# FEDERAL RESERVE BULLETIN 

April 1965
Volume 51 $\quad$ Number 4

## BOARD OF GOVERNORS

OF THE FEDERAL RESERVE SYSTEM

WASHINGTON

A copy of the Federal Reserve Bulletin is sent to each member bank without charge; member banks desiring additional copies may secure them at a special $\$ 2.00$ annual rate. The regular subscription price in the United additional copies may secure them at a special $\$ 2.00$ annual rate. The reguar subscription price in the United States and its possession, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador,
Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paguay, Peru, El Salvador, Uruguay, and Venezuela is $\$ 6.00$ per annum or 60 cents per copy; elsewhere, $\$ 7.00$ per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or $\$ 5.00$ for 12 months.

## CONSUMER INCOME, SPENDING,

 AND SAVINGersonal income has been rising about as rapidly this year as it did in 1964. Since the large rise in disposable income at the time of the cut in Federal income taxes last March, such income has about kept pace with the rise in personal income. In recent months consumers' purchases of new automobiles have been at very high levels, and their purchases of other goods and of services have expanded further. Nevertheless, their saving in financial forms has continued to show the same rapid expansion that has characterized the entire cyclical upswing.

Over the period since late 1963, consumers' after-tax income and their total consumption expenditures have each increased at an annual rate of about 7.5 per cent-much faster than in the preceding 2 years. Meanwhile, consumer prices have continued to rise slowly. Thus most of the large increase in income has represented a real gain in purchasing power.

Underlying the gains in income and spending has been the continued expansion in output and employment. The rise in personal income in the first quarter, as in 1964, reflected in large part the strong gains in wage and salary payments that accompanied rising employment and rates of pay in nonagricultural industries. During 1964 nonagricultural employment increased by 1.9 million, the largest 12 -month gain since 1959 , and it increased at a faster rate during the first quarter of this year. Although

NoTE.-Seasonally adjusted data. Indexes for personal income and retail sales based on Dept. of Commerce series. Nonagricultural employment, which is based on data for establishments, and unemployment rate are from Bureau of Labor Statistics. Latest figures shown, March.
growth in the labor force was also large, unemployment declined from a rate of 5.5 per cent at the end of 1963 to 4.7 per cent in March.

Consumers' allocation of their incomes between spending and saving was about the same in early 1965 as in early 1964, but in the intervening period it showed pronounced fluctuations. Spending lagged behind the spurt in disposable income just after the tax cut last spring. And again last autumn, when automobile purchases were limited by strikes, spending showed much less rise than income. For the year 1964, the spending rate was lower than in the preceding 2 years, and the rate of saving higher.

The rise in total personal income during 1964 and early 1965 has been the largest increase in this cyclical upswing except for the initial recovery period in 1961. Mainly because of last year's tax cut, the step-up in consumers' disposable income has been more pronounced than the increase in their total income. Consumer prices for goods and services have held to a slow rate of increase, and consumers' real income has advanced sharply.

Personal income. Total personal income in March was at a seasonally adjusted annual rate of $\$ 514$ billion, up more than a fourth from the recession low in early 1961. Since December 1963 the annual rate of increase has been 6 per cent. During 1963 personal income had increased by 5.5 per cent and in 1962 by less than 5 per cent.

Labor income-wages and salaries plus various supplements such as employer contributions to private pension and welfare funds-accounts for more than two-thirds of personal income and for the bulk of its fluctuations. More rapid expansion in labor income has accounted for most of the moderate step-up in personal income since late 1963.

Wages and salaries have increased at an annual rate of 7.5 per cent, as compared with 5 to 5.5 per cent in the preceding 2 years. In the main this development reflects larger gains in employment and longer hours of work.

Employment has increased substantially in most major nonagricultural industries, but perhaps most notably in manufacturing where it has responded to heightened demands by both business and consumers. Manufacturing employment increased as much last year as in the preceding 2 years combined and increased considerably further in early 1965. In March it equaled the peak reached in mid-1953 at the height of the Korean war boom, despite a long-term downward trend in production-worker employment, associated with rising productivity.

Accompanying the large employment gain, average weekly hours of factory workers have also increased. In fact, during the first 3 months of 1965, the average workweek reached the highest level in more than 19 years. Average hourly earnings have continued to increase at a rate of about 3 per cent per year. With fringe benefits included, total hourly compensation per employee has been increasing at a somewhat faster pace. However, the rise has not exceeded the gain in manufacturing productivity.

In line with the step-up in retail sales over the period, trade employment has increased somewhat more rapidly since late 1963 than earlier. Employment and payrolls of State and local governments and of service industries have maintained their strong uptrend. Federal Government employment has been relatively stable, but payrolls have risen moderately over the past year, primarily as a result of salary increases last summer.

While labor income increased more rapidly in 1964 and the first quarter of 1965 than earlier, the total of all other types of personal income did not accelerate. Interest and dividend payments continued to expand at a rapid rate, and the gain in income of nonfarm proprietors was at a moderately faster pace, but farm income declined slightly further.

Transfer payments continued on a moderate uptrend mainly because of payments under the old-age and survivors insurance program. Unemployment compensation, which moves countercyclically, declined with the reduction in unemployment.

[^1]

Note.-Based on Dept. of Commerce seasonally adjusted data. "Other" includes all personal income except wage and salary disbursements. Latest figures shown, March.

Disposable income. Since the end of 1963, disposable income has increased at an annual rate of nearly 7.5 per cent, as compared with 6 per cent for before-tax income. Most of the difference between these increases occurred when the substantially lower withholding rates went into effect as a result of the Federal tax cut enacted in early 1964. In contrast with the recent 7.5 per cent rate of increase, disposable income had increased by about 5.5 per cent in 1963 and by less than 4.5 per cent in 1962.

Note.-Dept. of Commerce seasonally adjusted data. Spending rate is consumption expenditures as a percentage of disposable income. Dashed lines are average spending rates for 1962, 1963, and 1964. Latest figures shown, first quarter 1965.

Incorporated in the law that reduced income tax rates for 1964 was provision for a second stage of reduction effective in 1965. However, most of the tax cut's direct effect on disposable income was experienced in March 1964 when the withholding rate on wages and salaries was reduced to 14 per cent from 18 per cent in one stage, rather than in two stages. The effect was to increase disposable income in 1964 by close to $\$ 8$ billion.

Consumer prices. In spending their larger incomes, consumers have benefited from relative price stability, particularly for goods. Average consumer prices of goods and services have risen by only
about 1 per cent over the past year, the same as the average annual increase since the spring of 1960 . Over this period, the cost of services has risen at a steady 2 per cent a year. Average price increases for commodities have varied more, owing mainly to fluctuations in food prices, but have ranged only from 0.5 to about 1 per cent a year. Over the past year commodity prices have increased 0.7 per cent.

Increases in costs of services over the past year have continued to be widespread, but the over-all rate of increase in this upswing has been smaller than in earlier postwar expansions. The rise in rents, in particular, has been slower. Over the past year, the largest increases have been in transportation services, including sharply higher auto insurance premiums, and in hospital charges and other medical services.

The small price increase for commodities reflects slight increases for food, apparel, and used cars. Prices of new autos are little changed from a year ago, and household durable goods have continued the gradual downtrend of the past several years.

CONSUMER SPENDING

Consumption expenditures began to accelerate late in 1963, in anticipation of passage of the tax cut, and thereafter rose rapidly except during the strikes in the automobile industry last autumn. Over the entire period from late 1963 to early 1965, consumption expenditures increased somewhat more than disposable income. With the added flow of income, consumers increased their spending for goods proportionally more than for services, and for durable goods more than for nondurable goods.

Durable goods. In contrast to the two preceding cyclical upswings when consumer purchases of durable goods tended to level off after an initial sharp rise, such purchases, as Chart 4 shows, have moved up steadily throughout this upswing, except for the dip in the fourth quarter of 1964 , which was due to the auto strikes. Moreover, the increase since late 1963 has been at a faster rate than in the preceding 2 years-an annual rate of 12 per cent compared with 8 per cent. Consumers have spent a steadily rising proportion of their disposable income for durable goods, and in the first quarter of 1965 this share was at its highest level since 1955.

Autos. The dominating feature of consumer demand developments in recent months has been the sharply advanced rate of sales of new cars, shown in Chart 5 . The exceptionally high rate of sales in the past few months-a seasonally adjusted annual rate of close to 10 million units (including imports)-has represented in part a making up for sales lost during the strikes last
autumn, and it is not generally expected to hold throughout the year.

In fact, in recent weeks, sales of new cars have not been showing all of the very large seasonal rise usual at this time of the year; the seasonally adjusted rate declined to about 9.3 million units in March and to a somewhat lower rate in early April. However, trade reports indicate that this may reflect in part capacity limitations on production of the most popular models.

Despite the strikes last autumn, sales of new domestic autos for the first 6 months of the 1965 model year were at an average annual rate of 8.3 million units. This represents the fourth successive step-up in automobile buying, by model year. Sales in the 1964 model year, which closed last September, totaled 7.7 million units, 7 per cent above sales in the preceding model year. Moreover, since the fall of 1962, sales of imported cars-which had been declining for about 3 years-have been rising again. On a calendar year basis, however, total sales of new cars did not exceed the record that had been set in 1955 until 1963. In 1964, sales were 9 per cent above the 1955 level.

The persistent rise in auto purchases throughout this cyclical upswing represents a departure from past experience of a more limited run of "good" auto years. This buoyancy in auto demand has stemmed not only from the favorable income developments of the past 4 years but also from increased replacement needs, a large increase in the driving-age population, the continuing trend to ownership of two or more cars, a steady succession of popular models, and ready availability of instalment credit with 36 -month maturities. Moreover, it appears that demand for new cars has been supported by comparatively high trade-in allowances because used car prices have remained at advanced levels. Since the beginning of 1964 , used car prices have been higher relative to new car prices than at any other time since the Korean war period when production of autos was limited.

Household durable goods. Consumer purchases of furniture and household equipment have followed an unusual pattern during this cyclical upswing. They have shown only a slight upward movement since mid-1964, whereas in the preceding 12 months they had increased sharply. In fact, the rise from mid-1963 to mid1964 accounted for half of the total increase in such purchases over the entire cyclical expansion to date.

The tax cut was undoubtedly an influence on that sharp rise, particularly in the first half of 1964. Another influence may have been the cumulative effect of the unusually persistent expansion in residential construction activity, which extended to early 1964.

Thereafter there was a sizable decrease in residential construction activity, which may have acted to moderate the expansion in consumer purchases of home goods after mid-1964. Another inhibiting influence on purchases of household durable goods in recent months may have been consumers' preferences for buying new automobiles.

While total retail sales of household durable goods appear to have shown little change since last summer, some products have continued to sell especially well. An outstanding feature of this market has been the coming of age of color television. Sales of color television sets have been increasing sharply, and consumer purchases of all types of television sets in late 1964 were up substantially from late 1963. Air conditioners and clothes dryers have also been important growth items.

Consumer buying plans. The findings of the Census Bureau's quarterly survey of consumer buying intentions conducted in

```
CHART A
DURABLE GOODS pace the rise in consumer spending; NONDURABLES
show lorge rise since '63

\footnotetext{
Note-Based on Dept. of Commerce seasonally adjusted data on personal consumption expenditures. Latest figures shown, first quarter 1965.
}

January suggested that demands for new cars would continue to be relatively stronger than those for household durable goods. The percentage of households expressing intentions to purchase a new automobile within 12 months was 9.3 per cent, up from 8.5 per cent in January 1964, which in turn was up from 7.8 per cent in January 1963. Consumers' plans to buy used cars were no more numerous at the beginning of this year than they had been in early 1964.

On the other hand, the percentage of households expecting to purchase any of seven major household durable goods within 6 months was down slightly from 16.7 per cent in January 1964, to 16.3 per cent, the same as in January 1963.

Nondurable goods. Consumer purchases of nondurable goods showed an unusual spurt in the first 3 quarters of 1964 and then, after a small rise in the fourth quarter, picked up again in early 1965. The increase for the year 1964 was the largest annual increase since 1951, and the rise from the end of 1963 to early 1965 was more than twice as fast as that for the preceding 2 years. The rise over the recent period about matched the large increase in disposable income, whereas in earlier years purchases of nondurable goods by consumers had tended to lag behind the rise in their income.

All major types of goods shared in the recent upsurge in buying, but the expansion for clothing and shoes was especially large. Since late 1963, consumer spending on clothing and shoes has increased at an annual rate of 11 per cent, as compared with increases of about 6.5 per cent for foods, gasoline and oil, and other nondurable goods, and of 7.5 per cent for total consumption expenditures on nondurable goods.

Services. The steady and substantial rise in consumer expenditures on services, to which we have become accustomed as a feature of postwar consumer buying patterns, showed little, if any, acceleration during the 1964-65 period of heightened consumer demands for goods. During this period service outlays in fact showed somewhat less rise than consumer incomes, with the result that the proportion of disposable income spent on services declined somewhat. Earlier, the spending rate on services had risen persistently.

With the added flow of income, consumers have increased both their current consumption and their saving, but the relative distribution of disposable income between the two changed moderately in 1964.

Consumption typically lags a little in its response to large in-
creases in disposable income. In the spring of 1964, when the tax cut gave an extra fillip to already expanding after-tax incomes, the spending rate (consumption as a per cent of disposable income) declined moderately. The limited availability of autos in the autumn, which precipitated a temporary sharp decline in consumer purchases of durable goods at a time when total incomes were continuing to rise, caused the rate to decline again. By the first quarter of 1965 , however, the spending rate was back to about the level of early 1964.

With the spending rate down moderately in 1964 as a whole, the saving rate rose to 7.5 per cent of disposable income from the relatively low 1963 figure of 6.8 per cent. Over the past 10 years the saving rate has averaged about 7.2 per cent of disposable income. With rapidly rising disposable income and an increase in the saving rate, the dollar volume of personal saving, which had been approximately constant during the previous 3 years, rose sharply in 1964.
```

During this expansion period as a whole, consumer acquisitions of financial assets have increased faster than personal saving. Consumers have chosen to channel a relatively large share of this

> CHART 6
> Over this expansion SAVINGS DEPOSITS represent a larger share of consumer acquisitions of financial assets

PER CENT

Note.-Based on flow of funds data. Items not shown include additions to reserves of life insurance companies and pension funds and net investment in noncorporate business.
total of financial saving into time and savings deposits at commercial banks and accounts at other savings institutions, as Chart 6 shows.

The distribution of consumer financial asset purchases in this upswing has been influenced significantly by the pattern of yields on alternative financial assets. Sharp increases in rates paid by commercial banks on savings deposits that followed changes in regulatory ceilings in 1962 and again in late 1964 have been important in channeling a larger share of the savings flow through the banking system. Competitive increases in rates paid by savings institutions other than commercial banks also have occurred during this expansion period, and their share of consumer saving has been higher than in the two previous expansion periods.

In the two previous periods of economic expansion, consumers were attracted to open market securities as market yields rose relative to yields on depositary-type claims. Though the share of consumer saving invested directly in credit and equity market instruments has risen in the current expansion, it has remained far below earlier highs. Yields on many classes of market securities failed to keep pace with the advance in rates on depositarytype claims, and-in the case of State and local government securities and mortgages-yields actually declined during the course of the expansion.

As a result of the allocation of consumer financial savings in this upswing, banks and other financial intermediaries have been able to supply a large volume of funds to long-term capital markets. This has been a factor contributing to sustained economic expansion.

\section*{Statement to Congress}

The proposed increase in the resources of the International Monetary Fund, of which the increase in the U.S. subscription is an integral part, will be in the interest of the United States and of the free world at large.

The United States, as the world's foremost international trading nation, is deeply interested in the adequacy and stability of the international payments mechanism. The Fund is a most important part of that mechanism. Accordingly, its strengthening is essential for further sustainable expansion of international commerce.
Critics of the present international payments system often contend that adequate liquidity under that system can be maintained only as long as the United States suffers a payments deficit and thereby supplies the world with enough dollars to finance the ever-expanding volume of international commerce. Once the U.S. payments deficit is eliminated-as it must be-only the creation of new types of reserve assets can, in the opinion of these critics, save the world from a crippling inadequacy of international liquidity.

As you know, the so-called Group of Ten, which includes the major industrial member countries of the International Monetary Fund, is at present studying the possibility of creating such new types of reserve assets,

Note.-Statement of William McChesney Martin, Jr., Chairman, Board of Governors of the Federal Reserve System, on H.R. 6497, before the House Committee on Banking and Currency, March 24, 1965.
if this should become necessary, without disrupting the present mechanism. Whatever the outcome of these studies may be, agreement on the creation of new types of reserve assets is a matter for the future. In any case, the Fund will be a principal source of international liquidity for any period following elimination of U.S. payments deficits. The proposed increase in its resources from about \(\$ 16\) billion to about \(\$ 21\) billion is desirable and indeed necessary if the Fund is adequately to fulfill that function.

In recent years, international liquidity has grown in large part through the dollars supplied in consequence of U.S. payments deficits. In these circumstances, recourse to the Fund was on a moderate scale. But once the flow of dollars from the U.S. is curtailed or even stopped, there are likely to be heavier demands for Fund accommodation. Hence, the proposed increase in Fund resources may well spell the difference between future inadequacy and adequacy of means of international payments, and thus between stagnation and further substantial expansion of international trade, including U.S. exports.

Apart from the general advantages of an increase in resources of the International Monetary Fund, the proposed increase in our subscription will be of particular benefit to the United States. It is true that the immediate effect of this increase will be a decline in our gold stock by the equivalent of the gold portion of the subscription, amounting to about \(\$ 259\) million, and an increase in our dollar liabilities to the Fund by the
amount of the dollar portion of the subscription, or about \(\$ 776\) million. But these changes are mere bookkeeping formalities rather than financial realities. The decline in our gold stock will be exactly offset by an increase in our virtually automatic gold tranche drawing rights on the Fund's resources; and the increase in our dollar liabilities to the Fund will similarly be offset by an equivalent increase in our regular drawing rights in the credit tranches.

In fact, the increase in our Fund drawing rights will be financially far more relevant than the increase in our dollar liabilities. The dollar part of our subscription will not be actually paid out until the Fund needs to acquire dollars in excess of its present availabilities of nearly \(\$ 3.5\) billion in order to satisfy requests for dollar drawings by other Fund members.

After our payments position has returned to equilibrium, a moderate outflow of dollars into the hands of foreign businessmen, resulting from dollar drawings on the Fund, would not only be harmless, it would be beneficial. It would actually help to avert the possibility of a future dollar shortage, if such should arise.

The increase in our drawing rights will work to our advantage during any future period when we incur a temporary payments imbalance internationally. It is during such a period that the United States will need to be in a position to mobilize foreign currency resources, including those available through the International Monetary Fund, in order to supplement the use of our gold to meet any interim payments problem. The mere existence of these facilities may obviate any such need.

At present, the foreign exchange holdings of the Treasury Stabilization Fund and of the Federal Reserve System are quite modest. Until equilibrium in our payments position
is restored, there is little or no hope for a large increase in these holdings. Our drawing rights on the Fund provide an opportunity to acquire, if and when necessary, large additional amounts of foreign currencies in order to meet our developing payments needs. The repayment period for these drawings would range from 1 to 3 years.

The increase in the resources of the International Monetary Fund will also buttress the efficiency of the bilateral arrangements concluded in recent years among the central banks of the major financial countries of the free world-arrangements in which the Federal Reserve System has played a leading role.

In the recent sterling crisis, central banks were able, literally within hours, to put \$3 billion at the disposal of the Bank of England. This experience shows the importance of these arrangements better than any theoretical exposition could do. And the-admittedly more modest-Federal Reserve operations have consistently demonstrated the advantage of mutual arrangements with foreign central banks in averting adverse effects of speculative or other disruptive movements of volatile funds on our payments position and on the value of the dollar in exchange markets.

Central bank operations of that kind are, however, invariably on a short-term basis, usually for initial periods of 3 months and renewable for no more than an additional 3, 6 , or-at most- 9 months. Last November, the aid "package" for sterling could probably not have been assembled at all, and certainly not as fast as it was, if the participants had not been able to count on the backstop function of the International Monetary Fund. All participants knew that, whatever might happen, they could always expect repayment through a U.K. drawing on the Fund. If the dollar ever needed foreign as-

\begin{abstract}
sistance on a similar scale, the Federal Reserve System would find that our drawing rights on the International Monetary Fund would greatly facilitate, and in fact make possible, any needed expansion in our pres-
\end{abstract}
ent bilateral arrangements with foreign central banks.

For these reasons, I fully endorse the request of the Secretary of the Treasury for speedy enactment of H.R. 6497.

\section*{Announcements}

\section*{ERRATUM IN MARCH 1965 BULLETIN}

On page 374 of the March 1965 Bulletin, Balance of Payments Program, Guidelines for Banks, (8) Trust departments, the second sentence should be changed to read as follows:
"They should bear the purpose of that program in mind in making any acquisitions of foreign obligations for trust accounts."

\section*{ADMISSION OF STATE BANK TO MEMBERSHIP IN THE FEDERAL RESERVE SYSTEM \\ The following bank was admitted to membership in the Federal Reserve System during the period March 16, to April 15, 1965 : \\ Wisconsin \\ Milwaukee . . . . American City Bank \& Trust Company}

\section*{Law Department}

\section*{Maximum Interest on Loans Secured by Time Deposits}

The opinion of the Board of Governors has been requested with respect to loans by a member bank secured by time deposits in such bank. It is stated that many banks are now paying interest on time deposits at the maximum rate of \(41 / 2\) per cent, and the legal rate of interest in some States for ordinary bank loans is fixed by statute at 6 per cent. The specific question is whether the bank may make the loan as section 217.4(e) of Regulation \(Q\) requires a member bank to charge a rate of interest not less than 2 per cent in excess of the rate of interest paid on its time deposit when such deposit is used as security for a loan.

Section 19 of the Federal Reserve Act (12 U.S.C. 371b) prohibits member banks from paying any time deposit before its maturity, except upon such conditions and in accordance with such rules and regulations as may be prescribed by the Board. The above-mentioned provision of Regulation \(Q\) is intended to implement the law and prevent evasion thereof. The specified 2 per cent penalty is designed to discourage loans on time deposits that would, in effect, enable the depositor to obtain his funds before maturity. For this reason, retention of the 2 per cent differential seems desirable.

Since banks in some States are prohibited from charging more than 6 per cent on loans, a member bank in such States that pays \(41 / 2\) per cent on a time deposit may not make a loan on such deposit without violating Regulation Q. However, there is nothing in the regulation to prevent a bank and its customer from agreeing to the payment of a lesser rate of interest on the deposit while a loan on the deposit is outstanding. Therefore, by agreement, the rate of interest paid on the deposit could be reduced to 4 per cent during the period of the loan, with interest on the loan fixed at 6 per cent. This would not be a circumvention of the Regulation as the customer would still be paying 2 per cent more interest on the loan than he would receive on the deposit. The rate of interest that the
bank could pay on the deposit before and after the loan would not be affected.

\section*{Order Under Bank Merger Act}

The following Order and Statement were issued in connection with action by the Board of Governors with respect to an application for approval of the acquisition of assets and assumption of deposit liabilities:

\section*{THE CITY BANK AND TRUST COMPANY, MILWAUKEE, WISCONSIN}

In the matter of the application of the City Bank and Trust Company for approval of acquisition of assets of American State Bank.

\author{
Order Approving Acquisition of Bank's Assets
}

There has come before the Board of Governors, pursuant to the Bank Merger Act of 1960 (12 U.S.C. 1828 (c)), an application by The City Bank and Trust Company, Milwaukee, Wisconsin, which, under the new name American City Bank \& Trust Company, is to be a State member bank of the Federal Reserve System, for the Board's prior approval of its acquisition of assets and assumption of deposit liabilities of American State Bank, Milwaukee, Wisconsin. Notice of the proposed acquisition of assets and assumption of deposit liabilities, in form approved by the Board, has been published pursuant to said Act.

Upon consideration of all relevant material in the light of the factors set forth in said Act, including reports furnished by the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Department of Justice on the competitive factors involved in the proposed transaction,

It is hereby ordered, for the reasons set forth in the Board's Statement of this date, that said application be and hereby is approved, provided that said acquisition of assets and assumption of deposit liabilities shall not be consummated (a) within seven calendar days after the date of this

Order, or (b) later than three months after said date.

Dated at Washington, D.C., this 12th day of March, 1965.

By order of the Board of Governors.
Voting for this action: Chairman Martin, and Governors Balderston, Mills, Shepardson, and Daane. Voting against this action: Governors Robertson and Mitchell.
(Signed) Merritt Sherman, Secretary.
[SEAL]

\section*{Statement}

The City Bank and Trust Company, Milwaukee, Wisconsin ("City Bank"), with total deposits of \(\$ 35.6\) million, has applied, pursuant to the Bank Merger Act of 1960 (12 U.S.C. 1828(c)), for the Board's prior approval of its acqusiition of the assets and assumption of the liabilities of American State Bank, Milwaukee, Wisconsin, which has total deposits of \(\$ 44.8\) million. \({ }^{1}\) Neither bank has any branches. Upon consummation of the transaction, the banking office of City Bank would be closed, since its operation as a branch would be prohibited by State law. The name of City Bank would be changed to American City Bank and Trust Company, and it would be a State member bank of the Federal Reserve System.

Under the law, the Board is required to consider, as to each of the banks involved, (1) its financial history and condition, (2) the adequacy of its capital structure, (3) its future earnings prospects, (4) the general character of its management, (5) whether its corporate powers are consistent with the purposes of 12 U.S.C., Ch. 16 (the Federal Deposit Insurance Act), (6) the convenience and needs of the community to be served, and (7) the effect of the transaction on competition (including any tendency toward monopoly). The Board may not approve the transaction unless, after considering all of these factors, it finds the transaction to be in the public interest.
Banking factors. The financial histories of City Bank and American State Bank are satisfactory, and City Bank has a generally satisfactory asset condition and an adequate capital structure. The capital structure of American State Bank is rea-

\footnotetext{
\({ }^{\mathbf{1}}\) Deposit figures are as of June 30, 1964.
}
sonably satisfactory, and although its asset condition reflects a sizable aggregate of relatively highrisk loans, the bank has a good over-all loss experience. American State Bank's earnings record is good, and its future earnings prospects are reasonably favorable. The earnings record of City Bank is less than satisfactory, and its future earnings prospects are no better than fair. A factor of considerable significance in this respect is that City Bank, located in an area which now consists largely of merchandising and light manufacturing establishments, operates, and has traditionally operated, as a "retail" institution catering mainly to the banking needs of individuals.

The management of City Bank, although presently lacking in depth, is experienced and capable. American State Bank, basically a "wholesale" institution, is managed fairly satisfactorily although, apparently as a result in part of the necessity that it compete with much larger banks, its policies are aggressive and liberal. The management of the acquiring bank would be composed of the managing officers of the proponent banks.

The capital structure and asset condition of the acquiring bank would be reasonably satisfactory and its earnings prospects favorable.

There is no evidence that the corporate powers of the banks are, or would be, inconsistent with the purposes of 12 U.S.C., Ch. 16.

Convenience and needs of the communities. City Bank and American State Bank are located one block apart in the center of the downtown business district of Milwaukee, Milwaukee County, Wisconsin. Milwaukee, which is situated on the west shore of Lake Michigan, is a diversified industrial center and serves as an important port. The population of Milwaukee is about 741,000 persons, and the total population of Milwaukee County exceeds one million.

There are 39 commercial banks, with 55 banking offices, in Milwaukee County, virtually all of which are located in the city of Milwaukee or within its metropolitan area. \({ }^{2}\) Fourteen of these banks, with a total of 27 offices, are subsidiaries of one or another of three bank holding companies and hold, altogether, 76 per cent of the total deposits of all commercial banks in Mil-

\footnotetext{
\({ }^{2}\) State law now prohibits the establishment of branch banking offices. A new bank, to be located in downtown Milwaukee, has been approved but not yet opened for business.
}
waukee County. The head offices of each of the largest banks owned by these holding companies are located within one block of the offices of City Bank and American State Bank.

It is not alleged that the banking needs and convenience of the community are not being adequately met. However, the proposed acquisition would result in a bank generally capable of providing improved and expanded services and, more particularly, with a lending limit 80 per cent greater than the present limit of the larger of the proponent banks. The acquiring bank, with the improved and additional services contemplated by the proposal, would benefit the community in that it would constitute an alternative source of relatively full banking services.

Competition. City Bank and American State Bank have essentially identical service areas, \({ }^{3}\) which may be approximately defined as the area within a six-mile radius of downtown Milwaukee. Both banks, however, secure some business from throughout the Milwaukee metropolitan area. If the proposed acquisition were consummated, the acquiring bank would hold 4.3 per cent of total deposits held by the present 24 commercial banks located in the service area, as defined above, and 4.1 per cent of such deposits held by all commercial banks in Milwaukee County.

Despite the virtually coterminous geographical markets of the proponent banks, there is a relatively limited amount of competition existing between them because City Bank provides banking services principally for individuals, whereas American State Bank caters mainly to the banking needs of business establishments. If operated as independent institutions, some potential for further competition between these banks may exist in that each could attempt to add to its principal range of services the services now provided by the other. However, the extent to which such competition might be developed, with due regard for sound banking practices, appears greatly limited under the circumstances.

Although the proposed acquisition would result in the elimination of one banking office, the acquiring bank, with its larger capital base and with certain economies available to it, would be capable of significantly greater competitive effec-

\footnotetext{
\({ }^{3}\) The area from which a bank obtains 75 per cent or more of its deposits of individuals, partnerships, and corporations.
}
tiveness than either of the proponent banks alone. The proposed transaction would not adversely affect any other bank and, indeed, would have the potential for enhancing somewhat the level of banking competition in the Milwaukee area.

Summary and conclusion. The acquiring bank, with the contemplated improved and additional services, would constitute an alternative source of relatively full banking services for the community. At the same time, the consequences for banking competition would not be adverse, but potentially beneficial.

The net effect of the proposed acquisition appears to be that the acquiring bank would have the advantage of being potentially a more viable and effective competitor, which would redound to the general benefit of the banking public in the area affected.

Accordingly, the Board finds that the proposed acquisition of assets and assumption of liabilities would be in the public interest.

\section*{Dissenting Statement of Governor Mitchell with Which Governor Robertson Concurs}

The record in this case clearly establishes that in the judgment of the applicant and other stockholding interests, consummation of the proposed acquisition will be to their private corporate advantage. There is no basis in the record to dispute this judgment. The record is not so clear, however, as to the consequences for the public interest.

The applicant contends that the acquiring bank will have the competitive capability to divert business from the "Big Three" banks in Milwaukee by offering a more complete line of banking services and a higher loan limit for larger businesses than heretofore available at either of the participating banks. The application lists forty-odd corporations which maintain headquarters or large plants in Milwaukee but which do not have accounts with either of the banks. From the public point of view, however, there is much more concern that small and medium-sized businesses have adequate access to bank credit. Companies as large as most of those on the list submitted have scores of credit alternatives with banks, insurance companies, and even in the capital market. Small companies have a very limited number of credit alternatives. Under this proposal, the smaller concerns in the downtown area of Milwaukee would have one less alternative, and the interest of the acquiring bank
would be shifted to a more affluent clientele. Rather than adding to the convenience and needs of the residents of the immediate area, the proposed transaction is likely to have the reverse effect.

The competitive factor is alleged to be favorable because the acquiring bank will be larger. With this argument, every proposal that results in a larger bank could be supported as furthering competition. The ultimate result of a merger policy based on this premise would be to make every bank as large as any other.

It is also said that one of the participating banks is a "wholesale" bank and the other a "retail" bank and that, therefore, they are not competitive. There appears a measure of truth in this generalization because one bank has more of its total deposits in savings accounts and the time accounts in the other bank are predominantly certificates of deposit. One bank has almost no consumer credit paper, whereas in the other such loans are over 17 per cent of total net loans and discounts. But the record appears also to show the consumer credit paper is largely generated by the bank's customers rather than the bank. In short, the banks are somewhat different because of differences in some of their customers. However, it is possible to point up similarities too-namely, in the relative size of their portfolios of commercial and industrial loans, tax exempt securities, and mortgages. Clearly, each competes with the other, and other banks in the area, for time and demand deposits, and the proposed acquisition will leave one less competitor in the immediate service area.
Two new banking offices are coming into the immediate area; the area's largest bank is relocating one of its offices to a site in the downtown area, and a newly organized bank is to be located in downtown Milwaukee. These specific, concrete expressions of judgment that the area is not overbanked undermine the contention that the proposed transaction is necessary to the growth and survival of both or either of the participating banks.

I conclude that the application should not be approved because effectuation of the proposal will lessen competition, it will not add to the public's convenience or accommodation, and there is no sustaining justification in the banking factors. This judgment may be temporarily hostile to the corporate interests of the two banks involved, but that
concern should not be paramount to the public interest.

\section*{Orders Under Section 3 of Bank Holding Company Act}

The following Orders and Statement were issued in connection with action by the Board of Governors on applications by a bank holding company for approval of the acquisition of voting shares of banks:

\section*{THE FIRST VIRGINIA CORPORATION, ARLINGTON, VIRGINIA}

In the matter of the application of The First Virginia Corporation, Arlington, Virginia, for approval of the acquisition of voting shares of Peoples Bank of Radford, Radford, Virginia.

\section*{Order Approving Application Under Bank Holding Company Act}

There has come before the Board of Governors, pursuant to section 3(a)(2) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842 (a)(2)) and section 222.4(a)(2) of Federal Reserve Regulation Y (12 CFR 222.4(a)(2)), an application by The First Virginia Corporation, Arlington, Virginia, a registered bank holding company, for the Board's prior approval of the acquisition of 80 per cent or more of the voting shares of Peoples Bank of Radford, Radford, Virginia.

As required by section 3(b) of the Act, the Board notified the Commissioner of Banking of the Commonwealth of Virginia of receipt of the application and requested his views and recommendation. The Commissioner expressed no objection to its approval.

Notice was published in the Federal Register of December 18, 1964 ( 29 F. R. 18025) providing an opportunity for interested persons to submit comments and views with respect to the proposed acquisition. The time for filing such comments and views has expired, and all those received have been considered by the Board.

It is hereby ordered, for the reasons set forth in the Board's Statement of this date, that said application be and hereby is approved, provided that the acquisition so approved shall not be consummated (a) within seven calendar days after the date of this Order or (b) later than three months after said date.

Dated at Washington, D. C., this 12th day of April, 1965.

By order of the Board of Governors.
Voting for this action: Chairman Martin, and Governors Robertson, Shepardson, Mitchell, and Daane. Absent and not voting: Governor Balderston.
(Signed) Merritt Sherman, Secretary.

\section*{THE FIRST VIRGINIA CORPORATION, ARLINGTON, VIRGINIA}

In the matter of the application of The First Virginia Corporation, Arlington, Virginia, for approval of the acquisition of voting shares of Bank of Chesapeake, Chesapeake, Virginia.

\section*{Order Approving Application under Bank Holding Company Act}

There has come before the Board of Governors, pursuant to section 3(a) (2) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(2)) and section 222.4(a) (2) of Federal Reserve Regulation Y (12 CFR 222.4(a) (2)), an application by The First Virginia Corporation, Arlington, Virginia, a registered bank holding company, for the Board's prior approval of the acquisition of 80 per cent or more of the voting shares of Bank of Chesapeake, Chesapeake, Virginia.

As required by section \(3(b)\) of the Act, the Board notified the Commissioner of Banking of the Commonwealth of Virginia of receipt of the application and requested his views and recommendation. The Commissioner expressed no objection to its approval.

Notice was published in the Federal Register of January 7, 1965 ( 30 F. R. 180) providing an opportunity for interested persons to submit comments and views with respect to the proposed acquisition. The time for filing such comments and views has expired, and all those received have been considered by the Board.

It is hereby ordered, for the reasons set forth in the Board's Statement of this date, that said application be and hereby is approved, provided that the acquisition so approved shall not be consummated (a) within seven calendar days after the date of this Order or (b) later than three months after said date.

Dated at Washington, D. C., this 12th day of April, 1965.

By order of the Board of Governors.
Voting for this action: Chairman Martin, and Governors Shepardson, Mitchell, and Daane.
Present but not voting: Governor Robertson.
Absent and not voting: Governor Balderston.

\section*{(Signed) Merritt Sherman, Secretary.}
[seal]

\section*{Statement}

The First Virginia Corporation ("Applicant"), Arlington, Virginia, a registered bank holding company, has filed applications, pursuant to section 3(a) (2) of the Bank Holding Company Act of 1956 ("the Act"), with respect to the Peoples Bank of Radford, Radford, Virginia, and the Bank of Chesapeake, Chesapeake, Virginia, requesting the Board's approval of the acquisition of 80 per cent or more of the voting shares of each bank.

Views and recommendations of supervisory authority. As required by section 3(b) of the Act, notices of receipt of the applications were sent to the Commissioner of Banking of the Commonwealth of Virginia requesting his views and recommendations. The Commissioner expressed no objection to approval of either application.

Statutory factors. With respect to each application, section 3(c) of the Act requires the Board to take into consideration the following five factors: (1) the financial history and condition of the holding company and the banks concerned; (2) their prospects; (3) the character of their management; (4) the convenience, needs, and welfare of the communities and the area concerned; and (5) whether the effect of the proposed acquisition would be to expand the size or extent of the bank holding company system involved beyond limits consistent with adequate and sound banking, the public interest, and the preservation of competition in the field of banking.

Although the applications have been acted upon separately, the Board has determined that unnecessary repetition of facts and conclusions resulting from application of the foregoing statutory factors to the holding company may be avoided through this combined Statement. Accordingly, while separate Orders effecting the Board's determinations accompany this Statement, the Board's findings, conclusions, and reasoning in respect to each application are combined in this Statement.

Financial history and condition, prospects, and management of Applicant and the Banks. Appli-
cant's system is composed of 9 banks located in Virginia, operating 44 banking offices with combined deposits of approximately \(\$ 197\) million as of June 30, 1964. \({ }^{1}\) It also controls two insurance agencies, two bank premises companies, and a bank servicing corporation. Applicant's financial history is satisfactory. The applications reflect that Applicant's proposed debt position involves a bank loan that is of relatively short maturity and rather heavy in relation to net worth. Although this tends to offset other relatively favorable aspects relating to the financial condition and earnings records of Applicant's subsidiary banks, the Board concludes that Applicant's financial condition and prospects are reasonably satisfactory. Applicant's management is experienced and well qualified.
Peoples Bank of Radford. Bank, located in the independent City of Radford, about 40 miles west of Roanoke, was chartered and opened for business in 1922. It operates one in-town branch in addition to its main office. With deposits of \(\$ 2.8\) million, it is one-quarter the size of the other bank in Radford, First and Merchants National Bank of Radford.
Bank's financial history is satisfactory and its financial condition considered fair. While Bank's earnings record and deposits growth in the past several years have been good, its prospects for the future would be bettered under Applicant's control, particularly in respect to Applicant's ability and stated intention to place or develop more experienced and qualified management in Bank than Bank, independently, can reasonably be expected to attract or develop. The likelihood of this result is a circumstance weighing in favor of approval of the application.
Bank of Chesapeake. Bank, originally chartered in 1955 as the Bank of Cradock, assumed its present name in 1964. It operates its main and two branch offices in the independent City of Chesapeake, and an additional office in adjacent Portsmouth City. Both cities are part of the NorfolkPortsmouth Standard Metropolitan Area. Measured by deposits ( \(\$ 10.5\) million), Bank ranks eighth in size of the nine banks operating in this area.
Bank's financial history and condition are satisfactory. While, on the basis of its past earnings

\footnotetext{
\({ }^{1}\) Unless otherwise indicated, banking data used herein are as of this date.
}
record and its location in a fast-growing area, Bank's prospects appear reasonably favorable, its prospects would be bettered, it is believed, by the introduction of a more aggressive management policy. Bank's present management is sound but conservative. This conservative operating policy is evidenced by Bank's lower than average ratio of loans to deposits. Applicant's proposal to foster in Bank a more aggressive management attitude, particularly as related to its lending policy, constitutes a consideration favoring approval of the application.

Convenience, needs, and welfare of the communities and areas concerned.

Peoples Bank of Radford. Bank's primary service area \({ }^{2}\) is the City of Radford, and contains an estimated population of 10,500 . Considerable support to the area's economy is derived from Radford College, a State-supported college for women. Diversified manufacturing activities, notably the operation of the Radford arsenal, have also contributed significantly to the sustained economic growth of the area.

Bank of Chesapeake. As earlier stated, Bank's offices are located in Chesapeake and Portsmouth. The primary service areas of these offices contain, in the aggregate, an estimated population of approximately 75,000 , and generally encompass the most densely populated sections of the City of Chesapeake and a portion of Portsmouth City.

Chesapeake, a port city, is located just inside the mouth of the Chesapeake Bay, and has some nine miles of industrial waterfront. Among the nearly 70 manufacturing concerns located in Chesapeake are major oil terminals, chemical plants, including the world's largest agricultural chemical plant, and commercial docking and stevedoring facilities. Chesapeake is also the site for the major repair facilities of the Norfolk and Western Railroad.

The benefits and advantages that Applicant asserts are inherent in each of the acquisitions proposed are substantially the same. In the main, these relate to increased lending limits through capital contributions by Applicant, greater facility in respect to loan participations, and greater diversification in loan portfolios; a more readily

\footnotetext{
\({ }^{2}\) The area from which Applicant estimates 80 per cent of Bank's deposits of individuals, partnerships, and corporations originate.
}
available source of additional capital for whatever reason required; and improved and expanded investment counseling and auditing services. A review of the records in these cases satisfies the Board that while Applicant's control of the Banks would produce in them certain operations, advantages, and improvements over existing conditions, in neither application has there been established the existence of an unserved demand or need for major banking services.

In respect to those services that Applicant states would enable the Banks to serve better their trade areas, on the basis of the evidence presented, the Board concludes that these services can be obtained from other banking outlets reasonably available to the areas involved. As to those services that would relate more directly to the Banks' operational procedures, their nature is such that they are, or could be, available to the Banks from sources other than Applicant. The fact, however, that Applicant could provide the services mentioned more conveniently, more assuredly, and perhaps more economically than could others constitutes a consideration consistent with approval of the applications.

Effect of proposed acquisitions on adequate and sound banking, public interest, and banking competition. The banking offices and deposits controlled by Applicant represent, respectively, 6.2 and 4.7 per cent of the banking offices and deposits in the State. There are operating in the State three other bank holding companies (two registered and one nonregistered) and three independent banks, each of which, measured by total deposits controlled, is larger than Applicant. Approval of both of Applicant's proposed acquisitions would not change its relative size position and would increase by only .4 its percentage of the deposits of all banks in the State. Approval would result in the four bank holding companies' controlling, in the aggregate, 22 per cent of the banking offices and 26 per cent of the deposits of all banks in the State. An additional 24 per cent of such deposits are held by the aforementioned three independent banks.

Applicant's ownership of Peoples Bank of Radford would give Applicant control of one of the city's two banks, two of the four banking offices, and 20 per cent of the deposits held by the two banks. Applicant's subsidiary bank nearest Radford is located in Mount Jackson, some 175 miles
distant. The nearest office of a holding company bank, a subsidiary of Virginia Commonwealth Corporation, is located about 16 miles southwest of Radford in adjoining Pulaski County, and holds deposits of about \(\$ 6\) million. Considering the size of this bank and its distance from the City of Radford, it is reasonably concluded that it does not hold a significant portion of deposits originating in Radford.

If Applicant were to acquire Bank of Chesapeake, it would control the only bank headquartered in that city. Its control of Bank's three offices in Chesapeake would represent 54 per cent of the deposits of all banking offices in the city. The one office of Virginia National Bank, Norfolk, the city's only other banking office, holds deposits of \(\$ 6\) million, or 46 per cent of the total deposits of the city's four banking offices. In the City of Portsmouth, adjoining Chesapeake, Bank operates one office with deposits of \(\$ 4\) million, representing about 6 per cent of the deposits of the 12 banking outlets in that city. In the combined Chesa-peake-Portsmouth area, Applicant would control 4 of 16 banking offices ( \(25 \%\) ) and \(\$ 10.5\) million of the \(\$ 80\) million of deposits ( \(13 \%\) ) held by these offices. Within the Norfolk-Portsmouth Standard Metropolitan Area, in which Chesapeake and Portsmouth are located, Applicant's acquisition of Bank of Chesapeake would increase its control of banking offices from 9 to 13 ( \(23 \%\) of the area's 56 banking offices), and its control of deposits from \(\$ 30\) million to \(\$ 40\) million ( \(9.2 \%\) of the deposits held by all banking offices). In the Metropolitan Area, holding company subsidiaries presently control 14 per cent of the total deposits. Consummation of Applicant's acquisition of Bank would increase this percentage to 16 . Considering the foregoing data, together with related evidence of record, the Board concludes that approval of Applicant's two proposals would not result in an undue concentration of banking resources, either in the State as a whole or in the areas directly involved in these applications. In this connection it is noted that in each of the areas involved in these applications, one or more independent banks several times larger than Applicant's proposed subsidiary bank have one or more offices.

None of Applicant's subsidiary banks presently competes with Peoples Bank of Radford. Accordingly, Applicant's acquisition of Bank will not eliminate any existing competition, nor will there
result any reduction in the number of alternative banking sources in the City of Radford. As to the effect on Bank's present competitors, the two banks that appear to compete to any significant extent in Bank's primary service area are both four times the size of Bank and each has as many or more offices than Bank. The Board finds no reasonable probability of adverse competitive effect from consummation of the proposed acquisition.

Regarding the competitive effects of Applicant's acquisition of the Bank of Chesapeake, no meaningful competition now exists between Bank and Applicant's nearest subsidiary, Southern Bank of Norfolk. The closest offices of the two banks are five miles apart and are separated by the Elizabeth River. For these reasons, even absent the affiliation proposed, an increase in competition between these banks would appear unlikely.

Within Bank's primary service area, Bank's principal competitors are six well-established banks ranging in deposit size from nearly \(\$ 10\) million to \(\$ 373\) million. In view of the considerable size advantage held by five of these banks, and the fact that the sixth and smallest of these is comparable in size to the Bank of Chesapeake and has for some time been in competition with the five larger banks, there is no reason to believe that Applicant's ownership and operation of Bank will
result in Bank's gaining any undue competitive advantage.

Finally, in respect to both applications, the Board is satisfied that within the communities and areas involved there will remain adequate alternative sources of banking services following consummation of Applicant's proposals to assure that, as in the other respects heretofore considered, the public interest will not be adversely affected.

Summary and conclusion. As herein found, considerations relating to the financial history of Applicant and of the Banks are consistent with approval of the applications. The more convenient and more assured nature of banking service likely to result from Applicant's control of the Banks weighs toward approval of the applications. At the same time, the Board concludes that consummation of these proposals will not result in an expansion in the size or extent of Applicant's system that will be inconsistent with adequate and sound banking, the public interest, or the preservation of banking competition.

Accordingly, on the basis of all the relevant facts as contained in the records before the Board, and in the light of the factors set forth in section 3(c) of the Act, it is the Board's judgment that the proposed acquisitions would be consistent with the public interest and that the applications should therefore be approved.

\title{
National Summary of Business Conditions \\ Released for publication April 15
}

Industrial production and employment continued to expand in March and the unemployment rate declined. Reflecting a longer factory workweek as well as increased employment, wage and salary payments rose further. However, retail sales did not match the advanced February rate. Loan demand remained strong. The money supply increased, following a decline in February, while time and savings deposits at commercial banks rose at a reduced rate. In late March and early April, bond yields generally changed little. Common stock prices set a new high.

\section*{Industrial Production}

The Board's index of industrial production rose 1 per cent in March, to 140.1 per cent of the 1957-59 average from 138.9 in February. Gains were widespread among manufacturing industries and the increase for autos was particularly large. Reflecting in part inventory accumulation for autos, steel, and some other products, the index was \(41 / 2\) per cent above the AugustSeptember level and \(81 / 2\) per cent above March 1964.

Auto assemblies, which had been curtailed somewhat in February by severe storms, rose 9 per cent in March to a record seasonally adjusted

INDUSTRIAL PRODUCTION

F.R. indexes, seasonally adjusted. Latest figures shown are for March.
annual rate of nearly 10 million units. Production of television sets also increased considerably while furniture and appliances changed little; total output of home goods was about a tenth higher than last summer.

Activity in business equipment industries continued to rise and was up 6 per cent from last summer. Output of iron and steel increased slightly further to about the record high reached in mid-1959 just before the strike. Production of most other industrial materials also advanced but output of metal and glass containers was curtailed by strikes.

\section*{Construction}

New construction put in place, revised downward to show a 1 per cent increase in February, rose 1 per cent further in March to a seasonally adjusted annual rate of nearly \(\$ 68\) billion. The expansion in industrial and commercial construction was particularly marked; residential building continued to rise and was up 6 per cent from a low last autumn; and public activity increased after declining earlier this year.

\section*{Employment}

Employment in nonfarm establishments showed another substantial gain in March and was 2 million higher than a year earlier. The unemployment rate was down to 4.7 per cent, compared with 5.0 per cent in February and 5.4 per cent in March 1964.

Employment increases in manufacturing continued to be concentrated in the machinery and other metal-using industries, apart from the can industry which was affected by a strike. Employment increased substantially further in retail trade and continued to expand in most other nonmanufacturing sectors. The average factory workweek lengthened and both hourly and weekly earnings of production workers increased.

\section*{Distribution}

Retail sales declined 1 per cent in March, but as in both January and February they were 9 per cent higher than a year earlier. The March de-
crease reflected mainly a seasonally adjusted decline in sales at auto dealerships as deliveries of new autos rose less than seasonally from the high January-February rate reached in the wake of last autumn's strikes. Dealers' stocks, including cars in transit from assembly plants, increased considerably. Sales also declined at apparel and general merchandise stores but increased at most other types of stores.

\section*{Commodity Prices}

The industrial commodity price index continued to change little in March and early April. However, prices of some sensitive industrial materials, such as copper scrap and tin, rose appreciably. Increases were announced for cans and some glass containers, while declines continued among fuel oils. Wholesale prices of foodstuffs rose somewhat, primarily because of a greater-than-seasonal reduction in hog marketings and sustained or increased demands for meats.

\section*{Bank Credit, Money Supply, and Reserves}

Seasonally adjusted commercial bank credit increased \(\$ 3.4\) billion in March reflecting continued strong loan demand. Bank holdings of Treasury

Bureau of Labor Statistics indexes. Latest figures shown for consumer prices. February; for wholesale prices, March.
securities declined somewhat. The money supply increased \(\$ 700\) million following a decrease of similar amount in February. Time and savings deposits at commercial banks rose \(\$ 1.3\) billion, considerably less than the large increases of January and February but in line with the average monthly increase in the second half of 1964.

Seasonally adjusted total and required reserves rose further in March. Excess reserves declined substantially while member bank borrowings increased slightly, with the result that borrowings were larger than excess reserves. Reserves were supplied principally by Federal Reserve purchases of U.S. Government securities and were absorbed by outflows of gold and currency.

\section*{Security Markets}

Between mid-March and mid-April yields on seasoned corporate and municipal bonds and on Treasury securities showed little net change. In mid-April, the rate on 3 -month Treasury bills was 3.94 per cent.

Common stock prices increased in early April and trading volume expanded. At mid-month, average prices were slightly above the previous record reached in early February.

Interest rates

Discount rate, range or level for all F.R. Banks. Weekly average market yields for U.S. Govt. bonds maturing in 10 years or more and for 90 -day Treasury bills. Latest figures shown, week ending Apr. 5.

The data for F.R. Banks and member banks and for consumer credit are derived from regular reports made to the Board; production indexes are compiled by the Board on the basis of data collected by other agencies; and flow of funds figures are compiled on the basis of materials from a combination of sources, including the Board. Figures for gold stock, currency, Fed-
eral finance, and Federal credit agencies are obtained from Treasury statements. The remaining data are obtained largely from other sources. For many of the banking and monetary series back data and descriptive text are available in Banking and Monetary Statistics and its Supplements (see list of publications at end of the Bulletin).

\({ }^{1}\) This total excludes, and that in the preceding table includes, \(\$ 51\) million in balances of unlicensed banks.

Note--Averages of daily figures. Beginning with Jan. 1964 reserves are estimated except for weekly averages.
Total reserves held: Based on figures at close of business through Nov. 1959; thereafter on closing figures for balances with F.R. Banks and open-
ing figures for allowable cash; see also note 3 to preceding table. Required reserves: Based on deposits as of opening of business each day. Borrowings at F.R. Banks: Based on closing figures.
Revisions and corrections shown in weekly data for October, November, and December 1964 did not appear in this table in the March 1965 BuLLETIN but were shown on pp. 490-91 of that Bulletin.

\end{tabular}

1 When two dates are shown, a first-of-month or midmonth date records changes at country banks, and any other date (usually a Thurs.) records changes at central reserve and reserve city banks.
2 Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.
\({ }_{3}\) Authority of the Board of Governors to classify or reclassify cities as central reserve cities was terminated effective July \(28,1962\).
Note.-All required reserves were held on deposit with F.R. Banks, June 21, 1917 until late 1959. Since then, member banks have also been allowed to count vault cash as reserves, as follows: Country banks-in excess of 4 and \(21 / 2\) per cent of net demand deposits effective Dec. 1,1959 banks-in excess of 2 and 1 per cent effective Dec. 3, 1959, and Sept. 1, 1960, respectively. Effective Nov. 24, 1960, all vault cash.

\({ }^{1}\) Outside Treasury and F.R. Banks. Includes any paper currency held outside the United States and currency and coin held by banks. Estimated totals for Wed. dates shown in table on p. 547.
\({ }_{3}^{2}\) Includes \(\$ 156\) million reserve against United States notes.
\({ }^{3}\) Consists of credits payable in gold certificates: (1) the Gold Certificate Fund-Board of Governors, FRS, and (2) the Redemption Fund for F.R. notes.
\({ }_{5}^{4}\) Redeemable from the general fund of the Treasury.
5 Does not include all items shown, as some items represent the security
for other items; gold certificates are secured by gold, and silver certificates by standard silver dollars and monetized silver bullion. Duplications are shown in parentheses.
Note.-Condensed from Circulation Statement of United States Money, issued by the Treasury. For explanation of currency reserves and security features, see the Circulation Statement or the Aug. 1961 Buld., p. 936 .

MONEY SUPPLY AND RELATED DATA
(In billions of dollars)

\footnotetext{
\({ }^{1}\) At all commercial banks.
Nore.-Averages of daily figures. For back data see June 1964 Bull. pp. 679-92. Money supply consists of (1) demand deposits at all com mercial banks other than those due to domestic commercial banks and
}
the U.S. Govt., less cash items in process of collection and F.R. float; (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, the FRS, and the vaults of all commercial banks. Time deposits adjusted are time deposits at all commercial bank
due to domestic commercial banks and the U.S. Govt.

\end{tabular}
\({ }^{1}\) Reciprocal balances excluded beginning with 1942.
\({ }_{2}\) Includes other assets and liabilities not shown separately.
\({ }^{3}\) See note 3, p. 587, May 1964 BuLL.
4 See note 4, p. 587, May 1964 BuLL.
s See note 5
5 See note 5, p. 587 , May 1964 BuLL.
6 Beginning with May 18, 1964, one New York City country bank with loans and investments of \(\$ 1,034\) million and total deposits of \(\$ 982\) million was reclassified as a reserve city bank.

7 See note 6, p. 587, May 1964 BuL.
Note--Data are for all commercial and mutual savings banks in the Note.-Data are for all commercial and mutual savings banks in the
United States (including Alaska and Hawaii, beginning with 1959). Com-
parability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.
Data for June 30, 1964, for national banks have been adjusted to make them comparable with State bank data. (Dec. 20, 1963 data also adjusted to lesser extent.)

Figures are partly estimated except on call dates.
For revisions in series before June 30, 1947, see July 1947 Bull., pp. See also Note, p. 643, May 1964 Bull.

\footnotetext{
3 Beginning with 1942, excludes reciprocal bank balances. \({ }^{4}\) Through 1960, demand deposits other than interbank and U.S. Govt., less cash items in process of collection; beginning with 1961, demand deposits other than domestic commercial interbank and U.S. Govt., less cash items in process of collection.

5 See note 6, May 1964 Buli., p. 589.
Notr.-Data are for all commercial banks in the United States. These fgures exclude data for banks in U.S. possessions except for member
banks. Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc. Data for June 30, 1964, for national banks have been adjusted to make them comparable with State bank data. (Data for Dec. 20, 1963, also adjusted to lesser extent.)

Also see Note, May 1964 Bull., p. 589.
For other notes see opposite page.

\end{tabular}
\({ }^{1}\) Beginning Dec. 31, 1963, bankers' acceptances for the creation of dollar exchange are excluded from commercial and industrial loans and those relating to commercial transactions are shown in a separate category. Current figures are therefore not strictly comparable with figures previously reported, but differences are relatively small.

Note.-About 200 of the weekly reporting member banks are included in this series; these banks classify, by industry, commercial and industrial loans amounting to about 85 per cent of such loans held by all weekly reporting member banks, and about 60 per cent of those held by all commercial banks

1 Includes bonds rated Aa and A , data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat.

Note--Annual yields are averages of monthly or quarterly data
Note.-Annual yields are averages of monthly or quarterly data.
Monthly and weekly yields are computed as follows: U.S. Govt. bonds: Monthly and weekly yields are computed as follows: U.S. Govt. bonds:
Averages of daily figures for bonds maturing or callable in 10 years or Averag
more.

State and local govt. bonds: General obligations only, based on Thurs.
\({ }_{5} 5\) Bills quoted on bank discount rate basis.
\({ }_{7}^{6}\) Certificates of indebtedness and selected note and bond issues. \({ }^{7}\) Selected note and bond issues.

\section*{BOND AND STOCK YIELDS}
(Per cent per annum)
figures. Corp. bonds: Averages of daily figures. Both of these series are from Moody's Investors Service series.
Stocks: Standard and Poor's Corp. series. Dividend/price ratios are based on Wed. figures; earnings/price ratios are as of end of period. Preferred stock ratio is based on 8 median yields for a sample of nonon the 500 stocks in the price index. Quarterly earnings are seasonally adjusted at annual rates.

1 Last 6 months only.
Note.-Annual data are averages of monthly figures. Yields on FHA-insured mortgages are derived from weighted averages for Sec. 203, 30-year mortgages, with the minimum down payment, a maximum permissible interest rate of \(51 / 4\) per cent, and an assumed prepayment period of 15 years. Price data are reported as of the first of the succeeding month.

Conventional first mortgages, Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation beginning in late 1962; interest rate data for earlier years-in parentheses-are based on estimates from Federal Housing Administration.

\end{tabular}

Note.-Data in first 3 cols. and last col. are for end of month; in other cols. for last Wed.
Net debit balances and broker and dealer credit: Ledger balances of member firms of N.Y. Stock Exchange carrying margin accounts, as reported to Exchange. Customers' debit and free credit balances exclude balances maintained with reporting firm by other member firms of national securities exchanges and balances of reporting firm and of general partners of reporting firm. Balances are net for each customer-i.e., all accounts of one customer are consolidated. Money borrowed meludes borrowings from banks and from other lender
ational securities exchanges.
Nov. data on customers' net debit balances exclude amounts carried by a large former member firm in liquidation; most of these accounts
have been transferred to other member firms and are reported in their debit figures from the month received (some in Dec. 1963, more in Jan. 1964). Debit balance totals for the period Oct.-Jan., therefore, are not completely comparable.
Bank loans to others than brokers and dealers: figures are for weekly reporting member banks. Before July 1959, loans for purchasing or carrying U.S. Govt. securities were reported separately only by N.Y. and Chicago banks. Accordingly, for that period the fifth col. includes
any loans for purchasing or carrying such securities at other reporting any loans for purchasing or carrying such securities at other reporting revised data for the new reporting series (but not for the breakdown of loans by purpose) are available back through July 1958 and have been incorporated.

investments, real estate owned and sold on contract, and office buildings and fixtures.
\({ }^{2}\) Before 1958 mortgages are net of mortgage-pledged shares. Asset items will not add to total assets, which include gross mortgages with no deductions for mortgage-pledged shares. Beginning with Jan. 1958, no deduction is made for mortgage-pledged shares. mese have declined consis

3 Consists of advances from FHLB and other borrowing.
}

4 The decline in reserves and surplus from Feb. to Mar. 1964 is concentrated in state-chartered savings and loan assns. in Calif. where the centrated in state-chartered savings
accounting system is being revised.

Notr_-Federal Savings and Loan Insurance Corp. data; figures are estimates for all savings and loan assns. in the United States. Data beginning with 1954 are based on monthly reports of insured assns. and on annual reports. Data for current and preceding year are preliminary on annual reports.

PEDERAL FISCAL OPERATIONS: SUMMARY
(In millions of dollars)

\[
1 \text { Primarily interest payments by Treasury to trust accounts and accumu- }
\]
\[
\begin{aligned}
& 1 \text { Primarily interest payments by Tre } \\
& \text { lations to U.S. employe trust funds. }
\end{aligned}
\]

2 Includes small adjustments not shown separately.
\({ }^{3}\) Includes net transactions of Govt.-sponsored enterprises.
4 Primarily (1) intragovt. transactions, (2) noncash debt, (3) clearing accounts.
\({ }^{5}\) Includes technical adjustments not allocated by functions. 6 Fiscal year cash payments for agriculture and international affairs reflect a shift of the Food for Peace program out of agriculture and into
international affairs. Data are not yet available to make the adjustment international affairs. Data are not yet available to make the adjustment on a monthly or half-yearly basis.

Nore.-Based on Treasury Dept. and Bureau of the Budget data.

Notr.-Direct public issues only. Based on Treasury Survey of Ownership.

Data complete for U.S. Govt. agencies and trust funds and F.R. Banks but for other groups are based on Treasury Survey data. Of total marketable issues held by groups, the proportion held on latest date by those reporting in the Survey and the number of owners surveyed were: (1) about 90 per cent by the 6,003 commercial banks, 501 mutual savings
banks, and 781 insurance cos. combined; (2) about 50 per cent by the 469 nonfinancial corps. and 488 savings and loan assns.; and (3) about 70 per cent by 507 State and local govts.

Holdings of "all others," a residual, include holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

\end{tabular}

Note.-Data from Federal Home Loan Bank Board, Federal National Mortgage Assn., and Farm Credit Admin. Among the omitted balance sheet items are capital accounts of all agencies, except for stock of home loan banks. Bonds, debentures, and notes are valued at par. They include only publicly offered securities (excluding, for the home loan banks,
bonds held within the FHLB System), and are not guaranteed by the U.S.
Govt.; for a listing of these securities, see preceding page. Loans are
gross of valuation reserves and represent cost for FNMA and unpaid
principal for other agencies.

\end{tabular}

1 Only bonds sold pursuant to 1949 Housing Act; secured by contract requiring the Public Housing Administration to make annual contributions to the local authority
\({ }_{2}\) Municipalities, counties, townships, school districts.
\({ }^{3}\) Excludes U.S. Govt. loans. Based on date of delivery to purchaser
4 Water, sewer, and other utilities.

5 Includes urban redevelopment loans.
Note.-The figures in the first column differ from those shown on the following page, which are based on Bond Buyer data. The principal difference is in the treatment of U.S. Govt loans
Investment Bankers Assn. data; par amounts of long-term issues Based on date of sale unless otherwise indicated

1 Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

2 Includes guaranteed issues.
Issues not guaranteed.
4 Foreign governments, International Bank for Reconstruction and Development, and domestic nonprofit organizations.

5 Estimated gross proceeds less cost of flotation.

6 For plant and equipment and working capital
7 Beginning with 1957 this figure differs from that shown on the previous page because this one is based on Bond Buyer data.

All issues other than those for retirement of securities.
Note.-Securities and Exchange Commission estimates of new issues maturing in more than 1 year sold for cash in the United States.

\footnotetext{
1 Includes contractual and regular single purchase sales, voluntary and contractual accumulation plan sales, and reinvestment of investment income dividends; excludes reinvestment of realized capital gains dividends.
\({ }^{2}\) Market value at end of period less current liabilities.
\({ }^{3}\) Cash and deposits, receivables, all U.S. Govt. securities, and other
}
short-term debt securities, less current liabilities.
Note.--Investment Co. Institute data based on reports of members, which comprise substantially all open-end investment cos. registered with the Securities and Exchange Commission. Data reflect newly formed cos. after their initial offering of securities.

SALES, PROFITS, AND DIVIDENDS OF LARGE CORPORATIONS

1 Includes 17 cos. in groups not shown separately.
2 Includes 27 cos. in groups not shown separately.
Note--Manufacturing corps. Data are obtained primarily from published co. reports.
Railroads. Interstate Commerce Commission data for Class I line haul railroads.
Electric power. Federal Power Commission data for Class A and B electric utilities, except that quarterly figures on operating revenue and affiliated nonelectric operations.

Telephone. Data obtained from Federal Communications Commission on revenues and profits for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Co.) and for 2 affiliated telephone cos. Dividends are for the 20 operating subsidiaries and the 2 affiliates.
All series. Profits before taxes are income after all charges and before Federal income taxes and dividends. For description of series see 215-17 (public utilities); and Sept. 1944 BULL., p. 908 (electric power). Back data available from the Division of Research and Statistics.

extracting operations in process were classified with farm through June extracting operations in process were classified with farm through June
1959 and with "other" nonfarm thereafter. These loans totaled \(\$ 38\) 1959 and with "other"
million on July 31,1959 .

Note.-Institute of Life Insurance data. For loans acquired, the
monthly figures may not add to annual totals and for loans outstanding, the end-of-Dec. figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset values, and because data for ycarend adjustments are more complete.

MORTGAGE ACTIVITY OF SAVINGS AND LOAN ASSOCIATIONS (In millions of dollars)

1 Includes loans for repairs, additions and alterations, refinancing, etc.,
not shown separately
2 Beginning with 1958 includes shares pledged against mortgage loans.

\({ }_{2}^{1}\) Includes adjustments for differences in trading days. except in 1959 in credit outstanding equal extens outstanding balances for Alaska and Hawaii.

Note.-Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and
sales of instalment paper, and certain other transactions may increase the amount of extensions and repayments without affecting the amount outstanding.
For a description of the series in this and the following table see Jan. 1954 Bull., pp. 9-17. Back data upon request.

1 Includes adjustment for differences in trading days.
2 Net changes in credit outstanding are equal to extensions less repay\({ }^{2}\) Net changes in credit outstanding are equal to extensions less repayments except: (1) in 1959, when the differences do not reflect the introduction of outstanding balances for Alaska and Hawaii, and (2) in certain
months when data for extensions and repayments have been adiusted to eliminate duplication resulting from large transfers of paper. In those
months the differences between extensions and repayments for some particular holders do not equal the changes in their outstanding credit. Such transfers do not affect total instalment credit extended, repaid, or outstanding.

For notes see following page.
Data are revised from those shown in March 1965 BuLl.

Notes to Table 2
I. Saving and investment. Derived statistically from Commerce Dept. income and product accounts. Tables presenting the relation to those sum for domestic sectors of gross-saving entries in Table 4 . It is before deduction of capital consumption allowances. Govt. saving is net of public outlays for capital goods as well as current operations. Gross national investment (line 8) is gross private domestic investment in in-come-and-product accounts plus consumer durables plus net foreign investment. Net foreign investment differs from corresponding income-and-product series by amount of errors and omissions in balance of payment statement.

Relation of saving-investment discrepancy to flow of funds matrix is described in Aug. 1959 Bull., p. 859.
iI. Financial flows-Summary. This table is described in Nov. 1962 Bull., p. 1405. Total net funds raised (line 17) is borrowing through credit markets (line 25 of Table 1) by households, nonfinancial business, govts., and foreign. Credit market funds raised by all sectors consists of line 17 plus financial-sector borrowing (Table \(4(\mathrm{H})\), line 33 and Table 4(I), line 7).
U.S. Govt. short-term securities are direct marketable issues due in less than 1 year and 2 years. For further detail see Table 4(E), lines 26-29 Demand deposits on lines 38 and 46 are on bank-record basis rather 1959 holder records shown in Table 4. Difference is described in Aug, Sources \(n\), (line 42 ) is mainly financial institution net sources of funds other than deposits, insurance and pension reserves, security credit, and other than deposits, insurance and pension reserves, security credit, and Private dumes of deposits and credit market instruments by households, nonfinancial
business, and state and local govts. Line 50 includes household savings bonds as well as marketable issues; see Table 3, line 39. Line 52 includes consumer credit and open-market paper in addition to private securitie III mortgages. Line 53 is net of free credit balances at brokers.
Table \(4(G)\), lines 5 less 14 . Commercial-bank total, line 63 , is Table \(4(\mathrm{H})\), line 5 ; includes security credit. Nonbank finance totals include security credit both in lending and funds raised and exclude investment company shares on both sides; line 67 is lines 3 and 4 of Table 4(I), less line 4 of 4 (I.8), and line 68 is line 7 of Table 4(I) plus line 5 of 4(I.7) less line 4 of (I.8). Line 71 is the net sum of lines \(50-53\) in Table 2-II.

\section*{Notes to Table 3}
I. Demand deposits and currency. Lines 5-8 are holder record; line 9 is difference between holder and bank record.
III. U.S. Govt. securities. All holdings stated in par values; excludes special issues to international organizations and includes nonguaranteed issues of Govt. agencies. Short-term category consists of direct marketable issues due in less than one year plus part of those due in less than 2 years.
IV. Other securities. Total excludes open-end investment co. shares; these are shown as a deduction on line 56 , offsetting net purchases of such shares included in the other lines (mainly consumer) under "net purchases." Net purchases includes small amounts for mutual savings anks and nonfinancial corporations not shown separately.
cluded in totais outstanding and treated as savings and lociations are Line 63 includes holdings by State and local govts not shown separately. Line 70 includes hiability of consumers not shown separately.

\section*{Notes to Table 4}
(A) Households

1 Includes nonprofit organizations serving individuals.
2 Retained funds of savings institutions and insurance imputed to personal saving in income and product accounts.
\({ }^{3}\) On owner-occupied houses and nonprofit plant and equipment. 4 Table 4(E), line 13 and \(4(\mathrm{~F})\), line 7.
\({ }^{5}\) Includes net free balances with security brokers not shown separately.
6 Policy loans and hypothecated deposits.
7 Commercial mtgs., bank loans, loans from Govt., and trade debt.

Table 4(E), line 30
8 Loans from U.S. Govt. and commercial loans from finance cos.
9 Loans from U.S. Govt. and commercial loans fron half of residential items in Table 4(B).
10 Excludes corporations in Tables 4(H), (I), and (J).
11 Includes branch profits paid to fgn. parents less branch profits received from abroad.

12 Includes State and local obligations not shown separately.
13 Direct investments abroad, fgn. currency holdings, and unallocated current assets.

14 Mainly commercial paper and commercial loans from finance cos. 15 Includes State and local profit taxes.
govts., subsidies less current surplus of Govt. enterprises.
5 Govt. life ins., employee retirement, and R.R. retirement programs.
Excludes social security, which is treated as nonfinancial operation.
\({ }^{6}\) Mainly nonconvertible fgn. currencies and official fgn. exchange position of Treasury.
7 Public debt held by public and Federal Reserve, plus nonguaranteed issues of Govt. agencies. Includes interest accruals on savings bonds and Treasury bills; excludes special notes to international organizations.

9 Marketable issues due in less than
\({ }^{9}\) Marketable issues due in less than 1 year plus part of those due in less than 2 years.
10 CCC-guaranteed loans and certificates of participation in Exportmport Bank loans. Net movements in inventory under CCC-guarantee are included in line 11.

12 Net of current surplus of govt funds.
13 Corporate bonds and mortgages.
14 Trade debt and loans from U.S. Govt.
5 Based on balance sheet estimates for last day of quarter. Reported bank data, as on p. 560, are frequently for last Wednesday of month or other reporting date. Excludes banks in U.S. possessions.
6 Deposits with F.R. Banks; vault cash in reserves is in line 4.
7 Net change in par value of holdings.
8 Includes consumer loans secured by hypothecated deposits not shown separately.

9 Includes deposits held outside Treasury.
10 Bank and nonbank.
11 Net of F.R. float, shown separately in line 30.

\section*{(G, H) Banking}

1 Federal Reserve System plus those Treasury accounts included in "Member Bank Reserves, Federal Reserve Bank Credit, and Related Items." Excludes Exchange Stabilization Fund, which is in U.S. Govt. 2 Includ.
\({ }^{2}\) Includes F.R. holdings of fgn. currencies, which are net in "other F.R. accounts" in table mentioned in note 1 .

3 Includes vault cash of nonmember banks.
MF indes deposits of international organizations other than \(I M F\) IMF deposits are net in line 3.

3 Includes retained capital-gains dividends.
\({ }^{3}\) Includes retained capital-gains dividends.
4 Includes cash and other assets, not shown separately. line 7 .

Nonbank Finance
1 In addition to types shown, includes credit unions, agencies of foreign anks, and banks in possessions.
\({ }^{2}\) Lines 10,11 of I.1; lines 6,7 , and 8 of I.6; and line 4 of I.8.

IMF position consists of U.S. capital subseription less IMF holdings of special U.S. Govt. notes and deposits with Federal Reserve.

4 Bank loans, acceptances, loans from U.S. Govt., and security credit. \({ }^{5}\) Direct investment abroad, foreign currencies held by other than in line 15 , subscriptions
unidentified liabilities.
\({ }^{6}\) Errors and omissions in U.S. balance of payments statement.

5 FINANCIAL ASSETS AND LIABILITIES, DECEMBER 31, 1964
(Amounts outstanding in billions of dollars)

\({ }^{1}\) Claims between commercial banks and monetary authorities: member bank reserves, vault cash, F.R. loans to banks, F.R. float, and stock at F.R. banks.
2 IMF Position liabilities of the U.S. Govt. (IMF notes) and monetary authorities (deposits of IMF at F.R. Bank of New York) are netted against assets in determining both the sector and transaction totals.
\({ }^{3}\) Includes savings bonds. Postal savings system deposits are included in line 12 .
4 Assets shown at market value; nonbank finance liability is redemption value of shares of open-end
investment companies. No specific liability is attributed to issuers of stocks other than open-end invest ment companies for amounts outstanding.
5 Net of noncorporate trade credit assets.

Note.-For description of sectors and transaction categories, see Aug. 1959 Bull., pp. 846-57. Details may not add to totals because of rounding.

NUMBER IN OPERATION ON DECEMBER 31, 1964

1 Excludes banks that have banking facilities only; banking facilities are shown separately; see note 4 .
\({ }^{2}\) Includes 1 national bank in the Virgin Islands, with 2 branches, that became a member of the F.R. System in 1957
\({ }^{3}\) State member bank figures include 1 noninsured trust co. without deposits.
\({ }^{4}\) Banking facilities (other than branches) that are provided at military and other Govt. establishments through arrangements made by the Treasury; they are operated by 192 banks, 67 of which have no other type of branch or additional office.
\({ }^{5}\) Each bank is reported once only-according to the widest area in which it operates branches or additional offices.

Note.-Each branch and additional office is located in the same State as its parent bank except that 1 national bank in N.J. has a branch in Pa., 1 national bank in Calif. has 2 branches in Wash. and 1 in Ore., 1 noninsured (unincorporated) bank in N.Y. has 1 branch in Mass. and 1 in Pa.; the table these branches are shown according to their own location rather than that of the parent bank.

For notes see opposite page.

\end{tabular}

1 Net losses is the excess of (a) actual losses charged against net income plus losses charged against valuation reserves over (b) actual recoveries and profits credited to net income plus recoveries credited to valuation reserves; net recoveries and profits is the reverse. Transfers to and from reserves are excluded.
\({ }_{2}\) Banks reporting no interest paid on time deposits or trust department revenue, as the case may be, were excluded in computing this average.
exclude fatios for 251 member banks in operation at the end of 1964 were excluded from the compilations because of unavailability of data covering the complete year's operations, certain accounting adjustments, lack of comparability, etc.
\({ }^{4}\) No ratios are shown for groups of less than 3 banks.
NotE.- These ratios, being arithmetic averages of the operating ratios of computed from aggregate dollar amounts that will be shown in a subse
quent issue of the Bulletin. Such differences result from the fact that each bank's figures have an equal weight in calculation of the averages whereas the figures of the many small and medium-sized banks have but
little influence on the aggregate dollar amounts. Averages of individual ratios are useful primarily to those interested in studying the financial results of operations of individual banks, while ratios based on aggregates show combined results for the banking system as a whole and, broadly speaking, are the more significant for purposes of general analyses of redit and monetary problems.
Figures of revenue, expenses, etc., used in the calculations were taken from the annual income and dividends reports for 1964. Balancesheet figures used in the compilations were obtained by averaging the Dec. 20, 1963, April 15 and June 30,1964 . Savings deposits are included in the time deposit figures used in these tables.

The figures on international capital transactions are collected by the F.R. Banks from reports made on Treasury foreign exchange forms collected by the F.R. Banks in accordance with Executive Orders No. 6560, dated Jan. 15, 1934, and No. 10033, dated Feb. 8, 1949, and Treasury regulations thereunder. Other data are com-
piled largely from regularly published sources such as central bank statements and official statistical bulletins. For some of the series, back data are available in Banking and Monetary Statistics and its Supplements (see list of publications at the end of the Buletin).

1 Includes reported or estimated gold holdings of international and regional organizations, central banks and govts. of countries listed in this table and also of a number not shown separately here, and gold to be distributed by the Tripartite Commission for the Restitution of Monetary
Gold; excludes holdings of the U.S.S.R., other Eastern European countries, and China Mainland.
The figures included for the Bank for International Settlements are the Bank's gold assets net of gold deposit liabilities. This procedure avoids the overstatement of total world gold reserves since most of the gold deposited with the BIS is included in the gold reserves of individual countries.

\({ }^{1}\) Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, which amounted to \(\$ 800\) million on Mar. 31, 1965.

2 Includes gold in Exchange Stabilization Fund.
3 For holdings of F.R. Banks only see pp. 554 and 556.

4 Includes payment of \(\$ 344\) million increase in U.S. gold subscription to the IMF.
Note---See Table 11 on p. 633 for gold held under earmark at F.R. Banks for foreign and international accounts. Gold under earmark is not included in the gold stock of the United States.
See also Nore to table on gold reserves.

HOLDINGS OF FOREIGN COUNTRIES AND INTERNATIONAL ORGANIZATIONS
(In millions of dollars)

\({ }^{1}\) The first column continues the series based on a 1960 survey and subsequently reported securities transactions; the second is based on a survey as of July 31, 1963, and reported securities transactions for Aug. Dec. Data are not available to reconcile the 2 series.
Includes, in addition to other Western European countries, unpublished gold reserves of certain Western European countries; gold to be tary Gold. Eutopean Fund, and the Bank for International Settlement tary Gold; European Fund; and the Bank for International Settlements (the figures for the gold reserves of the BIS represent the Bank's net gold assets).
countries, and gold reserves of the U.S.S.R., other Eastern European ountries, and China Mainland.
4 Includes international organizations and Latin American and Euro-
pean regional organizations, except the Bank for International Settlements and European Fund, which are included in "Other Western Europe."
Note.-Gold and short-term dollars include reported and estimated official gold reserves, and official and private short-term dollar holdings (principally deposits and U.S. Treasury bills and certificates); excludes nonnegotiable, non-interest-bearing special U.S. notes held by the InterAmerican Development Bank and the International Development Assn. Govt securities with an original matarity of more than 1 year. oxcludes nonmarketable US Treasury bonds and notes held by official institutions of foreign countries as shown in Table 8 on p. 632
See also Note to table on gold reserves.

8 Represent a partial breakdown of the amounts shown in the "other" categories (except "Other Eastern Europe") in Tables 2a-2e.
Note.-Short-term liabilities are principally deposits (demand and time) and U.S. Govt. securities maturing in not more than 1 year from their date of issue; the latter, however, exclude nonnegotiable, non-
interest-bearing special U.S. notes held by the International Development Assn. and the Inter-American Development Bank. For data on cong-term liabilities, see Table 6. For back figures and further
description of the data in this and the following tables on international capital transactions of the United States, see "International Finance," Section 15 of Supplement to Banking and Monetary Statistics, 1962.

For notes see following page.
4. SHORT-TERM CLAIMS ON FOREIGNERS REPORTED BY BANKS IN THE UNITED STATES, BY COUNTRY-Continued
(Amounts outstanding; in millions of dollars)

\({ }_{1}\) Not reported separately until 1963.
2 Includes Africa until 1963.
\({ }^{3}\) Includes \(\$ 58\) million reported by banks initially included as of Dec. 1961, of which \(\$ 52\) million reported for Japan.

4 Differs from December data in line above because of the exclusion as of Dec. 31, 1964, of \(\$ 58\) million of short-term U.S. Govt. claims prem claims art term claims arising from the inclusion of claims previously held but first reported as of Dec. 31,1964 , and revision of preliminary data.
5 Until 1963 includes Eastern European countries other than U.S.S.R., Czechoslovakia, Poland, and Rumania.

Czechoslovakia, Poland, and Rumania only until 1963. 1963
\({ }_{8}\) Until 1963 includes also the following Latin American Republics:

Costa Rica, Ecuador, Haiti, Honduras, Jamaica, Nicaragua, Paraguay, and Trinidad and Tobago.
\({ }^{9}\) Until 1963 includes also African countries other than Congo (Leopoldville), South Africa, and U.A.R. (Egypt).
Note.-Short-term claims are principally the following items payable on demand or with a contractual maturity of not more than 1 year; loans made to and acceptances made for foreigners; drafts drawn against foreigners where collection is being made by banks and bankers for and foreign currency balances held abroad by banks and bankers and their customers in the United States. Excludes foreign currencies held by U.S. monetary authorities. by U.S. monetary authorities
See also Note to Table 2 .

\end{tabular}

1 Includes central banks.
2 Not reported separately until 1963.
3 Until 1963 includes acceptances made for account of foreigners.
4 Until 1963 includes foreign government securities, commercial and finance paper.

5 These figures reffect the inclusion of data for banks initially included as of Dec. 31, 1961.

6 Differs from December data in line above because of the exclusion as of Dec. 31,1964 , of \(\$ 58\) million of short-term U.S. Govt. claims previously included; and because of the addition of \(\$ 163\) million of shortterm claims arising from the inclusion of claims previously held but firs \(t\) reported as of Dec. 31, 1964, and revision of preliminary data.

\({ }_{2}^{1}\) Not reported separately until 1963.
\({ }^{2}\) Includes Africa until 1963.
\({ }^{3}\) Includes claims previously held, but reported for the first time as of May 1963; on that date such claims were \(\$ 86\) million. Also includes \(\$ 193\) million reported for the first time as of December 1963, representing
in part claims previously held but not reported by banks. Included in
this amount are claims on: Europe \(\$ 5\) million, Latin America \(\$ 134\) million, and Asia \(\$ 54\) million.
\({ }^{4}\) Differs from December data in line above because of the addition of \(\$ 161\) million of long-term claims arising from the inclusion of claims previously held but first reported as of Dec. 31, 1964, and revision of preliminary data.
7. PURCHASES AND SALES BY FOREIGNERS OF LONG-TERM SECURITIES, BY TYPE
(In millions of dollars)

1 Excludes nonmarketable U.S. Treasury bonds and notes held by official institutions of foreign countries; see Table 8.
\({ }^{2}\) Includes small amounts of State and local govt. securities.

Nore.-Statistics include transactions of international and regional
organizations.
See also Note to Table 2.
8. NONMARKETABLE U.S. TREASURY BONDS AND NOTES HELD BY OFFICIAL INSTITUTIONS OF FOREIGN COUNTRIES
(In millions of dollars)

1 Includes the equivalent of \(\$ 70\) million payable in Swiss francs to the Bank for International Settlements.
\({ }^{2}\) Includes \(\$ 204\) million of nonmarketable bonds issued to the Government of Canada in connection with transactions under the Columbia River treaty.
9. NET PURCHASES OR SALES BY FOREIGNERS OF U.S. CORPORATE SECURITIES, BY TYPE OF SECURITY AND BY COUNTRY
(In millions of dollars)

1 Eighth revised series; includes data from firms reporting for the first time as of Dec. 31, 1963. This series also includes claims previously held but not reported
\({ }^{2}\) Ninth revised series; includes reports from firms having \(\$ 500,000\) or more of liabilities or of claims; for previous series the exemption level
} was \(\$ 100,000\).

CENTRAL BANK RATES FOR DISCOUNTS AND ADVANCES TO COMMERCIAL BANKS
(Per cent per annum)

1 On June 24, 1962, the bank rate on advances to chartered banks was fixed at 6 per cent. Rates on loans to money market dealers will was fixed at 6 per cent. Rates on loans to money market deaders wind
continue to be .25 of 1 per cent above latest weekly Treasury bill tender average rate but will not be more than the bank rate.

2 Beginning with Apr. 1, 1959, new rediscounts have been granted at the average rate charged by banks in the previous half year. Old rediscounts remain subject to old rates provided their amount is reduced by one-eighth each month beginning with May 1, 1959, but the rates are raised by 1.5 per cent for each month in which the reduction does not occur.
\({ }_{3}\) Rate shown is for call loans
4 Rate shown is for advances only
5 Begining with June 1, 1962, the rediscount rate for commercial bank loans financing the purchase of surplus agricultural commodities under U.S. Law 480 was reduced from 6 to 3 per cent; and on Aug. 22, 1962, the rediscount rate for commercial bank financing of 9 categories of development loans was reduced from 6 to 3 per cent.

Note.-Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt. securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate
shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations. Other rates for some of these countries follow;
Argentina-3 and 5 per cent for certain rural and industrial paper, depending on type of transaction:
Brazil-8 per cent for secured paper and 4 per cent for certain agricultural paper;
Colombia-5 per cent for warehouse receipts covering approved lists of products, 6 and 7 per cent for agricultural bonds, and 12 and 18 per cent Cor rediscounts in excess of an individual bank's quota;
Costa Rica-S per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper),
Ecuador- 6 per cent for bank acceptances for commercial purposes; Indonesia-various rates depending on type of paper, collateral, commodity involved, etc.;
Japan-penalty rates (exceeding the basic rate shown) for borrowings from the central bank in excess of an individual bank's quota; Peru- 8 per cent for agricultural, industrial and mining paper; and Venezuela - 4 per cent for rediscounts of certain agricultural paper and for advances against govt. bonds or gold and 5 per cent on advances against securities of Venezuelan companies.
