## FEDERAL RESERVE BOARD

---

### Ex officio members:

A. W. MELLON,  
*Secretary of the Treasury, Chairman.*  
J. W. MCINTOSH,  
*Comptroller of the Currency.*

ROY A. YOUNG, *Governor.*  
EDMUND PLATT, *Vice Governor.*  
ADOLPH C. MILLER.  
CHARLES S. HAMLIN.  
GEORGE R. JAMES.  
EDWARD H. CUNNINGHAM.

---

WALTER L. EDDY, *Secretary.*  
J. C. NOELL, *Assistant Secretary.*  
E. M. MCCLELLAND, *Assistant Secretary.*  
W. M. IMLAY, *Fiscal Agent.*  
J. F. HERSON,  
*Chief, Division of Examination, and Chief Federal  
Reserve Examiner.*

WALTER WYATT, *General Counsel.*  
E. A. GOLDENWEISER, *Director, Division of Research  
and Statistics.*  
CARL E. PARRY, *Assistant Director, Division of Re-  
search and Statistics.*  
E. L. SMEAD, *Chief, Division of Bank Operations.*

### SUBSCRIPTION PRICE OF BULLETIN

THE FEDERAL RESERVE BULLETIN is the board's medium of communication with member banks of the Federal reserve system and is the only official organ or periodical publication of the board. The BULLETIN will be sent to all member banks without charge. To others the subscription price, which covers the cost of paper and printing, is \$2. Single copies will be sold at 20 cents. Outside of the United States, Canada, Mexico, and the insular possessions, \$2.60; single copies, 25 cents.

No. 9

## REVIEW OF THE MONTH

Volume of reserve bank credit, after increasing rapidly for several months, declined in recent weeks, but was still at a higher level for this season of the year than at any time in the past six years. Compared with a year ago bills and securities of the reserve banks were larger by about \$400,000,000, reflecting a greater outflow of gold, offset in part by a decrease in the demand for currency. Growth of member bank credit, which has been rapid for the year, has not given rise to an increase in reserve requirements, and consequently in demand for reserve bank credit by member banks, owing to the fact that the entire growth in member bank deposit liabilities has been in time deposits, while, owing largely to gold exports, net demand deposits showed a decrease for the year. Since the middle of May loans and investments of member banks in leading cities, which are about 65 per cent of the loans and investments of all member banks, have declined. Whether this decline is representative of changes in the condition of all member banks, it is impossible to say. The decline for banks in leading cities has represented reductions in the banks' holdings of investments and in their loans on securities. Notwithstanding this liquidation, the banks of the country approach the season of heaviest demand for bank credit and currency in connection with the financing of the movements of crops to market and of the autumn trade—with a greatly increased volume of loans and investments and a heavy indebtedness at the reserve banks.

Total reserve bank credit outstanding in the third week of August averaged \$1,470,000,000, showing an increase of \$370,000,000 over the corresponding period in 1927. This increase in reserve bank credit was brought about by a loss of \$467,000,000 from the country's stock of monetary gold, offset in part by a decrease of \$107,000,000 in the demand for currency. Changes for the year in other factors in the reserve bank position have been of relatively minor importance.

As a consequence of the loss of gold during the year the ratio of reserves of the Federal reserve banks to their combined note and deposit liabilities declined from 78.5 per cent on August 24, 1927, to 69.6 per cent on August 22 of this year. The present ratio for the system as a whole, furthermore, represents an average of the ratios for the 12 Federal reserve banks, which range from 46.6 per cent for the Federal Reserve Bank of St. Louis to 76.5 per cent for the Federal Reserve Bank of Boston. The amount of reserves held by the Federal reserve system in excess of its legal requirements of 40 per cent against Federal reserve notes in circulation and 35 per cent against deposits was about \$1,300,000,000 on August 22. The amount of gold legally required by the reserve banks, however, is measured under present conditions not by their reserve requirements alone, but also by their requirements of collateral against outstanding Federal reserve notes, which under the law must be covered up to 100 per cent by gold or eligible paper pledged with the Federal reserve agent. The volume of Federal reserve notes outstanding on August 22, i. e., of notes issued by the

Federal reserve agents to the Federal reserve banks, was \$2,027,000,000, including about \$385,000,000 of notes held by the issuing banks for counter requirements. On that date eligible paper available as collateral was \$1,190,000,000, leaving about \$838,000,000 of notes to be covered by gold. In addition a 5 per cent redemption fund must be carried with the Treasurer of the United States against the part of the notes that is not covered by gold; this redemption fund requires another \$60,000,000 of gold.

The 35 per cent reserves necessary against deposits would absorb about \$814,000,000 of reserves, bringing the total of reserve money required by the reserve banks to \$1,712,000,000. With the total reserves amounting to \$2,761,000,000 the reserve banks thus have more than \$1,000,000,000 in gold above their legal requirements. This relatively large amount of surplus gold reflects the fact, however, that the volume of eligible paper at the present time is between \$400,000,000 and \$500,000,000 larger than the average amount for the preceding five years, as the result of the unusually heavy indebtedness of member banks. If member bank borrowings declined to a more usual level, gold would have to be used to replace the liquidated eligible paper as collateral with the Federal reserve agents, and this would reduce the amount of surplus gold to between \$500,000,000 and \$600,000,000, or by more than was exported last year.

It is often stated that the Federal reserve banks could increase their surplus gold by paying out Federal reserve notes and substituting them for the gold certificates now in circulation. This statement overlooks the fact that collateral will be required against the additional Federal reserve notes put into circulation, and that the entire amount of gold drawn into the Federal reserve banks would thus have to be impounded with the Federal reserve agents as cover for the additional notes issued. There would, therefore, be no addition to the surplus gold from this source. Even leaving out of consideration the necessity for additional collateral for Federal reserve notes, gold withdrawn from circulation would

have but a slight effect on the reserve position of the reserve banks, because their liabilities on Federal reserve notes would increase by the same amount through the paying out of notes as their reserves would increase through the receipt of gold certificates from circulation. If the entire amount of gold certificates in circulation, which is about \$1,000,000,000, were withdrawn from circulation<sup>1</sup> and Federal reserve notes were paid out to replace them, the reserve ratio of the Federal reserve banks would advance only from 69.6 to 75.6 per cent. It is, therefore, evident that, while the Federal reserve banks have a considerable volume of excess reserves, or unused lending power, this amount is much smaller than is popularly believed and in the present circumstances can not be materially increased by the device of substituting Federal reserve notes for gold certificates in the country's circulation.

Growth in the volume of reserve bank credit outstanding during the past year has been entirely in the form of discounts for member banks, as is brought out by the following table:

FEDERAL RESERVE BANKS [Weekly averages in millions of dollars]			
	Week ending Aug. 27, 1922	Week ending Aug. 25, 1923	Increase (+) or decrease (-)
Bills and securities, total.....	1,032	1,440	+408
Discounts.....	401	1,048	+647
Acceptances.....	174	184	+10
U. S. securities.....	457	207	-250

Reserve bank holdings of United States securities, which were in unusually large volume a year ago, have been reduced by about \$250,000,000 during the year. Security sales, which were begun last January as a part of the system's credit policy, continued for five months, and during that period the volume of United States securities held by the reserve banks decreased by about \$400,000,000 to slightly over \$200,000,000 by the end of May, the lowest level in nearly five years.

<sup>1</sup> Withdrawal of such a large amount of certificates could not be accomplished without considerable delay, and some certificates held in hoards at home and abroad could not be called in. The low point in the circulation of gold certificates, after several years of effort to concentrate them in the Federal reserve banks, was \$170,000,000 in February, 1922.

The system's acceptance holdings in August were in about the same volume as a year ago.

The total volume of bills outstanding, however, increased by about \$237,000,000 during the year. In the following table is shown the distribution of outstanding acceptances at the end of July, 1927 and 1928, and the chart

shows changes in the volume of acceptances outstanding since 1924, as reported by the American Acceptance Council:

**DISTRIBUTION OF ACCEPTANCE HOLDINGS**  
[In millions of dollars]

	July 31, 1927	July 31, 1928	Increase
Total outstanding.....	741	978	237
Held by Federal reserve banks, total.....	309	468	159
For own account <sup>1</sup> .....	158	162	4
For account of foreign correspondents <sup>2</sup> .....	151	306	155
Held elsewhere.....	432	510	78

<sup>1</sup> Bankers' acceptances in dollars held by Federal reserve banks.

<sup>2</sup> Contingent liability of Federal reserve banks on bills purchased for foreign correspondents.

The larger part of the increase in acceptances for the year was in holdings by Federal reserve banks for account of their foreign correspondents, which also participate to a considerable extent in the holdings of inves-

tors outside of the Federal reserve banks. Other investors have also been more active takers of bankers' bills owing to the relatively high rates of return prevailing on these securities.

Since last November the total volume of dollar acceptances has been in record volume above \$1,000,000,000, as is brought out by the chart, though on July 31 a seasonal decline in bills outstanding had carried them slightly below the billion-dollar mark. In addition, branches of American banks abroad have issued acceptances in foreign currencies, which have been estimated to aggregate as much as \$100,000,000. The continuance of dollar acceptances in large volume in recent months, notwithstanding the lower rates on bills prevailing in other markets, has been explained by the fact that dollar bills have continued to be as cheap or cheaper a way for American exporters to finance their transactions as bills in foreign currencies, for the reason that such bills require the purchase of forward exchange at a considerable premium. Whether the recent advance in American rates will influence the volume of dollar bills that will be drawn to finance crop exports, it is too early to determine. Autumn, however, is always a season of increased activity in the American bill market in connection with exports of cotton, wheat, and other products, and it is to be expected that in the next few months the volume of acceptances in this market will increase. The seasonal growth in the volume of acceptances, coming at a time when the demand for reserve bank credit increases to meet the currency and credit requirements of the autumn, generally results in large additions, amounting to as much as \$200,000,000, to the reserve banks' holdings of purchased bills. This year, with member bank indebtedness at the reserve banks in exceptionally large volume, sales of acceptances to the reserve banks may be in even larger volume than usual, because by this means member banks are able to obtain reserve bank funds without increasing their indebtedness to the reserve banks.

Discounts for member banks in August were larger than at any time since early in 1922.

**Distribution of discounts.** As already indicated, this increase in the direct indebtedness of member banks has been due to the withdrawals of gold for export during the past year and to the sale of securities by the reserve banks since the beginning of 1928. Volume of member bank indebtedness has increased in all the Federal reserve districts, the percentage of increase ranging from 79 per cent at the Federal Reserve Bank of San Francisco to 325 per cent at the Federal Reserve Bank of Chicago. The figures are shown, by Federal reserve districts, in the following table:

DISCOUNTS FOR MEMBER BANKS  
[Weekly averages in millions of dollars]

	Week ending Aug. 27, 1927	Week ending Aug. 25, 1928	Increase	Per cent of in- crease
Boston.....	28	59	31	111
New York.....	115	320	205	178
Philadelphia.....	38	101	63	166
Cleveland.....	25	70	45	180
Richmond.....	21	56	35	167
Atlanta.....	36	77	41	114
Chicago.....	36	153	117	325
St. Louis.....	28	65	37	132
Minneapolis.....	7	19	12	171
Kansas City.....	10	21	11	110
Dallas.....	14	30	16	114
San Francisco.....	43	77	34	79
Total.....	401	1,048	647	161

A chart is also presented showing the course of discounts for member banks in New York City, in other leading cities, and outside of these cities. Rapid increases in discounts since the beginning of the year are shown for all three classes of banks, the growth for banks in leading cities other than New York being the largest. The chart brings out the further fact that the peak of borrowing from the reserve banks for banks outside the leading cities is reached in late summer, and that as the crops move to market and bank loans are liquidated by the producers and their commercial creditors, the volume of borrowing at the reserve banks diminishes. The continued growth of the demand for reserve bank credit in the autumn and early winter comes largely from

the banks in financial centers, which feel the larger part of the demand for currency. It is the city banks, therefore, that may be expected to be called upon in the next few months to provide trade and industry with their requirements of additional credit and currency.

Discounts by Federal reserve banks for member banks. Monthly averages of weekly figures

Between the middle of May and August 22 total loans and investments of reporting member banks in leading cities decreased by \$485,000,000. **Position of New York City member banks** This decrease was in large part at the banks in New York City, the total for all other reporting member banks showing only a slight decline for the period. During these three months member banks in New York City reduced their holdings of investments by about \$123,000,000, and their loans on securities by \$345,000,000, while their other loans increased by \$42,000,000. These figures indicate that the banks in New York City, under the influence of the pressure exerted by higher discount rates and heavy indebtedness at the reserve banks, have sold considerable amounts of securities out of their own portfolios and have liquidated a part of their loans on securities. In the liquidation of security loans by New York banks an important factor has been the taking over of loans to brokers by corporations having surplus funds and wishing to profit by the prevailing high rates on call and time money. Changes between the middle of May and August 22 in total security loans of New York City banks and in the dif-

ferent classes of loans to brokers and dealers in securities are shown below:

SECURITY LOANS OF NEW YORK CITY MEMBER BANKS  
AND BROKERS' LOANS

[In millions of dollars]

	May 16, 1928	August 22, 1928	Increase (+) decrease (-)
Security loans of New York City member banks.....	2,790	2,445	-345
Loans to brokers and dealers, total.....	4,502	4,201	-301
For own account.....	1,312	809	-503
For account of out-of-town banks.....	1,656	1,513	-143
For account of others.....	1,535	1,880	+345

Loans to brokers and dealers in the aggregate declined by \$301,000,000 during the period; loans for account of out-of-town banks declined by \$143,000,000, and loans for account of others increased by \$345,000,000, while loans for own account declined by \$503,000,000. The chart presents a comparison of the movement of loans placed by New York banks for their bank and other customers, with the movement of their own loans to brokers, which have declined sharply since the middle of May.

That a part of the decline in own loans to brokers by New York banks represented a transfer of loans placed through brokers to loans by security holders directly from the banks is indicated by the fact that while brokers' loans by New York banks declined by \$503,000,000 during the period, the decline in their total security loans was much smaller. These developments may be summarized by saying that, under the influence of high money rates and closer scrutiny of brokers' loans, New York City banks have withdrawn a part of their accommodation to brokers, and have granted additional loans on securities directly to their customers; at the same time they have transferred a considerable part of their own street loans to corporations and others seeking temporary investment for their surplus funds. Brokers' loans for account of others were about \$1,880,000,000 in August, the largest volume on record.

One of the consequences of the taking over of brokers' loans by corporations has been the loss of deposits by the New York banks, since the corporations had to pay for the loans by

the use of their deposits. This procedure, by diminishing the reserve requirements of member banks, has tended to reduce their requirements of reserve bank credit. If the present nonbank lenders to brokers should find it necessary to convert some of their brokers' loans once more into deposits in order to meet the financial needs of their own enterprises, the greater part of these loans would be taken over by the New York banks, and the accompanying growth in their deposits would increase their reserve requirements, and consequently would have a tightening influence on the credit situation.

Loans to brokers and dealers in securities by weekly reporting member banks in New York City

This analysis of the banking situation at the beginning of the crop-moving period indicates that the seasonal credit pressure for banks in smaller towns and in agricultural districts, taking the total for the country, has reached its peak and is likely to decline, and that during the next few months the demand for additional credit will be felt chiefly by banks in the financial centers. In recent months these banks have reduced the volume of their loans and investments and in consequence are in a somewhat better position to meet the demands that will be made upon them during the autumn.

## CONDITION OF ALL MEMBER BANKS ON JUNE 30

Total loans and investments of all member banks, after a relatively small seasonal decline during the first two months of the year, increased rapidly during the subsequent four months. On June 30, the date of the latest member bank call report, loans and investments of member banks were \$35,498,000,000, showing an increase of \$1,354,000,000 since February 28 and of \$2,531,000,000 since June 30 of last year. The following table summarizes the condition of all member banks on call dates during the past year and shows changes in principal items for the year and for the past four months:

ALL MEMBER BANKS  
[In millions of dollars]

	Loans and investments					Net demand and time deposits	Borrowings at Federal reserve banks
	Total	Loans	Investments				
			Total	U. S. securities	All other securities		
June 30, 1927.....	32,967	23,149	9,818	3,796	6,022	31,418	441
Oct. 10, 1927.....	33,451	23,492	9,959	3,856	6,103	31,603	458
Dec. 31, 1927.....	34,679	24,318	10,361	3,978	6,303	32,848	583
Feb. 28, 1928.....	34,143	23,654	10,589	4,216	6,374	32,129	486
June 30, 1928.....	35,498	24,739	10,758	4,225	6,534	32,686	1,096
Change since—							
Feb. 28, 1928.....	+1,354	+1,185	+169	+9	+160	+457	+610
June 30, 1927.....	+2,531	+1,591	+941	+428	+512	+1,168	+655

Growth in the volume of member bank credit between the end of February and the end of June reflected chiefly an increase of \$1,185,000,000 in the banks' loans, which have advanced almost without interruption since the spring of 1922. Investment holdings also showed some further increase during the period, and constituted on June 30 more than 30 per cent of total member bank credit. This proportion was not far below the highest reached since the middle of 1919.

The growth in the volume of member bank loans and investments during the four-month period from the end of February to the end of June was not accompanied by a corresponding advance in deposits, owing largely to the outflow of gold from this country and the sale of United States securities by the Federal reserve banks. Time deposits continued to grow at about the same rate as in other recent years, showing an increase of nearly \$520,000,000, or about 4 per cent, for the four-month period, while net demand deposits decreased.

Figures for dates on which member banks made call reports

As a consequence of the more rapid growth in loans and investments than in deposits, member banks greatly increased their borrowings at the reserve banks, which at the end of June were about \$600,000,000 larger than four months earlier. The accompanying chart shows the course of principal resources and liabilities of all member banks since the beginning of 1919.

During the year ending June 30, 1928, the total volume of member bank loans increased

by nearly \$1,600,000,000 and their investment holdings by more than \$900,000,000, making a total increase of more than \$2,500,000,000, or nearly 8 per cent of the year. This is a more rapid rate of growth than the annual average rate since the middle of 1922 and is almost as large a percentage increase as in the fiscal years 1922-23 and 1924-25, when industrial and trade activity was expanding. During the fiscal year 1927-28 the growth of member bank credit was not accompanied by a considerable increase in the current credit requirements of trade and industry and represented in large measure a growth in the use of bank credit for other purposes, including the purchase of investments and the financing of transactions in securities.

Of the increase of \$1,590,000,000 in member bank loans during the year, \$1,320,000,000, or

about 83 per cent, was in the **Analysis of credit growth.** loans of banks in leading cities and for the most part in New York City and Chicago. Growth in the loans of banks in smaller communities, supplying chiefly the needs of agricultural sections, amounted to \$272,000,000 for the year. Classification of the loans of all member banks for June 30, 1928, is not yet available. Figures for banks in leading cities, however, which represent about 65 per cent of the loans for all member banks and account for most of the increase during the year, give an indication of the character of this increase.<sup>1</sup> The following table shows changes in principal resources and liabilities during the year ending June 30, 1928, for member banks in leading cities and for other member banks:

<sup>1</sup> Comparisons between figures for all member banks and weekly reporting member banks are not entirely accurate, since the dates to which they relate are not exactly the same.

<sup>1</sup> Amounts as on July 3, 1928; changes between June 29, 1927, and July 3, 1928.

<sup>2</sup> Amounts as on July 11, 1928; changes between June 22, 1927, and July 11, 1928.

At member banks in leading cities loans on securities increased rapidly during the last half of 1927 and, after declining considerably following the turn of the year, advanced to new high levels in May and June and on June 30 of this year were nearly \$850,000,000 larger than a year earlier. While the larger part of this increase was in loans of banks in New York and Chicago, security loans of banks in other cities showed an increase of \$400,000,000. Growth in loans to brokers and dealers in securities by member banks in New York City for their own account and for account of correspondent domestic banks accounts for about \$370,000,000, or about 44 per cent, of the total

growth in security loans. The loans to brokers, however, include some loans for banks that are not members of the Federal reserve system and are not included in the totals given for member banks. All other loans of banks in leading cities, which include loans for commercial, industrial, and agricultural purposes, as well as real-estate loans and a large variety of other loans, showed an increase of \$470,000,000 for the year. This increase was almost entirely in New York City and Chicago.

Investment holdings of all member banks showed an increase of \$940,000,000 for the year. Investments of banks in New York City and Chicago increased by \$160,000,000, holdings of banks in other leading cities by nearly \$390,000,000, and holdings of banks in smaller centers increased by a similar amount.

During the year ending June 30, 1928, net demand and time deposits of all member banks showed an increase of \$1,170,000,000,

reflecting a growth of \$1,230,000,000 in time deposits and a slight decline in net demand deposits. Member banks in leading cities showed a growth in time deposits of more than \$700,000,000 and banks in smaller centers an increase of about \$500,000,000 for the year.

Increase during the year in the volume of reserve bank discounts for member banks reflected chiefly increased borrowing by banks in leading cities. Discounts for banks in New York City, and Chicago increased by \$340,000,000 and discounts for banks in other leading cities by \$310,000,000, while discounts for banks in smaller centers showed an increase of about \$90,000,000 for the period.

Detailed figures of condition for all member banks, based on required reports for June 30, are published in some detail on pages 673-677 of this issue of the BULLETIN, and in greater detail by States, cities, and class of bank in Member Bank Call Report No. 40.

## NATIONAL SUMMARY OF BUSINESS CONDITIONS

Industrial and trade activity was in larger volume in July than is usual in midsummer and the general level of commodity prices advanced slightly. Member bank holdings of securities and loans on securities declined in July and August, while all other loans increased to the highest level since 1921. Conditions in the money market remained firm.

**Production.**—Production of manufactures and minerals showed a smaller decrease than usual in July, and the index of industrial production, which makes allowance for seasonal variations, advanced. Production of steel, bituminous coal, petroleum, automobiles, and footwear was larger in July than in June, while activity in textile mills, meat packing, and copper and anthracite mines declined. Lumber production showed less than the usual seasonal decrease. Steel mill activity, while during July was at an unusually high level for the summer season, was well maintained during August. Weekly reports from Detroit factories show a larger volume of employment in the middle of August than at any previous date, indicating that automobile production continued large in that month. Building contracts awarded declined by somewhat more than the usual seasonal amount in July, but were larger than in any previous July, the increase over last year being chiefly in residential building. Contracts awarded in the first two weeks in August were slightly smaller than in the same period of last year. Estimates of the Department of Agriculture as of August 1 indicate considerable improvement in crop conditions during July. Estimated wheat production was 891,000,000 bushels, larger by 91,000,000 than on July 1 and slightly larger than the yield in 1927. The corn crop is expected to be more than 3,000,000,000 bushels, an increase of 250,000,000 bushels from last year. Forecasts for other grain crops were also larger than the July 1 estimates and in most cases exceeded last year's yields. The August 1 forecast of cotton production was 14,290,000, as compared with yields of 12,955,000 bales in 1927 and nearly 18,000,000 bales in 1926.

**Trade.**—Distribution of commodities at wholesale and retail was in large volume in July. Sales of dry goods and shoes at wholesale were larger than in June, and those of other lines were only slightly smaller. Department store sales, after allowance for seasonal changes, increased in July. Compared with July a year ago trade of both wholesale and retail firms was larger. Stocks of department

stores and of wholesale firms continued smaller than a year ago.

Freight-car loadings increased by more than the usual seasonal amount in July and for the first time this year were larger than in the corresponding month of 1927. Increases, compared with last year, were reported in loadings of miscellaneous commodities and of grain, reflecting the early harvesting of the crop this year. The largest decrease, as compared with a year ago, was in livestock shipments. During the first two weeks in August total loadings were in about the same volume as in the corresponding weeks of last year.

**Prices.**—The general level of wholesale commodity prices increased slightly in July, reflecting chiefly advances in the prices of livestock and meats, although there were also small increases in hide and leather products, textiles, petroleum products, and building materials. There was a sharp decline in the price of grains, other than corn, and some decrease in chemicals and drugs, silk, rubber, and automobile tires. During the first half of August there were increases in the prices of sugar, hogs and pork products, coke, and lumber, and decreases in grains, cotton, wool, and hides.

**Bank credit.**—Between July 18 and August 15 total loans and investments of member banks in leading cities decreased by about \$130,000,000. This decline reflected a considerable reduction in investments, chiefly at banks in New York City, and some further decline in loans on securities. All other loans, which include loans for commercial purposes, showed a small seasonal increase and at the middle of August were in the largest volume since early in 1921 and nearly \$230,000,000 larger than at the autumn peak of last year. There was a further large decline in net demand deposits, and practically no change in time deposits.

Volume of reserve bank credit outstanding showed little change between July 25 and August 22. Discounts and acceptance holdings increased slightly, while United States security holdings were practically unchanged. Increased demand for currency, which is usual at this time of the year, has not resulted in an equivalent growth in reserve bank credit, because it was offset in part by a decline in reserves required by member banks, which reflected the decrease in their deposits.

There were further increases between the middle of July and the middle of August in open-market rates on collateral loans, commercial paper, and bankers' acceptances.

## RESERVE BANK CREDIT

Aug. 18.....	5½-5½	4½	6½-6½	6.27	6.60	4.58	3.58
Aug. 25.....	5½-5½	4½	6½	7.05	6.80	4.38	3.56

<sup>1</sup> Stock exchange call loans; new and renewal rates.

<sup>2</sup> Stock exchange 90-day time loans.

<sup>3</sup> 3 issues—3½, 4, and 4½ per cent; yields calculated on basis of last redemption dates—1956, 1954, and 1952.

<sup>4</sup> Change of issues on which yield is computed.

## PREVAILING RATES CHARGED CUSTOMERS BY BANKS IN PRINCIPAL CITIES

The rates shown are those at which the bulk of the loans of each class were made by representative banks during the week ending with the 15th of the month. Rates reported by about 200 banks with loans exceeding \$7,500,000,000.

\*Revised.

NOTE.—These tables contain, for certain months, index numbers of industrial production, together with group indexes for important components. The combined index of industrial production is computed from figures for 60 statistical series, 52 of manufactures, and 8 of minerals. Adjustments have been made in the different industries for the varying number of working days in each month and for customary seasonal variations, and the individual products and industries have been weighted in accordance with their relative importance. The sources of data and methods of construction were described and monthly indexes for the above groups were published in the BULLETIN for February and March, 1927.

## PRODUCTION OF MANUFACTURES, BY INDIVIDUAL LINES

\* Revised.

NOTE.—This table contains for certain months general index numbers of employment and pay rolls, together with group indexes for important industrial components. The general index is a weighted average of relatives for 34 individual industries. The method of construction was described in detail and indexes for the above groups since January, 1919, were published in the BULLETIN for May, 1925. See also p. 668 of BULLETIN for September, 1925, for certain revisions.

## FOREIGN BANKING AND BUSINESS CONDITIONS

ANNUAL REPORT OF THE BANK OF NETHERLANDS<sup>1</sup>

The report of the president of the Netherlands Bank, covering the year ended March, 31, 1928, and delivered to the general meeting of shareholders on June 26, 1928, is as follows:

In my report of last year, I was able to point out that great improvement had gradually taken place in the economic and financial situation of nations. Fortunately progress in the return to more normal conditions has on the whole continued during 1927. In many respects, of course, the consequences of the war and of the subsequent crisis have not yet entirely disappeared: the work of reconstruction is still being diligently carried on; it is meeting, however, with an increasing measure of friendly cooperation. Less and less frequently one hears the opinion expressed that one's own country can prosper only by putting other—former enemy—countries at a disadvantage; more and more the idea prevails of the restoration of friendship between those who formerly fought and for a long time thereafter continued to hate one another. In all this the influence of the conferences held at Geneva is very great.

**Currency stabilization in Poland.**—In the domain of banking also cooperation has been striven after to more definite purpose, and with good results. Our report of last year contained the announcement that stabilization in Belgium had been completely successful. Similarly stabilization has now been achieved in Poland. Once again 14 banks of issue declared themselves ready to participate in a bank credit—amounting to \$20,000,000—which should serve as a contingent revolving credit to maintain the zloty at its gold value. As in the case of Belgium, the administration of the guaranties for this revolving credit was entrusted to the Netherlands Bank. In addition, the Polish Government floated a long-term loan for \$62,000,000 in 7 per cent sinking fund gold bonds, and for the nominal amount of £2,000,000 in 7 per cent stabilization bonds.

The participants in the dollar loan were:

United States.....	\$47,000,000
France.....	2,000,000
Sweden.....	2,000,000
Switzerland.....	6,000,000
Poland.....	1,000,000
Netherlands.....	4,000,000
<b>Total.....</b>	<b>62,000,000</b>

while that part of the loan which was issued in sterling and amounted to £2,000,000, as noted above, was floated in England. The loan was used for consolidating and assuring the permanence of the conditions necessary for monetary stability and for balancing the budget. The entire floating debt was to be redeemed by the public treasury, and a working capital of 75,000,000 zlotys was provided to enable the Polish Government to meet any possible seasonal deficits. This loan was a great success, especially in America. The issue price of the allotment of \$4,000,000 floated in this country, as shown above, was 92 per cent; since its issue, however, the loan has been at some further discount in the Netherlands; after declining to 85 per cent the price on May 12 stood at 90 $\frac{7}{8}$  per cent. By the stabilization arrangement, the value of the zloty is fixed at 5,924.44 zlotys to 1 kilogram of fine gold, corresponding to a mint parity of 8.914 zlotys to one United States dollar and of 27.908 Netherlands florins to 100 zlotys.

**Currency stabilization in Italy.**—On December 22, 1927, the Italian Government announced that it had arranged for the stabilization of the lira at 7.91905 grams of fine gold per 100 lire (equivalent to 12,627.778 lire per 1 kilogram of fine gold), corresponding to a mint parity of 92.465 lire to £1 sterling, and about 13.094 Netherlands florins per 100 lire. Following the precedents set in the case of Belgium and of Poland, a revolving credit was again created by a number of banks of issue (namely, those of the United States, Belgium, Denmark, Germany, England, Egypt, Finland, France, Hungary, Japan, Netherlands, Austria, Poland, Czechoslovakia, Sweden, and Switzerland) in the amount of \$75,000,000, while the Bank of Italy arranged in addition a separate credit with private bankers in the amount of \$50,000,000. The administration of the guaranties of the credit of \$75,000,000 extended by the banks of issue was in this case intrusted to the National Bank of Switzerland at Zurich. The Italian stabilization also has been entirely successful.

**Expiration of the Belgian credit.**—The stabilization credit for Belgium, opened in 1926 by the group of central banks previously mentioned, expired during the past year without any necessity having arisen to use it for the protection of the stabilized currency. Yet undoubtedly the moral support furnished by the very existence of this credit supplied an

<sup>1</sup> For previous reports of the Bank of Netherlands, see FEDERAL RESERVE BULLETIN, August, 1927, p. 596; August, 1926, p. 592; and November, 1925, p. 811.

effective reenforcement against any possible speculative attack.

**Other stabilization measures.**—In the field of stabilization several other important steps have been taken in the right direction. In South America gold has been established as the standard by Argentina, Chile, Colombia, Ecuador, and Venezuela. Besides France, there are now on the eve of stabilization, Rumania, Bulgaria, Yugoslavia and probably Turkey. In Europe, Greece adopted the gold standard on May 14, 1928, as a result of which 375 drachmas were made equivalent to £1 sterling, which corresponds to 3.229 Netherlands florins per 100 drachmas. During the past year Denmark and Norway have revalorized their currencies to their former gold basis.

**The Netherlands money market.**—Money has been tighter in this market during the past year than during the two years previous; rates in the open market reflect this situation clearly. The placing of a considerable amount of foreign issues in this market has undoubtedly contributed to the stringency. As early as February 3, 1927, therefore, we had given a mild warning by raising our discount rate one-half of 1 per cent; this measure served the purpose well enough for the time being, but during the course of the year the situation became still further strained; money in the open market became steadily tighter; the exchanges on London and America stood almost uninterruptedly close to the gold export point, and more than once we had to declare ourselves ready to release gold because on certain days the gold export point was passed. This generally took place, moreover, in connection with a sudden reduction of transportation costs, which was granted by the steamship companies upon the departure of certain ships. In this way we released gold for shipment to America as follows:

	Florins
1927—May 15.....	1, 823, 000
May 24.....	7, 464, 000
June 5.....	4, 958, 000
July 5.....	4, 961, 000
July 19.....	6, 320, 000
July 21.....	4, 962, 000
July 26.....	1, 000, 000
Total.....	31, 488, 000

Meanwhile we gave the exchange value of the florin considerable additional support by converting dollars into pounds in the form of checks. As a result our foreign balances were very considerably reduced in the months of May, June, and October, 1927. When later on the course of the exchanges turned once more in our

favor, we took advantage of the change gradually to build up again our foreign exchange portfolio. How considerable the changes in our bill holdings have been during the course of the year may be seen from their lowest and highest levels as shown below:

	In thousands of florins	
	Domestic bills	Foreign bills
1927		
Beginning of fiscal year.....	99, 377	146, 785
May 23.....	98, 803	140, 380
June 13.....	153, 036	114, 103
Aug. 1.....	<sup>1</sup> 175, 506	127, 040
Oct. 13.....	156, 718	<sup>2</sup> 101, 655
1928		
Feb. 20.....	69, 951	<sup>1</sup> 190, 675
Mar. 24.....	<sup>2</sup> 49, 755	181, 312

<sup>1</sup> Maximum.

<sup>2</sup> Minimum.

The above figures indicate that fluctuations in domestic discounts and in foreign bills have repeatedly created a certain equilibrium, and from this it is evident to what a great extent the foreign bill portfolio has acted as a sort of regulator; with the increase of one there has followed shortly a decline of the other. Both the rapid increase in our domestic portfolio and the rapid decline in our foreign demand bills added to the tension in our money market.

**Discount rates.**—Thus there was every reason for us to consider seriously an advance in the discount rate. We waited for a time, however, before doing this until the temporary influence of monthly settlements had passed; as the same state of things continued after the first week in October we decided on October 13, 1927, to put into effect an increase in the rate. The increase amounted to a full 1 per cent for discounts and loans on collateral, and to one-half per cent for other loans. We made the latter decision in order to reestablish the former differential between this rate and the discount rate.

Certain conditions developing during the year might very well have led us to consider making a slight reduction in our interest charges. We made, however, but one change in our rates during the year, since this one change had accomplished the purpose for which we are constantly striving; so far as possible we try to avoid rate changes, because we are convinced that steadiness of the rate is of more importance to trade and industry than are any slight gains which might be reaped from lower rates over a short period.

**Purchases of gold.**—Meanwhile we felt obliged to strengthen our position in respect to foreign countries not only by a rise in discount rates; we also initiated purchases of gold. By this means, during the year, we acquired the following sums of gold:

An equivalent value of—	Florins
In London.....	11,240,000
In New York.....	29,730,000
In Amsterdam.....	124,000
Total gold purchases.....	41,094,000

We did not in every instance have the gold thus acquired shipped to this country at once; in some cases we left the sums abroad for the time being under earmark in banks of issue. Later on, however, we brought to this country all of the gold temporarily on deposit abroad. Inasmuch as gold held abroad was carried by the bank under the caption "Debits," the increase in our gold stock first appeared among the bank's holdings of precious metals when the gold was actually placed in our own vaults in this country.

**Reserve ratio.**—During the fiscal year 1927-28 our demand liabilities were on the average covered by coin and bullion in the proportion of 50.77 per cent. For earlier years the corresponding percentages were as follows:

	Per cent		Per cent
1926-27.....	51.57	1921-22.....	57.71
1925-26.....	50.57	1920-21.....	56.97
1924-25.....	52.82	1919-20.....	58.42
1923-24.....	58.25	1918-19.....	67.37
1922-23.....	59.07	1917-18.....	75.99

**German Reichsbank purchase price for gold.**—It should be noted that during the past year the Reichsbank has lowered its buying price for gold from 2,790 reichsmarks per fine kilogram to 2,784 reichsmarks, the figure which was formerly customary. This change is advantageous for us in that as a result the export point of gold from the Netherlands to Germany is raised by more than 2 per cent.

**Circulation.**—Furthermore we can perceive a steady improvement in the economic and financial situation of our country. The circulation of fiduciary means of payment has steadily declined since 1920-21, and the decrease has continued during the past fiscal year. It is true that temporary demands for currency at the end of certain months, in preparation for the usual large payments to be made immediately thereafter (as on January 1, May 1, July 1, and November 1), were in very considerable amount, but it was always evident that these extra demands were occasioned by special settlements, and after a few weeks the expansion gave place to a contraction which brought the figures down

again to those obtaining previous to these special demands.

**Prices.**—Price index numbers, which in recent years had followed a declining course, showed a rising tendency during the past nine months. It is not easy at this time to determine the cause of the advance. The rise is the more remarkable because in this most recent period increasing monetary stringency has been prevalent, as may be seen from the almost universally higher rates paid for money. Not only were the official rates of the Netherlands Bank advanced, but rates for private discount, call money, and contango in the open market were also higher than during recent years.

**Interest rates.**—The average contango rate in the Amsterdam bourse during 1927-28 was 3.9476 per cent, as against 3.07 per cent during 1926-27; the average rate for call money was 3.6 per cent, as against 2.4825 per cent in 1926-27; the average private discount rate 3.86345, as against 3.01 per cent in 1926-27.

**Plethora of Government funds.**—It is a noteworthy fact that during the past year the Government was too amply provided with funds. It was in a position gradually to accumulate large funds and with these to effect considerable redemptions of Government loans. The funds were lent "on call" in the Amsterdam market, and this naturally had its influence on open-market rates; if these funds had not been available, the rates for day-to-day money in the market would almost certainly have often been still higher. The withdrawal of this call money at the time of redemption of Government loans brought about a temporary stiffening of the money market.

In still another way the abundance of funds held by the Government was clearly shown. For months at a time the Government had a credit at the bank. For this reason there was almost no occasion for the Government to offer us treasury bills through the agency of bankers. Only once did the Government place 6,000,000 florins in treasury bills through bankers; this took place in September. After 10 days this advance was liquidated. Thus the issues of treasury notes and treasury bills in the open market have been less extensive than in previous years. "Anticipation-notes" of municipalities were discounted by the bank this year in only relatively small amounts, and even then for periods of only a few days.

**Gold coins in circulation.**—The issue of gold 10-florin pieces has been further restricted; it was evident that recently the gold coins put into circulation were for the most part being

sold abroad at a premium; this result was certainly not in accord with the purpose for which the 10-florin pieces were issued. We have therefore reduced the issue per day to 50 florins per application. The result of this has been that during the past year we have put into circulation only 2,218,990 florins in 10-florin pieces and that an amount of 892,340 florins has come back to us from circulation.

**Silver certificates.**—On March 31, 1928 there were still 12,032,000 florins outstanding in silver certificates. It is the purpose of the Government to convert all of this "coin-paper" (subsidiary notes) as soon as sufficient half crowns shall have been minted.

**Domestic and foreign loans.**—During the past fiscal year domestic loans have been floated in the total amount of 278,144,000 florins, of which 75,593,000 florins were conversions. In addition during the same period foreign loans were floated in Holland in the following currencies and amounts:

Florins.....	89,749,000
Pounds sterling.....	1,837,000
Canadian dollars.....	1,500,000
United States dollars.....	54,617,000
Reichsmarks.....	64,652,000
Belgas.....	13,500,000
Swedish kronor.....	2,000,000
Swiss francs.....	22,000,000
Belgian francs.....	157,000,000
French francs.....	1,200,000

**New central credit bank.**—In the domain of banking several important measures have become effective in this country. Through the cooperation of the various institutions which make a business of extending credit to the middle class, there was established during the past fiscal year the Netherlands Middle Class Bank as a central institution for the whole country. This new organization has absorbed the General Central Bank Union for the Middle Class, the Cooperative Central Savings and Loan Bank "Boaz," and the Middle-Class Bank for the Province of Limburg at Maast-

richt. The new institution began operations on November 14, 1927.

Under the regulation made in the years 1915-1918 respecting the distribution of risk of the first 3,000,000 florins of possible loss, the guaranty is valid which the Government has given us for the liability of this institution in a maximum amount of 9,000,000 florins.

Also the readjustment of the Rotterdam Banking Co. has now been definitely concluded since the two Houses of the States-General have approved the guaranty which the Government in 1924 and in 1925 had promised the Netherlands Bank.

**Special accounts.**—In previous annual reports we have mentioned a temporary account, the so-called "Reorganization account" which we opened on the books of the bank for the purpose of winding up certain concerns which as a result of the war and the crisis had become involved in difficulties, and from which we felt that in the general interest we should not withhold our assistance. Although the final settlement of these concerns has not yet taken place, and in some cases may perhaps still take several years, we are convinced that there is no longer any occasion to continue holding a separate account of this kind. We have therefore included the "Reorganization account" under the caption "Outstanding accounts."

This year the bank has had no opportunity to add any sum to the special reserve or to write any amount of it off. The special reserve, therefore, with the approval of His Excellency the Minister of Finance, remains at about 8,000,000 florins on our balance sheet, for the purpose for which it was created several years ago.

We have again written down our buildings this year by a considerable sum; detailed figures are given later in the report.

We may say with satisfaction that on the whole this past year has been favorable for the bank.

## ITALIAN CURRENCY LEGISLATION

In pursuance of its adopted program for re-establishment of Italian currency on a gold basis,<sup>1</sup> the Italian Government has issued a number of decrees, four of which are reproduced below. The first of these, dated December 21, 1927, provided for convertibility of the bank-note circulation, for legal stabilization of the lira, for revaluation of gold reserves of the Bank of Italy, and for maintenance by the

bank of a 40 per cent reserve against its note circulation and other demand liabilities. On February 26, 1928, two decrees were issued, one promulgating regulations governing conversion of Bank of Italy notes in gold or gold exchange and the purchase and sale of gold by the Bank of Italy in support of Italian exchange; and the other fixing the gold import and export points of the lira. Arrangements were concluded by the decree of June 17, 1928,

<sup>1</sup> See FEDERAL RESERVE BULLETIN, January, 1928, p. 27.

between the royal treasury and the Bank of Italy, according to which the bank is to insure the maintenance of the 40 per cent reserve, to make specified advances to the treasury, and to perform certain services for the treasury.

#### CONVERTIBILITY OF NOTES OF THE BANK OF ITALY INTO GOLD

[Royal decree law, December 21, 1927, No. 2325]

Under the law of January 31, 1926, No. 100, in consideration of the urgent need of definitely systematizing Italian currency so as to render it convertible into gold or negotiable values on a gold basis, after hearing the council of ministers, upon motion made by our minister, the Secretary of State for Finance, acting with the Prime Minister and Head of the Government, and the Minister of Justice and Public Worship, we (Victor Emanuel III) have decreed and do hereby decree:

##### ARTICLE 1

As from the day following that on which the present decree is promulgated, the Bank of Italy shall, on presentation at its head office in Rome, convert its own notes into gold, or at the option of the bank into exchange on foreign countries in which bank notes are convertible into gold.

The gold parity is fixed on the basis of a standard gold weight of 7.919 grams to each 100 Italian lire.

##### ARTICLE 2

Notes of the Bank of Italy, State notes until the time appointed for their retirement from circulation, and silver money coined in virtue of royal decree laws of September 7, 1926, No. 1506, and June 23, 1927, No. 1148, shall continue to have within the Kingdom their full legal value.

Nothing is changed in regard to the legal tender quality of said currency, nor in regard to the obligation of public banks and private individuals to accept it within the Kingdom as legal tender, any agreement to the contrary notwithstanding.

##### ARTICLE 3

The Bank of Italy is authorized to revalue in its assets its reserves of gold, and of foreign exchange on countries in which bank notes are convertible into gold, in Italian lire on the gold basis defined in article 1. The net profits resulting from revaluation of reserves of the Bank of Italy shall be credited to the State. Such profits shall be applied:

(a) To the liquidation of the debt in notes of the Bank of Italy issued for account of the State;

(b) To the settlement of the difference in value, expressed in paper lire, resulting from revaluation at the gold parity prescribed by article 1 of the reserves in gold or its equivalent of the Bank of Naples and the Bank of Sicily, transferred to the Bank of Italy at the time of the unification of the issue of notes at the said bank, in conformity with the provisions of article 2, of royal decree law of May 6, 1926, No. 812;

(c) To the settlement of the difference in value, expressed in paper lire, resulting from revaluation at the above-mentioned gold parity, of the sum of \$90,000,000 transferred by the State to the Bank of Italy against a reduction of 2,500,000,000 lire in the

debt of the royal treasury to the said bank, in accordance with article 1 of royal decree law of September 7, 1926, No. 1506;

(d) To the settlement of the difference in value, expressed in paper lire, resulting from revaluation at the above-mentioned gold parity, of purchases of other foreign exchange on countries in which bank notes are convertible into gold, which foreign exchange has been transferred by the State or the National Institute of Foreign Exchange to the Bank of Italy.

##### ARTICLE 4

As from the date on which the present decree law becomes effective the Bank of Italy shall hold a reserve in gold and in exchange on foreign countries in which bank notes are convertible into gold, of not less than 40 per cent of the amount of its notes in circulation and of its other obligations payable at sight.

Notes issued by the Bank of Italy shall be secured not only by the said reserve in gold or its equivalent but by all other assets of the institution, in accordance with existing legislative provisions.

##### ARTICLE 5

The Royal Government is authorized to provide by royal decree, on motion by the Minister of Finance, and after hearing the council of ministers and the director general of the Bank of Italy, for the issue of regulations for execution of the present decree law and for its coordination with the legislative provisions which at present apply to the bank of issue.

##### ARTICLE 6

By royal decree, on motion by the Minister of Finance, measures will be taken to coordinate the rules now in force regarding the minting and issue into circulation of gold coins as provided in article 1 of the present decree.

##### ARTICLE 7

The Minister of Finance is authorized to conclude special agreements with the Bank of Italy for execution of the present decree law.

The present decree shall become effective on the day following that of its promulgation and shall be submitted to Parliament for enactment into law. The minister introducing the decree is authorized to submit the plan for its execution.

We order that the present decree, bearing the State seal, be included in the official collection of laws and decrees of the Kingdom of Italy, enjoining on all whom it may concern to observe it and to see that it is observed.

Given at Rome, December 21, 1927, sixth year.

VICTOR EMANUEL.

#### REGULATIONS FOR CONVERSION OF NOTES OF THE BANK OF ITALY INTO GOLD AND GOLD EXCHANGE

[Royal decree, February 26, 1928, No. 252]

Under decree law of December 21, 1927, No. 2325, concerning convertibility of notes of the Bank of Italy into gold, after hearing the council of ministers and the director general of the Bank of Italy, upon motion by our minister, the Secretary of State for Finance, we

(Victor Emmanuel III) have decreed and do hereby decree:

## ARTICLE 1

Under article 1 of royal decree law of December 21, 1927, No. 2325, the Bank of Italy shall be obligated to redeem its notes, when presented at its head office in Rome, in gold bullion in minimum amounts of 5 kilograms, at the rate of 100 lire for 7.919113 grams.

## ARTICLE 2

According to said article 1 the Bank of Italy may redeem its notes in exchange on foreign countries in which bank notes are convertible into gold.

The conversion shall be made at a rate of exchange to be established by the Bank of Italy, according to quotations prevailing in the exchange market. Such rate shall never exceed the limits of the gold export points as provided for in article 4 below.

## ARTICLE 3

It shall be the duty of the Bank of Italy in regulating circulation, through the purchase or sale of gold and through intervention in the exchange market, to hold the fluctuations of Italian currency in relation to exchange on foreign countries in which bank notes are convertible into gold within the limits prescribed in the following article.

## ARTICLE 4

The limits of the gold export and import points in relation to the gold parity established in article 1 of royal decree law of December 21, 1927, No. 2325, shall be fixed in a royal decree to be issued on the motion of the Minister of Finance, after hearing the council of ministers and the director general of the Bank of Italy.

## ARTICLE 5

The present decree shall take effect on the day following that of its promulgation. \* \* \*

Given at Rome, February 26, 1928, sixth year.

VICTOR EMANUEL.  
MUSSOLINI.  
VOLPI.

## FIXING THE LIMITS OF THE GOLD POINTS

[Royal decree law, February 26, 1928, No. 253]

Under the royal decree law of December 21, 1927, No. 2325, concerning convertibility of notes of the Bank of Italy into gold, under the royal decree of February 26, 1928, No. 252, which gives the regulations for conversion of notes of the Bank of Italy into gold or into exchange on foreign countries in which bank notes are convertible into gold, after hearing the council of ministers and the director general of the Bank of Italy, upon motion by our minister, the Secretary of State for Finance, we (Victor Emmanuel III) have decreed and do hereby decree:

## ARTICLE 1

The limits of the gold export and import points in relation to gold parity shall be fixed on the following basis: 19.10 lire per dollar for export and 19.80 lire for import.

## ARTICLE 2

The present decree shall become effective on the day following that of its promulgation. \* \* \*

Given at Rome, February 26, 1928, sixth year.

VICTOR EMANUEL.  
MUSSOLINI.  
VOLPI.

## ARRANGEMENTS CONCLUDED BETWEEN THE ROYAL TREASURY AND THE BANK OF ITALY, UNDER ROYAL DECREE OF DECEMBER 21, 1927, No. 2325

[Royal decree of June 17, 1928, No. 1377]

Under the royal decree law of December 21, 1927, No. 2325, and the law governing banks of issue, approved by royal decree of April 28, 1910, No. 204, and amendments thereto, after hearing the director general of the Bank of Italy and the council of ministers, upon motion by our minister, the Secretary of State for Finance, acting with the Prime Minister and Head of the Government, and with the Minister of Justice and Public Worship, under the authorization conferred on the Government by article 5 of royal decree law of December 21, 1927, No. 2325, we (Victor Emmanuel III) have decreed and do hereby decree:

## ARTICLE 1

The circulation of notes of the Bank of Italy shall be so regulated as always to fulfill the requirement in article 4 of the royal decree law of December 21, 1927, No. 2325, that at all times a reserve shall be maintained in gold or in exchange and credits on foreign countries in which bank notes are convertible into gold, of not less than 40 per cent of the amount of the notes outstanding and all other demand liabilities of the bank. Should the reserve fall below 40 per cent of the circulation the uncovered portion of the latter, if not in excess of 10 per cent, shall be subject to a tax equal to the official discount rate increased by one-tenth. This tax shall be further increased by one additional tenth of the ruling bank rate for each subsequent fall of 10 in the percentage ratio of reserve to circulation.

Agreements shall be concluded between the Minister of Finance and the Bank of Italy to avoid increases in circulation even within the limits established under the ratio fixed in said article 4 of royal decree law of December 21, 1927, No. 2325.

## ARTICLE 2

The conversion of notes of the Bank of Italy shall be regulated in accordance with article 1 of the above-mentioned royal decree law of December 21, 1927, No. 2325, and with the provisions of royal decrees No. 253 and No. 252 of February 26, 1928.

## ARTICLE 3

The average circulation of notes and drafts of the Bank of Italy, after deducting the entire amount of the reserves in gold and gold equivalents held by the bank, shall be subject to an annual tax at the rate of 1½ per mille, without further additions.

Notes issued by the bank for advances to the treasury, in accordance with the following article (4), shall be tax exempt.

## ARTICLE 4

The Bank of Italy, at the request of the Minister of Finance, shall furnish temporary advances to the treasury up to an amount of 450,000,000 lire, upon which interest shall be payable at the rate of 2 per cent net per annum. Notes put into circulation for such advances shall be secured by reserve to the amount of at least 40 per cent. All provisions authorizing the State treasury to demand extraordinary advances and through such advances additional bank notes are hereby repealed.

## ARTICLE 5

The provisions of the law of April 28, 1910, limiting holdings of the Bank of Italy in securities issued or guaranteed by the State, are hereby repealed. The repeal of the royal decree law of November 23, 1914, No. 1284, which repeal was later enacted into the law of April 30, 1916, No. 528, regarding the amount of interest-bearing deposits and the rate of interest thereon, is hereby confirmed.

## ARTICLE 6

In connection with its services to the royal treasury in the Provinces, the Bank of Italy shall not be required to give sureties. Relations between the treasury and the bank in respect to the performance of such services shall be governed by a special convention.

For the performance of regular treasury services, the treasury shall maintain on deposit with the bank a permanent balance of 50,000,000 lire. Whenever this balance exceeds or falls below 50,000,000 lire by any amount up to a maximum of 300,000,000, an annual interest of  $1\frac{1}{2}$  per cent net of any tax on the excess or deficiency shall be charged to the bank or to the treasury, as the case may be.

Apart from this working balance, representing a current account available on demand and, therefore, to be covered by a reserve of not less than 40 per cent, the treasury may maintain at the bank a separate fund as a fixed deposit. On the combined balances in these two accounts up to a maximum of 500,000,000 lire interest at the rate of  $1\frac{1}{2}$  per cent per annum shall be paid. On any excess over the 500,000,000 lire interest shall be paid at the rate of 3 per cent per annum.

## ARTICLE 7

The Bank of Italy may convert its gold-exchange reserves into actual gold reserves.

When the position of the bank and the general conditions of the monetary market permit, the Bank of Italy is also authorized to reduce its own circulation of notes by prudent liquidation of a portion of its gold-exchange reserves.

Profits arising from investment of the reserves shall be divided between the State and the bank, under special convention in accordance with article 7 of royal decree law of December 21, 1927, No. 2325.

## ARTICLE 8

The provision of article 4, subsection (b), of royal decree law of September 27, 1923, No. 2158, remains in force; it is understood that it is applicable also to the newly issued shares of the Bank of Italy.

## ARTICLE 9

Notes outstanding representing credit extended by the Bank of Italy to the Istituto di Liquidazioni, and the securities issued by the latter are subject to circulation tax at the regular rate, but the equivalent of the tax shall be refunded to the bank by the Istituto di Liquidazioni.

In accordance with the provisions of article 2 of royal decree law of January 2, 1923, No. 4, article 5 of royal decree law of September 27, 1923, No. 2158, and article 3, subsection (c), of royal decree law of November 6, 1926, No. 1832, three-fourths of the total proceeds of the circulation tax shall be set aside until the end of the year 1930.

Article 3 of royal decree law of November 6, 1926, No. 1832, remains in force as regards subsections (a), (b), and (c).

Profits on the securities issued by the Istituto di Liquidazioni shall accrue to the istituto itself, while the state is guarantor to the Bank of Italy for the liabilities of that institution. Bank notes actually paid in to the Bank of Italy as a result of operations of the Istituto di Liquidazioni reduce the total note circulation.

## ARTICLE 10

The provision of article 2 of royal decree law of June 10, 1921, No. 736, and of article 2 of royal decree law of March 5, 1925, No. 258, are repealed in so far as they affect the Bank of Italy.

The provisions of articles 6 and 7 of the law approved by royal decree of April 28, 1910, No. 204; the royal decrees of August 4, August 13, and November 23, 1914, Nos. 791, 825, and 1284; and the royal decree law of September 7, 1926, No. 1506, are likewise repealed, as are all other provisions in respect to the bank of issue which may be inconsistent with the present decree.

## ARTICLE 11

The present decree becomes effective as from January 1, 1928.

We order that the present decree, bearing the seal of the state, be included in the official collection of laws and decrees of the Kingdom of Italy, enjoining on all whom it may concern to observe it and to see that it is observed.

Given at San Rossore, June 17, 1928, sixth year.

<sup>1</sup> Based on noon buying rates for cable transfers in New York as certified to the Treasury by the Federal Reserve Bank of New York, in pursuance of the provisions of sec. 522 of the tariff act of 1922. For back figures see BULLETIN for January, 1928, pp. 56-62.

\* Effective June 25, 1928.

\* Averages based on daily quotations of closing rates as published by New York Journal of Commerce.

\* Nominal.

\* Silver currency. Parity represents gold value of unit in 1913 computed by multiplying silver content of unit by New York average price of silver for 1913. This average price was \$0.61241 per fine ounce, which compares with an average price of \$0.59191 for August, 1928, \$0.59525 for July, 1928, and \$0.55029 for August, 1927. The corresponding London prices (converted at average rate of exchange) were \$0.59239, \$0.59710, and \$0.55220.

<sup>1</sup> New index—1926=100.<sup>2</sup> First of month figures.<sup>3</sup> New official index.

NOTE.—These indexes are in most cases published here on their original bases, usually 1913 or 1914, as determined by the various foreign statistical offices which compile the index numbers and furnish them to the Federal Reserve Board. In several cases, however, viz, France, Netherlands, Japan, New Zealand, and South Africa, they have been recomputed from original bases (1901-1910; 1910-1910; October, 1900; 1909-1913; 1910) to a 1913 base. Index numbers of commodity groups for most of the countries are also available in the office of the Division of Research and Statistics and may be had upon request. Further information as to base periods, sources, numbers of commodities, and the period of the month to which the figures refer may be found on pages 769-770 of the BULLETIN for November, 1927.

## RULINGS OF THE FEDERAL RESERVE BOARD

**Liability incurred by a member bank through issuance of cashier's check for Federal reserve exchange purchased.**

The Federal Reserve Board has recently been asked to pass upon the question whether the liability incurred by a member bank through the issuance of its cashier's check for Federal reserve exchange purchased creates a deposit liability or a liability for money borrowed. The transaction out of which the inquiry arose may be described as follows:

A member bank which is temporarily short in its reserves arranges with another member bank having a temporary excess in reserves for the use of a stipulated amount of Federal reserve credit, for one day or more, as may be agreed upon. The bank purchasing the credit either gives its cashier's check to the selling bank, to be held for one day or more, as the case may be, or, dispensing with the formality of issuing a cashier's check, authorizes the selling bank to clear a ticket for the amount through the clearing house settlement on the day agreed upon, and the selling bank either gives its draft on the Federal reserve bank to the buying bank or arranges with the Federal reserve bank to transfer on the Federal reserve bank's books the stipulated amount from the account of the selling bank to the account of the buying bank. The question arises whether the liability thus created should be carried on the books of the buying bank as "money borrowed" or as "cashier's checks outstanding."

The transaction above described clearly is a temporary loan intended for the purpose of avoiding the necessity of rediscounting with the Federal reserve bank or showing a deficiency in reserves, and the resulting liability clearly should be treated as money borrowed. In using Federal Reserve Board Form 105, as revised May 21, 1928, it should be carried as a liability under item 30, "Bills payable, including all obligations representing money borrowed other than rediscounts," and on the reverse side of the form it should be carried under the main heading "Bills payable and rediscounts," and under item 3 thereof, "Advances received on other instruments given for the purpose of borrowing money."

**Balances in foreign branches of American banks carried in foreign currency but repayable in dollars**

The question has been presented to the Federal Reserve Board whether a deposit of 100,000

pounds sterling made by a member bank, in the London branch of a New York City bank, which is repayable at the end of 90 days in dollars at a rate of exchange already determined may be considered as a balance due from a bank and therefore deductible from balances due to banks in computing the amount against which reserves must be maintained by the bank making such deposit.

The board has previously ruled that deposits in foreign branches of American banks which are payable in dollars may be considered as balances due from banks and, therefore, are deductible, but that deposits in foreign branches of American banks payable in foreign currency may not be considered as balances due from banks and, therefore, are not deductible. (FEDERAL RESERVE BULLETIN, July, 1925, p. 483.) Although the balances in question will be payable in dollars at the end of 90 days at a rate of exchange already determined and the depositing bank knows exactly how many dollars will be due to it at the end of 90 days, such deposit is created as a deposit in pounds sterling and will not become payable in dollars until the expiration of the 90 days. In applying the above-cited ruling, therefore, such a deposit should be treated as a foreign currency balance which is not deductible until the end of the 90 days, when it will become payable in dollars and will be deductible.

There is another and more important reason why this balance can not properly be treated as a balance due from banks and is not properly deductible from balances due to banks. The provision of section 19 of the Federal reserve act which authorizes the deduction of balances due from banks from balances due to banks in computing reserves is based upon the theory that balances due from banks are available for the purpose of meeting withdrawals, and therefore may properly be offset against balances due to banks; whereas the balance in question is not payable until the end of 90 days and could not be used for this purpose. In the board's opinion, therefore, such a balance is not a balance "due" from a bank either within the letter or the purpose of section 19.

The board rules, therefore, that the balance in question can not properly be treated as a balance due from a bank and can not be deducted from balances due to banks in computing reserves.

## LAW DEPARTMENT

## Amendment to Federal Reserve Board's Regulation K

The Federal Reserve Board on August 3, 1928, amended Section IV of its Regulation K, Series of 1928, which has to do with the titles of corporations organized under section 25 (a) of the Federal reserve act, so as to read as follows:

## SECTION IV. TITLE

Inasmuch as the name of the Corporation is subject to the approval of the Federal Reserve Board, a preliminary application for that approval should be filed with the Federal Reserve Board on F. R. B. Form 150, which is made a part of this regulation. This application should state merely that the organization of a Corporation under the proposed name is contemplated and may request the approval of that name and its reservation for a period of 30 days. The title of every such Corporation shall include the word "foreign" or the word "international." No Corporation will be permitted to have the word "bank" as a part of its title. So far as possible the title of the Corporation should indicate the nature or reason of the business contemplated and should in no case resemble the name of any other corporation to the extent that it might result in misleading or deceiving the public as to its identity, purpose, connections, or affiliations.

## New handbook of Federal reserve system

As announced on page 449 of the July BULLETIN, the Federal Reserve Board has in course of preparation a new edition of its Digest of Rulings which constitutes a complete and convenient handbook of the Federal reserve system and the national banking system. The final proof of this book has been sent to the printer, and it should be ready for distribution within the next 30 days.

As explained in the previous announcement, this book has been brought up to date and its scope has been broadened to include not only a complete digest of the published rulings of the Federal Reserve Board but also the text of the Federal reserve act, the national bank act, all related acts, and the instructions and regulations of the Comptroller of the Currency. The scope of the book is indicated by its table of contents, which is as follows:

	Page
Directory of the Federal Reserve Board and the Federal reserve banks.....	v
Preface.....	vii
Subject analysis of rulings of the Federal Reserve Board and related matters published in the Federal Reserve Bulletin, May, 1915, to December 31, 1927, inclusive, arranged according to sections of the Federal reserve act, the Clayton Antitrust Act, the national bank act, revenue acts of 1917-18, and the World War adjusted compensation act.....	xi
Digest of rulings.....	1

	Page
Regulations of the Federal Reserve Board in effect January 3, 1928.....	125
Federal reserve act as amended to February 25, 1927.....	199
Appendix to Federal reserve act, containing related acts.....	266
National bank act as of March 1, 1927.....	291
Instructions of the Comptroller of the Currency relative to the organization and powers of national banks, 1928.....	389
Regulations of the Comptroller of the Currency further defining the term "investment securities" as used in the act approved February 25, 1927.....	545
Federal reserve act as originally enacted December 23, 1913.....	547
Summary of all amendments to Federal reserve act, through February 25, 1927.....	579
Textual changes made in Federal reserve act by all amendments through February 25, 1927.....	599
Map of the Federal reserve system.....	642
Tables:	
(a) Table of rulings in the order published in the Federal Reserve Bulletin, with citations to their numbers appearing in this digest.....	643
(b) Table showing the places in the Federal Reserve Bulletin where the text of the various regulations and circulars of the Federal Reserve Board have been published from time to time.....	646
(c) Table showing sections of the Revised Statutes as contained in the national bank act.....	647
Index.....	649

The Digest of Rulings states in brief and concise form the substance of the published rulings and opinions which have interpreted the various provisions of the Federal reserve act and other laws affecting the Federal reserve system. It states the opinions and conclusions reached in sufficient detail to make it unnecessary in most cases to refer to the full text of the rulings as published in the BULLETIN. Citations to the volume and page of the BULLETIN containing the full text of the original rulings are furnished, however, for the convenience of those who desire to know the reasons for the conclusions stated in the rulings.

The usefulness of the book is greatly enhanced by a new general index covering everything in the book, which is very complete and which will enable the user to find readily all the authorities on the point for which he is searching, whether it be contained in the Federal reserve act, the acts supplementary and relative thereto, the national bank act, the regulations of the board, the published rulings of the Federal Reserve Board, or the instructions and regulations of the Comptroller of the Currency.

The text of the book proper covers 647 pages, the general index 124 pages, and the entire book

774 pages. It will be bound in durable buckram and the price is \$2 per volume. Orders are now being received by the Federal Reserve Board.

### Changes in State Bank Membership

The following list shows the changes affecting State bank membership during the month ended August 21, 1928, on which date 1,237 State institutions were members of the system:

No admissions.

#### CHANGES

	Capital	Surplus	Total resources
<b>District No. 1</b>			
Fidelity Trust Co., Portland, Me., (voluntary withdrawal).....	\$400,000	\$400,000	\$20,705,681
<b>District No. 2</b>			
The Municipal Bank of Brooklyn, N. Y.: Title changed to Municipal Bank & Trust Co. of Brooklyn. Franklin Bank and Trust Co., New- ark, N. J., has absorbed the Wash- ington Trust Co., Newark, N. J., nonmember, and changed its title to Franklin-Washington Trust Co.....	1,000,000	400,000	11,144,840
<b>District No. 4</b>			
Woodlawn Trust Co., Woodlawn, Pa.: Now Woodlawn Trust Co., Ali- quippa, Pa.			
<b>District No. 5</b>			
Nicholson Bank & Trust Co., Union, S. C. (voluntary withdrawal).....	200,000	200,000	2,141,141
<b>District No. 11</b>			
First State Bank, White Deer, Tex. (absorbed by First National Bank of White Deer, Tex.).....	25,000	5,000	197,489
American Trust & Savings Bank, El Paso, Tex. (voluntary liquidation)...	300,000	50,000	2,190,800
First State Bank & Trust Co., Snyder, Tex., has absorbed the First national Bank of Snyder.....	60,000	40,000	627,520

#### Acceptances to 100 Per Cent

The following member institutions have been authorized by the Federal Reserve Board to accept drafts and bills of exchange up to 100 per cent of their capital and surplus: Merchants National Bank, Mobile, Ala.; Citizens & Southern National Bank, Savannah, Ga.; United States National Bank, Galveston, Tex.

### Fiduciary Powers Granted to National Banks

During the month ended August 21, 1928, the Federal Reserve Board approved applications of the national banks listed below for permission to exercise one or

more of the fiduciary powers named in section 11 (k) of the Federal reserve act as amended, as follows: (1) Trustee; (2) executor; (3) administrator; (4) registrar of stocks and bonds; (5) guardian of estates; (6) assignee; (7) receiver; (8) committee of estates of lunatics; (9) in any other fiduciary capacity in which State banks, trust companies, or other corporations which come into competition with national banks are permitted to act under the laws of the State in which the national bank is located.

Location	District No.	Name of bank	Powers granted
Gloucester, Mass.	1	Gloucester National Bank.....	1 to 9
Manchester, N. H.	1	Amoskeag National Bank.....	1 to 9
Ellenville, N. Y.	2	First National Bank.....	1 to 9
New York, N. Y.	2	Industrial National Bank.....	1 to 9
Trenton, N. J.	3	Prospect National Bank.....	1 to 9
Dayton, Ohio	4	The City National Bank.....	1 to 7 and 9
Mount Airy, N. C.	5	First National Bank.....	1 to 9
Anderson, S. C.	5	Carolina National Bank.....	1 to 9
Clifton Forge, Va.	5	Clifton Forge National Bank.....	1 to 9
St. Petersburg, Fla.	6	First National Bank.....	1 to 9
Columbus, Ga.	6	Fourth National Bank.....	1 to 9
Lafayette, La.	6	Commercial National Bank.....	1 only
Osmond, Nebr.	10	First National Bank.....	1 to 9
Chanute, Kans.	10	do.....	1 to 9
Cody, Wyo.	10	do.....	1 to 9
San Antonio, Tex.	11	Groos National Bank.....	1 to 9

<sup>1</sup> Supplemental.

### Changes in National Bank Membership

The Comptroller of the Currency reports the following increases and reductions in the number and capital of national banks during the period from July 21 to August 24, 1928, inclusive:

	Num-ber of banks	Amount of capita
New charters issued.....	11	\$3,250,000
Restored to solvency.....	0	0
Increase of capital approved <sup>1</sup> .....	15	3,035,000
Aggregate of new charters, banks restored to solvency, and banks increasing capital.....	26	6,285,000
Liquidations.....	18	1,205,000
Reducing capital.....	5	400,000
Total liquidations and reductions of capital.....	23	1,605,000
Consolidation of national banks under act of Nov. 7, 1918.....	2	950,000
Consolidation of a national bank and a State bank under act of Feb. 25, 1927.....	2	275,000
Total consolidations.....	4	1,225,000
Aggregate increased capital for period.....		6,285,000
Reduction of capital owing to liquidations, etc.....		1,605,000
Net increase.....		4,680,000

<sup>1</sup> Includes one reduction in capital of \$50,000 incident to a consolidation under act of Nov. 7, 1918, and one reduction of \$25,000 incident to a consolidation of a State bank under act of Feb. 25, 1927.

<sup>1</sup> Exclusive also of certified and cashiers' or treasurers' checks outstanding.<sup>2</sup> Combined excess of amounts due to banks over amounts due from banks as shown by individual bank reports. When for a given bank amounts due from banks exceed amounts due to banks, the excess due from can not be deducted in determining deposits on which reserves are computed, and for this reason amounts in this column do not agree with the difference between aggregate amounts due to banks and due from banks. In this calculation the amounts due to banks include due to Federal reserve banks, bankers, and trust companies, and certified and cashiers' or treasurers' checks outstanding, and amounts due from banks include items with Federal reserve banks in process of collection, amounts due from banks, bankers, and trust companies, and exchanges for clearing house, also checks on other banks in same place.<sup>3</sup> Deficiencies in reserves indicated by a minus (-) sign.
