BUSINESS CYCLE DEVELOPMENTS

November 1967

DATA THROUGH OCTOBER

This report was prepared in the Economic Research and Analysis Division under the direction of Julius Shiskin, Chief. Technical staff and their responsibilities for the publication are—

Feliks Tamm—Technical supervision and review,
Barry A. Beckman—Specifications for computer processing,
Gerald F. Donahoe—New projects,
Morton Somer—Selection of seasonal adjustment methods,
Betty F. Tunstall—Collection and compilation of basic data.

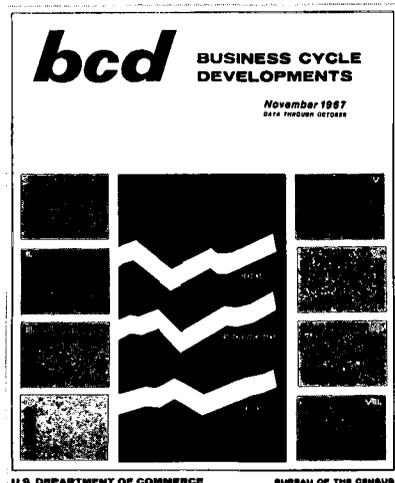

Editorial supervision is provided by Geraldine Censky of the Administrative and Publications Services Division. Stuart I. Freeman is responsible for publication design.

The cooperation of various government and private agencies which provide data is gratefully acknowledged. The agencies furnishing data are indicated in the list of series and sources on the back cover of this report.

Subscription price is \$7 a year (\$1.75 additional for foreign mailing). Single issues are 60 cents.

Airmail delivery is available at an additional charge. For information about domestic or foreign airmail delivery, write to the Superintendent of Documents (address below), enclosing a copy of your address label. Make checks payable to the Superintendent of Documents. Send to U.S. Government Printing Office, Washington, D.C. 20402, or to any U.S. Department of Commerce Field Office.

ABOUT THE COVER—Series in this publication are grouped according to their usual timing and shown against the background of contractions and expansions in general business activity. The center panel illustrates this concept. The vertical bar represents a contraction; the top curve, the Leading Series which usually fall before a contraction has begun and rise before it has ended; the middle curve, the Coincident Series which usually fall with the contraction period; the bottom curve, the Lagging Series which fall after a contraction has begun and rise after it ends. Series are also classified by economic process within each timing group. Processes are indicated in the squares bordering the panel.

BUREAU OF THE CENSUS

A. Ross Eckler, Director
Robert F. Drury, Deputy Director
Morris H. Hansen, Asst. Director for Research and Development
JULIUS SHISKIN, Chief Economic Statistician

PREFACE This report brings together many of the available economic indicators in convenient form for analysis and interpretation. The presentation and classification of series follow the business indicators approach. The list of indicators and their classification into "leading," "roughly coincident," and "lagging" groups are those designated by the National Bureau of Economic Research (NBER), a private, nonprofit research organization which has been preparing lists of business cycle indicators for more than 40 years. The business cycle turning dates are also those designated by NBER. In addition, all series within each timing group are classified under eight economic processes (e.g., employment and unemployment; production, income, consumption, and trade; fixed capital investment; etc.). Some special series included in the list (such as labor costs in manufacturing and the total of machinery and equipment sales and business construction) have been constructed by the NBER for purposes of business cycle analysis.

The utilization of the National Bureau list of indicators and their cyclical turning dates is not to be taken as implying acceptance or endorsement by the Bureau of the Census or any other government agency of any approach to business cycle analysis, nor of the special series compiled by the National Bureau to facilitate cyclical studies. This report is intended only to supplement other Department of Commerce reports that provide information so arranged as to facilitate the analysis of current business conditions.

The unique features of BCD are the arrangement of data according to their usual timing relations during the course of the business cycle, the cross-classification by timing and economic process, and the inclusion of special analytical measures and historical cyclical comparisons that help in evaluating the current state of the business cycle. In addition, the movements of the series are shown against the background of the expansions and contractions of the general business cycle so that "leads" and "lags" can be readily detected and unusual cyclical developments spotted.

About 115 principal series and over 300 components are used in preparing BCD. (This figure includes 19 foreign series in addition to 96 U.S. series.) Almost all of the basic data have been published by the source agency. A complete list of series titles and the sources of data is shown on the back cover of this report.

Cross-Classification of Business Indicators by Economic Process and Cyclical Timing

(Minor economic processes and the number of series in each process are shown for each classification. See the index and back cover for series titles)

Cyclical Timing Economic Processes	LEADING INDICATORS (36 series)	ROUGHLY COINCIDENT INDICATORS (25 series)	LAGGING INDICATORS (11 series)	OTHER SELECTED U.S. SERIES (16 series)
EMPLOYMENT AND UNEMPLOYMENT (14 series)	Marginal employment adjustments (5 series)	Job vacancies (2 series) Comprehensive employment (3 series) Comprehensive unemployment (3 series)	Long-duration unemployment (1 series)	
PRODUCTION, INCOME, CONSUMPTION, AND TRADE (8 series)		Comprehensive production (3 series) Comprehensive income (2 series) Comprehensive consumption and trade (3 series)		
FIXED CAPITAL INVESTMENT (14 series)	Formation of business enterprises (2 series) New investment commitments (8 series)	Backlog of investment commitments (2 series)	Investment expenditures (2 series)	
INVENTORIES AND INVENTORY INVESTMENT (9 series)	Inventory investment and purchasing (7 series)		Inventories (2 series)	
PRICES, COSTS, AND PROFITS (11 series)	Sensitive commodity prices (1 series) Stock prices (1 series) Profits and profit margins (4 series)	Comprehensive wholesale prices (2 series)	Unit labor costs (2 series)	Comprehensive retail prices (1 series)
MONEY AND CREDIT (17 series)	Flows of money and credit (6 series) Credit difficulties (2 series)	Bank reserves (1 series) Money market interest rates (4 series)	Outstanding debt (2 series) Interest rates on business loans and mortgages (2 series)	
FOREIGN TRADE AND PAYMENTS (6 series)				Foreign trade and payments (6 series)
FEDERAL GOVERNMENT ACTIVITIES (9 series)				Federal Government activities (9 series)

BACKGROUND MATERIALS

A revised list of indicators was introduced in the April issue of *BUSINESS CYCLE DEVELOPMENTS*. Research work for the revised list was carried out by the National Bureau of Economic Research, Inc. (NBER), a private, nonprofit research organization which has been preparing lists of economic indicators and research reports in the field of business cycle analysis for more than 40 years. This revised list was published by the National Bureau in March 1967, and is the result of a periodic review made by that agency of its previous list of indicators of aggregate economic activity. This is the third revision of the list originally published by the National Bureau in 1938.

The method of preparing the new list, the reasons for adding certain series and dropping others, and an explanation of the classification system used are described in a new report, *INDICATORS OF BUSINESS EXPANSIONS AND CONTRACTIONS*, published by the National Bureau of Economic Research, Inc., 261 Madison Avenue, New York, N.Y., 10016. Other reports on the historical studies and methods of making current interpretations of the indicators are listed in this book.

The revised list includes some new series, discontinues some of those on the previous list, and has assigned timing classifications to some series previously unclassified by timing. The chief features of the new list follow:

1. The major principle of classification is a four-fold grouping by cyclical timing: Leading, roughly coincident, and lagging indicators, and other selected series. The first three categories take into account timing at both peaks and troughs; the fourth group includes economic activities that have an important role in business cycles but have displayed a less regular relation to them. The new list of indicators includes 36 leading series, 25 roughly coincident series, 11 lagging series, and 16 series unclassified by timing—88 series in all; 69 are monthly and 19 are quarterly. This list includes 13 series not on the previous NBER list and omits 5 series. In addition, 14 series previously unclassified by timing are assigned a timing classification.

2. The type of economic process represented by the series is used as a secondary principle of classification, with emphasis on the processes that are important for business cycle analysis. The 88 U.S. series are classified into eight major groups: (I) Employment and Unemployment, 14 series; (II) Production, Income, Consumption, and Trade, 8 series; (III) Fixed Capital Investment, 14 series; (IV) Inventories and Inventory Investment, 9 series; (V) Prices, Costs, and Profits, 11 series; (VI) Money and Credit, 17 series; (VII) Foreign Trade and Payments, 6 series; and (VIII) Federal Government Activities, 9 series. Each of these major categories is subdivided into economic processes that exhibit rather distinct differences in cyclical timing. For example, under Fixed Capital Investment, new investment commitments are distinguished from investment expenditures.

3. A short list of 25 indicators, drawn from the full list, is identified throughout BCD. This more selective list includes 12 leading, 7 roughly coincident, and 6 lagging series; 21 are monthly and 4 are quarterly. The short list involves little of the duplica-

tion in economic coverage that is provided, for various reasons, in the full list. The series on the short list are identified by asterisks.

4. Two other groups of series are shown in BCD in addition to the 88 NBER indicators. They are "U.S. Series Under Consideration" (eight series not yet classified by cyclical timing and economic process but under consideration for the list of indicators) and "International Comparisons" (19 series showing industrial production, consumer prices, and stock prices for several countries which have important trade relations with the United States).

Changes in the 1966 list of indicators are as follows (series identification number and title):

13 series new to the 1966 list:

- 33. Net change in mortgage debt held by financial institutions and life insurance companies
- 39. Delinquency rate, 30 days and over, total installment loans
- 58. Index of wholesale prices, manufactured goods
- *71. Manufacturing and trade inventories, book value
- *72. Commercial and industrial loans outstanding, weekly reporting large commercial banks
- 101. National defense purchases
- 301. Nonagricultural job openings unfilled
- *502. Unemployment rate, persons unemployed 15 weeks and over
- 505. Machinery and equipment sales and business construction expenditures
- 511. Man-hours in nonagricultural establishments
- *816. Manufacturing and trade sales
- 861. Manufacturers' new orders for export, durable goods except motor vehicle and parts
- 862. Index of export orders, nonelectrical machinery

5 series on the previous list but omitted from the 1966 list:

- 4. Number of persons on temporary layoff, all industries
- 15. Number of business failures with liabilities of \$100,000 and over
- *51. Bank debits, all standard metropolitan statistical areas except New York
- *64. Manufacturers' inventories, book value
- 111. Corporate gross savings

10 series specially constructed for business cycle studies at the suggestion of the NBER:

- *10. Contracts and orders for plant and equipment
- *17. Ratio, price to unit labor cost, manufacturing
- 22. Ratio of profits to income originating, corporate, all industries
- 33. Net change in mortgage debt held by financial institutions and life insurance companies
- *38. Index of net business formation
- 53. Wages and salaries in mining, manufacturing, and construction
- *62. Index of labor cost per unit of output, manufacturing
- 68. Index of labor cost per dollar of real corporate GNP
- 505. Machinery and equipment sales and business construction expenditures
- 511. Man-hours in nonagricultural establishments

*Denotes series included on "short list."

□ *A limited number of changes are made from time to time to reflect new findings of business cycle research and newly available economic series and to report recent changes made by producing agencies in concept, composition, comparability, coverage, seasonal adjustment methods, benchmark data, etc. Such changes may involve additions or deletions of series used, changes in placement of series in relation to other series, changes in components of indexes, etc.*

Changes in this issue are as follows:

1.--The Federal Reserve index of industrial production has been revised from January 1966 to date to reflect the source agency's annual updating of seasonal adjustment factors and basic figures for certain series. These revisions affect series 47, 853, D47, and other series which utilize these Federal Reserve data--series 17 and 62. Further information concerning this index may be obtained from the Board of Governors of the Federal Reserve System, Business Conditions Section.

2.--The series on machinery and equipment sales and business construction expenditures (series 505) has been revised for the period January 1953 through December 1966. This revision reflects the incorporation of recently revised data on value in place for private nonresidential buildings for July 1962 through 1966. In addition, data on value in place for public utilities are now excluded for the entire period covered by the series. Further information concerning the revised value-in-place data may be obtained from the Bureau of the Census, Construction Statistics Division.

3.--Industrial production indexes for OECD--Europe, United Kingdom, West Germany, France, and Italy have been revised to reflect minor changes which have been made by the source agency.

4.--Appendix F includes historical data for series 121, 122, 125, 126, 127, 505, and D41.

NEW
FEATURES
AND
CHANGES
for this
issue

The December issue of BUSINESS CYCLE DEVELOPMENTS is scheduled for release on December 28.

**3 CENSUS
PROJECTS
of Economic
Fluctuations**

CENSUS METHOD II ADJUSTMENT PROGRAM. A time series computer program for measuring and analyzing seasonal, trading-day, cyclical, and irregular fluctuations and the relations among them. This program is particularly useful in analyzing economic fluctuations which take place *within a year*.

The latest variant, X-11, has greater generality and scope than any of the earlier programs. It can adjust quarterly as well as monthly series and series with negative and positive numbers as well as those with positive numbers alone. The X-11 version measures and adjusts not only for seasonal variations, but also for trading-day variations. Further, it computes many summary and analytical measures of the behavior of each series. The program includes various techniques, such as F tests and variance analysis, for use in extending the scope of time series studies and is written in a simplified computer language—Fortran IV. The program deck can be purchased from the Census Bureau at cost.

BUSINESS CYCLE DEVELOPMENTS. A monthly report for analyzing economic fluctuations over a short span of years.

This report brings together several hundred monthly and quarterly "economic indicator" series for the analysis of short-term economic trends and prospects. These series have been selected, tested, and evaluated, after half a century of continuing research, as the most useful and reliable for this purpose. The publication provides not only the basic data, but also various charts and analytical tables to facilitate such studies. In addition, a time series punch-card file, a diffusion index program, and a separate summary-measures computer program are available for those who wish to carry on further research in business cycle analysis.

LONG TERM ECONOMIC GROWTH An annual report for the study of economic fluctuations over a long span of years.

This report has been developed from available statistics to provide a comprehensive, long-range view of the U.S. economy. It has been planned, prepared, and published as a basic research document for economists, historians, investors, teachers, and students. It brings together for the first time under one cover, in meaningful and convenient form, the complete statistical basis for a study of long-term economic trends. It is a unique presentation of the full range of factors required for an understanding of our country's economic development. Some of the statistical series go back to 1860. A punchcard file of the time series included in the report is available for purchase.

DESCRIPTIONS AND PROCEDURES

INTRODUCTION

The business cycle is generally described as consisting of alternating periods of expansion and contraction in aggregate economic activity—that is, the complex of activities represented by such concepts as total production, employment, income, consumption, trade, and the flow of funds. Although a recurrent pattern has been characteristic of American economic history, many economists do not consider it inevitable.

The causal relations among various economic processes are primarily responsible for the cumulative nature of cyclical forces and explain why expansions have eventually turned into recessions and recessions into expansions. Cyclical fluctuations in production and employment are preceded by fluctuations in measures which relate to future rather than current production—measures such as new orders for durable goods, formation of new business enterprises, and accessions to payrolls. They are followed by fluctuations in various economic costs, such as labor costs, interest rates, fulfillment of long-term commitments, and holdings of inventories and debts.

TIMING CLASSIFICATION

On the basis of many years of research, the National Bureau of Economic Research (NBER) has compiled a list of indicators of aggregate economic activity and has classified these indicators according to whether they usually lead, roughly coincide with, or lag behind the cyclical movements in aggregate activity. The 1966 list, as issued by the NBER, is the basis for the presentation of U.S. series in **BUSINESS CYCLE DEVELOPMENTS**. Prior to April 1967, their 1960 list was used. The series have been grouped and classified by the NBER as “leading,” “roughly coincident,” or “lag-

ging” indicators. These indicators are described as follows:

Leading Indicators.—Series that usually reach peaks or troughs before those in aggregate economic activity as measured by the roughly coincident series (see below). One group of these series pertains to orders and contracts, another to inventory investment, and so on.

Roughly Coincident Indicators.—Series that are direct measures of aggregate economic activity or move roughly together with it; for example, nonagricultural employment, industrial production, and retail sales.

Lagging Indicators.—Series, such as new plant and equipment expenditures and manufacturers’ inventories, that usually reach turning points after they are reached in aggregate economic activity.

Also included in BCD are (a) “Other Selected U.S. Series,” economic activities which are important in analyzing business cycles but have a less consistent relation to them; (b) “U.S. Series Under Consideration,” indicators that measure important economic relationships but have not been classified by economic process and timing and, therefore, not yet incorporated into the list of 88 indicators; and (c) indexes of industrial production, consumer prices, and stock prices for several countries which have important trade relations with the United States.

The business cycle turning dates used in this report are those designated by the NBER. They mark the approximate dates when aggregate economic activity reached its cyclical high (peak) or low (trough) levels. As a matter of general practice, a business cycle turning date will not be designated until at least 6 months after it has occurred. (See appendix A for peak and trough dates.)

ECONOMIC PROCESS CLASSIFICATION

A secondary principle of classification, economic process, supplements the timing classification. All series are cross-classified according to these two principles. The major economic process categories are employment and unemployment; production, income, consumption, and trade; fixed capital investment; inventories and inventory investment; prices, costs, and profits; money and credit; foreign trade and payments; and Federal Government activity.

"SHORT LIST" OF INDICATORS

A short, substantially unduplicated list of principal indicators provides a convenient way of summarizing the current situation and outlook. The NBER has identified, for this purpose, a short list of 25. This list includes 12 leading, 7 roughly coincident, and 6 lagging indicators; 21 are monthly and 4 are quarterly. These series are identified throughout BCD.

METHOD OF PRESENTATION

This report consists of two major sections as follows:

Basic Data (chart 1, tables 1 and 2).—Data for all series are shown for the current and prior periods in both graphic and tabular form. Thus, a broad view of past and current business cycle fluctuations is provided.

Analytical Measures (chart 2, tables 3 and 4).—Measures are presented which help to determine the magnitude and scope of current changes in different processes, industries, and areas, and aid in evaluating the prospects of a turning point in the business cycle.

A list of titles and sources for all series is shown on the back cover of this report. The series numbers are for identification only and do not reflect series relationships or order.

CONCEPTS AND PROCEDURES

Several other concepts and procedures used in this report are summarized below:

Adjustments for average seasonal fluctuations are often necessary to bring out the underlying cyclical trends of a series. In most cases, the seasonally adjusted data used for a series are the official figures released by the source agency. In addition, for the

special purposes of business cycle studies, a number of series that are not ordinarily published in seasonally adjusted form are shown on a seasonally adjusted basis in this report. The *seasonal adjustment* process usually accounts for variations due to holidays; however, there are some cases in which a separate *holiday adjustment* is needed for holidays with variable dates.

Months for cyclical dominance (*MCD*) is an estimate of the appropriate span over which to observe the cyclical movements in a monthly series. *MCD moving averages* are shown in chart 1 for series with an *MCD* of "5" or more; however, to provide an indication of the variation about these moving averages, monthly data are also plotted.

Diffusion indexes are simple summary measures which express what percentage of the components of an aggregate series has risen over given time spans. Their turning points tend to lead those of the aggregate. Series numbers preceded by "D" designate diffusion indexes. Many of the component series used to make up the diffusion indexes are shown in table 4.

During the current expansion, *high values* for the indicators are identified in table 2. These values are not necessarily cyclical peak values, but are simply the highest values reached to date.

Certain *appendix materials* are presented regularly in this report. These materials include historical data, adjustment factors, peak and trough dates, and other information helpful in interpreting trends in the indicators.

HOW TO READ CHARTS 1 AND 2

Peak (P) of cycle indicates end of expansion and beginning of Recession (shaded areas) as designated by NBER.

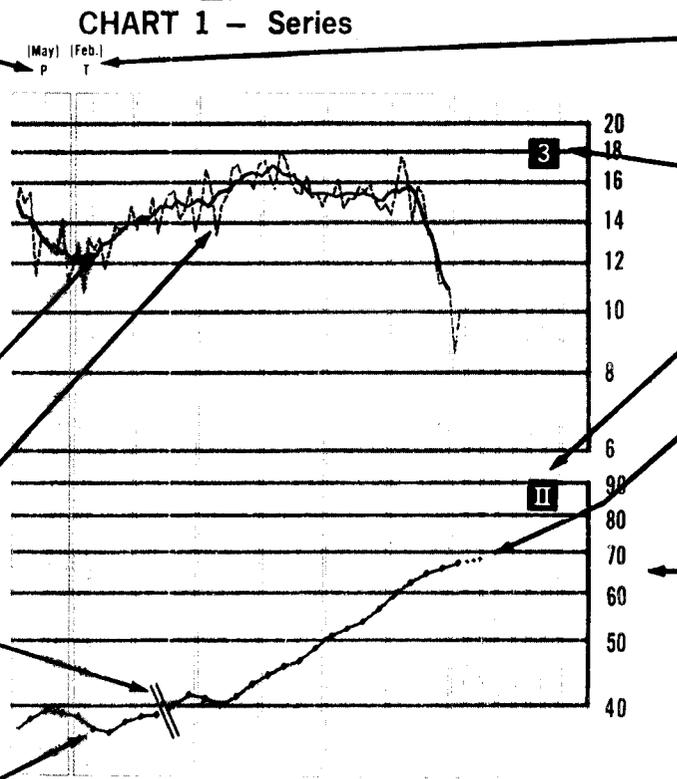

Series numbers are for identification only and do not reflect series relationships or order. Series are arranged in charts and tables according to their classification by timing and economic process.

Solid line indicates monthly data. (Data may be actual monthly figures or MCD moving averages.*)

Broken line indicates actual monthly data for series where an MCD moving average* is plotted.

Parallel lines indicate a break in continuity (data not available, changes in series definitions, extreme values, etc.).

Solid line with plotting points indicates quarterly data.

Trough (T) of cycle indicates end of recession and beginning of Expansion as designated by NBER.

Arabic number indicates late month for which data are plotted ("3" = March)

Roman number indicates late quarter for which data are plotted ("II" = second quarter)

Dotted line indicates anticipated data.

Various scales are used to highlight the patterns of the individual series. "Scale A" is an arithmetic scale, "scale L-1" is a logarithmic scale with 1 cycle in a given distance, "scale L-2" is a logarithmic scale with 2 cycles in that distance etc. The scales should be carefully noted because they show whether or not the plotted lines for various series are directly comparable.

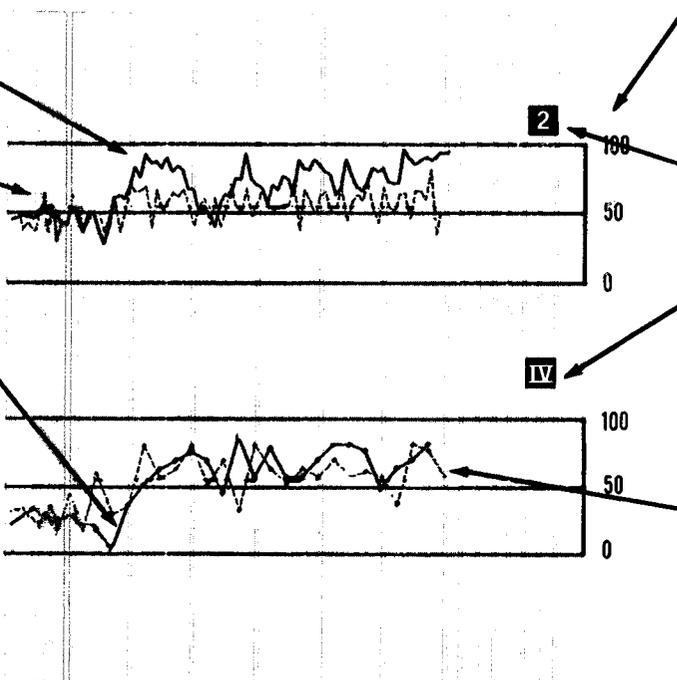

CHART 2 - Diffusion Indexes

Solid line indicates monthly data over 6- or 9-month spans.

Broken line indicates monthly data over 1-month spans.

Solid line with plotting points indicates quarterly data over various spans.

* Many of the more irregular series are shown in terms of their MCD moving averages as well as their actual monthly data. In such cases, the 4-, 5-, or 6-term moving averages are plotted 1½, 2, or 2½ months, respectively, behind the actual data. See appendix C for a description of MCD moving averages.

Scale shows percent of components rising.

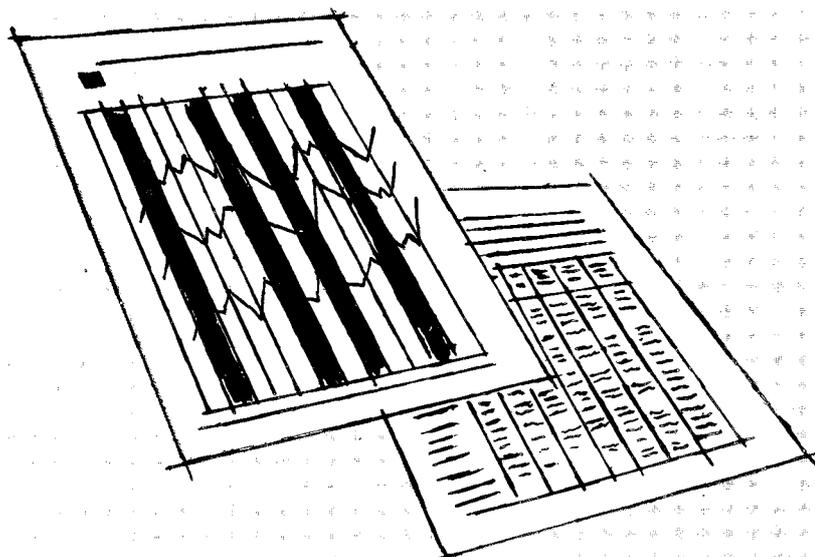

Arabic number indicates late month for which data are used computing the indexes. ("2" = February)

Roman number indicates late quarter for which data are used computing the indexes. ("IV" = fourth quarter)

Broken line with plotting points indicates quarterly data over various intervals. This line is also used to indicate anticipated quarterly data.

HOW TO LOCATE A SERIES

To locate a series in BCD, consult the **Index—Series Finding Guide** in the back of the book where series are arranged into eight groups by economic process and cross referenced by timing classification in the first column. The back cover, which lists series titles (followed by a Roman numeral denoting economic process group) and sources in numerical order within each timing group, may also be helpful to some readers.

BASIC DATA

charts and tables

LEADING INDICATORS

- Employment and unemployment*
- Fixed capital investment*
- Inventories and inventory investment*
- Prices, costs, and profits*
- Money and credit*

ROUGHLY COINCIDENT INDICATORS

- Employment and unemployment*
- Production, income, consumption, and trade*
- Fixed capital investment*
- Prices, costs, and profits*
- Money and credit*

LAGGING INDICATORS

- Employment and unemployment*
- Fixed capital investment*
- Inventories and inventory investment*
- Prices, costs, and profits*
- Money and credit*

OTHER U.S. SERIES

- Prices, costs, and profits*
- Foreign trade and payments*
- Federal Government activities*

Also U.S. SERIES UNDER CONSIDERATION (unclassified series) and INTERNATIONAL COMPARISONS (indexes of industrial production, consumer prices, and stock prices for selected foreign countries)

*Series included in the 1966 NBER "short list" of indicators. Ⓢ Not seasonally adjusted. NA = not available; r = revised; p = preliminary; e = estimated; a = anticipated. ¹Series are seasonally adjusted except for those series, indicated by Ⓢ, that appear to contain no seasonal movement. See additional basic data and notes in table 2. ²Average percent changes are based on month-to-month (or quarter-to-quarter) percent changes for the specified periods. ³To facilitate interpretations of cyclical movements, those series that usually fall when general business activity rises and rise when business falls are inverted so that rises are shown as declines and declines as rises (see series 3, 5, 14, 39, 40, 43, 45, 88, 93, and 502). Percent changes are computed in the usual way but the signs are reversed. See footnote 8 for other "change" qualifications. ⁴Average computed with regard to sign. ⁵Average computed without regard to sign. ⁶The period varies among the series; however, for most series, the period covered is 1953-65. ⁷Quarterly series; figures are placed in the middle month of quarter. ⁸Since basic data for this series are expressed in plus or minus amounts, the changes are month-to-month (or quarter-to-quarter) differences expressed in the same unit of measure as the basic data, rather than in percentages. ⁹Figures are placed in the last month of quarter.

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by (U). Current high values are indicated by (H); for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 45, 93, and 502), current low values are indicated by (L). Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown on the back cover. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

¹High value (24.02) was reached in October 1963.

²High value (52.86) was reached in August 1963.

³High value (1.57) was reached in May 1963

NOTE: Series are seasonally adjusted except those series that appear to contain no seasonal movement. Unadjusted series are indicated by (U). Current high values are indicated by (H); for series that move counter to movements in general business activity (series 3, 5, 14, 39, 40, 43, 45, 93, and 502), current low values are indicated by (L). Series numbers are for identification only and do not reflect series relationships or order. Complete titles and sources are shown on the back cover. Series preceded by an asterisk (*) are included in the 1966 NBER "short list" of indicators. The "r" indicates revised; "p", preliminary; "e", estimated; "a", anticipated; and "NA", not available.

NOTE: Figures are the percent of series components rising and are centered within spans: 1-month indexes are placed on latest month, 6-month indexes are placed on the 4th month, and 9-month indexes are placed on the 6th month of span. Seasonally adjusted components are used except in index D58 which requires no adjustment. Table 4 identifies the components for the indexes shown. The "r" indicates revised; "p", preliminary; and "NA", not available. Unadjusted series are indicated by Ⓢ.

Seattle (16).....	+	...	-	...	+	...	+	...	-	...	+	...	+	...	+

NOTE: To facilitate interpretation, the month-to-month directions of change are shown along with the numbers: (+) = rising, (o) = unchanged, and (-) = falling. Only the directions of change are shown when numbers are held confidential by the source agency. NA = not available. p = preliminary. r = revised.

¹Average for November 20, 21, and 22.

²Series components are seasonally adjusted by the Bureau of the Census. The industrial materials price index is not seasonally adjusted. Directions of change are computed before figures are rounded.

³The signs are reversed because this series usually rises when general business activity falls and falls when business rises: (-) = rising, (o) = unchanged, and (+) = falling. Series components are seasonally adjusted by the Bureau of the Census before the direction of change is determined. Data used are for the week including the 12th of the month. Directions of change are shown separately for only the 26 largest labor market areas. The number following the area designation indicates its size rank.

LEADING INDICATORS									
1. Average workweek, production workers, manufacturing.....	Dec. '60	Apr. '58	Apr. '54	Apr. '49	Jan. '38	June '32	Apr. '28	July '24	Feb. '21
30. Nonagricultural placements, all industries...	Jan. '61	Mar. '58	May '54	July '49	(NA)	(NA)	(NA)	(NA)	(NA)
38. Index of net business formation.....	Jan. '61	Apr. '58	Mar. '54	July '49	(NA)	(NA)	(NA)	(NA)	(NA)
6. New orders, durable goods industries.....	Jan. '61	Jan. '58	Sep. '53	June '49	Apr. '38	Mar. '33	(NSC)	May '24	Jan. '21
10. Contracts and orders, plant and equipment...	Mar. '61	Mar. '58	Mar. '54	Apr. '49	(NA)	(NA)	(NA)	(NA)	(NA)
29. New building permits, private housing units..	Dec. '60	Feb. '58	Sep. '53	Jan. '49	Dec. '37	Dec. '32	May '27	July '24	Dec. '20
31. Change in book value, manufacturing and trade inventories.....	Dec. '60	Apr. '58	Nov. '53	Apr. '49	(NA)	(NA)	(NA)	(NA)	(NA)
23. Industrial materials prices.....	Dec. '60	Apr. '58	Feb. '54	June '49	June '38	July '32	Aug. '28	June '24	July '21
19. Stock prices, 500 common stocks.....	Oct. '60	Dec. '57	Sep. '53	June '49	Apr. '38	June '32	(NSC)	Oct. '23	Aug. '21
16. Corporate profits after taxes (Q).....	1stQ '61	1stQ '58	4thQ '53	2ndQ '49	2ndQ '38	3rdQ '32	4thQ '27	3rdQ '24	2ndQ '21
17. Ratio, price to unit labor cost, manufacturing.....	Jan. '61	Mar. '58	Mar. '54	May '49	Dec. '37	Apr. '32	Aug. '27	June '24	Mar. '21
113. Change in consumer installment debt.....	Apr. '61	Mar. '58	Mar. '54	Jan. '49	Feb. '38	Feb. '32	(NA)	(NA)	(NA)
ROUGHLY COINCIDENT INDICATORS									
41. Employees in nonagricultural establishments..	Feb. '61	May '58	Aug. '54	Oct. '49	June '38	Mar. '33	Jan. '28	July '24	July '21
43. Unemployment rate, total (inverted).....	May '61	July '58	Sep. '54	Oct. '49	June '38	May '33	(NA)	(NA)	(NA)
50. GNP in 1958 dollars (Q).....	1stQ '61	1stQ '58	2ndQ '54	2ndQ '49	1stQ '38	3rdQ '32	(NSC)	(NSC)	4thQ '21
47. Industrial production.....	Feb. '61	Apr. '58	Apr. '54	Oct. '49	May '38	July '32	Nov. '27	July '24	Apr. '21
52. Personal income.....	(NSC)	Feb. '58	Apr. '54	July '49	May '38	Mar. '33	4thQ '26	2ndQ '24	2ndQ '21
816. Manufacturing and trade sales.....	Jan. '61	Mar. '58	Aug. '54	Oct. '49	(NA)	(NA)	(NA)	(NA)	(NA)
54. Sales of retail stores.....	Apr. '61	Mar. '58	Jan. '54	(NSC)	May '38	Mar. '33	(NSC)	(NSC)	Mar. '22
LAGGING INDICATORS									
502. Unemployment rate, persons unemployed 15 weeks and over (inverted).....	July '61	Aug. '58	Oct. '54	Nov. '49	(NA)	(NA)	(NA)	(NA)	(NA)
61. Business expenditures, new plant and equipment (Q).....	2ndQ '61	3rdQ '58	1stQ '55	4thQ '49	3rdQ '38	1stQ '33	4thQ '27	3rdQ '24	4thQ '21
71. Book value, manufacturing and trade inventories.....	Mar. '61	Aug. '58	Oct. '54	Dec. '49	(NA)	(NA)	(NA)	(NA)	(NA)
62. Labor cost per unit of output, manufacturing.....	Sep. '61	June '59	Sep. '55	July '50	June '40	July '33	(NSC)	(NSC)	Apr. '22
72. Commercial and industrial loans outstanding.....	(NSC)	July '58	Oct. '54	Aug. '49	Dec. '38	(NA)	(NA)	(NA)	(NA)
67. Bank rates on short-term business loans (Q).....	4thQ '61	2ndQ '58	1stQ '55	1stQ '50	3rdQ '41	(NSC)	Feb. '28	Nov. '24	Sep. '22

NOTE: Specific trough dates are the actual dates when individual series reached a trough as distinguished from the reference dates which are those dates designated as the trough of business activity as a whole. This table shows, for the 25 indicators on the NBER "short list," the specific dates corresponding to reference dates in 9 recent business cycles.

NA = Not available. NSC = No specific cycle corresponding to reference date.

Appendix B.—SPECIFIC TROUGH AND PEAK DATES FOR SELECTED BUSINESS INDICATORS—Continued

Selected series	Specific peak dates for reference contractions beginning in—								
	May 1960	July 1957	July 1953	Nov. 1948	May 1937	Aug. 1929	Oct. 1926	May 1923	Jan. 1920

*Series included in the 1966 NBER "short list" of 25 indicators.

¹Not shown for series when MCD is "6" or more.

BRIEF DEFINITIONS OF MEASURES SHOWN IN PART 1

The following are brief definitions of the measures shown in part 1 of this table. More complete explanations appear in Electronic Computers and Business Indicators, by Julius Shiskin, issued as Occasional Paper 57 by the National Bureau of Economic Research, 1957 (reprinted from Journal of Business, October 1957).

"CI" is the average month-to-month (or quarter-to-quarter) percentage change, without regard to sign, in the seasonally adjusted series.

"I" is the same for the irregular component, obtained by dividing the cyclical component into the seasonally adjusted series.

"C" is the same for the cyclical component, a smooth, flexible moving average of the seasonally adjusted series.

"MCD" (months for cyclical dominance) provides an estimate of the appropriate time span over which to observe

cyclical movements in a monthly series. It is small for smooth series and large for irregular series. In deriving MCD, percentage changes are computed separately for the irregular component and the cyclical component over 1-month spans (Jan.-Feb., Feb.-Mar., etc.), 2-month spans (Jan.-Mar., Feb.-Apr., etc.), up to 12-month spans. Averages, without regard to sign, are then computed for the changes over each span. MCD is the shortest span in months for which the average percentage change (without regard to sign) in the cyclical component is larger than the average percentage change (without regard to sign) in the irregular component, and remains so. Thus, it indicates the point at which fluctuations in the seasonally adjusted series become dominated by cyclical rather than irregular movements. All series with an MCD greater than "5" are shown as "6".

Similarly, "QCD" provides an estimate of the appropriate time span over which to observe cyclical movements in quarterly series. It is the shortest span (in quarters) for which the average percentage change (without regard to sign)

BRIEF DEFINITIONS OF MEASURES SHOWN IN PART 1—Continued

in the cyclical component is larger than the average percentage change (without regard to sign) in the irregular component, and remains so.

" \bar{I}/\bar{C} " is a measure of the relative smoothness (small values) or irregularity (large values) of the seasonally adjusted series. For monthly series, it is shown for 1-month spans and for spans of the period of MCD. When MCD is "6", no \bar{I}/\bar{C} ratio is shown for the MCD period. For quarterly series, \bar{I}/\bar{C} is shown for 1-quarter spans and QCD spans.

"Average Duration of Run" (ADR) is another measure of smoothness and is equal to the average number of consecutive monthly changes in the same direction in any series of observations. When there is no change between 2 months, a change in the same direction as the preceding change is assumed. The ADR is shown for the seasonally adjusted series CI, irregular component I, cyclical component C, and the MCD curve. The MCD curve is an unweighted moving average (with the number of terms equal to MCD) of the seasonally adjusted series.

A comparison of these measures of ADR with the expected ADR of a random series gives an indication of whether the

changes approximate those of a random series. Over 1-month intervals in a random series, the expected value of the ADR is 1.5. The actual value of ADR falls between 1.36 and 1.75 about 95 percent of the time. Over 1-month intervals in a moving average (MCD) of a random series, the expected value of ADR is 2.0. For example, the ADR of CI is 1.69 for the series on average weekly initial claims, State unemployment insurance (series 5). This indicates that 1-month changes in the seasonally adjusted series, on the average, reverse sign about as often as expected in a random series. The ADR measures shown in the next two columns, 1.42 for I and 12.67 for C, suggest that the seasonally adjusted series has been successfully separated into an essentially random component and a cyclical (nonrandom) component. Finally, ADR is 3.97 for the MCD moving average. This indicates that a 2-month moving average of the seasonally adjusted series (2 months being the MCD span) reverses direction, on the average, about every 4 months. The increase in the ADR from 1.42 for CI to 3.97 for the MCD moving average indicates that, for this series, month-to-month changes in the MCD moving average usually reflect the underlying cyclical trend movements of the series, whereas the month-to-month changes in the seasonally adjusted series usually do not.

¹Not shown for series when MCD is "6" or more.

BRIEF DEFINITIONS OF MEASURES SHOWN IN PART 2

The measures in part 2 are computed by an additive method to avoid the distortion caused by zero and negative data.

Thus, " \overline{CI} " is the average month-to-month (or quarter-to-quarter) change in the seasonally adjusted series. This average is computed without regard to sign and is expressed in the same unit of measure as the series itself.

" \overline{C} " is the same for the cyclical component, which is a moving average of the seasonally adjusted series.

" \overline{T} " is the same for the irregular component, which is determined by subtracting the cyclical component from the seasonally adjusted series.

All other measures shown in part 2 have the same meaning as in part 1.

NOTE: These data are not published by the source agency in seasonally adjusted form. Seasonal adjustments were made by the Bureau of the Census or the National Bureau of Economic Research, Inc. They are kept current by the Bureau of the Census. Seasonally adjusted data prepared by the source agency will be substituted whenever they are published. For a description of the method used to compute these factors, see Bureau of the Census Technical Paper No. 15, The X-11 Variant of the Census Method II Seasonal Adjustment Program.

¹Factors are products of seasonal and trading-day factors. Seasonally adjusted data resulting from the application of these combined factors may differ slightly from those obtained by separate applications of seasonal and trading-day factors due to rounding.

²Quarterly series; figures are placed in middle month of quarter.

³These quantities, in millions of dollars, are to be subtracted from the month-to-month net change in the unadjusted monthly totals to yield the seasonally adjusted net change. They were computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program.

⁴Bimonthly series. Data are for even-numbered months (February, April, June, etc.).

⁵Factors apply to monthly totals before month-to-month changes are computed.

⁶1-quarter diffusion index: Figures are placed on the 1st month of the quarter. The unadjusted diffusion index is computed and the factors, computed by the additive version of the X-11 variant of the Census Method II seasonal adjustment program, are subtracted to yield the seasonally adjusted index.

NOTE: For series with a "months for cyclical dominance" (MCD) of "1" or "2" (series 41, 43, 47, 52, and 816), the figure for the reference peak (trough) month is used as the base. For series with an MCD of "3" or more (series 54), the average of the 3 months centered on the reference peak (trough) month is used as the base. The base for quarterly series (series 49 and 50) is the reference peak (trough) quarter. See also MCD footnote to appendix C. *Series included in the 1966 NBER "short list" of 25 indicators. NA=Not available.

¹The most recent quarterly reference dates are as follows: 2d quarter 1958 (trough); 2d quarter 1960 (peak); and 1st quarter 1961 (trough). For earlier dates, see *Business Cycle Indicators* (NBER) vol. 1, p.670.

²Based on average for the calendar year.

³Differs from figure for same date in expansion (contraction) part of table because of change in series used.

⁴World War II contraction or expansion period.

⁵Korean War contraction or expansion period.

⁶The median is an average of the middle 2 or 3 items.

I. EMPLOYMENT AND UNEMPLOYMENT													
*1. Avg. workweek, production workers, mfg.	L ...	9	-	6	33	-	-	66-7	68	-	-	77	Oct. '67
*30. Nonagricultural placements, all indus.	L ...	9	-	6	33	-	-	66-7	68	73	-	66	Oct. '63 ¹
2. Accession rate, manufacturing.	L ...	9	-	6	33	-	-	-	68	-	-	76	Sept. '67
5. Initial claims, State unemploy. insurance.	L ...	9	-	6	33	-	-	-	68	73	-	66	July '63 ¹
3. Layoff rate, manufacturing.	L ...	9	-	6	33	-	-	-	68	-	-	76	Sept. '67
301. Nonagri. job openings unfilled.	C ...	17	-	7	38	-	-	-	68	73	-	76	Apr. '67
46. Help-wanted advertising.	C ...	17	-	7	38	-	-	-	68	-	-	66	Feb. '64 ¹
511. Man-hours in nonagri. establishments.	C ...	17	-	7	38	-	-	-	68	-	-	77	Apr. '67
*41. Employees in nonagri. establishments.	C ...	17	-	7	38	-	-	66-7	68	-	74	77	Oct. '67
42. Total nonagricultural employment.	C ...	17	-	7	38	-	-	-	68	-	-	72	Feb. '67
*43. Unemployment rate, total.	C ...	18	-	7	38	-	-	66-7	68	-	74	72	Feb. '67
45. Avg. weekly insured unemploy. rate, State.	C ...	18	-	7	38	-	-	-	68	-	-	66	Mar. '64 ¹
40. Unemployment rate, married males.	C ...	18	-	7	38	-	-	-	68	-	-	72	Feb. '67
*502. Unemploy. rate, 15 weeks and over.	Lg ...	22	-	7	41	-	-	66-7	69	-	-	76	Apr. '67
II. PRODUCTION, INCOME, CONSUMPTION, AND TRADE													
49. GNP in current dollars.	C ...	18	-	7	39	-	-	-	70	-	74	73	July '67
*50. GNP in 1958 dollars.	C ...	18	-	7	39	-	-	66-7	70	-	74	73	July '67
*47. Industrial production.	C ...	18	-	7	39	-	-	66-7	68	-	74	70	Sept. '64
*52. Personal income.	C ...	19	-	7	39	-	-	66-7	68	-	74	74	July '67
53. Wages and salaries, mining, mfg., constr.	C ...	19	-	7	39	-	-	-	68	-	-	74	July '67
*816. Manufacturing and trade sales.	C ...	19	-	7	39	-	-	66-7	68	-	74	77	Apr. '67
57. Final sales.	C ...	19	-	7	39	-	-	-	70	-	-	74	July '67
*54. Sales of retail stores.	C ...	19	-	7	39	-	-	66-7	68	-	74	72	Apr. '66
III. FIXED CAPITAL INVESTMENT													
*38. Index of net business formation.	L ...	10	-	6	33	-	-	66-7	68	-	-	74	June '65
13. New business incorporations.	L ...	10	-	6	33	-	-	-	68	73	-	66	Aug. '63 ¹
*6. New orders, durable goods industries.	L ...	10	-	6	34	-	-	66-7	68	-	-	78	June '67
94. Construction contracts, value.	L ...	10	-	6	34	-	-	-	68	-	-	-	-
*10. Contracts and orders, plant and equipment.	L ...	10	-	6	34	-	-	66-7	68	-	-	78	May '67
11. New capital appropriations, mfg.	L ...	11	-	6	34	-	-	-	70	-	-	76	Aug. '67
24. New orders, mach. and equip. industries.	L ...	11	-	6	34	-	-	-	68	-	-	66	Dec. '63 ¹
9. Construction contracts, comm. and indus.	L ...	11	-	6	34	-	-	-	68	-	-	78	May '67
7. Private nonfarm housing starts.	L ...	11	-	6	34	-	-	-	68	-	-	76	Aug. '67
*29. New building permits, private housing.	L ...	11	-	6	34	-	-	66-7	68	-	-	74	June '65
96. Unfilled orders, durable goods industries.	C ...	20	-	7	40	-	-	-	68	-	-	66	June '64
97. Backlog of capital appropriations, mfg.	C ...	20	-	7	40	-	-	-	70	-	-	77	Aug. '67
*61. Bus. expenditures, new plant and equip.	Lg ...	22	-	7	41	-	-	66-7	70	-	-	65	June '64
505. Mach. and equip. sales and bus. constr. expend.	Lg ...	22	-	7	41	-	-	-	69	-	-	78	Nov. '67
IV. INVENTORIES AND INVENTORY INVESTMENT													
21. Change in business inventories.	L ...	12	-	6	35	-	-	-	72	-	-	72	July '67
*31. Change, mfg. and trade inventories.	L ...	12	-	6	35	-	-	66-7	71	-	-	72	Nov. '66
37. Purchased materials, higher inventories.	L ...	12	-	6	35	-	-	-	68	73	-	68	June '63 ¹
20. Change, mtls. and supplies inventories.	L ...	12	-	6	35	-	-	-	71	-	-	64	June '64
26. Buying policy, production materials.	L ...	12	-	6	35	-	-	-	68	-	-	65	June '64
32. Vendor performance, slower deliveries.	L ...	13	-	6	35	-	-	-	68	-	-	66	Mar. '64 ¹
25. Change in unfilled orders, durable goods.	L ...	13	-	6	35	-	-	-	71	-	-	66	Dec. '63 ¹
*71. Book value, mfg. and trade inventories.	Lg ...	22	-	7	41	-	-	66-7	69	-	-	73	Apr. '67
65. Mfrs.' inventories, finished goods, book value.	Lg ...	22	-	7	41	-	-	-	69	-	-	72	Apr. '67

Series preceded by an asterisk () are on the 1966 NBER "short list" of 25 indicators. L = leading C = roughly coincident, Lg = lagging. ¹ Appendix G in this issue.

14. Liabilities of business failures	L . . .	16	-	6	37	-	-	-	68	73	-	66	Nov. '63 ¹
39. Delinquency rate, instal. loans, 30 days and over	L . . .	16	-	6	37	-	-	-	68	73	-	71	Apr. '67
93. Free reserves	C . . .	21	-	7	40	-	-	-	71	-	-	66	Oct. '64
114. Treasury bill rate ²	C . . .	21	-	7	40	-	-	-	68	-	-	71	July '64
116. Corporate bond yields ²	C . . .	21	-	7	40	-	-	-	68	-	-	72	Aug. '66
115. Treasury bond yields ²	C . . .	21	-	7	40	-	-	-	68	-	-	72	July '64
117. Municipal bond yields ²	C . . .	21	-	7	40	-	-	-	68	-	-	72	July '64
66. Consumer installment debt	Lg. . .	23	-	8	42	-	-	-	69	-	-	70	Aug. '64
*72. Comm. and indus. loans outstanding	Lg. . .	23	-	8	42	-	-	66-7	69	73	-	73	Apr. '67
*67. Bank rates on short-term business loans	Lg. . .	23	-	8	42	-	-	66-7	70	-	-	70	Aug. '64
118. Mortgage yields, residential ²	Lg. . .	23	-	8	42	-	-	-	69	-	-	72	July '64
VII. FOREIGN TRADE AND PAYMENTS													
89. U.S. balance of payments:													
a. Liquidity balance basis	U . . .	24	-	8	43	-	-	-	72	-	-	79	June '67
b. Official settlements basis	U . . .	24	-	8	43	-	-	-	72	-	-	79	June '67
88. Merchandise trade balance	U . . .	24	-	8	43	-	-	-	71	-	-	74	Apr. '67
86. Exports, excluding military aid	U . . .	25	-	8	43	-	-	-	69	-	-	73	Apr. '67
861. Export orders, durable goods, except motor vehicles	U . . .	25	-	8	43	-	-	-	69	-	-	77	Apr. '67
862. Export orders, nonelectric machinery	U . . .	25	-	8	43	-	-	-	69	73	-	78	Apr. '67
87. General imports	U . . .	25	-	8	43	-	-	-	69	-	-	74	Apr. '67
VIII. FEDERAL GOVERNMENT ACTIVITIES													
95. Fed. balance, nat'l. income and prod. account	U . . .	26	-	8	44	-	-	-	72	-	-	76	July '67
84. Federal cash surplus or deficit	U . . .	26	-	8	44	-	-	-	72	-	-	78	Oct. '67
83. Federal cash receipts from public	U . . .	26	-	8	44	-	-	-	70	-	-	78	Oct. '67
82. Federal cash payments to public	U . . .	26	-	8	44	-	-	-	70	-	-	78	Oct. '67
101. National defense purchases, current dollars	U . . .	27	-	8	44	-	-	-	70	-	-	76	July '67
91. Defense Department obligations, total	U . . .	27	-	8	44	-	-	-	69	73	-	70	Sept. '64
90. Defense Dept. obligations, procurement	U . . .	27	-	8	44	-	-	-	69	73	-	70	Sept. '64
99. New orders, defense products industries	U . . .	27	-	8	44	-	-	-	69	-	-	66	Oct. '64
92. Military contract awards in U.S.	U . . .	27	-	8	44	-	-	-	69	73	-	76	Aug. '67
U.S. SERIES UNDER CONSIDERATION													
850. Ratio, output to capacity, mfg.	U . . .	28	-	8	45	-	-	-	70	-	-	77	July '67
851. Ratio, inventories to sales, mfg. and trade	U . . .	28	-	8	45	-	-	-	69	-	-	77	July '67
852. Ratio, unfilled orders to shipments durable goods	U . . .	28	-	8	45	-	-	-	69	-	-	77	July '67
853. Ratio, prod. of bus. equipment to consumer goods	U . . .	28	-	8	45	-	-	-	69	-	-	78	July '67
854. Ratio, personal saving to disposable personal income	U . . .	29	-	8	45	-	-	-	70	-	-	78	July '67
855. Ratio, nonagri. job openings unfilled to unemployed	U . . .	29	-	8	45	-	-	-	69	-	-	78	July '67
856. Ratio, avg. earnings to consumer prices	U . . .	29	-	8	45	-	-	-	69	73	-	79	July '67
857. Vacancy rate in total rental housing	U . . .	29	-	8	45	-	-	-	70	73	-	79	July '67

Series preceded by an asterisk () are on the 1966 NBER "short list" of 25 indicators. L=leading, C=roughly coincident, Lg=lagging, U=unclassified ("other selected U.S. series," "U.S. series under consideration" and "international comparisons"). ¹ Appendix G in this issue. ² A description of this series is contained in the July 1964 issue of BCD (appendix G).

U.S. INCOME DISTRIBUTION

Is the distribution of income changing?

The ever-changing pattern of the way America earns its livelihood and divides its income is the subject of the first in a new series of reports of the nation's fact-finder, the Bureau of the Census.

Titled "Income Distribution in the United States," this in-depth study draws its data from the 1960 Census of Population, one of the most important single sources of information on social trends in the United States, and makes comparisons with the past three decennial censuses. Primary emphasis is on changes in income of men in 116 different occupations and in the income of families classified by the age and sex of the family head, residence, and various other characteristics. The study also contains a detailed evaluation of the quality of income statistics collected in the 1960 census. Interpretation of these

findings has brought about a new understanding of occupation levels and the inequality of income distribution.

Herman P. Miller, author of **Income Distribution in the United States**, is Chief of the Population Division of the Bureau of the Census and a recognized authority on income statistics. He is the author of the **1950 Census Monograph, Income of the American People**. Mr. Miller has also written **Rich Man, Poor Man** and served as editor of **Historical Statistics of the United States, Colonial Times to 1957** and **Poverty American Style**.

Inaugurating the 1960 Census Monograph Series, "Income Distribution" is published with the cooperation of the Social Science Research Council. **311 pp. (cloth) \$2.25.**

Tentative titles for other volumes in the 1960 Census Monograph Series include:

- RURAL AMERICA
- EDUCATION OF THE AMERICAN PEOPLE
- THE METROPOLITAN COMMUNITY
- CHANGING CHARACTERISTICS OF THE NEGRO POPULATION
- THE AMERICAN FAMILY
- POPULATION OF THE UNITED STATES IN THE 20TH CENTURY

To receive announcements of these forthcoming books, write to the Publications Distribution Section, Bureau of the Census, Washington, D.C. 20233

ORDER FROM: Superintendent of Documents

Titles and Sources of Principal Business Cycle Series and Diffusion Indexes

The numbers assigned to the series are for identification purposes only and do not reflect series relationships or order. "M" indicates monthly series; "Q" indicates quarterly series. Data apply to the whole period except for series designated by "EOM" (end of the month) or "EOQ" (end of the quarter). The Roman numeral identifies the economic process group in which a series is classified. (See Finding Guide.) Thus, "(M, II)" indicates a monthly series classified in group II. The general classification follows the approach of the National Bureau of Economic Research, Inc. The series preceded by an asterisk (*) are included in the 1966 NBER "short list" of 25 indicators.

36 Leading Indicators

Average workweek of production workers, manufacturing (M, I).--Department of Labor, Bureau of Labor Statistics

Accession rate, manufacturing (M, I).--Department of Labor, Bureau of Labor Statistics

Layoff rate, manufacturing (M, I).--Department of Labor, Bureau of Labor Statistics

Average weekly initial claims for unemployment insurance, State programs (M, I).--Department of Labor, Bureau of Employment Security; seasonal adjustment by Bureau of the Census

Value of manufacturers' new orders, durable goods industries (M, III).--Department of Commerce, Bureau of the Census

New private nonfarm housing units started (M, III).--Department of Commerce, Bureau of the Census

Construction contracts awarded for commercial and industrial buildings, floor space (M, III).--F.W. Dodge Corporation; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc.

Contracts and orders for plant and equipment (M, III).--Department of Commerce, Bureau of the Census, and F.W. Dodge Corporation; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc.

Newly approved capital appropriations, 1,000 manufacturing corporations (Q, III).--National Industrial Conference Board; component industries are seasonally adjusted and added to obtain seasonally adjusted total

Number of new business incorporations (M, III).--Dun and Bradstreet, Inc.; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc.

Current liabilities of business failures (M, VI).--Dun and Bradstreet, Inc.; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc.

Corporate profits after taxes (Q, V).--Department of Commerce, Office of Business Economics

Price per unit of labor cost index--ratio, wholesale prices of manufactured goods index (unadjusted) to seasonally adjusted index of compensation of employees (sum of wages, salaries, and supplements to wages and salaries) per unit of output (M, V).--Department of Commerce, Office of Business Economics; Department of Labor, Bureau of Labor Statistics; and Board of Governors of the Federal Reserve System

Profits (before taxes) per dollar of sales, all manufacturing corporations (Q, V).--Federal Trade Commission and Securities and Exchange Commission; seasonal adjustment by Bureau of the Census

Index of stock prices, 500 common stocks (M, V).--Standard and Poor's Corporation; no seasonal adjustment

Change in book value of manufacturers' inventories of materials and supplies (M, IV).--Department of Commerce, Bureau of the Census

Change in business inventories, farm and nonfarm, after valuation adjustment (GNP component) (Q, IV).--Department of Commerce, Office of Business Economics

Ratio of profits (after taxes) to income originating, corporate, all industries (Q, V).--Department of Commerce, Office of Business Economics

Index of industrial materials prices (M, V).--Department of Labor, Bureau of Labor Statistics; no seasonal adjustment

24. Value of manufacturers' new orders, machinery and equipment industries (M, III).--Department of Commerce, Bureau of the Census

25. Change in manufacturers' unfilled orders, durable goods industries (M, IV).--Department of Commerce, Bureau of the Census

26. Buying policy--production materials, percent reporting commitments 60 days or longer (M, IV).--National Association of Purchasing Agents; no seasonal adjustment

***29. Index of new private housing units authorized by local building permits (M, III).**--Department of Commerce, Bureau of the Census

***30. Nonagricultural placements, all industries (M, I).**--Department of Labor, Bureau of Employment Security; seasonal adjustment by Bureau of the Census

***31. Change in book value of manufacturing and trade inventories, total (M, IV).**--Department of Commerce, Office of Business Economics, and Bureau of the Census

32. Vendor performance, percent reporting slower deliveries (M, IV).--Chicago Purchasing Agents Association; no seasonal adjustment

33. Net change in mortgage debt held by financial institutions and life insurance companies (M, VI).--Institute of Life Insurance, Federal National Mortgage Association, National Association of Mutual Savings Banks, U.S. Savings and Loan League, and Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc.

37. Percent reporting higher inventories, purchased materials (M, IV).--National Association of Purchasing Agents; seasonal adjustment by Bureau of the Census

***38. Index of net business formation (M, III).**--Dun and Bradstreet, Inc., and Department of Commerce, Bureau of the Census; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc.

39. Percent of consumer installment loans delinquent 30 days and over (EOM, VI).--American Bankers Association; seasonal adjustment by Bureau of the Census and National Bureau of Economic Research, Inc. (Bimonthly since December 1964)

85. Percent change in total U.S. money supply (demand deposits plus currency) (M, VI).--Board of Governors of the Federal Reserve System

94. Index of construction contracts, total value (M, III).--F.W. Dodge Corporation

98. Percent change in total U.S. money supply (demand deposits and currency) and commercial bank time deposits (M, VI).--Board of Governors of the Federal Reserve System

110. Total funds raised by private nonfinancial borrowers in credit markets (Q, VI).--Board of Governors of the Federal Reserve System

112. Net change in bank loans to businesses (M, VI).--Board of Governors of the Federal Reserve System; seasonal adjustment by Bureau of the Census

***113. Net change in consumer installment debt (M, VI).**--Board of Governors of the Federal Reserve System

25 Roughly Coincident Indicators

40. Unemployment rate, married males, spouse present (M, I).--Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census

***41. Number of employees in nonagricultural establishments (M, I).**--Department of Labor, Bureau of Labor Statistics

42. Total nonagricultural employment, labor force survey (M, I).--Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census

***43. Unemployment rate, total (M, I).** Department of Labor, Bureau of Labor Statistics, and Department of Commerce, Bureau of the Census

45. Average weekly insured unemployment rate, State programs (M, I).--Department of Labor, Bureau of Employment Security

46. Index of help-wanted advertising in newspapers (M, I).--National Industrial Conference Board

***47. Index of industrial production (M, II).**--Board of Governors of the Federal Reserve System

49. Gross national product in current dollars (Q, II).--Department of Commerce, Office of Business Economics

***50. Gross national product in 1958 dollars (Q, II).**--Department of Commerce, Office of Business Economics

***52. Personal income (M, II).**--Department of Commerce, Office of Business Economics

53. Wage and salary income in mining, manufacturing, and construction (M, II).--Department of Commerce, Office of Business Economics

***54. Sales of retail stores (M, II).**--Department of Commerce, Bureau of the Census

55. Index of wholesale prices, industrial commodities (M, V).--Department of Labor, Bureau of Labor Statistics; no seasonal adjustment

57. Final sales (series 49 minus series 21) (Q, II).--Department of Commerce, Office of Business Economics

58. Index of wholesale prices, manufactured goods (M, V).--Department of Labor, Bureau of Labor Statistics; no seasonal adjustment

93. Free reserves (member bank excess reserves minus borrowings) (M, VI).--Board of Governors of the Federal Reserve System; no seasonal adjustment

96. Manufacturers' unfilled orders, durable goods industries (EOM, III).--Department of Commerce, Bureau of the Census

97. Backlog of capital appropriations, manufacturing (EOQ, III).--National Industrial Conference Board; component industries are seasonally adjusted and added to obtain seasonally adjusted total

114. Discount rate on new issues of 91-day Treasury bills (M, VI).--Board of Governors of the Federal Reserve System; no seasonal adjustment

115. Yield on long-term Treasury bonds (M, VI).--Treasury Department; no seasonal adjustment

116. Yield on new issues of high-grade corporate bonds (M, VI).--First National City Bank of New York and Treasury Department; no seasonal adjustment

117. Yield on municipal bonds, 20-bond average (M, VI).--The Bond Buyer; no seasonal adjustment

301. Nonagricultural job openings unfilled (EOM, I).--Department of Labor, Bureau of Employment Security; seasonal adjustment by Bureau of the Census

511. Man-hours in nonagricultural establishments, (M, I).--Department of Labor, Bureau of Labor Statistics

***816. Manufacturing and trade sales (M, II).**--Department of Commerce, Office of Business Economics and Bureau of the Census

11 Lagging Indicators

***61. Business expenditures on new plant and equipment, total (Q, III).**--Department of Commerce, Office of Business Economics, and the Securities and Exchange Commission

***62. Index of labor cost per unit of output, total manufacturing--ratio, index of compensation of employees in manufacturing (the sum of wages and salaries and supplements to wages and salaries) to index of industrial production, manufacturing (M, V).**--Department of Commerce, Office of Business Economics, and the Board of Governors of the Federal Reserve System

65. Book value of manufacturers' inventories of finished goods, all manufacturing industries (EOM, IV).--Department of Commerce, Bureau of the Census

66. Consumer installment debt (EOM, VI).--Board of Governors of the Federal Reserve System. FRS seasonally adjusted net change added to seasonally adjusted figure for previous month to obtain current figure
