## BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

Marriner S. Eccles, Chairman.
J. J. Thomas, Vice Chairman.

Cearles S. Hamlin.
Adolph C. Miller.
George R. James.
M. S. Szymczak.

Ex-officio members:
Henry Morgenthau, Jr., Secretary of the Treasury.
J. F. T. O'Connor, Comptroller of the Currency.

Lawrence Clayton, Assistant to the Chairman.
Elliott L. Thurston, Special Assistant to the Chairman.
Chester Morrill, Secretary.
J. C. Noell, Assistant Secretary. Liston P. Bethea, Assistant Secretary.
S. R. Carpenter, Assistant Secretary. Walter Wyatt, General Counsel.
Georgan B. Vest, Assistant General Counsel.
B. Magrdder Wingield, Assistant General Counsel. Leo H. Paulger, Chief, Division of Examinations.
R. F. Leonard, Assistant Chief, Division of Examinations.
C. E. Cagle, Assistant Chief, Division of Examinations. Frank J. Drinnen, Federal Reserve Examiner.
E. A. Goldenweiser, Director, Division of Research and Statistics.
Ladchlin Currie, Assistant Director, Division of Research and Statistics.
Woodlef Thomas, Assistant Director, Division of Research and Statistics.
E. L. Smead, Chief, Division of Bank Operations.
J. R. Van Fossen, Assistant Chief, Division of Bank Operations.
J. E. Horbett, Assistant Chief, Division of Bank Operations.
Carl E. Parry, Chief, Division of Security Loans.
Philip E. Bradley, Assistant Chief, Division of Security Loans.
O. E. Foulk, Fiscal Agent.

Josephine E. Lally, Deputy Fiscal Agent.

MANAGING DIRECTORS OF BRANCHES OF FEDERAL RESERVE BANKS

## SUBSCRIPTION PRICE OF BULLETIN

The Federal Reserve Bulletin is the Board's medium of communication with member banks of the Federal Reserve System and is the only official organ or periodical publication of the Board. The Bolletin will be sent to all member banks without charge. To others the subscription price, which covers the cost of paper and printing, is $\$ 2$. Single copies will be sold at 20 cents. Outside of the United States, Canada, Mexico, and the insular possessions, $\$ 2.60$; single copies, 25 cents.

## REVIEW OF THE MONTH

On September 30 member bank reserve balances with Federal Reserve banks totaled $\$ 5,254,000,000$, and excess re-

## Member bank reserve balances

serves amounted to $\$ 2,630$,-

000,000 . Both figures were smaller than at the end of August. An increase of $\$ 165,000,000$ in monetary gold stock during the month was offset in its effect on reserve balances by a seasonal growth of about $\$ 50,000,000$ in currency in circulation, an increase of nearly $\$ 50,000,000$ in the total of Treasury cash and deposits with Reserve banks, and an increase of over $\$ 100,000,000$ in other deposits at Reserve banks.

Reserve balances of member banks increased in the early part of September to a new high level of $\$ 5,388,000,000$ on September 11, an amount $\$ 2,820,000,000$ in excess of legal requirements. During the remainder of the month the amount of reserve balances showed wide fluctuations, largely as a result of Treasury transactions and gold imports. In the week ending September 18 a temporary increase in the Treasury's deposits with the Reserve banks, consequent upon tax receipts and the sale of a new issue of Treasury notes was the principal factor in a decline of $\$ 250,000,000$, in member bank reserve balances. Toward the end of the month these balances again increased, as the Treasury's deposits with Reserve banks were disbursed and also as the result of a considerable movement of gold to this country. Under the existing practice, as under previous custom, gold imports result in an equivalent increase of the reserves of member banks, since they receive credit in their reserve accounts when they turn the gold over to the United States Treasury.

The current movement of gold from Europe to the United States began early in September International with small shipments from Longold and capital don. On September 17 the movements first gold arrived from France, and on September 23 shipments were received from the Netherlands. From the middle of September through the first week of October about $\$ 230,000,000$ of gold arrived in the United States, of which $\$ 90,000,000$ was from France, $\$ 60,000,000$ from England, $\$ 55,000,000$ from the Netherlands, $\$ 15,000,000$ from India, and the rest from Canada and other countries. Additional shipments from Europe to the United States were in progress.

This heavy movement of gold does not reflect an excess of payments due to the United States on ordinary transactions with the world. During 1935 this country's merchandise exports have exceeded its imports by only a small amount. It is estimated that this small excess together with net income from foreign investments has been more than balanced by tourist expenditures abroad, immigrants' remittances, and freight payments to foreign vessels. The inflow of gold has been caused by a heavy movement of capital to this country, offset in part by purchases of silver abroad by the United States Treasury.

During the crisis in the gold-bloc countries last spring, the movement of capital was largely in the form of short-term balances. Speculative funds were being transferred from these countries to New York. Part of this movement of funds is reflected in the increase in balances of foreign banks at member banks in leading cities, shown on the chart on page 644. There was also a large return of New York funds from London, where the discount on for-
ward sterling made the continued holding of balances unprofitable. During the summer forward quotations on sterling and gold bloc currencies continued to be at a discount, and there was little return to Europe of funds that had come here in the spring crisis. There was, in fact, a considerable net inflow of short-term funds, reflecting liquidation of German shortterm indebtedness to the United States and a movement of balances to this country from Latin America and the Far East. In addition there was a large movement of European funds into the New York security market. Purchases were mostly of American rather than foreign securities.

This inward movement of capital from abroad was offset to a considerable extent by purchases of silver abroad by the United States Treasury during the summer months. There were, however, imports of gold amounting to about $\$ 60,000,000$ during July and August, half of which was shipped from the Netherlands during one week when there was a Cabinet crisis.

Aside from these Dutch shipments Europe lost little gold to the United States during the summer months, but losses in reserves suffered by commercial banks in Paris and Amsterdam during the outward movement of gold in the spring were not restored and these centers continued to carry the indebtedness incurred at their central banks at that time. Early in September reserves were still at the lowest level reached since the international crisis in 1931 and indebtedness was near the spring peak. The cost of this indebtedness had been lowered in France, however, by successive reductions in the rate charged by the Bank of France. From 6 percent on June 20 the bank had lowered its rate by August 9 to 3 percent. The Netherlands Bank, after reducing its rate three times, raised it from 3 to 6 percent during the crisis in July and thereafter reduced it to 5 percent. On September 17, in the face of the renewed gold outflow, the rate was again raised to 6 percent. In view of the substantial volume of indebtedness to the central banks, the course of central bank rates has largely
determined the course of open-market rates in Paris and Amsterdam.
The current movement of gold from France to the United States, unlike the movement from the Netherlands Bank, which lost \$40,000,000 of reserves in the first 2 weeks, has been replaced by gold received from other quarters, and there has been no advance of the discount rate in France. The offsetting movement of gold to France appears to have come chiefly from Italy and England, which have sold gold in France to support their exchanges. In addition to such English gold as has reached this country by way of France, there were also direct shipments from England. In part these were drawn from the London bullion market, where considerable amounts of gold from South Africa and India were being received; and in part they represented gold formerly held in London on private account.

The disturbed political conditions in Europe, which have intensified the movement of capital Reserve posi- to this country in recent weeks, tion of Bank have operated mainly upon of Italy those financial centers in which capital transactions are unhampered. The continual decline in gold reserves of the Bank of Italy is attributable less to capital transactions, which are now subject to Government control, than to the country's adverse balance of merchandise trade. This is not a new development. The Bank of Italy has been losing reserves since April 1928. Although gold reserves increased until the beginning of 1934 , the increase was more than offset by the exhaustion of the bank's reserves in foreign exchange. During 1934, with foreign exchange reserves no longer available, the bank parted with substantial amounts of gold, and by the end of the year its reserves were down practically to the legal minimum of 40 percent. In December 1934 decrees were issued by the Government requiring the Italian public to place their foreign balances and securities at the disposition of the authorities, and these resources enabled the bank to maintain its reserve position intact during the
first half of 1935. In June 1935, however, the decline in gold reserves of the bank was resumed and on July 22 the Government suspended the bank's reserve requirements. In the next 2 months more than $\$ 100,000,000$ of gold was withdrawn, and the reserve ratio fell to 29 percent. Some figures illustrative of the Italian reserve position in recent years are given in the table below.

Reserves of the Bank of Italy

${ }^{1}$ Ratio of gold and foreign exchange to notes and other sight liabilities of the bank. Until July 22, 1935, the legal minimum was 40 percent.

According to weekly reports obtained from member banks in 91 leading cities deposits

## Member banks in leading cities

 at these banks continued to increase during the third quarter of the year. On September 25 total deposits of reporting banks were $\$ 880,000,000$ larger than on June 26, 1935, and $\$ 3,100,000,000$ larger than on September 26, 1934. Total loans and investments, which had shown little growth since April, increased considerably in September, and on September 25 were $\$ 460,000,000$ larger than on June 26 and $\$ 1,340,000,000$ larger than a year ago. Most of this increase occurred in holdings of obligations of the United States Government, but the figures indicate that in recent weeks banks' holdings of other securities and their loans to commercial and industrial customers have also increased somewhat.As indicated in the following table, which shows an abbreviated balance sheet for these reporting banks, the differences between the growths in deposits and in loans and investments were represented principally by increases in reserves, reflecting gold imports, in balances due from other banks, and in items in process of collection. Figures from the June 29 call report for member banks indicate
that the large decrease during the past year in "other assets" of reporting banks reflected declines in customers' liabilities for acceptances executed and in amounts due from foreign banks and branches, while the decrease in "other liabilities" reflected declines in acceptances executed for customers and in national bank notes outstanding.

${ }^{1}$ Includes principally banking house and other real estate, customers' liability on acceptances, time balances with domestic banks, balances with foreign banks and branches, and miscellaneous assets.
${ }^{2}$ Includes principally national-bank notes outstanding, acceptances executed, and miscellaneous liabilities.

Changes in various types of deposits at reporting banks in leading cities are shown in the following table and in the

## Deposits of reporting banks

 chart. A substantial part of the growth in total deposits has occurred in balances of domestic banks, which increased by about $\$ 300,000,000$ in the 3 months and by $\$ 950,000,000$ in the 12 months ending September 25, 1935. As previously noted, an increase in cash items in process of collection, the so-called "float", was also responsible for part of the growth in total deposits. Interbank balances and float in effect involve a double counting of customers' deposits. Balances of foreign banks also increased considerably in the past year. United States Government deposits, on the other hand, although about the same on September 25 as on June 26 of this year, were much smaller than on September 26, 1934.When allowance is made for changes in Government and inter-bank deposits and in the
float, a figure is obtained that represents the demand deposits of individuals, partnerships, corporations, clubs, associations, and the like. This figure, called "adjusted demand deposits", showed an increase of $\$ 420,000,000$ in the third quarter of this year and of $\$ 2,190,000,000$ in the past 12 months.

A slight decline occurred in time deposits, as shown in the table. These deposita include

1 Includes both demand and time deposits.
${ }^{2}$ Includes Postal Savings deposits, which are not reported separately; ${ }^{3}$ Demand deposits of "other customers" plus certified and officers; checks and cash letters of credit and travelers' checks, minus cash items reported as on hand or in process of collection.

Postal Savings deposits, which are not reported separately in the weekly statements but which have declined considerably in the past year, owing to the fact that some banks have given up these deposits and the Postal Savings System has invested the funds in United States Government obligations. Postal Savings deposits at all member banks in New York and other reserve cities decreased by $\$ 116,000,000$ between October 17, 1934, and June 30, 1935, and withdrawals have continued since June 30. Since this decline was much larger than the decline in total time deposits of reporting banks, this would be an indication that time deposits of other customers showed some increase in the past year.

The figure for adjusted demand deposits is a more significant figure than that for net demand deposits heretofore shown in the weekly statement of condition. Net demand deposits showed deposits subject to reserve requirements and, since the method of computation
was changed by the Banking Act of 1935, present figures are not comparable with those reported prior to August 24. The new act

requires that reserves shall be carried against United States Government deposits, which were previously exempt from this requirement, and provides that balances due from banks and cash items in process of collection may hereafter be deducted from gross demand deposits, whereas previously they could be deducted only from balances due to other banks. Banks whose holdings of balances due from other banks and of collection items were larger than their balances due to other banks were not permitted, under the former law, to make full deductions. As a result of the change in the law, banks in New York City, which hold fairly large Government deposits, showed much larger net demand deposits than formerly, while country banks, whose balances
due from banks exceed their balance due to banks and their Government deposits, showed decreases. Net demand deposits represent different sorts of deposits for different types of banks. At New York City banks they include a large amount of bankers' balances, while at reserve city banks they include only a part of such balances. Under the present method of computation net demand deposits at country banks are smaller in the aggregate than total deposits of the banks' customers.

The growth in total loans and investments Loans and of reporting member banks investments during the past year, as shown in the following table and in the chart, has been principally in holdings of United States Government obligations. There was also a substantial increase in loans to brokers and dealers in securities in New York City, representing in part the sbifting of loans from nonreporting banks to reporting banks and in part larger loans to dealers in United States Government securities. Loans on securities to customers continued to decline in the year and there was also a substantial decrease in

Loans and Investments of Member Banks in Leading Cities
[In millions of dollars]

|  |  |
| :--- | ---: | ---: | ---: |

${ }^{1}$ Figures for Sept. 26, 1934, partly estimated.
acceptances and commercial paper bought. Loans on real estate showed little change during the year.

The table for loans and investments shows changes since July 31, 1935, rather than since June 26, 1935, the date used in the other tables. This is for the purpose of showing the seasonal increase in commercial loans, which generally begins in July or August. The item "other loans", covering all loans not secured by stocks and bonds or by real estate, including commercial, industrial, and agricultural loans, decreased by $\$ 90,000,000$ in the 5 weeks ending July 31 and increased in the following 8 weeks by $\$ 180,000,000$. Acceptances and commercial paper bought showed a small increase in the 2 months, a reversal of the trend for previous months. Although there has been a rise in stock prices and an increase in stock market activity in recent months, loans to brokers and dealers in securities have shown little growth; fluctuations have probably reflected changes in borrowings of security dealers.
The principal increase in the statement during the 8 weeks from July 31 to September 25 , as in other recent periods, was in holdings of United States Government obligations. These holdings have shown broad changes since June. Redemption in July and August of bonds pledged by national banks to secure circulating notes resulted in some decrease in the banks' holdings of Government securities, while at times when new issues of notes and bonds were floated by the Treasury there were increases. These changes resulted in little growth in holdings during June, July, and August, but in the week ending September 18, when there was a sale of a $\$ 500,000,000$ issue of Treasury notes, the reporting banks' investments in direct obligations of the Government showed an increase of $\$ 370,000,000$. Holdings of obligations guaranteed by the United States have continued to increase gradually and those of other securities have also shown a slow growth since June.

# REGULATIONS OF FEDERAL DEPOSIT INSURANCE CORPORATION 

The following regulations of the Federal Deposit Insurance Corporation defining deposit liabilities were recently promulgated:

## REGULATION I

This regulation was approved August 26, 1035, and became effective as of that date

## SCOPE OF REGULATION

Under the provisions of subsection (c), paragraph (12) of section 12B of the Federal Reserve Act, as amended, the board of directors find and prescribe that the obligations of banks enumerated herein, arising in the usual course of business, are deposit liabilities in addition to those specifically enumerated in said subsection.

## SECTION I.-STATUTORY PROVISIONS

Subsection (c), paragraph (12) of section 12B of the Federal Reserve Act, as amended, provides as follows:
"The term 'deposit' means the unpaid balance of money or its equivalent received by a bank in the usual course of business and for which it has given or is obligated to give credit to a commercial, checking, savings, time, or thrift account, or which is evidenced by its certificate of deposit, and trust funds held by such bank whether retained or deposited in any department of such bank or deposited in another bank, together with such other obligations of a bank as the board of directors shall find and shall prescribe by its regulations to be deposit liabilities by general usage: Provided, That any obligation of a bank which is payable only at an office of the bank located outside the States of the United States, the District of Columbia, Hawaii, Alaska, Puerto Rico, and the Virgin Islands, shall not be a deposit for any of the purposes of this section or be included as a part of total deposits or of an insured deposit: Provided further, That any insured bank having its principal place of business in any of the States of the United States or in the District of Columbia which maintains a branch in Hawaii, Alaska, Puerto Rico, or the Virgin Islands may elect to exclude from insurance under this section its deposit obligations which are payable only at such branch, and upon so electing the insured bank with respect to such branch shall comply with the provisions of this section applicable to the termination of insuranceby nonmember banks: Provided further, That the bank may elect to restore the insurance to such deposits at any time its capital stock is unimpaired."
This regulation is promulgated pursuant to the provisions italicized above.

SECTION 2
The term "deposit" as used in subsection (c), paragraph (12) of section 12B of the Federal Reserve Act, as amended, shall include the following obligations:

## I

Outstanding drafts, cashiers' checks, and other officer's checks issued under any of the following circumstances:
(a) For money or its equivalent received by the issuing bank; or
(b) For a charge against a deposit account in the issuing bank; or
(c) In settlement of checks, drafts, or other instruments forwarded to the issuing bank for collection.

## II

Checks drawn against a deposit account and certified by the drawee bank.

## III

Outstanding travelers' checks or letters of credit on which the bank is primarily liable issued under either of the following circumstances:
(a) For money or its equivalent received by the issuing bank; or
(b) For a charge against a deposit account in the issuing bank.

## REGULATION II

This regulation was approved August 26,1935 , and became effective as of that date

## SCOPE OF REGULATION

Under the provisions of subsection (h), paragraph (1) of section 12B of the Federal Reserve Act, as amended, insured banks are permitted to make deductions of certain uncollected items from total deposit liabilities for the purpose of determining the bases upon which assessments are to be calculated. This regulation prescribes the classes of uncollected items which are eligible for deduction and fixes the periods during which such uncollected items may be deducted.

SECTION 1.-STATUTORY PROVISIONS
Subsection (h), paragraph (1) of section 12B of the Federal Reserve Act, as amended, provides in part as follows:
"The assessment rate shall be one-twelfth of 1 per centum per annum. The semiannual assessment for each insured bank shall be in the amount of the product of one-half theannualassessment rate multiplied by an assessment base which shall be the average for 6 months of the differences at the
end of each calendar day between the total amount of liability of the bank for deposits (according to the definition of the term 'deposit' in and pursuant to paragraph (12) of subsection (c) of this section, without any deduction for indebtedness of depositors) and the total of such uncollected items as are included in such deposits and credited subject to final payment: Provided, however, That the daily total of such uncollected items shall be determined according to regulations prescribed by the board of directors upon a consideration of the factors of general usage and ordinary time of availability, and for the purposes of such deduction no item shall be regarded as uncollected for longer periods than those prescribed by such regulations.
This regulation is promulgated pursuant to the provisions italicized above.

SECTION 2
The term "item" as used in this regulation means any instrument providing for the payment of money.

In computing the bank's assessment base, items may be deducted by the bank of deposit from the total amount of the bank's liability for deposits during the periods prescribed by section 3 of this regulation: Provided, That they were included in the bank's
liability for deposits: And provided further, That they were received in the usual course of business pursuant to an agreement under which the bank has given or is obligated to give credit to a commercial, checking, savings, time, or thrift account, and that the drawee or the payor of the item is a bank or person other than the bank of deposit.

No item shall be deducted except in accordance with the provisions of this section.

## SECTION 3

A local item shall be eligible for deduction for a period not to exceed 1 day. An out-of-town item shall be eligible for deduction for a period not to exceed the time which would be necessary to send the item in due course to the Federal Reserve bank of the Federal Reserve district or the branch of the subdistrict thereof in which the bank of deposit is located, plus the time allowed for collection from the place where the item is payable, as shown on the current time schedule of such Federal Reserve bank or branch thereof: Provided, That no item shall be deducted after the bank has had advice that the item has been paid or dishonored.

This regulation is not to be construed as requiring any bank to clear items through any Federal Reserve bank or branch thereof.

# NATIONAL SUMMARY OF BUSINESS CONDITIONS 

[Compiled Sept. 24 and released for publication Sept. 26]

Total volume of industrial production increased in August by about the usual seasonal amount. Steel output increased more than seasonally, while the output of automobiles and anthracite declined sharply. Factory employment and pay rolls increased. Wholesale prices of farm products and metals advanced during August and the first 2 weeks of September, and prices of wheat and metals increased further in the third week of the month.

Production and employment.-Industrial production increased seasonally in August and the Board's index, which is adjusted to allow for usual seasonal variations, remained unchanged at 86 percent of the 1923-25 average. Activity at steel mills showed a considerable increase from July to August and in the first 3 weeks of September was at a level higher than in any other month since February. Automobile assemblies declined by about 30 percent in August and showed a further sharp reduction in the early part of September, reflecting in part preparations for early introduction of new models. At lumber mills, output continued to increase in August. Cotton consumption by domestic mills increased slightly from recent relatively low levels, and activity at woolen mills was maintained at a high rate. At mines, output of anthracite decreased sharply in August, while output of bituminous coal showed an increase.

Factory employment and pay rolls increased between the middle of July and the middle of August by more than the usual seasonal amount. Marked increases in employment were reported for the steel, machinery, lumber, silk, and clothing industries, while at automobile factories employment declined somewhat. The number of wage earners engaged in the production of durable manufactures in August was 6 percent larger than a year earlier, while the volume of employment in other manufacturing industries as a group showed little change. Total factory employment was 3 percent larger than in August 1934.

Daily average value of construction contracts, as reported by the F. W. Dodge Corporation, showed little change in August and the first half of September. Contracts for residential building, which earlier in the year had increased considerably, showed a decrease for this period, while the volume of public projects increased.

Department of Agriculture estimates based on September 1 conditions indicate a cotton crop of $11,489,000$ bales, as compared with the unusually small crop of $9,636,000$ bales last year. The indicated crops of corn, wheat, and other grains are considerably larger than last year, when drought conditions prevailed, and the condition of pastures is above the ten-year a verage.

Distribution.-Freight-car loadings increased considerably in August and the first half of September, partly as a consequence of seasonal factors. Department store sales increased slightly less than seasonally from July to August.

Commodity prices.-The general level of wholesale commodity prices, as measured by the index of the Bureau of Labor Statistics, advanced from 79.6 percent of the 1926 average at the beginning of August to 80.8 percent in the second week of September, and prices of many leading commodities, including wheat, silk, copper, lead, and zine, advanced further in the third week of the month. Cotton prices declined considerably in August and showed relatively little change in the first 3 weeks of September.

Bank credit.-Excess reserves of member banks declined in the 5 -week period ended September 18, reflecting a temporary increase in the Treasury's total holdings of cash and deposits at Federal Reserve banks and a seasonal increase of money in circulation, which was partly offset by an inflow of gold from abroad.

Total loans and investments of reporting banks inleading cities increased by $\$ 610,000,000$ during the 5 weeks ended September 18. Loans increased by $\$ 100,000,000$, holdings of United States Government direct obligations by $\$ 390,000,000$, holdings of United States guaranteed securities by $\$ 70,000,000$, and holdings of other securities by $\$ 50,000,000$. Adjusted demand deposits of these banksthat is, demand deposits other than Government and bank deposits, adjusted for collection items-increased by $\$ 140,000,000$, United States Government deposits by $\$ 160,000,000$, and balances due to banks by $\$ 270,000,000$.

Yields on Government securities rose somewhat further during this period, while other short-term open-market money rates remained at previous low levels.

| September ${ }^{\text {p }}$ | 9,368 | 164.8 | 156.7 | 1.0 | 7.1 |

p Preliminary
1 Gold released from earmark at Federal Reserve banks less gold placed under earmark (with allowance when necessary for changes in gold earmarked abroad for account of Federal Reserve banks).
1 Figures are derived from preceding columns and indicate net result of such factors as domestic production, movements into and out of nonmonetary use, imports and exports that do not affect gold stock during the month or year, and increment resulting from reduction in weight of gold dollar.

${ }^{1}$ Loans (secured by stocks and bonds) to brokers and dealers in securities at New York Oity.
1 Beginning June 30, 1933, figures relate to licensed banks only.
Central Reserve city banks only
Back figures.-See Annual Report for 1931 (table 53).

## ALL BANKS IN THE UNITED STATES

[Comprises all national banks in the continental United States and all State commercial banks, trust companies, mutual and stock savings banks, and such private and industrial banks as are included in abstracts issued by State banking departments. Also includes, beginning with June 1934, private banks which, pursuant to the provisions of sec. 21 (a) of the Banking Act of 1933, have agreed to examination by the Comptroller of the Currency or a Federal Reserve bank]

## LOANS AND INVESTMENTS

${ }^{2}$ Does not include loans by joint-stock land banks, which are now in liquidation.
3 Some of the loans made by the regional agricultural credit corporations and the banks for cooperatives and most of the loans made by the production credit associations are discounted with the Federal intermediate credit banks. The amounts in this column are thus included in the columns under those headings.

- Amounts shown are outstanding loans to and discounts for production credit associations by the Federal intermediate credit banks.

${ }^{1}$ Principal amount of obligations guaranteed as to interest and prin${ }_{2}{ }^{2} \mathrm{~F}$.
${ }^{2}$ Excludes obligations held by U. S. Treasury and reflected in the public debt; includes in 1933 and in January 1934 notes given in pur. chase of gold which were retired in February 1934.

## PRODUCTION, EMPLOYMENT, CAR LOADINGS, AND COMMODITY PRICES

[Index numbers; 1923-25 average $=100$. The terms "adjusted" and "unadjusted" refer to adjustment for seasonal variation]

- Preliminary
- Revised
* Average per working day
${ }^{1}$ For indexes of groups and separate industries see pp. 697-698; for description see Bulletin for February and March 1927.
2 -month moving average of F. W. Dodge Corporation data centered at second month; for description see BulLetin for July 1931 , p. 358 .
: The indexes for factory employment and pay rolls unadjusted for seasonal variation are compiled by the Bureau of Labor Statistics. For description and back figures see Bulletin for May 1934 pp. 270-271. For description and back figures for the seasonally adjusted index of factory employment compiled by Federal Reserve Board see Bulletin for June 1934, pp. 324-343. For current indexes of groups and separate industries see pp. 699-700.

For indexes of groups see p. 666 .

- Index of Bureau of Labor Statistics; 1926 $=100$. Index numbers for groups of commodities (also data by weeks) are given on p. 696

Back figures.-See Annual Report for 1934 (tables 95 and 100).

## - Preliminary.

${ }^{\circ}$ Revised. Estimated world production revised on basis of new estimate for production in U.S.S. R. during 1935, of $\$ 15,500,000$ per month (see Bulletin for March 1935, p. 170).

Note.-For monthly figures back to January 1929 and for explanation of table see Beiletin for April 1933, pp. 233-35, February 1934, p. 108, November 1934, p. 737, and March 1935, p. 170. For annual figures of world production back to 1873 see Annual Report of Director of the Mint tor 1934, p. 104. Figures for Canada beginning January, 1935, are subject to official revision.

## GOLD MOVEMENTS

[In thousands of dollars]

[^8]
## GOLD MOVEMENTS-Continued

[^9]
## GOLD MOVEMENTS-Continued

1 Preliminary.
1 Tbrough March 1935 gold held by Government; subsequently, gold held by Keserve Bank of India to which Government gold was transferred.
${ }^{2}$ Figures derived from preceding columns; net imports plus production minus increase in reserves in India.
Note. - Netherlands and Switzerland.-In some cases the annual aggregates of the official monthly figures differ somewhat from the revised official totals published for the year as a whole.

## CENTRAL BANKS

Preliminary.
${ }^{3}$ In addition, the issue department holds Government and other securities and silver coin as cover for the fiduciary issue, which is fixed by law st $£ 260,00 \mathrm{C}, 000$.
, Figures not jet available.
Netr.-For explanation of table see Bulletin for February 1931, pp. 81-83, and July 1935, p. 463,

## LAW DEPARTMENT

## Purchase by State member bank of "securities" which are not "investment securities"

The Board has recently ruled that under the provisions of paragraph Seventh of section 5136 of the Revised Statutes, as amended by section 308 of the Banking Act of 1935, and the provisions of section 9 of the Federal Reserve Act a State member bank may not purchase for its own account "securities" which do not constitute "investment securities" as defined in section 5136 and in the regulations of the Comptroller of the Currency issued thereunder. However, the Board stated that it would raise no objection to the continued holding by the bank of such securities which were purchased prior to the enactment of the Banking Act of 1935.

In the case in which the above ruling was made it appeared that the " $A$ " trust company, a State member bank, had purchased " $Z$ " corporation $2 \frac{1}{2}$-percent serial notes in the amount of $\$ 900,000$, such notes being a part of a $\$ 9,000,000$ issue, one-third of which was to mature annually on November 1, 1935, 1936, and 1937. It also appeared that the notes purchased by the " $A$ " trust company consisted of $\$ 300,000$ of each of the three maturities. The notes were originally issued in denominations of $\$ 100,000$ and $\$ 50,000$, but were interchangeable for notes of smaller denominations. The "A" trust company paid for the notes by check payable to the " $Z$ " corporation.

The "A" trust company stated that it purchased the notes for its own account for the purpose of investment and not for distribution, and also stated that the notes were not registered under the Securities Act of 1933. It appeared that the notes were not actively dealt in on any market, although other securities of the " $Z$ " corporation were actively traded in and widely held.

An examination of the form of the definitive notes and of the printed trust agreement disclosed that the notes were in the usual form of a corporate note or bond and were issued pursuant to the terms of a trust agreement under which the corporation obligated itself to the trustee, the "B" trust company, to pay the interest on and the principal of the notes. The notes could be registered as to principal or payable to bearer, and they carried interest coupons payable to bearer. Although the notes were unsecured, the trust agreement contained covenants limiting the right of the corporation and its subsidiary companies to make
mortgages, pledges, or other incumbrances while the notes remained unpaid.

The first question presented was whether the notes in question were "investment securities" as defined in paragraph Seventh of section 5136 of the Revised Statutes and the regulations of the Comptroller of the Currency issued pursuant thereto on February 25, 1927, and December 27, 1934. In response to the Board's inquiry, the Comptroller stated that, in his opinion, the notes were not "investment securities" within the meaning of his regulations on the subject because of the fact that they did not have such public distribution as to insure the marketability of the issue. The Board stated that it agreed with the opinion of the Comptroller of the Currency upon this point and, accordingly, ruled that the notes could not lawfully be held as "investment securities" under the provisions of paragraph Seventh of section 5136 of the Revised Statutes and section 9 of the Federal Reserve Act.

The question was also presented as to whether the notes could be held by the "A" trust company in its loan account as evidence of a loan by the trust company to the " $Z$ " corporation. The Board stated that the notes in question appeared to constitute securities, but as above stated were not "investment securities" within the meaning of that term as used in section 5136 of the Revised Statutes. The Board also stated that under the provisions of that section, as amended by section 308 of the Banking Act of 1935, it is clear that a national bank may not purchase for its own account notes such as those under consideration which are securities but not "investment securities", and that the provisions of section 9 on this subject were clearly intended to place State member banks on a basis of equality with national banks with respect to investments in securities. Accordingly, the Board ruled that a State member bank could not, since the enactment of the Banking Act of 1935, purchase for its own account notes of the type under consideration.

However, the Board stated that, in view of the amendment to the law, it believed that it was unnecessary to determine the question presented under the provisions of the law as it existed prior to the enactment of the Banking Act of 1935 , and stated that it would raise no objection to the continued holding by the "A" trust company of the notes in question which were purchased prior to the enactment of such act.

## BANKS SUSPENDED AND NONLICENSED BANKS PLACED IN LIQUIDATION OR RECEIVERSHIP DURING 1934 AND JANUARY-SEPTEMBER 1935

| [Preliminary figures] |
| :--- |

${ }^{1}$ Includes banks placed on a restricted basis.
2 Includes nonlicensed banks absorbed or succeeded by other banks.
Deposits of licensed member banks suspended are as of dates of suspension; deposits of nonlicensed national banks placed in liquidation or receivership are as of dates of conservatorship; deposits of nonlicensed State bank members placed in liquidation or receivership are as of the nearest call dates prior to liquidation or receivership; and deposits of nonmember banks are based on the latest data available at the time of the reported closing of the banks.

Includes 14 banks with deposits of $\$ 12,504,000$ in 1934 and 4 banks with deposits of $\$ 5,066,000$ during January-September 1935, which did not eceive licenses following the banking holiday and withdrew from the Federal Reserve System before being placed in liquidation,

Back figures.-See Annual Report for 1934 (tables 79-84);

## POSTAL SAVINGS SYSTEM

[In millions of dollars]

- Preliminary.

1 Includes working cash with postmasters, 5 percent reserve fund and miscellaneous working funds with the Treasurer of the United States, accrued interest on bond investments and accounts due from late postmasters.
Back figures.-See Bulletin for August 1935, p. 502.

MATURITY DISTRIBUTION OF BILLS AND SECURITIES HELD BY FEDERAL RESERVE BANKS

## ALL BANKS IN THE UNITED STATES

## ALL BANKS 1 - PRINCIPAL ASSETS AND LIABILITIES ON MAR. 4, 1935, AND DEC. 31 AND JUNE 30, 1934, BY DISTRICTS

[Amounts in millions of dollars; figures for nonmember banks are for dates indicated or for call dates nearest thereto for which figures are available]

[^13]Comprises all licensed national banks in the continental United States and all licensed nonnational banks described in footnote 1 on p. 693
Back figures.-See Annual Reports of the Federal Reserve Board for 1929 (tables 83-85) and 1931 (tables 93-95); also Bulletins for October 1832 (p. 663), April 1933 (p. 254), and February 1935 (p. 123).

r Revised.
1 Comprises all licensed State commercial banks, trust companies, mutual and stock savings banks, and such private and industrial banks as are included in abstracts issued by State banking departments. Also includes, beginning with June 1984, private banks which, pursuant to the provisions of see. 21 (a) of the Banking Act of 1933 , agreed to examination by the Comptrolijer of the Currency or a Federal Reserve bank and rendered condition reports to the Comptroller of the Currency under the same conditions as national banks; for comparative figures of private banks included in this compilation, see the next following table.
${ }_{2}$ Includes interbank deposits.
${ }^{2}$ Includes interbank deposits. 34 cash depositories on Mar. 4, 1935; 32 on Dec. 31, 1934; and 29 on June 30, 1934.
Nore.-All figures in the Mar. 4, 1935, columns are as of Mar. 4, except as follows: Maine, Mar. 30; New Hampshire, June 30, 1934; Massachusetts, savings banks, Oct. 31; Rhode Island, savings banks, Dec. 31; Connecticut, savings banks, Mar. 30; New York, savings banks, Dec. 31; other banks and trust companies, Mar. 30, including 2 private banks not under State supervision as of Mar. 4; Minnesota, Apr. 18; Missouri, Nov. 5; Nebraska, Apr. 3; Kansas, Mar. 25; Maryland, State banks and trust companies, Mar. 30; savings banks, Dec. 31; Louisiana, Mar. 29; Colorado, Mar. 16; Oregon, savings banks, Dec. 31; Alabama, Georgia, Indiana, Kentucky, North Dakota, Tennessee, and Wisconsin, Dec. 31.

## ALL BANKS IN THE UNITED STATES-Continued

PRIVATE BANKS-PRINCIPAL ASSETS AND LIABILITIES ON MAR. 4, 1935, AND DEC. 31 AND JUNE 30, 1934, BY STATES
[Figures in this table are also included in the table on p. 693 covering "State banks." Figures include private banks that agreed to examination by the Comptroller of the Currency or a Federal Reserve bank, under provisions of sec. 21 (a) of the Banking Act of 1933. Amounts in thousands of dollars]

[^15][Index of Bureau of Labor Statistics. $\quad 1926=100$ ]

Back figures.-For monthly and annual indexes of groups, see Annual Report for 1934 (table 100); indexes of subgroups available at Bureau of Labor Statistics. For weekly indexes covering 1934, see Annual Report for 1934 (table 101).

## INDUSTRIAL PRODUCTION, BY INDUSTRIES (ADJUSTED INDEXES)

[Index numbers of Federal Reserve Board; adjusted for seasonal variation. 1923-25 average $=100$ ]

Note.-For description see Bulletins for February and March 1927. For latest revisions see Bulletins tor March 1932, pp. 194-196, and September 1933, pp. 584-587. Series on silk-loom activity and on production of book paper, wrapping paper, fine paper, box board, mechanical wood pulp, chemical wood pulp, paper boxes, and lumber, usually published in this table, are in process of revision.

## INDUSTRIAL PRODUCTION, BY INDUSTRIES (UNADJUSTED INDEXES)

[Index numbers of Federal Reserve Board; without seasonal adjustment. 1923-25 average $=100$ ]

Note.-For description see Bulletins for February and March 1927. For latest revisions see Bulletins for March 1932, pp. 194-196, and September 1933, pp. $584-587$. Series on silk-loom activity and on production of book paper, wrapping paper, fine paper, box board, mechanical wood pulp, chemical wood pulp, paper boxes, and lumber, usually published in this table, are in process of revision.

1 Figures for winter wheat from estimate for Aug. 1; no estimate for Sept. 1.
2 Includes 16,000 bales grown in miscellaneous territory.
4 Revised production of tobacco for 1934 is exclusive of $28,500,000$ pounds estimated to have been harvested and rendered unmarketable by growers operating under contract with the Agricultural Adjustment Administration.

[^0]:    1 With some exceptions figures represent customs valuations at rate of

[^1]:    For footnotes see table above

[^2]:    T Member

[^3]:    Back figures.-See Annual Redort for 1934 (table 57)

[^4]:    Monthly data are averages of daily or weekly figures
    Average, computed by Treasury Department, of yields of all outtanding Treasury bonds except those due or callable within 8 years.

    Standard Statistics Co.
    Moody's Investors' Service.
    Back figures.-See Annual Report for 1934 (table 94).

[^5]:    ${ }^{1}$ Includes publicly offered issues of Federal banks, Federal interme-

[^6]:    ${ }^{1}$ Includes processing taxes, customs ,and miscellaneous receipts.
    ${ }^{2}$ Excludes public-debt retirement.
    ? Prior to July 1933. recovery and relief expenditures included only net expenditures of the Reconstruction Finance Corporation; other ftems subsequently classified as recovery and relief expenditures were included in general expenditures.

    - Includes expenditures classified by the Treasury as agricultural aid, aid to home owners, and miscellaneous, which includes direct loans and expenditures of the Reconstruction Finance Corporation.
    - Includes also increment resulting from reduction in the weight of the gold dollar, receipts from selgniorage, expenditures chargeable agalnst increment on gold (other than for retirement of national-bank notes), and. beginning June 1935, transactions in checking accounts of certain special governmental agencies whose balances were transferred on May 31 to these accounts. Excess of credits.

[^7]:    - Prellminary

    Loans closed.
    ' No monthly reports prior to September 1934; they now exclude largely new associations recently chartered and inactive associations
    I Includes loans to Federal savings and loan associations, all of which are members, and a negligible amount to others than member institu-

[^8]:    iDiffers from official customhouse figures in which imports and exports for January 1934 are valued at approximate rate of $\$ 20.67$ a fine ounce.

[^9]:    - Preliminary.
    ${ }^{1}$ Except during January 1933, imports of gold from Switzerland are included under "All other countries" since they are not reported separately in the official monthly statistics.
    ${ }^{2} \$ 19,218,000$ inpported by France from Italy in November 1934; $\$ 65,437,000$ in December 1934; $\$ 25,755,000$ in January 1935; $\$ 27,417,000$ in August 1935.
    i Figures for France preliminary.
    Note.-Great Britain and Germany.-In some cases the annual aggregates of the official monthly figures differ somewhat from the revised official totals published for the year as a whole. German gold movements by individual countries, beginning with June 1935, are subiecr to offleial revision.

[^10]:    ${ }^{1}$ Partly or wholly nominal since April 1933.
    P Partly or wholly nominal since April 1934.
    : Paper peso, equivalent to 44 percent of gold peso, quoted in place of latter beginning Dec. 13, 1933. Average for 1933 is for gold peso for Jan. 1-Dec. 10.

    4 Beginning Apr. 10, 1933, new yuan, containing 23.4934 grams of pure silver, quoted in place of old yuan, containing 23.9025 grams of pure silver A verage for 1933 is for new yuan for Apr. 10-Dec. 31; average for old yuan for Jan. 1-A pr. 9 was 20.2103 cents.

    - Silver peso quoted in place of gold peso beginning July 30, 1931. Average for 1931 is for silver peso for Juiy 30-Dec. 31. Average for gold peso for Jan. 2-July 29 was 47.6510 cents.

[^11]:    Annual indexes are unweighted averages of monthiy indexes.
