Subscription Price of Bulletin

A copy of the Federal Reserve Bulletin is sent to each member bank without charge. The subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents per copy; elsewhere, \$7.00 per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or \$5.00 for 12 months.

Mortgage Credit and Construction

CONSTRUCTION IS INCREASING AGAIN after having declined 7 per cent in the first five months of this year from the record annual rate of \$50 billion at the end of 1957. With prices of building materials and residential construction costs about the same as a year ago, and credit conditions easier, more private housing units are being placed under construction than at any other time since the spring of 1956.

Real estate markets have been much more active in the past few months. Mortgage financing has become readily available in most metropolitan areas, and commitments to make mortgage loans in the near future appear to have increased. At midyear, outstanding home mortgage debt exceeded \$111 billion.

New houses appear to be selling well, particularly if low or moderately priced, and unsold inventories are small. spring an increasing number of existing houses have been sold, apparently with little shading of price and little if any lengthening of the negotiation period. The success of owners in selling the near-record number of such houses now coming on the market is an important influence on the demand for new houses, which seems to depend increasingly on the desire of present home owners for new living accommodations.

CONSTRUCTION

Value of new construction in the first half of 1958 was at a seasonally adjusted annual rate of \$48 billion, only slightly below the record dollar volume of the preceding six months. After allowance for cost increases,

Billions of dollars

PRIVATE CONSTRUCTION

18 12 10 RUSINESS 1954 1956

Note.—Data are seasonally adjusted annual rates estimated jointly by U. S. Departments of Commerce and Labor. Business includes commercial, industrial, and public utility construction. Latest figures shown are for July.

the physical volume of work done was about the same as in the corresponding periods of 1956 and 1957.

The decline in construction in the early months of this year reflected reductions in private building for residential and business purposes. These were offset to some extent by increases in private and public construction of community facilities. Almost all the increase since May has been in residential building.

Nonresidential. Business construction has been declining fairly steadily since the spring of 1957, reflecting the behavior of its industrial component. Contract awards for industrial construction, which tend to lead actual construction by several months, have also been declining. In the first six months of this year industrial contracts were as low as in the corresponding period of 1954.

The large additions to manufacturing plant between 1954 and 1957 had satisfied many demands for industrial facilities. In the past year or so, manufacturers planned fewer new plants and in some cases, after reappraising the sales outlook, curtailed building programs already approved. More recently, some deferred plans have become active again.

With demands continuing large for modern office and warehouse space and for improved utility services to residential areas, construction of commercial buildings and public utilities has remained near record levels. Contract awards for these categories have also been well maintained.

Construction of facilities to meet the expanding requirements of residential communities for churches, schools, hospitals, and social and recreational buildings has increased further this year. In 1957 private construction of this sort rose to a level one-sixth above the previous high in 1956, and in the first half of this year has continued to increase. State and local government construction of community facilities has shown similar trends, with most of the added expenditures going for schools.

Government outlays for highways have changed about seasonally this year. In 1957 a sharp rise in Federal outlays was partly offset by the first decline in State and local highway expenditures since World War II. The Federal Aid Highway Act of 1958, enacted in April, provided a special authorization of \$600 million for the Federally aided road system in addition to the \$875 million already authorized under the regular program for fiscal year 1959. All work under the special authorization must be under contract by the end of this year and com-

pleted by December 1959. Since June, awards for highway work have been well above the previous high in 1956.

Residential. Private housing starts rose in July for the fourth consecutive month and reached a seasonally adjusted annual rate of nearly 1.2 million units. This rate is one-fourth above the February-March low, and the highest since early 1956.

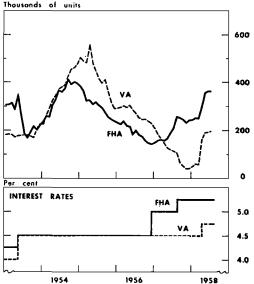

In recent months the number of units started without commitments for Federally underwritten financing—that is, with conventional mortgages or without mortgage financing—has been very large. In the first six months of the year, it totaled 342,000 compared with 332,000 in the corresponding period of 1957. Government underwritten starts in July reached a seasonally adjusted annual rate three-fourths above the February low; in the first half they numbered 150,000 as against 152,000 a year earlier.

Apartment units have been a more important element in housing starts in recent months than in the past few years. Early in 1958 they accounted for about one in six private units started, compared with one in eight units in the year 1957, and less than one in ten in 1955-56.

MORTGAGE MARKET

The general strengthening of residential markets this year has been influenced by increased availability of mortgage credit, by relaxation of the terms on which Government underwritten mortgages are insured or guaranteed, and by support from the Federal National Mortgage Association. So far, increased activity has shown up more strongly in commitments to make mortgages than in closed loans. Applications to the Federal Housing Administration for commitments to insure mortgages and requests

APPLICATIONS AND REQUESTS FOR FINANCING NEW HOUSES

Note.—FHA data are applications for commitments to insure mortgages and VA data are requests to appraise houses, adjusted for duplication and for seasonal variation by Federal Reserve; shown as annual rates. Interest rates are maximum contract rates. Latest figures shown are for July, except for interest rates (August).

to the Veterans Administration for appraisals increased markedly this spring, as may be seen in the chart.

Mortgage discounts. Contract interest rates on new real estate mortgages, as on bonds and other obligations, usually adjust to the yields at which alternative investments of similar grades are selling in the market. Thus contract interest rates on new conventional mortgages tend to rise when market yields rise.

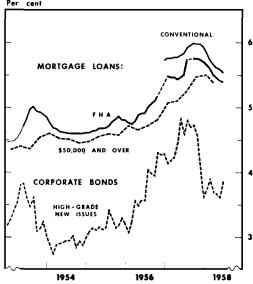

Rates on Federally underwritten mortgages cannot respond freely to increases in other yields because the maximum permissible contract interest rates are specified by law and regulation. Investors can obtain what they regard as equivalent yields on Federally underwritten mortgages, and borrowers can compete with other demands for loanable funds, only by pricing the mortgage at less than its face value—that is, by discounting.

When discounts on Federally underwritten mortgages are small, as they have been FHA-insured mortgages in recent months, they provide the flexibility needed for market adjustments. When they are large, as they typically still were in mid-1958 on VA-guaranteed mortgages in many areas, they tend to discourage the use of this type of credit. On the supply side, institutional investors are reluctant to buy insured or guaranteed mortgages at prices far below their face value. On the demand side, builders and sellers as well as buyers of houses become unwilling to absorb the discount and may prefer conventional mortgages with higher rates.

Availability of mortgage credit. The ready availability of mortgage credit this year contrasts with the situation two years ago. At that time heavy credit demands from businesses and local governments in relation to the funds available exerted strong upward pressure on interest rates, as illustrated in the chart on the following page by yields on new issues of high-grade corporate bonds. By the end of 1956 discounts on FHA and VA mortgages carrying 4½ per cent interest ranged from 3 to 5 percentage points.

In December 1956 the permissible interest rate on FHA-insured mortgages was raised to 5 per cent. Market rates continued to rise sharply in the spring of 1957, however, and discounts on 5 per cent FHA mortgages became almost as large as they had previously been on 4½ per cent mortgages. Discounts on VA mortgages, which continued to carry an interest rate of 4½ per cent, averaged 7 to 8 points. At this level, discounts were so large that builders and sellers as well as buyers turned to other types of financing.

MORTGAGE AND BOND YIELDS

Note.—Data are average yields except for conventional mortgages and corporate bonds, which are average interest rates. Conventional mortgages: computed by FHA from typical rates. Corporate bonds: estimates of First National City Bank of New York, adjusted to a Aaa basis (figures reflect changes in quality, industrial composition, maturity, and type). FHA: computed by Federal Reserve from average prices reported by FHA (series improves in quality after July 1953). \$50,000 and over: computed by Federal Reserve from reports of The Title Guarantee and Trust Company of New York on conventional mortgages recorded in New York City. Dashed lines for FHA indicate periods when averages were adjusting to changes in contract rates, that is, from 4½ to 5 per cent in December 1956; and to 5¼ per cent in August 1957. Latest data shown are for July, except the April figure used to extend quarterly data for mortgages of \$50,000 and over.

That changes in contract rates are more effective than large discounts in adjusting yields is illustrated by the rise in FHA applications in mid-1957 in contrast with the continued sharp drop in VA appraisal requests. In August 1957 the FHA rate was increased to 5½ per cent while the VA rate continued at 4½ per cent. FHA applications stabilized in the second half of 1957 appreciably higher than in the first half. VA requests continued to decline.

In the closing months of 1957 yields in most securities markets declined sharply, and in the first half of 1958 remained below their level a year earlier. In this situation,

smaller discounts on Federally underwritten mortgages than were required earlier sufficed to bring the yields in line with those available on other investments.

Since April of this year, the interest rate on VA-guaranteed mortgages has been 434 per cent, and downpayments on both FHA and VA mortgages have been lower than earlier. With discounts on FHA and VA mortgages smaller, builders and sellers, who are permitted to pass on to buyers directly only a part of the cost of discounts, have been willing to absorb their portion in order to attract buyers by offering the favorable terms of these types of financing.

Continuation of this situation will depend in part on whether the recent sharp increase in market yields is temporary or whether it reflects renewal of sustained pressure on capital markets. In either case, commitments made under the relatively easy conditions of recent months will show up in loan closings for some time.

REGULATORY CHANGES

Increases in the maximum permissible contract interest rates on Federally underwritten loans are not the only statutory and regulatory changes that have affected the availability of mortgage credit in the past year. The Housing Act of 1957, which became effective in August, reduced the downpayment required on new houses financed with FHA-insured mortgages and made these mortgages more attractive to borrowers.

The Act also directed the Federal Housing Administration and the Veterans Administration to regulate the portion of the discount on mortgages that builders and sellers might absorb. This was set at from 1 to $2\frac{1}{2}$ percentage points on FHA mortgages and from $2\frac{1}{2}$ to $5\frac{1}{2}$ percentage points on VA mortgages. Builders were also per-

mitted to pay commitment fees up to one per cent of the amount of the mortgage.

By and large, these discounts and fees brought yields on 5½ per cent FHA mortgages to levels that were competitive with market yields. In the case of 4½ per cent VA loans, however, the regulated discounts did not provide competitive yields. The fact that under existing law the VA program was to terminate in July 1958 also reduced the volume of activity in these loans.

The Emergency Housing Act of 1958 that became effective in April, in addition to raising the maximum interest rate on VA mortgages, removed the statutory requirement for control of discounts, extended both the loan guaranty program and the direct loan program of the Veterans Administration for two years, and provided \$350 million for the latter. By administrative action, the Veterans Administration removed the 2 per cent downpayment requirement in effect since July 1955.

The Act also gave the Federal National Mortgage Association authority to make commitments to purchase at par up to \$1 billion of Federally underwritten mortgages on new houses to cost no more than \$13,500. On April 4 the President made available \$300 million of this amount, and in May, July, and August added \$300 million, \$150 million, and \$100 million, respectively.

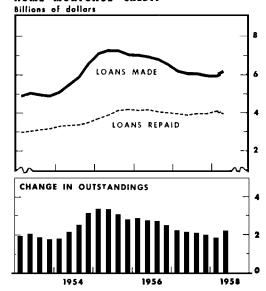

Some of the recent increase in FHA applications and VA appraisal requests is attributable to this commitment program. In the four months ending July 31, the Association made commitments to purchase nearly 50,000 mortgages involving \$584 million. This represents about one-fourth of the applications and requests on new houses received by the agencies in the four months.

HOME MORTGAGE CREDIT

In recent months the improvement of mortgage yields relative to bond yields and the large inflow of savings to financial institutions have renewed the interest of investors in mortgages. Preliminary information indicates that lending and the increase in outstanding debt on 1- to 4-family properties rose in the second quarter after allowance for usual seasonal movements. In the first quarter, lending and the increase in outstandings were at the lowest levels in several years, as is shown in the chart.

Lending. The higher level of mortgage lending in the second quarter of 1958 reflected increased lending on conventional mortgages. The volume of FHA-insured loans closed was slightly larger than in the first quarter—in contrast with other recent years when it was typically smaller—and about half again as large as a year earlier.

HOME MORTGAGE CREDIT

Note.—Data derived or estimated, and adjusted for seasonal variation, by Federal Reserve from data for recordings of nonfarm mortgages of \$20,000 or less and mortgage debt outstanding published by the Federal Home Loan Bank Board. Figures for 1958 preliminary.

VA-guaranteed lending continued to decline through May, and rose only slightly in June. It was lower in the second quarter than at any other time in several years.

Commitments outstanding to make all three kinds of loans appear to have risen markedly since early spring. This suggests that lending on each kind of mortgage will rise further in the summer and autumn.

Debt. The smaller increase this year in mortgage debt outstanding on 1- to 4-family properties reflects the excess of repayments over lending on VA-guaranteed loans. In other recent years the increase in VA-guaranteed debt has been between 30 and 40 per cent of the total increase.

Both conventional and FHA-insured debt appear to have risen by near-record amounts in the first half of 1958. The total increase in debt on 1- to 4-family properties was probably about \$3.9 billion, compared with \$4.3 billion in the first half of 1957 and a record \$6.5 billion in the first half of 1955. At mid-1958, \$48 billion of the \$111 billion outstanding was Federally underwritten.

Institutional holdings. Holdings of 1- to 4-family mortgage debt by private financial institutions increased less in the first quarter of 1958 than in the corresponding months of recent years, as may be seen from the table. The unattractiveness of VA-guaranteed loans last winter, when their yields were relatively low, is reflected in the decline in holdings by these institutions. The decline occurred despite the fact that institutions were purchasing VA mortgages from the Federal National Mortgage Association in this period. Private institutional holdings

Note.—Change in private institutional holdings of mortgages on 1- to 4-family properties. Federal Reserve estimates based on data from Federal and private agencies.

of conventional and FHA mortgages, in contrast, increased more in the first quarter this year than last.

The differing capacity of institutional investors to respond to market alternatives is also suggested by the table. Commercial banks, with a wide choice of investments and the greatest need for liquidity, reduced their mortgage holdings both this year and last. Insurance companies and savings banks, with more restricted alternatives than commercial banks, increased their holdings less this year than last.

Savings and loan associations, which are restricted by regulation and tradition to investing the bulk of their assets in first mortgages, increased their mortgage holdings by about the same amount in both years. The associations also reduced their borrowings from the Federal home loan banks and increased their deposits with the banks.

The Balance Sheet of Agriculture, 1958

The major factual portion of the fourteenth in a series of annual reports on the financial condition of agriculture, issued by the United States Department of Agriculture, is given below.' The full report will be published as an Agriculture Information Bulletin of the Department of Agriculture.

The study was prepared under the direction of Norman J. Wall, Chief, Agricultural Finance Research Branch, Farm Economics Research Division, Agricultural Research Service, by F. L. Garlock, L. A. Jones, W. H. Scofield, F. D. Stocker, and R. W. Bierman.

Data relating to the inventories of livestock, crops, machinery, and household equipment were prepared under the direction of the following persons: Livestock—R. H. Moats; crops—C. E. Burkhead, J. J. Morgan, George D. Harrell; machinery—Robert H. Masucci, Q. Francis Dallavalle; household equipment—Jean L. Pennock. Data relating to farm income and expenditures were compiled under the direction of E. W. Grove.

SUMMARY OF THE 1958 BALANCE SHEET

Farm assets rose to a new record value of \$187 billion on January 1, 1958. Although farm debts also increased in 1957, the equities of farmers and other owners of farm properties reached a new peak of \$167 billion (Table 1).

As in other recent years, the increase during 1957 in farm values and equities resulted chiefly from the upward trend of farm real estate values. Nearly \$7 billion of the \$10 billion increase in asset values arose from this source. But an important factor was an increase of about \$3 billion in the value of livestock on farms. This was the result of higher prices for livestock. Most other types of farm assets rose slightly in 1957 but the value of crop inventories dropped enough to offset

the increases in these other assets. The decline in value of crop inventories resulted from lower prices of crops. Physical inventories of crops increased (Table 2).

Farm debts rose again in 1957 as they have each year since 1945. The increase in 1957 was almost exclusively in farm mortgage debt: non-real-estate farm debt as an aggregate showed little change. However, a sharp decrease occurred in outstanding price-support loans made or guaranteed by the Commodity Credit Corporation, and an offsetting increase occurred in other non-real-estate debt. Wet weather in the fall of 1957 brought late harvest of cotton and corn and impaired the quality so much that large quantities

¹The balance sheet as presented here brings together the assets and liabilities of agriculture as though it were one large enterprise. It is the 14th in a series that contains comparable estimates annually beginning in 1940. Annual changes shown in it provide one means of appraising the effects on the financial structure of agriculture of developments in both the farm and nonfarm sectors of the economy.

This report shows farm assets and farm debts as of the beginning of 1958 and selected earlier years, and it deals mainly with changes in the financial situation of agriculture that occurred during 1957.

In using and interpreting the balance sheet, it should be recognized that the data are aggregates and do not show the distribution of assets and debts among owneroperators, tenants, and landlords. Nor do the data permit full separation of the farm firm as a production unit from the farm family as a consumption unit. Further, changes indicated in farm assets and net worth should be used with caution as a measure of the general economic situation of farmers. Year-to-year changes in the market value of farm assets frequently reflect only changes in unit prices. Recent increases in market values of some assets, particularly farm real estate, represent "paper" gains in the sense that they can be realized only if the assets are sold or used as security for additional credit.

The general financial and credit position of agriculture and how it varies among regions and among some groups of farmers is given special attention in the Agricultural Finance Outlook issued in November of each year by the Agricultural Research Service.

for livestock loans to restock ranges and feed lots that had been depleted during the drought.

The net income of farm operators, including inventory gains or losses, was at about the same level in 1957 as in 1956—\$11.6 billion—despite higher returns in 1957 from sales of livestock. But the net income that farm operators realized in 1957 amounted only to \$10.8 billion, nearly \$1.3 billion less than the amount they realized in 1956. The increase in inventories of crops that had not been sold or put under price-support loan was mainly responsible for the lower net realized income of farm operators in 1957.

In the first half of 1958, receipts from marketings picked up sharply and the realized net income of farm operators was about 22 per cent higher than in the corresponding months of 1957.

INFLUENCE OF GENERAL ECONOMIC SITUATION

Consumers' expenditures for food increased about 7 per cent in 1957. About half the increase in outlays for food reflected higher prices. The costs of processing and marketing food increased about as much as retail prices, so that the farmer's share of the consumer's food dollar remained at 40 cents, the same as in 1956.

³ Includes all crops held on farms for whatever purpose and crops held off farms as security for Commodity Credit Corporation loans. The latter on Jan. 1, 1958 totaled \$700 million. Estimated valuation for 1940, plus purchases minus depreciation

¹ Computed from unrounded data.
² This series is based on data for Census years developed by Alvin S. Tostlebe in cooperation with the National Bureau of Economic Research. It takes into account changes in the area in farms, acreage of improved land, and number and condition of farm structures. (See Agricultural Finance Review, November 1952.) Data for inter-Censal years, and for 1951-58, are extensions from Census benchmarks based on net investment in farm structures (gross investment minus depreciation)

In 1957, the agricultural economy drew support also from record farm exports. The total, valued at \$4.5 billion, was 8 per cent above the previous high of \$4.2 billion in 1956. A 52 per cent increase in the volume of cotton exports accounted for most of the rise. Exports of other cropsespecially wheat, rice, corn, tobacco and soybeans —also continued large.

A vigorous demand and reduced marketings led to comparatively strong prices for livestock products in 1957. But heavy supplies of many crops continued to act as a brake on farm product prices and on farm income. As a net result, the 1957 index of prices for all farm products averaged about 3 per cent higher—the first year-toyear gain since 1951—and total net farm income. after a five-year decline, held unchanged from 1956.

INCOME

Total gross farm income in 1957 was \$35.1 billion, about 3 per cent higher than in 1956. Although receipts from farm marketings declined, there was a substantial increase in income from the value of inventory adjustments, and Government payments to farmers totaled \$1.0 billion in 1957, almost twice as large as in the year before (Table 3).

The total volume of farm products sold or used in the farm home declined 3 per cent; crops declined 9 per cent and livestock less than 2 per cent. Average prices received by farmers in 1957 were 3 per cent lower than in 1956 for crops but 8 per cent higher for livestock.

Cash receipts from farm marketings in 1957 were below 1956 in 6 of the 10 regions. The declines were largest in the South, especially in the Delta States and the Southeast. In these regions, late rains damaged crops and delayed harvesting. Moreover, total production of cotton and other crops was down and much of the harvest was carried over for sale in 1958. The Lake States and Mountain regions which showed the largest increase in receipts from farm marketings were helped by the relatively favorable prices received for meat animals.

Production costs were nearly \$1.0 billion higher in 1957 than in 1956. Expenditures for seed and fertilizer remained about the same but all other cost groups rose. The increase for purchase of livestock-more than \$300 million-was the largest increase in any group of expenditures. Expenditures for taxes, wages, and mortgage interest also increased. Prices paid by farmers for items used in production, including interest, taxes, and wage rates, rose about 4 per cent between 1956 and 1957.

The purchasing power of realized net income of farm operators from farming dropped about 13 per cent. This resulted partly from a decline in current-dollar income and partly from an increase of nearly 3 per cent in the prices farmers

paid for items used in family living. Except for 1956 the purchasing power of realized net income declined each year since 1951. In 1957, it was only 7 per cent above 1940 and only about half the level of the high year 1946.

The income that farmers received from non-

farm sources in 1957 is estimated at \$6.3 billion, down about 6 per cent from the all-time high of \$6.7 billion received in 1956. A decline in the farm population, and less opportunity for nonfarm employment in some areas, were mainly responsible for lower income from such sources.

THE 1958 BALANCE SHEET IN DETAIL

In the preceding paragraphs, the balance sheet was summarized in general terms. In the sections that follow, each item of the 1958 balance sheet is treated in detail.

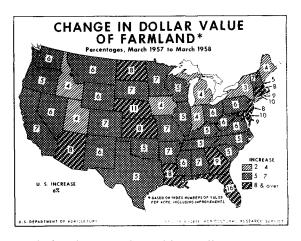

ASSETS

Assets fall into two general classes: (1) Physical assets, both real estate and tangible personalty; and (2) financial assets, which include cash, bank deposits, United States savings bonds, and farmers' investments in cooperative associations.

Farm real estate. The total value of farm real estate (land and buildings) was estimated at \$116.3 billion on March 1, 1958 or \$100.39 per acre. This was a new record; it was 6 per cent or \$6.8 billion above the previous high set in March 1957. The value of farm buildings was estimated at \$26.9 billion on March 1, 1958, or 23.2 per cent of the value of farm real estate. This was a slightly higher proportion of the total than a year earlier.

The average value of farm real estate per acre advanced in all States in the 12 months ended March 1, 1958. Increases ranged from 5 to 7 per cent in more than one-half of the States; values were up 8 per cent or more in several Northeastern and Southeastern States, in Arizona, and in the Northern Plains, as the map shows.

A complex of factors has contributed to the rise in farm real estate values in the last four years. Among these are inflationary pressures, demand for land for nonfarm uses, Government programs, and the reductions in cost made possible by enlargement of existing farms. Most of these forces continued to support or to increase market values of farm real estate the year just past. Despite reduced employment in the durable goods and manufacturing sectors, demand for farm products was sustained, and prices received by farmers in the spring of 1958 were the highest in five years. This improvement in the agricul-

tural situation, together with excellent prospects for wheat in the former drought areas, added a note of optimism to the farm real estate market in some sections of the country this spring. In other areas, where adverse fall weather had delayed or damaged harvest, little change in land values occurred.

The trend toward larger farm operating units with its associated demand for land for farm enlargement continues at an accelerated rate. Sales data show that 40 per cent of the transfers reported for the year ended March 1958 were for additions to existing farms. A year earlier, the proportion was 38 per cent. This type of demand for land has contributed most to the market in the wheat areas where the proportion of purchases for enlargement currently makes up 65 per cent of all transfers. The proportion was nearly 50 per cent in the Corn Belt and in western cotton and range-livestock areas.

Continued increases in the market value of production assets in agriculture, particularly of real estate, without corresponding increases in farm income have reduced sharply the rate of return on farm capital in recent years. Net agricultural income after all expenses were paid (in-

cluding a charge for operator and family labor) amounted only to 3.7 per cent on the inventory value of physical assets of agriculture in 1957. If an allowance is made for interest on the inventory value of machinery, equipment and livestock, the residual return to real estate was 3.0 per cent.

Although the rates for 1957 were slightly higher than in 1956, average rates for the last three years were the lowest since 1932-34 and about the same as in 1910-15. The highest rates on record occurred in 1942-48 when the return available for all farm capital averaged 9.4 per cent and the return for real estate averaged 10.5 per cent. This unusually favorable rate of return to real estate was due to the slow response of farm real estate prices to sharply higher World War II and postwar farm earnings. To some extent, therefore, the continued rise in market prices after farm earnings turned downward following 1951 represented a "catching up" and a return to the prewar relationships between land values and farm earn-

Livestock and poultry on farms. The inventory of livestock and poultry on farms on January 1, 1958 was valued at \$14.2 billion, 27 per cent higher than a year earlier and the highest since 1953. The substantial rise in value occurred despite a small decrease in numbers of livestock. Numbers were fewer for all categories except sheep (Table 4). The aggregate decline as measured by valuations in 1940 prices was one per cent.

Total			11,132			14,163	

The increase in livestock values resulted from higher prices. For example, average prices per hundredweight for beef cattle rose from \$14.90 in January 1957 to \$19.70 in January 1958. The price of calves increased from \$16.60 to \$22.20, hogs from \$17.30 to \$18.50, and sheep from \$5.71 to \$7.83.

The strength in livestock prices stemmed in part from the feed situation. Pastures were improved, especially in the Southern Plains, and ranchers held back sales in an effort to restock. In the Corn Belt the large corn crop, much of it wet and subject to spoilage, resulted in strong demand for cattle to utilize the feed. During the fall of 1957 these factors slowed the downtrend in livestock numbers and forced prices up but at the beginning of 1958 numbers still were lower than a year earlier.

Machinery and motor vehicles on farms. Following a decline to \$2.8 billion in 1956, expenditures for new farm machinery and motor vehicles increased 12 per cent to about \$3.1 billion in 1957. Purchases increased because of better growing conditions and slightly higher prices for farm products sold. The breaking of the drought in the Southwestern and Great Plains areas helped sales of machinery.

The value of farm machinery and motor vehicles on farms reached a record high of \$17.6 billion on January 1, 1958. This was about 2 per cent above the previous record of \$17.2 billion on January 1, 1957 (Table 5). Both the numbers of principal farm machines and the prices at which they were valued reached peak levels on January 1, 1958. All of the major

classes of farm machinery and motor vehicles on farms, except automobiles, were up in value. Automobiles declined in value from \$4.0 billion on January 1, 1957 to \$3.9 billion on January 1, 1958.

In constant prices, the value of farm machinery and motor vehicles on January 1, 1958 was about 2 per cent lower than a year earlier. Expenditures for new machinery, although higher in 1957 than in 1956, were less than depreciation allowances.

Crops. Crop inventories of farmers, including crops pledged under loan to the Commodity Credit Corporation, were valued at \$7.6 billion on January 1, 1958, about 9 per cent less than a year earlier. All the major crop groups listed, except the miscellaneous feed grains of oats, barley, and grain sorghum, showed declines. The value of stored soybeans was about the same on each date.

The physical quantity of crop inventories, as measured in 1940 prices, increased nearly 8 per cent between January 1, 1957 and January 1, 1958. For crops stored on farms the quantity increased 11 per cent. Quantities of feed grains, hay and forage, and cotton stored on farms increased. Storage on the farm of the food grains and oil crops showed a small decline. The quantity of crops stored off-farm under CCC loan decreased about 22 per cent, mainly because of less cotton and wheat.

Liquid financial assets. Bank deposits, currency, and United States savings bonds owned by farmers on January 1, 1958 are estimated at \$14.5 billion. A year earlier they totaled \$14.4 billion (Table 6).

The amount of currency farmers had at home or in their pockets was \$2.0 billion, the same as last year. Time deposits (savings accounts) rose sharply to \$2.9 billion—the largest since estimates began in 1940. At the beginning of 1958, farmers' checking accounts totaled \$4.5 billion. The decline from \$4.7 billion a year earlier may have been due partly to a shift of funds to savings accounts.

A survey made by the Federal Reserve Board shows much variation among regions in farmers' checking accounts. For the country as a whole, the average size of farmers' checking accounts, \$1,358, was about the same as a year earlier and ranged from \$2,421 in the San Francisco District to \$871 in the Richmond District. Most farmers have smaller accounts than these averages, which

are influenced heavily by a relatively few persons who have very large accounts.

The cash value of United States savings bonds owned by farmers at the beginning of 1958 was the same as a year earlier, \$5.1 billion. This is the first year since 1952 that holdings of bonds did not increase. The general rise in interest rates which made other types of bonds and savings accounts more attractive has been the main factor in this situation. Purchases of United States savings bonds by farmers decreased about 19 per cent from 1956 to 1957. Purchases of Series H bonds, which are often bought by the larger investors, declined 26 per cent. The amount of savings bonds cashed by farmers in 1957 was about 3 per cent larger than in 1956 and exceeded the amount of bonds purchased by more than \$100 million. The cash value of outstanding bonds, however, was maintained at the level of \$5.1 billion because of the interest that accrued during 1957.

Net worth of farmers' cooperatives. The net worth of farmers' cooperatives again in 1957 showed an increase of about \$0.2 billion, and reached \$3.7 billion on January 1, 1958. Cooperatives have had a steady financial growth since the end of World War II. On January 1, 1958 marketing associations had the largest net worth, \$1,370 million. Associations through which farmers buy feed, seed, fertilizer and other supplies were next in importance with an aggregate net worth of \$675 million. The combined net worth of the credit cooperatives that operate under the Federally sponsored Farm Credit System totaled \$669 million.

Assets used in farm production. On January 1, 1958, the value of assets used in farm production amounted to \$140.6 billion, or about three-fourths of all assets included in the balance sheet of agriculture. All classes of production assets, except crops and checking accounts, rose in value during 1957. These increases in value were the

³ Revised.

result of higher prices. Feed and forage crops held on farms for feeding livestock were the only assets that showed an increase in physical quantity. Most significant is the amount of production capital handled on each farm and by each worker. Value per farm, which was \$17,000 in 1950, had risen to \$29,600 by 1958. The increase per worker on farms was from about \$9,600 to nearly \$18,400 (Table 7).

CLAIMS

Claims on agricultural assets are of two general kinds: (1) Liabilities, which are divided into real estate and non-real-estate debt; and (2) equities, which represent the value of the residual rights in agricultural assets belonging to the proprietors—owner-operators, tenants, and landlords. Included among these proprietors are individuals, financial institutions and other corporations, and Federal, State, and local government agencies.

Farm real estate debt. Farm mortgage (real estate) debt rose for the twelfth consecutive year in 1957 to an estimated total of \$10.5 billion on January 1, 1958, as shown in the chart above.

The increase for 1957 was \$600 million compared with \$840 million for 1956. All regions participated in the increase in outstanding farm mortgage debt in 1957. The Delta States had the largest increase (9.9 per cent); the smallest increases were in the Northeast (3.5 per cent) and the Southern Plains (3.6 per cent). Among lenders, percentage increases in outstanding farm mortgage loans ranged from 17.4 per cent for the Farmers Home Administration to 2.3 per cent for insured commercial banks (Table 8).

² Includes regular mortgages, purchase-money mortgages, and sales contracts.

³ Loans were made for the Corporation by the Land Bank Commissioner. Authority to make new loans expired July 1, 1947. On June 30, 1955, loans of the Federal Farm Mortgage Corporation were sold to the 12 Federal land banks.

⁴ For 1940 tenant-purchase loans and direct soil and water loans to individuals only. 1945–58 includes tenant-purchase, farmenlargement, farm-development, and project-liquidation loans; beginning July 1950, farm-housing loans; and beginning 1955, building-improvement loans.

In 1957, farm mortgages recorded declined in both number and total amount. A decline in the over-all average size of farm mortgages recorded in 1957 reflects chiefly a shift in borrowing from the Federal land banks and insurance companies, which usually make larger loans, to individuals and miscellaneous lenders, which usually make smaller loans.

As in other recent years, farm mortgage loans were made in 1957 chiefly for the purpose of buying farm real estate and refinancing debts. However, data for 12 life insurance companies indicate that a smaller proportion of the proceeds of their mortgage loans was used for refinancing in 1957 than in 1956. Sellers of farm land, chiefly individuals, accounted for the largest share -43 per cent—of the credit used in purchasing farm land in the year ending March 31, 1958, as shown by the chart above. Banks provided 17 per cent of the credit, insurance companies 15 per cent, Federal land banks 9 per cent, and other individuals 7 per cent. The proportions provided by individuals were higher, and those from such institutional lenders as banks, insurance companies, and the Federal land banks were lower, than in the previous year.

Principal repayments for the Federal land banks declined from 9.4 per cent of the amount outstanding at the beginning of the year in 1956 to 8.3 per cent in 1957. A similar decline was noted for 16 life insurance companies where principal repayments (including payments through refinancing) declined from 12.1 per cent of the January 1 amount outstanding in 1956 to 10.5 per cent in 1957.

The lower volume of farm mortgage loans made in 1957 apparently resulted largely from the tight situation in the money markets. Rising yields of bonds during most of the year tended to attract funds of insurance companies and some other lenders to the bond market. Moreover, as interest rates charged on farm mortgage loans followed bond yields upward, farmers apparently became less inclined to borrow. This was particularly true of farmers who already had mortgages on their farms and who faced the prospect of having to refinance their old loans at higher rates in order to obtain additional advances.

Interest rates on new farm mortgage loans rose by one-half of one to one percentage point during 1957. Contract rates on mortgages recorded during the first quarter of 1957 varied from an average of 5.86 per cent for banks and trust companies to averages of 5.21 per cent for insurance companies and 4.40 per cent for Federal land banks. By November 1957, nine of the Federal land banks were charging 5.5 per cent and three banks were charging 6 per cent. Leading life insurance companies in the farm mortgage field reported a minimum rate of 5.5 per cent in early November 1957. In some areas this rate was as high as 6 per cent.

Interest rates charged by the Federal land banks and probably by other lenders turned downward during the early months of 1958. On July 1, 1958, only four land banks were charging 5.5 per cent; seven charged 5 per cent; and the Omaha bank charged 4.5 per cent.

Non-real-estate debt. Total non-real-estate debt of farmers amounted to about \$9.7 billion on January 1, 1958, only slightly more than a year earlier. But noteworthy changes occurred during 1957 in the composition of this debt. Price-support loans, made or guaranteed by the Commodity Credit Corporation, dropped sharply from \$1.6 billion at the beginning of the year to \$1.2 billion at the end of the year. Other types of loans increased from \$8.0 billion to \$8.5 billion (Table 9).

These changes resulted partly from wet weather in the fall of 1957, which delayed harvests and impaired the quality of the cotton, corn, and other crops. This caused smaller quantities of these crops to be placed under price-support loans in the fall of 1957 than in other recent years. Repay-

Although these are nonrecourse loans, they are treated as debts.
 Borrowers must either pay them in cash or deliver the commodities on which they were based.
 Estimates based on fragmentary data.

ments of other loans were slowed and, at the same time, farmers' needs for loans to meet operating and living expenses were increased. In the western Corn Belt, the large but wet corn crop stimulated demand for loans to buy feeder cattle. The demand of farmers for other loans was strengthened also by increased purchases of farm machinery in 1957, and by improved pastures in the Plains and Southwestern States, which increased demands for cattle to restock ranges that had been depleted during the drought.

Under the impact of these forces, outstanding production loans to farmers held by banks and

Federally sponsored agencies increased by nearly 12 per cent during 1957, as shown by the accompanying chart. Increases occurred in all States except Rhode Island and Connecticut but, with few exceptions, the largest increases were in the Plains and Southern States.

In 1957, the production credit associations expanded their outstanding loans by about 27 per cent whereas banks and the Farmers Home Administration increased their outstanding production loans to farmers by only about 10 per cent and one per cent respectively. Two factors go far towards explaining the exceptionally large increase in loans of the production credit associations: (1) The offering of intermediate-term loans, with maturities ranging up to five years, has attracted business to them; and (2) as their operating margins were reduced in 1957 by the rise in money market rates, the associations were under considerable pressure to increase their volume of business in order to maintain their earnings.

Because of rising rates of interest in the money markets during 1956 and 1957, most of the production credit associations increased the rates they charge farmers on new loans. At the beginning of 1956 only slightly more than half of the associations charged rates as high as 6 per cent. By the end of 1957, nearly all of the associations were charging 6 per cent or more for loans. Bank rates to farmers were not affected as strongly by rising money market rates as were those of the production credit associations, but indications are that they also increased during 1956 and 1957. With the decline in money market rates since last November, rates charged by some of the production credit associations have been lowered.

Total farm debt. Total farm debt, including price-support loans, rose from \$19.5 billion at the beginning, to \$20.2 billion at the end, of 1957. This debt has risen each year since 1946, when it totaled only \$8.0 billion. On January 1, 1958, farm debt amounted to 11 per cent of the value of farm assets, compared with 8 per cent on January 1, 1946.

Law Department

Administrative interpretations, new regulations, and similar material

National Bank Real Estate Loans

By Act of Congress approved July 18, 1958 (Public Law 85-536), the fourth paragraph of section 24 of the Federal Reserve Act was amended so as to make the limitations and restrictions on real estate loans by national banks inapplicable to loans made by such banks to established industrial or commercial businesses in which the Small Business Administration cooperates through agreements to participate on an immediate or deferred basis. The text of the pertinent provision of the Act reads as follows:

Sec. 3. The fourth paragraph of section 24 of the Federal Reserve Act is amended (1) by striking out "or the Small Business Administration" and "or of the Small Business Act of 1953,", and (2) by adding at the end thereof the following new sentence: "Loans in which the Small Business Administration cooperates through agreements to participate on an immediate or deferred basis under the Small Business Act shall not be subject to the restrictions or limitations of this section imposed upon loans secured by real estate."

Margin Requirements

The Board of Governors of the Federal Reserve System, effective August 5, 1958, amended the Supplement to Regulation T entitled "Extension and Maintenance of Credit by Brokers, Dealers, and Members of National Securities Exchanges," and amended the Supplement to Regulation U entitled "Loans by Banks for the Pur-

pose of Purchasing or Carrying Stocks Registered on a National Securities Exchange" so as to increase the margin requirements from 50 per cent to 70 per cent for credit extended by brokers and banks to finance purchases of stock exchange securities. The increased margins also apply to short sales. The texts of the Supplements as thus amended are as follows:

SUPPLEMENT TO REGULATION T

Maximum loan value for general accounts.— The maximum loan value of a registered security (other than an exempted security) in a general account, subject to section 3 of Regulation T, shall be 30 per cent of its current market value.

Margin required for short sales in general accounts.—The amount to be included in the adjusted debit balance of a general account, pursuant to section 3(d)(3) of Regulation T, as margin required for short sales of securities (other than exempted securities) shall be 70 per cent of the current market value of each such security.

SUPPLEMENT TO REGULATION U

For the purpose of section 1 of Regulation U, the maximum loan value of any stock, whether or not registered on a national securities exchange, shall be 30 per cent of its current market value, as determined by any reasonable method.

APPLICATIONS OF FIRST NEW YORK CORPORATION ET AL. TO BECOME BANK HOLDING COMPANIES

The Board of Governors of the Federal Reserve System, on July 10, 1958, issued an Order denying the applications of First New York Corporation, The First National City Bank of New York, and International Banking Corporation, under Section 3 of the Bank Holding Company Act of 1956, to become bank holding companies. There are published below copies of the Board's Order (Docket Nos. BHC 1-3), Statement by the Board, Dissenting Statement by certain members of the Board, and Supplemental Report and Recommended Decision of the Hearing Examiner.

ORDER DENYING APPLICATIONS

There having come before the Board of Governors, pursuant to Section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842) and Section 4(a)(1) of the Board's Regulation Y (12 CFR 222.4(a)(1)), applications on behalf of First New York Corporation, a Delaware corporation with its principal office in New York City, The First National City Bank of New York, New York City, and International Banking Corporation, a Connecticut corporation with its principal

office in New York City, for the Board's prior approval of action whereby each of such companies would become a bank holding company under the Act; a hearing on said applications having been held pursuant to Section 7(a) of the Board's Regulation Y (12 CFR 222.7(a)); opportunity having been given to all parties for the filing of proposed findings and conclusions; the Hearing Examiner having filed a Report and Recommended Decision and a Supplemental Report and Recommended Decision, in each of which he recommended that said applications be denied; the Applicants and The County Trust Company, White Plains, New York (a non-applicant party to this proceeding), having filed exceptions and briefs; oral arguments having been presented to the Board; and all such steps having been taken in accordance with the Board's Rules of Practice for Formal Hearings (12 CFR 263):

It is hereby ordered, for the reasons set forth in the accompanying Statement of the Board, that the applications of First New York Corporation, The First National City Bank of New York, and International Banking Corporation pursuant to Section 3(a)(1) of the Bank Holding Company Act of 1956, shall be, and hereby are, denied.

This 10th day of July 1958. By order of the Board of Governors.

Voting for this action: Chairman Martin, Vice Chairman Balderston, and Governors Szymczak, Robertson, and Shepardson; voting against this action: Governors Vardaman and Mills.

(Signed) S. R. CARPENTER,

Secretary.

(SEAL)

STATEMENT

Nature of the proposal. This case involves consideration of applications by three companies, filed pursuant to Section 3(a)(1)¹ of the Bank Holding Company Act of 1956 (hereafter sometimes referred to as the "Act"), for prior approval by the Board of Governors of the Federal Reserve System of action which will cause each of such companies to become a bank holding company under the Act.

The three applications are here considered together because they represent a single proposal. Moreover, two of them are for holding companies that would exist only temporarily.

Broadly speaking, the general purpose of the proposal is to create a new bank holding company, First New York Corporation, which would control three existing banking institutions, namely, The First National City Bank of New York, City Bank Farmers Trust Company, New York, and The County Trust Company, White Plains, Westchester County, New York.

The Applicants are First New York Corporation (hereafter referred to as "First"), a Delaware corporation with its principal office in New York City; The First National City Bank of New York (hereafter referred to as "City Bank"), a national banking association with its principal place of business in New York City; and International Banking Corporation (hereafter referred to as "IBC"), a Connecticut corporation, operating under an agreement with the Board pursuant to Section 25 of the Federal Reserve Act and engaged in international and foreign banking. IBC is a whollyowned subsidiary of City Bank.

The details of Applicants' plan are set forth in a document entitled "Reorganization Program" introduced in evidence as Board Exhibit 4.² For present purposes, the essential features of that plan are as follows:

All of the outstanding capital stock of First would be acquired by IBC. First would then cause the organization of three new national banking associations to be known as The Metropolitan National Bank, The First National City Trust Company of New York (hereafter referred to as "City Trust"), and County Trust National Bank (hereafter referred to as "County National"). All of the stock of these banks, except directors' qualifying shares, would be acquired by First. By such action, First would become a bank holding company under the Act. Since First's stock would be held by IBC and since the latter is controlled

¹ Section 3(a)(1) provides: "It shall be unlawful except with the prior approval of the Board (1) for any action to be taken which results in a company becoming a bank holding company under Section 2(a) of this Act;"

² Board Exhibits 1, 2, 3, and 4 were, respectively, the application of First New York Corporation, the application of The First National City Bank, the application of International Banking Corporation, and Applicants' "Reorganization Program." Hereafter in this Statement Applicants' Exhibits are referred to as "App. Exh. —.", and the Board's Exhibits are referred to as "Bd. Exh. —." References to the hearing transcript are indicated by "T. —."

by City Bank, both City Bank and IBC would also become bank holding companies as a result of the same action.

Subject to approval by the Comptroller of the Currency, each of the three presently existing banks previously mentioned would be consolidated with one of the three new national banks. City Bank would be consolidated with The Metropolitan National Bank under the charter of the latter and the name of the former. City Bank Farmers Trust Company, New York, New York (hereafter referred to as "Farmers"), which is presently affiliated with City Bank by reason of the fact that Farmers' stock except for directors' qualifying shares is held by trustees for shareholders of City Bank, would be consolidated with City Trust under the charter and name of the latter. County Trust Company, White Plains, New York (hereafter referred to as "County Trust"), which is not now affiliated with City Bank or Farmers, would be consolidated with County National under the charter and name of the latter. First would be a party to these consolidation agreements and would become the owner of all the stock, except the directors' qualifying shares, of City Bank, City Trust, and County National.

In connection with the consolidations, and following an increase in its authorized capital stock, First would issue to the present shareholders of City Bank and County Trust shares of First against surrender of certificates of stock in City Bank (which carry with them beneficial interest in Farmers) and County Trust. Both IBC and its parent, City Bank, would cease to be bank holding companies. Only First would then continue as a bank holding company, its subsidiaries being City Bank, City Trust, and County National.

The net effect of the program, therefore, as previously indicated, would be to bring under the control of First, a new holding company, (1) City Bank, (2) that bank's presently affiliated Farmers (but under a national charter), and (3) the presently unaffiliated County Trust (also under a national charter).

History of the proceeding. The action that would cause the Applicants to become bank holding companies, as previously noted, would be the acquisition by First of stock of the three newly organized national banks. Accordingly, as required by Sec-

tion 3(b) of the Act,3 the Board on November 14, 1956, requested the views and recommendations of the Comptroller of the Currency with respect to the applications. At the same time, though not required by the Act but because two of the banks involved are now New York State banks, the Board also invited an expression of views by the New York State Superintendent of Banks. In his reply of December 13, 1956, the Comptroller recommended approval of the applications. State Superintendent of Banks, in a letter dated December 12, 1956, without recommending approval or disapproval, questioned the form of the applications as placing a veto power in the hands of the Comptroller of the Currency contrary to the intent of Congress and urged that a decision on the applications be postponed pending action by the New York State Legislature regarding the structure of the State's banking system.

On December 26, 1956, the Board ordered a public hearing on the applications, to be conducted in accordance with the Board's Rules of Practice for Formal Hearings (12 CFR 263) by a hearing examiner selected by the Civil Service Commission pursuant to the Administrative Procedure Act (5 U.S.C., Sec. 1010). That hearing was commenced on January 24, 1957, and the record of the hearing was closed on September 20, 1957. The Applicants, the Board, County Trust, and the New York State Banking Department were designated by the Hearing Examiner as parties to the proceeding.

Following submission of proposed findings by the Applicants, a statement by Counsel for the Board regarding the Applicants' proposed findings,

Board regarding the Applicants' proposed findings,

3 Section 3(b) provides: "(b) Upon receiving from a company any application for approval under this Section, the Board shall give notice to the Comptroller of the Currency, if the applicant company or any bank the voting shares or assets of which are sought to be acquired is a national banking association or a District bank, or to the appropriate supervisory authority of the interested State, if the applicant company or any bank the voting shares or assets of which are sought to be acquired is a State bank, and shall allow 30 days within which the views and recommendations of the Comptroller of the Currency or the State supervisory authority, as the case may be, may be submitted. If the Comptroller of the Currency or the State supervisory authority so notified by the Board disapproves the application in writing within said 30 days, the Board shall forthwith give written notice of that fact to the applicant. Within three days after giving such notice to the applicant, the Board shall notify in writing the applicant and the disapproving authority of the date for commencement of a hearing by it on such application. Any such hearing shall be commenced not less than 10 nor more than 30 days after the Board has given written notice to the applicant of the action of the disapproving authority. The length of any such hearing shall be determined by the Board, but it shall afford all interested parties a reasonable opportunity to testify at such hearing. At the conclusion thereof, the Board shall by order grant or deny the application on the basis of the record made at such hearing."

and memoranda by the Applicants and the New York State Banking Department regarding the effect on these proceedings of New York legislation relating to bank holding companies, the Hearing Examiner on October 3, 1957, filed with the Board his Report and Recommended Decision. The Hearing Examiner recommended that the applications be denied because of the existence of Article III-B of the New York Banking Law, which would make unlawful consummation of the plan here proposed. In view of this recommendation, the Hearing Examiner's Report did not discuss or pass upon the merits of the applications in the light of the factors set forth in Section 3(c) of the Act, hereinafter described.

Following exceptions to the Hearing Examiner's Report and Recommended Decision, oral arguments were presented before the Board on November 26, 1957. On December 10, 1957, the Board remanded the case to the Hearing Examiner for a report and recommendation with respect to the merits of the applications, apart from the legal effect of the New York statute.

On February 20, 1958, the Hearing Examiner filed with the Board a Supplemental Report and Recommended Decision. It was his recommendation that the Board deny the applications for the reasons, among others, that ". . . the prospective and possible benefits of the program do not outweigh its prospective and possible disadvantages." He concluded that ". . . the program is not required for the needs and welfare of the community and area, and further, that the effect of the proposed acquisition may be to expand the size or extent of the holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking. Under these circumstances the applicants have not sustained the burden of establishing that the public interest will be furthered by granting approval of the applications."

Exceptions to the Hearing Examiner's Supplemental Report and Recommended Decision were filed on behalf of Applicants and County Trust; and on May 21, 1958, oral arguments were presented to the Board with respect to the merits of the applications.

On May 22, 1958, the Board accepted as a part of the record in the proceeding a Statement

submitted by the Department of Justice, relating to the applicability of Section 7 of the Clayton Antitrust Act to the transaction here proposed. Subsequently, Applicants filed briefs in reply to the Department's Statement.

In reaching its decision in the present case, the Board has given careful consideration to all relevant factual material contained in the record of the hearing; to pertinent arguments presented at the hearing or contained in briefs, memoranda, and statements made a part of the record of the proceeding; to both the initial and supplemental reports and recommended decisions filed by the Hearing Examiner; and to statements presented at oral arguments before the Board.

Effect of New York statute upon Board's authority. In view of the conclusions expressed by the Hearing Examiner in his Report and Recommended Decision of October 3, 1957, it is necessary at the outset to determine whether the Board is precluded, as a matter of law, from considering the merits of the present applications by reason of the existence of Article III-B of the New York Banking Law (hereafter referred to as the "New York statute").

The New York statute was first enacted effective January 29, 1957, shortly after commencement of the hearing in this case. It was passed as a temporary measure to expire by its terms on May 1, 1957, but was subsequently extended by Acts of April 22, 1957, and April 16, 1958. Unless further extended, the statute will expire May 1, 1959. Briefly, and insofar as it is pertinent to the present case, the New York statute has the effect of prohibiting, until May 1, 1959, any company from acquiring 25 per cent of the stock of two or more banks unless the banks are located within the same city or New York State banking district. On its face, the statute would prohibit consummation of the transactions for which Applicants seek Board approval under the Bank Holding Company Act, since the three proposed subsidiary banks would not be located in the same city or banking district of the State.

Section 7 of the Bank Holding Company Act provides:

"Sec. 7. The enactment by the Congress of the Bank Holding Company Act of 1956 shall not be construed as preventing any State from exercising such powers and jurisdiction which it now has or may here-

after have with respect to banks, bank holding companies, and subsidiaries thereof."

Because of this provision of the Act, the Hearing Examiner concluded that the New York statute is "an exercise of State jurisdiction authorized by the Federal law", and that, for the period of the duration of the New York statute, it effectively prevents approval of the program here proposed so that the Board is "precluded" from approving the applications at this time.

The extent of the "power and jurisdiction" of the States in the field of bank holding company regulation is, of course, not a matter for this Board's decision; nor may the Board undertake to determine whether the New York statute represents a valid exercise of that State's power. These are matters for determination by the courts. Unless and until a court of competent jurisdiction holds the New York statute to be invalid, the Board must assume its validity. Davies Warehouse Co. v. Bowles, 321 U.S. 144, 153 (1944). The question, therefore, is not whether the New York statute is valid but whether the Bank Holding Company Act so limits the Board's discretion, either expressly or by implication, as to make it necessary, as a matter of law, for the Board to disapprove the present applications because of the existence of the New York statute.

In connection with its consideration of proposals for bank holding company legislation over a period of years, the Congress gave careful consideration to various suggested provisions designed to prohibit Board approval of applications in certain circumstances, such as, for example, where the appropriate State supervisory authority objected, or where the proposed transaction would conflict with State branch banking laws, or where State statute would prohibit acquisition of the stock of State banks in the same circumstances, or where the proposed acquisition would cross State lines. At the time such proposals were made, the bill under consideration also contained provisions similar to those of Section 7 of the Act preserving the jurisdiction of the States. Congress nevertheless rejected all such proposals to limit the Board's discretion, with the single exception of the provision prohibiting approval of acquisitions across State lines, the provision now contained in Section 3(d) of the Act.

That Section 7 was not intended to confer upon

the States any new authority with respect to banks, bank holding companies, and their subsidiaries is clearly indicated by the following statement contained in the report of the Senate Banking and Currency Committee on March 6, 1956, with respect to the meaning of the language of Section 7:

"A great deal of concern has been expressed that Section 7 of the bill as reported by the committee granted new authority and powers to States over national banks in general, and respecting the stocks of national banks in particular. This concern apparently has arisen as a result of the language added to this Section by the committee and certain statements which appeared in the committee report. The language added by the committee in the bill as reported provided that States in the exercise of their jurisdiction and powers over banks and bank holding companies could impose 'no less onerous' restrictions than were provided in the bill. The intent of the committee was to make it clear that a State could not enact legislation inconsistent with the bill and therefore nullify its effect. In view of the fact that the meaning of the no less onerous clause has apparently been misconstrued by some persons, the committee agreed to strike the clause and thus return to the language of the comparable section of H. R. 6227. However, your committee reiterates its view that Section 7 in no way permits States to exercise such powers and jurisdiction in a manner inconsistent with this proposed legislation.

"In order to clarify the legislative history of Section 7, the committee wishes to emphasize that this Section does not grant any new authority to States over national banks. The purpose of the Section is to preserve to the States those powers which they now have in our dual banking system. It is always of uppermost importance in legislation of this nature to preserve the dual system of National and State banks, and Section 7 must be viewed in that light."

In view of its language and legislative history, Section 7 is interpreted by the Board (1) as evidencing the intent of Congress not to occupy exclusively the field of bank holding company regulation or to deprive the States of whatever jurisdiction they may lawfully have in this field and (2) as not conferring upon the States any new authority in this respect. It is the Board's conclusion, therefore, that neither Section 7 nor any other provision of the Act operates to preclude the Board from approving the present applications because the transactions contemplated by them would appear to be in contravention of the State statute. It may be noted that the New York State Banking Department has taken the position that the New York statute does not legally preclude Board approval of these applications, even though that statute would prevent consummation of the plan.

In his Report and Recommended Decision of October 3, 1957, the Hearing Examiner assigned a second reason for his conclusion that Board approval of the applications is precluded by virtue of the existence of the New York statute. tion 34a of Title 12 of the United States Code, relating to the consolidation of a State bank with a national bank, provides that no consolidation shall be "in contravention of the law of the State" under which the State bank is incorporated. Since the proposed consolidation of County Trust with the proposed new County Trust National Bank would be an integral part of the program, and since in his opinion that consolidation would violate the State statute, the Hearing Examiner concluded that Section 34a of Title 12 of the United States Code "also precludes approval of the proposed program."

While the views of the Hearing Examiner on this point have been considered, weight must be given to the opinion expressed by the Comptroller of the Currency in a letter addressed to the Board on May 10, 1957, and made a part of the record of the hearing in this case. In that letter, the Comptroller stated that "with respect to Section 34a of Title 12 of the United States Code, we see nothing in Article III-B of the New York Banking Law which deals with the consolidation of banks or which would in any way affect the consolidation of a State bank with a national bank under Section 34a. . . . " That Section of Federal law is administered by the Comptroller of the Currency; and a determination by an agency administering a statute is to be accepted if it has a reasonable basis in law. NLRB v. Hearst Publications, Inc., 322 U.S. 111 (1944). In the circumstances and without expressing any opinion on the question involved, the Board feels that it should be guided by the Comptroller's view.

Needless to say, in view of Section 11 of the Act,⁴ approval of the present applications would not in any sense obviate the need for compliance by the Applicants with Section 34a of Title 12 of the United States Code or any other statute that might be applicable to any aspects of the program contemplated by the Applicants.

Whether or not the existence of the New York statute has the effect of legally precluding approval of the applications, it has been contended further that, in any event, such approval would constitute a vain and futile action, inasmuch as the transaction could not be lawfully consummated under State law. The Hearing Examiner expressed the view that, as long as the State statute remains in effect, "a determination that portions of the Federal Act do not prevent approval of the applications seems like a vain thing." The New York State Banking Department, while not asserting that the Board is legally foreclosed from approval, took the position that the State law makes the applications "academic and moot."

With due regard to these views, and assuming the validity of the State statute, the Board is unable to agree that its approval of the applications would necessarily and in all events constitute a futile action. The New York statute by its terms is temporary in nature; it cannot be said with certainty that it will be further extended beyond its present expiration date or that the New York State Legislature will not before that date enact other legislation on this subject. Moreover, while the Board expresses no opinion on the question, Applicants have challenged the validity of the State statute as applied to the transaction here proposed.

While the existence of the State statute does not, in the Board's opinion, legally bar consideration of the merits of the applications, the question whether and to what extent weight may be given the State statute in such consideration of the merits is a separate question that will be dealt with at a later point in this Statement.

Plan as giving veto power to Comptroller of the Currency. One further preliminary question may be briefly mentioned. In his letter to the Board of December 12, 1956, the New York State Superintendent of Banks expressed the view that, since the program of the Applicants would contemplate independent action by the Comptroller of the Currency with respect to approval of charters of the three new national banks and approval of the three proposed consolidations, the plan would have the effect of placing a complete veto power in the hands of the Comptroller and that this would not be in accordance with the intent of Congress to vest final decision on applications under the Act in the Board of Governors.

⁴ Section 11 provides: "Nothing herein contained shall be interpreted or construed as approving any act, action, or conduct which is or has been or may be in violation of existing law, nor shall anything herein contained constitute a defense to any action, suit, or proceeding pending or hereafter instituted on account of any prohibited antitrust or monopolistic act, action, or conduct."

Section 11 of the Act recognizes that approval by the Board of an application under the Act does not relieve an applicant from compliance with other applicable statutes. Thus, approval by the Board under the Act of acquisition of stock of a new State or national bank would not alone be sufficient to enable a bank holding company to establish a new bank; approval by the appropriate State bank authority or the Comptroller, as the case might be, of the charter of the proposed bank would also be necessary. In the opinion of the Board, therefore, the applications are not defective in the respect suggested by the State Superintendent of Banks.

Factors to be considered by the Board. Section 3(c) of the Act provides:

"(c) In determining whether or not to approve any acquisition or merger or consolidation under this Section, the Board shall take into consideration the following factors: (1) the financial history and condition of the company or companies and the banks concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether or not the effect of such acquisition or merger or consolidation would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking."

As stated by the Senate Banking and Currency Committee in its report on the Act,

"It is upon the basis of these factors that the Federal Reserve Board is to measure whether each application should be granted or denied in the public interest." (S. Rep. 1095, p. 10, 84th Cong.)

It is clear that Congress did not consider bank holding companies as evil per se and that the Act does not purport to forbid completely the expansion of existing such companies or the creation of new ones. It is equally clear, however, that, in seeking to control the expansion of bank holding companies, Congress expected the Board in each case to weigh all pertinent facts relevant to the five statutory factors. Moreover, as conceded by Applicants in this case, considerations relating to one of the factors may, in the circumstances of a particular case, be such as to overshadow and outweigh those relating to the other factors. It is with these principles in mind that the Board has considered whether the transaction here proposed would be in accord with the statutory factors.

Financial history and condition, prospects, and management. The first three of the statutory factors, as applied to the circumstances of this case, may conveniently and appropriately be considered together.

In a literal sense, the companies and banks "concerned" in this case are the Applicants (First, City Bank, and IBC), the proposed three new national banks (The Metropolitan National Bank, City Trust, and County National). However, under the program contemplated by the Applicants, IBC and City Bank would cease to be bank holding companies when the program is consummated; and the proposed three new national banks would do no business as such until after their consolidation with City Bank, Farmers, and County Trust. Consequently, for all practical purposes, the company and the banks actually concerned are First (the proposed new holding company) and the three existing banks which would be brought under the control of First, namely, City Bank, Farmers, and County Trust.

City Bank, incorporated in 1812 and converted into a national bank in 1865, is the second largest bank in New York City and the third largest in the country. As of March 31, 1957, it had deposits of \$6,692 million (including deposits at foreign offices) and capital accounts of \$573 million (App. Exh. 33). It has 75 offices in New York City and 64 foreign branches.

Farmers, originally chartered in 1822, became affiliated with City Bank in 1929. It is one of the leading fiduciary institutions in the United States. As of March 31, 1957, it had deposits of \$118 million and capital accounts of \$33 million (App. Exh. 33). It operates 3 offices in New York City.

County Trust, chartered as a State bank in 1903, is the largest bank in Westchester County. As of March 31, 1957, it had deposits of \$341 million and a capital structure of \$26 million, including reserves (App. Exh. 32). It operates 39 offices in the County.

All evidence in the record supports the conclusion that these three banks are in sound financial condition, that their financial history has been good, that their prospects are favorable, and that their managements are of high quality.

First, the proposed holding company, chartered on October 17, 1956, presently has assets of \$1,000, representing proceeds of sale of capital

stock in that amount. It has no other financial history. It is evident that, if the program were consummated, First's financial condition, prospects and management would, in the language of the Comptroller of the Currency, "parallel those of the banks it will own."

The Board concludes that the evidence relevant to the first three statutory factors is consistent with approval of the applications but does not provide substantial affirmative support for such approval.

Convenience, needs, and welfare of the communities and area concerned. The fourth statutory factor requires that the Board consider how the proposed transaction will affect the convenience, the needs, and the welfare of "the communities and the area concerned." While each of the three elements of this factor—convenience, needs, and welfare—is here considered separately, it must be recognized that for practical purposes the three elements in some respects overlap.

It is clear from the record that New York City, in which City Bank and Farmers are located, and Westchester County, in which County Trust is located, must be considered as the primary communities and area concerned in this case, although the national and international business engaged in by City Bank cannot be ignored.

There is substantial evidence to support the assertions of Applicants that, because of population and business trends, Westchester County, which lies immediately north of New York City, has become and will increasingly become an integral part of the trade and population area of which New York City is the center (T. 56). Economic integration of the County with the City has been promoted by connecting arterial highways and well developed systems of rail and bus transportation. It appears also that there has been a movement of business in significant degree from New York City to suburban areas and this trend is expected to continue. The trend is reflected by a proportionately greater increase of bank deposits in Westchester County than in New York City (T. 57).

It is to be expected that New York City banks, looking toward their future growth, would naturally wish to follow these shifts in population and business by extending their banking operations to Westchester and other suburban areas; and this consideration appears to have been a major factor that prompted the Applicants' program. It must

be borne in mind, however, that, while benefits to the banks involved may indirectly also benefit the communities concerned, the prime consideration under the fourth statutory factor is the effect of the proposed transaction upon the convenience, needs, and welfare of the areas concerned rather than its effect upon the banks involved. Consideration of this factor depends, therefore, upon the extent to which banking institutions in those areas are now serving or failing to serve the convenience, needs, and welfare of businesses and residents in the areas.

There is no assertion or evidence in the record that the proposed plan would, to any substantial extent, increase the services rendered to their customers in New York City by City Bank and Farmers. Accordingly, the principal consideration here is the probable effect of the plan upon the convenience, needs, and welfare of Westchester County.

The County is now served by 12 commercial banks. Of these, County Trust is by far the largest. As of the end of 1956, it had deposits of \$351,787,000 and 39 offices, representing 48.9 per cent of deposits of all commercial banks in the County and 44.8 per cent of the total offices of such banks. The next largest commercial bank in the County is the National Bank of Westchester with deposits of \$129,385,000 and 18 offices. The remaining 10 commercial banks had aggregate deposits of \$238,697,000 and 30 offices (Bd. Exh. 39).

Applicants claim that affiliation of County Trust with City Bank and Farmers, as contemplated by the proposed plan, will increase materially the banking services directly available in Westchester County to customers and potential customers of County Trust, and thereby serve the convenience, needs, and welfare of the communities and area concerned.

In particular, it is alleged that the proposed affiliation would increase the degree to which, and the facility with which, County Trust could provide its customers with the following services: personal loans to individuals and credit to small businesses, especially because of formalized programs developed by City Bank; financing of large business enterprises through specialized techniques developed by City Bank and through placement with or through City Bank of credit lines in excess

of County Trust's lending limits; the furnishing through City Bank of foreign banking services not now currently directly available in the County; and improved trust department and investment advisory services resulting from access to the extensive facilities and experienced personnel of City Bank and Farmers. It is also asserted that County Trust would further benefit through access to the personnel and training programs of City Bank, to the research and development programs of City Bank with respect to mechanical and electronic procedures, and to the nation-wide credit information facilities and foreign credit files of City Bank.

To a substantial degree, the benefits claimed are now available to Westchester residents through correspondent relations of Westchester banks with various New York City banks. Nevertheless, it appears probable that County Trust would be enabled as a result of its affiliation with City Bank and Farmers to improve the quality and types of services rendered to its customers; and to this extent the plan presumably would contribute to the "convenience" of Westchester County.

The second element of the fourth statutory factor requires consideration of the probable effect of the proposed transaction insofar as the "needs" of Westchester County are concerned.

As to the benefits expected to flow to residents and small business concerns in Westchester County in such matters as personal loans, loans to small businesses, and commercial loans, the record reflects that County Trust in particular, and other Westchester County commercial banks in general, have not experienced and do not anticipate future difficulty in responding to loan applications arising in the County. As to future demands in this regard, it may reasonably be assumed, as Applicants and County Trust assert, that County Trust will be required to increase its capital structure in order to meet the potential banking demands of the County. However, in view of the investor acceptance of County Trust stock, as evidenced by the high ratio of its market value to its book value, there is nothing to suggest that the proposed affiliation is necessary to enable County Trust to meet needs for additional capital.

The record also indicates that County Trust is presently experiencing no difficulty in furnishing adequate fiduciary services or investment advisory and management services; that it has done well in the field of small business loans; and that it has had no trouble in training and developing an efficient management staff. The president of the largest bank competing with County Trust testified at the hearing that the development of Westchester County had not created a demand for banking services that had not been adequately met by the banking facilities of the County alone, or in conjunction with correspondent banks (T. 827, 828). He further stated that his bank had experienced no difficulty in utilizing correspondents to meet the requirements of Westchester County applicants for loans (T. 847). Other testimony supported the view that there is no reasonable need for banking services in the County that is not being met adequately by existing banks working in conjunction with their New York City correspondents.

As previously indicated, the statute refers to the "needs" of the communities and area concerned, not to needs of the banks involved. To the extent, however, that benefits to the banks involved would indirectly benefit the public, there is no substantial evidence that the transaction is necessary to the normal growth and development of County Trust. It is apparent that County Trust has been able to keep abreast of the banking needs of the area it serves. Its annual report for 1956 showed that, as compared with 1955, it had risen in rank from 82d to 74th in size among the country's commercial banks. During 1956 its deposits increased \$18.6 million, as compared with a combined increase of \$19.8 million for the 11 other commercial banks in the County (Bd. Exh. 23). In addition, during 1956, it established a foreign department and expanded its employees' training program, (App. Exh. 3).

In the light of the above facts and other supporting evidence contained in the record, the Board concludes that the proposed transaction would not in any appreciable way serve the "needs" of Westchester County either directly or through benefits resulting to the banks concerned.

The third element of the fourth statutory factor—effect upon the "welfare" of the communities and area concerned—has broad connotations. To the extent that contribution to the "convenience" of the public would result from the proposed plan, the plan might be said also to contribute to the

welfare of the public. However, the term "welfare" is sufficiently general as to include the effect of the transaction upon adequate and sound banking in the area, the public interest, and preservation of competition in the banking field-considerations mentioned in the fifth statutory factor which are yet to be considered. It may be assumed, as suggested by a representative of the Applicants (T. 1041 et seq.), that "welfare" also comprises potential contribution to the development of an area, looking beyond existing convenience or needs. However, in the Board's opinion, based on the entire record, the proposed affiliation would be unlikely to result in a contribution of this nature appreciably greater than that which could be provided by the County's banks in the absence of such affiliation.

To summarize, the Board concludes, as to the fourth statutory factor, that the proposed transaction would probably contribute to a limited extent to the "convenience" of the area concerned and to that extent also to its "welfare"; but that the transaction is not necessary in order to meet the "needs" of the area and would not appreciably contribute, except to the limited extent above indicated, to present or potential "welfare".

The fifth factor: "size or extent." The fifth factor stated in Section 3(c) of the Act obliges the Board to consider whether the proposed transaction would "expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking." In the light of the legislative history of the Act, it is apparent that this factor is of primary importance, though it must be balanced against considerations relating to the other four factors.

Before considering the probable effect of the size or extent of the holding company system here proposed upon adequate and sound banking, the public interest and preservation of competition, it is necessary to determine what would be the actual size and extent of the proposed holding company system. In making this determination, consideration must be given to the size of the proposed subsidiary banks and the extent of their operations.

In terms of total deposits City Bank is the third largest bank in the United States and the second largest bank in the City and State of New York. In fact, since the hearing on these applications commenced, City Bank has on occasion been the largest bank in terms of deposits in the City and State of New York. As of December 31, 1956, City Bank and Farmers combined had total deposits of \$6,032 million, representing 19.5 per cent of the total deposits of all commercial banks in New York City. As of the same date, City Bank and Farmers combined had 78 banking offices representing 13.3 per cent of the banking offices of all commercial banks in New York City. In terms of capital and surplus, City Bank—even excluding the capital and surplus of its trust affiliate—is the largest bank in the United States.

County Trust, in terms of total deposits, is 74th in size in the nation and 4th in New York State outside New York City. As of December 31, 1956, County Trust had deposits of over \$351 million, representing 48.9 per cent of the deposits of all commercial banks in Westchester County. As of the same date, it had 39 offices representing 44.8 per cent of the total commercial bank offices in the County.

In total, the three banks which would be controlled by the proposed holding company would have 117 banking offices within the New York City-Westchester County area, representing 17.8 per cent of the offices and 20.37 per cent of the deposits of all commercial banks in that area.

Applicants introduced in evidence a comparison of the prospective size of First New York Corporation with the size of the largest presently existing bank holding companies. That comparison reveals that the holding company here proposed would control banks having, as of June 30, 1956, 115 offices (apparently excluding the home offices of City Bank and County Trust) with deposits of \$6,023 million, excluding foreign branches. Further, the comparison made by Applicants shows that as of June 30, 1956, Transamerica Corporation's majority-controlled banks had 277 offices with deposits of \$2,663 million in 11 Western States; Marine Midland Corporation's banks had 150 offices with deposits of \$1,813 million in New York State; Northwest Bancorporation's banks had 98 offices with deposits of \$1,521 million in 7 States; and First Bank Stock Corporation's banks had 88 offices with deposits of \$1,373 million in 5 States (App. Exh. 25).

Applicants have also referred to the fact that various existing banking organizations represent concentrations of control of greater proportions of banking resources in given areas than that here involved. Of the examples cited by Applicants, however, some are nonholding company situations, whereas the Bank Holding Company Act was directed against undue concentration of control by holding companies. The population, geographic area, and aggregate banking assets involved in the bank holding company examples cited by Applicants are of a substantially different character from those here involved. Many communities, among them some of those involved in the Applicants' examples, can support comparatively few banking offices, so that any bank operating in the community will necessarily have a relatively large proportion of that community's total banking offices and deposits. This would not be so in Westchester County or in New York City. Control by a holding company of 20 per cent of the total commercial bank deposits in New York City, the financial center of the country, or of nearly 50 per cent in Westchester County, may present a far greater question of consistency with the public interest than would a considerably higher concentration in another community.

As stated by Applicants, the size of the proposed holding company system would be attributable to the size of the three subsidiary banks, particularly that of City Bank. However, the language of the fifth statutory factor refers not to the size of the banks involved but to the size of the bank holding company system. The Act is not concerned with regulation of the expansion of individual banks; it is aimed at control of expansion of bank holding companies.

As to the "extent", the proposed holding company would operate only in New York City and adjoining Westchester County, except that through City Bank it would also engage in extensive banking operations on a national and international scale. Some existing bank holding companies, as pointed out by Applicants, cover far larger geographic areas than the area comprised by New York City and Westchester County. However, the *effect* of a holding company's geographic extent upon adequate and sound banking, the public interest, and preservation of competition will, of course, de-

pend in large part upon the nature of the banking structure of the geographic area involved.

Consistency with adequate and sound banking, the public interest, and preservation of competition. In determining whether the size or extent of the holding company system here proposed would be "consistent" with the three elements referred to in the fifth factor, it must be borne in mind that these elements, like those stated in the fourth factor, to some extent overlap and represent different but related aspects of a single broad concept.

Thus, the question whether the size or extent of the proposed holding company system would be consistent with "adequate or sound banking" or with the "public interest" must depend largely upon findings as to its effect upon "preservation of competition in the field of banking." For example, it is reasonable to assume from the history of the Act that, in the mind of Congress, a transaction that would result in an undue concentration of banking power in a holding company system would not be in accord with the "public interest."

Again, in a broad sense, all of the five statutory factors require consideration of the effect of a proposed transaction upon the "public interest." However, it must be noted that the fifth factor is specifically concerned with the relation of size and extent to the public interest; and in this respect the Holding Company Act, unlike the Clayton Act, expressly requires consideration of the effect of the size and extent of a holding company system.

Preservation of competition. A determination of whether the size or extent of the proposed holding company system would be inconsistent with "the preservation of competition in the field of banking" must be related to the areas primarily concerned, New York City and Westchester County, and within those areas, both to the banks proposed to be affiliated and to other commercial banks. Within that framework, inconsistency with the preservation of competition could result from the reduction or elimination of existing or potential competition either among the banks involved in the plan or among all banks operating in these areas.

As to competition between the three banks here involved, it is clear that City Bank and Farmers

do not compete with each other, both because they are presently owned by the same shareholders and because they are engaged in different types of business. As between these institutions, therefore, the transaction will eliminate no present competition.

Applicants estimate that, on a conservative basis, less than 6 per cent of the fiduciary accounts of Farmers originates in Westchester County. County Trust has an active trust department; the number of its trust accounts increased from 395 to 681 (or 72 per cent) from July 1950 to January 1957. Applicants concede that in the ordinary trust field, as distinguished from specialized trusts such as pension trusts, a "limited degree" of competition exists between the two institutions.

That a certain amount of competition presently exists between City Bank and County Trust is apparent. Applicants stated that deposits of City Bank originating in Westchester County were less than 1 per cent of City Bank's domestic deposits, and that the deposits of County Trust originating in New York City were less than 3 per cent of its deposits (Exh. F, pp. 5, 6). One per cent of City Bank's deposits, excluding deposits of national concerns and deposits at foreign branches, would be over \$20 million. If only deposits of foreign branches are excluded, 1 per cent of City Bank's deposits would be approximately \$55 million. Three per cent of County Trust's deposits would be about \$10 million. Accordingly, despite the small percentages involved, it appears that the actual amounts involved are substantial.

The above described overlapping of accounts of the banks involved is merely suggestive of the extent to which alternative choices of banking facilities are being *exercised* by residents of New York City and Westchester County at the present time; it is not a measure of the extent to which alternative choices are *available*. For the thousands of persons living in Westchester County and working in New York City, banking facilities in the County or in the City are always possible alternatives, regardless of evidence of present actual use.

Of significance in this connection are statistics drawn from the evidence regarding the present labor force of Westchester County. In July 1956, it was estimated that of the total Westchester County employed resident labor force of 310,000, 204,000 were locally employed and 160,000 were

employed outside the County (primarily in New York City). Of the total employment in the County of 227,000, 204,000 were County residents. In April 1956, there were 45,901 regular rail commuters from Westchester to New York City (App. Exh. 6; T. 417), and in May 1956, there were 17,151 auto commuters (App. Exh. 9; T. 423). Thus, it is evident that a large segment of the employed Westchester residents have a convenient choice of banking facilities as between Westchester County and New York City.

Similarly, the ready accessibility of the one area to the other makes it convenient for business concerns in one area to find alternative sources of banking accommodations in the other.

If, as Applicants assert, the trend toward economic integration of the two areas is increasing, it is reasonable to assume that much greater competition between the banks involved would develop in the course of time. In other words, with further economic integration, such competition as exists today would tend to become even more intensive in the future. That potential competition would be lessened by the plan here under consideration.

In addition to its effect upon competition between the banks concerned, the Board must consider the probable competitive effect of the proposed transaction upon all banking institutions in the areas concerned, New York City and Westchester County.

City Bank does not presently have a dominant position in New York City. The record reflects that City Bank, together with Farmers, vigorously competes with other banks of comparable size in New York City both as to local business and that portion of its business which is national or international in scope.

At the same time, it must be recognized that City Bank and Farmers now have 13.3 per cent of the offices and 19.5 per cent of the assets, deposits, and loans of all commercial banks in the City. Considering the population and banking resources of New York City and its importance as the financial center of the country, the degree of banking power that would be held by the proposed holding company system, even though not dominant, would be considerable. Again, it must be borne in mind that, while such concentration now exists in City Bank and Farmers, the Act relates to concentration of banking power, not in

the hands of banks, but in the hands of bank holding companies.

Applicants stress the advantages that would accrue to County Trust from closer correspondent relationships between that bank and City Bank under Applicants' proposed plan. On the basis of such testimony and the entire record, it is reasonable to conclude, and the Board does conclude, that under the actual operation of the plan City Bank and Farmers probably would have considerably greater access to the correspondent business of County Trust than they now have and than would the other banks in New York City. The resulting adverse effects on such other New York City banks and on competition in New York City for correspondent banking business are suggested by Westchester County's importance as a thriving and rapidly expanding area with deposits of all its commercial banks already approximating \$720 million, and by County Trust's powerful position with almost 50 per cent of those deposits. The danger to an existing competitive balance inherent in a supplier acquiring all or a substantial portion of a customer's stock has been the subject of extensive analysis by the United States Supreme Court in the case of United States v. Du Pont & Co., 353 U.S. 586 (1957). While relating to a different statute (Clayton Act), nevertheless, in the sense that City Bank would be the supplier of services to County Trust, the reasoning of the Court in that case is instructive.

With respect to the probable effect of the proposed plan upon banking competition in West-chester County, County Trust is presently by far the largest commercial bank in the County, and its affiliation with City Bank, the second largest bank in New York City, would substantially strengthen its competitive position in the County. The very benefits that Applicants allege would accrue to County Trust from the plan—such as access to City Bank's foreign banking services, credit information files, and mechanical and procedural development programs—would provide competitive advantages not so readily available to competing Westchester banks.

Under the proposed plan County Trust's present banking power would be brought under the control of a holding company and would be increased by its affiliation with City Bank and Farmers.

The record reveals that effective banking com-

petition presently exists in Westchester County, despite the size of County Trust (Bd. Exh. 11, p. 17). Representatives of competing Westchester County banks testified at the hearing that they would not be affected adversely in any substantial degree by the proposed plan (T. 797, 862). Opinions were expressed to the effect that the plan would even sharpen and increase competition. Nevertheless, all witnesses who commented on the point conceded that there is a reasonable likelihood that the plan would cause independent banks in the County to seek associations with other New York City banks; and the record shows that some of the County banks have already been approached in this respect by large banks in New York City.

Any such future affiliations of Westchester County banks with New York City banks through the organization of new holding companies would, of course, require the prior approval of the Board under the Act; and each such case would have to be considered by the Board on the basis of the circumstances existing at that time. Nevertheless, approval of the present applications despite findings as to adverse competitive effect would suggest that, other things being equal, even stronger adverse findings as to competition would be necessary to warrant disapproval of such possible future applications under the Act. It seems clear that sanction for the operation of two or more strong bank holding companies in Westchester County, while it might sharpen and intensify rivalry between a few large banking organizations, would not tend to preserve competition in the banking field in the sense of maintaining a relatively large number of independent alternative sources of banking services.

Moreover, if the increased power of County Trust would impel independent banks in the County to seek affiliation with New York City banks, it is likely that it would also lead them in some cases to seek mergers with other banks in the County. The record indicates that both County Trust and its largest local competitor, National Bank of Westchester, have been active in this respect in recent years. Bank mergers within the County could, of course, be accomplished without prior approval by the Board under the Bank Holding Company Act.

In the light of the adverse effect of the proposed transaction upon existing and potential competi-

tion between the banks involved and upon present and future banking competition in the areas concerned, it is the Board's judgment that the size and extent of the proposed holding company system would extend beyond limits consistent with preservation of competition in the field of banking, and for the reasons heretofore indicated, would be inconsistent with the fifth statutory factor.

The New York statute. As previously indicated, the Board is of the view that no legal bar to approval of the applications is presented by reason of the existence of Article III-B of the New York Banking Law. Question remains, however, as to the weight, if any, that may be given to the fact that the New York statute, assuming its validity, would prohibit consummation of the proposed transaction until after May 1, 1959.

While the New York statute is not directed at the size of a bank holding company, it limits the extent of a holding company system by prohibiting acquisition by any corporation of the stock of two or more banks not located in the same city or State banking district. Accordingly, the State statute is relevant to consideration of the fifth statutory factor if that statute reflects a public policy of the State and if the Board is entitled to give weight to that policy.

Despite its temporary nature, the New York statute, in the Board's opinion, reflects the present policy of the State to forbid bank holding company transactions of the kind here contemplated. As a matter of fact, it is clear from the record that the statute was specifically prompted by the particular proposal now under consideration.

That the policy of a State in this field was expected to be considered is suggested by Section 3(b) of the Act, which requires the Board to obtain the views of the appropriate State supervisory authorities in cases in which stock of a State bank is to be acquired by a bank holding company. While the banks whose stock would be initially acquired by the Applicants in this case would be new national banks it is plain that two of the three operating banks which would be brought into the holding company system are now New York State banks.

In the circumstances, it is the considered view of the Board that, in considering the proposed transaction's effect on the "public interest", it may properly take into account the fact that the New York statute and related circumstances evidence a policy of that State adverse to approval of the present applications. However, the Board's decision in this case is not dependent upon the existence of the State statute or the policy of the State reflected by that statute.

Conclusions. On the basis of the findings of fact heretofore stated, and after consideration of all arguments contained in the record of the hearing, in briefs and memoranda submitted by the parties, in statements made by the parties at oral arguments before the Board, and in documents made a part of the record in this proceeding, including the initial and supplemental Reports and Recommended Decisions of the Hearing Examiner, the Board concludes that:

- 1. Facts pertinent to the first three statutory factors, namely, financial history and condition of the companies and banks concerned, their prospects, and the character of their management, are consistent with approval of the applications but do not provide substantial affirmative grounds for such approval;
- 2. With respect to the fourth statutory factor, the transaction for which the Board's approval is requested would probably contribute in some limited measure to the convenience of the communities and the area concerned and to that extent also to their welfare; but the banking needs of the communities and the area concerned are being satisfied by existing banking institutions without the affiliations proposed by Applicants;
- 3. With respect to the fifth statutory factor, the proposed transaction would "expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking"; and
- 4. Adverse considerations relating to the fifth statutory factor outweigh the favorable considerations relating to the other factors, and, accordingly, approval of the present applications would not be consistent with the statutory factors required by Section 3(c) of the Act to be considered by the Board.

In reaching the above conclusions, the Board has considered, in relation to the fifth statutory factor, the question whether the proposed transaction would violate Section 7 of the Clayton Act, and in this connection attention has been given to the Statement of the Department of Justice with respect to this question. However, since the Board has concluded that the application should not be approved in the light of the standards stated in the Bank Holding Company Act, it is unnecessary to determine whether the proposed acquisitions of bank stocks would involve a violation of the Clayton Act.

Question has been raised in this proceeding as to the nature of the burden of proof imposed upon the Applicants. The Hearing Examiner stated that "Under these circumstances the Applicants have not sustained the burden of establishing that the public interest will be furthered by granting approval of the applications." The Applicants assert that they have a burden of proof to "show that their proposal is consistent with the statutory factors" and that, having established a prima facie case in this respect, "it then becomes necessary to review the record in the light of the 'preponderance of evidence', to ascertain whether there is substantial evidence of sufficient weight to rebut Applicants' prima facie case." Assuming that Applicants have correctly stated the nature of their burden of proof and that they have established a prima facie case, the Board finds on the basis of the entire record that such prima facie case has been rebutted.

The findings of the Hearing Examiner, contained in his supplemental Report and Recommended Decision of February 20, 1958, to the extent that they are consistent with those contained in this Statement of the Board, are hereby adopted. On the basis of these adopted findings, and the findings by the Board as hereinbefore set forth, it is the judgment of the Board that the recommendation of the Hearing Examiner, as contained in his Supplemental Report, should be adopted and that the applications must be denied; and IT IS SO ORDERED.

DISSENTING STATEMENT OF GOVERNORS VARDAMAN AND MILLS

We agree with the other members of the Board that the existence of a New York statute prohibiting the consummation of this plan does not preclude the Board from approving the pending applications, if such approval is otherwise justified under the Bank Holding Company Act of 1956. We also agree that there are no other legal impediments to consideration of the applications on their merits. Accordingly, the Board is required to determine, on the basis of the record in this case and the applicable statutory provisions, whether or not to approve the pending applications, taking into consideration the several factors enumerated in Section 3(c) of the Act.

A central purpose of the Act was to control the future expansion of bank holding companies. Section 3(c) provides criteria to guide the Board of Governors, as the agency charged with administering the Act, in determining whether to approve or disapprove applications directed at the creation or expansion of bank holding companies. Nothing in the Act can be construed as forbidding creation or expansion of holding companies as an evil in itself, and it follows that the regulatory body—the Board of Governors—should not block a proposed expansion of a legitimate enterprise unless it is clearly in conflict with the statutory criteria prescribed by Congress.

In the present case, as far as the first three factors prescribed by Section 3(c) are concerned we agree with the majority that, with respect to each of the organizations involved, financial history and condition and prospects are good, as is the character of management and proposed management. We further agree that these circumstances do not make approval of the pending plan either appropriate or inappropriate, from the viewpoint of the Holding Company Act.

The fourth factor enumerated in Section 3(c) relates to the "convenience, needs, and welfare" of the area concerned. The record demonstrates that the proposed plan would contribute to the convenience, needs, and welfare of Westchester County, the area that would be principally affected. Not only witnesses on behalf of the Applicants, but also disinterested Federal bank supervisory authorities, testified that the proposed affiliation would increase the services available to the customers of The County Trust Company over a period of time.

Up to this point, it is conceded by all, we face a situation presenting no factors adverse to the proposal and one very important factor—the convenience, needs, and welfare of the area—that is affirmatively favorable to the proposal. The

majority of the Board, however, have reached the conclusion that the fifth factor prescribed by Section 3(c) applies so unfavorably to the facts of this case as to require denial of the application. We are compelled to disagree with the majority with respect to both (1) the interpretation of the fifth factor of Section 3(c), and (2) the application of that factor to the facts disclosed by the record in this proceeding.

In discussions of the fifth factor, it is customary—perhaps for the sake of brevity—to refer to it as the "preservation of competition" factor. It is particularly important, however, to bear in mind that Section 3(c) does not proscribe every proposal that might have some limiting effect upon competition in the field of banking. The statute simply requires the Board to take into consideration

"... whether or not the effect of such acquisition ... would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking."

Our disagreement with the majority of the Board in this case is based on a different interpretation of the Holding Company Act in this respect. The decision of the majority appears to rest on the idea that the Act was designed principally to preserve competition in the field of banking by preventing the expansion or creation of holding company systems unless such expansion or creation could be justified by proof that it would affirmatively contribute to the public interest in some manner.

In our opinion, this is not the philosophy of the Bank Holding Company Act, and the crucial language of Section 3(c) previously quoted, supports our interpretation. Section 3 generally evidences a Congressional conclusion that uncontrolled expansion of bank holding companies could be inimical to "adequate and sound banking, the public interest, and the preservation of competition in the field of banking." In other words, Congress recognized that, unless subject to regulation, a bank holding company system might "expand . . . beyond limits" consistent with those objectives. The Board of Governors of the Federal Reserve System was selected by Congress as a body qualified to examine proposed expansions or creations of holding company systems and to determine, in each case, whether the particular proposal would result in a holding company system whose "size or extent" would exceed those limits

Perhaps the difference in interpretation of the Act can be put in another way. The majority appear to believe that, whenever a proposed holding company acquisition might have even a limited effect upon banking competition, the fifth factor of Section 3(c) dictates disapproval, unless this "unfavorable" factor is outweighed by favorable considerations arising under one or more of the other four factors. For example, the majority conceivably would approve the establishment of a new bank by a holding company in a community that greatly needed banking facilities and had none, on the ground that the "needs and welfare ... of the area concerned" were so pressing as to outweigh any unfavorable considerations under the fifth factor. Similarly, if an existing bank was in weakened condition and had poor prospects, the majority conceivably would approve its acquisition by a well-managed holding company that gave promise of building up the weak bank into a solid and serviceable institution. But in the absence of such countervailing considerations, the majority appear to believe that even a slight diminution of competition, in a limited field, is a fatal objection.

We do not regard the Holding Company Act as susceptible of such a restrictive and negative interpretation. Congress did not set up "the preservation of competition" to the maximum possible extent as one of the objectives of this statute. The factor of competition was to become significant only if and when a holding company system threatened to grow to such magnitude as to pass "beyond limits consistent with . . . the preservation of competition in the field of banking." Short of that point, the Board of Governors is not justified in preventing a holding company acquisition on the ground that it might, to a minor extent, diminish competition in the banking field.

In the instant case, it is difficult to see how the proposed plan could reasonably be said to threaten the continued existence of banking competition to the extent referred to in the Act—that is, "to expand the size and extent of the bank holding company system involved beyond limits consistent with . . . the preservation of competition." As far

as New York City proper is concerned, it cannot be contended that banking competition would be adversely affected by the circumstance that the majority of the stock of one of the many large banks in that City was owned by a corporation that also owned the majority stock of a bank in Westchester County. The vigor and intensity of competition in New York City would be in no significant way diminished if this plan were consummated.

The only other area directly involved in this case is Westchester County, a prosperous suburban county immediately north of New York City. In that area The County Trust Company is presently the largest bank, but there are a number of other substantial and successful banking institutions. The record in this case contains little on which to base a reasonable finding that competition among banks in Westchester County would be materially diminished simply because the stock of The County Trust Company was owned by a corporation that also owned the stock of a large bank in New York City. It is not sufficient to talk in broad generalities about the enormous economic power that would stand behind The County Trust Company if it were owned by the proposed First New York Corporation. It is our obligation to examine the record realistically, and on that basis there is an absence of persuasive explanation of how—in what specific ways—the competitive situation in Westchester County would be adversely affected by consummation of Applicants' plan.

The fact that the proposed holding company would be considerably larger than any existing bank holding company is not germane to any problem stemming from a concentration of banking resources in First New York Corporation. In the first place, a large segment of the domestic and foreign resources controlled by First National City Bank, the chief unit of the proposed system, spread far beyond the area of banking competition under scrutiny and must, therefore, be excluded from consideration. More important, however, is the fact that Congress has not indicated that the magnitude of existing holding companies marks the maximum permissible limits of size and extent. On the contrary, the Board is obligated to examine each situation presented to it in the light of its own unique facts, and to decide on that basis alone whether the proposed expansion would be

consistent with the legislative purpose reflected by the factors enumerated in Section 3(c), by other provisions of the Act, and by its legislative history.

Focusing analysis on the competitive situation in New York City and in Westchester County that would result from the creation of the proposed holding company system, there is no weighty evidence that competition would be unduly lessened or that the aggregate size or extent of the banking institutions to be controlled by First New York Corporation would be out of keeping with the character of banking business being conducted in the metropolitan area of New York City. To hold otherwise would be tantamount to saying that entry into Westchester County and comparable suburban areas around New York City should be denied forever to any except the smaller New York City banks that might wish to extend the scope of their services through the holding company device. Such position would confer preferred status in this regard upon smaller New York City banks merely because of their lesser size. The injustice of such reasoning and result is apparent from the views of the New York State Banking Department and the introduction in the New York Legislature of bills that recognize the general desirability of revising the banking district boundaries in New York State so as to permit the regulated expansion of New York City banks into suburban areas along lines that will preserve their over-all competitive positions and allow an extension of their banking services to clienteles already situated within the range of their activities.

If commercial banking is to retain its proper place in the scheme of financial institutions serving the American public, it is clearly appropriate that commercial banks be permitted to follow their trade when not in conflict with the general public interest as a resultant of an overwhelming market power. There is no evidence that such overwhelming market power would result from the transactions contemplated by the pending applications, the propriety of which is supported by the opinions of such competent independent authorities as the Comptroller of the Currency and the Federal Reserve Bank of New York. Nor is there any doubt that the convenience and welfare of the Westchester County area would be served by the creation and operation of the proposed bank holding company system.

We conclude, therefore, that there is nothing substantial in the record to support a finding that the plan under consideration would produce anticompetitive effects, to a degree more than negligible, either in New York City or in Westchester County. But even if the prospective effects upon competition, which actually are inconsequential, were regarded as material in the aggregate, denial of the pending applications on this ground would not be justified. Viewed objectively, it is unreasonable to contend that ownership of the stock of these banks by a holding company would "expand the size or extent of the bank holding company ... beyond limits consistent with ... the preservation of competition" either in metropolitan New York City or in Westchester County, the relevant areas of competition. An allegation that the intense banking competition in New York City would be lessened by the fact that First New York Corporation owned stock of The County Trust Company of Westchester County as well as stock of First National City Bank of New York cannot be sustained. And similarly, the record is devoid of credible evidence that the "preservation of competition" among the banks of Westchester County would be threatened by the proposed change in ownership of the majority stock of The County Trust Company.

The majority opinion recognizes that affiliations of the kind here proposed might sharpen and intensify rivalry in Westchester County, but it forecloses this potential intensification of competition on the ground that such affiliations "would not tend to preserve competition . . . in the sense of maintaining a large number of independent alternative sources of banking services." There is nothing in the Holding Company Act to indicate a Congressional intent to give statutory protection and perpetuation to a "large number of independent . . . sources of banking services." The statute refers simply to preservation of "competition", which most reasonably refers to the vigor and intensity of competition, rather than to the mere number of institutions.

In this connection, the majority acknowledge that the proposed affiliation would enable The County Trust Company to better its services to Westchester County because of improved access to various facilities of First National City Bank. Nevertheless, these benefits are being denied in order "to preserve competition . . . in the sense of

maintaining a large number of independent alternative sources of banking services". In other words, the status quo is to be maintained, regardless of the fact that the proposal that is being rejected by the Board would serve the convenience and welfare of the public that the banks are chartered to serve. The Board's decision will withhold from the public, to this extent, that constant improvement of banking and fiduciary services which is necessary to the growth and development of modern communities; and this action is being taken in order to protect the vested interests of the existing banks in the area.

In enacting the Bank Holding Company Act of 1956, Congress was dealing with an area in which concentration of power through the holding company device had been subject theretofore to no legal limitations, short of the sanctions of the antitrust laws as they would apply to acquisitions resulting in demonstrable violations of the Clayton Act or the Sherman Act. The only proceeding that has been brought against a bank holding company under the antitrust laws (Transamerica Corporation v. Board of Governors of Federal Reserve System (C.A. 3, 1953) 206 F. 2d 163) demonstrated the difficulties of controlling bank holding companies by this means. In these circumstances, Congress recognized the possibility that holding company control of banks could reach a point at which the size or extent of a holding company system might be so great as to threaten the public interest and the preservation of banking competition, without involving a provable violation of the antitrust laws. Accordingly, it subjected holding company expansion to the scrutiny of the Board of Governors, in accordance with prescribed standards. The Board was not directed to prohibit every expansion unless favorable considerations were found to justify it; on the contrary, the language of Section 3(c) shows that, with respect to competition, the Board was not to consider a proposed acquisition as undesirable from this point of view unless it appeared clearly that "the effect of such acquisition . . . would be to expand the size or extent of the bank holding company system involved beyond limits consistent with . . . the preservation of competition in the field of banking."

The proposed affiliation would serve the convenience and welfare of the area concerned by expanding and improving its available banking services. The record reveals that the aggregate effect of the proposed plan upon banking competition would be minor, and that consummation of the plan would fall far short of expanding the proposed bank holding company system beyond limits consistent with the preservation of competition. Consequently, in the admitted absence of any other adverse consideration that would make consummation of the plan inappropriate under the Act, the pending applications should be approved.

SUPPLEMENTAL REPORT AND RECOMMENDED DECISION

Background

On 3 October 1957 the Hearing Examiner issued a Report and Recommended Decision with respect to the applications herein. It was there recommended that the applications be denied on the ground that the Board was precluded from approving them during the effective period of Sections 140-145 of the New York Banking Law, known as Article III-B. No determina-tion was made as to the factors involved in Section 3(c) of the Bank Holding Company Act of 1956. Exceptions to that Report and Recommended Decision were filed by the Applicants, and oral argument thereon was heard by the Board of Governors on 26 November 1957. Thereafter, on 10 December 1957 the Board remanded the case to the Hearing Examiner for determination with respect to the merits of the applications. The Order of Remand, in part, is as

"... Since the Hearing Examiner's Report and Recommended Decision related principally to the legal consequences of Article III-B of the New York Banking Law and made no recommendations on the merits of the subject applications, and since the Board deems it desirable to have the benefit of the views and recommendations of the Hearing Examiner with respect to all factors and circumstances affecting the merits of such applications.

"IT IS ORDERED, That this matter be and hereby is remanded to the Hearing Examiner for submission by him to the Board of a further Report and Recommended Decision setting forth, on the basis of the hearing record, his views and recommendations with respect to the merits of the subject applications in the light of all of the provisions of the Bank Holding Company Act of 1956, including consideration of the extent, if any, to which factual weight should be given Article III-B of the New York Banking Law, but irrespective of the question as to the legal consequences of such Article III-B which has already been dealt with in the Hearing Examiner's Report and Recommended Decision of October 3, 1957;"

The Board's Order also contained provision for submission of the further Report and Recommended Decision within a specified time, subsequently extended.

Section 3(c)

Section 3(c) of the Bank Holding Company Act of 1956 requires the Board to consider certain criteria, specifically set out, in connection with the approval or disapproval of applications for acquisition of the kind here involved. Section 3(c) is as follows:

"(c) In determining whether or not to approve any acquisition or merger or consolidation under this Section, the Board shall take into consideration the following factors: (1) the

financial history and condition of the company or companies and the banks concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether or not the effect of such acquisition or merger or consolidation would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking."

The Data

The record is made up of a substantial volume of material, consisting of testimony, and various documentary matter in the nature of exhibits, proposed findings, briefs, comments or analysis. With respect to the merits of the program, testimony was given by witnesses favorable to the applications (among these representatives of the Applicants and of the Federal Reserve Bank of New York), and of witnesses op-posed (among these legislators and a representative of independent bankers associations). In the same regard, testimony by several witnesses prominent in Westchester County financial activity (presidents of two banks competitive with the County Trust Company, and the head of an accounting firm) was in part approving, in part disapproving. The New York State Superintendent of Banking testified in support of Article III-B. The Comptroller of the Currency, by communication, has stated his approval of the program. The documentary material and the views of all witnesses have been considered and weighed, whether specifically referred to herein or not. The Applicants' proposed findings are adopted to the extent consistent with the findings herein.¹

The Banks

The Applicants' program has been described in the original Report and Recommended Decision, to which reference is made. In summary (with allowances for changes in status or name), the plan calls for a holdchanges in status of name), the plan cans for a holding company composed of three national banks in the New York City-Westchester County area: The First National City Bank of New York, City Bank Farmers Trust Company, and The County Trust Company.

The First National City Bank of New York (FNCB) the First National City Bank of New York (FINEB) is one of the world's great banking institutions. It is the second largest bank in New York City and State, and the third largest in the nation, operating 75 domestic offices in New York City. Its foreign operations are widespread, operating through 70 branches, offices and offices in 24 foreign countries. As of 31 offices and affiliates in 24 foreign countries. As of 31 March 1957 First National City Bank reported assets March 1957 First National City Bank reported assets in excess of \$7 billion. Comparative figures of the three largest American banks in March 1957 are as follows: Bank of America (San Francisco) (March 14), \$9,203,860,039; Chase-Manhattan Bank (New York City) (March 14) \$7,251,575,323; the FNCB (March 31) \$7,485,882,769.²

The relative size of the major New York City commercial banks as of 31 December 1956 is shown in the following table.

the following table.

¹ In the main, the Applicants' proposed findings have been accepted, as amplified or modified by comment thereon by Board Counsel, and insofar as they state factual rather than conclusionary material. Some of the conclusions stated in the proposed findings are obviously modified by conclusions in this Report. A number of proposed findings contain several assertions, some acceptable, some not, militating against outright acceptance or rejection.
² Since a relatively recent merger, as a result of which it became the largest New York bank, Chase-Manhattan usually reports slightly more assets than FNCB.

Total—All commercial banks	587	100.0	35,419,075	100.0	30,930,773	100.0	17,104,472	100.0

FNCB was organized in 1812. As shown by its Statement of Condition as of 31 December 1956, it had deposit liabilities on that date of \$6,672,390,362, and undivided profits of \$69,381,186. Its present capital stock of \$240,000,000, consisting of 12,000,000 outstanding shares \$20 par value each, is widely held, FNCB having over 63,000 shareholders at the end of 1956. Surplus is presently \$380,000,000. FNCB engages in all phases of domestic and foreign banking and has for decades successfully offered a complete range of wholesale and retail banking services to large, medium-sized and small business enterprises, and to individuals in low and medium as well as high economic levels. It was a pioneer and is a leader today in retail banking.

City Bank Farmers Trust Company (Farmers), an affiliate of FNCB, and operating three banking offices in New York City, is perhaps the country's outstanding fiduciary institution. Originally chartered in 1822, it became affiliated with FNCB in 1929 through ownership by trustees of all its stock, except directors' qualifying shares, for the benefit of the shareholders of FNCB. As shown by its Statement of Condition, as of 31 December 1956, Farmers had capital of \$10,000,000 surplus of \$10,000,000, and undivided profits of \$12,801,777. Farmers is essentially the trust department of FNCB. Such commercial banking as Farmers engages in is carried on almost entirely for the accommodation of its fiduciary clients.

The County Trust Company (County Trust), a State bank, the largest bank in Westchester County, 74th in size in the nation, and a substantial and exampsive banking institution, was chartered in 1903. It

The County Trust Company (County Trust), a State bank, the largest bank in Westchester County, 74th in size in the nation, and a substantial and expansive banking institution, was chartered in 1903. It operates 39 banking offices in the county. It is engaged in a general commercial banking and fiduciary business, including large amounts of mortgages, a field in which it acts as a wholesale dealer. It finances home construction in many States and does a large consumer lending business, both directly and by purchase of paper. Its volume of industrial loans is relatively not large. As shown by its 1956 Annual Report, as of 31 December 1956 County Trust had resources

of \$382,464,612, deposit liabilities of \$351,787,285, outstanding debentures in the amount of \$2,234,000, capital of \$6,654,115, surplus of \$7,406,250, undivided profits of \$4,816,898, reserves of \$4,500,000, and additional capital (proceeds of the debentures) of \$2,234,000. In 1957, County Trust increased its capital to \$6,986,825 having 1,397,365 shares, of \$5.00 par value each, outstanding and held by approximately 5,500 stockholders. Its reports show a consistent increase in capital funds, deposits and net earnings in substantially each year since 1947.

In the past several decades, and particularly since 1947, County Trust's growth has been rapid and continuous. From 1920 through 1955, The County Trust Company absorbed 19 banks having resources or deposits of \$163 million.

In 1955, County Trust absorbed 7 banks, having resources of \$57 million. Of the \$163 million resources or deposits absorbed through 1955, all but \$17 million was acquired since 1945. Since 1947 County Trust has merged with 10 banks operating 14 offices, and opened 8 de novo branches. Growth apart from absorption has been equally substantial. Since 1947 The County Trust Company's deposits have grown from \$70 million to \$351 million. In 1956 it established a record volume of new business in the amount of \$43 million.

The County Banks

Westchester County has 12 commercial banks. From 1950 through 1955 The County Trust Company increased its percentage of total commercial deposits in the county from 34 per cent to 48 per cent. Second largest bank in the county is The National Bank of Westchester, which on 31 December 1956 had de-

³ Capital stock was increased in 1957 from 10 million shares to 12 million, and surplus from \$300 million to its present figure.

⁴This finding is based upon the testimony of Congressman Celler at p. 212 of the transcript of hearing; of Mr. Andrew Wilson, the Chairman of the Board of The County Trust Company at pp. 146-157 of the transcript; Board Exhibit 21, Board Exhibit 22, and Applicants' Exhibit 1, M-6, Schedule II, pp. 5-6. See also p. 20 of Board Exhibit 43, Congressman Celler's written statement. The Congressman's list of acquisitions by The County Trust Company, totaling 18 in number and \$139 million in resources, does not include a 1952 merger with Mount Vernon Trust Company, Mt. Vernon, an institution with \$24 million in deposits.

¹ These remaining seven banks are the following: Rye National Bank, Rye; Scarsdale National Bank & Trust Co., Scarsdale; Mt. Kisco National Bank & Trust Co., Mt. Kisco; Gramatan National Bank & Trust Co., Bronxville; First National Bank & Trust Co., Ossining; First National Bank of North Tarrytown, N. Tarrytown;

Chappaqua National Bank, Chappaqua. Their deposits range from \$22,658,000 in the case of Rye National Bank to \$7,020,000 in the case of Chappaqua National Bank. Percentage of deposits ranges from 3.1 per cent for Rye National to .097 per cent for Chappaqua National.

posits of \$129 million approximating 18 per cent of total commercial deposits in the county. The next largest bank in the county is The First National Bank in Yonkers, with deposits of \$56 million approximating 7 per cent of total commercial deposits; the fourth, First Westchester National Bank, \$43 million and 6 per cent of deposits. The other 8 commercial banks in the county, with 20 per cent of deposits, range in deposit size from \$7 million to \$36 million. As of 31 December 1956, these 12 banks operated a total of \$7 offices in Westchester County.

As of 31 December 1956, these 12 banks operated a total of 87 offices in Westchester County, County Trust had most, 39, and National Bank of Westchester was second with 18.5

As of 31 December 1956, County Trust Company held 56.9 per cent of total loans by Westchester commercial banks, 48 per cent of the assets, and 44.8 per cent of the banking offices.

The table above shows the relative size of the Westchester County commercial banks as of 31 December 1956.

In addition to the commercial banks there are 11 savings banks in Westchester County with deposits of \$380 million as of 31 December 1955, and having 15 offices. There are also 14 savings and loan associations with 16 offices and unstated deposits.

SELECTED YEAR-END DATA FOR FNCB AND FARMERS

Item	1946	1956
Deposits (in millions)	\$4,786 \$1,095	\$6,793 \$3,741
Number on staff	11,774 895,000	16,137 1,067,000
Total earnings (in thousands)	\$22,788 \$287,632	\$ 46,891 \$602,183
Earnings per share	\$3.67	1\$4.69

¹ Actual net operating earnings in 1956 were \$51,962, equal to \$5.20 per share. The above figures of \$46,891 and \$4.69 are net operating earnings after deduction of \$.51 for losses on sales of securities.

Like County Trust, the growth of FNCB has also been aided substantially by merger, nine in number over a period of 40 years, involving acquisition of resources in the amount of \$1,580 million. The most recent and the largest of these occurred in 1955 with the acquiring of First National Bank, New York, having resources of \$713 million.

In the 10-year period 1946 to 1956 FNCB and Farmers have also grown and prospered vigorously, as shown by the lower table based on their 1956 Report. Deposits and loan figures are in millions of dollars, total earnings and capital funds in thousands. During the same period of time, however, the number of their shareholders showed a decrease from 68,918 in 1946 to 63,893 in 1956.

It seems a fair statement from the above history to say that the instant applications involve the joinder of two highly successful, aggressive, and expansive banking institutions, each outstanding in its particular area, and each with a consistent and remarkable history of growth accompanied by absorption of competitors.

As has been noted in the previous Report and Recommended Decision, New York State and National Bank Act restrictions on branch banking prevent the New York City banks from establishing branches, or merging with banks, in suburban areas, such as Westchester County, which have in recent years undergone substantial and economic growth. As we have seen, the State, by Article III-B, has also sought to prevent, at least for the time being, similar expansion achieved by way of bank holding companies. The instant program thus contemplates the establishment of a banking entity having segments in both New York City and Westchester County, contrary to present State policy.

The Various Factors Involved

The requirements of Section 3(c) have been set out heretofore. There is little or no controversy concerning the facts. Essentially, any differences between witnesses were in the area of opinion, relating to the significance of facts and the conclusions to be drawn therefrom. No effort will be made to summarize all

⁵ At the time of hearing (July 1957) National Bank of Westchester had approval for 19 offices, presumably including its head office.

the evidence and testimony. Suffice to say that in arriving at conclusions, as has been said, all the evidence and testimony has been considered and weighed, and consideration given to the argument and views expressed thereon. As stated by Mr. Howard C. Sheperd, Chairman of the Board of FNCB in his testimony, "it is proper to regard the public interest as the sole issue presented by this proceeding."

Considerable stress has been laid, pro and con, on the efficiency of the bank holding company as a device for combining desirable centralized direction of policy with autonomous operation of subsidiaries. Those arguments seem largely irrelevant here. That bank holding companies have value is implicit in the fact that they are tolerated. That they involve an element of public concern is evident from the fact that they are regulated. But whether they are more effi-cient or less efficient, benign or malevolent, forms of organization in the field of bank management, such inquiries do not seem to be proper issues here.

The Financial History, Condition, Prospects, and Management of the Institutions Concerned

History and condition. The financial history of the companies involved, relevant parts of which have been set out heretofore or in the previous Report, is good. Their condition is excellent. The comment of the Comptroller of the Currency in that regard, here adopted, is as follows:

adopted, is as follows:

"The First National City Bank of New York, the City Bank Farmers Trust Company, and The County Trust Company of White Plains, New York, have excellent financial histories. The First National City Bank of New York, are outstanding commercial banking institutions. They have, for decades, successfully emphasized the offering of complete banking services to large, medium-sized, and small business enterprises, and to individuals in low and medium, as well as high economic levels. Both banks were early pioneers in retail banking and are leaders in this field today. Their financial condition is sound. Additional capital would benefit The County Trust Company of White Plains. The City Bank Farmers Trust Company has long been an outstanding institution majoring in the fiduciary field and its financial condition is sound.
"The condition of the recently organized First New York Corporation which would become a bank holding company with respect to the three banks under discussion, subsequent to their consolidations with three newly chartered national banks, would be sound. It would commence operations with a net worth in excess of \$645 million, and no indebtedness. It would have about \$4.5 million of cash resources."

Prospects. The comment of the Comptroller with respect to the prospects of the organizations, also adopted, is as follows:

"The prospects of the three banks are excellent. They are established and progressive institutions operating in a large, highly competitive banking field. Their ability to operate profitably and to cope with banking problems as they may arise is not open to question. Their prospects under a bank holding company ownership would be equally good and possibly enhanced to a minor degree by virtue of administrative economies that may be achieved.

"The prospects of the First New York Corporation parallel those of the banks it will own."

Management. Here the Comptroller states, and it is found:

"The managements of the three banks, in their respective fields, are representative of the best in American banking. This would continue, in our opinion, under holding company ownership.

"We have every reason to believe that the management of First New York Corporation would reflect the high capacity, and principles which characterize the managements of the three banks it would own."

It seems apparent from the above, and is concluded, that the Applicants meet all the requirements stated or implicit in the first three factors of Section 3(c) of the Act. The sole question then is whether factors 4 and 5 are equally favorable to the granting of the applications. As the proponents of an order the Applicants have the burden of proof.

The communities and area. The suburban counties surrounding New York City have in recent years, particularly since World War II, undergone substantial population growth. Accompanying the gain in population has been a comparable economic expansion in the way of new service, merchandising, and industrial enterprises. From 1950 through 1955, Westchester County showed population increase of 17.4 per cent. It is estimated that from 1955 to 1975, population increase in the county will be approximately 36 per cent. New York City population growth in the same period is estimated at 4.3 per cent. West-chester County labor force is expected to increase by 110,000 from 1955 to 1975. In 1955, Westchester County had a population of 735,000. Approximately one-third of its resident labor force of 310,000 people is employed in New York City. Transportation be-tween Westchester and the city is good. A substan-tial number of national concerns have in recent years moved their executive or administrative offices to Westchester County; or have announced plans to do so. Westchester County is now one of the major in-dustrial areas of New York State, ranking fourth in the State in the number of industrial enterprises within its boundaries.

That growth is not peculiar to Westchester County or the New York City area alone. Similar development, sometimes peripheral, sometimes interstitial, often both, has occurred in other areas in the nation in or continguous to large municipalities in the years since World War II.

Whether that process is to be described as the unification of a trading area, or instead as the independent urbanization of adjacent rural regions, is perhaps only of dialectical interest. Whatever the explanation, convenient trading opportunities attract enterprising organizations. It was therefore perhaps inevitable that FNCB should be attracted to Westchester County. For with the growth of the suburbs, their banks also grow. Thus, from 1940 through 1956, deposits in commercial banks in Westchester County increased from \$155 million to a total of \$719 million. Growth in the number of offices has also been dynamic. From 1945 to 1955, a total of 32 de novo branches were opened in the county, 7 by County Trust, 6 by National Bank of Westchester, and 19 by other banks. Of the 19, County Trust subsequently acquired 5 by merger, National Bank of Westchester 4. During the same period of time County Trust acquired a total of 19 branches, 13 of them by merger.

Convenience, Needs and Welfare of the Community and Area

Granting of the applications would appear to contribute in some measure to the convenience of the Westchester community and area. That conclusion, however, is not dispositive.

Analysis of the Board's decisions under the Bank Holding Company Act discloses that the Board has drawn a distinction between the "convenience" of

⁶ Section 7(c) of the Administrative Procedure Act provides, in part, as follows: "Except as statutes otherwise provide, the proposent of a rule or order shall have the burden of proof." (5 U.S.C., Sec. 1006(c).)

a community and area, and its "needs and welfare". Establishment of the former does not overcome lack of clear evidence of the latter. (Wisconsin Bankshares Corporation, decision dated 20 December 1957.)

Similarly, that the proposed acquisition would "probably serve a useful purpose", does not justify its approval if "existing 'needs' do not appear to be of a high order of intensity", and if the convenience and welfare of the area are not "heavily dependent" on the establishment of the proposed bank. Furthermore the standard for the facility does not recognize more, the need for the facility does not necessarily favor ownership of it by a holding company: "The two actions are related, but they are not the same." (Northwest Bancorporation, decision dated 5 Novem-

Beyond that, however, the Board has said that it is not enough that some or all of the facts support, or in some respects tend to support, granting of the application. Facts which are "partially favorable", or which "may benefit the community in some respects" may be outweighed by other considerations when all relevant circumstances are collated. (Northwest Bancorporation, 5 November 1957.)

The degree of weight or application of the factors involved in each case is not mathematically assessable. As the Board has said, "No precise formula can be applied . . . and each case must necessarily be determined on the basis of a considered judgment in the light of all relevant circumstances" (Wisconsin Bankshares Corporation, 20 December 1957)

We turn now to an assessment of applicable considerations under factor 4.

Initially, it will be observed that no new bank or banking office will be created by the acquisition, either in New York City or Westchester County. In the cases just cited approval was denied, even though the programs there involved the creation of new banking offices and facilities. The benefits of the instant program are wholly potential and consequential.

The contributions which the acquisition will make to the area are set out most cogently in the testimony of Mr. Howard C. Sheperd, Chairman of the Board

"The effect of the proposal upon the convenience, needs and welfare of the communities and the areas concerned is likewise covered in Exhibit F and of course throughout the application in numerous other ways. The proposal would connect, through common ownership, The County Trust Company with The First National City Bank of New York and its affiliated trust company, which together supply a varied and complete market basket of banking and trust services to individuals and to large and small businesses at home and abroad, which have great diversity of resources and which have demonstrated sound, progressive and successful management. It would lead to the development of stronger banking institutions, offering of more complete and varied services and greater capacity for growth to meet future needs. It would make possible a beneficial exchange of management ideas, methods and experience, to which all three institutions would contribute substantially. It would provide additional assurance of continuing able management for The County Trust Company because of the access provided to the personnel and the training programs of The First National City Bank of New York; furthermore, we of National City are happy to acknowledge that we can learn a great deal in this area from the progressive methods of The County Trust Company. As already stated, the affiliation would facilitate the raising of additional capital for The County Trust Company to support its present position and future growth.

"Moreover, the association through the holding company would make possible more economic and efficient operation. It would make available experienced, specialized managerial talent of high quality—in such matters, for example, as investment management, investment advisory and trust service, accounting, tax service, credit investigation, and business development—over a larger volume of business. It would facilitate the

development and application of improved mechanical and electronic procedures to bank operations, in which all these institutions are engaged.

electronic procedures to bank operations, in which all these institutions are engaged.

"I submit at this point a memorandum setting forth in greater detail certain of the benefits that will accrue to customers of The County Trust Company through the proposed move. This memorandum covers eleven pages. I shall not read it but only ask that it be made a part of the record. In brief, it describes numerous services provided by The First National City Bank which can be made available to The County Trust Company through the holding company. One is the formalized small business loan program of The First National City Bank, which adapts to small business a term loan facility historically reserved for big business. Such loans, to start new enterprises and to enlarge existing organizations, are made available in amounts up to \$25,000 repayable up to periods of sixty months. We have made 150,000 such loans for a total of \$280 million, and we have accumulated invaluable experience and staff organization as a result. We have made 70,000 business loans to veterans, as provided for in the GI Bill of Rights, for more than \$150 million. In a rapidly growing and expanding community such facilities for small business are of paramount public importance. I say this of course without prejudice to the fine job that County Trust does for its small business clients. Nevertheless, there are virtues and advantages in formalized systems and the experience derived from them.

"The First National City Bank provides superior foreign services all over the world, of value to the many large and

small business clients. Nevertheless, there are virtues and advantages in formalized systems and the experience derived from them.

"The First National City Bank provides superior foreign services all over the world, of value to the many large and medium-sized corporations located in Westchester County. The holding company affiliation would make available to The County Trust Company The First National City's 196.000 credit files of foreign names, and the services of The First National City Bank's 70 branches in 24 foreign countries.

"Immediately available to The County Trust Company and its personnel would be certain additional training and educational procedures, including a two-year executive training program, a model bank training center, and other programs. These would augment or complement training programs already in effect at County Trust.

"As business grows in Westchester County, the lending capacity of its banks will become increasingly important. The holding company can enable The County Trust Company to enlarge its lending capacity in two ways, by facilitating placement of excess loans with the other subsidiaries and by assistance in providing additional capital funds as necessary. In the mortgage field the holding company could combine a large reservoir of funds available for investment with the valuable technical experience of The County Trust Company.

"For its trust service to its community, the holding company affiliation would give The County Trust Company investment research department and library, its fully equipped traders desk, its large and competent tax department, its corporate trust services, and its pension trust services.

"The economic services provided by First National City, which are of high standard and are increasingly in demand in business today, would be made available to The County Trust Company's customers.

"Extension and improvement of services, greater capacity for growth, and the other advantages above cited would all redound to the benefit of the community."

It is to be expected that benefits of such or similar character would follow to some degree from the consolidation of organization, methods and resources of two efficient institutions of this kind. On the other hand, it does not appear from the evidence, as I evaluate it, that the program is necessary to the needs or welfare of Westchester County.

The growth and increased industrialization of Westchester County in recent years has brought a need for various specialized services, such as foreign banking and foreign financing, small loans, and residential mortgage and consumer loans. These services are presently available in adequate degree and form. There is no present want or need for further banking services in Westchester County in the sense that such service is unavailable, either directly with a county bank, or through that bank's correspondent relationship with one of the larger New York City banks. In the matter of large loans for industrial enterprises, and perhaps in the field of foreign banking services, referral of some portion of such business to a correspondent bank may at times be necessary either because of loan limits of the county banks, or because of other limitations. Certain other services, now available in varying degrees, could be improved by the

adoption of specialized techniques.

The rapid growth and expansion of County Trust since 1947 has required additional capital funds, a need which may be expected to continue. Thus far County Trust has experienced no difficulty in its ability to raise capital, which has shown a consistent increase since 1947. The market for County Trust shares appears promising; their market price is almost double their book value, recent ratios being roughly \$14 book value to \$25 market value. It is perhaps reasonable to assume that the proposed affiliation will facilitate the raising of capital by County Trust when and if needed, but the affiliation does not seem essential to that result.

Other suggested advantages to The County Trust Company, and indirectly to the community, from the proposed program appear to be attributable either to the size of the FNCB and Farmers organizations or to their procedures and methods. I refer here to phases of banking activity in which FNCB and Farmers are particularly outstanding. In this category are various highly developed or specialized services or programs involving the management, knowhow, organization and machinery flowing from the necessary to the conduct of volume transactions on an efficient basis. Examples are Farmers' trust services, FNCB's foreign banking, its automation program, programs in the areas of personnel training, loans to small business, commercial and mortgage loans, administrative planning and economics research. In ministrative planning and economics research. In some of those areas The County Trust Company is itself outstanding. In none does County Trust's service seem deficient in terms of reasonable demand. No doubt a larger organization, greater specialization, and more plant would intensify concentration on detail, but whether at profitable cost or loss of organizational efficiency may be open to question. banking techniques developed out of the problems of New York City are not necessarily transferable wholesale to Westchester County. And the attainment of the anticipated advantages is to some extent counterbalanced by the risk that responsibility for the development of policies to meet local needs may be shifted to an organization with more diffused interests.

County Trust and the other county banks seem to have kept pace with the essential needs of Westchester. Their growth in the past decade is evidence of responsiveness to and anticipation of community needs. The 1956 Annual Report of County Trust discloses the establishment of a foreign department in that year, the inauguration of a training school for tellers, and the development or improvement of banking services

and administrative programs. Contrary to some suggestion in the record, County Trust offers a complete range of trust services.8

The factor which makes possible the offering of their specialized services by the New York City banks tends also in some measure to cancel out their desirability. That is the matter of the size of FNCB and

Farmers, a point treated more fully later.

Finally, the convenience, needs and welfare of the area are also affected by reason of Article III-B and other State banking regulations of bearing. As will be seen, the proposed program, in conjunction with those measures, would have an effect upon the competitive banking situation and the State system of banking. Execution of the program would set aside the public policy of the State. These results are not, of course, dispositive. If there is conflict of policy in a field where Federal authority is paramount, the State must give way. However, the consequences of subordination of State policy are among the elements affecting convenience, needs and welfare of the community and area. In that respect the effect of the proposed acquisition would be adverse.

To sum up the considerations bearing upon the fourth statutory factor: It appears that the proposed program may contribute to the convenience of the Westchester community and area; but it is not shown by clear evidence to be necessary for the needs and welfare thereof. It will make no contribution to the convenience, needs and welfare of the New York City community and area. In addition, considerations involved in factor 5 tend to diminish or cancel the weight of the convenience factor in Westchester. As in the case of Northwest Bancorporation: though the proposed acquisition may serve a useful purpose in the county, existing needs are not of a high order of intensity and the convenience and welfare of the community and area are not heavily dependent upon its consummation. Indeed, the needs and welfare of the area may be adversely affected.

We turn then to the fifth factor.

Factor 5

The basic element in factor 5 is the size or extent of the bank holding company system: It must not be beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking. The proposed program would provide "adequate" banking at least in terms of fulfilling demand; whether it would be "sound" banking may depend upon its impact on the structure of the banking systems of New York City and Westchester County. Whether the system would be consistent with the public interest involves the weighing of all relevant considerations; the provision respecting preservation of competition seems self-explanatory.

explanatory.

The size of the proposed holding company is substantial. In fact, it will be the largest bank holding

TIt is to be noted that until its expansion of capital in 1957 by the sale of an additional 2 million shares, FNCB may also have been short of capital funds or resources to meet customer needs. Thus, the 1956 combined Report to stockholders of FNCB and Farmers (p. 5) says that "Lending capacity has not been sufficient for all demands." Securities were sold to obtain funds for expanding loans, but even with that, "close control over lending policy has been necessary to assure our continuing ability to meet our customers' short-term needs . . ." Foreign operations presented the same problem. The 1956 Report says of these (p. 15): "Demand for loans at many of our overseas branches continued to exceed the available supply of funds. We see no slackening in this demand." In addition to indicating that FNCB has no capital funds to spare County Trust, these facts, along with their record of growth since 1946, would seem to suggest that the demands of their present area and operations exceed even FNCB's and Farmers' capacity.

[§] The evidence discloses consistent growth in the volume, quality, and variety of The County Trust Company's trust services. In July 1948, County Trust administered 411 trust accounts having an estimated \$8 million in assets. As of January 1957, it administered 681 trusts of various kinds, having assets of \$51.4 million. Significantly, in addition to absolute growth, those figures reveal a marked rise in the average value of the trusts administered, from approximately \$19,500 in 1948 to roughly \$75,000 in 1957; indicating that The County Trust Company is attracting larger trust accounts. The 1956 Report to stockholders reveals that one group of Investment Advisory Accounts administered averaged over \$750,000 per family.

company in the country. The accompanying table, based on data as of 30 June 1956 shows First New York Corporation's projected size in comparison with the five largest existing bank holding companies.

RELATIVE SIZE OF FIRST NEW YORK CORPORATION JUNE 30, 1956

¹ Figures are from Applicants' Exhibit 25. Comparable data in Board Exhibit 35 are in conflict. Applicants' figures are given for the reason that they were compiled and submitted some weeks after Board Exhibit 35, and presumably in response thereto.

Data relating to Marine Midland Corporation as of Dec. 31, 1955; number of banks as of Dec. 31, 1956.

Congressional concern over the concentration of banking assets and facilities in larger institutions, reduction in the number of independent banks by absorption into other units, and the effect of those occur-rences on the banking structure and on competition were major reasons for the enactment of the Bank Holding Company Act of 1956. It would seem that the establishment of the proposed holding company would profoundly affect the banking situation in Westchester County and New York City by producing a substantial concentration of banking assets. would join in one organization the dominant bank in Westchester County, the fourth largest bank in the State outside New York City, with the second largest bank in the City and State, the third largest in the nation. It would introduce a financial institution with resources of approximately \$7 billion into a banking community whose assets presently total approximately \$750 million. Based on March 1957 call figures, no conceivable combination of a New York City bank with a Westchester County bank could approach it in size except a union in some fashion of Chase-Manhattan Bank and the National Bank of Westchester. And on the present state of the law, as will be seen. such a combination is not possible so long as Chase-Manhattan remains a State bank. Indeed, if all the commercial banks in Westchester County other than The County Trust Company were to merge or join with any single bank in New York State other than ENCR or Chase-Manhattan the resulting combination. FNCB or Chase-Manhattan, the resulting combination, in terms of assets, would be less than one-half the

This is expressed in the following table of assets as of 31 December 1956, taken from data in Board Exhibits 38 and 39. On that date Manufacturers Trust

Company was the third largest bank in New York City. Figures are, in thousands of dollars:

. \$7,298,131 3,506,942

Unless overborne by specific advantage to the community in other respects, the evidence thus suggests that the proposed program would result in an undue concentration of banking resources, tend to the reduction of the number of independent banking companies in Westchester, and create conditions of potential threat to the soundness of the county banking structure and to the competitive situation.¹⁰ As the Board said in the case of Northwest Bancorpora-tion (5 November 1957):

"Bank holding companies often have the available resources, and therefore the ability, to act more quickly than a group of individuals in endeavoring to establish a new bank in an area which gives promise of supporting a successful banking operation. Such early establishment of a bank, and the acquisition of its stock by a bank holding company, may benefit the community in some respects. On the other hand such an entry into an area by a bank holding company bank may, in some circumstances, 'expand the size or extent' of the bank holding company system in such a manner or to such a degree as to have a strong tendency to preclude later entry by a bank which is not controlled by a bank holding company. It is apparent that in such a situation control of a bank by a bank holding company would run counter to the considerations stated in the fifth factor and should not be approved unless there are considerations favorable to the application that are sufficient to offset such adverse circumstances."

The applicants' position, to the contrary, is that competition among the Westchester County banks will be stimulated by improvement of County Trust banking services.

That some or all of the remaining county banks will attempt to revise their operations or services to meet the situation presented by First New York Corporation is to be expected; but they may have difficulty in meeting the challenge on competitive terms as they are presently organized. And if the program is executed, Article III-B and State and Federal branch banking laws weight the competitive situation in favor of First New York Corporation. They do this by preventing State banks from forming inter-district bank holding companies, and all banks from forming inter-district combinations by merger or by acquisition of out-district branches. Thus, under the present

The act is to be interpreted inter alia as requiring the Board to deny approval to a proposed holding company which "would not maintain competition among banks, or would fail to minimize the danger inherent in concentration of economic power through centralized control of banks." (Control & Regulation of Bank Holding Companies, Hearings before House Committee on Banking and Currency on H. R. 2674, p. 95, 84th Cong. 1st Sess. (1955).)

"The factors required to be taken into consideration by the Federal Reserve Board under this bill also require contemplation of the prevention of undue concentration of control in the banking field to the detriment of public interest and the encouragement of competition in banking." (S. Rep. 1095, p. 10. 84th Cong., 1st Sess.)

Market factors of suggested relevance in determining the competitive consequences of merger acquisitions, under Section

Market factors of suggested relevance in determining the competitive consequences of merger acquisitions, under Section 7 of the Clayton Act, are thus stated in the Report of the Attorney General's Committee to Study the Antitrust Laws (1955), p. 125 et seq.: "(1) The character [including size, etc.] of the acquiring and the acquired company, (2) the characteristics of the markets affected, (3) immediate changes in the size and competitive range of the acquiring company and in the adjustments of other companies operating in the markets directly affected, and (4) probable long range differences that the acquisition may make for companies actually or potentially operating in these markets."

Digitized for FRASER http://fraser.stlouisfed.org/ Federal Reserve Bank of St. Louis State laws, no State bank in New York City can join in a holding company with a State bank in West-chester County, or vice versa, and no bank in New York City can merge with or acquire as a branch a bank in Westchester County, or vice versa. It does not seem likely that, in circumstances where the competitive strength of a bank might be unfavorably affected thereby, Congress could have intended to make it possible for a holding company to direct a banking business even though the bank could not. So long as Article III-B and present limitations on merger and branch banking remain in force, competitive conditions in Westchester County and New York City may be adversely affected by the execution of the proposed program.¹¹

At least the problem of fashioning effective com-

At least the problem of fashioning effective competitive combinations to meet the new holding company will be unnecessarily complex. For that the effort will be made seems a foregone conclusion, both because the county banks will probably consider it necessary to survival, and because the city banks will not likely be content to be disadvantaged vis-a-vis FNCB. The evidence is that preliminary contacts have already been made by city banks with county banks with regard to such affiliation. In this respect it seems significant that the instant proposal itself appears to be a consequence of concern for its competitive position on the part of County Trust because of reputed interest of the Rockefeller family in both the National Bank of Westchester and a large New York bank—presumably Chase-Manhattan. See testimony of Mr. Andrew Wilson, pp. 139-141.

If the program is approved, no doubt succeeding ones along similar lines should be approved also, in order that competitive balance in Westchester and in New York City may be maintained. The result would

If the program is approved, no doubt succeeding ones along similar lines should be approved also, in New York City may be maintained. The result would be to duplicate in Westchester substantially the banking situation which prevails in New York City. This is not bad per se, but it presents problems affecting the public interest. The creation of conditions which, whether for reasons of rivalry or of survival, would impel affiliation of the remaining Westchester banks with larger city institutions, and perhaps adversely affect the State system of banks and regulation in the two areas could not, in my judgment, produce other than undesirable banking instability for a period of time. It is to be anticipated that this process would hasten the reduction, by absorption, of the number of independent banks in Westchester, though not necessarily the number of banking offices. This is not to say that the situation must, for the sake of stability, remain unchanged. It is merely to say that the Bank Holding Company Act was not intended to stimulate radical upheaval in the banking structure of a community.

With respect to the force of the competition it is urged that personalized services of the small bank and similar factors will tend to offset the strength of the holding company. Personal relationship can, of course, be a substantial competitive factor, and may be better preserved by a small bank—though this is by no means sure. But whatever the charm of its staff, its desire to be of service, and the prejudice of a certain segment of the public to large organizations, it seems unlikely that many of the smaller county banks could as independents compete effectively with

First New York Corporation. For the very factors in its staff which may lure the customer to the small bank—competence, personal following, friendlier service—will attract the staff to the larger bank with its greater opportunities for advancement. The result of elimination of the smaller banks, even though the result of competition, may be to lessen competition by reducing choice of available facilities. That result has no necessary relation to efficiency. As one witness commented in another connection: there may be "considerable doubt as to whether smaller competing banks in the County will have long range opportunity to do business profitably; whether they will have unfettered opportunity for growth and expansion; whether new banks will be able to enter into business without undue handicap; and whether new capital will find such new banks an attractive investment." Additional considerations are urged on behalf of

the Applicants against the conclusion that the size of the proposed holding company or the concentration of assets militates against approval, or the conclusion that competition will be adversely affected. Thus, in respect to size, it is pointed out that FNCB is alone larger than any existing bank holding company in terms of deposits, and that the acquisition of County Trust adds only slightly more than 5 per cent to the resources of FNCB and Farmers. In percentage terms First New York Corporation would have about 20 per cent of the total commercial banking deposits and about 17 per cent of the commercial banking offices in the combined New York City-Westchester area, and about 16 per cent of commercial deposits or resources in New York State. It is pointed out that other bank holding companies have higher percentages of deposits or cover larger geographic areas. It is not clear, however, that the situations in such cases are comparable with First New York Corporation's in respect to such relevant factors as character of communities, services required, and applicable State legislation.

The power of the holding company would seem to be accentuated, not diminished, by its concentration in the smaller area. And the percentages have their definitely adverse side. For the minimal per cent addition to the resources of the city banks merely reflects their already substantial size. Thus, if FNCB and Farmers acquired all the commercial banks in upstate New York, their assets would be increased less than 95 per cent. And if viewed from the standpoint of addition to the resources of County Trust, the program would increase those over 1,700 per cent.

For however apt comparisons, primary consideration must be given to the effect in Westchester County. There the program increases the relative size of the acquiring enterprise to the point where, perhaps, "its advantage over its competitors threatens to be decisive." (Celler-Kefauver Amendment to Section 7 of the Clayton Act, H. Rep. 1191, p. 8, 81st Cong. 1st Sess.). On this score the apprehension of The County Trust Company over the possibility of a competitive combination between another major New York City bank and the National Bank of Westchester appears to speak with more force as to the probable impact of the program than any amount of argument or speculation.

Elimination of competition. Execution of the program will also tend to eliminate competition between

¹¹ These restrictions may be revised in the near future by the State legislature, now in session. But such developments must remain speculative. The determination here must be made on the basis of the law as it exists, without the comforting assurance of second sight.

¹² Banks such as the National Bank of Westchester and the First National Bank of Mt. Vernon could no doubt (as their presidents testified they felt they could) be able to compete with First New York Corporation. either independently or as part of a combine. These, however, are not small banks.

Westchester County banks and city banks. About 6 per cent of the fiduciary accounts—in dollars a sub-stantial figure—of Farmers originates in Westchester That competition may be expected to be County. eliminated by the proposed program, as well as potential competition which County Trust could be expected to provide by continued improvement of its trust services. The reduction of competition would, however, be greater than that. As of July 1956 more than half as many employed Westchester residents were employed outside the county, mainly in New York City, as were employed within the county. At the same time at least 10 per cent of the locally employed persons were nonresidents of the county. This is shown in the following table:

County residents employed in the county	204,000
commuters) Nonresidents employed in the county (in-commuters)	106,000 23,000
Total employment in county	227,000

It is thus seen that a majority of the county labor force possibly has regular access to banking facilities both in New York City and in Westchester County. To such persons, as well as to large-scale industrial and business establishments, the two areas offer alternative sources of banking service. Under such circumstances the banking systems of the two communities are in competition. The Applicants estimate that the percentage of FNCB domestic depositors originating in Westchester is less than one per cent; the deposits of County Trust originating in New York City less than 3 per cent. One per cent of FNCB's domestic deposits would be over \$20 million: more than 5 per cent of County Trust's total deposits. Three per cent of County Trust's deposits would be approximately \$10 million. These are not insubstantial amounts. Statistics in evidence indicating greater percentage of overlap in an FNCB branch nearest Westchester appear too fragmentary to be meaningful.

However, a minimal number of nonresident depositors would not necessarily indicate an absence of competition. As an official of the New York Federal Reserve Bank observed, "I look at competition as the customer's choice of available facilities." An absence of nonresident depositors, borrowers, or customers probably indicates no more than that persons with a choice find their home facilities satisfactory. perhaps is as accurate a gauge as any for measuring the adequacy of Westchester banking facilities. a substantial number of persons employed in Westchester County have access to either the city or the county banks, and thus have a choice between them, I am of the opinion that there is effective competition between the city and county banks for the business of such individuals. The entry of First New York Corporation into Westchester County will tend to eliminate the choice which such persons now have, or may in the future have, between the banking services of FNCB and Farmers on the one hand, and the services of The County Trust Company on the other. In addition, the program will probably eliminate FNCB as an actual or potential correspondent for any of the other Westchester banks. These deprivations of choice result in a substantial lessening of competition, and in some respects a reduction in available banking service.1

Marine Midland Trust Company. It is pointed out that Marine Midland Corporation has operated as a bank holding company in New York State for many years. As of 30 June 1956 it had 149 or 150 14 banking offices, and deposits in excess of \$1,700 million. It is urged, and rightly, that the situation should not be frozen so as to give an undue advantage to Marine Midland Corporation. Among other holdings, Marine Midland operates a bank in Rockland County, across the Hudson from, and in the same district as, West-chester, and another in New York City. The record does not indicate that the Rockland bank is competitive with the Westchester banks, and presumably it is not. An attempt on the part of The County Trust Company to cross the Hudson River into Rockland County was prevented by the State Banking Department.

Since it does not appear that Marine Midland Corporation is an effective competitor in Westchester County, other than the generalized competition for Westchester business in New York City which it shares with FNCB and Farmers by reason of being a city bank, the whole group of which makes banking services available to Westchester out-commuters, the establishment of First New York Corporation is not necessary to enable FNCB and Farmers to compete with Marine Midland in Westchester or in New York City. Marine Midland should not, of course, because of the accident of prior birth, have a preferred, exclusive, or advantageous position in any area in which it operates. But denial of the applications here would not tend to perpetuate that position, nor would granting of them tend to further competition between existing banks and Marine Midland Corporation.

Foreign banking assets. FNCB is a large-scale banker on a national and international level. It is said that the portion of FNCB's deposits involved in that phase of its operations (roughly two-thirds of total deposits) should not be counted in determining FNCB's size, since only the residue (about \$2 billion) is available for use in the local portion of its activities and hence cannot be of any effect in Westchester.

Such an approach cuts two ways. If valid, it not merely minimizes the impact of First New York Corporation on the Westchester banking structure; it also tends to cancel out any prospect that those resources will be available, directly or indirectly, to support the capital position or loan capacity of The County Trust Company. The advantages to County Trust and, indirectly the public, from the program are then reduced substantially to providing The County Trust Company with the managerial know-how and peripheral skills of FNCB and Farmers.

LAHIDIT 33 as 149.

15 As one witness, favoring the program, put it, after observing that national or international deposits of First National City were already committed, and thus not available to The County Trust Company:

"What The County Trust Company, it seems to me, will gain in additional resources are resources of experience and knowledge, skill, availability to execute training programs, college recruitment training programs, the combination of resources which can be spent and will be spent in experimentation with electronics, and new and more efficient ways of doing the banking business, rather than dollars and cents resources"

¹³ That, as is said, Westchester County "has become increasingly a continuous and integral part of the natural trade and population area of Metropolitan New York", and that the city and the outlying counties are today "parts of an integrated economic unit" trade, social and business-wise, seems to imply an existing competitive situation. At the very least, if the development trend continues, the city and county banks are potential competitors in the ultimate competitive area.

14 Information in the record is in conflict as to the number of offices. Applicants' Exhibit 25 gives it as 150, Board Exhibit 35 as 149.

LAW DEPARTMENT 929

The Applicants, in expressing the same idea, refer to the gains as "not . . . monetary resources . . . but . . . intangible benefits of experience, knowledge, and skill."

See also footnote 7, p. 925, as to commitment of resources of FNCB.

Important as those accomplishments are, they do not appear to be a substantial enough gain to warrant recommending approval of the program in the face of other and adverse factors.

Conclusions

The conclusions which I draw may be summarized as follows: Under the present circumstances approval of the proposed program would contribute in a measure to the convenience of the community and area of Westchester County, but the anticipated benefits are not required for its needs and welfare. With existing relationships the Westchester banks are capable of providing and do provide adequate and constantly improving banking service commensurate with com-munity needs and demand. The benefits to be derived from the proposed program are mainly of intangible service character flowing from management or referral factors. No new banking outlets or offices in Westchester County will be provided; no new services or programs are contemplated. In general the option or programs are contemplated. In general the anticipated benefits result from improvement or extension of existing services or programs; gains which, to the extent justified, seem expectable in the normal course of development of Westchester banking organization. Effective competition presently exists between the county banks. This has resulted in the growth of county banking services as rapidly as needs and pru-dence justify. In these circumstances the proposed program may result in such alteration of evolutionary of the nature and weight of the gains to be realized.

The program, by combining the dominant banking

The program, by combining the dominant banking system in Westchester County with one of the largest banking systems in the nation, establishes in Westchester County a financial organization of such relative size as perhaps to give it decisive advantage over competitors; may result in an undue concentration of banking assets and control; may induce unnecessary dislocation in the existing banking structure

of the county—and thus unsound banking; may unduly and substantially lessen competition between city and county banks; and may result in undue reduction of the number of independent banks in the county with consequent reduction in the number of competing banking organizations.

In addition, in the existing circumstances, approval may tend to prejudice State regulation unduly and to impair legislative policies governing State banks.

On balance, the prospective and possible benefits of the program do not outweight its prospective and possible disadvantages. It is concluded that the program is not required for the needs and welfare of the community and area, and further, that the effect of the proposed acquisition may be to expand the size or extent of the holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking. Under these circumstances the Applicants have not sustained the burden of establishing that the public interest will be furthered by granting approval of the applications.

These conclusions being based upon the existing situation, changes in that situation, such as in the present banking structure in the county, or in applicable law, may warrant approval of the program at an appropriate time in the future. As of the present moment, however, approval seems inappropriate. It will consequently be recommended that the Board not approve the applications.

Recommendation

In accordance with the foregoing findings and conclusions it is recommended that the Board of Governors of the Federal Reserve System enter an order denying the applications of First New York Corporation, The First National City Bank of New York, and International Banking Corporation for prior approval of action to become bank holding companies under Section 3 of the Bank Holding Company Act of 1956.

Dated at Washington, D. C., this 20th day of February 1958.

(Signed) CHARLES W. SCHNEIDER, Hearing Examiner.

Current Events and Announcements

FEDERAL RESERVE MEETINGS

Meetings of the Federal Open Market Committee were held in Washington on July 29 and August 19, 1958.

INCREASE IN MARGIN REQUIREMENTS

On August 4, 1958, the Board of Governors of the Federal Reserve System amended Regulations T and U, relating respectively to margin requirements of brokers and banks, by increasing margin requirements from 50 per cent to 70 per cent, effective August 5, 1958. The increased requirements apply to both purchases and short sales. No other change was made in the regulations.

INCREASE IN FEDERAL RESERVE DISCOUNT RATE

On August 14, 1958, the Board of Governors of the Federal Reserve System approved action by the directors of the Federal Reserve Bank of San Francisco increasing the discount rate at that Bank to 2 per cent, effective Friday, August 15, 1958. The rate previously in effect at that Bank was 134 per cent.

APPOINTMENTS OF DIRECTORS

On July 11, 1958, the Federal Reserve Bank of Atlanta appointed Mr. R. J. Murphy a director of its Birmingham Branch for the unexpired portion of a term ending December 31, 1959. Mr. Murphy is Vice President of the Citizens-Farmers & Merchants Bank, Brewton, Alabama. As Branch director he succeeds Mr. John R. Downing, Executive Vice President, Citizens-Farmers & Merchants Bank, Brewton, Alabama, who died recently.

The Board of Governors on August 11, 1958, announced the appointment of Mr. John H. Warden, of Houghton, Michigan, as a Class C director of the Federal Reserve Bank of Minneapolis for the unexpired portion of the term ending December 31, 1958. Mr. Warden is President of the Upper Peninsula Power Company, Houghton, Michigan. As a director of the Minneapolis Bank he succeeds Mr. F. Albee Flodin, President and General Manager of Lake Shore, Inc., Iron Mountain, Michigan, who died recently.

CHANGES IN BOARD'S STAFF

Mr. S. R. Carpenter, Secretary of the Board of Governors since July 1, 1945, resigned on July 31, 1958, in order to become President of the Central States Mission, Church of Jesus Christ of the Latter-day Saints, in which capacity he will be in charge of Church activities in Oklahoma, Kansas, Missouri, Arkansas, and part of Illinois. Mr. Carpenter joined the Board's organization in 1926, and was an Assistant Secretary of the Board for twelve years prior to his appointment as Secretary.

The Board has appointed Mr. Merritt Sherman to succeed Mr. Carpenter as Secretary, effective upon his return in October from a European assignment. Mr. Sherman, who is an Assistant Secretary of the Board, was employed by the Federal Reserve Bank of San Francisco in 1926, and was Assistant Cashier of the Bank at the time he joined the Board's staff as Assistant Secretary in 1946.

ADMISSIONS OF STATE BANKS TO MEMBERSHIP IN THE FEDERAL RESERVE SYSTEM

The following State banks were admitted to membership in the Federal Reserve System during the period June 16, 1958 to July 15, 1958:

New Jersey

Paterson County Bank and Trust Company Virginia

Danville Schoolfield Bank & Trust Company

National Summary of Business Conditions

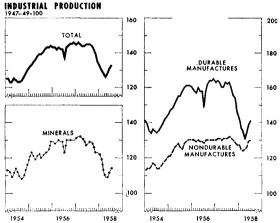

Released for publication August 15

Recovery in industrial production continued in July and construction activity and private housing starts rose further. Nonfarm employment and personal income also increased further and retail sales were maintained. From early July to early August, prices of industrial materials advanced but prices of farm products declined. While loans to business declined, total bank credit increased further. Yields on Government securities and corporate bonds rose while common stock prices reached new highs for this year.

INDUSTRIAL PRODUCTION

The Board's seasonally adjusted index of industrial production rose in July to 133 per cent of the 1947-49 average, two points above the revised June level. The July rate was 6 per cent above the April low and 8 per cent below a year ago.

Increases were widespread among durable goods industries in July. Activity in producers' equipment lines—still sharply below the 1957 peaks—increased for the second month. Output of television and furniture advanced further, and the recovery in construction materials continued. Auto and truck assemblies were maintained and current schedules for August indicate little change, after allowance for early model-changeover curtailments. Steel mill operations increased steadily

Federal Reserve indexes, seasonally adjusted. Monthly figures, latest shown are for July.

after the vacation period in early July, and in early August were 100 per cent of the 1947-49 average, one-fourth above the April low.

Gains were general among nondurable goods industries in July. The most pronounced recovery in recent months has occurred in textiles, apparel, rubber and leather products. Output of minerals picked up somewhat further in July as crude oil production increased and coal and metal mining changed little.

Construction

Private housing starts rose again in July to a seasonally adjusted annual rate of nearly 1.2 million units, 14 per cent above a year earlier. Total construction outlays also advanced, reflecting mainly a further rise in residential construction. Expenditures for industrial plants continued to decline, and outlays for commercial and public utility building showed little change.

EMPLOYMENT

Seasonally adjusted nonfarm employment rose to 50.4 million in July, 400,000 above the April low. In manufacturing, employment increased somewhat further and the average workweek, which usually declines in July, remained at the improved level of June. Average weekly earnings increased, reflecting mainly a one-cent rise in hourly earnings to a level 3 per cent above a year ago. On a seasonally adjusted basis the rate of unemployment, at 7.3 per cent of the civilian labor force, has changed little from the high reached in April.

DISTRIBUTION

Seasonally adjusted retail sales in July remained at the improved level of the previous three months and were 3 per cent below the record of last summer. Sales at department stores increased sharply, to 140 per cent of the 1947-49 average compared with 133 in June and the record high of 144 last August; sales advanced further in early August. Stocks at department stores continued to increase in June, but were 3 per cent under a year ago.

AGRICULTURE

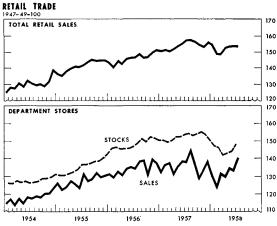

Gains in yield prospects during July indicate the largest crop in history, with record harvests in prospect for grains, already in surplus supply, and for oil crops. The official forecast as of August 1 was for production 13 per cent above the 1947-49 average and 7 per cent above last year. As in 1957, 28 million acres of cropland are in the Soil Bank and acreage for harvest is the smallest since the drought years of the thirties.

COMMODITY PRICES

The wholesale commodity price index changed little from early July to early August. Average prices of industrial commodities increased further, however, as steel, copper, aluminum, scrap metals, rubber, lumber, and petroleum products advanced. Prices of farm products declined, reflecting mainly decreases in livestock.

BANK CREDIT AND RESERVES

Total loans and investments at city banks increased \$950 million during the four weeks ending August 6. Holdings of U. S. Government securities rose \$1.8 billion, reflecting bank purchases of new Treasury tax anticipation certificates in early August. Total loans declined about \$1 billion, owing mainly to reductions in business and security loans following the June expansion.

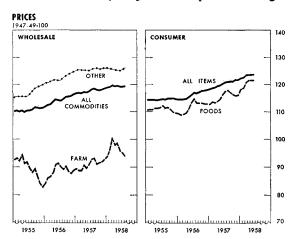

Federal Reserve indexes, seasonally adjusted; retail sales based on Department of Commerce data. Monthly figures; latest shown for department store stocks is June, for other series. July.

Member bank borrowings from the Federal Reserve averaged about \$135 million and excess reserves about \$670 million over the four weeks ending August 13. Between mid-July and mid-August reserves were supplied principally through Federal Reserve purchases of U. S. Government securities and currency inflows. Gold outflow absorbed a smaller amount of reserves than in past months. Required reserves increased substantially in early August as deposits grew in connection with Treasury financing.

SECURITY MARKETS

Yields on U. S. Government securities and on corporate and State and local government bonds showed marked advances from mid-July to mid-August. The yield on long-term Treasury bonds rose to over 3.60 per cent, about one-half percentage point above the 1958 low, and the Treasury bill rate rose to more than 1½ per cent. On August 14, the discount rate was raised from 1¾ per cent to 2 per cent at the Federal Reserve Bank of San Francisco.

In late July the Treasury refunded over \$16 billion of securities with a 15% per cent certificate and sold \$3.5 billion of tax anticipation certificates for cash. Although the Federal Reserve System bought \$1.2 billion of the securities involved in the refunding, cash redemptions amounted to nearly 30 per cent of public holdings.

Bureau of Labor Statistics indexes. "Other" wholesale prices exclude processed foods, included in total but not shown separately. Monthly figures, latest shown: June for consumer prices, and August estimates for wholesale prices.

Tables on the following pages include the principal statistics of current significance relating to financial and business developments in the United States. The data relating to Federal Reserve Banks, member banks of the Federal Reserve System, and department store trade, and the consumer credit estimates are derived from regular reports made to the Board; production indexes are compiled by the Board on the basis

of material collected by other agencies; figures for gold stock, currency in circulation, Federal finance, and Federal credit agencies are obtained from Treasury statements; the remaining data are obtained largely from other sources. Back figures for 1941 and prior years for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, Banking and Monetary Statistics.

P Preliminary.
 Averages of daily closing figures for reserves and borrowings and of daily opening figures for other items, inasmuch as reserves required are based on deposits at opening of business.
 Weekly figures of required, excess, and free reserves of all member

banks and of country banks are estimates.

³ Demand deposits subject to reserve requirements, i.e., gross demand deposits minus cash items reported as in process of collection and demand balances due from domestic banks.

⁴ Free reserves are excess reserves less borrowings.

MARGIN REQUIREMENTS¹

[Per cent of market value]

Prescribed in accordance with Securities Exchange Act of 1934	Apr. 23, 1955- Jan. 15, 1958	Jan. 16, 1958- Aug. 4, 1958	Effective Aug. 5, 1958
Regulation T: For extensions of credit by brokers and dealers on listed securities. For short sales. Regulation U: For loans by banks on stocks.	70	50	70
	70	50	70
	70	50	70

¹ Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of extension; margin requirements are the difference between the market value (100%) and the maximum control of the con mum loan value.

In effect Aug. 1, 1958	18	161/2			
Present legal requirements: Minimum	13 26	10 20	7 14	3 6	3 6

¹ Demand deposits subject to reserve requirements which, beginning Aug. 23, 1935, have been total demand deposits minus cash items in process of collection and demand balances due from domestic banks (also minus war loan and Series E bond accounts during the period Apr. 13, 1943-June 30, 1947).

* First-of-month or midmonth dates are changes at country banks, and other dates (usually Thurs.) are at central reserve or reserve city banks.

¹ Under Secs. 13 and 13a, as described in table above.

* Preferential rate for advances secured by Govt. securities maturing or callable in 1 year or less in effect during the period Oct. 30, 1942–Apr. 24, 1946. The rate of 1 per cent was continued for discounts of and advances secured by eligible paper.

Note.—Repurchase rate on U. S. Govt. securities. In 1955, 1956, and 1957 this rate was the same as the discount rate except in the following periods (rates in percentages): 1955—May 4-6, 1.65; Aug. 4, 1.85; Sept. 1-2, 2.10; Sept. 8, 2.15; Nov. 10, 2.375; and 1956—Aug. 24-29, 2.75; 1957—Aug. 22, 3.50.

 ¹ Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.
 ² Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.
 ³ Not covered by Federal Reserve Bank commitment to purchase or discount.

Note.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹ Loans made by private financing institutions and guaranteed by Government procurement agencies, pursuant to the Defense Production Act of 1950. Federal Reserve Banks act as fiscal agents of the guaranteeing agencies in these transactions, and the procedure is governed by Regulation V of the Board of Governors.

Note.—The difference between guaranteed loans authorized and sum of loans outstanding and additional amounts available to borrowers under guarantee agreements outstanding represents amounts repaid, guarantees authorized but not completed, and authorizations expired or withdrawn.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS1

[In effect July 31. Per cent per annum]

	comm	strial or ercial	To financing institutions					
Federal Reserve Bank	Busin	esses	On disco purch	On commit-				
Bank	On loans ²	On commit- ments	Portion for which institution is obligated rion

1 Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above; totals for Wednesday dates, in table on p. 936.

2 Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.

3 To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.

4 Less than \$500,000.

5 Because some of the types of currency shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See Note for explanation of duplications. Note.—There are maintained in the Treasury—(1) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (2) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on

receipt); (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (4) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such sold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Each Federal Reserve Bank must maintain a reserve in gold certificates of at least 25 per cent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve agents as collateral, and those deposited with the Treasury of the United States as a redemption fund, are counted as reserve. Gold certificates, as herein used, includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

Note.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in other securities and in capital and miscellaneous accounts, net, and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against capital and miscellaneous accounts, net, instead of against U. S. Govt. deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes foreign bank deposits, net, and Treasury cash. Except on call dates, figures are rounded to nearest \$100 million and may not add to the totals.

P Preliminary.

1 Represents all commercial and savings banks, Federal Reserve Banks, Postal Savings System, and Treasury currency funds (the gold account, Treasury currency account, and Exchange Stabilization Fund).

2 Excludes interbank time deposits; U. S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.

3 Prior to June 30, 1947, includes a small amount of demand deposits.

4 Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.

5 Seasonally adjusted series begin in 1947 and are available only for last Wednesday of the month. For back figures, see BULLETIN for July 1957, pp. 828-29.

P Preliminary.

1 All banks in the United States. All banks comprise all commercial banks and all mutual savings banks. All commercial banks (comprise all nonmember commercial banks and all member banks (including (1) one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively, and (2) a noninsured non-deposit trust company, but excluding three mutual savings banks that became members in 1941). Stock savings banks and nondeposit trust companies are included with commercial banks. Number of banks includes a few noninsured banks for which asset and liability data are not

available. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers,

etc.

2 Beginning June 30, 1942, excludes reciprocal balances, which on Dec. 31, 1942, aggregated \$513 million at all member banks and \$525 million at all insured commercial banks.

3 Includes other assets and liabilities not shown separately. For other notes see following two pages.

PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF ALL BANKS, BY CLASSES!-Continued

[Figures partly estimated except on call dates. Amounts in millions of dollars]

⁴ Beginning with Dec. 31, 1947, the all-bank series was revised as announced in November 1947 by the Federal bank supervisory agencies. At that time a net of 115 noninsured nonmember commercial banks with total loans and investments of about \$110 million was added, and 8 banks with total loans and investments of \$34 million were transferred

from noninsured mutual savings to nonmember commercial banks.

5 Less than \$5 million. Because preliminary data are rounded to the nearest \$10 million no amount is shown except on call dates.

For other notes see preceding and opposite pages,

cluded in member banks but are *not* included in all insured commercial banks or all commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

For other notes see opposite page.

^e Estimated.

¹ All commercial banks in the United States. These figures exclude data for banks in U. S. possessions except for one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively. During 1941 three mutual savings banks became members of the Federal Reserve System; these banks are in-

² Beginning June 30, 1948, figures for various loan items are shown gross (i.e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown net.

³ Breakdowns of loan, investment, and deposit classifications are not available prior to 1947; summary figures for earlier dates appear in the preceding table.

<sup>Central reserve city banks.
Beginning June 30, 1942, excludes reciprocal bank balances, which on Dec. 31, 1942, aggregated \$513 million at all member banks and \$525 million at all insured commercial banks.
Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.
For other notes see opposite page.</sup>

Monthly and weekly yields are averages of daily figures for U. S. Govt. and corporate bonds. Yields of State and local govt. general obligations are based on Thursday figures; and of preferred stocks, on Wednesday figures. Figures for common stocks are as of the end of the period, except for annual averages.
 Series is based on bonds maturing or callable in 10 years or more.
 Moody's Investors Service. State and local govt. bonds include general obligations only.
 Includes bonds rated Aa and A, data for which are not shown sepa-

rately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat.

Standard and Poor's Corporation. Preferred stock ratio is based on 8 median yields in a sample of noncallable issues—12 industrial and 2 public utility. For common stocks, the dividend/price and the earnings/price ratios are now computed for the 500 stocks in the price index, but figures prior to mid-1957 are based on the 90 stocks formerly included in the daily price index.

¹ Ledger balances of member firms of the New York Stock Exchange carrying margin accounts, as reported to the Exchange. Customers' debit and free credit balances exclude balances maintained with the reporting firm by other member firms of national securities exchanges and balances of the reporting firm and of general partners of the reporting firm. Balances are net for each customer—i. e., all accounts of one customer are consolidated. Money borrowed includes borrowings from banks and from other lenders except member firms of national securities exchanges. Data are as of the end of the month, except money borrowed, which is as of the last Wednesday of the month beginning June 1955.

² Prices derived from average market yields in preceding table on basis of an assumed 3 per cent, 20-year bond.

³ Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent, 20-year bond.

⁴ Average daily volume of trading in stocks on the New York Stock Exchange for a 5½-hour trading day.

² Figures are for last Wednesday of month for weekly reporting member banks, which account for about 70 per cent of all loans for this purpose. Column 5 includes some loans for purchasing or carrying U. S. Govt. securities (such loans are reported separately only by New York and Chicago banks). On June 30, 1956, reporting banks outside New York and Chicago held \$51 million of such loans. On the same date insured commercial banks not reporting weekly held loans of \$28 million for purchasing and carrying U. S. Govt. securities and of \$384 million for other securities. Noninsured banks had \$33 million of such loans, probably mostly for purchasing or carrying other securities.

¹ Figures are for all savings and loan associations in the United States. Data beginning 1950 are based on monthly reports of insured associations and annual reports of noninsured associations. Data prior to 1950 are based entirely on annual reports.

² Includes gross mortgages with no deduction for mortgage pledged

³ These represent annual statement asset values, with bonds carried on an amortized basis and stocks at end-of-year market value.

⁴ These represent book value of ledger assets. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately, but are included, in total, in "Other assets."

³ Beginning January 1958, no deduction is made for mortgage pledged shares. These have declined consistently in recent years and amounted to \$34 million at the end of 1957.

⁴ Includes other loans, stock in the Federal home loan banks and other investments, real estate owned and sold on contract, and office buildings and fixtures.

and fixtures.

Note.—Data for 1957 and 1958 are preliminary.

Note.—Statistics beginning Mar. 31, 1956, reflect the expanded coverage and the new classification of agencies now reported in the Treasury Bulletin. The revised statement includes a larger number of agencies, and their activities are classified according to the type of fund they represent. Funds are combined in the table above, but are shown separately in the table on the following page. Classifications by supervisory authorities are those in existence currently. Where current Treasury compilations do not provide a detailed breakdown of loans, these items have been classified by Federal Reserve on basis of information about the type of lending activity involved.

* Totals reflect exclusion of agencies reporting other than quarterly. I Figures for trust revolving funds include interagency items. For all types of funds combined, loans by purpose and agency are shown on a gross basis; total loans and all other assets, on a net basis, i.e., after reserve for losses.

2 Coverage changed from preceding period (see also NOTE).

and through 1952 are based in part on information not shown in Treasury compilation.

6 Figure derived by Federal Reserve.

7 Includes investment of the Agricultural marketing revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset.

8 Includes \$1,000 million due under the agreement with Germany signed Feb. 27, 1953, and lend-lease and surplus property balances due the United States in the principal amount of \$1,966 million.

³ Effective Jan. 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (70 Stat. 659). Thereafter operations of the banks are classified as trust revolving transactions.

⁴ Less than \$500,000.

⁵ Figures represent largely the Treasury loan to the United Kingdom, and through 1952 are based in part on information not shown in Treasury compilation.

^c Corrected. ^p Preliminary.

¹ Consists primarily of interest payments by Treasury to trust accounts and to Treasury by Govt. agencies, transfers to trust accounts representing Budget expenditures, and payroll deductions for Federal employees retirement funds.

² Small adjustments to arrive at this total are not shown separately.

³ Consists primarily of (1) intra-Governmental transactions as described in note 1, (2) net accruals over payments of interest on savings

^c Corrected.

n.a. Not available.

Beginning February 1957, includes transfers to Federal disability insurance trust fund.

Represents the sum of taxes for old-age insurance, railroad retirement, and unemployment insurance.

For more details, see the 1959 Budget document, pp. 890-96 and pp. 954-55 and the Treasury Bulletin, Table 3 of section on Budget receipts and expenditures.

⁴ Includes stockpiling and defense production expansion not shown

[•] Includes stockpling and detense production expansion not shown separately.

5 Periodic revisions of Treasury statement data for fiscal years given without corresponding monthly revisions; consequently monthly and semiannual data may not add to totals.

6 Derived by subtracting totals for July-December from totals for fiscal

¹ Estimates of new issues maturing in more than one year sold for cash in the United States,
2 Gross proceeds are derived by multiplying principal amounts or number of units by offering price.
3 Includes guaranteed issues.
4 Issues not guaranteed.
5 Represents foreign governments, International Bank for Reconstruction and Development, and domestic eleemosynary and other nonprofit organizations.

⁶ Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.

7 Represents proceeds for plant and equipment and working capital.

8 Represents proceeds for the retirement of mortgages and bank debt with original maturities of more than one year. Proceeds for retirement of short-term bank debt are included under the uses for which the bank debt was incurred.

9 Less than \$500,000.

10 Represents all issues other than those for retirement of securities.

¹⁰ Represents all issues other than those for retirement of securities.

¹ Includes 26 companies in groups not shown separately, as follows: textile mill products (10); paper and allied products (15); miscellaneous (1). ² Includes 25 companies in groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

quarterly figures on operating revenue and profits before taxes are partly estimated by the Federal Reserve to include affiliated nonelectric opera-

estimated by the Federal Reserve to include affiliated nonelectric operations.

Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For detailed description of series, see pp. 662-66 of the BULLETIN for June 1949 (manufacturing); pp. 215-17 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power).

NOTE.—Manufacturing corporations. Sales data are obtained from the Securities and Exchange Commission; other data from published company reports.

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that

¹ Reflects cash transactions only. As contrasted with data shown on p. 962, new issues exclude foreign and include offerings of open-end investment companies, sales of securities held by affiliated companies or RFC, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose shown on p. 962.

P Preliminary.
 Derived figures, which include negligible amount of farm loans held by savings and loan associations.
 Derived figures, which include debt held by Federal land banks and Farmers Home Administration.
 NOTE.—Figures for first three quarters of each year are Federal Reserve estimates. Financial institutions represent commercial banks (including nondeposit trust companies but not trust departments), mutual savings banks, life insurance companies, and savings and loan associations.

Federal agencies represent HOLC, FNMA, and VA (the bulk of the amounts through 1948 held by HOLC, since then by FNMA). Other Federal agencies (amounts small and separate data not readily available currently) are included with individuals and others.

Sources.—Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, Institute of Life Insurance, Departments of Agriculture and Commerce, Federal National Mortgage Association, Veterans Administration, Comptroller of the Currency, and Federal Reserve.

Preliminary.

based on Federal Reserve preliminary tabulation of a revised series of banking statistics. March and September figures are Federal Reserve estimates based in part on data from National Association of Mutual Savings Banks.

Sources.—All-bank series prepared by Federal Deposit Insurance Corporation from data supplied by Federal and State bank supervisory agencies, Comptroller of the Currency, and Federal Reserve.

Preliminary.
 Represents all banks in the United States and possessions.
 Includes loans held by nondeposit trust companies but excludes holdings of trust departments of commercial banks. March and September figures are Federal Reserve estimates based on data from Member Bank Call Report and from weekly reporting member banks.
 Figures for 1941 and 1945, except for the grand total, are estimates

Note.—For loans acquired, the monthly figures may not add to annual totals, and for loans outstanding, the end-of-December figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset

values, and because data for year-end adjustments are more complete. Source.—Institute of Life Insurance; end-of-year figures are from Life Insurance Fact Book, and end-of-month figures from the Tally of Life Insurance Statistics and Life Insurance News Data.

1 Monthly figures do not reflect mortgage amendments included in annual totals.
2 These loans are not ordinarily secured by mortgages.
3 Includes a small amount of alteration and repair loans, not shown separately; only such loans in amounts of more than \$1,000 need be secured.

Note.—FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amount of loans closed. Figures do not take account of principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

Sources.-Federal Housing Administration and Veterans Administration.

¹ Represents all consumer instalment credit extended for the purpose of purchasing automobiles and other consumer goods, whether held by retail outlets or financial institutions. Includes credit on purchases by individuals of automobiles or other consumer goods that may be used in part for business.

² Represents repair and modernization loans held by financial institutions; holdings of retail outlets are included in other consumer goods paper.

Note.—Monthly figures for the period December 1939 through 1947, and a general description of the series are shown on pp. 336-54 of the BULLETIN for April 1953; monthly figures for 1948-56, in the BULLETINS for October 1956, pp. 1035-42, and December 1957, pp. 1420-22. A detailed description of the methods used to derive the estimates may be obtained from Division of Research and Statistics.

 $^{^{1}\,\}mathrm{Obtained}$ by subtracting instalment credit repaid from instalment credit extended.

in the BULLETIN for January 1954, pp. 9-17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

Note.—Monthly figures for 1940-54 are shown on pp. 1043-54 of the Bulletin for October 1956; for 1955-56, in the Bulletin for December 1957, pp. 1420-22.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown

¹ Data on extensions and repayments have been adjusted to avoid duplications resulting from large transfers of other consumer goods paper. As a result, the differences between extensions and repayments for some types of holders do not equal the changes in outstanding credit.

² Obtained by subtracting instalment credit repaid from instalment credit extended, except as indicated in note 1.

Note.—Monthly figures for 1940-54 are shown on pp. 1043-54 of the Bulletin for October 1956; for 1955-56, in the Bulletin for December 1957, pp. 1420-22.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown in the BULLETIN for January 1954, pp. 9-17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

Estimated. Preliminary.

^{*} Average per working day.

Average per working day.

Indexes beginning 1956 are based on data for 48 States from F. W. Dodge Corporation, 1956-57=100. Figures for earlier years are three-month moving averages, based on data for 37 States east of the Rocky Mountains, 1947-49=100; the data for 1956 on this basis were: Total, 268; Residential, 271; and all other, 266. A description of the old index, including seasonal adjustments, may be obtained from the Division of Research and Statistics.

² The indexes of employment and payrolls, wholesale commodity prices, and consumer prices are compiled by the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces. The figures on employment and payrolls incorporate revisions to first-quarter 1957 Benchmark levels. The consumer price index is the revised series, reflecting, beginning January 1953, the inclusion of some new series and revised weights; prior to January 1953, indexes are based on the "interim adjusted" and "old" indexes converted to the base 1947–49= 100.

Norz.—A number of groups and subgroups include individual series not published separately, and metal fabricating contains the ordnance group in addition to the groups shown. Certain types of combat materiel

are included in major group totals but not in individual indexes for autos, farm machinery, and some other products, as discussed in the BULLETIN for December 1953, pp. 1269-71.

For description and back figures, see BULLETIN for December 1953 pp. 1247-93 and pp. 1298-1328, respectively.

Preliminary.
 Revised.
 Represents units started under commitments of FHA or VA to insure or guarantee the mortgage.
 VA figures after June 1950 and all FHA

figures are based on filed office reports of first compliance inspections; earlier VA figures are estimates based on loans-closed information.

¹ Includes self-employed, unpaid family, and domestic service workers.

² Beginning 1957 persons waiting to start new wage and salary jobs and those on temporary layoff, previously considered as employed (with a job but not at work), are classified as unemployed, and a small group in school and waiting to start new jobs (previously included as employed) are classified as not in the labor force.

NOTE.—Information relating to persons 14 years of age and over is obtained through interviews of households on a sample basis. Monthly data relate to the calendar week that contains the 12th day; annual data are averages of monthly figures.

Note.—Data include all full- and part-time employees who worked during, or received pay for, the pay period ending nearest the 15th of the month. Proprietors, self-employed persons, domestic servants, unpaid family workers, and members of the armed forces are excluded. Figures for June and July 1958 are preliminary. The series for recent years

were revised by the Bureau of Labor Statistics in July 1958 to first quarter 1957 benchmark levels indicated by data from government social insurance programs. Back data may be obtained from the Bureau of Labor Statistics.

P Preliminary.
 Figures for sales are the average per trading day, while those for stocks are as of the end of the month or averages of monthly data.

NOTE.—For description of the series and for monthly indexes beginning 1947, see BULLETIN for December 1957, pp. 1323-52. Figures prior to 1947 may be obtained from the Division of Research and Statistics.

Preliminary.
 Revised.
 These figures are not estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1957, sales by these stores accounted for about 45 per cent of estimated total department store sales.
 2 Derived from the reported figures on sales and stocks.

³ Derived from receipts and reported figures on outstanding orders.

⁴ The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

Revised.
 Exports of domestic and foreign merchandise.
 Department of Defense shipments of grant-aid military equipment and supplies under the Mutual Security Program.

³ General imports including imports for immediate consumption plus entries into bonded warehouses.

² Consists of sales abroad and domestic sales of surplus consumption goods and materials.

P Preliminary.
 1 Monthly data are seasonally adjusted totals at annual rates.
 2 Represents compensation for injuries, employer contributions to private pension and welfare funds, and other payments.
 3 Represents business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.
 4 Represents government social insurance benefits, direct relief, mustering-out pay, veterans' readjustment allowances and other payments, as

well as consumer bad debts and other business transfers.

5 Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.

6 Represents personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net interest, and net dividends paid by agricultural corporations.

⁷ Revised.

¹ Excludes banks and branches in United States territories and possessions except one national bank in Alaska, with no branches, that became a member of the Federal Reserve System on Apr. 15, 1954, and one national bank in the Virgin Islands, with one branch, that became a member of the Federal Reserve System on May 31, 1957.

² State member bank and insured mutual savings bank figures both include, since 1941, three member mutual savings banks not included in the total for commercial banks. State member bank figures also include, since 1954, one noninsured trust company without deposits.

³ As of June 30, 1947, the series was revised. The revision resulted in a net addition of 115 banks and 9 branches.

⁴ Separate figures not available.
5 Exclusive of new banks organized to succeed operating banks.
6 Exclusive of liquidations incident to succession, conversion, and absorption of banks.
7 Exclusive of conversions of national banks into State bank members, or vice versa. Shown separately under conversions.
9 Exclusive of insured nonmember banks converted into national banks or admitted to Federal Reserve membership, and vice versa.
9 Banking facilities (other than branches) that are provided at military and other Government establishments through arrangements made by the Treasury Department.

¹ Comprises all commercial banking offices in the continental United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands on which checks are drawn, including 245 banking facilities. Number of banks and branches differs from that in the preceding table because this table includes banks in Alaska, Hawaii, Puerto Rico, and the Virgin Islands, but excludes banks and trust companies on which no checks are drawn

and three mutual savings member banks.

² Alaska and Hawaii assigned to the San Francisco District for purposes of Regulation J, "Check Clearing and Collection." Puerto Rico and the Virgin Islands assigned to the New York District, Member branches in Puerto Rico are branches of New York banks.

Tables on the following pages include the principal available statistics of current significance relating to international capital transactions of the United States, foreign gold reserves and dollar holdings, and foreign central banks. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and

dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Other data are compiled largely from regularly published sources such as central bank statements and official statistical bulletins. Back figures for 1941 and prior years, together with descriptive text, may be obtained from the Board's publication, Banking and Monetary Statistics.

Preliminary.

 1 Short-term liabilities reported in these statistics represent principally deposits and U. S. Govt. obligations maturing in not more than one year from their date of issue, held by banking institutions in the United States; small amounts of bankers' acceptances and commercial paper and of liabilities payable in foreign currencies are also included.
 2 Includes International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations. Excludes Bank for International Settlements, reported under Other Europe.
 3 Represents funds held with banks and bankers in the United States (and in accounts with the U. S. Treasury) by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.).

⁴ Part of United Arab Republic since February 1958.

⁵ These data are based on reports by banks in the Second (New York) Federal Reserve District and include funds held in an account with the U. S. Treasury. They represent a partial breakdown of the amounts shown in the "other" categories in tables 1a-1c.

⁶ Based on reports by banks in all Federal Reserve districts.

NOTE.—Statistics on international capital transactions of the United States are based on reports by banks, bankers, brokers, and dealers. Beginning with the BULLETIN for June 1954 (as explained on p. 591 of that issue), tables reflect changes in reporting forms and instructions made as of Mar. 31, 1954, as well as changes in content, selection, and arrangement of material published. For discontinued tables and data reported under previous instructions, see BULLETIN for May 1954, pp. 540–45.

(excluded from these statistics) amounted to \$1,212 million on May 31, 1958. The term foreigner is used to designate foreign governments, central banks, and other official institutions as well as banks, organizations, and individuals domiciled outside the United States, including U. S. citizens domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms.

2 Less than \$500,000.

3 Part of United Arab Republic since February 1958.

4 Includes transactions of international institutions.

p Preliminary.
1 Short-term claims reported in these statistics represent principally the following items payable on demand or with a contractual maturity of not more than one year: loans made to and acceptances made for foreigners; drafts drawn against foreigners that are being collected by banking institutions on behalf of their customers in the United States; and foreign currency balances held abroad by banking institutions and their customers in the United States. Claims on foreigners with a contractual maturity of more than one year reported by U. S. banking institutions

r Revised.
1 Gold exports, representing about 90 per cent of total production.
2 Excluding Mexico.

Sources.—World production: estimates of U. S. Bureau of Mines.

Production reported monthly: reports from individual countries except Ghana and Belgian Congo, data for which are from American Bureau of Metal Statistics. For the United States, annual figures are from the U. S. Bureau of the Mint and monthly figures are from American Bureau of Metal Statistics.

Includes purchase of \$31.5 million of gold from Spain.
 Represents purchase of gold from International Monetary Fund.

Preliminary,
 Revised.
 See note 2 on following page.
 Net after payment of \$687.5 million in gold as United States gold subscription to the International Monetary Fund.

³ Not yet available.
⁴ Gold held under earmark at the Federal Reserve Banks for foreign and international accounts amounted to \$7,755.5 million on July 31, 1958.
Gold under earmark is not included in the gold stock of the United States.

P Preliminary.

Revised.

Excludes U.S.S.R. and other Eastern European countries.
Represents reported gold holdings of central banks and governments and international institutions, unpublished holdings of various central banks and governments, estimated holdings of British Exchange Equalization Account based on figures shown below under United Kingdom, and estimated official holdings of countries from which no reports are received.

received.

2 Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves

Reserve Bank Credit, and Related Items" or in the Treasury statement "United States Money, Outstanding and in Circulation, by Kinds."

3 Part of United Arab Republic since February 1958.

4 Represents holdings of Bank of France (holdings of French Exchange Stabilization Fund are not included).

5 Exchange Equalization Account holdings of gold and of United State and Canadian dollars, as reported by British Government. (Gold reserves of Bank of England have remained unchanged at \$1 million since 1939, when Bank's holdings were transferred to Exchange Equalization Account.)

Note.—Gold and short-term dollars include reported and estimated official gold reserves, and total dollar holdings as shown in Short-term Liabilities to Foreigners Reported by Banks in the United States, by Countries (Tables I and Ia-Id of the preceding section). U. S. Govt. bonds and notes represent estimated holdings of such securities with original maturities of more than one year; these estimates are based on a survey of selected U. S. banks and on monthly reports of security transactions. For back figures see BULLETIN for March 1956, pp. 304-05.

Preliminary. Revised.

1 Excludes gold holdings of French Exchange Stabilization Fund.

2 Does not include \$286 million of gold loaned by Bank of France to the French Exchange Stabilization Fund on June 26, 1957.

3 Less than \$500,000.

4 Includes Yugoslavia, Bank for International Settlements (both for its own and European Payments Union account), gold to be distributed by the Tripartite Commission for Restitution of Monetary Gold, and unpublished gold reserves of certain Western European countries.

5 Includes latest reported figures for gold reserves as follows: Australia (Dec. 31, 1957); and Colombia (Jan. 31).

Part of United Arab Republic since February 1958.
 Excludes gold reserves of the U. S. S. R. and other Eastern European

- Notes to tables on international institutions:

 1 Currencies include demand obligations held in lieu of deposits.

 2 Represents principal of authorized loans, less loans not yet effective, repayments, the net amount outstanding on loans sold or agreed to be sold to others, and exchange adjustment.

 3 Excludes uncalled portions of capital subscriptions.

 4 Loans to dependencies are included with member.

 5 Includes also effective loans agreed to be sold but not yet disbursed.

 6 Includes \$259 million in loans not yet effective.

 7 Includes \$219 million not guaranteed by the Bank.

 8 U. S. Treasury bills purchased with proceeds of sales of gold.

 9 Transferred to General Reserve.

 10 Countries shown are those with cumulative net drawings of \$25 million or more on the latest date.

 11 Represents sales of U. S. dollars by the Fund to member countries for local currencies, less repurchases of such currencies with dollars.

Note.—All figures, including gold and foreign exchange, are compiled from official reports of individual banks and are as of the last report date of the month. For details relating to individual items, see BULLETIN for April 1955, p. 443.

Notes to central bank table on this and opposite page:

1 Notes issued, less amounts held in banking department.

2 Gold was transferred on May 1, 1940, to Foreign Exchange Control Board in return for short-term Govt. securities (see BULLETIN for July 1940, pp. 677-78).

3 Includes Economic Cooperation Administration.

4 Less than 50 million francs.

5 Other assets include 100.0 billion francs of gold loaned to Stabilization Fund.

tion Fund.

⁶ Under the banking reform, effective Dec. 2, 1957, the Central Bank has been reorganized. The balance sheet has been substantially modified, and figures are not comparable with those shown previously. ⁷ This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.

⁷ Revised.

¹ This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.

² For the last available reports for Czechoslovakia and Hungary (March and February 1950, respectively), see BULLETIN for September 1950, pp. 1262-63.

³ Beginning Mar. 27, 1958, includes gold in Banking Department, previously combined with gold in Issue Department.

Note.—All figures, including gold and foreign exchange, are compiled from official reports of individual banks and are as of the last report date of the month.

⁵ On Aug. 1, 1957, the Land Central Banks and the Berlin Central Bank were merged with the Bank of German States (Bank deutscher Länder) and the latter became the German Federal Bank (Deutsche Bundesbank).

⁶ Includes (1) gold and foreign exchange in banking department and (2) in May 1957, the profit resulting from revaluation of gold from

^{.0275557} to .0117316 grams of fine gold per rial.

7 Holdings in each month were 448 million yen.

8 Includes gold, silver, and foreign exchange forming required reserve (25 per cent) against notes and other demand liabilities.

For other notes see opposite page.

¹ Rates shown represent mainly those at which the Central bank either discounts or makes advances against eligible commercial paper and/or government securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which the largest proportion of central bank credit operations is understood to be transacted. In certain cases other rates for these countries are given in note 3.

² Since Nov. 1, 1956, the discount rate is set each week at ¼ per cent above the latest average tender rate for Treasury bills.
³ Discounts or advances at other rates include: Japan—various rates depending on type of paper or transaction and extent of borrowing from Central bank, including 7.67 per cent for discount or paper related to domestic commercial transactions (rate shown is for advances on commercial paper and miscellaneous collateral); Argentina—3 and 5 per cent

for certain rural and industrial paper, depending on type of transaction; Cuba—4.5 per cent for sugar loans and 4 per cent for loans secured by national public securities; Indonesia—various rates depending on type of paper, collateral, commodity involved, etc.; Chile—rates in excess of 6 per cent are applied to rediscounts in excess of 50 per cent of the rediscounting bank's capital and reserves, rates of 4 and 2 per cent apply to certain types of agricultural paper; Costa Rica—5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper and 2 per cent for special cases; and Peru—4 per cent for industrial paper and mining paper, and 3 per cent for most agricultural paper.

4 Since May 16, this rate applies to advances against commercial paper as well as against government securities and other eligible paper.

Official rate. The basic and preferential rates were discontinued and the new official rate of 18 pesos per U. S. dollar became effective Oct. 28, 1955.
 New free market rate became effective Oct. 28, 1955.
 Effective Sept. 16, 1957, the Finnish markka was devalued from 230 to 320 markkaa per U. S. dollar.

⁴ On Aug. 12, 1957, the French authorities established an effective rate of 420 francs per U. S. dollar applicable to most foreign exchange transactions. Since Oct. 28, 1957, this rate has applied to all foreign exchange transactions. The official rate of 350 francs per U. S. dollar was changed to 420 francs on June 23, 1958.
5 Based on quotations through June 20, 1958.
6 Based on quotations beginning Jan. 2, 1958.

Federal Reserve Board Publications

Unless otherwise noted, the material listed may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington 25, D. C. Where a charge is indicated, remittance should accompany order and be made payable to the order of the Board of Governors of the Federal Reserve System. A more complete list, including periodic releases and additional reprints, appeared on pages 747-750 of the June 1958 Bulletin.

- THE FEDERAL RESERVE SYSTEM—PURPOSES AND FUNCTIONS. April 1954. 208 pages.
- Annual Report of the Board of Governors of the Federal Reserve System.
- FEDERAL RESERVE BULLETIN. Monthly. Subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents per copy; elsewhere \$7.00 per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or \$5.00 for 12 months.
- FEDERAL RESERVE CHART BOOK ON FINANCIAL AND BUSINESS STATISTICS. Monthly. Annual subscription includes one issue of Historical Supplement. Subscription price in the United States and the countries listed above is \$6.00 per annum, 60 cents per copy, or 50 cents each in quantities of 10 or more of a particular issue for single shipment; elsewhere \$7.00 per annum or 70 cents each.
- HISTORICAL SUPPLEMENT TO FEDERAL RESERVE CHART BOOK. Issued annually in September. Annual subscription to monthly chart book includes one issue of Supplement. In the United States and countries listed above under Federal

- Reserve Bulletin, single copies 60 cents each or in quantities of 10 or more for single shipment 50 cents each; elsewhere 70 cents each.
- THE FEDERAL RESERVE ACT, as amended through December 31, 1956, with an Appendix containing provisions of certain other statutes affecting the Federal Reserve System. 385 pages. \$1.00.
- FLOW OF FUNDS IN THE UNITED STATES, 1939-53. A new accounting record designed to picture the flow of funds through the major sectors of the national economy. December 1955. 390 pages. \$2.75.
- A STATISTICAL STUDY OF REGULATION V LOANS. September 1950. 74 pages. 25 cents per copy; in quantities of 10 or more copies for single shipment, 15 cents each.
- Banking and Monetary Statistics. Statistics of banking, monetary, and other financial developments. November 1943. 979 pages. \$1.50.
- Rules of Organization and Rules of Procebure—Board of Governors of the Federal Reserve System. 1946. 31 pages.
- REGULATIONS OF THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.
- Administrative Interpretations of Regulation F—Section 17—Common Trust Funds. 9 pages.

Consumer Instalment Credit—Six books (Parts I-IV) giving the results of an intensive study of consumer instalment credit, undertaken by the Board on request of the Council of Economic Advisers by direction of the President, are being distributed through the Superintendent of Documents.

Part I-Growth and Import, Volume 1, \$1.25; Volume 2, \$1.00

Part II—Conference on Regulation, Volume 1, \$1.75; Volume 2, \$.60

Part III-Views on Regulation, \$1.00

Part IV—Financing New Car Purchases, \$.60

Requests and remittances for these six books should be directed to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.
