Subscription Price

A copy of the Federal Reserve BULLETIN is sent to each member bank without charge; member banks desiring additional copies may secure them at a special \$2.00 annual rate.

The regular subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is \$6.00 per annum or 60 cents a copy. (In quantities of 10 or more of same issue sent to one address, \$5.00 per annum or 50 cents each.) Elsewhere, \$7.00 per annum or 70 cents a copy.

Flows Through Financial Intermediaries

IN 1963, as in other recent years, those who borrowed in the capital markets obtained long-term funds primarily through major financial intermediaries.

To meet this demand intermediaries had available a record net inflow of funds. The total for the full year amounted to \$38 billion, despite some slowing in the flow from consumers after the first quarter. Even so, such savings still accounted for more than four-fifths of the total inflow to these institutional investors during the year.

In the first quarter of 1964 total net inflows to intermediaries—as defined in the note to the accompanying chart—continued at high levels, but were below first-quarter rates for both 1962 and 1963. Preliminary data available for March and April show no clear-cut effect of the Federal tax cut on these flows.

During the expansion phases of earlier postwar cycles, consumers diverted considerable amounts of their savings from intermediaries to direct purchases of securities. This pattern has been less marked in the current expansion. In contrast with earlier experience, market rates of interest have advanced only moderately, and returns paid on the deposits and shares of financial intermediaries have risen enough to keep these outlets for saving competitive with market investments.

Slackening in the flow of savings to intermediaries since the first quarter of 1963 has had only a moderate impact on capital markets. Uncertainties about flows of funds

into commercial bank time deposits, and hence about the volume of bank investment in State and local government securities, did have some effect on yields of these obligations, particularly in the September-November period of 1963. In the mortgage market, although intermediaries have continued to finance a large volume of new mortgage debt at stable interest rates, they have ceased to make net purchases of mortgages in the secondary market and have relied heavily on funds borrowed from the Home Loan Bank System.

SAVINGS FLOWS have been directed largely through intermediaries

NOTE.—Flow of funds annual data. Net flows to financial intermediaries encompass (1) growth in reserves of contractual intermediaries (life insurance companies and noninsured, private pension funds) and (2) net acquisitions by domestic individuals, nonfinancial corporations and other institutions—excluding the U.S. Government—of income-producing claims on depository institutions (time and savings deposits at commercial banks, savings deposits at mutual savings banks, and share accounts at savings and loan associations and credit unions.) Net purchases of shares of open-end investment companies and demand deposits at commercial banks are not included.

FLOWS INTO DEPOSITORY INSTITUTIONS

Net savings flows to financial intermediaries, although recently below the peak volume reached in early 1963, have been unusually large throughout the current economic expansion. In part, these record inflows reflect a continuation of the broad underlying forces that have fostered steady growth of financial saving at intermediaries since World War II. This has been particularly true for such intermediaries as life insurance companies and pension funds, through which individuals and their employers make contractual provision for specific financial needs.

In the past several years, however, the strongest expansion has occurred at depository institutions. Here, too, the operation of long-run trends has been evident. Rising incomes have continued to expand financial savings among people who favor claims in depository form—a preference that reflects both the typically small size of their savings increments and a lack of familiarity with the mechanics of security markets. Also, as returns on savings deposits and shares have risen, consumers and business firms have been encouraged to hold their liquidity reserves in the form of depository-type savings and to minimize the size of their non-interest-bearing demand deposits.

But the sharpness of the upsurge in flows to financial intermediaries during recent years and the tendency for this rise to persist beyond the early recovery stage of the cycle have also clearly reflected forces that were not operative in earlier postwar periods of economic advance. During each of the two previous cycles, flows to intermediaries reached a peak in the recession, and then contracted during the subsequent recovery as the volume of savings flowing into direct purchases of securities increased.

The principal component accounting for

COMMERCIAL BANKS have increased their share of depository savings

NOTE.—Semiannual flow of funds data plotted at seasonally adjusted annual rates.

the unusual rise in flows to financial intermediaries since 1960 has been the accelerated growth of time and savings deposits at commercial banks. But increases in claims on other types of intermediaries have also been large.

Commercial banks. Expansion in time and savings deposits at banks reached record proportions in 1962 when the net inflow exceeded \$15 billion. This total was more than seven times the low 1959 level, and it accounted for more than 40 per cent of total flows to all major intermediaries. In 1963, however, the inflow of time and savings deposits at banks diminished by \$2 billion, while flows to other intermediaries showed a year-over-year gain of \$2.5 billion. The share of commercial bank flows in total flows declined to 35 per cent, but remained larger than that for any other type of intermediary.

Commercial banks have been making a sustained effort in recent years to expand their position as financial intermediaries. Their success has depended in large part on

higher rates of return paid on time and savings deposits at banks relative to those available on money market instruments. In addition, successive increases in rates at commercial banks, although partly offset by upward adjustments at other depository institutions, have narrowed spreads between returns paid on time and savings deposits at banks and those paid on claims at other savings institutions.

Nevertheless, average spreads have remained substantial. And funds diverted from these other institutions appear to have been less important in accounting for the growth in flows to commercial banks than funds diverted from checking accounts and securities markets.

Unlike earlier postwar cycles, growth in time and savings deposits did not contract as the current expansion developed; in fact, during 1962 and early 1963 the rate of growth increased. In part, this reflected the fact that market interest rates advanced only moderately as general money and credit conditions remained easy in comparison with the two previous upswings. At the same time it reflected a sharp rise in rates paid on bank time and savings deposits made possible by revisions in regulatory ceilings. The details of these changes in ceiling rates are shown in the table on page 577 of this BULLETIN.

In late 1961, when market rates began to push toward the bank rate ceilings established at the beginning of 1957, maximum permissible rates were adjusted upward. And in the summer of 1963 ceiling rates on time deposits of shorter duration were raised again, in conjunction with the July increase in the Federal Reserve discount rate. These revisions facilitated continued commercial bank competition for savings flows as the economic expansion progressed.

The relationship between rates on com-

NOTE.—Ratio of total interest or dividends paid during year to average deposits or shares on which interest or dividends are paid. Commercial bank data include both savings and other time deposits. Data for mutual savings banks are from National Association of Mutual Savings Banks; for savings and loan associations (insured), from Federal Home Loan Bank Board; and for commercial banks (member), from Federal Reserve.

mercial bank time deposits and those available on short-term money market instruments has been particularly important since 1961 because of the rapid growth in negotiable time certificates of deposits (CD's) at banks. The relatively high interest returns on CD's, their flexible maturities, and the availability of a secondary market make them suitable substitutes for other short-term market instruments. Thus they represent a means by which at least the larger banks may compete for the liquid reserves of corporations and other large participants in the market.

From late 1960 to late 1961 the outstanding volume of negotiable CD's issued at weekly reporting banks rose by \$2 billion. Since these are the largest banks, they ac-

count for the bulk of the supply of such instruments. Growth in CD's at weekly reporting banks accelerated after the January 1962 increase in the Regulation Q ceilings, and by the end of March 1964 the total outstanding had increased by almost \$8 billion more. From the end of 1960 through March 1964, growth in such deposits accounted for roughly one-fourth of the total expansion of commercial bank time and savings deposits.

The largest share of the expansion in bank time and savings deposits, however, has continued to come from the consumer sector. In 1960, consumer savings flowing to banks amounted to only \$3.3 billion, but in 1962 the flow expanded to \$11.5 billion and represented 75 per cent of the total net savings flow to banks. In 1963, as market rates rose, the stimulus from increases in rate ceilings began to moderate, and net flows from the consumer sector dropped back to an estimated \$7.3 billion. At this level, however, they still accounted for more than half of the increase in commercial bank time and savings balances.

Savings and loan associations. Among other major intermediaries, the savings and loan associations have received the largest volume of funds in recent years, as the chart on page 550 shows. In 1961, for the first time, the flow of funds to these associations matched net flows to contractual institutions—that is, life insurance companies and uninsured corporate pension funds combined. Since then it has exceeded the net inflow to these institutions.

In 1963 savings and loan associations received \$11 billion, net, in new share-account balances, two-thirds more than in 1959. At the same time, however, because of the sharp rise in flows into time and savings deposits at commercial banks, these associations accounted for only 30 per cent of total flows to all financial intermediaries;

this compares with nearly 50 per cent in 1961.

The ability of the savings and loan associations to maintain steady growth in the absolute volume of their share accounts reflects the fact that they have continued on the average to offer the highest rates available on liquid claims. At a few associations on the West Coast—where growth in share accounts has been sharpest—rates touched 5 per cent in 1963. In fact, during the last 2 years rates in that area have averaged well over 4.5 per cent and have attracted a sizable flow of funds from other parts of the country.

Mutual savings banks. While mutual savings banks have continued to receive a minor share of total savings flows to all major intermediaries, they have enjoyed large percentage gains since 1959. As was true for commercial banks, some of this growth represented the recapturing of a position lost during the 1959 period when market securities were particularly attractive because of their higher returns. But in 1962 net inflows rose nearly 50 per cent to \$3.1 billion. While the rate of increase during 1963 was much lower, growth in 1964 has picked up again, apparently due in large measure to a local rate increase in the New York metropolitan area.

INVESTMENT PATTERNS

Large flows of funds into financial intermediaries have permitted record advances to borrowers seeking long-term funds. Depository institutions, whose inflows experienced the sharpest growth in 1962 and early 1963, accounted for most of the increase over earlier years.

Net acquisitions of financial assets by savings and loan associations were \$13.4 billion in 1963—up 30 per cent from 1961

—while net acquisitions by mutual savings banks increased by more than 60 per cent over the same period to \$3.4 billion. Commercial bank takings of mortgages and securities other than those of the U.S. Government amounted to \$10.5 billion last year and accounted for more than half their total increase in loans and investments. Acquisitions of comparable assets had accounted for little more than 10 per cent of the total in 1960 and less than 30 per cent in 1961.

In some instances net acquisitions of investments by savings institutions substantially exceeded inflows of savings to them. In addition to channeling individual savings to borrowers, these institutions have been able to draw on funds from other sources when they thought an active investment policy was justified. In 1963, borrowing—primarily from the Federal home loan banks—provided savings and loan associations with funds for a tenth of their net acquisitions, with most of the increase on a seasonally adjusted basis occurring in the second half of the year.

Variations in liquidity reserves also permit investment flexibility. Mutual savings banks, for instance, continued to acquire funds for mortgages by reducing their holding of U.S. Government securities, and commercial banks helped finance their enlarged acquisitions of State and local obligations and mortgages by reducing their holdings of short-term Government securities.

Changes in the flows of institutional funds into particular market instruments over the past 2 years have reflected the financing needs of long-term borrowers, the more rapid growth of depositary intermediaries, and the pressures that rate competition for savers' funds has exerted on intermediaries to acquire higher-yielding assets. These pressures induced a sharp shift in institutional preferences among asset types in 1962, and the

pattern of takings established then has generally persisted since.

Mortgages. Borrowers obtain more funds through mortgages than through any other market instrument. During 1963 the net increase in mortgages outstanding exceeded \$29 billion and represented two-thirds of total long-term funds raised by issuers other than the Federal Government.

The rate of expansion in debt secured by 1- to 4-family residential property, while substantial, has been less than that in other mortgages—principally those on apartments and commercial properties. The increase in debt of the latter type, which had averaged little more than \$4 billion per year during 1952-61, totaled \$13.6 billion in 1963.

Mortgages, like corporate bonds, find their major market among institutional investors. Although the mortgage instrument is not readily marketable, it provides large-scale holders with a considerable element of liquidity through amortization. In recent years mortgage borrowers have benefited from the rapid growth of intermediaries such as savings and loan associations and mutual savings banks, which specialize in mortgage lending. At the same time, more diversified lending institutions such as commercial banks and life insurance companies have maintained or expanded their acquisitions of mortgages. Commercial banks in particular have turned more extensively to mortgages as they have sought to increase their holdings of higher-yielding assets in line with the growing importance of time and savings deposits among their liabilities.

Savings and loan associations have continued to be the single most important supplier of mortgage funds for 1- to 4-family properties, as the following chart shows. In the decade 1952-61 they provided 47 per cent of the total. By 1963 the figure had risen to 59 per cent. Acquisitions in the

first quarter of 1964 about matched last year's pace. Bank lending, which had accounted for only 10 per cent of the 1952-61 expansion in home mortgage debt, rose to 18 per cent in 1963, with most of the proportional increase occurring during 1962. Mutual savings banks also increased their share of total funds flowing into mortgages on 1- to 4-family properties.

As these suppliers have grown in relative importance, the share of mortgage money supplied by life insurance companies and other lenders has declined. Life insurance companies accounted for only 5 per cent of the net increase in mortgages on 1- to 4-family properties in 1962 as compared with 15 per cent in 1952-61, and the dollar volume of their net acquisitions declined by nearly \$1 billion from the preceding decade's annual average of \$1.5 billion. Some recovery occurred in 1963, with loan volume in an uptrend throughout the year. But in each of the last 2 years insurance investments in mortgages were directed in larger measure toward those on multifamily and commercial properties.

In the rapidly growing market for such mortgages, life insurance companies have until recently been the most important institutional lender. Despite large increases in amounts lent in 1962, however, their proportional share in the total declined as did that of mutual savings banks. Although commercial banks recently have more than tripled their average takings in the 1952-61 decade, their role in providing long-term financing for income properties has increased only moderately.

The most striking increase in relative importance has been at savings and loan associations. Their share rose from 12 per cent in 1952-61 to 22 per cent in 1962 as net acquisitions increased from an average of \$0.5 billion to \$2.6 billion. Despite a further small increase in their acquisitions last year, the relative importance of savings and loan associations apparently declined somewhat as the market expanded further.

Corporate and foreign bonds. Financial intermediaries, and especially those with contractual inflows and predictable obligations, make up the major market for corporate and

DEPOSITORY INSTITUTIONS played a growing role

foreign bonds. Life insurance companies provide more than 40 per cent of the net funds, and most of the rest comes from private pension funds and retirement systems operated by State and local government units.

In 1963 corporate and foreign bonded debt showed a net increase of \$6.7 billion, with more than half of the new corporate offerings taking the form of private placements. This total, while well short of the 1957 record volume, was high compared with most other years. Foreign borrowers drew heavily on U.S. capital markets in the first half of the year—prior to proposals for an interest-equalization tax—and long-term issues by finance companies were large.

Corporate and foreign debt instruments provided investment outlets for \$2.8 billion in life insurance funds, the largest amount since 1952. As compared with the two previous years, pension fund acquisitions also rose somewhat, varying inversely with the amount of funds directed toward the stock market.

Corporate stocks. Purchases of corporate stocks constitute an important investment outlet for private pension funds and, to a lesser extent, insurance companies. Last year these two groups made net purchases amounting to \$2.2 billion—somewhat less than in 1961 and 1962.

Unlike other capital market instruments, most transactions in stocks take place in the secondary market and involve transfers of outstanding shares rather than new issues. In years of small new-issue volume, the net effect of stock acquisitions by institutional investors is to shift existing shares from individual to institutional ownership.

Such a shift occurred during 1963 when new stock financing—excluding the increase in shares of open-end investment companies—was less than retirements. Net transfers of lesser magnitude have occurred before,

but the sums involved have been small relative to the estimated value of outstanding corporate stocks, and stock ownership remains predominantly in the hands of individuals.

Since the sums realized through sales of investment company shares are used to acquire existing assets—principally common stocks—these transactions constitute mainly a shift in the form of individual stock ownership. Participation by individuals in open-end investment company portfolios continued to expand in 1963, but at \$1.3 billion, net sales of shares were the smallest in 6 years.

State and local government securities. Interest received from State and local obligations is exempt from Federal income tax; since the value of the exemption is reflected in lower yields, the appeal of these instruments has been limited in large part to institutions that are fully subject to corporate income tax and to individuals in the higher income tax brackets. Institutional participation in financing State and local government debt has been important for many years, with commercial banks and fire, marine, and casualty insurance companies figuring as major purchasers.

In the decade ending with 1961, individuals on the average acquired about one-third of the net increase in tax-exempt bonds, and insurance companies (other than life) took just under one-fifth. Commercial banks accounted for somewhat more than one-fourth of the increase, but their annual acquisitions fluctuated widely around an average level of \$1.1 billion. On balance, the proportion of outstanding issues that they held declined slightly over the period.

Concurrent with the steep rise in time and savings deposits in 1962, net acquisitions of tax-exempt securities by commercial

banks rose to about \$4.5 billion. This equaled nearly 90 per cent of the year's increase in State and local government bonded debt. Banks' net purchases rose further to more than \$5 billion in 1963, but their share in last year's record volume of financing fell to about 75 per cent.

The bulk of the increase in 1963, moreover, occurred early in the year; fourth-quarter takings were at a seasonally adjusted annual rate of only about \$2 billion. Bank participation in the market for these instruments in early 1964 has been intermittent, but on balance takings appear to have been at about the fourth-quarter pace.

MARKET ADJUSTMENTS

In accommodating changing patterns of investment demand, yield differentials among the various market instruments have shifted moderately since 1961. Shifts in quoted interest rates might have been greater except for some easing of average terms—for instance, lengthening of mortgage maturities and increasing loan-to-value ratios. At the same time, other factors have helped to bring supplies of favored instruments into balance with demand.

During a period when new mortgage financing has been in record volume, heavy institutional demand for mortgages has narrowed the traditional spread between mortgage yields and those on newly issued high-grade corporate bonds—the most directly competitive instrument. As the chart shows, yields on FHA-insured home mortgages continued to decline for some months after other yields began to rise late in 1962 and have remained steady since early 1963, despite the gradual increase in most long-term rates. The differential, which at present is about 1 percentage point, must include compensation to the lender for costs of serv-

CHANGING YIELD RELATIONSHIPS reflect supplies and investor preferences

NOTE.—Yields on FHA mortgages are Federal Reserve compilation from average secondary price reported by FHA; corporate Aaa bonds, weighted average of new publicly offered issues rated Aaa, Aa, and A by Moody's and adjusted to an Aaa basis; State and local government Aaa issues from Moody's Investors Service; U.S. Government, bonds due or callable in 10 years or more. Latest figures plotted: Apr.

icing mortgage debt. Mortgage companies charge up to $\frac{1}{2}$ percentage point for this service.

Despite this reduction in the relative attractiveness of mortgages, savings and loan associations and mutual savings banks last year supplemented their funds for acquiring mortgages by borrowing or by reducing other investments. And lenders with wider investment options allotted more funds rather than less to the mortgage market. Thus it does not appear that rate differentials had narrowed to the point of reversing investment preferences. Once a pattern of mortgage investment has been established, it seems that yield comparisons less favorable than those that induced the shift may be adequate to sustain the new pattern.

Continuing ability of lenders to find outlets for mortgage money at rates satisfactory to them has reflected in part both record levels of construction and larger loans relative to property values. Ready availability of financing has probably encouraged both

construction activity and additional financing on existing properties. The secondary market was also an important supply factor in the first half of 1963 when the Federal National Mortgage Association made substantial sales out of its portfolio.

Bank acquisitions of State and local government bonds on a greatly expanded scale have forced down the returns on these instruments. Yields on such bonds fell more sharply in 1962 than other long-term rates. Although yields on State and local government securities participated fully in the gradual uptrend of interest rates during 1963, they remained below those on taxable instruments by about a full percentage point—a wider margin than had prevailed before 1962. Fluctuation in the differential increased in late 1963 and early 1964, however, as bank participation in the State and local market became less regular.

The quest for higher-yielding assets has not been confined to shifts among instruments and maturities but has also been reflected in a greater willingness of institutional investors to accept medium-quality issues. There has reportedly been some liberalization of credit standards in mortgage lending, and the yield spread between high-grade and lower-grade bonds has narrowed perceptibly for both corporate and State and local government debt.

The spread between long-term Government and high-grade corporate yields has also been sharply reduced. In part this is another illustration of reduced willingness

to accept lower yields in return for greater liquidity and risklessness. But it probably also reflects increased supply, stemming from Treasury decisions to lengthen debt maturities when the market was receptive to long-term instruments. Outstanding U.S. Government marketable debt maturing in more than 5 years increased by a total of \$14.5 billion in 1962 and 1963. The impact on rates of these additions to supply was moderated, however, by the fact that most of the issues were offered in refunding rather than cash operations.

Many borrowers in capital markets take advantage of differences in cost or availability of funds by modifying the form or timing of new financing. Last year, for example, some local governments took advantage of the favorable market for their debt by raising money to refund some issues in advance of redemption dates and then holding the proceeds in the form of shorter-term assets. Corporate borrowers also often have considerable latitude in meeting their needs for long-term financing. They may postpone long-term debt issues through short-term borrowing or accelerate them and invest the loan proceeds in short-term assets.

This ability of issuers to choose between long- and short-term financing according to market conditions constitutes an important element of flexibility. Management of the U.S. Government debt probably presents the most clear-cut opportunity for tailoring offerings to maturity preferences so as to moderate movements in interest rates.

Member Bank Income, 1963

THE MAJOR developments reflected in member bank statements of income and dividends for 1963 are:

Net income rose to a new high, after having declined in 1962.

Revenue from current operations rose more than current operating expenses. Thus, net current operating earnings increased.

Substantial increases in earnings from larger holdings of loans and of State and local government securities were primarily responsible for the increase in revenues. Average rates of return realized on these assets declined slightly.

The rise in expenses was attributable mainly to a sharp increase in interest paid on savings and other time deposits. Such deposits expanded substantially, and the average rate of interest paid also went up. Interest payments on these deposits are now the largest single expense item of member banks.

Smaller provisions for income taxes more than offset an increase in losses on nonoperating transactions. This contributed to the rise in net after-tax income.

Dividend payments increased, but not in the same proportion as average total capital accounts, and the dividend rate fell slightly.

Ratios of capital accounts to total assets, to risk assets (total assets less U.S. Government securities and cash), and to deposits all declined from 1962 levels.

EARNING ASSETS AND OPERATING REVENUES

Average holdings of earning assets of member banks during 1963 were \$200 billion, \$18 billion higher than during 1962. Increases of \$14 billion in loans and \$5 billion in other securities were partially offset by a drop of more than \$1 billion in average holdings of U.S. Government securities.

Considering these three broad groups of assets, member banks generally added to their holdings of those that had greater current yields, in order to offset the increased costs of time and savings deposits. Holdings of all classifications of loans increased, but the largest dollar increases

were in real estate loans, commercial and industrial loans, and other loans to individuals (largely consumer loans). Most of the increase in holdings of securities was in issues of State and local governments, which generally have a relatively high after-tax yield.

Total average holdings of U.S. Government securities maturing in less than 5 years declined from 1962 levels. Within this group, holdings of notes maturing in 1 to 5 years increased. Among longer-term bond issues, larger average holdings of 5- to 10-year maturities more than offset a reduction in holdings of issues maturing in more than 10 years.

The ratio of average total capital accounts to risk assets declined from 14.0 to

13.0 per cent, the result of increases in holdings of loans and of other securities. This continued the downward trend in this ratio.

Total revenues from loans and from other securities increased substantially, even though slightly lower rates of return accompanied the strong expansion in average holdings of these assets. Income from loans was \$765 million more than in 1962, despite a decline in the average rate of return from 5.93 to 5.87 per cent. The expansion in average holdings of other securities resulted in an increase of \$144 million in revenue from this source.

Despite smaller average holdings of U.S. Government securities, income from these issues rose by \$39 million, as the rate of re-

turn rose from 3.22 per cent in 1962 to 3.38 per cent in 1963. Revenue from other sources also rose, but did not change significantly as a proportion of the total.

All of these factors contributed to the 10 per cent increase in total operating revenues of member banks, which reached \$11,169 million.

EXPENSES

Total expenses of member banks, at \$7,931 million, were 13 per cent, or \$890 million, more than in 1962.

More than half of this increase was due to the rise in interest payments on savings and other time deposits. This expense item rose by \$499 million and absorbed a total of \$2,858 million, or 26 per cent, of total current operating revenues in 1963. Interest on these deposits was the largest single expense item, for the first time exceeding direct compensation of officers and employees.

Both the volume of interest-bearing de-

posits and the effective average rate on them have been rising sharply since the end of 1956, when the maximum interest rates banks were permitted to pay were raised. Maximum permissible rates were raised again in 1962, and in mid-1963 such rates were raised on time deposits, other than savings accounts, with maturities of from 90 days to 1 year. In 1956 the average rate of interest paid on time deposits was 1.58 per cent. By 1962 this rate had more than doubled, reaching 3.23 per cent. In 1963 it advanced to 3.34 per cent.

The average volume of time and savings deposits held in member banks during 1963 was 17 per cent above the 1962 figure. This compares with a rise of 16 per cent from 1961 to 1962 and 15 per cent from 1960 to 1961. The average volume of time and savings deposits also increased in relation to total deposits. Such deposits in 1963 represented nearly 39 per cent of average total deposits at member banks, as compared with 26 per cent in 1956.

Salaries and wages of officers and employees, the second most important expense item in terms of dollar volume, accounted for 18 per cent of the increase in operating expenses during 1963. Fringe benefits for officers and employees working on banking operations amounted to \$393 million. Total payments for these benefits, which represent such expenses to the bank as hospitalization and life insurance premiums, unemployment and social security taxes, and current contributions to retirement funds, were \$30 million, or 8 per cent, more than in 1962 and were equal to 14.8 per cent of the total amount of direct compensation paid in the form of wages, salaries, and bonuses.

Expenses relating to the occupancy of bank premises amounted to \$501 million

after a deduction for rents received, and accounted for 6.3 per cent of total expenses. An additional \$255 million was attributable to furniture and equipment expense.

PROFITS, RECOVERIES, LOSSES, AND TRANSFERS TO VALUATION RESERVES

Nonoperating transactions reduced net income by \$329 million in 1963, compared with a reduction of \$308 million in 1962. Member banks have shown a net gain from these transactions in only three postwar years (1946, 1954, and 1958), when profits on the sale of securities more than offset the

other transactions on loans and securities that tend to reduce net income.

Transactions in loans, including transfers to and from valuation reserves, reduced reported net income by \$398 million, down slightly from the 1962 total of \$406 million, which was the largest net loss reported on these transactions in recent years. Net income was reduced further by \$21 million as a result of losses and charge-offs on all other bank assets.

Security transactions have increased net income in every year since 1959. The increase in 1963, however, was not so large as in 1962. Substantially lower profits on the

² Includes interest on capital notes and debentures.

sale of securities were partly offset in 1963 by smaller losses. Also, charge-offs rose slightly. Thus, the increase in net income resulting from nonoperating transactions in securities was only \$90 million, compared with \$126 million in 1962.

Member banks continued to increase their valuation reserves against loans in 1963. The addition was smaller than in the previous 2 years, but slightly above the average for the 5 years 1958-62. These reserves have expanded in each year since they were first reported separately in 1948. Valuation reserves against securities were reduced by \$9 million in 1963.

INCOME TAXES

Although net income before taxes increased, a larger proportion of the total represented income from tax-exempt investments. Provisions for income taxes were therefore \$31 million less in 1963 than in 1962. The total, \$1,079 million, represented 37 per cent of

net income before taxes, compared with 40 per cent in 1962.

NET INCOME AND CASH DIVIDENDS

Net income after taxes amounted to \$1,831 million, up 8.0 per cent from 1962 and 7.0 per cent from the 1961 level.

Cash dividends declared amounted to \$878 million, \$46 million more than in 1962. This represented 48 per cent of net income after taxes, compared with 49 per cent in the previous year. The ratio of cash dividends to average total capital accounts was 4.3 per cent.

Retained income accounted for 79 per cent of the increase in total capital accounts during the year. The total retained was \$953 million, \$90 million more than in 1962.

Revenues, expenses, and income by reserve classifications of member banks for 1962 and 1963 are shown in an accompanying table. Detailed figures for income, expenses, and related items appear on pages 630-38.

Law Department

Administrative interpretations, new regulations, and similar material

Interlocking Relationship Involving Securities Affiliate of Brokerage Firm

The Board was asked recently whether Section 32 of the Banking Act of 1933, as amended ("Section 32"), prohibited the interlocking service of X as a director of a member bank of the Federal Reserve System and as a partner in a New York City brokerage firm ("Partnership") having a corporate affiliate ("Corporation") engaged in business of the kinds described in Section 32 ("Section 32 business").

Section 32, subject to an exception not applicable here, provides that "No officer, director, or employee of any corporation or unincorporated association, no partner or employee of any partnership, and no individual, primarily engaged in the issue, flotation, underwriting, public sale, or distribution, at wholesale or retail, or through syndicate participation, of stocks, bonds, or other similar securities, shall serve the same time as an officer, director, or employee of any member bank. . . ."

From the information submitted it appears that Partnership, a member firm of the New York Stock Exchange, is the successor of two prior partnerships, in one of which X had been a partner. This prior partnership had been found not to be "primarily engaged" in Section 32 business. The other prior partnership, however, had been so engaged. By arrangement between the two prior firms, Corporation was formed chiefly for the purpose of carrying on the Section 32 business of the prior firm that had been "primarily engaged" in that business, which business was transferred to Corporation. The two prior firms were then merged, and the stock of Corporation was acquired by all the partners of Partnership, other than X, in proportion to the respective partnership interests of the stockholding partners. The information submitted indicated also that two of the three directors and "some" of the principal officers of Corporation are partners in Partnership, although X is not a director or officer of Corporation.

It is understood that the practice of forming corporate affiliates of brokerage firms, in order that

the affiliate may carry on the securities business (such as Section 32 business) with limited liability and other advantages, has become rather widespread in recent years. Accordingly, other cases may arise where a partner in such a firm may desire to serve at the same time as director of a member bank.

On the basis of the information presented, the Board concluded that X, in his capacity as an "individual," was not engaged in Section 32 business. However, as that information showed Corporation to be "primarily engaged" in Section 32 business, the Board stated that a finding that Partnership and Corporation were one entity for the purposes of the statute would mean that X would be forbidden to serve both the member bank and Partnership, if the one entity were so engaged.

Paragraph .15 of Rule 321 of the New York Stock Exchange governing the formation and conduct of affiliated companies of member organizations states that:

"Since Rule 314 provides that each member and allied member in a member organization must have a fixed interest in its entire business, it follows that the fixed interest of each member and allied member must extend to the member organization's corporate affiliate. When any of the corporate affiliate's participating stock is owned by the members and allied members in the member organization, such holdings must at all times be distributed among such members and allied members in approximately the same proportions as their respective interests in the profits of the member organization. When a member or allied member's interest in the member organization is changed, a corresponding change must be made in his participating interest in the affiliate."

Although it was understood that X had received special permission from the Exchange not to own any of the stock of Corporation, it appeared to the Board that Rule 321.15 would apply to the remaining partners. Moreover, other paragraphs of the Rule forbid transfers of the stock, except under certain circumstances to limited classes of persons, such as employees of the organization or estates of decedent partners, without permission of the Exchange.

The information supplied to the Board clearly

indicated that Corporation was formed in order to provide Partnership with an "underwriting arm." Under Rule 321 of the Exchange, the partners (other than X) are required to own stock in Corporation because of their partnership interest, would be required to surrender that stock on leaving the partnership, and incoming partners would be required to acquire such stock. Furthermore, Rule 321 speaks of a corporate affiliate, such as Corporation, as a part of the "entire business" of a member organization.

On the basis of the foregoing, the Board concluded that Partnership and Corporation must be regarded as a single entity or enterprise for purposes of Section 32.

The remaining question was whether the enterprise, as a whole, should be regarded as "primarily engaged" in Section 32 business. The information presented stated that the total dollar volume of Section 32 business of Corporation during the first eleven months of its operation was \$89 million. The gross income from Section 32 business was less than half a million, and represented about 7.9 per cent of the income of Partnership. The Board was advised that the relatively low amount of income from Section 32 business of Corporation was due to special costs, and to the condition of the market for municipal and State bonds during the past year, a field in which Corporation specializes. Corporation is listed in a standard directory of securities dealers, and holds itself out as having separate departments to deal with the principal underwriting areas in which it functions.

In view of the above information, the Board concluded that the enterprise consisting of Partnership and Corporation was "primarily engaged" in Section 32 business. Accordingly, the Board stated that the partners in Partnership, including X, were forbidden by that section and by the Board's Regulation R, issued pursuant to the statute, to serve as officers, directors, or employees of any member banks.

Underwriting of Public Authority Bonds Payable From Rents Under Lease With Governmental Entity Having General Taxing Powers

The Board of Governors has been asked whether securities of a public Authority that are to be paid from rents payable under a lease of the Authority's facilities to a governmental entity

that possesses general powers of taxation, including property taxation, constitute "general obligations" within the meaning of Section 5136 of the United States Revised Statutes (12 U.S.C. 24). In cases where this question can be answered in the affirmative, member State banks of the Federal Reserve System may lawfully underwrite and deal in such securities, and invest therein without limitation on amount, as far as Federal banking law is concerned.

The Board understands that the issuing Authorities usually have no taxing powers and that their obligations are not, under pertinent State constitutional and statutory provisions as interpreted by the courts, "debts" of the lessee—that is, the governmental entity with general powers of taxation. However, whether a security constitutes a "debt" for purposes of State law is not determinative as to whether it is a "general obligation" within the meaning of Section 5136, a Federal statute. (See 1963 Federal Reserve BULLETIN 1237, 1238)

During recent Hearings before the Committee on Banking and Currency of the House of Representatives, published under the title "Increased Flexibility for Financial Institutions—1963", the Board expressed its understanding of the meaning of the phrase "general obligations of any State or any political subdivision thereof" as used in Section 5136.

As the House Committee was informed, the Board understands that phrase to include "only obligations that are supported by an unconditional promise to pay, directly or indirectly, an aggregate amount which (together with any other funds available for the purpose) will suffice to discharge, when due, all interest on and principal of such obligations, which promise (1) is made by a Governmental entity that possesses general powers of taxation, including property taxation, and (2) pledges or otherwise commits the full faith and credit of said promisor; said term does not include obligations not so supported that are to be repaid only from specified sources such as the income from designated facilities or the proceeds of designated taxes." (Hearings, p. 1018)

A major requirement of the foregoing definition is that a "general obligation" must be supported by general powers of taxation, including property taxation. The Board recognizes, however, that such support by general powers of taxation may be indirect as well as direct.

If a State (or other governmental entity having general powers of taxation) agrees unconditionally to pay to an Authority rentals that will be sufficient and will be used, in all events, to cover required payments of interest and principal on the relevant securities when due, the securities, in the opinion of the Board, are indirectly supported by general taxing powers, and, accordingly, constitute "general obligations" within the meaning of R. S. 5136. On the other hand, if the lease does not contain an unconditional promise of the State to provide sums sufficient, in all events, to cover required payments of interest and principal on the bonds of the lessor Authority as they become due, the securities cannot be considered "general obligations."

The status of a particular issue of such lease-supported bonds thus depends upon the terms of the lease involved. Where the lease is for a term of years not less than the maximum maturity of the relevant bond issue, and the State unconditionally promises to pay rentals sufficient to cover all payments on the bonds as they become due, the bonds ordinarily will qualify as "general obligations." Where the promise of the State is to pay a fixed dollar rental, the securities will not qualify as "general obligations" unless the lease provides that rental payments in amounts sufficient to service the bonds cannot be expended by the Authority for any other purpose than the payment of principal and interest thereon.

This interpretation is intended to indicate the circumstances in which securities issued by public Authorities without taxing powers constitute "general obligations" that are eligible for underwriting by member banks, under R. S. 5136. The status of any particular issue can only be determined through examination of all relevant laws and contracts, in order to ascertain the actual legal and financial arrangements.

Order Under Bank Merger Act

The Board of Governors of the Federal Reserve System issued the following Order and Statement with respect to an application for approval of the merger of banks:

COUNTY TRUST COMPANY, TENAFLY, NEW JERSEY

In the matter of the application of County Trust

Company for approval of merger with The First National Bank of Park Ridge.

ORDER APPROVING MERGER OF BANKS

There has come before the Board of Governors, pursuant to the Bank Merger Act of 1960 (12 U.S.C. 1828(c)), an application by County Trust Company, Tenaflly, New Jersey, a State member bank of the Federal Reserve System, for the Board's prior approval of the merger of that bank and The First National Bank of Park Ridge, Park Ridge, New Jersey, under the charter and title of the former. As an incident to the merger, the three offices of The First National Bank of Park Ridge would become branches of County Trust Company. Notice of the proposed merger, in form approved by the Board, has been published pursuant to said Act.

Upon consideration of all relevant material in the light of the factors set forth in said Act, including reports furnished by the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Department of Justice on the competitive factors involved in the proposed merger,

IT IS HEREBY ORDERED, for the reasons set forth in the Board's Statement of this date, that said application be and hereby is approved, provided that said merger shall not be consummated (a) within seven calendar days after the date of this Order or (b) later than three months after said date.

Dated at Washington, D. C., this 6th day of May, 1964.

By order of the Board of Governors.

Voting for this action: Unanimous, with all members present.

(Signed) MERRITT SHERMAN,
Secretary.

[SEAL]

STATEMENT

County Trust Company, Tenaflly, New Jersey ("County Trust"), with deposits of \$57.8 million as of September 30, 1963, has applied, pursuant to the Bank Merger Act of 1960 (12 U.S.C. 1828(c)), for the Board's prior approval of the merger of that bank and The First National Bank of Park Ridge, Park Ridge, New Jersey ("First National"), with deposits of \$11.8 million as of the same date, under the charter and title of County Trust. The proposal contemplates that

the three offices of First National would be operated as branches of County Trust, increasing the number of its operating offices to seven. County Trust has received approval to establish two other branches which are not yet operative.

Under the Act, the Board is required to consider, as to each of the banks involved, (1) its financial history and condition, (2) the adequacy of its capital structure, (3) its future earnings prospects, (4) the general character of its management, (5) whether its corporate powers are consistent with the purposes of 12 U.S.C., Ch. 16 (the Federal Deposit Insurance Act), (6) the convenience and needs of the community to be served, and (7) the effect of the transaction on competition (including any tendency toward monopoly). The Board may not approve the transaction unless, after considering all these factors, it finds the transaction to be in the public interest.

Banking factors. Both banks have satisfactory financial histories. The asset condition of each is sound, and this would be true also of the resulting bank. The capital structure of County Trust is adequate. While the capital of First National is a little below a desirable level, it is regarded as reasonably satisfactory. The resulting bank would have an adequate capital structure.

The management of each bank is satisfactory. However, consummation of the proposal would provide the resulting bank with depth and strength of management possessed by neither of the participating banks individually, and would also provide, partly through operating economies, a basis for meeting the need for improvement in the earnings of the two banks.

There is no indication that the powers of the banks are or would be inconsistent with the purposes of 12 U.S.C., Ch. 16.

Convenience and needs of the communities. The service area* of County Trust lies in the northeastern corner of Bergen County, which had a population growth of 45 per cent in the decade ending in 1960. Effectuation of the proposal would increase the lending limit of County Trust, the sixth largest bank in the County, from approximately \$387,000 to around \$500,000. Otherwise there would be no significant effect from the

transaction upon banking convenience and needs in County Trust's present service area, in which there also are situated three branches of Peoples Trust Company of Bergen County and seven offices of Citizens National Bank of Englewood, respectively, the largest and third largest banks in the County.

The service area of First National includes principally Park Ridge, Montvale, and Woodcliff Lake, in each of which the bank has an office. The total population of the area, which exceeds 27,000, more than doubled over the ten years, 1950-1960. Although primarily residential, a considerable part of the area around Montvale has been zoned for light industry, and development for that purpose has begun. A substantial volume of home construction is occurring throughout the bank's service area.

First National is restricted in its ability to assist in the economic development of its service area, particularly by its lending limit of only \$62 thousand. The credit needs of real estate developers, and other business and institutional customers involve financing in excess of the capacity of the bank. The banking needs of the area would be better served, not only by the resulting bank's loan limit of about \$500,000, but also by other services which it would offer and which are needed in an area of both residential and industrial expansion (but which are not offered at First National), such as complete fiduciary services, construction loans, personal and commercial letters of credit, and education loans. Although a number of these services are presently available from offices of two other banks in or near the service area of First National, effectuation of the transaction would provide in the area a convenient alternative source of such services.

Competition. The main offices of the participating banks are about 11 miles apart and their nearest branches are separated by approximately 7 miles. In the intervening area are natural barriers and the offices of other banks, including branches of the largest and third largest banks in Bergen County. Because of this, and the few direct routes connecting the service areas of the participating banks, there is only minor competition between them.

Consummation of the proposal would not change County Trust's position as the sixth largest bank in Bergen County. Competition might

* The area from which a bank obtains 75 per cent or more of its deposits of individuals, partnerships, and corporations ("IPC deposits").

be intensified between County Trust and its principal competitors, the County's largest and third largest banks, noted above. It is not expected that the transaction would result in any adverse competitive effects in County Trust's present service area.

First National's principal competitors are Citizens National Bank of Englewood, the third largest bank in the County, and Pascack Valley National Bank and Trust Company, with IPC deposits in December 1963 of about \$20 million. Effectuation of the proposal would not change significantly the relationship between County Trust and Citizens National Bank of Englewood. Although there would probably result an intensification of competition in First National's service area, there is no indication that Pascack Valley National Bank and Trust Company or any other bank in or on the periphery of the area would be affected adversely.

Because of the large number of Bergen County residents who commute to New York City, the banks in the County compete with New York

City banks, particularly those with offices close by the transport station facilities used by the commuters. Savings and loan associations holding withdrawable balances in excess of \$317 million compete vigorously with banks in the County for real estate loans and savings accounts.

Summary and conclusion. The proposal would unite the sixth largest of Bergen County's 29 commercial banks with one of the County's relatively small banks. There is no more than minor competition between the two banks. County Trust's ranking would not be affected. Some intensification of competition may result, although there is no indication that any other bank in the service area of the resulting bank would be adversely affected. Pursuant to the proposal, the residents and businesses in First National's service area would have conveniently available stronger and broader banking facilities more adequate to their expanding needs.

Accordingly, the Board finds the proposed transaction to be in the public interest.

Announcements

STATEMENTS TO CONGRESS

The attention of interested readers is directed to the fact that Professors Milton Friedman and Karl Brunner have filed with the House Committee on Banking and Currency comments on statements made by Governors George W. Mitchell and J. Dewey Daane before that Committee and published in the BULLETIN for March 1964, pages 308-20. The comments by Professors Friedman and Brunner are printed in "The Federal Reserve System After Fifty Years," *Hearings* before the Subcommittee on Domestic Finance of the Committee on Banking and Currency, House of Rep-

resentatives, Eighty-eighth Congress, Second Session, Volume 2, pages 1220 and 1223, respectively. The *Hearings* also include a supplementary statement by Governors Mitchell and Daane, page 1515, and a comment by Governor Mitchell, page 1517.

ADMISSION OF STATE BANK TO MEMBERSHIP IN THE FEDERAL RESERVE SYSTEM

The following bank was admitted to Membership in the Federal Reserve System during the period April 16, 1964, through May 15, 1964:

North Dakota

Minot. First Western Bank of Minot

National Summary of Business Conditions

Released for publication May 15

Industrial production continued to increase in April while construction activity and retail sales remained at advanced levels. Nonfarm employment rose further, but the unemployment rate was unchanged. The private money supply expanded while Government deposits declined and bond yields changed little.

INDUSTRIAL PRODUCTION

Industrial production in April, at 129.2 per cent of the 1957-59 average, was 1 point above March and $5\frac{1}{2}$ per cent above a year ago. Output of both final products and materials increased to new highs.

Production of consumer goods rose in April and continued about 5 per cent above a year earlier. Auto assemblies, following a decline in March, rose to a record level. Output of furniture and some other home goods rose in April and production of consumer staples changed little. Output of industrial, commercial, and freight and passenger equipment increased. Total business equipment output was up 8 per cent from a year earlier and overtime operations in the machinery industry reached the highest levels since 1956.

Output of iron and steel, construction materials,

and most other materials expanded further in April. In early May, steel ingot production continued to increase.

CONSTRUCTION ACTIVITY

New construction put in place continued at the record seasonally adjusted annual rate of just under \$67 billion reached in March and was more than a tenth above a year earlier. Both private and public construction activity changed little from earlier highs.

EMPLOYMENT

Employment in nonagricultural establishments rose 200,000 in April. Although the gain was largely concentrated in retail trade, employment increased further in State and local government and durable goods manufacturing. In manufacturing, the average workweek at $40\frac{1}{2}$ hours was longer than last year and increased overtime in the machinery and motor vehicle industries raised the average workweek in those industries to $42\frac{1}{2}$ hours. The unemployment rate for the third successive month was 5.4 per cent. In April last year the rate was 5.7 per cent.

DISTRIBUTION

Retail sales in April were unchanged from a month earlier. Sales of new and used cars and of other consumer durable goods increased, while sales of most nondurable goods changed little. Total sales were up 5 per cent from a year earlier, with sales up 6 per cent at durable goods stores and 4 per cent at nondurable goods stores.

COMMODITY PRICES

Prices of copper scrap declined from peaks reached in early April but upward tendencies persisted in the markets for various other materials and some final industrial products. Prices of livestock and meats remained at reduced levels and

INDUSTRIAL PRODUCTION

F.R. indexes, seasonally adjusted. Latest figures shown are for Apr.

were about 5 per cent below a year ago as the volume of marketings expanded further to a rate 10 per cent higher than last year.

The total wholesale commodity price index continued to change little in late April and early May.

BANK CREDIT, MONEY SUPPLY, AND RESERVES

Seasonally adjusted commercial bank credit declined about \$2 billion in April following rapid expansion earlier in the year. Reductions in holdings of U.S. Government securities and in security loans were offset in part by continued expansion in most other loan categories. The seasonally adjusted money supply increased \$600 million following little net change in the previous two months. Time and savings deposits at commercial banks rose further but the increase was less than in March. U.S. Government deposits were reduced.

Member bank excess reserves averaged \$375

million in April, slightly higher than in March; bank borrowings from the Federal Reserve were \$215 million, somewhat lower than in March. Monthly average required reserves, seasonally adjusted, showed little change. Reserves were absorbed through currency outflow and supplied principally through System purchases of U.S. Government securities and an increase in float.

SECURITY MARKETS

Yields on seasoned corporate bonds and State and local government bonds showed little net change between mid-April and mid-May, while those on Treasury bonds declined somewhat. The rate on 3-month Treasury bills remained slightly below the $3\frac{1}{2}$ per cent discount rate.

After declining somewhat in late April, common stock prices rose to a new high around mid-May.

PRICES

Bureau of Labor Statistics indexes. Latest figures shown for consumer prices, Mar.; for wholesale prices, Apr.

INTEREST RATES

Discount rate, range or level for all F.R. Banks. Weekly average market yields for U.S. Govt. bonds maturing in 10 years or more and for 90-day Treasury bills. Latest figures shown, week ending May 15.

Guide to Tabular Presentation

SYMBOLS AND ABBREVIATIONS

e	Estimated	N.S.A.	Monthly (or quarterly) figures not adjusted for seasonal variation
c	Corrected	IPC	Individuals, partnerships, and corporations
p	Preliminary	A	Assets
r	Revised	L	Liabilities
rp	Revised preliminary	S	Sources of funds
I, II, III, IV	Quarters	U	Uses of funds
n.a.	Not available	*	Amounts insignificant in terms of the particular unit (e.g., less than 500,000 when the unit is millions)
n.e.c.	Not elsewhere classified		(1) Zero, (2) no figure to be expected, or (3) figure delayed
S.A.	Monthly (or quarterly) figures adjusted for seasonal variation		

GENERAL INFORMATION

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

A heavy vertical rule is used (1) to the right (to the left) of a total when the components shown to the right (left) of it add to that total (totals separated by ordinary rules include more components than those shown), (2) to the right (to the left) of items that are not part of a balance sheet, (3) to the left of memorandum items.

"U.S. Govt. securities" may include guaranteed issues of U.S. Govt. agencies (the flow of funds figures also include not fully guaranteed issues) as well as direct obligations of the Treasury. "State and local govt." also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.

The footnotes labeled NOTE (which always appear last) provide (1) the source or sources of data that do not originate in the System; (2) notice when figures are estimates; and (3) information on other characteristics of the data.

The data for F.R. Banks, member banks, and department stores, and consumer credit are derived from regular reports made to the Board; production indexes are compiled by the Board on the basis of data collected by other agencies; figures for gold stock, currency, Federal finance, and Federal business-type activi-

ties are obtained from Treasury statements; the remaining data are obtained largely from other sources. For many of the banking and monetary series back data and descriptive text are available in *Banking and Monetary Statistics* and its *Supplements* (see list of publications at end of the BULLETIN).

¹ Beginning with 1960 reflects a minor change in concept, see Feb. 1961 BULL., p. 164.

² Includes industrial loans and acceptances, when held. (Industrial loan program discontinued Aug. 21, 1959.) For holdings of acceptances on Wed. and end-of-month dates, see subsequent tables on F.R. Banks. See also note 1.

³ Part allowed as reserves Dec. 1, 1959–Nov. 23, 1960; all allowed thereafter. Beginning with Jan. 1963 figures are estimated except for weekly averages.

¹ This total excludes, and that in the preceding table includes, \$51 million in balances of unlicensed banks.

NOTE.—Averages of daily figures. Beginning with Jan. 1964 reserves are estimated except for weekly averages.

Total reserves held: Based on figures at close of business through Nov. 1959; thereafter on closing figures for balances with F.R. Banks and opening figures for allowable cash; see also note 3 to preceding table.

Required reserves: Based on deposits as of opening of business each day.

Borrowings at F.R. Banks: Based on closing figures.

¹ Advances secured by U.S. Govt. securities and discounts of and advances secured by eligible paper. Rates shown also apply to advances secured by securities of Federal intermediate credit banks maturing within 6 months. Maximum maturity: 90 days except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not over 6 months and 9 months, respectively, and advances

secured by FICB securities are limited to 15 days.

² Advances secured to the satisfaction of the F.R. Bank. Maximum maturity: 4 months.

³ Advances to individuals, partnerships, or corporations other than member banks secured by U.S. Govt. direct securities. Maximum maturity: 90 days.

¹ Preferential rate of ½ of 1 per cent for advances secured by U.S. Govt. securities maturing in 1 year or less. The rate of 1 per cent was continued for discounts of and advances secured by eligible paper.

NOTE.—Discount rates under Secs. 13 and 13a (as described in table above). For data before 1933, see *Banking and Monetary Statistics*, 1943, pp. 439-42.

The rate charged by the F.R. Bank of N.Y. on repurchase contracts

against U.S. Govt. securities was the same as its discount rate except in the following periods (rates in percentages): 1955—May 4-6, 1.65; Aug. 4, 1.85; Sept. 1-2, 2.10; Sept. 8, 2.15; Nov. 10, 2.375; 1956—Aug. 24-29, 2.75; 1957—Aug. 22, 3.50; 1960—Oct. 31-Nov. 17, Dec. 28-29, 2.75; 1961—Jan. 9, Feb. 6-7, 2.75; Apr. 3-4, 2.50; June 29, 2.75; July 20, 31, Aug. 1-3, 2.50; Sept. 28-29, 2.75; Oct. 5, 2.50; Oct. 23, Nov. 3, 2.75; 1962—Mar. 20-21, 2.75.

MAXIMUM INTEREST RATES PAYABLE ON TIME AND SAVINGS DEPOSITS

(Per cent per annum)

Type of deposit	Effective date			
	Jan. 1, 1936	Jan. 1, 1937	Jan. 1, 1962	July 17, 1963
Savings deposits held for:				
1 year or more.....	2½	3	4	4
Less than 1 year.....			3½	3½
Postal savings deposits held for:				
1 year or more.....	2½	3	4	4
Less than 1 year.....			3½	3½
Other time deposits payable in: ¹				
1 year or more.....	2½	3	4	4
6 months-1 year.....			3½	
90 days-6 months.....	2	2½	2½	
Less than 90 days.....	1	1	1	1

¹ For exceptions with respect to foreign time deposits, see Oct. 1962 BULL., p. 1279.

NOTE.—Maximum rates that may be paid by member banks as established by the Board of Governors under provisions of Regulation Q. Under this Regulation the rate payable by a member bank may not in any event exceed the maximum rate payable by State banks or trust cos. on like deposits under the laws of the State in which the member bank is located. Effective Feb. 1, 1936, maximum rates that may be paid by insured nonmember commercial banks, as established by the FDIC, have been the same as those in effect for member banks.

Maximum rate payable on all types of time and savings deposits; Nov. 1, 1933-Jan. 31, 1935, 3 per cent; Feb. 1, 1935-Dec. 31, 1935, 2½ per cent.

MARGIN REQUIREMENTS

(Per cent of market value)

Regulation	Effective date		
	July 28, 1960	July 10, 1962	Nov. 6, 1963
Regulation T:			
For extensions of credit by brokers and dealers on listed securities.....	70	50	70
For short sales.....	70	50	70
Regulation U:			
For loans by banks on stocks.....	70	50	70

NOTE.—Regulations T and U, prescribed in accordance with Securities Exchange Act of 1934, limit the amount of credit that may be extended on a security by prescribing a maximum loan value, which is a specified percentage of its market value at the time of extension; margin requirements are the difference between the market value (100%) and the maximum loan value.

¹ When two dates are shown, first-of-month or midmonth dates record changes at country banks, and other dates (usually Thurs.) record changes at central reserve or reserve city banks.

² Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.

³ Authority of the Board of Governors to classify or reclassify cities as central reserve cities was terminated effective July 28, 1962.

NOTE.—All required reserves were held on deposit with F.R. Banks, June 21, 1917, until late 1959. Since then, member banks have also been allowed to count vault cash as reserves, as follows: Country banks—in excess of 4 and 2½ per cent of net demand deposits effective Dec. 1, 1959 and Aug. 25, 1960, respectively. Central reserve city and reserve city banks—in excess of 2 and 1 per cent effective Dec. 3, 1959 and Sept. 1, 1960, respectively. Effective Nov. 24, 1960, all vault cash.

¹ Outside Treasury and F.R. Banks. Before 1955 details are slightly overstated because they include small amounts of paper currency held by the Treasury and the Reserve Banks for which a denominational breakdown is not available.

² Paper currency only; \$1 silver coins reported under coin.

NOTE.—Condensed from Circulation Statement of United States Money, issued by the Treasury.

¹ Outside Treasury and F.R. Banks. Includes any paper currency held outside the United States and currency and coin held by banks. Estimated totals for Wed. dates shown in table on p. 573.

² Includes \$156 million reserve against United States notes.

³ Consists of credits payable in gold certificates: (1) the Gold Certificate Fund—Board of Governors, FRS, and (2) the Redemption Fund for F.R. notes.

⁴ Redeemable from the general fund of the Treasury.

⁵ Does not include all items shown, as some items represent the security

for other items; gold certificates are secured by gold, and silver certificates by standard silver dollars and monetized silver bullion. Duplications are shown in parentheses.

NOTE.—Condensed from Circulation Statement of United States Money issued by the Treasury. For explanation of currency reserves and security features, see the Circulation Statement or the Aug. 1961 BULL., p. 936.

¹ At all commercial banks.

NOTE.—Averages of daily figures. For back data see Aug. 1962 BULL., pp. 941–51. Money supply consists of (1) demand deposits at all commercial banks, other than those due to domestic commercial banks and

the U.S. Govt., less cash items in process of collection and F.R. float; (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, the FRS, and the vaults of all commercial banks. Time deposits adjusted are time deposits at all commercial banks other than those due to domestic commercial banks and the U.S. Govt.

¹ Other than interbank and U.S. Govt., less cash items in process of collection.² Includes relatively small amounts of demand deposits. Beginning with June 1961, also includes certain accounts previously classified as other liabilities.³ Reclassification of deposits of foreign central banks in May 1961 reduced this item by \$1,900 million (\$1,500 million to time deposits and \$400 million to demand deposits).NOTE.—For back figures and descriptions of the consolidated condition statement and the seasonally adjusted series on currency outside banks and demand deposits adjusted, see "Banks and the Monetary System," Section 1 of *Supplement to Banking and Monetary Statistics, 1962*, and Jan. 1948 and Feb. 1960 BULLS.

Except on call dates, figures are partly estimated and are rounded to the nearest \$100 million.

¹ Reciprocal balances excluded beginning with 1942. Reclassification of deposits of foreign central banks in May 1961 reduced interbank deposits by a total of \$1,900 million (\$1,500 million time to other time and \$400 million demand to other demand).

² Includes other assets and liabilities not shown separately.

³ Figures for mutual savings banks include relatively small amounts of demand deposits. Beginning with June 1961, also includes certain accounts previously classified as other liabilities.

⁴ Beginning with Dec. 31, 1947, the series was revised. A net of 115 noninsured nonmember commercial banks with total loans and investments of about \$110 million were added, and 8 banks with total loans and investments of \$34 million were transferred from noninsured mutual savings to nonmember commercial banks.

⁵ These data reflect the reclassification of New York City and city of Chicago as reserve cities effective July 28, 1962; for details see Aug. 1962 BULL., p. 993. See also second paragraph of note 6 to this table.

⁶ Beginning with Feb. 1960 reserve city banks with total loans and investments of \$950 million and total deposits of \$1,070 million were reclassified as country banks. Beginning with Aug. 23, 1962 (Topeka and

Wichita, Kansas) and Sept. 6, 1962 (Kansas City, Kansas) reserve city banks with total loans and investments of \$500 million and total deposits of \$600 million were reclassified as country banks.

Beginning with June 1963, 3 New York City banks with loans and investments of \$392 million and total deposits of \$441 million were reclassified as country banks. Also see note 6, Oct. 1962 BULL., p. 1315.

NOTE.—Data are for all commercial and mutual savings banks in the United States (including Alaska and Hawaii, beginning with 1959).

Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; and nondeposit trust companies. Commercial banks exclude, and member banks include, a national bank in the Virgin Islands that became a member in May 1957, and in the period 1941 to July 1962, from 1 to 3 mutual savings banks.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

Figures are partly estimated except on call dates.

For revisions in series before June 30, 1947, see July 1947 BULL., pp. 870-71.

¹ Beginning with June 30, 1948, figures for various loan items are shown gross (i.e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown net.

² Breakdowns of loan, investment, and deposit classifications are not available before 1947; summary figures for earlier dates appear in the preceding table.

³ New York City and city of Chicago were central reserve city banks before July 28, 1962; reserve city banks thereafter.

For other notes see opposite page.

⁴ Beginning with 1942, excludes reciprocal bank balances.⁵ Through 1960, demand deposits other than interbank and U.S. Govt., less cash items in process of collection; beginning with 1961, demand deposits other than domestic commercial interbank and U.S. Govt., less cash items in process of collection.⁶ Beginning with June 1961, reclassification of deposits of foreign central banks reduced foreign interbank demand deposits by about \$400 million and interbank time deposits by about \$1,500 million. These amounts are now included in demand and time deposits of individuals, partnerships, and corporations.

NOTE.—Data are for all commercial banks in the United States. These figures exclude data for banks in U.S. possessions except for member banks. During 1941 3 mutual savings banks became members of the FRB; these banks (3 before Jan. 1960, 2 until June 1961, and 1 until July 1962) are included in member banks but are not included in all insured or total banks. Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

For other notes see opposite page.

¹ Beginning December 31, 1963, bankers' acceptances for the creation of dollar exchange are excluded from commercial and industrial loans and those relating to commercial transactions are shown in a separate category. Current figures are therefore not strictly comparable with figures previously reported, but differences are relatively small.

NOTE.—About 200 of the weekly reporting member banks are included in this series; these banks classify, by industry, commercial and industrial loans amounting to about 85 per cent of such loans held by all weekly reporting member banks, and about 60 per cent of those held by all commercial banks.

¹ Includes bonds rated Aa and A, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat.

NOTE.—Annual yields are averages of monthly or quarterly data. Monthly and weekly yields are computed as follows: U.S. Govt. bonds: Averages of daily figures for bonds maturing or callable in 10 years or more.

State and local govt. bonds: General obligations only, based on Thurs.

figures, Corp. bonds: Averages of daily figures. Both of these series are from Moody's Investors Service series.

Stocks: Standard and Poor's Corp. series. Dividend, price ratios are based on Wed. figures; earnings price ratios are as of end of period. Preferred stock ratio is based on 8 median yields for a sample of non-callable issues—12 industrial and 2 public utility; common stock ratios on the 500 stocks in the price index. Quarterly earnings are seasonally adjusted at annual rates.

NOTE.—Annual data are averages of monthly data. Monthly and weekly data are computed as follows:

U.S. Govt. bonds, derived from average market yields in preceding table on basis of an assumed 3 per cent, 20-year bond, averages of daily figures.

Municipal and corporate bonds, derived from average yields, as computed by Standard and Poor's Corp., on basis of a 4 per cent, 20-year bond; Wed. closing prices.

Common stocks, Standard and Poor's index based on averages of daily figures; Securities and Exchange Commission index on weekly closing prices.

Volume of trading, average daily trading in stocks on the N.Y. Stock Exchange for a 5½-hour trading day.

NOTE.—Data in first 3 cols. and last col. are for end of month; in other cols. for last Wed.

Net debit balances and broker and dealer credit: Ledger balances of member firms of N.Y. Stock Exchange carrying margin accounts, as reported to Exchange. Customers' debit and free credit balances exclude balances maintained with reporting firm by other member firms of national securities exchanges and balances of reporting firm and of general partners of reporting firm. Balances are net for each customer—i.e., all accounts of one customer are consolidated. Money borrowed includes borrowings from banks and from other lenders except member firms of national securities exchanges.

Nov. data on customers' net debit balances exclude amounts carried by a large former member firm in liquidation; most of these accounts

have been transferred to other member firms and are reported in their debit figures from the month received (some in Dec. 1963, more in Jan. 1964). Debit balance totals for the period Oct.-Jan., therefore, are not completely comparable.

Bank loans to others than brokers and dealers: figures are for weekly reporting member banks. Before July 1959, loans for purchasing or carrying U.S. Govt. securities were reported separately only by N.Y. and Chicago banks. Accordingly, for that period the fifth col. includes any loans for purchasing or carrying such securities at other reporting banks. Composition of series also changed beginning with July 1959; revised data for the new reporting series (but not for the breakdown of loans by purpose) are available back through July 1958 and have been incorporated.

¹ Includes securities of foreign governments and international organizations and U.S. Govt. agencies not guaranteed, as well as corporate securities.

² See note 3, p. 583.

³ Commitments outstanding of banks in N.Y. State as reported to the Savings Banks Assn. of the State of N.Y.

⁴ Data reflect consolidation of a large mutual savings bank with a commercial bank.

NOTE.—National Assn. of Mutual Savings Banks data; figures are estimates for all savings banks in the United States and differ somewhat from those shown elsewhere in the BULLETIN; the latter are for call dates and are based on reports filed with U.S. Govt. and State bank supervisory agencies. Loans are shown net of valuation reserves.

¹ Issues of foreign governments and their subdivisions and bonds of the International Bank for Reconstruction and Development.

NOTE.—Institute of Life Insurance data; figures are estimates for all life insurance cos. in the United States.

Year-end figures: Annual statement asset values, with bonds carried on an amortized basis and stocks at year-end market value. Month-end figures: Book value of ledger assets. Adjustments for interest due and accrued and for differences between market and book values are not made on each item, separately, but are included in total, in "other assets."

¹ Includes other loans, stock in the Federal home loan banks, other investments, real estate owned and sold on contract, and office buildings and fixtures.

² Before 1958 mortgages are net of mortgage-pledged shares. Asset items will not add to total assets, which include gross mortgages with no deductions for mortgage-pledged shares. Beginning with Jan. 1958, no deduction is made for mortgage-pledged shares. These have declined consistently in recent years and amounted to \$42 million at the end of 1957.

³ Consists of advances from FHLB and other borrowing.

NOTE.—Federal Savings and Loan Insurance Corp. data; figures are estimates for all savings and loan assns. in the United States. Data beginning with 1954 are based on monthly reports of insured assns. and annual reports of noninsured assns. Data before 1954 are based entirely on annual reports. Data for current and preceding year are preliminary even when revised.

NOTE.—Direct public issues only. Based on Treasury Survey of Ownership.

Data complete for U.S. Govt. agencies and trust funds and F.R. Banks but for other groups are based on Treasury Survey data. Of total marketable issues held by groups, the proportion held on latest date and the number of reporting owners surveyed were: (1) about 90 per cent by the 6,048 commercial banks, 504 mutual savings banks, and 786 insurance

cos. combined; (2) about 50 per cent by the 469 nonfinancial corps. and 488 savings and loan assns.; and (3) about 70 per cent by 506 State and local govts.

Holdings of "all others," a residual, include holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

NOTE.—The transactions data combine market purchases and sales of U.S. Govt. securities dealers reporting to the F.R. Bank of N.Y. They do not include allotments of and exchanges for new U.S. Govt. securities, redemptions of called or matured securities, or purchases or sales of securi-

ties under repurchase agreements, reverse repurchase (resale), or similar contracts. Averages of daily figures based on the number of trading days in the period.

DEALER POSITIONS

(Par value, in millions of dollars)

Period	U.S. Government securities, by maturity				U.S. Govt. agency securities
	All maturities	Within 1 year	1-5 years	Over 5 years	
1963—Mar.....	3,547	2,439	563	543	212

18...	3,023	2,691	355	-24	181
25...	2,515	2,343	252	-80	194

NOTE.—The figures include all securities sold by dealers under repurchase contracts regardless of the maturity date of the contract unless the contract is matched by a reverse repurchase (resale) agreement or delayed delivery sale with the same maturity and involving the same amount of securities. Included in the repurchase contracts are some that more clearly represent investments by the holders of the securities rather than dealer trading positions.

Average of daily figures based on number of trading days in the period.

NOTE.—Data from Federal Home Loan Bank Board, Federal National Mortgage Assn., and Farm Credit Admin. Among the omitted balance sheet items are capital accounts of all agencies, except for stock of home loan banks. Bonds, debentures, and notes are valued at par. They include only publicly offered securities (excluding, for the home loan banks,

bonds held within the FHLB System), and are not guaranteed by the U.S. Govt.; for a listing of these securities, see preceding page. Loans are gross of valuation reserves and represent cost for FNMA and unpaid principal for other agencies.

¹ Only bonds sold pursuant to 1949 Housing Act; secured by contract requiring the Public Housing Administration to make annual contributions to the local authority.

² Municipalities, counties, townships, school districts.

³ Excludes U.S. Govt. loans. Based on date of delivery to purchaser (and payment to issuer) which occurs after date of sale.

⁴ Water, sewer, and other utilities.

⁵ Includes urban redevelopment loans.

NOTE.—The figures in the first column differ from those shown on the following page, which are based on *Bond Buyer* data. The principal difference is in the treatment of U.S. Govt. loans.

Investment Bankers Assn. data; par amounts of long-term issues. Based on date of sale unless otherwise indicated.

¹ Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

² Includes guaranteed issues.

³ Issues not guaranteed.

⁴ Foreign governments, International Bank for Reconstruction and Development, and domestic nonprofit organizations.

⁵ Estimated gross proceeds less cost of flotation.

⁶ For plant and equipment and working capital.

⁷ Beginning with 1957 this figure differs from that shown on the previous page because this one is based on *Bond Buyer* data.

⁸ All issues other than those for retirement of securities.

NOTE.—Securities and Exchange Commission estimates of new issues maturing in more than 1 year sold for cash in the United States.

¹ Open-end and closed-end cos.² Extractive and commercial and misc. cos.³ Railroad and other transportation cos.⁴ Includes investment cos.

NOTE.—Securities and Exchange Commission estimates of cash transactions only. As contrasted with data shown on p. 605, new issues exclude

foreign and include offerings of open-end investment cos., sales of securities held by affiliated cos. or RFC, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements include the same types of issues, and also securities retired with internal funds or with proceeds of issues for that purpose shown on p. 605.

¹ Figures have not been adjusted for the varying treatment by individual cos. of additional depreciation under the new guidelines and of the investment tax credit.

² Includes 17 cos. in groups not shown separately.

³ Includes 27 cos. in groups not shown separately.

NOTE.—*Manufacturing corps.* Data are obtained primarily from published co. reports.

Railroads. Interstate Commerce Commission data for Class I line-haul railroads.

Electric power. Federal Power Commission data for Class A and B electric utilities, except that quarterly figures on operating revenue and profits before taxes are partly estimated by the Federal Reserve to include affiliated nonelectric operations.

Telephone. Data obtained from Federal Communications Commission on revenues and profits for telephone operations of the Bell System Consolidated (including the 20 operating subsidiaries and the Long Lines and General departments of American Telephone and Telegraph Co.) and for 2 affiliated telephone cos. Dividends are for the 20 operating subsidiaries and the 2 affiliates.

All series. Profits before taxes are income after all charges and before Federal income taxes and dividends. For description of series see June 1949 BULL., pp. 662-66 (manufacturing); Mar. 1942 BULL., pp. 215-17 (public utilities); and Sept. 1944 BULL., p. 908 (electric power). Back data available from Division of Research and Statistics.

¹ Commercial banks (including nondeposit trust cos. but not trust depts.), mutual savings banks, life insurance cos., and savings and loan assns.

² U.S. agencies are FNMA, FHA, VA, PHA, Farmers Home Admin., and Federal land banks, and in earlier years, RFC, HOLC, and FFMC. Other U.S. agencies (amounts small or current separate data not readily available) included with "individuals and others."

³ Derived figures; includes small amounts of farm loans held by savings and loan assns.

⁴ Derived figures; includes debt held by Federal land banks and Farmers Home Admin.

NOTE.—Based on data from Federal Deposit Insurance Corp., Federal Home Loan Bank Board, Institute of Life Insurance, Depts. of Agriculture and Commerce, Federal National Mortgage Assn., Federal Housing Admin., Public Housing Admin., Veterans Admin., and Comptroller of the Currency.

Figures for first 3 quarters of each year are F.R. estimates.

¹ Certain mortgage loans secured by land on which oil drilling or extracting operations in process were classified with farm through June 1959 and with "other" nonfarm thereafter. These loans totaled \$38 million on July 31, 1959.

NOTE.—Institute of Life Insurance data. For loans acquired, the monthly

figures may not add to annual totals and for loans outstanding, the end-of-Dec. figures may differ from end-of-year figures, because monthly figures represent book value of ledger assets whereas year-end figures represent annual statement asset values, and because data for year-end adjustments are more complete.

¹ Monthly figures do not reflect mortgage amendments included in annual totals.² Not ordinarily secured by mortgages.³ Includes a small amount of alteration and repair loans, not shown separately; only such loans in amounts of more than \$1,000 need be secured.

NOTE.—Federal Housing Admin. and Veterans Admin. data. FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amounts of loans closed. Figures do not take into account principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

¹ Holdings of financial institutions; holdings of retail outlets are included in "other consumer goods paper."

NOTE.—Consumer credit estimates cover loans to individuals for household, family, and other personal expenditures, except real estate mortgage

loans. The estimates include data for Alaska beginning with Jan. 1959 (except for instalment credit held by sales finance cos.) and for Hawaii beginning with Aug. 1959. For a description of the series see Apr. 1953 BULL. Back data are available upon request.

¹ Includes adjustment for differences in trading days.² Net changes in credit outstanding equal extensions less repayments except in 1959, when the differences do not reflect the introduction of outstanding balances for Alaska and Hawaii.

NOTE.—Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and

sales of instalment paper, and certain other transactions may increase the amount of extensions and repayments without affecting the amount outstanding.

For a description of the series in this and the following table see Jan. 1954 BULL., pp. 9-17. Back data upon request.

INSTALMENT CREDIT EXTENDED AND REPAYED, BY HOLDER

(In millions of dollars)

¹ Includes adjustment for differences in trading days.² Net changes in credit outstanding are equal to extensions less repayments except: (1) in 1959, when the differences do not reflect the introduction of outstanding balances for Alaska and Hawaii, and (2) in certain months when data for extensions and repayments have been adjusted to eliminate duplication resulting from large transfers of paper. In those

months the differences between extensions and repayments for some particular holders do not equal the changes in their outstanding credit. Such transfers do not affect total instalment credit extended, repaid, or outstanding.

See also NOTE to previous table.

¹ Employees only, excludes personnel in the armed forces.² Production workers only.³ Federal Reserve index based on Census Bureau figures.⁴ Prices are not seasonally adjusted.

NOTE.—Data are seasonally adjusted unless otherwise noted.

Construction contracts: F. W. Dodge Corp. monthly index of dollar

value of total construction contracts, including residential, nonresidential,

and heavy engineering; does not include data for Alaska and Hawaii.

Employment and payrolls: Based on Bureau of Labor Statistics data; includes data for Alaska and Hawaii beginning with 1959.

Prices: Bureau of Labor Statistics data.

Freight carloadings: Based on data from Association of American Railroads.

¹ Beginning with 1959, based on revised definition of metropolitan areas.

NOTE.—Beginning with 1959, Census Bureau series includes both farm and nonfarm series developed initially by the Bureau of Labor

Statistics, for which annual totals are given including overlap for 1959. Data from Federal Housing Admin. and Veterans Admin. represent units started, based on field office reports of first compliance inspections.

¹ Includes self-employed, unpaid family, and domestic service workers.² Per cent of civilian labor force.³ Inclusion of figures for Alaska and Hawaii beginning with 1960 increased population by about 500,000 and total labor force by about 300,000. Most of the increase was in nonagricultural industries.

NOTE.—Information relating to persons 14 years of age and over is obtained on a sample basis. Monthly data relate to the calendar week that contains the 12th day; annual data are averages of monthly figures. Bureau of Labor Statistics estimate.

NOTE.—The schedule for reporting current operating expenses was revised beginning with 1961 and certain items are not directly comparable with data for previous years. For detailed summary of these changes see May 1962 BULL., pp. 526–27. Revenue and expenses incident to Federal

funds transactions have been classified as interest and discount on loans and interest on borrowed money in these tables. For other notes see following two pages.

¹ Includes figures for all banks that were members of the FRS at the end of the year (including those becoming members during the year whose returns may cover operations for only part of the year); and in addition includes appropriate adjustments for member banks in operation during part of the year but not at the end of the year. Asset and liability data may not add to totals because of rounding.

² Includes interest on capital notes and debentures.

³ Not included in recoveries shown above.

⁴ Not included in losses shown above.

For other notes see following page.

Number of banks.....	5	3	6	20	18	24	15	17	7	31	19	25

NOTE.—Does not include reserve city banks in the cities of New York and Chicago. The figures of assets, deposits, and capital accounts are averages of the amounts reported for 4 consecutive official call dates beginning with the end of the previous year and ending with the fall call of the current year (except that in 1963 the Dec. 20 call was included in place of the fall call). The number of officers, employees, and banks are

as of the end of the year. Cash assets are comprised of cash, balances with other banks (including reserve balances), and cash items in process of collection. Total capital accounts are comprised of the aggregate book value of capital stock, capital notes and debentures, surplus, undivided profits, reserves for contingencies, and other capital reserves. For other notes see preceding page.

Number of banks.....	6,233	6,174	6,113	6,047	6,108	13	12	190	5,893

¹ Net losses is the excess of (1) actual losses charged against net profits plus losses charged against valuation reserves over (2) actual recoveries and profits credited to net profits plus recoveries credited to valuation reserves; net recoveries and profits is the reverse. Transfers to and from valuation reserves are excluded.

NOTE.—The ratios in this and the following 3 tables were computed from the dollar aggregates shown in preceding tables. Many of these ratios vary substantially from the average of individual bank ratios, which were shown in the April BULL., in which each bank's figures

—regardless of size or amount—are weighted equally and in general have an equally important influence on the result. In the ratios based on aggregates presented here, the experience of those banks in each group whose figures are largest have a much greater influence than that of the many banks with smaller figures. Ratios based on aggregates show combined results for the banking system as a whole, and, broadly speaking, are the more significant for purposes of general analyses of credit and monetary problems, while averages of individual ratios are useful primarily to those interested in studying the financial results of operations of individual banks.

INCOME RATIOS OF MEMBER BANKS, BY FEDERAL RESERVE DISTRICT

(Computed from aggregate dollar amounts; ratios expressed as percentages)

¹ Includes interest on capital notes and debentures.² Not included in recoveries above.³ Not included in losses above.

NOTE.—Includes all insured commercial banks in the United States and possessions. Excludes 1 to 3 mutual savings banks prior to 1962, and 1 or 2 noninsured nondeposit trust companies prior to 1962; these

were State member banks of the FRS and were included in member bank figures.

The figures of assets, deposits, and capital accounts are averages of the amounts reported for call dates at the beginning, middle, and end of each year (except that in 1963 the March 18 call was also included). The number of officers, employees, and banks are as of the end of each year.

¹ Other than interbank and U.S. Govt., less cash items in process of collection.

² Includes relatively small amounts of demand deposits. Beginning with June 1961, also includes certain accounts previously classified as other liabilities.

³ Reclassification of deposits of foreign central banks in May 1961 reduced this item by \$1,900 million (\$1,500 million to time deposits and \$400 million to demand deposits).

NOTE.—For back figures and descriptions of the consolidated condition statement and the seasonally adjusted series on currency outside banks and demand deposits adjusted, see "Banks and the Monetary System," Section I of *Supplement to Banking and Monetary Statistics*, 1962, and Jan. 1948 and Feb. 1960 BULLS.

Except on call dates, figures are partly estimated and are rounded to the nearest \$100 million.

¹ Reciprocal balances excluded beginning with 1942. Reclassification of deposits of foreign central banks in May 1961 reduced interbank deposits by a total of \$1,900 million (\$1,500 million time to other time and \$400 million demand to other demand).

² Includes other assets and liabilities not shown separately.

³ Figures for mutual savings banks include relatively small amounts of demand deposits. Beginning with June 1961, also includes certain accounts previously classified as other liabilities.

⁴ Beginning with Dec. 31, 1947, the series was revised. A net of 115 noninsured nonmember commercial banks with total loans and investments of about \$110 million were added, and 8 banks with total loans and investments of \$34 million were transferred from noninsured mutual savings to nonmember commercial banks.

⁵ These data reflect the reclassification of New York City and city of Chicago as reserve cities effective July 28, 1962; for details see Aug. 1962 BULL., p. 993. See also second paragraph of note 6 to this table.

⁶ Beginning with Feb. 1960 reserve city banks with total loans and investments of \$950 million and total deposits of \$1,070 million were reclassified as country banks. Beginning with Aug. 23, 1962 (Topeka and Wichita, Kansas) and Sept. 6, 1962 (Kansas City, Kansas) reserve city

banks with total loans and investments of \$500 million and total deposits of \$600 million were reclassified as country banks.

Beginning with June 1963, 3 New York City banks with loans and investments of \$392 million and total deposits of \$441 million were reclassified as country banks. Also see note 6, Oct. 1962 BULL., p. 1315.

NOTE.—Data are for all commercial and mutual savings banks in the United States (including Alaska and Hawaii, beginning with 1959).

Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; and nondeposit trust companies. Commercial banks exclude, and member banks include, a national bank in the Virgin Islands that became a member in May 1957, and in the period 1941 to July 1962, from 1 to 3 mutual savings banks.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

Figures are partly estimated except on call dates.

For revisions in series before June 30, 1947, see July 1947 BULL., pp. 870-71.

Financial Statistics

The figures on international capital transactions are collected by the F.R. Banks from reports made on Treasury foreign exchange forms collected by the F.R. Banks in accordance with Executive Orders No. 6560, dated Jan. 15, 1934, and No. 10033, dated Feb. 8, 1949, and Treasury regulations thereunder. Other data are com-

piled largely from regularly published sources such as central bank statements and official statistical bulletins. For some of the series, back data are available in *Banking and Monetary Statistics* and its *Supplements* (see list of publications at end of the BULLETIN).

¹ Includes reported or estimated gold holdings of international and regional organizations, central banks and govts. of countries listed in this table and also of a number not shown separately here, and gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold; excludes holdings of the U.S.S.R., other Eastern European countries, and China Mainland.

The figures included for the Bank for International Settlements are the Bank's gold assets net of gold deposit liabilities. This procedure avoids the overstatement of total world gold reserves since most of the gold deposited with the BIS is included in the gold reserves of individual countries.

² Net gold assets of BIS, i.e., gold in bars and coins and other gold assets minus gold deposit liabilities.

³ European Payments Union through Dec. 1958 and European Fund thereafter.

NOTE.—For back figures and description of the data in this and the following tables on gold (except production), see "Gold," Section 14 of *Supplement to Banking and Monetary Statistics*, 1962.

¹ Includes sales of \$21 million to Lebanon and \$48 million to Saudi Arabia.

² Includes sales of \$21 million to Burma, \$32 million to Lebanon, and \$13 million to Saudi Arabia.

³ Includes purchases of \$25 million from the Philippines.

⁴ Proceeds from this sale invested by the IMF in U.S. Govt. securities; upon termination of the investment the IMF can reacquire the same amount of gold from the United States.

⁵ Payment to the IMF of \$344 million as increase in U.S. gold subscription less sale by the IMF of \$300 million (see also note 3).

¹ Includes gold sold to the United States by the International Monetary Fund with the right of repurchase, which amounted to \$800 million on Apr. 30, 1964.

² Includes gold in Exchange Stabilization Fund.

³ For holdings of F.R. Banks only see pp. 578 and 580.

⁴ Includes payment of \$344 million increase in U.S. gold subscription to the IMF.

NOTE.—See Table 10 on p. 657 for gold held under earmark at F.R. Banks for foreign and international accounts. Gold under earmark is not included in the gold stock of the United States.

See also NOTE to table on gold reserves.

¹ The first column continues the series based on a 1960 survey and subsequently reported securities transactions; the second is based on a survey as of July 31, 1963, and reported securities transactions for Aug.-Dec. Data are not available to reconcile the 2 series.

² Includes, in addition to other Western European countries, unpublished gold reserves of certain Western European countries; gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold; European Fund; and the Bank for International Settlements (the figures for the gold reserves of the BIS represent the Bank's net gold assets).

³ Total short-term dollars include \$82 million reported by banks initially included as of Dec. 31, 1961, of which \$81 million reported for Japan.

⁴ Excludes gold reserves of the U.S.S.R., other Eastern European countries, and China Mainland.

⁵ International Bank for Reconstruction and Development, Inter-

national Monetary Fund, International Finance Corp., International Development Assn., and other international organizations; Inter-American Development Bank, European Coal and Steel Community, European Investment Bank, and other Latin American and European regional organizations except the BIS and E.F. (see note 2).

NOTE.—Gold and short-term dollars include reported and estimated official gold reserves, and official and private short-term dollar holdings (principally deposits and U.S. Treasury bills and certificates); excludes nonnegotiable, non-interest-bearing special U.S. notes held by the Inter-American Development Bank and the International Development Assn. U.S. Govt. bonds and notes are official and private holdings of U.S. Govt. securities with an original maturity of more than 1 year; excludes nonmarketable U.S. Treasury bonds and notes held by official institutions of foreign countries as shown in Table 7 on p. 656.

See also NOTE to table on gold reserves.

¹ International Bank for Reconstruction and Development, International Monetary Fund, International Finance Corp., International Development Assn., and other international organizations; Inter-American Development Bank, European Coal and Steel Community, European Investment Bank and other Latin American and European regional organizations, except Bank for International Settlements and European Fund which are included in "Europe."

² Not reported separately until 1962.

³ Foreign central banks and foreign central govts. and their agencies, and Bank for International Settlements and European Fund.

⁴ Includes \$1,031 million representing increase in U.S. dollar subscription to the IMF paid in June 1959.

⁵ Includes \$82 million reported by banks initially included as of Dec. 31, 1961, of which \$81 million reported for Japan.

⁶ Includes Bank for International Settlements and European Fund.

⁷ Decline from end of 1961 reflects principally reclassification of deposits for changes in domicile over the past few years from Cuba to other countries.

⁸ Data based on reports by banks in the Second F.R. District only for year-end 1959–1962; Dec. 1962 figure carried forward through Mar. 1963.

⁹ Bermuda only; Bahamas included in "Other Latin America."

¹⁰ Represent a partial breakdown of the amounts shown in the "other" categories (except "Other Eastern Europe") in Tables 1a–1e.

Except as indicated by note 11, data for 1961–62 based on reports by banks in the Second F.R. District only; data for Apr. and Dec. 1963 based on reports by banks in all F.R. Districts.

¹¹ Based on reports by banks in all F.R. districts.

¹² Jamaica, Trinidad and Tobago included in British West Indies.

NOTE.—Short-term liabilities are principally deposits (demand and time) and U.S. Govt. securities maturing in not more than 1 year from their date of issue; the latter, however, exclude nonnegotiable, non-interest-bearing special U.S. notes held by the International Development Assn. and the Inter-American Development Bank. For data on long-term liabilities, see Table 5. For back figures and further description of the data in this and the following tables on international capital transactions of the United States, see "International Finance," Section 15 of *Supplement to Banking and Monetary Statistics*, 1962.

¹ Not reported separately until May 1963.² Includes Africa until May 1963.³ Includes \$58 million reported by banks initially included as of Dec. 1961, of which \$52 million reported for Japan.⁴ Until May 1963 includes Eastern European countries other than U.S.S.R., Czechoslovakia, Poland, and Rumania.⁵ Czechoslovakia, Poland, and Rumania only until May 1963.⁶ Bolivia, Dominican Republic, El Salvador, and Guatemala only until May 1963.⁷ Until May 1963 includes also the following Latin American Republics: Costa Rica, Ecuador, Haiti, Honduras, Jamaica, Nicaragua, Paraguay, and Trinidad and Tobago.⁸ Until May 1963 includes also African countries other than Congo (Leopoldville), South Africa, and U.A.R. (Egypt).

NOTE.—Short-term claims are principally the following items payable on demand or with a contractual maturity of not more than 1 year: loans made to and acceptances made for foreigners; drafts drawn against foreigners where collection is being made by banks and bankers for their own account or for account of their customers in the United States; and foreign currency balances held abroad by banks and bankers and their customers in the United States. Excludes convertible currencies held by U.S. monetary authorities.

See also NOTE to Table 1.

¹ Includes data for a number of firms reporting for the first time on Dec. 31, 1962 (6th revised series) and on Mar. 31, 1963 (7th revised series).

² Until June 1963 includes Eastern European countries other than U.S.S.R., Czechoslovakia, Poland, and Rumania.

³ Czechoslovakia, Poland, and Rumania only until June 1963.

⁴ Bolivia, Dominican Republic, El Salvador, and Guatemala only until June 1963.

⁵ Not reported separately until June 1963.

⁶ Until June 1963 includes also the following Latin American Republics: Costa Rica, Ecuador, Haiti, Honduras, Jamaica, Nicaragua, Paraguay, and Trinidad and Tobago.

⁷ Until June 1963 includes also African countries other than Congo (Leopoldville), South Africa, and U.A.R. (Egypt).

⁸ Includes Africa until June 1963.

NOTE.—Reported by exporters, importers, and industrial and commercial concerns in the United States. Data exclude claims held through U.S. banks, and intercompany accounts between U.S. companies and their foreign affiliates.

See also NOTE to Table 1.

Venezuela.....	4.5	Dec. 1960														4.5

¹ On June 24, 1962, the bank rate on advances to chartered banks was fixed at 6 per cent. Rates on loans to money market dealers will continue to be .25 of 1 percent above latest weekly Treasury bill tender average rate but will not be more than the bank rate.

² Beginning with Apr. 1, 1959, new rediscounts have been granted at the average rate charged by banks in the previous half year. Old rediscounts remain subject to old rates provided their amount is reduced by one-eighth each month beginning with May 1, 1959, but the rates are raised by 1.5 per cent for each month in which the reduction does not occur.

³ Rate shown is for advances only.

⁴ Rate applies to advances against commercial paper as well as against govt. securities and other eligible paper.

⁵ Beginning with June 1, 1962, the rediscount rate for commercial bank loans financing the purchase of surplus agricultural commodities under U.S. Law 480 was reduced from 6 to 3 per cent; and on Aug. 22, 1962, the rediscount rate for commercial bank financing of 9 categories of development loans was reduced from 6 to 3 per cent.

NOTE.—Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt. securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts

the largest proportion of its credit operations. Other rates for some of these countries follow:

Argentina—3 and 5 per cent for certain rural and industrial paper, depending on type of transaction;

Brazil—8 per cent for secured paper and 4 per cent for certain agricultural paper;

Colombia—5 per cent for warehouse receipts covering approved lists of products, 6 and 7 per cent for agricultural bonds, and 12 and 18 per cent for rediscounts in excess of an individual bank's quota;

Costa Rica—5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper);

Cuba—5.5 per cent for sugar loans and 5 per cent for loans secured by national public securities;

Ecuador—6 per cent for bank acceptances for commercial purposes;

Indonesia—various rates depending on type of paper, collateral, commodity involved, etc.;

Japan—penalty rates (exceeding the basic rate shown) for borrowings from the central bank in excess of an individual bank's quota;

Peru—8 per cent for agricultural, industrial and mining paper; and

Venezuela—4 per cent for rediscounts of certain agricultural paper and for advances against govt. bonds or gold and 5 per cent on advances against securities of Venezuelan companies.

¹ A new markka, equal to 100 old markkaa, was introduced on Jan. 1, 1963.

² Effective Jan. 1, 1963, the franc again became the French monetary unit. It replaces, at a 1 to 1 ratio, the new franc introduced Jan. 1, 1960.

NOTE.—Averages of certified noon buying rates in New York for cable transfers. For description of rates and back data, see "International Finance," Section 15 of *Supplement to Banking and Monetary Statistics*, 1962.
