Volume 44 Number 10

A copy of the Federal Reserve Bulletin is sent to each member bank without charge. The subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents per copy; elsewhere, \$7.00 per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or \$5.00 for 12 months.

The 1957-58 Recession in World Trade

UNITED STATES EXPORTS dropped sharply from mid-1957 to early 1958. The decline in foreign purchases exceeded \$4 billion at an annual rate, and was one of the major factors in the eight-month decline in United States economic activity after August 1957.

Exports ceased falling early this year, but thus far have played no positive role in the economic recovery that began after April in this country. These developments differ strikingly from those of 1953-54, when exports were a sustaining factor in the United States recession and an expansive element in the subsequent recovery.

WORLD BOOM AND REACTION

A 60 per cent advance in United States exports from the first half of 1954 to the first half of 1957 added appreciably to demands in the United States economy during that period. This rapid growth in exports was concentrated in capital goods and industrial materials including fuels. It reflected strong pressures of demand abroad associated with rapidly increasing outlays to expand productive capacity throughout the world. Demand pressures were further intensified at the end of 1956 by speculative developments following the closing of the Suez Canal.

Sooner or later, monetary and fiscal policies in all industrial countries and in many others were directed toward restraining the force of the boom. The lateness of application of restraints in some countries contributed alike to unsustainable bulges in world trade, including United States exports, and

U. S. BALANCE OF PAYMENTS

Billions of dollars, quarterly

NOTE.—Department of Commerce seasonally adjusted data. Total payments correspond to first main heading in table on p. 1155. Net transfers of gold and dollars include gold purchases from the United States and net increases in foreign holdings of short-term assets in the United States and of U. S. Government long-term securities. Exports in first quarter of 1954 adjusted to include, and exports in second quarter to exclude, shipments delayed by port strike in March 1954.

to drains on the foreign exchange reserves of the countries concerned.

In 1956 and 1957 investment expenditures began to level off. Inventories of industrial materials, which earlier had appeared inadequate for current and prospective needs, became excessive in 1957 as consumption of materials stopped rising and supplies increased. These developments were associated with declines in raw material prices on world markets and led, at varying dates in 1957 and early 1958, to cyclical

downturns in industrial activity here and abroad. Declines in world prices and recessions in industrial countries were inter-related events in the aftermath of the 1954-57 acceleration of investment expansion throughout the world.

Declines in prices reduced the value of the exports of nonindustrial countries. Many of these countries were already importing at rates in excess of their export earnings and capital inflows, and in 1957-58 there were heavy drains on their reserves. By mid-1958 reductions in their imports were slowing the reserve drains.

Most European countries and Japan have by now checked price inflation and regained external balance. Since spring industrial output has been expanding again in the United States and Canada.

U. S. BALANCE OF PAYMENTS

The drop of more than \$4 billion in the annual rate of United States exports between mid-1957 and early 1958 occurred while total payments from the United States were declining only moderately. It therefore led to renewed transfers of gold and dollars to foreign countries, as shown in the chart on the preceding page. Such transfers were about \$1.5 billion in the first half of 1958. The gains were concentrated in the holdings of West European countries, Japan, and Canada. The year before, when United States exports and payments were both very large, speculative movements of funds had caused drains on foreign reserves through September.

Payments. Total payments from the United States were at a seasonally adjusted annual rate of \$26 billion in the first half of 1958, only \$1.5 billion less than in the 12 months to mid-1957. These payments include those for imports of goods and serv-

ices and the net outflow of United States investments, loans, and grants.

An important factor in the maintenance of total payments was the moderate size of the decline in imports. Despite a fairly sharp drop at the end of 1957, imports of goods and services in the first half of 1958 were down only 3 per cent from a year earlier.

Imports of metals and other materials declined no more in the 1957-58 recession than they had in 1953-54. While prices fell more in 1957-58, declines in volume were in most cases smaller. In the first half of 1958 imports of crude and semifinished materials (excluding petroleum) were slightly less than in the first half of 1954; there was little difference in average prices. Petroleum imports have been level since the latter part of 1957, after doubling in value from 1954.

During 1957 and early 1958, the total of imports was buoyed by further advances in imports of manufactures from West Europe and Japan, and by larger imports of meat, mostly from Canada. Imports of manufactures now account for more than one-fifth of total merchandise imports compared with one-seventh of the smaller 1954 total. While imports of manufactured textiles have been level since early 1956, there were continued increases through 1957 in imports of a wide range of other manufactured consumer goods. An impressive advance in imports of automobiles continued into 1958; in the first half of this year they were nine times as large in value as four years earlier.

An increasingly important element in total payments to foreign countries in recent years has been the net outflow of private United States capital. In the first half of 1958 this flow was at an annual rate

of more than \$3 billion, greater than at any time before mid-1956.

Direct investments by United States companies formed a smaller proportion of the total outflow of private capital than in earlier years. New investment in overseas petroleum development was appreciably smaller than in the first half of 1957, when large payments were made for petroleum exploration rights in Venezuela. Direct investments in Canada also declined as large projects for resource development were completed. The outflow to West Europe was little changed.

Flotations of foreign securities in this country slackened in the last half of 1957, but rose to a record level in the first half of 1958. After interest rates in the United States eased near the end of 1957, there was a marked increase in security issues of Canadian local authorities, of the World Bank, and of a widening list of foreign governments and corporations.

The outflow of short-term capital including bank loans also increased in the first half of 1958 after diminishing during most of 1957. In recent years growth in

^p Preliminary.¹ Including military expenditures abroad totaling \$1.18, \$1.36, \$1.31, \$1.73, \$1.40, \$1.70 billion in the periods given.² Excluding military transfers under grant-aid programs.

NOTE.—Department of Commerce data, not adjusted for seasonal variation. Details may not add to totals because of rounding.

foreign lending by United States banks, including participations in World Bank and Export-Import Bank loans, has added significantly to the resources available for financing world trade.

The outflow of Government loans and nonmilitary grants, mainly to nonindustrial countries, has continued at a rate of about \$2.5 billion a year.

Exports. The decline in merchandise exports, from a record \$20 billion annual rate in the first half of 1957 to a \$16 billion rate early this year, was concentrated in exports to industrial countries, as the chart shows. Exports to Canada, West Europe, and Japan were 30 per cent lower in the first half of 1958 than a year earlier. Exports to West Europe had been swollen at the beginning of 1957 by emergency oil shipments, which ended in the second quarter; from mid-1957 to early 1958 exports to West Europe fell more than one-fifth.

UNITED STATES EXPORTS

Billions of dollars, annual rates

NOTE.—Bureau of the Census data, seasonally adjusted by Federal Reserve. Because of port strike in early 1954, figures for first two quarters are averaged and presented as a half-year rate. Data exclude special category exports for which no country-of-destination detail is available.

Total shipments to nonindustrial countries did not begin to decline until the end of 1957. In the second quarter of 1958 they were 12 per cent lower than a year earlier.

Well over half the decline in total exports affected industrial materials. Exports of steel, steel scrap, and other metals in the spring of 1958 were 40 per cent lower in value than a year earlier, partly because of price declines. Declines in exports of raw cotton and coal were also large.

Exports of machinery and transportation equipment, exclusive of passenger automobiles, did not decline substantially before the end of 1957. Shipments of capital goods to industrial countries turned down moderately at various dates, beginning with exports to Canada, but until late last year these declines were offset by rising shipments to nonindustrial areas.

During the spring and early summer of 1958 there was an increase in export shipments of agricultural products. United States nonagricultural exports, seasonally adjusted, were virtually level from April through August.

INDUSTRIAL ACTIVITY ABROAD

Economic activity leveled off during 1957 or early 1958 in all industrial countries. The extent of subsequent declines varied widely, reflecting differences among countries in the strength of total demand.

Consumer demand continued to expand in most countries. Business fixed investment outlays remained large, though in some countries they fell off considerably, as they did in Canada and the United States. But everywhere a slowing down of inventory accumulation in 1957 and a later shift to inventory liquidation contributed to marked curtailments of steel and textile output, and to sharp declines in related imports.

NOTE.—United States: Federal Reserve index, quarterly, seasonally adjusted, shifted to 1953-55 = 100. Others: Crude steel production, quarterly, converted to index basis and seasonally adjusted by Federal Reserve.

For most industrial countries, declines in export demand were smaller than for the United States. Exports of West European countries to each other and to the United States leveled off early in 1957. Their exports to nonindustrial countries rose into the second half of 1957 and then declined, as did those of the United States.

Industrial production reached its peak earlier than elsewhere in Canada, Belgium, the Netherlands, and Denmark. Belgian production, heavily concentrated in steel and textiles, declined for more than a year, and this summer was about 13 per cent below its peak. In Canada and the Netherlands declines from the first quarter of 1957 were about 7 per cent, and upturns began this year sooner than in the United States. Similarly, moderate declines in industrial production in Japan and Norway from peaks in the second quarter of 1957 ended early this year.

British industrial production reached its peak in the second quarter of 1957. During the spring and summer of 1957 continuing

expectations of persistent slow inflation dried up the market for fixed-interest securities including British Government bonds, and there was widespread speculation on the possibility of devaluation of sterling and revaluation of the German mark. In September, to stop a speculative run on reserves and bring inflation to a halt decisively, the Bank of England raised its discount rate from 5 to 7 per cent, and the Government drastically tightened fiscal and credit restraints.

Business expenditures for buildings, plant, and equipment in the United Kingdom, including those of the nationalized utilities and railroads, continued to rise into 1958. Industrial production declined about 5 per cent from mid-1957 through the summer of 1958, mainly owing to cutbacks in steel and textiles.

Expansion persisted into the first quarter of 1958 in Germany, France, and Italy, carrying the index of aggregate West European industrial production to new highs, as shown in the chart. After January, however,

NOTE.—Seasonally adjusted indexes. Organization for European Economic Cooperation (OEEC) index for West Europe; latest figure shown is for July (partly estimated by Federal Reserve). Federal Reserve index for United States; latest figure shown is for September (preliminary).

over-all activity leveled off in Germany and dipped briefly in Italy, reflecting weakness in steel markets and a spreading of inventory liquidation in the apparel and textile field. In France, where excessive demand had caused inflation and serious losses of foreign exchange, industrial production turned down after February 1958.

As economic downturns developed, and as imports fell with the abatement of inflationary pressures, credit and fiscal restraints began to be relaxed. In Canada, a new Government enacted a number of expansionary fiscal measures during the fall of 1957. Changes in credit policy in European countries and in Japan were gradual and cautious. In Germany increased availability of long-term funds at reduced interest rates stimulated residential construction.

In Britain, Bank rate was cut back last spring to the pre-September 1957 level. In July, the direct control of bank loans introduced in 1955 was removed. In September, instalment credit regulations were relaxed.

WEST EUROPEAN IMPORTS

Purchases by West European countries from outside Europe declined quite sharply in value after mid-1957. Imports from the United States fell most, and imports from Canada also dropped. Imports from Japan, on the other hand, continued to rise, and imports of petroleum from the Middle East recovered after early 1957.

West European imports from other producers of primary products, which had been at an annual rate of about \$16 billion in the first half of 1957, were about \$1.5 billion lower in the first six months of 1958. This decline was greater, even in relative terms, than the decline in United States imports from the same broad group of countries. In

both cases price changes were an important element in the decline.

The reduction in value of imports contributed greatly to the balance-of-payments gains of European countries after September 1957, and to striking increases in their gold and foreign exchange reserves.

TRADE OF NONINDUSTRIAL COUNTRIES

While at mid-1958 gross reserves of gold and foreign exchange of West European countries were nearly \$3 billion greater than at the end of 1956, and gold holdings of the United States were \$650 million less, gross reserves of nonindustrial countries other than petroleum exporters were down nearly \$2 billion from a year and a half earlier. Somewhat under half of this decline for nonindustrial countries was in their holdings of sterling and most of the remainder was in dollars and gold. During the same period the nonindustrial countries made net drawings of \$450 million from the International Monetary Fund.

Reduced earnings from sales of primary products have been an important cause of drains on reserves, but the most critical reserve situations have been confined to countries that allowed their own payments to become and remain excessive. Import purchases by nonindustrial countries other than petroleum producers began to exceed the sum of their export earnings and net inflows of capital in 1956. The imbalance became greater in 1957 as their imports rose further for a time and as export earnings declined.

Exports in the boom. Over the course of the 1954-57 boom, export earnings of nonindustrial countries in the aggregate increased one-sixth, as shown in the chart. These gains were due largely to volume expansion, which was especially rapid from 1954 to early 1956. Thereafter increases in

NOTE.—Unadjusted for seasonal variation. Exports f.o.b. and imports c.i.f. Based on data from International Monetary Fund *International Financial Statistics*. *Petroleum exporters*: Brunei, Iran, Iraq, Netherlands Antilles, Sarawak, Saudi Arabia, Trinidad, Venezuela, Kuwait, and other Persian Gulf states. *Non-petroleum exporters*: all other countries except the United States, Canada, Japan, and members of the Organization for European Economic Cooperation. Second quarter 1958 partly estimated by Federal Reserve.

volume were markedly slower, except for petroleum.

Fluctuations in prices for raw materials and foodstuffs varied widely from commodity to commodity. While prices for some agricultural commodities were never as high after 1954 as before, market prices of many commodities rose sharply to peaks at various dates in 1955, 1956, or 1957. Nevertheless, the broad average of prices actually realized by nonindustrial countries, unrepresentative though this may be of the experience of individual countries, did not change widely from 1954 to early 1957.

Exports in 1957-58. When demand for primary commodities in industrial countries slackened in 1957, price declines began to predominate over increases. Short crops explain the few exceptions to the generally

downward movement of prices of primary commodities after the spring of 1957. Physical volume of exports of commodities other than petroleum decreased a little.

Average prices entering into total export earnings of nonindustrial countries other than petroleum producers were about 10 per cent lower this spring than in 1954. Price levels in industrial countries, on the other hand, are generally higher than they were in 1954.

Some shift in price relationships would probably have occurred on account of long-term changes in demand and supply, even if sharp fluctuations in industrial countries' demand in the 1954-58 period had been avoided. Lowered costs of production of synthetic materials, relative growth of world demand for manufactured products in general, and the overcoming of postwar supply shortages for some primary products would all have worked in the same direction. But the concentration of price adjustments within the latter part of this period has greatly intensified the difficulties of nonindustrial countries.

Imports in 1957-58. Decreases in earnings of nonindustrial countries have been followed, with a lag, by reductions in their imports. The decline in imports continued in the second quarter of 1958, if allowance is made for the usual seasonal variation.

To protect dwindling foreign exchange reserves, some countries, such as South Africa and Rhodesia, tightened their monetary and fiscal policies this year. Others, notably India, the Philippines, and New Zealand, adopted severe measures of exchange control which cut their import purchases sharply. Others, however, continued to import heavily; Brazil and Argentina virtually exhausted their foreign exchange reserves.

Among countries with large reserves,

Australia maintained its imports and Mexico increased its purchases further. Venezuela reduced its imports of capital goods as petroleum investment expenditures declined.

THE IMF AND THE WORLD BANK

In adjusting to changes in their balances of payments in the later stages of the world boom and in the subsequent trade recession, many countries made use of temporary assistance from the International Monetary Fund. This institution has exerted an influence toward stability and order in world trade not only through its financial assistance but also through advice on appropriate financial policies.

Looking ahead to problems of the next decade, the President of the United States has proposed enlargement of the resources of the Fund, which have not been changed since it was set up just after World War II. He has also proposed increasing the resources of the International Bank for Reconstruction and Development, which operates in the field of long-term investment. Both proposals were favorably received at the annual meeting this month of the Governors of the Fund and the Bank. The Executive Directors of the institutions were instructed to work out detailed plans. These plans will be submitted to the Congress of the United States and to the appropriate bodies in other member countries.

Law Department

Administrative interpretations, new regulations, and similar material

Participations between Banks under Bank Holding Company Act

An interpretation published at page 1059 of the September 1958 Federal Reserve BULLETIN expressed the view that certain participations described therein between co-subsiary banks of a bank holding company are permissible under Section 6(a) of the Bank Holding Company Act of 1956.

In connection with a participation which is otherwise permissible under that interpretation, the Board has been asked the further question whether the participation would cease to be permissible by reason of the fact that the notes representing the original loan were made payable to the originating bank and then endorsed to the participating bank. In response the Board expressed the opinion that such a participation would continue to be permissible with such a procedure, provided the participation was otherwise permissible under the earlier interpretation and the procedure was provided for in advance by the participation agreement between the banks.

Acquisition by Bank Holding Company and Banking Subsidiaries of Stock in Small-Business Investment Company

A registered bank holding company requested an opinion by the Board of Governors with respect to whether that company and its banking subsidiaries may acquire stock in a small-business investment company organized pursuant to the Small Business Investment Act of 1958.

It is understood that the bank holding company and its subsidiary banks propose to organize and subscribe for stock in a small-business investment company which would be chartered pursuant to the Small Business Investment Act of 1958 which provides for long-term credit and equity financing for small-business concerns.

Section 302(b) of the Small Business Investment Act authorizes national banks, as well as other member banks and nonmember insured banks to the extent permitted by applicable State law, to invest capital in small-business investment

companies not exceeding one per cent of the capital and surplus of such banks. Section 4(c)(4) of the Bank Holding Company Act exempts from the prohibitions of Section 4 of the Act "shares which are of the kinds and amounts eligible for investment by national banking associations under the provisions of Section 5136 of the Revised Statutes." Section 5136 of the Revised Statutes (paragraph "Seventh") in turn provides, in part, as follows:

"Except as hereinafter provided or otherwise permitted by law, nothing herein contained shall authorize the purchase by the association for its own account of any shares of stock of any corporation." (Italics supplied.)

Since the shares of a small-business investment company are of a kind and amount expressly made eligible for investment by a national bank under the Small Business Investment Act of 1958, it follows, therefore, that the ownership or control of such shares by a bank holding company would be exempt from the prohibitions of Section 4 of the Bank Holding Company Act by virtue of the provisions of Section 4(c)(4) of that Act. Accordingly, the ownership or control of such shares by the bank holding company would be exempt from the prohibitions of Section 4 of the Bank Holding Company Act.

An additional question is presented, however, as to whether Section 6 of the Bank Holding Company Act prohibits banking subsidiaries of the bank holding company from purchasing stock in a small-business investment company where the latter is a "subsidiary" under that Act.

Section 6(a)(1) of the Act makes it unlawful for a bank "to invest any of its funds in the capital stock, bonds, debentures, or other obligations of a bank holding company of which it is a subsidiary, or of any other subsidiary of such bank holding company." Section 6(b) of the Act exempts from the prohibitions of Section 6 the capital stock of any company described in Section 4(c)(1) of that Act, but fails to exempt also investments in stock that fall within that part of Section 4(c)(4) which exempts from the divestment requirements of the Act shares eligible for

investment by national banks under Section 5136 of the Revised Statutes.

It might be argued that, since Congress deemed it proper for a holding company bank to invest in shares of the types of companies described in Section 4(c)(1) of the Act, it would also be proper for banking subsidiaries of a bank holding company to purchase shares eligible for investment by national banks under Section 5136 of the Revised Statutes. However, the express wording of the Act is to the contrary.

In the absence of any facts which would seem to justify the Board in ignoring the present wording of Section 6 of the Bank Holding Company Act and until Section 6(b) of that Act is amended to include reference to Section 4(c)(4) (as indicated above and as recommended by the Board in its Report to the Congress of May 8, 1958), the Board is, therefore, compelled to conclude that Section 6 prohibits the purchase by banking subsidiaries of a bank holding company of stock of a small-business investment company organized pursuant to the Small Business Investment Act of 1958, where that company is or will be a subsidiary of the bank holding company.

Accordingly, Section 6 of the Bank Holding Company Act prohibits banking subsidiaries of the bank holding company from purchasing stock in a small-business investment company organized pursuant to the Small Business Investment Act of 1958, where that company is or will be a subsidiary of the bank holding company. However, this prohibition would not apply to investment by the holding company alone in voting shares of such a small-business investment company even though the latter would constitute a subsidiary under the Bank Holding Company Act; nor would it apply if the holding company and its banking subsidiaries should not together acquire as much as 25 per centum of the voting shares of such a small-business investment company and that company was also not otherwise a subsidiary of the bank holding company.

Order under Section 4(c)(6) of Bank Holding Company Act

The Board of Governors of the Federal Reserve System, on September 10, 1958, issued an Order approving the application of Financial Institutions, Inc. for an exemption of a subsidiary corporation under Section 4(c)(6) of the Bank Hold-

ing Company Act of 1956. The Board's Order (Docket No. BHC 45) and accompanying Report and Recommended Decision read as follows:

FINANCIAL INSTITUTIONS, INC.

In the Matter of the Application of Financial Institutions, Inc. under Section 4(c)(6) of the Bank Holding Company Act of 1956

ORDER

On July 29, 1958, the Hearing Examiner issued his Report and Recommended Decision in the above-entitled proceeding, recommending to the Board that it grant the application of Financial Institutions, Inc. for a determination that Geneva Shareholders, Inc., Geneva, New York, and activities thereof are of the kind described in Section 4(c)(6) of the Bank Holding Company Act of 1956 and Section 5(b) of the Board's Regulation Y so as to make it unnecessary for the prohibitions of Section 4 of the Act with respect to retention of shares in nonbanking organizations to apply in order to carry out the purposes of the Act. The time for filing with the Board exceptions and brief to the recommended decision of the Hearing Examiner expired without any exceptions or brief having been filed.

Pursuant to Section 4(c)(6) of the Bank Holding Company Act and Section 5(b) of the Board's Regulation Y, and on the basis of the entire record, the Board hereby adopts the findings of fact, conclusions of law, and the recommendations of the Hearing Examiner as set forth in the attached copy of his Report and Recommended Decision, and makes the following Order:

IT IS HEREBY ORDERED that the request of Financial Institutions, Inc., under Section 4(c)(6) of the Bank Holding Company Act of 1956 for a determination exempting its shares in Geneva Shareholders, Inc. from application of the prohibitions of Section 4(a)(2) of the said Act, shall be, and hereby is, approved.

This 10th day of September, 1958.

By order of the Board of Governors.

Voting for this action: Messrs. Martin, Chairman, Balderston, Vice Chairman, Szymczak, Vardaman, Mills, Robertson, and Shepardson. Voting against this action: None.

(Signed) KENNETH A. KENYON

Assistant Secretary.

(SEAL)

REPORT AND RECOMMENDED DECISION

Statement of the Case

Under date of 14 April 1958 Financial Institutions, Inc., Warsaw, New York, a bank holding company and the Applicant herein, filed with the Board of Governors of the Federal Reserve System a request, here referred to as the Application. By the Application the Applicant seeks a determination from the Board, pursuant to Section 4(c)(6) of the Bank Holding Company Act of 1956, herein called the Act, and Section 5(b) of the Board's Regulation Y promulgated pursuant to the Act (12 CFR 222.5(b)), that the shares of stock held by the Applicant in Geneva Shareholders, Inc. are exempt from the provisions of the Act prohibiting the retention by a bank holding company of any voting shares of a nonbanking organization.

The particular sections of the Act here applicable are:

"Section 4(a). Except as otherwise provided in this Act, no bank holding company shall—

* * * *

"(2) after two years from the date of enactment of this Act . . . retain direct or indirect ownership or control of any voting shares of any company which is not a bank or a bank holding company or engage in any business other than that of banking or of managing or controlling banks or of furnishing services to or performing services for any bank of which it owns or controls 25 per cent or more of the voting shares.

"The Board is authorized, upon application by a bank holding company, to extend the period referred to in paragraph (2) above from time to time as to such bank holding company for not more than one year at a time if, in its judgment, such an extension would not be detrimental to the public interest, but no such extensions shall extend beyond a date five years after the date of enactment of this Act or five years after the date as of which a company becomes a bank holding company, whichever is later.

* * * *

"(c) The prohibitions in this section shall not apply—

* * * *

"(6) to shares of any company all the activities of which are of a financial, fiduciary, or insurance nature and which the Board after due notice and hearing, and on the basis of the record made at such hearing, by order has determined to be so closely related to the business of banking or of managing or controlling banks as to be a proper incident thereto and as to make it unnecessary for the prohibitions of this section to apply in order to carry out the purposes of this Act;"

* * * *

Section 5(b) of the Board's Regulation Y is as follows:

"(b) *Shares of financial, fiduciary, or insurance companies.*—Any bank holding company which is of the opinion that a company all the activities of which are of a financial, fiduciary, or insurance nature is so closely related to the business of banking or of manag-

ing or controlling banks, as conducted by such bank holding company or its banking subsidiaries, as to be a proper incident thereto and as to make it unnecessary for the prohibitions of Section 4 of the Act to apply in order to carry out the purposes of the Act, may request the Board for such a determination pursuant to Section 4(c)(6) of the Act. Any such request shall be filed in duplicate with the Federal Reserve Bank. After receipt of any such request, the Board will notify the bank holding company of the place and time fixed for a hearing on the requested determination; and, after the conclusion of such hearing and on the basis of the record made at the hearing, the Board will by order make or decline to make the requested determination."

On 23 May 1958 the Board ordered that a hearing be held on the aforesaid Application, in accordance with the provisions of Section 4(c)(6) of the Act, and Sections 5(b) and 7(a) of the Board's Regulation Y.¹

Notice of the Application and of the order directing hearing thereon were duly published in the Federal Register on 29 May 1958 (23 Federal Register 3752). The notice provided *inter alia* that any person desiring to give testimony in the proceeding might file a request for that purpose with the Board.

Pursuant to the aforesaid order and notice, a hearing was held at Buffalo, New York, on 12 June 1958, before the undersigned Charles W. Schneider, a hearing examiner selected by the Civil Service Commission in accordance with the provisions of Section 11 of the Administrative Procedure Act (5 U.S.C. 1010) and thereafter designated by the Board to conduct the hearing in the matter. The Applicant and the Board—the latter in a nonadversary capacity—were represented at the hearing by counsel and otherwise, and were afforded full opportunity to be heard, to examine and cross-examine witnesses, to introduce evidence bearing on the issues, and to file briefs and proposed findings with the hearing examiner. On 25 July 1958 an order was entered correcting and adding to the record pursuant to stipulation of the parties, and closing the hearing. The Applicant has filed proposed findings and a brief, which have been considered. All the Applicant's proposed findings are accepted.

Upon the entire record in the case I make the following findings.

The Companies Involved

Financial Institutions, Inc., a New York corporation, is a bank holding company maintaining its principal office and place of business in Warsaw, New York.

Financial Institutions, Inc. owns approximately 92 per cent of the voting stock of Wyoming County Bank and Trust Company, Warsaw, New York, and approximately 30 per cent of the voting stock of the Pavilion State Bank, Pavilion, New York. In addition to those stocks, and some other miscellaneous share holdings, Financial Institutions, Inc. also owns,

¹ Section 5(b) of the Regulation has been set out *supra*. Insofar as applicable Section 7(a) of Regulation Y is as follows (12 CFR 222.7(a)):

(a) *Hearings.*— . . . Notice of any hearing required by the Act will be published in the Federal Register a reasonable time in advance of the date fixed for the hearing; and any hearings so required will ordinarily be held before trial examiners appointed in accordance with the provisions of the Administrative Procedure Act. All hearings under this regulation will be conducted in accordance with the Board's "Rules of Practice for Formal Hearings."

either beneficially or of record, 1,900 shares of voting stock in Geneva Shareholders, Inc., or approximately 32 per cent of 5,964 such shares outstanding. Of this stock, all purchased for cash, 415 shares are common stock, 1,485 preferred.

Geneva Shareholders, Inc. is a New York corporation whose principal office and place of business is in Geneva, New York. It was organized in 1932 to assist in the continuance of operations by The National Bank of Geneva, a Geneva bank. Because of devaluation of assets the bank's condition at that time required the securing of additional capital in order to remain open. For that purpose Geneva Shareholders, Inc. was formed. The common stock of The National Bank of Geneva was exchanged, share for share, for common stock of Geneva Shareholders, Inc., except for bank directors' qualifying shares and six bank shares held by an individual. At the same time approximately \$300,000 of preferred voting stock of Geneva Shareholders, Inc. was sold publicly, \$90,000 of it to Financial Institutions, Inc. The proceeds of the sale were either contributed to the bank by Geneva Shareholders, Inc. or used to purchase the bank's disallowed assets.

There are presently outstanding 2,980 shares of preferred stock (5 per cent cumulative) of Geneva Shareholders, Inc., and 2,984 shares of common stock. Both classes of stock are voting stock.

The National Bank of Geneva has outstanding 2,500 shares of common stock. There is no preferred stock. As has been seen, the bulk of that stock is held by Geneva Shareholders, Inc.

As of 28 March 1958, Geneva Shareholders, Inc. owned 2,338 shares of stock of The National Bank of Geneva. Geneva Shareholders' only other assets as of that date were \$12,794.95 in cash and \$39,936 in notes receivable: the latter representing noninterest bearing notes given by bank directors in exchange for qualifying shares.

Geneva Shareholders' only business is the ownership and control of stock of The National Bank of Geneva. It does not exercise active supervision over the management of the bank. However, the same person, Vernon Alexander, is president of the bank and of Shareholders. In addition, five of the directors of Geneva Shareholders are also directors of the bank. The only income of Shareholders is the dividends received from the bank, and its only disbursements are dividends to its stockholders, taxes, and modest operating expenses. Shareholders also provides directors of The National Bank of Geneva with their qualifying shares, receiving in exchange noninterest bearing promissory notes; the services of the directors being in lieu of interest.

We turn now to the problem presented.

The Determination

As is seen from the language of Section 4 of the Act, *supra*, an effect of that Section, absent exemption, is to require bank holding companies to divest their nonbanking interests. *Transamerica Corporation and Occidental Life Insurance Co. of Calif.*, decision of the Board 20 August 1957, Docket No. BHC 28 (published in the Federal Reserve BULLETIN for September 1957, p. 1014).

Financial Institutions, Inc. is a bank holding com-

pany as defined in the Act. If Geneva Shareholders, Inc. is a nonbanking or nonbank holding company, Financial Institutions, Inc., owning over 25 per cent of its shares, must divest them by 9 November 1958—unless exempt under the provisions of Section 4.²

In general, bank holding companies which have no nonbanking interests are not subject to divestment under Section 4. As has been seen, Geneva Shareholders, Inc. has no nonbanking interests. However, Geneva Shareholders, Inc. does not meet the definition of a bank holding company contained in Section 2(a) of the Act; which, in summary, defines a bank holding company as a company which owns or controls two or more banks. Geneva Shareholders, Inc. controls only one bank. If the definition in Section 2(a) of the Act is a functional as well as a jurisdictional one, Geneva Shareholders, Inc. is not excused from divestment by reason of Section 4(a)(2). Thus its difficulties arise, not because of the functions it performs, or from the impropriety of its relations with affiliates, but because it does not own enough banks.

However, the construction of Section 2(a) is not an issue here. The question presented by the application is whether Geneva Shareholders, Inc. is a company qualified for exemption under Section 4(c)(6), not under Section 4(a)(2). We turn then to that question.

The requirements for securing an exemption under Section 4(c)(6) were thus stated by the Board in the *Transamerica* case, *supra*:

"(1) All the activities of the organization must be of a financial, fiduciary, or insurance nature; and

"(2) The company must be determined by the Board to be so closely related to the business of banking or of managing or controlling banks (a) as to be a proper incident thereto and (b) as to make it unnecessary for the prohibitions of Section 4 of the Act to apply in order to carry out the purposes of the Act."

Does Geneva Shareholders, Inc. meet these requirements?

It has been seen that the only function of Geneva Shareholders, Inc. is, through its stock ownership and allotment of qualifying shares to directors, to manage and control The National Bank of Geneva. This function is not merely closely related to managing or controlling banks; it would seem to constitute actual engagement therein. That Shareholders does not exercise supervision over day-to-day operation of the bank would not seem to detract from its control. Management is inherent in the exercised powers of ownership. Absent disqualifying statutory factors, the Act makes it lawful to be a bank holding company, and to manage or control banks. It would seem to follow that such functions are then proper incidents of banking. The retention of ownership of shares of such nature would appear to be consonant with the statutory purposes. I so find.

The final question is whether the activities of Geneva Shareholders, Inc. are of a financial, fiduciary, or insurance nature. Clearly they are not insurance in character, nor would they seem to be fiduciary, as such term is generally understood.

As to whether the activities of a bank holding company are in general of a "financial" nature, there is

² On 8 May 1958, upon application, the Board, pursuant to authority contained in Section 4 of the Act, extended the Applicant's period for compliance to 9 November 1958.

scant helpful authority in either the legislative history of the Act or in judicial decisions. Webster's New International Dictionary, Second Edition, and Funk and Wagnalls New Standard Dictionary of the English Language, 1952, substantially define "financial" as "pertaining to finance". Webster gives as one definition of "finance":

"... the management of monetary affairs, especially those involving large sums or investment funds."

I find it unnecessary to decide, however, whether the activities of bank holding companies are *per se* of a financial nature. For in the instant case the activities of Geneva Shareholders, Inc. are, in my opinion, specifically so.

As we have seen, Geneva Shareholders, Inc. was formed for the purpose of raising capital in order that The National Bank of Geneva could be kept open. It was a salvage, not an investment, operation. The funds raised were either contributed directly to the bank or used to purchase disallowed assets of the bank. The evidence, reiterated in the Applicant's brief, is that in the event of necessity Geneva Shareholders, Inc. would again attempt to rescue the bank from fiscal difficulty. In the aggregate those activities would seem to be of financial character. Under such circumstances the conclusion appears warranted, and I find that the activities of Geneva Shareholders, Inc. are financial in nature.

I further find Geneva Shareholders, Inc. and its operations to be proper incidents to the management and control of banks, and further that it is unnecessary to apply the prohibitions of Section 4 of the Act to Geneva Shareholders, Inc. in order to carry out the purposes of the Act. Exemption of Geneva Shareholders, Inc. seems in accord with the objectives of the Act as stated in the Report of the Senate Committee on Banking and Currency, as follows: (S. Rep. 1095, pp. 13-14, 84th Cong., 1st Sess.)

"Your committee holds the opinion that bank holding companies should confine their activities to the control and management of banks and activities

closely related to banking. They should not combine management and control of banking activities with management and control of nonbanking activities. The divestment requirements in this bill are designed to remove the danger that a bank holding company might misuse or abuse the resources of a bank it controls in order to gain an advantage in the operation of the nonbanking activities it controls."

None of the dangers suggested by the Senate Committee are presented in the continued retention by Financial Institutions, Inc. of the shares of Geneva Shareholders, Inc.

Upon the basis of the foregoing findings of fact, and upon the entire record in the case, I make the following:

Conclusions of Law

1. All the activities of Geneva Shareholders, Inc. are of a financial nature.

2. Geneva Shareholders, Inc., its operations and activities, are so closely related to the business of managing and controlling banks as to be a proper incident thereto.

3. It is unnecessary to apply the prohibitions of Section 4 of the Act to Geneva Shareholders, Inc. in order to carry out the purposes of the Act.

Recommendations

It is recommended that the Board of Governors of the Federal Reserve System:

1. Enter an order determining the issue in this proceeding in accordance with the findings of fact and conclusions of law made above, and

2. Grant the request of Financial Institutions, Inc. for an order under Section 4(c)(6) of the Act exempting Geneva Shareholders, Inc. from application of the prohibitions of Section 4 of the Act.

Dated at Washington, D. C., this 29th day of July 1958.

(Signed) CHARLES W. SCHNEIDER,
Hearing Examiner.

Current Events and Announcements

FEDERAL RESERVE MEETINGS

Meetings of the Federal Open Market Committee were held in Washington on September 30 and October 21, 1958.

INCREASE IN MARGIN REQUIREMENTS

On October 15, 1958, the Board of Governors of the Federal Reserve System amended Regulations T and U, relating respectively to margin requirements of brokers and banks, by increasing margin requirements from 70 per cent to 90 per cent, effective October 16, 1958. The increased requirements apply to both purchases and short sales. No other change was made in the regulations.

INCREASE IN FEDERAL RESERVE DISCOUNT RATE

On September 22, 1958, the Board of Governors of the Federal Reserve System approved action by the directors of the Federal Reserve Bank of Boston increasing the discount rate at that Bank from 1¾ per cent to 2 per cent, effective September 23, 1958. The effective dates of a similar change in discount rate at the other Federal Reserve Banks were published in the BULLETIN for September.

CHANGES IN BOARD'S STAFF

In line with the announcement on page 930 of the BULLETIN for August 1958, Mr. Merritt Sherman assumed his duties as Secretary of the Board on October 9, 1958.

APPOINTMENT OF BRANCH DIRECTOR

On September 23, 1958, the Board of Governors announced the appointment of Mr. John T. Ryan,

Jr., of Pittsburgh, Pennsylvania, as a director of the Pittsburgh Branch of the Federal Reserve Bank of Cleveland for the unexpired portion of a term ending December 31, 1959. Mr. Ryan is President of the Mine Safety Appliances Company, Pittsburgh. As a director of the Pittsburgh Branch he succeeds Admiral Ben Moreell, formerly Chairman of the Board of Jones & Laughlin Steel Corporation, Pittsburgh, who resigned recently.

DEATH OF DIRECTOR

Mr. Joseph E. Healy, who had served as a director of the Federal Reserve Bank of Richmond since January 1, 1956, died on October 12, 1958. Mr. Healy was President of The Citizens National Bank of Hampton, Hampton, Virginia.

National Summary of Business Conditions

Released for publication October 14

Industrial production, construction activity, and nonfarm employment increased further in September, and unemployment was reduced. Personal income continued to expand, but retail sales declined. Total commercial bank credit decreased. From early September to early October, average wholesale prices of agricultural and industrial commodities changed little. Common stock prices rose further to record highs.

INDUSTRIAL PRODUCTION

Industrial production, as measured by the Board's seasonally adjusted index, in September was 137 per cent of the 1947-49 average, one point above the revised August figure. Output of nondurable goods and minerals continued to rise, while production of durable goods showed no change.

Among durable goods industries, a marked curtailment in auto assemblies offset gains in other lines. Steel mill operations rose to 66 per cent of capacity from 61 per cent in August, and in early October ingot production averaged 72 per cent. Output of construction materials also expanded further in September. Activity in most business equipment industries and production of furniture and other household goods continued

to increase. Auto assemblies, after seasonal adjustment, were curtailed about two-fifths by prolonged model-changeovers and by continuing work stoppages. Dealers' stocks of new autos were reduced further and at the end of September were about one-fifth below last year's model-changeover low.

Activity in most industries producing non-durable goods advanced further in September, and minerals production continued to rise as crude oil output and metal mining operations expanded.

CONSTRUCTION

Private housing starts rose further in September to a seasonally adjusted annual rate of more than 1.2 million units—the highest level since the autumn of 1955. Total construction activity rose for the fourth straight month, and the seasonally adjusted annual rate of \$50.2 billion was close to the record high reached in December 1957. The September gain occurred mainly in private residential and public construction activity. Public utility construction advanced slightly while commercial building declined somewhat and the prolonged decline in industrial construction continued.

EMPLOYMENT

Seasonally adjusted nonfarm employment rose 100,000 further in September but, at 50.7 million, was 1.6 million below a year earlier. September increases were concentrated in durable goods manufacturing industries. Weekly earnings at factories continued to rise, reflecting increases for both weekly hours and hourly earnings, and were 3 per cent higher than a year earlier. Unemployment declined about 600,000 to 4.1 million; the seasonally adjusted rate of unemployment decreased to 7.2 per cent of the civilian labor force, but remained substantially higher than a year earlier.

DISTRIBUTION

Seasonally adjusted retail sales declined somewhat in September from the improved July-August level. Sales fell off at department stores and at

Federal Reserve indexes, seasonally adjusted. Monthly figures, latest shown are for September.

specialty stores selling mainly apparel and household goods, following substantial increases earlier. Department store stocks, seasonally adjusted, were the same at the end of August as in the previous two months and were 3 per cent below a year earlier.

COMMODITY PRICES

The wholesale commodity price index continued relatively stable from early September to early October. In general, changes in prices of livestock, meats, and other foodstuffs were small and offsetting. Average prices of industrial commodities also changed little although, with industrial demands expanding, there were increases in prices of nonferrous metals and some other sensitive materials. In addition, 1959 autos were being introduced at prices generally higher than those for 1958 models.

BANK CREDIT AND RESERVES

Total credit at city banks declined \$700 million over the four weeks ending October 1 as reductions in bank holdings of U. S. Government securities were offset only in part by increases in loans and in holdings of other securities. A rise in

business loans in mid-September was associated primarily with income tax payments and was followed by some decline. On October 8 and 10, banks acquired substantial amounts of Treasury bills and Treasury notes offered for cash.

Member bank borrowings from the Federal Reserve averaged \$460 million over the four weeks ending October 8, compared with \$365 million in the previous four weeks, and excess reserves averaged \$590 million, about the same as in the earlier period. Reserves were absorbed mainly by Federal Reserve sales of U. S. Government securities and further gold outflows and were supplied by reductions in required reserves and changes in other factors.

SECURITY MARKETS

Short-term interest rates rose further from mid-September to mid-October, reflecting in part the Treasury cash borrowing in early October of \$3.7 billion short-term securities. The average yield on long-term U. S. Government bonds rose to a new postwar high in early October, but then declined somewhat. Yields on corporate bonds continued to increase, while those on State and local government bonds declined slightly.

Bureau of Labor Statistics indexes. "Other" wholesale prices exclude processed foods, included in total but not shown separately. Monthly figures, latest shown: August for consumer prices, and September estimates for wholesale prices.

Weekly average market yields for long-term U. S. Government 2½ per cent bonds and for longest Treasury bills; latest shown are for week ending October 10.

Tables on the following pages include the principal statistics of current significance relating to financial and business developments in the United States. The data relating to Federal Reserve Banks, member banks of the Federal Reserve System, and department store trade, and the consumer credit estimates are derived from regular reports made to the Board; production indexes are compiled by the Board on the basis

of material collected by other agencies; figures for gold stock, currency in circulation, Federal finance, and Federal credit agencies are obtained from Treasury statements; the remaining data are obtained largely from other sources. Back figures for 1941 and prior years for banking and monetary tables, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

^p Preliminary.¹ Averages of daily closing figures for reserves and borrowings and of daily opening figures for other items, inasmuch as reserves required are based on deposits at opening of business.² Weekly figures of required, excess, and free reserves of all member

banks and of country banks are estimates.

³ Demand deposits subject to reserve requirements, i.e., gross demand deposits minus cash items reported as in process of collection and demand balances due from domestic banks.⁴ Free reserves are excess reserves less borrowings.

FEDERAL RESERVE BANK DISCOUNT RATES

[Per cent per annum]

Federal Reserve Bank	Discounts for and advances to member banks						Advances to individuals, partnerships, or corporations other than member banks secured by direct obligations of the U. S. (last par. Sec. 13)		
	Advances secured by Government obligations and discounts of and advances secured by eligible paper (Secs. 13 and 13a) ¹			Other secured advances [Sec. 10(b)]					
	Rate on Sept. 30	In effect beginning—	Previous rate	Rate on Sept. 30	In effect beginning—	Previous rate	Rate on Sept. 30	In effect beginning—	Previous rate

¹ Rates shown also apply to advances secured by obligations of Federal intermediate credit banks maturing within 6 months.

NOTE.—Maximum maturities. Discounts for and advances to member banks: 90 days for discounts and advances under Sections 13 and 13a of the Federal Reserve Act except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not exceeding 6

months and 9 months, respectively, and advances secured by obligations of Federal intermediate credit banks maturing within 6 months are limited to maximum maturities of 15 days; 4 months for advances under Section 10(b). Advances to individuals, partnerships, or corporations under the last paragraph of Section 13: 90 days.

1946—Apr. 25	1	Sept. 12	2
		In effect Oct. 1, 1958	2

¹ Under Secs. 13 and 13a, as described in table above.

* Preferential rate for advances secured by Govt. securities maturing or callable in 1 year or less in effect during the period Oct. 30, 1942—Apr. 24, 1946. The rate of 1 per cent was continued for discounts of and advances secured by eligible paper.

NOTE.—Repurchase rate on U. S. Govt. securities. In 1955, 1956, and 1957 this rate was the same as the discount rate except in the following periods (rates in percentages): 1955—May 4–6, 1.65; Aug. 4, 1.85; Sept. 1–2, 2.10; Sept. 8, 2.15; Nov. 10, 2.375; and 1956—Aug. 24–29, 2.75; 1957—Aug. 22, 3.50.

MARGIN REQUIREMENTS¹

[Per cent of market value]

Prescribed in accordance with Securities Exchange Act of 1934	Apr. 23, 1955–Jan. 15, 1958	Jan. 16, 1958–Aug. 4, 1958	Effective Aug. 5, 1958
Regulation T:			
For extensions of credit by brokers and dealers on listed securities	70	50	70
For short sales	70	50	70
Regulation U:			
For loans by banks on stocks	70	50	70

¹ Regulations T and U limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of extension; margin requirements are the difference between the market value (100%) and the maximum loan value.

¹ Includes applications approved conditionally by the Federal Reserve Banks and under consideration by applicant.

² Includes industrial loans past due 3 months or more, which are not included in industrial loans outstanding in weekly statement of condition of Federal Reserve Banks.

³ Not covered by Federal Reserve Bank commitment to purchase or discount.

NOTE.—The difference between amount of applications approved and the sum of the following four columns represents repayments of advances, and applications for loans and commitments withdrawn or expired.

¹ Loans made by private financing institutions and guaranteed by Government procurement agencies, pursuant to the Defense Production Act of 1950. Federal Reserve Banks act as fiscal agents of the guaranteeing agencies in these transactions, and the procedure is governed by Regulation V of the Board of Governors.

NOTE.—The difference between guaranteed loans authorized and sum of loans outstanding and additional amounts available to borrowers under guarantee agreements outstanding represents amounts repaid, guarantees authorized but not completed, and authorizations expired or withdrawn.

FEDERAL RESERVE BANK RATES ON INDUSTRIAL LOANS¹

[In effect Sept. 30. Per cent per annum]

Federal Reserve Bank	To industrial or commercial businesses		To financing institutions		
	On loans ²	On commitments	On discounts or purchases		On commitments
			Portion for which institution is obligated	Re-main-ing portion	
Boston.....	3½-6	½-1½	(3)	(4)	½-1½
New York.....	4-6	½-1½	(3)	(4)	½-1½
Philadelphia.....	4-6	½-1½	(5)	(4)	½-1½
Cleveland.....	3½-6	½-1½	(3)	(4)	½-1½
Richmond.....	4-6	½-1½	(3)	(4)	½-1½
Atlanta.....	2¼-5¼	1-1½	(3)	(4)	(6)
Chicago.....	3½-6	½-1½	3½-6	3½-6	½-1½
St. Louis.....	2¼-5¼	½-1½	(3)	(4)	½-1½

Kansas City.....	4-6	½-1½	(3)	(4)	½-1½
Dallas.....	4-6	½-1½	(3)	(4)	½-1½
San Francisco.....	4-6	½-1½	(3)	(4)	½-1½

¹ Rates on industrial loans, discounts or purchases of loans, and commitments under Sec. 13b of the Federal Reserve Act. Maturities not exceeding five years.

² Including loans made in participation with financing institutions.

³ Rate charged borrower less commitment rate.

⁴ Rate charged borrower. ⁵ Rate charged borrower but not to exceed 1 per cent above the discount rate.

⁶ Twenty-five per cent of loan rate. Charge of ½ per cent per annum is made on undisbursed portion.

⁷ Charge of ¼ per cent per annum is made on undisbursed portion.

FEES AND RATES ON LOANS GUARANTEED UNDER REGULATION V¹

[In effect Sept.30]

Fees Payable to Guaranteeing Agency by Financing Institution on Guaranteed Portion of Loan

Percentage of loan guaranteed	Guarantee fee (percentage of interest payable by borrower)	Percentage of any commitment fee charged borrower
70 or less.....	10	10
75.....	15	15
80.....	20	20
85.....	25	25
90.....	30	30
95.....	35	35
Over 95.....	40-50	40-50

Maximum Rates Financing Institution May Charge Borrower [Per cent per annum]

Interest rate.....	6 ½
Commitment rate.....	

¹ Schedule of fees and rates established by the Board of Governors on loans made by private financing institutions and guaranteed by Government procurement agencies, pursuant to the Defense Production Act of 1950. Federal Reserve Banks act as fiscal agents of the guaranteeing agencies in these transactions, and the procedure is governed by Regulation V of the Board of Governors.

¹ Outside Treasury and Federal Reserve Banks. Includes any paper currency held outside the continental limits of the United States. Totals for other end-of-month dates are shown in table above; totals for Wednesday dates, in table on p. 1172.² Includes \$156,039,431 held as reserve against United States notes and Treasury notes of 1890.³ To avoid duplication, amount of silver dollars and bullion held as security against silver certificates and Treasury notes of 1890 outstanding is not included in total Treasury currency outstanding.⁴ Less than \$500,000.⁵ Because some of the types of currency shown are held as collateral or reserves against other types, a grand total of all types has no special significance and is not shown. See NOTE for explanation of duplications.

NOTE.—There are maintained in the Treasury—(1) as a reserve for United States notes and Treasury notes of 1890—\$156,039,431 in gold bullion; (2) as security for Treasury notes of 1890—an equal dollar amount in standard silver dollars (these notes are being canceled and retired on

receipt); (3) as security for outstanding silver certificates—silver in bullion and standard silver dollars of a monetary value equal to the face amount of such silver certificates; and (4) as security for gold certificates—gold bullion of a value at the legal standard equal to the face amount of such gold certificates. Federal Reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal Reserve Bank. Federal Reserve notes are secured by the deposit with Federal Reserve agents of a like amount of gold certificates or of gold certificates and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act, or of direct obligations of the United States. Each Federal Reserve Bank must maintain a reserve in gold certificates of at least 25 per cent against its Federal Reserve notes in actual circulation. Gold certificates deposited with Federal Reserve agents as collateral, and those deposited with the Treasury of the United States as a redemption fund, are counted as reserve. Gold certificates, as herein used, includes credits with the Treasurer of the United States payable in gold certificates. Federal Reserve Bank notes and national bank notes are in process of retirement.

^p Preliminary.¹ Represents all commercial and savings banks, Federal Reserve Banks, Postal Savings System, and Treasury currency funds (the gold account, Treasury currency account, and Exchange Stabilization Fund).² Excludes interbank time deposits; U. S. Treasurer's time deposits, open account; and deposits of Postal Savings System in banks.³ Prior to June 30, 1947, includes a small amount of demand deposits.⁴ Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.⁵ Seasonally adjusted series begin in 1947 and are available only for last Wednesday of the month. For back figures, see BULLETIN for July 1957, pp. 828-29.

NOTE.—For description of statement and back figures, see BULLETIN for January 1948, pp. 24-32. The composition of a few items differs slightly from the description in the BULLETIN article; stock of Federal Reserve Banks held by member banks is included in other securities and in capital and miscellaneous accounts, net, and balances of the Postal Savings System and the Exchange Stabilization Fund with the U. S. Treasury are netted against capital and miscellaneous accounts, net, instead of against U. S. Govt. deposits and Treasury cash. Total deposits and currency shown in the monthly Chart Book excludes foreign bank deposits, net, and Treasury cash. Except on call dates, figures are rounded to nearest \$100 million and may not add to the totals.

PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF ALL BANKS, BY CLASSES¹

^p Preliminary.

¹ All banks in the United States. All banks comprise all commercial banks and all mutual savings banks. All commercial banks comprise all nonmember commercial banks and all member banks (including (1) one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively, and (2) a noninsured non-deposit trust company, but excluding three mutual savings banks that became members in 1941). Stock savings banks and nondeposit trust companies are included with commercial banks. Number of banks includes a few noninsured banks for which asset and liability data are not

available. Comparability

PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF ALL BANKS, BY CLASSES¹—Continued

[Figures partly estimated except on call dates. Amounts in millions of dollars]

⁴ Beginning with Dec. 31, 1947, the all-bank series was revised as announced in November 1947 by the Federal bank supervisory agencies. At that time a net of 115 noninsured nonmember commercial banks with total loans and investments of about \$110 million was added, and 8 banks with total loans and investments of \$34 million were transferred

from noninsured mutual savings to nonmember commercial banks.

⁵ Less than \$5 million. Because preliminary data are rounded to the nearest \$10 million no amount is shown except on call dates.

For other notes see preceding and opposite pages.

PRINCIPAL ASSETS AND LIABILITIES AND NUMBER OF ALL BANKS, BY CLASSES¹—Continued

[Amounts in millions of dollars]

Class of bank and date	Loans and investments				Cash assets ²	Total assets—Total liabilities and capital accounts ³	Deposits					Total capital accounts	Number of banks
	Total	Loans	U. S. Govt. obligations	Other securities			Total ²	Inter-bank ²	Other

¹ All commercial banks in the United States. These figures exclude data for banks in U. S. possessions except for one bank in Alaska and one in the Virgin Islands that became members on Apr. 15, 1954, and May 31, 1957, respectively. During 1941 three mutual savings banks became members of the Federal Reserve System; these banks are included in member banks but are not included in all insured commercial

banks or all commercial banks. Comparability of figures for classes of banks is affected somewhat by changes in Federal Reserve membership, insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

For other notes see opposite page.

RESERVES AND LIABILITIES OF COMMERCIAL BANKS, BY CLASSES¹

[In millions of dollars]

Class of bank and call date	Re-serves with Federal Reserve Banks	Cash in vault	Bal-ances with do-mestic banks ⁵	De-mand de-posits ad-justed ⁶	Demand deposits					Time deposits				Bor-rows	Cap-ital ac-counts

² Beginning June 30, 1948, figures for various loan items are shown gross (i.e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown net.

³ Breakdowns of loan, investment, and deposit classifications are not available prior to 1947; summary figures for earlier dates appear in the preceding table.

⁴ Central reserve city banks.

⁵ Beginning June 30, 1942, excludes reciprocal bank balances, which on Dec. 31, 1942, aggregated \$513 million at all member banks and \$525 million at all insured commercial banks.

⁶ Demand deposits other than interbank and U. S. Govt., less cash items reported as in process of collection.

For other notes see opposite page.

¹ Data for a sample of about 210 banks reporting changes in their larger loans; these banks hold about 95 per cent of total commercial and industrial loans of all weekly reporting member banks and about 75 per cent of those of all commercial banks.

² Figures for periods other than weekly are based on weekly changes.

³ Includes machinery and transportation equipment.

⁴ Prior to week ending Jan. 11, 1956, included changes in agricultural loans.

⁵ Includes increase of \$318 million resulting from errors disclosed incident to survey of credit extended to real estate mortgage lenders.

⁶ Corrected

¹ Monthly and weekly yields are averages of daily figures for U. S. Govt. and corporate bonds. Yields of State and local govt. general obligations are based on Thursday figures; and of preferred stocks, on Wednesday figures. Figures for common stocks are as of the end of the period, except for annual averages.

² Series is based on bonds maturing or callable in 10 years or more.

³ Moody's Investors Service. State and local govt. bonds include general obligations only.

⁴ Includes bonds rated Aa and A, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat.

⁵ Standard and Poor's Corporation. Preferred stock ratio is based on 8 median yields in a sample of noncallable issues—12 industrial and 2 public utility. For common stocks, the dividend/price and the earnings/price ratios are now computed for the 500 stocks in the price index, but figures prior to mid-1957 are based on the 90 stocks formerly included in the daily price index.

¹ Monthly and weekly data for (1) U. S. Govt. bond prices, Standard and Poor's common stock indexes, and volume of trading are averages of daily figures; (2) municipal and corporate bond prices are based on Wednesday closing prices; and (3) the Securities and Exchange Commission series on common stock prices are based on weekly closing prices.

² Prices derived from average market yields in preceding table on basis of an assumed 3 per cent, 20-year bond.

³ Prices derived from average yields, as computed by Standard and Poor's Corporation, on basis of a 4 per cent, 20-year bond.

⁴ Average daily volume of trading in stocks on the New York Stock Exchange for a 5½-hour trading day.

¹ Revised.

¹ Ledger balances of member firms of the New York Stock Exchange carrying margin accounts, as reported to the Exchange. Customers' debit and free credit balances exclude balances maintained with the reporting firm by other member firms of national securities exchanges and balances of the reporting firm and of general partners of the reporting firm. Balances are net for each customer—i. e., all accounts of one customer are consolidated. Money borrowed includes borrowings from banks and from other lenders except member firms of national securities exchanges. Data are as of the end of the month, except money borrowed, which is as of the last Wednesday of the month beginning June 1955.

² Figures are for last Wednesday of month for weekly reporting member banks, which account for about 70 per cent of all loans for this purpose. Column 5 includes some loans for purchasing or carrying U. S. Govt. securities (such loans are reported separately only by New York and Chicago banks). On June 30, 1956, reporting banks outside New York and Chicago held \$51 million of such loans. On the same date insured commercial banks not reporting weekly held loans of \$28 million for purchasing and carrying U. S. Govt. securities and of \$384 million for other securities. Noninsured banks had \$33 million of such loans, probably mostly for purchasing or carrying other securities.

¹ Figures are for all life insurance companies in the United States.² Represents issues of foreign governments and their subdivisions and bonds of the International Bank for Reconstruction and Development.³ These represent annual statement asset values, with bonds carried on an amortized basis and stocks at end-of-year market value.⁴ These represent book value of ledger assets. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately, but are included in total, in "Other assets."

NOTE.—Figures for 1957 and 1958 have been revised.

n.a. Not available.

¹ Figures are for all savings and loan associations in the United States. Data beginning 1950 are based on monthly reports of insured associations and annual reports of noninsured associations. Data prior to 1950 are based entirely on annual reports.² Includes gross mortgages with no deduction for mortgage pledged shares.³ Beginning January 1958, no deduction is made for mortgage pledged shares. These have declined consistently in recent years and amounted to \$34 million at the end of 1957.⁴ Includes other loans, stock in the Federal home loan banks and other investments, real estate owned and sold on contract, and office buildings and fixtures.

NOTE.—Data for 1957 and 1958 are preliminary.

NOTE.—Statistics beginning Mar. 31, 1956, reflect the expanded coverage and the new classification of agencies now reported in the *Treasury Bulletin*. The revised statement includes a larger number of agencies, and their activities are classified according to the type of fund they represent. Funds are combined in the table above, but are shown separately in the table on the following page. Classifications by supervisory authorities are those in existence currently. Where current Treasury compilations do not provide a detailed breakdown of loans, these items have been classified by Federal Reserve on basis of information about the type of lending activity involved.

* Totals reflect exclusion of agencies reporting other than quarterly.
¹ Figures for trust revolving funds include interagency items. For all types of funds combined, loans by purpose and agency are shown on a gross basis; total loans and all other assets, on a net basis, i.e., after reserve for losses.
² Coverage changed from preceding period (see also NOTE).

³ Effective Jan. 1, 1957, the production credit corporations were merged in the Federal intermediate credit banks, pursuant to the Farm Credit Act of 1956, approved July 26, 1956 (70 Stat. 659). Thereafter operations of the banks are classified as trust revolving transactions.

⁴ Less than \$500,000.

⁵ Figures represent largely the Treasury loan to the United Kingdom, and through 1952 are based in part on information not shown in Treasury compilation.

⁶ Figure derived by Federal Reserve.

⁷ Includes investment of the Agricultural marketing revolving fund in the banks for cooperatives; Treasury compilations prior to 1956 classified this item as an interagency asset.

⁸ Includes \$1,000 million due under the agreement with Germany signed Feb. 27, 1953, and lend-lease and surplus property balances due the United States in the principal amount of \$1,966 million.

PRINCIPAL ASSETS AND LIABILITIES OF FEDERAL BUSINESS-TYPE ACTIVITIES

[Based on compilation by Treasury Department. In millions of dollars]

^p Preliminary.

n.a. Not available.

¹ Consists primarily of interest payments by Treasury to trust accounts and to Treasury by Govt. agencies, transfers to trust accounts representing

Budget expenditures, and payroll deductions for Federal employees retirement funds.

² Small adjustments to arrive at this total are not shown separately.

For other notes, see opposite page.

DETAILS OF FEDERAL FISCAL OPERATIONS

³ Consists primarily of (1) intra-Governmental transactions as described in note 1, (2) net accruals over payments of interest on savings bonds and Treasury bills, (3) Budget expenditures involving issuance of Federal securities, (4) cash transactions between International Monetary Fund and the Treasury, (5) reconciliation items to Treasury cash, and (6) net operating transactions of Govt. sponsored enterprises.

⁴ Primarily adjustments 2, 3, and 4, described in note 3.

⁵ Excludes net transactions of Govt. sponsored enterprises, which are included in the corresponding columns above.

⁶ Includes transfers to Federal disability insurance trust fund.

⁷ Represents the sum of taxes for old-age insurance, railroad retirement, and unemployment insurance.

⁸ For more details, see the 1959 *Budget document* and the *Treasury Bulletin*, Table 3.

⁹ Includes stockpiling and defense production expansion not shown separately.

For other notes, see opposite page.

¹ Revised.

² Includes the Postal Savings System.

³ Includes holdings by banks in territories and insular possessions, which amounted to about \$284 million on Dec. 31, 1957.

⁴ Includes savings and loan associations, dealers and brokers, foreign accounts, corporate pension funds, and nonprofit institutions.

NOTE.—Reported data for Federal Reserve Banks and U. S. Govt. agencies and trust funds; Treasury Department estimates for other groups.

¹ Estimates of new issues maturing in more than one year sold for cash in the United States.² Gross proceeds are derived by multiplying principal amounts or number of units by offering price.³ Includes guaranteed issues.⁴ Issues not guaranteed.⁵ Represents foreign governments, International Bank for Reconstruction and Development, and domestic eleemosynary and other nonprofit organizations.⁶ Estimated net proceeds are equal to estimated gross proceeds less cost of flotation, i.e., compensation to underwriters, agents, etc., and expenses.⁷ Represents proceeds for plant and equipment and working capital.⁸ Represents proceeds for the retirement of mortgages and bank debt with original maturities of more than one year. Proceeds for retirement of short-term bank debt are included under the uses for which the bank debt was incurred.⁹ Less than \$500,000.¹⁰ Represents all issues other than those for retirement of securities.

¹ Includes 26 companies in groups not shown separately, as follows: textile mill products (10); paper and allied products (15); miscellaneous (1).

² Includes 25 companies in groups not shown separately, as follows: building materials (12); transportation equipment other than automobile (6); and miscellaneous (7).

NOTE.—*Manufacturing corporations.* Sales data are obtained from the Securities and Exchange Commission; other data from published company reports.

Railroads. Figures are for Class I line-haul railroads (which account for 95 per cent of all railroad operations) and are obtained from reports of the Interstate Commerce Commission.

Electric power. Figures are for Class A and B electric utilities (which account for about 95 per cent of all electric power operations) and are obtained from reports of the Federal Power Commission, except that quarterly figures on operating revenue and profits before taxes are partly

estimated by the Federal Reserve to include affiliated nonelectric operations.

Telephone. Revenues and profits are for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Company) and for two affiliated telephone companies, which together represent about 85 per cent of all telephone operations. Dividends are for the 20 operating subsidiaries and the two affiliates. Data are obtained from the Federal Communications Commission.

All series. Profits before taxes refer to income after all charges and before Federal income taxes and dividends. For detailed description of series (but not for figures), see pp. 662-66 of the BULLETIN for June 1949 (manufacturing); pp. 215-17 of the BULLETIN for March 1942 (public utilities); and p. 908 of the BULLETIN for September 1944 (electric power). Revised data annually beginning with 1939 and quarterly beginning with 1946 are available from the Division of Research and Statistics.

¹ Reflects cash transactions only. As contrasted with data shown on p. 1198, new issues exclude foreign and include offerings of open-end investment companies, sales of securities held by affiliated companies or RFC, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose shown on p. 1198.

^p Preliminary.¹ Derived figures, which include negligible amount of farm loans held by savings and loan associations.² Derived figures, which include debt held by Federal land banks and Farmers Home Administration.

NOTE.—Figures for first three quarters of each year are Federal Reserve estimates. Financial institutions represent commercial banks (including nondeposit trust companies but not trust departments), mutual savings banks, life insurance companies, and savings and loan associations.

Federal agencies represent HOLC, FNMA, and VA (the bulk of the amounts through 1948 held by HOLC, since then by FNMA). Other Federal agencies (amounts small and separate data not readily available currently) are included with individuals and others.

Sources.—Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, Institute of Life Insurance, Departments of Agriculture and Commerce, Federal National Mortgage Association, Veterans Administration, Comptroller of the Currency, and Federal Reserve.

^p Preliminary.¹ Represents all banks in the United States and possessions.² Includes loans held by nondeposit trust companies but excludes holdings of trust departments of commercial banks. March and September figures are Federal Reserve estimates based on data from Member Bank Call Report and from weekly reporting member banks.³ Figures for 1941 and 1945, except for the grand total, are estimates

based on Federal Reserve preliminary tabulation of a revised series of banking statistics. March and September figures are Federal Reserve estimates based in part on data from National Association of Mutual Savings Banks.

Sources.—All-bank series prepared by Federal Deposit Insurance Corporation from data supplied by Federal and State bank supervisory agencies, Comptroller of the Currency, and Federal Reserve.

^r Revised.

NOTE.—For loans acquired, the monthly figures may not add to annual totals, and for loans outstanding, the end-of-December figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset

values, and because data for year-end adjustments are more complete.
Source.—Institute of Life Insurance; end-of-year figures are from *Life Insurance Fact Book*, and end-of-month figures from the *Tally of Life Insurance Statistics* and *Life Insurance News Data*.

¹ Monthly figures do not reflect mortgage amendments included in annual totals.² These loans are not ordinarily secured by mortgages.³ Includes a small amount of alteration and repair loans, not shown separately; only such loans in amounts of more than \$1,000 need be secured.

NOTE.—FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amount of loans closed. Figures do not take account of principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

Sources.—Federal Housing Administration and Veterans Administration.

¹ Represents all consumer instalment credit extended for the purpose of purchasing automobiles and other consumer goods, whether held by retail outlets or financial institutions. Includes credit on purchases by individuals of automobiles or other consumer goods that may be used in part for business.

² Represents repair and modernization loans held by financial institutions; holdings of retail outlets are included in other consumer goods paper.

NOTE.—Monthly figures for the period December 1939 through 1947, and a general description of the series are shown on pp. 336-54 of the BULLETIN for April 1953; monthly figures for 1948-56, in the BULLETINS for October 1956, pp. 1035-42, and December 1957, pp. 1420-22. A detailed description of the methods used to derive the estimates may be obtained from Division of Research and Statistics.

¹ Obtained by subtracting instalment credit repaid from instalment credit extended.

NOTE.—Monthly figures for 1940–54 are shown on pp. 1043–54 of the BULLETIN for October 1956; for 1955–56, in the BULLETIN for December 1957, pp. 1420–22.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown

in the BULLETIN for January 1954, pp. 9–17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

¹ Data on extensions and repayments have been adjusted to avoid duplications resulting from large transfers of other consumer goods paper. As a result, the differences between extensions and repayments for some types of holders do not equal the changes in outstanding credit.

² Obtained by subtracting instalment credit repaid from instalment credit extended, except as indicated in note 1.

NOTE.—Monthly figures for 1940-54 are shown on pp. 1043-54 of the BULLETIN for October 1956; for 1955-56, in the BULLETIN for December 1957, pp. 1420-22.

A discussion of the composition and characteristics of the data and a description of the methods used to derive the estimates are shown in the BULLETIN for January 1954, pp. 9-17. Estimates of instalment credit extended and repaid are based on information from accounting records of retail outlets and financial institutions and often include charges incurred under the instalment contract. Renewals and refinancing of loans, repurchases and resales of instalment paper, and certain other transactions may increase the amount of both credit extended and credit repaid without adding to the amount of credit outstanding.

SELECTED BUSINESS INDEXES

[1947-49=100, unless otherwise noted. The terms "adjusted" and "unadjusted" refer to adjustment of monthly figures for seasonal variation]

*Estimated. p Preliminary. r Revised.

* Average per working day.

¹ Indexes beginning 1956 are based on data for 48 States from F. W. Dodge Corporation, 1956-57=100. Figures for earlier years are three-month moving averages, based on data for 37 States east of the Rocky Mountains, 1947-49=100; the data for 1956 on this basis were: Total, 268; Residential, 271; and all other, 266. A description of the old index,

including seasonal adjustments, may be obtained from the Division of Research and Statistics.

² The indexes of employment and payrolls, wholesale commodity prices, and consumer prices are compiled by the Bureau of Labor Statistics. Nonagricultural employment covers employees only and excludes personnel in the armed forces. The consumer price index is the revised series, reflecting, beginning January 1953, the inclusion of some new series and revised weights; prior to January 1953, indexes are based on the "interim adjusted" and "old" indexes converted to the base 1947-49=100.

NOTE.—A number of groups and subgroups include individual series not published separately, and metal fabricating contains the ordnance group in addition to the groups shown. Certain types of combat materiel

are included in major group totals but not in individual indexes for autos, farm machinery, and some other products, as discussed in the BULLETIN for December 1953, pp. 1269-71.

For description and back figures, see BULLETIN for December 1953 pp. 1247-93 and pp. 1298-1328, respectively.

[¶] Preliminary.

n.a. Not available.

¹ Represents units started under commitments of FHA or VA to insure or guarantee the mortgage. VA figures after June 1950 and all FHA

figures are based on filed office reports of first compliance inspections; earlier VA figures are estimates based on loans-closed information.

¹ Includes self-employed, unpaid family, and domestic service workers.² Beginning 1957 persons waiting to start new wage and salary jobs and those on temporary layoff, previously considered as employed (with a job but not at work), are classified as unemployed, and a small group in school and waiting to start new jobs (previously included as employed) are classified as *not* in the labor force.

NOTE.—Information relating to persons 14 years of age and over is obtained through interviews of households on a sample basis. Monthly data relate to the calendar week that contains the 12th day; annual data are averages of monthly figures.

* Preliminary.

* Revised.

¹ Figures for sales are the average per trading day, while those for stocks are as of the end of the month or averages of monthly data.

NOTE.—For description of the series and for monthly indexes beginning 1947, see BULLETIN for December 1957, pp. 1323-52. Figures prior to 1947 may be obtained from the Division of Research and Statistics.

^p Preliminary.^r Revised.

¹ These figures are *not* estimates for all department stores in the United States. They are the actual dollar amounts reported by a group of department stores located in various cities throughout the country. In 1957, sales by these stores accounted for about 45 per cent of estimated total department store sales.

² Derived from the reported figures on sales and stocks.

³ Derived from receipts and reported figures on outstanding orders.

⁴ The first three ratios are of stocks and/or orders at the end of the month to sales during the month. The final ratio is based on totals of sales and receipts for the month.

NOTE.—For description and monthly figures for back years, see BULLETIN for October 1952, pp. 1098–1102.

^p Preliminary.¹ Monthly data are seasonally adjusted totals at annual rates.² Represents compensation for injuries, employer contributions to private pension and welfare funds, and other payments.³ Represents business and professional income, farm income, and rental income of unincorporated enterprise; also a noncorporate inventory valuation adjustment.⁴ Represents government social insurance benefits, direct relief, mustering-out pay, veterans' readjustment allowances and other payments, as

well as consumer bad debts and other business transfers.

⁵ Prior to 1952 includes employee contributions only; beginning January 1952, includes also contributions to the old-age and survivors' insurance program of the self-employed to whom coverage was extended under the Social Security Act Amendments of 1950. Personal contributions are not included in personal income.⁶ Represents personal income exclusive of net income of unincorporated farm enterprise, farm wages, agricultural net interest, and net dividends paid by agricultural corporations.

Summary totals and comparisons							
Number of banking offices, total.....	33 States		United States— all commercial banks	Holding company groups as a percentage of all commercial banks in:			
	Holding company groups	All commercial banks		33 States	United States		
	Banks.....	1417	10,387	13,564	18.09	15.89	
Branches.....	1851	5,280	7,967				
Deposits (in millions of dollars).....	115,139	155,193	201,306	19.75	17.52		

¹ The data include: (1) banks of which the bank holding companies owned or controlled 25 per cent or more of the outstanding stock, and (2) eight domestic commercial banks that are themselves bank holding companies. The eight banks have 52 branches and deposits aggregating \$1,549,192,000. Exclusion of these 60 banking offices and their deposits from the data in the table would reduce the percentage ratios shown in the table as follows: Holding company groups to all commercial banks in 33 States—number of banking offices, from 8.09 to 7.71; deposits, from 9.75 to 8.76; holding company groups to all commercial banks in United States—number of banking offices, from 5.89 to 5.61; deposits, from 7.52 to 6.75.

² Data for individual States represent bank holding companies controlling banks in the respective States rather than registered bank holding companies whose principal offices are located in such States. Total does not equal sum of State figures because it has been corrected for duplications; that is, holding companies that control banks in more than one State are included in the total only once.

The 50 bank holding companies included in the total represent only 44 separate bank groups because in six cases the bank group is controlled by a bank holding company that is in turn controlled by another bank holding company. These groups are located in the following States: Florida, one; Georgia, two; Indiana, one; Massachusetts, one; and Virginia, one.

Tables on the following pages include the principal available statistics of current significance relating to international capital transactions of the United States, foreign gold reserves and dollar holdings, and foreign central banks. Figures on international capital transactions of the United States are collected by the Federal Reserve Banks from banks, bankers, brokers, and

dealers in the United States in accordance with the Treasury Regulation of November 12, 1934. Other data are compiled largely from regularly published sources such as central bank statements and official statistical bulletins. Back figures for 1941 and prior years, together with descriptive text, may be obtained from the Board's publication, *Banking and Monetary Statistics*.

² Preliminary. n.a. Not available.¹ Short-term liabilities reported in these statistics represent principally deposits and U. S. Govt. obligations maturing in not more than one year from their date of issue, held by banking institutions in the United States; small amounts of bankers' acceptances and commercial paper and of liabilities payable in foreign currencies are also included.² Includes International Bank for Reconstruction and Development, International Monetary Fund, and United Nations and other international organizations. Excludes Bank for International Settlements, reported under Other Europe.³ Represents funds held with banks and bankers in the United States (and in accounts with the U. S. Treasury) by foreign central banks and by foreign central governments and their agencies (including official purchasing missions, trade and shipping missions, diplomatic and consular establishments, etc.).⁴ Part of United Arab Republic since February 1958.⁵ These data are based on reports by banks in the Second (New York) Federal Reserve District and include funds held in an account with the U. S. Treasury. They represent a partial breakdown of the amounts shown in the "other" categories in tables 1a-1c.⁶ Based on reports by banks in all Federal Reserve districts.

NOTE.—Statistics on international capital transactions of the United States are based on reports by banks, bankers, brokers, and dealers. Beginning with the BULLETIN for June 1954 (as explained on p. 591 of that issue), tables reflect changes in reporting forms and instructions made as of Mar. 31, 1954, as well as changes in content, selection, and arrangement of material published. For discontinued tables and data reported under previous instructions, see BULLETIN for May 1954, pp. 540-45.

^p Preliminary.

¹ Short-term claims reported in these statistics represent principally the following items payable on demand or with a contractual maturity of not more than one year: loans made to and acceptances made for foreigners; drafts drawn against foreigners that are being collected by banking institutions on behalf of their customers in the United States; and foreign currency balances held abroad by banking institutions and their customers in the United States. Claims on foreigners with a contractual maturity of more than one year reported by U. S. banking institutions

(excluded from these statistics) amounted to \$1,232 million on July 31, 1958. The term foreigner is used to designate foreign governments, central banks, and other official institutions as well as banks, organizations, and individuals domiciled outside the United States, including U. S. citizens domiciled abroad and the foreign subsidiaries and offices of U. S. banks and commercial firms.

² Less than \$500,000.³ Part of United Arab Republic since February 1958.⁴ Includes transactions of international institutions.

^p Preliminary.¹ Excludes U.S.S.R. and other Eastern European countries.

Represents reported gold holdings of central banks and governments and international institutions, unpublished holdings of various central banks and governments, estimated holdings of British Exchange Equalization Account based on figures shown below under United Kingdom, and estimated official holdings of countries from which no reports are received.

² Includes gold in Exchange Stabilization Fund. Gold in active portion of this Fund is not included in regular statistics on gold stock (Treasury gold) used in the Federal Reserve statement "Member Bank Reserves

Reserve Bank Credit, and Related Items" or in the Treasury statement "United States Money, Outstanding and in Circulation, by Kinds."

³ Part of United Arab Republic since February 1958.⁴ Represents holdings of Bank of France (holdings of French Exchange Stabilization Fund are not included).

⁵ Exchange Equalization Account holdings of gold and of United States and Canadian dollars, as reported by British Government. (Gold reserves of Bank of England have remained unchanged at \$1 million since 1939, when Bank's holdings were transferred to Exchange Equalization Account.)

^p Preliminary.¹ Excludes gold holdings of French Exchange Stabilization Fund.² Does not include \$286 million of gold loaned by Bank of France to the French Exchange Stabilization Fund on June 26, 1957.³ Less than \$500,000.⁴ Includes Yugoslavia, Bank for International Settlements (both for its own and European Payments Union account), gold to be distributed by the Tripartite Commission for Restitution of Monetary Gold, and unpublished gold reserves of certain Western European countries.⁵ Includes latest reported figures for gold reserves as follows: Australia (Dec. 31, 1957); Colombia (Feb. 28); and Mexico (May 31).⁶ Part of United Arab Republic since February 1958.⁷ Excludes gold reserves of the U. S. S. R. and other Eastern European countries.

NOTE.—Gold and short-term dollars include reported and estimated official gold reserves, and total dollar holdings as shown in Short-term Liabilities to Foreigners Reported by Banks in the United States, by Countries (Tables I and 1a-1d of the preceding section). U. S. Govt. bonds and notes represent estimated holdings of such securities with original maturities of more than one year; these estimates are based on a survey of selected U. S. banks and on monthly reports of security transactions. For back figures see BULLETIN for March 1956, pp. 304-05.

Notes to tables on international institutions:

- ¹ Currencies include demand obligations held in lieu of deposits.
² Represents principal of authorized loans, less loans not yet effective, repayments, the net amount outstanding on loans sold or agreed to be sold to others, and exchange adjustment.
³ Excludes uncalled portions of capital subscriptions.
⁴ Loans to dependencies are included with member.
⁵ Includes also effective loans agreed to be sold but not yet disbursed.
⁶ Includes \$238 million in loans not yet effective.
⁷ Includes \$240 million not guaranteed by the Bank.
⁸ U. S. Treasury bills purchased with proceeds of sales of gold.
⁹ Transferred to General Reserve.
¹⁰ Countries shown are those with cumulative net drawings of \$25 million or more on the latest date.
¹¹ Represents sales of U. S. dollars by the Fund to member countries for local currencies, less repurchases of such currencies with dollars.

Notes to central bank table on this and opposite page:

¹ Notes issued, less amounts held in banking department.² Gold was transferred on May 1, 1940, to Foreign Exchange Control Board in return for short-term Govt. securities (see BULLETIN for July 1940, pp. 677-78).³ Includes Economic Cooperation Administration.⁴ Less than 50 million francs.⁵ On July 31, 1958, gold reserves were revalued on the basis of 420 francs per U. S. dollar.⁶ Includes 120.1 billion francs of gold loaned to Stabilization Fund.⁷ Under the banking reform, effective Dec. 2, 1957, the Central Bank has been reorganized. The balance sheet has been substantially modified, and figures are not comparable with those shown previously.⁸ This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.

NOTE.—All figures, including gold and foreign exchange, are compiled from official reports of individual banks and are as of the last report date of the month. For details relating to individual items, see BULLETIN for April 1955, p. 443.

* Revised. * Latest month available.

¹ This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.² For the last available reports for Czechoslovakia and Hungary (March and February 1950, respectively), see BULLETIN for September 1950, pp. 1262-63.³ Beginning Mar. 27, 1958, includes gold in Banking Department, previously combined with gold in Issue Department.

NOTE.—All figures, including gold and foreign exchange, are compiled from official reports of individual banks and are as of the last report date of the month.

⁴ On Aug. 1, 1957, the Land Central Banks and the Berlin Central Bank were merged with the Bank of German States (Bank deutscher Länder) and the latter became the German Federal Bank (Deutsche Bundesbank).

⁵ Includes (1) gold and foreign exchange in banking department and (2) in May 1957, the profit resulting from revaluation of gold from

.0275557 to .0117316 grams of fine gold per rial.

⁶ Holdings in each month were 448 million yen.

⁷ Includes gold, silver, and foreign exchange forming required reserve (25 per cent) against notes and other demand liabilities.

For other notes see opposite page.

^r Revised.^{*} Latest month available.¹ In August 1958, a portion of the gold reserves was revalued from 0.549191 to 0.258601 grams of fine gold per rupee.² This figure represents the amount of the country's subscription to the Fund less the bank's local currency liability to the Fund.³ Includes small amount of nongovernment bonds.

NOTE.—All figures, including gold and foreign exchange, are compiled from official reports of individual banks and are as of the last report date of the month.

Turkey.....	6.0	June 1956	Thailand.....	7.0	Feb. 1945						

¹ Rates shown represent mainly those at which the Central bank either discounts or makes advances against eligible commercial paper and/or government securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which the largest proportion of central bank credit operations is understood to be transacted. In certain cases other rates for these countries are given in note 3.

² Since Nov. 1, 1956, the discount rate is set each week at ¼ per cent above the latest average tender rate for Treasury bills.

³ Discounts or advances at other rates include: *Japan*—commercial bank borrowings from the Central bank in excess of individual bank quotas are charged penalty rates exceeding the basic rate shown; *Argentina*—3 and 5 per cent for certain rural and industrial paper, depending on

type of transaction; *Cuba*—4.5 per cent for sugar loans and 4 per cent for loans secured by national public securities; *Indonesia*—various rates depending on type of paper, collateral, commodity involved, etc.; *Chile*—rates in excess of 6 per cent are applied to rediscounts in excess of 50 per cent of the rediscounting bank's capital and reserves, rates of 4 and 2 per cent apply to certain types of agricultural paper; *Costa Rica*—5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper); *El Salvador*—3 per cent for agricultural and industrial paper and 2 per cent for special cases; and *Peru*—4 per cent for industrial paper and mining paper, and 3 per cent for most agricultural paper.

⁴ Since May 16, 1957, this rate applies to advances against commercial paper as well as against government securities and other eligible paper.

¹ Official rate. The basic and preferential rates were discontinued and the new official rate of 18 pesos per U. S. dollar became effective Oct. 28, 1955.

² New free market rate became effective Oct. 28, 1955.

³ Effective Sept. 16, 1957, the Finnish markka was devalued from 230 to 320 markkaa per U. S. dollar.

⁴ On Aug. 12, 1957, the French authorities established an effective rate of 420 francs per U. S. dollar applicable to most foreign exchange transactions. Since Oct. 28, 1957, this rate has applied to all foreign exchange transactions. The official rate of 350 francs per U. S. dollar was changed to 420 francs on June 23, 1958.

⁵ Based on quotations through June 20, 1958.

⁶ Based on quotations beginning Jan. 2, 1958.

Federal Reserve Board Publications

Unless otherwise noted, the material listed may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington 25, D. C. Where a charge is indicated, remittance should accompany order and be made payable to the order of the Board of Governors of the Federal Reserve System. A more complete list, including periodic releases and additional reprints, appeared on pages 747-750 of the June 1958 Bulletin.

THE FEDERAL RESERVE SYSTEM—PURPOSES AND FUNCTIONS. April 1954. 208 pages.

ANNUAL REPORT OF THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

FEDERAL RESERVE BULLETIN. Monthly. Subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents per copy; elsewhere \$7.00 per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or \$5.00 for 12 months.

FEDERAL RESERVE CHART BOOK ON FINANCIAL AND BUSINESS STATISTICS. Monthly. Annual subscription includes one issue of Historical Supplement. Subscription price in the United States and the countries listed above is \$6.00 per annum, 60 cents per copy, or 50 cents each in quantities of 10 or more of a particular issue for single shipment; elsewhere \$7.00 per annum or 70 cents each.

HISTORICAL SUPPLEMENT TO FEDERAL RESERVE CHART BOOK. Issued annually in September. Annual subscription to monthly chart book includes one issue of Supplement. In the United States and countries listed above under *Federal*

Reserve Bulletin, single copies 60 cents each or in quantities of 10 or more for single shipment 50 cents each; elsewhere 70 cents each.

THE FEDERAL RESERVE ACT, as amended through December 31, 1956, with an Appendix containing provisions of certain other statutes affecting the Federal Reserve System. 385 pages. \$1.00.

FLOW OF FUNDS IN THE UNITED STATES, 1939-53. A new accounting record designed to picture the flow of funds through the major sectors of the national economy. December 1955. 390 pages. \$2.75.

A STATISTICAL STUDY OF REGULATION V LOANS. September 1950. 74 pages. 25 cents per copy; in quantities of 10 or more copies for single shipment, 15 cents each.

BANKING AND MONETARY STATISTICS. Statistics of banking, monetary, and other financial developments. November 1943. 979 pages. \$1.50.

RULES OF ORGANIZATION AND RULES OF PROCEDURE—Board of Governors of the Federal Reserve System. 1946. 31 pages.

REGULATIONS OF THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM.

ADMINISTRATIVE INTERPRETATIONS OF REGULATION F—SECTION 17—COMMON TRUST FUNDS. 9 pages.

CONSUMER INSTALMENT CREDIT—Six books (Parts I-IV) giving the results of an intensive study of consumer instalment credit, undertaken by the Board on request of the Council of Economic Advisers by direction of the President, are being distributed through the Superintendent of Documents.

Part I—*Growth and Import*, Volume 1, \$1.25; Volume 2, \$1.00
Part II—*Conference on Regulation*, Volume 1, \$1.75; Volume 2, \$.60
Part III—*Views on Regulation*, \$1.00
Part IV—*Financing New Car Purchases*, \$.60

Requests and remittances for these six books should be directed to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.
