# FEDERAL RESERVE BULLETIN 

## Rising Cost of Living

Continued increases in production and employment in recent months have been accompanied by sharp advances in the cost of living, which have reflected chiefly previous upward movements in wholesale prices. Wage rates have been further increased and corporate profits, after allowance for higher taxes, have continued substantially in excess of 1940. National income has risen to a rate of over 95 billion dollars a year. As increases in capacity have been less rapid than the growth in the demand for goods and as additional pressure for conversion of existing plant to military production has developed, shortages of many types of civilian goods have come closer. Measures for limiting the growth of civilian demand have been put into effect, particularly stiffer taxes and regulation of consumer credit. There are also instances in which incomes and consequently demand for goods are being curtailed as a result of dislocations incident to the transition from civilian to military production.

This autumn, growth in activity has not been accompanied by forward buying to the same extent as during the latter part of 1940 and the first half of 1941. Manufacturers and distributors have been operating more conservatively, as inventories and unfilled orders have accumulated all along the line, and have been less active buyers. Buying by consumers has also been reduced somewhat from peak levels reached in the third quarter of the year, when the volume of purchases rose in anticipation of shortages, installment credit regulation, and higher excise taxes. Reduced buying has been particularly apparent in automobiles and other consumers durable goods. Consumer re-
sistance to price advances has been a factor restricting sales of some products recently. In wholesale markets the reduction in buying has resulted in a period of relatively stable prices. There have been declines in prices of some agricultural commodities, especially those marketed in large volume at this season. Prices of most industrial materials have remained at earlier advanced levels, but a number of finished industrial products have advanced further. Price ceilings have been established for additional basic materials and also for some products at later stages of production and distribution.

Industrial production by October had increased to 164 per cent of the 1935-1939 average, according to the Board's seasonally adjusted index, and a further increase to about 166 is Increase in production indicated for November. The rise of seven points in the five months since June, when the index was at 159 , compares with a more rapid increase of 20 points in the first half of this year. The total increase since the defense program was initiated a year and a half ago has been 50 points. For the calendar year 1941 the index is likely to average 156, as compared with 123 last year and 108 in 1939.

Increased industrial output since June has been largely in the fabrication of armaments and of equipment for armament production. Output of passenger automobiles, tires, silk goods, and a few other products, on the other hand, has been curtailed, largely by Federal action, and in most other lines production has shown little further increase. This has been in contrast with developments earlier in the year when output of most products increased rapidly.

Bureau of Labor Statistics data; general wholesale price index and cost of living index shifted to August 1939 base and monthly data for cost of living prior to September 1940 estimated by Federal Reserve. November 1941 estimated.

Movement of traffic on the railroads this autumn has been heavy, but no important shortages of equipment were evident during the season of peak traffic. In the field of construction, contract awards have continued at high levels, with an unusually large portion of publicly financed projects. Building materials have been generally available, except for local and temporary shortages, but recently Federal action has been taken to limit the use of specified materials and to grant priorities on materials to be used on projects essential to defense.

Wholesale prices have been relatively stable since the early part of September, after a period of swift advance begin-

## Recent price changes

 ning last February. Retail prices, which rose less than wholesale prices during the spring and summer months, have continued to advance sharply. By the middle of November thetotal cost of living was estimated to be 9 per cent higher than last February and, as is shown on the chart in the opposite column, 11 per cent above the prewar level.

The wholesale price index of 900 commodities, which had risen from 81 per cent of the 1926 average in February to 92 in September, by November had advanced one point further to 93 . This level, as shown on the chart, is 24 per cent above that of August 1939, before the outbreak of war. The recent relative stability in this index has reflected further increases in prices of finished industrial products, partly offset by declines in agricultural commodities. Livestock and meat prices have been lower, chiefly as a result of a large seasonal increase in marketings, and there have been some reductions in prices of other foodstuffs and cotton, which earlier this year had shown the largest increases.

For 28 basic commodities, prices in the latter part of November were about the same as they were two and a half months earlier, as is shown in the chart below. Prices of most basic industrial materials have recently

WHOLESALE PRICES OF 28 BASIC COMMODITIES

Bureau of Labor Statistics indexes since August 1939; earlier indexes are Federal Reserve groupings of Bureau of Labor Statistics data. Latest figures shown are for November 27, 1941.
remained largely unchanged at Federal ceiling levels established earlier and agricultural commodities, following a sharp decline in the middle of October, have advanced. Imported, as well as domestic, commodities in November were near the levels reached in early September.

Price advances in wholesale markets earlier this year, particularly for basic commodities, had been partly in anticipation
Causes of rising prices of important changes in the underlying situation as a result of the rapidly expanding defense program. Prior to the passage of the first Lend-Lease Act in March, the defense program was of a limited character involving Federal expenditures for armaments of about 30 billion dollars over a period of several years. With authorization of lend-lease aid and further additions to the defense program to a combined total of over 60 billion dollars, it became evident that public expenditures for armaments and facilities to produce them would be vastly expanded and that Government purchases of foodstuffs and other agricultural and industrial commodities would be in large volume. Moreover, the expenditures were more urgent and were expected to continue over a longer period of time. It soon became apparent that the large-scale purchases required would have important direct effects in the commodity markets as well as important indirect effects in increasing consumer incomes, limiting supplies of many consumers goods, and increasing costs of production.

Prices had already risen considerably in the autumn of 1940 , and the prospect of these new developments stimulated unprecedented buying by producers, distributors, and consumers during the spring and summer of this year. Unfilled orders continued to expand, delivery dates lengthened, and buyers, in many instances anxious to build up inventories as well as to meet expanding current requirements, were willing to pay
higher prices for goods. Other factors affecting market supplies were reduction or shifts in coastwise and foreign shipping facilities due partly to extensive naval warfare, reluctance to expand plant facilities at the start of the defense program, and the withholding and accumulation of stocks on the part of private concerns and public agencies.

This autumn, however, as buyers had built up their inventories and extended their commitments considerably, they became less willing, in many instances, to extend their pur-
Slackening of price advance chases further into the future, especially when still higher prices were asked by sellers and when the retail market for goods at advanced prices had not been tested. At the same time Federal restrictions on purchasing of materials and on output of finished products were being extended. As a consequence of these and other factors, the volume of orders placed with manufacturers declined

Source: Department of Commerce. For inventories, December 31, $1938=100$. Scale for inventories is double that for orders and shipments to indicate approximately the relationships that would be shown by actual value figures. Latest figures shown are preliminary data for October 1941.
from earlier peak levels, as indicated in the chart on the preceding page.

New orders received by manufacturers of durable goods have declined substantially from the peak reached last June, although they are still at a high level compared with 1939 and most of 1940 , both in value terms and after allowance for price increases. New orders, however, in October were still as large, relative to the prewar period, as shipments of durable goods, which rose little after June. Orders and shipments of nondurable goods, which increased less sharply than those for durable goods, have continued at or near peak levels. Inventories held by manufacturers have continued to increase, reflecting larger amounts of goods in process, accompanying increased operations, as well as accumulation of supplies of raw materials.

Among the other factors operating to limit price advances since the early part of September have been a seasonal increase in marketings of farm products and an improvement in the supply situation, at least temporarily, for some other commodities. Speculative sentiments have been affected by international developments and the accompanying prospects of more widespread price controls. During this period there has been an extension of Federal maximum price action, particularly to petroleum products and to selected metal, lumber, paper, chemical, and textile products. Earlier advances in prices of imported commodities and improved shipping practices have brought forth more abundant supplies of commodities such as wool, burlap, and sugar than had been anticipated, and partly as a result prices of 11 basic imports have leveled off since June, as indicated in the chart on page 1212. Increased supplies of petroleum products have been made available to the East Coast of this country as a result of the return of a substantial number of tankers previously taken over by Great Britain. Also, with the shift from the Federal priorities system to more direct allocation of materials, the supply situation for some
commodities has improved. Consumer buying also showed a decline in October following a period of exceptionally heavy purchases.

Notwithstanding the recent slackening in buying, the underlying situation with regard to increasing defense outlays, higher incomes, and reduced supplies of many products has continued to develop generally along lines expected earlier, and the upward movement in prices of industrial products has continued, despite some further extension of Federal action. Also, further advances in living costs have contributed to continued pressure for higher wage rates.

Following earlier increases in prices at wholesale, retail prices have risen sharply in recent months. In some instances, retail prices have advanced independently, with the
Rise in cost of living changes being reflected back to jobbers' and producers' prices. The largest advances, as shown in the chart on the next page, have been in commodities, particularly foods, clothing, and house furnishings. Rents and services, however, have also been rising in recent months, particularly in those localities where consumer incomes and expenditures have been greatly increased. The total cost of living, covering both goods and services, in November was about 11 per cent above the prewar level, most of the rise having occurred since March this year.

Prices for goods and services purchased by the low income groups appear to have increased most sharply. Thus foods, which commonly absorb about half of the expenditures by the lower third income group as compared with a fifth by the upper third, have risen by 20 per cent from the prewar level. Also the lower priced foods such as pork products, cheese, flour, and beans have shown among the largest increases in price. Clothing, which is also especially important in the budgets of those in the lower income groups, has shown a large price increase, with the sharpest advances in work clothing and other

Bureau of Labor Statistics data for the fifteenth of the month; selected dates March 1935-July 1936, quarterly through September 1940, and monthly October 1940-October 1941.
cotton products. Percentage increases in rents on units renting for $\$ 30$ and less have been about twice the average shown on the chart. Fuller employment and increases in wage rates have resulted in considerably larger earnings of many individuals with low incomes, but numerous others, particularly in trade and the services and in nondefense production, have had little or no change in income.
The rise in the food index since last spring has reffected to a large extent advances in prices of livestock products. Direct Federal purchases of pork, dairy, and poultry products, chiefly to increase exports and to stimulate larger output, have been substantial since April. Representing a new demand outside of regular trade channels, these purchases have had a strong influence on prices. At the same time increases in consumer demand for these products have been larger than for other foods. Retail prices of sugar, beverages, and oils and fats also rose considerably
this summer, reflecting partly earlier increases in wholesale prices in expectation of restricted imports. Pressure on prices of these commodities, however, has recently been reduced by improved shipping facilities, direct Federal controls over raw sugar prices, and action to increase supplies of beverages and vegetable oils. Retail prices of cereal products, which this year had shown little change until July, have since increased, along with other retail foods, notwithstanding the existence of large domestic supplies of grains. Prices of canned and other processed foods have risen partly because of increased processing costs; another important factor in the rise has been the greatly increased Federal demand for these products for the armed forces and for export to the United Kingdom.
Retail prices of housefurnishings as a group have shown almost as large a rise in the past year as food prices. Furniture has advanced 25 per cent, while prices of such diverse products as rugs, electrical appliances, and china have increased about 10 per cent. Prices of automobiles, tires, and gasoline, included in the miscellaneous group, have increased about 15 per cent since last year.
A continued rapid increase in income payments has been one of the important elements

Rise in income payments at a rate of wher tor an 95 billion a year, an increase of 25 per cent from the rate of 76 billion dollars a year in August 1940, according to recently revised seasonally adjusted figures of the Department of Commerce. For wages and salaries the average rise was 27 per cent, with larger increases in the commodity producing industries and the Government, smaller increases in the distributive and service industries, and a decline in work relief wages. Agricultural income has risen substantially. There has been some increase in dividends but this has not been in proportion to the growth in profits.

The rise in wages and salaries has reflected for the most part additional employment and increased hours of work. In manufacturing, for example, these factors accounted for nearly three-fourths of the increase in payrolls from August 1940 to October 1941. Average hourly earnings have risen about 14 per cent in this period and this rise has accounted for about one-fourth of the increase in factory payrolls. Part of the rise in average hourly earnings has reflected more overtime work, paid for at higher rates, but most of the increase, particularly since the early months of this year, has come about through increases in wage rates.

Increases in average hourly earnings during this period were widespread, but they were more marked in the industries producing metals and metal products than in most other lines. Activity in these industries has been at exceptional levels, creating unusual demand for workers and at the same time making it possible for manufacturers to pay higher wages and to earn higher profits.

Earnings of large industrial corporations, despite increasing costs and heavier taxes, have been larger during

## Corporate profits

 1941 than during 1940. As shown in the table, reported earnings of 416 companies were about 30 per cent larger in the first nine months of 1941 than in the first nine months of last year. The largest increases have occurred in such durable goods industries as iron and steel, aircraft, railway equipment, general industrial machinery, automobiles and automobile accessories. In nondurable goods industries earnings for year to date have shown smaller increases, except for the oil producing and refining and paper and printing groups.Net profits shown in the table are after deductions for reserves for Federal income and excess profits taxes, which have absorbed an increasing proportion of earnings before taxes. In 1940 normal taxes were increased and an excess profits tax was imposed, and this year further increases were made in

Profits of Large Industrial Corporations, Jandary-September, 1940 and 1941

| Industrial Group | Number of companies | Profts (in millions of dollars) |  | Per-centage increase |
| :---: | :---: | :---: | :---: | :---: |
|  |  | 1941 | 1940 |  |
| Total | 416 | 1,242. 2 | 945.4 | +31 |

| Miscellaneous services. | 35 | 41.6 | 31.3 | +33 |

these taxes. Quarterly data on reserves for Federal taxes, and profits before and after deduction of such reserves, are available since the beginning of 1939 for 122 industrial companies. The Federal tax reserves set up by these companies during the first nine months of 1941 were 53 per cent of net earnings before taxes as compared with 17 per cent in the first nine months of 1939. As a result the major part of the increase in earnings that has accompanied the defense program has been set aside as reserves to meet Federal taxes. Earnings of these 122 companies, after all charges and before taxes, were 1,200 million dollars for the first nine months of 1941, an increase of 770 millions as compared with the corresponding period of 1939; reserves for Federal taxes showed an increase of 550 millions. Earnings after taxes-that is, the remainder available for stockholders-also increased substantially; for the 122 companies they were 25 per cent larger in the first nine months of 1941 than in 1940 and nearly 60 per cent larger than in the corresponding period of 1939 .

# From a Legal Standpoint 

## Administrative interpretations of banking laws, new regulations issued by the Board of Governors, and other similar material.

## CONSUMER CREDIT

## Interpretations of Regulation W

Since the publication of the November 1941 Federal Reserve Bulletin, the Board of Governors of the Federal Reserve System has issued the following interpretations of Regulation W relating to Consumer Credit:

## Seasonal Goods

Interpretation No. 106 of Regulation W
The determination of whether listed articles are "seasonal goods" within the meaning of sections 4(d) and 5(c) (3) of Regulation W depends on their typical use, rather than on the distribution of their sales during the year or the use to which the article is put in a particular case.

For these reasons, Group D-1 listed articles (furnaces, etc.) and Group C-6 articles (heating stoves, etc.) are winter "seasonal goods," even though occasionally such articles may be used the year round. Similarly, Group C-8 articles (room-unit air conditioners), Group D-5 articles (home air conditioning systems), and Group D-6 articles (attic ventilating fans) are summer "seasonal goods" even though occasionally they may be used throughout the year.

However, as pointed out in W-74, a refrigerator is not a "seasonal good," since refrigerators are typically used the year round. The fact that some refrigerators may go unused during winter months does not alter this general classification.

## One-Payment-Bank Loan-Renewal with Curtail

Interpretation No. 107 of Regulation W
In response to several inquiries regarding W-47, the Board said that an ordinary bank loan evidenced by a promissory note repayable in full at maturity is not subject to Regu-
lation $W$, even though the bank may anticipate that at the maturity of the note it may accept a partial payment and a renewal note for the balance; provided the bank makes no commitment to do so and the transaction is entered into in good faith and not as a means of avoiding or evading the Regulation.

## Effect of Amendment Ne. 2 Upon Existing Interpretations

Interpretation No. 108 of Regulation W
Amendment No. 2 to Regulation W will affect certain interpretations previously issued by the Board, and the following comments will be pertinent to the interpretations indicated:

W-15. See sec. 9 (f) as amended relating to "Farmer Plans."
W-16. Even if not instalment sale credit, transaction would involve a "purpose loan" under sec. 5 (a) as amended.
W-19, W-28, W-49 and W-65. Note postponement of effective date of secs. 8(a) through $8(\mathrm{~d})$ as amended; note the provisions of amended sec. 8(b) relating to addons; and note provisions relating to the statement of necessity now contained exclusively in sec. 8 (d) as amended. Otherwise the principle stated in W-19, W-28, W-49 and W-65 will not be affected.

W-25, W-26, W-27, W-30 and W-48. Not affected, but note that sec. 6(a) has been amended and broadened.

W-33. Note amendment of sec. 5 (a) as to "purpose loans"; and note amended sec. 4 (e) relating to down payments.
W-45. Note that the figure in sec. 5 (b) as amended is $\$ 1,500$.

W-92. Note that sec. 6(a) has been amended and broadened, and note change to $\$ 1,500$ in sec. 5 (b), as amended.

W-24, W-36, W-37 and W-53 will be obsolete after November 30.

W-35 will be obsolete after December 31. See sec. 5 (d) as amended.

## Group E-Lender and Vendor Are on Equal Footing

Interpretation No. 109 of Regulation W
Since Amendment No. 2 of Regulation W increases the figure $\$ 1,000$ to $\$ 1,500$ in the definition of instalment loan credit but leaves the figure $\$ 1,000$ in Group $E$ of the Supplement, the Board has been asked whether the Amendment will permit a vendor to make an instalment sale of Group E materials and services in the amount of $\$ 1,200$ on easier terms than it will permit a lender to make an instalment loan to finance the same transaction.

Section 6(b) of the Regulation equalizes the application of the Regulation to vendors and lenders in such cases.

If the $\$ 1,200$ transaction does not include any articles in Group C or D, Section 6 (b) exempts it for both lender and vendor.

If the $\$ 1,200$ transaction does include articles listed in Group C or D, its status under Section 6(b) is likewise the same for both lender and vendor: the transaction is exempt for both lender and vendor if the bona fide cash purchase price of the Group C or D articles does not exceed $\$ 600$ (that is, $50 \%$ of the total over-all deferred balance of $\$ 1,200$ ) ; and it is not exempt for either lender or vendor if the purchase price of the C or D articles exceeds $\$ 600$.

## Refrigerators-Locker Plant Systems

Interpretation No. 110 of Regulation W
The classification "mechanical refrigerators" does not include refrigerated locker plant systems composed of a group of frozen food storage lockers which are not individually refrigerated but are installed in a refrigerated room, even though the individual lockers are of less than 12 cubic feet capacity.

## Automobiles-Station Wagons

Interpretation No. 111 of Regulation W
The classification "automobiles" under Group A-1 of the Supplement includes station wagons.

## FOREIGN FUNDS CONTROL

## General Licenses and Public Circular Issued by the Secretary of the Treasury

Since the publication of certain General Licenses on pages 1094-1097 of the Novem-
ber Federal Reserve Bulletin, the following General Licenses and Public Circular have been issued by the Office of the Secretary of the Treasury under the authority of the Executive Order of April 10, 1940, as amended, and the Regulations issued pursuant thereto relating to transactions in foreign exchange, etc.:

Treasury Department, Office of the Secretary, November 12, 1941
General License No. 58, as Amended, Under Executive Order No. 8389, April 10, 1940, as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions in Foreign Exchange, etc. ${ }^{\text {* }}$

General License No. 58 is amended to read as follows:
(1) A general license is hereby granted licensing all transactions ordinarily incident to the importing and exporting of goods, wares and merchandise between the United States and any part of China other than Manchuria, provided the following terms and conditions are complied with:
(a) Such transaction shall not involve property in which any one of the following has at any time on or since the effective date of the Order had any interest and shall not be by, or on behalf of, or pursuant to the direction of any one of the following:
(i) any blocked country other than China or
(ii) any person within Manchuria, or
(iii) any national of any blocked country other than China unless such national is within China;
(b) Exports from the United States to China having a value in excess of $\$ 100$ shall be effected only provided both of the following conditions are satisfied:
(i) payment therefor has been or will be made through a domestic bank and such domestic bank has been notified by an appointed bank that the importer within China has paid or has completed arrangements to pay therefor with United States dollars acquired from such appointed bank, or in lieu of the foregoing, a domestic bank has been notified by an appointed bank that the shipment has been otherwise approved by the Stabilization Board of China; and
(ii) on each shipment the domestic bank referred to in (i) shall execute Form TFR-158 in quadruplicate. The original of such executed form shall be transmitted by the domestic bank directly to the collector of customs at the port of exportation and shall be received by such collector of customs prior to the exportation of the shipment. The duplicate of such executed form shall be delivered by the domestic bank to the exporter or his agent who shall present and, if requested, deliver such copy to the collector of customs at the

[^1]port of exportation at the time the Shipper's Export Declaration is filed. The remaining two copies of such executed form shall be filed promptly by the domestic bank with the appropriate Federal Reserve Bank.
(c) Imports into the United States from China having a value in excess of $\$ 100$ shall be effected only provided both of the following conditions are satisfied:
(i) payment therefor in United States dollars has been or will be made through a domestic bank and the exporter within China has sold or has completed arrangements for selling such United States dollars to an appointed bank, or in lieu of the foregoing, the shipment has been otherwise approved by the Stabilization Board of China; and
(ii) prior to the release of any such shipment from customs custody the collector of customs of the port of entry through which the shipment is imported shall have received a consular invoice covering such shipment and such consular invoice shall bear the certification of a United States consul in China that an appointed bank has duly notified the consul that the exporter within China has sold or has completed arrangements for selling the United States dollar proceeds from such shipment to such appointed bank or that the shipment has been otherwise approved by the Stabilization Board of China.
(d) The conditions prescribed in (b) and (c) shall not apply with respect to any import or export:
(i) if the shipment was in transit between the United States and China on November 12, 1941; or
(ii) if the consignee or consignor of the shipment is the United States Government or the Chinese National Government or a recognized agency or political instrumentality of either government; or
(iii) if payment for the shipment was fully effected prior to November 12, 1941, and the following reporting procedure is followed: On each such shipment a domestic bank participating in financing the shipment shall execute Form TFR-158A in quadruplicate. The original of such executed form shall be transmitted by such domestic bank directly to the collector of customs at the port of importation or exportation as the case may be and shall be received by such collector of customs prior to the release of such shipment from customs custody or prior to the exportation of such shipment as the case may be. The duplicate of such executed form shall be delivered by the domestic bank to the importer or exporter or their respective agents who shall present and, if requested, deliver such copy to the collector of customs at the time the shipment is released from customs custody or the Shipper's Export Declaration is filed, as the case mav be. The remaining two copies of such executed form shall be filed promptly by the domestic bank with the appropriate Federal Reserve Bank.
(e) Any domestic bank prior to issuing, confirming or advising letters of credit, or accepting or
paying drafts drawn, or reimbursing themselves for payments made, under letters of credit, or making any other payment or transfer of credit, in connection with any importation or exportation pursuant to this general license, or engaging in any other transaction herein authorized, shall satisfy itself (from the shipping documents or otherwise) that:
(i) any such transaction is incident to a bona fide importation or exportation and is customary in the normal course of business, and that the value of such importation or exportation reasonably corresponds with the sums of money involved in financing such transaction: and
(ii) such importation or exportation is or will be made pursuant to all the terms and conditions of this license.
(2) As used in this general license:
(a) The term "appointed bank" shall mean any of those banks cooperating with the Stabilization Board of China and buying and selling foreign exchange with the permission of, and subject to the conditions prescribed by, such Board, the names of which appear on Schedule $A$ of this general license at the time the transaction is effected.
(b) A person shall not be deemed to be "within China" unless such person was situated within and doing business within China on and since June 14, 1941.

> E. H. Foley, Jr.,
> Acting Secretary of the Treasury.

Schedule A of General License No. 58
The offices within Hong Kong and any part of China, except Manchuria, of the following are hereby licensed as "appointed banks" within the meaning of General License No. 58:
(a) The Chase Bank
(b) National City Bank of New York
(c) Underwriters Bank for the Far East
(d) American Express Company
(e) Moscow Narodny Bank, Ltd.
(f) Thos. Cook \& Son (Bankers) Ltd.
(g) Hongkong \& Shanghai Banking Corporation
(h) Mercantile Bank of India, Ltd.
(i) David Sassoon \& Co., Ltd.
(j) E. D. Sassoon \& Co., Ltd.
(k) E. D. Sassoon Banking Co., Ltd.
(1) Chartered Bank of India, Australia \& China, Ltd.
(m) Nederlandsch Indische Handelsbank
(n) Nederlandsche Handel Maatschappij
(o) Shanghai Commercial and Savings Bank, Ltd.
(p) Bank of East Asia, Ltd.
(q) National Commercial Bank, Ltd.
(r) Chekiang Industrial Bank, Ltd.
(s) Bank of Canton, Ltd.
(t) Oversea-Chinese Banking Corporation, Ltd.
(u) Kincheng Banking Corporation
(v) China Banking Corporation
(w) Bank of China
(x) Bank of Communications
(y) Farmers Bank of China
(z) Central Bank of China
E. H. Foley, Jr.,

Acting Secretary of the Treasury.

Treasury Department, Office of the Secretary, November 12, 1941
General License No. 59, as Amended, Under Executive Order No. 8389, April 10, 1940, as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions in Foreign Exchange, etc.*
General License No. 59 is amended to read as follows:
(1) A general license is hereby granted licensing as generally licensed nationals the offices within Hong Kong and any part of China except Manchuria of the following:
(a) The Chase Bank
(b) National City Bank of New York
(c) Underwriters Bank for the Far East
(d) American Express Company
(e) Moscow Narodny Bank, Ltd.
(f) Thos. Cook \& Son (Bankers) Ltd.
(g) Hongkong \& Shanghai Banking Corporation
(h) Mercantile Bank of India, Ltd.
(i) David Sassoon \& Co., Ltd.
(j) E. D. Sassoon \& Co., Ltd.
(k) E. D. Sassoon Banking Co., Ltd.
(1) Charted Bank of India, Australia \& China, Ltd.
(m) Nederlandsch Indische Handelsbank
(n) Nederlandsche Handel Maatschappij
(o) Shanghai Commercial and Savings Bank, Ltd.
(p) Bank of East Asia, Ltd.
(q) National Commercial Bank, Ltd.
(r) Chekiang Industrial Bank, Ltd.
(s) Bank of Canton, Ltd.
(t) Oversea-Chinese Banking Corporation, Ltd.
(u) Kincheng Banking Corporation
(v) China Banking Corporation
(2) Any such office of any such bank is also authorized to engage in all transactions ordinarily incident to the importing and exporting of goods, wares, and merchandise between the United States and any part of China, except Manchuria, provided all the terms and conditions of General License No. 58 are complied with.
(3) Banking institutions within the United States making any payment, transfer or withdrawal from the accounts of any such office of the aforementioned banking institutions shall file promptly with the appropriate Federal Reserve Bank monthly reports setting forth the details of such transactions during such period.
E. H. Foley, Jr.,

Acting Secretary of the Treasury.
Treasury Department, Office of the Secretary, November 12, 1941
General License No. 61, as Amended, under Executive Order No. 8389 , April 10, 1940, as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions in Foreign Exchange, etc.*

General License No. 61 is amended to read as follows:
(1) A general license is hereby granted licensing the offices outside the United States and not within

[^2]any blocked country other than China of the following Chinese banks as generally licensed nationals:
(a) the Bank of China;
(b) the Bank of Communications; and
(c) the Farmers Bank of China.

Any transaction engaged in by ary such office of any such bank pursuant to the order of or for the account of any person not within any blocked country is also hereby authorized to the same extent, and under the same circumstances, as though such transaction were solely for the account of such office of such bank; provided, however, that this authorization shall not be deemed to permit any payment, transfer or withdrawal from any blocked account.
(2) Any office within Hong Kong or any part of China, except Manchuria, of any such bank is also authorized to engage in all transactions ordinarily incident to the importing and exporting of goods, wares and merchandise between the United States and any part of China, except Manchuria, provided all the terms and conditions of General License No. 58 are complied with.
(3) Banking institutions within the United States making any payment, transfer or withdrawal from the accounts of any such office of the aforementioned banks shall file promptly with the appropriate Federal Reserve Bank monthly reports setting forth the details of such transactions during such period.
E. H. Foley, Jr.,

Acting Secretary of the Treasury.
Treasury Department, Office of the Secretary, November 12, 1941
Revocation of General License No. 64, under Executive Order No. 8389, April 10, 1940 , as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions in Foreign Exchange, etc.*

General License No. 64 is hereby revoked.
E. H. Foley, Jr.,

Acting Secretary of the Treasury.
Treasury Department, Office of the Secretary, November 12, 1941

General License No. 75, under Executive Order No. 8389, April 10, 1940, as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions in Foreign Exchange, etc.*
(1) A general license is hereby granted authorizing remittances in any amount by any person through any domestic bank to any person in any part of China except Manchuria, and any domestic bank is authorized to effect such remittances, provided the following terms and conditions are complied with:
(a) Such remittances may be made from any account other than a blocked account and, subject to item (b) hereof, such remittances may be made from the blocked account of any national of China.
(b) Such remittances may not be made from

[^3]any blocked account if any of the following has an interest in such account:
(i) Any national of any blocked country other than China;
(ii) Any person within Manchuria; or
(iii) Any blocked country other than China; and
(c) Such remittances shall be effected by a domestic bank paying the dollar amount of the remittance to a designated agent of the Central Bank of China for the account of an appointed bank.
(2) All domestic banks effecting such remittances shall satisfy themselves that the foregoing terms and conditions are complied with.
(3) With respect to each remittance made pursuant to this general license reports on Form TFR132 shall be executed and filed in the manner and form and under the conditions prescribed in General License No. 32. Domestic banks through which any such remittances originate shall note on the reverse side of such form the nature of the transaction for which the remittance is being made but need not furnish the information called for in item 6 of such form.
(4) All dollars accruing to any appointed bank pursuant to this general license shall, if so required by the Stabilization Board of China, be made available to the Board by payment to the Central Bank of China against delivery of an equivalent amount of Chinese national currency.
(5) This general license shall not be deemed to authorize any transaction incidental to imports and exports between the United States and China.
(6) As used in this general license:
(a) The term "appointed bank" shall have the same meaning as that prescribed in General License No. 58.
(b) The term" "designated agent of the Central Bank of China" shall mean either the Bank of China or the Philippine Bank of Communications. E. H. Foley, Jr.,

Acting Secretary of the Treasury.
Treasury Department, Office of the Secretary, November 12, 1941

Public Circular No. 7, under Executive Order No. 8389, April 10, 1940 , as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions in Foreign Exchange, etc.*
General Licenses Nos. 32 and 33 shall not be deemed to authorize remittances to any individual in any part of China, except Manchuria, unless such remittances are effected in the manner prescribed in paragraph (1) (c) of General License No. 75, namely, by a domestic bank paying the dollar amount

[^4]of the remittance to a designated agent of the Central Bank of China for the account of an appointed bank.
E. H. Foley, Jr.,

Acting Secretary of the Treasury.
Treasury Department, Office of the Secretary, November 27, 1941
General License No. 42A Under Executive Order No. 8389, April 10, 1940, as Amended, and Regulations Issued Pursuant Thereto, Relating to Transactions In Foreign Exchange, Etc.*
(1) A general license is hereby granted:
(a) Licensing as a generally licensed national any individual who has been residing only in the United States at all times on and since June 17, 1940, and
(b) Licensing as a generally licensed national any partnership, association, corporation or other organization which is a national of any blocked country solely by reason of the interest therein of a person or persons licensed as generally licensed nationals pursuant to this general license.
(2) Every person licensed herein as a generally licensed national shall file with the appropriate Federal Reserve Bank within thirty days after the date hereof a report under oath in triplicate setting forth (a) the name, address and nationality of such person; (b) a statement that such person is licensed as a generally licensed national under this general license; and (c) a statement that such person has filed a report on Form TFR-300 or that such person was not required to file such report because the total value of all property interests of such person to be reported was less than $\$ 1,000$. Any person not complying with this reporting requirement is not authorized to engage in any transaction under this general license.
(3) This general license:
(a) Shall not be deemed to suspend, cancel or otherwise modify in any way the requirements of the Order and regulations relating to reports on Form TFR-300 with respect to the property interests of persons licensed herein as generally licensed nationals, and
(b) Shall not be deemed to license as a generally licensed national any individual who on or since the effective date of the Order has acted or purported to act directly or indirectly for the benefit or on behalf of any blocked country, including the government thereof, or to license any individual who is a national of a foreign country by reason of any fact other than that such individual has been domiciled in, or a subject or citizen of, a foreign country at any time on or since the effective date of the Order.

> E. H. FOLEY, JR., Acting Secretary of the Treasury.

[^5]
# Gold and Dollar Resources of the United Kingdom 

0N September 30, 1941, in connection with the hearings on the second appropriation bill under the Lend-Lease Act, certain further information concerning the gold and dollar resources of the United Kingdom and the gold and dollar transactions of the Sterling Area was presented by Mr. Daniel W. Bell, Under Secretary of the Treasury, to the Subcommittee of the Committee on Appropriations of the House of Representatives. In the Bulletin for February 1941, pp. 99-101, tables were presented showing the status of the United Kingdom's gold and dollar resources on August 31, 1939, and on December 31, 1940, as well as the estimated gold and dollar transactions of the Sterling Area in the intervening period and those anticipated in the calendar year 1941. The additional data made avail-
able by Mr. Bell include statements of the gold and dollar assets of the United Kingdom on September 1, 1941, and of the anticipated gold and dollar transactions of the Sterling Area in the six months from September 1, 1941, to March 1, 1942 (the first half of the third year of war). The figures employed in these statements were prepared by the British Government; they exclude LendLease transactions, which do not involve any immediate payments.

On the basis of this and other published information, the table at the bottom of the page has been prepared to demonstrate the changing state of the United Kingdom's gold and dollar resources during the first two years of war. In the sixteen months through the end of 1940, 2,316 million dollars of such assets was disbursed, three-

British Estimates of United Kingdom Gold and Dollar Resources

[^6]quarters in the form of gold. In the following eight months, the total utilization of resources was only 640 million dollars, but since the British had little gold left to lose, the sale of securities and investments had to be expedited to meet even this reduced drain.

In July 1941, however, the British negotiated an agreement with the Reconstruction Finance Corporation which eliminated the necessity of selling outright their remaining dollar assets. The Reconstruction Finance Corporation undertook to advance to the British Treasury a total of 425 million dollars against the pledge of British-owned market securities with a market value of 205 million, and British direct investments in this country with an estimated value of 495 million. This loan will bear interest at 3 per cent and will run for fifteen years, subject to partial extension under certain conditions. The income accruing on the pledged investments will be used to service the loan and, if maintained at the average level of the past five years, would provide for full amortization of the loan during the initial fifteen-year period.

By September 1, 1941, the Reconstruction Finance Corporation had actually advanced 100 million dollars against the pledge of market securities valued at 145 million. It thus remained committed to disburse a further 325 million dollars against the pledge of collateral valued at 555 million. Since September 1, 1941, an additional 250 million dollars has in fact been advanced against collateral valued at about 305 million, thus reducing the unutilized portion of the loan to 75 million dollars.

Although the United Kingdom's unpledged gold and dollar resources declined 640 million dollars in the first eight months of 1941, at least 80 million dollars of the decline yielded no cash proceeds. Firstly, as noted above the initial advance from the Reconstruction Finance Corporation was 45 million dollars
less than the value of the collateral pledged at that time. Secondly, the sale of British interests in the American Viscose Corporation and in the Brown and Williamson Tobacco Corporation produced only 80 million dollars, while the British figure for their holdings of direct investments, valued on a book value basis, declined as a result of these transactions by 115 million.

No official statement has been made public of the total gold and dollar transactions of the Sterling Area during the first eight months of 1941. It may be estimated, however, that the aggregate gold and dollar receipts of the Sterling Area during this period from the export of merchandise and of currently-mined or dishoarded gold, and from the liquidation of the United Kingdom's resources, amounted to over 1,500 million dollars. Of this amount, 907 million dollars was required for payments on British Government orders in this country, according to Mr. Bell's statement before the House Subcommittee. This indicates that over 600 million dollars was devoted to the remaining items of expenditure, such as payments for imports from the United States not supplied on British Government orders, net payments to this country on service transactions, and net gold and dollar payments to other countries.

It may be noted that the British forecast for 1941 published in the Bulletin for February 1941 anticipated a drain on the United Kingdom's gold and dollar resources during the year of 844 million dollars, after eliminating from the calculations the item of 620 million for gold payments to Canada and Newfoundland which in practice these countries have foregone. The actual proceeds from the liquidation of resources in the first eight months of 1941 was almost exactly eight-twelfths of this estimate for the year. This coincidence is accidental, of course, especially since the forecast for 1941 excluded any payments which might be made on new orders placed by the British Government dur-
ing the year, and any changes during 1941 in the scheduled payments on the old orders. Actually, according to Mr. Bell's statement before the House Subcommittee, changes in the old orders and the placement of new contracts increased the British commitments to American supplies by 458 million dollars during the first eight months of 1941; and no doubt substantial payments on these additional commitments were made in this period. Total payments on British Government orders in the first eight months of 1941, according to Mr. Bell, amounted to 907 million dollars, or about 60 million more than eighttwelfths of the figure forecast for the year. This excess cannot be taken as a measure of payments on the new commitments, however, since even assuming the accuracy of the British estimate for payments during 1941 on the orders outstanding at the beginning of the year, there is no reason to expect that these payments had a regular incidence through the year.

An analogous difficulty confronts any comparison of the other items in the annual forecast with the actual figures for the first eight months of the year. It may be noted, however, that our reported imports from the Sterling Area in the first eight months of 1941 exceeded eight-twelfths of the British forecast
for the year by almost 130 million dollars. This is attributable to our unexpectedly large imports from sterling countries other than the United Kingdom, the actual figures for eight months having fallen little short of the forecast for the year as a whole.

With regard to the anticipated gold and dollar transactions of the Sterling Area after September 1, 1941, Mr. Bell presented to the Subcommittee British estimates for the six months through March 1, 1942 (the first half of the third year of war) and conveyed certain additional information concerning the liquidation of commitments on British Government orders. The data for the six months' period is presented in the table below in substantially its original form. The supplementary information regarding British Government orders in this country may be summarized as follows:

Commitments outstanding on January 1, 1941 1,893
Add: Additional commitments incurred January-August 1941

458
(Changes in contracts, amendments, options taken up, new contracts. etc.)
Deduct: Payments January-August 1941
907
Commitments outstanding on September 1, 1941943
Anticipated payments September 1941-February 1942

Amount due after March 1, 1942, under existing commitments

Estimated Gold and Dollar Transactions of Sterling Area
September 1, 1941-March 1, 1942

${ }^{1}$ May consist in part of capital transactions, but probably also reflects such items as gifts.

The estimates of the gold and dollar transactions of the Sterling Area in the six months ending March 1, 1942, indicate a net deficit to be covered from United Kingdom resources of 150 million dollars. Funds considerably in excess of this amount have in fact been mobilized since September 1 by drafts on the Reconstruction Finance Corporation credit. Included in the transactions accounting for this deficit are payments totaling 500 million dollars on British Government orders placed before September 1, 1941. These commitments are now in the process of liquidation. New British Government orders during the next six months will be handled under the Lend-Lease arrangements or are included
in the six months' forecast under the item "Other goods and services, urgent or ineligible under Lend-Lease." Thus, according to the British estimates, a net gold and dollar surplus of 350 million dollars would accrue to the Sterling Area in the six months ending March 1, 1942, from transactions other than the liquidation of the old British Government commitments. If this anticipated surplus continues to accrue at the same rate after March 1, 1942, it will provide within eight months the means for liquidating the balance of the commitments outstanding on Sept. 1, 1941 without any further drain on the much diminished gold and dollar resources of the United Kingdom.

# Banks in United States Territories and 

## Possessions

From time to time, inquiries are received relating to banks in the Territory of Alaska, the Canal Zone, the Territory of Hawaii, the Commonwealth of the Philippines, Puerto Rico and other such areas under the sovereignty or jurisdiction of the United States. By way of a general response to these inquiries, a table showing the number of banking offices, and their deposits, in territories and possessions, and also brief summaries of the local laws relating to banking, if any, are set forth below.

The latest available information indicates that in the territories and possessions there are 197 banking offices with aggregate deposits of about 400 million dollars. The great majority of these offices ( 49 banks with 123 branches) are offices of domestic banks, i. e., banks whose principal place of business is
located in the respective territory or possession. There is given below a table showing the location of these offices, together with their deposits.

National banks, in the discretion of the Comptroller of the Currency, may be chartered in Alaska, Hawaii, Puerto Rico and the Virgin Islands. Also, national banks, or banks organized under local laws, located in Alaska or in a dependency or insular possession or any part of the United States outside the continental United States, may, with the consent of the Board of Governors of the Federal Reserve System, become member banks of any one of the Federal Reserve districts * and must in that event take stock, maintain reserves and be subject to all the other provisions of the Federal Reserve Act.

* There are no such members at the present time.

[^7]
## Summary of Laws

Alaska-Three or more persons may incorporate to do a banking business; and upon compliance with all legal requirements, the Territorial Banking Board, which is charged with the supervision of banking, issues a certificate of authority to do business. Among other things, the required articles of incorporation must designate the city where the bank has its principal place of business and the nature of the business to be conducted. The statutory requirements as to capital actually invested apply to all banks, including private bankers and banking partnerships.

All banks must make quarterly reports to the Banking Board which may also call for special reports; and such matters as loans, reserves, deposits, and indebtedness are subject to certain restrictions.

Institutions may also be incorporated by five or more persons to do a trust business.

Canal Zone-There are no special Canal Zone banking laws. However, under section 25 of the Federal Reserve Act, two New York City banks operate branches in the Canal Zone.

Hawaii-Not less than five persons may make application to the Treasurer of the Territory, the general supervisory authority over banks, for permission to incorporate a bank. If he finds that the public convenience will be promoted thereby, the Treasurer may approve the application, and thereafter the incorporators must execute and file with the Treasurer articles of incorporation and an application for charter. If the Treasurer is satisfied that all legal requirements have been complied with, he may issue a charter to the incorporators to do a banking business.

Apparently, all banking must be done by incorporated institutions, and banks are classified as commercial banks and savings banks. Commercial banks may conduct savings departments, but the two departments must be kept separate except in the operation
of branch banks which may be opened subject to certain restrictions.

The Treasurer is the bank supervising authority. There are statutory provisions relating to required capital funds, reserves, loans, obligations, deposits, investments, dividends, etc.

Trust companies are organized under a separate law and may not transact a banking business and banks may not exercise trust powers. The Treasurer is the supervisory authority over trust companies and detailed provisions are made governing the transaction of business.

Foreign institutions may do a banking business in Hawaii with the consent of the Treasurer ; but they must operate in accordance with certain specified requirements.

Commonwealth of the Philippines-Banks may be incorporated by filing articles of association with the Bureau of Commerce and Industry accompanied by a certificate of authority issued by the Bank Commissioner, who is the supervisory authority over all banks. Banks are classified as savings and mortgage banks, commercial banks and trust companies. Upon compliance with certain requirements applicable to savings and mortgage banks, commercial banks may be authorized to accept savings deposits. Commercial banks and trust companies are expressly authorized to establish branches, with the approval of the Bank Commissioner, if they have a paid-up capital of the required amount. A trust company may, with the Bank Commissioner's approval, conduct a commercial banking business which must be kept separate and distinct from its trust business. Similarly, and with like approval, commercial banks may operate a trust business.

Banks must submit quarterly condition reports to the Bank Commissioner who is required to examine the affairs of all banks at least once a year.

Banks of the foregoing classes organized and operating in the Commonwealth of the

Philippines are granted the powers and are subject to many of the restrictions familiar to the banking business; and foreign banks may not operate in the Commonwealth of the Philippines unless they comply with certain restrictions imposed for the protection of local depositors.

Puerto Rico-Five or more persons may organize a bank by filing articles of incorporation with the Executive Secretary and securing a certificate from the Treasurer of Puerto Rico to the effect that all legal requirements have been met. Banks are subject to supervision and inspection by the Treasurer and must make monthly reports to him and publish annual reports in a newspaper. Detailed provisions are prescribed relating to reserves, loans, capital, merger, etc.

A separate law covers the incorporation of trust companies which may be accomplished by at least seven persons filing articles of incorporation with the Executive Secretary. The Treasurer is the supervisory authority which examines and receives semiannual reports from trust companies.

In order to operate in Puerto Rico, foreign banks must obtain a license issued by the Treasurer after the filing of a copy of the institution's charter, etc., with the Executive Secretary.

Virgin Islands-The legislative branch of the government of the Virgin Islands consists of two Colonial Councils, one for the municipality of St. Croix, and the other for the municipality of St. Thomas and St. John. These Colonial Councils enact all laws governing the islands, subject to veto by the Governor and subject also to final approval or disapproval of the President of the United States whenever he deems it necessary to exercise that right.

The local laws of the Virgin Islands available are not complete but it appears that the Colonial Council for the municipality of St.

Thomas and St. John has not enacted any banking laws.

The Colonial Council of St. Croix has enacted a rather comprehensive banking law. Three or more persons may incorporate to do a banking business and upon compliance with the legal requirements, the Banking Board, which is charged with the supervision of banking, issues a certificate of authority to do business. Banks so incorporated have the usual banking powers except trust powers. Foreign banking corporations and partnerships are also required to obtain a certificate from the Banking Board to do business.

All banks are required to make quarterly reports to the Banking Board and the Banking Board may examine all banks at least once each year. Such matters as loans, reserves, deposits, indebtedness, liability of stockholders and directors and holding stock of another bank, are subject to certain restrictions.

Samoa and Guam-The Bank of American Samoa was founded in 1914 by Executive Order of the Governor. It is owned, operated, and its deposits are guaranteed by the government of American Samoa. The bank is authorized to conduct a general commercial and savings bank business including trust business.

The Bank of Guam is a branch of the Naval Government of Guam and was established by Executive Order of the Governor in 1915. All the capital stock of the bank is owned by the Naval Government of Guam. The bank is authorized to conduct a general banking business including trust business.

The islands of Guam and Samoa are under the administration of Naval officers appointed by the President of the United States, and in both cases the officers and directors of the banks are officials of the Naval Government.

## Current Events

## Election of Class B Director

Henry H. Tucker, President of Fones Brothers Hardware Company, Little Rock, Arkansas, was elected a Class B director of the Federal Reserve Bank of St. Louis on November 18, 1941, to fill the unexpired portion of the term ending December 31, 1943.

At the time of his election as a Class B director, Mr. Tucker was serving under appointment by the Board of Governors as a director of the Little Rock Branch of the Federal Reserve Bank. His resignation as a branch director was submitted to the Board of Governors and accepted on November 26, 1941.

## Death of Class_C Director

Clifford V. Gregory, Associate Publisher of Wallaces' Farmer and Iowa Homestead, Des Moines, Iowa, who had served as a Class C director of the Federal Reserve Bank of Chicago since January 1, 1940, and as Deputy Chairman of the Bank since January 1, 1941, died on November 18, 1941.

## Meeting of Federal Advisory Council

The fourth meeting of the Federal Advisory Council during the current year was held in Washington on November 16-17. On

November 17 the members of the Council met with the Board of Governors.

## Admissions of State Banks to Membership in the Federal Reserve System

The following State banks were admitted to membership in the Federal Reserve System during the period October 16, 1941, to November 15, 1941, inclusive.

## Kansas

Horton-Home State Bank, Horton, Kansas Norton-The First State Bank

Missouri
Ste. Genevieve-Bank of Ste. Genevieve
New Jersey
Phillipsburg-Phillipsburg Trust Company
Ohio
St. Henry-The St. Henry Bank

Pennsylvania
Philadelphia-Security Bank and Trust Company of Philadelphia

Virginia
Hillsville-Carroll County Bank

# From the Soard's Correspondence 

Questions of general interest, relating to money and banking, are answered in this section of the Bulletin.

# Development and Use of Member Bank Earning and Expense Statements 

## QUESTION

For some time we have been interested in the tables published in the Federal Reserve Bulletin analyzing the earnings and expenses of member banks, e.g., those on pages 467-472 of the May 1941 Bulletin. Any information you can supply as to the purposes served by these records and how the records originated will be greatly appreciated.

## ANSWER

THE analyses of member bank earnings and expenses published in the Federal Reserve Bulletin serve a variety of purposes, the primary one probably being to provide fuller information concerning the course and direction of banking developments than is obtainable from analyses of balance sheet figures alone. When, for example, there is a substantial decline in bank earnings, it is desirable to know whether it is caused by temporary influences or by fundamental changes in the source or disposition of bank income. In the latter event, the ultimate effect might be depletion of bank capital and increased risks to depositors unless some means were found to improve the earning position of banks. Such analyses are, therefore, valuable to the authorities responsible for credit and fiscal policies and bank supervision, as well as to others interested in these matters. Publication of such data is also in line with the practice of making public available statistics relating to earnings of large industrial corporations, railroads, and other institutions. As you perhaps know, income statements are not required to be published by individual banks. There is, consequently, a real need for providing data showing bank earnings,
expenditures, returns to stockholders, etc. on an aggregate basis.

Another important use that is served by compilations of bank earnings data, particularly those of the type published on pages 632 and 685-699 of the July 1941 Federal Reserve Bulletin, in which operating ratios of individual banks are computed and averaged, is to provide a basis of comparison to which the managements of individual banks can refer in seeking to determine the relative efficiency of their policies and operations. They are enabled thus to find points of weakness and sources of possible trouble which they might not be aware of otherwise. In the light of such findings, corrective measures can frequently be taken and more effective means of conducting operations discovered.

The historical background of the earnings and dividends statements that are required of our banks is somewhat obscure. In the early days of the national banking system, however, a need developed for reports (to be made to the supervisory authority) of dividends declared by national banks. No provision requiring the submission of such reports was contained in the National Bank Act as originally enacted February 25, 1863 or as reenacted June 3, 1864, but on March 3, 1869, section 5212, U. S. R. S., was added which provides that "each (national banking) association shall report to the Comptroller of the Currency, within ten days after declaring any dividend, the amount of such dividend, and the amount of net earnings in excess of such dividend". The reports origi-
nally were required to be submitted only following dividend declarations, but beginning with 1871 the Comptroller of the Currency required them to be submitted at least semiannually, whether or not dividends were declared, and beginning with 1916 every national bank has been required to submit reports covering the semiannual periods ending with June and December.

The first reports required of national banks by the Comptroller showed only the dividend declared (rate and amount), net profits, tax on profits, capital stock, undivided profits, and a few related items. In 1871 gross earnings, expenses (including taxes), premiums paid and charged off, and bad debts and other losses were added to the report form. Various changes were made from time to time in the report form, but it was not until 1917 that a break-down as to the sources and disposition of earnings was required in the regular reports. It appears, however, that in the early days some such information was obtained from certain banks on special occasions or for some specific purpose. For example, on page XII of the Annual Report of the Comptroller of the Currency for 1870 it is stated that for the year ending September 30 (1870), banks in New York City, Boston, and Philadelphia paid interest aggregating $\$ 6,486,172.66$ on their deposits. It is further shown that 1,070 banks paid interest on their deposits but 540 banks paid none. This information apparently was obtained from the submission of a special report by these banks.

Many States now require their State-char-
tered banks to submit regular reports of earnings and dividends to the respective State banking departments. Kansas, which has required them every year since 1902, apparently is the first State to have instituted such a requirement.

State bank members of the Federal Reserve System were originally required to submit reports to the Comptroller of the Currency, as national banks do. Since 1917, however, their reports have been submitted in duplicate to the Federal Reserve Banks, which in turn have sent one copy of each report to the Board's offices in Washington. National banks furnish copies of their reports to the Federal Reserve Banks, in accordance with the instructions of the Comptroller of the Currency. The forms of the reports rendered by national and State bank members have been revised at intervals, and instructions have been issued, with the result that the figures now reported are more detailed and probably more accurate than the earlier ones.

Ever since the inception of Federal deposit insurance, at the beginning of 1934, all insured nonmember banks have been required to submit annual reports to the Federal Deposit Insurance Corporation showing the sources and disposition of their income, recoveries, losses, net profits, dividends, and other items. These data, combined with the similar reports submitted by national and State member banks, produce information on bank earnings in this country that is more comprehensive than any that was ever before available.

## National Summary of Susiness Conditions

Compiled November 18 and released for publication November 21. Figures shown on charts may differ from preliminary figures used in text. Later developments are discussed on pages 1211-1216 of this Bulletin.

INDUSTRIAL activity continued to increase in October and the first half of November and there was some further advance in prices of industrial materials and finished products. Distribution of commodities to consumers declined in this period following an unusually large volume of trade in the preceding three months.

## Production

Volume of industrial production increased further in October and the Board's seasonally adjusted index advanced from 161 to 164 per cent of the 1935-1939 average. Increases in activity occurred mainly in industries producing machinery, armament, and other durable manufactures required under the defense program. In the meatpacking industry activity also advanced considerably and output of other manufactured food products, which has been unusually large in recent months, declined less than seasonally.

Automobile production increased during October and in the first half of November was sustained at about the rate reached at the beginning of the month. Production in October approximated the quota permitted for the month, whereas in August and September output had been considerably below the quotas set, owing in part to delays incident to the changeover to new model production and to difficulties in obtaining certain

Federal Reserve index of physical volume of production, adjusted for seasonal variation, $1935-1939$ average $=100$. By months, January 1935 to October 1941.
materials. Since the beginning of the model year production has been substantially in excess of retail sales and dealers' stocks have risen sharply. Output of cars and trucks in October was about one-fourth smaller than in October last year; in the industry as a whole, however, activity, as measured by man-hours worked, was about the same as a year ago, apparently reflecting a shift to armament production.

In most other manufacturing industries output in October was maintained at or near the rates prevailing in other recent months. At cotton mills activity increased, following some reduction in the previous month, while at wool mills there was a slight decline from the peak reached in September. Steel production rose to an average rate of about 99 per cent of capacity during October but declined slightly in the first half of November.

Coal production declined somewhat in October and early November, while output of crude petroleum increased further to new record levels. Iron ore shipments down the Lakes were maintained at a high rate and through the end of October amounted to $71,600,000$ gross tons, a larger volume than had previously been transported in any complete shipping season.

Value of construction contract awards decreased slightly in October, according to fig-

Federal Reserve indexes of value of sales and stocks, adjusted for seasonal variation, 1923-1925 average $=100$. By months, January 1935 to October 1941.
ures of the F. W. Dodge Corporation. Declines in awards for publicly-financed work were partly offset in the total by an increase in privately-financed projects. Awards for residential building showed little change, although an increase is customary in this month. Contract awards in October continued in larger volume than a year ago. Total awards were 60 per cent larger, reflecting increases of 13 per cent in private construction and of 112 per cent in public work.

## Distribution

Distribution of commodities to consumers declined in October following an unusually large volume of trade in the preceding three months. During the third quarter sales had been stimulated considerably by several factors, notably apprehension that there might be shortages and higher prices of many consumers' goods later on, as well as desire to avoid stricter instalment credit terms, effective September 1, and higher taxes on many products effective October 1.

Railroad freight-car loadings declined somewhat from September to October, owing principally to decreased shipments of grain products and coal. Shipments of livestock increased and ore loadings showed less than the usual seasonal decline.

## Commodity prices

Prices of agricultural commodities, which had declined from the early part of September to the middle of October, have advanced somewhat since that time and prices of industrial commodities have increased further. Recent advances for industrial raw materials

> MONEY RATES IN NEW YORK CITY

Weekly averages of daily yields of 3 - to 5 -year tax-exempt Treasury notes, Treasury bonds callable after 12 years, and average discount on new issues of Treasury bills offered within week. For weeks ending January 5. 1935 to November 22, 1941.
and finished products have been more restricted than in earlier periods, reflecting partly an extension of Federal maximum price action particularly to petroleum products and to selected metal, chemical, and textile products.
Prices in retail markets have continued to advance sharply. In September the cost of living, as measured by the Bureau of Labor Statistics' index, increased 2 points to 108 per cent of the 1935-1939 average and was 7 per cent above the level of last March. Since September retail food prices, which usually decline at this season, have increased further and preliminary data indicate that retail prices of other commodities have continued to rise.

## Bank credit

Total loans and investments at reporting member banks rose further during October and the first two weeks in November. Holdings of U. S. Government securities increased and commercial loans continued to advance.

Excess reserves of member banks declined from 4.7 billion dollars to 3.5 billion on November 1, reflecting the increase in reserve requirements previously announced by the Board to be effective on that date.

## United States Government security market

Long-term Treasury bonds declined slightly in price during the early part of November, following a relatively sharp increase after the middle of September to a record high level around November 1. Yields on shortterm issues have firmed since early in September, the yield on Treasury notes of December 1945 advancing from 0.62 per cent on September 15 to 0.83 on November 15, and the bill rate rising to 0.258 per cent.
member bank reserves

Wednesday figures, January 2, 1935 to November 26, 1941. Required and excess reserves, but not the total, are partly estimated.

[^11]ANALYSIS OF CHANGES IN GOLD STOCK OF UNITED STATES
[In millions of dollars]

Preliminary
${ }^{1}$ Figures are those for United States published in table on p. 1285 , adjusted to exclude Pbilippine Islands production received in United States.
${ }^{3}$ Figures based on rate of $\$ 20.67$ a fine ounce in January 1934 and $\$ 35$ a fine ounce thereafter.
${ }^{3}$ Includes gold in the Inactive Account amounting to 27 million dollars on Dec. 31, 1936, and 1,228 million on Dec. 31, 1937
1 Gold held under earmark at Federal Reserve Banks for foreign account, in millions of dollars: October $31-2,054.7$; Nov. 26-2, 109.3 .
Note.-For back figures see Annual Report for 1937 (table 29).

BANK SUSPENSIONS ${ }^{1}$

|  | Total, all banks | Member banks |  | Nonmemberbanks |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

1 National series, for which bank debit figures are available beginning with 1919.
${ }^{2}$ Except that 1929 figure is for 128 centers only
Back figures.-Annual report for 1937, page 157. Annual totals, beginning with 1919, by Federal Reserve districts and for individual centers, are available for distribution and will be furnished upon request.

## ALL BANKS IN THE UNITED STATES

Comprises all national banks in the continental United States and all State commercial banks, trust companies, mutual and stock savings banks and such private and industrial banks as are included in abstracts issued by State banking departments. Also includes, during the period June 1934-June 1935, private banks which, pursuant to the provisions of sec. 21 (a) of the Banking Act of 1933, submitted condition reports to the Comptroler of the Currency. Under the amended provisions of sec. 21 (a) private banks no longer report to the Comptroller of the currency. For comparative figures of private banks included in the figures from June 1934 to December 1935, see Federal Reserve Bulletin for December 1935, p. 883, and July 1936, p. 535. Figures for nonmember banks are for dates indicated or nearest thereto for which figures are available.

[^12][In millions of dollars]

[^13][In millions of dollars]

1 Prior to Dec. 31, 1935, excludes balances with private banks to the extent that they were then reported in "Other assets." Since Oct. 25, 1933, includes time balances with domestic banks which on that date amounted to $\$ 69,000,000$ and which prior to that time were reported in "Other assets."
i Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection and, prior to Dec. 31, 1935, less cash items reported on hand but not in process of collection

Includes "Due to Federal Reserve Banks (transit account)," known as "Due to Federal Reserve Banks (deferred credits)" prior to Dec. 31 , 1935. 4 U. S. Treasurer's time deposits, open account, are combined with postal savings (time) deposits.

- Central reserve city banks.
${ }^{8}$ Partly estimated.
Back figures.-See Annual Report for 1937 (tables 52-58).

# WEEKLY REPORTING MEMBER BANKS-NEW YORK CITY AND OUTSIDE LOANS AND INVESTMENTS 

[Monthly data are averages of Wednesday figures. In millions of dollars]

r Revised.
Note.-For description of figures see Bulletin for November 1935 (pp. 711-738) or reprint, and Bulletin for June 1937 (pp. 530-531). For back figures see Bulletre for November 1935 (pp. 711-738) or reprint, Bulletin for December 1935 (p. 876), Annual Report for 1937 (tables $65-67$ ) and corresponding tables in previous Annual Reports.

# WEEKLY REPORTING MEMBER BANKS—NEW YORK CITY AND OUTSIDE 

 RESERVES AND LIABILITIES[Monthly data are averages of Wednesday figures. In millions of dollars]

[^14]I U. S. Treasurer's time deposits, open account, are combined with postal savings (time) deposits.
[In millions of dollars]

* Separate figures for New York City are shown in the immediately preceding table, and for the city of Chicago in this table. The figures for the New York and Chicago districts, as shown in this table, include New York City and Chicago, respectively.

1 Monthly and weekly data are averages of daily figures, except for municipal bonds and for stocks, which are based on Wednesday figures. ${ }^{2}$ Prices derived from average of yields on all outstanding partially tax-exempt U. S. Government bonds due or callable in more than 12 years on basis of a $23 / 4$ per cent, 16 year bond. For description see November 1940 BuLLETiN, pp. 1179-1180. Prices expressed in decimals.
${ }^{3}$ Prices derived from average yields, as computed by Standard and Poor's Corporation.
${ }^{4}$ Prices derived from averages of median yields, as computed by Standard and Poor's Corporation.
${ }^{5}$ Prices derived from averages of median yields on noncallable bigh-grade stocks on basis of a $\$ 7$ annual dividend.
${ }^{6}$ Standard and Poor's Corporation.
${ }_{7}$ Average daily volume of trading in stocks on the New York Stock Exchange.
Back figures.-For United States Government bonds, see November, 1940 Bulletin; for municipal bonds, see Annual Report for 1937 (table 79 ).

[^19][On basis of daily statements of United States Treasury. In millions of dollars]

[^20] 1940-June 1941 have not yet been revised because of lack of adequate data.

1 Beginning with July 1, 1940, net receipts represent total receipts less net social security employment taxes, which under the 1939 amendments to the Social Security Act are appropriated directly to the Federal old-age and survivors insurance trust fund. To make the figures for earlier periods comparable, transfers to this trust fund, formerly shown under expenditures, have been deducted from total receipts, from total expenditures, and from transfers to trust accounts.
${ }^{2}$ ' Details given in lower section of table.
${ }^{2}$ Por details, see page 1257 .

* For social security investments, excess of redemptions; for net expenditures in checking accounts, excess of receipts.

Notr.-For explanation of table see Bulletin for October, 1940, pp. 1052-1054.

$r$ Revised. $\quad p$ Preliminary.
${ }^{1}$ Includes also paperboard container production which has been carried forward on the basis of seasonal changes since July 1940 when figures were last reported.

Note.-For description and back figures, see Bulletin for September 1941, pages 878-881 and 933-937, and August 1940, pages 753-771 and 825-882.

| Main store ------- | +14 | +8 |
| Basement | +20 | +10 |
| Shoes (basement only) | +12 | $+8$ |

${ }^{*}$ Based on reports from 247 stores. Reports of total sales from a larger number of stores, including many stores not reporting sales by departments, showed an increase of 11 per cent for October and 18 per cent for the first ten months of 1941, as indicated in the table below. Group
${ }^{2}$ Group totals for basement are not strictly comparable with those shown for main store owing chiefly to inclusion in basement of fewer departments and somewhat different types of merchandise.

## ALL MEMBER BANKS

## COndition on selected call dates, June 30, 1936, to September 24, 1941

${ }^{1}$ Figures of loans and investments beginning December 31, 1938 are not entirely comparable with prior call dates because investments and other assets (principally loans) indirectly representing bank premises and other real estate are now reported separately. Such investments and other assets amounted to $\$ 94,569,000$, and $\$ 49,939,000$ respectively, on December 31, 1938 .
${ }^{2}$ This is a combination of two or more items shown separately on June and December call dates
${ }_{4}^{3}$ United States Treasurer's time deposits, open account, are combined with postal savings (time) deposits,
4 Reserves for dividends payable in common stock, $\$ 5,544,000$ on December 31, 1938 , were formerly published as part of undivided profits. Reserves for undeclared cash dividends on capital stock and for accrued interest on capital notes and debentures, $\$ 10,691,000$ on December 31,1938 , were formerly reported in combination with dividends declared but not yet payable. Beginning December 31, 1938 these two reserves are included in "Other capital accounts."
${ }^{5}$ Demand deposits other than interbank and United States Government, less cash items reported as in process of collection.

Price movements:
Wholesale prices ..... 1298
Retail food prices and cost of living. ..... 1299
Security prices. ..... 1299

Tables on the following pages include the principal available statistics of current significance relating to gold, international capital transactions of the United States, and financial developments abroad. The data are compiled for the most part from regularly published sources such as central and commercial bank statements and official statistical bulletins; some data are reported to the Board directly. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Back figures may in most cases be obtained from earlier BULLETINS and from Annual Reports of the Board of Governors for 1937 and earlier years. Daily and monthly press releases giving daily and monthly average foreign exchange rates will be sent without charge to those wishing them. Other data on the following pages are not regularly released prior to publication.

1 Figures relate to last official report dates for the respective countries, as follows: Germany -June 15, 1939; Italy-late in Mar. 1940; Norway-Mar. 30, 1940; Poland-July 31, 1939.
${ }^{8}$ Beginning Apr. 1940, reports on certain Argentine gold reserves no longer available. trol Board Gold reported since that time is gold belu by Minister of Finance.
${ }^{4}$ Change from previous December due largely to inclusion of gold formerly not reported.
${ }^{5}$ Figures for Dec. 1936 and Dec. 1937 are those officially reported on Aug. 1, 1936, and Apr. 30,1938 , respectively.

6 Beginning Mar. 29, 1941, gold reserves no longer reported separately.
7 These countries are: Albania, Algeria, Australia, Austria through Mar. 7, 1938, Belgian Congo, Bolivia, China, Danzig through Aug. 31, 1939, Ecuador, El Salvador, Estonia, Finland Guatemala, Iceland, Latvia, Lithuania, Morocco, and Thailand (Siam). Figures for certain of these countries have been carried forward from last previous official report.
${ }^{8}$ Gold holdings of Bank of England reduced to nominal amount by gold transfers to British Exchange Equalization Account during 1939.

- Beginning Dec. 1940, figures refer to gold reserves of new Central Bank only.

Note.-For description of table and back fgures see Bulletin for September 1940, pp. 925-934 and pp. 1000-1007; details regarding special internal gold transfers affecting the reported figures through April 1940 appear on p .926 in that issue.

${ }^{1}$ Prior to Jan. 3, 1940, the figures under Asia represent Far East only, the remaining Asiatic countries being included under "All other"
Last report date on old basis.
4 The figures in this supplementary table represent a partial analysis of the figures in the main table under the headings Other Europe, Latin America, and Asia.
${ }^{5}$ Less than $\$ 50,000$.
Note.-The figures given in this table are not fully comparabie throughout as a result of certain changes or corrections in the reporting practice of reporting banks which occurred on Aug. 12, 1936, and Oct. 18, 1939 (see Bulletin for May 1937, p. 431, and April 1940, p. 363).

p Preliminary.
${ }^{1}$ Through f'ebruary 1939 , valued at legal parity of 85 shillings a fine ounce.
2 Securities and silver coin held as cover for fiduciary issue, the amount of which is also shown by this figure.
Notes issued less amounts held in banking department
4 On Jan. 6, 1939, 200 million pounds sterling of gold (at legal parity) transferred from Bank to Exchange Equalization Account; on Mar. 1 1939, about 5.5 million pounds (at current price) transferred from Exchange Account to Bank; on July 12, 1939, 20 million pounds transferred from b
${ }_{6}{ }^{6}$ Fiduciary issue increased by 50 million pounds on June 12, 1940 , and Apr. 30 and Aug. 30,1941
6 Gold revalued in Mar. 1940, Nov. 1938, July 1937, and Oct. 1936. For further details see Bulletin for May 1940, pp. 406-407; January 1939, p. 29; September 1937, p. 853; and November 1936, pp. 878-880

8 For explanation Cof this item, see Benlaetin ar of France and the Treasury, dated Aug. 25, Oct. 29, Dec. 12, and Dec. 30, 1940, and Feb. 20 , Apr. 30, May 10, June 11, and Sept. 23, 1941, advances of 130,000 million francs have been authorized to meet the costs of the German army of occupation.

- Central Administration of the Reichskreditkassen
${ }_{10}$ In each of the weeks ending Apr. 20 and Aug. 3, 1939, 5,000 million francs of gold transferred from Exchange Stabilization Fund to Bank of France; in week ending Mar. 7, $1940,30,000$ million francs of gold transferred from Bank of France to Stabilization Fund.
${ }_{12}^{11}$ Figures taken from annual report of Bank for 1940.
${ }^{12}$ Figure not available.
Note.-For further explanation of tables see Bullerns for February 1931, pp. 81-83.

${ }^{1}$ Figures represent calculated prices of a 4 per cent, 20 -year bond offering a yield equal to the monthly average yield for 10 high-grade corporate bonds for the series beginning 1937 and for a varying number of high-grade bonds for the series prior to that date. The yearly average for 1937 is the same for both series. Source: Standard and Poor's Corporation.
${ }^{2}$ Since A pril 1, 1935, the 139 bonds included in the calculation of the average price have all borne interest at $41 / 2$ per cent. The series prior to
that date is not comparable to the present series, principally because the 169 bonds then included in the calculation bore interest at 6 per cent.
${ }^{3}$ Indexes of reciprocals of average yields. For old index, $1929-1936,1929=100$; average yield in base year was 4.57 per cent. For new index beginning Jan. 1937, Jan-Mar. 1937=100; average yield in base period was 3.39 per cent.
${ }^{4}$ This number, originally 329 , has declined as the number of securities eligible for inclusion in the index has diminished. In May 1941, it was down to 287.
${ }_{5}^{5}$ A verage May-Dec. only; exchange elosed Jan. 1-Apr. 11.

- Average Apr-Dec. only-see note 2. Average Jan--Mar on old basis was 95.9.
${ }_{8}$ A verage based on figures for 7 months; no data available May-September.
${ }^{8}$ Average based on figures for 9 months; no data available May-July.
Sources.-See Bulletin for November 1937, p. 1172; July 1937, p. 698; April 1937, p. 373; June 1935, p. 394; and February 1932, p. 121

[^5]:    * Sec. 5 (b), 40 Stat. 415 and 966 ; Sec. 2, 48 Stat. 1; 54 Stat. 179; Ex. Order 8389, April 10, 1940, as amended by Ex. Order 8785, June 14, 1941, and Ex. Order 8832, July 26, 1941; Regulations, April 10. 1940, as amended June 14, 1941, and July 26, 1941.

[^6]:    * Figure not predictable.
    ${ }^{1}$ Excludes throughout some small investments which, because of their size, the British regard as virtually unsaleable
    2 The private dollar balances on Dec. 31, 1940, and Sept. 1, 1941, are classified as unavailable, since they were considered by the British to be at the minimum level necessary for the transaction of current business.
    ${ }^{3}$ Includes 145 million dollars pledged with Reconstruction Finance Corporation on Aug. 1, 1941.
    4 On Sept. 1, 1941, the R. F. C. was committed to advance a further 325 million dollars to the British Government against the pledge of assets in this country valued at 555 million dollars. Since Sept. 1, the R. F. C. has actually disbursed 250 million dollars pursuant to this commitment.

    5 Includes branches of British insurance companies valued at 200 million dollars, only the earnings of which will be pledged against $R$. F. C. loan.
    ${ }_{6} 6$ Trusts in United States held for United Kingdom beneficiaries; these are established under United States law and hence may be unavailable to the British Government.
    ${ }_{7}$ Includes 62 million dollars of securities not readily marketable, and over 30 million dollars of some 1,100 marketable stocks in small holdings which could not be immediately mobilized.

[^7]:    Latest available figures, mostly June 1941
    ${ }^{2}$ Excluding the 48 States and the District of Columbia. The figures also exclude some Governmental credit agencies and other miscellaneous financial institutions not usually counted in banking statistics.
    ${ }_{3}$ There are no banking offices in Baker Island, Canton Island, Enderbury Island, Howland Island, Jarvis Island, Johnston Island, Kingman Reef, Kure Island, Midway Island, Navassa Island, Swan Islands, and Wake Island.
    ${ }^{4}$ Comprises branches of 2 New York national banks.
    ${ }_{5}{ }^{5}$ Distributed as follows: Hawaii-1 branch of a Japanese bank; Commonwealth of the Philippines- 3 branches of an English bank, 2 branches of a Hongkong bank, 2 branches of 2 Japanese banks, and 1 branch of a Netherlands East Indian bank; Puerto Rico-2 branches each of 2 Canadian banks.
    ${ }^{6}$ Not available.
    ${ }_{7}{ }^{6}$ Includes 6 national banks which are not members of the Federal Reserve System but which are under supervision of the Comptroller of the Currency, 4 in Alaska and 1 each in Hawaii and the Virgin Islands.

[^8]:    Tables on the following pages include the principal available statistics of current significance relating to financial and business developments in the United States. The data relating to the Federal Reserve Banks and the member banks of the Federal Reserve System are derived from regular reports made to the Board; index numbers of production are compiled by the Board on the basis of material collected by other agencies; figures for gold stock, money in circulation, Treasury finance, and operations of Government credit agencies are obtained principally from statements of the Treasury, or of the agencies concerned; data on money and security markets and commodity prices and other series on business activity are obtained largely from other sources. Back figures may in most cases be obtained from earlier BuLletins and from Annual Reports of the Board of Governors for 1937 and earlier years. Current figures compiled by the Board are generally released prior to publication in the BuLLETIN and press statements will be sent without charge to those wishing them. For a list of current releases see Federal Reserve Publications at the back of this Bulletin.

[^9]:    1 Excluding central reserve city banks, for which figures for latest month are shown in table above.

[^10]:    1 Includes silver held against silver certificates amounting to $\$ 1,939$, 000,000 on Oct. 31, 1941 and $\$ 1,864,000,000$ on Oct. $31,1940$.

[^11]:    ${ }^{1}$ Less than $\$ 50,000$.
    Back figures.-See Annual Report for 1937 (table 38),
    Description.-See Bulletin for January 1932, pp. 7-8.

[^12]:    ${ }^{1}$ Prior to Dec. 30, 1933, member bank figures include interbank deposits not subject to immediate withdrawal, which aggregated $\$ 103,000,000$ on that date. Prior to June 1940, the nonmember bank figures on some call dates included some interbank deposits not shown separately in a fewf State bank abstracts.
    ${ }_{2}$ Prior to December 1938 the figures include loans and investments indirectly representing bank premises or other real estate, now classified in condition reports among "Other assets." The amounts of such loans and investments in December 1938, were approximately $\$ 50,000,000$ and $\$ 100$,000,000 , respectively.
    3 One bank (with deposits, excluding interbank deposits, of $\$ 90,000000$ and total loans and investments of $\$ 96,000,000$ on Dec. 30, 1939)
    which, prior to March 1940, was classified as a mutual savings bank, is now included in figures in the "Other nonmember banks" column.
    \& Includes, subsequent to April 4, 1941, two mutual savings banks in Wisconsin and one in Indiana.
    ${ }^{5}$ Figures for nonmember banks are preliminary.
    Back figures.-See Annual Report for 1937 (tables 48-49)

[^13]:    1 Classifications indicated were revised as of Dec. 31, 1938; for explanation see Bulletin for January, 1939, pp. 22-23, and Bulletin for April, 1939, pp. 259-264, 332. Beginning June 30, 1939, detailed classifications available on Juns and December dates only.

    Not shown in call reports prior to December 1938, but the total amount of agricultural loans was reported separately on some dates, and the total amount of "Commercial, industrial and agricultural paper" has been reported by weekly reporting banks since May 1937.
    ${ }^{3}$ Figures in this column prior to Dec. 31, 1938, represent all loans on securities, regardless of purpose, excepting only loans on securities to banks and to brokers and dealers.
    ${ }_{5}^{4}$ This is a residual item and, because of the revised loan classifications, figures beginning Dec. 31, 1938, are not comparable with earlier figures.

    - Includes Treasury certificates of indebtedness through 1934.
    ${ }_{7}$ Breakdown of loans and investments not reported separately.
    ${ }^{7}$ Central reserve city banks.
    Back fioures.-See Annual Report for 1937 (tables 52-58).

[^14]:    ${ }^{1}$ Demand deposits other than interbank and U. S. Government, less cash items reported as in process of collection.

[^15]:    * See note on preceding page.

    Demand deposits other than interbank and U.S. Government, less cash items reported as in process of collection.
    2 U. S. Treasurer's time deposits, open account, are combined with postal savings (time) deposits.

[^16]:    1 Excluding balances with reporting firms (1) of member firms of New York Stock Exchange and other national securities exchanges and (2) of firms' own partners.
    ${ }^{2}$ Includes money borrowed from banks and also from other lenders (not including member firms of national securities exchanges)
    NOTE.-For explanation of these fgures see "Statistics on Margio Accounts" in BoLiETIN for September 1936; The article describes the method by which the figures are derived and reported, distinguishes the table from a "statement of financial condition," and explains that the last column is not to be taken as representing the actual net capital of the reporting firms.

    Back figures.-See Bulletin for March 1938, p. 196, and (for data in detail) Annual Report for 1937 (table 69).

[^17]:    ${ }_{2}^{1}$ Monthly and weekly data are averages of daily figures, except for municipal bonds, which are based on Wednesday figures.

[^18]:    1 Includes publicly-offered issues of Federal credit agencies, but excludes direct obligations of U.S. Treasury.
    ${ }_{3}^{2}$ Includes issues of noncontiguous U. S. Territories and Possessions.
    ${ }^{3}$ Less than $\$ 500,000$.
    Source.-For domestic issues, Commercial and Financial Chronicle; for foreign issues, U.S. Department of Commerce. Monthly figures subject to revision.

    Back figures.-See Annual Report for 1937 (table 78).

[^19]:    ${ }^{1}$ Estimated figures for other commercial banks and mutual savings banks have been rounded to nearest 10 millions and estimated figures for insurance companies and other investors have been rounded to nearest 100 millions.
    ' Holdings of insurance companies included with "Other investors" prior to 1932.
    ${ }^{2}$ ' Holdings of insurance companies included with "Other in vestors" prior to 1932.
    Note.-For end of June figures 1916-1931, see Bulletin for July 1941, p. 664.

[^20]:    $r$ Revised for change in classification of commodity stamp transactions of Surplus Marketing Administration. Figures for 1939 and November

[^21]:    ${ }^{1}$ Less than $\$ 500,000$.
    ${ }^{2}$ Excludes Federal land bank bonds in the amount of $\$ 761,000.000$ held by Federal Farm Mortgage Corporation.

[^22]:    1 Including Metals Reserve Company, Rubber Reserve Company, Defense Plant Corporation, and Defense Supplies Corporation.

[^23]:    * Adiusted to Census of Manufactures through 1939. $\quad{ }^{r}$ Revised.

    2 Excludes military and naval forces.
    ${ }^{3}$ Revised 1929 to date owing to revisions in data compiled by Bureau of Labor Statistics.
    Note.-Unadjusted data compiled by Bureau of Labor Statistics. Figures for October 1941 are preliminary. Back figures, adjusted for seasonal variation, may be obtained from the Division of Research and Statistics.

[^24]:    : Revised.

    - Indexes adjusted to Census of Manufactures through 1939. For back figures see Bulletin for February 1941, p. 166.

[^25]:    1 Revised.
    Note. Figures for 0 not available.
    Note.-Figures for October 1941 are preliminary. Back data may be obtained from the Bureau of Labor Statistics. Underlying figures

[^26]:    ${ }^{r}$ Revised. ${ }^{p}$ Preliminary.

    * Derived from Interstate Commerce Commission data.
    ${ }^{1}$ Excludes switching and terminal companies.
    Note.-Descriptive material and back figures may be obtained from the Division of Research and Statistics.

[^27]:    ${ }^{1}$ Figures for spring wheat, oats, and tame hay from estimates for Oct. 1, for winter wheat for Aug. 1. No estimates made for Nov. 1.
    2 Includes 18,000 bales grown in miscellaneous territory.
    ${ }^{3}$ Includes 24,000 bales grown in miscellaneous territory.

[^28]:    ${ }^{1}$ Excluding member banks in outlying sections of some cities authorized to carry lower reserves.
    2 This is a combination of two or more items shown separately on June and December call dates.
    3 United States Treasurer's time deposits, open account, are combined with postal savings (time) deposits.
    ${ }^{4}$ Demand deposits other than interbank and United States Government. less cash items reported as in process of collection.

[^29]:    ${ }^{1}$ The figures for December 1934 include 140 private banks which reported to the Comptroller of the Currency under the provisions of Section 21(a) of the Banking Act of 1933. Under the provisions of the Banking Act of 1935, private banks no longer report to the Comptroller of the Currency and, accordingly, only such private banks as report to State banking departments are in the figures shown for subsequent years.
    ${ }^{3}$ Federal deposit insurance did not become operative until January 1, 1934.
    3 Number of banks comprises 50 insured and 496 uninsured; number of branches comprises 31 insured and 103 uninsured. The figures beginning with 1939 exclude one bank with 4 branches which theretofore was classified as an insured mutual savings bank but is now included with "Nonmember banks other than mutual savings and private banks."

    - Number of banks comprises 1 insured and 51 uninsured; all branches were uninsured.
    - Separate figures not available for branches of insured and not insured banks.

    Exclusive of new banks organized to succeed operating banks.
    T Exclusive of liquidations incident to the succession, conversion and absorption of banks.
    Exclusive of conversions of national banks into State bank members, or vice versa, as such conversions do not affect Federal Reserve membership

    - Exclusive of conversions of member banks into insured nonmember banks, or vice versa, as such conversions do not affect Federal Depositl Insurance Corporation membership.
    * Includes three mutual savings banks admitted during April (two in Wisconsin and one in Indiana), the first of such banks to become members of the Federal Reserve System.

    Back figures.-See Annual Report for 1939 (table 16) and Bulletin for February 1939, p. 110.

[^30]:    ${ }^{1}$ Reported at infrequent intervals or on delayed basis: U.S.-Exchange Stabilization Fund (Special A/c No. 1); U. K.-Exchange Equalize tion Account; France-Exchange Stabilization Fund and Rentes Fund; Belgium-Treasury.
    ${ }_{2}$ Figure for end of Mar. 1937, first date re ported.
    ${ }_{3}$ Figure for end of Sept. 1937.
    4. First date reported. For complete monthly Series from Oct. 1938-May 1939, see Bulletin for February 1941, p. 170.
    Note.-For details regarding special gold transfers in 1939-40 between the British E. E.A and the Bank of England, and between the French E. S. F. and the Bank of France, see BULIETIN for September 1940, p. 926

[^31]:    Gold production in U. S.S. R.: No regular Government statistics on gold production in U. S. S. R. are available, but data of percentage changes irregularly given out by officials of the gold mining industry, together with certain direct figures for past years, aford a basis for estimating annual production as follows: 1934, 135 million dollars; 1935, 158 milion; 1936, 187 million; 1937, 185 million; 1938, 180 million.
    $p$ Preliminary. $r$ Revised.
    $f$ Figure carried forward from last previous figure without footnote $f$
    ${ }^{1}$ Annual figures through 1939 are estimates of U. S. Mint. Annual figure for 1940 and monthly figures are based on estimates of American Bureau of Metal Statistics given in thousands of fine ounces.
    ${ }^{2}$ Beginning April 1941, figures are for Gold Coast only.
    ${ }^{3}$ Beginning May 1940, monthly figures no longer reported. Annual fgure for 1940 estimated at three times production for first four months of the year.
    ${ }_{4}^{4}$ Includes Philippine Islands production received in United States. Monthly figures for U. S. for 1940 represent estimates of American Bureau of Metal Statistics revised by adding to each monthly figure $\$ 242,602$ so that aggregate for 1940 is equal to annual estimate compiled by Bureau of Mint in cooperation with Bureau of Mines.

    - Figures for Canada beginning January 1941 are subject to official revision
    ${ }^{6}$ Beginning May 1940, figures are those reported by American Bureau of Metal Statistics.
    Note.-For monthly figures back to January 1929 and for explanation of table and sources see Bolletin for March 1939, p. 227; February 1939, p. 151; June 1938, pp. 539-540; and April 1933, pp. 233-235. For annual figures of world production back to 1873 (including Russia-U. S. S. R.), see Annual Report of Director of Mint for 1940, p. 101, and 1936, pp. 108-109.

[^32]:    ${ }^{1}$ Including funds in accounts transferred from central bank to government names; for original explanation of funds included under this heading ee Bulletin for April 1939, p. 285

    Note.-Statistics reported by banks, bankers, brokers, and dealers. For back figures and description of the statistics, see Bulletin for April 1039, pp. 284-296; A pril 1938, pp. 267-277; and May 1937, pp. 394-431.

[^33]:    ${ }^{1}$ Prior to Jan. 3, 1940, the figures under Asia represent Far East only, the remaining Asiatic countries being included under "All other".
    ${ }^{1}$ Inflow less than $\$ 50,000$.
    Note.-Statistics reported by banks, bankers, brokers, and dealers. For back figures and description of the statistics, see Bulletin for April 1939, pp. 284-296; April 1938, pp. 267-277; and May 1937, pp. 394-431.

[^34]:    ${ }^{1}$ Prior to Jan. 3, 1940, the figures under Asia represent Far East only, the remaining Asiatic countries being included under "All other".
    For explanation see Bulletin for May 1937, pp. 395-396.
    Inflow less than $\$ 50,000$
    Outflow less than $\$ 50,000$.

[^35]:    ${ }^{1}$ Prior to Jan. 3, 1940, the figures under Asia represent Far East only, the remaining Asiatic countries being included under "All other".
    ${ }_{3}$ Last report date on old basis.
    ${ }^{3}$ First report date on new basis.
    1 The figures in this supplementary table represent a partial analysis of the figures in the main table under the headings of Other Europe, Latin America, and Asia.

    Note.-The figures given in this table are not fully comparable throughout as a result of certain changes or corrections in the reporting practice of reporting banks which occurred on Aug. 12, 1936, Jan. 5, 1938, Oct. 18, 1939, and May 7, 1941 (see Bulletin for May 1937, p. 425; April 1939, p. 295; April 1940, p. 362; and September 1941, p. 947).

[^36]:    Preliminary.
