NUMBER 10

THE WARTIME EXPANSION OF LIQUID ASSETS

During the past three wartime years holdings of cash and Government securities by businesses and individuals have shown an expansion never before approached in this country. In peacetime a growth of as much as 5 billion dollars a year in such holdings would have been considered large. In the past three years, the total amount of these liquid assets held by individuals and businesses has expanded at a rate of over 35 billion dollars a year. It is estimated that for the three years ending this coming December the total increase will be about 107 billion dollars, or 128 per cent, as shown in the table. By the end of the war and early postwar period this expansion will have gone much further.

ESTIMATED HOLDINGS OF PRINCIPAL LIQUID ASSETS
BY INDIVIDUALS AND CORPORATIONS
[In billions of dollars]

| | Dec. 31, 1944 (Probable) | Dec. 31, 1941 | Increase during three years |
|----------------------------------|--------------------------------|------------------|-----------------------------------|
| Currency..... | 23.7 | 9.5 | 14.2 |
| Demand deposits..... | 49.4 | 29.6 | 19.8 |
| Time deposits..... | 37.3 | 26.9 | 10.4 |
| U. S. Government securities..... | 79.5 | 17.4 | 62.1 |
| Total liquid assets..... | 189.9 | 83.4 | 106.5 |

NOTE.—Figures exclude currency, demand and time deposits, and United States Government securities held by banks, insurance companies, savings and loan associations, all governmental bodies, educational and charitable institutions, other nonprofit associations, and foreigners. The figures for the last half of 1944 were projected on the basis of changes during the first half of the year.

The particular items shown in the table—currency, demand and time deposits in banks, and holdings of United States Government securities—cover the principal assets which are most readily available for use

and for which there are representative statistics of ownership. Currency and demand deposits are the basic forms of cash money ordinarily used, and under existing practices time deposits and also United States Government securities are readily convertible into cash. Other assets commonly considered as liquid savings, such as savings and loan shares, insurance and pension reserves, and corporate and municipal securities, are viewed by their holders more as investments than as liquid reserves. In this Review the term “liquid assets” will be used as referring only to the items included in the table. The figures should not be considered as comparable with estimates of individual and corporate savings compiled by the Department of Commerce and the Securities and Exchange Commission.

SIGNIFICANCE OF THE EXPANSION

During the war business and individual incomes have been greatly in excess of current purchases, and the difference has been largely reflected in the growth of liquid assets. The Federal Government has spent considerably more than it has received in taxes, and it has been necessary to meet the deficit by borrowing. The amount of borrowing has corresponded closely to the excess of business and individual incomes over their expenditures. Businesses and individuals have used a large part of their surplus income to purchase some of the securities that the Government has sold, and have

held a part in the form of bank deposits and currency. Banks have purchased the Government securities not bought by others. Some of the surplus income has been used for the repayment of debt or has gone into insurance or pension reserves, and a small amount has been used to purchase property.

It is necessary to distinguish between accumulation of liquid assets and current savings. While current savings of individuals and businesses may be held in the form of liquid assets, these assets are not a measure of savings. In times of peace current savings of individuals and business are generally represented by the net increase in residences, plant, equipment, and stocks of goods, and have amounted to as much as 10 billion dollars a year; if no allowance is made for depreciation, obsolescence, and destruction of existing capital, the figure would be considerably larger. The growth in liquid assets has seldom equaled 5 billion dollars a year. In wartime, however, the opportunities for direct investment of savings by either individuals or businesses in new construction or for the purchase of goods are sharply limited. As a result there has been little saving in this form by individuals and businesses. They have had, however, an excess of current incomes over their current expenditures and have accumulated liquid assets in the form of cash and Government securities. These assets do not represent new capital formation; they are the result of borrowing by the Government from banks and from the public in order to finance war expenditures.

The existence of such a large volume of readily available funds raises important questions as to their possible significance in the peacetime economy. They provide a cushion against severe depression and also may present inflationary possibilities.

If wartime liquidity and savings habits should continue, however, new investment outlets will be needed in order to utilize such a large amount of current savings and maintain economic activity at a high level.

It is not to be expected that the total volume of accumulated liquid assets will show any substantial decline in the first few years after the war. There will be shifts in their ownership and possibly in their composition as individual persons and businesses spend or invest their holdings, but they will continue to exist in other hands or in other forms. Since the wartime expansion of liquid assets has resulted primarily from the growth in Government debt, a substantial decline in the total can come about only as a result of the paying off of Government debt in amounts greater than any increase that may occur in private debt held by the banking system. This is not likely to occur on a large scale in any short period of time.

GROWTH IN PREVIOUS WAR

During the last war period, as shown on the chart, there was also a substantial expansion in holdings of liquid assets by individuals and corporations. Although the absolute amounts were much smaller, the percentage increase was nevertheless large. During the two-year period ended June 30, 1919, individual and corporate holdings of currency, bank deposits, and United States Government securities increased by 24 billion dollars. This was a growth of 90 per cent, compared with an estimated increase of about 128 per cent for the three years ending December 31, 1944.

The major portion of this increase in liquid asset holdings during the last war, as in this war, was due to expansion of Government debt. At that time, however,

there was also a 4 billion dollar expansion of credit extended to business and individuals by the banking system. Loans based on Government securities accounted for part of this increase. During this war there has also been some lending on Government securities but in the aggregate the credit extended by banks to business and individuals has declined. Changes in bank loans and investments are shown in the chart on page 961.

LIQUID ASSET HOLDINGS OF INDIVIDUALS AND CORPORATIONS

Total deposits adjusted and currency outside of banks includes deposits and currency holdings of insurance companies, savings and loan associations, and State and local governments, as well as those of other corporations and of individuals. Federal Government deposits as well as interbank deposits have been excluded. United States Government security holdings of all commercial and mutual savings banks have been excluded for all years; insurance company holdings have been excluded for the period from June 30, 1932 to the present.

Because of this difference a decrease in the aggregate liquid assets immediately following the war is not as likely as it was following the last world war. After the conclusion of that war there was a brief period of further rapid expansion in bank credit but this expansion was later followed by a sharp contraction, which temporarily reduced the liquid asset totals. In the period immediately following this war, a further contraction of any substantial

amount in credit extended by banks to businesses and individuals is unlikely.

In the decade following the last war the total amount of liquid assets continued to expand, except in the brief postwar recession of 1921-22. This was due to the fact that during the 'twenties, the continued expansion of private debt to banks more than offset the decline in public holdings of United States Government securities. By June 30, 1929, the total liquid asset holdings of individuals and corporations were about 10 billion dollars larger than on June 30, 1919, notwithstanding a reduction of about 9 billion in their holdings of Government securities.

DISTRIBUTION BY TYPE OF ASSET

Distribution of liquid assets among holdings of currency, bank deposits, and Government securities reflects the needs and preferences of individuals and corporations. Receipts of individuals and business are in the first instance in the form of cash. During the war period both individuals and corporations have been urged to convert their cash into United States Government securities as much as possible. War loan drives, pay roll deduction plans, and continuous availability of savings bonds and tax notes have all been directed to this end. To the extent that Government financing needs have not been met in this way, securities have been sold to insurance companies, mutual savings banks, other savings institutions, and to commercial banks. Since both individuals and corporations have chosen to retain substantial amounts of cash—currency and demand deposits—and since the individual accumulation of time deposits has been sizeable, sales of United States Government securities to banks have necessarily been large.

As is evident from an examination of the table at the beginning of this Review, holdings of Government securities by businesses and individuals by the end of this year will be $4\frac{1}{2}$ times as large as at the end of 1941—a growth that makes up nearly 60 per cent of the estimated 107 billion dollar growth in total liquid assets. The next largest proportionate expansion—to $2\frac{1}{2}$ times the 1941 level—is in currency, although demand deposits show the next largest dollar increase. The growth in currency accounts for 13 per cent, that in demand deposits for 19 per cent, and that in time deposits for 10 per cent of the total growth in liquid assets. In 1944 additions to time deposits and Government security holdings have been larger than in the two previous years and together account for 84 per cent of the growth in the total; the increase in demand deposits has been small while currency growth has continued to be about the same as in the previous year.

OWNERSHIP OF LIQUID ASSETS

Distribution of the wartime growth in liquid assets among individuals, unincorporated businesses, and corporations reflects both the character and incidence of war expenditures, as well as the other uses made of these funds by their recipients.

Funds distributed through Federal Government expenditures have gone largely in the first instance to war contractors for purchases of goods or to the members of the armed services and other Government employees. A portion of the funds received by the contractors represent undistributed profits or unexpended depreciation reserves retained by them. The balance has been disbursed to other businesses in payment for material and equipment, to individuals in the payment of wages, salaries, interest, and dividends, and some has been paid to

Government in taxes. The secondary recipients, and subsequent ones, have repeated this process of distributing the funds.

There are no accurate figures as to the ownership of liquid assets, but rough estimates may be derived from available data. The Securities and Exchange Commission has prepared estimates of holdings of cash and securities by corporations and also of

Figures for corporations exclude holdings of banks, insurance companies, savings and loan associations, and all nonprofit associations. Holdings of individuals include those of professional people as well as farmers. Estimated distribution of United States Government securities for 1939 and 1941 was based largely on Treasury data and extrapolated on the basis of current data to Dec. 31, 1944. The estimated distribution of demand deposits was based on *Statistics of Income* for 1939 and 1941 and on an extrapolation of Securities and Exchange data as well as on the Federal Reserve deposit survey data for Dec. 31, 1944. Estimates of the liquid asset holdings of unincorporated businesses were based largely on the Federal Reserve deposit survey and on the Federal Reserve Retail Credit Survey.

changes in holdings by individuals and unincorporated businesses taken together; the Treasury has made estimates of the ownership of Government securities; and the Federal Reserve System has compiled figures with respect to the ownership of demand deposits. Although these figures do not provide all the information needed, they furnish the basis for approximate estimates, which are shown in the chart for the end

of 1939, the end of 1941, and the end of 1944.

These estimates indicate that by the end of this year individuals will hold almost 125 billion dollars of liquid assets, or nearly two-thirds of the total for businesses and individuals. Corporations will have about a fourth and unincorporated businesses nearly a tenth of the total. The increase in individuals' holdings has also accounted for nearly two-thirds of the increase in the total since 1941. The most rapid rate of increase in the gross accumulation of liquid assets has been by corporations, with unincorporated business nearly as rapid and individuals somewhat less. Even after allowance for the fact that corporate tax liabilities are on an accrual basis, whereas individuals and unincorporated business are on an essentially current basis, these relationships hold.

Individuals hold about two-fifths of the demand deposits, the bulk of the time deposits and currency, and about three-fifths of the Government securities held by individuals and business. About half of the growth in individuals' holdings since 1941 has been in Government securities and nearly a fifth in currency. Demand deposits increased rapidly in 1942 and 1943, but have since grown more slowly, while the increase in time deposits has accelerated.

During 1940 and 1941 corporate businesses increased their holdings of liquid assets by about 5 billion dollars, an amount somewhat smaller than corporate tax accruals during the period. During these years corporations were making large-scale expenditures for producers' goods and construction. Since the end of 1941 private capital expenditures have been limited, and corporations have increased their holdings of cash and Government securities by about 30 billion dollars, or nearly 170 per cent.

Their demand deposits increased by about 65 per cent, mostly in 1942 and the first half of 1943, and their holdings of Government securities, which were less than 2 billion dollars until the middle of 1941, are expected to be about 25 billion dollars at the end of 1944. At first a large part of this growth was in tax savings notes, but in the past two years most of it has been in holdings of marketable securities.

SIGNIFICANCE OF INDIVIDUAL HOLDINGS

Under ordinary peacetime conditions a large portion of the current savings of individuals would be used to purchase housing, various durable goods, corporate securities, and insurance. Additions to holdings of time deposits and of Government securities would also be important, but increases in currency and demand deposits would be largely limited to current cash needs and, except in a technical sense, would hardly be considered as savings. Under wartime circumstances, individuals tend to accumulate larger amounts of liquid assets because of the limited opportunity for the non-liquid use of savings. During the past three years the expansion in individuals' holdings of liquid assets has amounted to 65 billion dollars, or 110 per cent. These holdings are readily available for future use and their postwar use will have an important bearing on the course of production, employment, and incomes.

Some clue as to possible consumer use of the wartime accumulations of liquid savings might be had if it were known at which income levels savings had accrued. Presumably, savings by middle and upper income groups are less likely to be tapped for current expenditures than those in lower income groups. Little is known, however, about the distribution of liquid assets by income classes. On the basis of information

as to incomes reported for tax purposes and the amount of taxes paid, it would appear that individuals reporting annual incomes in excess of \$5,000 each, which in number are about 3 per cent of all gainfully employed persons and have about an eighth of all individual income after taxes, could hardly account for more than 20 billion of the 65 billion dollar increase in liquid assets during recent years. Individuals in these income groups probably held most of the amount outstanding before the war. It appears, therefore, that persons in the income groups below that level now hold a substantially increased volume of liquid assets. Presumably most of these are held by persons with incomes of over \$2,000 each. Information as to the growth in bank deposits and currency indicates that persons in small towns and rural communities, including farmers, have had substantial percentage increases in their holdings, and sales of war savings bonds, especially through pay roll deduction plans, have been widespread. Much of the growth has occurred in areas where war activities have greatly increased.

It thus appears that a substantial part of the expansion in liquid assets belongs to persons who ordinarily do the bulk of the spending and account for little of the saving. Spending has been restrained in wartime and many goods have not been available. Hence part of the wartime holding of cash may be in anticipation of postwar spending. It is also possible that some individuals, having accumulated a sizeable holding of liquid assets during the war period, will be more inclined to spend a larger portion of current income than in the prewar period.

There are other factors, however, which may reduce the stimulus to postwar spending that might come from these accumulations of liquid assets. An increase in cash

holdings is a normal accompaniment of increased incomes, and it is probable that a portion of the additions will not be put to current use as long as incomes remain near existing levels. It is possible also that many persons may consider part or all of their increased holdings as a desirable reserve for contingencies and may wish to retain them in the present form. Others, who have established the habit of saving large portions of their incomes, may continue the practice and withhold a larger proportion of current income than was previously customary.

In any event, the greatly expanded liquid assets of individuals may serve to make the postwar volume of consumer expenditures more independent of changes in consumer incomes than in the prewar period. At times when incomes decline consumption might be maintained. On the other hand, increases in incomes might lead to even more rapid increases in consumption than would be the case in the absence of the large volume of liquid assets.

These alternative possibilities indicate that wartime developments have introduced a monetary element the behavior of which is even less foreseeable than usual, so that the postwar economy possesses potentialities both of great inflation and at the same time of considerable contraction.

SIGNIFICANCE OF BUSINESS HOLDINGS

The estimated increase during the past three years of about 40 billion dollars in holdings of liquid assets by business, corporate and unincorporated, provides the means of financing expenditure of substantial sums over and above amounts drawn from current business revenues. It thus appears likely that in the postwar period business will be less dependent than in the past on the banking system or the

capital market for funds. In the case of businesses, however, to a greater extent than in the case of the individuals, the increased liquid asset holdings must be considered with reference to changes in cash needs and in other assets and liabilities. These relationships were discussed more fully in the July BULLETIN.

Although the large holding of liquid assets by businesses will reduce the necessity for recourse to the banking system or the capital market, it by no means removes such necessity. If the peacetime economy should achieve the productive levels which war has shown to be possible, the size of capital expenditures which business will need to make would require some additional funds, particularly if present cash balances are maintained. The amount of funds which would be required under these circumstances would probably depend upon the timing of these capital outlays. If they are spread over a three or four year period, funds currently retained by businesses as a result of undistributed profits and depreciation, depletion, and other business charges would go a long way toward financing these outlays. If heavy capital expenditures are made within a period of a year or two, requirements for outside financing would be somewhat greater.

Some demand for credit may also arise from the fact that the particular firms which will need funds for capital expenditures after the war may not be the same concerns that have been accumulating cash during the war period. Although the available evidence indicates that there has been a fairly wide dispersion of funds between small and large companies and among companies in various industries, there may be a sizeable number of firms requiring advances from the banking system or the capital market. In addition, a part of the

growth in liquid assets held by many corporations is virtually offset by enlarged Federal tax liabilities.

The growth in liquid holdings is, nevertheless, potentially a spur to large business capital outlays. These capital outlays are always to some extent self-financed by virtue of current undistributed profits, and depreciation, depletion, and other business charges. Business managers are probably more willing to make commitments for capital outlays from accumulated funds than they are when borrowing is required. Thus, the large accumulations of business funds, which reduce the need for recourse to the capital market, will tend to encourage business investment in the postwar period.

POSTWAR CHANGES IN LIQUID ASSETS

Spending of these accumulated funds by the individual holders—persons or business concerns—in the postwar period would not in itself lead to a decline in the aggregate volume of such holdings. There would be shifts in their ownership and perhaps in their composition, but the total volume would probably show little decline. The drawing down of deposits or the use of currency by one individual or business to make current expenditures will simply transfer the funds to others. Sale of Government securities to obtain cash may change the composition of liquid assets but will not reduce the total of cash and Government securities held.

Any substantial decrease in the total holdings can come about only through a reduction in the public debt, not accompanied by an offsetting increase in private debt held by the banking system. Debt retirement will necessarily be a relatively slow process and in such a period of budget surpluses it is likely that there would be

an expansion of bank credit. A period of budget surpluses would probably be one of active business and high income, with a sizeable amount of borrowing from banks by both business and individuals. If business activity and incomes should expand to such an extent as to threaten an inflationary development, a budget surplus and retirement of public debt would be a stabilizing influence.

At the present time the recent expansion in the volume of liquid assets seems extraordinarily large. Holdings of liquid assets, however, must be measured against the current requirements for such assets, which in turn depend not only on current levels of business activity and income but also on the uncertainty both individuals and businesses may feel about their future needs. Consequently, it is impossible to determine whether the total volume of liquid assets at the end of the war will be greater than, equal to, or less than the requirements of the postwar economy.

War periods have usually been marked by an expansion of private ownership of liquid claims and in postwar periods this situation has seldom been reversed. If in the coming postwar period higher levels of business activity should be maintained, it is conceivable that the liquid asset levels achieved during the war may not be out of line with the postwar needs. There are no precise standards for measuring the amount of liquidity that business concerns want in relationship to current volume of transactions or that individuals want in relationship to their current income. It appears, however, that over long periods of time the demands for liquid assets have grown relatively faster than the aggregate of business transactions and of individual incomes. With allowance for such growth the existing level of cash balances and other

liquid assets may not be excessive for the postwar period. This is necessarily conjectural. If only lack of outlets, direct controls, and patriotic restraint have held in check the use of the rapidly growing volume of liquid assets during the war, then these assets might promote inflation after the war, unless their influence is counteracted by debt retirement or is checked by control measures.

EFFECT ON THE BANKING SYSTEM

For banks the expansion of liquid assets has meant increased assets and liabilities, which may be expected to continue at high levels and possibly even grow further. Should individuals and businesses wish to liquidate some of their holdings of Government securities in order to spend the proceeds, these may be sold to other nonbank investors or they may be sold to banks. In the former case, assuming no other changes in public or private debt, there would be no change in the composition of liquid holdings in the aggregate, although ownership would have shifted. If banks purchase the securities, bank deposits, as well as bank holdings of Government securities, would increase. It is even possible that some individuals would wish to convert a portion of their large holdings of currency and deposits into Government securities and would buy them from banks, in which case bank deposits would decline, although the aggregate liquid asset holdings of businesses and individuals would show no change.

Banking developments after the war will depend to a greater extent than in the war period on the demand for private credit. Although some concerns may be out of the borrowing market because of large liquid asset holdings, others will be seeking funds. There will undoubtedly be some new and

rapidly growing firms that will be potential borrowers from banks. Extension of such loans will depend in part upon the willingness and ability of the banking system to make advances to more dynamic and rapidly growing firms whose credit has not yet been established. New credit standards may be needed in the postwar era.

Consumer borrowings, which in the past have been a sizeable element directly or indirectly in the volume of bank credit extended, may increase again notwithstanding the large consumer holdings of liquid assets. Individuals may seek credit for their postwar purchases even though holding large savings.

Although the total volume of bank credit may expand in the postwar period, there is a likelihood that the expansion will be smaller relative to the general level of incomes and business activity than was true in the prewar period. In retrospect it now appears that the large growth in liquid assets in the previous war meant that, although banks grew after the war, the demands on them for the types of credit previously customary were relatively not as great as they had been prior to that war. It was then that bank holdings of securities and security loans began to increase so rapidly. Changes in bank loans and investments over the past three decades are shown in the chart.

If businesses and individuals should

liquidate holdings of Government securities in order to provide funds for current use, banks may be called upon to purchase these securities. In this event there would be a conversion of United States Government securities held by individuals and business concerns to cash forms—currency and demand deposits. This would

Includes commercial and mutual savings banks. Federal Reserve Banks are excluded.

result in a growth of bank holdings of Government securities. In other words, part of the financing of consumers and of businesses by banks after the war may take the indirect form of bank purchases of Government securities from the public rather than the direct form of bank loans and purchase of corporate securities.

LAW DEPARTMENT

Administrative interpretations of banking laws, new regulations issued by the Board of Governors, and other similar material.

Financing of War Production and War Contract Termination

1944 V-Loan Guarantee Agreement

In connection with the inauguration of the program of T-Loan guarantees under the Contract Settlement Act of 1944, the War and Navy Departments and the United States Maritime Commission have adopted a revised form of guarantee agreement for use in the guaranteeing of V and VT loans under Executive Order No. 9112. The revised form is entitled "1944 V-Loan Guarantee Agreement" and bears the identifying date of September 15, 1944.

The only major difference between the revised form of guarantee agreement and the form of April 6, 1943, which it supersedes, is the elimination of provisions of former sections 5 and 6, which provided for an increase in the guaranteed percentage and for waiver of interest and suspension of maturity of the loan in the event of cancellation of the Borrower's war production contracts.

Guarantees executed on the revised form are subject to the same schedule of guarantee and commitment fees and maximum rate of interest as have been prescribed with respect to T-Loan guarantees and loans. Such schedule of fees and maximum rate of interest were published in the September issue of the Federal Reserve BULLETIN, at page 879.

Copies of the printed 1944 V-Loan Guarantee Agreement and accompanying Explanatory Notes are available at all Federal Reserve Banks.

National Bank Loan Limitations

In connection with the recent adoption by the War and Navy Departments and Maritime Com-

mission of the form of T-Loan Guarantee Agreement bearing the date of September 1, 1944, for use in guaranteeing loans under the Contract Settlement Act of 1944, and of the 1944 V-Loan Guarantee Agreement bearing the date of September 15, 1944, for use in guaranteeing loans under Executive Order 9112, the Board of Governors requested the opinion of the Comptroller of the Currency as to whether these forms of guarantee agreement comply with the requirements of the Comptroller's definition of the term "unconditional" as used in Exception 10 to section 5200 of the United States Revised Statutes relating to the loan limitations applicable to national banks.

In response to the Board's request, the Comptroller of the Currency, in letters dated September 5 and September 25, 1944, expressed the opinion that guarantees executed on such forms of guarantee agreement would come within the purview of Exception 10 to section 5200 of the Revised Statutes and the definition of the term "unconditional" as used therein. Accordingly, to the extent that loans by a national bank are subject to guarantees on either of these forms of agreement, they are exempt from the limitations of section 5200 of the Revised Statutes on loans by national banks to one person.

Foreign Funds Control

Treasury Department Releases

The following releases relating to transactions in foreign exchange, etc., in addition to those heretofore published in the Federal Reserve BULLETIN, have been issued by the Office of the Secretary of the Treasury under authority of the Executive Order of April 10, 1940, as amended, and the Regulations issued pursuant thereto:

LAW DEPARTMENT

Treasury Department Foreign Funds Control

August 23, 1944

PUBLIC INTERPRETATION No. 17

Under Executive Order No. 8389, as Amended, Executive Order No. 9193, Sections 3(a) and 5(b) of the Trading with the Enemy Act, as Amended by the First War Powers Act, 1941, Relating to Foreign Funds Control

Subject: Status of members of the armed forces of the United States and United States citizens accompanying such armed forces while in enemy territory.

Inquiry has been made as to whether members of the armed forces of the United States or citizens of the United States accompanying such armed forces in the course of their employment by the Government of the United States or by any organization acting on its behalf are enemy nationals if they are within enemy territory.

The Treasury Department has replied in the negative. The fact that such persons are within enemy territory does not make them enemy nationals, and they are not to be regarded as enemy nationals even though captured or reported missing. Accordingly, a waiver of General Ruling No. 11 is not required to act upon instructions received from such persons.

The Treasury Department also has ruled that accounts of members of the armed forces of the United States and of citizens of the United States accompanying such armed forces in the course of their employment by the Government of the United States or by any organization acting on its behalf may be operated under General License No. 37. This general license is applicable to the accounts of such persons, regardless of their presence within enemy territory and even though they are captured or reported missing.

ORVIS A. SCHMIDT,
Acting Director.

Treasury Department Foreign Funds Control

August 29, 1944

GENERAL LICENSE No. 32A, AS AMENDED

*Under Executive Order No. 8389, as Amended, Executive Order No. 9193, Section 5(b) of the Trading with the Enemy Act, as Amended by the First War Powers Act, 1941, Relating to Foreign Funds Control**

(1) *Certain remittances to specified liberated areas for living expenses authorized.* A general license is hereby granted authorizing remittances by any individual through any domestic bank to any individual within the liberated areas specified in paragraph (8) of this general license, and any

* Sec. 5(b), 40 Stat. 415 and 966; Sec. 2, 48 Stat. 1; 54 Stat. 179; 55 Stat. 838; Ex. Order 8389, April 10, 1940, as amended by Ex. Order 8785, June 14, 1941, Ex. Order 8832, July 26, 1941, Ex. Order 8963, Dec. 9, 1941, and Ex. Order 8998, Dec. 26, 1941; Ex. Order 9193, July 6, 1942; Regulations, April 10, 1940, as amended June 14, 1941, and July 26, 1941.

domestic bank is authorized to effect such remittances, provided the following terms and conditions are complied with:

- (a) Such remittances are made only for the necessary living expenses of the payee and his household and do not exceed \$500 in any one calendar month to any one household;
- (b) Such remittances are not made from a blocked account other than from an account in a banking institution within the United States in the name of, or in which the beneficial interest is held by, a citizen of the United States who is the payee or a member of his household; and
- (c) Such remittances are effected only by the payment of the dollar amount of the remittance to a domestic bank for credit:
 - (i) When the remittance is to any individual within the area specified in paragraph (8) (a) hereof, to a post-liberation blocked account in the name of "Bank of Sicily, Account AF."
 - (ii) When the remittance is to any individual within the area specified in paragraph (8) (b) hereof, to a post-liberation blocked account in the name of "Bank of Naples, Account AF."
- (2) *Duty of individuals and domestic banks acting under this license.* All individuals making such remittances and all domestic banks effecting such remittances shall satisfy themselves that the foregoing terms and conditions are complied with.
- (3) *Reports by domestic banks effecting remittances.* Domestic banks through which any such remittances originate shall execute promptly Section A of Form TFR-132 with respect to each such remittance. When so executed, Form TFR-132 shall be forwarded promptly to the domestic bank ultimately transmitting abroad the payment instructions for such remittances and the latter bank shall, upon receipt thereof, execute Section B of Form TFR-132 and promptly file such executed report with the appropriate Federal Reserve Bank. If the domestic bank through which any such remittance originates is also the bank ultimately transmitting abroad the payment instructions for such remittance, then such bank shall execute both Sections A and B of such report. No report on Form TFR-132 shall be deemed to have been filed in compliance with this general license unless both Sections A and B thereof have been duly executed as herein prescribed.
- (4) *Reports by domestic banks maintaining post-liberation blocked accounts.* Domestic banks maintaining post-liberation blocked accounts pursuant to this general license shall report promptly the establishment of such accounts, and the balances therein at the end of each calendar month, to the appropriate Federal Reserve Bank.
- (5) *Refunds.* Domestic banks are authorized to refund the amount of any remittance ordered pursuant to this general license when such domestic banks are advised that such remittance cannot be effected.
- (6) *Waiver of General Ruling No. 11 and General Ruling*

OCTOBER 1944

963

LAW DEPARTMENT

No. 5A. Transactions authorized herein and communications with persons in the areas specified in paragraph (8) hereof relating thereto are authorized notwithstanding General Ruling No. 11. Domestic banks are authorized, notwithstanding General Ruling No. 5A, to send to and receive from the banks referred to in paragraph (1) (c) hereof non-negotiable bank payment orders covering remittances or refunds authorized herein.

(7) *Definitions.* As used in this general license:

(a) The term "household" shall mean:

- (i) those individuals sharing a common dwelling as a family; or
- (ii) any individual not sharing a common dwelling with others as a family.

(b) The term "post-liberation blocked account" shall mean a blocked account:

- (i) which is established pursuant to this license or any other license or other authorization expressly referring to a post-liberation blocked account;

(ii) to which funds may be credited only pursuant to this license or any other license or other authorization expressly referring to a post-liberation blocked account; and

(iii) with respect to which payments, transfers, or withdrawals or other dealings may not be made or effected except pursuant to this license or any other license or other authorization expressly referring to a post-liberation blocked account.

(8) *Designation of liberated areas to which remittances may be effected.* The liberated areas covered by this general license are:

(a) Sicily;

(b) Sardinia and the following provinces of Italy: Cosenza, Reggio Calabria, Potenza, Foggia, Bari, Brindisi, Catanzaro, Matera, Avellino, Taranto, Lecce, Naples, Salerno, Benevento, Rome, Littoria, Frosinone, and Campobasso.

HERBERT E. GASTON,

Acting Secretary of the Treasury.

CURRENT EVENTS

Federal Reserve Meetings

The Federal Advisory Council met in Washington September 17-18, 1944, and on September 18, 1944, met with the Board of Governors of the Federal Reserve System.

A meeting of the Presidents' Conference was held in Washington on September 18-20, 1944. The Board of Governors of the Federal Reserve System met with the Presidents' Conference on September 22, 1944.

A meeting of the Federal Open Market Committee was held in Washington on September 21-22, 1944.

Retirement of Mr. Fleming and Appointment of Mr. Gidney as President of the Federal Reserve Bank of Cleveland

Mr. Matthew J. Fleming, who had been an officer of the Federal Reserve Bank of Cleveland for nearly 30 years, resigned as President of the Bank, effective at the close of business September 15, 1944, having availed himself of the privilege of retiring under the provisions of the Retirement System of the Federal Reserve Banks. Mr. Fleming was a member of the original staff of officers appointed in November 1914, and since January 1935 had served first as Governor, and then as President of the Bank.

Mr. Fleming was succeeded as President by Mr. Ray M. Gidney, formerly a Vice President of the Federal Reserve Bank of New York, who also has been with the Federal Reserve System for a period of nearly 30 years. In 1917, after

having been on the staff of the Federal Reserve Board for two and one-half years, Mr. Gidney joined the staff of the Federal Reserve Bank of New York, where he has served in various official capacities, including Manager of the Buffalo Branch, Controller of Loans, Deputy Governor, Assistant Federal Reserve Agent, and Vice President.

Resignation of Mr. Stroud and Appointment of Mr. Gentry as First Vice President of the Federal Reserve Bank of Dallas

Mr. E. B. Stroud resigned as First Vice President and General Counsel of the Federal Reserve Bank of Dallas, effective September 30, 1944, to resume the general practice of law. After having served the Bank as counsel for many years, he was appointed First Vice President and General Counsel in June 1939.

Mr. W. D. Gentry, Vice President and Cashier of the Bank, was appointed First Vice President, effective October 1, 1944. Mr. Gentry has been a member of the Bank's staff since April 1916, and has been an officer of the Bank since June 1923.

Appointment of Branch Director

On September 14, 1944, the Federal Reserve Bank of Kansas City appointed Mr. Philip K. Alexander, Vice President of The First National Bank, Denver, Colorado, a director of the Denver Branch for the unexpired portion of the term ending December 31, 1945, to succeed Mr. Clarence H. Adams, deceased.

CURRENT EVENTS

Admissions of State Banks to Membership in the Federal Reserve System

The following State banks were admitted to membership in the Federal Reserve System during the period August 16, 1944, to September 15, 1944, inclusive:

Connecticut

Bridgeport—The Bridgeport-City Trust Company

Illinois

Colfax—Peoples State Bank of Colfax
Galesburg—Bank of Galesburg

Indiana

Hammond—Mercantile Bank

Iowa

Belmond—First State Bank

Kansas

Minneapolis—The Ottawa County Bank

Missouri

Hamilton—The Hamilton Bank

New Jersey

Elizabeth—Union County Trust Company

New York

Great Kills—The South Shore Bank of Staten Island

Madrid—Madrid Bank

Pennsylvania

Lebanon—The Farmers Trust Company of Lebanon, Pa.

Tennessee

Columbia—The Middle Tennessee Bank

Vermont

Brattleboro—Brattleboro Trust Company

Wisconsin

Florence—State Bank of Florence

Spring Green—State Bank of Spring Green

CORRECTION—ARTICLE ON BRETTON WOODS AGREEMENTS

In the article on Bretton Woods Agreements, which appeared in the BULLETIN for September, please eliminate commas on page 852, column 1, third line from the bottom. The correction is important because the commas, which were put in by error, completely change the meaning of the sentence, a vital one in the Agreements.

The sentence, which follows almost exactly the text of the Articles of Agreement on the International Monetary Fund, should read: "Also it must not reject such a change on account of the domestic social or political policies of the proposing member."

NATIONAL SUMMARY OF BUSINESS CONDITIONS

Compiled September 22, and released for publication September 26. Figures shown on charts may differ from preliminary figures used in text.

Industrial output and employment showed little change in August. Retail trade was at a new high level for the month. There was a small further rise in retail commodity prices.

INDUSTRIAL PRODUCTION

Output at factories and mines was 232 per cent of the 1935-39 average in August as compared with 231 for July, according to the Board's seasonally adjusted index of industrial production. Steel production was maintained, while output of nonferrous metals continued to decline. Overall, activity in the metal fabricating industries continued at the level of the preceding month. There were large increases in output of heavy trucks, tanks, and some other critical ordnance items in August; aircraft production showed little change; while shipbuilding declined.

Output increased in the shoe, woolen and worsted, and paper industries in August following a drop in July which reflected chiefly the curtailment of operations around the Fourth. Output of manufactured foods, after allowance for seasonal changes, declined in August, largely reflecting decreases in output of meats, dairy products, and sugar products. Distilleries were shifted for the month of August from production of industrial alcohol for war purposes and output of about 50 million proof gallons of beverage spirits was reported. Production of other non-

durable goods was maintained at the level of the preceding month.

Minerals output in August rose 2 per cent from July, reflecting increases in coal and crude petroleum. Crude petroleum production was at a rate 11 per cent above the same month last year.

DISTRIBUTION

Value of department store sales, according to the Board's seasonally adjusted index, was larger in August and the first half of September than in the first half of 1944 and averaged 12 per cent above the corresponding period of last year. In the third quarter the index at 90 per cent above the 1935-39 average has been at the highest level on record.

Carloadings of railroad freight were maintained in large volume in August. During the first three weeks in September loadings were slightly less than during the same period a year ago, owing to decreases in all classes of freight except merchandise in less than carload lots and miscellaneous shipments.

COMMODITY PRICES

Wholesale prices of farm products and foods showed small seasonal decreases from the middle of August to the middle of September. Maximum prices of such industrial goods as cotton fabrics, cement, and bricks were increased.

INDUSTRIAL PRODUCTION

Federal Reserve indexes. Groups are expressed in terms of points in the total index. Monthly figures, latest shown are for August.

DEPARTMENT STORE SALES AND STOCKS

Federal Reserve indexes. Monthly figures, latest shown are for August.

NATIONAL SUMMARY OF BUSINESS CONDITIONS

Retail prices of food and other cost of living items increased slightly in August and the average of all items was 2 per cent higher than a year ago, according to the Bureau of Labor Statistics index.

AGRICULTURE

Crop prospects improved during August and the early part of September and harvests of most major crops are expected to be larger than last season. Marketings of livestock products, which were at a record level earlier this year and 15 per cent higher than during the first six months of 1943, have declined in July and August to about the same level as that prevailing last year.

BANK CREDIT

Bank deposits of businesses and individuals, as well as currency in circulation, have increased since the end of the Fifth War Loan Drive. This increase in the money holdings of businesses and individuals is largely a reflection of the expenditures made by the Treasury from its war-loan accounts built up during the drive. Adjusted demand and time deposits at member banks in leading cities increased by nearly 4 billion dollars between the close of the drive and mid-September, or by over three-quarters of the amount of reduction in such funds during the drive. Deposits at nonreporting banks probably increased by nearly 2 billion dollars. Treasury war-loan accounts at banks declined by nearly 8 billion dollars.

In the same period loans and investments at

weekly reporting member banks in 101 leading cities declined by 2.2 billion dollars. Loans to brokers and dealers for purchasing and carrying Government securities declined to a level approximately equal to that of the predrive period. There was, however, a temporary increase in such borrowings in late August and early September presumably associated with market transactions stemming from the Treasury offer to exchange certificates maturing on September 1 and notes maturing on September 15 for new issues. Loans to others for purchasing and carrying securities declined steadily, but on September 13 were still well above the predrive level. Government security holdings showed a net decline of 800 million dollars over the period, reflecting mainly substantial bill sales by reporting banks partially offset by some increase in bond holdings.

As the result of the increase in deposits of businesses and individuals, the average level of required reserves at all member banks rose by about a billion dollars between the close of the Fifth Drive and mid-September. In addition, a billion dollar increase in money in circulation and some further decrease in gold stock served to absorb reserve funds. Member bank needs for reserves due to these factors were met largely through an increase of 1.7 billion dollars in the Government security portfolio of the Federal Reserve Banks and there was also a slight increase in Reserve Bank discounts. Excess reserves declined from an average level of 1.4 billion at the close of the drive to somewhat less than a billion by early September.

Demand deposits (adjusted) exclude U. S. Government and inter-bank deposits and collection items. Government securities include direct and guaranteed issues. Wednesday figures, latest shown are for Sept. 20.

Breakdown between required and excess reserves partly estimated. Wednesday figures, latest shown are for Sept. 27.

Tables on the following pages include the principal available statistics of current significance relating to financial and business developments in the United States. The data relating to the Federal Reserve Banks and the member banks of the Federal Reserve System are derived from regular reports made to the Board; index numbers of production are compiled by the Board on the basis of material collected by other agencies; figures for gold stock, money in circulation, Treasury finance, and operations of Government credit agencies are obtained principally from statements of the Treasury, or of the agencies concerned; data on money and security markets and commodity prices and other series on business activity are obtained largely from other sources. Back figures for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*; back figures for most other tables may be obtained from earlier BULLETINS.

¹ Rates shown also apply to advances secured by obligations of Federal Intermediate Credit Banks maturing within 6 months.

Note.—Maximum maturities for discounts and advances to member banks are: 15 days for advances secured by obligations of the Federal Farm Mortgage Corporation or the Home Owners' Loan Corporation guaranteed as to principal and interest by the United States, or by obligations of Federal Intermediate Credit Banks maturing within 6 months; 90 days for other advances and discounts made under Sections 13 and 13a of the Federal Reserve Act (except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6 months and 9 months respectively); and 4 months for advances under Section 10(b). The maximum maturity for advances to individuals, partnerships, or corporations made under the last paragraph of Section 13 is 90 days.

Back figures.—See *Banking and Monetary Statistics*, Tables 115-116, pp. 439-443.

FEDERAL RESERVE BANK BUYING RATES ON BILLS

[Per cent per annum]

| Maturity | Rate on Sept. 30 | In effect beginning— | Previous rate |
|-----------------------------------|------------------|----------------------|---------------|
| Treasury bills ¹ | ¾ | Apr. 30, 1942 | — |
| Bankers' acceptances ² | | | |
| 1-90 days..... | 1¼ | Oct. 20, 1933 | 1 |
| 91-120 days..... | ¾ | Oct. 20, 1933 | 1 |
| 121-180 days..... | 1 | Oct. 20, 1933 | 1½ |

¹ Established rate at which Federal Reserve Banks stand ready to buy all Treasury bills offered. Effective Aug. 3, 1942, purchases of such bills, if desired by the seller, were made on condition that the Reserve Bank, upon request before maturity, would sell back bills of like amount and maturity at the same rate of discount. Since May 15, 1943, all purchases have been made subject to repurchase option.

² Minimum buying rates on prime bankers' acceptances.

Back figures.—See *Banking and Monetary Statistics*, Table 117, pp. 443-445.

MEMBER BANK RESERVE REQUIREMENTS

[Per cent of deposits]

| | Net demand deposits ¹ | | | Time deposits (all member banks) |
|-----------------------------------|----------------------------------|--------------------|---------------|----------------------------------|
| | Central reserve city banks | Reserve city banks | Country banks | |
| June 21, 1917-Aug. 15, 1936..... | 13 | 10 | 7 | 3 |
| Aug. 16, 1936-Feb. 28, 1937..... | 19½ | 15 | 10½ | 4½ |
| Mar. 1, 1937-Apr. 30, 1937..... | 22¾ | 17½ | 12½ | 5¼ |
| May 1, 1937-Apr. 15, 1938..... | 26 | 20 | 14 | 6 |
| Apr. 16, 1938-Oct. 31, 1941..... | 22¾ | 17½ | 12 | 5 |
| Nov. 1, 1941-Aug. 19, 1942..... | 26 | 20 | 14 | 6 |
| Aug. 20, 1942-Sept. 13, 1942..... | 24 | 20 | 14 | 6 |
| Sept. 14, 1942-Oct. 2, 1942..... | 22 | 20 | 14 | 6 |
| Effective Oct. 3, 1942..... | 20 | 20 | 14 | 6 |

¹ Demand deposits subject to reserve requirements; i.e., demand deposits other than war loan deposits, minus cash items in process of collection and demand balances due from domestic banks.

MARGIN REQUIREMENTS¹

[Per cent of market value]

| Prescribed by Board of Governors of the Federal Reserve System in accordance with Securities Exchange Act of 1934 | Apr. 1, 1936-Oct. 31, 1937 | Effective Nov. 1, 1937 |
|---|----------------------------|------------------------|
| For extensions of credit by brokers and dealers on listed securities, under Regulation T..... | 55 | 40 |
| For short sales, under Regulation T..... | (2) | 50 |
| For loans by banks on stocks, under Regulation U..... | 55 | 40 |

¹ Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of the extension; the "margin requirements" shown in this table are the difference between the market value (100%) and the maximum loan value.

² Requirement under Regulation T was the margin "customarily required" by the broker. ³ Regulation U became effective May 1, 1936.

Note.—Regulations T and U also provide special margin requirements on "omnibus" accounts and loans to brokers and dealers.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS AND COMMITMENTS UNDER SECTION 13b OF THE FEDERAL RESERVE ACT

Maturities not exceeding five years

[In effect September 30. Per cent per annum]

| Federal Reserve Bank | To industrial or commercial businesses | | To financing institutions | | |
|----------------------|--|----------------|---|----------------------|----------------|
| | On loans ¹ | On commitments | Discounts or purchases | | On commitments |
| | | | On portion for which institution is obligated | On remaining portion | |
| Boston..... | 2½-5 | 1½-1 | (2) | (3) | 1½-1 |
| New York..... | 2½-5 | 1½-1¼ | (2) | (3) | 1½-1¼ |
| Philadelphia..... | 2½-5 | 1½-1¼ | 42 | (8) | 1½-1¼ |
| Cleveland..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |
| Richmond..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |
| Atlanta..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |
| Chicago..... | 2½-5 | 1½-1¼ | 2½-5 | 2½-5 | 1½-1¼ |
| St. Louis..... | 2½-5 | 1½-1¼ | 1-1½ | (8) | 1½-1¼ |
| Minneapolis..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |
| Kansas City..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |
| Dallas..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |
| San Francisco..... | 2½-5 | 1½-1¼ | (2) | (8) | 1½-1¼ |

¹ Including loans made in participation with financing institutions.

² Rate charged borrower less commitment rate.

³ Rate charged borrower.

⁴ May charge same rate as charged borrower by financing institution, if lower.

⁵ Financing institution is charged ¼ per cent on undisbursed portion of loan under commitment.

Back figures.—See *Banking and Monetary Statistics*, Table 118, pp. 446-447.

MAXIMUM RATES ON TIME DEPOSITS

Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q

[Per cent per annum]

| | Nov. 1, 1933-Jan. 31, 1935 | Feb. 1, 1935-Dec. 31, 1935 | Effective Jan. 1, 1936 |
|------------------------------|----------------------------|----------------------------|------------------------|
| Savings deposits..... | 3 | 2½ | 2½ |
| Postal savings deposits..... | 3 | 2½ | 2½ |
| Other deposits payable: | | | |
| In 6 months or more..... | 3 | 2½ | 2½ |
| In 90 days to 6 months..... | 3 | 2½ | 2 |
| In less than 90 days..... | 3 | 2½ | 1 |

Note.—Maximum rates that may be paid by insured nonmember banks as established by the F. D. I. C., effective Feb. 1, 1936, are the same as those in effect for member banks. Under Regulation Q the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located.

¹ Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.

² Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹ Figures do not include certain other demand deposits of the U. S. Government with member banks and, therefore, differ from figures for U. S. Government deposits shown in other published banking data. See also footnote 2.

² Preceding column minus so-called "float" (total cash items in process of collection) and estimate of U. S. Government deposits other than war loan accounts.

³ Demand deposits subject to reserve requirements; i.e., demand deposits other than war loan deposits, minus cash items in process of collection and demand balances due from domestic banks.

⁴ Includes some interbank and U. S. Government time deposits; the amounts on call report dates are shown in the *Member Bank Call Report*.

¹ Total of amounts of coin and paper currency shown by denominations less unsorted currency in Treasury and Federal Reserve Banks.

² Includes unsorted currency held in Treasury and Federal Reserve Banks and currency of unknown denominations reported by the Treasury as destroyed.

³ Paper currency only; \$1 silver coins reported under coin.

Back figures.—See *Banking and Monetary Statistics*, Table 112, pp. 415-416.

UNITED STATES MONEY, OUTSTANDING AND IN CIRCULATION, BY KINDS

[On basis of circulation statement of United States money. In millions of dollars]

¹ Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States; totals for other end-of-month dates shown in table above, totals by weeks in table on p. 971, and seasonally adjusted figures in table on p. 980.

² Includes \$1,800,000,000 Exchange Stabilization Fund, \$143,908,390 balance of increment resulting from reduction in weight of the gold dollar, and \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.

³ To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.

⁴ Because some of the types of money shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See note for explanation of these duplications. ⁵ Less than \$500,000.

NOTE.—There are maintained in the Treasury—(i) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (ii) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on receipt); (iii) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (iv) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or, until June 30, 1945, of direct obligations of the United States if so authorized by a majority vote of the Board of Governors of the Federal Reserve System. Federal Reserve Banks must maintain a reserve in gold certificates of at least 40 per cent, including the redemption fund which must be deposited with the Treasurer of the United States, against Federal Reserve notes in actual circulation; gold certificates pledged as collateral may be counted as reserves. "Gold certificates" as herein used includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

MONEY IN CIRCULATION WITH ADJUSTMENT FOR SEASONAL VARIATION [Outside Treasury and Federal Reserve Banks. In millions of dollars]

¹ For end of year figures, represents change computed on absolute amounts in first column.

NOTE.—For discussion of seasonal adjustment factors and for back figures on comparable basis see September 1943 BULLETIN, pp. 822-826. Because of an apparent recent change in the seasonal pattern around the year end, adjustment factors have been revised somewhat for dates affected, beginning with December 1942; seasonally adjusted figures for money in circulation, as shown in *Banking and Monetary Statistics*, Table 111, p. 414, and described on p. 405, are based on an older series of adjustment factors.

ANALYSIS OF CHANGES IN GOLD STOCK OF UNITED STATES [In millions of dollars]

² Preliminary. ³ Figure carried forward.

¹ Annual figures are estimates of the United States Mint. Monthly figures are those published in table on p. 1023, adjusted to exclude Philippine Islands production received in United States.

² Figures based on rate of \$20.67 a fine ounce in January 1934 and \$35 a fine ounce thereafter.

³ Includes gold in the Inactive Account amounting to 27 million dollars on Dec. 31, 1936, and 1,228 million on Dec. 31, 1937.

⁴ The net gold import figures for months subsequent to December 1941 have not been released for publication.

⁵ Gold held under earmark at Federal Reserve Banks for foreign account amounted to 3,806.2 million dollars on Aug. 31, 1944.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 156, pp. 536-538, and for description of statistics see pp. 522-523 in the same publication.

BANK DEBITS AND DEPOSIT TURNOVER

¹ National series for which bank debit figures are available beginning with 1919.

² Annual figures for 1935-1942 (old series) include 133 centers; annual figures for 1942 (new series) and 1943, and monthly figures, include 193 centers.

³ See p. 717 of August 1943 BULLETIN for description of revision beginning with May 1942; deposits and debits of new series for first four months of 1942 partly estimated.

NOTE.—Debits to total deposit accounts, except interbank accounts, have been reported since 1942 for 334 reporting centers; the deposits, from which rates of turnover have been computed, have likewise been reported by most banks and have been estimated for others. Debits to demand deposit accounts, except interbank and United States Government, and the deposits from which rates of turnover have been computed have been reported by member banks in 101 leading cities since 1935; yearly turnover rates in this series differ slightly from those shown in *Banking and Monetary Statistics*, Table 55, p. 254, due to differences in method of computation.

DEPOSITS AND CURRENCY—ADJUSTED DEPOSITS OF ALL BANKS AND CURRENCY OUTSIDE BANKS

¹ Preliminary.

² Includes demand deposits, other than interbank and United States Government, less cash items in process of collection.

³ Beginning with December 1933, includes United States Treasurer's time deposits, open account.

⁴ Excludes interbank time deposits and postal savings redeposited in banks.

⁵ Beginning with June 1941, the commercial bank figures exclude and the mutual savings bank figures include three member mutual savings banks.

⁶ Includes both amounts redeposited in banks and amounts not so redeposited; excludes amounts at banks in possessions.

Note.—Except on call dates, figures are rounded to nearest 100 million dollars. See *Banking and Monetary Statistics*, p. 11, for description and Table 9, pp. 34-35, for bank figures.

POSTAL SAVINGS SYSTEM

| 1944—Jan.-Aug..... | 405 | | | 405 | |

¹ Represents banks which, during the periods shown, closed temporarily or permanently on account of financial difficulties; does not include banks whose deposit liabilities were assumed by other banks at the time of closing (in some instances with the aid of Federal Deposit Insurance Corporation loans).

² Federal deposit insurance became operative Jan. 1, 1934.

³ Deposits of member banks and insured nonmember banks suspended are as of dates of suspension, and deposits of noninsured nonmember banks are based on the latest data available at the time the suspensions were reported.

Back figures.—See *Banking and Monetary Statistics*, pp. 283-292; for description, see pp. 281-282 in the same publication.

* These figures do not include data for banks in possessions of the United States and therefore differ from those published by the Comptroller of the Currency and the Federal Deposit Insurance Corporation for national banks and insured banks respectively.

¹ Beginning June 30, 1942, excludes reciprocal bank balances which on that date aggregated 600 million dollars at all member banks and 614 million dollars at all insured commercial banks.

² Beginning June 30, 1941, member bank figures and insured mutual savings bank figures *both* include 3 member mutual savings banks with total deposits of 8 million dollars in June 1941, which became members of the Federal Reserve System during 1941. These banks are *not* included in "commercial banks" and are included only once in "all banks."

³ Decreases in "noninsured nonmember commercial banks" and "all nonmember commercial banks" figures (with corresponding increases in member bank and all insured commercial bank figures) reflect principally the admission to membership in the Federal Reserve System of one large bank with total loans and investments aggregating 472 million dollars on June 30, 1942.

⁴ Beginning June 30, 1942, includes Bank of North Dakota, a nonmember bank not previously included in these statistics; on Dec. 31, 1941, its deposits, excluding interbank deposits, were 33 million dollars and its loans and investments 26 million dollars.

Back figures.—See *Banking and Monetary Statistics*, Tables 1-7, pp. 16-23; for description, see pp. 5-15 in the same publication.

⁶ Estimated. Complete reports now collected semiannually; monthly figures for three items estimated on basis of reports from a small number of large firms.

¹ Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms' own partners.

² Includes money borrowed from banks and also from other lenders (not including member firms of national securities exchanges).

NOTE.—For explanation of these figures see "Statistics on Margin Accounts" in BULLETIN for September 1936. The article describes the method by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

Back figures.—See *Banking and Monetary Statistics*, Table 143, pp. 501-502, for monthly figures prior to 1942, and Table 144, p. 503, for data in detail at semiannual dates prior to 1942.

OPEN-MARKET MONEY RATES IN NEW YORK CITY

[Per cent per annum]

| Year, month, or week | Prime commercial paper, 4- to 6-months ¹ | Prime bankers' acceptances, 90 days ¹ | Stock exchange call loan renewals ² | Yields on U. S. Government securities | | |

| Sept. 23..... | $\frac{3}{4}$ | $\frac{7}{8}$ | 1.00 | .375 | .78 | 1.34 |
| Sept. 30..... | $\frac{3}{4}$ | $\frac{7}{8}$ | 1.00 | .375 | .80 | 1.34 |

¹ Monthly figures are averages of weekly prevailing rates.

² The average rate on 90-day stock exchange time loans was 1.25 per cent during the entire period.

³ Rate on new issues offered within period. Tax-exempt bills prior to March 1941; taxable bills thereafter.

⁴ Number of issues decreased from 2 to 1 on Sept. 15.

Back figures.—See *Banking and Monetary Statistics*, Tables 120-123, pp. 448-462; for description, see pp. 424-426.

¹ Monthly and weekly data are averages of daily figures, except for municipal bonds, which are based on Wednesday figures.

² Standard and Poor's Corporation.

³ U. S. Treasury Department.

⁴ Moody's Investors Service, week ending Friday. Because of limited number of suitable issues, the industrial Aaa and Aa groups have been reduced from 10 to 5 and 10 to 6 issues, respectively, and the railroad Aaa group from 10 to 5 issues.

⁵ Number of issues decreased from 5 to 4 on Sept. 15.

Back figures.—See *Banking and Monetary Statistics*, Tables 128-129, pp. 468-474.

¹ Monthly and weekly data are averages of daily figures, except for municipal bonds and for stocks, which are based on Wednesday figures.

² Average of taxable bonds due or callable in 15 years and over.

³ Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent 20-year bond.

⁴ Prices derived from averages of median yields, as computed by Standard and Poor's Corporation.

⁵ Standard and Poor's Corporation.

⁶ Prices derived from averages of median yields on noncallable high-grade stocks on basis of a \$7 annual dividend.

⁷ Average daily volume of trading in stocks on the New York Stock Exchange.

Back figures.—See *Banking and Monetary Statistics*, Tables 130, 133, 134, and 136, pp. 475, 479, 482, and 486, respectively.

¹ Estimates of new issues sold for cash in the United States. Current figures subject to revision.

² Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

³ Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.

⁴ Includes repayment of other debt and other purposes.

Source.—Securities and Exchange Commission; for compilations of back figures, see *Banking and Monetary Statistics* (Table 138, p. 491), a publication of the Board of Governors.

¹ Revised.

² "Net profits" and "net income" refer to income after all charges and taxes and before dividends.

³ Class I line-haul railroads, covering about 95 per cent of all railroad operations.

⁴ New series, Class A and B electric utilities covering about 95 per cent of all electric power operations. Figures include affiliated nonelectric operations. (During 1942, two companies formerly reporting separately were merged with another in the group.) Series excludes American Telephone and Telegraph Company, the greater part of whose income consists of dividends received on stock holdings in the 30 companies.

⁵ After all charges and taxes except Federal income and excess profits taxes.

⁶ Partly estimated.

⁷ Not available.

Sources.—Interstate Commerce Commission for railroads; Federal Power Commission for electric utilities (nonelectric operations and quarterly figures prior to 1942 are partly estimated); Federal Communications Commission for telephone companies (except dividends); published reports for industrial companies and for telephone dividends. Figures for the current and preceding year subject to revision, especially for war producers whose contracts are under renegotiation. For description of data and back figures, see pp. 214-217 of the March 1942 BULLETIN.

* Figures include only holdings by institutions or agencies from which reports are received. Data for commercial banks, mutual savings banks, and the residual "other" are not entirely comparable from month to month. Since June 1943, the coverage by the survey of commercial banks has been expanded. Figures in column headed "other" include holdings by nonreporting banks and insurance companies as well as by other investors. Estimates of total holdings (including relatively small amounts of nonmarketable issues) by all banks and all insurance companies for certain dates are shown in the table above.

¹ Including stock savings banks. On July 31, 1944, commercial banks reporting to the Treasury held \$26,282,000,000 of United States Government securities due or callable within one year out of a total of \$53,249,000,000 outstanding.

² Including \$196,000,000 of Postal Savings and prewar bonds not shown separately below.

¹ Excluding Federal land bank bonds held by the Federal Farm Mortgage Corporation.

² Excluding investments in preferred stock, the amount of which is shown in the lower section of this table.

³ Excluding loans by Federal savings and loan associations, which are privately owned institutions under the supervision of the Federal Home Loan Bank Administration. Loans by these institutions are reported quarterly and amounted to 1,973 million dollars on June 30, 1944.

⁴ The increase in business property and the decrease in other assets resulted largely from the transfer of completed vessels from the U. S. Maritime Commission (reported as other assets) to the War Shipping Administration (reported as business property).

[The terms "adjusted" and "unadjusted" refer to adjustment of monthly figures for seasonal variation]

NOTE.—Figures for August 1944 are preliminary. Indexes for major groups and totals have been adjusted to final data for 1941 and preliminary data for the second quarter of 1942 made available by the Bureau of Employment Security of the Federal Security Agency. Back data and data for industries not here shown are obtainable from the Bureau of Labor Statistics. Underlying figures are for pay roll period ending nearest middle of month and cover wage earners only.

* Includes Contract Construction and Federal Force Account Construction. † Revised.

NOTE.—Revised seasonally adjusted estimates of the Board of Governors based on revised Bureau of Labor Statistics data released in May 1944. Estimates include all full- and part-time wage and salary workers in nonagricultural establishments employed during the pay period ending nearest the 15th of the month. Proprietors, self-employed persons, domestic servants, and personnel of the armed forces are excluded. August 1944 figures are preliminary. For back seasonally adjusted estimates, see BULLETIN for June 1944, p. 600. Back unadjusted data are available from the Bureau of Labor Statistics.

NOTE.—Group totals include sales in departments not shown separately. Figures for basement store are not strictly comparable with those for main store owing chiefly to inclusion in basement of fewer departments and somewhat different types of merchandise. The ratio of stocks to sales is obtained by dividing stocks at the end of the month by sales during the month and hence indicates the number of months' supply on hand at the end of the month in terms of sales for that month.

^p Preliminary. ^r Revised.

¹ Includes repair and modernization loans. A revision of repair and modernization estimates was shown on p. 392 of the BULLETIN for April 1944. This revision is preliminary and subject to change.

² An estimated total of noninstalment consumer loans; i.e., single-payment loans of commercial banks and loans by pawnbrokers.

Note.—National estimates of consumer short-term credit for the period from January 1929 through August 1942 were prepared by the Bureau of Foreign and Domestic Commerce, United States Department of Commerce, and published in the November 1942 issue of the *Survey of Current Business* with a description of sources of data and methods of estimation. Later estimates, comparable with those formerly published by the Department of Commerce, were made at the Board of Governors of the Federal Reserve System.

CONSUMER INSTALMENT SALE CREDIT, EXCLUDING AUTOMOTIVE

¹ Banks are classed according to the reserves which they are required to carry (see p. 972). Some banks classed as "country banks" are in outlying sections of reserve cities or central reserve cities, and some banks classed as "reserve city banks" are in outlying sections of central reserve cities. Figures for each class of banks include assets and liabilities of their domestic branches, whether located within or outside the cities in which the parent banks are located.

² Demand deposits other than interbank and United States Government, less cash items reported as in process of collection.

Tables on the following pages include the principal available statistics of current significance relating to gold, international capital transactions of the United States, and financial developments abroad. The data are compiled for the most part from regularly published sources such as central and commercial bank statements and official statistical bulletins; some data are reported to the Board directly. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Back figures for all except price tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

⁸ Preliminary.

¹ Figures through March 1940 and figure for December 1942 and December 1943 include, in addition to gold of the Central Bank held at home, gold of the Central Bank held abroad and gold belonging to the Argentine Stabilization Fund.

² Change from previous December due largely to inclusion of gold formerly not reported.

³ On May 1, 1940, gold belonging to Bank of Canada transferred to Foreign Exchange Control Board. Gold reported since that time is gold held by Minister of Finance.

⁴ Figures relate to last official report dates for the respective countries, as follows: Bulgaria—Jan. 31, 1943; Greece—Mar. 31, 1941; Java—Jan. 31, 1942; Norway—Mar. 30, 1940; Poland—July 31, 1939; Yugoslavia—Feb. 28, 1941.

⁵ Figure for December 1938 is that officially reported on Apr. 30, 1938.

⁶ Figure for February 1941; beginning Mar. 29, 1941, gold reserves no longer reported separately.

⁷ Beginning December 1942, includes gold reserves abroad, formerly not reported.

⁸ These countries are: Albania, Algeria, Australia, Austria through Mar. 7, 1938, Belgian Congo, Bolivia, China, Costa Rica beginning July 1943, Danzig through Aug. 31, 1939, Ecuador, El Salvador, Estonia, Finland, Guatemala, Iceland, Ireland beginning February 1943, Latvia, Lithuania, Morocco, and Thailand (Siam). Figures for certain of these countries have been carried forward from last previous official report.

⁹ Gold holdings of Bank of England reduced to nominal amount by gold transfers to British Exchange Equalization Account during 1939.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Tables 156-160, pp. 536-555, and for a description of figures, including details regarding special internal gold transfers affecting the reported data, see pp. 524-535 in the same publication.

¹ Reported at infrequent intervals or on delayed basis: U. S.—Exchange Stabilization Fund (Special A/c No. 1); U. K.—Exchange Equalization Account; France—Exchange Stabilization Fund and Rentes Fund; Belgium—Treasury.

² Figure for end of September.

³ Reported figure for total British gold reserves on Aug. 31, 1939, less reported holdings of Bank of England on that date.

⁴ Figure for Sept. 1, 1941.

NOTE.—For certain back figures and for details regarding special internal gold transfers affecting the British and French institutions, see *Banking and Monetary Statistics*, p. 526.

Gold production in U. S. S. R.: No regular Government statistics on gold production in U. S. S. R. are available, but data of percentage changes, irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, afford a basis for estimating annual production as follows: 1934, 135 million dollars; 1935, 158 million; 1936, 187 million; 1937, 185 million; 1938, 180 million.

¹ Preliminary. ² Figure carried forward.

³ Annual figures through 1940 are estimates of U. S. Mint; annual figure for 1941 based on estimates of American Bureau of Metal Statistics.

⁴ Beginning April 1941, figures are those reported by American Bureau of Metal Statistics.

⁵ Beginning May 1940, monthly figures no longer reported. Annual figure for 1940 estimated at three times production for first four months of the year.

⁶ Includes Philippine Islands production received in United States. Annual figures are estimates of the United States Mint. Monthly figures represent estimates of American Bureau of Metal Statistics, those for 1943 having been revised by adding to each monthly figure \$85,455 so that aggregate for 1943 is equal to annual estimate for the year compiled by Bureau of Mint in cooperation with Bureau of Mines.

⁷ Figures for Canada beginning 1943 are subject to official revision.

⁸ Beginning April 1942, figures no longer reported. Annual figure for 1942 is rough estimate based on reported production of \$7,809,000 in first three months of year.

⁹ Gold exports, reported by the Banco Nacional de Nicaragua, which states that they represent approximately 90 per cent of total production.

¹⁰ Beginning December 1941, figures are those reported by American Bureau of Metal Statistics. For the period December 1941–December 1943 they represent total Australia; beginning January 1944, Western Australia only.

¹¹ Beginning May 1940, figures are those reported by American Bureau of Metal Statistics.

NOTE.—For explanation of table and sources, see BULLETIN for February 1939, p. 151; July 1938, p. 621; June 1938, p. 540; April 1933, pp. 233–235; and Banking and Monetary Statistics, p. 524. For annual estimates compiled by the United States Mint for these and other countries in the period 1910–1941, see Banking and Monetary Statistics, pp. 542–543.

¹ Differs from official customs-house figures in which imports and exports for January 1934 are valued at approximately \$20.67 a fine ounce.

² Includes \$31,830,000 from Argentina.

³ Includes \$28,097,000 from China and Hong Kong, \$15,719,000 from Italy, \$10,953,000 from Norway, \$10,077,000 from Chile, and \$37,555,000 from other countries.

⁴ Includes \$75,087,000 from Portugal, \$59,072,000 from Argentina, \$43,935,000 from Italy, \$33,405,000 from Norway, \$30,851,000 from U. S. S. R., \$26,178,000 from Hong Kong, \$20,583,000 from Netherlands Indies, \$16,310,000 from Yugoslavia, \$11,873,000 from Hungary, \$10,802,000 from Chile, \$10,775,000 from Brazil, \$10,416,000 from Spain, \$10,247,000 from Peru, and \$28,935,000 from other countries.

⁵ Includes \$44,920,000 from U.S.S.R., \$10,963,000 from Central America, and \$44,603,000 from other countries.

⁶ Includes imports from U. S. S. R. as follows: February—\$11,236,000, August—\$3,407,000, September—\$5,652,000, October—\$5,550,000, November—\$5,615,000, December—\$13,460,000.

NOTE.—Figures for months subsequent to December 1941 have not been released for publication. For bank figures see Banking and Monetary Statistics, Table 158, pp. 539–541, and for description of statistics, see p. 524 in the same publication.

¹ This category made up as follows: through Sept. 21, 1938, funds held by foreign central banks at the Federal Reserve Bank of New York; beginning Sept. 28, 1938, also funds held at commercial banks in New York City by central banks maintaining accounts at the Federal Reserve Bank of New York; beginning July 17, 1940, also funds in accounts at the Federal Reserve Bank of New York which had been transferred from central bank to government names; beginning with the new series commencing with the month of July 1942, all funds held with banks and bankers in the United States by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.).

² Reported figures for capital movement through July 1 have been adjusted to represent the movement through June 30 on the basis of certain significant movements known to have occurred on July 1. Subsequent figures are based upon new monthly statistical series. For further explanation, see BULLETIN for January 1943, p. 98.

³ Amounts outstanding on June 30, in millions of dollars: total foreign banking funds in United States \$5,508.6, including official funds, \$3,299.0, and other funds, \$2,209.6; United States banking funds abroad, \$278.9; and brokerage balances (net due "foreigners") \$42.3.

NOTE.—Statistics reported by banks, bankers, brokers, and dealers. Data by countries and geographic areas through December 1941, have been published in earlier BULLETINS for all types of capital movement in the above table (except columns 3 and 4), and for outstanding short-term liabilities to and claims on "foreigners" as reported by banks and brokers. For back figures, see *Banking and Monetary Statistics*, Tables 161-163, pp. 574-637, and for full description of statistics see pp. 558-560 in the same publication.

¹ Through February 1939, valued at legal parity of 85 shillings a fine ounce; thereafter at market price, which fluctuated until Sept. 6, 1939, when it was officially set at 168 shillings per fine ounce.

² Securities and silver coin held as cover for fiduciary issue, the amount of which is also shown by this figure.

³ Notes issued less amounts held in banking department

⁴ On Jan. 6, 1939, 200 million pounds sterling of gold (at legal parity) transferred from Bank to Exchange Equalization Account; on Mar. 1, 1939, about 5.5 million pounds (at current price) transferred from Exchange Account to Bank; on July 12, 1939, 20 million pounds transferred from Exchange Account to bank; on Sept. 6, 1939, 279 million pounds transferred from Bank to Exchange Account.

⁵ Fiduciary issue increased by 50 million pounds on June 12, 1940, Apr. 30, Aug. 30, and Dec. 3, 1941, and Apr. 22 and July 28, 1942; by 70 million pounds on Dec. 2, 1942; and by 50 million pounds on Apr. 13, Oct. 6, and Dec. 8, 1943, and on Mar. 7 and Aug. 2, 1944.

⁶ Securities maturing in two years or less.

⁷ Includes notes held by the chartered banks, which constitute an important part of their reserves.

⁸ On May 1, 1940, gold transferred to Foreign Exchange Control Board in return for short-term Government securities (see BULLETIN for July 1940, pp. 677-678).

NOTE.—For bank figures on Bank of England and Bank of Canada, see *Banking and Monetary Statistics*, Tables 164 and 166, pp. 638-640 and pp. 644-645, respectively; for description of statistics see pp. 560-564 in same publication.

CENTRAL BANKS—Continued

¹ Gold revalued March 1940, November 1938, July 1937, and October 1936. For further details see BULLETIN for May 1940, pp. 406-407; January 1939, p. 29; September 1937, p. 853; and November 1936, pp. 878-880.

² For explanation of this item, see BULLETIN for July 1940, p. 732.

³ By a series of Conventions between the Bank of France and the Treasury, dated from Aug. 25, 1940, through May 17, 1944, advances of 411,000 million francs were authorized to meet the costs of the German army of occupation.

⁴ Central Administration of the Reichskreditkassen.

⁵ In each of the weeks ending Apr. 20 and Aug. 3, 1939, 5,000 million francs of gold transferred from Exchange Stabilization Fund to Bank of France; in week ending Mar. 7, 1940, 30,000 million francs of gold transferred from Bank of France to Stabilization Fund.

⁶ Gold not shown separately in weekly Reichsbank statement after June 15, 1939.

NOTE.—For back figures on Bank of France and Reichsbank, see *Banking and Monetary Statistics*, Tables 165 and 167, pp. 641-643 and pp. 645-647, respectively; for description of statistics see pp. 562-565 in same publication.

¹ Separate figures for National Bank of Belgium not available. The Bank of Issue of Brussels was founded by the German Military Administration on June 27, 1940; it has no note issue, drawing its resources principally from advances from the National Bank and deposits by the Postal Checking Office.

² Latest month for which report is available for this institution.

³ For last available report from the central bank of Bulgaria (January 1943), see BULLETIN for July 1943, p. 697; of Finland (August 1943), see BULLETIN for April 1944, p. 405; of Greece (March 1941) and Japan (September 1941), see BULLETIN for March 1942, p. 281; and of Java (January 1942), see BULLETIN for March 1943, p. 278.

⁴ Represents Bank's claim on the Government for the Bank's foreign exchange losses resulting from the revaluation of the krone on Jan. 23, 1942.

⁵ Items for issue and banking departments consolidated.

¹ Through August 1939, averages of weekly figures; beginning September 1939, end-of-month figures, representing aggregates of figures reported by individual banks for days, varying from bank to bank, toward the end of the month.

² Represent six-month loans to the Treasury at 1½ per cent, callable by the banks in emergency at a discount equal to the Bank of England rate.

³ Through December 1937, excludes deposits in offices outside England and Wales which are included in total.

⁴ Figures for three banks only. Data for Crédit Industriel et Commercial not available September 1940–March 1941.

NOTE.—For back figures and figures on German commercial banks, see *Banking and Monetary Statistics*, Table 168, pp. 648–655, and for description of statistics see pp. 566–571 in same publication.

¹ Prior to Nov. 1, 1942, the official designation of the Brazilian currency unit was the "milreis."

² Average of daily rates for that part of the year during which quotations were certified.

NOTE.—For back figures, see *Banking and Monetary Statistics*, Table 173, pp. 662-682. For description of statistics see pp. 572-573 in same publication, and for further information concerning developments affecting the averages during 1942 and 1943 see BULLETIN for February 1943, p. 201, and February 1944, p. 209. There are no developments to record for 1944.

^p Preliminary.

¹ Figures represent calculated prices of a 4 per cent 20-year bond offering a yield equal to the monthly average yield for 15 high-grade corporate bonds for the series beginning 1937 and for a varying number of high-grade bonds for the series prior to that date. The yearly average for 1937 is the same for both series. Source.—Standard and Poor's Corporation; for compilations of back figures on prices of both bonds and common stocks in the United States see *Banking and Monetary Statistics*, Table 130, p. 475, and Table 133, p. 479.

² Since Apr. 1, 1935, the 139 bonds included in the calculation of the average price have all borne interest at 4½ per cent. The series prior to that date is not comparable to the present series, principally because the 169 bonds then included in the calculation bore interest at 6 per cent.

³ Indexes of reciprocals of average yields. For old index, 1929-1936, 1929 = 100; average yield in base year was 4.57 per cent. For new index beginning January 1937, Jan.-Mar. 1937 = 100; average yield in base period was 3.39 per cent.

⁴ This number originally 329, has declined as the number of securities eligible for the index has diminished. In May 1941, it was down to 287.

⁵ Average Apr.-Dec. only. Average Jan.-Mar. on old basis was 95.9.

⁶ Average based on figures for 7 months; no data available May-Sept.

⁷ Average based on figures for 10 months; no data available Jan.-Feb.

⁸ Average based on figures for 9 months; no data available May-July.

**BOARD OF GOVERNORS
OF THE FEDERAL RESERVE SYSTEM**

MARRINER S. ECCLES, *Chairman*

RONALD RANSOM, *Vice Chairman*

M. S. SZYMCAK
JOHN K. MCKEE

ERNEST G. DRAPER
R. M. EVANS

LAWRENCE CLAYTON, *Assistant to the Chairman*

ELLIOTT THURSTON, *Special Assistant to the Chairman*

OFFICE OF THE SECRETARY

CHESTER MORRILL, *Secretary*
LISTON P. BETHEA, *Assistant Secretary*
S. R. CARPENTER, *Assistant Secretary*
FRED A. NELSON, *Assistant Secretary*

LEGAL DIVISION

WALTER WYATT, *General Counsel*
J. P. DREIBELBIS, *General Attorney*
GEORGE B. VEST, *Assistant General Attorney*

DIVISION OF RESEARCH AND STATISTICS

E. A. GOLDENWEISER, *Director*
WOODLIEF THOMAS, *Assistant Director*

DIVISION OF EXAMINATIONS

LEO H. PAULGER, *Director*
C. E. CAGLE, *Assistant Director*
WILLIAM B. POLLARD, *Assistant Director*

DIVISION OF BANK OPERATIONS

EDWARD L. SMEAD, *Director*
J. R. VAN FOSSEN, *Assistant Director*
J. E. HORBETT, *Assistant Director*

DIVISION OF SECURITY LOANS

CARL E. PARRY, *Director*
BONNAR BROWN, *Assistant Director*

DIVISION OF PERSONNEL ADMINISTRATION

ROBERT F. LEONARD, *Director*

**OFFICE OF ADMINISTRATOR FOR WAR LOANS
COMMITTEE**

EDWARD L. SMEAD, *Administrator*
GARDNER L. BOOTHE, II, *Assistant Administrator*

FISCAL AGENT

O. E. FOULK, *Fiscal Agent*
JOSEPHINE E. LALLY, *Deputy Fiscal Agent*

**FEDERAL
OPEN MARKET COMMITTEE**

MARRINER S. ECCLES, *Chairman*
ALLAN SPROUL, *Vice Chairman*
CHESTER C. DAVIS
ERNEST G. DRAPER
R. M. EVANS
HUGH LEACH
JOHN K. MCKEE
J. N. PEYTON
RONALD RANSOM
M. S. SZYMCAK
C. S. YOUNG

CHESTER MORRILL, *Secretary*
S. R. CARPENTER, *Assistant Secretary*
WALTER WYATT, *General Counsel*
