings and Loan League; and Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of Economic Analysis (B6)
- 34. Net cash flow, corporate, current dollars (Q).—
 Department of Commerce, Bureau of Economic
 Analysis (B5)
- Net cash flow, corporate, 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis
- Percent of companies reporting higher inventories of purchased materials (M).—National Association of Purchasing Management; seasonal adjustment by Bureau of Economic Analysis (B4)

- Percent of consumer installment loans delinquent 30 days and over (EOM).—American Bankers Association; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (Bimonthly since December 1964) (B6)
- 40. Unemployment rate, married males, spouse present (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (B1)
- *41. Number of employees on nonagricultural payrolls, establishment survey (M).—Department of Labor, Bureau of Labor Statistics (B1, B8, E3, E4)
- Total number of persons engaged in nonagricultural activities, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (B1)
- *43. Unemployment rate, total (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (B1, B8)
- *44. Unemployment rate, 15 weeks and over (M).—
 Department of Labor, Bureau of Labor Statistics, and
 Department of Commerce, Bureau of the Census
 (B1, B8)
- 45. Average weekly insured unemployment rate, State programs (M).—Department of Labor, Manpower Administration (B1)
- 46. Index of help-wanted advertising in newspapers (M).—The Conference Board (B1)
- *47. Index of industrial production (M).—Board of Governors of the Federal Reserve System (B2, B8, E3, E4, E5, F2)
- 48. Man-hours in nonagricultural establishments (M).—
 Department of Labor, Bureau of Labor Statistics
 (B1, E5)
- 50. Number of job vacancies in manufacturing (M).— Department of Labor, Bureau of Labor Statistics (B1)
- *52. Personal income (M).—Department of Commerce, Bureau of Economic Analysis (B2, B8)
- 53. Wage and salary income in mining, manufacturing, and construction (M).—Department of Commerce, Bureau of Economic Analysis (B2)
- *54. Sales of retail stores (M).—Department of Commerce, Bureau of the Census (B2, B8, E3, E4)
- 55. Index of wholesale prices, industrial commodities (M).—Department of Labor, Bureau of Labor Statistics (B5, E5)
- *56. Manufacturing and trade sales (M).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (B2, B8)
- Final sales (series 200 minus series 245) (Q).—Department of Commerce, Bureau of Economic Analysis
 (B2)
- 58. Index of wholesale prices, manufactured goods (M).—Department of Labor, Bureau of Labor Statistics (B5, D4, E3, E4)
- Sales of retail stores, 1967 dollars (M).—Department of Commerce, Bureau of Economic Analysis (B2)
- *61. Business expenditures for new plant and equipment, total (Q).—Department of Commerce, Bureau of Economic Analysis (B3, B8, C1, C2)
- *62. Index of labor cost per unit of output, total manufacturing—ratio, index of compensation of employees in manufacturing (the sum of wages and salaries and supplements to wages and salaries) to index of industrial production, manufacturing (M).—Department of Commerce, Bureau of Economic Analysis, and the Board of Governors of the Federal Reserve System (B5, B8)

Titles and Sources of Series (Continued)

- Index of unit labor cost, total private economy (Q).—Department of Labor, Bureau of Labor Statistics
- Manufacturers' inventories of finished goods, book value, all manufacturing industries (EOM).—Department of Commerce, Bureau of the Census (B4)
- 66. Consumer installment debt (EOM).—Board of Governors of the Federal Reserve System. FRS seasonally adjusted net change added to seasonally adjusted figure for previous month to obtain current figure. (RA)
- *67. Bank rates on short-term business loans, 35 cities (Q).—Board of Governors of the Federal Reserve System (B6, B8)
- Labor cost (current dollars) per unit of gross product (1958 dollars), nonfinancial corporations—ratio of current-dollar compensation of employees to gross corporate product in 1958 dollars (Q).—Department of Commerce, Bureau of Economic Analysis (B5)
- 69. Manufacturers' machinery and equipment sales and business construction expenditures (industrial and commercial construction put in place) (M).— Department of Commerce, Bureau of the Census (B3)
- *71. Manufacturing and trade inventories, total book value (EOM).—Department of Commerce, Bureau of Economic Analysis and Bureau of the Census (B4, B8)
- *72. Commercial and industrial loans outstanding, weekly reporting large commercial banks (EOM).—Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of Economic Analysis (B6, B8)
- 85. Change in U.S. money supply (demand deposits plus currency) [M1] (M).—Board of Governors of the Federal Reserve System (B6)
- 93. Free reserves (member bank excess reserves minus borrowings) (M).—Board of Governors of the Federal Reserve System (B6)
- Manufacturers' unfilled orders, durable goods industries (EOM).—Department of Commerce, Bureau of the Census (B3)
- 97. Backlog of capital appropriations, manufacturing (EOQ).—The Conference Board (B3)
- 102. Change in U.S. money supply plus time deposits at commercial banks other than large CD's [M2] (M).—Board of Governors of the Federal Reserve System (B6)
- 103. Change in U.S. money supply, plus time deposits at commercial banks other than large CD's, plus deposits at nonbank thrift institutions [M3] (M).—Board of Governors of the Federal Reserve System (B6)
- 110. Total funds raised by private nonfinancial borrowers in credit markets (Q).—Board of Governors of the Federal Reserve System (B6)
- 112. Net change in bank loans to businesses (M).—Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of Economic Analysis (B6)
- *113. Net change in consumer installment debt (M).—Board of Governors of the Federal Reserve System (B6, B8)
- 114. Discount rate on new issues of 91-day Treasury bills (M).—Board of Governors of the Federal Reserve System (B6)
- Yield on long-term Treasury bonds (M).—Treasury Department (B6)
- 116. Yield on new issues of high-grade corporate bonds (M).—First National City Bank of New York and Treasury Department (B6)
- 117. Yield on municipal bonds, 20-bond average (M).—The Bond Buyer (B6)

- 118. Secondary market yields on FHA mortgages (M).—Department of Housing and Urban Development, Federal Housing Administration (B6)
- *200. Gross national product in current dollars (Q). See in section A.
- *205. Gross national product in 1958 dollars (Q). See in section A.
- 245. Change in business inventories (GNP component) (Q). See in section A.
- 810. Twelve leading indicators—reverse trend adjusted composite index (includes series 1, 5, 6, 10, 12, 16, 17, 19, 23, 29, 31, and 113) (M).—Department of Commerce, Bureau of Economic Analysis (B7)
- Twelve leading indicators—composite index prior to reverse trend adjustment (includes series 1, 5, 6, 10, 12, 16, 17, 19, 23, 29, 31, and 113) (M).—Department of Commerce, Bureau of Economic Analysis
- 813. Marginal employment adjustments—leading composite index (includes series 1, 2, 3, and 5) (M).— Department of Commerce, Bureau of Economic Analysis (B7)
- 814. Capital investment commitments—leading composite index (includes series 6, 10, 12, and 29) (M).—
 Department of Commerce, Bureau of Economic Analysis (B7)
- 815. Inventory investment and purchasing-leading composite index (includes series 23, 25, 31, and 37) (M).—Department of Commerce, Bureau of Economic Analysis (B7)
- 816. Profitability—leading composite index (includes series 16, 17, and 19) (M).—Department of Commerce, Bureau of Economic Analysis (B7)
- Sensitive financial flows-leading composite index (includes series 33, 85, 112, and 113) (M).—Department of Commerce, Bureau of Economic Analysis (B7)
- 820. Five coincident indicators—composite index (includes series 41, 43, 47, 52, and 56) (M).—Department of Commerce, Bureau of Economic Analysis (87, E5)
- 825. Five coincident indicators—deflated composite index (includes series 41, 43, 47, 52D and 56D) (M).—
 Department of Commerce, Bureau of Economic Analysis (67)
- 830. Six lagging indicators-composite index (includes series 44, 61, 62, 67, 71, 72) (M).—Department of Commerce, Bureau of Economic Analysis (B7)

C Anticipations and Intentions

- 61. Business expenditures for new plant and equipment, all industries (Q). See in section B.
- 410. Manufacturers' sales, total value (Q).—Department of Commerce, Bureau of the Census (C1)
- 412. Manufacturers' inventories, total book value (E0Q).—Department of Commerce, Bureau of the Census (C1)
- 414. Percent of total book value of inventories held by manufacturers classifying their holdings as high, less percent classifying holdings as low (EOQ).—Department of Commerce, Bureau of the Census
- 416. Percent of total gross capital assets held by companies classifying their existing capacity as inadequate for prospective operations over the next 12 months, less percent classifying existing capacity as excessive (EOQ).—Department of Commerce, Bureau of Economic Analysis (C1)
- 420. Current income of households compared to income a year ago (percent higher, lower, and unchanged) (Q).—Department of Commerce, Bureau of the Census (C1)

- 425. Mean probability (average chances in 100) of substantial changes (increase, decrease, and increase less decrease) in income of households (Q).—Department of Commerce, Bureau of the Census (C1)
- 430. Number of new cars purchased by households (0).—Department of Commerce, Bureau of the Census (C1)
- 435. Index of consumer sentiment (Q).—University of Michigan, Survey Research Center (C1)
- D440. New orders, manufacturing (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)
- D442. Net profits, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)
- D444. Net sales, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)
- D446. Number of employees, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)
- D450. Level of inventories, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)
- D460. Selling prices, manufacturing and trade (Q).—Dun and Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2)
- D462. Selling prices, manufacturing (Q).—Dun and Brad street, Inc. (Used by permission. This series may no be reproduced without written permission from the source.) (C2
- D464. Selling prices, wholesale trade (Q).—Dun and Brad street, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2
- D466. Selling prices, retail trade (Q).—Dun and Bradstreet Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (C2

D Other Key Indicators

- Index of wholesale prices, industrial commoditie (M). See in section B.
- Index of wholesale prices, manufactured goods (M), See in section B.
- 211. Fixed weighted price index, gross private produc
 (Q).—Department of Commerce, Bureau of Economi
 Analysis (D4)
- 250. Balance on goods and services; U.S. balance c payments (Q). See in section A.
- 252. Exports of goods and services, excluding transfer under military grants; U.S. balance of payments (0 See in section A.
- 253. Imports of goods and services: U.S. balance (payments (Q). See in section A.
- 264. Federal Government purchases of goods and service national defense (Q). See in section A.
- 500. Merchandise trade balance (Series 502 minus series 512) (M).—Department of Commerce, Bureau of the Census (D)
- 502. Exports, excluding military aid shipments, tot (M).—Department of Commerce, Bureau of the Census (D

Titles and Sources of Series (Continued)

- 506. Manufacturers' new orders for export, durable goods except motor vehicles and parts (M).—Department of Commerce, Bureau of the Census (D1)
- 508. Index of export orders for nonelectrical machinery (M).—McGraw-Hill, Department of Economics; seasonal adjustment by Bureau of Economic Analysis.
- 512. General imports, total (M).—Department of Commerce, Bureau of the Census (D1)
- 515. Balance on goods, services and remittances; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Balance on current account; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 519. Balance on current account and long term capital; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Net liquidity balance; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Official reserve transactions balance; U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Liquid liabilities (excluding military grants) to all foreigners, total outstanding: U.S. balance of payments (EOQ).—Department of Commerce, Bureau of Economic Analysis (D2)
- Liquid and certain nonliquid liabilities (excluding military grants) to foreign official agencies, total outstanding. U.S. balance of payments (EOQ).— Department of Commerce, Bureau of Economic Analysis (D2)
- 534. U.S. official reserve (assets) position, excluding military grants: U.S. balance of payments (EOQ).— Department of Commerce, Bureau of Economic Analysis (D2)
- Allocations to the U.S. of Special Drawing Rights:
 U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Merchandise exports, adjusted, excluding military grants: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Merchandise imports, adjusted, excluding military:
 U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- i40. U.S. investment income, military sales, and other services exports, excluding military grants: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Foreigners' investment income, military expenditures and other services imports: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Income on U.S. investments abroad: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Income on foreign investments in the U.S.: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 344. Receipts from foreign travelers in the U.S.: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Payments by U.S. travelers abroad: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)

- 546. Military sales to foreigners: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 547. U.S. military expenditures abroad: U.S. balance of payments (0).—Department of Commerce, Bureau of Economic Analysis (D2)
- 548. Receipts for transportation and other services: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 549. Payments for transportation and other services: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- Foreign direct investments in the U.S.: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- U.S. direct investments abroad: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 564. Foreign purchases of U.S. securities: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 565. U.S. purchases of foreign securities: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 570. Government grants and capital transactions, net: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 575. Banking and other capital transactions, net: U.S. balance of payments (Q).—Department of Commerce, Bureau of Economic Analysis (D2)
- 600. Federal Government surplus or deficit, national income and product accounts (Q).—Department of Commerce, Bureau of Economic Analysis (D3)
- 601. Federal Government receipts, national income and product accounts (0).—Department of Commerce, Bureau of Economic Analysis (D3)
- 602. Federal expenditures, national income and product accounts (Q).—Department of Commerce, Bureau of Economic Analysis (D3)
- 616. Defense Department obligations incurred, total, excluding military assistance (M).—Department of Defense, Fiscal Analysis Division; seasonal adjustment by Bureau of Economic Analysis (D3)
- 621. Defense Department obligations incurred, procurement (M).—Department of Defense, Fiscal Analysis
 Division; seasonal adjustment by Bureau of Economic
 Analysis
 (D3)
- 625. Military prime contract awards to U.S. business firms and institutions (M).—Department of Defense, Directorate for Statistical Services; seasonal adjustment by Bureau of Economic Analysis (D3)
- 647. New orders, defense products industries (M).— Department of Commerce, Bureau of the Census (D3)
- 648. New orders, defense products (M).—Department of Commerce, Bureau of the Census (D3)
- 740. Index of average hourly earnings of production workers, private nonfarm economy—adjusted for overtime (in manufacturing only), interindustry employment shifts, and seasonality (M).—Department of Labor, Bureau of Labor Statistics (D5)
- 741. Index of real average hourly earnings of production workers, private nonfarm economy—adjusted for overtime (in manufacturing only), interindustry employment shifts, and seasonality (M).—Department of Labor, Bureau of Labor Statistics (D5)
- 745. Index of average hourly compensation, all employees, private nonfarm economy (Q).—Department of Labor, Bureau of Labor Statistics (D5)
- 746. Index of real average hourly compensation, all employees, private nonfarm economy (Q).—Department of Labor, Bureau of Labor Statistics (D5)

- 748. Negotiated wage and benefit decisions, all industries—first year average (mean) changes (Q).—
 Department of Labor, Bureau of Labor Statistics(D5)
- 749. Negotiated wage and benefit decisions, all industries—average (mean) changes over life of contract (Q).—Department of Labor, Bureau of Labor Statistics (D5)
- Index of wholesale prices, all commodities (M).— Department of Labor, Bureau of Labor Statistics (D4)
- 751. Index of wholesale prices, processed foods and feeds (M).—Department of Labor, Bureau of Labor Statistics (D4)
- 752. Index of wholesale prices, farm products (M).— Department of Labor, Bureau of Labor Statistics(D4)
- 770. Index of output per man-hour, total private economy (Q).—Department of Labor, Bureau of Labor Statistics (D.5)
- 781. Index of consumer prices (M).—Department of Labor, Bureau of Labor Statistics (D4, E5, F1)
- 782. Index of consumer prices, food (M).—Department of Labor, Bureau of Labor Statistics (D4)
- 783. Index of consumer prices, commodities less food (M).—Department of Labor, Bureau of Labor Statistics (D4)
- 784. Index of consumer prices, services (M).—Department of Labor, Bureau of Labor Statistics (D4)
- 841. Total civilian labor force, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 842. Total civilian employment, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (DR)
- 843. Number of persons unemployed, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 844. Unemployment rate, males 20 years and over, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 845. Unemployment rate, females 20 years and over, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 846. Unemployment rate, both sexes 16-19 years of age, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 847. Unemployment rate, white, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 848. Unemployment rate, Negro and other races, labor force survey (M).—Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census (D6)
- 858. Index of output per man-hour, total private nonfarm (Q).—Department of Labor, Bureau of Labor Statistics (D5)
- 859. Real spendable average weekly earnings of production or nonsupervisory workers (with 3 dependents) on private nonagricultural payrolls, 1967 dollars (M).—Department of Labor, Bureau of Labor
