## FEDERAL RESERVE BULLETIN

A copy of the Federal Reserve Bulletin is sent to each member bank without charge; member banks desiring additional copies may secure them at a special $\$ 10.00$ annual rate. The regular subscription price in the United States, its possessions, Canada, and Mexico is $\$ 20.00$ per annum or $\$ 2.00$ per copy; elsewhere, $\$ 24.00$ per annum or $\$ 2.50$ per copy. Group subscriptions in the United States for 10 or more copies to one address, $\$ 1.75$ per copy per month, or $\$ 18.00$ for 12 months.
The Bulletin may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and remittance should be made payable to the order of the Board of Governors of the Federal Reserve System in a form collectible at par in U.S. currency. (Stamps and coupons are not accepted.)

The Federal Reserve Bulletin is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. Direction for the art work is provided by Mack R. Rowe. Editorial support is furnished by the Economic Editing Unit headed by Elizabeth B. Sette.

## Prices in Recession and Recovery

> This article was prepared in the Wages, Prices, and Productivity Section of the Division of Research and Statistics.

The U.S. economy is now in its second year of recovery from a sharp, prolonged recession. Associated with that recession was a pronounced deceleration of inflation to a rate about half of that in 1974, which was the highest in 25 years. Since the recovery began, however, the inflation rate has remained unusually high by historical standards. The severity of the 1973-74 inflationary episode and its residue reflect both an accumulated inflationary bias arising from structural changes in the economy and the combined effects of a number of severe exogenous shocks to the economy.

The unusual events that led to double-digit price increases in 1973 and 1974 are largely behind us, but their legacy is still present. A developed inflationary process takes a long time to unwind, and the continuance of an underlying rate of inflation in the neighborhood of 6 per cent during the recovery reflects that fact. In addition, however, there has been a clear tendency over the post-World-War-II period toward an increasingly higher level of inflation at the low point of the business cycle. The factors underlying this pattern are many. There have been basic changes in the processes that determine prices and wages, in part because of changes in governmental policies. For example, the development and use of stimulative policies to combat the forces of recession probably has dampened price cutting during downturns. Similarly, more generous programs of unemployment compensation, while alleviating the hardship of income loss, also have diluted the influence of rising unemployment on wage determination. Moreover, extensive use of Federal programs to promote high employment, rapid economic growth, and a variety of social
objectives has led to large Federal deficitsthere has been only one Federal surplus since 1960-and these deficits have been an important factor in the Nation's long-run inflationary problem.

The underlying inflationary trend was exacerbated by a series of severe economic shocks in the early 1970's. There were poor agricultural harvests abroad in 1972 and at home in 1974. Reflecting reduced domestic supplies as well as other cost pressures, consumer food prices recorded annual increases of nearly 15 per cent in 1973 and 1974. The oil embargo of 1973 was followed by a quadrupling of world crude oil prices and steep cost increases for alternative energy sources. During 1973-74, there were simultaneous rapid business expansions in a number of industrialized countries. This led to intensive speculation in commodity markets as shortages appeared, and resulted in steep cost-price increases as capacity levels were strained. Currency devaluations by the United States made our imports more expensive and, at the same time, led to some bidding up of prices of domestic goods as demands for our exports increased. Coinciding with these developments were first an easing, and then a removal, of wage and price controls, which had previously restrained some price and wage rises. The intensity of the resulting inflation fed expectations of further inflation and was associated with domestic inventory speculation. This general situation, reflecting as it did important unforeseen exogenous events, made control of inflation through traditional fiscal and monetary policy measures extremely difficult.

## ECONOMIC SETTING

The recovery of the U.S. economy since the spring of 1975 has proceeded to the point where

Price levels

Dept. of Labor data, seasonally adjusted.
many major economic variables, including total output and employment, now exceed their prerecession peaks. Although the recovery has been vigorous, serious sectoral imbalances have not developed and the recovery stage of the cycle has been completed without stimulating additional inflation. The recovery of demand was led by consumer spending on both nondurable and durable goods, particularly automobiles. Housing began to move up early in the recovery, but lately, further growth of activity has been limited by problems in the multifamily housing sector. A return of inventory investment from rapid liquidation to moderate accumulation brought additional strength to the recovery. Business profits have recovered from the depressed recession levels. Spending by business on fixed capital has lagged more than it usually does during a recovery, however, reflecting relatively high excess capacity in some lines and continued pursuit of cautious investment policies by business firms.

During the course of the recovery the underlying rate of price change has been obscured somewhat by erratic movements in food and gasoline prices. The rise in consumer prices had slowed to a 6 per cent annual rate in the second quarter of 1975, but then jumped to more than an 8 per cent rate in the following quarter as food prices responded to reduced meat supplies and as gasoline prices rose following the imposition of fees on crude oil imports. The rise in food and gasoline prices began to subside in
the fall, and earlier this year these prices were actually declining. Largely because these declines offset increases elsewhere, consumer price increases averaged only 4.6 per cent, annual rate, over the 6 months ending in May 1976.

If the food and energy price changes are disregarded, a clearer picture of the underlying trend emerges. Prices of the remaining items in the consumer price index (CPI) were rising at about a 10 per cent annual rate in the first quarter of 1975 , but moderated to about a $51 / 2$ per cent annual rate around midyear. By the first quarter of 1976 these prices were temporarily rising at an annual rate of a little over 8 per cent-reflecting step-ups in postal rates, public transportation, and auto insurance rates. Data for April and May suggest that the second quarter annual rate of change may be back in the vicinity of $61 / 2$ per cent.

By the foregoing measure of price performance, inflation thus appears to have reached its lowest rate just after the time that total output was at its trough in the first quarter of 1975. But with that, the underlying improvement of price performance came to an end. The failure of the inflation rate to decline further cannot be ascribed to an abrupt reheating of the economy. Unemployment, which had reached a high of 8.7 per cent of the labor force in the second quarter of 1975 , did not go below 8 per cent of the civilian labor force until the first quarter of 1976. The previous peak in real GNP
was not regained until the same quarter. Capacity utilization rates for industrial materials production did not reach 80 per cent until recently; utilization rates were in excess of 90 per cent during 1973-74.

Although the exogenous forces that led to the intensification of price pressure in 1973-74 have in general stabilized or subsided, their impact has not ended as abruptly as it began. In order to examine better the process by which inflationary impulses are transmitted through the economy and the time that is required for adjustment to take place, the following sections review developments in wholesale and consumer prices using a stage-of-processing framework. Foods, which account for more than one-fifth of all consumer expenditures in the

Rate of change of prices

GNP data, percentage change at annual rates, from Dept. of Commerce; unemployment rate data, from BLS; rate of capacity utilization of total materials industries, F.R.

United States, are discussed first. Then goods and materials are grouped according to whether they are crude-entering the economy for the first time, intermediate, or finished and are to be transacted for the last time at the retail level. In addition, costs arising from the labor sector are reviewed and the implications for the profit share are described.

## FOOD

Aside from short-term, sharp fluctuations, advances in retail food prices have been trending downward since the unusually high rates of 1973. Food prices over the 12 months ending December 1973 rose 20 per cent. The following year this increase had decelerated to 12 per cent and by December 1975 it had dropped to $61 / 2$ per cent. Although food price declines earlier this year were reversed in the spring, over-all food prices were still a shade lower in May than they had been last December.

During 1975 about three-fifths of the over-all price increase for foods was due to rising prices of meat, poultry, and fish; these items rose $151 / 2$ per cent during the year. Most of the increase

## Food prices

BLS data. Centered 6-month changes at seasonally adjusted annual rates.
in meat prices came in the second and third quarters of 1975, as sharply higher feed costs resulting from the poor U.S. harvest in 1974 led livestock producers to curtail output sharply. Supplies of grain-fed beef in the spring of 1975 fell to the lowest level in 10 years and pork production was the lowest in 9 years. The heavy slaughter of grass-fed cattle and of cows and heifers eased this supply shortage, bringing some improvement in meat prices late in the year.

The poor feed-grain harvest in 1974 was followed in 1975 by record crops of corn and wheat as well as near-record soybean output. The resulting moderation of grain prices sur-
vived a temporary increase during the summer on news of a large shortfall in Soviet production. Despite a sale of 16 million tons of grain to the Soviet Union, the record crop brought significantly lower grain prices toward the end of the year. Reflecting the improved grain situation, food prices dropped sharply in the first quarter of 1976, as the price of beef declined in response to renewed production of grain-fed beef and continued slaughter of grass-fed cattle. Prices of meats and of cereal and bakery products rose in May but still were below their peak levels of 1975, as were prices of fruits and vegetables. Prices of dairy products have increased only moderately this year after having risen at annual rates of nearly 14 per cent during the latter half of 1975 . Because of a reduction of supplies following the frost damage in Brazil last year, however, coffee prices have risen sharply to levels one-third above those of May 1975.

Enlargement of the spread between retail and farm prices of the equivalent products also contributed to the advance in food prices in 1975, although it added less than in 1974. This spread, which represents charges for processing and distribution, accounts for more than half of the retail value of foods produced and sold in the United States. By the fourth quarter of 1974

## TABLE 1

| Total | 18.1 | 23.8 | . 5 | 8.6 | 2.3 |
| Farm and food ${ }^{1}$ | -8.7 | 34.2 | $-5.6$ | 6.5 | $-.3$ |
| Industrials | 31.6 | 19.9 | 3.0 | 9.4 | 3.4 |
| Energy items ${ }^{2}$.... | 82.1 | 26.2 | 5.4 | 20.9 | -5.1 |
| Less energy items ${ }^{2}$ | 26.1 | 18.9 | 2.6 | 7.4 | 4.8 |

[^0]this farm-retail spread had widened by more than 30 per cent in 2 years; this rise was responsible for most of the increase in food prices during 1974.

Although the increase in the average farm-retail spread was down to 8 per cent in 1975, the spreads for meats, particularly beef, and for cereal and bakery products rose to very high levels. In the first quarter of 1976 the spread for beef widened further as declines in retail prices lagged the fall in cattle prices. This was partly reversed in the second quarter as retail prices rose less than livestock prices.

## INDUSTRIAL COMMODITIES

The impacts of the oil embargo, commodity shortages and speculation, simultaneous worldwide achievement of rapid business expansions, and currency devaluations were dramatically reflected in annual rates of price rise above 30 per cent for industrial commodities in mid-1974. By that time, however, price series that typically lead cyclical downturns already had moderated. In particular, prices of crude materials excluding foods had begun a sharp deceleration earlier in the first half of 1974. Annual rates of price increase for such unprocessed materials dropped nearly two-thirds, from over 70 per cent in the first quarter to about 25 per cent in the third. These eased slightly in the fourth quarter and registered a $151 / 2$ per cent rate of decrease in the first quarter of 1975 as swollen inventories were worked down at all levels of production.

Economic recovery led to increases of crude material prices after the first quarter of 1975. The uncontrolled portion of domestic crude oil production-about one-third of the total-rose in response to fees levied on imported crude oil in February and June of 1975. Prices for hides and skins and for scrap metals moved higher in this period as inventory liquidation came to an end.

Increases in prices of crude materials moderated temporarily in the early months of 1976 as domestic crude oil prices were rolled back by the Energy Policy and Conservation Act. Despite a decline in crude oil prices, however,

Wholesale price changes by stage of processing

BLS data; excluding foods. Centered 6-month changes at seasonally adjusted annual rates.
over-all prices of crude materials were up at a 9.3 per cent annual rate over the first half of this year.

Price changes for intermediate materials minus foods exhibit a shorter lead and less amplitude at cycle turning points than is the case for crude materials. Intermediate materials include items such as steel products, processed fuels, lumber and plywood, and textiles. The timing of price changes for intermediate materials also was affected by the removal of price controls in the spring of 1974. Price increases for this group, which had averaged more than 35 per cent at annual rates during mid-1974, decelerated sharply by the first half of 1975 and, in fact, were unchanged between the first and
second quarters. In the second half, these prices turned up again as economic recovery brought an end to inventory liquidation and permitted firms to pass through their higher costs for material and labor. Over the first half of 1976, prices of intermediate materials were up 3.5 per cent, annual rate.

Wholesale prices of finished goods followed a pattern similar to that of intermediate materials. From peak rates of inflation not so high as those for crude and intermediate materials, increases in prices of wholesale finished goods decelerated in late 1974 and reached a low toward the middle of 1975.

Beginning late in 1974, producers of consumer finished goods (excluding foods) posted many fewer and much smaller upward price adjustments. After rising nearly one-sixth during 1974, wholesale prices of consumer goods other than gasoline and food were about unchanged between January and September 1975. In the fall, however, and again early this year, automobile prices rose significantly, causing a temporary surge for the over-all group. Nonetheless, the average rate of price rise for this group has averaged around $31 / 2$ per cent since January 1975; this moderation at wholesale bodes well for continued easing of price pressures on consumer goods at retail. Wholesale gasoline prices, which had risen nearly 25 per cent during 1975, declined over the first 4 months of 1976 in response to lower-priced crude oil. In the past 2 months, however, wholesale gas prices have risen, and, at the latest reading, wholesale gasoline was selling at more than double its level in the spring of 1973.

Purchasers of producers' finished goods have seen a progressive easing of wholesale price rises over the past 18 months. Deceleration in this sector has been somewhat slower than for consumer goods-a lag of this type is typical owing mainly to long-range contractual arrangements. Late last year, sizable price increases for trucks and for equipment needed for energy exploration and development were important in the over-all rise in prices of producers' goods. At about a 5 per cent annual rate over the past half-year, however, the trend for these prices compares very favorably with annual rates of increase in the 25 to 30 per cent range just a year and a half ago.

## CONSUMER GOODS

Increases in retail prices of consumer goods decelerated progressively from the third quarter of 1974 to the early months of 1976 -when they had fallen to an annual rate of rise of 3.5 per cent-but, since then, they have turned up again.

Faced by mounting inventories and weakening demand, manufacturers and retailers triggered the deceleration of consumer goods prices late in 1974 by mounting extensive price rebate and discount programs. Apparel prices fell somewhat in the following months, as did quotations for new autos. By the summer of 1975, however, tax rebates and lowered withholding rates had strengthened consumer demand, retail inventories were already coming into better balance, and promotional programs began to be discontinued. Gasoline prices moved sharply higher, and price adjustments to offset earlier cost increases became more common. Nonetheless, by the end of 1975 , prices of consumer goods had risen only about 6 per cent from a year earlier, less than half the 1974 rise.

Fuel products, which had accounted for about a fifth of the over-all increase of consumer prices

Consumer price behavior
6-month percentage changes

BLS data. Centered 6-month changes at seasonally adjusted annual rates.
in 1975, were destined to ease somewhat early this year. The Organization of Petroleum Exporting Countries (OPEC) had raised crude oil prices by $\$ 1$ per barrel in October, but in December the $\$ 2$ per barrel fee on imported crude oil was removed. The resulting lower cost of crude was reflected in outright declines in petroleum product prices from November through April. This decline in prices-averaging 12.5 per cent, annual rate-partly offset increases in other nonfood commodities and held the consumer goods inflation rate at about $31 / 2$ per cent for the November-to-April period. New and used cars recorded above-average increases in this period but apparel, furniture, and home fixtures remained quite moderate. Nevertheless, when petroleum product prices are excluded, the consumer goods price index shows increases averaging nearly $5^{1 / 2}$ per cent (annual rate) over the 6 months ending in May. Although still rapid by historical standards, this rate was a
substantial improvement over increases in the $12^{1 / 2}$ per cent range late in 1974.

## SERVICES

Prices for services accelerated noticeably when wage and price controls were removed early in 1974. Their rate of advance remained about 10 per cent until well into the first part of 1975, when declines in mortgage interest rates and deceleration in rates of increase of prices of other services provided some offset to large advances for medical care. Late in 1975, hikes in bus, subway, and airline fares, and rising auto insurance costs pushed the services index up at a faster rate. In January 1976 a jump in postal rates followed by further large increases in auto insurance and medical care costs gave additional impetus to the rise in service prices. Data for April and May indicate a considerable moderation in the rate of increase of service prices.

Service prices

BLS data. Centered 6-month changes at seasonally adjusted annual rates.

## LABOR COSTS AND PROFITS

Compensation per hour in the private nonfarm economy rose $71 / 2$ per cent over the year ending in the first quarter of 1976. This was down from the increase of almost 11 per cent recorded over the previous year. Smaller average pay increases reflected the concurrent dampening of inflation, a relatively light collective bargaining schedule, and the high rate of unemployment.

Wage movements alone, however, are an
imperfect measure of labor costs, as increases in productivity can offset their impact. Output per hour typically rises rapidly in a recovery period due to more intensive utilization of existing workers and equipment. The period 1975-76 was not an exception; productivity increased by 5.3 per cent over the year after a recession-induced decline of 2.7 per cent over the previous year. Reflecting the slower rise of hourly compensation and the rebound of productivity, unit labor costs rose only 2.1 per cent over the year ending in the first quarter of 1976, the most moderate increase in unit labor costs in more than 3 years; it compares with a cyclical jump of nearly 14 per cent from early 1974 to early 1975.

As a general rule only the longer-run trend in unit labor costs is reflected in price behavior. Short-term movements in this series, thus, tend to have their impact on corporate profits.

In the second and third quarters of 1975, productivity recorded a sharp cyclical rebound, rising at an 8.7 per cent average annual rate. During this same period, hourly compensation grew only at a 7.8 per cent rate; thus, unit labor costs declined somewhat. Since prices were still rising, there was a rapid recovery in corporate profits. Over the two subsequent quarters, growth of compensation was unchanged while productivity advances eased to a 2.1 per cent annual rate. This limited the further recovery of the profit share. Nevertheless, the before-tax profit share of national income in the first quarter had returned to the same proportion as in 1973.

## CYCLICAL PATTERNS

Consumer prices have a typical behavior pattern over the business cycle. The cyclical peak in the rate of increase of prices usually precedes slightly the peak in business activity. Historically, low points of inflation usually coincide with or closely follow business-cycle troughs. If the trough of the recent recession is marked in the first quarter of 1975, however, then the corresponding low point in the inflation rate does not come until nearly 12 months later.

Moreover, the recent experience is unique in the amount of inflation still present at the trough of the price cycle. Inflation at its low point this year, when measured over a 6 -month period, did not go below 4.6 per cent. Except during the recession of 1969-70 when inflation bottomed out at 3.1 per cent, all other post-World-War-II troughs in prices were at zero or negative rates of change. The high rate of inflation during the past recession can be seen as a continuation of a tendency to have successively higher levels of inflation at the bottom of the price cycle.

As in other recessions, the low point of retail price increases was foreshadowed by troughs that had occurred a year earlier in crude and intermediate wholesale price increases and by a low point in wholesale consumer goods a quarter earlier. Service prices typically lag at the trough by one to four quarters. To the extent that the current recovery follows past patterns, further deceleration of increases in service prices may be forthcoming.

During recovery from economic recession, prices typically accelerate over the rate of increase at the trough. In the past, the net increase in the rate of inflation in the year following the trough, as measured by the CPI, has ranged from about $1 / 2$ to $21 / 2$ per cent-with most cases falling between 1 and 2 per cent.

If the behavior of retail prices minus food and fuel is examined, it can be seen that a trough in the rate of inflation appeared much earlierthat is, in mid-1975, or about the same time as the business-cycle trough. Thus the delay of the trough in the total CPI for more than two additional quarters can be attributed to special movements in prices of food and fuel-first, upward movements in the second half of 1975; then combined sharp downward movements in the first quarter of 1976. Even without the influence of food and fuel, however, the level of inflation at about 5 per cent was still high by historical standards.

Because of the relatively small number of observations available for the post-World-WarII period, and because over the course of 30 years there have been significant institutional changes affecting the economy-for example, programs to deal with unemployment-cyclical

## TABLE 3

comparisons such as those above should be interpreted cautiously. Also, because some of the events that had an important influence in the recent inflation were of a largely exogenous and temporary nature, such as the oil embargo and the unusually strong foreign demand for U.S. food, past post-recession relationships may be an unreliable guide to the future.

## CURRENT SITUATION AND OUTLOOK

Currently a rate of price increase in the neighborhood of 6 per cent appears representative of the underlying inflation in the economy. A continued rise in the price of energy relative to other goods can be expected to exert a fairly constant upward pressure on costs and prices in the foreseeable future. Moreover, wage settlements continue to be well in excess of likely produc-
tivity gains and are expected, therefore, to continue to exert upward pressure on prices.

Food prices, on the other hand, have improved with larger agricultural output. Moreover, the outlook for food production and prices is favorable if summer and fall weather is near normal. Although the winter wheat crop of 1976 will be lower than originally expected because of drought in the Southwest, a record acreage of corn was planted this spring. The latest Agriculture Department forecast anticipates a record year for corn production and a nearrecord year for wheat. Expansion in output is under way for beef, pork, poultry, and dairy products as last year's large harvest led to improved profitability of feeding operations. The major adverse factor in the current outlook for food prices is the prolonged dry spell in Europe. If this situation should continue, grain and other food prices may be subjected to more upward pressure from export demand than had been anticipated earlier.

As the recovery proceeds and demand strengthens, firms may attempt to pass forward more of the cost increases that, in the period of weakened demand, had come out of profits. Some moderation might be forthcoming in the rise of service prices, however. Some services are provided by industries that are under public regulation, and price increases in such industries lag earlier cost increases. Some of the recent large increases, particularly in public transportation and auto insurance, were of this catch-up nature.

In general, the longer-run outlook for a return to more stable prices hinges on gradual but progressive moderation in cost pressures-such as wage and energy costs, on gains in productivity, and on an avoidance of an overheated economy.

# Changes in Time and Savings Deposits at Commercial Banks, October 1975-January 1976 

For the 3 months ending January 31, 1976, time and savings deposits of individuals, partnerships, and corporations (IPC) continued to grow at approximately the same moderate pace as in the previous quarter. Results of the most recent quarterly survey conducted jointly by the Federal Reserve System and the Federal Deposit Insurance Corporation (FDIC) indicate a signif-

Note.-Virginia Lewis of the Board's Division of Research and Statistics prepared this article.
icant surge in passbook savings deposits and small-denomination (less than $\$ 100,000$ ) time deposits. However, at the same time, outstanding amounts of large-denomination negotiable and nonnegotiable certificates of deposit (CD's) declined and as a result the total of time and savings deposits grew at a 2.3 per cent quarterly rate.

Although rates paid on consumer-type time and savings deposits generally were maintained

[^1]Note.-Data were compiled jointly by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation. The information was reported by a probability sample of all insured commercial banks.

Some deposit categories include a small amount of deposits outstanding in a relatively few banks that no longer issue these types of deposits and are not included in the number of issuing banks. Dollar amounts may not add to totals because of rounding.

## TABLE 2

Small-denomination time and savings deposits, IPC, held by insured commercial banks on October 31, 1975, and January 31, 1976, by type of deposit, by most common rate paid on new deposits in each category, and by size of bank

For notes. see p. 573.
at the regulatory ceiling levels, yields on largedenomination CD's tended to follow short-term money market rates and declined throughout the 3-month period. Furthermore, the over-all average rate paid on passbook savings and small-denomination time deposits at the end of January remained at the same level as in Oc-tober--the exceptional growth in lower-rate, shorter-maturity accounts balanced the expansion in higher-interest, longer-maturity deposits.

## SAVINGS DEPOSITS

Inflows of savings deposits were unusually strong between October and January. Such deposits rose at a 7.3 per cent quarterly rate to $\$ 165.5$ billion, not seasonally adjusted-the largest increase for any 3-month period since the start of the survey in 1968. During the quarter, many money market rates declined to levels below the maximum allowable interest rate payable on savings accounts, and the

NotE.-The average rates were calculated by weighting the most common rate reported on each type of deposit at each bank by the amount of that type of deposit outstanding. Christmas savings and other special funds, for which no rate information was collected, were excluded.
proportion of banks offering the 5 per cent ceiling edged up slightly to almost 89 per cent. Thus, savings deposits represented an attractive short-term investment for funds, especially since most banks pay interest from the day of deposit to the day of withdrawal.

Further stimulus to the growth of savings deposits was provided by the change in Federal Reserve and FDIC regulations, effective November 10, 1975, that permitted the holding of such deposits at commercial banks by corporations, partnerships, and other profit-making organizations up to $\$ 150,000$ per depositor. At the approximately 320 large commercial banks for which a breakdown of savings data into IPC, business accounts, and government deposits is available, about one-fourth of the inflows into savings accounts during the survey period was from business depositors. According to a Federal Reserve survey conducted on January 7, 1976, the funds deposited into these accounts were, for the most part, transferred from demand balances.

## SMALL-DENOMINATION TIME DEPOSITS

The outstanding volume of small-denomination time deposits expanded at a quarterly rate of 4.1 per cent over the October-January interval. The most rapid rates of increase occurred in deposits with maturities greater than 4 yearsdue, in part, to the interest rate structure of Regulation Q , which allows higher rates to be paid on longer maturity deposits. However, the volume of time deposits maturing in less than $21 / 2$ years also showed unusual strength-those in the 1 - to $2 \frac{1}{2}$-year range rose for the first 3-month period since this maturity category was
established in July 1973. Presumably, the favorable yields on such deposits relative to money market instruments had begun to draw funds from other investments; likewise, inflows to time deposits with an original maturity of less than 1 year, most of which are thought to be 90 -day accounts, are probably viewed by some customers as close substitutes for savings deposits.

## LARGE-DENOMINATION TIME DEPOSITS

Between October and January the volume of large-denomination time deposits, after having expanded slightly during the previous survey period, resumed the steady decline observed in the first half of 1975 . The willingness of commercial banks to allow large CD's to run off indicates that the near-record growth in con-sumer-type time and savings inflows provided adequate funds to satisfy still modest loan de-mand-and at relatively low cost. Rates paid on large-denomination time deposits by banks competing for such funds, having leveled off at the end of October, declined in January in line with short-term market rates of interest. More than 50 per cent of the outstanding dollar volume of these issues was held by banks offering a rate of 5 per cent, whereas in October the bulk of the CD's issued were at banks paying 6.5 per cent. From November to early December, many regional banks were able to attract large CD deposits at rates lower than those offered by large New York City banks-apparently the result of apprehension in money market centers about purchasing the large-denomination time deposits of these banks in the aftermath of the city's financial crisis.

Most common interest rates paid by insured commercial banks on new deposits, January 31, 1976

## NOTES TO APPENDIX TABLES 1-8:

[^2]Figures exclude banks that reported no interest rate paid and that held no deposits on the survey dates, and they also exclude a few banks that had discontinued issuing these instruments but still had some deposits outstanding on the survey date. Dcllar amounts may not add to totals because of rounding.
In the headings of these tables under "Most common rate paid (per cent)" the rates shown are those being paid by nearly all reporting banks. However, for the relatively few banks that reported a rate in between those shown, the bank was included in the next higher rate

## NOTES TO TABLE 2:

${ }_{2}$ Less than .05 per cent.
${ }^{2}$ See p. A-8 for maximum interest rates payable on time and savings deposits at the time of each survey. Note that the ceiling rate is included in rate interval in the line above.

Note.-The most common interest rate for each instrument refers to the basic stated rate per annum (before compounding) in effect on the survey date that was generating the largest dollar volume of dethe survey date that was generating the largest dollar volume of de-
posit inflows. If the posted rates were unchanged during the 30 -day posit inflows. If the posted rates were unchanged during the 30 -day
period just preceding the survey date, the rate reported as the most common rate was the rate in effect on the largest dollar volume of

## Statements to Congress

Statement by Philip E. Coldwell, Member, Board of Governors of the Federal Reserve System, before the Joint Committee on Defense Production, June 28, 1976.

Madam Chairwoman, I am happy to have this opportunity to describe to the Joint Committee the responsibilities of the Federal Reserve System in the emergency preparedness area and our plans to carry out those responsibilities if necessary.

Federal Reserve System involvement in contingency planning for an attack on the United States began in the early 1950's. It was formalized in 1956, when the Office of Defense Mobilization issued a Defense Mobilization Order to the Board. That order was superseded by Presidential Executive Orders, the most recent of which is Executive Order 11490 dated June 11, 1976.

The Federal Preparedness Agency has designated the Federal Reserve a Category A agency, which means that we have essential functions that must be continued during an attack and in an immediate post-attack period. The Executive Order requires, among other things, that such agencies maintain alternate headquarters and sites for the storage of duplicate essential records.

More specifically, the Executive Order charges the heads of the Federal bank supervisory agencies, including the Board of Governors of the Federal Reserve System, with responsibility for developing emergency plans, programs, and regulations to cope with the potential economic effects of a mobilization or an attack. Functions that the Order specifies must be carried on include: (1) provision and regulation of money and credit; (2) acquisition, decentralization, and distribution of currency; (3) collection of checks; (4) fiscal agency and foreign operations; (5) provision for the continued or resumed
operations of financial institutions; and (6) provision of necessary liquidity to those institutions.

These policies and plans are not directed at the areas of the country that would be devastated by an exchange of high-yield nuclear weapons. Rather, they are aimed at the undamaged or lightly damaged areas where national survival might depend upon maintaining economic momentum and organized economic activity. This is a point that is often overlooked by those who, quite understandably, are preoccupied by the terrible problems that would confront us in the damaged areas.

I should point out also that these plans are based on a general war-an 'all out'" nuclear exchange. However, we have examined the problems that would be generated by a limited exchange such as the one being examined by this committee. We have concluded that the same plans would apply, the difference being one of magnitude. The plans would be easier to implement since presumably a larger number of our normal operating facilities would survive and problems of communication and control would be less difficult.

The Board and the Reserve Banks have organized themselves to meet the responsibilities outlined briefly above by establishing alternate headquarters and duplicate record storage sites in nontarget areas. In the Board's case, we have been able to combine these functions at a facility that also operates our vital communications system on a day-to-day basis.

Lists of officials and staff who would relocate to these sites when instructed to do so have been established and are kept current. Succession lists are maintained on a current basis. Delegations of authority, the use of which would be triggered by an attack, have been made to Reserve Banks that might be out of communication with the Board.

The problem of insuring a currency supply is made difficult because the only production source of Federal Reserve notes is the Bureau of Engraving and Printing, here in Washington, and because almost all of the Reserve Banks and branches are in potential target areas. We have established an inventory of the various denominations of Federal Reserve notes at our facility at Culpeper, Virginia, to provide a cushion until the Bureau could get back into production.

Since we must assume that high-speed equipment at normal operating facilities would not be available, plans for maintaining the check collection and currency distribution systems involve a high degree of decentralization. Checkagent and cash-agent banks, each serving a small geographic area, have agreed to perform these functions for the Federal Reserve in an emergency. Each agent bank has been furnished instructions and the necessary forms.

Most importantly, we have informed the banks and other financial institutions about these plans in detail by distributing to each copies of emergency regulations, operating circulars, and operating letters.

These plans and policies have been tested, to the extent that they could be, during national tests and exercises held over the past 20 years. In 1974 an interagency committee of the Federal
financial agencies re-evaluated the post-attack financial policies and recommended no changes.

However, the basic assumptions underlying these plans, particularly those relating to national survival and continuity of Government, have not been revised since 1966. In that period the political and military situations have changed materially. For that reason, as we informed the Joint Committee in the last Annual Report, Chairman Burns has asked that these assumptions be re-examined. We understand that General Bray is chairing an interagency steering group that is engaged in such a study. In the meantime, we plan to maintain emergency preparedness programs at the Board and at the Reserve Banks at their present levels until we are advised differently by the administration or by the Congress.

In conclusion, Madam Chairwoman, you have asked about the need for such emergency preparedness plans. In my opinion the national emergency plans on the civil side of Government are a necessary complement to the defense efforts on the military side. As long as there are such emergency plans, and in this disturbed and unsettled world they seem to be a requirement, the plans and programs I have outlined for the Federal Reserve are a fundamental feature underlying all other plans since the others assume a functioning monetary system.

Statement by Arthur F. Burns, Chairman, Board of Governors of the Federal Reserve System, before the Joint Economic Committee of the U.S. Congress, June 30, 1976.

I am pleased to meet once again with the Joint Economic Committee to present the views of the Board of Governors of the Federal Reserve System on the condition of our national economy.

The economic expansion now under way is entering its second year. Business activity began to pick up in the spring of 1975 and has gathered momentum since then. In the quarter now ending, the physical volume of total production will be about $71 / 2$ per cent higher than a year ago.

As is typical of a period of cyclical expansion, the rebound of activity has been especially vigorous in the industrial sector. New data released this Monday [June 28] by the Federal Reserve Board indicate that industrial production, that is, the output of our factories, mines, and power plants, has risen since March of last year at an annual rate of $131 / 2$ per cent-a stronger advance than was indicated by our earlier reports.

The expansion of economic activity in the various service trades as well as the industrial sector has led to material strengthening in the demand for labor. Total employment across the Nation has increased by more than $31 / 2$ million from its low point in March 1975. This gain
has been accompanied by significant lengthening of the average workweek-especially in manufacturing, where the amount of overtime is back to the highest level since the summer of 1974. Meanwhile, long-term unemployment has sharply diminished, and the over-all unemployment rate has come down from about 9 per cent a year ago to $71 / 4$ per cent presently.

The rate of utilization of our industrial plant has also moved up with the expansion of business activity. In the materials-producing industries, only about 70 per cent of available plant capacity was effectively used during the second quarter of 1975. At present, the rate of capacity use has reached 80 per cent in these industries. Where the recovery of production has been especially rapid, as in the paper industry and some branches of the textiles industry, the utilization of capacity already exceeds 90 per cent.

The intensity of the economic recovery to date has been close to the average for cyclical upswings during the period since World War II. Moreover, the pattern of the current expansion has been similar in many respects to that of its predecessors.

Consumers led the way out of recession last spring, and they have been a major source of stimulus to economic expansion since then. As confidence improved, they became more active buyers, and the rise in consumer spending outstripped by a considerable margin the increase in disposable income.

The advance of consumer buying, which began in markets for apparel and other nondurables, soon spread to durable goods. During the quarter now ending, consumers spent approximately 13 per cent of their after-tax incomes on durable goods-compared with $111 / 2$ per cent a year earlier. The automobile market has been especially active. In recent months, unit sales of domestic models have run about 50 per cent above their depressed level in April 1975.

As purchases of big ticket items rose, consumers incurred new indebtedness. However, the rate of increase in consumer instalment debt has thus far remained moderate in relation to consumer incomes.

The hesitation that developed recently in the pace of consumer spending is, in the Board's
judgment, a transitory phenomenon. After a rapid advance from last December through this March, total retail sales remained unchanged in April and then declined somewhat in May. Temporary pauses of this kind are not uncommon during periods of cyclical expansion. Members of this committee may remember that the lull in consumer buying last autumn was soon followed by a renewed surge of retail sales during the winter months. There is good reason to believe that the recent slowdown will also be temporary. The basic determinants of consumer spending are clearly favorable: real incomes of families are increasing, labor market conditions are improving, and so too is the liquidity position of consumers. I would therefore expect consumer spending to continue moving upward. In fact, incoming sales data for the past 3 or 4 weeks on automobiles and most other branches of retail trade suggest that a resumption of the upward trend is already under way.

A further rise of inventory investment should also add strength to general business activity. In many nondurable goods industries, inventories have now been restored to levels that are adequate to meet current rates of sales. In the durable goods trades, on the other hand, renewed accumulation of inventories is just getting under way. New orders for durable goods are now rising vigorously, and rebuilding of stocks should be a stimulus to production in the months ahead.

A larger, and more basic, source of stimulus to economic activity can be expected from increasing business outlays for new plants, machinery, and other equipment. Business capital spending typically joins the recovery process later than other sectors of the economy. But as utilization of capacity increases and profits improve during the course of an expansion, business firms typically move ahead more aggressively with their capital investment programs. Although such a development has been somewhat delayed in the present instance, the traditional pattern is again emerging.

Thus, production of business equipment has been rising since November 1975 at an annual rate of 11 per cent. Other indicators of business capital spending are also pointing strongly up-
ward. New orders for nondefense capital goods have risen in each of the past 5 months and in May were 16 per cent above their level at the end of 1975. Also, the most recent surveys of business anticipations indicate some further strengthening of plans for capital expenditures this year.

In the other major sector of private long-term investment-that is, homebuilding-the revival of activity has contributed to economic expansion since the spring of 1975. New housing starts last month were almost 50 per cent above their trough in early 1975, and unemployment among construction workers has fallen by a third from its cyclical peak.

The rebound in residential construction has been largely confined to single-family homes. Construction of apartment houses has been held down by several factors-previous overbuilding, high construction costs, and lagging rents. In fact, inflated costs of construction, maintenance, and operation are now a major limiting factor for all branches of residential construction. It is reasonable, nevertheless, to anticipate a gradual further advance in homebuilding activity during the second half of this year. Residential building permits have been rising rather steadily and last month reached their highest level in 2 years. Mortgage credit is in ample supply in practically all parts of the country. Furthermore, while the construction of apartment houses has remained at a depressed level, vacancy rates for rental units have declined noticeably.

Our net trade balance with other countries may also show some improvement in the months ahead. During the past year of economic recovery, our foreign trade balance declined. The physical volume of imports-which fell off sharply during the recession-began to rise again during the third quarter of last year, reflecting the enlarged demand for petroleum, industrial supplies, and other goods needed to support the rise of industrial production or to meet consumer preferences. Our merchandise exports, however, have yet to regain the upward trend that was interrupted by worldwide recession.

Imports of industrial supplies and consumer goods will probably move up further as the
expansion of our economy continues to cumulate. But the outlook for our export trades is also brightening. Although economic recovery in other industrial countries began later than in our own, the pace of economic expansion in Western Europe and Japan has of late begun to gather momentum. Material strengthening of demands for American machinery and other products is therefore to be expected.

During the course of the current expansion, several milestones have already been passed on the road to restoring our Nation's economic vitality. By early this year, the number of persons holding jobs had already regained the prerecession level, and total employment has since then moved above the previous peak by nearly $11 / 2$ million. The average level of real disposable income per person rose to an all-time high in the first quarter of 1976, and the real value of the gross national product now also exceeds the previous peak level reached in the final quarter of 1973.

Our country still has some distance to go, however, to regain full prosperity. It is therefore vital to maintain conditions that will foster continuation of a good rate of economic expansion.

Fortunately, the recovery process has thus far remained balanced and orderly. There have been few signs of the speculative excesses that sometimes develop in the course of a businesscycle expansion and inevitably cause trouble later on. Our Nation has made notable progress in reducing the rate of inflation. The rise in consumer prices came down from 12 per cent in 1974 to 7 per cent in 1975, and to an annual rate of 4 per cent in the first 5 months of this year. This recent further moderation in the rate of inflation, however, stems in large part from special factors that for a time reduced the prices of food and fuel. When these erratic items are excluded, it appears that the underlying annual rate of inflation has not diminished since mid1975 and that it may still be about 6 or 7 per cent.

Any such rate of inflation constitutes a serious threat to the economy, and elimination of our disease of inflation must therefore remain a major objective of public policy. At the same time, it is important to recognize that we have managed during the past year to avoid a fresh
outburst of inflation-a development that would have quickly eroded the purchasing power of wages and savings, created strains in financial markets, undermined confidence, and sapped the strength of the forces of economic expansion.

Let me turn now to the role of monetary policy in these developments. The Federal Reserve was urged repeatedly during the past year to pursue a more expansionist policy in order to speed the return to full employment. Concern was expressed by some economists, as well as by some members of the Congress, that the rates of monetary growth we were seeking would prove inadequate to finance a good economic expansion. Interest rates would move up sharply, it was argued, as the demand for money and credit rose with increased aggregate spending, and shortages of money and credit might soon choke off the recovery.

We at the Federal Reserve did not share this pessimistic view. We knew from experience, first, that the turnover of existing money balances is apt to increase rapidly with the return of confidence; second, that rapid expansion of money and credit is apt to intensify inflationary expectations and soon sow the seeds of another recession. Consequently, we resisted advice to open the tap and let money flow out in greater abundance.

The monetary policy pursued by the Federal Reserve fostered a moderate rate of monetary expansion. During the year ending this quarter, $M_{1}$, the narrowly defined money stock, which includes only currency and demand deposits, grew about $51 / 4$ per cent. A more broadly defined money stock, $M_{2}$, which includes also savings and time deposits other than large certificates of deposit (CD's) at commercial banks, rose by 10 per cent.

These increases in the stock of money were sufficient to finance a large increase in the physical volume of output even at rising prices, because they were accompanied, as we expected, by a sharp rise in the turnover of money balances. Moreover, this rise in velocity was not associated with rising interest rates or developing shortages of credit. On the contrary, conditions in financial markets have remained relatively easy.

There is a striking contrast between the movement of interest rates during the current expansion and their behavior in past cyclical upswings. Short-term interest rates normally begin to move up at about the same time as the upturn in general business activity, although the extent of rise varies from one cycle to another. Upward pressures on short-term interest rates might well have been expected during the past year, in view of the vigorous rebound of economic activity, the continuing advance of the price level, and the record volume of Treasury borrowing. However, after some run-up in the summer months of 1975, short-term rates turned down again last fall, and long-term rates also moved lower. By April of this year, interest rates on most short-term market securities had fallen to their lowest level since late 1972, while yields on high-grade new issues of corporations declined to their lowest level since early 1974. The main cause of the unusual behavior of interest rates during the past year was undoubtedly the lessening of inflationary fears and the consequent reduction in the inflation premium that got built into interest rates-particularly, the long-term rates.

The financial climate that has prevailed during the past year of economic recovery has permitted lenders and borrowers alike to strengthen their financial condition. For example, the liquidity position of savings banks and of savings and loan associations has improved markedly over the past year. Moreover, the flow of individual savings to the thrift institutions is still ample. Deposits at savings and loan associa-tions-the leading suppliers of home mortgage credit-rose at an annual rate of 14 per cent in May, and the outstanding mortgage loan commitments of these institutions increased further-to more than $\$ 20$ billion, the highest level in 3 years.

Commercial banks have also rebuilt their liquidity. They have added a large quantity of short-term Treasury securities to their portfolios, and they have also reduced reliance on volatile funds. The condition of the banking system has been further strengthened through widespread additions to retained earnings and some new issues of common stock. The ratio of capital to risk assets of commercial banks,
which declined steadily during the early 1970's, has thus increased appreciably, and confidence in the banking system has been bolstered.

Our Nation's business enterprises have likewise taken advantage of the prevailing financial climate to improve their financial condition. Corporations issued a huge volume of long-term bonds during 1975, and they used much of the proceeds to repay short-term debt and to acquire liquid assets. This year, they are still finding long-term funds readily available. Public offerings of bonds by domestic corporations will total about $\$ 3$ billion this month-an extraordinary volume by historical standards. For a time, access to public markets for long-term funds was confined largely to firms with the highest credit ratings. Of late, however, some lowerrated firms have found a more receptive public market for their debt issues, as is reflected in a narrowing of the yield spread between Aaaand A-rated bond issues from $11 / 2$ percentage points last summer to about $1 / 2$ percentage point this spring. Many medium-sized firms, and others with lower credit ratings, have met their needs for long-term funds through private placements with life insurance companies and other institutional lenders.
Besides this, an improved stock market has made it easier for corporations to raise equity funds for financing new investment programs or for restoring capital cushions. This month, corporate enterprises have sold about $\$ 11 / 2$ billion of new shares to the public. If the pace of new stock offerings during the first half of this year is maintained over the next 6 months, the year will end with the largest volume of corporate stock flotations in our history.

These accomplishments in financial markets indicate, I believe, that the course of moderation in monetary policy pursued by the Federal Reserve over the past year has aided the process of economic recovery. Our actions during recent weeks have further served to reassure the business and financial community that we intend to stick to a course of monetary policy that will support further growth of output and employment, while avoiding excesses that would aggravate inflationary pressures and thus create trouble for the future.

As I indicated in testimony before the Senate
banking committee, the Federal Open Market Committee recently reduced the upper limit of the projected growth range of $M_{1}$ in the year ahead from $71 / 2$ per cent to 7 per cent and the upper limit of $M_{2}$ from $101 / 2$ per cent to 10 per cent. The changes are small, but they are a logical step in light of financial developments and the behavior of the economy.
The decision to reduce the upper limit of the ranges for $M_{1}$ and $M_{2}$ reflects the experience of the past year, when improvements in financial technology made it possible for a moderate rise in the money stock to finance a good economic recovery with declining interest rates. However, with a full year of renewed expansion in business activity already behind us, some downward adjustment in the upper boundary of thé growth ranges for $M_{1}$ and $M_{2}$ might have been called for in any event. The adjustment in the projected growth ranges for $M_{1}$ and $M_{2}$ over the year ahead was thus a very small but prudent step in the right direction. Looking to the longer future, it would be helpful if everyone recognized that the rate of monetary expansion we have recently projected is still too high to be consistent with general price stability.

Another indication of our intention to adhere to a moderate course of monetary policy may be found in the prompt actions we took some weeks ago to ward off the threat of excessive growth of the monetary aggregates. In April, the pace of monetary expansion jumped very sharply-to an annual rate of 15 per cent for $M_{1}$. We recognized that technical factors-such as the decline in the Treasury's cash balancemight be partly responsible, and that the bulge in the monetary growth rate might be temporary. We could not, however, risk an explosion of the monetary aggregates during a period of strongly advancing economic activity.

Over a period of several weeks, starting in late April, the Federal Reserve thus became somewhat less accommodative in meeting the demand for bank reserves. The upward movement in market rates of interest that followed reflected our actions as well as rising demands for credit. In more recent weeks, the pace of monetary expansion has again moderated; short-term interest rates have stabilized or fallen back, and long-term rates may have begun de-
clining again. In the Board's judgment, the small but prudent steps just described have bolstered confidence and enhanced prospects for sustaining a healthy economic recovery. The Board believes that the prospects for a durable prosperity would be further enhanced by moderation in the course of fiscal policy.

The deficit in the Federal budget has diminished very little over the past year-especially when the operations of off-budget agencies and Government-sponsored enterprises are taken into account, as they should be. During the first quarter of this year, the annual rate of deficit, as calculated in the national income and product accounts, was still close to $\$ 70$ billion, and there is little evidence of a significant closing of the huge gap between receipts and expenditures during the second quarter. It is of the utmost importance that the Congress and the administration cooperate to maintain tight control over Federal expenditures. At the present stage of the business cycle, a substantial decline of the Federal deficit is essential if renewed inflationary pressures are to be avoided and savings are to become available for much-needed private investment.

We can all take considerable satisfaction in the progress that has been made over the past year in restoring more prosperous conditions in our country. Both the Congress and the administration deserve credit for improving the economic climate. Much remains to be accom-
plished, however. Unemployment remains much too high. Productivity has been lagging. The expansion of our industrial plant is proceeding at too slow a pace. The homebuilding industry and other branches of construction are still depressed. And the menace of inflation is still with us, though in a less virulent form than in many other countries around the world. Rampant inflation abroad-West Germany and Switzerland are outstanding exceptions-has contributed to the turbulence in foreign exchange markets this year.

Participants in the economic summit meeting just concluded in Puerto Rico have recognized the dilemma faced by economic policy-makers throughout the advanced industrial world today. There is a pressing need for expansion in the economies of both the industrialized countries and the developing nations. However, traditional policies of economic stimulation may well prove to be counterproductive in today's environment of deeply ingrained inflationary expectations.

The declaration of the conferees at Puerto Rico regarding the need to maintain an economic climate that is conducive to enterprise and investment, while working toward the complete elimination of inflation, is both welcome and appropriate. Both in this country and abroad, our main hope for achieving lasting prosperity lies in adhering to prudent fiscal, monetary, and structural policies.

# Record of Policy Actions of the Federal Open Market Committee 

MEETING HELD ON MAY 18, 1976

## 1. Domestic Policy Directive

Preliminary estimates of the Commerce Department indicated that growth in real output of goods and services had picked up to an annual rate of 7.5 per cent in the first quarter-from a rate of 5 per cent in the fourth quarter of 1975-and that the rise in the GNP fixed-weighted price index had slowed substantially. Staff projections suggested that growth in real output was continuing at a vigorous, although slightly less rapid, pace in the current quarter and that it was likely to be more moderate in the second half of the year. The projections also suggested that the rise in prices would be above the relatively low first-quarter rate.

Retail sales were unchanged in April. Over the period since November, however, retail sales had risen substantially, reflecting in large part strong demands for automobiles and general merchandise.

Industrial production continued to recover in April at about the average rate of the preceding 4 months. As in March, the rise reflected mainly increases in output of automobiles, other consumer goods, business equipment, and durable goods materials.

Gains in employment were large and widespread in April. The civilian labor force grew as much as total employment, however, and the over-all unemployment rate remained at 7.5 per cent. Nevertheless, the unemployment rate for heads of households and for adult males declined. In manufacturing, the average factory workweek fell, but the decrease appeared to have been related to holidays in the week used for the survey of establishments.

Private housing starts, which had rebounded sharply in February and then fallen moderately in March, declined somewhat further in April to the average level in the fourth quarter of 1975. Outstanding mortgage loan commitments at savings and loan associations had risen in March, the latest month for which data were available, and had reached the highest level in 3 years.

New orders for nondefense capital goods rose appreciably in

March for the third consecutive month, but the backlog of orders declined further. Nonresidential construction activity remained depressed. However, a private survey suggested that over recent months business plant and equipment expenditures planned for this year had been raised considerably.

The index of average hourly earnings for private nonfarm production workers, which had risen at a less rapid pace over the first quarter of 1976 than it had on the average in 1975, continued to advance at a moderate rate in April. The schedule of labor contract negotiations had been light in the first 4 months of this year, and relatively few cost-of-living wage adjustments went into effect. From the fourth quarter of 1975 to the first quarter of 1976 over-all compensation per manhour in the private nonfarm economy rose as rapidly as it had on the average during 1975.

The wholesale price index for all commodities rose appreciably in April, following a 5 -month period of little change. Average prices of farm and food products rose sharply, after 5 months of decline, while average prices of industrial commodities continued upward at a moderate pace. In March the rise in the consumer price index had remained at a reduced rate, in large part because retail prices of foods and fuels had continued to decline.

Staff projections now suggested that growth in real output in the current quarter would be stronger than had been projected 4 weeks earlier, provided that a current work stoppage in the rubber products industry ended before it caused significant curtailments in output in other industries. The greater strength in the quarter was attributed in large part to higher rates of business investment in fixed capital and inventories than had been projected a month ago, although a slightly faster rate of growth in personal consumption expenditures also was now anticipated.

Staff projections for the second half of the year suggested that expansion in business fixed investment would continue to accelerate and that business investment in inventories would remain at an advanced rate. It was also anticipated that growth in personal consumption expenditures would remain vigorous and that residential construction would continue to recover. However, the expansion in State and local government purchases of goods and services was expected to remain relatively slow.

The U.S. foreign trade balance was in deficit in March for the
third consecutive month, and the sizable deficit for the first quarter as a whole was in sharp contrast to large surpluses in each of the four quarters of 1975. The shift to deficit in the first quarter was attributable mainly to increases in imports associated with the expansion in the domestic economy; at the same time, exports declined somewhat.

Over the period since the April 20 meeting of the Committee, the average value of the dollar against leading foreign currencies had remained relatively steady. Attention in the exchange markets during the period was focused on problems affecting the Italian lira and the British pound, both of which fluctuated considerably. On balance, the lira rose somewhat and the pound declined somewhat in relation to the dollar.

Total loans and investments at U.S. commercial banks expanded somewhat further in April, reflecting almost entirely another large increase in bank holdings of Treasury securities. Bank holdings of other securities increased slightly. Total loans outstanding at banks declined, reflecting substantial net repayments of business and security loans. Other loans by banks continued to expand moderately.

In general, business short-term credit demands remained weak in April. The outstanding volume of commercial paper issued by nonfinancial corporations rose, but the increase was offset by the decline in outstanding bank loans to businesses.

Growth in the narrowly defined money stock- $M_{1}$-accelerated to an annual rate of about 15 per cent in April, reflecting in part a rise in private balances resulting from a large decline in U.S. Government deposits. ${ }^{1}$ On the average from March to April Treasury balances at Federal Reserve and commercial banks declined by almost $\$ 4$ billion. $M_{1}$ had grown at a moderate rate in February and March and at a slow rate over the preceding 4 months.

The more broadly defined money stock measures- $M_{2}$ and $M_{3}$ also increased substantially in April, owing to the sharp rise in $M_{1}$ and to continuing strong inflows of time and savings deposits (other than negotiable CD's) at banks and nonbank thrift institu-

[^4]tions. Interest rates on such deposits remained favorable relative to rates on short-term market instruments.

System open market operations since the April 20 meeting had been guided by the Committee's decision to seek bank reserve and money market conditions consistent with moderate growth in monetary aggregates over the period ahead, while taking account of developments in domestic and international financial markets. Immediately after the April meeting the System became less accommodative in the provision of reserves. Operations were directed toward achieving conditions of reserve availability consistent with a Federal funds rate of $47 / 8$ per cent-the midpoint of the $41 / 2$ to $51 / 4$ per cent operating range that the Committee had specified for the inter-meeting period and $1 / 8$ percentage point above the rate prevailing at the time of the April meeting.

Data that had become available soon after that meeting and in each subsequent week suggested that in the April-May period growth in $M_{1}$ and $M_{2}$ would be strong relative to the ranges that had been specified by the Committee. Accordingly, the System gradually became still less accommodative in the provision of reserves. By the end of the inter-meeting period the Federal funds rate was around $5 \frac{1}{4}$ per cent, the upper limit of the specified range, and market interest rates in general had risen. Upward pressures on market rates also reflected investor reactions to the indications of accelerated growth in the monetary aggregates and to reports suggesting vigorous economic recovery.

In the short-term area, the rise in market rates during the inter-meeting period occurred despite continued weakness in private credit demands. In addition, the Treasury cut its outstanding shortterm indebtedness after midmonth by repaying a substantial amount of cash-management bills and by reducing the size of the weekly auctions of bills. On the day before this meeting the market rate on 3-month Treasury bills was 5.22 per cent, compared with 4.77 per cent on the day before the April meeting.

In the intermediate- and long-term areas, demands for funds remained relatively strong in April. Public offerings of new corporate bonds, although down from the exceptional volume in March, were still large. Offerings of new State and local government bonds also fell from the exceptional total in March, but a rebound in the volume appeared to be in prospect for May.

On April 28 the Treasury announced that it would sell $\$ 6.25$ billion of notes and bonds to refund $\$ 4.1$ billion of publicly held notes that were to mature on May 15 and to raise $\$ 2.2$ billion of new cash. In auctions on May 4 and May 7 it sold to the public $\$ 2$ billion of 2 -year notes and $\$ 750$ million of 23 -year 9 -month bonds at average prices to yield 6.61 per cent and 8.19 per cent, respectively. For the remaining $\$ 3.5$ billion, the Treasury offered 10 -year, $7 \% / 8$ per cent notes at par. However, subscriptions for these notes amounted to $\$ 8.9$ billion, and on May 7 the Treasury accepted $\$ 4.7$ billion of them. Altogether, the Treasury sold to the public almost $\$ 7.5$ billion of notes and bonds, raising $\$ 3.4$ billion in new cash.

Interest rates on home mortgages in the primary market were unchanged during the inter-meeting period. In the more sensitive secondary market, yields edged up beginning in late April in reaction to the rise in other market rates of interest.

At its April meeting, the Committee had agreed that growth in the monetary aggregates on the average over the period from the first quarter of 1976 to the first quarter of 1977 at rates within the following ranges appeared to be consistent with its broad economic aims: $M_{1}, 4^{1 / 2}$ to 7 per cent; $M_{2}, 71 / 2$ to 10 per cent; and $M_{3}, 9$ to 12 per cent. The associated range for growth in the bank credit proxy was 6 to 9 per cent. It was agreed that the longer-term ranges, as well as the particular list of aggregates for which such ranges were specified, would be subject to review and modification at subsequent meetings. It also was understood that, as a result of short-run factors, growth rates from month to month might well fall outside the ranges contemplated for annual periods.

In the discussion of current policy at this meeting, the Committee took note of a staff analysis suggesting that over the May-June period the rate of growth in $M_{1}$ was likely to subside from the rapid pace in April, which was attributable in part to the large decline in U.S. Treasury deposits. At the same time, however, it appeared that the underlying demand for money was strong and that a somewhat more typical relationship between growth in $M_{1}$ and growth in nominal GNP was in the process of being re-established. Given the rate of GNP growth projected for the current quarter, the staff analysis suggested that, if prevailing money market conditions were maintained over the 5 weeks until the next
meeting, growth in $M_{1}$ over the May-June period would be within a range that was high relative to the longer-term range agreed upon by the Committee at the preceding meeting.

The staff analysis also suggested that, if prevailing money market conditions were maintained over the next inter-meeting period, growth in $M_{2}$ over the May-June period would remain relatively rapid, although less so than the average rate during the first 4 months of the year. It was expected that thrift institutions' inflows of time and savings deposits other than money market CD's would be dampened by the recent rise in interest rates and that some deposits would be withdrawn in order to make payment in mid-May for the new 10 -year, $7 \% / 8$ per cent Treasury notes.

It was noted that credit market pressures would be affected by the recent build-up in the calendar of new corporate and State and local government bond issues. In general, demands for interme-diate- and long-term funds across all market sectors were likely to remain strong. Moreover, it was not yet clear whether longerterm market rates had fully adjusted to the recent firming in money market conditions.

During the Committee's discussion, it was observed that the recovery in economic activity had proceeded in a satisfactory way, although the rate of unemployment remained high and re-intensification of inflationary pressures was a serious threat. Recent gains in production and employment had been sizable, and a significant expansion in business demands for fixed capital and for inventories appeared to be developing. Altogether, the outlook for economic activity was strong; to some members of the Committee, it appeared stronger than suggested by the staff projections.

The members agreed that growth in monetary aggregates recently had been at unacceptably high rates, especially in view of the longer-run ranges for growth that had been adopted at the preceding meeting. It was observed that the moderate monetary policy that the System had been pursuing had contributed to a return of confidence; that to sustain confidence it was important for the System to demonstrate its intention to resist unduly rapid growth in the monetary aggregates; and that pursuit of that objective would run little or no risk of aborting the recovery in economic activity.

A number of members expressed the view that failure to take additional steps now to restrain growth in the monetary aggregates
might confront the Committee with the need to take stronger measures later on, if growth rates were to be held within the longer-run ranges agreed upon at the last meeting. At the same time, it was felt that the System should proceed cautiously because the exceptionally rapid growth in the monetary aggregates recently might be a temporary aberration and because some modest tightening in money market conditions already had taken place.

It was noted that the Federal funds rate had turned up from a level of around $43 / 4$ per cent and had risen 50 basis points in the period since the April meeting and that interest rates in general had increased. Some concern was expressed about the rise in longer-term rates. The observation was also made, however, that rising rates would not have much impact on economic activity until late this year or early next year, and should a strong capital investment boom be under way at that time, prompt action now to restrain monetary growth would be viewed, retrospectively, as especially appropriate.

In general, Committee members favored directing operations in the period immediately ahead toward moderating growth of the monetary aggregates, and they indicated that in pursuit of that end they would accept some modest further firming in money market conditions. However, they differed in their preferences for specifics of operating instructions for the coming period. Most members favored specification of $M_{1}$ and $M_{2}$ ranges of growth for the May-June period that were close to the longer-run ranges that had been agreed upon at the last meeting. Other members preferred to specify somewhat higher ranges of growth for $M_{1}$ and $M_{2}$ over the May-June period in recognition of the growth rates that appeared to be already developing. In general, however, they were willing to accept slightly more firming in money market conditions than were members in the first group, should the 2 -month rates of growth in the aggregates appear to be approaching or exceeding the upper limits of those higher ranges.

At the conclusion of the discussion the Committee decided to seek bank reserve and money market conditions consistent with moderate growth in monetary aggregates over the period ahead. Specifically, the members agreed that growth in $M_{1}$ and $M_{2}$ over the May-June period at annual rates within ranges of 4 to $71 / 2$ per cent and 5 to 9 per cent, respectively, would be acceptable.

They decided that, in assessing the behavior of the aggregates, approximately equal weight should be given to $M_{1}$ and $M_{2}$.

The members agreed that until the next meeting the weeklyaverage Federal funds rate might be expected to vary in a gradual and orderly way within a range of 5 to $53 / 4$ per cent. They also agreed that, in the conduct of operations, account should be taken of developments in domestic and international financial markets.

The following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests that growth in real output of goods and services is continuing at a vigorous pace in the current quarter. In April recovery in industrial production continued, and gains in employment were large and widespread. However, the civilian labor force also increased substantially, and the unemployment rate continued at 7.5 per cent. Retail sales remained at the March level. The wholesale price index for all commodities rose appreciably in April, reflecting a sharp increase in average prices of farm products and foods and a modest increase in prices of industrial commodities. Over recent months, the index of average wage rates has advanced moderately.

The average value of the dollar against leading foreign currencies has been relatively steady in recent weeks. During the first quarter, there was a sizable U.S. foreign trade deficit, in contrast to the large surpluses in the preceding four quarters.
$M_{1}$, which had expanded moderately in February and March, increased sharply in April, reflecting in part a drop in U.S. Government deposits. Inflows of time and savings deposits other than negotiable CD's were strong at banks and nonbank thrift institutions, and $M_{2}$ and $M_{3}$ increased substantially. In recent weeks, both shortand long-term market interest rates have risen.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions that will encourage continued economic recovery, while resisting inflationary pressures and contributing to a sustainable pattern of international transactions.

To implement this policy, while taking account of developments in domestic and international financial markets, the Committee seeks to achieve bank reserve and money market conditions consistent with moderate growth in monetary aggregates over the period ahead.

Votes for this action: Messrs. Burns, Volcker, Balles, Black, Gardner, Jackson, Kimbrel, Partee,

Wallich, and Winn. Vote against this action: Mr. Coldwell.

Mr. Coldwell dissented because he did not want to provide for the possibility of a rise of as much as $1 / 2$ percentage point in the Federal funds rate over the next inter-meeting period in addition to the rise of $1 / 2$ percentage point that had occurred since the last meeting. In his opinion, a further rise of that amount could have an exaggerated effect on expectations in the financial markets, provoking excessive increases in interest rates. Rapid monetary growth recently, he thought, might reflect transitory forces to a significant degree, so that much further tightening in money market conditions over the next few weeks could force consideration later on of the need for a reversal. Accordingly, he favored a range of 5 to $5^{1 / 2}$ per cent for the weekly-average Federal funds rate until the next meeting and a range of 6 to 10 per cent for the annual rate of growth in $M_{1}$ over the May-June period.

## 2. Release Schedule for the Record of Policy Actions

At this meeting the Committee approved a motion that the record of policy actions for each meeting of the Committee be released to the public shortly after the next regularly scheduled meeting. A publication delay of approximately 45 days had been in effect since early 1975.

Votes for this action: Messrs. Burns, Volcker, Balles, Black, Gardner, Jackson, Kimbrel, Partee, Wallich, and Winn. Votes against this action: None. Abstention: Mr. Coldwell.

This action was taken to provide information regarding the Committee's policy actions on a more timely basis. Since the majority of meetings are held at 4-week intervals, the delay now will most often be about a month. For the minority of meetings that are followed by a 5 -week interval, the delay will be about a week longer.

From mid-1967 to early 1975, a delay of approximately 90 days had been in effect. Prior to mid-1967, when the Committee's Rules Regarding the Availability of Information were changed to comply
with the Freedom of Information Act, the records of policy actions were published only in the Board's Annual Report to Congress.

In conjunction with the foregoing action, the Committee amended Section 271.5(a) of its Rules Regarding the Availability of Information to delete the sentence reading "For example, the Committee's domestic policy directive adopted at each meeting of the Committee is published in the Federal Register approximately 45 days after the date of its adoption; and no information in the records of the Committee relating to the adoption of any such directive is made available for public inspection or copying before it is published in the Federal Register or is otherwise released to the public by the Committee." With this amendment, Section 271.5(a) reads as follows:
(a) Deferred availability of information.-In some instances, certain types of information of the Committee are not published in the Federal Register or made available for public inspection or copying until after such period of time as the Committee may determine to be reasonably necessary to avoid the effects described in paragraph (b) of this section or as may otherwise be necessary to prevent impairment of the effective discharge of the Committee's statutory responsibilities.

Votes for this action: Messrs. Burns, Volcker, Balles, Black, Coldwell, Gardner, Jackson, Kimbrel, Partee, Wallich, and Winn. Votes against this action: None.

## 3. Memorandum of Discussion

At this meeting the Committee approved a motion that the memorandum of discussion be discontinued after the memorandum for the meeting of March 15-16, 1976.

Votes for this action: Messrs. Burns, Volcker, Balles, Black, Gardner, Jackson, Kimbrel, Partee, Wallich, and Winn. Vote against this action: Mr. Coldwell.

This action was taken against the background of the Committee's decision to speed up publication of the records of policy actions, and of its understanding that the policy records would be expanded to include more information concerning members' views on
longer-run and current policy. The memoranda of discussion are detailed accounts of proceedings at meetings of the Committee, which have been available to the public 5 years after the end of the year to which they apply. The decision to discontinue these memoranda reflected the Committee's judgment that the benefits derived from them did not justify their relatively high cost, particularly in light of the changes being made in the policy record.

Mr. Coldwell dissented from this action because he felt that the benefits of the memorandum of discussion justified its retention.

## 4. Foreign Currency Operations

On June 6, following consultations among members of the Foreign Currency Subcommittee of the Federal Open Market Committee, the System agreed that it would stand ready to make available \$1 billion to the Bank of England under the existing reciprocal currency arrangement with that Bank. At the same time, the Treasury Department, through the Exchange Stabilization Fund, agreed that it would stand ready to make available $\$ 1$ billion under a swap arrangement with the Bank of England.

The System and the Treasury participated with central banks of other Group of Ten countries, Switzerland, and the Bank for International Settlements in making available to thé Bank of England standby credits totalling $\$ 5.3$ billion. Those arrangements were made in the light of the recent fall in the value of the pound sterling under exchange market pressures that had led to disorderly market conditions, and in the common interest in the stability and efficient functioning of the international monetary system.

## Home Mortgage Disclosure

The Board of Governors has added a new Part 203 (Regulation C) to implement the Home Mortgage Disclosure Act of 1975, which requires the disclosure of mortgage loan data by depository institutions that make Federally related mortgage loans as determined by the Board and are located in standard metropolitan statistical areas.

Effective June 28, 1976, a new Part 203 is added to read as follows:

## Index to Sections

Section 203.1 Authority, Scope, and Enforcement Section 203.2 Definitions
Section 203.3 Exemptions
Section 203.4 Compilation of Mortgage Loan Data
Section 203.5 Disclosure Requirements
Section 203.6 Sanctions for Violations
Section 203.7 Effective Date

Section 203.1—Authority, Scope, and Enforcement
(a) Authority and scope. This Part comprises the regulations issued by the Board of Governors of the Federal Reserve System pursuant to the Home Mortgage Disclosure Act of 1975 (Title III of Pub. L. 94-200; 89 Stat. 1125 et seq.). This Part applies to depository institutions which make Federally related mortgage loans. Nothing in the Act or this Part is intended to, nor shall it be construed to, encourage unsound lending practices or the allocation of credit.
(b) Administrative enforcement. As set forth more fully in sections 305 and 306 of the Act, compliance with the provisions of the Act and this Part shall be enforced by the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation), and the Administrator of the $\mathrm{Na}-$ tional Credit Union Administration.

## Section 203.2-Definitions

For the purposes of this Part, the following definitions apply unless the context indicates otherwise:
(a) Act means the Home Mortgage Disclosure Act of 1975 (Title III of Pub. L. 94-200; 89 Stat. 1125 et seq.).
(b) Branch office means any office approved as a branch of the depository institution by that depository institution's Federal or State supervisory agency.
(c) Depository institution means any commercial bank, savings bank, savings and loan association, building and loan association, homestead association (including cooperative banks), or credit union, which makes Federally related mortgage loans. Any majority-owned subsidiary of a depository institution shall be deemed to be part of its parent depository institution for the purposes of this Part.
(d) Federally related mortgage loan means any loan (other than temporary financing such as a construction loan) which (i) is secured by a first lien on residential real property (including individual units of condominiums and cooperatives) that is designed principally for the occupancy of from one to four families and is located in a State; and (ii)(A) is made in whole or in part by a depository institution the deposits or accounts of which are insured by any agency of the Federal Government, or is made in whole or in part by a depository institution which is regulated by any agency of the Federal Government; or (B) is made in whole or in part, or insured, guaranteed, supplemented, or assisted in any way, by the Secretary of Housing and Urban Development or any other officer or agency of the Federal Government or under or in connection with a housing or urban development program administered by any other such officer or agency; or (iii) is intended to be sold by the depository institution that originates the loan to the Federal National Mortgage Association, the Government National Mortgage Association, the Federal Home Loan Mortgage Corporation, or a financial institution from which it is to
be purchased by the Federal Home Loan Mortgage Corporation.
(e) FHA, FmHA, or VA loans means mortgage loans which are insured under Title II of the National Housing Act or under Title V of the Housing Act of 1949 or which are guaranteed under Chapter 37 of Title 38, United States Code.
(f) Home improvement loan means a loan, unsecured or secured by collateral other than a first lien on residential real property, (i) the proceeds of which are to be used for the purpose of repairing, rehabilitating, or remodeling an existing residential dwelling located in a State as stated by the borrower to the lender at the time of the loan transaction, and (ii) that is recorded on the books of the depository institution as a home improvement loan.
(g) Mortgage loan means a "residential mortgage loan" as defined in paragraph (h) of this section or a 'home improvement loan'' as defined in paragraph (f) of this section.
(h) Residential mortgage loan means a loan which is secured by a first lien on residential real property located in a State, including a first lien refinancing of an existing loan, but shall not include (i) temporary financing (such as a construction loan), or (ii) purchase of an interest in a pool of mortgage loans (such as mortgage participation certificates issued or guaranteed by the Federal Home Loan Mortgage Corporation, the Government National Mortgage Association, or the Farmers Home Administration), or (iii) a loan made primarily for business or consumer purposes (other than to purchase, repair, rehabilitate or remodel residential real property) but in connection with which a first lien on residential real property is taken as collateral.
(i) Residential real property means improved real property used or to be used for residential purposes, including single-family homes, dwellings for from two to four families, multi-family dwellings, and individual units of condominiums and cooperatives.
(j) State means any State of the United States of America, the District of Columbia, and the Commonwealth of Puerto Rico.

Section 203.3-Exemptions
(a) The following categories of depository institutions are exempt from the compilation of data and disclosure requirements of sections 203.4 and 203.5 of this Part:
(1) any depository institution that has total assets as of the last day of its last full fiscal year of $\$ 10,000,000$ or less; or
(2) any depository institution that has neither a home office nor any branch office located in a standard metropolitan statistical area (SMSA) as currently defined by the Office of Management and Budget of the United States Government; or
(3) any State-chartered depository institution subject to the mortgage loan disclosure laws (statutes or regulations) of a State or subdivision thereof that the Board determines, in accordance with the procedures set forth in the Supplement to this Part, contain (i) requirements substantially similar to those imposed under the Act, and (ii) adequate provisions for enforcement.
(b) A depository institution that was exempt on or after the effective date of this Part on the basis of paragraph (a) of this section and that subsequently becomes no longer exempt shall compile the data described in section 203.4 of this Part for each fiscal year beginning with its last full fiscal year ending prior to the date it was no longer exempt, and that last full fiscal year shall be deemed to be a "full fiscal year ending prior to July 1, 1976" for the purposes of section 203.4 of this Part.

## Section 203.4- <br> Compilation of Mortgage Loan Data

(a) Data to be included. (1) Each depository institution shall aggregate, separately for each standard metropolitan statistical area (SMSA) in which it has a home office or branch office, its mortgage loan data for each fiscal year beginning with its last full fiscal year ending prior to July 1, 1976, with the exception of mortgage loans described in subsection (4) of this paragraph. Mortgage loan data relating to residential real property located within the relevant SMSA (i.e., the SMSA where a home or branch office is located) shall be segregated from mortgage loan data relating to residential real property located outside the relevant SMSA and shall be itemized by the census tract in which the principal residential real property securing the residential mortgage loan (or, in the case of home improvement loans, the property to be improved) is located (except as provided in subsection (2) of this paragraph) according to the following classifications in a format similar to guideline Form HMDA-1, which is set forth in the appendix to this Part:
(i) FHA, FmHA, or VA loans, except on multi-family dwellings (i.e., dwellings for more than four families), subdivided as to those loans (A) originated and (B) purchased by the depository institution, during that fiscal year;
(ii) residential mortgage loans other than FHA, FmHA, or VA loans and other than loans on multi-family dwellings, subdivided as to those loans (A) originated and (B) purchased by the depository institution, during that fiscal year;
(iii) all residential mortgage loans, except on multi family dwellings, (i.e., sum of classifications (i) and (ii)), subdivided as to those loans (A) originated and (B) purchased by the depository institution, during that fiscal year;
(iv) home improvement loans, except on multi-family dwellings, subdivided as to those loans (A) originated and (B) purchased by the depository institution, during that fiscal year;
(v) all mortgage loans (home improvement loans and residential mortgage loans) on multifamily dwellings, subdivided as to those loans (A) originated and (B) purchased by the depository institution, during that fiscal year; and
(vi) all mortgage loans (home improvement loans and residential mortgage loans), except on multi-family dwellings, made to any borrower who did not, at the time of the loan transaction, intend to reside as his principal dwelling in the property securing the residential mortgage loan (or, in the case of home improvement loans, the property to be improved), subdivided as to those loans (A) originated and (B) purchased by the depository institution, during that fiscal year.
Classifications (i) through (v) include loans to both occupants and non-occupants of the property. Mortage loan data relating to residential real property located outside the relevant SMSA (or relevant SMSA's in the case of a depository institution with home or branch offices in more than one SMSA) shall also be itemized according to classifications (i) through (v) set forth above, but further itemization of that data by census tracts or United States Postal Service ZIP codes is not required.
(2) Mortgage loan data relating to residential real property located within the relevant SMSA may be itemized, according to the classifications specified in subsection (1) of this paragraph, by United States Postal Service ZIP codes for the area in which the principal residential real property securing the residential mortgage loan (or, in the case of home improvement loans, the property to be improved) is located, in lieu of census tracts,
to the extent that such data relate to:
(i) a full fiscal year ending prior to July 1 , 1976; or
(ii) a part of a fiscal year if that part ends on June 30,1976 , provided that a mortgage loan disclosure statement for that part of the fiscal year is made available by the depository institution by September 30, 1976, and a separate mortgage loan disclosure statement for the remaining part of that fiscal year (itemizing mortgage loan data relating to residential real property within the relevant SMSA by census tracts) is made available by the depository institution within ninety days of the end of that fiscal year; or
(iii) residential real property located in an area of a currently defined relevant SMSA that is not tracted on the maps (as a portion of then-defined SMSA's or otherwise) in the series " 1970 Census of Population and Housing: CENSUS TRACTS, Final Reports, PHC(1) Series'' prepared by the Bureau of the Census of the United States Department of Commerce.
(3) Mortgage loan data to be compiled as described in this paragraph shall be in terms of number of loans and total dollar amounts (original principal amounts of loans originated by the institution to the extent of its interest, where the loan is made jointly or cooperatively, and unpaid principal balances of loans purchased by the depository institution, to the extent of its interest in such purchased loans), except that, in the case of purchased home improvement loans, the amount to be reported may include the unpaid finance charges. The compilations shall be on an annual basis and relate to mortgage loans originated or purchased solely during the relevant fiscal year.
(4)(i) A depository institution shall not include in its mortgage loan data to be compiled pursuant to paragraph (a) of this section:
(A) a refinancing that it originates involving no increase in the outstanding balance of the principal due on the existing loan where the depository institution and the borrower are the same parties to the existing loan and the refinancing; and
(B) a loan originated or purchased by the depository institution acting as trustee or in some other fiduciary capacity.
(ii) For the purpose of compiling mortgage loan data pursuant to paragraph (a) of this section with respect to a full fiscal year ending prior to July 1, 1976, a depository institution may-
(A) notwithstanding the definition contained
in section 203.2(f) of this Part, itemize as home improvement loans those loans that it has classified as home improvement loans for the purposes of State law, provided that no loans secured by first liens on residential real property shall be included as home improvement loans in the mortgage loan disclosure statement and reference is made in the disclosure statement to the State law definition of home improvement loan that is being utilized; or
(B) omit, at its option, any mortgage loan that was (1) both originated and either sold or paid in full during such fiscal year, or (2) both purchased and either sold or paid in full during such fiscal year, provided that the depository institution consistently applies this option with respect to all loans in those categories and clearly states in its mortgage loan disclosure statement for that year that such data have been omitted.
(b) Applicable SMSA's, census tracts and ZIP codes. (1) For the purpose of determining whether a mortgage loan is to be included in the classifications relating to residential real property within the relevant SMSA as described in paragraph (a) of this section (but not for the purpose of determining exemptions pursuant to section 203.3(a)(2) of this Part), the applicable areas of the relevant SMSA shall be those as defined by the Office of Management and Budget of the United States Government and in effect on June 28,1976 , or the first day of the fiscal year to which the mortgage loan disclosure statement relates, whichever is the later date.
(2) Applicable census tract numbers and boundaries shall be those appearing on the census tract maps in the series " 1970 Census of Population and Housing: CENSUS TRACTS, Final Reports, PHC(1) Series', prepared by the Bureau of the Census, United States Department of Commerce. If the number itself would be duplicated in the mortgage loan disclosure statement for the relevant SMSA, the county, city, or town that uniquely identifies the census tract shall be identified in that disclosure statement.
(3) An applicable ZIP code shall be that for the area in which the principal residential real property securing the residential mortgage loan (or, in the case of home improvement loans, the property to be improved) is located. No depository institution is obligated to revise its mortgage loan data to reflect official changes of ZIP code numbers or boundaries made after the ZIP code for a particular loan is recorded.
(4) Nothing contained in this paragraph is in-
tended to prohibit the use of maps, directories, computer programs, or the like that have more recent definitions of the applicable SMSA areas than those specified in subsection (1) of this paragraph, provided that every mortgage loan relating to residential real property within the applicable areas of the relevant SMSA as specified in subsection (1) of this paragraph or within the areas of the relevant SMSA as more recently defined shall be included in the data to be itemized by census tracts or ZIP codes as required by paragraph (a) of this section. If such updated revisions are utilized, the mortgage loan disclosure statement shall indicate the source of the revision.
(c) Applicable presumption. For the purpose of compiling mortgage loan data described in paragraph (a) of this section, a depository institution may presume (unless its records relating to that loan contain information to the contrary) with respect to any mortgage loan originated prior to June 28, 1976, or purchased at any time, that the borrower intended, at the time of the loan transaction, to reside as his principal dwelling in the property securing the residential mortgage loan (or, in the case of home improvement loans, the property to be improved), if such property is a residential dwelling used or to be used by from one to four families.

## Section 203.5-Disclosure Requirements

(a) Dates disclosure statements due. (1) Each depository institution shall make available to the public by the following dates mortgage loan disclosure statements required to be compiled pursuant to section 203.4 of this Part:
(i) September 30, 1976, in the case of a disclosure statement relating to a full fiscal year ending prior to July 1, 1976, except as provided in subsection (2) of this paragraph;
(ii) within ninety days of the end of the relevant fiscal year in the case of a disclosure statement that relates to a full fiscal year ending subsequent to June 30, 1976; and
(iii) within ninety days of the date a depository institution becomes no longer exempt in the case of the initial disclosure statement required pursuant to section 203.3(b) of this Part.
(2) If an application for an exemption is filed by September 30, 1976, pursuant to section 203.3(a)(3) of this Part, a State-chartered depository institution subject to the mortgage disclosure laws of a State or subdivision thereof being con-
sidered in the application shall not be required to compile and make available to the public a mortgage loan disclosure statement relating to a full fiscal year ending prior to July 1, 1976, while the application is pending before the Board. If the State-chartered depository institution is not granted an exemption by the Board's determination on the application, that depository institution shall make the disclosure statement for that fiscal year available within sixty days of the date of the Board's determination.
(3) Any mortgage loan disclosure statement required to be made available shall be maintained and made available for a period of five years after the close of the first fiscal year during which that disclosure statement is required to be maintained and made available.
(b) Offices at which disclosure statements to be made available. (1) Except as provided in subsection (2) of this paragraph, each depository institution shall make available to the public disclosure statements required to be compiled pursuant to section 203.4 of this Part, by the dates specified in paragraph (a) of this section, at its home or branch offices, as follows:
(i) in the case of depository institutions that have home or branch offices in only one SMSA, the entire mortgage loan disclosure statement shall be made available at the home office and at least at one branch office at the home office and at least at one branch office (if there is such a branch office) within that SMSA; and
(ii) in the case of depository institutions that have home and branch offices in more than one SMSA, (A) the entire mortgage loan disclosure statement (relating to all SMSA's with respect to which the depository institution is required to compile mortgage loan data) shall be made available at the home office and (B) the entire mortgage loan disclosure statement shall also be made available at least at one branch office within every SMSA where the depository institution has branch offices (including the SMSA where the home office is located), except that the disclosure statement at a particular branch office need not include census tract or ZIP code itemizations with respect to relevant SMSA's other than the SMSA in which the particular branch office is located provided that aggregated data from the disclosure statement with respect to each of those other relevant SMSA's (i.e., the column totals of Section I of the appendix to this Part) are furnished.
(2) Any depository institution all of whose
offices (home and branch) are located where there is no general public access shall make available mortgage loan disclosure statements required to be compiled pursuant to section 203.4 of this Part, by the dates specified in paragraph (a) of this section, in either of the following ways:
(i) it shall designate a place convenient and accessible to the public within the SMSA of its home office where the entire mortgage loan disclosure statement (relating to all SMSA's with respect to which it is required to compile mortgage loan data) will be available at reasonable times, and shall designate a convenient and accessible place within every other SMSA where it has a branch office, at which designated place will also be made available the entire mortgage loan disclosure statement except for the omission, at the option of the depository institution, of census tract or ZIP code itemizations with respect to relevant SMSA's other than the SMSA where the particular branch is located provided that aggregated data from the disclosure statement with respect to each of those other relevant SMSA's (i.e., the column totals of Section I of the appendix to this Part) are furnished; or
(ii) it shall promptly furnish by mail to anyone requesting the information a copy of a required mortgage loan disclosure statement, imposing no more than a reasonable charge for the cost of reproduction of the data.
(3) A depository institution shall make appropriate efforts at least once each year to notify its depositors of the availability of its mortgage loan data, such as by (i) inserting a notice in a periodic account statement or other communication to depositors, (ii) posting a notice in the lobbies of its home and branch offices located in SMSA's for at least one month, or (iii) publishing a notice in a newspaper or newspapers of general circulation in the SMSA's in which its home and branch offices are located.
(4) Upon request, any office of a depository institution shall promptly provide information regarding the location of any office or designated place of that depository institution at which mortgage loan disclosure statements are available.
(c) Manner of making disclosure statements available. Each office or designated place of a depository institution that is required pursuant to paragraph (b) of this section to make a mortgage loan disclosure statement available shall make such a mortgage loan disclosure statement available to anyone requesting it for inspection or
copying during the hours in which such office or designated place is normally open to the public for business. If a depository institution makes reproduction facilities available, it may impose a reasonable charge for the cost of reproduction of the data.

## Section 203.6-Sanctions for Violations

(a) A violation of the Act or this Part is subject to sanctions as provided in section 305 of the Act.
(b) An error in compiling or disclosing required mortgage loan data shall not be deemed to be a violation of the Act or this Part if the error was unintentional and resulted from a bona fide mistake notwithstanding the maintenance of procedures reasonably adopted to avoid any such error.

## Section 203.7-Effective Date

This Part shall be effective on June 28, 1976.

## Supplement to Part 203

## Procedures for an Application

for Exemption Pursuant to
Paragraph (a)(3) of Section 203.3
(a) Application. Any State or subdivision thereof, ${ }^{1}$ State-chartered depository institution, or association of State-chartered depository institutions, may make application to the Board pursuant to the terms of this Supplement and the Board's Rules of Procedure ( 12 CFR 262) for a determination that, under the laws of that State or municipality, ${ }^{2}$ a State-chartered depository institution is subject to requirements substantially similar to those imposed by Regulation C (12 CFR 203) and that there is adequate provision for enforcement of such requirements.
(b) Supporting documents. The application, which may be made by letter, shall be accompanied by (1) a copy of the full text of the laws of the State or municipality which are claimed by the applicant to impose requirements substantially similar to those imposed by this Regulation; (2) a statement of reasons to support the claim that

[^6]applicable requirements of the laws of the State or municipality are substantially similar to all requirements imposed under this Regulation including an explanation of reasons as to why any differences are not significant; (3) a copy of the full text of the laws of the State or subdivision thereof which provide for enforcement of the State laws referred to in item (1) of this paragraph; and (4) an undertaking to inform the Board within 30 days of the occurrence of any change in the applicable law or regulations of the State or municipality.
(c) Public notice of filing. In connection with any application which has been filed in accordance with the requirements of paragraphs (a) and (b), notice of such filing will be published by the Board in the Federal Register, and a copy of such application will be made available for examination by interested persons during business hours at the Board and at the Federal Reserve Bank of each Federal Reserve District in which the applicant is situated. A period of time will be allowed from the date of such publication for the Board to receive written comments from interested persons with respect to that application. Should multiple applications be received with respect to the laws of the same State or municipality, the Board may, in its discretion, (1) consolidate the notice of receipt of all such applications in one Federal Register notice, and (2) dispense with publication of the notice of applications received after publication of the notice of an application relating to the laws of the same State or municipality.
(d) Exemption from requirements. If the Board determines on the basis of the information before it that under the laws of a State or municipality some or all State-chartered depository institution(s) are subject to requirements substantially similar to those imposed by this Regulation, and that there is adequate provision for enforcement of such requirements, the Board will exempt those State-chartered depository institutions in that State or municipality that are subject to such requirements from the requirements of the Act and the Board's regulations in the following manner: (1) Notice of the exemption will be published in the Federal Register and the Board will furnish a copy of such notice to the applicant, to each State or municipal authority responsible for administrative enforcement of the laws of the State or municipality, to the regulatory authorities specified in section 305(b) of the Act, and to each interested person who has participated in the proceeding. (2)

The Board will inform the appropriate official of any State or municipality in which State-chartered depository institutions that have received an exemption are located of any subsequent amendments of the Act (including the implementing provisions of this Part and published interpretations of the Board) which might call for amendment of the law, regulations or official interpretations of the State or municipality.
(e) Revocation of exemption. (1) The Board reserves the right to revoke any exemption if it at any time determines that the laws of a State or municipality do not in fact impose requirements which are substantially similar to those imposed by this Regulation or that there is not in fact
adequate provision for enforcement. (2) Notice of the Board's intention to revoke any exemption previously granted shall be published in the Federal Register and shall be transmitted to the appropriate official of the State or municipality. A period of time will be allowed from the date of publication for the Board to receive written comments from interested persons with respect to the proposed revocation. (3) In the event of revocation of such exemption, notice of such revocation shall be published by the Board in the Federal Register and a copy of such notice shall also be furnished to the appropriate official of the State or municipality and to regulatory authorities specified in section 305(b) of the Act.

## MORTGAGE LOAN DISCLOSURE STATEMENT (cont.)

(Specimen Form)

PART B PURCHASED LOANS
Section I Mortgage loan data relating to residential real property located within the relevant SMSA

Section II Mortgage loan data relating to residential real property located outside the relevant SMSA (or SMSA's)

|  | $\square$ |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |

## nstructions:

1. Data may be rounded to nearest thousands of dollars.
2. If more than one SMSA is involved, the relevant SMSA should be indicated next to the tract number or, preferably, separate pages should be used.
3. If the tract number is duplicated within a SMSA, the county, city or town that uniquely identifies the number should be stated next to the number.
4. Whenever a ZIP code number is permitted to be used, it should be preceded by the letter " $Z$ "
5. If the statement is prepared on the basis of the definition of the relevant SMSA that is more recent than that in effect on the first day of the reporting period, so indicate.
6. Census tract numbers are those appearing on the maps in the Bureau of the Census 1970 PHC(1) series, but computer coding is permissible if explained on the statement.
7. "Multi-family dwellings" means residential dwellings for more than four families.
8. The column "Total Residential Mortgage Loans" should equal the sum of the preceding two columns (except for rounding)
9. This statement must be retained and made available for a period of five years from the last day of the reporting period.
10. If census tract itemization is required, the relevant tract maps should be conveniently made available with the statement.

## Reserves of Member Banks

## Interest on Deposits

The Board of Governors has amended its Regulations D and Q to provide greater flexibility in the issuance by member banks of subordinated notes and debentures that are considered part of the bank's capital structure obligations and believes that it is important for the banking supervisor to scrutinize the condition of the issuing bank prior to such repayment.
Effective July 26, 1976, Regulations D and Q are amended as follows:

1. Section 204.1 of Regulation D is amended as follows:

## Section 204.1-Definitions

(f) Deposits as including certain promissory notes and other obligations. For the purposes of this Part, the term "deposits" also includes a member bank's liability on any promissory note, acknowledgment of advance, due bill, banker's acceptance, or similar obligation (written or oral) that is issued or undertaken by a member bank as a means of obtaining funds to be used in its banking business, except any such obligation that:
(3) (i) bears on its face, in bold-face type, the following: "This obligation is not a deposit and is not insured by the Federal Deposit Insurance Corporation'';
is subordinated to the claims of depositors, is unsecured, and is ineligible as collateral for a loan by the issuing bank and also expressly states said provisions on its face; has an original maturity of at least seven years, or, in the case of an obligation or issue that provides for any type of scheduled repayments of principal, has an average maturity ${ }^{7}$ of at least seven years ${ }^{8}$ and provides that once any such repayment of principal begins, all scheduled repayments shall be made at least annually and the amount repaid in each year is no less than in the prior year; is issued subject to a requirement that no repayment (other than a regularly sched-

[^7]uled repayment already approved by the appropriate Federal bank regulatory agency), including but not limited to a payment pursuant to acceleration of maturity, may be made without the prior written approval of the appropriate Federal bank regulatory agency; ${ }^{9}$ is in an amount of at least $\$ 500$, Except, That the appropriate Federal bank regulatory agency may approve the issuance of an obligation that is less than $\$ 500$ if such lesser amount is necessary (a) to satisfy the preemptive rights of shareholders in the case of a convertible debt obligation, (b) to maintain a ratable unit offering to holders of preemptive rights in the case of an obligation issued exclusively as part of a unit including shares of stock which are subject to such preemptive rights, or (c) to satisfy shareholders' ratable claims in the case of an obligation issued wholly or partially in exchange for shares of voting stock or assets pursuant to a plan of merger, consolidation, reorganization, or other transaction where the issuer will acquire either a majority of such shares of voting stock or all or substantially all of the assets of the entity whose assets are being acquired; and has been approved by the appropriate Federal bank regulatory agency as an addition to the capital structure of the issuing bank; or (ii) meets all of the requirements in the preceding clause except the maturity requirement or the requirement that scheduled repayments shall be in amounts at least equal to those made in a previous year, and with respect to which the appropriate Federal bank regulatory agency has determined that exigent circumstances require the issuance of such obligations without regard to the provisions of this Part; or (iii) was issued or publicly offered before June 30,1970 , with an original maturity of more than two years; or
2. Section 217.1 of Regulation $Q$ is amended as follows:

## Section 217.1-Definitions

(f) Deposits as including certain promissory notes and other obligations. For the purposes of this Part, the term "deposits" also includes a

[^8]member bank's liability on any promissory note, acknowledgment of advance, due bill, or similar obligation (written or oral) that is issued or undertaken by a member bank principally as a means of obtaining funds to be used in its banking business, except any such obligation that:
(3)(i) bears on its face, in bold-face type, the following: "This obligation is not a deposit and is not insured by the Federal Deposit Insurance Corporation',
is subordinated to the claims of depositors, is unsecured, and is ineligible as collateral for a loan by the issuing bank and also expressly states said provisions on its face; has an original maturity of at least seven years, or , in the case of an obligation or issue that provides for any type of scheduled repayments of principal, has an average maturity ${ }^{6}$ of at least seven years ${ }^{7}$ and provides that once any such repayment of principal begins, all scheduled repayments shall be made at least annually and the amount repaid in each year is no less than in the prior year; is issued subject to a requirement that no repayment (other than a regularly scheduled repayment already approved by the appropriate Federal bank regulatory agency), including but not limited to a payment pursuant to acceleration of maturity, may be made without the prior written approval of the appropriate Federal bank regulatory agency; ${ }^{8}$ is in an amount of at least $\$ 500$, Except, That the appropriate Federal bank regulatory agency may approve the issuance of an obligation that is less than $\$ 500$ if such lesser amount is necessary (a) to satisfy the preemptive rights of shareholders in the case of a convertible debt obligation, (b) to maintain a ratable unit offering to holders of preemptive rights in the case of an obligation issued exclusively as part of a unit including shares of stock which are subject to such preemptive rights, or (c) to satisfy shareholders' ratable claims in the case of an obligation issued wholly or partially in exchange for shares of voting stock or assets

[^9]pursuant to a plan of merger, consolidation, reorganization, or other transaction where the issuer will acquire either a majority of such shares of voting stock or all or substantially all of the assets of the entity whose assets are being acquired; and has been approved by the appropriate Federal bank regulatory agency as an addition to the capital structure of the issuing bank; or (ii) meets all of the requirements in the preceding clause except the maturity requirement or the requirement that scheduled repayments shall be in amounts at least equal to those made in a previous year; and with respect to which the appropriate Federal bank regulatory agency has determined that exigent circumstances require the issuance of such obligations without regard to the provisions of this Part; or (iii) was issued or publicly offered before June 30, 1970, with an original maturity of more than two years; or
3. As an incident to these amendments, footnotes are renumbered as follows:
a. In Regulation D ( 12 CFR 204), footnotes 5a, 6,7 , and 8 are renumbered $6,10,11$, and 12 , respectively.
b. In Regulation Q (12 CFR 217), footnotes 5a, $6,6 \mathrm{a}$, and 7 are renumbered $9,10,11$, and 12 , respectively.

In connection with its adoption of the regulatory amendments described herein, the Board has approved issuance of criteria to be applied in evaluating requests by State member banks for approval of new issues of subordinated notes and debentures "as an addition to the capital structure of the issuing bank.', Proposed guideline criteria were released for comment by the Board on July 2, 1975, along with the proposed regulatory amendments, and the Board has revised the proposals based upon its own findings and review of the comments received.

Application of the criteria adopted today is intended to promote the accumulation by debt-issuing State member banks of an adequate cushion of equity capital, protect against excessive concentrations of debt repayment in any one year, and prevent the inclusion of terms in such issues that could be regarded as in conflict with safe and sound banking practices. The Board believes that publication of the criteria will enable banks to better plan their financing alternatives. In applying
these criteria to a proposed issue, the Board will consider a full range of financial and other data.

## Criteria for Evaluating a Subordinated Debt Issue as an Addition to the Capital Structure of a State Member Bank

In evaluating a bank's capacity to issue debt under the following criteria, the Board will take into account the full range of financial and other information available to the Board regarding the applicant. Such indicators and considerations include the recent trend and stability of earnings, impact of unusual income and expense developments on recent earnings, recent acquisitions or mergers through purchase of assets, prospective growth of the bank, quality of management, quality of assets, earnings coverage of loan losses, sensitivity of interest income and expense to changes in market rates, degree of reliance on potentially volatile sources of funds, and the relative strength of earnings of nonbank affiliates or subsidiaries. The bank's need for additional capital and the accessibility of additional equity also will be taken into account.

1. Maximum ratio of debt to equity. The total amount of subordinated notes and debentures outstanding, including the debt proposed to be issued but excluding any debt to be retired out of the proceeds of the new issue, should not exceed 50 percent of a bank's equity capital base at time of issuance of the new debt. ${ }^{1}$ However, banks with significant asset or management problems generally would not be presumed to be entitled to issue debt capital up to the 50 per cent ceiling.
2. Earnings coverage of fixed charges. A State member bank proposing to issue subordinated debt should demonstrate that its recent income record is sufficient to provide abundant assurance of that bank's continuing ability to pay the additional fixed charges out of current earnings. ${ }^{2}$

[^10]3. Retained net income. A State member bank proposing to issue subordinated debt should demonstrate that its recent level of retained net income, viewed in conjunction with intended dividend policy, would exceed annual pro forma amortization on all subordinated notes and debentures by a sufficient margin to assure that bank's ability to replace each debt issue with equity by maturity. ${ }^{3}$
4. Avoidance of debt repayment concentrations. A State member bank proposing to issue subordinated debt should avoid excessive concentration of debt repayment in any one year.
5. Approval of interbank debt transactions. In general, the Board does not intend to approve as an addition to the issuing bank's capital structure a subordinated note or debenture issued by a State member bank directly or indirectly (through a holding company or otherwise) to a banking organization other than its parent bank holding company where that issue, together with other subordinated debt outstanding at that bank and held by such banking organizations, would exceed $\$ 2$ million unless specifically authorized as such an addition by the Board of Governors upon a presentation and finding of compelling circumstances. ${ }^{4}$
6. Covenants in conflict with safe and sound banking practices. No indenture or other contract covering the issuance of a subordinated note or

[^11]debenture by a State member bank shall include any covenants, restrictions, or other terms that are determined by the Board to be inconsistent with safe and sound banking practices. Examples of such terms are those regarded as impairing the ability of the bank to comply with statutory or regulatory requirements regarding disposition of assets or incurrence of additional debt, limiting the ability of the Board or the chartering authority to take any necessary action to resolve a problem bank situation, or unduly interfering with the ability of the bank to conduct normal banking operations.

## Interpretation of Regulation Q

Serial, sinking fund redemption, and amortized issues as capital. On June 16, 1976, the Board amended § 204.1(f)(3) of Regulation D and § 217.1(f)(3) of Regulation $Q$ to permit member banks to issue subordinated notes and debentures with weighted average maturities of at least seven years. When such issues satisfy all of the requirements of those sections and have been approved by the appropriate regulatory agencies, funds obtained from such issues will be regarded as an addition to capital and exempt from deposit treatment. In connection with those amendments, this interpretation is intended to describe more fully the method for the computation of weighted average maturity.

Member banks should compute the weighted average maturity on serial issues, sinking fund issues, and amortized obligations as follows: (1) determine to the nearest month the maturity from the initial offering date of each set of notes maturing or to be called on the same day, or of each scheduled repayment in the case of an amortized issue, and multiply that maturity by the amount to mature or be redeemed or repaid on that day; (2) sum the weighted maturities computed in (1) above for the entire issue; and (3) divide the sum calculated in (2) above by the total amount of the issue, thus obtaining the average maturity. The average maturity must in all cases be equal to or greater than seven years unless specific authorization has been obtained from the appropriate Federal bank regulatory agency.
As an example of the procedure described above, assume that on July 31, 1976, Bank X
obtains approval from the Board and issues a $\$ 10$ million sinking fund issue. $\$ 1$ million of the notes are to be called on August 1, 1979, and $\$ 1$ million per year thereafter until all remaining notes are called on August 1, 1986. The table below summarizes Bank X's issue and illustrates the calculation of average maturity.
(1)
(2)
(3)

Maturity Amount Maturing Weighted Maturity in Years (\$ million)
(1) $\times(2)$

| 1 | 0 | 0 |
| ---: | ---: | ---: |
| 2 | 0 | 0 |
| 3 | 1 | 3 |
| 4 | 1 | 4 |
| 5 | 1 | 5 |
| 6 | 1 | 6 |
| 7 | 1 | 7 |
| 8 | 1 | 8 |
| 9 | $\frac{3}{10}$ | 9 |
| 10 | $\frac{30}{72}$ |  |

$$
\begin{aligned}
& \text { Average Maturity }= \\
& \begin{aligned}
\text { Sum of Weighted Maturities } & =\frac{72}{10} \\
\text { Amount of issue } & =7.2 \text { years }
\end{aligned}
\end{aligned}
$$

Hence, Bank X's issue has an "average maturity of at least 7 years," and satisfies the provisions of the Regulation.

## Rules Regarding Delegation of Authority

The Board of Governors has amended its Rules Regarding Delegation of Authority to delegate to the Secretary of the Board authority to conform its published rules to administrative changes in the structure of the Board's staff.

Effective June 23, 1976, Section 265.2(a)(16) is added to read as follows: -

## Section 265.2-Specific

Functions Delegated to Board
Employees and to Federal Reserve Banks
(a) The Secretary of the Board (or, in his absence, the Acting Secretary) is authorized:
(16) Under the provisions of Section 11 (i) of the Federal Reserve Act ( 12 U.S.C. 248(i)) to conform references to administrative positions or units in outstanding rules and regulations of the Board to changes in the administrative structure of the Board.

## Interpretation of Regulation D

Cash Items in the Process of Collection. As a result of involvement in automated arrangements in which payment information is contained on magnetic tape, paper listings, etc., rather than checks, a number of member banks have inquired as to the proper reserve requirement treatment for payroll, Federal recurring payments, and other items received for credit to a customer's account in such arrangements.

Where payment information is sent to a member bank prior to the date credit is passed for the item, some banks have been crediting their customers on the date prior to that payment date to ensure that such deposit is available to the depositor at opening of business on the payment date. Such procedure, however, results in an increase in reported member bank deposits even though the member bank does not itself receive credit for the funds until the next day. Some member banks have inquired as to whether the account "cash items in the process of collection' may be debited in an amount equal to the amount credited on the date prior to the payment date.

Section 19(g) of the Federal Reserve Act (12 U.S.C. 465) permits a member bank to deduct "cash items in the process of collection"' as defined by the Board. Section 204.2(b) of Regulation D provides that cash items may be deducted from gross demand deposits, and $\S 204.1(\mathrm{~h})(3)$ defines cash items in the process of collection as "those customarily cleared or collected by banks as cash items.' The deduction was intended, in part, to avoid the "double counting'" by member banks of their deposits subject to reserves. Furthermore, due to the spread of automated arrangements, it has become customary to treat such automated payments as "cash items." Because double counting would arise in circumstances described above, and in view of the fact that automated arrangement are now customary practices, the Board believes that banks are permitted to debit the account 'cash items in the process of collection' in such amounts.

## Order Granting Temporary Suspension of Early Withdrawal Penalty

The Board has suspended temporarily the Regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks ( 12 CFR 217.4(d)) for depositors affected by the collapse of the Teton Dam on June 5, 1976. On June 6, 1976, the President, pursuant to Section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141), designated the following Idaho counties a major disaster area: Bingham, Bonneville, Fremont, Jefferson, and Madison. The Board regards the President's action as recognition by the Federal Government that a disaster of major proportions has occurred. The President's designation enables victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional measure of assistance to flood victims by temporarily suspending the Regulation $Q$ early withdrawal penalty. ${ }^{1}$ The Board's action permits a member bank to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has, in fact, suffered property or other financial loss in the disaster area as a result of the collapse of the Teton Dam. A member bank should obtain from a depositor seeking to withdraw a time deposit pursuant to this action a signed application describing fully the disaster-related loss. This application should be approved and certified by an officer of the bank. This action will be retroactive to June 6, 1976, and will remain in effect until 12 midnight December 31, 1976.

Section 19(j) of the Federal Reserve Act (12 U.S.C. 371 b ) provides that no member bank shall pay any time deposit before maturity except upon such conditions and in accordance with such rules and regulations as may be prescribed by the Board. Pursuant to $\S 19(\mathrm{j})$ the Board has determined it to be in the overriding public interest to suspend the penalty provision prescribed in $\S 217.4(\mathrm{~d})$ of Regulation $Q$ for the benefit of depositors suffering disaster-related losses within those counties of the State of Idaho officially designated a major disaster area by the President. This action will be effective from June 6, 1976, until 12 midnight December

[^12]31, 1976. The Board, in granting this temporary suspension, encourages member banks to permit penalty-free withdrawal before maturity of time deposits for depositors who have suffered disas-ter-related losses within the designated disaster area.

In view of the urgent need to provide immediate assistance to relieve the financial hardship being suffered by persons directly affected by the severe damage and destruction occasioned by the collapse of the Teton Dam, the Board finds that good cause exists for dispensing with notice and public participation referred to in section 553(b) of Title 5 of the United States Code with respect to this action and that public procedure with regard to this action would be contrary to the public interest. Because of the need to provide assistance as soon as possible and because the Board's action relieves a restriction, the Board finds that there is good cause to make the action effective immediately.

By order of the Board of Governors, June 25, 1976.

## Credit by Banks for the Purpose of Purchasing or Carrying Margin Stocks

Pursuant to the authority of Section 7 of the Securities Exchange Act of 1934 (15 U.S.C. 78g), the Board of Governors has adopted a revised Federal Reserve Form U-1, "Statement of Purpose of a Stock-Secured Extension of Credit by a Bank," effective September 1, 1976. ${ }^{1}$ This form is for use by banks in fulfilling certain requirements of Part 221 of Title 12 (Regulation U).

On February 7, 1968, the Board published a notice in the Federal Register (33 F.R. 2702) announcing, inter alia, that, effective March 11, 1968, Section 221.3(a) of Regulation $U$ is amended to add a requirement that a bank shall obtain and keep for a prescribed period in connection with any stock-secured loan, on a form prescribed by the Board, a statement relating to the purpose of the loan by (i) the customer and (ii) the officer extending the credit. The Board commented that the changes in Section 221.3(a) of Regulation $U$ were designed to make uniform the evidentiary requirements of such section.

Pursuant to and simultaneously with the notice of amendment to Section 221.3(a), the Board

[^13]published in the Federal Register on February 7, 1968 ( 33 F.R. 2721), a notice of adoption, effective March 11, 1968, of, inter alia, Federal Reserve Form U-1, "Statement of Purpose of the Proceeds of a Stock-Secured Extension of Credit by a Bank,'" for use by banks in implementing and fulfilling the requirements of that Section.

In 1969, the Board adopted an amendment to Section 221.3(a), effective July 8, 1969, to reduce the time required for retaining Federal Reserve Form U-1 ( 34 F.R. 9203, June 11, 1969) and adopted a revised Form U-1 to reflect such change (34 F.R. 12330).

Since the last revision of Federal Reserve Form $\mathrm{U}-1$ in 1969, substantial experience has been gained by banks, law enforcement agencies and System staff in the use of the form. Such experience leads to the conclusion that certain revisions of Form U-1 are necessary and appropriate, if it is to continue to serve as a useful evidentiary tool in maintaining compliance with provisions of Regulation U.

Generally, the revised Form U-1 will embody the following changes:
(1) The addition of caveats and definitional aids to prospective borrowers respecting their potential criminal liability under various statutes and the provisions of the Board's Regulation X. The purpose of Regulation X, which was adopted by the Board on November 1, 1971, is to prevent infusion into United States securities markets of unregulated credit obtained in circumvention of the provisions of the Board's margin regulations, or by borrowers falsely certifying the purpose of a loan, or otherwise willfully and intentionally evading the provisions of those regulations.
(2) A revision of the format to provide increased assistance to law enforcement agencies and bank examiners by requiring, inter alia, a borrower to specifically state whether or not a proposed stocksecured extension of credit is for the purpose of purchasing or carrying margin stock.
(3) Inclusion of a requirement for affirmative representation by borrowers respecting the integrity of the collateral offered as security for an extension of credit, and a requirement that a duly authorized officer of the lending bank shall undertake, in addition to other required procedures, an examination of the physical aspects of the securities offered as collateral and perform such validation procedures with respect thereto as are mandated by bank policy and governmental regulations.

## Equal Credit Opportunity Truth in Lending

The Board of Governors has amended its Regulations B and Z to designate the Director and other officials of the Office of Saver and Consumer Affairs as officials duly authorized to issue, at their discretion, interpretations of Regulations B and Z.

1. Effective July 30, 1976, 12 CFR Part 202 is amended by revising $\S 202.13(\mathrm{~b})$, redesignating § 202.13(c) as § 202.13(d) and adding a new § 202.13(c). Section 202.13 reads as follows:

Section 202.13-Penalties and Liabilities
(b) Section 706(e) relieves a creditor from civil liability resulting from any act done or omitted in good faith in conformity with any rule, regulation or interpretation by the Board of Governors of the Federal Reserve System, or with any interpretation or approval issued by a duly authorized official or employee of the Federal Reserve System, notwithstanding that after such act or omission has occured, such rule, regulation or interpretation is amended, rescinded or otherwise determined to be invalid for any reason.
(c)(1) Any request for formal Bosd interpretation or official staff interpretation of Regulation B must be addressed to the Director of the Office of Saver and Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. Each request for interpretation must contain a complete statement, signed by the person making the request or a duly authorized agent, of all relevant facts of the transaction or credit arrangement relating to the request. True copies of all pertinent documents must be submitted with the request. The relevance of such documents must, however, be set forth in the request and the documents must not merely be incorporated by reference. The request must contain an analysis of the bearing of the facts on the issues and specifying the pertinent provisions of the statute and regulation. Within fifteen business days of receipt of the request, a substantive response will be sent to the person making the request or an acknowledgement will be sent which sets a reasonable time within which a substantive response will be given.
(2) Any request for reconsideration of an official staff interpretation of Regulation B must be addressed to the Secretary, Board of Governors of
the Federal Reserve System, Washington, D.C. 20551, within thiry days of the publication of such interpretation in the Federal Register. Each request for reconsideration must contain a statement setting forth in full the reasons why the person making the request believes reconsideration would be appropriate, and must specify and discuss the applicability of the relevant facts, statute and regulations. Within fifteen business days of receipt of such request for reconsideration, a response granting or denying the request will be sent to the person making the request, or an acknowledgement will be sent which sets a reasonable time within which such response will be given.
(3) Pursuant to §706(e) of the Act, the Board has designated the Director and other officials of the Office of Saver and Consumer Affairs as officials "duly authorized" to issue, at their descretion, official staff interpretations of this Part. This designation shall not be interpreted to include authority to approve particular creditors' forms in any manner.
(4) The type of interpretation issued will be determined by the Board and the designated officials by the following criteria:
(i) Official Board interpretations will be issued upon those requests which involve potentially controversial issues of general applicability dealing with substantial ${ }^{\circ}$ ambiguities in this Part and which raise significant policy questions.
(ii) Official staff interpretations will be issued upon those requests which, in the opinion of the designated officials, require clarification of technical ambiguities in this Part or which have no significant policy implications.
(iii) Unofficial staff interpretations will be issued where the protection of $\S 706(\mathrm{e})$ of the Act is neither requested nor required, or where time strictures require a rapid response.
(d) [Redesignated.]
2. Effective July 30, 1976, 12 CFR Part 226 is amended by revising $\S 226.1$ (c) and adding a new § $226.1(\mathrm{~d})$. Section 226.1 reads as follows:

Section 226.1-
Authority, Scope, Purpose, Etc.
(c) Penalties and liabilities. Section 112 of the Act provides criminal liability for willful and knowing failure to comply with any requirement imposed under the Act and this Part. Section 134 provides for criminal liability for certain fraudulent
activities related to credit cards. Section 130 provides for civil liability in individual or class actions for any creditor who fails to comply with any requirement imposed under Chapter 2 or Chapter 4 of the Act and the corresponding provisions of this Part. Section 130 also provides creditors a defense against civil and criminal liability for any act done or omitted in good faith in conformity with the provisions of this Part or any interpretation thereof by the Board, or with any interpretations or approvals issued by a duly authorized official or employee of the Federal Reserve System, notwithstanding that after such act or omission has occured, such rule, regulation or interpretation is amended, rescinded or otherwise determined to be invalid for any reason. Section 130 further provides that a multiple failure to disclose in connection with a single account shall permit but a single recovery. Section 115 provides for civil liability for an assignee of an original creditor where the original creditor has violated the disclosure requirements and such violation is apparent on the face of the instrument assigned, unless the assignment is involuntary. Pursuant to § 108 of the Act, violations of the Act or this Part constitute violations of other Federal laws which may provide further penalties.
(d) Issuance of interpretations (1) Any request for formal Board interpretation or official staff interpretation of Regulation Z must be addressed to the Director of the Office of Saver and Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. Each request for interpretation must contain a complete statement, signed by the person making the request or a duly authorized agent, of all relevant facts of the transaction or credit arrangement relating to the request. True copies of all pertinent documents must be submitted with the request. The relevance of such documents must, however, be set forth in the request and the documents must not merely be incorporated by reference. The request must contain an analysis of the bearing of the facts on the issues and it must specify the pertinent provisions of the statute and regulation. Within fifteen business days of receipt of the request, a substantive response will be sent to the person making the request or an acknowledgement will be sent which sets a reasonable time within which a substantive response will be given.
(2) Any request for reconsideration of an official staff interpretation of Regulation Z must be addressed to the Secretary, Board of Governors of
the Federal Reserve System, Washington, D.C. 20551, within thirty days of the publication of such interpretation in the Federal Register. Each request for reconsideration must contain a statement setting forth in full the reasons why the person making the request believes reconsideration would be appropriate, and must specify and discuss the applicability of the relevant facts, statute and regulations. Within fifteen business days of receipt of such request for reconsideration, a response granting or denying the request will be sent to the person making the request, or an acknowledgement will be sent which sets a reasonable time within which such response will be given.
(3) Pursuant to $\S 130(f)$ of the Act, the Board has designated the Director and other officials of the Office of Saver and Consumer Affairs as officials "duly authorized" to issue, at their discretion, official staff interpretations of this Part. This designation shall not be interpreted to include authority to approve particular creditors' forms in any manner.
(4) The type of interpretation issued will be determined by the Board and the designated officials by the following criteria:
(i) Official Board interpretations will be issued upon those requests which involve potentially controversial issues of general applicability dealing with substantial ambiguities in this Part and which raise significant policy questions.
(ii) Official staff interpretations will be issued upon those requests which, in the opinion of the designated officials, require clarification of technical ambiguities in this Part or which have no significant policy implications.
(iii) Unofficial staff interpretations will be issued where the protection of $\S 130(\mathrm{f})$ of the Act is neither requested nor required, or where time strictures require a rapid response.

## Securities Credit Transactions

The Board of Governors has amended its Regulations $G, T$, and $U$ to revise the criteria for inclusion and continued inclusion on the List of OTC Margin Stocks in view of significant changes which have occurred in the over-the-counter (OTC) market.

Effective August 6, 1976 sections 207.5, 220.4, and 221.4, are amended as follows:

## Section 207.5-Supplement

*     *         *             *                 * 

(d) Requirements for inclusion on list of OTC margin stock. Except as provided in subparagraph (4) of § $207.2(f)$, such stock shall meet the requirements that:
(2) Four or more dealers stand willing to, and do in fact, make a market in such stock including making regularly published bona fide bids and offers for such stock for their own accounts, or the stock is registered on a securities exchange that is exempted by the Securities and Exchange Commission from registration as a national securities exchange pursuant to section 5 of the Securities Exchange Act of 1934 (15 U.S.C. 78e).
(3) There are 1,200 or more holders of record, as defined in SEC Rule 12g5-1 (17 C.F.R. § $240.12 \mathrm{~g} 5-1$ ), of the stock who are not officers, directors, or beneficial owners of 10 per cent or more of the stock, or the average daily trading volume of such stock, as determined by the Board, is at least 500 shares.
(9) The minimum average bid price of such stock, as determined by the Board, is at least $\$ 5$ per share, and
(e) Requirements for continued inclusion on list of OTC margin stock. Except as provided in subparagraph (4) of § $207.2(\mathrm{f})$, such stock shall meet the requirements that:
(3) There continue to be 800 or more holders of record, as defined in SEC Rule 12g5-1 (17 C.F.R. § $240.12 \mathrm{~g} 5-1$ ), of the stock who are not officers, directors, or beneficial owners of 10 per cent or more of the stock, or the average daily trading volume of such stock, as determined by the Board, is at least 300 shares
(8) The minimum average bid price of such stock, as determined by the Board, is at least $\$ 3$ per share, and

Section 220.2-Supplement
(d) Requirements for inclusion on list of OTC margin stock. Except as provided in subparagraph (4) of § 221.3(d), OTC margin stock shall meet the requirements that:
(2) Four or more dealers stand willing to, and do in fact, make a market in such stock including making regularly published bona fide bids and offers for such stock for their own accounts, or the stock is registered on a securities exchange that is exempted by the Securities and Exchange Commission from registration as a national securities exchange pursuant to section 5 of the Securities Exchange Act of 1934 ( 15 U.S.C. 78 e ),
(3) There are 1,200 or more holders of record, as defined in SEC Rule 12g5-1 (17 C.F.R. § 240.12g5-1), of the stock who are not officers, directors, or beneficial owners of 10 per cent or more of the stock, or the average daily trading volume of such stock, as determined by the Board, is at least 500 shares.
(9) The minimum average bid price of such

## Bank Holding Company and Bank Merger Orders Issued by the Board of Governors

stock, as determined by the Board, is at least $\$ 5$ per share, and
(e) Requirements for continued inclusion on list of OTC margin stock. Except as provided in subparagraph (4) of § $221.3(\mathrm{~d})$, OTC margin stock shall meet the requirements that:
(3) There continue to be 800 or more holders of record, as defined in SEC Rule 12g5-1 (17 C.F.R. § $240.12 \mathrm{~g} 5-1$ ), of the stock who are not officers, directors, or beneficial owners of 10 per cent or more of the stock, or the average daily trading volume of such stock, as determined by the Board, is at least 300 shares
(8) The minimum average bid price of such stock, as determined by the Board, is at least $\$ 3$ per share, and

## Orders Under Section 3 of Bank Holding Company Act

Bankshares of Hawley, Inc., Hawley, Minnesota

Bankshares of Hawley, Inc., Hawley, Minnesota, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 95.7 per cent of the voting shares of State Bank of Hawley, Hawley, Minnesota ("Bank').

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S 3$ (b) of the Act. The time for filing comments and views has expired, and the Board has considered the has expired, and the Board has considered the
application and all comments received in light of the factors set forth in $\S 3$ (c) of the Act (12 U.S.C. § 1842(c)).

\author{

## Ordering Denying

 <br> Formation of Bank Holding Company} for interested persons to submit comments and

Applicant is a nonoperating corporation organized for the purpose of becoming a bank holding company through acquisition of Bank. Bank, with deposits of $\$ 8$ million, ${ }^{1}$ representing one tenth of 1 per cent of the total commercial bank deposits in Minnesota, is the twelfth largest of 23 banking organizations within the relevant banking market. ${ }^{2}$ Bank holds 1.62 per cent of the total commercial bank deposits in this market. Inasmuch as the proposal represents merely a restructuring of Bank's ownership, the acquisition of Bank by Applicant would have no adverse effects on competition within the relevant banking market.

The financial and managerial resources and prospects of the newly formed Applicant are generally dependent upon these conditions as they relate to Bank. However, Applicant proposes to assume debt incurred by its principals. The record indicates that Bank is in need of additional capital,

[^14]and although Applicant proposes to increase Bank's capital, it appears that the servicing of Applicant's substantial acquisition debt over a 12-year period through Bank's dividends can be expected to further weaken Bank's capital position.

In addition, it appears that the two individuals who would own 78 per cent of the outstanding shares of Applicant would not be in a sufficiently strong financial position to provide assistance to Bank in the event problems arose in servicing the acquisition debt or in meeting other unforeseen financial needs. In view of the limited financial flexibility of Applicant and its two principals, and the strain that would be placed on Bank's capital position as a result of Applicant's debt servicing requirements, the Board is of the opinion that considerations relating to the financial aspects of Applicant's proposal weigh against approval of the application.

Applicant indicates that banking services currently rendered the community by Bank will remain unchanged upon consummation of the proposal. Accordingly, considerations relating to the convenience and needs of the community to be served do not outweigh the adverse findings with respect to the financial factors involved in Applicant's proposal.

On the basis of all the circumstances of this case and the facts of record, the Board concludes that the acquisition debt involved in this proposal presents adverse circumstances bearing on the financial condition and prospects of Applicant and Bank. Such adverse factors are not outweighed by any procompetitive effects or by benefits to the convenience and needs of the communities to be served. Accordingly, it is the Board's judgment that approval of the application to become a bank holding company would not be in the public interest and the application should be denied.

On the basis of the record, the application is denied for the reasons summarized above.

By order of the Board of Governors, effective June 25, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, and Lilly. Absent and not voting: Chairman Burns and Governors Jackson and Partee.
[SEAL] Assistant Secretary of the Board.

Benson Bancshares, Inc., Benson, Minnesota

Order Suspending Further<br>Consideration of Application to<br>Become A Bank Holding Company

Benson Bancshares, Inc., Benson, Minnesota, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company through acquisition of 88 per cent or more of the voting shares of Swift County Bank, Benson, Minnesota.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S 3(b)$ of the Act. During the course of its consideration of the instant application, the Board has become aware of certain facts that raise questions whether provisions of the Securities Exchange Act of 1934 (15 U.S.C. §78(a) et seq.) were fully observed in the acquisition of shares of Bank by the principals of Applicant. These questions may have a bearing on the Board's evaluation of the managerial resources of Applicant and Bank. Accordingly, the Board has determined that advice from the Securities and Exchange Commission, as to whether certain facts in the record on the instant application give rise to such a violation, is necessary to make a proper assessment of the managerial resources of Applicant and Bank and is therefore necessary to the Board's ultimate decision of the application.

Accordingly, further consideration of the application is hereby suspended pending receipt of the views of the Securities and Exchange Commission which today have been solicited.

By order of the Board of Governors, effective June 7, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Governor Wallich.
(Signed) Griffith L. Garwood,
[SEAL] Assistant Secretary of the Board.
El Dorado Bancshares, Inc.,
Prairie Village, Kansas

## Order Approving Formation of

Bank Holding Company
El Dorado Bancshares, Inc., Prairie Village, Kansas, has applied for the Board's approval under
§ 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 98 per cent or more of the voting shares of Citizens State Bank of El Dorado, El Dorado, Kansas ('‘Bank').

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S 3(\mathrm{~b})$ of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3(\mathrm{c})$ of the Act ( 12 U.S.C. § $1842(\mathrm{c}))$.

Applicant is a corporation organized under the laws of the State of Kansas for the purpose of becoming a bank holding company through the acquisition of Bank. Bank (with deposits of $\$ 19$ million) is the 123 rd largest of 614 commercial banks operating in the State of Kansas, and controls approximately .2 per cent of the total deposits held by commercial banks in that State. ${ }^{1}$ In the relevant banking market (approximated by Butler County, Kansas), Bank is the second largest of 13 commercial banks operating in the market and controls approximately 15.1 per cent of market deposits. ${ }^{2}$ Through three other one-bank holding companies, certain principals of Applicant also have interests in three banks in Kansas. However, the three other banks in which principals of Applicant are involved are located in different banking markets and do not compete with Bank to any significant extent. Furthermore, inasmuch as the present proposal represents a corporate reorganization of the ownership of Bank, and Applicant has no present banking subsidiaries, it appears that the acquisition of Bank by Applicant would not have any significant adverse effect upon either existing or potential competition within the relevant market. Accordingly, on the basis of record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial condition, managerial resources, and future prospects of Applicant are entirely dependent upon the operation of Bank, and are regarded as being satisfactory. Although Applicant will incur acquisition debt in connection with this

[^15]proposal, it appears that Applicant will be able to service this debt without impairing the financial condition of Bank during that period. In addition, Applicant's principals have demonstrated their ability to service the debt of the three other onebank holding companies under their control without impairing the capital of those companies' respective subsidiary banks. Accordingly, the Board concludes that considerations relating to the banking factors are regarded as being consistent with approval of the application. Although consummation of the transaction would effect no immediate changes in the services that are being offered by Bank, the Board regards considerations relating to the convenience and needs of the community to be served as being consistent with approval. It is the Board's judgment that consummation of the holding company formation would be in the public interest and that the application to acquire Bank should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective June 14, 1976.

[^16](Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

Fiduciary Investment Company of New Jersey, Newark, New Jersey

## Order Approving <br> Formation of Bank Holding .Company

Fiduciary Investment Company of New Jersey, Newark, New Jersey ('‘Applicant'’), has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act ('Act"') (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 50.2 per cent or more of the voting shares of Security National Bank of New Jersey, Newark, New Jersey ('‘Bank’’).

Notice of the application, affording opportunity
for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered all comments received, including those of two stockholders of Bank, Messrs. Joseph Dunn and Joseph McCormack ('‘Protestants'’), certain directors of Bank, and the Comptroller of the Currency ('‘Comptroller''), in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant was formed for the purpose of becoming a bank holding company through the acquisition of shares of Bank. Upon acquisition of those shares, Applicant would control the 107th largest banking organization in New Jersey with total deposits of approximately $\$ 26.1$ million, representing 0.1 of 1 per cent of total deposits held by commercial banks in the State. ${ }^{1}$ Bank is the 22nd largest bank in the Greater Newark banking market ${ }^{2}$ and holds slightly less than 0.6 of 1 per cent of the deposits held by commercial banks in that market. Although Applicant is a registered investment adviser, it presently manages only the account of one of its shareholders, with a portfolio of about $\$ 4$ million. ${ }^{3}$ In view of this fact, and since Applicant has no subsidiaries, it appears that consummation of the proposal would have no adverse effect on existing or potential competition or the concentration of banking resources in any relevant area. Accordingly, the Board concludes that competitive considerations are consistent with approval of the application.

Although Bank's capital base and liquidity appear good, Bank has an immediate need for experienced and capable management. Until such management is provided, Bank's overall condition and future prospects cannot be regarded as satisfactory. Applicant will provide Bank with capable management that has considerable successful experience in trust department operations and that will greatly expand Bank's trust and fiduciary services. In the Board's judgment, it appears that Applicant has the resources to bring about its

[^17]proposed expansion of Bank's trust department services and that the income from this expansion should over time improve Bank's profitability, which has been poor in recent years, and future prospects. In addition, Applicant has stated that it will engage as soon as possible a senior officer to supervise Bank's commercial banking operations and it would appear that Applicant possesses the resources to attract such additional management. In the Board's judgment, approval of this application should bring about an immediate improvement in Bank's managerial resources and will improve Bank's future prospects. Accordingly, it is the Board's judgment that considerations relating to banking factors lend weight toward approval of the application.

It does not appear that the convenience and needs of the community to be served are not being currently met. Applicant will not alter Bank's present commercial banking services but will place emphasis on greatly expanding Bank's trust and fiduciary services. Considerations relating to the convenience and needs of the community to be served are thus consistent with approval of the application.

As noted above, the Board has received comments from several parties with respect to this application. The Comptroller has recommended approval in view of Bank's current lack of management and ownership direction. Ten of Bank's twelve directors have also recommended approval in view of Bank's management problem.

Protestant Dunn, who died on May 22, 1976, requested the Board to consider allegations made by him in a lawsuit charging Applicant and its officers with having violated various provisions of Federal securities laws and regulations issued thereunder in their attempt to acquire control of Bank. ${ }^{4}$ In an opinion issued May 20, 1976, the United States District Court of the District of New Jersey ruled in favor of Applicant and its principals on all issues raised by Protestant Dunn with one exception: the Court determined that Applicant's failure to include in its tender offer materials the amount of funds contributed by certain of its investors was a material omission. ${ }^{5}$ The Court thus directed Applicant to amend its tender offer to the

[^18]shareholders of Bank to indicate these additional facts. The Board regards the Court's decision as being dispositive of Protestant Dunn's specific objections regarding violations of Federal securities laws and regulations and is of the opinion that the Court's decision and other information of record on this issue does not reflect adversely upon Applicant's managerial resources.

Protestant Dunn's other primary objection was that Applicant had failed to disclose its controlling ownership. In particular, Protestant Dunn contended that Applicant would not, in fact, be controlled by its president and executive vice president, who own the majority of Applicant's voting stock and who have the right to elect a majority of Applicant's board of directors. Protestant Dunn contended, without any documented support, that one or more of several institutions, including specifically several foreign institutions, that have contributed almost all of Applicant's capital in return for nonvoting stock, or one or more undisclosed owners of such institutions, would be controlling or have the ability to control Applicant and Bank. Protestant McCormack has also expressed similar concerns. It is clear from the record of this application that none of Applicant's passive investors will be able to control Applicant by reason of his ownership of nonvoting stock. In addition, it appears from the record that there are no agreements between Applicant and its passive investors, or any beneficial owner of any such investor, relating to the control of Applicant or Bank. This issue was also raised by Protestant Dunn in the above-mentioned securities litigation, wherein, after exhaustive depositions, the Court found that " $[t]$ here is no demonstration that [Applicant] or its management is or will be in any way dominated by, or is the unthinking tool of, a foreign entity. ${ }^{\prime 6}$ On the basis of the preceding and other information in the record of this application, the Board is of the opinion that Applicant will not be controlled by any of its passive investors. Additionally, the Board notes that should any evidence of control by Applicant's passive investors develop in the future, the Board may order a controlling influence proceeding pursuant to § 2(a)(2)(C) of the Act (12 U.S.C. § 1841(a) (2)(C)). ${ }^{7}$

[^19]With regard to Applicant's stated intent to emphasize trust activities upon acquiring control of Bank, Protestant McCormack has questioned Applicant's ability to attract sufficient trust accounts to make this type of banking profitable in view of Bank's limited current involvement in trust services. The Board is of the view that the experience and success of Applicant's officers in the trust field justifies the conclusion that they are capable of significantly expanding Bank's trust business. While Protestant McCormack expressed other doubts concerning Applicant's managerial resources, Bank's profitability as a subsidiary of Applicant, and the potential responsiveness of Applicant to the community to be served, the Board believes that Applicant's managerial resources are satisfactory, that Bank's profitability should improve under Applicant's management and that convenience and needs considerations are consistent with approval. It is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons set forth above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York pursuant to delegated authority.

By order of the Board of Governors, effective June 14, 1976.

Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.
(Signed) Griffith L. Garwood, [SEAL] Assistant Secretary of the Board.

[^20]Harlan National Company, Harlan, Iowa

## Order Approving Reconsideration

Harlan National Company, Harlan, Iowa, has requested reconsideration of the Order of October 31, 1975 (40 Federal Register 52440), whereby the Board of Governors denied the application of Harlan National Company, pursuant to section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)), to become a bank holding company through acquisition of 98.2 per cent of the voting shares of The Harlan National Bank, Harlan, Iowa, and declared moot Harlan's application, pursuant to section $4(\mathrm{c})(8)$ of the Bank Holding Company Act ( 12 U.S.C. § 1843(c)(8)), for permission to acquire all of the voting shares of Bank Insurance Agency, Harlan, Iowa.

The request for reconsideration is filed pursuant to section $262.3(\mathrm{~g})(5)$ of the Board's Rules of Procedure, which provides that the Board will not grant any request for reconsideration "unless the request presents relevant facts that, for good cause shown, were not previously presented to the Board, or unless it otherwise appears to the Board that reconsideration would be appropriate." The Board finds that the request for reconsideration presents relevant facts or issues which appear appropriate in the public interest for the Board to consider. Accordingly, the request for reconsideration is hereby approved.

In order to facilitate such consideration, comments and views regarding the proposed acquisition may be filed with the Board not later than July 11, 1976. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application, as supplemented by Applicant's request for reconsideration, may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

By the Board of Governors, effective June 11, 1976.

[^21]Sierra Petroleum Co., Inc.
and United Investments Corp., Wichita, Kansas

## Order Approving Formation of Bank Holding Company and Merger of Bank Holding Companies

As part of a corporate reorganization involving Sierra Petroleum Co., Inc., Wichita, Kansas ('Sierra'), a registered bank holding company, United Investments Corp., Wichita, Kansas ("United'), a new corporation, has applied for the Board's approval under $\S 3(\mathrm{a})(1)$ of the Bank Holding Company Act ("the Act") (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through the indirect acquisition of 87.1 per cent of the voting shares of United American State Bank \& Trust Company, Wichita, Kansas ("Bank"). The subject shares of Bank are presently owned by Sierra. United proposes to become a bank holding company for only a short period of time as a result of the exchange of 92.9 per cent of the outstanding common shares of Sierra for an equivalent number of shares of the common stock of United. Immediately after this exchange of stock, United will merge with and into Sierra, with Sierra being the surviving corporation in the merger. In connection with this proposal, Sierra has also applied for the Board's approval, pursuant to § 3(a)(5) of the Act, to merge with United under the charter and title of Sierra.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

United is a nonoperating corporation that was organized for the sole purpose of becoming a bank holding company for a short period of time in order to facilitate a reorganization of the ownership of Sierra. The proposal was initiated by a group of companies and individuals owning, in the aggregate, 92.9 per cent of Sierra's voting stock. The companies and individuals, collectively referred to as the Graham-Michaelis interests, control or own slightly more than 2.5 million of Sierra's approximately 2.7 million outstanding shares. Under the terms of the merger of United into Sierra, the Graham-Michaelis interests will be issued shares of Sierra stock in the exact amount which they
held prior to the initial exchange of shares with United (except that one shareholder, Mr. W. A. Michaelis, Jr., will receive 10 additional shares in exchange for the initial 10 shares issued to him by United). Sierra's present 3,420 minority shareholders, who own $192,585.25$ shares, will be offered two dollars per share for their stock upon the surrender of their shares to Sierra. ${ }^{1}$

Sierra controls only one bank. ${ }^{2}$ Bank is the 60th largest of the 614 banks in Kansas and holds slightly more than 0.3 per cent of the total commercial bank deposits in the State. ${ }^{3}$ Bank, with deposits of about $\$ 28$ million, is the ninth largest of 28 competing banks in the relevant banking market, which is approximated by the boundaries of Sedwick County, Kansas. Inasmuch as neither United nor Sierra has any other subsidiary bank, and since the proposal represents merely a restructuring of Bank's ownership, neither the temporary acquisition of Bank by United, nor the subsequent merger of United with Sierra, would have any adverse effects on competition within the area served by Bank. Accordingly, it is concluded that competitive considerations are consistent with approval of the application.

The financial and managerial resources ${ }^{4}$ of Sierra and Bank are regarded as satisfactory and the future prospects of each appear favorable. Neither United nor Sierra will incur debt incident to the subject proposal. Accordingly, banking factors are regarded as being consistent with approval. Although consummation of the transaction would have no immediate effect on the area's

[^22]banking needs, considerations relating to the convenience and needs of the communities to be served are consistent with approval of the applications. Therefore, it is the Board's judgment that the proposed acquisition and subsequent merger are in the public interest and should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be made (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective June 7, 1976.

Voting for this action: Chairman Burns and Gover-
nors Gardner, Coldwell, Jackson, Partee, and Lilly.
Absent and not voting: Governor Wallich.
(Signed) Griffith L. Garwood, [sEAL] Assistant Secretary of the Board.

American Affiliates, Inc.,
South Bend, Indiana

## Order Approving Retention and Acquisition of Bank Shares

American Affiliates, Inc., South Bend, Indiana a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act ( 12 U.S.C. § 1842(a)(3)) to retain 3.83 per cent of the voting shares of American National Bank and Trust Company of South Bend, South Bend, Indiana ("Bank") and to acquire an additional 3.74 per cent of the voting shares of Bank.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § $3(\mathrm{c}$ ) of the Act ( 12 U.S.C. 1842(c)).

Applicant acquired 42.5 per cent of the shares of Bank in March of 1966. After January 1, 1971, Applicant acquired an additional 3.83 per cent of

Bank's shares without prior Board approval. ${ }^{1}$ Applicant now proposes to retain those shares, as well as acquire an additional 3.74 per cent of Bank's shares. Upon consummation of the subject proposal, Applicant would control slightly more than 50 per cent of Bank's total outstanding shares. The subject applications are part of a series of steps that Applicant proposes to take in order to acquire control of all of the shares of Bank. With Bank as its sole subsidiary, Applicant is the 38th largest banking organization in Indiana with 0.5 per cent of the total deposits in commercial banks in the State.

Bank holds deposits of approximately $\$ 82.4$ million, ${ }^{2}$ representing 9.9 per cent of total deposits in commercial banks in the South Bend banking market, ${ }^{3}$ and thereby, ranks as the fourth largest of ten banks operating in the market. Since Applicant already controls the policies of Bank, it does not appear, from the facts of record, that either the retention of Bank shares or the acquisition of additional Bank shares by Applicant would have any adverse effect on existing or potential competition, increase the concentration of banking resources, or have an adverse effect on other banks in any relevant area. Thus, the competitive considerations are consistent with approval of the application.

Applicant has committed to inject at least $\$ 1,250,000$ into Bank upon receiving the regulatory approvals necessary for its plan to acquire control of all of the shares of Bank or within one

[^23]year of the date of the Order approving the subject applications, whichever occurs first. In view of this commitment, the financial condition, managerial resources and future prospects of Applicant and Bank are considered to be consistent with approval. Although Applicant proposes no significant changes in the operations or services of Bank as a part of this proposal, considerations relating to the convenience and needs of the residents of the community to be served are also consistent with approval of the applications. It is the Board's judgment that the proposed retention and acquisition of shares of Bank by Applicant would be in the public interest and that the applications should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transaction to acquire additional shares of Bank shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective June 18, 1976.

Voting for this action: Chairman Burns and Governors Wallich, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Governor Gardner.
(Signed) Griffith L. Garwood,
Assistant Secretary of the Board.

Cedar Investment Company, Waverly, Iowa

## Order Approving Acquisition of Additional Shares of Bank

Cedar Investment Company, Waverly, Iowa ('Applicant''), a registered bank holding company, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire 60.5 per cent of the voting shares of State Bank of Waverly, Waverly, Iowa ("Bank'’).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including
those of the Superintendent of Banking for the State of Iowa, in light of the factors set forth in § 3(c) of the Act ( 12 U.S.C. § 1842(c)).

Applicant ${ }^{1}$ presently owns directly 24.9 per cent of the voting shares of Bank. ${ }^{2}$ With deposits of $\$ 24.9$ million, Bank controls approximately twotenths of one per cent of the total deposits held by commercial banks in Iowa and is the 93rd largest bank in that State. ${ }^{3}$ Bank, which is the smaller of the two banks in Waverly, controls approximately 24.8 per cent of the total deposits in the relevant banking market (approximated by Bremer County) and is the second largest of eight banks in that market. Applicant proposes to acquire an additional 60.5 per cent of the voting shares of Bank from two individuals who are officers and directors of Bank as well as being the only shareholders, directors, and officers of Applicant. Inasmuch as the proposed transaction is essentially a reorganization of family interests, and Applicant has no other present banking subsidiaries, consummation of the proposal would neither eliminate existing or potential competition, increase the concentration of banking resources, nor have significant adverse effects upon other banks in the relevant area. Accordingly, based upon the foregoing and other facts of record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial condition, managerial resources, and future prospects of Applicant and Bank are considered satisfactory and appear to be consistent with approval of the application. Although Appli-

[^24]cant will incur some acquisition debt in connection with this proposal, the earnings prospects of Bank appear to provide Applicant with the necessary financial flexibility that will enable Applicant to service its debt without impairing the financial condition of Bank. Accordingly, banking factors are consistent with approval of the application. Considerations relating to the convenience and needs also are regarded as being consistent with approval of the application. Therefore, it is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago, pursuant to delegated authority.

By order of the Board of Governors, effective June 23, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, and Lilly. Absent and not voting: Governor Partee.
(Signed) Griffith L. Garwood, [SEAL] Assistant Secretary of the Board.

## First Freeport Corporation,

 Freeport, Texas
## Order Approving Acquisition of Bank

First Freeport Corporation, Freeport, Texas, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of Chemical National Bank, Clute, Texas ("Bank’"), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted on behalf of three Texas banks: The Lake Jackson Bank of Lake Jackson, Lake Jackson, Brazosport Bank of Texas, Freeport, and First State Bank, Clute (hereinafter referred to as
"'Protestants'), in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the 212 th largest banking organization in Texas, controls one bank with aggregate deposits of $\$ 35.9$ million, representing approximately .8 of one per cent of the total commercial bank deposits in the State. ${ }^{1}$ Since Bank is a proposed new bank, its acquisition by Applicant would neither eliminate any existing competition nor immediately increase Applicant's share of commercial bank deposits.

Bank is to be located in Clute, Texas, and will compete in the Freeport banking market (the relevant banking market). ${ }^{2}$ Applicant's subsidiary bank, First Freeport National Bank, located 8.3 miles northwest of Bank, is the largest of twelve banks operating in the market and holds approximately 19.8 per cent of market deposits, while Protestants Lake Jackson Bank and Brazosport Bank are the second and third largest banks in the market accounting for 12.2 and 11.9 per cent of market deposits, respectively. Since Bank is a proposed new bank, its acquisition by Applicant would not eliminate any existing or potential competition. In addition, there is no evidence to indicate that Applicant's proposal is an attempt to preempt a site before there is a need for a bank. On the basis of the above and other facts of record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial condition and managerial resources and future prospects of Applicant and its subsidiary bank are regarded as satisfactory. Bank has no operating financial history; however, it will be opened with adequate capital and its prospects as a subsidiary of Applicant appear satisfactory. Accordingly, considerations relating to the banking factors are consistent with approval. Considerations relating to the convenience and needs of the community to be served lend some weight

[^25]toward approval of the application since Bank will be capable of offering a full complement of banking services to its customers.

During the course of its consideration of this application, the Board has considered the comments submitted on behalf of Protestants. Protestants have advanced several arguments relating to the Board's jurisdiction to consider the subject application. In brief, Protestants assert that the Board's jurisdiction does not exist since Bank is merely a proposed bank rather than an operating institution. Further, the Comptroller of the Currency was not authorized to condition his granting of Bank's charter on the acquisition of Bank by Applicant. Both of Protestants' contentions have been rejected by the courts. Gravois Bank v. Board of Governors, 478 F. 2d 546, (8th Cir. 1973); see Whitney National Bank v. Bank of New Orleans \& Trust Co., 379 U.S. 411 (1965). Accordingly, the Board finds these arguments to be without merit. ${ }^{3}$

Protestants also contend that affiliation of Applicant with Bank would contravene Texas law prohibiting branch banking (TEX. CONST. Art XVI § 16). The Board has stated that a State's restrictive branch banking laws are not automatically applicable to bank holding company operations. In a given case the Board examines the facts to determine whether a particular acquisition of a bank holding company would constitute an illegal branch under State law. If the Board determines that a violation of State law would result, it is required to disapprove the transaction. Whitney National Bank v. Bank of New Orleans, 323 F. 2d 290 (D.C. Cir. 1963), rev'd on other grounds, 379 U.S. 411 (1965); Gravois Bank v. Board of Governors, 478 f. 2d 546 (8th cir. 1973).

The Board notes that the Office of the Comptroller of the Currency has granted preliminary approval for the charter of Bank, following a hearing, apparently concluding that Bank would not be an illegal branch under Texas law. The facts of record in this case indicate that Bank will be a separate corporation, with its own capital stock

[^26]and a loan limit based on such capital stock; that Bank's operations will be conducted primarily by its own officers; that Bank's board of directors will be generally separate from the boards of Applicant and of Freeport Bank and will exercise independent judgment with respect to the management of Bank; that Bank's officers and employees will not directly perform any services for customers of Freeport Bank other than those services that would be provided for customers of other area banks, such as check cashing, and the same is true of Freeport Bank's officers and employees with regard to customers of Bank; that Bank's customers will be able to deposit and withdraw their funds only with respect to accounts in Bank and will not be able to effect a deposit or withdrawal from Bank at Freeport Bank; and the same is true of Freeport Bank's customers who will likewise not be able to effect a deposit or withdrawal from Freeport Bank at Bank; that Bank and Freeport Bank will be advertised as being members of the same bank holding company system but that they will not be identified as united institutions; that Bank will maintain its own books of account, use its own stationery and issue its own distinctive checks and forms; and that Bank's name will be different from the name of Freeport Bank.

In order to prevail on the branching issue, "It must be shown that in substance a bank is doing business through the instrumentality of the affiliate institution which constitutes the alleged branch, or vice versa, in the same way as if the institutions were one." Independent Bankers Association of Georgia v. Board of Governors of the Federal Reserve System, 516 F. 2d 1206 (D.C. Cir. 1975). In view of the foregoing, and having considered the comments of the Protestants and all the other facts of record, the Board concludes that Bank will not be operated in a unitary fashion with Applicant's banking subsidiary and thus this proposal will not contravene Texas' branch banking law.

Protestants further contend that the Freeport banking market is not particularly attractive for de novo entry because little growth in the area can be expected. Consequently, Protestants assert, it is doubtful that Bank can become a viable independent banking institution. The Board has reviewed the facts of record, including the past and projected growth of the economy of the area, and finds that the market can reasonably be expected to support an additional banking alternative. This is especially so in light of the market's
higher than average population growth, high income per household, and anticipated strong business development. While the decision to establish a new bank almost always involves some measure of risk, the Board is unable to conclude that Applicant's proposal involves more than the usual entrepreneurial risks inherent in such a proposal.

Finally, Protestants assert that any substantial growth by Bank would be at the expense of the area's existing banks. Applicant has defined a service area for Bank which overlaps the service areas of three neighboring banks. These banks have sustained growth rates of over 50 per cent on the average in both deposits and loans over the past five years. In view of the growth pattern of the area's economy and the commercial and industrial activity occurring near Bank's proposed site, it is the Board's determination that Applicant's entry will have no significant adverse effects on any bank in the market or impair their ability to remain viable banking organizations.

In view of the foregoing discussion and having considered the facts of record and all the comments of Protestants in light of the statutory factors the Board must consider under § 3(c) of the Act, it is the Board's judgment that consummation of the subject proposal would be in the public interest and that the application to acquire Bank should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) Chemical National Bank, Clute, Texas, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective July 1, 1976.

[^27]Florida Bankshares, Inc., Hollywood, Florida

## Order Approving Acquisition of Bank

Florida Bankshares, Inc., Hollywood, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. § $1842(\mathrm{a})(3)$ ) to acquire 23.8 per cent of the voting shares of First National Bank of Sebring, Sebring, Florida ('Bank'").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired and the application and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the 25th largest banking organization in Florida, controls five banks, with deposits of approximately $\$ 131.2$ million, representing approximately .5 per cent of total deposits in commercial banks in the State. ${ }^{1}$ Acquisition of Bank, the third largest of seven banking organizations in the Sebring banking market, ${ }^{2}$ with deposits of $\$ 28.8$ million, or 16.1 per cent of the deposits in the market area, would not result in a significant increase in the concentration of banking resources in Florida.

Applicant's acquisition of Bank would provide Applicant with its initial entry into the Sebring banking market. Applicant's banking subsidiary nearest the Sebring banking market is located 58 miles southeast of that market. No significant competition exists between Bank and any of Applicant's subsidiaries and therefore, consummation of the instant proposal would not eliminate any significant amount of existing competition. Although Applicant has the resources to enter the market de novo, the probability of such an entry is considered slight in view of the fact that population per banking office and income per banking office ratios are substantially lower in the relevant

[^28]market than for the State as a whole, two new banks having entered this market within the last five years. Accordingly, it does not appear that consummation of the proposal would eliminate the likelihood of potential competition. Competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiaries appear to be generally satisfactory and it is believed that Applicant's acquisition of Bank will strengthen the financial condition and managerial resources of Bank. Consequently, banking factors are considered to be consistent with approval. Applicant's influence ${ }^{3}$ over Bank should improve Bank's management and operating efficiency and, as a subsidiary of Applicant, Bank will have ready access to loan participations and capital through Applicant's larger financial organization. Accordingly, considerations relating to the convenience and needs of the community to be served are consistent with approval. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective June 16, 1976.

Voting for this action: Chairman Burns and Governors Wallich, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Governor Gardner.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

[^29]
## National City Corporation,

 Cleveland, Ohio
## Order Approving Acquisition of Bank

National City Corporation, Cleveland, Ohio, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under $\S 3(\mathrm{a})(3)$ of the Act ( 12 U.S.C $\S 1842(\mathrm{a})(3)$ ) to acquire all of the voting shares, less directors' qualifying shares, of the successor by consolidation to First National Bank of Elyria ("Bank'), Elyria, Ohio. As part of this proposal, Applicant will acquire all of the voting shares, less directors' qualifying shares, of a new national bank ('interim bank'), which is to be consolidated with Bank. The interim bank and resulting consolidated bank to be acquired have no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposal is treated herein as the acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the fourth largest banking organization in Ohio, controls 4 banks with aggregate deposits of $\$ 1.56$ billion, representing approximately 5.3 per cent of the total commercial bank deposits in the State. ${ }^{1}$ Consummation of this proposal would increase Applicant's share of Statewide deposits by approximately .1 per cent and would not have a significant effect upon the concentration of banking resources in the State.

Bank, headquartered in the city of Elyria about 35 miles from downtown Cleveland, is the 21 st largest of 37 banking organizations competing in the Cleveland banking market ${ }^{2}$ and holds approximately $\$ 29.6$ million in deposits, representing

[^30]about .34 per cent of the total commercial bank deposits in the market. ${ }^{3}$ Applicant, with two subsidiary banks operating 50 offices in the market, is the second largest banking organization in the Cleveland market controlling approximately 16.6 per cent of total market deposits. ${ }^{4}$ Applicant's acquisition of Bank would increase only slightly Applicant's market share and the concentration of deposits in the Cleveland market and Applicant would still remain the second largest banking organization in the Cleveland market behind the largest banking organization which controls approximately 31.1 per cent of market deposits. While approval of this application would eliminate one independent banking alternative in the market, 36 banking organizations, including subsidiaries of nine other Ohio multibank holding companies, would remain, operating 432 banking offices in the Cleveland market. Even though Applicant and Bank operate in the same market, the facts of record indicate that subsidiaries of Applicant and Bank derive no significant business from each other's service areas and thus approval would not result in the elimination of any significant amount of existing competition.

In assessing the effects of the proposal on potential competition, the Board is of the view that although Applicant may possess the capabilities to enter Lorain County de novo and acquisition of Bank would eliminate one independent banking alternative in the relevant market, there are several other facts of record that mitigate these slightly adverse competitive effects. Ohio's restrictive branching laws, which limit branching to home office counties, prohibit Applicant's present subsidiaries from branching into the Lorain County portion of the market; moreover, it appears unlikely that Applicant would enter Lorain County de novo since its population and deposits-per-banking-office ratios are considerably below the State averages. Furthermore, Bank is the smallest of eight banks headquartered in Lorain County and, following approval, there would remain 18 other independent banking organizations as possible entry points into the market for competitors.

[^31]Accordingly, it is concluded that consummation of the proposal would have only slightly adverse effects on potential competition.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory and consistent with approval. The acquisition of Bank by Applicant will allow the more specialized banking services currently being offered in the market to become more readily accessible to residents of Elyria and the remainder of Lorain County. In particular, Applicant has indicated that it will make available to Bank and Bank's customers more specialized and diversified trust services, more specialized types of credit services, including personal property leasing and industrial revenue bond financing, international banking services, and data processing services. The Board concludes, therefore, that considerations relating to the convenience and needs of the community to be served outweigh the slight anticompetitive effects of the proposal. Accordingly, it is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction should not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Cleveland pursuant to delegated authority.
By order of the Board of Governors, effective June 23, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Jackson, Partee, and Lilly. Voting against this action: Governor Coldwell.
(Signed) Griffith L. Garwood,
[seal] Assistant Secretary of the Board.

## Dissenting Statement of Governor Coldwell

As noted in the majority's opinion, the instant proposal involves an acquisition of a bank in the Cleveland banking market by National City Corporation, a bank holding company that currently ranks as the second largest banking organization in the market. Where a banking organization is already present in the market, a horizontal acquisition such as the one proposed here necessarily
results in some elimination of existing competition.

Given the absolute and relative size of Applicant in the Cleveland banking market, the effects on existing competition are in my view adverse; and the Bank Holding Company Act requires denial of such a proposal unless such anticompetitive effects are outweighed by other factors reflected in the record. In this regard, I am of the opinion that the other factors involved in this proposal are not sufficient to outweigh the anticompetitive effects inherent in this proposal. For these reasons, I would deny this application.

## The Royal Trust Company, Montreal, Quebec, Canada

## Order Approving Acquisition of Bank

The Royal Trust Company, Montreal, Quebec, Canada, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act [12 U.S.C. § 1842(a)(3)] to acquire 80 per cent or more of the voting shares of The First Bank of Gulfport, Gulfport, Florida ("Bank’).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3(\mathrm{c})$ of the Act [12 U.S.C. § 1842(c)].

Applicant, with total assets of $\$ 3.4$ billion (as of December 31, 1975) is the largest trust company and the eighth largest financial institution in Canada, and operates, through its subsidiaries and other interests, in both Europe and the Caribbean Islands. In the United States, Applicant controls two banks ${ }^{1}$ and operates one nonbank subsidiary, which provides data processing and other related services to financial institutions located in Florida and operates as a computer service bureau for the

[^32]storing and processing of banking, financial, and other related economic data. ${ }^{2}$ Through its two subsidiary banks, Applicant controls aggregate deposits of $\$ 73.6$ million, representing approximately three-tenths of one per cent of the total deposits held by commercial banks in Florida. ${ }^{3}$ Consummation of the subject proposal would increase Applicant's share of State deposits by approximately one-tenth of one per cent and would not have a significant effect upon the concentration of banking resources in the State.

Bank (with deposits of $\$ 21.3$ million) is the 14 th largest of the 32 commercial banks in the South Pinellas County banking market ${ }^{4}$ and holds approximately two per cent of the market's commercial bank deposits. Applicant is not presently represented in the relevant market and its closest banking subsidiary to Bank is located in the adjacent, but separate, Tampa banking market. There does not appear to be any existing competition between Bank and any of Applicant's present banking and nonbanking subsidiaries, and it does not appear likely that any significant competition would develop in the future. Upon acquisition of Bank, Applicant would become the 13th largest of the 17 banking organizations that currently are competing in the South Pinellas County banking market.

While Applicant could enter the relevant market de novo, the Board views the proposed acquisition of Bank as a foothold entry by Applicant into the market. Moreover, acquisition of Bank by Applicant will remove Bank from its affiliation with another bank that is located in the relevant market and will introduce a new banking alternative into the market. Accordingly, on the basis of the facts

[^33]of record, the Board concludes that consummation of the proposal would not have any significant adverse effects upon either existing or potential competition in any relevant area, and that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks and Bank are regarded as being generally satisfactory. Applicant will provide Bank with its expertise in the areas of international banking, trust services, and specialized loans and will be a source of capital and management as needed. Therefore, considerations relating to banking factors and to the convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors, effective June 11, 1976.

Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

## Western Michigan Corporation, Niles, Michigan

## Order Denying Acquisition of Bank

Western Michigan Corporation, Niles, Michigan, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act ( 12 U.S.C. § 1842(a)(3)) to acquire 100 per cent of the voting shares (less directors' qualifying shares) of the successor by merger to The First National Bank of Cassopolis, Cassopolis, Michigan ('Bank'). The bank into which Bank is to be merged has no significance except as a means to facilitate the acquisition of the voting shares of Bank. Accordingly, the proposed acquisition of
shares of the successor organization is treated herein as the proposed acquisition of the shares of Bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received including the denial recommendation of the Department of Justice, in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant is the 34th largest banking organization in Michigan and through its sole subsidiary, First National Bank of Southwestern Michigan, Niles, Michigan ('FNB'"), holds deposits of approximately $\$ 108.7$ million, representing 0.4 per cent of the total deposits held by commercial banks in the State. ${ }^{1}$ Acquisition of Bank would increase Applicant's share of Statewide deposits by approximately .05 per cent and would make Applicant the 31st largest banking organization in Michigan. Although consummation of this transaction would not significantly increase the concentration of banking resources in Michigan, it would have significant adverse effects upon concentration in the relevant banking market.

Bank (deposits of $\$ 15.1$ million) controls approximately 20.1 per cent of the total deposits held by commercial banks in the Cass County banking market, the relevant banking market, ${ }^{2}$ and is the second largest of five banking organizations competing in the market. FNB, Applicant's banking subsidiary, competes in the adjoining Niles, Michigan-South Bend/Elkhart, Indiana banking market. ${ }^{3}$ FNB also operates one branch (deposits of $\$ 12.9$ million) in the relevant banking market and controls approximately 17.1 per cent of the market's total deposits, thereby ranking as the fourth largest among the five banking organizations in the market. Acquisition of Bank by Applicant would significantly increase Applicant's share of total deposits in the relevant banking market since Applicant would become the market's second largest banking organization and

[^34]would control approximately 37.2 per cent of total market deposits. Thus, the two-bank concentration ratio in the market would become 75.3 per cent, a significant increase in the concentration of banking resources in the relevant market.
In addition to the significant adverse effects on concentration, it appears that the proposal would also have adverse effects on existing and future competition within the Cass County banking market. As noted above, Applicant already operates in the relevant banking market ${ }^{4}$ and the record indicates clearly that there is substantial competition between Applicant and Bank which would be eliminated by this proposal. ${ }^{5}$ Furthermore, the proposal would reduce the number of banking alternatives operating in the market. Moreover, approval of the proposed transaction would remove a viable entry vehicle for a Michigan bank holding company not currently represented in the market. This factor is even more significant when considered in the light of the fact that the market is not particularly attractive for de novo entry by other banking organizations seeking to gain access to the Cass County market. On the basis of the foregoing and other facts of record, including the views of the Department of Justice and Applicant's response thereto, the Board concludes that approval of the application would have significantly adverse effects on both existing and potential competition.
On the basis of the foregoing and other facts of record, the Board concludes that the competitive considerations relating to this application weigh sufficiently against approval so that it should not be approved unless the anticompetitive effects are clearly outweighed by benefits to the public in meeting the convenience and needs of the communities to be served.
The financial and managerial resources and prospects of Applicant, its subsidiary bank, and Bank are regarded as satisfactory and consistent with approval of the application; however, such considerations do not provide significant weight for approval of the application. Acquisition of Bank by Applicant would enable Bank to expand

[^35]its trust department, increase its lending capacity through loan participations, upgrade its agricultural loan services, and create new time deposit services and municipal and corporate savings programs. These considerations relating to convenience and needs lend some weight toward approval of the application. The Board finds, however, that neither the considerations relating to banking factors nor to convenience and needs are sufficient to outweigh the adverse competitive effects of Applicant's proposal.

On the basis of the facts in the record, and in light of the factors set forth in $\S 3$ (c) of the Act, it is the Board's judgment that approval of the proposal would not be in the public interest. Accordingly, the application is denied for the reasons summarized above.

By order of the Board of Governors, effective June 30, 1976.

Voting for this action: Vice Chairman Gardner and Governors Jackson and Partee. Voting against this action: Governor Lilly. Absent and not voting: Chairman Burns and Governors Wallich and Coldwell.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

## Dissenting Statement of Governor Lilly

I would approve the subject application of Western Michigan Corporation to acquire the voting shares of The First National Bank of Cassopolis. It appears from the facts of record that the relevant banking market is rural in nature and that Applicant's resources would enable Bank to increase both its internal efficiencies and the quality of its services to the public. Of particular importance is the fact that Applicant would expand Bank's trust department, increase Bank's lending capacity through loan participations, upgrade Bank's agricultural loan services, and create new time deposit services and municipal and corporate savings programs.

For these reasons, I regard the considerations relating to the convenience and needs of the community to be served to outweigh clearly in the public interest the slightly adverse competitive effects of the proposed transaction, and I would approve the application.

Bank Shares Incorporated, Minneapolis, Minnesota

Order Denying
Merger of Bank Holding Companies
Bank Shares Incorporated, Minneapolis, Minnesota ('Applicant"'), a bank holding company within the meaning of the Bank Holding Company Act (' Act'"), has applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. $\S$ 1842(a)(5)) to merge with Mid America Bancorporation, Inc., Minneapolis, Minnesota (''Mid America''), a bank holding company within the meaning of the Act. Applicant would be the surviving corporation.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § $1842(\mathrm{c})$ ).

On the basis of the record, the application is denied for the reasons set forth in the Board's Statement, which will be released at a later date.

By order of the Board of Governors, effective June 21, 1976.

[^36](Signed) Griffith L. Garwood, [SEAL] Assistant Secretary of the Board.

## Statement

Bank Shares Incorporated, Minneapolis, Minnesota ('"Applicant'"), a bank holding company within the meaning of the Bank Holding Company Act ('Act''), applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. § 1842(a)(5)) to merge with Mid America Bancorporation, Inc., Minneapolis, Minnesota ('"Mid America''), a bank holding company within the meaning of the Act. Applicant would be the surviving corporation.

Notice of the application, affording opportunity for interested persons to submit comments and
views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § $1842(\mathrm{c})$ ).

Applicant controls five banks with aggregate deposits of $\$ 259$ million, representing approximately 1.88 per cent of the total deposits held by commercial banks in Minnesota, and is the fifth largest bank holding company in that State. ${ }^{1}$ Mid America controls seven banks with aggregate deposits of \$118 million, representing approximately 0.85 of one per cent of the total deposits held by commercial banks in the State, and is Minnesota's seventh largest bank holding company. Consummation of the proposed merger would result in Applicant's control of approximately 2.73 per cent of total deposits held by the State's commercial banks, and Applicant would become the State's fourth largest bank holding company.

Four of Applicant's subsidiary banks are located in the Minneapolis-St. Paul banking market, ${ }^{2}$ and the fifth is located in the Rochester banking market. ${ }^{3}$ Of Mid America's seven banking subsidiaries, six are located in the Minneapolis-St. Paul banking market and one is in the Hutchinson banking market. ${ }^{4}$ The Rochester and Hutchinson markets are approximately 85 and 60 road miles distant, respectively, from the Minneapolis-St. Paul market, and approximately 125 road miles from each other. Since numerous other banks intervene between these markets and large distances separate them, it appears unlikely that approval of the subject application would foreclose any significant existing or potential competition between Applicant and Mid America in the Rochester and Hutchinson markets.

Accordingly, the primary area in which the proposed transaction may have anticompetitive

[^37]effects is in the Minneapolis-St. Paul banking market. Applicant is the fourth largest commercial banking organization in that market with total market deposits of $\$ 206.5$ million, representing 2.9 per cent of deposits held by commerical banks in the market. Mid America ranks sixth with total market deposits of $\$ 101.3$ million, representing a market share of 1.4 per cent. Consummation of the proposed transaction would result in Applicant holding 4.3 per cent of total market deposits and Applicant would thereby become the market's third largest banking organization. The two largest banking organizations hold 67.7 per cent of total market deposits. While consummation may stimulate competition between the surviving corporation and the two largest banking organizations in the market, the proposed transaction would eliminate some existing competition between Applicant and Mid America, particularly in the area of consumer banking services. Thus, consummation of the merger may have a slight adverse effect on competition.

The Board has indicated on previous occasions that it believes that a bank holding company should constitute a source of financial and managerial strength to its subsidiary banks, and that the Board will closely examine applications with this consideration in mind.

The total amount of Applicant's debt has increased markedly over the last five years. At year-end 1975, Applicant's total borrowed funds equaled 55 per cent of its stated equity capital on a parent company only basis. At year-end 1971, Applicant's parent-only debt-equity ratio was 33 per cent. Applicant's interest expense increased from 19 per cent of operating revenue in 1972 to 50 per cent of operating revenue in 1975. On a consolidated basis, Applicant's debt-equity ratio was 63 per cent. Parent-only long-term debt of Applicant represented 44 per cent of its equity capital at year-end 1974 while other similarlysized multi-bank holding companies averaged a long-term-debt-equity ratio of 12.3 per cent. The size of Applicant's debt-equity ratio suggests that Applicant lacks the financial flexibility to provide financial assistance to its subsidiary banks in the event such banks encounter currently unforeseen difficulties.

The Board's concern over the size of Applicant's debt has been previously expressed to Applicant. The Board, in 1972, approved Applicant's proposal to acquire Olmsted County Bank and Trust Company, Rochester, Minnesota ('‘Roches-
ter Bank''), with the understanding that the debt of $\$ 4$ million incurred by Applicant would be replaced with equity within one year of the acquisition. To date, that debt remains on Applicant's books. Applicant has asserted that market conditions have made it impossible for Applicant to sell equity securities publicly. However, Applicant, in making the aforementioned commitment and in consummating the Rochester Bank acquisition on that basis assumed the risk of a change in market conditions. It is also Applicant's contention that it has pursued alternatives to equity funding which have resulted in a capital structure similar to that which would have resulted had the commitment been fulfilled. In view of the fact that Applicant's debt position has further deteriorated since the Rochester Bank acquisition was originally proposed, and in view of the continuing need for increased equity capital, the Board is unable to accept Applicant's assertions. Under these circumstances, the Board regards Applicant's longterm noncompliance with the above-mentioned commitment as a factor reflecting adversely upon the financial and managerial resources of Applicant and as providing sufficient grounds for denial of the present proposal.

In contrast, Mid America is a conservatively operated holding company without substantial leverage. Its parent-only total borrowed funds equaled only 18 per cent of its stated equity capital at year-end 1975, down from 32 per cent a year earlier and reflecting the efforts of Mid America to reduce its leverage. Consummation of the proposed transaction will result in a combined organization with total parent company debt equalling 41 per cent of stated equity capital and long-term parent company debt equalling 30 per cent of stated equity capital. While this would represent some improvement over Applicant's debt position, it would continue to compare unfavorably with other bank holding companies of similar size. Such improvement in the resulting organization's leverage vis à vis Applicant's leverage would be accomplished at the expense of subjecting Mid America's banking subsidiaries, which should be retaining dividends in order to build capital to support deposit growth, to a substantially more highly leveraged parent. Accordingly, Mid America's banking subsidiaries, which have not provided any significant dividends to Mid America, would be subjected to the possibility of
a substantial demand from the resulting parent corporation for dividends.

Generally, the financial conditions of the subsidiary banks of Applicant and Mid America are satisfactory. However, one bank subsidiary of Applicant and one of Mid America have experienced substantial deposit growth without commensurate capital growth and thus are in need of infusions of capital. Irrespective of whether the survivor of the merger would be so leveraged as to inhibit its ability to raise such capital, the pressure for bank dividends represented by the combined debt servicing requirement could have an adverse effect on the capital accounts of those two banks. ${ }^{5}$ Accordingly, the Board finds that although the financial resources and future prospects of Mid America are generally satisfactory, the financial resources and future prospects of both Applicant and the combined organization must be regarded as less than satisfactory and lending weight toward disapproval.

The Board regards the managerial resources of Mid America as being satisfactory. But for Applicant's failure to fulfill the above-mentioned commitment, the managerial considerations relating to Applicant would be regarded as generally satisfactory, but would lend no weight toward approval of the proposed transaction. There is no indication that the convenience and needs of the communities to be served are not being met currently. Applicant has asserted that expanded trust services, real estate lending, and increased lending limits would flow from approval of the proposed transaction. While convenience and needs factors lend some slight weight toward approval of the application, they are insufficient to outweigh the adverse factors found by the Board to be present in the application. Accordingly, on the basis of the facts of record, it is the Board's judgment that approval of the application would not be in the public interest and that the application should be denied.

[^38]Board of Governors of the Federal Reserve System, June 23, 1976.

[seal] Assistant Secretary of the Board.

# Orders Under Section 4 Of Bank Holding Company Act 

D. H. Baldwin Company, Cincinnati, Ohio

## Order Approving Joint Venture Participation in FMC-Baldwin Leasing Company

D. H. Baldwin Company, Cincinnati, Ohio, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act (12 CFR § 225.4(b)(2)), to engage in a joint venture through its subsidiary, The Baldwin Company, with FMC Finance Corporation, a subsidiary of FMC Corporation, Chicago, Illinois ('FMC'"). The joint venture is to be known as FMC-Baldwin Leasing Company, Chicago, Illinois ("Company'). Company would engage de novo in the activities of leasing personal property on a full pay-out basis. Such activities have been determined by the Board to be closely related to banking ( 12 CFR § 225.4(a)(6)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 10453 (1976)). The time for filing comments and views has expired, and the Board has considered the application and all comments ${ }^{1}$ received in the light of the public interest factors set forth in § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)).

Applicant controls 12 banks with aggregate de-

[^39]posits of approximately $\$ 554$ million, ${ }^{2}$ representing 7.6 per cent of the total deposits in commercial banks in Colorado, and is the fifth largest banking organization in the State. Applicant also controls several nonbanking subsidiaries engaged in underwriting life and casualty insurance, operating a savings and loan association, ${ }^{3}$ performing commercial mortgage and leasing activities, and manufacturing and marketing musical instruments and electronic components.

FMC and its subsidiaries are engaged in the manufacture and sale of many types of industrial equipment, including mining, agricultural, food processing, petroleum, and marine and rail transportation equipment.

Applicant proposes to acquire a 20 per cent equity participation in Company, ${ }^{4}$ which will engage de novo in the activities of originating full pay-out leveraged leases on personal property. ${ }^{5}$ It is anticipated that most, if not all, of such leases will be written for equipment manufactured by FMC and its subsidiaries. Company will engage in such leasing activities from an office in Chicago, Illinois; however, it appears that the relevant geographic market for these activities is the nation, particularly in that the market for products manufactured by FMC and to be leased by Company is nationwide. Applicant's subsidiary, Baldwin Finance Company, engages in leasing personal property on a full pay-out basis. In addition, Applicant's subsidiary banks originate instalment sales contracts relating to personal property, which may serve as substitutes for the types of leases

[^40]that Company will originate. FMC Finance Corporation also originates instalment sales contracts. However, in relation to the $\$ 100$ billion of estimated total equipment lease obligations outstanding nationwide, the volume of obligations originated by Applicant and FMC in 1975 is not considered substantial. Thus, it does not appear that consummation of the proposal would eliminate a substantial amount of existing competition.

On the other hand, formation of Company would provide an additional and convenient source of financing the acquisition of certain personal property, especially for equipment manufactured by FMC and its subsidiaries. Furthermore, there is no evidence in the record indicating that consummation of the subject proposal would result in any undue concentration of resources, unfair competition, conflicts of interest or any other adverse effects.
Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to (1) Applicant's commitment to treat Company as a subsidiary; (2) the compliance of Applicant and Company with the conditions set forth in § 225.4(c) of Regulation Y; and (3) the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City.

By order of the Board of Governors, effective June 30, 1976.

[^41]Republic of Texas Corporation, Dallas, Texas

Order Approving Retention of Republic Commerce Company, Republic Money Orders, Inc., and Republic Money Orders of California, Inc., all of Dallas, Texas

Republic of Texas Corporation, Dallas, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section $4(c)(8)$ of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), to retain ownership of the voting shares of Republic Commerce Company, Dallas, Texas ("Company''), and indirect ownership of the voting shares of Republic Money Orders, Inc. ('RMO'’), and Republic Money Orders of California, Inc. ('RMO of California''), both of Dallas, Texas. Company engages in no activities and merely serves as owner of record of all shares of RMO. RMO engages in the activity of issuing money orders and travelers checks to third party agents who, in turn, sell the instruments at the retail level. RMO of California is a wholly-owned subsidiary of RMO which, until 1972, also issued money orders and travelers checks. RMO of California is inactive and will be liquidated in 1985 when any money orders that remain unclaimed at that time escheat to the State of California.

The Board has previously determined by order that the activity of issuing and selling travelers checks is closely related to banking ( 59 Federal Reserve Bulletin 544 (1973)). The Board has not previously determined whether the issuance and sale of money orders constitutes an activity closely related to banking. The Board has decided to proceed by rulemaking on the question of whether Regulation Y should be amended by adding the activity of issuing payment instruments, such as money orders, to the list of permissible nonbank activities ( 12 CFR 225.4(a)). Notice of the Board's decision has been published affording interested persons an opportunity to submit their views on this subject (41 Federal Register 14902). Since it has previously determined that the activity of issuing and selling travelers checks is closely related to banking, the Board decided to consider as a separate matter Applicant's application to continue to engage (through RMO) in the activity of issuing and selling travelers checks.

Notice of the application, affording opportunity
for interested persons to submit comments and views on the public interest factors, has been duly published (40 Federal Register 44634). The time for filing comments and views has expired, and the Board has considered all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act.

By Order dated October 25, 1973, the Board approved the application of Applicant to become a bank holding company through the acquisition of Republic National Bank of Dallas ("Republic Bank'"). Applicant became a bank holding company on May 9, 1974. At the time that Applicant became a bank holding company, it also acquired, from Republic Bank, direct ownership of Company. Republic Bank was itself a bank holding company by virtue of the 1970 Amendments to the Act and owned various bank and nonbank interests. RMO and its subsidiary, RMO of California, were established as de novo subsidiaries of the profit sharing plan of Republic Bank. Pursuant to the provisions of $\S 4(\mathrm{a})(2)$ of the Act, Applicant has two years from the date when it became a bank holding company to divest its nonbank activities or, in the alternative, to apply to the Board for approval to retain them. The Board regards the standards under § 4(c)(8) of the Act for retention of shares to be the same as the standards for a proposed acquisition.

Applicant, the fourth largest banking organization in Texas, controls three banks with total deposits of approximately $\$ 2.8$ billion, representing about 6.5 per cent of the total deposits in commercial banks in the State. ${ }^{1}$ In addition, Applicant engages indirectly through a group of corporations referred to collectively as The Howard Corporation, in various nonbanking activities which are described in a Board determination dated September 10, 1973, relating to the grandfather benefits of Republic Bank ( 59 Federal Reserve Bulletin 768 (1973)). The Board has previously ruled that Applicant would not be a successor to the grandfather benefits of Republic Bank, and Applicant has committed, and is required, to dispose of the nonpermissible activities within the two-year statutory period prescribed in $\S 4(\mathrm{a})(2)$ of the Act. ${ }^{2}$

[^42]The issuance and sale of travelers checks is recognized as a distinct line of commerce. Seven firms constitute most of the travelers check industry which has annual sales of approximately $\$ 6$ billion. The largest organization, American Express, accounts for about two-thirds of the industry total. RMO's share of the national market is approximately one per cent. ${ }^{3}$ Barriers to entry into the industry appear high in view of the necessity for a large international sales organization to handle this low-margin high-volume product. Thus, potential entrants are likely to be those large money center banking organizations which have, or are capable of building, correspondent or agency relationships worldwide. The Board has previously determined that it would be in the public interest for bank holding companies having sucn capabilities to engage in the activity of issuing and selling travelers checks in view of the limited number of competitors presently serving the industry ( 59 Federal Reserve Bulletin 544 (1973)). Retaining Company as a subsidiary of Applicant should serve to promote competition among the various leading participants in the travelers check industry.

RMO was established de novo by Republic Bank in 1959. In 1974 it had travelers checks issues of $\$ 129.7$ million. In view of the highly concentrated nature of the travelers check industry and the fact that RMO was established de novo, as a subsidiary of Applicant's lead bank, the Board concludes that Applicant's retention of RMO would not result in any adverse effects on competition in any relevant area. Furthermore, there is no evidence in the record to indicate that the proposed retention of RMO by Applicant would lead to an undue concentration of resources, unfair competition, conflicts of interest, or unsound banking practices, or other adverse effects.

Funds received on the issuance of travelers checks by a member bank are considered as demand deposits and included in the money supply. As such, member banks are required to carry reserves against outstanding instruments (see 15 Federal Reserve Bulletin 348; Board Interpretation 9 2770). RMO, however, because it is not a member bank, is not required by statute to maintain reserves with respect to such funds.

[^43]While the Board believes that the better course would be to have all institutions engaged in deposit banking of this kind subject to common reserve requirements, it recognizes that competition in the travelers check industry is likely to be promoted by allowing bank holding companies to offer such services through nonbank subsidiaries rather than through subsidiary banks. It has therefore approved the subject application in view of the relevant favorable considerations under the Bank Holding Company Act.

Unlike some other issuers of travelers checks, RMO does not charge its agents a fee. The absence of a fee provides RMO's agents greater flexibility in dealing with retail customers and, in certain circumstances, may result in lower retail costs. In addition, continued affiliation of Applicant and RMO should increase the possibilities that RMO will expand the number of retail outlets that handle its travelers checks. Accordingly, it is the Board's view that approval of the subject application will produce benefits to the public and will be in the public interest.

Based on the foregoing and other considerations reflected in the record, the Board has determined, in accordance with the provision of section $4(\mathrm{c})(8)$ of the Act, that retention of Company, RMO and RMO of California can reasonably be expected to result in benefits to the public that outweigh possible adverse effects. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective June 25, 1976.

[^44][seal]
(Signed) Griffith L. Garwood,
[SEAL] Assistant Secretary of the Board.

Security Bancorp, Inc., Ponca City, Oklahoma

Order Approving Retention of Security Datacenter and A.D.P.C., Inc.

Security Bancorp, Inc., Ponca City, Oklahoma, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), to retain the assets of Security Datacenter ("Datacenter'') and shares of A.D.P.C., Inc. ("A.D.P.C.'), both of Ponca City, Oklahoma. Datacenter engages in the activities of providing bookkeeping and data processing services for Applicant's subsidiary bank, and financially-related data processing services for businesses and municipalities. A.D.P.C. engages in the activity of providing financially-related data processing services for public schools. Such activities have been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(8)).

Notice of the applications, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 1546). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the public interest factors set forth in § 4(c)(8) of the Act (12 U.S.C. § $1843(\mathrm{c})(8)$ ).

Applicant, the 25 th largest banking organization in Oklahoma, controls one bank with deposits of approximately $\$ 49.1$ million, representing 0.5 per cent of the total deposits in commercial banks in the State. ${ }^{1}$

Datacenter is an unincorporated company, all the assets of which have been owned by Applicant since August of 1970. Primarily, Datacenter provides bookkeeping and data processing services for the internal operations of Applicant's subsidiary bank. In addition, it provides financially-related data processing services to municipalities and private business firms. In 1975, Datacenter had total operating revenue of approximately $\$ 328,000$.
A.D.P.C. is a computer service company that leases computer time from Datacenter in order to

[^45]perform financially-related data processing services for public school systems in Oklahoma. Applicant presently controls approximately 47 per cent of the outstanding shares of A.D.P.C. ${ }^{2}$ In 1975, A.D.P.C. had total operating revenue of approximately $\$ 210,000$.

In acting on applications submitted pursuant to § 4(c)(8) of the Act, the Board analyzes an application to retain a company engaged in §4(c)(8) activities by the same standards that it analyzes an application to acquire a company engaged in such activities. In addition, the Board analyzes the competitive effects of a proposal both at the time of the acquisition and at the time of the application for retention. Applicant acquired Datacenter in August, 1970 from Applicant's sole subsidiary bank. Since that transaction was essentially a reorganization of Applicant's existing data processing activities, it does not appear to have had any significant adverse effects on competition at that time. At present, Datacenter competes with three general data processing services in the Ponca City market ${ }^{3}$ to provide certain data processing services for municipalities and businesses. From the facts of record it does not appear that the retention of Datacenter by Applicant would have any significant adverse effects on existing or potential competition.

[^46]A.D.P.C. was formed de novo in 1971, and thus, the acquisition of its shares by Applicant does not appear to have had any significant adverse effects on competition at that time. A.D.P.C. is highly specialized in that it only provides finan-cially-related data processing services for public school systems throughout Oklahoma. On the basis of the record, it does not appear that the retention of A.D.P.C. by Applicant would have any significant adverse effects on existing or potential competition. The retention of Datacenter and A.D.P.C. by Applicant should provide benefits to the public by assuring the respective customers of those companies of a continued and convenient source for financially-related data processing services. Moreover, there is no evidence in the record indicating that retention of Datacenter or A.D.P.C. would lead to any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices or other adverse effects on the public interest.
With respect to Applicant's financial condition, the Board notes that, in the past, Applicant has incurred substantial debt in order to purchase its own shares. ${ }^{4}$ Such practice, known as "bootstrapping," is of concern to the Board because it has the potential to reduce or eliminate equity in a bank holding company; place substantial pressure on the holding company's subsidiary bank(s) to pay excessive dividends to service the debt; and encourage undue risk-taking aimed at increasing the earnings of its subsidiary bank(s) in order to service the debt. As of May 15, 1976, § 225.6 of Regulation Y (12 CFR § 225.6) requires that, under certain conditions, a holding company planning to make purchases of its own equity securities must notify the Board 45 days prior to any such transaction. The purpose of this recent amendment is to assist the Board in supervising bank holding companies by providing advance notice of holding company redemptions that could have a significant impact on the holding company's capital structure. Accordingly, future redemptions by Applicant of its equity securities may be subject to this prior notification requirement, and if circumstances indicate that the proposed transaction would violate applicable law, or create an unsafe or unsound condition in Applicant, the Board would, if nec-

[^47]essary, use its cease and desist authority to prevent the transaction.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under $\S$ 4(c)(8) is favorable. Accordingly, the applications are hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective June 30, 1976.

Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.
(Signed) Griffith L. Garwood,
[seal] Assistant Secretary of the Board.
Security Pacific Corporation,
Los Angeles, California
Order Approving Acquisition of
The Bankers Investment Company
Security Pacific Corporation, Los Angeles, California ('Applicant'"), a bank holding company within the meaning of the Bank Holding Company Act ("Act'), has applied for the Board's approval, under § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), to acquire voting shares of The Bankers Investment Company, Hutchinson, Kansas ("BIC'), and thereby to acquire control of the wholly-owned subsidiaries of BIC. As a result of consummation of this proposal Applicant, through BIC's subsidiary companies, would engage in consumer finance activities, act as agent for the sale of credit life and credit accident and health insurance related to extensions of credit by the offices of BIC, and act as underwriter for credit life and credit accident and health insurance directly related to extensions of credit by the holding company system. ${ }^{1}$ Such

[^48]activities have been determined by the Board to be closely related to banking ( $12 \mathrm{CFR} \S$ 225.4(a)(1), (9), and (10)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 16616). The time for filing comments and views has expired, and the Board has considered the application and all comments received in the light of the public interest factors set forth in § 4(c)(8) of the Act.

Applicant, the second largest banking organization in California, controls one subsidiary bank, Security Pacific National Bank, Los Angeles, California ("Bank'"). Bank controls deposits of $\$ 9.9$ billion, representing 12.3 per cent of the total deposits in commercial banks in the State, ${ }^{2}$ and offers a full range of banking services. Applicant engages in a variety of permissible nonbank activities through its nonbanking subsidiaries. Applicant's nonbank activities include commercial finance, venture capital investment, mortgage banking, leasing, insurance agency, and investment advisor activities; and through Security Pacific Finance Corp. ("SPFC'), which was organized de novo in 1974, Applicant engages in consumer finance activities. SPFC has opened 11 offices as of March, 1976, all but one of which are located in California.
BIC (gross receivables of approximately $\$ 40$ million, as of December 31, 1975) operates 57 offices in nine south-central States: Colorado, Idaho, Kansas, Missouri, New Mexico, Oklahoma, Texas, Utah, and Wyoming, with the largest group of offices, 23, being located in Kansas. Through these offices, BIC engages in direct consumer, agricultural, and commercial lending, and the purchase of instalment sales contracts. ${ }^{3}$ Additionally, BIC conducts a nationwide loan-by-mail program from its principal office in Hutchinson, Kansas. BIC engages in the sale of credit life and credit accident and health insurance related to its extensions of credit. BIC also presently engages in the sale of other lines of insurance, but Applicant has committed that BIC will cease to engage in the sale of these other lines of insurance following consummation of this proposal. Through
${ }^{2}$ All banking data are as of June 30, 1975.
${ }^{3} \mathrm{BIC}$ presently issues investment certificates as a source of funding. Applicant has committed to cause BIC to cease the issuance of investment certificates upon consummation of the proposed acquisition.
two subsidiaries, BIC engages in the underwriting of various lines of insurance; however, Applicant has committed that, following consummation of this proposal, BIC's underwriting activities will be limited to the underwriting of credit life and credit accident and health insurance directly related to extensions of credit by Applicant's creditgranting subsidiaries.

None of Applicant's subsidiaries presently competes in any market in which offices of BIC are located; ${ }^{4}$ nor does it appear likely that any significant competition would develop in the future between BIC and any of Applicant's subsidiaries. Applicant's existing consumer finance subsidiary is not regarded as a likely entrant into any of the markets served by BIC in view of its small size and its past record of limiting its expansion primarily to California. Accordingly, the Board concludes that consummation of the proposed acquisition would not result in a significant adverse effect on competition with respect to this activity in any relevant area. In addition, it does not appear that Applicant's acquisition of BIC's insurance activities would have any significant effect on competition in view of the limited nature of the insurance activities which Applicant proposes that BIC would retain following consummation of the acquisition.

It is anticipated that BIC's affiliation with Applicant will afford BIC access to Applicant's expertise and substantial financial resources, thus enabling it to compete more effectively with other consumer finance companies in the areas in which it operates. Applicant states that, as a result of this proposal, BIC would be able to expand its lending activities. Applicant proposes to provide BIC customers with a broader range of lending services and to increase the availability of largersized loans, loans with longer maturities, and loans at lower annual percentage rates.

Credit life and credit accident and health insurance are generally made available by banks and other lenders and are designed to assure repayment of a loan in the event of death or disability of the borrower. In connection with its addition of the underwriting of such insurance to the list of permissible activities for bank holding companies, the Board stated:

[^49]To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally, such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. (12 CFR $\$ 225.4(\mathrm{a})(10) \mathrm{n} .7$ )
Applicant has stated that following consummation of the acquisition, BIC will offer at reduced premiums the several types of credit insurance policies that it will reinsure. Since credit life insurance will be sold in each of the nine States in which BIC operates as well as by Bank in California and SPFC in California and Colorado, Applicant's proposed rate reductions vary according to the permissible rate structures in each respective State. Thus, Applicant's proposal involves rate reductions for reducing-term single and joint credit life insurance at premium rates ranging from 2 per cent to 15 per cent below the rates presently charged in each of the respective States. Applicant does not propose to have BIC underwrite the credit accident and health insurance sold by the California offices of its subsidiaries. However, such insurance sold by SPFC's Colorado office and the offices of BIC in the above-mentioned nine States will be offered at rates ranging from 3.7 per cent to 5 per cent below the premiums presently charged in each of the respective States. The Board is of the view that the reductions in insurance premiums that Applicant proposes to establish are in the public interest.

There is no evidence in the record indicating that consummation of the proposed transaction would result in any undue concentration of resources, decreased or unfair competition, conflicts of interest, unsound banking practices, or other adverse effects on the public interest. In its consideration of this application, the Board has taken into account several commitments made by Applicant with respect to the discontinuance, following consummation of the proposed acquisition, of certain impermissible nonbank activities in which BIC is presently engaged.

Based upon the foregoing and other considerations reflected in the record, including a commitment by Applicant, with respect to its proposed underwriting activities, to maintain on a continuing basis the public benefits that the Board has found to be reasonably expected to result from this proposal and upon which the approval of that aspect of this proposal is based, the Board has determined that the balance of the public interest
factors the Board is required to consider under § $4(c)(8)$ is favorable. Accordingly, the application is hereby approved. This determination is conditioned upon Applicant's obtaining approval of the proposed transaction from the Commissioner of Insurance of the State of Kansas prior to consummation. This determination is further subject to the conditions set forth in $\S 225.4$ (c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of San Francisco, pursuant to authority hereby delegated.

By order of the Board of Governors, effective June 21, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, Partee, and Lilly.
[SEAL] Assistant Secretary of the Board.

## Walter E. Heller International Corporation, Chicago, Illinois

## Order Approving Acquisition of PepsiCo Leasing Corporation

Walter E. Heller International Corporation, Chicago, Illinois, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 4(c)(8) of the Act ( 12 U.S.C. § 1843 (c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2) (1976)), to acquire PepsiCo Leasing Corporation, Lexington, Massachusetts ('PLC'), a company that, directly or indirectly through subsidiaries, engages in the activities of commercial finance, full-payout leasing of personal property, and financially-related data processing. Such activities have been determined by the Board to be so closely related to banking as to be a proper incident thereto ( 12 CFR $\%$ 225.4(a)(1), (6), and (8) (1976)).

Notice of the application, affording opportunity for interested persons to submit comments and
views on the public interest factors, has been duly published (41 Federal Register 21701 (1976)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in the light of the public interest factors set forth in $\S 4(\mathrm{c})(8)$ of the Act (12 U.S.C. § 1843(c)(8)).

Applicant is the fifth largest banking organization in Illinois by virtue of its control of one bank with total deposits of $\$ 1$ billion, representing approximately 1.7 per cent of total deposits held by commercial banks in the State. ${ }^{1}$ Applicant is also the Nation's twelfth largest finance company, based on total assets of $\$ 3.3$ billion, as of December 31, 1975. Its numerous nonbanking subsidiaries are engaged, inter alia, in the activities of factoring, commercial finance, full-payout leasing, data processing, and mortgage banking. ${ }^{2}$

PLC (total assets of $\$ 215.4$ million as of December 31, 1975) is a wholly-owned subsidiary of PepsiCo, Inc., New York, New York. PLC has a total of 17 wholly-owned subsidiaries which have offices located in nine States and certain foreign countries. ${ }^{3}$ PLC and its subsidiaries primarily engage in the nonleveraged leasing of a wide range of personal property and equipment (receivables from these activities account for approximately 95 per cent of PLC's gross receivables). Certain of PLC's current leasing transactions do not appear to be within the scope of nonbanking activities that are permissible for bank holding companies pursuant to the Act and the Board's Regulation Y. Therefore, Applicant has

[^50]committed to the Board that it will acquire and conduct only those leasing activities of PLC that are within the scope of the leasing requirements set forth in section 225.4(a)(6)(a) of the Board's Regulation Y (12 CFR § 225.4(a)(6)(A) (1976)). In connection with its leasing activities, PLC also engages in a small amount of commercial finance activities that represent approximately 2 per cent of its gross receivables. In addition, PLC presently performs financially-related data processing services for itself and its subsidiaries and its parent company PepsiCo, Inc. and subsidiaries thereof. After consummation of the proposed transaction, PLC will continue to provide its own data processing services and will continue to perform fi-nancially-related data processing services for PepsiCo, Inc. and its subsidiaries until such organizations can obtain satisfactory alternative services.

As indicated previously, Applicant will not acquire lease receivables from PLC that do not meet the full-payout requirements of the Board's Regulation Y. In this regard, PLC had net receivables in full-payout personal property leasing in the amount of approximately $\$ 191.5$ million as of September 30, 1975; as of the same date, Applicant had net receivables in full-payout personal property leasing totalling approximately $\$ 31.4$ million. While PLC has lease receivables outstanding in 44 of the 50 States, it derives approximately 53.4 per cent ( $\$ 102.3$ million) of its total full-payout lease receivables from within those SMSA's wherein its and its subsidiaries' offices are located. ${ }^{4}$ With the exception of the Philadelphia and Cincinnati SMSA's, Applicant also has offices located within these areas, with the most competition between Applicant and PLC being in the New York, Chicago, and Los Angeles SMSA's. ${ }^{5}$ However, in view of the large number of competitors in the areas where Applicant and PLC compete, including all of the major national and regional leasing firms, and the intensity of competition in these areas, the amount of existing and future competition that would be eliminated

[^51]as a result of this proposal is considered, at the most, to be slight. In addition, it appears from the facts of record that acquisition of PLC would not give Applicant a dominant position in any relevant market.

With respect to PLC's commercial finance activities, PLC, as of September 30, 1975, had notes receivable outstanding totalling $\$ 1.2$ million, all of which were derived from SMSA's where PLC or its subsidiaries maintain offices. In the same areas, Applicant, as of the same date, had notes receivable outstanding of approximately $\$ 169.3$ million. In view of the large number and size of banks and finance company competitors in these areas and PLC's relatively small involvement in this activity, it does not appear that Applicant's acquisition of PLC's commercial finance activities would have any signficant adverse effects on either existing or future competition.

Due to the nature of PLC's data processing activities, which have been limited to servicing its needs and those of its parent organization, it does not appear that Applicant's acquisition of these data processing activities would have any significant effect on existing or future competition.
It appears that consummation of this proposal would not result in any undue concentration of resources, conflicts of interest, unsound banking practices, or any other adverse effects on the public interest. Applicant's acquisition of PLC should make PLC a more effective competitor with the major equipment leasing companies operating in its markets, since it will have access to Applicant's significant financial and managerial resources, and will benefit from certain improved efficiencies in its operations. In this regard, it is noted from the record that PepsiCo, Inc. has apparently determined to dispose of PLC's leasing activities that are unrelated to PepsiCo's commercial business activities, and that if a suitable purchaser of PLC is not found, it is likely that PLC's assets would be liquidated. In the Board's judgment, the slight amount of competition between Applicant and PLC that would be eliminated as a result of this proposal is outweighed, under the circumstances, by the public benefits that will result from PLC's affiliation with Applicant.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject
to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Chicago pursuant to authority hereby delegated.

By order of the Board of Governors, effective June 28, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Jackson, Partee, and Lilly. Absent and not voting: Governor Coldwell.
(Signed) Griffith L. Garwood,
[seal] Assistant Secretary of the Board.

## Orders Under Sections 3 and 4 Of Bank Holding Company Act

Nebraska Banco, Inc., Ord, Nebraska

Order Denying<br>Formation of Bank Holding Company

Nebraska Banco, Inc., Ord, Nebraska, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act ( 12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 100 per cent of the voting shares of Nebraska State Bank, Ord, Nebraska ("Bank'"). Applicant has also applied, pursuant to $\S 4(\mathrm{c})(8)$ of the Act ( 12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y , for permission to acquire all of the assets of Pierce Agency, Inc., Ord, Nebraska ("Agency"), a company that engages in the activities of a general insurance agency in a town with a population of less than 5,000 persons. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a) (9)(iii)).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S \S 3$ and 4 of the Act ( 40 Federal Register 54305). The time for filing comments and views has expired,
and the applications and all comments received ${ }^{1}$ have been considered in light of the factors set forth in §3(c) of the Act, and the considerations specified in § 4(c)(8) of the Act.

Applicant is a nonoperating corporation formed for the purposes of becoming a bank holding company through the acquisition of Bank, and engaging in the business of a general insurance agency through the acquisition of Agency. The proposed transaction involves the transfer of control of Bank from individuals to a corporation owned by the same individuals. Upon acquisition of Bank, Applicant would control 0.2 per cent of the total deposits in commercial banks in Ne braska.

Bank holds deposits of approximately $\$ 11.1$ million, ${ }^{2}$ representing 32.1 per cent of the total deposits in commercial banks in the relevant banking market, ${ }^{3}$ and ranks as the second largest of four commercial banks operating therein. Although principals of Applicant control eight onebank holding companies in Nebraska, none of the subsidiary banks of those holding companies are located within the relevant market. However, one of Applicant's principals also controls the market's third largest bank, North Loup Valley Bank, North Loup, Nebraska ('‘Valley Bank'), with deposits representing 14.9 per cent of total market deposits. Therefore, to the extent that Board approval of the subject proposal would facilitate the maintenance of the existing ties between Bank and Valley Bank, such approval would have adverse effects on both existing and potential competition.

Since Applicant does not propose to provide any significant changes in the operations or services of Bank, the considerations relating to the convenience and needs of the community to be served are consistent with, but lend no weight toward, approval of the application.

[^52]Under § 3(c) of the Act, the Board is required to consider the financial condition, managerial resources and future prospects of the bank holding company involved and the bank to be acquired. In acting on one-bank holding company formations, the Board has been less restrictive than otherwise with respect to financial considerations in cases that involve a current or prospective owner-chief executive establishing a holding company to hold the individual's direct equity interest in the bank. The Board regards such a policy as being in the public interest in order to facilitate management succession on the community level at the Nation's many smaller, independent banks. However, the Board has long held that, as a general matter, such a less restrictive policy with respect to financial considerations should not apply to those situations where the individuals are involved in more than a single one-bank holding company, such as those situations involving individuals that are engaged in establishing a series or chain of one-bank holding companies. ${ }^{4}$ The Board is also of the opinion that in analyzing managerial resources of a bank that is part of a chain of one-bank holding companies it should look beyond the subject bank involved in an application to the other banks that are part of that chain. In such situations, the Board believes that it is more appropriate to analyze such organizations under the standards that are normally applicable in analyzing acquisitions by multibank holding companies. The application of multibank holding company standards in such circumstances appears appropriate because of the interdependence of the banks in a chain of commonly-owned one-bank holding companies and the distinct possibility that the financial and managerial resources of one or more of the banks in the chain may be used to support the operations of other members in the banking group.

As mentioned previously, principals of Applicant are also principals of eight other one-bank holding companies and are principal shareholders in an additional three banks. The Board notes that three of the subsidiary banks that principals of
${ }^{4}$ See Board's Order dated January 15, 1974, denying the application of B H Co., Inc., Hardis, Montana ( 60 Federal Reserve Bulletin 123 (1974)); and Board's Order dated October 17, 1975, approving application of Commercial Bankshares, Inc., Grand Island, Nebraska (61 Federal Reserve Bulletin 807 (1975)).

Applicant control through one-bank holding companies reflect a financial condition that the Board considers less than satisfactory. Furthermore, the Board notes that during the past five years the financial condition of these three banks has continued to be less than satisfactory under the control of Applicant's principals. Such circumstances weigh against approval of the subject application. In such instances, the Board is of the opinion that principals of Applicant should direct their managerial resources toward improving the banks presently under their control before seeking to establish additional holding companies. It should be noted that considerations relating to the present financial condition and managerial resources of Bank are considered satisfactory; however, the Board is of the opinion that it should not facilitate the expansion of a chain of one-bank holding companies when certain of the banks in that chain are in need of improvement, nor would the public interest be served by such action.

On the basis of all of the facts of record, and in light of the factors set forth in § 3(c) of the Act, it is the Board's judgment that consummation of the subject proposal would not be in the public interest and that the application should be denied. ${ }^{5}$

By order of the Board of Governors, effective June 14, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Coldwell, Jackson, and Lilly. Absent and not voting: Governors Wallich and Partee.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.
${ }^{5}$ Denial of the Applicant's § 3(a)(1) application renders moot Board action on the accompanying § 4(c)(8) application.

North Lawndale
Economic Development Corporation, Chicago, Illinois

## Order Denying <br> Formation of Bank Holding Company

North Lawndale Economic Development Corporation, Chicago, Illinois, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act ("Act") ( 12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 90 per cent of the voting shares of Community Bank of Lawndale, Chicago, Illinois ('Bank'), a proposed new bank.

At the same time, Applicant has applied, pursuant to § 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y to continue to engage in various community development ventures in an economically depressed area of Chicago, Illinois.
Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with §§ 3 and 4 of the Act ( 41 Federal Register 3873). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act and the considerations specified in $\S 4(\mathrm{c})(8)$ of the Act.
On the basis of the record, the applications are denied for the reasons set forth in the Board's Statement, which will be released at a later date.
By order of the Board of Governors, effective June 7, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Governor Wallich.
(Signed) Griffith L. Garwood,
[seal] Assistant Secretary of the Board.

## Statement

North Lawndale Economic Development Corporation, Chicago, Illinois, applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act ("Act’) (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 90 per cent of the voting shares of Community Bank of Lawndale, Chicago, Illinois ('Bank"), a proposed new bank. At the same time Applicant applied, pursuant to § 4(c)(8) of the Act (12 U.S.C. § $1843(\mathrm{c})(8)$ ) and § 225.4(b)(2) of the Board's Regulation Y to continue to engage in various community development ventures in an economically depressed area of Chicago, Illinois. By Order of June 7, 1976, the Board acted to deny those applications for reasons which are set forth in this satement.
Applicant is a corporation formed in 1968, for the stated purpose of expanding and securing the economic well-being, physical redevelopment and stability of the community in which it operates, an area known as the Midwest Impact Area located on the west side of Chicago, Illinois. Applicant is engaged in the development of an industrial
park, a 1,000 -bed mixed-use health care facility, and property management, and proposes to engage in long-term development, management, and ownership of other commercial, residential, and industrial real estate property, including an additional industrial park, a shopping center, residential housing, a cable television franchise, and the formation of Community Bank of Lawndale. All of the proposals would be developed in an area characterized by high unemployment and substantial poverty.

Applicant received Federal grants of funds pursuant to Subchapter VII (Community Economic Development) of a Federal statute referred to as the Community Services Act of 1974 [42 U.S.C. §§ 2981 et seq.]. The Congresssional statement of purpose of this subchapter is "to encourage the development of special programs by which the residents of urban and rural low-income areas may . . . with appropriate Federal assistance, improve the quality of their economic and social participation in community life in such a way as to contribute to the elminination of poverty and the establishment of permanent economic and social benefits." The Community Services Administration ("CSA") is the Federal agency providing much of the grants of funds for Applicant's ventures. CSA expects community development corporations such as Applicant to become profitable, self-sustaining enterprises in about eight to ten years.

While this is an application under § 3(a)(1) of the Act to form a bank holding company, since Applicant's express purpose is community development activities and Applicant does not propose to terminate such activities, the Board must determine whether such activities are permissible under § $4(\mathrm{c})(8)$ of the Act in order to approve the application. In determining whether a proposal is permissible under § 4(c)(8) of the Act the Board must first determine that any nonbank activity involved is closely related to banking. If the Board determines that the nonbank activity is closely related to banking, the Board must then examine the public benefits expected to be derived from the bank holding company engaging in the activity, and weigh them against possible adverse effects.

The Applicant has not made any effort to show that the individual activities themselves are closely related to banking but rather states that its overall activity qualifies as an activity which the Board has adopted as permissible under § 4(c)(8),
namely, ' making equity and debt investments in corporations or projects designed primarily to promote community welfare, such as the economic rehabilitation and development of low-income areas."

The Board's views as to the scope of this activity are set forth in a published Interpretation (12 CFR 225.127). In adopting this activity, the Board had in mind the history of the 1970 Amendments to the Act. At the time Congress was considering these amendments, the Board proposed economic development investments "subject to careful limitations", as being a type of nonbank investment that might be appropriate for bank holding companies.

The "closely related" determination with respect to this activity is grounded upon the ability of banks to make investments of this type. The Board and the Comptroller of the Currency previously have expressed views encouraging or permitting banks to make investments in community development projects on a limited basis. Such investments by banks are regarded as being primarily contributory in nature. It is not the nature of the community development activity itself wich renders it closely related to banking, but rather its contributory aspects. Since banks are permitted to make limited contributions of a charitable nature in community development projects, a bank holding company's participation in such projects may be regarded as being closely related to banking to the extent it is in the nature of a limited charitable contribution.

In accordance with the above basis for the adoption of the activity of making investments in community development projects, the Board has appropriately specified and implied limitations on the conduct of the activity by bank holding companies, in the Board's published Interpretation regarding this activity ( 12 CFR 225.127). Further, as indicated in the Interpretation, "Bank holding companies possess a unique combination of financial and managerial resources, making them particularly suited for a meaningful and substantial role in remedying our social ills. Section 225.4(a)(7) is intended to provide an opportunity for them to assume such a role."

The application before the Board does not involve the situation envisioned in the regulation where a traditional bank holding company whose activities are predominantly financial is bringing the expertise gained in its banking business to bear on community problems and fulfilling its civic
responsibility. Rather than being engaged in community development activities to a limited extent, Applicant has no other activities, and the question arises whether Applicant's activities, even though not covered by the present regulation, can be found to be closely related to banking. As indicated above, Applicant is designed to promote community development and, although it is presently almost entirely Federally funded, Applicant has been formed as a "for-profit" corporation with the intention that Federal grants of funds will not continue indefinitely and that it will become a diversified, viable, self-sustaining, profit-making, commercial enterprise. If Applicant's activities cannot be found to be closely related to banking within the scope of the Act, Applicant's ownership of Bank while engaging at the same time in its proposed nonbanking activities would create a situation inconsistent with the Congressionally mandated separation of banking from nonbanking businesses.

While the Board recognizes that Applicant's activities may well produce needed benefits to the community, the Act nevertheless requires that the Board determine the "closely related" issue before giving consideration to the public benefit factors. Each individual activity engaged in or proposed to be engaged in by Applicant is a commercial activity and, on an individual basis, there is nothing inherent in any of the activities which would render them closely related to banking. In the Interpretation, as well as in a previous decision involving this section of the Regulation, the Board has stated that, an activity should be closely examined to determine whether it is designed primarily to promote community welfare. This test has some relevance when applied to a limited investment by a "traditional"' bank holding company in order to differentiate between investments which would be considered in the nature of a limited contribution for social uses, and thus closely related to banking, and investments which are primarily commercial ventures designed for profit and thus not closely related to banking. While each of Applicant's present and proposed ventures is a commercial venture designed for profit, this test is not useful as applied to Applicant since, as a whole, Applicant has no purpose other than to promote community welfare.

The question before the Board is whether it may find that a community development corporation, or for that matter, any enterprise primarily engaged in contributory activities for social purposes, could
be considered to be engaged in activities closely related to banking. Congress might well be considered to have focused on this type of question since it has specifically exempted from the prohibitions of § 4 certain family-owned corporations and labor, agricultural, and horticultural organizations which are exempted from taxation under the Internal Revenue Code and which also own banks. Congress, however, did not exempt charitable organizations or community development corporations. Since there is nothing inherent in the activity which renders it, in itself, closely related to banking, other than its contributory aspect when engaged in to a limited extent, the Board concludes that it does not have the legal authority to approve Applicant's proposal. Rather, it is a matter for Congress to decide whether to exempt community development corporations or other organizations which contribute to social needs from the prohibitions of § 4 of the Act. Accordingly, the Board is constrained to deny Applicant's proposal on the basis that Applicant's existing and proposed activities are not closely related to banking within the meaning of § 4(c)(8) of the Act.

In view of its determination that it is not within its power to approve this application, the Board has not had occasion to consider the other statutory factors. That is, whether approval of the application would provide benefits to the public such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects. The Board has, however, noted that the North Lawndale community is in need of banking facilities and the Board, to help ensure maximum responsiveness to community needs, has always encouraged the ownership of local banks by individuals from the local community. Furthermore, in its regulation regarding projects to promote community welfare, the Board has encouraged bank holding companies to fulfill their civic responsibilities. However, in this instance, the Board is unfortunately unable to find that the Bank Holding Company Act provides the authority necessary to approve these applications in the form proposed by Applicant.

Board of Governors of the Federal Reserve System, June 9, 1976.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

## Order for Hearing

First Arkansas Bankstock Corporation, Little Rock, Arkansas

First Arkansas Bankstock Corporation ('‘FABCO'), Little Rock, Arkansas, has filed a petition, dated December 16, 1975, requesting the Board of Governors of the Federal Reserve System to make a determination pursuant to the provisions of the Bank Holding Company Act of 1956, as amended ( 12 U.S.C. § 1841 et seq.), and the Board's Regulation Y (12 CFR § 225), that FABCO presently exercises a controlling influence over the management and policies of United Banks of Arkansas, Inc. ("United'), a registered bank holding company; and that through United, FABCO exercises a controlling influence over the management and policies of the First National Bank in Mena ("Bank"), Mena, Arkansas. FABCO further requests that the Board determine that FABCO has continuously exercised a controlling influence over United and Bank since prior to December 31, 1970, the effective date of the 1970 Amendments to the Bank Holding Company Act.

Notice of FABCO's petition was published in the Federal Register on January 5, 1976 (41 Federal Register 827). In that notice the Board invited interested persons to file written comments and/or request a hearing with respect to FABCO's requested determination. Subsequently, written submissions were filed by FABCO and certain other interested parties. FABCO did not request a hearing. Mr. William J. Bowen, on behalf of Commercial National Bank of Little Rock and certain other Arkansas banks, filed a request for an informal hearing. However, Mr. Bowen's request was not timely.

Although a formal evidentiary hearing has not been requested, the Board has examined the submissions of FABCO and Mr. Bowen, as well as other information available to the Board, and has concluded that there are unresolved substantive issues of fact with regard to the relationship between FABCO and United, and through United, between FABCO and Bank, which can best be resolved by a proceeding conducted pursuant to the Board's Rules of Practice for Formal Hearings (12 CFR Part 263).

Accordingly, it is hereby ordered, that a public hearing with respect to this matter be held before

Philip J. LaMacchia, former Administrative Law Judge, now retired, at such time and place as he shall designate subsequent to a prehearing conference. This hearing shall be conducted in accordance with the Board's Rules of Practice for Formal Hearings (12 CFR Part 263).

It is further ordered, that the basic issues to be considered at said hearing are:
(1) whether FABCO directly or indirectly exercises a controlling influence over the management and policies of Bank, and if so, at what point in time did such a controlling influence commence;
(2) whether FABCO has, at any time, directly or indirectly or acting through one or more other persons owned, controlled, or had power to vote 25 per centum or more of any class of voting securities of Bank; and
(3) whether FABCO has, at any time, controlled Bank through control in any manner of the election of a majority of the directors of Bank.

It is further ordered, that any person desiring
to give testimony, present evidence, or otherwise participate in these proceedings should file with the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, on or before August 9, 1976, a written request containing a statement of the nature of the petitioner's interest in the proceedings, the extent of the participation desired, and a summary of the matters concerning which the petitioner desires to give testimony or submit evidence. Requests to participate in the proceedings will be submitted to Judge LaMacchia for his determination, and persons submitting them will be notified of his decision. Submission of the names and identities of possible witnesses can be made to Judge LaMacchia at such time as the date for the hearing has been determined.

By order of the Board of Governors, effective July 1, 1976.
(Signed) Theodore E. Allison,
[seal]
Secretary of the Board.

## Orders Approved Under Bank Holding Company Act

## By the Board of Governors

During June 1976, the Board of Governors approved the applications listed below. ## Order Approved Under Bank Merger Act-

## Announcements

## REGULATIONS B AND Z: Amendments

The Board of Governors has amended its regulations, effective July 30,1976 , to implement recent changes in consumer credit protection laws intended to make compliance easier, especially for small creditors.

The Board amended its Regulation B (Equal Credit Opportunity) and Regulation $Z$ (Truth in Lending) to authorize certain members of its staff to issue interpretations of the regulations. Creditors acting in conformity with these interpretations cannot be held liable for violating the regulations or the laws that the regulations implement.

The Congress had recently amended the Truth in Lending and Equal Credit Opportunity Acts to give the Board authority to permit such interpretations by its staff, in response to concerns expressed by creditors (especially small creditors, with limited access to legal counsel) about the difficulty of complying with the many complex requirements of the Acts.

The official staff interpretations will clarify technical points in the Board's Regulations B and Z that do not have broad policy implications. The staff interpretations will be published in the Federal Register.

The Board simultaneously established procedures for Board review of staff interpretations upon formal request by interested parties.

The Board of Governors has also amended its Regulation $Z$ to spell out the way in which finance charges must be described, effective August 6, 1976.

In some instances extensions of credit may involve more than one type of finance charge, such as charges for interest, a loan fee, or an investigation fee. In these cases under the regulation, each type of finance charge must be described. However, the amended regulation indicates that when only one type of finance charge is involved, the nature of that charge need not be described.

The amendment of the regulation, which replaces an interpretation of Regulation Z, had been proposed for public comment on March 2.

## REGULATIONS D AND Q: Amendments and Criteria

The Board of Governors has adopted amendments to its regulations to provide greater flexibility to banks in adding to their capital structure.

Together with these amendments-to Regulation D (Reserves of Member Banks) and Regulation $Q$ (Interest on Deposits)-the Board made public the criteria that it will use in evaluating requests by State member banks for approval of new subordinated debt and debenture issues as additions to the banks' capital structure.

The most significant change in the regulatory amendments adopted-from those proposed by the Board on July 2, 1975-was the introduction of a 5-year minimum maturity requirement for any note in a serial issue. Another new provision allows Federal bank regulators to waive certain repayment requirements in exigent circumstances.

The criteria have been simplified and made more flexible.

The regulatory amendments and the criteria were effective July 26,1976 . The Comptroller of the Currency is issuing similar criteria for national banks. The Federal Deposit Insurance Corporation is issuing regulatory amendments substantially similar to those adopted by the Board.

## The Regulatory Amendments

The amendments to Regulations $D$ and $Q$ revise the definition of deposits in those regulations. The principal amendments, as adopted, provide that:

1. An issue of subordinated debt to be used as an addition to the capital of a State member bank will be free of reserve requirements and interest rate ceilings if the issue has an average maturity
of 7 years or more. (This modifies the present requirement that a subordinated debt obligation of a member bank must have an original maturity of 7 years or more in order to qualify for exemption from reserve and interest rate requirements.) In a related action the Board issued an interpretation explaining the calculation of weightedaverage maturity.
2. No note in a serial issue may have a maturity of less than 5 years.
3. In exigent circumstances the appropriate Federal bank regulatory agency may waive requirements in the regulations that scheduled repayments be made at least annually and in amounts not less than in the previous year.
4. The issuing bank must obtain the approval of the appropriate Federal bank regulator for any redemption of an issue prior to maturity, or for any payment pursuant to acceleration of maturity in event of default.
5. Federal bank regulators may make exceptions, in certain limited circumstances, to the rule that an obligation that is exempt from reserve requirements and interest rate ceilings must have a minimum denomination of $\$ 500$.

The amendments to Regulations D and Q-as well as the criteria-apply to new debt issues acted upon after the effective date of the amendments. In all cases, the appropriate Federal bank regulator is the Comptroller of the Currency for national banks, the Board of Governors of the Federal Reserve System for State member banks, and the Federal Deposit Insurance Corporation for State nonmember banks.

## The Criteria

In connection with its adoption of amendments to the definitions of deposits in Regulations D and Q, the Board approved issuance of criteria to be applied in evaluating requests by State member banks for approval of new subordinated notes and debentures as an addition to the capital structure of the issuing bank.

The application of these criteria is intended to encourage the accumulation by State member banks of an adequate cushion of equity capital, to protect against excessive concentrations of debt repayments in any 1 year, and to promote safe and sound banking practices.

In order to make the criteria more flexible than those previously proposed, the Board has revised
the earnings coverage test, the retained net income test, and the test relating to avoidance of debt repayment concentrations by not specifying numerical standards for these criteria. The Board has also incorporated a more general version of the requirement for accumulation of equity over the life of the debt in the retained net income test.

A new provision, intended to be of assistance to smaller banks, is an exception to the Board's general opposition to including interbank debt as capital. It permits a State member bank to include as capital up to $\$ 2$ million of subordinated debt issued to an unrelated banking organization. There are, in addition, a number of technical changes.

In making known its criteria for assessing subordinated debt and debenture issues as additions to capital, the Board stressed that approval of applications for debt issues by banks is not to be regarded as a substitute for, but rather as a supplement to, normal investor evaluation of the proposed issue.

The Board also stressed that the criteria are not to be regarded, and would not be administered, as a rigid set of rules in addition to those set forth in Regulations D and Q. Rather, the Board expects to administer them flexibly, taking into account the range of financial and other information available. These other indicators include the recent trend and stability of earnings, the impact on recent earnings of unusual income and expenses, recent acquisitions or mergers through purchase of assets, prospective growth of the bank, quality of management, quality of assets, earnings coverage of loan losses, sensitivity of interest income and expense to changes in market rates, degree of reliance on volatile sources of funds, the relative strength of earnings of any nonbank affiliates or subsidiaries, and the bank's need for additional capital and prospects for raising new equity.

Criteria for evaluation by the Board of a subordinated debt issue as an addition to a State member bank's capital structure are as follows:

1. MAXIMUM RATIO OF DEBT TO EQUITY. The total amount of outstanding subordinated capital notes and debentures of a bank, including the debt proposed to be issued but excluding any debt to be retired out of the proceeds, should not exceed 50 per cent of a State member bank's equity capital base at the time of the new issue. However, banks with significant asset or management problems generally would not be
entitled to that high a percentage. For this test, a bank's equity capital base includes capital stock, surplus, undivided profits, capital reserves, and all reserves for losses on loans, including any related deferred tax liability.
2. EARNINGS COVERAGE OF FIXED CHARGES. A State member bank proposing to issue subordinated debt should demonstrate that its recent income record is sufficient to provide clear assurance of that bank's continuing ability to pay the additional fixed charges out of current earnings.
3. RETAINED NET INCOME. A State member bank proposing to issue subordinated debt should demonstrate that its recent level of retained net income, viewed in relation to intended dividend policy, exceeds annual pro forma amortization of all subordinated notes and debentures by a sufficient margin to clearly assure that bank's ability to replace each debt issue with equity by the time of maturity.
4. AVOIDANCE OF DEBT REPAYMENT CONCENTRATIONS. A State member bank proposing to issue subordinated debt should avoid undue concentration of debt repayment in any 1 year.

## 5. APPROVAL OF INTERBANK DEBT

 TRANSACTIONS. In general, the Board does not intend to approve a subordinated note or debenture issued by one bank directly or indirectly (through a holding company or otherwise) to a banking organization other than the issuing bank's parent holding company, except when that issue, together with other subordinated debt outstanding at that bank and held by such banking organization, exceeds $\$ 2$ million.
## 6. COVENANTS IN CONFLICT WITH SAFE

 AND SOUND BANKING PRACTICES. No indenture or other contract covering the issuance of a subordinated note or debenture by a State member bank shall include any covenants, restrictions, or other terms that are determined by the Board to be inconsistent with safe and sound banking practices. Examples of such terms are those regarded as impairing the ability of the bank to comply with statutory or regulatory requirements regarding disposition of assets or ability to incur additional debt, limiting the ability of the Board or the chartering authority to take any necessaryaction to resolve a problem bank situation, or unduly interfering with the ability of the bank to conduct normal banking operations.

## OTC MARGIN STOCKS: Amended Criteria

The Board of Governors has amended, effective August 6, 1976, the criteria that over-the-counter (OTC) stocks must meet and continue to meet to be included on its List of OTC Margin Stocks. More than 800 stocks are now on the List and subject to the Board's margin regulations.

The Board's action reflects the changes that have occurred in the OTC market in recent years, particularly the increased competition among the securities markets and the impact of the National Association of Securities Dealers Automated Quotation System (NASDAQ).

## REGULATION Q: Order Granting Temporary Suspension of Early Withdrawal Penalty

The Board of Governors has made it possible for member banks to give special emergency financial assistance to victims of the Teton Dam collapse.

The Board's action applies to individuals or businesses who suffer financial loss, due to the bursting of the dam, in the five-county area of Idaho declared a major disaster area by the President on June 6 (Bonneville, Fremont, Madison, Jefferson, and Bingham counties).

To assist victims of the disaster, the Board gave permission to member banks, and encouraged them, to permit early withdrawal of time deposits without penalty, upon a showing that the depositor has suffered a loss related to the disaster.

The Board's action is retroactive to June 6, 1976, and will remain in effect through December 31, 1976. The action applies to. time depositors in a member bank located anywhere, if the depositor suffered a loss in the five-county area related to the rupture of the dam.

A time deposit is money left on deposit with a bank for a specified period of time in return for payment of interest at a rate higher than that for passbook savings. The Board's Regulation Q provides that if part or all of a deposit is withdrawn before the end of the contract period (except in
certain circumstances such as in the case of death of the depositor), the depositor shall be penalized.

The penalty is reduction of the rate of interest paid on the deposit to the passbook rate for the period the deposit has been held and a loss of 3 months' interest. The Board's action suspends the penalty rule for depositors who suffer losses in the disaster area.

The Board's action is designed to give financial relief in two forms: (1) to make time deposit savings immediately available to those suffering Iosses related to the flood, and (2) to do this without loss of previously earned interest.

The Federal Deposit Insurance Corporation and the Federal Home Loan Bank Board are taking similar actions for financial institutions under their jurisdictions.

## PROPOSED AMENDMENTS

The Board of Governors has announced proposals to liberalize the conditions that govern certain borrowing by member banks from the 12 Reserve Banks (Regulation A-Extensions of Credit by Federal Reserve Banks). The Board will receive comment on the proposals through July 23, 1976.

The Board has proposed amendments to its Regulation H (Membership of State Banking Institutions in the Federal Reserve System) and Regulation Y (Bank Holding Companies) relative to the operations of certain clearing agencies for stock market transactions. Comment will be received on the proposals through July 30, 1976.

The Board has issued for comment proposed amendments to its Regulation Z (Truth in Lending) to implement the Consumer Leasing Act of 1976 requiring disclosures of terms under which personal property is leased. A hearing on the proposed amendments will be held on August 3, and the Board will receive comments through August 16, 1976.

The Board has proposed for public comment a revision of its Regulation B (Equal Credit Opportunity) to implement the 1976 amendments to the Equal Credit Opportunity Act that prohibit discrimination in extensions of credit based on race, color, religion, national origin, age, receipt of
income from public assistance programs, and good faith exercise of rights under the Consumer Credit Protection Act. The Board will hold a hearing on the proposals on August 12 and 13, 1976, and will receive written comment through September 1, 1976.

## CHANGES IN BOARD STAFF

The Board of Governors has announced the appointment of Uyless D. Black, Chief, Special Projects Section, Division of Data Processing, as Assistant Director in that Division, effective June 27, 1976.

Mr. Black, who joined the Board's staff in 1970, holds a B.S. from the University of New Mexico, has completed an M.S. program in computer science from American University, and is a graduate of the Stonier Graduate School of Banking.

The Board has also announced the temporary appointment of Richard D. Abrahamson, Assistant Vice President of the Federal Reserve Bank of Chicago, as an Assistant Secretary of the Board, effective August 1, 1976, replacing Joseph P. Garbarini of the Federal Reserve Bank of St. Louis. Mr. Abrahamson, who holds a B.A. from the University of Minnesota, has been on the staff of the Federal Reserve Bank of Chicago since 1971.

## SYSTEM MEMBERSHIP: Admission of State Banks

The following banks were admitted to membership in the Federal Reserve System during the period June 16, 1976, through July 15, 1976:

## Michigan

Kentwood ...... Old Kent Bank of Kentwood New York

New York ............................. UBAF Arab American Bank
Virginia
Lynchburg .................. Metropolitan Bank of Central Virginia

## Industrial Production

## Released for publication July 16

Industrial production increased an estimated 0.3 per cent in June following an upward-revised increase of 0.7 per cent in May. Increases of 0.6 per cent and 0.4 per cent were registered in March and April, respectively. Gains in output of durable materials and business equipment during June were partially offset by continued weakness in production of consumer nondurable goods and nondurable materials. At 129.9 per cent of the 1967 average, the index is about 16 per cent above the March 1975 low and about $1 / 1 / 2$ per cent below the high of June 1974. The levels of both the May and June indexes were reduced by approximately 0.2 per cent as a result of the rubber strike.

Auto assemblies rose in June, and production schedules for the coming months indicate some further expansion after allowance for model changeover. Output of home goods increased further. Production of business equipment advanced an estimated 0.6 per cent in June from the downward revised May level. The rate of growth in business equipment accelerated in the second quarter to 2.3 per cent from the 1.9 per cent rise in the first quarter

Strong increases in output of durable goods materials continued, reflecting a rise in production
of basic metals and parts for consumer durables and for equipment. Output of nondurable materials, however, is estimated to be unchanged; inventory accumulation over the last several months has dampened the earlier rapid growth of textile, paper, and chemical materials.

* Auto sales and stocks include imports.

${ }^{1}$ Includes Federal agency issues held under repurchase agreements beginning Dec. 1, 1966, and Federal agency issues bought outright beginning Sept. 29, 1971.

2 Includes, beginning 1969, securities loaned-fully guaranteed by U.S. Govt. securities pledged with F.R. Banks-and excludes (if any) securities sold and scheduled to be bought back under matched sale-purchase transactions.
${ }^{3}$ Includes industrial loans and acceptances until Aug. 21, 1959, when industrial loan program was discontinued. For holdings of acceptances on Wed. and end-of-month dates, see p. A-10. See also note 3.

4 Beginning July 1973, this item includes certain deposits of domestic nonmember banks and foreign-owned banking institutions held with member banks and redeposited in full with F.R. Banks in connection

with voluntary participation by nonmember institutions in the F.R. System's program of credit restraint.

As of Dec. 12, 1974, the amount of voluntary nonmember bank and foreign-agency and branch deposits at F.R. Banks that are associated with marginal reserves are no longer reported. However, two amounts are reported: (1) deposits voluntarily held as reserves by agencies and branches of foreign banks operating in the United States; and (2) Euro-dollar liabilities.
${ }^{5}$ Part allowed as reserves Dec. 1, 1959-Nov. 23, 1960; all allowed thereafter. Beginning Jan. 1963, figures are estimated except weekly averages. Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date.

Beginning with week ending Nov. 15,1972 , includes $\$ 450$ million of
reserve deficiencies on which F.R. Banks were allowed to waive penalties for transition period associated with bank adaptation to Regulation J , as amended effective Nov. 9, 1972. For 1973, allowable deficiencies included are (beginning with first statement week of quarter): QI, \$279 million; Q2, $\$ 172$ million; $\mathrm{Q} 3, \$ 112$ million; $\mathrm{Q} 4, \$ 84$ million. For 1974 , Q1, $\$ 67$ million, Q2, $\$ 58$ million. Transition period ended after 1974, Q2'. Qeginning with week ending Nov. 19, 1975, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy, effective Nov. 19, 1975, of permitting transitional relief on a graduated basis oyer a 24 -month period when a nonmember bank merges into an existing member bank, or when a nonmember bank joins the Federal Reserve System.

For other notes see opposite page.

## RESERVES AND BORROWINGS OF MEMBER BANKS

(In millions of dollars)

[^56]existing member bank, or when a nonmember bank joins the Federal Reserve System
${ }^{2}$ Beginning Nov. 9, 1972, designation of banks as reserve city banks for reserve-requirement purposes has been based on size of bank (net for reserve-requirement purposes has been based on size of bank (net
demand deposits of more than $\$ 400$ million), as described in the BuLLETIN demand deposits of more than $\$ 400$ million), as described in the Bulletin,
for July 1972 , p. 626 . Categories shown here as "Large" and "All other" parallel the previous "Reserve city" and "Country" categories, respectively (hence the series are continuous over time).

Note.-Monthly and weekly data are averages of daily figures within the month or week, respectively.

Borrowings at F. R. Banks: Based on closing figures.
Effective Apr. 19, 1973, the Board's Regulation A, which governs lending by F.R. Banks, was revised to assist smaller member banks to meet the seasonal borrowing needs of their communities.

BASIC RESERVE POSITION, AND FEDERAL FUNDS AND RELATED TRANSACTIONS

| 1970-Oct. 1..... |  |  |  |  |  |  | 5 |

Beginning Nov. 9, 1972

1 When two dates are shown, the first applies to the change at reserve city banks and the second to the change at country banks. For changes prior to 1963 see Board's Annual Reports.

2 (a) Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.
(b) Requirement schedules are graduated, and each deposit interval applies to that part of the deposits of each bank.
(c) Since Oct. 16, 1969, member banks have been required under Regulation $M$ to maintain reserves against foreign branch deposits computed on the basis of net balances due from domestic offices to their foreign branches and against foreign branch loans to U.S. residents. Since June 21, 1973, loans aggregating $\$ 100,000$ or less to any U.S. resident have been excluded from computations, as have total loans of a bank to U.S. residents if not exceeding $\$ 1$ million. Regulation $D$ imposes a similar reserve requirement on borrowings from foreign banks by domestic offices of a member bank. The reserve percentage applicable to each of these classifications is 4 per cent. The requirement was 10 per cent originally was increased to 20 per cent on Jan. 7 , 1971, was reduced to 8 per cent effective June 21, 1973, and was reduced to the current 4 per cent effective May 22, 1975. Initially certain base amounts were exempted in the computation of the requirements, but effective Mar. 14, 1974, the last of these reserve-free bases were eliminated. For details, see Regulations $D$ and $M$
${ }^{3}$ Effective Jan. 5, 1967, time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits Beginning Nov. 10, 1975, profitmaking businesses may maintain saving deposits of $\$ 150,000$ or less at member banks. For details of 1975 action see Regulations D and Q, and also Bulletins for Oct., p. 708, and Nov., p. 769 .

Notes 2(b) and 2(c) above are also relevant to time deposits
Notes 2(b) and 2(c) above are also relevant to time deposits.
4 Effective Nov. 9, 1972, a new criterion was adopted to designate reserve cities, and on the same date requirements for reserves against ne demand deposits of member banks were restructured to provide that each
member bank will maintain reserves related to the size of its net demand deposits. The new reserve city designations are as follows: A bank having net demand deposits of more than $\$ 400$ million is considered to have the character of business of a reserve city bank, and the presence of the head office of such a bank constitutes designation of that place as a reserve city. Cities in which there are F.R. Banks or branches are also reserve cities. Any banks having net demand deposits of $\$ 400$ million or less are considered to have the character of business of banks outside of reserve cities and are permitted to maintain reserves at ratios set for banks not in reserve cities For details, see Regulation D and appropriate sup plements and amendments. plements and amendments
${ }^{5}$ A marginal reserve requirement was in effect between June 21, 1973, and Dec. 11, 1974, against increases in the aggregate of the following types of obligations: (a) outstanding time deposits of $\$ 100,000$ or more, (b) outstanding funds obtained by the bank through issuance by a bank's affiliate of obligations subject to existing reserve requirements on time deposits, and (c) beginning July 12, 1973, funds from sales of finance bills. The requirement applied to balances above a specified base, but was not applicable to banks having obligations of these types aggregating less than $\$ 10$ million. For details, including percentages and maturity classifications, see "Announcements" in Bulletins for May, July, Sept., and Dec. 1973 and Sept. and Nov. 1974.
${ }^{6}$ The $161 / 2$ per cent requirement applied for one week, only to former reserve city banks. For other banks, the 13 per cent requirement was continued in this deposit interval.

7 See columns above for earliest effective date of this rate.
8 The average of reserves on savings and other time deposits must be at least 3 per cent, the minimum specified by law. For details, see Regulation D .
Note.-Required reserves must be held in the form of deposits with F.R. Banks or vault cash.

# MAXIMUM INTEREST RATES PAYABLE ON TIME AND SAVINGS DEPOSITS 

(Per cent per annum)

${ }^{1}$ For exceptions with respect to certain foreign time deposits, see Bulletin for Feb. 1968, p. 167.

2 Multiple-maturity time deposits include deposits that are automatically renewable at maturity without action by the depositor and deposits that are payable after written notice of withdrawal

3 Maximum rates on all single-maturity time deposits in denominations of $\$ 100,000$ or more have been suspended. Rates that were effective Jan. 21, 1970, and the dates when they were suspended are:

| $\left.\begin{array}{ll}30-59 \text { days } & 61 / 4 \text { per cent } \\ 60-89 \text { days } & 61 / 2 \text { per cent } \\ 90-179 \text { days } & 63 / 4 \text { per cent } \\ 180 \text { days to } 1 \text { year } & 7 \\ 1 \text { per cent } \\ 1 \text { year or more } & 71 / 2 \text { per cent }\end{array}\right\}$ | June 24,1970 |
| :--- | :--- | :--- |

Rates on multiple-maturity time deposits in denominations of $\$ 100,000$ or more were suspended July 16, 1973, when the distinction between single- and multiple-maturing deposits was eliminated.
${ }^{4}$ Effective Dec. 4, 1975, the $\$ 1,000$ minimum denomination does not apply to time deposits representing funds contributed to an Individual Retirement Account established pursuant to 26 U.S.C. (I.R.C. 1954) §408.
5 Between July 1 and Oct. 31, 1973, there was no ceiling for certificates maturing in 4 years or more with minimum denominations of $\$ 1,000$. The amount of such certificates that a bank could issue was limited to

5 per cent of its total time and savings deposits. Sales in excess of that amount were subject to the $61 / 2$ per cent ceiling that applies to time deposits maturing in $21 / 2$ years or more.
Effective Nov. 1, 1973, a ceiling rate of $71 / 4$ per cent was imposed on certificates maturing in 4 years or more with minimum denominations of $\$ 1,000$. There is no limitation on the amount of these certificates that banks may issue.
${ }^{6}$ Prior to Nov. 27, 1974, no distinction was made between the time deposits of governmental units and of other holders, insofar as Regulation $Q$ ceilings on rates payable were concerned. Effective Nov. 27, 1974, governmental units were permitted to hold savings deposits and could receive interest rates on time deposits with denominations under $\$ 100,000$ irrespective of maturity, as high as the maximum rate permitted on such deposits at any Federally insured depositary institution.

Note.-Maximum rates that may be paid by member banks are estabished by the Board of Governors under provisions of Regulation $Q$ however, a member bank may not pay a rate in excess of the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Beginning Feb. 1, 1936, maximum rates that may be paid by nonmember insured commercial banks, as established by the FDIC, have been the same as those in effect for member banks.

For previous changes, see earlier issues of the BULLETIN.

Note.-Regulations G, T, and U, prescribed in accordance with the Securities Exchange Act of 1934, limit the amount of credit to purchase and carry margin stocks that may be extended on securities as collateral by prescribing a maximum loan value, which is a specified percentage of the market value of the collateral at the time the credit is extended; margin requirements are the difference between the market value ( 100 per cent) and the maximum loan value. The term margin stocks is defined in the corresponding regulation. Regulation G and special margin requirements for bonds convertible into stocks were adopted by the Board of Governors effective Mar. 11, 1968.

TRANSACTIONS OF THE SYSTEM OPEN MARKET ACCOUNT
(In millions of dollars)

1 Before Nov. 1973 Bulletin, included matched sale-purchase transactions, which are now shown separately.
2 Includes special certificates acquired when the Treasury borrows directly from the Federal Reserve, as follows (millions of dollars): June 1971, 955 ; Sept. 1972, 38; Aug. 1973, 351 ; Sept. 1973, 836; Nov. 1974, 131; Mar. 1975, 1,560; Aug. 1975, 1,989.
${ }^{3}$ Net change in U.S. Govt. securities, Federal agency obligations, and bankers acceptances.

Note.-Sales, redemptions, and negative figures reduce System holdings; all other figures increase such holdings. Details may not add to totals because of rounding.

Note.-Composition of the money stock measures is as follows:
$M_{1}$; Averages of daily figures for (1) demand deposits of commercial banks other than domestic interbank and U.S. Govt., less cash items in process of collection and F.R. float; (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, F.R. Banks, and vaults of commercial banks.
$M_{2}$ : Averages of daily figures for $M_{1}$ plus savings deposits, time de-
posits open account, and time certificates of deposit other than negotiable CD's of $\$ 100,000$ of large weekly reporting banks.
$M_{3}: M_{2}$ plus the average of the beginning and end-of-month deposits
of mutual savings banks, savings and loan shares, and credit union shares (nonbank thrift)
$M_{4}: M_{2}$ plus large negotiable CD's.
$M_{5}: M_{3}$ plus large negotiable CD's
For a description of the latest revisions in $M_{1}, M_{2}, M_{\mathbf{3}}, M_{4}$, and $M_{5}$, see "Revision of Money Stock Measures" on pp. 82-87 of the Feb. 1976 Bulletin. Beginning Oct. 1975, money stock measures and related data have been revised to incorporate benchmark data from the Dec. 31, 1975, call report

Latest monthly and weekly figures are available from the Board's H. 6 release. Back data are available from the Banking Section, Division of Research and Statistics.

COMPONENTS OF MONEY STOCK MEASURES AND RELATED ITEMS
(In billions of dollars)

${ }^{1}$ Negotiable time certificates of deposit issued in denominations of $\$ 100,000$ or more by large weekly reporting commercial banks
${ }_{2}$ Average of the beginning and end-of-month figures for deposits of mutual savings banks, for savings capital at savings and loan associations, and for credit union shares.

3 At all commercial banks.
See also Note above.

1 Averages of daily figures. Member bank reserve series reflect actual reserve requirement percentages with no adjustment to eliminate the effect of changes in Regulations $D$ and $M$. There are breaks in series because of changes in reserve requirements effective Dec. 12, 1974, Feb. 13, May 22, and Oct. 30, 1975, and Jan. 8, 1976. In addition, effective Jan. 1, 1976, statewide branching in New York was instituted. The subsequent merger of a number of banks raised required reserves because of higher reserve requirements on aggregate deposits at these banks.
${ }^{2}$ Reserves available to support private nonbank deposits are defined as (1) required reserves for (a) private demand deposits, (b) total time and savings deposits, and (c) nondeposit sources subject to reserve requirements, and (2) excess reserves. This series excludes required reserves for net interbank and U.S. Govt. demand deposits.
${ }^{3}$ Averages of daily figures. Deposits subject to reserve requirements include total time and savings deposits and net demand deposits as defined by Regulation D. Private demand deposits include all demand deposits except those due to the U.S. Govt., less cash items in process of collection and demand balances due from domestic commercial banks.
4"Total member bank deposits" subject to reserve requirements, plus Euro-dollar borrowings, loans sold to bank-related institutions, and certain other nondeposit items. This series for deposits is referred to as "the adjusted bank credit proxy."
Note.-Back data and estimates of the impact of required reserve changes may be obtained from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551

[^61]As of Oct. 31, 1974, "Total loans and investments" of all commercial banks were reduced by $\$ 1.5$ billion in connection with the liquidation of one large bank. Reductions in other items were: "Total loans," $\$ 1.0$ billion (of which $\$ 0.6$ billion was in "Commercial and industrial loans"), and "Other securities," \$0.5 billion. In late November "Commercial and industrial loans" were increased by $\$ 0.1$ billion as a result of loan reclassifications at another large bank.

Note.-Total loans and investments: Seasonally adjusted data revised beginning 1968 . Not seasonally adjusted data revised beginning July
1975. See this Bulletin, p. 554 . Back data for $1959-75$ available from 1975. See this Bulletin, p. 554 . Back data for 1959-75 available from
Banking Section, Division of Research and Statistics; for 1948-58, See. Aug. 1968 Bulletin, pp. A-94-A-97. For description of seasonally adjusted series for total loans and investments, see Dec. 1971 BULLETIN, pp. 971-73 and for commercial and industrial loans, see July 1972 BuLLETIN, p. 683 . Data are for last Wed. of month except for June 30 and Dec. 31 ; data are partly or wholly estimated except when June 30 and Dec. 31 are call dates.

${ }^{1}$ Loans to farmers directly guaranteed by CCC were reclassified as securities and Export-Import Bank portfolio fund participations were reclassified from loans to securities effective June 30, 1966. This reduced "Total loans" and increased "Other securities" by about $\$ 1$ billion. "Total loans" include Federal funds sold, and beginning with June 1967 securities purchased under resale agreements, figures for which are included in "Federal funds sold, etc.," on p. A-1 6 .
Effective June 30, 1971, Farmers Home Administration notes were classified as "Other securities" rather than "Loans." As a result of this, change, approximately $\$ 300$ million was transferred to "Other securities" for the period ending June 30, 1971, for all commercial banks.
Effective Mar. 31, 1976, includes "reserves for loan losses" and "urearned income on loans."
See also table (and notes) at the bottom of p. A-24.
${ }^{2}$ See first 2 paragraphs of note 1.
${ }^{3}$ Reciprocal balances excluded beginning with 1942.
4 Includes items not shown separately. See also note 1.
Effective, Mar. 31, 1976, "reserves for loan losses" and unearned income on loans," which for all commercial banks are estimated to be approximately $\$ 14.5$ billion, have been netted against "other assets" and "other liabilities", and, therefore, against "total assets/liabilities."
${ }^{5}$ See third paragraph of note 1 above.
6 Effective Mar. 31, 1976, includes "reserves for securities" and a portion of "reserves for loan losses"
${ }_{7}$ For the last-Wednesday-of-the-month series, figures for call dates are shown for June and December as soon as they became available.
8 Beginning with Dec. 31, 1947, the series was revised; for description, see note 4, p. 587, May 1964 Bulletin.
${ }^{9}$ Figure takes into account the following changes, which became effective June 30, 1969: (1) inclusion of consolidated reports (including
figures for all bank-premises subsidiaries and other significant majorityowned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis-that is, before deduction of valuation reserves-rather than net as previously reported.
10 See last paragraph of note 1 , second paragraph of note 4 , and note 6.
Note.-Data are for all commercial banks in the United States (including Alaska and Hawaii, beginning with 1959). Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; nondeposit trust companies; and U.S. branches of foreign banks.
Figures for member banks before 1970 include mutual savings banks as follows: 3 before Jan. 1960 and 2 through Dec. 1960. Those banks are not included in insured commercial banks.
Effective June 30, 1969, commercial banks and member banks exclude a small national bank in the Virgin Islands; also, member banks exclude, and noninsured commercial banks include, through June 30, 1970, a small member bank engaged exclusively in trust business; beginning 1973, exclude 1 national bank in Puerto Rico.
Beginning Dec. 31, 1973, June 30, 1974, and Dec. 31, 1974, June 30, 1975, respectively, member banks exclude and noninsured nonmember banks include $1,2,3$, and 4 noninsured trust companies that are member of the Federal Reserve System.
Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and by mergers etc.

Figures are partly estimated except on call dates.
For revisions in series before June 30, 1947, see July 1947 Bulletin,
pp. $870-71$. pp. 870-71.

[^62]Note.-Data include consolidated reports, including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries. Figures for total loans and for individual categories of subsidiaries. Figures for total loans and tor ind is, before deduction of securities are repo
valuation reserves.
Back data in lesser detail were shown in previous Bulletins. Beginning with the fall Call Report, data for future spring and fall Call Reports will be available from the Data Production Section of the Division of Data Processing.
Details may not add to totals because of rounding.

[^64]ASSETS AND LIABILITIES OF LARGE COMMERCIAL BANKSA-Continued
(In millions of collars)

For notes see pp. A-18 and A-22.

## ASSETS AND LIABILITIES OF LARGE COMMERCIAL BANKSA—Continued

(In millions of dollars)

[^65]${ }^{11}$ Exclusive of loans and Federal funds transactions with domestic commercial banks

12 All demand deposits except U.S. Govt. and domestic commercial banks, less cash items in process of collection
${ }_{13}$ Certificates of deposit issued in denominations of $\$ 100,000$ or more. 14 All other time deposits issued in denominations of $\$ 100,000$ or more (not included in large negotiable CD's)

15 Other than commercial banks. 16 Domestic and foreign commercial banks, and official international organizations.

Note.-Effective Mar. 24, 1976, reclassification of loans in Chicago resulted in the following major revisions: commercial and industrial, - $\$ 675$ million; other nonbank financial institutions, $-\$ 185$ million; real estate, $\$ 580$ million. These reclassifications are not reflected in data prior to Mar. 24, 1976.

${ }^{1}$ Beginning Nov. 9, 1972, designation of banks as reserve city banks for reserve-requirement purposes has been based on size of bank (net demand deposits of more than $\$ 400$ million), as described in the Bulletin for July 1972, p. 626. Categories shown here as "Other large" and "All other member" parallel the previous "Reserve City" (other than in New York City and the City of Chicago) and "Country" categories, respectively (hence the series are continuous over time).

Note.-Hypothecated deposits, as shown in this table, are treated one way in monthly and weekly series for commercial banks and in another way in call-date series. That is, they are excluded from "Time deposits" and "Loans" in the monthly (and year-end) series as shown on p. A-14; from the figures for weekly reporting banks as shown on pp. A-18-A-22 (consumer instalment loans); and from the figures in the table at the bottom of p. A-13. But they are included in the figures for "Time deposits" and "Loans" for call dates as shown on pp. A-14-A-17.

LOANS SOLD OUTRIGHT BY LARGE COMMERCIAL BANKS
(Amounts outstanding; in millions of dollars)

${ }^{1}$ To bank's own foreign branches, nonconsolidated nonbank affiliates of the bank, the bank's holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company.

Note.-Series changed on Aug. 28, 1974. For a comparison of the old and new data for that date, see p. 741 of the Oct. 1974 Bulletin. Revised figures received since Oct. 1974 that affect that comparison are shown in note 2 to this table in the Dec. 1974 Bulletin, p. A- 27.

1 Financial companies are institutions engaged primarily in activities such as, but not limited to, commercial, savings, and mortgage banking; sales, personal, and mortgage financing; factoring, finance leasing, and sales, personal, and mortgage financing; factoring, finance easing, and
other business lending; insurance underwriting; and other investment other busi
$\underset{2}{2}$ astivities. reported by dealers; includes all financial company paper sold in the open market.
${ }_{3}$ As reported by financial companies that place their paper directly with investors.

4 Nonfinancial companies include public utilities and firms engaged primarily in activities such as communications, construction, manufacturing, mining, wholesale and retail trade, transportation, and services.
turing, mining, wholesale and retail trade, transportation, and services. Coverage of bank-related companies was expanded in Aug. 1974. Most of the increase resulting from this expanded coverage occurred in directlyplaced paper.
6 Beginning November 1974, the Board of Governors terminated the System guarantee on acceptances purchased for foreign official accounts.

${ }^{1}$ Averages of the most representative daily offering rate quoted by dealers.
2 Averages of the most representative daily offering rate published by finance companies, for varying maturities in the $90-179$ day range.

3 Beginning Aug. 15, 1974, the rate is the average of the midpoint of the range of daily dealer closing rates offered for domestic issues; prior data are averages of the most representative daily offering rate quoted by dealers.

Seven-day averages of daily effective rates for week ending Wednesday. Since July 19, 1973, the daily effective Federal funds rate is an average of the rates on a given day weighted by the volume of transactions at these
rates. Prior to this date, the daily effective rate was the rate considered most representative of the day's transactions, usually the one at which most transactions occurred.
5 Except for new bill issues, yields are averages computed from daily closing bid prices.
${ }_{7}$ Bills quoted on bank-discount-rate basis.
7 Selected note and bond issues.

Note.-Figures for Treasury bills are the revised series described on $p$. A-35 of the Oct. 1972 Bulletin.

$t$ Includes bonds rated $A$ and $A$, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat. As of Dec. 23, 1967, there is no longer an Aaa-rated railroad bond series.

2 Number of issues varies over time; figures shown reflect most recent count.

Note.-Annual yields are averages of weekly, monthly, or quarterly data.

Bonds: Monthly and weekly yields are computed as follows: (1) U.S.
Govt., averages of daily figures for bonds maturing or callable in 10 years or more; from Federal Reserve Bank of New York. (2) State and local
govt., general obligations only, based on Thurs. figures, from Moody's Investors Service. (3) Corporate, rates for "New issue", and "Recently offered" Aaa utility bonds, weekly averages compiled by the Board of Governors of the Federal Reserve System; and rates for seasoned issues, averages of daily figures from Moody's Investors Service.

Stocks: Standard and Poor's corporate series. Dividend/price ratios are based on Wed. figures. Earnings/price ratios as of end of period. Preferred stock ratio based on 8 median yields for a sample of noncallable issues- 12 industrial and 2 public utility. Common stock ratios on the 500 stocks in the price index. Quarterly earnings are seasonally adjusted at annual rates.

## NOTES TO TABLES ON OPPOSITE PAGE:

## Security Prices:

${ }^{1}$ Standard and Poor's indexes appearing for week ending July 3, 1976, actually represent averages for the 3 days ending June 30, 1976. Beginning July 1, 1976 changes were made in composition of the Standard and Poor's index. Figures showing the effects of these changes and of the addition of a new subgroup for financial corporations will appear in the Aug. 1976 Bulletin.

Note.-Annual data are averages of daily or weekly figures. Monthly and weekly data are averages of daily figures unless otherwise noted and are computed as follows: U.S. Govt. bonds, derived from average market yields in table on p. A- 28 on basis of an assumed 3 per cent, 20-year bond. Municipal and corporate bonds, derived from average yields as computed by Standard and Poor's Corp., on basis of a 4 per cent, 20 computed by Standard and Poor's Corp., on basis of a 4 per cent, $20-$
year bond; Wed. closing prices. Common stocks, derived from comyear bond; Wed. closing prices. Common stocks, derived from com-
ponent common stock prices. Average daily volume of trading, presently conducted 5 days per week for 6 hours per day.

## Stock Market Customer Financing:

${ }^{1}$ Margin credit includes all credit extended to purchase or carry stocks or related equity instruments and secured at least in part by stock (Dec. 1970 Bulletin, p. 920 ). Credit extended by brokers is end-of-month data for member firms of the New York Stock Exchange. June data for banks are universe totals; all other data for banks represent estimates for all commercial banks based on reports by a reporting sample, which accounted for 60 per cent of security credit outstanding at banks on June 30, 1971.
${ }^{2}$ In addition to assigning a current loan value to margin stock generally, Regulations $T$ and $U$ permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.

Nonmargin stocks are those not listed on a national securities exchange and not included on the Federal Reserve System's list of over the counter margin stocks. At banks, loans to purchase or carry nonmargin stocks are unregulated; at brokers, such stocks have no loan value

4 Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

SECURITY PRICES

For notes see opposite page.

For notes see opposite page.

## EQUITY STATUS OF MARGIN ACCOUNT DEBT AT BROKERS

(Per cent of total debt, except as noted)

1 Note 1 appears at the bottom of p. A-28.
Note.-Each customer's equity in his collateral (market value of collateral less net debit balance) is expressed as a percentage of current collateral values.

SPECIAL MISCELLANEOUS ACCOUNT BALANCES AT BROKERS, BY EQUITY STATUS OF ACCOUNTS
(Per cent of total, except as noted)

| End of period | Net credit status | Equity class of accounts in debit status |  | Total balance (millions of dollars) |
| :---: | :---: | :---: | :---: | :---: |
|  |  | 60 per cent or more | Less than 60 per cent |  |
| 1975-May. | 44.5 | 43.2 | 12.3 | 7,601 |
| June. | 45.9 | 43.1 | 11.0 | 7,875 |
| July. | 45.6 | 41.1 | 13.1 | 7,772 |
| Aug. | 43.5 | 40.6 | 16.0 | 7,494 |
| Sept. | 45.3 | 38.9 | 15.8 | 7,515 |
| Oct. | 44.4 | 40.1 | 15.5 | 7,362 |
| Nov. | 45.3 | 40.2 | 14.5 | 7,425 |
| Dec.. | 43.8 | 40.8 | 15.4 | 7,290 |
| 1976-Jan.. | 45.8 | 44.0 | 10.3 | r7,770 |
| Feb. | 44.4 | 44.7 | 10.9 | r8,040 |
| Mar. | 44.0 | 46.0 | 10.4 | 8,050 |
| Apr. | 43.0 | 45.0 | 12.0 | 7,990 |
| May | 41.4 | 46.2 | 12.4 | 8,030 |

Note--Special miscellaneous accounts contain credit balances that may be used by customers as the margin deposit required for additional purchases. Balances may arise as transfers based on loan values of other collateral in the customer's margin account or deposits of cash (usually sales proceeds) occur.

${ }^{1}$ Excludes stock of the Federal Home Loan Bank Board. Compensating changes have been made in "Other" assets.
${ }^{2}$ Includes net undistributed income, which is accrued by most, but not all, associations.

3 Advances from FHLBB and other borrowing.
4 Data comparable with those shown for mutual savings banks (on opposite page) except that figures for loans in process are not included above but are included in the figures for mutual savings banks.

5 Beginning 1973, participation certificates guaranteed by the Federal Home Loan Mortgage Corporation, loans and notes insured by the Farmers Home Administration, and certain other Govt.-insured mortgagetype investments, previously included in mortgage loans, are included
in other assets. The effect of this change was to reduce the mortgage total by about $\$ 0.6$ billion.

Also, GNMA-guaranteed, mortgage-backed securities of the passthrough type, previously included in "Cash" and "Investment securities" are included in "Other" assets. These amounted to about $\$ 2.4$ billion at the end of 1972 .

Note-FHLBB data; figures are estimates for all savings and loan assns. in the United States. Data are based on monthly reports of insured assns. and annual reports of noninsured assns. Data for current and preceding year are preliminary even when revised.

[^69]taries" (deposits in certain commercial depositaries that have been converted from a time to a demand basis to permit greater flexibility in Treasury cash management).
4 Includes debt of Federal home loan banks, Federal land banks, R.F.K. Stadium Fund, FNMA (beginning Sept. 1968), and Federal intermediate credit banks and banks for cooperatives (both beginning Dec. 1968).
5 Beginning July 1974, public debt securities excludes $\$ 825$ million of notes issued to International Monetary Fund to conform with Office of Management and Budget's presentation of the budget.

Note.-Half years may not add to fiscal year totals due to revisions in series that are not yet available on a monthly basis.
(In millions of dollars)

[^70]1977. Figures for outlay categories exclude special allowances for contingencies and civilian agency pay raises totaling $\$ 200$ million for fiscal year $1976, \$ 175$ million for the transition quarter (TQ), and $\$ 2,260$ million for fiscal year 1977, and therefore do not add to totals.

8 Effective in calendar year 1976, the fiscal year for the U.S. Govt. is being changed from July 1-June 30 to Oct. 1-Sept. 30. The period July 1Sept. 30 of 1976, data for which are shown separately from fiscal year 1976 and fiscal year 1977 totals, will be a transition quarter.

Note.-Half years may not add to fiscal year totals due to revisions in series that are not yet available on a monthly basis.

1 Includes non-interest-bearing debt (of which $\$ 613$ million on June 30 1976, was not subject to statutory debt limitation)
2 Includes Treasury bonds and minor amounts of Panama Canal and postal savings bonds.
${ }^{3}$ Includes (not shown separately): depositary bonds, retirement plan bonds, Rural Electrification Administration bonds, State and local government bonds, and Treasury deposit funds.

4 Nonmarketable certificates of indebtedness, notes, and bonds in the Treasury foreign series and foreign-currency-series issues.
${ }^{5}$ Held only by U.S. Govt. agencies and trust funds and the Federal home loan banks.

Note.—Based on Monthly Statement of the Public Debt of the United States, published by U.S. Treasury. See also second paragraph in Note to table below.

[^71]The debt and ownership concepts were altered beginning with the Mar. 1969 Bulletin. The new concepts (1) exclude guaranteed securities and (2) remove from U.S. Govt. agencies and trust funds and add to other miscellaneous investors the holdings of certain Govt.-sponsored but privately owned agencies and certain Govt. deposit accounts. Beginning in July 1974, total gross public debt includes Federal Financing Bank bills and excludes notes issued to the IMF ( $\$ 825$ million).

[^72]banks, and 729 insurance companies combined, each about 90 per cent; (2) 453 nonfinancial corporations and 486 savings and loan assns., each about 50 per cent; and (3) 501 State and local govts., about 40 per cent "All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

## DAILY-AVERAGE DEALER TRANSACTIONS

(Par value, in millions of dollars)

1 Since Jan. 1972 has included transactions of dealers and brokers in securities other than U.S. Govt.

Note.-The transactions data combine market purchases and sales of U.S. Govt. securities dealers reporting to the F.R. Bank of New York.

They do not include allotments of, and exchanges for, new U.S. Govt. securities, redemptions of called or matured securities, or purchases or sales of securities under repurchase agreement, reverse repurchase (resale), or similar contracts. Averages of daily figures based on the number of trading days in the period.

| 26 | 4,624 | 4,352 | 234 | 29 | 9 | 29 |

Note.-The figures include all securities sold by dealers under repurchase contracts regardless of the maturity date of the contract, unless the contract is matched by a reverse repurchase (resale) agreement or delayed delivery sale with the same maturity and involving the same amount of securities. Included in the repurchase contracts are some that more clearly represent investments by the holders of the securities rather than dealer trading positions.

${ }^{1}$ Gross proceeds are derived by multiplying principal amounts or number of units by offering price.
${ }^{2}$ Includes guaranteed issues.
${ }^{3}$ Issues not guaranteed.
4 See Note to table at bottom of preceding page.

5 Foreign governments and their instrumentalities, International Bank for Reconstruction and Development, and domestic nonprofit organizations.

Note.-Securities and Exchange Commission estimates of new issues maturing in more than I year sold for cash in the United States.

1 Excludes investment companies.
${ }^{2}$ Extractive and commercial and miscellaneous companies.
3 Railroad and other transportation companies.
Note.-Securities and Exchange Commission estimates of cash transactions only. As contrasted with data shown on preceding page, new issues
exclude foreign sales and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements are defined in the same way and also include securities retired with internal funds or with proceeds of issues for that purpose.

[^76]Note.-Based on data from various institutional and Govt. sources, with some quarters estimated in part by Federal Reserve in conjunction with the Federal Home Loan Bank Board and the Dept. of Commerce. Separation of nonfarm mortgage debt by type of property, where not reported directly, and interpolations and extrapolations where required, estimated mainly by Federal Reserve. Multifamily debt refers to loans on structures of 5 or more units.

[^78]period of 12 years for 30 -year loans, without special adjustment for FNMA commitment fees and FNMA stock purchase and holding requirements. Commitments mature in 4 months.
(End of period, in billions of dollars)

Note.-VA-guaranteed residential mortgage debt is for 1 - to 4 -family properties while FHA-insured includes some debt in multifamily structures.

Detail by type of holder partly estimated by Federal Reserve for first and third quarters, and for most recent quarter.

Note.-American Life Insurance Association data for new commitments of $\$ 100,000$ and over each on mortgages for multifamily and nonresidential nonfarm properties located largely in the United States. The 15 companies account for a little more than one-half of both the total assets and the nonfarm mortgages held by all U.S. life insurance companies. Averages, which are based on number of loans, vary in part with loan composition by type and location of property, type and purpose of loan, and loan amortization and prepayment terms. Data for the following are limited
to cases where information was available or estimates could be made: capitalization rate (net stabilized property earnings divided by property value); debt coverage ratio (net stabilized earnings divided by debt service); and per cent constant (annual level payment, including principal and interest, per $\$ 100$ of debt). All statistics exclude construction loans, increases in existing loans in a company's portfolio, reapprovals, and loans secured by land only.

1 Weighted averages based on probability sample survey of characteristics of mortgages originated by major institutional lender groups (including mortgage companies) for purchase of single-family homes, as compiled by Federal Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation. Data are not strictly comparable with earlier figures beginning Jan. 1973.

2 Fees and charges-related to principal mortgage amount-include loan commissions, fees, discounts, and other charges, but exclude closing costs related solely to transfer of property ownership.
${ }^{3}$ Effective rate, reflecting fees and charges as well as contract rates
(as shown in first column of this table) and an assumed prepayment at end of 10 years.
${ }^{4}$ Rates on first mortgages, unweighted and rounded to the nearest 5 basis points.
5 Based on opinion reports submitted by field offices of prevailing local conditions as of the first of the succeeding month. Yields are derived from weighted averages of private secondary market prices for Sec. 203, 30 -year mortgages with minimum downpayment and an assumed prepayment at the end of 15 years. Any gaps in data are due to periods of adjustment to changes in maximum permissible contract interest rates.

Note.-Rates are reported on an annual percentage rate basis as specified in Regulation $\mathbf{Z}$ (Truth in Lending), of the Board of Governors. Commercial bank rates are "most common"' rates for direct loans with
specified maturities; finance company rates are weighted averages for purchased contracts (except personal loans). For back figures and description of the data, see BulLETIN for Sept. 1973.

A Revised data for 1955-62, comparable to the revised data beginning 1963 shown below, will be published later.
${ }^{1}$ Employees onty: excludes personnel in the Armed Forces.
2 Production workers only. Revised back to 1973.
3 F.R. index based on Census Bureau figures.
4 Prices are not seasonally adjusted. Latest figure is final
${ }_{5}$ Prigure is for second quarter 1975 .
Note.-All series: Data are seasonally adjusted unless otherwise noted.

Capacity utilization: Based on data from Federal Reserve, McGrawHill Economics Department, and Dept. of Commerce.
Construction contracts: McGraw-Hill Informations Systems Company, F.W. Dodge Division, monthly index of clollar value of total construction contracts, including residential, nonresidential, and heavy engineering.

Employment and payrolls: Based on Bureau of Labor Statistics data; includes data for Alaska and Hawaii beginning with 1959.

Prices: Bureau of Labor Statistics data.

CONSTRUCTION CONTRACTS AND PRIVATE HOUSING PERMITS
(In millions of dollars, except as noted)

1 Because of improved procedures for collecting data for 1 -family homes, some totals are not strictly comparable with those prior to 1968 . To improve comparability, earlier levels may be raised by approximately 3 per cent for total and private construction, in each case, and by 8 per cent for cent for total and pr
residential building.

Note.-Dollar value of construction contracts as reported by the McGraw-Hill Informations Systems Company, F.W. Dodge Division. Totals of monthly data may differ from annual totals because adjustments are made in accumulated monthly data after original figures have been published.
Private housing units authorized are Census Bureau series for 14,000 reporting areas with local building permit systems.

1 Exports of domestic and foreign merchandise (f.a.s. value basis); excludes Department of Defense shipments under military grant-aid programs.

2 General imports, which includes imports for immediate consumption plus entries into bonded warehouses. See also note 3.
3 Beginning with 1974 data, imports are reported on an f.a.s. trans actions value basis; prior data are reported on a Customs import value
basis. For calendar year 1974, the f.a.s. import transactions value was $\$ 100.3$ billion, about 0.7 per cent less than the corresponding Customs import value of $\$ 101.0$ billion.

4 Sum of unadjusted figures.
Note.- Bureau of the Census data. Details may not add to totals because of rounding.

${ }^{1}$ Includes (a) gold sold to the United States by the IMF with the right of repurchase, and (b) gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the IMF under quota increases. For corresponding gold subscriptions to
${ }_{2}$ Includes gold in Exchange Stabilization Fund.
2 Includes gold in Exchange Stabilization Fund.
3 Includes allocations by the IMF of Special Drawing Rights as follows $\$ 867$ million on Jan. 1, 1970; $\$ 717$ million on Jan. 1, 1971; and $\$ 710$ million on Jan. 1, 1972; plus net transactions in SDR's.

4 Includes gain of $\$ 67$ million resulting from revaluation of the German mark in Oct. 1969, of which $\$ 13$ million represents gain on mark holdings at time of revaluation.
5 Includes $\$ 28$ million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of Dec. 31, 1971

6 Total reserve assets include an increase of $\$ 1,016$ million resulting from change in par value of the U.S. dollar on May 8, 1972; of which,
total gold stock is $\$ 828$ million (Treasury gold stock $\$ 822$ million), reserve position in IMF $\$ 33$ million, and SDR's $\$ 155$ million
7 Total reserve assets include an increase of $\$ 1,436$ million resulting from change in par value of the U.S. dollar on Oct. 18, 1973; of which, total gold stock is $\$ 1,165$ million (Treas. gold stock $\$ 1,157$ million), reserve position in IMF $\$ 54$ million, and SDR's $\$ 217$ million.
8 Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974. At valuation used prior to July 1974 (SDR $1=\$ 1.20635$ ) SDR holdings at end of June amounted to $\$ 2,435$ million, reserve position in IMF, $\$ 3,357$ million, and total U.S. reserves assets, $\$ 18.555$.
Note.-See Table 20 for gold held under earmark at F.R. Banks for foreign and international accounts. Gold under earmark is not included in the gold stock of the United States.

## NOTES TO TABLE 1 ON OPPOSITE PAGE:

${ }^{1}$ Seasonal factors are no longer calculated for capital transactionslines 14 through 49.
${ }^{2}$ Adjusted to a balance of payments basis; among other adjustments, excludes military transactions and includes imports into the Virgin Islands.
${ }^{3}$ Differs from the definition of "net exports of goods and services" in the national income and product (GNP) account. The GNP definition
excludes special military sales from exports and U.S. Govt. interest payments from imports.

Note.-Data are from U.S. Dept. of Comm., Bureau of Economic Analysis, Survey of Current Business. A detailed description of items in this revised format of U.S. International Transactions will appear in a future issue of the Bulletin.

## 4. GOLD RESERVES OF CENTRAL BANKS AND GOVERNMENTS

(In millions of dollars; valued at $\$ 35$ per fine ounce through Apr. 1972, at $\$ 38$ from May 1972-Sept. 1973, and at $\$ 42.22$ thereafter)

1 Includes (a) liability on gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the IMF under quota increases, and (b) U.S. Treasury obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the IMF to the United States to acquire income-earning assets.
2 Includes Bank for International Settlements; also includes European Fund through Dec. 1972.

3 Derived by applying reported transactions to benchmark data.
4 Excludes notes issued to foreign official nonreserve agencies.
5 Includes long-term liabilities reported by banks in the United States and debt securities of U.S. Federally sponsored agencies and U.S. corporations.

6 Includes short-term liabilities payable in dollars to commercial banks abroad and short-term liabilities payable in foreign currencies to commercial banks abroad and to other foreigners.
${ }^{7}$ Includes marketable U.S. Treasury bonds and notes held by commercial banks abroad.

8 Principally the International Bank for Reconstruction and Development and the Inter-American and Asian Development Banks.

9 Data on the 2 lines shown for this date differ because of changes in reporting coverage. Figures on first line are comparable with those
shown for the preceding date; figures on second line are comparable with those shown for the following date.
10 Includes $\$ 101$ million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969.

11 Data on the second line differ from those on first line because cer tain accounts previously classified as official institutions are included with banks; a number of reporting banks are included in the series for the first time; and U.S. Treasury securities payable in foreign currencies issued to official institutions of foreign countries have been increased in value to reflect market exchange rates as of Dec. 31,1971 .
12 Includes $\$ 162$ million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates, as follows: short labilities revalued to refiect market exchange rates, as follows: shortterm liabilities.

Note.-Based on Treasury Dept. data and on data reported to the Treasury Dept. by banks and brokers in the United States. Table excludes IMF holdings of dollars, and U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations.

[^87]with those shown for the preceding date; figures on the second line are comparable with those shown for the following date

8 Foreign central banks and foreign central govts. and their agencies, Bank for International Settlements, and European Fund through Dec. 1972
9 Excludes central banks, which are included in "Official institutions."
Note.-_'short term" obligations are those payable on demand or having an original maturity of 1 year or less. For data on long-term liabilities reported by banks, see Table 9 . Data exclude International Monetary Fund holdings of dollars; these obligations to the IMF constitute contingent liabilities, since they represent essentially the amount of dollars available for drawings from the IMF by other member countries. Data exclude also U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by the Inter-American Development Bank and the International Development Association.

## 8. SHORT-TERM LIABILITIES TO FOREIGNERS REPORTED BY BANKS IN THE UNITED STATES, BY COUNTRY

(End of period. Amounts outstanding; in millions of dollars)

# 8. SHORT-TERM LIABILITIES TO FOREIGNERS REPORTED BY BANKS 

 IN THE UNITED STATES, BY COUNTRY-Continued(End of period. Amounts outstanding; in millions of dollars)
Supplementary data ${ }^{7}$

1 Data in the 2 columns shown for this date differ because of changes in reporting coverage. Figures in the first column are comparable in coverage with those for the preceding date; figures in the second column are comparable with those shown for the following date

2 Includes Bank for International Settlements.
3 Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

4 Comprises Algeria, Gabon, Libya, and Nigeria.
5 Data exclude holdings of dollars of the International Monetary Fund. ${ }^{6}$ Asian, African, and European regional organizations, except BIS, which is included in "Europe."
7 Represent a partial breakdown of the amounts shown in the other categories (except "Other Eastern Europe'').

## 9. LONG-TERM LIABILITIES TO FOREIGNERS REPORTED BY BANKS IN THE UNITED STATES

1 Marketable U.S. Treasury bills, certificates of indebtedness, notes, and bonds and nonmarketable U.S. Treasury securities payable in dollars and in foreign currencies.

2 The value of earmarked gold increased because of the changes in par value of the U.S. dollar in May 1972, and in Oct. 1973.

Nore.-Excludes deposits and U.S. Treasury securities held for international and regional organizations. Earmarked gold is gold held for foreign and international accounts and is not included in the gold stock of the United States.

${ }_{1}$ Based on average yield of weekly tenders during month.
${ }^{2}$ Based on weekly averages of daily closing rates.
${ }^{3}$ Rate shown is on private securities.
${ }^{4}$ Rate in effect at end of month
${ }^{5}$ Monthly averages based on daily quotations.
Note.-For description and back data, see "International Finance," Section 15 of Supplement to Banking and Monetary Statistics, 1962.

NOTES TO TABLES 19a AND 19b ON PAGES A-70 AND A-71, RESPECTIVELY:

[^93]NoTe.-Components may not add to totals due to rounding.

For a given month, total assets may not equal total liabilities because some branches do not adjust the parent's equity in the branch to reflect unrealized paper profits and paper losses caused by changes in exchange rates, which are used to convert foreign currency values into equivalent dollar values.

Note.-Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt. securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations. Other rates for some of these countries follow:
Argentina- 3 and 5 per cent for certain rural and industrial paper, depending on type of transaction;
Brazil-8 per cent for secured paper and 4 per cent for certain agricultural paper;

[^94]

Industrial Production-1976 Revision. 6/76.
Federal Reserve Operations in Payment Mechanisms: A Summary. 6/76.
Changes in Time and Savings Deposits at Commercial Banks, October 1975-January 1976. 7/76.

## Index to Statistical Tables

## References are to pages A-2 through A-75 although the prefix " A " is omitted in this index

ACCEPTANCES, bankers, 9, 25, 27
Agricultural loans of commercial banks, 16, 18
Assets and liabilities (See also Foreigners):
Banks, by classes, 14, 16, 17, 18, 30
Federal Reserve Banks, 10
Nonfinancial corporations, current, 41
Automobiles:
Consumer instalment credit, 45, 46, 47
Production index, 48, 49
BANK credit proxy, 13
Bankers balances, 16, 17, 20
(See also Foreigners)
Banks for cooperatives, 37
Bonds (See also U.S. Govt. securities):
New issues, 37, 38, 39
Yields and prices, 28, 29

## Branch banks:

Assets, foreign branches of U.S. banks, 70
Liabilities of U.S. banks to their foreign branches and foreign branches of U.S. banks, 22, 71
Brokerage balances, 69
Business expenditures on new plant and equipment, 41
Business indexes, 50
Business loans (See Commercial and industrial Ioans)
CAPACITY utilization, 50
Capital accounts:
Banks, by classes, 14, 17, 22
Federal Reserve Banks, 10
Central banks, 60,75
Certificates of deposit, 22
Commercial and industrial loans:
Commercial banks, 13, 16
Weekly reporting banks, 18, 23
Commercial banks:
Assets and liabilities, 13, 14, 16, 17, 18
Consumer loans held, by type, 45, 46, 47
Deposits at, for payment of personal loans, 24
Loans sold outright, 25
Number, by classes, 14
Real estate mortgages held, by type of holder and property, 42-44
Commercial paper, 23, 25, 27
Condition statements (See Assets and liabilities)
Construction, 50, 51
Consumer instalment credit, 45, 46, 47
Consumer price indexes, 50,53
Consumption expenditures, 54, 55
Corporations:
Profits, taxes, and dividends, 41
Sales, revenue, profits, and dividends of large manufacturing corporations, 40
Security issues, 38,39
Security yields and prices, 28, 29
Cost of living (See Consumer price indexes)
Currency and coin, 3, 16
Currency in circulation, 3, 12
Customer credit, stock market, 29, 30
DEBITS to deposit accounts, 11
Debt (See specific types of debt or securities)

Demand deposits:
Adjusted, commercial banks, 11, 13, 17
Banks, by classes, 14, 17, 20, 21
Ownership by individuals, partnerships, and corporations, 24
Subject to reserve requirements, 13
Turnover, 11
Deposits (See also specific types of deposits):
Accumulated at commercial banks for payment of personal loans, 24
Banks, by classes, 14, 17, 20, 21, 30
Federal Reserve Banks, 10, 72
Subject to reserve requirements, 13
Discount rates at Federal Reserve Banks (See Interest rates)
Discounts and advances by Reserve Banks (See Loans)
Dividends, corporate, 40,41
EMPLOYMENT, 50, 52
FARM mortgage loans, 42
Federal agency obligations, 9, 10, 11
Federal finance:
Receipts and outlays, 32, 33
Treasury operating balance, 32
Federal funds, 5, 16, 18, 21, 27
Federal home loan banks, 37
Federal Home Loan Mortgage Corporation, 42, 43
Federal Housing Administration, 42, 43, 44, 45
Federal intermediate credit banks, 37
Federal land banks, 37
Federal National Mortgage Assn., 37, 42, 43

## GENERAL INFORMATION

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

A heavy vertical rule is used in the following instances: (1) to the right (to the left) of a total when the components shown to the right (left) of it add to that total (totals separated by ordinary rules include more components than those shown), (2) to the right (to the left) of items that are not part of a balance sheet, (3) to the left of memorandum items.
"U.S. Govt. securities" may include guaranteed issues of U.S. Govt. agencies (the flow of funds figures
also include not fully guaranteed issues) as well as direct obligations of the Treasury. "State and local govt." also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.
The footnotes labeled Note (which always appear last) provide (1) the source or sources of data that do not originate in the System; (2) notice when figures are estimates; and (3) information on other characteristics of the data.

LIST PUBLISHED SEMIANNUALLY, WITH LATEST BULLETIN REFERENCE

[^0]:    ${ }^{1}$ Farm products and processed foods and feeds.
    ${ }^{2}$ Estimates based on Dept. of Labor data.
    Source.-Department of Labor.

[^1]:    ${ }_{2}^{1}$ Less than 05 per cent.
    2 Includes time deposits, open account, issued in passbook, statement, or other forms that are direct alternatives for regular savings accounts. Most of these are believed to be in accounts totaling less than $\$ 100,000$. The figures shown on this line are included above in the appropriate maturity category.

[^2]:    ${ }^{1}$ Less than $\$ 500,000$.
    2 Omitted to avoid individual bank disclosure.
    ${ }^{3}$ See p. A-8 for maximum interest rates payable on time and savings deposits at the time of each survey. Note that the ceiling rate is included in the rate interval in the column to the left.

    Note.-Data were compiled from information reported by a probability sample of member and insured nonmember commercial banks. The data were expanded to provide universe estimates.

[^3]:    deposit inflows during the 30 -day period. If the rate changed during that period, the rate reported was the rate prevailing on the largest dollar volume of inflows from the time of the last rate change to the survey date.

    While rate ranges of $1 / 4$ or $1 / 2$ of a percentage point are shown in this and other tables, the most common rate reported by most banks was the top rate in the range; for example, $4.00,4.50$, etc. Some deposit categories exclude a small amount of deposits outstanding in a relatively few banks that no longer issue these types of deposits and are not included in the number of issuing banks.

    Figures may not add to totals because of rounding

[^4]:    ${ }^{1}$ The monetary growth rates for April reported at this meeting were based on revised measures of the monetary aggregates, reflecting new benchmark data for deposits at nonmember banks. The revised measures were published on May 20, 1976.

[^5]:    Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's Annual Report, are released about a month after the meeting and are subsequently published in the Bulletin.

[^6]:    ${ }^{1}$ Hereinafter referred to as a municipality.
    ${ }^{2}$ Any reference to the laws of a State or municipality in this Supplement includes a reference to any regulations which implement such laws and official interpretations thereof, and to regulations of a State or municipal agency or department having jurisdiction over a class or classes of depository institutions.

[^7]:    ${ }^{7}$ The "average maturity" of an obligation or issue repayable in scheduled periodic payments shall be the weighted average of the maturities of all such scheduled repayments.
    ${ }^{8}$ In a serial issue, the member bank may offer no note with a maturity of less than five years.

[^8]:    ${ }^{9}$ For the purposes of this Part, the "appropriate Federal bank regulatory agency' is the Comptroller of the Currency in the case of a national bank and the Board of Governors in the case of a State member bank.

[^9]:    ${ }^{6}$ The '"average maturity' of an obligation or issue repayable in scheduled periodic payments shall be the weighted average of the maturities of all such scheduled repayments.
    ${ }^{7}$ In a serial issue, the member bank may offer no note with a maturity of less than five years.
    ${ }^{8}$ For the purposes of this Part, the " appropriate Federal bank regulatory agency' is the Comptroller of the Currency in the case of a national bank and the Board of Governors in the case of a State member bank.

[^10]:    ${ }^{1}$ A bank's equity capital base, for purposes of this test, is considered to include capital stock, surplus, undivided profits, capital reserves, and all reserves for losses on loans, including any related deferred tax liability.
    ${ }^{2}$ Definitions:
    "Income", is defined as income before taxes and before fixed charges, including securities gains and losses, excluding extraordinary charges and credits, and adjusted where necessary to reflect actual net loan loss experience (charge-offs less recoveries) rather than other "provision for loan losses," plus an adjustment for earnings on the proceeds of the proposed

[^11]:    issue equal to annual interest charges before taxes on the proposed issue.
    "Fixed charges" is defined as annual interest charges before taxes on all existing debt, net of debt to be retired out of the proceeds of the new issue, plus those on the debt proposed to be issued. Fixed charges on existing debt would include annual interest on all outstanding mortgage debt and subordinated notes and debentures, plus the annual interest component in any payments, net of sublease income, under lease contracts having an original maturity of one year or more (or if the interest component is not readily ascertainable, one-third of annual payments net of sublease income under such contracts may be substituted).
    ${ }^{3}$ Definitions:
    "Retained net income" is defined as net income after taxes minus dividends declared on common and preferred stock. In most circumstances banks which have issued additional shares of equity capital would receive credit for these new issues as if they had been part of retained net income.
    "Pro forma amortization" is calculated for each issue of subordinated debt, including the proposed new issue but excluding debt to be retired out of the proceeds of the new issue, by dividing the original amount of the issue by the number of years from date of issue to maturity. Total pro forma amortization would be the sum of annual pro forma amortization for all such subordinated debt issues.

    4"Banking organization," for purposes of this criterion, is defined as any commercial bank, mutual savings bank, bank holding company, or nonbank affiliate of a bank holding company.

[^12]:    ${ }^{1}$ Section 217.4(d) of Regulation $Q$ provides that where a time deposit, or any portion thereof, is paid before maturity, a member bank may pay interest on the amount withdrawn at a rate not to exceed that currently prescribed for a savings deposit and that the depositor shall forfeit three months of interest payable at such rate.

[^13]:    ${ }^{1}$ Copies of the Federal Reserve Form U-I are available on request to any Federal Reserve Bank.

[^14]:    ${ }^{1}$ All banking data are as of June 30, 1975.
    ${ }^{2}$ The relevant banking market is approximated by the Fargo-Moorhead SMSA: Clay County, Minnesota, and Cass County, North Dakota.

[^15]:    ${ }^{1}$ All banking data are as of June 30, 1975, unless otherwise indicated.
    ${ }^{2}$ Of these 13 banks, three (including the market's largest) are located in the city of El Dorado, Kansas.

[^16]:    Voting for this action: Chairman Burns and Governors Wallich, Coldwell, Partee, and Lilly. Absent and not voting: Governors Gardner and Jackson.

[^17]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ The Greater Newark banking market is approximated by Essex County, Union County excluding the extreme southern portion, the eastern half of Morris County and a small portion of western Hudson County.
    ${ }^{3}$ Applicant has not applied to retain its investment adviser activities under § 4 of the Act; upon consummation of the proposal, Applicant will transfer its existing account to Bank's trust department and will cease engaging in investment adviser activities.

[^18]:    ${ }^{4}$ In a letter of February 4, 1976, the Board denied Protestant Dunn's request for a hearing on these issues.
    ${ }^{5}$ Dunn v. Fiduciary Inv. Co. of New Jersey, et al., Civil No. 75-2203 (D.N.J., May 20, 1976).

[^19]:    ${ }^{6}$ Dunn v. Fiduciary Inv. Co. of New Jersey, et al., Civil No. 75-2203, p. 28 (D.N.J., May 20, 1976).

[^20]:    ${ }^{7}$ Protestant Dunn advanced several other objections to the proposed transaction. The Board finds these objections to be without merit and to have been refuted adequately by Applicant's responses thereto. As noted previously, Protestant Dunn died on May 22, 1976. His attorneys have requested that the Board's consideration of this application be postponed until the executors of his estate are confirmed and a determination is made as to their position with regard to the application. With respect to this request, Protestant Dunn filed extensive protests to the application and it appears no useful regulatory purpose would be served by further delay, particularly in view of the pressing need to resolve Bank's managerial problems. Accordingly the request is denied.

[^21]:    Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.
    (Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

[^22]:    ${ }^{1}$ Under Kansas corporation law, the approval of the merger by the shareholders of either United or Sierra is not required; neither is the approval of the directors of Sierra required. The Kansas statutes provide the opportunity for minority shareholders of Sierra's stock to contest the value assigned to their shares by the board of directors of United, and provide remedial procedures.
    ${ }^{2}$ Sierra, as a "company covered in 1970,'" engages in the following activities pursuant to Section $4(a)(2)$ of the Act, which it may retain indefinitely after surviving the merger proposed with United: the sale of gas and crude oil and the operating of oil and gas leases, and real estate leasing activities. The oil and gas related activities were commenced in 1952, and the real estate activities were commenced in 1967. Additionally, Sierra has engaged in the operation of a public stockyard and the sale of livestock, through subsidiaries over which control was obtained on November 25, 1970. Sierra may continue these latter activities under $\S 4(\mathrm{a})(2)$ of the Act until December 31, 1980.
    ${ }^{3}$ All banking data are as of June 30, 1975.
    ${ }^{4}$ The proposed officers and directors of United are identical to the officers and directors of Sierra, and, except for Mr. W. A. Graham, Sierra's vice president and director, Sierra's officers and directors are also directors or officers of Bank.

[^23]:    ${ }^{1}$ In accord with the Board's position with respect to violations of the Act, the Board has scrutinized the underlying facts surrounding the acquisitions of Bank's shares without prior Board approval. Upon an examination of all the facts of record, the Board does not believe that those facts call for denial of the application to retain Bank's shares.

    The Board cautions, however, that all bank holding companies have an obligation not only to conform their conduct to the requirements of the Act, but also to take steps to inform themselves of their obligations under the Act. As it has stated on previous occasions, the Board will continue to fulfill its responsibilities to refer any apparently willful violation to the Department of Justice for possible criminal prosecution. Further, in the Board's consideration of applications for permission to retain illegally acquired shares or activities, the circumstances surrounding a violation may reflect so adversely on the managerial factors as to constitute grounds for denial of such an application. In appropriate cases, the Board may also initiate cease-and-desist proceedings under the Financial Institutions Supervisory Act.
    ${ }^{2}$ All banking data are as of June $30,1975$.
    ${ }^{3}$ The relevant geographic market for purposes of analyzing the competitive effects of the subject proposal is approximated by St. Joseph County, Indiana.

[^24]:    ${ }^{1}$ Applicant became a bank holding company on December 31,1970 , by virtue of the fact that it owned 61 per cent of the voting shares of American Savings Bank, Tripoli, Iowa ("ASB"). At that time, Applicant also owned 24.9 per cent of the voting shares of Bank. Although Applicant divested itself of its shares in ASB in 1975, it agreed with the Federal Reserve Bank of Chicago to continue its status as a bank holding company with respect to Bank, based upon the fact that pursuant to section 225.2 of the Board's Regulation Y [12 CFR § 225.2 (1976)] Applicant owned 24.9 per cent of Bank's voting shares, and principals of Applicant owned additional shares. Although a rebuttable presumption that Applicant controls Bank exists under section 225.2(b) of the Board's Regulation Y (12 CFR § 225), the Board has made no formal determination that Applicant controls Bank.
    ${ }^{2}$ Applicant also engages in the activity of acting as an agent for the sale of credit-related insurance that is issued in connection with extensions of credit. Applicant, by letter dated May 10, 1976, to the Federal Reserve Bank of Chicago, has agreed to file a section $4(c)(8)$ application to continue to engage in this nonbanking activity.
    ${ }^{3}$ All banking data are as of June 30, 1975, unless otherwise indicated.

[^25]:    ${ }^{1}$ All banking data are as of June 30,1975 , adjusted to reflect bank holding company formations and acquisitions approved as of May 31, 1976.
    ${ }^{2}$ The Freeport banking market is approximated by Brazoria County exclusive of the communities of Alvin and Pearland and their immediate environs. The Freeport banking market was previously included in the Houston banking market; however, in response to Protestants' contentions that the Freeport area represented a distinct banking market, the Federal Reserve Bank of Dallas undertook a field study of the area. As a result, it was determined that the Freeport banking market was a separate and distinct banking market.

[^26]:    ${ }^{3}$ Protestants also claim that section 3(b) of the Act ${ }^{\circ}(12$ U.S.C. $\S 1842$ (b)) restricts the Comptroller's chartering authority. This provision of the Act refers to the Board's obligation to solicit the Comptroller's views with regard to applications by bank holding companies to acquire a national bank as a proposed subsidiary pursuant to section 3 of the Act. If the Comptroller recommends disapproval of an application, within the 30 days after receipt of the Board's notice the Board must hold a formal hearing on the application.

[^27]:    Voting for this action: Chairman Burns and Governors Caldwell, Jackson, Partee, and Lilly. Absent and not voting: Governors Gardner and Wallich.
    (Signed) J. P. Garbarini, [seal] Assistant Secretary of the Board.

[^28]:    ${ }^{1}$ All banking data are as of June 30, 1975.
    ${ }^{2}$ The Sebring banking market, which is the relevant market within which to assess the competitive effects of the proposed acquisition, is approximated by Highland County and the communities of Wauchula in Hardee County and Frostproof in Polk County.

[^29]:    ${ }^{3}$ In connection with its consideration of the subject proposal, the Board has by letter of today's date notified Applicant that, upon consummation of the proposal, the Board has determined, on the basis of the record, that Applicant would be capable of exercising a "controlling influence" over the management and policies of Bank within the meaning of § $2(\mathrm{a})(2)(\mathrm{C})$ of the Act. Accordingly, upon consummation of the proposal, Applicant is required to report Bank as a subsidiary of Applicant and to comply with the applicable provisions of Federal banking law with respect to such subsidiary. Applicant has waived the requirement of notice and opportunity for a hearing provided in the statute, and acknowledged that, upon consummation, it will control Bank.

[^30]:    ${ }^{1}$ All banking data are as of June 30, 1975, unless otherwise indicated.
    ${ }^{2}$ The Cleveland banking market, which is the relevant banking market, is approximated by all of Cuyahoga, Lake and Geauga Counties, the northwestern quarter of Portage County, the northern third of Summit County, all but the southern-most tier of townships in Medina and Lorain Counties and the City of Vermition which straddles the border of Lorain and Erie Counties.

[^31]:    ${ }^{3}$ All market data are as of June 30, 1974.
    ${ }^{4}$ Applicant controls two subsidiary banks in the market, National City Bank, Cleveland, Ohio, and National City Bank of Lake County, Mentor, Ohio, a de novo bank, which was opened on March 15, 1976 and therefore its deposits are not reflected in the market data.

[^32]:    ${ }^{1}$ The Royal Trust Bank of Miami, N.A., Miami, Florida, and Dale Mabry State Bank, Tampa, Florida. On March 1, 1976, Applicant transferred its controlling interest in Royal Trust Bank of Miami to a newly-formed, wholly-owned Florida subsidiary, Royal Trust Bank Corp., itself a bank holding company. Applicant also contemplates similar transfers in the future with respect to both Dale Mabry State Bank and Bank.

[^33]:    ${ }^{2}$ Information Systems Design of Florida, Inc., Miami, Florida ('ISD-Florida'), is a subsidiary of Information Systems Design, Inc., Oakland, California ('ISD-California'), which is owned by Computel Systems, Ltd. ("Computel'"), a Canadian computer company. By Order of December 6, 1973, the Board denied Applicant's retention of ISD-California after Applicant's acquisition of Computel [38 Federal Register 34514 (1973); 60 Federal Reserve Bulletin 58 (1974)]. ISDCalifornia is engaged in non-permissible data processing activities while ISD-Florida is engaged in permissible data processing activities. The Board granted Applicant a two-year period, after its acquisition of Computel, within which to divest itself of ISD-California. At the request of Applicant, the Board recently has extended the divestiture period until September 14, 1976.
    ${ }^{3}$ All banking data are as of June 30, 1975, unless otherwise indicated.
    ${ }^{4}$ The South Pinellas County banking market is comprised of Pinellas County south of the town of Largo.

[^34]:    ${ }^{1}$ Unless otherwise indicated, all banking data are as of June 30, 1975, and reflect bank holding company formations and acquisitions approved through May 31, 1976.
    ${ }^{2}$ The Cass County banking market is approximated by all of Cass County except the two extreme southwestern townships of Howard and Milton, which are part of the Niles, MichiganSouth Bend/Elkhart, Indiana banking market.
    ${ }^{3}$ FNB operates eight banking offices in this market.

[^35]:    ${ }^{4}$ The other eight banking offices of Applicant's lead bank are all within 25 miles of Bank's head office in Cassopolis, albeit in a different market.
    ${ }^{5}$ Among the facts of record regarded by the Board as evidencing the elimination of existing competition are the amount of deposits and loans derived from Bank's service area by Applicant's subsidiary bank, which represent 9.9 and 15.2 per cent of Bank's total deposits and loans, respectively.

[^36]:    Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, and Partee. Present and abstaining: Governor Lilly.

[^37]:    ${ }^{1}$ All banking data are as of June 30, 1975, unless otherwise indicated.
    ${ }^{2}$ The Minneapolis-St. Paul banking market is approximated by the Minneapolis-St. Paul Ranally Metro Area, adjusted to include all of Carver County.
    :3The Rochester banking market is approximated by northwestern Fillmore County, northeastern Mower County, southeastern Dodge County, and southwestern Wabasha County, and all but the eastern portion of Olmsted County
    ${ }^{4}$ The Hutchinson banking market is approximated by Mcleod County and the northeastern portion of Renville County.

[^38]:    ${ }^{\text {s }}$ Applicant has projected earnings for the resulting organization as being sufficient to meet the debt servicing requirements of that organization. However, it is the Board's judgment that these projections are unreasonably optimistic. For example, the projections assume a return on average assets for the surviving corporation substantially above the five-year average return on average total resources of either of the merging companies. Further, even if dividends from subsidiary banks could be increased sufficiently to service the combined organizations' debt, this could weaken the capital adequacy of those banks.

[^39]:    ${ }^{1}$ As originally proposed, Applicant declared that, if the subject application were approved, Company would not engage in leasing activities within Colorado. The United States Department of Justice commented on the application stating that this provision appeared to be a territorial allocation arrangement, a form of behavior that the courts have repeatedly condemned as a per se offense under the Sherman Act. Upon being advised of the Justice Department's comments, Applicant amended its application by removing this provision. Accordingly, the Justice Department currently has no objection on antitrust grounds to the proposed transaction.

[^40]:    ${ }^{2}$ All banking data are as of June 30, 1975, and reflect bank holding company formations and acquisitions approved by the Board through May 31, 1976.
    ${ }^{3}$ Currently pending before the Board is an application by Applicant to retain shares of its subsidiary, Empire Savings, Building and Loan Association, Denver, Colorado (see 41 Federal Register 26276 (1976)).
    ${ }^{4}$ Although Applicant is providing a 20 per cent equity participation in Company, it will be a general partner in the management of Company. Applicant has agreed to report Company as its subsidiary for purposes of the Bank Holding Company Act, and to comply with all limitations and prohibitions that are applicable under the Act to such a subsidiary. Accordingly, the Board's approval action herein is based upon Applicant's commitments and is conditioned upon Applicant's compliance therewith.
    ${ }^{5}$ It is contemplated that funds will be lent to Company, on a nonrecourse basis (i.e., neither Company, nor its equity participants, Applicant and FMC, will be liable for this debt), from unaffiliated financial institutions. A trustee will be designated to receive rentals and to disburse those funds to the equity and debt participants in particular lease trusts.

[^41]:    Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.
    [seal] (Signed) Griffith L. Garwood,

[^42]:    ${ }^{1}$ Unless otherwise noted, all banking data are as of December 31, 1974.
    ${ }^{2}$ The Federal Reserve Bank of Dallas, acting pursuant to delegated authority, has extended the period within which Applicant must dispose of its impermissible activities by one year to May 9, 1977.

[^43]:    ${ }^{3}$ Applicant sells travelers checks to companies with outlets in 44 States and two foreign countries.

[^44]:    Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, and Lilly. Absent and not voting: Governors Jackson and Partee.

[^45]:    ${ }^{1}$ All banking data are as of June 30, 1975

[^46]:    ${ }^{2}$ On January 14, 1971, the date A.D.P.C. was formed, Applicant acquired one-third of the outstanding shares of A.D.P.C. without prior Board approval. This transaction did not require prior Board approval by virtue of $\S 225.4$ (d) of Regulation Y ( $12 \mathrm{CFR} \S 225.4$ (d). Since that time, however, Applicant has on two separate occasions acquired additional shares of A.D.P.C. without prior Board approval. It appears from the facts of record that these two latter acquisitions of shares were based on a misunderstanding of the applicable statutes and regulations relating to nonbanking activities of bank holding companies. In accord with the Board's position with respect to violations of the Act, the Board has scrutinized the underlying facts surrounding the acquisitions of shares of A.D.P.C. without prior Board approval; and upon an examination of all the facts of record, the Board believes that those facts do not call for denial of the application to retain shares of A.D.P.C.

    It should be noted that, under the Act, any acquisition by a bank holding company that would result in that holding company controlling more than five per cent of the shares of a company engaged in nonbanking activities requires the prior approval of the Board. This requirement is applicable to any such acquisition of shares of a nonbanking company, whether or not the holding company already controls more than 50 per cent of that company's shares.
    ${ }^{3}$ The Ponca City market, the relevant geographic market for purposes of analyzing the competitive effects of the proposal to retain Datacenter, is approximated by all of Kay County, Oklahoma.

[^47]:    ${ }^{4}$ Through earnings retention, Applicant has been able to replace nearly all of its shareholder equity that was reduced by the purchase of its own shares.

[^48]:    ${ }^{1}$ Applicant would not underwrite credit accident and health insurance for its credit-granting offices located in California.

[^49]:    ${ }^{4}$ BIC's nationwide receivables associated with its loan-bymail program approximate $\$ 6.8$ million and its customers are located throughout the United States. Thus, any competition with Applicant in this area is not deemed by the Board to be significant.

[^50]:    ${ }^{1}$ All banking data are as of June 30,1975 , unless otherwise indicated.
    ${ }^{2}$ One of Applicant's subsidiaries, Knoll International, Inc., is engaged in the business of manufacturing furniture. The Board's Order of May 11, 1973, approving Applicant's application to become a bank holding company required divestiture of Knoll International, Inc., by May 11, 1975. Acting pursuant to delegated authority, the Federal Reserve Bank of Chicago on January 3, 1975, extended the divestiture date by one year. Applicant has requested another one-year extension until May 11, 1977, which request is currently pending at the Board.
    ${ }^{3}$ Applicant has applied under $\S 4(c)(8)$ of the Act to acquire 11 of PLC's existing subsidiaries, all of which are principally engaged in domestic leasing activities. Applicant has also filed a separate application under $\$ 4(c)(13)$ of the Act to acquire four of PLC's foreign leasing subsidiaries; this application has also been approved today in a separate letter issued by the Board. The activities of PLC's subsidiaries are carried on as a unit; all administrative, credit, operational, data processing and collection functions for each of the subsidiaries are perfomed at PLC's home office and that office and each other location serves as a sales office for PLC and each of its subsidiaries.

[^51]:    ${ }^{4}$ Baltimore, Boston, Chicago, Cincinnati, Dallas, Ft. Lauderdale, Houston, Los Angeles, New York, Philadelphia, and San Francisco
    ${ }^{5}$ Applicant derives lease receivables totalling $\$ 6.6$ million from within the Chicago SMSA, $\$ 5.5$ million from within the New York SMSA and $\$ 2.2$ million from within the Los Angeles SMSA. From these same SMSA's, PLC has lease receivables outstanding of $\$ 12.4$ million, $\$ 34.2$ million and $\$ 13.4$ million respectively.

[^52]:    ${ }^{1}$ The Board has received comments in opposition to the application to acquire Agency from Floyd A. Raymond, Loup City; E. O. Armstrong, Ord; and D. E. Armstrong Insurance, Ord, all in Nebraska ('Protestants'). Protestants are all engaged in the insurance business and generally oppose the affiliation of Agency with Bank. Since the denial of the application to form a bank holding company renders the application to acquire Agency moot, the Board believes it is unnecessary to address Protestants' allegations.
    ${ }^{2}$ All bank data with respect to the relevant market are as of June 30, 1975.
    ${ }^{3}$ The relevant geographic market for purposes of analyzing the competitive effects of the proposed transaction is approximated by Valley County, Nebraska.

[^53]:    *This list of pending cases does not include suits against the Federal Reserve Banks in which the Board of Governors is not named a party.

[^54]:    $\dagger$ Decisions have been handed down in these cases, subject to appeals noted.

[^55]:    $\ddagger$ The Board of Governors is not named as a party in this action.

[^56]:    1 Beginning with week ending Nov. 15,1972 , includes $\$ 450$ million of reserve deficiencies on which F.R. Banks are allowed to waive penalties for a transition period in connection with bank adaptation to Regulation $J$ as amended effective Nov. 9, 1972. Beginning 1973, allowable deficiencies as amended effective Nov. 9,1972 . Beginning 1973, allowable deficiencies
    included are (beginning with first statement week of quarter): Q1, $\$ 279$ included are (beginning with first statement week of quarter): Q1, $\$ 279$
    million; $\mathrm{Q} 2, \$ 172$ million; $\mathrm{Q} 3, \$ 112$ million; $\mathrm{Q} 4, \$ 84$ million. Beginning million; Q2, $\$ 172$ million; Q3, $\$ 112$ milion; Q4, $\$ 84$ million. Beginning
    1974 , Q1, $\$ 67$ million; Q2, $\$ 58$ million. Transition period ended after second quarter, 1974. For weeks for which figures are preliminary, figures by class of bank do not add to the total because adjusted data by class are not available.

    Beginning with week ending Nov. 19, 1975, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy, effective Nov. 19, 1975, of permitting transitional relief on a graduated basis over a 24 -month period when a nonmember bank merges into an

[^57]:    ${ }^{1}$ Based upon reserve balances, including all adjustments applicable to the reporting period. Prior to Sept. 25, 1968, carryover reserve deficiencies, if any, were deducted. Excess reserves for later periods are net of all carryover reserves. Beginning with week ending Jan. 7, 1976, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy change effective Nov. 19, 1975
    ${ }_{2}$ Derived from averages for individual banks for entire week. Figure for each bank indicates extent to which the bank's weekly average purchases and sales are offsetting.
    ${ }^{3}$ Federal funds loaned, net funds supplied to each dealer by clearing

[^58]:    ${ }^{1}$ See note 2 on p. A-2.
    2 See note 6 on p. A-2.

[^59]:    ${ }_{2}^{1}$ Excludes interbank and U.S. Govt. demand deposit accounts.
    2 Boston, Philadelphia, Chicago, Detroit, San Francisco-Oakland, and Los Angeles-Long Beach.

[^60]:    Note.-Total SMSA's include some cities and counties not designated For back data see pp. 634-35 of the July 1972 Bulletin.

[^61]:    1 Adjusted to exclude domestic commercial interbank loans.
    2 Loans sold are those sold outright to banks' own foreign branches nonconsolidated nonbank affiliates of the bank, the banks' holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company. Prior to Aug. 28, 1974, the institutions included had been defined somewhat differently, and the reporting panel of banks was also different. On the new basis, both "Total loans" and "Commercial and industrial loans' were reduced by about $\$ 100$ million.

    3 Reclassification of loans at one large bank reduced these loans by about $\$ 400$ million as of June 30,1972 and by about $\$ 1.2$ billion as of March 31, 1976
    4 Farmers Home Administration insured notes included in "Other securities" rather than in loans beginning June 30,1971 , when such notes totaled about $\$ 700$ million
    5 Data beginning June 30,1974 , include one large mutual savings bank that merged with a nonmember commercial bank. As of that date there were increases of about $\$ 500$ million in loans, $\$ 100$ million in "Other securities," and $\$ 600$ million in "Total loans and investments."

[^62]:    1 Member banks exclude and nonmember banks include 4 noninsured trust companies that are members of the Federal Reserve System, and member banks exclude 2 national banks outside the continental United States.
    ${ }^{2}$ See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. 24.
    ${ }^{3}$ Demand deposits adjusted are demand deposits other than domestic commercial interbank and U.S. Govt., less cash items reported as in process of collection.

[^63]:    A Effective with changes in New York State branch banking laws, beginning Jan. 1, 1976, three large New York City banks are now reporting combined totals for previously affiliated banks that have been converted to branches.
    The principal effects of these changes were to increase the reported data for New York City (total assets, by about $\$ 5.5$ billion) and to decrease the

[^64]:    For notes see pp. A-18 and A-22.

[^65]:    A See p. A-18.
    ${ }^{1}$ Loan loss reserve and unearned income on loans had been reported as liability items through Mar. 24, 1976. Since then the item is netted against total loans, and therefore against total assets also.
