BUREAU OF ECONOMIC ANALYSIS

George Jaszi, Director

Allan H. Young, Deputy Director

John E. Cremeans, Associate Director for National
Analysis and Projections

Feliks Tamm, Editor

This report is prepared in the Statistical Indicators Division, Bureau of Economic Analysis. Technical staff and their responsibilities for the publication are—

Barry A. Beckman—Technical supervision and review

Morton Somer—Selection of seasonal adjustment methods

Betty F. Tunstall—Collection and compilation of basic data.

Telephone (202) 523-0541

The cooperation of various government and private agencies which provide data is gratefully acknowledged. Agencies furnishing data are indicated in the list of series and sources at the back of this report.

This publication is prepared under the general guidance of a technical committee under the auspices of the Office of Federal Statistical Policy and Standards. The committee consists of the following persons:

Julius Shiskin, Chairman, Bureau of Labor Statistics, U.S. Department of Labor

John E. Cremeans, Bureau of Economic Analysis, U.S. Department of Commerce

Joseph W. Duncan, Office of Federal Statistical Policy and Standards

Lyle E. Gramley, Council of Economic Advisers, Executive Office of the President

J. Courtland Peret, Board of Governors of the Federal Reserve System

Beatrice N. Vaccara, U.S. Department of the Treasury

ABOUT THIS REPORT

BUSINESS CONDITIONS DIGEST (BCD) provides a monthly look at many of the economic time series found most useful by business analysts and forecasters.

The original **BCD**, which began publication in 1961 under the title **Business Cycle Developments**, emphasized the cyclical indicators approach to the analysis of business conditions and prospects. The report's contents were based largely on the list of leading, roughly coincident, and lagging indicators maintained by the National Bureau of Economic Research, Inc.

In 1968, **BCD** was expanded to increase its usefulness to analysts using other approaches to business conditions analysis. Principal additions to the report were series from the national income and product accounts and series based on surveys of businessmen's and consumers' anticipations and intentions. The composite indexes were added at that time, and the report's present title was adopted.

The dominant feature of the current **BCD** is the cyclical indicators section, in which each business cycle indicator is assigned a three-way timing classification according to its behavior at peaks, at troughs, and at all turns. This section is supplemented by a section containing other important economic measures. The method of presentation is explained in the introductory text which begins on page 1.

Most of the data contained in this report also are published by their source agencies. A series finding guide and a complete list of series titles and sources can be found at the back of the report.

Cyclical Indicators are economic time series which have been singled out as leaders, coinciders, or lagers based on their general conformity to cyclical movements in aggregate economic activity. In this report, cyclical indicators are classified both by economic process and by their average timing at business cycle peaks, at business cycle troughs, and at peaks and troughs combined. These indicators have been selected primarily on the basis of their cyclical behavior, but they also have proven useful in forecasting, measuring, and interpreting short-term fluctuations in aggregate economic activity.

Other Economic Measures provide additional information for the evaluation of current business conditions and prospects. They include selected components of the national income and product accounts; measures of prices, wages, and productivity; measures of the labor force, employment, and unemployment; economic data on Federal, State, and local government activities; measures of U.S. international transactions; and selected economic comparisons with major foreign countries.

Annual subscription price: \$40 domestic, \$50 foreign. Single copy price: \$3.50 domestic, \$4.50 foreign. For information concerning foreign airmail delivery, available at an additional charge, write the Superintendent of Documents (address

follows), enclosing a copy of your address label. Make checks payable to the Superintendent of Documents. Send to the U.S. Government Printing Office, Washington, D.C. 20402.

NEW FEATURES AND CHANGES FOR THIS ISSUE

Changes in this issue are as follows:

1. The series based wholly or in part on sales and inventories of retail stores and merchant wholesalers (series 31, 36, 54, 56, 57, 59, 70, 71, and 77) have been revised to reflect the following changes by the source agency: A new sample design and sample reselection, benchmarking to the levels of the 1967 and 1972 Economic Censuses, redefinition of sales to exclude sales taxes and finance charges, conversion of classifications based on the 1967 *STANDARD INDUSTRIAL CLASSIFICATION MANUAL* to classifications based on the 1972 *SIC MANUAL*, and revision and updating of seasonal adjustment factors.

In *BCD*, the current-dollar series (31, 54, 56, and 71) affected by these changes are revised from 1967 to date--the entire period of the source agency's revisions. The constant-dollar series are revised beginning with July 1977. Revised constant-dollar data for the period 1967 to July 1977 are scheduled to become available early in 1978.

Further information concerning these revisions may be obtained from the U.S. Department of Commerce, Bureau of the Census, Business Division (series 54) and from the U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Wealth Division (series 31, 56, 57, 59, 70, 71, and 77) and Statistical Indicators Division (series 36).

2. Series 53 (Wages and salaries in mining, manufacturing, and construction) has been revised for the period 1947 to date. This revision reflects the source agency's adjustment of these data to classifications based on the 1972 *STANDARD INDUSTRIAL CLASSIFICATION MANUAL*.

Further information concerning this revision may be obtained from the U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Wealth Division.

(Continued on page iv.)

The December issue of *BUSINESS CONDITIONS DIGEST* is scheduled for release on January 4.

A limited number of changes are made from time to time to incorporate recent findings of economic research, newly available time series, and revisions made by source agencies in concept, composition, comparability, coverage, seasonal adjustment methods, benchmark data, etc. Changes may result in revisions of data, additions or deletions of series, changes in placement of series in relation to other series, changes in composition of indexes, etc.

3. Series based wholly or in part on data for consumer installment credit (series 66, 95, and 113) have been revised for the period January 1977 to date. These revisions reflect the source agency's adjustment of data for commercial banks to the June 30, 1977, call report.

In addition, series 66 and 95 have been revised for the period December 1968 through December 1976 on the basis of two revisions (December 1968 and December 1969) in the seasonally adjusted net change in consumer installment credit. (NOTE: The seasonally adjusted total consumer installment credit outstanding is obtained by adding the current month's seasonally adjusted net change to the previous month's seasonally adjusted total outstanding.)

Further information concerning these revisions may be obtained from the Board of Governors of the Federal Reserve System, Division of Research and Statistics, Mortgage and Consumer Finance Section.

4. Appendix C contains historical data for series 50, 200, 213, 217, 220, 224, 225, 227, 230-233, 235-243, 245, 247-253, 255-257, 260-263, 265-268, 280, and 282-284.

5. Appendix G contains recovery comparisons for series 36, 48, 57, 72, 92, 95, 910, and 940.

METHOD OF PRESENTATION

This report is organized into two major parts. Part I, *Cyclical Indicators*, includes about 150 time series which have been found to conform well to broad fluctuations in comprehensive measures of economic activity. Nearly three-fourths of these are individual indicators, the rest are related analytical measures: Composite indexes, diffusion indexes, and rates of change. Part II, *Other Important Economic Measures*, covers over 130 series which are valuable to business analysts and forecasters but which do not conform well enough to business cycles to qualify as cyclical indicators. (There are a few exceptions: Four series which are included in pt. I are also shown in pt. II to complete the systematic presentation of certain sets of data, such as real GNP and unemployment.) The largest section of part II consists of quarterly series from the national income and product accounts; other sections relate to prices, labor force, government activities, and international transactions and comparisons.

The two parts are further divided into sections (see table of contents), and each of these sections is described briefly in this introduction. Data are shown both in charts and in tables. Most charts begin with 1953, but those for the composite indexes and their components (pt. I, sec. A) begin with 1948, and a few charts use a two-panel format which covers only the period since 1967. Except for section F in part II, the charts contain shading which indicates periods of recession in general business activity. The tables contain data for only the last few years. The historical data for the various time series are contained in the 1977 *Supplement to Business Conditions Digest*.

In addition to the charts and tables described above, each issue contains a summary table which shows the current behavior of many of the series. Appendixes present seasonal adjustment factors, measures of variability, specific cycle turning dates, cyclical comparison charts, and other information of analytic interest. An index appears at the back of each issue. It should be noted that the series numbers used are for identification purposes only and do not reflect precise relationships or order. However, all series considered as cyclical indicators are numbered in the range 1 to 199.

Seasonal Adjustments

Adjustments for average seasonal fluctuations are often necessary to bring out the underlying trends of time series. Such adjustments allow for the effects of repetitive intrayear variations resulting primarily from normal differences in weather conditions and from various institutional arrangements. Variations attributable to holidays are usually accounted for by the seasonal adjustment process; however, a separate holiday adjustment is occasionally required for holidays with variable dates, such as Easter. An additional adjustment is sometimes necessary for series which contain considerable variation due to the number of working or trading days in each month. As used in this report, the term "seasonal adjustment" includes trading-day and holiday adjustments where they have been made.

Most of the series in this report are presented in seasonally adjusted form and, in most cases, these are the official figures released by the source agencies. However, for the special purposes of this report, a number of series not ordinarily published in seasonally adjusted form are shown here on a seasonally adjusted basis.

MCD Moving Averages

Month-to-month changes in a series are often dominated by erratic movements. MCD (months for cyclical dominance) is an estimate of the appropriate span over which to observe cyclical movements in a monthly series. (See app. A.) It is the smallest span of months for which the average change in the cyclical factor is greater than that in the irregular factor. The more erratic a series is, the larger the MCD will be; thus, MCD is 1 for the smoothest series and 6 for the most erratic. MCD moving averages (that is, moving averages of the period equal to MCD) tend to have about the same degree of smoothness for all series. Thus, a 5-term moving average of a series with an MCD of 5 will show its cyclical movements about as clearly as the seasonally adjusted data for a series with an MCD of 1.

The charts in this report generally include centered MCD moving averages for those series with an MCD greater than 4. The seasonally adjusted data are also plotted to indicate their variation

about the moving averages and to provide observations for the most recent months.

Reference Turning Dates

The historical business cycle turning dates used in this report are those designated by the National Bureau of Economic Research, Inc. (NBER). They mark the approximate dates when, according to NBER, aggregate economic activity reached its cyclical high or low levels. As a matter of general practice, neither new reference turning dates nor the shading for recessions will be entered on the charts until after both the new reference peak and the new reference trough bounding the shaded area have been designated.

The historical reference turning dates are subject to periodic review by NBER and on occasion are changed as a result of revisions in important economic time series. The dates shown in this publication for the 1948-1970 time period are those determined by a 1974 review. The turning dates for the 1973-1975 period are detailed in NBER's 1976 *Annual Report*.

Part I. CYCLICAL INDICATORS

Business cycles have been defined as sequences of expansion and contraction in various economic processes that show up as major fluctuations in aggregate economic activity—that is, in comprehensive measures of production, employment, income, and trade. While recurrent and pervasive, business cycles of historical experience have been definitely nonperiodic and have varied greatly in duration and intensity, reflecting changes in economic systems, conditions, policies, and outside disturbances.

One of the techniques developed in business cycle research and widely used as a tool for analyzing current economic conditions and prospects is the cyclical indicators approach. This approach identifies certain economic time series as tending to lead, coincide with or lag behind the broad movements in aggregate economic activity. Such indicators have been selected and analyzed by NBER in a series of studies published between 1938 and 1967. During the 1972-75 period, a new comprehensive review of cyclical indicators was carried

Cross-Classification of Cyclical Indicators by Economic Process and Cyclical Timing

A. Timing at Business Cycle Peaks

<div> <div>Economic Process</div> <div>Cyclical Timing</div> </div>	I. EMPLOYMENT AND UNEMPLOYMENT (18 series)	II. PRODUCTION AND INCOME (10 series)	III. out by the Bureau of Economic Analysis (BEA) with the cooperation of the NBER research staff. The present format and content of part I of *BCD* are based on the results of that study.

Section A. Composite Indexes and Their Components

All cyclical indicators have been evaluated according to six major characteristics: Economic significance, statistical adequacy, consistency of timing at business cycle peaks and troughs, conformity to business expansions and contractions, smoothness, and prompt availability (currency). A formal, detailed weighting scheme was developed and used to assess each series by all of the above criteria. (See articles in the May and November 1975 issues of *BCD*.) The resulting scores relate to the cyclical behavior of the series during the period 1947-70. This analysis produced a new list of indicators classified by economic process and typical timing at business cycle peaks and troughs. (See tables on p. 2 and text below relating to sec. B.)

This information, particularly the scores relating to consistency of timing, served as a basis for the selection of series to be included in the composite indexes. The indexes incorporate the best-scoring series from many different economic-process groups and combine those with similar timing behavior, using their overall performance scores as weights. Because they use series of historically tested usefulness and given timing characteristics (for example, leading at both peaks and troughs), with diversified economic coverage and a minimum of duplication, composite indexes give more reliable signals over time than do any of the individual indicators. Furthermore, much of the independent measurement error and other "noise" in the included series are smoothed out in the index as a whole. The indexes include only monthly series that are acceptable in terms of relatively prompt availability and reasonable accuracy.

The main composite indexes are distinguished by their cyclical timing. Thus, there is an index of leading indicators, series which historically reached their cyclical peaks and troughs earlier than the corresponding business cycle turns. There is an index of roughly coincident indicators, consisting of series which historically reached their turning points at about the same time as the general economy, and an index of

lagging indicators, which includes series that typically reached their peaks and troughs later than the corresponding business cycle turns.

The leading index contains series with long as well as short leads, but each series leads on the average over time and shows a frequency of leads at the individual turns exceeding that attributable to chance, given the historical distribution of cyclical timing. (An analogous statement applies to the components of the lagging index.) Since 1948, leads were generally more frequent and longer at peaks than at troughs of business cycles, while lags were generally more frequent and longer at troughs than at peaks. The adopted system of scoring and classifying the indicators takes into account these well-established differences in timing. Consequently, rough coincidences include short leads (-) and lags (+) as well as exact coincidences (0). (For monthly series, the range is from -3 through +1 at peaks and from -1 through +3 at troughs, where minus denotes leads and plus denotes lags in months.)

For purposes of constructing a composite index, each component series is standardized: The month-to-month percent changes in a given series are divided by the long-run average (without regard to sign) of those changes. Thus, the more volatile series are prevented from dominating the index. The coincident index is calculated so that its long-term trend (since 1948) equals the average of the trends of its four components. This trend, which is similar to that of GNP in constant dollars, can be viewed as a linear approximation to the secular movement (at an average growth rate) in aggregate economic activity. The indexes of leading and lagging indicators have been adjusted so that both their trends and their average month-to-month percent changes (without regard to sign) are approximately equal to those of the coincident index. (For a more detailed description of the method of constructing the composite indexes, see the 1977 *Supplement to BCD*.)

In addition to these principal composite indexes, differentiated according to cyclical timing, there are five indexes based on leading indicators which have been grouped by economic process. Taken together, these additional indexes include all 12 component series of the overall leading index, plus a few related series. Also shown in this section is the ratio of the index of roughly coincident indicators to the index of lagging indicators, a series known to have a useful pattern of early cyclical timing.

Numbers entered on the charts of the composite indexes show the length, in months, of leads (-) and lags (+) at each of the reference turning dates covered.

The next set of data consists of series included in the principal composite indexes. These are the 12 components of the leading index, the 4 components of the coincident index, and the 6 components of the lagging index. Following the title of each series, its typical timing is identified by three letter symbols in a small box. The first of these letters refers to the timing of the given indicator at business cycle peaks, the second to its timing at business cycle troughs, and the third to its timing at all turns, i.e., at peaks and troughs combined. "L" denotes a tendency to lead, "C" a tendency to roughly coincide with the business cycle turns (as represented by the NBER-designated reference dates), and "Lg" a tendency to lag. Since these series have been selected for the consistency of their timing at both peaks and troughs, all components of the leading index are denoted "L,L,L", all components of the coincident index "C,C,C", and all components of the lagging index "Lg,Lg,Lg." It should be remembered that these classifications are based on limited evidence, namely the performance of the indicators during the business cycles of the 1948-70 period, which included five peaks and five troughs. While the timing classifications are expected to agree with the patterns prevailing in the near future, they will not necessarily hold invariably in every instance. The timing of the series in the post-1970 period can be determined by inspection of the charts where the 1973-75 recession is shaded according to the dates of the NBER reference cycle chronology.

Section B. Cyclical Indicators by Economic Process

This section covers 111 individual time series, including the 22 indicators used in the construction of the composite indexes. The peak and trough timing classifications are shown on the charts in the same manner as described above, but this section includes series with different timing at peaks and at troughs, as well as series where the timing is not sufficiently consistent to be classified as either L,C, or Lg according to the probabilistic measures and scoring criteria adopted. Such series are labeled U, i.e., unclassified as to timing at turning points of the given

type. Eight series are unclassified at peaks, one series at troughs, and 19 series at all turns (of the 19, 15 have definite but different timing at peaks and at troughs). No series that is classified as U both at peaks and at troughs is included in the list of cyclical indicators.

The classification scheme which groups the indicators of this section by economic process and cyclical timing is summarized in the two tabulations on page 2. Cross-classification A is based on the observed behavior of the series at five business cycle peaks (November '48, July '53, August '57, April '60, and December '69); cross-classification B, on their behavior at five business cycle troughs (October '49, May '54, April '58, February '61, and November '70). Each tabulation distinguishes seven major economic processes and four types of cyclical timing. The titles in the cells identify subgroups of the given economic process with the given timing characteristic. The number of series in each such group is given in parentheses following the title. Complete information on how individual indicators are classified by timing at peaks, troughs, and all turns, along with selected measures and scores, is provided in the *1977 Supplement to BCD*.

Section C. Diffusion Indexes and Rates of Change

Many series in this report are aggregates compiled from numerous components. How the individual components of an aggregate move over a given time span is summarized by a diffusion index which indicates the percentage of components that are rising (with half of the unchanged components considered rising). Cyclical changes in these diffusion indexes tend to lead those of the corresponding aggregates. Since diffusion indexes are highly erratic, they are computed from changes measured over 6- or 9- month (or 3- or 4- quarter) spans, as well as 1-month (or 1-quarter) spans. Longer spans help to highlight the trends underlying the shorter-term fluctuations. Diffusion indexes are shown for the component series included in each of the three composite indexes and for the components of some of the aggregate series shown in section B.

Diffusion measures can be derived not only from actual data but also from surveys of anticipations or intentions. Indexes based on responses of business

executives about their plans and expectations for several operating variables are presented, along with the corresponding indexes based on actual data, as the last set of the diffusion series.

This section also records rates of change for the three composite indexes (leading, coincident, and lagging) and for four indicators of aggregate economic activity: GNP in constant dollars (quarterly), industrial production, employee hours in nonagricultural establishments, and personal income less transfers in constant dollars. Rates of change are shown for 1- and 3-month spans or for 1-quarter spans.

Although movements in diffusion indexes and in rates of change for the same aggregates are generally positively correlated, these two measures present information about two related but distinct aspects of economic change. Diffusion indexes measure the prevailing direction or scope of change, while rates of change measure the degree as well as the overall direction. As is the case for diffusion indexes, cyclical movements in the rates of change tend to lead those of the corresponding indexes or aggregates, and thus, they tend to lead at the business cycle turns as well.

Part II. OTHER IMPORTANT ECONOMIC MEASURES

This part is divided into six sections which cover a wide range of quarterly and monthly time series measuring various aspects of economic activity. Some of these series are very comprehensive, pertaining to the U.S. economy as a whole, others have to do with particular sectors or markets, and still others relate to U.S. international transactions or to selected foreign countries. The represented variables include incomes, outputs, and expenditures; prices, earnings, and productivity; labor resources; government receipts, obligations, and purchases; exports and imports; and selected indicators for a few key foreign countries.

Section A. National Income and Product

The national income and product accounts, compiled by BEA, summarize both receipts and final expenditures for the personal, business, foreign, and government sectors of the economy.

Section A1 shows the gross national product, final sales, and personal and

disposable personal income. The four major components of the gross national product—personal consumption expenditures, gross private domestic investment, government purchases of goods and services, and net exports of goods and services—are presented in sections A2 through A5. Most of the series in section A are presented in current as well as constant dollars. There are also a few per capita series. The national income and product accounts, briefly defined below, are described more fully in the *Survey of Current Business*, Part I, January 1976.

Gross national product (GNP) is the market value of final goods and services produced by the labor and property supplied by residents of the United States, before deduction of allowances for the consumption of fixed capital goods. It is the most comprehensive measure of aggregate economic output. Final sales is GNP less change in business inventories.

Personal income is the income received by persons (individuals, owners of unincorporated businesses, non-profit institutions, private trust funds, and private noninsured welfare funds) from all sources. It is the sum of wage and salary disbursements, other labor income, proprietors' income, rental income of persons, dividends, personal interest income, and transfer payments, less personal contributions for social insurance.

Disposable personal income is the personal income available for spending or saving. It consists of personal income less personal taxes and nontax payments to government.

Personal consumption expenditures (A2) is goods and services purchased by individuals, operating expenses of non-profit institutions, and the value of food, fuel, clothing, rent of dwellings, and financial services received in kind by individuals. Net purchases of used goods are also included.

Gross private domestic investment (A3) is fixed capital goods purchased by private business and nonprofit institutions and the value of the change in the physical volume of inventories held by private business. The former include all private purchases of dwellings, whether purchased for tenant or owner occupancy. Net purchases of used goods are also included.

Government purchases of goods and services (A4) is the compensation of government employees and purchases from business and from abroad. It excludes transfer payments, interest paid by government, and subsidies. It includes gross investment by government enterprises, but excludes their current outlays. It includes net purchases of used goods and excludes sales and purchases of land and financial assets.

Net exports of goods and services (A5) is exports less imports of goods and services. Exports are part of the national production; imports are not, but are included in the components of GNP and are therefore deducted. More detail on U.S. international transactions is provided in section E.

National income (A6) is the incomes that originate in the production of goods and services attributable to labor and property supplied by residents of the United States. Thus, it measures the factor costs of the goods and services produced. It consists of the compensation of employees, proprietors' income, rental income of persons, corporate profits, and net interest.

Saving (A7) is the difference between income and expenditures during an accounting period. Total gross saving includes personal saving, business saving (mainly undistributed corporate profits and capital consumption allowances), and government surplus or deficit.

Shares of GNP and national income (A8). The major expenditure components of GNP (consumption, investment, etc.) are expressed as percentages of GNP, and the major income components of national income (compensation of employees, corporate profits, etc.) are expressed as percentages of national income.

Section B. Prices, Wages, and Productivity

The important data on price movements include the monthly consumer and wholesale price indexes and their major components. Based largely on these series are the quarterly price indexes from the national income and product accounts, notably the GNP implicit price deflator (with weights reflecting the changing proportions of different expenditure categories in GNP) and the fixed-weighted price index for the gross business product. Data on both levels and percent changes are presented for the period since 1967.

The group of series on wages and productivity consists of data on average hourly earnings and average hourly compensation (including earnings and other benefits) in current and constant dollars, output per hour of work in the business sector, and rates of change for most of these measures.

Section C. Labor Force, Employment, and Unemployment

This section contains measures of the civilian labor force and its major components: Total numbers of employed and unemployed persons. The number of unemployed is subdivided into selected categories defined by sex, age, and class of worker. Also included are data on participation rates for a few principal segments of the labor force.

Section D. Government Activities

Receipts, expenditures, and their balance (surplus or deficit) are shown quarterly on two levels: (1) Federal Government and (2) State and local government. Defense series relating to

obligations, contracts, and orders (monthly) and purchases (quarterly) are also shown. (For a more comprehensive picture of defense activities, see *Defense Indicators*, a monthly BEA publication.)

Section E. U.S. International Transactions

This group includes monthly series on exports (excluding military aid) and general imports, plus a few selected components of these aggregates. Also shown are the balances between receipts and expenditures for goods and services, merchandise, and investment income.

Section F. International Comparisons

This section is designed to facilitate a quick review of basic economic conditions in six of the nations with which we have important trade relationships. The U.S. business cycle shading has been omitted from these charts. Data on industrial production, consumer prices, and stock prices for Canada, the United Kingdom, France, West Germany, Japan, and Italy are compared with the corresponding U.S. series. Also included is an industrial production index for the European countries in the Organization for Economic Cooperation and Development (OECD). The industrial production series provide cyclically sensitive output measures for large parts of the economies covered. Changes in consumer price indexes (plotted for the period since 1967) provide important measures of the rates of inflation in the major industrialized countries. Stock prices (also shown beginning in 1967) tend to be significant as leading indicators.

HOW TO READ CHARTS

Basic Data

Peak (P) of cycle indicates end of expansion and beginning of recession (shaded area) as designated by NBER.

Solid line indicates monthly data. (Data may be actual monthly figures or moving averages.)

Broken line indicates actual monthly data for series where a moving average is plotted.

Solid line with plotting points indicates quarterly data.

Parallel lines indicates a break in continuity (data not available, extreme value, etc.).

Trough (T) of cycle indicates end of recession and beginning of expansion as designated by NBER.

Arabic number indicates latest month for which data are plotted. ("9" = September)

Dotted line indicates anticipated data.

Roman number indicates latest quarter for which data are plotted. ("IV" = fourth quarter)

Various scales are used to highlight the patterns of the individual series. "Scale A" is an arithmetic scale, "scale L-1" is a logarithmic scale with 1 cycle in a given distance, "scale L-2" is a logarithmic scale with two cycles in that distance, etc.

Diffusion Indexes

Solid line indicates monthly data over 6- or 9-month spans.

Broken line indicates monthly data over 1-month spans.

Broken line with plotting points indicates quarterly data over 1-quarter spans.

Solid line with plotting points indicates quarterly data over various spans.

Diffusion indexes and rates of change are centered within the spans they cover.

Arabic number indicates latest month for which data are used in computing the indexes.

Roman number indicates latest quarter for which data are used in computing the indexes.

Dotted line indicates anticipated quarterly data over various spans.

Rates of Change

Solid line indicates percent changes over 3- or 6-month spans.

Broken line indicates percent changes over 1-month spans.

Solid line with plotting points indicates percent changes over 3- or 4-quarter spans.

Arabic number indicates latest month used in computing the changes.

Broken line with plotting points indicates percent changes over 1-quarter spans.

Roman number indicates latest quarter used in computing the changes.

HOW TO LOCATE A SERIES

1. See **ALPHABETICAL INDEX—SERIES FINDING GUIDE** at the back of the report where series are arranged alphabetically according to subject matter and key words and phrases of the series titles, or—
2. See **TITLES AND SOURCES OF SERIES** at the back of the report where series are listed numerically according to series numbers within each of the report's sections.

NOTE: Series are seasonally adjusted except for those indicated by Ⓢ, which appear to contain no seasonal movement. Series indicated by an asterisk (*) are included in the major composite indexes. Dollar values are in current dollars unless otherwise specified. For complete series titles (including composition of the composite indexes) and sources, see "Titles and Sources of Series" at the back of BCD. NA = not available. a = anticipated. EOP = end of period. A.r. = annual rate. S/A = seasonally adjusted (used for special emphasis). IVA = inventory valuation adjustment. CCA = capital consumption adjustment. NIA = national income accounts.

- ¹ For a few series, data shown here have been rounded to fewer digits than those shown elsewhere in BCD. Annual figures published by the source agencies are used if available.
- ² Differences rather than percent changes are shown for this series.
- ³ The three-part timing code indicates the timing classification of the series at peaks, at troughs, and at all turns: L = leading; C = roughly coincident; Lg = lagging; U = unclassified.
- ⁴ Inverted series. Since this series tends to move counter to movements in general business activity, signs of the changes are reversed.
- ⁵ End-of-period series. The annual figures (and quarterly figures for monthly series) are the last figures for the period.
- ⁶ This series is a weighted 4-term moving average (with weights 1, 2, 2, 1) placed at the terminal month of the span.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ^(U). Current high values are indicated by ^(H); for series that move counter to movements in general business activity, current low values are indicated by ^(L). Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 13, 21, and 22.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by (U). Current high values are indicated by (H); for series that move counter to movements in general business activity, current low values are indicated by (L). Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 14, 16, 27, and 28.

¹Series is a weighted 4-term moving average (with weights 1,2,2,1) placed at the terminal month of the span.

²See "New Features and Changes for This Issue," page iii.

NOTE: Figures are the percent of series components rising. (Half of the unchanged components are counted as rising.) Data are centered within the spans: 1-month indexes are placed on the 2d month, 6-month indexes on the 4th month, and 9-month indexes on the 6th month of the span. Diffusion indexes 961, 962, and 963 are computed from seasonally adjusted components; indexes 950, 951, and 952 are computed from the components of the composite indexes. The "r" indicates revised; "p", preliminary; and "NA", not available.

Graphs of these series are shown on page 37.

¹Component data are not available for publication and therefore are not shown in table C2.

²Excludes series 12 and 36 for which data are not yet available.

³Excludes series 57 for which data are not yet available.

⁴Excludes series 70 and 95 for which data are not yet available.

NOTE: Figures are the percent of series components rising. (Half of the unchanged components are counted as rising.) Data are centered within the spans: 1-month indexes are placed on the 2d month, 6-month indexes on the 4th month, and 9-month indexes on the 6th month of the span; 1-quarter indexes are placed on the 1st month of the 2d quarter, 3-quarter indexes on the 1st month of the 3d quarter, and 4-quarter indexes on the 2d month of the 3d quarter. Seasonally adjusted components are used except in index 968, which requires no adjustment, and index 969, which is adjusted as an index (1-quarter span only). Unadjusted series are indicated by [Ⓢ]. The "r" indicates revised; "p", preliminary; and "NA", not available.

Graphs of these series are shown on page 38.

¹This is a copyrighted series used by permission; it may not be reproduced without written permission from The Conference Board.

²Based on 65 components through November 1976, and on 62 components thereafter. Component data are not shown in table C2 but are available from the source agency.

³Average for November 1, 8, 15, and 22.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by ^u. Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown at the back of the book. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

Graphs of these series are shown on pages 50 and 51.

¹Adjusted for overtime (in manufacturing only) and interindustry employment shifts.

²Percent changes are centered within the spans: 1-month changes are placed on the 2d month, 6-month changes are placed on the 4th month, 1-quarter changes are placed on the 1st month of the 2d quarter, and 4-quarter changes are placed on the middle month of the 3d quarter.

969. Profits, manufacturing (Citibank) ⁴	-8	18	-8	-2

NOTE: These series are seasonally adjusted by the Bureau of Economic Analysis or the National Bureau of Economic Research, Inc., rather than by the source agency. Seasonal adjustments are kept current by the Bureau of Economic Analysis. Seasonally adjusted data prepared by the source agency will be used in *Business Conditions Digest* whenever they are available. For a description of the method used to compute these factors, see Bureau of the Census Technical Paper No. 15, *The X-11 Variant of the Census Method II Seasonal Adjustment Program*.

¹ Factors are the products of seasonal and trading-day factors.

² Quarterly series; factors are placed in the middle month of the quarter.

³ These quantities, in millions of dollars, are subtracted from the month-to-month net change in the unadjusted monthly totals to yield the seasonally adjusted net change. These factors are computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program.

⁴ 1-quarter diffusion index; factors are placed in the first month of the quarter. The unadjusted diffusion index is computed and these factors, computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program, are subtracted to yield the seasonally adjusted index.

G. Experimental Data and Analyses

Recovery Comparisons: Current and Selected Historical Patterns

HOW TO READ CYCLICAL COMPARISON CHARTS

These charts show graphically, for selected indicators, the path of the current business recovery. To set the current cyclical movements into historical perspective, cyclical paths over generally similar historical periods are also shown. The selected periods are superimposed so as to compare the current business recovery with corresponding historical patterns and to facilitate critical assessment of the amplitude, duration, and severity of the indicators' current movements.

1. Two cyclical comparison charts are shown for each indicator. The left panel shows a comparison based on reference peak levels and reference trough dates; in the right panel, a chart is aligned according to both the levels and the dates of the specific troughs in each indicator. (See charts on the following pages.)

2. The vertical line represents trough dates: reference trough dates in the left panel and specific trough dates in the right panel. The current recovery and the corresponding historical periods are positioned so that their reference trough dates (left panel) and specific trough dates (right panel) are on this vertical line.

3. The horizontal line represents the level of data at reference cycle peaks (left panel) and at specific cycle troughs (right panel). The current recovery and the corresponding historical periods are positioned so that their reference peaks (left panel) and specific troughs (right panel) are on this horizontal line.

4. For most series, deviations (percent or actual differences) from the reference peak and specific trough levels are computed and plotted. For series measured in percent units (e.g., the unemployment rate), these units (actual data) are plotted rather than deviations. The numerical values of these deviations for the current cycle are shown in the tables accompanying the charts.

5. For series that move counter to movements in general business activity (e.g., the unemployment rate), an inverted scale is used; i.e., declines in data are shown as upward movements in the plotted lines, and increases in data, as downward movements in plotted lines.

6. In each chart, several curves are shown. The heavy solid line (—) describes the current recovery. The dotted line (•••) represents the median pattern of the five post-World War II recoveries. The remaining lines represent selected business recoveries. In the left panel, each line is labeled according to the year of the reference trough. In the right panel, the label for each line indicates the month and year of the specific trough.

7. The business cycle (reference) peaks and troughs used in these charts are those designated by the National Bureau of Economic Research as follows: peaks, Nov. 1948 (IVQ 1948), July 1953 (IIQ 1953), Aug. 1957 (IIIQ 1957), Apr. 1960 (IIQ 1960), Dec. 1969 (IVQ 1969), Nov. 1973 (IVQ 1973); troughs, Oct. 1949 (IVQ 1949), May 1954 (IIQ 1954), Apr. 1958 (IIQ 1958), Feb. 1961 (IQ 1961), Nov. 1970 (IVQ 1970), Mar. 1975 (IQ 1975).

The three-part timing code indicates the timing classification of the series at peaks, at troughs, and at all turns: L = leading; C = roughly coincident; Lg = lagging; and U = unclassified.

This number indicates latest calendar month of data plotted (1 = January).

This scale measures time in months before (-) and after (+) reference trough dates (left panel) and specific trough dates (right panel).

This scale shows deviations (percent or actual differences) from reference peak levels (left panel) and specific trough levels (right panel).

This scale shows actual series units and applies only to the current business cycle (heavy solid line).

TITLES AND SOURCES OF SERIES

Series are listed below according to the sections of this report in which they appear. Series numbers are for identification only and do not reflect relationships or order among the series. "M" following a series title indicates monthly data; "Q" indicates quarterly data. Data apply to the whole period except when indicated by "EOM" (end of month) or "EOQ" (end of quarter).

To save space, the commonly used sources listed below are referred to by number:

Source 1—U.S. Department of Commerce, Bureau of Economic Analysis; Source 2—U.S. Department of Commerce, Bureau of the Census; Source 3—U.S. Department of Labor, Bureau of Labor Statistics; Source 4—Board of Governors of the Federal Reserve System.

Following the source for each series is an indication of the pages on which that series appears. The "Series Finding Guide" also lists chart and table page numbers for each series.

I-A. Composite Indexes

910. Composite index of twelve leading indicators (includes series 1, 3, 8, 12, 19, 20, 29, 32, 36, 92, 104, 105) (M).—Source 1 (11,40,59)
913. Composite index of marginal employment adjustments (includes series 1, 2, 3, 5) (M).—Source 1 (12,59)
914. Composite index of capital investment commitments (includes series 12, 20, 29) (M).—Source 1 (12,59)
915. Composite index of inventory investment and purchasing (includes series 8, 32, 36, 92) (M).—Source 1 (12,59)
916. Composite index of profitability (includes series 17, 19, 80) (M).—Source 1 (12,59)
917. Composite index of money and financial flows (includes series 104, 105, 110) (M).—Source 1 (12,59)
920. Composite index of four roughly coincident indicators (includes series 41, 47, 51, 57) (M).—Source 1 (11,40,59)
930. Composite index of six lagging indicators (includes series 62, 70, 72, 91, 95, 109) (M).—Source 1 (11,40,59)
940. Ratio, coincident composite index (series 920) to lagging composite index (series 930) (M).—Source 1 (12,59)

I-B. Cyclical Indicators

1. Average workweek of production workers, manufacturing (M).—Source 3 (13,17,60,76)
2. Accession rate, manufacturing (M).—Source 3 (17,60)
3. Layoff rate, manufacturing (M).—Source 3 (13,17,60)
4. Quit rate, manufacturing (M).—Source 3 (17,60)

5. Average weekly initial claims for unemployment insurance, State programs (M).—U.S. Department of Labor, Employment Training Administration; seasonal adjustment by Bureau of Economic Analysis (17,60)
6. Value of manufacturers' new orders, durable goods industries, in current dollars (M).—Source 2 (22,63,76)
7. Value of manufacturers' new orders, durable goods industries, in 1972 dollars (M).—Sources 1, 2, and 3 (22,63)
8. Value of manufacturers' new orders for consumer goods and materials in 1972 dollars (M).—Sources 1, 2, and 3 (13,22,63)
9. Construction contracts awarded for commercial and industrial buildings, floor space (M).—McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (24,65)
10. Contracts and orders for plant and equipment in current dollars (M).—Source 2 and McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of the Census and Bureau of Economic Analysis (24,65)
11. Newly approved capital appropriations, 1,000 manufacturing corporations (Q).—The Conference Board. (Used by permission. This series may not be reproduced without written permission from the source.) (25,65)
12. Index of net business formation (M).—Source 1; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (13,24,64)
13. Number of new business incorporations (M).—Dun & Bradstreet, Inc.; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (24,64)
14. Current liabilities of business failures (M).—Dun & Bradstreet, Inc. (34,71)
15. Profits (after taxes) per dollar of sales, all manufacturing corporations (Q).—Federal Trade Commission and Securities and Exchange Commission; seasonal adjustment by Bureau of Economic Analysis (30,69)
16. Corporate profits after taxes in current dollars (Q).—Source 1 (29,68)
17. Index of price per unit of labor cost, manufacturing—ratio, index of wholesale prices of manufactured goods (unadjusted) to seasonally adjusted index of compensation of employees in manufacturing (sum of wages, salaries, and supplements to wages and salaries) per unit of output (M).—Sources 1, 3, and 4 (30,69)
18. Corporate profits after taxes in 1972 dollars (Q).—Source 1 (29,68)
19. Index of stock prices, 500 common stocks (M).—Standard & Poor's Corporation (14,29,58,68,94)
20. Contracts and orders for plant and equipment in 1972 dollars (M).—Sources 1, 2, 3, and McGraw-Hill Information Systems Company (13,24,65)
21. Average weekly overtime hours of production workers, manufacturing (M).—Source 3 (17,60)
22. Ratio of profits (after taxes) to total corporate domestic income (Q).—Source 1 (30,68)
23. Index of industrial materials prices (M).—Source 3 (29,68,78)
24. Value of manufacturers' new orders, capital goods industries, nondefense, in current dollars (M).—Source 2 (24,65)
25. Change in manufacturers' unfilled orders, durable goods industries (M).—Source 2 (22,63)
27. Value of manufacturers' new orders, capital goods industries, nondefense, in 1972 dollars (M).—Sources 1, 2, and 3 (24,65)
28. New private housing units started, total (M).—Source 2 (26,66)
29. Index of new private housing units authorized by local building permits (M).—Source 2 (14,26,66)
30. Gross private domestic investment, change in business inventories, all industries, in 1972 dollars (Q).—Source 1 (27,43,67,80)
31. Change in book value of manufacturing and trade inventories, total (M).—Sources 1 and 2 (27,67)
32. Vendor performance, percent of companies reporting slower deliveries (M).—Purchasing Management Association of Chicago (13,22,63)
33. Net change in mortgage debt held by financial institutions and life insurance companies (M).—American Council of Life Insurance; Federal National Mortgage Association; U.S. Department of Housing and Urban Development, Government National Mortgage Association; National Association of Mutual Savings Banks; U.S. Savings and Loan League; and source 4; seasonal adjustment by Bureau of Economic Analysis (33,70)
34. Net cash flow, corporate, in current dollars (Q).—Source 1 (30,69)
35. Net cash flow, corporate, in 1972 dollars (Q).—Source 1 (30,69)
36. Net change in inventories on hand and on order in 1972 dollars (smoothed) (M).—Sources 1, 2, and 3 (14,27,67)
37. Number of persons unemployed, labor force survey (M).—Sources 2 and 3 (19,52,61,88)
38. Change in stocks of materials and supplies on hand and on order, manufacturing (M).—Source 2 (27,67)
39. Percent of consumer installment loans delinquent 30 days and over (EOM).—American Bankers Association (34,71)
40. Number of employees in nonagricultural goods-producing industries—mining, manufacturing, and construction (M).—Source 3 (18,61)
41. Number of employees on nonagricultural payrolls, establishment survey (M).—Source 3 (15,18,61)
42. Number of persons engaged in nonagricultural activities, labor force survey (M).—Sources 2 and 3 (18,61)
43. Unemployment rate, total (M).—Sources 2 and 3 (19,61)

TITLES AND SOURCES OF SERIES— Continued

44. Unemployment rate, 15 weeks and over (M).—Sources 2 and 3 (19,61)
45. Average weekly insured unemployment rate, State programs (M).—U.S. Department of Labor, Employment Training Administration (19,61)
46. Index of help-wanted advertising in newspapers (M).—The Conference Board (18,60)
47. Index of industrial production, total (M).—Source 4 (15,21,40,57,62,77,92)
48. Employee-hours in nonagricultural establishments (M).—Source 3 (18,40,60)
49. Value of goods output in 1972 dollars (Q).—Source 1 (21,62)
50. Gross national product in 1972 dollars (Q).—Source 1 (20,40,41,62,79)
51. Personal income, less transfer payments, in 1972 dollars (M).—Source 1 (15,20,40,62)
52. Personal income, total, in 1972 dollars (M).—Source 1 (20,62)
53. Wage and salary income in mining, manufacturing, and construction in 1972 dollars (M).—Sources 1 and 3 (20,62)
54. Sales of retail stores in current dollars (M).—Source 2 (23,64)
55. Personal consumption expenditures, automobiles (Q).—Source 1 (23,64)
56. Manufacturing and trade sales in current dollars (M).—Sources 1 and 2 (23,64)
57. Manufacturing and trade sales in 1972 dollars (M).—Sources 1, 2, and 3 (15,23,64)
58. Index of consumer sentiment (Q).—University of Michigan, Survey Research Center (23,64)
59. Sales of retail stores in 1972 dollars (M).—Sources 1 and 3 (23,64)
60. Ratio, help-wanted advertising in newspapers (series 46) to number of persons unemployed (series 37) (M).—Sources 1, 2, 3, and The Conference Board (18,60)
61. Business expenditures for new plant and equipment, total (Q).—Source 1 (25,66)
62. Index of labor cost per unit of output, total manufacturing—ratio, index of compensation of employees in manufacturing (sum of wages, salaries, and supplements to wages and salaries) to index of industrial production, manufacturing (M).—Sources 1 and 4 (16,31,69)
63. Index of unit labor cost, private business sector (Q).—Source 3 (31,69)
64. Compensation of employees as a percent of national income (Q).—Source 1 (31,48,69,82)
65. Manufacturers' inventories of finished goods, book value, all manufacturing industries (EOM).—Source 2 (28,67)
66. Consumer installment debt (EOM).—Source 4; FRB seasonally adjusted net change added to seasonally adjusted figure for previous month to obtain current figure (36,72)
67. Bank rates on short-term business loans, 35 cities (Q).—Source 4 (36,72)
68. Labor cost (current dollars) per unit of gross domestic product (1972 dollars), nonfinancial corporations—ratio of current-dollar compensation of employees to real gross corporate product (Q).—Source 1 (31,69)
69. Manufacturers' machinery and equipment sales and business construction expenditures (industrial and commercial construction put in place) (M).—Source 2 (25,66)
70. Manufacturing and trade inventories, total book value, in 1972 dollars (EOM).—Sources 1, 2, and 3 (16,28,67)
71. Manufacturing and trade inventories, total book value, in current dollars (EOM).—Sources 1 and 2 (28,67)
72. Commercial and industrial loans outstanding, weekly reporting large commercial banks (M).—Source 4; seasonal adjustment by Bureau of Economic Analysis (16,36,72)
73. Index of industrial production, durable manufactures (M).—Source 4 (21,62)
74. Index of industrial production, nondurable manufactures (M).—Source 4 (21,62)
75. Index of industrial production, consumer goods (M).—Source 4 (23,64)
76. Index of industrial production, business equipment (M).—Source 4 (25,66)
77. Ratio, constant-dollar inventories (series 70) to sales (series 57), manufacturing and trade, total (EOM).—Sources 1, 2, and 3 (28,67)
78. Stocks of materials and supplies on hand and on order, manufacturing (EOM).—Source 2 (28,67)
79. Corporate profits after taxes with inventory valuation and capital consumption adjustments in current dollars (Q).—Source 1 (29,68)
80. Corporate profits after taxes with inventory valuation and capital consumption adjustments in 1972 dollars (Q).—Source 1 (29,68)
81. Ratio of profits (after taxes) with inventory valuation and capital consumption adjustments to total corporate domestic income (Q).—Source 1 (30,69)
82. Rate of capacity utilization, manufacturing (Q).—Source 4 (21,63)
83. Rate of capacity utilization, manufacturing (EOQ).—Source 1 (21,63)
84. Rate of capacity utilization, materials (Q).—Source 4 (21,63)
85. Change in money supply M1 (demand deposits plus currency) (M).—Source 4 (32,70)
86. Gross private domestic fixed investment, total non-residential, in 1972 dollars (Q).—Source 1 (26,66)
87. Gross private domestic fixed investment, nonresidential structures, in 1972 dollars (Q).—Source 1 (26,66)
88. Gross private domestic fixed investment, nonresidential producers' durable equipment, in 1972 dollars (Q).—Source 1 (26,66)
89. Gross private domestic fixed investment, total residential, in 1972 dollars (Q).—Source 1 (26,66)
90. Ratio, civilian employment to total population of working age (M).—Sources 1, 2, and 3 (19,61)
91. Average (mean) duration of unemployment in weeks (M).—Sources 2 and 3 (16,19,61)
92. Change in sensitive prices (WPI of crude materials excluding foods, feeds, and fibers) (smoothed) (M).—Sources 1 and 3 (14,29,68)
93. Free reserves (member banks excess reserves minus borrowings) (M).—Source 4 (34,71)
94. Member bank borrowings from the Federal Reserve (M).—Source 4 (34,71)
95. Ratio, consumer installment debt to personal income (EOM).—Sources 1 and 4 (16,36,72)
96. Manufacturers' unfilled orders, durable goods industries (EOM).—Source 2 (22,63)
97. Backlog of capital appropriations, manufacturing (EOQ).—The Conference Board. (Used by permission. This series may not be reproduced without written permission from the source.) (25,65)
102. Change in money supply M2 (demand deposits and currency plus time deposits at commercial banks other than large CD's) (M).—Source 4 (32,70)
104. Change in total liquid assets (smoothed) (M).—Sources 1 and 4 (14,32,70)
105. Money supply M1 (demand deposits plus currency) in 1972 dollars (M).—Sources 1, 3, and 4 (14,32,70)
106. Money supply M2 (demand deposits and currency plus time deposits at commercial banks other than large CD's) in 1972 dollars (M).—Sources 1, 3, and 4 (32,70)
107. Ratio, gross national product to money supply M1 (Q).—Sources 1 and 4 (32,70)
108. Ratio, personal income to money supply M2 (M).—Sources 1 and 4 (32,70)
109. Average prime rate charged by banks (M).—Source 4 (36,72)
110. Total funds raised by private nonfinancial borrowers in credit markets (Q).—Source 4 (33,71)
112. Net change in bank loans to businesses (M).—Source 4; seasonal adjustment by Bureau of Economic Analysis (33,71)
113. Net change in consumer installment debt (M).—Source 4 (33,71)
114. Discount rate on new issues of 91-day Treasury bills (M).—Source 4 (35,71)
115. Yield on long-term Treasury bonds (M).—U.S. Department of the Treasury (35,72)

TITLES AND SOURCES OF SERIES— Continued

116. Yield on new issues of high-grade corporate bonds (M).—Citibank and U.S. Department of the Treasury (35,72)
117. Yield on municipal bonds, 20-bond average (M).—The Bond Buyer (35,72)
118. Secondary market yields on FHA mortgages (M).—U.S. Department of Housing and Urban Development, Federal Housing Administration (35,72)
119. Federal funds rate (M).—Source 4 (35,71)

I-C. Diffusion Indexes

950. Diffusion index of twelve leading indicator components (M).—Source 1 (37,73)
951. Diffusion index of four roughly coincident indicator components (M).—Source 1 (37,73)
952. Diffusion index of six lagging indicator components (M).—Source 1 (37,73)
961. Diffusion index of average workweek of production workers, manufacturing—21 industries (M).—Sources 1 and 3 (37,73,76)
962. Diffusion index of initial claims for unemployment insurance, State programs—47 areas (M).—Source 1 and U.S. Department of Labor, Employment Training Administration; seasonal adjustment by Bureau of Economic Analysis (37,73)
963. Diffusion index of number of employees on private non-agricultural payrolls—172 industries (M).—Source 3 (37,73)
964. Diffusion index of value of manufacturers' new orders, durable goods industries—35 industries (M).—Sources 1 and 2 (38,74,76)
965. Diffusion index of newly approved capital appropriations, deflated—17 industries (Q).—The Conference Board. (Used by permission. This series may not be reproduced without written permission from the source.) (38,74)
966. Diffusion index of industrial production—24 industries (M).—Sources 1 and 4 (38,74,77)
967. Diffusion index of industrial materials prices—13 industrial materials (M).—Sources 1 and 3; seasonal adjustment by Bureau of Economic Analysis (38,74,78)
968. Diffusion index of stock prices, 500 common stocks—62-82 industries (M).—Standard & Poor's Corporation (38,74)
969. Diffusion index of profits, manufacturing—about 1,000 corporations (Q).—Citibank; seasonal adjustment by Bureau of Economic Analysis and National Bureau of Economic Research, Inc. (38,74)
970. Diffusion index of business expenditures for new plant and equipment, total—18 industries (Q).—Source 1 (39,75)
971. Diffusion index of new orders, manufacturing—about 700 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)

972. Diffusion index of net profits, manufacturing and trade—about 1400 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)
973. Diffusion index of net sales, manufacturing and trade—about 1400 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)
974. Diffusion index of number of employees, manufacturing and trade—about 1400 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)
975. Diffusion index of level of inventories, manufacturing and trade—about 1400 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)
976. Diffusion index of selling prices, manufacturing—about 700 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)
977. Diffusion index of selling prices, wholesale trade—about 450 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)
978. Diffusion index of selling prices, retail trade—about 250 businessmen reporting (Q).—Dun & Bradstreet, Inc. (Used by permission. This series may not be reproduced without written permission from the source.) (39,75)

II-A. National Income and Product

30. Gross private domestic investment, change in business inventories, all industries, in 1972 dollars (Q).—Source 1 (27,43,67,80)
50. Gross national product in 1972 dollars (Q).—Source 1 (20,40,41,62,79)
64. Compensation of employees as a percent of national income (Q).—Source 1 (31,48,69,82)
200. Gross national product in current dollars (Q).—Source 1 (41,79)
213. Final sales (series 50 minus series 30) in 1972 dollars (Q).—Source 1 (41,79)
217. Per capita gross national product in 1972 dollars (Q).—Sources 1 and 2 (41,79)
220. National income in current dollars (Q).—Source 1 (46,81)
223. Personal income in current dollars (M).—Source 1 (41,62)
224. Disposable personal income in current dollars (Q).—Source 1 (41,79)
225. Disposable personal income in 1972 dollars (Q).—Source 1 (41,79)

227. Per capita disposable personal income in 1972 dollars (Q).—Sources 1 and 2 (41,79)
230. Personal consumption expenditures, total, in current dollars (Q).—Source 1 (42,79)
231. Personal consumption expenditures, total, in 1972 dollars (Q).—Source 1 (42,79)
232. Personal consumption expenditures, durable goods, in current dollars (Q).—Source 1 (42,79)
233. Personal consumption expenditures, durable goods, in 1972 dollars (Q).—Source 1 (42,79)
235. Personal consumption expenditures, total, as a percent of gross national product (Q).—Source 1 (48,82)
236. Personal consumption expenditures, nondurable goods, in current dollars (Q).—Source 1 (42,80)
237. Personal consumption expenditures, services, in current dollars (Q).—Source 1 (42,80)
238. Personal consumption expenditures, nondurable goods, in 1972 dollars (Q).—Source 1 (42,80)
239. Personal consumption expenditures, services, in 1972 dollars (Q).—Source 1 (42,80)
240. Gross private domestic investment, total, in current dollars (Q).—Source 1 (43,80)
241. Gross private domestic investment, total, in 1972 dollars (Q).—Source 1 (43,80)
242. Gross private domestic fixed investment, total, in current dollars (Q).—Source 1 (43,80)
243. Gross private domestic fixed investment, total, in 1972 dollars (Q).—Source 1 (43,80)
245. Gross private domestic investment, change in business inventories, all industries, in current dollars (Q).—Source 1 (43,80)
247. Gross private domestic investment, change in business inventories, all industries, as a percent of gross national product (Q).—Source 1 (48,82)
248. Gross private domestic fixed investment, nonresidential, as a percent of gross national product (Q).—Source 1 (48,82)
249. Gross private domestic fixed investment, residential, as a percent of gross national product (Q).—Source 1 (48,82)
250. Net exports of goods and services in current dollars; national income and product accounts (Q).—Source 1 (45,81)
251. Net exports of goods and services as a percent of gross national product (Q).—Source 1 (48,82)
252. Exports of goods and services in current dollars; national income and product accounts (Q).—Source 1 (45,81)
253. Imports of goods and services in current dollars; national income and product accounts (Q).—Source 1 (45,81)

TITLES AND SOURCES OF SERIES— Continued

255. Net exports of goods and services in 1972 dollars; national income and product accounts (Q).—Source 1 (45,81)
256. Exports of goods and services in 1972 dollars; national income and product accounts (Q).—Source 1 (45,81)
257. Imports of goods and services in 1972 dollars; national income and product accounts (Q).—Source 1 (45,81)
260. Government purchases of goods and services, total, in current dollars (Q).—Source 1 (44,80)
261. Government purchases of goods and services, total, in 1972 dollars (Q).—Source 1 (44,80)
262. Federal Government purchases of goods and services in current dollars (Q).—Source 1 (44,80)
263. Federal Government purchases of goods and services in 1972 dollars (Q).—Source 1 (44,80)
265. Federal Government purchases of goods and services as a percent of gross national product (Q).—Source 1 (48,82)
266. State and local government purchases of goods and services in current dollars (Q).—Source 1 (44,80)
267. State and local government purchases of goods and services in 1972 dollars (Q).—Source 1 (44,80)
268. State and local government purchases of goods and services as a percent of gross national product (Q).—Source 1 (48,82)
280. Compensation of employees (Q).—Source 1 (46,81)
282. Proprietors' income with inventory valuation and capital consumption adjustments (Q).—Source 1 (46,81)
283. Proprietors' income with inventory valuation and capital consumption adjustments as a percent of national income (Q).—Source 1 (48,82)
284. Rental income of persons with capital consumption adjustment (Q).—Source 1 (46,81)
285. Rental income of persons with capital consumption adjustment as a percent of national income (Q).—Source 1 (48,82)
286. Corporate profits with inventory valuation and capital consumption adjustments (Q).—Source 1 (46,81)
287. Corporate profits with inventory valuation and capital consumption adjustments as a percent of national income (Q).—Source 1 (48,82)
288. Net interest (Q).—Source 1 (46,81)
289. Net interest as a percent of national income (Q).—Source 1 (48,82)
290. Gross saving—private saving plus government surplus or deficit (Q).—Source 1 (47,81)
292. Personal saving (Q).—Source 1 (47,81)
293. Personal saving rate—personal saving as a percent of disposable personal income (Q).—Source 1 (47,82)

295. Business saving—undistributed corporate profits plus capital consumption allowances with inventory valuation and capital consumption adjustments (Q).—Source 1 (47,81)
298. Government surplus or deficit, total (Q).—Source 1 (47,82)

II-B. Prices, Wages, and Productivity

310. Implicit price deflator, gross national product (Q).—Source 1 (49,83)
311. Fixed weighted price index, gross business product (Q).—Source 1 (49,83)
320. Index of consumer prices, all items (M).—Source 3 (50,58,83,93)
322. Index of consumer prices, food (M).—Source 3 (50,83)
330. Index of wholesale prices, all commodities (M).—Source 3 (49,84)
331. Index of wholesale prices, crude materials for further processing (M).—Source 3 (49,84)
332. Index of wholesale prices, intermediate materials, supplies, and components (M).—Source 3 (49,85)
333. Index of wholesale prices, producer finished goods (M).—Source 3 (49,85)
334. Index of wholesale prices, consumer finished goods (M).—Source 3 (49,85)
335. Index of wholesale prices, industrial commodities (M).—Source 3 (49,84)
340. Index of average hourly earnings of production workers, private nonfarm economy—adjusted for overtime (in manufacturing only), interindustry employment shifts, and seasonality (M).—Source 3 (50,86)
341. Index of real average hourly earnings of production workers, private nonfarm economy—adjusted for overtime (in manufacturing only), interindustry employment shifts, and seasonality (M).—Source 3 (50,86)
345. Index of average hourly compensation, all employees, nonfarm business sector (Q).—Source 3 (50,86)
346. Index of real average hourly compensation, all employees, nonfarm business sector (Q).—Source 3 (50,87)
348. Negotiated wage and benefit decisions, all industries—first year average (mean) changes (Q).—Source 3 (51,87)
349. Negotiated wage and benefit decisions, all industries—average (mean) changes over life of contract (Q).—Source 3 (51,87)
358. Index of output per hour, all persons, nonfarm business sector (Q).—Source 3 (50,87)
370. Index of output per hour, all persons, private business sector (Q).—Source 3 (50,87)

II-C. Labor Force, Employment, and Unemployment

37. Number of persons unemployed, labor force survey (M).—Sources 2 and 3 (19,52,61,88)
441. Total civilian labor force, labor force survey (M).—Sources 2 and 3 (52,88)
442. Total civilian employment, labor force survey (M).—Sources 2 and 3 (52,88)
444. Number unemployed, males 20 years and over, labor force survey (M).—Sources 2 and 3 (52,88)
445. Number unemployed, females 20 years and over, labor force survey (M).—Sources 2 and 3 (52,88)
446. Number unemployed, both sexes 16-19 years of age, labor force survey (M).—Sources 2 and 3 (52,88)
447. Number unemployed, full-time workers, labor force survey (M).—Sources 2 and 3 (52,88)
448. Number employed, part-time workers for economic reasons, labor force survey (M).—Sources 2 and 3 (52,88)
451. Civilian labor force participation rate, males 20 years and over (M).—Sources 2 and 3 (52,88)
452. Civilian labor force participation rate, females 20 years and over (M).—Sources 2 and 3 (52,88)
453. Civilian labor force participation rate, both sexes 16-19 years of age (M).—Sources 2 and 3 (52,88)

II-D. Government Activities

500. Federal Government surplus or deficit; national income and product accounts (Q).—Source 1 (53,89)
501. Federal Government receipts; national income and product accounts (Q).—Source 1 (53,89)
502. Federal Government expenditures; national income and product accounts (Q).—Source 1 (53,89)
510. State and local government surplus or deficit; national income and product accounts (Q).—Source 1 (53,89)
511. State and local government receipts; national income and product accounts (Q).—Source 1 (53,89)
512. State and local government expenditures; national income and product accounts (Q).—Source 1 (53,89)
516. Defense Department obligations incurred, total, excluding military assistance (Q).—U.S. Department of Defense, OSD, Comptroller, Directorate for Program Financial Control; seasonal adjustment by Bureau of Economic Analysis (54,89)
525. Military prime contract awards to U.S. business firms and institutions (M).—U.S. Department of Defense, OSD, Comptroller, Directorate for Management Information Operation and Control; seasonal adjustment by Bureau of Economic Analysis (54,89)
548. Value of manufacturers' new orders, defense products (M).—Source 2 (54,89)
564. Federal Government purchases of goods and services for national defense (Q).—Source 1 (54,89)

TITLES AND SOURCES OF SERIES— Continued

II-E. U.S. International Transactions

602. Exports, excluding military aid shipments, total (M).—Source 2 (55,90)
604. Exports of agricultural products (M).—Source 2; seasonal adjustment by Bureau of Economic Analysis (55,90)
606. Exports of nonelectrical machinery (M).—Source 2; seasonal adjustment by Bureau of Economic Analysis (55,90)
612. General imports, total (M).—Source 2 (55,90)
614. Imports of petroleum and petroleum products (M).—Source 2; seasonal adjustment by Bureau of Economic Analysis (55,90)
616. Imports of automobiles and parts (M).—Source 2; seasonal adjustment by Bureau of Economic Analysis (55,90)
618. Merchandise exports, adjusted, excluding military grants (Q).—Source 1 (56,91)
620. Merchandise imports, adjusted, excluding military (Q).—Source 1 (56,91)
622. Balance on merchandise trade (Q).—Source 1 (56,91)
651. Income on U.S. investments abroad (Q).—Source 1 (56,91)
652. Income on foreign investments in the United States (Q).—Source 1 (56,91)
667. Balance on goods and services (Q).—Source 1 (56,91)
668. Exports of goods and services, excluding transfers under U.S. military grants (Q).—Source 1 (56,91)
669. Imports of goods and services, total (Q).—Source 1 (56,91)

II-F. International Comparisons

19. United States, index of stock prices, 500 common stocks (M).—Standard & Poor's Corporation (14,29,58,68,94)
47. United States, index of industrial production, total (M).—Source 4 (15,21,40,57,62,77,92)
320. United States, index of consumer prices, all items (M).—Source 3 (49,58,83,93)
