## FEDERAL RESERVE BULLETIN

VoL. 24
SEPTEMBER, 1938
No. 9

## REVIEW OF THE MONTH

Since the beginning of April member bank reserves have increased by about $\$ 850,000,000$

## Increase in member bank reserves

 as a consequence of disbursements by the United States Treasury of funds held on deposit with Federal Reserve banks. Reserves in excess of requirements during the period increased by about $\$ 1,400,000,000$, of which $\$ 750,000,000$ resulted from the reduction in reserve requirements by the Board of Governors the middle of April. By the middle of July excess reserves had increased to $\$ 3,150,000,000$, close to the high level of August 1936. They subsequently declined somewhat and on August 24 amounted to $\$ 2,980$,000,000 . Fluctuations in member bank reserves and in Treasury balances with the Reserve banks are shown in the charts on page 760.Treasury balances with the Reserve banks, which were increased on April 14 by $\$ 1,400$,000,000 as the result of the release of inactive gold by the Treasury, were rapidly drawn down until the middle of July, largely for the retirement of $\$ 800,000,000$ of Treasury bills. In the following four weeks current receipts, including proceeds from the sale of Reconstruction Finance Corporation notes and Treasury bills, exceeded disbursements and Treasury balances increased by $\$ 200$,000,000 , with a consequent reduction in excess reserves. In the latter part of August expenditures were again larger than receipts, Treasury balances declined somewhat, and excess reserves increased.

The principal factor in the variations in Treasury deposits at the Reserve banks since April has been changes in the amount of outstanding Treasury bills, which was reduced by $\$ 800,000,000$ from April 27 to July 20 and increased by $\$ 250,000,000$ in the 5 weeks ending August 24. There have been, however,
other important Treasury receipts and expenditures. For the entire period from April 1 to August 24, net disbursements by the Treasury on account of the excess of current budget expenditures over receipts were large, amounting to about $\$ 1,000,000,000$, reflecting in part increased disbursements for relief. Payments for the purchase of gold amounted to about $\$ 250,000,000$ in the period. These expenditures were partly offset by net cash receipts from other Treasury transactions, including about $\$ 350,000,000$ of net proceeds from the sale of notes of the Commodity Credit Corporation and the Reconstruction Finance Corporation, about $\$ 150,000,000$ from United States savings bonds, about $\$ 200,000,000$ of net receipts for the unemployment trust fund under the Social Security Act, and the return to the Treasury of about $\$ 250,000,000$ from Treasury deposits with commercial banks.
Treasury expenditures from its balances with the Reserve banks this year have resulted in some increase in

## Recent banking developments

 bank deposits, as well as in bank reserves. Deposits at city banks are now at the highest level in over a year. The increase in bank deposits has been accompanied by a further decline in the turnover of deposits, i.e., in the rate at which they are used. At the present time the country's volume of demand deposits, as well as of total deposits including time accounts, is near the all-time peak reached at the end of 1936, while the turnover of these deposits is at the slowest rate on record.Although reserves and deposits of banks have increased, total loans and investments declined until July. Retirement of United States Government short-term obligations reduced the supply of securities available to banks, and bank loans to commerce and industry continued to decline as the result of
reduced business activity and curtailment of inventories. In recent weeks there have been small increases in loans and investments of member banks in leading cities. While their holdings of direct obligations of the United States Government have declined somewhat, total investments increased through purchases of Government guaranteed obligations and of other securities. Brokers' loans increased slightly in August, and commercial loans, which had declined sharply from last October, have also shown small increases.

New call report figures as of June 30 show that while city banks have increased their holdings of investments since last autumn, country banks investments have been further reduced. At city banks loans have declined sharply until recent weeks. At country banks loans have been relatively stable. A drop in deposits at city banks last year has been followed by an expansion, whereas at country banks deposits have declined this year. Reserve balances of city banks have increased, but country banks have shown little change in their reserves, preferring to build up their deposits with city correspondents, which were already exceptionally large. Tables that show these developments are presented on pages 782-783.

A chart of selected items from the aggregate balance sheets of country member banks since the end of 1934 is given below. The largest

Developments at country banks
recent change on the chart is a decline of $\$ 430,000,000$ in investment holdings from June 1937 to June 1938. About $\$ 190,000,000$ of this decline was in holdings of United States Government obligations, most of which has occurred since last March in holdings of Treasury notes and of issues guaranteed by the Government. The remaining $\$ 240,000,000$ represents the reduction in holdings of other securities, principally those of public utilities and railroads.

Total loans of country banks showed little net change during the first half of 1938. They had increased substantially during 1937 and
in some areas had begun to pick up as early as 1935. These developments are brought out by the chart on the next page, in which the twelve Reserve districts are grouped into three broad geographical regions with (1) Boston, New

York, and Philadelphia classified as Northeastern districts, (2) Richmond, Atlanta, St. Louis, and Dallas as Southern districts, and (3) the rest of the country as the Central and Western districts. The chart is plotted on a ratio scale so that equal vertical distances represent equal percentage changes.

Following the general decline during the depression, loans to customers by country banks began to increase in the Central and Western districts in the spring of 1935 . Elsewhere, however, country bank loans declined further. By the spring of 1936 the expansion had spread to the Southern districts, but in the Northeastern districts the decline continued until last year.

Loans on real estate were the only class of
loans to show an increase at country banks this year. Increases occurred in all Federal Reserve districts except Boston. Owing chiefly to the rise at country banks, real estate loans at all member banks are now about $\$ 310,000,000$ larger than in the spring of 1936

LOANS TO CUSTOMERS AT COUNTRY MEMBER BANKS

Total loans of country banks, excluding brokers' loans and purchased paper, plotted on ratio scale. Federal Reserve districts grouped as follows: Northeastern districts-Boston, New York, Philadelphia; Central and Western districts-Cleveland, Chicago, Minneapolis, Kansas City, San Francisco; Southern districtsRichmond, Atlanta, St. Louis, Dallas.
and amount to $\$ 2,600,000,000$. The increase at country banks is more than twice as large as that of all other member banks and practically all of it is in loans on non-farm real estate.

The volume of adjusted demand deposits (which exclude interbank balances, United States Government deposits, and items in process of collection) declined substantially at country banks in the first half of 1938, after showing little change during the previous
year. The decline was larger than the usual seasonal amount, being $\$ 230,000,000$ or nearly 4 percent. Each Federal Reserve district shared in this decrease, and the largest percentage decreases were in those districts that usually show the greatest seasonal drop. Time deposits at country banks have shown little change this year, after increasing steadily since the early part of 1933.

Country banks have continued to be well supplied with funds for lending and investment. Since June of last year they have built up their balances with city correspondents by approximately $\$ 250,000,000$, of which about a third represents the transfer from the Reserve banks of part of the reserve balances set free when reserve requirements were reduced last April. Country bank balances with city correspondents on June 30 amounted to $\$ 1,800,000,000$, which was not much below the all time peak of $\$ 1,930,000,000$ in December 1936 and about double the pre-depression volume. In addition to their large correspondent balances country banks now hold close to $\$ 500,000,000$ of excess reserves with the Federal Reserve banks.

Partly as a result of the building up of country bank balances with city banks, all of the additional bank reserves that have recently been supplied by the Treasury have been acquired by city banks. Excess reserves of city banks have accordingly been increased by these additions to total reserves as well as by the reduction in reserve requirements in April.

Notwithstanding this growth in excess reserves, total loans and investments declined further during the first half of 1938 at banks both in New York and in 100 other leading cities. During July and August they increased somewhat. As shown by the following chart, United States Government obligations held by city banks have increased this year and have recently been larger than at any time since the spring of 1937. Their loans, however, declined steadily until August. The
increase in holdings of Government securities was chiefly at New York City banks, which toward the close of August held about \$380,000,000 more of Government direct and fully guaranteed obligations than they did in September 1937, the low point of their holdings for the last three years. Present holdings of New York City banks are still about $\$ 1,000$,000,000 less than the maximum amount they held in the summer of 1936 .
banks in 101 Leading cities

Latest figures for August 17. Commercial loans based on new classification beginning May 19, 1937.

During the period from March 7 of this year to June 30, the latest two call dates, banks in New York and other leading cities increased their holdings of Treasury bonds and of obligations guaranteed by the Government. They reduced holdings of Treasury notes and Treasury bills. These changes reflected the Treasury's retirement of a substantial volume of bills and the refunding of Treasury notes into bonds. Outstanding securities carrying the Government guarantee were increased in the period with the issuance of notes by the Commodity Credit Corporation. The following table shows the changes
in Government security holdings by types of issue and classes of member banks between March 7 and June 30, 1938.

Loans of city banks, which had increased rapidly from early in 1936 to the autumn of 1937, subsequently declined by about $\$ 2,000$,000,000 or by 20 percent, to approximately the low levels of 1935. About $\$ 700,000,000$ of this decline represents loans that security brokers and dealers repaid to New York City banks during the period of sharply declining stock prices last year and the first quarter of this year. More recently brokers' loans have remained comparatively stable notwithstanding a recovery in stock prices.

Most of the decline in loans at city banks has been in commercial loans, which declined steadily from the middle of last October through the first week of July. The decline amounted to about $\$ 450,000,000$ in New York City and about $\$ 510,000,000$ in 100 other leading cities. Outside of the Southern Federal Reserve districts of Richmond, Atlanta, and Dallas, declines in commercial loans were common to most of the large cities. Early in July the contraction in commercial loans appears to have ceased. Small increases were reported at many leading cities outside New York early in July and moderate increases occurred in New York City during the first half of August. In part this reflects seasonal
influences that usually bring a resumption in commercial borrowing at city banks during the third quarter of the year.

Although total loans and investments have decreased at city banks this year, demand deposits have increased. Drafts on deposits by customers of city banks to repay loans have been exceeded by deposits derived from Treasury expenditures out of balances at the Federal Reserve banks. At banks in 101 leading cities, the volume of adjusted demand deposits during the first half of August, as shown by the chart, was about $\$ 600,000,000$ larger than the average for the first quarter of the year and about $\$ 500,000,000$ below the peak level reached at the end of 1936.

Accompanying the increase in demand deposits at city banks during recent months there has been a notable

## Decline in turnover of deposits

 slowing down in the rate at which these deposits are utilized. This rate of turnover, or the velocity of deposits, represents the ratio of the amount of checks drawn against deposits over a period to the average volume of deposits during the same period.During the three years 1935-1937, demand deposits at New York City banks, exclusive of interbank deposits and United States Government deposits, turned over at an average rate of about 30 times per annum. From February through July of this year the average rate was about $251 / 2$ times per annum, a decline of 15 percent. In the other 100 leading cities there was a comparable reduction, the average rate from February through July being $191 / 2$ times per annum as compared with an average of 22 times per annum during the previous three years. In 1926, a comparatively normal pre-depression year, demand deposits turned over at the rate of about 80 times a year at banks in New York City and about 36 times at banks in other leading cities. The lower level of deposit turnover in recent years, especially at New York City banks, has reflected on the one hand the lower level of security market and general business
activity and on the other hand an accumulation in city banks of a large volume of idle balances awaiting investment or other uses.

## Appointment of Deputy Chairman at Federal Reserve Bank

On August 22, 1938, the Board of Governors of the Federal Reserve System appointed R. B. Caldwell, a Class C director of the Federal Reserve Bank of Kansas City, as Deputy Chairman of the bank for the remainder of the current year.

## Annual Report

The complete edition of the Annual Report of the Board of Governors for 1937 is now available. This edition includes the text of the report and the record of action on questions of policy by the Board of Governors and by the Federal Open Market Committee, which were available earlier this year in the brief edition of the Annual Report, and in addition contains the usual statistical tables and other matter of record usually published in the complete edition.

## Revised Quotations of Netherlands Private Discount

 RateIn recent months a considerable divergence has appeared between the quotations of the private discount rate in Amsterdam published by the Rotterdamsche Bankvereeniging and by the Frankfurter Zeitung, which have been the basis of quotations published in the Federal Reserve Bulletin. In the future, quotations will be based on information furnished by De Nederlandsche Bank, which has supplied the following table of figures for the period since January 1936:

## NATIONAL SUMMARY OF BUSINESS CONDITIONS

[Compiled August 23 and released for publication August 25]

Industrial activity increased in July, when there is usually a considerable decline, and rose somewhat further in the first three weeks of August.

Production.- Volume of industrial production increased from 77 percent of the 19231925 average in June to 83 percent in July, according to the Board's index which is adjusted for changes in the number of working days and for usual seasonal variations. Steel

Monthly index of physical volume of production, adjusted for seasonal variation, 1923-1925 average $=100$.
output rose sharply, lumber production also increased, and output of cement and glass was maintained. Automobile production declined somewhat further. In the first three weeks of August activity at steel mills was at a rate of around 40 percent of capacity as compared with an average of 35 percent in July, while in the automobile industry there was more than the usual seasonal reduction in output as producers closed plants somewhat earlier than in other recent years to prepare for the shift to new model production.

At textile mills activity in July showed a further rise, marked increases being reported in mill consumption of cotton and wool and in shipments of rayon yarn. Shoe production also increased substantially, following a decline in June.

Bituminous coal production advanced some-
what in July, and output of crude petroleum was at a much higher rate, reflecting chiefly a return to production on a six-day week basis in Texas. Anthracite production decreased sharply following a considerable volume of output during May and June.

Value of construction contracts awarded in 37 Eastern States showed little change from June to July, according to figures of the F. W.

Three-month moving averages of F. W. Dodge data for value of contracts awarded in 37 Eastern States, adjusted for seasonal variation. Latest figures based on data for June and July and estimate for August.
Dodge Corporation. Contracts for residential building continued to increase, and there was an increase also in commercial building, reflecting the award of a contract for a large office building. Factory construction remained at a low level and declines were reported in most other types of construction.
Employment.-Factory employment and payrolls, which usually decline at this season, increased somewhat from the middle of June to the middle of July. There were substantial increases in the number employed at textile mills, clothing establishments, and shoe factories, and at railroad repair shops there was a slight increase. In the machinery and automobile industries employment declined somewhat further. In non-manufacturing industries the principal changes in employment were a decrease at mines and an increase on the railroads.

Agriculture.-A domestic cotton crop of $12,000,000$ bales was indicated on August 1 , according to the Department of Agriculture. Last season the crop was $19,000,000$ bales and, with world consumption of American cotton about $11,000,000$ bales, the carryover increased sharply to $13,500,000$ bales. The wheat. crop was forecast at $956,000,000$ bushels, as compared with $874,000,000$ bushels harvested last year and usual domestic consumption of about $670,000,000$ bushels. Production estimates for most other major crops were slightly under the large harvests of a year ago. Preliminary estimates by the Department of Agriculture indicate that cash farm income, including Government payments, will total $\$ 7,500,000,000$ for the calendar year 1938, a decline of 12 percent from last year, which was the highest since 1929.

Distribution.-In July department store sales declined by less than the usual seasonal amount, while sales at variety stores and mailorder houses decreased seasonally. Retail sales of automobiles increased somewhat, although there is ordinarily a decline in July. In the first half of August sales at department stores showed less than the usual seasonal rise.

Freight-car loadings increased from June to July, reflecting chiefly larger shipments of grain, coal, and miscellaneous freight.

Commodity prices.-Prices of grains, cotton, livestock, and meats were lower in the

Indexes compiled by United States Bureau of Labor Statistics $1926=100$. By weeks, January 6, 1934, to Aug. 20, 1938.
third week of August than in the middle of July, while prices of most industrial commodities were unchanged. Steel scrap advanced further in July, then declined somewhat in the first half of August. Cotton grey goods also declined in the early part of August, while prices of copper and rubber were maintained, following increases in the latter part of July.

Bank credit.-Excess reserves of member banks declined by about $\$ 230,000,000$ in the five weeks ending August 17 to a total of $\$ 2,930,000,000$, following a steady growth from the middle of April to a peak on July 13.

Wednesday figures of estimated excess reserves for all member banks and for selected New York City banks, January 3, 1934, to August 24, 1938.

The decline in reserves was largely the result of an increase in Treasury deposits with the Reserve banks, reflecting receipts from weekly Treasury bill offerings in excess of maturities and a sale of Reconstruction Finance Corporation notes. Most of the decrease in excess reserves was at city banks.

Following substantial declines since the autumn of last year, commercial loans and brokers' loans at reporting member banks in 101 leading cities increased somewhat during the first half of August. Member banks in leading cities added about $\$ 170,000,000$ to their holdings of investments in the middle of July, mainly United States Government guaranteed obligations, but thereafter their holdings showed little change.

## MEMBER BANK RESERVES AND RELATED ITEMS

## SUMMARY OF FINANCIAL AND BUSINESS STATISTICS

- Preliminary. PRevised. 'Partly estimated.

Does not include time deposits 1929-1934.

## LAW DEPARTMENT

## Limitation Upon Investment of Funds of a Trust in a Common Trust Fund

The Board recently considered an inquiry involving an interpretation of the following provision of section 17 (c) (5) of Regulation F :
"No funds of any trust shall be invested in a participation in a Common Trust Fund if such investment would result in such trust having an interest in the Common Trust Fund in excess of 10 per cent of the value of the assets of the Common Trust Fund, as determined by the trust investment committee, or the sum of $\$ 25,000$, whichever is less at the time of investment."
The Board stated that where the present value of the units of participation in a common trust fund which are held by a trust is $\$ 25,000$ or more, the regulation does not permit the investment of additional funds of the trust in the common trust fund, although the amount of funds of the trust previously invested therein is less than $\$ 25,000$.

## Approval of Acceptance of Trusts by National Bank

The Board recently considered an inquiry relating to the ruling published at page 440 of the Federal Reserve Bulletin for June 1938 to the effect that the directors or the appropriate committee of a national bank must approve the acceptance of trusts by the bank prior to their acceptance rather than subsequent thereto in order to comply with the following provision of section 6 (b) of the Board's Regulation F:

> "* * * The acceptance of all trusts shall be approved by the board of directors or a committee appointed by such board, and the closing out or relinquishment of all trusts shall be approved or ratified by the board of directors or a committee appointed by such board; and such committee or committees shall be composed of capable and experienced officers or directors of the bank. Any such approval or ratification shall be recorded in the minutes of the board of directors or of such committee as the case may be."

In commenting upon the considerations which prompted the incorporation of the above-quoted provision in the regulation, the Board noted that such provision conforms to the principle contained in the "Statement of

Principles of Trust Institutions", approved by the Executive Council of the American Bankers Association in 1933, to the effect that the responsibility for the investment of trust funds should not be reposed in an individual officer or employee, but all investments should be made, retained, or sold only upon the authority of a committee composed of capable and experienced officers or directors of the institution. The Board stated that the question whether or not a particular trust should be accepted by a bank is a matter of such importance that it felt that this principle of collective judgment should be applied in such a case as well as in the case of investment of trust funds, and that if such collective judgment should not be exercised until after a new trust has been accepted it might be embarrassing and in some instances impracticable for the bank to relinquish the trust.

As a matter of practical operation, attention was called to the fact that the board of directors of a bank, if it so desires, may designate a special committee for the purpose of passing on the acceptance of new trusts and it is not necessary that such committee be composed of directors of the bank. In fact, under the regulation, the committee may be composed exclusively of capable and experienced officers.
The Board stated that it considered it to be consistent with the provisions of the regulation for a new trust to be accepted by a bank upon the written approval of a majority of the members of the appropriate committee without a meeting of the committee, provided such action is promptly reported to the committee and the report incorporated in its minutes. It was stated that it was understood, of course, that at the time the acceptance is approved in writing all of the available members of the committee will be given an opportunity to pass on the acceptance. It was noted that the Board's position in this matter was similar to that taken in a ruling
published at page 391 of the Federal Reserve Bulletin for May, 1937, with reference to the actions of the trust investment committee provided for in section 6 (c) of the regulation.

It was also noted that the Board had ruled that alternates might be appointed for members of the trust investment committee and that when the regulation was amended effective December 31, 1937, a footnote containing the following statement was included: "* * * alternates appointed by the board of directors may serve in place of regular members of the committee who are unable to serve on account of vacations, illness, or other good and sufficient reasons if the minutes of the committee show the reason for the service of such alternate in place of the regular member." The Board expressed the opinion that the appointment of alternates may properly be made for the committee provided for in section $6(\mathrm{~b})$ in the circumstances described in the language just quoted.

## Settlement of Short Sale by Simultaneous Borrowing of Security

The Board recently considered a case in which a member of a national securities exchange sold short on the exchange certain securities at a price of $\$ 1000$. The buying member later agreed to accept a due bill for the securities and a check for $\$ 1000$. Pursuant to the rules of the clearing house of the particular exchange, the selling member delivered the due bill and the check to the clearing house, and the transaction was settled. As a part of the settlement, the selling member received payment for the sale in the usual manner.

The Board was asked whether Regulation $T$ would require the selling member to deposit with the buying member the usual margin on a $\$ 1000$ short sale ( $\$ 500$ under present requirements). The question was raised both as to a short sale for the selling member's own account and a short sale for the account of a customer of the selling member.

The Board expressed the view that the transaction in question might properly be considered to consist of two parts, first, a sale of securities and its completion by delivery of the securities, and second, a borrowing of securities for the purpose of effecting the delivery. It appeared that the method of settlement was such that the acceptance by the buying member of the due bill was in effect a loan of the securities for the purpose of completing delivery. It was understood that, as a practical matter, the buying member's books often would not differentiate between such a receipt of the due bill and the making of an ordinary loan of securities.

Section 6(h) of the regulation provides that:
"Without regard to the other provisions of this regulation, a creditor (1) may make a bona fide deposit of cash in order to borrow securities (whether registered or unregistered) for the purpose of making delivery of such securities in the case of short sales, failure to receive securities he is required to deliver, or other similar cases, and (2) may lend securities for such purpose against such a deposit."

Accordingly, in the circumstances cited the selling member need not deposit margin with the buying member and it is immaterial whether the sale is for the member's own account or for the account of a customer.

Advance Made in Individual Capacity by Partner of Member Firm
Section 2(b) of Regulation $T$ defines the term "creditor" to include, among others, "any member of a national securities exchange." Section 3(a) of the Securities Exchange Act of 1934, as incorporated in Regulation T, provides in part that:

[^0]In a case recently considered by the Board, $A$ and $B$ were partners of a firm which was a member firm of a national securities exchange. Transactions in the account of C, a customer of the firm, on a given day created
an excess of the adjusted debit balance of the account over the maximum loan value of the securities in the account, and, therefore, required the brokerage firm to obtain a deposit of margin. The inquiry related to an advance of cash which $A$, in his individual capacity, proposed to make to C in the amount of the required margin. If the advance were
made by A, neither his nor B's capital or drawing account would be altered.

Inasmuch as partner A is clearly a "creditor" within the meaning of that term as used in Regulation T, it is clear that such an advance which he might make to $C$ would be subject to the usual margin requirements of the regulation.

# ALL MEMBER BANKS-CONDITION ON SELECTED CALL DATES, JUNE 30, 1933, TO JUNE 30, 1938

Exclusive of mutual savings and private banks
${ }^{2}$ Federal deposit insurance did not become operative until January 1, 1934
${ }^{3}$ Includes branches of Morris Plan and industrial banks, as follows: Nonmember banks, 36 in 1933 and 36 in 1934; insured nonmember banks, 35 in 1935, 35 in 1936, and 38 in 1937; not insured nonmember banks, 3 in 1935, 3 in 1936, 2 in 1937, and 2 in 1938. Such branches heretofore have not been included in statistics on branches published by the Board.
${ }^{4}$ Separate figures not arailable for branches of insured and not insured banks.
ANALYSIS OF CHANGES IN NUMBER OF BANKS AND BRANCHES, JANUARY 1 - JUNE 30, 1938
(Figures are preliminary)

[^2]
## CUBAN CURRENCY LEGISLATION

A series of measures affecting the currency have been enacted in Cuba in recent months. Provision has been made to coin additional silver pesos and to issue further silver certificates; banks operating in Cuba are required to give as favorable treatment to accounts and transactions in Cuban currency as to those in United States and other foreign currencies; and banks operating in Cuba are required to maintain a portion of their reserves in Cuban currency. A brief résumé of these measures is given below.

A law of June 23, 1938, provides for the coinage of $20,000,000$ silver coins of one peso, which will bring the total of such coins minted since 1932 to $79,600,000$ pesos. An earlier issue of $2,800,000$ pesos of such coins was minted during 1915-16 following the enactment of the National Monetary Law of October 29, 1914. Nickel coin in small denominations to the amount of 20,000 pesos will also be minted under the present law.

The law further provides for the manufacture of $37,000,000$ pesos of silver certificates of various denominations. Five million pesos of this amount are set aside for replacement of worn or mutilated notes when required. Of the remainder, $20,000,000$ pesos are intended to be placed in circulation against the corresponding amount of new silver pesos referred to above, which will be held in vault as reserve. The remaining $12,000,000$ pesos of certificates will be used to replace in circulation an equal amount of silver coin issued before 1934. The present law increases the authorized circulation of silver certificates to $82,000,000$ pesos. The first of the issues, which occurred in 1934, is described in the Federal Reserve Bulletin for July 1934, p. 468.

Profits arising from the seigniorage on the silver peso issue will be used in part to meet the expenses incurred under the new law, including minting, engraving and printing, and the construction of a vault for storage of silver pesos in custody of the Treasury. The
remainder will be kept as a special fund which may be drawn upon for the following purposes: appropriations specified in the annual budget; monthly Government expenses of an emergency character; expenditures authorized by laws of Congress for purposes of public welfare and administration. Other items chargeable against the seigniorage are $1,000,000$ pesos for urgent needs under the budget of 1937-38.

Two executive decrees issued subsequent to the above-mentioned law are designed to maintain the value of the Cuban currency. Decree No. 1327 of June 28, 1938, calls attention to Article No. 180 of the Code of Commerce, which directs that banks shall keep in their vaults cash equal to at least 25 percent of their deposits and current accounts, and provides as follows:
"1. Deposits shall be considered to be: deposits in current and savings account; certificates of deposit; certified checks; officers' checks; letters of credit issued; and all other deposits of money, securities, or bills which can be used by banks in their active operations.
"2. The total amount of the deposits shall be ascertained by adding together all obligations detailed in the preceding section and deducting from such sum the amounts receivable on demand which each bank may have in other banking institutions located in Cuba. Overdrafts shall be considered as credits in favor of the respective banks and, consequently, shall not be deducted from deposits.
"3. The Secretary of the Treasury shall determine, periodically, and after considering the needs of the market, the proportion in which each of the various classes of currency shall compose the reserve referred to in Article 180 of the Code of Commerce.
"4. The Secretary of the Treasury shall adopt such measures as are necessary to exact of the banking institutions which operate in Cuba compliance with the provisions of this Decree, to which end he shall order made immediately by the Bureau of General Inspection of Banks of the General Accounting Office audits, inspections, and other verifications conducive to this objective."
In accordance with Section 3, the Secretary of the Treasury promulgated a Treasury Resolution on August 2, 1938, requiring banks to maintain at least 75 percent of the reserve mentioned in Article 180 of the Code of Commerce in Cuban national currency.

Decree No. 1418 of July 12, 1938, requires banks operating in Cuba to accord as favorable treatment to accounts and transactions in Cuban currency as to those in United States and other foreign currencies. The Cuban Government, local governments, and official institutions are forbidden to make deposits in banks which fail to comply with the above requirements. In order to implement the carrying out of Decree No. 1327, banks
established in Cuba are required to submit daily reports of the transactions of the previous day indicating:
"(1) The aggregate deposits according to what is established in Section Two of Decree No. 1327, of June 28, 1938, indicating the kind of currency in which said transactions have been effected.
"(2) Cash on hand, indicating the kind of currency.
"(3) Items subject to call on that day, also indicating the kind of currency."

## ALL BANKS IN THE UNITED STATES

Comprises all national banks in the continental United States and all State commercial banks, trust companies, mutual and stock savings banks and such private and industrial banks as are included in abstracts issued by State banking departments. Also includes, during the period June 1934-June 1935, private banks which, pursuant to the provisions of sec. 21 (a) of the Banking Act of 1933, submitted condition reports to the Comptroller of the Currency. Under the amended provisions of Sec. 21 (a) private banks no longer report to the Comptroller of the Currency. For comparative figures of private banks included in the figures from June 1934 to December 1935, see Federal Reserve Bulletin for December 1935, p. 883, and July 1936, p. 535. Figures for nonmember banks are for dates indicated or nearest thereto for which figures are available.

1 Prior to Dec. 31, 1935, excludes balances with private banks to the extent that they were then reported in "Other assets." Since Oct. 25, 1933, includes time balances with domestic banks which on that date amounted to $\$ 69,000,000$ and which prior to that time were reported in "Other assets."

2 Does not include cash items in process of collection reported in balances with domestic banks. Prior to Dec. 31, 1935, includes cash items on
hand but not in process of collection, amounting on that date to $\$ 16,000,000$.
"Includes "Due to Federal Reserve banks (transit account)," known as "Due to Federal Reserve banks (deferred credits)" prior to Dec. 31, 1935,
' Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935,'
less cash items reported on hand but not in process of collection
6 Ceginning June 1933 figures relate to licensed banks only.

- Ceserve city banks.
Back figurcs.-See Annual Report for 1937 (tables 54-58).

## REPORTING MEMBER BANKS IN 101 LEADING CITIES

 ASSETS AND LIABILITIES OF ALL REPORTING MEMBER BANKS, AND OF REPORTING MEMBER BANKS IN NEW YORK CITY AND OUTSIDE NEW YORK CITY[Monthly data are averages of weekly figures. In millions of dollars]

| Date or month | Total loans and investments | Loans |  |  |  |  |  |  |  | Investments |  |  |  | Reserve with Federal Reserve banks | $\left\lvert\, \begin{gathered} \text { Cash } \\ \text { in } \\ \text { vault } \end{gathered}\right.$ | Bal- <br> ances with domestic banks |

${ }^{1}$ Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms own partners.
${ }^{2}$ Includes both money borrowed from banks and trust companies in New York City and elsewhere in the United States and also money borrowed from other lenders (not including member firms of national securities exchanges)

Notm.-For explanation of these figures see "Statistics on Margin Accounts" in Bullemin for September 1936. The article describes the methods by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.-See Bulletin for March 1938, p. 196.

[^10]${ }^{3}$ Excludes obligations guaranteed as to interest only.

## SUMMARY OF TREASURY OPERATIONS

[On basis of daily statements of United States Treasury. In millions of dollars]

${ }^{1}$ Excludes debt retirements.
Revised.
2 Includes taxes under Social Security Act and on carriers and their employees.
${ }^{3}$ Includes miscellaneous internal revenue, unjust enrichment tax, and processing taxes.
4 Excludes expenditures for adjusted service which are included under "Transfers to trust accounts, etc."
s Includes revolving funds of Public Works Administration and Farm Credit Administration

- Includes expenditures for retirement funds, adjusted service certificate fund, old-age reserve account and railroad retirement account; except for the adjusted service certificate fund, these appear as receipts under "Trust accounts, etc."
${ }^{7}$ Details given in lower section of table. $\quad{ }^{8}$ Less than $\$ 500,000$. ${ }^{2}$ Excess of credits.
10 Monthly figures for the fiscal year 1938 subject to revision.
${ }^{11}$ Includes other trust accounts, increment resulting from reduction in weight of the gold dollar, expenditures chargeable against increment on gold (other than retirement of national bank notes) and receipts from seigniorage.

Note.-This table is arranged to correspond with classifications published in the daily Treasury statements beginning July 1, 1938. The principal changes as compared with former statements are the transfer of financial transactions of the Reconstruction Finance Corporation, Commodity Credit Corporation, and Export-Import Bank from "Revolving funds (net)" under "General and special accounts" to "Trust accounts, etc, and the inclusion of greater detail on certain trust account items. As in the former BuLLETIN table, footnotes to certain columns indicate items in the daily Treasury statements which are combined.

1 Some of the loans made by the regional agricultural credit corporations and the banks for cooperatives and most of the loans made by the production credit associations are discounted with the Federal intermediate credit banks. The amounts in this column are thus included in the prode columns under those headings. Such loans are not always discounted in the same month in which the original credit is extended.

p Preliminary

* Average per working day

1 For indexes of groups and separate industries see pp. 797-798; for description see Bulletin for February and March 1927.
3 3-month moving average of F. W. Dodge Corporation data centered at second month; for description see p. 358 of BuLletin for July 1931.
8 The indexes for factory employment and payrolls unadjusted for seasonal variation are compiled by the Bureau of Labor Statistics. For description and back figures for the seasonally adjusted index of factory employment compiled by F. R. Board of Governors see pp. $950-978$ of Bulletin for December 1936. For current indexes of groups and separate industries see pp. 799-802. Underlying figures are for payroll period ending nearest middle of month.

For indexes of groups see p. 804.
Back figures.-See Annual Report for 1937 (table 81). For department store sales see p. 631 of Bulletin for August 1936, and for freight-car loadings, see pp. 522-529 of Bulletin for June 1937

## INTERNATIONAL FINANCIAL STATISTICS

GOLD RESERVES OF CENTRAL BANKS AND GOVERNMENTS
[In millions of dollars]

## p Preliminary.

See notes under United Kingdom, Italy, and Spain
${ }^{2}$ Bank of England only. In addition, according to official announcements. British Exchange Equalization Account held $\$ 934,000,000$ of gold on Mar. 31, 1937, $\$ 1,395,000,000$ on Sept. 30, 1937, and $\$ 1,489,000,000$ on March 31, 1938.
${ }^{3}$ Figure for March 1937 officialiy reported as of 20 th of month and carried forward through November 1937. Figures for December 1937 through March 1938, officially reported and carried forward for subsequent months.

4 Figure for August 1, 1936 carried forward through March 1938; April 1938 figure officially reported and carried forward.
5 Figure for March 7, 1938, date of latest statement received; Austrian National Bank subsequently absorbed by Reichsbank in accordance with German decree of March 17, 1938.

Note.-The countries for which figures are not shown separately are, in Europe: Albania, Danzig, Estonia, Finland, Latvia, and Lithuania; In Latin America: Bolivia, Ecuador, El Salvador, and Guatemala; in Asia and Oceania: Australia and Siam; and in Africa: Algeria, Belgian Congo, and Morocco.

For back figures and description of table see Bulletin for June 1933, pp. $368-372$ and July 1936, pp. 544-547; also see footnotes to table in BulleTIN for August 1936, p. 667; and December 1937, p. 1262.

Gold production in U.S.S. R.: No regular Government statistics on gold production in U. S. S. R. are available, but data of percentage changes irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production, in millions of dollars, as follows-at $\$ 20.67$ per fine ounce: $1929, \$ 15 ; 1930, \$ 31 ; 1931, \$ 34 ; 1932, \$ 40 ; 1933$, $\$ 56$; at $\$ 35$ per fine ounce: 1933 , $\$ 95$; 1934, \$135; 1935, \$158; 1936, \$185; 1937, \$180.
$r$ Revised. $p$ Preliminary.
${ }^{1}$ Includes production in the Philippines.
Note.-For monthly figures back to January 1929 and for explanation of table see Bulletins for June 1938, pp. 539-540, and April 1933, pp. 233-35. For annual figures of world production back to 1873 (including Russia-U.S.S.R.), see Annual Report of Director of Mint for 1936, pp. 108109 and 1937 p. 104. Figures for Canada beginning January 1937 are subject to official revision

## Preliminary $r$ Revised $c$ Corrected

${ }^{1}$ Beginning with April 1938, figures represent gold movements of Greater Germany. The correct figure for December $\mathbf{1 9 3 6}$ is $\$ 4,763,000$.
Includes $\$ 17,465,000$ exported to Rumania and unspecified net imports of $\$ 95,937,000$.
Includes exports of $\$ 50,661,000$ to Sweden and $\$ 12,571,000$ to Norway; and net imports of $\$ 53,465,000$ from Switzerland.
Includes $\$ 10,129,000$ exported to Sweden and unspecified net imports of $\$ 19,684,000$
Includes $\$ 67,655,000$ exported to Central and South America and net exports of $\$ 16,596,000$ to Switzeriand
6 Figures for Sept., Oct., and Nov. 1937 include exports to Central and South America of $\$ 15,120,000, \$ 27,511,000$, and $\$ 24,996,000$ respectively. Includes net exports of $\$ 12,082,000$ to Switzerland.
Includes net exports of $\$ 6,000,000$ to Switzerland and $\$ 7,590,000$ to Sweden.
${ }^{9}$ Figures for April and May 1938 include exports to Sweden of $\$ 10,088,000$ and $\$ 13,996,000$ respectively.
${ }^{10}$ Figures for June and July include exports to Sweden of $\$ 7,673,000$ and $\$ 11,428,000$, and net exports to Switzerland of $\$ 5,407,000$ and $\$ 15,838,000$ respectively.
${ }_{11}$ Through March 1935 gold held by government; subsequently, gold held by Reserve Bank of India to which government gold was transferred.
${ }_{13}$ Figures derived from preceding columns; net imports plus production minus increase in reserves in India.
${ }^{13}$ Figures for April, May, and July 1938 include exports to Germany of $\$ 9,953,000, \$ 6,182,000$, and $\$ 8,919,000$ respectively.
Note.-Switzerland and United Kingdom.-In some cases annual aggregates of oficial monthly figures differ somewhat from revised official totals published for year as a whole.

SENIOR OFFICERS OF FEDERAL RESERVE BANKS

MANAGING DIRECTORS OF BRANCHES OF FEDERAL RESERVE BANKS

## SUBSCRIPTION PRICE OF BULLETIN

The Federal Reserve Bulletin is the Board's medium of communication with member banks of the Federal Reserve System and is the only official organ or periodical publication of the Board. The Bulletin will be sent to all member banks without charge. To others the subscription price, which covers the cost of paper and printing, is $\$ 2$. Single copies will be sold at 20 cents. Outside of the United States, Canada, Mexico, and the insular possessions, $\$ 2.60$; single copies, 25 cents.

[^0]:    "The term 'member' when used with respect to an exchange * * * includes any firm transacting a business as broker or dealer of which a member is a partner, and any partner of any such firm."

[^1]:    ${ }^{1}$ Beginning with 1933, figures relate to licensed banks only.

[^2]:    ${ }^{1}$ Exclusive of mutual savings and private banks.
    ${ }^{2}$ Exclusive of new banks organized to succeed operating banks.
    ${ }^{3}$ Exclusive of liquidations incident to the succession, conversion and absorption of banks.
    ${ }^{4}$ Exclusive of conversions of national banks into State bank members, or vice versa, as such conversions do not affect Federal Resetve mernbership.
    ${ }_{s}$ Exclusive of conversions of member banks into insured nonmember banks, or vice versa, as such conversions do not affect Federal I Deposit Insurance Corporation membership.

    Back figures.-See Annual Report for 1937 (tables 72 and 73), and Btla ETiN for November 1937, p1. $1084-1122$.

[^3]:    - Includes industrial advances

    VnTE - For description of figures in this table and discussion of their significance, see Bullemin for July 1935, pp. 419-429. Reprints of article, together with all availahle back figures, may be obtained upon request from Division of Research and Statistics. Back figures are also shown in Annual Report for 1937 (tables 3 and 4) and for excess reserves in Bollewtin for August 1935, pp. 499-500. Averages of daily figures for recent ans vems are and in table on p.

    * Reserve requirements reduced by approximately 1314 percent effective A pril 16.

[^4]:    ${ }^{1}$ Includes Federal Reserve notes held by the United States Treasury or by a Federal Reserve Bank other than the issuing bank.

[^5]:    ${ }^{1}$ Excluding central reserve city banks, for which figures for latest month are shown in table above.

[^6]:    1 Nonmember bank figures not available
    ${ }^{2}$ Prior to Dec. 30, 1933, member-bank figures include interbank deposits not subject to immediate withdrawal, which aggregated $\$ 103,000,000$ on that date. The nonmember bank figures include interbank deposits to the extent (estimated as $\$ 150,000,000$ on June 30 , 1937) that they are not shown separately in a few State bank abstracts.
    ${ }^{3}$ Beginning with this date (1) the figures exclude private banks in Georgia which no longer report to the State banking department ( 43 such banks reported deposits of $\$ 2,491,000$ and loans and investments of $\$ 1,087,000$ on December 31,1936 ); and (2) the figures include Morris Plan and industrial banks in New York and North Carolina, of which there were 45 on June 30, 1937, with deposits of $\$ 50,287,000$ and total loans and invest ments of $\$ 61,165,000$. The figures already include such Morris Plan and industrial banks in other States as are covered by State banking department reports.

    Back figures.-See Annual Report for 1937 (tables 48-49).

[^7]:    1 Does not include cash items in process of collection reported in balances with domestic banks
    2 Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

[^8]:    1 Monthly and weekly data are averages of daily figures, except for municipal bonds, which are based on Wednesday figures.
    2 A verage of yields of all outstanding bonds due or callable after 8 years.

    - Btandard Statistics Co.
    - Moody's Investors Service. week ending Friday. Because of limited number of suitable issues, the industrial Aaa group has been reduced from 10 to 3, the industrial Aa group from 10 to 5, and the railroad Aaa group from 10 to 9 . Series revised back to Jan. 1, 1937 in July, 1938 because of changes in railroad bond yield averages in all rating groups.

    Back figures.-See Annual Report for 1937 (table 80).

[^9]:    ${ }^{1}$ Issues classified as of date of final maturity; most issues callable at earlier dates; most of the U. S. savings bonds are redeemable at option of holder.
    ${ }^{2}$ Includes unclassified U. S. savings bonds.

[^10]:    ${ }^{1}$ Principal amount of obligations guarantead as to interest and principal. Excludes obligations held by U. S. Treasury and reflected in the Housing Administrator, amounting to $\$ 581,000$ on July 31, 1938.

[^11]:    ${ }^{1}$ Includes $\$ 77,000,000$ of loans for distribution to depositors of closed banks.
    Note.-For explanation of table and back figures, see Bulletin for April 1936, p. 220.

[^12]:    ${ }^{1}$ In addition to loans the HOLC held on July 31, 1938, $\$ 874,000,000$ in other assets, consisting principally of investments in the Federal Savings and Loan Insurance Corporation and in various savings and loan associations, real estate and other property, and accrued interest receivable. ${ }^{2}$ Federal Home Loan Bank Board estimates for all Federal savings and loan associations.
    ${ }^{3}$ Includes loans to Federal savings and loan associations, all of which are members, and a negligible amount to other than member institutions.

[^13]:    ${ }_{1}^{1}$ Monthly figures from January 1937 to February 1938, inclusive, and weekly figures from January 16, 1937, to April 2, 1938, are subject to revision. ${ }^{2}$ Preliminary revision.
    Back figures.-For monthly and annual indexes of groups, see Annual Report for 1937 (table 86); for indexes of subgroups, see Annual Report for 1937 (table 87). Figures for revised series available at Bureau of Labor Statistics.

[^14]:    ${ }^{1}$ Includes 23,000 bales grown in miscellaneous territory.
    ${ }^{2}$ Includes 17,000 bales grown in miscellaneous territory.

[^15]:    ${ }^{2}$ Differs from official customhouse figures in which imports and exports for January 1934 are valued at approximately $\$ 20.67$ a fine ounce.
    Notr.-For gross import and export figures and for additional countries see table on p. 780 .

[^16]:    p Preliminary.
    1 Issue department also holds securities and silver coin as cover for fiduciary issue, which is fixed by law at $£ 260,000,000$. However, by direction of British Treasury under Section 2, paragraph (2), of Currency and Bank Notes Act, 1928 (see Bulletin for August 1928, pp. 567-569), reductions in amount of fiduciary issue (and securities held as cover) have been in effect as follows: Dec. 16, 1936, to Nov. 10, 1937, £60,000,000; Nov, 17, 1937, to Jan. 12, 1938, £40,000,000; since Jan. 19, 1938, £60,000,000. From August 1, 1931, to March 31, 1933, increase of $£ 15,000,000$ in fiduciary issue (and securities beld as cover) was authorized by British Treasury under Section 8 of Currency and Bank Notes Act.

    2 By law of October 1, 1936, gold provisionally revalued at rate of 49 milligrams gold 0.900 fine per franc (see Bulletin for November 1936, pp. 878-880). Of total gold increment of about $17,000,00,000$ francs, $10,000,000,000$ franes was initially turned over to Stabilization Fund established by law of October 1. By decree of July 22, 1937, gold was again revalued on basis of 43 milligrams of gold 0.900 fine per franc, and resulting increment of about $6,800,000,000$ franes was allocated to fund for regulating market (or Government securities (see BulLetin for September 1937, p. 853).

    3 Bills and warrants endorsed by National Wheat Board (law of Aug. 15, 1936-see Bulletin for October 1936, pp. 785-786), and bills redis:
    counted for account of Banques Populaires (law of Aug. 19, 1936-see Bullemin for October 1936, p. 788).
    ${ }^{4}$ Includes advances granted under authority of Conventions between Bank of France and Treasury of June 18, 1936, June 30, 1937, March 22 1938, and April 14, 1938 (see Bulletins for July 1936, p. 536; August 1937, p. 720; June 1938, p. 452; and August 1938, p. 650 ).

    Note.-For explanation of table see Bulletin for February 1931, pp. 81-83; and July 1935, p. 463.

[^17]:    ${ }^{1}$ Excluding deposits of National Bank relating to offices outside United Kingdom, which are included in total. Figures for 10 banks not available beginning 1936

    2 District Bank included beginning in 1936.
    Note.-For other back figures and explanation of table see Bulletin for October 1933, pp. 639-640.

[^18]:    ${ }^{1}$ Combined monthly balance sheets not published for December. Prior to merger of two of the banks in February 1932 figuras refer to six large Berlin banks. Beginning in 1935 figures are not entirely comparable with those shown for previous years due to changes in reporting practice. (See Bulletin for June 1935, p. 389).

[^19]:    Note.-For information concerning nominal status of exchange quotations, special factors affecting the averages, and changes in the basis of quotation, see note in Bulletin for March 1938, p. 244. Subsequent developments have been as follows: Australia, New Zealand, and South Africaquotations not nominal beginning March 26; Austria-no quotations available beginning March 14; China-quotations nominal beginning March 14; Mexico-quotations not available March 19-21 and nominal thereafter.

[^20]:    $p$ Preliminary.
    ${ }^{1}$ Prices derived from average yields for 60 corporate bonds as published by Standard Statistics Co.
    ${ }^{2}$ Exchange closed from July 13 to Sept. 2, 1931, and from Sept. 19, 1931, to Apr. 11, 1932. Index for 1931 represents average of months JanuaryJune; index for 1932 represents average of months May-December.
    ${ }^{3}$ Indexes of reciprocals of average yields. For old index, $1929-1936,1929=100$; average yield in base year was 4.57 percent. For new index beginning January 1937, January-March 1937 $=100$; average yield in base period was 3.39 percent.
    ${ }^{4}$ New index. See note 3
    Sources.-See Bulletin for February 1932, p. 121, June 1935, p. 394, April 1937, p. 373, July 1937, p. 698, and November 1937, p. 1172.
