VoL. 22
DECEMBER 1936
No. 12

## REVIEW OF THE MONTH

On November 21 Chairman Eccles issued the following statement:
"The Board of Governors of the Federal Reserve System met during the week with the Federal Advisory Coun-

Statement by Chairman Eccles cil and later with the Presidents of the Federal Reserve banks. In addition, there was a meeting of the Federal Open Market Committee.
"In the course of these meetings, the business and credit situation was fully reviewed. Particular attention was given to the fact that since the Board's action last July in raising reserve requirements, there has been a continued and substantial increase of member bank reserves, resulting principally from a further large inflow of gold from abroad, so that member bank reserves are once more far in excess of legal requirements and of present or prospective needs of commerce, industry and agriculture.
"Those charged with responsibility for credit and reserve policy are now giving careful consideration to the various problems raised by the effects of these reserves with a view to taking such action at such time as appears to be necessary in the public interest."

On July 14, when the decision to increase reserve requirements of member banks by 50 percent was made, excess reserves were $\$ 2,-$ $900,000,000$; on August 15, after the increase in reserve requirements had come into effect, excess reserves were reduced to $\$ 1,800,000$,000. After that date total reserves of member banks increased by $\$ 600,000,000$, and excess reserves on November 25 were $\$ 2,200$,000,000 , notwithstanding a considerable growth in required reserves caused by an increase in member bank deposits.

The most important influence in this expansion of reserve funds was the addition of approximately $\$ 500,000,000$ to the monetary gold stock. The movement of gold to the United States has continued during the past two months while the new currency arrangement has been in operation.

Considerable light is thrown upon international movements of gold in the past two years by the information on foreign exchange transactions and international capital movements for the period January 2, 1935, to September 30, 1936, which was released by the Treasury on November 27. The data regarding capital movements are reported to the Federal Reserve banks by banks and security brokers on a weekly basis and cover short-term foreign assets and liabilities and the movement of funds into and out of the country in security transactions. The data are classified according to type and to the foreign country or area to which they pertain. Data regarding spot and forward foreign exchange transactions, also classified according to country and area, are reported by banks. It is intended to publish similar data by weeks once a quarter.

The transfers of gold to the United States since the end of September reflect in part the usual seasonal influences, but chiefly the heavy movement of capital from abroad into American securities. Although the volume of this movement was unusually large during the six weeks following the inauguration of the new currency arrangement, the chart shows that it had been proceeding almost without interruption since

April 1935. From that date to the end of September 1936 foreigners put $\$ 640,000,000$ on balance into American securities, most of the orders coming from England and the gold-bloc countries. If this be combined with subsequent acquisitions and allowance be made for rising security prices, the investments of foreigners in this country since April 1935 may now have a market value of $\$ 1,000,000,000$.

Net purchases of securities from Americans by foreigners as reported by banks and brokers in United States, cumulated weekly from Jan, 2, 1935.

The greater part of what foreigners now hold here, however, was acquired before the depression. The Department of Commerce, largely on the basis of a census of foreign holdings, estimated foreign investments in this country at the end of 1935 as follows:

Foreign Long-Term Investments in the United States, December 31, 1935

> [In millions of dollars]

Common stocks (market value) . . . . . . . . . . . . 2,015
Preferred stocks (par value)..
329
Bonds (par value)
Direct investments ${ }^{1}$ (book value)
Other investments (various bases of value)
1,039
Total . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 5,035
${ }^{1}$ Data relate to 1934 .
Allowing for subsequent investments and broadly estimating the value of all stocks and bonds at current market value, it appears that foreigners may now have a long-term investment here of between $\$ 6,000,000,000$ and $\$ 6,500,000,000$, of which readily marketable stocks and bonds comprise perhaps twothirds.

As has been noted, most of this great foreign investment was acquired before the de-pression-a substantial portion of it before the war. Dutch investments in American railroad bonds and British investments in insurance subsidiaries are examples of the older type of investment. In the intervening years foreign buying and selling transactions have resulted in shifts of ownership and changes in the securities held. During the war period foreign holdings in this country were reduced, but during the last decade the movement of foreign funds has been prevailingly into, rather than out of, American securities. There appear to have been no sustained foreign withdrawals from the American security markets even during the early years of the depression when confidence was at a low ebb and prices were declining sharply. While many foreigners were selling during these years of world-wide unsettlement, they could do so only at prices that would induce potential purchasers to buy. At these low prices foreigners as a group invested as much in American securities as they withdrew.

Changes in private long-term foreign investment in the United States and American investment abroad during the past decade are shown in the table at the top of the next page.

American investments abroad have been far more variable during the last decade than foreign investments in this country. This reflects the rise and fall of the market for new foreign issues. In 1927 and 1928 new foreign issues were floated in the United States at a rate of well over $\$ 1,000,000,000$ a year. By 1932 the new issue market had almost disappeared. Americans had already begun to sell back to foreigners large amounts of foreign dollar bonds floated in earlier years. The chart above shows foreign buying of foreign securities in the United States during the period for which the Treasury figures are available.

${ }_{2}$ Including arbitrage transactions not shown in following columns.
${ }^{3}$ Transactions on redemption and sinking fund account included with net security purchases.
${ }_{4}$ Figures not available.

As a result of the maintenance of the foreign investment position in this country and the withdrawal of Americans from investments abroad the United States shifted in 1931 from a lender of private long-term capital on balance to the world-a position it had occupied almost without interruption since the war-to a net importer of such capital. The first column of the above table shows that this change in the country's international capital position has been accentuated in the last two years.

The international shifts of bank deposits and other short-term funds since 1929 have been in general far greater

International short-term balances than the movements of longterm capital. Annual figures for the period 1930 to September 1936 covering the movement of foreign and American balances are given in the table in the next column. The yearly figures are taken from Department of Commerce reports; those for the first nine months of 1936 are from the records compiled by the Federal Reserve banks for the Treasury.

The net outflow of short-term funds in the period 1930 to 1933 amounted to $\$ 2,000,000$,000 compared with a net inflow of American and foreign long-term capital of $\$ 200,000$,-
000. Foreign balances in the United States, which exceeded $\$ 3,000,000,000$ in 1929, were reduced by $\$ 2,500,000,000$ in the next four

## Movement of International Short-Term Banking Funds

years. This reduction, however, did not result in any substantial export of gold over the period as a whole. Part of the foreign shortterm balances were utilized to pay for new foreign investments at long term in the United States and for the repurchase from Americans of long-term investments abroad, and another part went to repay American short-term claims on foreign countries, which were reduced by $\$ 500,000,000$ during the period. The balance of foreign funds held in the United States was largely required to pay for a continuing surplus of merchandise exports from the United States and the service
on American investments in foreign coun-tries-items that were only partially covered by expenditures of American tourists, immigrant remittances, and other international revenues. The major items in the inter-

national balance of payments of the United States for the periods 1930-1933, and 1934 to the end of September 1936, are shown in the above table, largely drawn from Department of Commerce data.

Figures cumulated weekly from Jan. 2, 1935. Movement in balances represents net transfer of American and foreign shortterm funds to United States from abroad as reported by banks in United States. Movement in security transactions, in which allowance has been made for changes in brokerage balances, represents net purchases of securities from Americans by foreigners as reported by banks and brokers in United States.

Since 1933 the short-term capital movement has been sharply reversed, and the continued inflow of long-term capital has been supplemented by an even larger transfer of balances from abroad. The chart shows this movement for the period during which the Treasury figures are available. Some of these short-term funds have come to the United States in a comparatively steady flow since revaluation, but a far larger part has been received at intervals in sharp movements, usually associated with a financial or a political crisis in the former gold-bloc countriesFrance, Switzerland, and the Netherlands. Great Britain and other European countries have been affected by these developments as well as by international uncertainties in Europe.

At the end of September 1936 short-term balances held by foreigners in the United States amounted to $\$ 1,460$,-

Increase in foreign balances since 1933 000,000 , an increase of nearly $\$ 1,000,000,000$ since the end of 1933. The movement of total balances and balances by countries for the period for which the figures have been made public is shown in the charts on the next page. French Dutch, and Swiss balances on September 30, 1936, totaled $\$ 390,000,000$, the bulk of which was acquired since the end of 1933. This inward movement of funds was associated to an important degree with financial crises in the gold-bloc countries, though also influenced to some extent by the unsettled international situation in Europe. While readjustment of the currencies of the gold-bloc countries has been followed by some return of hoarded funds and capital from London, uncertainties abroad continue and gold-bloc balances in the United States have been little reduced since September.

The inflow of British balances from the end of 1933 through September 1936 was $\$ 230,000,000$, or nearly a quarter of the total increase in foreign liabilities. The gold-bloc difficulties, through their influence upon the
forward exchange market, were an important factor in this movement, since the transfer of French and other funds to London raised the spot rate for sterling to a higher level

Weekly figures representing banks' own accounts and accounts handled on behalf of customers.
than operators in the forward market were willing to accept as permanent. In anticipation of a subsequent decline, the rate on sterling for future delivery was quoted substantially below the spot rate. This permitted British and other holders of sterling to transfer their funds to New York at a profit, inasmuch as sterling sold at the spot rate could be repurchased for future delivery at a rate so much lower that the loss of interest in London was more than offset. Funds also were transferred from London to New York in substantial volume during the international tension over the Italian-Ethiopian hostilities.

At the end of September British balances in the United States totaled $\$ 295,000,000$. Recently there has been a return movement of British balances. This has accompanied a reduction in the discount on forward sterling and some firming of interest rates in London.

Other European and non-European countries have increased their balances in the United States by $\$ 420,000,000$ since 1933 , of which about three-quarters was for account of non-Europeans. For the most part the increase in these balances has been steady, in contrast to the series of sharp inward movements from Great Britain and the gold-bloc countries followed by periods of moderate withdrawal. The regular manner in which the balances of other European and non-European countries have been built up suggests that these funds, which aggregated $\$ 780$,000,000 at the end of September, represent to a large extent an accumulation of working balances customarily employed on foreign money markets. The special factors which, in recent years, have rendered other money centers unattractive to such funds, have resulted in their concentration in New York. While the return of more stable monetary conditions may stimulate some redistribution of these funds among the leading money markets, an expansion of world trade should increase the working balance requirements of other countries which, in recent years, have increased their funds in the United States for other reasons.

The reduction in American balances abroad since 1933 amounts to $\$ 625,000,000$, if temporary loans on gold in transit are eliminated. Of this total, $\$ 180,000,000$

## Return of

 American balances since 1933 was withdrawn from the London market and \$65,000,000 from the gold-bloc countries, largely in response to influences already discussed. An amount in excess of $\$ 250,000,000$ represents the gradual liquidation of frozen American claims on European and Latin American countries where ex-change restrictions exist. The steady reduction in American balances abroad, except for temporary loans on gold at periods of heavy gold movements from Europe, is shown in the first chart on the preceding page. This inward movement of American funds has accentuated the effect upon the exchange market and upon member bank reserves of the great flow of foreign capital to the United States in recent years.

Appointment of First Vice President of the Federal Reserve Bank of Minneapolis
Effective November 19, 1936, Mr. O. S. Powell, who was serving as Vice President, was appointed First Vice President of the Federal Reserve Bank of Minneapolis.

Erratum in Federal Reserve Bulletin for November
On page 852 of the Bulletin for November 1936, first paragraph of the second column, seventh line, the new parity of the Italian lira should be $\$ 0.05263$ instead of $\$ 0.5263$.

## INCLUSION OF ADDITIONAL COUNTRIES IN THE INTERNATIONAL CURRENCY ARRANGEMENT

On November 24 the following statement was issued by the Treasury:
"By authority of the President the Secretary of the Treasury announces that as a further step in the direction of international monetary equilibrium arrangements have been made to give effect to the desire of the Governments of Belgium, The Netherlands and Switzerland to cooperate with the Governments of the United States, Great Britain and France in accordance with the principles of the tripartite declaration of September 25, 1936.
"The Belgian Government notified the United States of its adherence to these principles on September 26. Similar declarations of adherence have now been received from the Governments of The Netherlands and Switzerland.
"The Governments of the United States, Great Britain, and France welcome the declarations of the Governments of Belgium, Switzerland and The Netherlands expressing
their adherence to the principles stated in the tripartite declaration of September 25.
"Arrangements have been made by the United States Treasury for gold transactions on a reciprocal basis with these three countries. These arrangements are given effect by public statements of the Secretary of the Treasury which are annexed hereto:
"(1) A statement supplementing the statement of the Secretary of the Treasury dated October 13, 1936, with respect to reciprocal transactions in gold with certain countries, and withdrawing the statement of January 31, 1934, relating to the sale of gold for export;
"(2) A statement naming the countries of Belgium, The Netherlands and Switzerland as complying with the conditions of the statement of October 13 as supplemented by the above statement.
"In addition to the statements to which reference is made above, copies of communications from the Governments of The Netherlands and Switzerland are made public herewith.

## First Statement

"Supplementing the announcement made by him on October 13, 1936, ${ }^{1}$ relating to the sale of gold for export, the Secretary of the Treasury states that (hereafter, and until, on twenty-four hours' notice, this statement of intention may be revoked or altered) the United States, in addition to sales of gold to the exchange equalization or stabilization funds of foreign countries, will also sell gold for immediate export to, or earmark for the account of, the treasuries, or any fiscal agencies acting for or whose acts in this connection are guaranteed by the treasuries, of those countries whose treasuries or fiscal agencies so acting or guaranteed are likewise offering to sell gold to the United States, provided such offerings of gold are at such rates and upon such terms and conditions as the Secretary may deem most advantageous to the public interest. The Secretary announces herewith, and will hereafter announce daily, the names of the foreign countries complying with the foregoing conditions. All such sales of gold by the United States will be made through the Federal Reserve Bank of New York, as fiscal agent of the United States, upon the following terms and conditions which the Secretary of the Treasury deems

[^0]most advantageous to the public interest:
"Sales of gold will be made at $\$ 35$ per fine ounce, plus one-quarter per cent handling charge, and sales and earmarking will be governed by the Regulations issued under the Gold Reserve Act of 1934.
"The Secretary further announces that his statement of January 31, 1934, ${ }^{2}$ relating to the sale of gold for export, is accordingly withdrawn.

## Second Statement

"The Secretary of the Treasury today named the following additional countries:

## Belgium <br> The Netherlands <br> Switzerland

as complying with the conditions specified in his press release of October 13, 1936, as supplemented by his press release of November 24, 1936, for the purchase of gold from the United States for immediate export or earmark.

Netherlands Communication
"Royal Netherland Legation
Washington, D. C. November 21, 1936.
No. 3775
"Sir:
"Acting upon instructions of the Minister of Foreign Affairs of the Netherlands I have the honor to inform Your Excellency of the following declaration made by my Government:
"'The Government of The Netherlands has cognizance of the declarations by which the

[^1]Governments of France, Great Britain and the United States have seen fit to express their intention with regard to their monetary policy and adheres to the general principles stated in their tripartite declaration of September 25, 1936.'
"I avail myself of this opportunity to renew to you, Sir, the assurances of my highest consideration.
(Signed) C.van Breugel Douglas, Chargé d' Affaires a. i. of the Netherlands.
"The Honorable R. Walton Moore, Acting Secretary of State, Washington, D. C."

## Swiss Communication

"Légation de Suisse,
Washington, D. C.
November 21, 1936.
"Sir:
"I have the honor to inform you that I have been instructed by my Government to convey to you the following:
"'The Government of Switzerland has cognizance of the declarations by which the Governments of France, Great Britain and the United States of America have seen fit to express their intentions with regard to their monetary policy and adheres to the general principles stated in their tripartite declaration of September 25.'
"Accept, Sir, the assurances of my highest consideration.
(Signed) Marc Peter, Minister of Switzerland.
"The Honorable R. Walton Moore, Acting Secretary of State, Washington."

## NATIONAL SUMMARY OF BUSINESS CONDITIONS

## [Compiled November 25 and released for publication November 28]

Volume of industrial production increased seasonally in October and there was a substantial rise in employment and pay rolls. Prices of a number of industrial raw ma-

Monthly index of physical volume of production, adjusted for seasonal variation, 1923-1925 average =100.
terials and finished products have advanced.
Production and employment.- In October the Board's seasonally adjusted index of industrial production was at 109 per cent of the 1923-1925 average, about the level of the three preceding months. Steel production was in larger volume than in any other month since 1929, and the rate of activity was sustained in the first three weeks of November. Output of automobiles rose sharply from September to October. The increase in this

Indexes of value of sales, 1923-1925 average $=100$.
period was less than a year ago, reflecting the fact that this year the date of the shift to production of new models was less uniform among the leading producers, but in the first
three weeks of November production increased further and was larger than last year. Activity at textile mills, which usually increases in October, declined slightly from the high level of September. In the meatpacking industry output showed a further increase. Coal production increased seasonally, and production of crude petroleum continued at recent high levels.

Factory employment increased by more than the usual seasonal amount between the middle of September and the middle of October. Increases in employment were general among the durable goods industries, with the largest expansion reported at factories producing automobiles and machinery, while changes in employment in the nondurable goods industries were largely of a seasonal

Indexes compiled by the United States Bureau of Labor Statistics, $1926=100$. By months, 1929 to 1931 ; by weeks, 1932 to date. Latest figure is for week ending November 21, 1936.
character. Factory pay rolls rose by considerably more than the usual seasonal amount.

Value of construction contracts awarded, as reported by the F. W. Dodge Corporation, was slightly smaller in October than in September, with a decline in publicly owned projects partly offset in the total by an increase in awards for private non-residential construction.

Distribution.-Sales by department stores and by mail-order houses serving rural areas increased from September to October by a larger amount than is usual at this season. Variety store sales showed a less than seasonal rise. Freight-car loadings increased further in October, reflecting chiefly a larger
volume of shipments of miscellaneous freight and of coal.

Commodity prices.-The general level of wholesale commodity prices advanced somewhat during the first three weeks of November, following two and a half months of little change. Since the middle of October prices of a number of industrial raw materials, particularly nonferrous metals, hides, rubber, silk, and wool, have shown a considerable rise and there have also been substantial increases in the prices of some finished

Wednesday figures for reporting member banks in 101 leading cities, September 5, 1934, to November 18, 1936. Loans on real cities, September 5 , 1934, to November 18, 19ns to banks, and acceptances and commercial paper estate, loans to banks, and acceptances and commercial paper bought inc
separately.
products, including automobile tires, glass, woolen goods, and cotton goods.
Bank credit.-Member bank reserves increased in the four weeks ended November 18, chiefly as the result of transfers of gold to the United States. On that date member bank reserves were $\$ 2,270,000,000$ larger than legal requirements, the highest level since the increase in reserve requirements which became effective in the middle of August.

Adjusted demand deposits at weekly reporting member banks in leading cities have continued to increase, and on November 18 amounted to about $\$ 15,400,000,000$. Since the end of last May these deposits have increased by over $\$ 800,000,000$, reflecting a rise in deposits outside New York City. Time deposits at reporting banks have remained at about the $\$ 5,000,000,000$ level.

Holdings of United States Government obligations at reporting banks have recently declined somewhat further. Since the end of June the decline has amounted to about $\$ 300$,000,000 and has been at New York City, with little change elsewhere. Holdings of other securities have declined in recent weeks, reflecting chiefly a reduction in the amount held by New York City banks. Loans to customers have shown some further increase.

MEMBER BANK RESERVES AND RELATED ITEMS

## RESULTS OF 1935 CENSUS OF BANKS

The Bureau of the Census of the United States Department of Commerce has just published a report presenting the results of a nation-wide census of banks taken as a part of the 1935 census of business. Statistics presented in the report were collected by the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation, as well as by the Bureau of the Census.

The report gives statistics of the number of banks and branches during 1935, the number of executives and of other bank employees, and the total salaries and wages paid in each of these groups during the year. Data are given separately by States and 9 geographical divisions for the following classes of banks: member banks of the Federal Reserve System, insured banks of the Federal Deposit Insurance Corporation, national banks, State incorporated banks, mutual savings banks, private banks, and industrial banks. Data are also shown for unit banks and for branch banks. All banks actively engaged in the banking business during any part of 1935 with the exception of 20 banks and 3 foreign bank agencies from which reports could not be obtained are included in the report. The following table gives the number of banks and

Number and Salaries of Bank Executives, Salaried Officers, and Employees, 1935

|  | Num- <br> ber of banks and branches re-porting | Executives and salaried cfficers |  | All other employees |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

| All banks | 19,581 | 58,482 | \$197, 316 | 207,976 | \$290, 378 |
| National banks.---.------ | 6, 725 | 23, 862 | 87, 835 | 90, 240 | 124. 109 |
| State incorporated banks..- | 11, 574 | 30, 841 | 90, 355 | 88, 822 | 120, 644 |
| Private banks-........- | ${ }_{673}^{253}$ | ${ }_{2,482}^{251}$ | 12,787 | 2,338 11,515 | 4,505 18,634 |
| Industrial and Morris plan banks. | 249 | + 521 | 1,785 | 1,182 1,829 | 18, 2,268 |
| Federal Reserve and Joint Stock Land banks...... | 107 | 525 | 4,210 | 13, 232 | 20, 218 |

the number of officers and employees at the end of 1935 or, for some banks, at the time they ceased operation, and their compensation by class of bank during the year or any part of the year when the banks were in operation. The table on the following page gives similar information by States.

As shown in the table below there were 16,249 banks in the United States actively engaged in the banking business during 1935, including the Federal Reserve banks and the Joint Stock Land banks and counting only head offices of branch systems. Of this number 9,762 were State incorporated banks, 5,402 were national banks, 554 were mutual savings banks, 243 were private banks, and 181 were industrial and Morris Plan banks. In the entire country 890 banks had branches numbering 3,332 , of which 3,135 were branches of national banks and State incorporated banks.

Number of Banks and Branches, ${ }^{1} 1935$

|  | Number of banks |  |  | Number of branches |
| :---: | :---: | :---: | :---: | :---: |
|  | Total | $\underset{\text { Unit }}{\text { Unks }}$ | $\begin{aligned} & \text { Banks } \\ & \text { with } \\ & \text { branches } \end{aligned}$ |  |
| All banks. | 16,249 | 15,359 | 890 | 3,332 |
| National banks .-.-.---.-...-- | 5, 402 | 5, 226 | 176 | 1,323 |
| State incorporated banks.....- | 9, 762 | 9,143 | 619 | 1,812 |
| Private banks_---7...........- | 243 | 236 | ${ }_{6}^{7}$ | 10 |
| Mutual savings banks.-.-.---- | 554 | 492 | 62 | 119 |
| Industrial and Morris plan banks. | 181 | 155 | 26 | 68 |
| Federal Reserve and Joint Stock Land banks. | 107 | 107 |  |  |

${ }^{1}$ The number of banks differs somewhat from the number shown on pages 531-535 of the July 1936 BULLETIN, principally because these figures tion for some time during 1935 but not at the end of that year, also such private banks as did not report to State banking departments. The
Census figures were obtained principally from the three Federal bank supervisory agencies, whereas those on pages 531-535 are based on abstracts of condition reports issued by the Comptroller of the Currency and State banking departments. "State banking department abstracts of Morris Plan and other industrial banks. For similar reasons the number of branches as shown in this table differs from the number shown on page 304 of the April 1936 issue of the Bulletin.
2 Federal Reserve banks, branches, and agencies; Joint Stock Land banks; and foreign bank agencies are considered as unit banks.

Bank Employment, Bank Pay Rolls, and Number of Banks, 1935

## REVISED INDEXES OF FACTORY EMPLOYMENT ADJUSTED FOR SEASONAL VARIATION

The Board's seasonally adjusted indexes of factory employment have been revised to take account of changes in the indexes of the Bureau of Labor Statistics, from which the Board's adjusted indexes are derived, and of changes in the seasonal characteristics of many individual employment series. ${ }^{1}$ Chart I shows the revised index of total factory employment, unadjusted and adjusted for seasonal variation, by months from 1919 to date.
made for many individual industries, but they were partly offsetting in the total, inasmuch as some series were raised while others were lowered. Census data, which are collected every two years, are not yet available for 1935 and the relationships established between the new series and the old series in December 1933 have been continued except for a few instances in which current data have been revised. On the basis of experi-

## FACTORY EMPLOYMENT

Nature of revisions.-The principal revisions made by the Bureau of Labor Statistics were for the period since 1931 and reflected adjustments of the currently reported series to the level of employment shown by the 1933 Census of Manufactures. ${ }^{2}$ As a result of adjustments to the census level, the revised index of total factory employment for the period since the end of 1933 is at a level about 5 percent higher than the former index. ${ }^{3}$ Considerably larger revisions were

[^4]ence with past adjustments, it seems likely that the index of total factory employment for the period since the end of 1933 will be raised further when subsequent census adjustments are made.

The census adjustments raised or lowered the levels of the individual series but did not change their month-to-month movements except for gradual shifts during the period from 1931 through 1933. Seasonal and other movements for the groups and the total index were altered to some extent, however, because the census adjustment changed the relative importance of individual series, which at times showed marked differences in movements.

In view of this revision in basic data, the Board has taken occasion to reexamine and revise the seasonal adjustment factors used
in computing the seasonally adjusted indexes. ${ }^{4}$ Revisions in these factors have resulted in substantial changes during recent years in the month-to-month fluctuations of many of the individual seasonally adjusted series, and have contributed to moderate

FACTORY EMPLOYMENT

Chart II.-These figures are calculated by dividing the index without seasonal adjustment by the corresponding adjusted index. The figures for November and December are estimated.
changes in the monthly movements of the adjusted index of total factory employment, which is compiled by weighting and combining the adjusted series for each industry. In general, the significant differences between the new factors and those formerly used occur in the period since 1930, revisions for earlier years having been relatively small. Chart II shows for each month in 1936 the effective seasonal adjustment for the index of total factory employment as derived from the new seasonal factors for individual series.

When the 1934 revision of seasonal factors was made, little reliance could be placed upon the data for the years immediately preceding 1934, inasmuch as they covered the bottom of the depression and showed greatly distorted movements. While the data since early 1934 have also been subject to broad nonseasonal fluctuations, such movements have been smaller than in other recent years and a more nearly accurate measurement of current seasonal variation has been possible.

[^5]In 1934 provisional adjustment factors were computed for 29 series for which current monthly data were first collected in 1931 and for two which began in 1929. At that time the periods covered by these data were too short, particularly in view of the sharp changes in activity, to make possible more than a rough approximation of seasonal movements. With data for two additional years it has been possible to measure more accurately the seasonal variation of these industries.

Seasonal factors for most of the other series, which began in 1919 or 1923, were also found to be in need of revision for the last few years and in some cases for earlier years as well. Nearly all of the changing seasonal factors ${ }^{5}$ formerly used were revised for recent years, and changing seasonal factors were computed for most series formerly regarded as having constant seasonal movements. At the present time 54 of the 58 series for which monthly data have been available since 1923 have changing seasonal factors.

Chart III.-Revised series adjusted to Census of Manufactures through 1933; seasonal factors computed in 1936. factures through 1933; seasonal factors computed in 1936. Former series adjusted to Census of M
1931 ; seasonal factors computed in 1934.
The combined effects upon the total index of adjustments to the 1933 Census of Manufactures and of revisions in seasonal factors are indicated for the period from 1931 to date in Chart III, which shows the revised index and the series formerly published.

[^6]Seasonally adjusted indexes of employment in industries manufacturing durable goods and in those manufacturing nondurable goods have been compiled and are presented for the first time in Table 5 and in Chart IV.

The tables on factory employment and pay rolls currently published in the BuLLETIN have been revised to include more data as indicated on pages 1009 to 1012 of this issue.
able goods industries and a few others showing abrupt nonseasonal shifts, a freehand curve was used in place of the moving average in order that a closer approximation to the cyclical movement might be obtained, and ratios of the unadjusted data to the values read from the freehand curve were computed. The seasonally adjusted indexes computed in 1934 and the twelve-month moving

Chart IV.-Indexes adjusted to Census of Manufactures through 1933. In this grouping the durable goods industries are those in the iron and steel, machinery, transportation equipment, railroad repair shop, non-ferrous metals, lumber, and stone, clay and glass groups. The nondurable goods industries are those in the textile, leather, food, tobacco, paper and printing, chemicals and petroleum, and rubber groups.

Method used for seasonal adjustment.The basic method used for the current revision of seasonal factors was the ratio-to-twelve-month-moving average method, which has been used by the Board in practically all of its adjustments for seasonal variation, except the adjustment of the short employment series in 1934 when a ratio-to-free-hand curve was used. ${ }^{6}$ The twelve-month moving average is a fairly accurate base or standard from which to measure seasonal variations when cyclical or other nonseasonal movements are of moderate proportions. It has proved, however, to be relatively insensitive to sharp cyclical turns and to other sudden shifts shown by many series during recent years. For some industries, particularly the dur-

[^7]averages of the unadjusted data were used as guides for deriving such freehand curves and in all cases the ratios to freehand curves were compared with the ratios to moving averages. In selecting the freehand curves, a careful attempt was made to avoid including in them any regularly recurring movements and to draw them at the general level of the unadjusted data. The use of the freehand curve made it possible to follow more closely cyclical movements and other marked nonseasonal fluctuations such as those resulting from strikes and the NRA codes, but in no case were the ratios for the months showing rapid changes given very much weight in selecting the seasonal factors. When the freehand curve was used, however, the ratios for other months immediately preceding or following the periods of rapid
change were free from the effect of such changes, while the ratios to moving average were not.

Special problems were encountered in the seasonal adjustment of some individual series. In the cement industry, for example, the absolute amount of seasonal fluctuation appeared to be as great at the depth of the depression as in earlier years. It was decided, therefore, to allow for seasonal variation by adding or subtracting absolute amounts from the unadjusted indexes rather than by dividing the unadjusted indexes by the usual seasonal ratios. It was found that such absolute seasonal factors could be determined more accurately and it is believed that they will probably be more reliable when activity in this industry increases. The automobile industry also presented a special problem owing to a shift in 1935 in the date for introducing new models. This new policy,
which resulted in an abrupt change in seasonal variation of employment in the industry, has not yet been in effect long enough to make possible accurate determination of the full extent of the change. The seasonal factors selected for current use, therefore, are only rough approximations.

Tables.-The Bureau of Labor Statistics' revised indexes of total factory employment and pay rolls, without seasonal adjustment, are shown in Table 1.

The Board's revised seasonally adjusted index for total factory employment is shown in Table 2 and indexes by groups and by industries are given in Tables 5 and 6. Table 3 shows the seasonal factors for 1936, and Table 4 gives, by industries, the initial year of the series and the average number of employees in the 1923-25 base period, a measure of the relative importance of each industry in the total index.

Table 1-Revised Indexes of Factory Employment and Pay Rolls, Without Seasonal Adjustment
[Compiled by Bureau of Labor Statistics. Adjusted to Census of Manufactures through 1933. 1923-25 average == 100]]

## NETHERLANDS GOLD EMBARGO AND CURRENCY LEGISLATION

The Netherlands Government announced late on September 26 its intention to prohibit the export of gold as a consequence of the monetary measures taken by France and Switzerland earlier the same day. This announcement was followed by the issue of a Royal decree dated September 26 promulgating the embargo and of two regulations of the Minister of Finance dealing respectively with the procedure for licensing exports of gold and the closing of the security exchanges. A brief account of the Government's action was given in the Bulletin for October 1936, p. 760. The Royal decree and the regulations were published in a special number of the Nederlandsche Staatscourant bearing the date September 28. A law of September 30 gave statutory basis to the embargo decree, and another law of September 30 enacted measures setting up a stabilization fund and relieving the Netherlands Bank of its obligation to redeem its notes. Translations of various measures adopted are given below.

## Prohibition of the Export of Gold Coin and Bullion

## September 26, 1936. No. 52.

We Wilhelmina, by the grace of God, Queen of the Netherlands, Princess of Orange-Nassau, etc.

On proposal of Our Minister of State, Minister of Colonies, President of the Council of Ministers, and of Our Minister of Finance of September 26, 1936, No. 79, General Treasury:

Having received a request of the Netherlands Bank that Government measures be taken to prevent the possibility of removal of the gold supply of the Netherlands to foreign countries;

Have decreed and do hereby decree:
that the export of gold coin and gold bullion is temporarily prohibited from a date to be determined by Our Minister of Finance, subject to exceptions therefrom in certain specified cases to be granted in the discretion of the said Minister.

Our Minister of Finance is charged with the execution of this decree.

The Loo, September 26, 1936.
Wilhelmina.
The Minister of State,
Minister of Colonies,
President of the Council of Ministers,
H. Colijn.

The Minister of Finance, OUD.

The Minister of Finance has ruled:
That in pursuance of the Royal decree of September 26, 1936, No. 52, the export of gold coin and gold
bullion is temporarily prohibited beginning September 27, 1936, with the understanding that exceptions from this prohibition will be granted in favor of shipments accompanied by an authentic certificate of the Netherlands Bank, dated September 28, 1936, or later, stating that the shipment described therein is released for export; the said certificate must be delivered to officials of the customs service for cancellation at the time of exportation.

The Minister of Finance,
Oud.
The Hague, September 26, 1936.
Law of the Thirtieth of September, 1936, Concerning Prohibition of Export of Gold Coin and Bullion. ${ }^{1}$

Wilhelmina, by the grace of God, Queen of the Netherlands, Princess of Orange-Nassau, etc.
To all to whom these presents shall come, greetings:
Whereas We have considered it necessary to give statutory basis to Our decree of September 26, No. 52, containing prohibition of export of gold coin and gold bullion;
Therefore, after hearing the Council of State and after consultation with the States-General, We have approved and do hereby approve the following:

Article 1. As soon as this Act comes into force the Royal decree of September 26, 1936, No. 52, prohibiting the export of gold coin and gold bullion shall acquire force of law as from the day on which it was signed. The embargo shall remain valid until revoked by the Government; its revocation shall be published in the Nederlandsche Staatscourant.

Art. 2. The provisions of the Act of August 3, 1914, (Staatsblad No. 344), as amended by existing or future laws, shall apply to the embargo in like manner as would be the case if such an embargo were decreed in virtue of the said Act; except in so far as the embargo itself contains provisions to the contrary.

Art. 3. This law shall come into force on the day after its promulgation.

We order and command that this decree shall be published in the Staatsblad, and that all Ministerial Departments, authorities, institutions, and officials whom it may concern shall see that it is strictly executed.

Given at Loo Palace, the thirtieth of September, 1936.

Wilhelmina.
The Minister of State,
Minister of Colonies,
President of the Council of Ministers,
H. Colijn.

The Minister of Finance, Oud.
Issued the thirtieth of September, 1936. The Minister of Justice, Van Schaik.
${ }^{1}$ Published as Staatsblad No. 101.

Law of the Thirtieth of September, 1936, Containing Certain Provisions in Connection with the Extraordinary Circumstances with Regard to Foreign Exchange. ${ }^{2}$

Wilhelmina, by the grace of God, Queen of the Netherlands, Princess of Orange-Nassau, etc.

To all to whom these presents shall come, greetings:
Whereas, We have considered it desirable to adopt certain measures, in connection with the extraordinary circumstances, with regard to foreign exchange;

Therefore, after hearing the Council of State and after consultation with the States-General, We have approved and do hereby approve the following:

Article 1. A fund is established, for account and risk of the Government, for the purpose of influencing foreign exchange rates by buying and selling money transfers, bills and similar paper payable abroad, and gold.

Art. 2. (1) The Minister of Finance is authorized to make advances to the fund mentioned in article 1 on conditions to be fixed by himself; the total amount of the credits granted to the fund is not to exceed three hundred million guilders.
(2) The Minister of Finance is authorized to procure the funds required for making the advances mentioned in the preceding paragraph by the sale of Treasury paper or by borrowing on the security of such paper, subject to existing or future provisions of law on this subject.
(3) Payments for interest and expenses incurred in connection with the issue of the aforementioned Treasury paper shall not be made out of funds appropriated in the budget to make provision for similar liabilities created by ordinary issues of Treasury paper.

[^10]Art. 3. Notwithstanding the provisions to the contrary embodied in article 12 of the Bank Act $1919^{3}$ (Staatsblad No. 553 of 1918), the Netherlands Bank is authorized to grant credits to the Government on the security of the Treasury paper which the Minister of Finance may issue under the terms of the preceding article.

ART. 4. (1) The fund mentioned in article 1 will be managed by the Netherlands Bank in accordance with the rules to be laid down by the Minister of Finance and under his supervision.
(2) The provisions of the Public Accountability Act of 1927 (Staatsblad No. 259) shall not apply to the fund's operations.
(3) As soon as the country's interests will permit, provisions shall be made by law to determine the way in which the use made of the moneys of the fund shall be accounted for and the date on which such account shall be rendered.

Art. 5. The Netherlands Bank's obligation to pay its notes is suspended until further action by law.

Art. 6. This law shall come into force on the day after its promulgation.

We order and command that this law shall be published in the Staatsblad and that all Ministerial Departments, authorities, institutions, and officials whom it may concern shall see that it is strictly executed.

Given at Loo Palace, the thirtieth of September, 1936.

[^14]MOVEMENT OF GOLD TO AND FROM UNITED STATES ${ }^{1}$
[In thousands of dollars]

${ }^{1}$ Figures represent customs valuations which, with some exceptions, are at rate of $\$ 35$ a fine ounce.
${ }^{3}$ Includes all movements of unreported origin or destination
Back figures.-See table, p. 829, and Annual Report for 1935 (tables 34 and 35).

## ALL BANKS IN THE UNITED STATES

Comprises all national banks in the continental United States and all State commercial banks, trust companies, mutual and stock savings banks and such private and industrial banks as are included in abstracts issued by State banking departments. Also includes, during the period June 1934-June 1935, private banks which, pursuant to the provisions of sec. 21 (a) of the Banking Act of 1933, submitted condition reports to the Comptroller of the Currency. Under the amended provisions of Sec. 21 (a) private banks no longer report to the Comptroller of the Currency. For comparative figures of private banks included in the figures from June 1934 to December 1935, see Federal Reserve Bulletin for December 1935, p. 883, and July 1936, p. 535. Figures for nonmember banks are for dates indicated or nearest thereto for which figures are available.

[^15]
## ALL MEMBER BANKS-LOANS AND INVESTMENTS

[In millions of dollars]

[^16]
## ALL MEMBER BANKS-RESERVES, DEPOSITS, AND BORROWINGS

[In millions of dollars]

${ }^{1}$ Prior to Dec. 31, 1935, excludes balances with private banks to the extent that they were then reported in "Other assets." Since Oet. 25, 1933, includes time balances with domestic banks which on that date amounted to $\$ 69,000,000$ and which prior to that time were reported in "Other assets."
${ }_{2}$ Does not include cash items in process of collection reported in balances with domestic banks. Prior to Dec. 31, 1935, includes cash items on hand but not in process of collection, amounting on that date to $\$ 16,000,000$
${ }^{3}$ Includes "Due to Federal Reserve banks (transit account)", known as "Due to Federal Reserve banks (deferred credits)" prior to Dec. 31, 1935.
4 Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection.
${ }^{5}$ Beginning June 1933 figures relate to licensed banks only.
Central reserve city banks.
Back figures.-See Annual Report for 1935 (table 53)

r Revised.
${ }^{1}$ Loans (secured by stocks and bonds) to brokers and dealers in securities.
${ }_{3}^{2}$ Includes reporting banks' own acceptances.
${ }^{3}$ Figures reported prior to 1936 excluded a certain amount of time balances and balances with private banks; the amount excluded on Dec. 31 , 1935, was approximately $\$ 38,000,000$ at all weekly reporting member banks.

For other figures and note, see next page.

[^17] of firms' own partners.
${ }_{2}$ Includes both money borrowed from banks and trust companies in New York City and elsewhere in the United States and also money borrowed from other lenders (not including member firms of national securities exchanges).

Note.-For explanation of these figures see "Statisties on Margin Accounts" in Bulletin for September 1936, The article describes the methods by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

## FEDERAL RESERVE BANK DISCOUNT RATES

[Percent per annum]

| Federal Reserve Bank | Rediscounts and advances under secs. 13 and 13a of the Federal Reserve Act ${ }^{1}$ |  |  | Advances under sec. 10(b) of the Federal Reserve Act |  | Advances secured by direct obligations of the United States (last paragraph of sec. 13 of the Federal Reserve Act) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rate <br> Nov. 30 | In effect beginning- | Previous rate | Rate Nov. 30 | $\begin{gathered} \text { In effect } \\ \text { beginning- } \end{gathered}$ | Rate Nov. 30 | $\begin{gathered} \text { In effect } \\ \text { beginning- } \end{gathered}$ |
| Boston. | 2 | Feb. 8, 1934 | $21 / 2$ | 21/2 | Sept. 20, 1935 | 4 | Oct. 20, 1933 |
| New York | 11/2 | Feb. 2, 1934 | 2 | 2 | Oct. 10, 1935 | 31/2 | Feb. 8, 1934 |

| Cleveland.- | $2^{11 / 2}$ | May 11, 1935 | 2 | 2 | Oct. 19, 1935 | $31 / 2$. | May 11, 1935 |
| Atlanta. |  | Jan. 14, 1935 | $21 \%$ | $21 / 2$ | Sopt. 14, 1935 | 4 | Feb. Mar. 17, 17, 1934 |
| Chicago. | 2 | Jan. 19, 1935 | $21 / 6$ | 21/2 | Sept. 20, 1935 |  | Oct. 16, 1933 |
| St. Louis | 2 | Jan. 3, 1935 | $21 / 2$ | $21 / 2$ | Oct. 3,1935 | 4 | Feb. 21, 1935 |
| Minneapolis |  | May 14, 1935 | $21 / 2$ | 21/2 | Oct. 29, 1935 | $41 / 2$ | Apr. 15, 1933 |
| Kansas City | 2 | May 10, 1935 | $21 / 2$ | 21/2 | Aug. 26, 1935 | 31/2 | May 10, 1935 |
| Dallas......- | 2 | May 8, 1935 | $21 / 2$ | $21 / 2$ | Oct. 8, 1935 | 4 | Mar. 12, 1934 |
| San Francisco. | 2 | Feb. 16, 1934 | $23 / 2$ | $23 / 2$ | Sept. 20, 1935 |  | Oct. 19, 1933 |

${ }^{1}$ Rates indicated also apply to United States Government securities bought under repurchase agreement.
Back figures.-See Annual Report for 1935 (table 40).

## BUYING RATES ON ACCEPTANCES

Buying rates at the Federal Reserve Bank of New York
[Percent per annum]

| Maturity | Rate in effect on Nov. 30 | In effect be-ginning- | Previous rate |
| :---: | :---: | :---: | :---: |
| 1-15 days ${ }^{1}$ | $1 / 2$$1 / 2$$1 / 2$$1 / 2$$1 / 2$$3 / 4$1 |  | 1 |
| 16-30 days.- |  |  | 1 |
| 31-45 days.. |  |  | 1 |
| 46-60 days.. |  |  | 1 |
| 61-90 days |  |  | 1 |
| $91-120$ days |  |  | 1 |
| 121-180 days |  |  | 11/4 |

1 This rate also applies to acceptances bought under repurchase agreements, which agreements are always for a period of 15 days or less.
Note.-Minimum rates on prime bankers' acceptances payable in dollars; higher rates may be charged for other classes of bills.
Back figures.-See Annual Report for 1935 (table 41).

## MAXIMUM RATES ON TIME DEPOSITS

Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q.
[Percent per annum]

|  | $\begin{aligned} & \text { Nov. 1, } 1933 \\ & \text { Jan. } 31,1935 \end{aligned}$ | $\begin{aligned} & \text { Feb. 1, } 1935 \\ & \text { Dec. } 31,1935 \end{aligned}$ | In effect beginning Jan. 1, 1936 |
| :---: | :---: | :---: | :---: |
| Savings deposits. | 3 | 21/2 |  |
| Postal Savings deposits. | 3 | 21/2 | $21 / 2$ |
| Other time deposits payable in: |  |  |  |
| 6 months or more......- | 3 | $21 / 2$ | 21/2 |
| 90 days to 6 months....- | 3 | $21 / 2$ | 2 |
| Less than 90 days-.----- | 3 | 21/2 | 1 |

Note.-Maximum rates that may be paid by insured nonmember banks as established by the Federal Deposit Insurance Corporation, effective February 1, 1936, are the same as those now in effect for member banks. In some States the maximum rates established by the Board and the Federal Deposit Insurance Corporation are superseded by lower maximum rates established by State authority.

## RATES ON INDUSTRIAL ADVANCES

A pproved by the Board of Governors of the Federal Reserve System, under Sec. $13(\mathrm{~b})$ of the Federal Reserve Act as amended June 19, 1934. Percent per annum except as otherwise specified. In effect Nov. 30 , 1936 [Percent per annum]

| Feders] Reserve Bank | Advances direct to industrial or commercial organizations | Advances to financing institutions- |  | Commitments to make advances |
| :---: | :---: | :---: | :---: | :---: |
|  |  | On portion for which institution is obligated | On remaining portion |  |
| Boston. | 31/2-6 | 3 | 31/2 | 1/2-1 |
| New York. | 4-6 | 3 | 4-5 | 1-2 |
| Philadelphia. | 4-6 | 3 | $\left.{ }^{2}\right)$ | 1/2-2 |
| Cleveland.... | 41/2-6 | $31 / 2$ | 4 |  |
| Richmond. | 6 | 4-6 | 4-6 | 1-2 |
| Atlanta. | 6 | 5 | 5 | 1/2 |
| Chicago. | 5-6 | 13 | 5-6 | 1-2 |
| St. Louis | 51/2 | 4129 | 41/2 | $81 / 2$ |
| Minneapolis | 6 | 41/2-5 | 41/2-5 | 1 |
| Kansas City. | 4-6 | 4 | 4 | 8 1/2-2 |
| Dallas... | 5-6 | 4 | 5-6 |  |
| San Francisco...... | 5-6 | 3-4 | 4-5 | 1/2-2 |

1 Authorized rate 1 percent above prevailing discount rate. ${ }^{2}$ Same as to borrower but not less than 4 percent.

- Flat charge.

Back figures.-See Annual Report for 1935 (table 40).

${ }^{1}$ Does not include loans by joint stock land banks, which are now in liquidation.
T Some of the loans made by the regional agricultural credit corporations and the banks for cooperatives and must of the loans made by the production credit associations are discounted with the Federal intermediate credit banks. The amounts in this column are thus included in the 3 columns under those headings. Such loans are not always discounted in the same month in which the original credit is extended.

## preliminary

Average per working day
${ }^{1}$ For indexes of groups and separate industries see pp. 1007-1008; for description see Bulletin for February and March 1927.
23 -month moving average of F.W. Dodge Corporation data centered at second month; for description see Bulletin for July 1931, p. 358
${ }_{3}$ Revised series. The indexes for factory employment and pay rolls unadjusted for seasonal variation are compiled by the Bureau of Labor Statistics. For description and back figures for the seasonally adjusted index of factory employment compiled by F. R. Board of Governors see pages $950-978$ of this BULLETIN. For current indexes of groups and separate industries see pp. 1009-1012. Underlying figures are for pay-roll period ending nearest middle of month.

4 For indexes of groups see p. 1014.
Back figures.-See Annual Report for 1935 (table 75). For department store sales see p. 631 of Bulletin for August, 1936.

## INDUSTRIAL PRODUCTION, BY INDUSTRIES (ADJUSTED INDEXES)

[Index numbers of the Board of Governors; adjusted for seasonal variation. $\quad 1923-25$ average $=100$ ]

## INDUSTRIAL PRODUCTION, BY INDUSTRIES (UNADJUSTED INDEXES)

[Index numbers of the Board of Governors; without seasonal adjustment. $\quad 1923-25$ arerage $=100$ ]

## INTERNATIONAL FINANCIAL STATISTICS

GOLD RESERVES OF CENTRAL BANKS AND GOVERNMENTS
[In millions of dollars]

Prelim
See notes under Italy, Mexico and Spain.
No statements have been received for Bank of Spain since Aug. 1, 1936. Figure as of that date is given for August 1936 and carried forward for subsequent months.

4 Figure for March 1935 carried forward for subsequent months
Note. -The countries for which figures are not shown separately are in Europe: Albania, Danzig, Estonia, Finland, Latvia, and Lithuania; in Latin America: Bolivia, Brazil, Ecuador, El Salvador, and Guatemala; in Asia and Oceania: Australia, and Siam; and in Africa: Algeria, Belgian Congo, and Moroceo.

For back figures and for full description of this table, see Buldetin for May 1932, pp. 311-318; June 1933, pp 368-372; July 1936, pp. 544-547; and August 1936, p. 667.

Differs from official customhouse figures in which imports and exports for January 1934 are valued at approximately $\$ 20.67$ a fine ounce.

## GOLD MOVEMENTS-Continued

[In thousands of dollars at approximately $\$ 35$ a fine ounce]

pPreliminary.
${ }^{r}$ Revised.
1 \$9,079,000 imported by France from Spain in March, \$8,354,000 in June, \$12,503,000 in August, and \$38,436,000 in September 1936.
Nore.-United Kingdom.-In some cases the annual aggregates of the official monthly figures differ somewhat from the revised official totals published for the year as a whole.

## GOLD MOVEMENTS-Continued

[In thousands of dollars at approximately $\$ 35$ a fine ounce]

${ }^{p}$ Preliminary. $\quad r$ Revised.
${ }^{1}$ Beginning with October 1936 Netherlands figures are for gross imports; exports, which are subject to license, not reported since September 1936.
${ }^{2} \$ 8,444,000$ imported by Switzeriand from Czechoslovakia in April and $\$ 15,933,000$ in May 1936.
${ }^{3}$ Through March 1935 gold held by Government; subsequently, gold held by Reserve Bank of India to which Government gold was transferred.
${ }^{4}$ Figures derived from preceding columns; net imports plus production minus increase in reserves in India.

[^23]CENTRAL BANKS

## - Corrected.

1 Issue department also holds securities and silver coin as cover for fiduciary issue, which is fixed by law at $£ 260,000,000$
${ }^{2}$ By law of October 1, 1036, gold provisionally revalued at rate of 49 milligrams gold 0.900 fine per franc. Of the total gold increment of about $17,000,000,000$ francs, $10,000,000,000$ francs was initially turned over to the stabilization fund established by the law of October 1 .
${ }^{3}$ 'Bills and warrants endorsed by the National Wheat Board (law of Aug. 15, 1936-see Bulletin for October 1936, pp. 785-786), and bills rediscounted for account of the Banques Populaires (law of Aug. 19, 1936-see Bulletin for October 1936, p. 788).

Note.-For explanation of table see Bulletin for February 1931, pp. 81-83, July 1935, p. 463, and July 1936, p. 603.

## CENTRAL BANKS-Continued

[Figures as of last report date of month]

c Corrected. $\quad r$ Revised
1 Beginning March 1936 all items valued by bank in Australian currency; previously valued partly in Australian currency, partly in sterling.
${ }^{2}$ Items for issue and banking departments consolidated.
${ }^{3}$ Increment resulting from revaluation of gold under law of October 9,1936 , converted into foreign exchange and carried partly in that item and partly in Other Assets
${ }_{4}^{4}$ Bank reorganized under law of April 7, 1936 (see Bulletin for July 1936, p. 537, and August 1936, p. 632). First balance sheet on new basis was as of June 30,1936

5 Gold in vault revalued at rate of 9.968331 sucres per gram of fine gold by decree of Dec. 18,1935 and at rate of 11.6466 sucres per gram of fine gold by decree of June 13, 1936.

[^25] lent to 0.29032 gram of fine gold. Value of foreign currencies included among assets and liabilities is calculated on basis of market quotations on September 30, 1936, except for French franc for which no official rate was quoted on that date. Assets and liabilities in French francs have been converted into Swiss gold francs at the old parity between these currencies. Assets and liabilities of the Bank in those currencies which were devalued in the last week of September are approximately equal.
${ }^{2}$ Reduction in total resources between September 30 and October 31, 1936, due to valuation of French franc assets and liabilities on Octoher 31 at market rate on that date. See note 1 .

## COMMERCIAL BANKS

[Figures are as of end of month, except those for the United Kingdom, which are averages of weekly figures]

${ }^{1}$ Excluding deposits of the National Bank relating to offices outside the United Kingdom, which are included in the total.
${ }^{1}$ District Bank included beginning January 1936.
Note.-For back figures and explanation of table see Bulletin for October 1933, pp. 639-646, and June 1935, pp. 388-390.

[^0]:    ${ }^{1}$ See Bulletin for November, 1936, p. 852.

[^1]:    ${ }^{2}$ See Bulletin for February, 1934, p. 69.

[^2]:    $p$ Preliminary. $r$ Revised. e Partly estimated.
    1 Figures not available. ${ }^{2}$ Include time deposits of banks, domestic and foreign, 1929-1934. 3 Do not include time deposits $1929-1934$.
    Revised series. See pages $950-978$ of this Bulletin.

[^3]:    ${ }^{1}$ For corresponding figures of State member and National banks for the last 6 months of 1935, see Buldetin for July 1936, pp. 526-527.
    Includes interest on capital notes and debentures
    ${ }^{3}$ The aggregate book value of capital stock, capital notes and debentures, surplus, undivided profts, reserves for contingencies, reserves for stock dividends on common stock, and retirement fund for preferred stock and /or capital notes and debentures.

[^4]:    ${ }^{1}$ For a description of the previous seasonal adjustment of the index of factory employment, see the Federal Reserve Buldetin index of factor
    for June, 1934.
    or June, 1934 .
    2 Revised employment indexes, without seasonal adjustment, for individual industries, groups of industries, and manufacturing as a whole may now be obtained from the Bureau of Labor Statistics and shortly the Bureau will issue a bulletin giving a detailed description of the revised indexes.
    ${ }^{3}$ The Bureau of Labor Statistics has also revised the index of factory payrolls and, for the period since 1933, the revised index is about $21 / 2$ per cent higher than the index formerly published.

[^5]:    ${ }^{4}$ These factors, which are derived from the indexes of the Bureau of Labor'Statistics, reflect the seasonal variations in the Bureau's sample of each industry and, in some instances, they differ from factors which would be obtained from indexes representing complete coverage.

[^6]:    © Changing seasonal factors are those which take into account progressive shifts in the timing and amount of seasonal movements evident in the unadjusted series.

[^7]:    - See Federal Reserve Bulletin for June 1934, November 1930, and April 1928.

[^8]:    1 In these series there was evidence of progressive change in seasonal movement from year to year, and separate sets of seasonal factors were computed for each year. They may be obtained from the Division of Research and Statistics; factors shown are for the year 1936 .

    2 In computing the seasonally adjusted index the seasonal factor is subtracted (algebraically)from the unadjusted index; see discussion on page 953 .
    Note.-No seasonal variation in employment was evident in the following industries: Bolts, nuts and washers; wirework; cash registers, adding machines and calculating machines; electrical machinery, apparatus and supplies; electric railroad repair shops; paper and pulp.

[^9]:    ${ }^{1}$ This total includes allowance for other industries not currently reported.
    2 This group is a combination of chemical and petroleum groups less manufactured gas and includes allowance for other industries not currently reported.
    ${ }^{2}$ Excluding manufactured gas, motion-picture production, and a few other industries included in manufactures by the Census but not by the Bureau of Labor Statistics.

[^10]:    ${ }^{2}$ Published as Staatsblad No. 403.

[^11]:    ${ }^{3}$ Article 12, paragraph (1), of the Bank Act 1919 reads as follows:
    "The Bank shall not grant to any person whomsoever any credit or advance without security; the terms credit or advance without security do not include moneys or goods entrusted by the Bank in its own interest to mandatories who are not in its regular service,
    or to the Postal Cheque and Transfer Service."

[^12]:    ${ }^{1}$ Includes Federal Reserve notes held by other Federal Reserve banks.

[^13]:    ${ }^{1}$ Excluding central reserve city banks, for which figures for latest month are shown in table above.
    NOTE.-For explanation and figures for period January-June 1936 see September Bulletin, pp. 700-701. For earlier figures see April 1936 Bulle-TIN- p. 299, and previous issues.

[^14]:    Gold released from earmark at Federal Reserve banks less gold placed under earmark (with allowance when necessary for changes in gold earmarked abroad for account of Federal Reserve banks).
    ${ }^{2}$ Figures are derived from preceding columns and indicate net result of such factors as domestic production, movements into and out of nonmonetary use or unreported holdings, imports and exports that do not affect gold stock during the month or year, and increment resulting from reduction in weight of gold dollar.

    Back figures.-See Annual Report frr 1935 (table 32)

[^15]:    ${ }^{1}$ Figures of preceding call carried forward.
    , Figures of precedinging June 30,1933 , all figures (other than for mutual savings banks) relate to licensed banks only, with some exceptions as to nonmember banks.
    ${ }_{3}$ Nonmember bank figures not available.
    4 Prior to Dec. 30, 1933, member-bank figures include interbank deposits not subject to immediate withdrawal, which aggregated $\$ 103,000,000$ on that date.

    Back figures.-See Annual Report for 1935 (tables 47-48)

[^16]:    1 Loans (secured by stocks and bonds) to brokers and dealers in securities
    ${ }^{2}$ Beginning June 30, 1933, figures relate to licensed banks only.
    'An estimated small amount of Home Owners' Loan Corporation bonds fully guaranteed by the United States Government is included in "Other securities" on this date

    4Central reserve city banks.
    Back figures.-See Annual Report for 1935 (table 52)

[^17]:    ${ }^{1}$ Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2)

[^18]:    ${ }^{1}$ Monthly data are a verages of daily figures, except for municipal bonds, which are averages of Wednesday figures
    Average of yields of all outstanding bonds due or callable after 8 years
    Standard Statisties Co.
    Moody's Investors' Service, revised series. Lists of judustrial and public utility bonds revised back to January i, 1935, and of railroad bonds back to January 1, 1936. Because of limited number of suitable issues, less than 40 industrial bonds are included; the industrial Aaa group has been reduced from 10 to 3 and the industrial Aa group from 10 to 4.

    Back figures.-See Annual Report for 1035 (table 74)

[^19]:    ${ }^{1}$ Includes issues of noncontiguous U. S. Territories and Possessions
    ${ }^{2}$ Includes publicly offered issues of Federal land banks, Federal intermediate credit banks, Federal Farm Mortgage Corporation, and Home Owners' Loan Corporation; excludes direct obligations of U. S. Treasury.
    ${ }^{3}$ Less than $\$ 500,000$.
    Sources-For domestic issues, Commercial and Financial Chronicle; for foreign issues, U. S. Department of Commerce. Monthly figures subject to revision.

    Back figures.-See Annual Report for 1935 (table 72) for figures of new issues-annual and quarterly basis.

[^20]:    $p$ Preliminary.
    i Includes $\$ 116,000,000$ of loans for distribution to depositors of closed banks. ${ }^{2}$ Includes $\$ 701,000$ of preferred stock instalment sale contracts.
    Note.--For explanation of table and back figures, see April Buldetin, p. 220.

[^21]:    Note.--Revised figure

[^22]:    ${ }^{1}$ Figures for spring wheat, oats, and tame hay from estimates for Oct. 1; for winter wheat from Aug. 1; no estimates made for Nov. 1.
    2 Includes 9,000 bales grown in miscellaneous territory.
    Includes 13,000 bales grown in miscellaneous territory.

[^23]:    Notr.-Germany, Netherlands, and Swizerland.-In some cases the annual aggregates of the official monthly figures differ somewhat from the revised official totals published for the year as a whole. German gold movements by individual countries, beginning with July 1936, are subject to official revision.

[^24]:    1 Items for issue and banking departments consolidated
    ${ }^{2}$ By law of September 28,1936 , Latvian currency was linked to sterling at rate of 25.22 lats to the pound compared with previous market rate of about 15 lats to the pound.

    3 Agricultural and urban loans in process of liquidation

[^25]:    ${ }^{1}$ According to official announcement of the B. I. S., all figures for September 30, 1936, are expressed, as hitherto, in Swiss gold francs equiva-

[^26]:    p Preliminary.

[^27]:    c Corrected.

[^28]:    onth.
    2 Index represents prices converted to gold basis of 1914.
    Sources.-For both retail food prices and cost of living: United States-Bureau of Labor Statistics, Department of Labor; England-Ministry of Labour; Germany-Statistisches Reichsamt; France-For retail food prices, Statistique Génerale, and for cost of living, Commission d'etudes

[^29]:    ${ }^{1}$ Prices derived from average yields for 60 corporate bonds as published by Standard Statistics Oo.
    2 Annual indexes are unweighted averages of monthly indexes
    ' Exchange closed from July 13 to Sept. 2, 1931, and from Sept. 19, 1931, to Apr. 11, 1932. Index for 1931 represents average of months JanuaryJune; index for 1932 represents average of months May-December.

    Sources.-See Bulletin for February 1932, p. 121, and June 1935, p. 394.
