## AUGUST 1976

## FEDERAL RESERVE BULLETIN

A copy of the Federal Reserve Bulletin is sent to each member bank without charge; member banks desiring additional copies may secure them at a special $\$ 10.00$ annual rate. The regular subscription price in the United States, its possessions, Canada, and Mexico is $\$ 20.00$ per annum or $\$ 2.00$ per copy; elsewhere, $\$ 24.00$ per annum or $\$ 2.50$ per copy. Group subscriptions in the United States for 10 or more copies to one address, $\$ 1.75$ per copy per month, or $\$ 18.00$ for 12 months.
The Bulletin may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and remittance should be made payable to the order of the Board of Governors of the Federal Reserve System in a form collectible at par in U.S. currency. (Stamps and coupons are not accepted.)

# Domestic Financial Developments in the Second Quarter of 1976 

This report, which was sent to the Joint Economic Committee of the U.S. Congress on August 13, 1976, highlights the important developments in financial markets during the spring and early summer.

The total volume of funds raised in domestic financial markets increased during the second quarter of 1976, as total spending in the Nation's economy expanded further. In the business sector, the cyclically improved level of profits continued to limit the amount of external funds needed to finance rising capital outlays. Nevertheless, the desire of many firms to strengthen their balance sheets kept offerings of new corporate stock and bonds at a very high level, and nonfinancial enterprises added to their total short-term indebtedness during the second quarter for the first time since late 1974. The aggregate credit demands of State and local governments also increased, as did those of
households, which stepped up the pace of their borrowing in the mortgage and consumer loan markets. The Federal Government was the only major sector registering a lower level of borrowing; however, the Treasury's efforts to lengthen the maturity structure of its marketable debt were reflected in a large volume of note and bond issues.

Most interest rates posted moderate declines during the opening weeks of the second quarter; indeed, some short-term yields reached their lowest levels in more than 3 years. However, growth of the monetary aggregates, after accelerating in February and March, reached extraordinary proportions in April. The Federal Reserve consequently became somewhat less accommodative in the provision of reserves to the banking system. Reflecting the System's actions, as well as intensifying credit demands, the interest rate on Federal funds-interbank loans of immediately available funds on an

Yields: U.S. Treasury bills, market yields on 3-month issues; prime commercial paper, dealer offering rates; Conventional mortgages, rates on first mortgages in primary markets, unweighted and rounded to nearest 5 basis points, from Dept. of Housing and Urban Development; Aaa utility bonds, weighted averages of new publicly offered bonds rated Aaa, Aa, and A by Moody's Investors Service and adjusted to Aaa basis; U.S. Govt. bonds, market yields adjusted to 20 -year constant maturity by U.S. Treasury; State and local govt. bonds ( 20 issues, mixed quality) Bond Buyer.
overnight basis-rose from $43 / 4$ per cent in late April to about $51 / 2$ per cent at the end of May; it fluctuated around this higher level for the remainder of the quarter.

Other short-term market rates of interest also moved up, rising between $1 / 2$ and $3 / 4$ of a percentage point in May, and yields on long-term securities-already subject to upward pressure from the heavy volume of new offerings-rose between $3 / 8$ and $1 / 2$ of a percentage point. The prime loan rate at commercial banks was increased from 7 to $7 \frac{1}{4}$ per cent at the beginning of June, but rates charged by banks on loans to small businesses and on automobile instalment loans declined on balance during the quarter.

The monthly growth rates of the major monetary aggregates slowed in May and June, suggesting that monetary expansion was returning to a growth path generally within the long-run ranges that had been specified by the System.

Steps were then taken to provide bank reserves somewhat more freely, and the Federal funds rate declined to about 51/4 per cent in early July. Other interest rates also declined in July as the Federal funds rate fell and the calendars of new corporate and municipal bond offerings lightened.

Measured on a quarterly-average basis, the narrowly defined money stock, $M_{1}$, expanded at an 8.4 per cent annual rate in the second quarter, well above the 2.6 per cent rate of the first 3 months of 1976. The growth rates of $M_{2}$ and $M_{3}-11.3$ and 12.3 per cent, respectively -slightly exceeded their elevated first-quarter levels, but only because of the acceleration of $M_{1}$. Growth in the other components of the broader monetary aggregates moderated considerably in the latter half of the quarter when the higher level of market interest rates induced some investors to shift funds from savings accounts at commercial banks and thrift institu-

## NOTES:

[^1]tions into money market instruments. By midJuly, however, inflows of savings deposits no longer appeared to be retarded by shifts of interest-sensitive funds; as a result, the interestbearing components of $M_{2}$ and $M_{3}$ resumed a rapid pace of expansion.

## MONETARY AGGREGATES AND BANK RESERVES

Although the short-run behavior of the money stock is not amenable to definitive explanation, the movements of $M_{1}$ during the second quarter seem to have been influenced to a considerable degree by unusual variations in the size of the Treasury's cash balance. Most of the growth in $M_{1}$ occurred during April as the Treasury ran down its deposits at commercial banks and at the Federal Reserve by more than $\$ 7$ billion (on a seasonally adjusted basis). Recipients of the Federal disbursements apparently deposited a large portion of the funds in checking accounts, temporarily building up their money balances in excess of current transactions needs. As they subsequently readjusted their asset portfolios, $M_{1}$ fluctuated in a narrow range, changing little on balance between late April and mid-June. Then, in the last weeks of the quarter, the Treasury's cash balances rose sharply, and $M_{1}$ declined briefly.

Over all, $M_{1}$ grew only a little less rapidly than gross national product during the second quarter. The income velocity of $M_{1}$-that is, the ratio of GNP to $M_{1}$-thus rose more slowly than in any previous quarter of the current cyclical expansion. The rise in velocity during the first year of this recovery had been exceptionally large, reflecting in part institutional and regulatory innovations that facilitated the substitution of savings deposits and other financial assets for demand deposits. Some reduction in the rate of increase in velocity typically occurs during the second year of an economic upswing; however, the ongoing changes in financial technology may continue to boost the pace of advance above that implied by past cyclical patterns.

Despite the marked pick-up in $M_{1}$ expansion during the second quarter, growth of the broader

Changes in the income velocity of $\mathrm{M}_{1}$ and $\mathrm{M}_{2}$

Data are at seasonally adjusted annual rates of growth.
monetary aggregates-measured on a quarterlyaverage basis-was only marginally above the pace of the first quarter of the year. The other component of $M_{2}$-time and savings deposits, other than large negotiable certificates of deposit (CD's), at commercial banks-rose at a 13.7 per cent annual rate, as compared with 15.9 per cent in the first quarter. Total deposits at savings and loan associations, mutual savings banks, and credit unions, included in $M_{3}$, grew at a 13.7 per cent rate in both quarters.

During the first few months of 1976, when market rates of interest on some short-term securities fell below interest rates paid on savings deposits, there was a massive influx of funds to such accounts. The rise in market yields during the second quarter apparently prompted some reversal of these rate-induced flows. Savings deposits, after expanding at a diminished pace in May, were about unchanged on a seasonally adjusted basis during June.

The net inflow of savings and small-denomination time deposits to commercial banks during the second quarter was, nonetheless, very strong
by historical standards. With their loan portfolios expanding only modestly, large banks as a group were therefore able to reduce still further their CD liabilities. Some money market banks did register significant net increases in CD's during late May and June, but this development apparently reflected mainly positioning for midyear financial statements; there was a noticeable contraction of outstanding CD's in early July. The average volume of CD's outstanding at large banks during the second quarter was $\$ 5.8$ billion below that in the preceding 3 months, after seasonal adjustment.

The total reserves of member banks increased at a 0.8 per cent annual rate during the second quarter. Nonborrowed reserves expanded at a 0.5 per cent rate; the level of member bank borrowings from Federal Reserve Banks rose somewhat as the Federal funds rate approached the prevailing $51 / 2$ per cent discount rate. The small increase in reserves was adequate to support substantial growth in the monetary aggregates because the decrease in the volume of large CD's outstanding released reserves to support expansion of other deposits.

Components of bank credit

Major categories of bank loans

Seasonally adjusted. Total loans and business loans adjusted for transfers between banks and their holding companies, affiliates, subsidiaries, or foreign branches.

## BANK CREDIT AND COMMERCIAL PAPER

Total loans and investments at all commercial banks grew at a moderate pace in the second quarter, and the pattern of expansion was broadly similar to that of the first quarter. Again, most of the growth occurred in holdings of U.S. Treasury and Federal agency issues, and large banks continued to concentrate their security

${ }^{3}$ Nonfinancial company paper measured from end-of-month to end-of-month.
acquisitions in coupon issues rather than shorter-dated bills. Total loans outstanding increased only slightly, on a seasonally adjusted basis. Real estate and consumer loans expanded substantially. However, business loans contracted for the sixth consecutive quarter, bringing the cumulative decline between December 1974 and June 1976 to $\$ 11.8$ billion, or 6.4 per cent.

Net issuance of commercial paper by nonfinancial firms was the largest since the third quarter of 1974. Indeed, the increase in outstanding nonfinancial paper during the second quarter exceeded the decrease in business loans
by nearly $\$ 1$ billion (seasonally adjusted). Some firms that had used ample internal cash flows and the proceeds of capital market financings to repay short-term debt during the first year of the economic recovery again encountered a need for short-term credit; with the cost advantage of open market financing over bank loans remaining sizable, they returned to the commercial paper market.

## MORTGAGE MARKET

Deposits at savings and loan associations and mutual savings banks expanded at a seasonally adjusted annual rate of 13.9 per cent in the second quarter, little changed from the 13.3 per cent rate of the preceding quarter. Deposit growth did slow, however, as the quarter progressed. Tending to moderate deposit inflows were not only the rise in market rates of interest but also prior efforts by some institutions to retard the heavy flows of funds into relatively costly term accounts. These efforts involved such measures as lowering offering rates, increasing minimum denominations, and reducing advertising.

## Deposits

Savings and loans and mutual savings banks

Seasonally adjusted quarterly averages at annual rates.
The strong growth of deposits permitted savings and loan associations and mutual savings banks to increase their mortgage lending while maintaining a high level of liquidity. Net mortgage debt formation at these institutions during the second quarter was the highest in more than 3 years. Furthermore, their outstanding mort-

## TABLE 3

Net change in mortgage debt outstanding In billions of dollars, seasonally adjusted annual rates

[^2]gage commitments rose to a near-record seasonally adjusted level of about $\$ 23$ billion at the end of June.

The pace of net mortgage debt formation by all lenders rose slightly further in the second quarter to a seasonally adjusted annual rate of $\$ 73$ billion. As in other recent quarters, mortgage lending on 1 - to 4 -family homes accounted for much of the credit expansion; the multifamily and nonresidential components remained weak. The Federal and related agencies operating in the secondary market sold more mortgages from their portfolios than they bought, while private institutions, predominantly savings and loan associations, enlarged their support to the market.

## SECURITIES MARKETS

Gross long-term debt and equity financing by U.S. corporations in the second quarter proceeded at a seasonally adjusted annual rate of $\$ 55$ billion, slightly above the first-quarter pace. Domestic firms continued to restructure their balance sheets in the April-June period, selling new bonds at a seasonally adjusted annual rate
of $\$ 40$ billion, about the same volume as in the first quarter. Contributing to the large volume of publicly offered debt securities was a record amount of debt issued by finance companies. Nonprime borrowers also availed themselves of the public bond market in greater volume during the second quarter. Corporations issuing bonds rated A or lower accounted for 55 per cent of the quarter's calendar-a significant increase over their 40 per cent portion of the first-quarter volume. Such firms also obtained a large volume of long-term funds through private placements with institutional lenders.

Domestic corporations continued to lower the ratio of their debt to equity through issuance of substantial amounts of stock as well as through retention of earnings. Common and preferred stock offerings amounted to $\$ 15$ billion at a seasonally adjusted annual rate, up slightly from the first-quarter figure. This large volume reflected a record amount of issues by manufacturing concerns and a single large issue by a communications firm.

The volume of long-term State and local debt issued in the April-June period was $\$ 34$ billion at a seasonally adjusted annual rate, a little above the previous quarter's $\$ 33$ billion. This large volume of financing appears to have reflected a significant amount of financial restructuring by State and local units, mainly the funding of short-term debt. The gross volume of short-term notes sold in the first half was 25 per cent below the pace of a year earlier.

TABLE 4
Offerings of new security issues

| Foreign securities | 6 | 7 | 10 | 9 | 10 |
| State and local govt. bonds | 33 | 36 | 26. | 33 | 34 |

${ }^{e}$ Estimated.

The U.S. Treasury placed smaller demands on the credit markets in the second quarter as the Federal unified budget registered a modest surplus on a seasonally unadjusted basis. Government expenditures were somewhat lower than had been anticipated, and the Treasury cash balance rose to an unusually high level of $\$ 14.8$ billion on June 30. Net cash borrowings amounted to $\$ 8.9$ billion, compared with an average of $\$ 24.5$ billion in each of the preceding three quarters. As part of its continuing effort to lengthen the average maturity of the marketable Federal debt, the Treasury reduced the amount of outstanding bills by $\$ 2.1$ billion and issued $\$ 10.0$ billion, net, of coupon securities during the quarter.

## INTEREST RATES

Yields on both short- and long-term securities traced broadly similar patterns over the quarter, influenced to a considerable degree by shifting market expectations about future interest rate movements and by the less accommodative posture in providing bank reserves that the Federal Reserve System adopted beginning in late April. Federal funds, which had traded around the $43 / 4$ per cent level in the first half of April, rose over the remainder of the month and throughout May, reaching the $51 / 2$ per cent level at the end of the month. The rate on Federal funds fluctuated around this level until early July when the System began to provide reserves somewhat more freely in light of the moderation in the growth of the monetary aggregates. Yields on other short-term private market instruments and on Treasury bills also moved upward by $5 / 8$ to $3 / 4$ of a percentage point in the late April and May period, but declined again in late June and early July.

Yields on long-term corporate and municipal securities, which had declined in early April, increased by about $1 / 2$ of a percentage point until they peaked in late May. Much of this rise occurred at a time when the supply of new issues in both markets was quite large and when market participants expected short-term interest

## TABLE 5

## Federal Government

borrowing and cash balance
Quarterly totals, in billions of dollars, not seasonally adjusted

| Item | 1975 |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |

${ }^{1}$ Includes outlays of the Export-Import Bank, Pension Benefit Guaranty Corporation, Postal Service Fund, Rural Electrification and Telephone Revolving Fund, Rural Telephone Bank, Housing for the Elderly or Handicapped Fund, and Federal Financing Bank.
${ }^{2}$ Checks issued less checks paid, accrued items, and other transactions.
rates to increase over the remainder of the year. As June progressed, prospective supply pressures eased; this, together with indications that the pace of monetary expansion was moderating, led market participants to revise their expectations, and long-term rates began to decline. For example, the Board's index of yields on newly-issued Aaa-rated utilities and the Bond Buyer index of long-term municipal bonds registered declines of about $1 / 4$ of a percentage point over the month of June.
${ }^{3}$ Includes debt of the Federal Home Loan Mortgage Corporation, Federal home loan banks, Federal land banks, Federal intermediate credit banks, banks for cooperatives, Federal National Mortgage Association (including discount notes and securities guaranteed by the Government National Mortgage Association), and farm credit banks.
${ }^{e}$ Estimated.
Yields on long-term Treasury issues and on conventional mortgages moved less widely over the quarter. Treasury bond yields, paralleling corporate and municipal yields, rose about $3 / 8$ of a percentage point in the April-May period before dropping about $1 / 8$ of a percentage point by the end of June. With deposit flows relatively ample at thrift institutions, home mortgage rates in the primary market changed little in April and May and moved up only slightly in June.

## Member Bank Income in 1975

Net income at member banks continued to increase in 1975, but the rate of expansion was half that of the year before and was at the slowest rate in more than a decade. The slow growth in earnings was the result largely of a sharp decrease in rates of return on loans, although other contributing factors included a deceleration in the rate of loan portfolio growth, a continued increase in the provision for loan losses, and a drop in revenues from Federal funds sold and securities purchased under resale agreements. Operating income and expenses declined during the year compared with record or near-record levels the two previous years. Net securities transactions, however, resulted in a small gain for member banks and added to net income for the first time in 3 years.

## SUMMARY

Operating income at member banks decreased almost 5 per cent in 1975, after having risen at rapid rates in 1973 and 1974. The decline was largely the result of a substantial drop in interest income on loans caused by sharply reduced rates of return on loans and a negligible growth in loan volume. Interest income on investments, however, rose rapidly in 1975 as the rapid growth in holdings was accompanied by a modest increase in rates of return.

All noninterest categories of expenses increased in 1975, but the increases were generally less than in 1974. Salaries and wages, which represent the second largest single ex-

[^3]pense for member banks, rose moderately during 1975. The fact that the increase was substantially less than in the previous year reflected the efforts of many banks to trim payroll expenses. As in 1974, the largest increase in any noninterest category was in the provision for loan losses. Actual net loan losses in 1975 rose at substantially the same high rate as in 1974, even though the rate of growth in loans outstanding declined. As a result, the ratio of net loan charge-offs (for those banks that account for possible loan losses by the use of a reserve account) to average loans outstanding rose to the highest level in any recent year.

Because of these changes, income before income taxes and net securities gains and losses declined nearly 1 per cent in 1975 from the year-earlier total. However, a sizable decrease in tax liabilities on current income and a small net gain in securities transactions more than offset this decline, and so net after-tax income of member banks reached $\$ 5,545$ million- 3.4 per cent more than in 1974.

The ratio of net income to equity capital plus reserves at member banks declined in 1975 to a level below that of several recent years. As in 1974, however, cash dividends declared rose faster than net income, thus causing an increase in the ratio of cash dividends declared to net income.

Large member banks in New York, Chicago, and other major cities recorded roughly equal rates of increase in net income during 1975. For these groups the increase was slightly higher than for all member banks and significantly greater than for smaller member banks, which posted only a negligible increase in net income during 1975. For all groups, however, the rates of increase in 1975 were substantially less than those in 1974.

## OPERATING INCOME

After having increased at a record pace in 1973 and at a near-record rate in 1974, total operating income at member banks declined in 1975. Operating revenues totaled $\$ 51,356$ million, down $\$ 2,472$ million, or 4.6 per cent, from 1974 (Table 1). In recent years large gains in revenues had been attributable to rapid increases in interest and fees on loans. In contrast, there was a dramatic decline in such income during 1975. Similarly, there was a sharp drop in
income derived from the amount of Federal funds sold and securities purchased under resale agreements. As a result, interest income on loans fell as a proportion of total operating revenue. Revenue from investment activities, however, accounted for a larger proportion of operating income in 1975 than in 1974.

Interest and fees on loans (including Federal funds sold and securities purchased under agreements to resell) declined $\$ 5,323$ million, or 13.1 per cent, in 1975 after having increased

sharply in both 1974 and 1973. The decline was attributable to several factors. Generally lower interest rates, for example, resulted in a significantly lower average return on all loans during

[^4]1975. For the year, the average rate of return on loans fell nearly $11 / 2$ percentage points to 8.44 per cent-after having risen by nearly the same amount in 1974. The drop in the average interest rate earned on Federal funds sold was even more dramatic-more than $41 / 2$ percentage points, the largest decline in recent years. Loan revenues were further dampened in 1975 by the effects of nonaccrual loans and by loans renegotiated at reduced rates, particularly loans to real estate investment trusts.

Perhaps the most important influence limiting the growth in interest income during 1975, however, was the lack of strong growth in average loans outstanding. For the year, the average ${ }^{1}$ for total loans rose only $\$ 7.7$ billion, or 1.9 per cent, in contrast to the increase of $\$ 51.3$ billion, or 14.2 per cent, recorded in 1974. Loans outstanding in nearly every category increased less than in 1974. Commercial and industrial loans account for more than a third of total outstanding loans at member banks, and they increased only 2.2 per cent in 1975-far below the 17.7 per cent rise posted in 1974.

The contraction effect of the recession in early 1975 and the liquidation and then modest growth of inventories translated into a decline in the outstanding volume of loans to the commercial and industrial sector until late in the year. Businesses in the aggregate continued to issue a large volume of long-term debt and equities, repaying bank loans in order to restructure their balance sheets and improve their liquidity positions. This financial policy was enhanced by sharply improved cash flows relative to capital outlays. Bank loan policies remained cautious with loan rates high relative to market rates and with nonprice terms and conditions tending to emphasize loan quality as banks sought to improve their own financial positions.

Real estate loans of member banks rose by only $\$ 3.8$ billion, or 4.1 per cent, during 1975. However, this increase in loans for real estate

activities accounted for a much larger proportion of total loan growth in 1975 than in 1974about half of the total in contrast to one-fifth in 1974. Consumer loans too were depressed in response to adverse economic conditions in 1975; they rose less than 1 per cent during the year. This was in marked contrast to the 7.4 per cent growth rate posted in 1974. Loans for purchasing and carrying securities declined for the second consecutive year, although the $\$ 383$ million, or 4.1 per cent, decline in 1975 was significantly less than the 23.8 per cent decrease recorded in the previous year.

The lack of strong loan demand, together with sizable deposit inflows, permitted member banks to invest more heavily in securities during 1975 than in 1974. For the year, average holdings of securities by member banks increased 11.3 per cent as compared with only 2.1 per cent in 1974. As a result, revenue from this source increased by $\$ 1,321$ million, or 18.3 per cent. Acquisitions of U.S. Treasury securities were particularly large, with average holdings
rising by 28.9 per cent. This sharp increase, coupled with a rise of 30 basis points in the rate of return on these securities, boosted revenue from this source by 35.1 per cent to $\$ 3,165$ million. This was in sharp contrast to 1974, a year in which holdings fell by 11 per cent and revenue fell by 2 per cent. Investment in other types of securities also increased in 1975, but neither the gain in volume nor the increase in revenue was so large as in 1974.

Aggregate revenue from trust departments, service charges on deposit accounts, and other charges and fees increased $\$ 350$ million, or 9.9 per cent-slightly more than in 1974. "Other operating income," which includes net income from the trading account, foreign branches, and Edge Act subsidiaries, rose $\$ 1,181$ million, or 52.2 per cent. This increase compares with one of 26.5 per cent in 1974 and reflects a continuation in the trend toward a greater volume of overseas business at many member banks. As in other years, the largest member banks (especially those in New York and Chicago) have been most involved in this overseas expansion. In 1975 these large banks found international banking a profitable activity as loan demand increased substantially above 1974 levels and interest spreads widened.

## OPERATING EXPENSES

Operating expenses at member banks during 1975 declined significantly, after having increased at a near-record rate in 1974. This decrease reflected both a sharp decline in nearly every category of interest expense and a slower rate of growth in noninterest expenses relative to 1974 .

Interest paid on time and savings depositswhich generally comprises about two-fifths or more of total operating expenses-declined in 1975 to $\$ 19,794$ million, a drop of 9.2 per cent. Contributing strongly to this decline was a sharp decrease in the average rate paid on such deposits. During 1975 the average rate paid on time and savings deposits declined 119 basis points after having risen rapidly in 1974. This drop reflected both a reduction in offering rates
associated with the decline in yields on Treasury bills and other market outlets for savings and a shift in the composition of interest-bearing deposits at commercial banks. During the year, relatively low-cost savings deposits increased by 11.5 per cent while time deposits rose by only 7.5 per cent. In view of the relative strength of savings deposit inflows, member banks were able to reduce their reliance on purchased funds such as large certificates of deposit. This is in marked contrast to 1974, a year in which member banks issued large quantities of such time deposits. In addition, the over-all decline in short-term interest rates also made CD's a much cheaper source of funds in 1975 than in 1974 for those banks that found it necessary to purchase funds to finance their portfolios.

Interest paid for Federal funds purchased and securities sold under repurchase agreements fell dramatically in 1975. For the year this operating expense declined $\$ 2,563$ million, or 44.9 per cent, and reflected both a slower increase in volume than in 1974 and a precipitous decline in the average rate paid for such funds. In 1975, for example, the volume of Federal funds sold increased 8.1 per cent compared with 23.6 per cent in the previous year. Similarly, the average rate paid for these funds in 1975 was 5.82 per cent, or 469 basis points less than in 1974.

Interest paid on "other borrowed money," which includes interest costs on Euro-dollar borrowings and on loans from Federal Reserve Banks, also declined sharply in 1975. During the year, expenses from such borrowings declined 61.5 per cent after having risen 84.0 per cent in 1974, as both the volume of borrowing and average rates paid declined. Interest costs associated with outstanding capital notes and debentures, the only interest expense category to increase in 1975, continued to grow at about the same pace as in 1974.

Salaries and wages (inciuding benefits) at member banks continued to rise in 1975, but the increase was somewhat less than in 1974 and it reflected an effort on the part of many banks to "hold the line" on payroll expenses. For the year such expenditures increased $\$ 789$ million or 8.9 per cent, in contrast to a 13.2 per cent increase during 1974.

For the second consecutive year member banks raised their provision for loan losses by a large amount; provisions for the year totaled $\$ 3,050$ million, an increase of $\$ 1,193$ million, or 64.2 per cent. This rate, which was much larger than the 1.9 per cent growth rate of total average loans outstanding, reflected the necessity for many member banks to bolster loan loss reserves in response to the adverse economic conditions. For banks that operate on a loan-loss reserve-accounting basis, which includes all larger banks and many smaller ones, the current provision for loan losses generally is the estimated amount needed to bring the reserve for loan losses to a level sufficient to absorb expected losses on the existing loan portfolio. For accounting purposes, this item is considered to be an operating expense affecting net income in the current year. Although the minimum amount that a bank must provide each year for such purposes is determined by methods prescribed by supervisory authorities, ${ }^{2}$ bank management may designate a larger-than-required provision if such action is advisable under prevailing economic conditions.

Numerous member banks made such "excess" provisions during 1975 in order to offset the effects of loan-loss charge-offs, which increased 71.6 per cent to $\$ 2,731$ million. This increase in net loan charge-offs was much faster than the growth of loans; hence it caused the ratio of net loan charge-offs to average loans outstanding to increase from 0.39 per cent in 1974 to 0.65 per cent in 1975-the highest level recorded in any recent year. Nonetheless, actual provisions for loan losses exceeded net loan charge-offs by $\$ 319$ million in 1975 and increased total loan loss reserves by 3.6 per cent. As a result of the changes, the ratio of reserves for losses to average loans outstanding increased slightly in 1975, from 1.69 per cent to 1.71 per cent.

Other minor operating expenses such as net occupancy expense, furniture and equipment

[^6]expense, and other expenses all rose slightly less than in 1974 and reflected both cost-cutting measures taken by banks during 1975 and lower expenses associated with reductions on Eurodollar borrowing, which some banks report in this item.

## OTHER TRANSACTIONS

After recording net losses on securities transactions for two consecutive years, member banks posted a small net gain in 1975. Their earnings on such transactions totaled $\$ 17$ million. Ex-

TABLE 4
Consolidated report of income for 1975 and 1974 for member banks grouped by class In millions of dollars

${ }^{1}$ Less than $\$ 500,000$.
Note.-Figures may not add to totals because of rounding.
traordinary charges or credits after taxes also had a favorable impact on net earnings-adding $\$ 24$ million to net income-after having had a negligible effect during 1974.

## INCOME TAXES

Applicable income taxes at member banks declined 8.7 per cent, or $\$ 138$ million, in 1975. This decline, which was about twice as large as that in 1974, reflected not only the decline in before-tax income but also the increased proportion of that income derived from tax-exempt sources.

## NET INCOME AND CASH DIVIDENDS

Reflecting all of the above changes, net income at member banks in 1975 increased $\$ 181$ million, or 3.4 per cent-the smallest gain in a number of years. Equity capital plus reserves, however, increased at more than twice that rate during 1975, and as a result the ratio of net income to equity capital plus reserves declined for the second consecutive year. For the year this ratio declined about half of a percentage point to 10.27 per cent, whereas in 1974 the
decline had been a more moderate one-fifth of a percentage point.

The increase in cash dividends at member banks during 1975 was somewhat less than in 1974-9.1 per cent compared with 12.5 per cent. However, this rate of increase was still nearly three times as large as the increase in net income in 1975, and it boosted the ratio of cash dividends declared to net income from 42.3 per cent in 1974 to 44.7 per cent in 1975.

## NET INCOME BY CATEGORY OF BANK

Large banks in New York City recorded the most rapid increase in net income of any category of member banks. However, the 5.9 per cent increase for this group-which accounts for a fifth of all member bank income-was only slightly higher than for large banks in Chicago, which posted a 5.0 per cent gain. This was in contrast to 1974 when the performance difference between these two groups had been somewhat larger. "Other" large banks also increased their net income at about the same rate-5.1 per cent during 1975. As in 1974 net income of 'all other'" member banks increased only slightly. For this group, such income rose only $\$ 12$ million, or 0.5 per cent.

# The Federal Reserve System's Equal Employment Opportunity Program 

A Progress Report for the Period 1971 Through 1975

Equal employment opportunity is a key element in the personnel policies of the Federal Reserve System. The System's equal employment opportunity (EEO) program is of national significance in terms of the number of people affected, the number of policy-formulating jobs to be filled, the involvement of all geographic sections of the country, and the availability of jobs for women and minorities.

This article provides a progress report on results of the System's equal employment opportunity program over the past 4 years.

At the end of 1975 the System employed some 28,000 people. These people were em-ployed-in categories ranging from manual labor to policy formulation-in Washington, D.C., in the 12 Federal Reserve Bank cities, and in 35 other cities across the country. There is no part of the Federal Reserve System's professional or technical work that cannot be performed equally well by women or men or by persons of any race or cultural background, given personal aptitude and the necessary education or training.

This report on the System's progress toward complete equality of opportunity in employment, therefore, may have some special significance as a profile of a large employer, operating nationwide under a single set of guidelines and conditions in which equality of opportunity is limited only by the availability of persons with the necessary aptitudes and preparation. One further factor is a limitation, not on equality of opportunity, but on results in the form of numerical improvements. The Federal Reserve System is regarded as an employer that gives a high level of training and requires a high level of performance. The System, consequently, has an Alice in Wonderland problem: it must run to even stay in place because minority or female
employees promoted into the professional or high-level technical ranks are a target for other employers.

The Federal Reserve System's espousal of nondiscriminatory personnel manage-ment-employment and promotion based on merit-has long been regarded as a part of its general outlook as a public service organization. Board statements calling for the abandonment of personnel actions based on considerations of race, color, religion, or national origin date back many years before formalization of nondiscriminatory employment practices was required by the Civil Rights Act of 1964 and Executive Orders 11246 and 11478 implementing such rules in Federal employment policy. Later actions of the Federal Government extended this policy's reach by introducing requirements that employers prepare and implement written Affirmative Action Plans.

The Federal Reserve Board has kept in step with these moves, formalizing and extending the basic equal employment objectives that had long been a part of the System's employment philosophy. To focus efforts on the achievement of stated equal employment opportunity affirmative action goals, the Board in 1969 adopted a TenPoint Plan. This called, inter alia, for the designation at each Federal Reserve Bank of a senior officer to head the Bank's Equal Employment Opportunity office, and to make regular reports to the President or First Vice President of the Bank on efforts being made by the Bank to achieve the objectives of the Plan and on the results achieved. In adopting the TenPoint Plan the Board recognized that achievements under the Plan were a priority matter and gave the Reserve Banks authority to incur additional costs to that end.

The written Affirmative Action Plan, with
annual revisions, is the basic element in an equal employment opportunity program. To be effective the plan must address the question of the representation of minorities and women at all levels of employment in the organization. Further, it must identify any deficiencies in personnel management that tend to inhibit the hiring and progress of women and minorities. Numerical goals and timetables are established by which achievement can be measured. The aim is a constantly improving "EEO profile," that is, a measurable improvement in the participation of minorities and women in an organization's employment and promotion pattern, and the distribution of minorities and women in all employment grades. This is the basic nature of the EEO programs now being implemented by the Board and the 12 Federal Reserve Banks.

To monitor and strengthen the System's EEO efforts, the Board in 1971 established an Equal Opportunity Office and gave officer status to its head. In 1972 the Board instituted an annual comprehensive year-end survey of Federal Reserve System employment, with detailed breakdowns by sex, minority group, and Federal Reserve (FR) grade level. Additional statistics cover accessions and separations.

The data that follow are taken from the annual surveys of System employment in the 4-year period from December 31, 1971, through December 31, 1975. The most significant progress toward improved nondiscriminatory employment is increased representation of women and minorities in higher grades-FR-9 and above, where professional and high-level technical employment with significant policy-formulation impact occurs. Thus, the data excerpted from the annual surveys concludes by focusing on changes in System employment of women and minorities at these levels. The FR-9 and above assignments include the professional, managerial, supervisory, and official staff positions that are comparable to the Federal Civil Service General Schedule (GS) assignments through the supergrade level. They cover the positions in which minorities and women have traditionally been underrepresented.

During the 4 -year period 1971-75 over-all employment in the Federal Reserve System increased from 23,746 to 28,130 . This represented a gain of 18.5 per cent. In 1971, women employees numbered 12,838 , or 54.1 per cent of the total System employment. In 1975 they had increased to 15,346 , or 54.6 per cent of the total. During the same 4 -year period minority employment-which overlaps female em-ployment-increased from 5,171 to 7,419 , a gain of 43.5 per cent. Thus, the rate of increase in over-all minority employment was nearly $21 / 2$ times greater than the over-all increase in System employment. At the close of 1971, minority employees represented 21.7 per cent of total employment; by the end of 1975 they had increased to 26.4 per cent of the total.

The breakdown of the 4 -year gain in minority group employment covered the following racial groupings, including women employees in these groups: Black, Oriental, American Indian, and Hispanic. The distribution of these groupings in the System for 1971 and 1975 by number and the percentage gains for each are shown in the accompanying table.

| Racial grouping | 1971 | 1975 | Percentage increase |
| :---: | :---: | :---: | :---: |
| Black | 4,174 | 5,844 | 40.0 |
| Oriental | 272 | 500 | 83.8 |
| American Indian | 21 | 36 | 71.4 |
| Hispanic | 704 | 1,039 | 47.6 |

In 1971 the minority distribution by sex was 2,040 men and 3,131 women; in 1975 the figures were 2,826 and 4,593 , respectively. This accounted for gains of 38.5 per cent for minority men and 46.7 per cent for minority women. As a result, minority women increased their percentage of all women System employees from 24.4 per cent in 1971 to 29.9 per cent in 1975.

During the 4 years, System assignments in the critical FR-9 and above grades increased from 6,522 to 9,343 . This was a gain of 43.3 per cent. For all men employees in this category, the advance was from 5,160 to 6,874 or 33.2 per cent. For all women employees the advance was from 1,362 to 2,469 or 81.3 per cent, more than double the percentage gain for men. These

| Employee group | 1971 | 1975 | Percentage increase | Per cent of total |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 1971 | 1975 |
| All employees of which: | 6,522 | 9,343 | 43.3 | 100.0 | 100.0 |
| Men ....... | 5,160 | 6,874 | 33.2 | 79.1 | 73.6 |
| Women | 1,362 | 2,469 | 81.3 | 20.9 | 26.4 |
| Non-minority employees of which: | 6,208 | 8,446 | 36.1 | 95.2 | 90.4 |
| Men ............... | 4,929 | 6,259 | 27.0 | 79.4 | 74.1 |
| Women | 1,279 | 2,187 | 71.0 | 20.6 | 25.9 |
| Minority employees of which: | 314 | 897 | 186.0 | 4.8 | 9.6 |
| Men | 241 | 615 | 155.0 | 76.8 | 68.6 |
| Women | 73 | 282 | 288.0 | 23.2 | 31.4 |

developments moved the percentage of women employees in the professional-managerial levels from 20.9 per cent of all System employees in 1971 to 26.4 per cent in 1975. In the officer category only, the increase for women was from 17 in 1971, representing 2.6 per cent of the total of 659 officers, to 40 or 5.1 per cent of the total of 778 officers in 1975.

For minority employees in the professionalmanagerial levels, the increase was from 314 to 897 -a gain of 186 per cent during the 4 -year period, or more than four times the over-all increase of System employment in these grades. Minority representation thus moved from 4.8 per cent of the highest levels of System employment in 1971 to 9.6 in 1975. During the same period, minority officers increased from 4 to 15 , constituting 1.9 per cent of the System officer category at the end of 1975.

The accompanying table shows the distri-
bution of System personnel FR-9 and above by sex and minority group for December 31, 1971, and December 31, 1975.

Further analyses of the 4 -year employment data for both the Board and individual Reserve Banks show that progress in equality of employment opportunity has been rather uniform throughout the nationwide System. This is due in large measure to the uniform and advanced criteria for the Affirmative Action Plan laid down for the System by the Board and shows close adherence to it by all Banks and by the Board. This adherence, coupled with the System's program accountability provisions and comprehensive evaluation procedures, should insure continued evenness within the System in moving to full equality of opportunity for advancement for every System employee and equality of opportunity for employment for every applicant for a job in the System.

## Statements to Congress

Statement by Arthur F. Burns, Chairman, Board of Governors of the Federal Reserve System, before the Committee on Banking, Currency, and Housing, U.S. House of Representatives, July 27, 1976.

I am pleased to meet once again with the House Banking Committee to present the report of the Board of Governors of the Federal Reserve System on the condition of the national economy and the course of monetary policy.

The economic expansion now under way is well into its second year. By any reasonable yardstick, the Nation's economy has experienced a substantial recovery. In the quarter just ended, the physical volume of total production was $8 \frac{1}{2}$ per cent above its trough in the first quarter of 1975. The rebound of activity in the industrial sector has been especially vigorous; the combined output of our factories, mines, and power plants has risen more than 16 per cent since March of last year.

The expansion of economic activity in the service trades as well as in the industrial sector has led to material strengthening in the demand for labor. Total employment across the Nation has risen about $3^{1 / 2}$ million from its low in March 1975 and is now $11 / 4$ million above the previous peak. The average length of the factory workweek has also risen, and the unemployment rate has declined from about 9 per cent to $71 / 2$ per cent in the face of rapid growth of the labor force.

These gains in production and employment have been accompanied by larger personal incomes and rising consumer purchasing power. The average level of disposable income per capita has risen in real terms by $61 / 2$ per cent since early 1975, and last quarter it was $11 / 2$ per cent above its previous peak. Business profits, too, have rebounded as the workshops
of the economy have returned to more efficient levels of operation.

In a typical business cycle, the rate of growth of economic activity slows after the first year of recovery. Thus, during the past five cyclical upswings, the physical volume of the Nation's total production rose, on average, by 8 per cent in the first year and 4 per cent in the second. This tendency for the pace of expansion to diminish during the second year often reflects a reduced stimulus from rebuilding of inventories.

In the current recovery, too, the rate of economic expansion has been influenced by the pace of inventory investment. Between the second quarter of last year and the first quarter of this year, the shift from extensive liquidation of inventories to moderate accumulation accounted for about 45 per cent of the increase in the physical volume of production. But in the quarter just ended, if preliminary estimates hold up, inventory investment no longer added to the growth of physical output.

In consequence, the real gross national product appears to have expanded at an annual rate of $41 / 2$ per cent in the second quarter of this year, compared with 8 per cent over the preceding three quarters. Growth of industrial output also decelerated, particularly in industries producing nondurable goods. And while conditions in labor markets continued to improve in the second quarter, they did so to a lesser degree. Total employment, which increased 1.3 million during the first 3 months of this year, rose 800,000 in the next 3 months. And the unemployment rate, which fell materially between December and March, has changed little over the ensuing months.

The recent slowdown in the rate of economic expansion has resulted not only from inventory adjustments-a pause in consumer spending
also played a part in this development. After a rapid advance from last December through this March, retail sales grew slowly in April and then declined in May. Temporary pauses of this kind are not uncommon during periods of cyclical expansion. Indeed, recent sales figures suggest that a resumption of the upward trend is already under way. Retail sales rose nearly 3 per cent in June, and there were encouraging gains across the range of nondurable goodswhere sales had lagged in April and May.

We may reasonably expect further good gains in retail trade in the months ahead. The basic determinants of consumer spending are clearly favorable: real incomes of families are increasing, labor market conditions are improving, and so too is the liquidity position of consumers. Furthermore, as optimism continues to spread, consumer expenditures will tend to rise more rapidly than the disposable income of consumers. As the recovery proceeds, consumer buying will in all likelihood remain a major source of strength in the economy.

A larger and more basic source of stimulus to economic activity can be expected from business outlays for new plants, machinery, and other equipment. Business capital spending typically joins the recovery process later than other sectors of the economy. But as utilization of capacity increases and profits improve, business firms typically move ahead more aggressively with their capital expenditure programs. Although such a development has been somewhat delayed in the present instance, the traditional pattern is again emerging.

Thus, production of business equipment has been rising briskly since late last year. Other indicators of business capital spending are also pointing upward. New orders for nondefense capital goods have risen in each of the past 6 months and in June were 18 per cent above their level at the end of 1975 . Also, the most recent surveys of business anticipations indicate some further strengthening of plans for capital expenditures this year.

A rising level of outlays for plant and equipment creates a need for larger inventories of materials, component parts, and other supplies in the durable goods trades. Thus, while inven-
tories in some nondurable goods industries have been restored to levels that are adequate to meet current rates of sales, renewed accumulation of inventories in the durable goods sector is just beginning. Total new orders received by producers of durable goods are now rising sharply, and rebuilding of their stocks should be a stimulus to production in the months ahead.

A revival of homebuilding activity has been contributing to general economic expansion since the spring of 1975. New housing starts rose 4 per cent further last month, as the number of single-family housing starts advanced to the level of 3 years ago.

Weakness in the multifamily sector, however, has limited the over-all improvement of residential building activity. Construction of apartment houses has been held down by previous overbuilding, lagging rents, and high construction costs. In fact, inflated costs-of construction, maintenance, and operation-have become a significant limiting factor for all branches of residential construction. Nevertheless, some signs of improvement have recently emerged even in the multifamily sector; in particular, vacancy rates for rental units have declined to the lowest level since 1972. With mortgage credit in ample supply in practically all parts of the country, a gradual further advance in homebuilding activity is likely in the months immediately ahead.

Our trade balance with other countries may also show some improvement in coming months. Imports of industrial supplies and consumer goods will move up further as the expansion of our economy continues to cumulate. But the outlook for our export trade is also brightening. Although economic recovery in other industrial countries began later than in our own, the pace of expansion in Western Europe and Japan has begun to gather momentum. Material strengthening of demands for American machinery and other products is therefore to be expected.

Activity in all major sectors of the private economy thus seems poised for further advances. Fortunately, the recovery process has thus far been well balanced, and the state of confidence has been steadily gaining. There
have been few signs of the speculative excesses that often develop in the course of a businesscycle expansion. Consumer attitudes toward buying durable goods and homes have of late further improved, and conditions in financial markets remain favorable for continuance of economic expansion.

Developments in the money and capital markets during the current recovery contrast sharply with those observed in past cyclical upswings. Short-term interest rates usually begin to rise at about the time that general business activity turns up. Soon thereafter, inflows of savings to thrift institutions often begin to dry up, and the homebuilding industry is then adversely affected.

In view of the vigorous rebound of economic activity, the continuing advance of the price level, and the record volume of Treasury borrowing, strong upward pressures on short-term interest rates might well have been expected during the past year. However, after some runup in the summer months of 1975 , short-term rates turned down again last fall, and long-term rates also moved lower. The main cause of the unusual behavior of interest rates was undoubtedly the lessening of inflationary fears over the past year, and the consequent reduction in the inflation premium that got built into interest rates-particularly, the long-term rates.

The financial climate that has prevailed during the economic recovery has permitted lenders and borrowers alike to strengthen their financial condition. The liquidity position of savings banks and of savings and loan associations, for example, has improved markedly over the past year or so. The flow of savings to these institutions has been abundant, and they have substantially increased their mortgage lending as well as added to their liquidity. The outstanding mortgage loan commitments of savings and loan associations-the leading suppliers of home mortgage credit-are now close to the highest dollar figure on record.

Commercial banks have also rebuilt their liquidity. They have done so by adding large amounts of short-term Treasury securities to their portfolios, besides reducing their reliance on volatile funds. The condition of the banking
system has been further strengthened through widespread additions to retained earnings and some new issues of common stock. The ratio of capital to risk assets of commercial banks, which declined steadily during the early 1970's, has thus increased appreciably, and confidence in the banking system has been bolstered.

Our Nation's business enterprises have likewise taken advantage of the prevailing financial climate to improve their financial condition. Corporations issued a huge volume of long-term bonds during 1975, and they used much of the proceeds to repay short-term debt and to acquire liquid assets. This year, they are still finding long-term funds readily available. Public offerings of bonds by domestic corporations totaled $\$ 3$ billion last month-an extraordinary volume by historical standards. For a time, access to public markets for long-term funds was confined largely to firms with the highest credit ratings. During the past several months, however, some lower-rated firms have found a more receptive public market for their debt issues, as is reflected in a narrowing of the yield spread between Aaa- and A-rated bond issues from $11 / 2$ percentage points last summer to about $1 / 2$ percentage point at present. Many medium-sized firms, and others with lower credit ratings, have met their need for long-term funds through private placements with life insurance companies and other institutional lenders.

Besides this, an improved stock market has made it much easier for corporations to raise equity funds for financing new investment programs or for restoring capital cushions. During June corporate enterprises sold about $1 / 1 / 2$ billion of new shares to the public. If the pace of new stock offerings during the first half of this year is maintained over the remainder of the year, 1976 will see the largest dollar volume of corporate stock flotations in our history.

These accomplishments in financial markets indicate, I believe, that the course of moderation in monetary policy pursued over the past year has aided the process of recovery in economic activity.

We at the Federal Reserve remain deeply concerned about the level of unemployment that still exists in our country. We recognize the
pressing need for the Nation to regain more prosperous economic conditions. We also recognize, as thoughtful Americans generally do, that lasting prosperity will not be achieved until our country solves its chronic problem of inflation.

The inflation that is still damaging our economy and troubling our people began over a decade ago-largely as a consequence of loose fiscal policies. Over the past 10 years, the Federal budget has been in deficit in every fiscal year but one. Over that 10 -year span, the total deficit in the Federal budget-including offbudget agencies and Government-sponsored en-terprises-has cumulated to almost $\$ 300$ billion. These huge and persistent deficits added little to our capacity to produce, but they added enormously to aggregate demand for goods and services. They have thus been directly responsible for a substantial part of the inflation problem. In financing these deficits, and also in meeting the large demands for credit by business and consumers, tremendous pressures were placed on our credit mechanisms, and the supply of money has tended to grow at a rate inconsistent with price stability.

In the early 1970's, the underlying inflationary trend caused by lax financial policies was greatly aggravated by a variety of special factors. In 1972 and 1973 crop harvests were poor both here and abroad, and a boom in economic activity developed throughout the industrialized world. Upward pressures on our prices were further augmented by devaluation of the dollar in international exchange markets, and by an enormous run-up in prices of gasoline, fuel oil, and other energy items. By 1974 these special factors combined with the underlying inflationary trend to set off an explosion of the general price level.

Our Nation has made notable progress since then in reducing the rate of inflation. The rise in consumer prices came down from 12 per cent in 1974 to 7 per cent in 1975. Over the first 4 months of this year, the rise in consumer prices moderated further, to a $31 / 2$ per cent annual rate, reflecting a temporary decline in the prices of food and fuel. In the past 2 months, however, retail prices of food and fuel have
again been increasing, and the annual rate of increase in consumer prices has stepped up to $61 / 2$ per cent. It appears that the underlying rate of inflation has not diminished since mid-1975 and that it may still be about 6 or 7 per cent.

Any such rate of inflation constitutes a serious threat to the economy, and elimination of our disease of inflation must therefore remain a major objective of public policy. Monetary pol-icy-no matter how well designed and imple-mented-cannot do the job alone. Adherence to a moderate course of monetary policy can, however, make a significant contribution to the fight against inflation.
A year ago, I reported to this committee the Federal Reserve's projection that $M_{1}$-that is, the money stock defined so as to include only currency and demand deposits-should grow between 5 and $71 / 2$ per cent during the year ending in the second quarter of 1976. For $M_{2}$ which also includes consumer-type time and savings deposits at commercial banks-a range of $81 / 2$ to $10^{1 / 2}$ per cent was deemed appropriate. For $M_{3}$-a still broader measure of money balances encompassing, besides the components of $M_{2}$, the deposits at nonbank thrift institutionsthe range was set at 10 to 12 per cent. As I informed the committee at the time, we believed that these projected rates of growth of the major monetary aggregates would facilitate substantial recovery in economic activity without aggravating the problem of inflation.

Looking back, we find that the pace of monetary expansion was generally in line with the specified ranges. During the year ended in the second quarter of $1976, M_{1}$ grew by 5.2 per cent, or near the lower end of the projected range. $M_{2}$, on the other hand, rose by 9.8 per cent, which was near the midpoint of its range, while $M_{3}$ grew 12.1 per cent, or close to the top end of its range.

The Federal Reserve was urged repeatedly during the past year to pursue a more expansionist policy in order to speed the return to full employment. Some economists as well as some members of the Congress expressed concern that the rates of monetary growth we were seeking would prove inadequate to finance a good economic expansion. We at the Federal

Reserve respected but did not share this pessimistic view. We judged from experience, first, that the turnover of existing money balances is apt to increase rapidly with the return of confidence; second, that more rapid expansion of money and credit is likely to intensify inflationary expectations and soon sow the seeds of another recession. Consequently, we resisted advice to open the tap and let money flow out in greater abundance.

The moderate rate of monetary expansion fostered by the Federal Reserve proved quite sufficient to finance a large increase in the physical volume of output and a still larger increase in the dollar volume of output. As expected, the increase of money stocks was accompanied by a sharp rise in the turnover of money balances. Moreover, neither rising interest rates nor developing shortages of credit were associated with this rise in velocity. On the contrary, conditions in financial markets, as I noted earlier, have been relatively easy, and they remain favorable to economic expansion.

Over the course of the past year, the Federal Reserve made several modifications in its projected growth ranges. Last October, the lower boundaries of the ranges for both $M_{2}$ and $M_{3}$ were reduced by one percentage point. This January, the lower boundary of the range for $M_{1}$ was reduced by a half of a percentage point, and in April the upper limit for both $M_{1}$ and $M_{2}$ was lowered by a half of a percentage point.

These were small changes, but they were logical steps in light of economic and financial developments. Reductions in our projected growth ranges were needed because improvements in financial technology made it possible for a moderate increase in money balances to finance a good economic recovery with declining interest rates. But in any event, some reduction in the projected growth ranges would have been called for as the expansion in economic activity proceeded.

The downward adjustments of these growth ranges served to reassure the business and financial community that we intend to stick to a course of moderation in monetary policy. Another indication of our firm resolve was the prompt action taken some weeks ago to ward
off a threat of excessive growth of the monetary aggregates. In April, $M_{1}$ expanded very sharply - to an annual growth rate of 15 per cent. We recognized that technical factorssuch as the decline in the Treasury's cash bal-ance-were partly responsible, and that the bulge in the monetary growth rate might be temporary. We could not, however, risk an explosion of the monetary aggregates during a period of advancing economic activity.

Over a period of several weeks starting in late April, the Federal Reserve thus became somewhat less accommodative in meeting the demand for bank reserves. The upward movement in market rates of interest that followed reflected our actions as well as rising demands for credit. Subsequently the pace of monetary expansion moderated, and interest rates have declined again.

This temporary rise of interest rates was largely confined to sensitive market yields. Interest rates on loans to small businesses and farmers, also on instalment loans to consumers, have continued to move down or remain substantially unchanged.

Most interest rates at the present time are at or below their levels in the spring of 1975, when the economic recovery began. For example, the yield on 3-month Treasury bills reached a low of around $51 / 4$ per cent in May 1975 and is now at about that same level. The rate on new issues of high grade corporate bonds in May 1975 was $91 / 2$ per cent; now that rate is down to around $81 / 2$ per cent. Interest charges on automobile instalment loans are at their lowest level since mid-1974, while those on bank loans to small businesses are lower than at any time in 3 years.

At its meeting last week, the Federal Open Market Committee specified growth ranges of the monetary aggregates for the year ending in the second quarter of 1977. The ranges differ only a little from those announced last May. The range of $41 / 2$ to 7 per cent was retained for $M_{1}$. For $M_{2}$ the upper boundary of the range was reduced by a half percentage point; for $M_{3}$ the upper boundary was brought down by a full percentage point. Consequently, the new range is $71 / 2$ to $91 / 2$ per cent for $M_{2}$, and 9 to 11 per cent for $M_{3}$.

The projected range for $M_{1}$ was left unchanged because of considerable uncertainty about the transactions balances that may be needed over the next year to finance a good rate of economic expansion. During the first year of the economic recovery, the income velocity of $M_{1}$ rose by 8 per cent. Recently, however, the rise of velocity has slowed appreciably, and it would be reasonable to expect the financing of economic activity over the next year to depend less on increasing velocity of money balances than it did during the past year.

I have advised the Congress repeatedly that the rate of expansion in $M_{1}$ will have to be lowered gradually in order to be consistent with restoration of general price stability. However, in view of recent developments with regard to the turnover of $M_{1}$, a reduction of the previously projected growth of $M_{1}$ seems inappropriate at this time.

Some lowering of the growth ranges for $M_{2}$ and $M_{3}$ is nevertheless desirable. Depositary institutions have experienced very ample inflows of savings over the past year, and some of them-particularly among the thrift institu-tions-have recently reduced somewhat the rates they pay on various classes of deposits or have taken other actions to discourage inflows of funds in excess of what they can lend or invest profitably. Since market interest rates on short-term securities have also risen marginally since April of this year, savings inflows of late appear to have moderated. Consequently, if the ranges of expansion in $M_{2}$ and $M_{3}$ are to be consistent with our projected range for $M_{1}$, they need to be lowered somewhat. These downward adjustments, I should add, are another small and prudent step in moving toward a rate of monetary expansion that may in time accommodate general price stability.

We can all take considerable satisfaction in the progress that has been made over the past year in restoring more prosperous conditions in our country. Both the Congress and the administration deserve credit for improving the economic climate. Much remains to be accomplished, however. Unemployment remains much too high. Productivity has been lagging. The expansion of our industrial plant is pro-
ceeding at too slow a pace. The residential building industry and other branches of construction are still depressed. And the menace of inflation is still with us, though in a less virulent form than in many other countries around the world. Rampant inflation abroadWest Germany and Switzerland are outstanding exceptions-has been a major factor in the turbulence of foreign exchange markets this year.

In conclusion, let me sketch briefly the directions in which our Nation may need to move in order to deal effectively with some of these problems.

First, the Board believes that the prospects for a durable prosperity would be enhanced by moderation in the course of fiscal policy. The deficit in the Federal budget has diminished very little over the past year-especially when the operations of off-budget agencies and Govern-ment-sponsored enterprises are taken into account, as they should be. It is of the utmost importance that the Congress and the administration cooperate to maintain tight control over Federal expenditures. At the present stage of the business cycle, a substantial decline of the Federal deficit is desirable in order that savings may become sufficiently available for muchneeded private investment and that renewed inflationary pressures be avoided.

Second, we would be well advised to avoid actions that might damage public confidence or threaten the vitality of particular industries. For example, the recent ruling by the Federal Trade Commission on the "holder-in-due course" doctrine seems to have come at an unpropitious moment. It may well be reducing somewhat the availability of credit to consumers and some retailers at the very time when a continued strong rise of consumer spending is needed to foster further gains in production and employment. Also, serious discussion of legislation to split up the Nation's large oil companies may even now be discouraging the investment required to relieve our critical energy problem.

Third, we ought to move forward with structural changes that will enhance the prospects for returning to full employment without releasing a new wave of inflation. A part of our recent problem of continuing inflation amidst wide-
spread unemployment stems from a failure to attend sufficiently to modernization and improvement of our Nation's industrial plant. There is a clear need in our country for a larger volume of business capital investment and for greater reliance by business firms on equity funds in financing their capital expenditures. These objectives could be promoted by an overhaul of the structure of Federal taxation.
Governmental practices and programs affecting labor markets also have to be reviewed in any serious search for lasting measures to reduce unemployment. For example, the Federal minimum wage law is still pricing many teenagers out of the job market, and our present programs for unemployment compensation may be providing benefits on such a generous scale as to blunt incentives to work. We would also benefit from more effective job banks, more realistic training programs, and other labor market policies.

Structural changes in other areas are also needed to enhance the prospects for expanded employment, while at the same time reducing the pressures on costs and prices. We need to
gather the courage to reassess the nature and enforcement of our laws directed against restraint of trade by business firms; also the various restrictions on entry into the professions, the wage and employment standards in the Davis-Bacon Act, the proper role of trade unions in the public sector, the monopoly of first-class mail by the Postal Service, and the mass of governmental regulations that impede the competitive process and run up costs for business enterprises.

There are numerous structural measures besides those I have mentioned that might aid in the restoration of general prosperity. Progress in this field is, I believe, a matter of urgency. Our Nation has tolerated high rates of unemployment and of inflation much too long. But our Nation cannot reach the goal of full employment by pursuing fiscal and monetary policies that rekindle inflation. The Board therefore urges the Congress and the Administration to move ahead on structural policies that promise to strengthen competitive forces in our markets and to open new opportunities for expansion of production and employment.

> Statement by Philip C. Jackson, Jr., Member, Board of Governors of the Federal Reserve System, before the Committee on Banking, Housing, and Urban Affairs, U.S. Senate, July 29, 1976.

I appreciate the opportunity to participate on behalf of the Board of Governors of the Federal Reserve System in these hearings. For purposes of brevity, I will not repeat the answers previously furnished to the committee in response to its questions. These answers outline the nature and extent of the Board's Office of Saver and Consumer Affairs, which acts on consumer complaints. They describe the enforcement activities in the consumer credit area of both the Board of Governors and the Federal Reserve System as a whole. They also speak to the rationale and need for the complex regulatory
scheme under the Consumer Credit Protection Act.

In discharging its responsibilities under the Consumer Credit Protection Act, the Board of Governors must fulfill the role of writer and promulgator of regulations under the statute as well as that of enforcer of the statute for State member banks. Thus, the Board's Office of Saver and Consumer Affairs not only responds to consumer complaints but also drafts regulations and interpretations to implement the statute and assists our Division of Banking Supervision and Regulation in its enforcement responsibilities.

Our past enforcement efforts under the Consumer Credit Protection Act, primarily concentrated in the Truth in Lending Act area, have utilized the standard bank examination technique. However, the recent rapid growth of
consumer credit laws in general is leading us toward changes in this approach. These laws encompass such a broad range of highly technical subjects that examiners understandably have difficulty keeping up with the many details involved. We have also found that the techniques needed for examination of bank practices and policies in the consumer credit area are quite different from the approach that is appropriate for determining banks' safety and soundness.

In recent months a committee of the Board of Governors has been studying various approaches to the enforcement of consumer credit laws. This committee is striving to determine the best approach toward this type of enforcement activity and to provide for uniform techniques throughout the System.

Several Reserve Banks have already established special teams and procedures for enforcement of consumer credit regulations. The teams consist of experts and provide helpful information to banks, particularly small banks where the burdens of technical compliance are disproportionately large. These specialists are also working to develop new techniques for examination that will meet the demands for the more contemporaneous concepts of compliance with the new regulations. Generally, these Reserve Banks are finding it appropriate to separate enforcement for compliance under consumer credit legislation from standard examinations on safety and soundness.

The Board shares the banking committee's concern about the complexity of the regulatory scheme that has arisen as a consequence of the Consumer Credit Protection Act. In recent weeks, we have made some recommendations to this committee for statutory simplification of those aspects of the Truth in Lending Act appli-
cable to closed-end credit. As soon as more practical experience is gained under the Fair Credit Billing Act, similar recommendations for potential simplification applicable to open-end credit may be in order. One of the recommendations made earlier-the possible limitation of creditor liability to acts that significantly injure or mislead consumers-offers some hope of a major change toward simplicity in the statute and its implementation.

In the Board's view, the principal reason that these statutes and regulations are complex is that the credit system in America is complex beyond the ability of any one person or organization to completely understand. Ours has become such a credit-oriented society that the purchase of practically any kind of good or service may directly or indirectly involve the use of credit. It is thus axiomatic that any statute or implementing regulation that is applicable to credit in general will tend to be as complex as the system it is designed to regulate. We feel the best solution to this problem for the future is to limit legislative corrective action to those particular fields where significant public abuse has developed.

The Board was pleased that the Congress recently authorized establishment of a Consumer Advisory Council, which has advisory responsibility on a broad range of consumer matters. We are also pleased that, following public notice, a large number of qualified people has indicated a willingness to serve on the Council. Final selection of Council members is now being made. This Council should prove to be beneficial in assisting the Board in its commitment toward effective action in the regulatory and enforcement aspects of consumer credit legislation.

## Record of Policy Actions of the Federal Open Market Committee

## MEETING HELD ON JUNE 22, 1976

## Domestic Policy Directive

The information reviewed at this meeting suggested that growth in real output of goods and services had moderated in the second quarter from the rapid pace to which it had accelerated in the first quarter, now estimated by the Commerce Department to have been at an annual rate of 8.7 per cent. Average prices appeared to have risen more in the second quarter than the first, when the rate of advance had been relatively low. Staff projections suggested that during the second half of the year real GNP would expand at a good pace and that prices would continue to rise somewhat faster than they had in the first quarter.

The second-quarter moderation in growth of real output was attributable primarily to a considerable slowing in the rates of increase in consumer spending and business inventory investment. Retail sales, which had risen substantially in late 1975 and early 1976, were estimated to have remained about unchanged in April and to have declined somewhat in May-as a result of weakness in nondurable goods sales in both months and a downturn in sales of autos in May. However, weekly data suggested some pick-up in retail sales in late May and early June.

Industrial production, employment, and personal income all rose substantially further in May. Production gains were largest in industries that make business equipment, durable consumer goods other than autos, and materials for durable goods industries. Auto production rose only slightly further. Output of nondurable goods also increased, but growth in that area had slowed appreciably from the high rates of the summer and early fall of 1975. As in April, the rise in production was reduced somewhat by a strike in the rubber industry.

Conditions in labor markets continued to improve in May. Nonfarm payroll employment reached a level some 250,000 above its pre-recession high, and the unemployment rate declined from
7.5 to 7.3 per cent. The average length of the factory workweek rebounded to about its March level, following a decline in April that apparently had been related to holidays in the week of the survey. Personal income increased at about the average rate of other recent months.

Private housing starts, which had declined in March and April, rose somewhat in May to a little above the first-quarter average rate. The May increase was accounted for by a rise in starts of multifamily units to the highest level in nearly 2 years, although such starts were still quite low by historical standards. Residential building permits increased for both single and multifamily units. Outstanding mortgage loan commitments at savings and loan associations had advanced further in April, the latest month for which data were available.

Although nonresidential construction activity remained weak in April, new orders for nondefense capital goods increased substantially further in both April and May. A Commerce Department survey of anticipated plant and equipment expenditures, taken in late April and early May, indicated that businesses were planning to step up capital outlays in 1976 relative to 1975 somewhat more than had been suggested by a corresponding survey taken in February. The rise, however, was considerably smaller than had been implied by an intervening private survey. According to the latest Commerce Department survey, the largest increases in capital outlays were planned by electric and gas utilities and manufacturers of nondurable goods.

According to available data, capacity utilization rates in industries producing major materials were still well below earlier peaks but had risen markedly, particularly in nondurable goods industries. Comments of businessmen in the course of conversations with Reserve Bank personnel also suggested that rates of capacity use were generally high in major industries. In almost all such industries, however, capacity was regarded as adequate for at least the next 6 to 12 months.

The wholesale price index for all commodities-which had risen appreciably in April following 5 months of little change-increased moderately in May. The rise was attributable to some further increase in prices of farm and food products, following their sharp advance in April. The May index for industrial commodities was
virtually unchanged, but it did not reflect subsequent price increases for steel and gasoline.

The rate of increase in consumer prices stepped up somewhat in May, as prices of food and energy items rose; earlier in the year the rise in the consumer price index had been held down by declines in such items. Apart from food and energy, average consumer prices had advanced at a relatively steady annual rate, in the neighborhood of 7 per cent, for the past year.

The index of average hourly earnings for private nonfarm production workers advanced at a faster pace in May than in previous months of the year, reflecting in part the impact of a major labor settlement in the transportation industry and sizable wage increases in service industries. Over the first 5 months of 1976 the rate of increase in average wage rates was less than in the second half of 1975.

A staff analysis of the economic situation indicated that the economic expansion had slowed somewhat more in the second quarter than had been anticipated a month earlier, mainly because of sluggishness in retail sales. In the staff's judgment, however, the recent weakness in consumer spending was likely to prove to be a temporary pause of the kind that had often occurred during periods of economic expansion-most recently in 1975, following the sharp advance of the spring and early summer. It was noted that the basic determinants of consumer spending-including the rates of growth in employment and in real personal income-were conducive to a resumption relatively soon of stronger gains in outlays.

In general, it appeared that there had been little change during the past month in the fundamental factors underlying the outlook for economic activity. Therefore, relatively little change had been made in the staff's projections for the second half of 1976. Although the latest Commerce Department survey suggested less growth in business capital spending than had an earlier private survey, the outlook in that sector remained relatively favorable-in light of such factors as the recent increases in production of business equipment and in new orders for nondefense capital goods, and rising rates of capacity utilization. Businesses were expected to maintain a high rate of inventory investment, particularly in durable goods. Residential construction outlays were projected to rise in
the second half, although at a somewhat slower pace than anticipated a month earlier.
U.S. foreign trade was in deficit again during April, but the deficit was less than in March and was about equal to the average rate in the first quarter. Nonfuel imports declined from their high March volume, while nonagricultural exports rose somewhat from the depressed levels early in the year.

In the latter part of May the average value of the dollar against leading foreign currencies increased about 1 per cent on a tradeweighted basis, in part because of a rise in U.S. interest rates relative to interest rates abroad, but it changed little thereafter. During the period since the meeting of the Committee in mid-May the dollar had appreciated on balance against all major currencies except the Canadian dollar and the Swiss franc. A steep decline in exchange rates for the British pound was halted and partly reversed in early June after announcement of a $\$ 5.3$ billion package of standby credits to the Bank of England by the Group of Ten countries, Switzerland, and the Bank for International Settlements. The package included $\$ 1$ billion under the Federal Reserve swap line with the Bank of England and $\$ 1$ billion under a U.S. Treasury Exchange Stabilization Fund swap arrangement with that Bank.

At U.S. commercial banks total loans and investments expanded further in May, but most of the growth continued to reflect increased bank holdings of Treasury securities. While real estate loans remained strong and business loans rose for the first time since January, total loans outstanding at banks were about unchanged. The volume of commercial paper issued by nonfinancial corporations increased somewhat further during the month.

Growth in the narrowly defined money stock- $M_{1}$-slowed to a 6 per cent annual rate in May from the exceptionally rapid 15 per cent rate recorded in April and appeared to be moderating further in early June. Much of the slowing might have been attributable to adjustments in cash balances following the bulge that had developed in April. Growth in the broader measures of the money stock- $M_{2}$ and $M_{3}$-also slowed in May, due in most part to the slower expansion in demand deposits. Inflows of time and savings deposits (other than negotiable CD's) at banks and nonbank thrift institutions were relatively well maintained during May and early June-despite a marked diminution of inflows to
passbook savings accounts at banks as short-term market interest rates moved above the ceiling rate on such accounts.

System open market operations since the May meeting had been guided by the Committee's decision to seek bank reserve and money market conditions consistent with moderate growth in the monetary aggregates over the period ahead, while taking account of developments in domestic and international financial markets. Immediately following the May meeting, the System had become a little less accommodative in the provision of reserves, as it aimed at reserve conditions consistent with a Federal funds rate averaging around $53 / 8$ per cent. This was slightly above the $51 / 4$ per cent rate prevailing at the time of the meeting and equal to the midpoint of the 5 to $53 / 4$ per cent operating range that the Committee had specified for the inter-meeting period.

Data becoming available in the latter part of May suggested that the May-June rates of growth in both $M_{1}$ and $M_{2}$ would be near the upper ends of the Committee's ranges of tolerance. Accordingly, the System sought reserve conditions consistent with a Federal funds rate of about $51 / 2$ per cent. While subsequent data tended to confirm the late-May projection of growth in $M_{2}$, they also suggested that growth in $M_{1}$ might be weaker than had been indicated earlier. Under the circumstances the System continued to aim at reserve conditions consistent with a Federal funds rate averaging around $51 / 2$ per cent.

Short-term interest rates in general rose somewhat further in the latter part of May, reflecting market responses to the firming in money market conditions and some increase in business credit demands. During this period most banks raised the prime rate applicable to large business borrowers in two steps from $63 / 4$ to $71 / 4$ per cent. Subsequently, short-term rates fluctuated in a narrow range, as market attitudes appeared to be influenced by indications that the rate of monetary growth had slowed, by the leveling off of the Federal funds rate, and by evidence of some moderation in the pace of economic expansion. Over the inter-meeting period as a whole, most private short-term interest rates increased modestly, on balance, while rates on Treasury securities changed little. On the day before this meeting the market rate on 3-month Treasury bills was 5.36 per cent, compared with 5.22 per cent on the day before the May meeting.

Interest rates on intermediate- and long-term securities declined a little on balance over the inter-meeting period, in part reflecting the stabilization of conditions in short-term markets. In May public offerings of new corporate bonds and stocks remained substantial, and the volume of new State and local government bond offerings rose to the highest level on record.

Interest rates on home mortgages in the primary market, which typically lag bond yields, had edged up in recent weeks. However, yields in the secondary market for mortgages tended to move with other long-term rates-rising in May and declining in the first half of June.

In mid-May the Treasury announced plans to sell $\$ 2.25$ billion of 2 -year notes and $\$ 2.0$ billion of 4 -year 1-month notes, in order to refund $\$ 1.5$ billion of publicly held notes maturing on May 31 and to raise $\$ 2.75$ billion of new cash. In auctions on May 19 and June 3 the notes were sold at average prices to yield 7.16 and 7.71 per cent, respectively. Because its cash balance exceeded its earlier anticipations, the Treasury was able to meet its seasonal financing need prior to the June 15 tax date through the issuance of $\$ 2$ billion of 9 -day cash-management bills-roughly half the amount previously projected. In the week before this meeting the Treasury announced that in the coming weeks it would sell $\$ 2.5$ billion of 2 -year notes and $\$ 2.5$ billion of 5 -year 1 -month notes.

In April, when the Committee had last reviewed its longer-run ranges for the monetary aggregates, it had agreed that on the average over the period from the first quarter of 1976 to the first quarter of 1977 growth at rates within the following ranges appeared to be consistent with its broad economic aims: $M_{1}, 41 / 2$ to 7 per cent; $M_{2}, 71 / 2$ to 10 per cent; and $M_{3}, 9$ to 12 per cent. The associated range for growth in the bank credit proxy was 6 to 9 per cent. It was agreed that the longer-term ranges, as well as the particular list of aggregates for which such ranges were specified, would be subject to review and modification at subsequent meetings. It was also understood that, as a result of short-run factors, growth rates from month to month might well fall outside the ranges contemplated for annual periods.

In the discussion of current policy at this meeting, the Committee took note of a staff analysis suggesting that, if prevailing money market conditions were maintained over the coming 4 -week inter-
val, rates of growth in $M_{1}$ and $M_{2}$ for June and July combined were likely to average close to the moderate pace that had developed in May. These rates were substantially below the very rapid growth rates experienced in April and near the midpoints of the longer-run ranges agreed upon by the Committee at its April meeting.

The staff analysis suggested that growth in $M_{1}$ would be influenced by increasing demands for money associated with expansion in nominal GNP, but that the rise in June was likely to be somewhat smaller than in July because of continuing adjustments of cash balances built up during the April bulge in money growth. Growth in the time deposit component of $M_{2}$ was expected to moderate slightly further, reflecting some continued shifts of inter-est-sensitive funds from passbook savings accounts to alternative forms of liquid assets.

The analysis also suggested that financial markets were not likely to come under pressure in the near term. Following the large volume of new corporate and municipal issues being offered in June, the supply of new bonds was expected to slacken seasonally. Moreover, while the Treasury faced a large budget deficit in the third quarter, it appeared that part of its cash needs in that quarter could be accommodated through reductions in what seemed likely to be a relatively large mid-year cash balance. It appeared, however, that over the somewhat longer run, strengthening could be expected in private short-term credit demands, particularly from businesses.

In discussion of the longer-term outlook for credit demands, it was noted by a staff member that business inventory accumulation and capital spending were projected to be larger in the second half of 1976 than in the first half. Because these expanded outlays seemed likely to exceed internal accumulations of funds, over-all business needs for external financing were projected to rise. In view of the large volume of financing already accommodated in capital markets during the first half of the year, the bulk of this additional second-half need was expected to be met at banks.

During the Committee's policy discussion, it was observed that the apparent moderation in the rate of growth in real GNP in the second quarter was, by and large, a healthy development, in the sense that continuation of the rapid first-quarter rate of expansion would soon have generated undesirable boom conditions. On the whole, the members were of the view that the economic expansion
was proceeding satisfactorily and that the outlook was favorable. At the same time, some concern was expressed about the possibility that inflationary pressures would strengthen as the expansion proceeded.

Some differences emerged during the discussion in the degree of confidence with which members viewed the outlook in particular economic sectors. Thus, while the members were generally inclined to agree that the second-quarter slowing in consumer spendingwhich had been a major contributing factor to the moderation in GNP growth-was likely to prove temporary, several noted that that outcome was not wholly certain. Some members were more confident than others about the likely strength in capital spending. One member, who was personally optimistic on that score, nevertheless observed that the investment plans of many of the businessmen with whom he had talked were being affected by their concerns regarding the implications of current and possible governmental regulatory actions. Another indicated that he would interpret recent businessmen's comments to Reserve Banks as suggesting that there was less excess capacity in the economy than one might have thought. With respect to the outlook for residential construction, some members indicated that they had been rather disappointed by developments in recent months-including the relatively low average rate of multifamily starts and the failure of new home sales to rise above the levels of last autumn. In support of a contrary view, reference was made to the May increase in starts and permits, and to what appeared to be a generally optimistic attitude within the homebuilding industry.

In general, Committee members favored directing open market operations in the period immediately ahead toward achieving bank reserve and money market conditions consistent with moderate growth in the monetary aggregates. Some suggested specifying operating ranges for $M_{1}$ and $M_{2}$ in the June-July period with upper limits no higher than 7 and 10 per cent, respectively-the upper limits of the longer-run ranges agreed upon at the April meetingon the ground that more rapid growth in the short run would make realization of the longer-run goals more difficult. Others indicated that they were prepared to accept somewhat more rapid growth over the June-July period.

The Committee agreed that it would be desirable to maintain
relative stability in money market conditions at this juncture, in light of the current slowing of the economic expansion and the moderation of growth in the monetary aggregates since April. It was noted by some members that, if the economy expanded about as projected during the second half of the year, some firming of money market conditions might well be required to hold growth of the monetary aggregates within the Committee's longer-run ranges, and it was suggested that a small rise in the Federal funds rate now might serve to moderate the extent of the increase that might otherwise be indicated later. It was also noted, however, that there was little risk in awaiting stronger confirmation that the recent slowing of growth in consumer spending was only temporary. In addition, it was observed that short-term interest rates were already somewhat higher than they had been in April. With respect to the interest rate outlook, one Committee member questioned the staff's projection of enlarged business credit demands at banks in the second half of 1976.

There were some differences in members' views regarding the desired inter-meeting range of tolerance for the weekly-average Federal funds rate. A substantial majority favored a relatively narrow range of $51 / 4$ to $53 / 4$ per cent, on the grounds that a significant easing of money market conditions would be undesirable at this time in view of the likelihood that it might have to be reversed shortly, and that a significant firming would be inappropriate in view of the element of uncertainty in the economic outlook. Some, however, preferred a wider range of 5 to 6 per cent in order to allow more scope for responses to possible deviations from expectations in growth rates of the monetary aggregates.

At the conclusion of the discussion the Committee members agreed that growth in $M_{1}$ and $M_{2}$ over the June-July period at annual rates of $31 / 2$ to $71 / 2$ per cent and 6 to 10 per cent, respectively, would be acceptable. As at other recent meetings, they decided that approximately equal weight should be given to $M_{1}$ and $M_{2}$ in assessing the behavior of the aggregates. Finally, they agreed that until the next meeting the weekly-average Federal funds rate might be expected to vary in a gradual and orderly way within a $51 / 4$ to $53 / 4$ per cent range. As customary, it was understood that the Chairman might call upon the Committee to consider the need for supplementary instructions before the next scheduled meeting
if significant inconsistencies appeared to be developing among the Committee's various objectives.

The following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests that growth in real output of goods and services, which had been vigorous in the first quarter, has moderated in the current quarter. In May retail sales declined from the March-April level and were near the monthly average of the first quarter. However, recovery in industrial production continued at about the average pace of the first 4 months of the year, and the gain in employment again was substantial. The unemployment rate declined from 7.5 to 7.3 per cent. The rise in the wholesale price index for all commodities, which had been large in April, was moderate in May; average prices of farm products and foods rose much less than in April. Average prices of industrial commodities changed little in May, but in recent weeks price increases have been announced for some major industrial materials. The rise in consumer prices in May was somewhat faster than the average increase in earlier months of the year, owing to increases in prices of food and energy items. The advance in the index of average wage rates was larger in May than the gains in other recent months, owing in part to implementation of a new labor contract in a major industry.

The average value of the dollar against leading foreign currencies has been relatively steady in recent weeks. On June 7 a total of $\$ 5.3$ billion of 6 -month stand-by credits to the United Kingdom was announced, including $\$ 1$ billion under the Federal Reserve System's swap line and $\$ 1$ billion from the Exchange Stabilization Fund. Subsequently, the decline in the pound sterling was halted and partly reversed. In April the U.S. foreign trade deficit was at the same rate as in the first quarter.

Growth in monetary aggregates slowed substantially in May and early June from the exceptionally rapid rates recorded in April, mainly because of a sharp slackening in expansion of demand deposits at commercial banks; inflows of those time and savings deposits included in the broader aggregates were relatively well maintained. Market interest rates in general rose somewhat further in the latter part of May, but since then, short-term rates have fluctuated in a narrow range and long-term rates have edged down.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions that
will encourage continued economic expansion, while resisting inflationary pressures and contributing to a sustainable pattern of international transactions.

To implement this policy, while taking account of developments in domestic and international financial markets, the Committee seeks to achieve bank reserve and money market conditions consistent with moderate growth in monetary aggregates over the period ahead.

Votes for this action: Messrs. Burns, Volcker, Balles, Black, Coldwell, Gardner, Jackson, Lilly, Partee, Wallich, Winn, and Baughman. Votes against this action: None. Absent and not voting: Mr. Kimbrel. (Mr. Baughman voted as alternate for Mr. Kimbrel.)

Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's Annual Report, are released about a month after the meeting and are subsequently published in the Bulletin.

Statutes, regulations, interpretations, and decisions

## Securities Credit by Persons Other Than Banks, Brokers, or Dealers

The Board of Governors has adopted several amendments to its Regulation $G$ relating to registration, termination of registration, and reporting requirements.

Effective August 20, 1976, Part 207 is amended as follows:

1. Paragraphs (a) and (b) of section 207.1 are amended as set forth below:

## Section 207.1-General Rule

(a) Registration. Every person who, in the ordinary course of his business, ${ }^{1}$ during any calendar quarter ended after June 30, 1976, extends or arranges for the extension of a total of $\$ 100,000$ or more, or has outstanding at any time during the calendar quarter, a total of $\$ 500,000$ or more, in credit, secured directly or indirectly, ${ }^{2}$ in whole or in part, by collateral that includes any margin securities, ${ }^{3}$ unless such person is subject to Part 220 (Regulation T) or Part 221 (Regulation U) of this Chapter, is subject to the registration requirements of this paragraph and shall, within 30 days following the end of the calendar quarter during which the person becomes subject to such registration requirements, register with the Board of Governors of the Federal Reserve System by filing a statement in conformity with the requirements of Federal Reserve Form G-1 with the Federal Reserve Bank of the district in which the principal office of such person is located.
(b) Termination of registration. Any person so registered who has not, during the preceding 6 calendar months, extended or arranged for the extension or maintenance of and has not had more than $\$ 200,000$ of credit outstanding at any time during such period, secured directly or indirectly, in whole or in part, by collateral that includes any

[^7]margin securities, may apply for termination of such registration by filing Federal Reserve Form G-2 with the Federal Reserve Bank of the district in which the principal office of such person is located. A registration shall be deemed terminated when such application is approved by the Board of Governors of the Federal Reserve System.
2. Section 207.3 (a) is amended as set forth below:

## Section 207.3-Reports and Records

(a) Every person who is registered pursuant to $\S 207.1(\mathrm{a})$ of this part shall, within 30 days following June 30,1977 and within 30 days following each succeeding June 30 thereafter, file a report on Federal Reserve Form G-4 with the Federal Reserve Bank of the district in which the principal office of the lender is located.
3. As an incident of the foregoing amendments to Regulation G, footnotes therein numbered 5, $6,7,8$, and 9 are renumbered $4,5,6,7$, and 8 , respectively.

## Truth in Lending

The Board of Governors has amended its Regulation Z to require itemization of a finance charge where the finance charge consists of more than one type of charge.

Effective August 6, 1976, section 226.8 is amended as follows:

Section 226.8-Credit
other than open end-specific disclosures
(c) * * *
(8) $* * *$
(i) The total amount of the finance charge, using the term "finance charge,'" and where the total
charge consists of two or more types of charges, a description of the amount of each type, and
(ii) * * *
(d) ***
(3) * * * the total amount of the finance charge, ${ }^{11}$ using the term "finance charge," and where the total charge consists of two or more types of charges, a description of the amount of each type.

## Rules Regarding Delegation of Authority

The Board of Governors has amended its Rules Regarding Delegation of Authority to delegate to the Secretary of the Board the authority to approve future Annual Reports to the Office of Management and Budget on implementation of the Privacy Act.

Effective July 1, 1976, section 265.2(a) is amended by adding a new paragraph (17) to read as follows:
Section 265.2-Specific
Functions Delegated to Board
Employees and to Federal Reserve Banks
(a) The Secretary of the Board (or, in his absence, the Acting Secretary) is authorized:
(17) Pursuant to the requirement of the Privacy Act (5 U.S.C. § 552a(p)), to approve future Annual Reports on the Privacy Act from the Board of Governors to the Office of Management and Budget for inclusion in the President's annual consolidated report to the Congress.

## Interest on Deposits

## Individual Retirement AccountsNotice Concerning Rulemaking Proceeding

On June 26, 1975, the Board and the Federal Deposit Insurance Corporation (' ${ }^{\text {FDIC'') }}$ invited public comment on several issues relating to Individual Retirement Accounts ('IRA's") and possible amendments to Regulation Q (Interest on Deposits) ( 40 FR 28644 ). This action was taken in view of the enactment of the Employee Retirement Income Security Act of 1974 (Pub.L. 93-406),
which provides, in part, for the establishment of IRA's by individuals not covered by employer pension plans.

Among the issues presented for comment at that time was the question of whether existing restrictions of Regulation $Q$ relating to withdrawal of time deposits prior to maturity unnecessarily interfere with the administration of IRA's maintained at banks in time deposit form. Comment was also requested on whether these restrictions interfere with the orderly distribution of IRA funds to an individual who has reached age $591 / 2$ or has become disabled. In addition, comment was requested on whether the existing schedule of ceiling interest rates that member banks are permitted to pay on IRA deposits should be increased and whether member banks should be permitted to pay interest on IRA deposits at rates that are equal to those that may be paid by savings and loan associations and mutual savings banks.

Numerous comments were received by the Board and the FDIC on the issues presented. Ninety financial institutions and organizations commented on the question of raising interest rate ceilings. Forty-eight commercial banks favored action to increase the interest rate ceiling on funds deposited in IRA's. Twenty-eight banks, ten thrift institutions, and four organizations representing thrift institutions opposed such action. Three hun-dred-nine comments were received on the question of elimination of the existing differential in interest rate ceilings between commercial banks and thrift institutions for IRA deposits. Two hundred fortythree commercial banks and banking organizations favored the elimination of the differential. Sixty thrift institutions and thrift organizations and six banks opposed elimination of the differential.

Those institutions and organizations commenting in favor of elimination of the interest rate differential stated that the existing differential in rate ceilings places commercial banks at a serious competitive disadvantage with thrift institutions in attracting and retaining IRA deposits. Additional arguments presented were that the effect of the $1 / 4$ per cent differential over time and the effect of compounding result in a significant difference in earnings over the life of an IRA. These comments assert that, since IRA's constitute an entirely new type of service available at financial institutions, it is inequitable for Federal regulations to permit a rate advantage to exist based solely upon the nature of the regulated institution in which the IRA is established. It is argued that in
enacting the IRA provisions, Congress intended to provide an incentive for individuals to save for their retirement and did not indicate an intent to favor any one category of financial institution. Consistent with this Congressional intent, an individual should be permitted to obtain the highest rate of return possible on his or her retirement savings. It is further argued that to restrict individuals from obtaining the highest earnings possible on these retirement funds by limiting the ceiling rate for commercial banks to a rate below that permitted to be paid by thrift institutions would be contrary to Congress's intent that IRA's are to be encouraged as a vehicle for accumulating retirement savings.

Those opposed to elimination of the differential stated that thrift institutions need the $1 / 4$ per cent differential in order to compete successfully with commercial banks for IRA deposits. These comments stated that Congress was aware of the existence of the differential when it enacted the IRA provisions. It was argued that if Congress intended that IRA participants should be permitted to obtain the same rate of interest on IRA deposits regardless of where the accounts are established, it would have reflected such an intent explicitly in the legislative history of the provision. Since nothing in the legislative history indicates any such explicit Congressional intent to eliminate the favored position of thrift institutions, it was argued, Congress did not intend to affect the existing differential structure when it enacted the IRA provision. Many of those opposed to elimination of the differential also stated that any change in the rate structure should await the outcome of Congress's current review of the powers of financial institutions.
In December 1975, following consideration of the comments submitted, the Board amended Regulation Q to permit member banks to pay all or a portion of an IRA time deposit prior to maturity without imposing the Regulation Q interest penalty when the depositor attains age $591 / 2$ or becomes disabled (40 FR 57663). The Board also permitted member banks to waive the $\$ 1,000$ minimum denomination requirement for IRA time deposits with 4 - and 6 -year maturities at ceiling rates of $71 / 4$ per cent and $71 / 2$ per cent. Similar actions were taken by the FDIC and by the Federal Home Loan Bank Board for insured nonmember banks and insured savings and loan associations. These actions were taken to facilitate the establishment of IRA's in accordance with Congress's
intent to encourage individuals not participating in other pension plans to save for their retirement and to provide a convenient means for payout of IRA funds in the future. At the time these actions were taken, the Board indicated that, in view of Congress's intent to encourage individuals to save for their retirement, the Board would continue to examine the question of whether a differential in interest rate ceilings is appropriate for IRA deposits.

Subsequently, a survey was conducted by the Board in conjunction with the FDIC and Federal Home Loan Bank Board of IRA accounts of all Federally-insured commercial banks, savings and loans, and mutual savings banks. Among the data obtained were statistics on the amount and distribution of IRA funds among various types of financial institutions, distribution of IRA deposits according to size of institution, and maturity classifications of IRA deposits at commercial banks and mutual savings banks. The results of this survey indicate that as of March 31, 1976, thrift institutions generally possess relatively more IRA deposits than do commercial banks.

The Board has carefully considered the question of an interest rate differential as it applies to IRA deposits at commercial banks and thrift institutions. During the course of this consideration, the Board has given weight to the various arguments presented by those who have commented on the issues raised by the Board's June 1975 announcement as well as comments received subsequently. Weight has also been given to the results of the Board's survey concerning IRA deposits. Consideration has been given to the intent of Congress in enacting the IRA provisions to encourage individuals to save for retirement and the effect that a differential may have upon the amount of earnings an individual may obtain on his or her retirement savings over the life of the IRA.

The Board believes that in enacting the IRA provisions it was the intent of Congress that individuals whose employers do not have private retirement plans should be encouraged to provide for their retirement needs through the establishment of IRA's. In order to accomplish Congress's intent, as a matter of public policy the Board believes that IRA participants should be permitted to obtain the highest rates of interest permissible on their retirement savings regardless of where the deposits are maintained. In the Board's estimation, a differential in IRA deposits may be viewed as inconsistent with the objective of providing IRA
depositors with a means of obtaining the highest earnings possible on funds saved for retirement purposes.

In addition, the Board believes that there is some evidence, as yet inconclusive, which indicates that member banks may be at a disadvantage vis-à-vis thrift institutions in competing for IRA deposits because of the existence of the differential in present interest rate ceilings.

The Board has determined that further monitoring for several months will be proper before a final conclusion is reached. If the present trend in the competitive structure for IRA deposits continues, the Board will then consider taking appropriate steps to restore competitive balance between commercial banks and thrift institutions in the offering of IRA's.

It is anticipated that further consideration of action by the Board to permit member banks to offer IRA's on a fully competitive basis will be appropriate in early 1977 concurrent with Congressional consideration of the extension of the Board's authority to establish interest rate ceilings for member banks and the Board's recommendations to Congress in connection with that review. In this regard, the Board recognizes that under the provisions of Public Law 94-200 (89 Stat. 1124), any action by the Board to eliminate or reduce an interest rate differential for any category of deposits or accounts that was in effect on December 10, 1975 could not become effective until such action was approved by concurrent resolution of the House of Representatives and the Senate.

## Bank Holding Company and Bank Merger Orders Issued by the Board of Governors

## Orders Under Section 3 of Bank Holding Company Act

Banco de Santander, S.A., Santander, Spain

## Order Approving

Formation of Bank Holding Company
Banco de Santander, S.A., Santander, Spain, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 67 per cent or more of the voting shares of First National Bank of Puerto Rico, Hato Rey, Puerto Rico ("Bank’").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant (deposits of approximately $\$ 3.2$ billion), a Spanish commercial bank, has 484 branches including branches in Paris, Frankfurt, and London. Applicant also owns indirectly banks in Argentina and Panama and operates representative offices in Europe, Latin America, New York, New York, and San Juan, Puerto Rico.

Bank (deposits of approximately $\$ 29.3$ million) ${ }^{1}$ is the only national bank headquartered in Puerto Rico and is the tenth largest of eleven nongovern-ment-owned commercial banks operating in Puerto Rico. Because of the nature of the business conducted by Applicant's representative offices in Puerto Rico, it does not appear that any meaningful competition would be eliminated as a result of the proposal. In view of Bank's size and rank in the market, the Board views the proposed acquisition as a foothold entry by Applicant into the market. ${ }^{2}$ Such a foothold entry by Applicant should have a salutary effect on competition by enhancing Bank's competitive capabilities relative to the other banks in the market. Therefore, on the basis of the record, the Board concludes that consummation of the proposal would not have a significant adverse effect on existing or potential competition in any relevant area and that competitive considerations are consistent with approval of the application.

The financial condition and managerial resources of Applicant are considered satisfactory and its future prospects appear favorable. Absent consummation of this proposal, the financial condition, managerial resources and future prospects

[^8]of Bank would be less than satisfactory. However, in view of Applicant's agreement to inject needed capital of approximately $\$ 3.2$ million and its intention to strengthen the management of Bank, the same conclusions which apply to Applicant with respect to its financial condition, managerial resources and future prospects also apply to Bank. Affiliation with Applicant should enable Bank to more effectively provide services it has been forced to reduce as a result of its weakened financial condition. In addition, affiliation with an international banking organization such as Applicant should enable Bank to offer international banking services not currently available at Bank. Thus, considerations relating to the convenience and needs of the community to be served are also consistent with approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order of (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective July 30, 1976.

Voting for this action: Chairman Burns and Governors Wallich, Partee, and Lilly. Absent and not voting: Governors Gardner, Coldwell, and Jackson.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

C N Banc Holding Corporation, Maplewood, Missouri

## Order Denying

Formation of Bank Holding Company
C N Banc Holding Corporation, Maplewood, Missouri ("Applicant'), has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 80 per cent or more of the voting shares of Citizens National Bank of Greater St. Louis, Maplewood, Missouri (''Bank'’).

Notice of the application, affording opportunity
for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3(c)$ of the Act ( 12 U.S.C. § 1842(c)).

Applicant is a nonoperating company with no subsidiaries, organized for the express purpose of becoming a bank holding company through the acquisition of Bank. The purpose of the proposed transaction is to effect a transfer of the controlling ownership of Bank from an individual to a corporation owned by the same individual with no change in Bank's management or operations. Upon acquisition of Bank, Applicant would control 0.3 per cent of the total deposits in commercial banks in Missouri.

Bank holds deposits of approximately $\$ 44.8$ million, ${ }^{1}$ representing 0.6 per cent of the total deposits in commercial banks in the St. Louis banking market, ${ }^{2}$ and ranks as the 46th largest of 128 commercial banks operating in the market. In view of the facts that the proposed transaction represents a restructuring of Bank's present ownership, and Applicant has no subsidiaries, it does not appear that consummation of the proposal would eliminate any significant existing or potential competition, increase the concentration of resources, or have any adverse effects on any other banks in any relevant area. Therefore, the competitive considerations are consistent with approval of the application.

Under the Bank Holding Company Act, the Board is required to take into consideration the financial condition, managerial resources, and future prospects of the proposed holding company and the bank to be acquired. With respect to the subject proposal, it appears that the future prospects of Applicant are entirely dependent upon the financial resources of Bank. In this regard, Applicant proposes to service the $\$ 2.3$ million debt ${ }^{3}$ it will incur as part of this transaction over a twelveyear period primarily through dividends from Bank, representing 51.2 per cent of Bank's pro-

[^9]jected income for the first year and declining each year thereafter to 40.4 per cent in the twelfth year. In view of Bank's operating history and present financial condition, the Board is unable to conclude that Applicant's projected earnings are reasonable or attainable. The Board is of the view that the future earnings of Bank would not provide Applicant with the necessary financial flexibility to meet its debt servicing requirements as well as any unexpected problems that might arise at Bank. In addition, the high level of dividend payout may not provide Applicant with the necessary financial flexibility to service the acquisition debt while maintaining Bank's capital position. On the basis of the foregoing and other facts of record, the Board concludes that the considerations relating to the banking factors weigh against approval of the application.

As stated previously, the proposed formation of Applicant merely represents a restructuring of Bank's ownership with no changes in Bank's operations or services. Consequently, considerations relating to the convenience and needs of the community to be served lend no weight toward approval of the application. Moreover, in view of Applicant's debt servicing requirements, consummation of the subject transaction could diminish Bank's ability to continue to serve the area as a viable banking alternative.

On the basis of all of the facts of record, it is the Board's judgment that the subject proposal would result in a bank holding company with financial and managerial resources that are inadequate to service its debt while maintaining Bank's capital account. While the Board recognizes that denial of this application would not necessarily affect the control of Bank, the Board cannot sanction the use of a holding company structure that, because of its debt servicing requirements, could impair the financial condition of the bank to be acquired; nor would the public interest be served by such Board action. Accordingly, the Board concludes that consummation of the proposed transaction would not be in the public interest and that the application should be denied.

By order of the Board of Governors, effective July 19, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, Partee, and Lilly.
(Signed) J. P. Garbarini, [SEAL] Assistant Secretary of the Board.

Columbia Holding Corp., Chicago, Illinois

Order Denying<br>Formation of Bank Holding Company

Columbia Holding Corp., Chicago, Illinois has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act ( 12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through the acquisition of 80 per cent or more of the voting shares of Columbia National Bank of Chicago, Chicago, Illinois ("Bank'").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S 3(\mathrm{~b})$ of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3(\mathrm{c})$ of the Act ( 12 U.S.C. § $1842(\mathrm{c})$ ).

Applicant is a nonoperating corporation recently organized for the purpose of becoming a bank holding company through the acquisition of Bank ( $\$ 55.2$ million in deposits). ${ }^{1}$ Bank ranks 154th among the banking organizations in Illinois and holds approximately .1 per cent of the total deposits held by commercial banks in the State. Bank, located approximately 10 miles northwest of downtown Chicago, is the 101 st largest of the 292 commmercial banks operating in the Chicago banking market ${ }^{2}$ (the relevant banking market) with approximately .13 per cent of market deposits. Inasmuch as the subject proposal represents a restructuring of existing ownership interests in Bank and since Applicant has no present subsidiaries, consummation of the proposal herein would have no adverse effects on existing or potential competition.

Principals of Applicant are also principals in Mid-Town Bank of Chicago, Chicago, Illinois ('Mid-Town Bank’'). Mid-Town Bank (deposits of $\$ 6.4$ million) ranks as the 273rd largest bank in the relevant banking market with .02 per cent of total market deposits. In view of the relatively small size of the two banks, the fact that their offices are six miles apart, and the large number of competitors in the market, it appears that there is no significant competition between Mid-Town Bank and Bank. Accordingly, based on the fore-

[^10]going and other facts of record, the Board concludes that competitive considerations are consistent with approval of the application.

The Board has indicated on a number of occasions that it believes that a holding company should serve as a source of financial and managerial strength to its subsidiary bank(s) and that the Board will closely examine the condition of an applicant in each case with this consideration in mind. While the Board considers the managerial resources of Applicant and Bank as satisfactory, the Board is concerned with the high level of debt that will result in connection with the consummation of this proposal. Applicant proposes to incur a debt of $\$ 3.0$ million $^{3}$ that Applicant intends to service over a twelve-year period primarily through dividends from Bank and through tax savings resulting from filing consolidated tax returns. Based on the facts of record, the Board is unable to conclude that the proposal would provide Applicant with the necessary financial flexibility to service its debt while maintaining adequate capital levels at Bank. In this connection, it is noted that Bank's capital is marginally acceptable at the present time, and this position has been attained through the retention of 100 per cent of Bank's earnings since it opened for business in 1964. Even though Applicant contemplates providing Bank with $\$ 300,000$ in equity capital upon consummation of the proposal, Bank's capital would remain only marginally acceptable throughout the debt retirement period, assuming Applicant's projections are accurate, as a result of the sizable dividends that will be taken from Bank in order to service Applicant's debt.

The Board is also concerned about the narrow margin for error in Applicant's projections, since a deviation from those estimates in the future would further weaken Bank's capital and lessen Applicant's ability to serve as a source of financial strength. Applicant has projected that Bank's earnings, as a percentage of assets, would equal 1.05 per cent. However, only in 1975 did Bank's earnings exceed this figure and for each of the four previous years Bank earned between .3 and .9 per

[^11]cent on its assets. Thus, Bank does not have a proven record of earnings to support Applicant's somewhat optimistic projections. Similarly, Applicant's projections in regard to Bank's asset growth are not supported by Bank's actual growth experience.

Furthermore, as indicated in footnote 3 supra, the instant proposal contemplates a transaction whereby the debenture holders of Bank will be exchanging debentures aggregating $\$ 600,000$, bearing interest at 5.5 and 7.0 per cent, respectively, for approximately $\$ 1.1$ million in Applicant's debentures, bearing interest at 10 per cent. As a consequence of this proposal, Bank's debenture holders will receive approximately $\$ 110,000$ in interest annually on Applicant's debentures whereas they presently receive $\$ 37,500$ in interest on Bank's debentures. The Board considers this additional financial burden on Applicant to be further evidence that Applicant's proposal does not permit Applicant to be a source of financial strength to Bank. Accordingly, the Board is of the view that Applicant's proposal, as presently structured, does not provide Applicant with the financial flexibility necessary to service its debt, maintain Bank's capital at acceptable levels, and to provide for any unforeseen problems that might arise at Bank. Therefore, the Board views the debt to be incurred by Applicant as a significantly adverse factor in the consideration of this proposal and finds that the considerations relating to financial resources and future prospects weigh against approval of the application.

The proposed formation represents merely a restructuring of the ownership of Bank with no changes in Bank's operations or the services offered to customers. Thus, considerations relating to the convenience and needs of the community to be served lend no weight toward approval of the application.

On the basis of all the circumstances concerning this application, the Board concludes that the banking considerations involved in this proposal present adverse factors bearing upon the financial condition and future prospects of both Applicant and Bank. Such adverse factors are not outweighed by any procompetitive effects or by benefits which would result in serving the convenience and needs of the community. Accordingly, it is the Board's judgment that approval of the application would not be in the public interest and that the application should be, and hereby is, denied for the reasons summarized above.

By order of the Board of Governors, effective July 9, 1976.

Voting for this action: Vice Chairman Gardner and Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.

[seal] Assistant Secretary of the Board.
United Bancshares of Nebraska, Inc., Lincoln, Nebraska

## Order Approving <br> Formation of a Bank Holding Company

United Bancshares of Nebraska, Inc., Lincoln, Nebraska has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through the acquisition of 99.2 per cent or more of the voting shares of First Westroads Bank, Inc., Omaha, Nebraska ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant is a nonoperating corporation organized for the purpose of becoming a bank holding company through the acquisition of Bank. Bank (deposits of $\$ 12.3$ million) ranks 18th out of the 25 banks operating in the Omaha banking market (which is approximated by Douglas County) and controls 0.7 of 1 per cent of the total deposits in commercial banks in the market. ${ }^{1}$ Upon acquisition of Bank, Applicant would control 0.2 of 1 per cent of the total deposits in commercial banks in Nebraska.

The principals of Applicant are also officers and/or directors of NBC Co., Lincoln, Nebraska, a one-bank holding company that owns the National Bank of Commerce Trust and Savings Association, Lincoln, Nebraska. NBC Co. presently is one of nine affiliated one-bank holding companies that individually own banks across the State of Nebraska, collectively holding 7.3 per cent of the deposits in commercial banks in the State. The

[^12]purpose of the transaction is to effect an eventual transfer of the ownership of Bank to the shareholders of NBC Co. The nearest affiliates of NBC Co. are located in Fremont, approximately thirty miles northwest of Bank, and operate in a separate banking market. There is no existing competition between Bank and its potential affiliates. Accordingly, on the basis of the facts of record, the Board concludes that consummation of the proposal would not have any adverse effect on other banks in the relevant market and that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of both Applicant and Bank are considered satisfactory in light of Applicant's commitment to add $\$ 100,000$ to Bank's capital. Although Applicant will incur acquisition debt in connection with this proposal, it appears that it will be able to service this debt over a 10 -year period without impairing the financial condition of Bank during that time. Furthermore, it appears that the overall financial condition of the other onebank holding companies in which principals of Applicant are involved is satisfactory. Therefore, considerations relating to banking factors are consistent with approval of the application.

Affiliation with Applicant should enable Bank to expand and improve the banking services it presently offers to its customers. Accordingly, these considerations relating to the convenience and needs of the community to be served are consistent with approval. It is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective July 16, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns.
(Signed) J. P. Garbarini, [seal] Assistant Secretary of the Board.

First National Corporation, Appleton, Wisconsin

## Order Approving Acquisition of Bank

First National Corporation, Appleton, Wisconsin, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 per cent or more of the voting shares of The Farmers State Bank, Larsen, Wisconsin ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the ninth largest banking organization in Wisconsin, controls six banks with aggregate deposits of $\$ 179.5$ million, representing approximately 1.2 per cent of the total deposits in commercial banks in the State. ${ }^{1}$ Acquisition of Bank (deposits of approximately $\$ 9.3$ million) would not significantly increase Applicant's share of deposits in the State nor would it alter Applicant's ranking among the other banking organizations in Wisconsin.

Bank is the eleventh largest of twelve banking organizations in the Appleton banking market ${ }^{2}$ and holds $\$ 9.3$ million in deposits, which represents 1.8 per cent of the total commercial bank deposits in the market. Applicant is the largest of the twelve banking organizations in the market, and upon acquisition of Bank, Applicant would control four banks in the market with aggregate deposits representing 26.8 per cent of the total commercial bank deposits in the market. Applicant and Bank operate in the same market, and the record indicates that some existing competition would be eliminated as a result of the consummation of the proposal. Bank is located on the western fringe of the relevant market in the town of Larsen and Applicant's closest banking office is a branch of Applicant's

[^13]lead bank some 12 miles northeast in the town of Greenville. Competition between that office and Bank-and between Applicant's other subsidiary banks and Bank-does not appear to be significant. Moreover, in view of the restrictive State branching laws prohibiting the establishment of a branch within a three mile limit of Bank's location and also in view of the rural character of the area surrounding Bank, expansion by Applicant into this portion of the market does not appear likely. The effects of the proposal on competition are further mitigated by the relatively small size of Bank and the fact that it has not been a significant competitor in the market. Bank was established in 1914 and its deposits have grown to only about $\$ 9$ million in some sixty years of operation. Accordingly, on the basis of the facts of record, the Board concludes that consummation of the proposal would have some slightly adverse effects on competition.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory. In arriving at such conclusion, the Board has relied in part on Applicant's commitments to augment the capital at certain of its subsidiary banks. Consequently, the Board regards banking factors as being consistent with approval of the application. Furthermore, Applicant's acquisition of Bank would give Bank access to Applicant's banking expertise and management resources. Applicant also proposes to assist Bank in providing new and expanded services to its customers, including estate planning and trust services, investment advisory services, computer services for both Bank and Bank's customers, and direct leasing services. Therefore, considerations relating to the convenience and needs of the community to be served lend weight toward approval and, in the Board's view, outweigh any slightly adverse effects the proposal may have on competition. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order nor (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective July 13, 1976.

Voting for this action: Vice Chairman Gardner and Governors Coldwell, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Wallich and Jackson.
(Signed) J. P. Garbarini, [seal] Assistant Secretary of the Board.

Florida National Banks of Florida, Inc., Jacksonville, Florida

## Order Denying Acquisition of Bank

Florida National Banks of Florida, Inc. ('Florida National"), Jacksonville, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842 (a)(3)) to acquire 50.37 per cent or more of the voting shares of the Citizens Bank of Bunnell ('Bank"), Bunnell, Florida.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3$ (c) of the Act (12 U.S.C. 1842(c)).

Florida National, the fifth largest banking organization in Florida, controls 32 banks with aggregate deposits of approximately $\$ 1.3$ billion, representing 5.4 per cent of the total deposits in commercial banks in the State. ${ }^{1}$ Acquisition of Bank would increase Florida National's share of total commercial bank deposits by .04 per cent and would not result in a significant increase in the concentration of banking resources in Florida.

Bank, the larger of the two banks in the relevant banking market, ${ }^{2}$ controls total deposits of approximately $\$ 11$ million representing 62.2 per cent of the total deposits in commercial banking institutions in the market. The closest subsidiary bank of Florida National is 23 miles southeast of Bank. No significant competition exists between any of Florida National's subsidiary banks and Bank, and it appears unlikely that such competition would develop in the future. Common ownership and

[^14]control of Bank and the only other bank in the relevant market has led to common senior operating management and director interlocks. Because of this affiliate relationship, the two banking institutions do not presently compete with each other. If the subject proposal is approved, it is expected that the affiliate relationship will be terminated and Bank will become an independent alternative source of banking services in the relevant market. On the basis of the facts of record, the Board concludes that competitive considerations are consistent with, and lend some weight toward, approval of the application.

The financial condition and future prospects of Florida National, its subsidiaries and Bank are regarded as satisfactory. Accordingly, the Board concludes that financial considerations are consistent with approval of the application.

In the course of processing this application, the following information has come to the Board's attention.
(1) In May 1974 Florida National withdrew a previous application it then had pending to acquire 50.37 per cent of Bank. ${ }^{3}$
(2) In late May 1974, Florida National's counsel (who was also a director of Florida National) conferred with members of the Board's Legal Division to discuss the possibility of preserving Florida National's opportunity to acquire Bank by having officers of Florida National purchase the stock of Bank and hold it as individuals until such time as Florida National could purchase it from them.
(3) Subsequently, by letter of June 14, 1974, the Board's Legal Division informed Florida National's counsel that ". . . any action to acquire shares of a bank by officers, directors or other persons associated or related to a bank holding company, without Board approval, should be taken with extreme caution to insure that the bank holding company does not obtain direct or indirect

[^15]control or power to control or exercise a controlling influence over the bank."
(4) On June 28, 1974, Florida National entered into a Stock Purchase Agreement with three of its officers* ('Officers') providing, in part, that Florida National, through one of its subsidiary banks, would loan its Officers funds with which to purchase 50.37 per cent of the voting shares of Bank. The Officers agreed to sell those shares to Florida National at a later date. In addition, 'the entire risk of gain or loss on the transactions', was upon Florida National. Florida National also agreed to indemnify its Officers against loss in the event it was unable to purchase the shares from them.
(5) Inquiries by the Board's Legal Division in October 1974 resulted in a letter dated October 7, 1974, from Florida National's counsel committing Florida National and its Officers to (a) remove the loan from Florida National's subsidiary bank to an unaffiliated bank, (b) cancel, rescind, and render void and unenforceable the Stock Purchase Agreement of June 28, 1974, and (c) enter into a new Stock Purchase Agreement "which would be consistent with the Board's staff's recommendations and which would provide no indemnification.'
(6) Florida National subsequently placed the loan with an unaffiliated bank. However, Florida National agreed to guarantee the loan.
(7) On May 1, 1975, Florida National submitted an application for prior approval to acquire 50.37 per cent of the outstanding voting shares of Bank from its Officers who had acquired the shares from Bank's principal shareholder.
(8) During processing of the application, staff discovered that the Stock Purchase Agreement between Florida National and its Officers had not been 'cancelled and rescinded and rendered void and unenforceable from the beginning' and was in fact still in force. The only step that had been taken by Florida National in fulfillment of the commitments listed in the aforementioned October 7th letter was the transfer of the loan to Officers from Florida National's subsidiary bank to an unaffiliated bank. Florida National continues to

[^16]guarantee the loan to its Officers ${ }^{4}$ and all of the other provisions of the Stock Purchase Agreement remain in force.
(9) In response to a request by the Board's staff that Florida National explain its actions, Florida National and its counsel provided documents and arguments in support of its position that its actions should not be deemed a willful violation of the Act. Florida National and its counsel argue, in part, that Florida National acted upon the advice of counsel; that Florida National's agreement with its Officers had been structured to comply with prior holdings of the Board in similar cases; and that, at worst, the transaction was a technical violation of the Act.

Section 3(a) of the Act provides that it shall be unlawful, except with the prior approval of the Board '. . .(3) for any bank holding company to acquire direct or indirect ownership or control of any voting shares of any bank if, after such acquisition, such company will directly or indirectly own or control more than 5 per centum of the voting shares of such bank." Section 2(a)(2) (A) of the Act provides that any company has control over a bank or over any company if "(A) the company directly or indirectly or acting through one or more other persons owns, controls, or has power to vote 25 per centum or more of any class of voting securities of the bank or company."

It appears that, contrary to the specific recommendations and views expressed by the Board's Legal Division, Florida National, acting through its Officers, acquired control of 50.37 per cent of Bank's outstanding voting shares. Florida National was instructed by the Board's Legal Division not to finance its Officers' purchase of Bank's shares, not to guarantee any loan made to its Officers by an unaffiliated bank and not to indemnify its Officers against loss. Despite these directions and Florida National's awareness of the Board's publicly expressed concern with acquisitions by officers of holding companies acting to preserve corporate opportunities, ${ }^{5}$ and without apparent concern for the consequences of its actions, Florida National nevertheless structured the transaction in a manner that clearly resulted in its acquiring control of Bank. Moreover, Florida National continues to guarantee the loan to its Of-

[^17]ficers and to indemnify those Officers against loss, and the control relationship thus continues.

On the basis of the facts of record, the Board concludes that Florida National controls Bank within the meaning of $\S 2(\mathrm{a})(2)(\mathrm{A})$ of the Act. The Board further concludes that Florida National violated § 3(a)(3) of the Act by acquiring control of Bank without the prior approval of the Board.

Among the factors enumerated in § 3(c) of the Act that the Board must consider in acting on applications is the managerial resources of the acquiring bank holding company. The reference to "managerial resources" does not, however, refer solely to the business abilities of management or its past financial success. The legislative history of this provision makes it clear that this factor relates not only to management's competence but also to management's integrity and disposition to conduct the affairs of the company in accordance with the requirements of law. ${ }^{6}$

In assessing the managerial resources of an applicant, the Board must consider all the factors that bear upon the competence, quality and integrity of the management of any holding company seeking to acquire control of a bank. The Board has previously stated that when it comes to the Board's attention that an acquisition has been made, or activities have been commenced, without the requisite prior approval of the Board, whether or not such violation of the law appears to have been "willful," such conduct may reflect so adversely upon the managerial factors in connection with an application for permission to retain the illegally acquired activity that the conduct, in and

[^18]of itself, constitutes grounds for denial of such an application.

In view of the repeated warnings of the Board's Legal Division cautioning Florida National's counsel to exercise great care in structuring the transaction whereby Officers acquired control of Bank, the contradictory statements made by Florida National's counsel to the Legal Division, the apparent misrepresentations made in connection with the application, and Florida National's continued failure to comply with the Board's staff's recommendations for remedying the situation, it is clear that insofar as this application is concerned the management of Florida National has not demonstrated a disposition to conform the conduct of Applicant's affairs to the requirements of the Act. Section 3(a) of the Act requires prior approval for acquisitions, and where an acquisition of control is made without obtaining such prior approval, under circumstances such as those presented here, the Board believes it should not approve an application to retain the illegally acquired control position and thereby allow the offending party to reap the fruits of its violation.

There is no evidence in the record that the banking needs of the community are not currently being adequately served. Florida National has proposed to expand certain of Bank's services. However, in the context of this application, these considerations are not sufficient to outweigh the adverse managerial considerations of Florida National's violation of the Act referred to above. Accordingly, it is the Board's judgment that approval of the application would not be in the public interest and that the application should be denied.

On the basis of the record, the application is denied for the reasons summarized above. Florida National and its Officers are ordered to take all necessary steps to divest the shares of Bank unlawfully acquired by them no later than October 27, 1976 and to submit to the Board for its approval no later than August 29, 1976, a plan to effect such divestiture.

By order of the Board of Governors, effective July 29, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Coldwell and Jackson.
(Signed) J. P. Garbarini, [seal] Assistant Secretary of the Board.

Indian Head Banks Inc., Nashua, New Hampshire

## Order Approving

## Acquisition of Shares of Bank

Indian Head Banks Inc., Nashua, New Hampshire, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act ( 12 U.S.C. § 1842(a)(3)) to acquire 67 per cent or more of the voting shares of Community National Bank of Rochester, Rochester, New Hampshire.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by Strafford National Bank, Dover, New Hampshire ('Protestant'"), in light of the factors set forth in $\S 3(\mathrm{c})$ of the Act (12 U.S.C. § 1842(c)).

Applicant, the largest banking organization in New Hampshire, controls 8 banks with aggregate deposits of approximately $\$ 255$ million, representing 15.4 per cent of total deposits in commercial banks in New Hampshire. ${ }^{1}$ Acquisition of Bank (deposits of approximately $\$ 7$ million) would increase Applicant's share of Statewide deposits by .4 of one per cent. Consummation of the proposed transaction would not result in a significant increase in the concentration of banking resources in New Hampshire.

Bank is the 6th largest of 10 commercial banking organizations in the Dover-Rochester banking market (the relevant banking market for purposes of this proposal) $)^{2}$ and controls 9.4 per cent of deposits in commercial banks in the market. A subsidiary of Applicant, Indian Head National Bank of Exeter ("Exeter Bank"), Exeter, New Hampshire, operates a branch in Newmarket, New Hampshire, located in the relevant banking market. That branch holds deposits of approximately

[^19]$\$ 6.3$ million $^{3}$ representing 8.4 per cent of total deposits in commercial banks in the market, and thus Applicant is the eighth largest banking organization in the relevant banking market. As a result of consummation of the proposed transaction, Applicant would become the largest banking organization in the relevant market with 17.8 per cent of deposits in commercial banks. Thus the proposed transaction would have the effect of increasing somewhat the concentration of banking resources in the relevant market. However, even after consummation of the proposed transaction, the market would not be highly concentrated as the four largest banking organizations would control 60.7 per cent of deposits in the market. The effect of the proposal on concentration in the relevant market is mitigated by the facts that Bank and Exeter Bank are among the smaller organizations in the market and that, because Bank is in less than satisfactory condition, it is not currently a meaningful competitor in the market. Indeed, affiliation with Applicant should enable Bank to become a competitive factor in the market. Accordingly, it is the Board's judgment that the proposal would be consistent with the public interest despite its effects on concentration in the market.
To the extent that Bank and Exeter Bank's Newmarket branch operate in the Dover-Rochester banking market, some amount of existing competition would be eliminated as a result of consummation of this proposal. However, on the basis of the facts of record, including the facts that Bank and Exeter Bank's Newmarket branch are 18 miles apart and that a number of banks compete in the market, it does not appear that any meaningful competition between Bank and Exeter Bank would be eliminated as a result of the proposal, particularly in view of the current financial condition of Bank. Applicant's other subsidiaries also have five banking offices located outside the relevant market that derive some deposits from Bank's service area. The amount of such deposits, however, is not significant nor does Bank derive a significant amount of deposits from the service areas of these subsidiaries of Applicant. After consummation of the proposal, several independent banks would remain available for acquisition by holding companies not represented in the market. Accordingly, the Board concludes that consummation of the

[^20]proposal would not eliminate any significant existing competition or foreclose the development of potential competition.

The financial condition and managerial resources of Applicant and its subsidiaries are considered satisfactory and their future prospects appear favorable. Bank's financial condition, managerial resources and future prospects, absent consummation of the instant proposal, are less than satisfactory. However, Applicant has agreed to inject needed capital of approximately $\$ 200,000$ into Bank and intends to revamp the management of Bank. Thus, banking factors lend some weight toward approval of the application. Affiliation with Applicant should enable Bank to provide more effectively services it has been forced by its weakened financial condition to reduce. In addition, as a result of the proposal, Bank will offer accounts subject to negotiable orders of withdrawal (socalled 'NOW accounts') paying interest on balances in excess of $\$ 500$, free checking accounts for individuals over 62 years of age, expanded savings and retirement account services, dealer floor planning services and accounts receivable financing. Therefore, considerations relating to convenience and needs of the community to be served lend weight toward approval of the application and, in the Board's view, outweigh any slight adverse competitive effects that might result from consummation of the proposal.

In its consideration of the subject application, the Board has considered the comments submitted by Protestant. Protestant has asserted that consummation of the proposal would result in adverse competitive effects that are not outweighed in the public interest by the effects the proposal would have on the convenience and needs of the community. Specifically, Protestant contends, first, that Applicant should have chosen to establish a de novo office rather than to acquire an existing institution and, second, that there exist less anticompetitive alternatives for the affiliation of Bank with another viable banking organization. With regard to possible de novo entry by Applicant, Protestant disregards the fact that Applicant's subsidiaries are precluded by New Hampshire law from opening branches in the town of Rochester. ${ }^{4}$ Furthermore, the ratio of deposits per banking office in the relevant market is already considerably below the Statewide average. Introduction

[^21]of an additional banking office would further reduce that average. With regard to the possible affiliation of Bank with an organization, the effects of which affiliation would be less anticompetitive, it is noted that State law requires that the principal offices of merging banks be within 30 miles of each other. ${ }^{5}$ Thus, the merger of Bank with any other institution would likely have at least some adverse effect on competition. ${ }^{6}$ Besides Applicant, there are only three other bank holding companies in New Hampshire. Two do not appear to possess sufficient resources to acquire the shares of Bank sought by Applicant, and any such acquisition by the third would present essentially the same competitive consequences as the instant proposal. The Board is of the view that the mere existence of other institutions with which Bank could conceivably become affiliated, does not warrant denial of the subject application.

In the course of its consideration of the subject application, the Board has also noted the existence of a bank management consulting agreement between a subsidiary of Applicant, Indian Head Bank Services Corporation ("IHBS'"), ${ }^{7}$ and Bank. According to that agreement, IHBS provides Bank with a full-time on-site consultant who is authorized to initiate new loans of less than $\$ 5,000$, 'to do all things appropriate to the collection of loans charged off or past due" and 'to do all things necessary to administer the day-to-day operation of [Bank] but not including the execution of contracts on behalf of [Bank] or the hiring or removal of personnel." It appears that IHBS may be providing Bank with services on a daily or continuing basis contrary to the proscription contained in Footnote 9 to $\S 225.4(\mathrm{a})(12)$ of Regulation $Y$ which provides in pertinent part: "In performing this activity [bank management consulting] bank holding companies are not authorized to perform tasks or operations or provide services to client banks either on a daily or continuing basis, except

[^22]as shall be necessary to instruct the client bank on how to perform such services for itself', (emphasis added). The Board has scrutinized the circumstances of Applicant's involvement with Bank including the financial and managerial resources of Bank, the fact that the Federal Reserve Bank of Boston was consulted by Applicant prior to its entering into the agreeement with Bank and the fact that Applicant entered into the agreement at the insistence of Bank, and has concluded that the facts surrounding Applicant's involvement with Bank do not warrant denial of the subject application. Accordingly, the Board has proceeded to consider the subject application on its merits and, on that basis, concludes that approval of the proposal would be consistent with the public interest.

The Board, nevertheless, believes it appropriate to set forth for the record its view that transactions of the type described above may justify a finding that a company has violated the Bank Holding Company Act. Bank holding companies engaging directly or indirectly in the activity of providing management consulting advice to nonaffiliated banks, should avoid entering into relationships with client banks that exceed the scope of section 225.4(a)(12), even when such bank may be experiencing financial or managerial difficulties. Particular caution should be exercised where a bank holding company contemplates the subsequent acquisition of the client bank.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Boston pursuant to delegated authority.

By order the Board of Governors, effective July 28, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Partee, and Lilly. Absent and not voting: Governors Coldwell and Jackson.
(Signed) J. P. Garbarini, [seal] Assistant Secretary of the Board.

## Orders Under Section 4 Of Bank Holding Company Act

First Security Corporation, Salt Lake City, Utah

## Order Denying

Extension of Time for Divestiture
First Security Corporation, Salt Lake City, Utah ('FSC"), a bank holding company within the meaning of the Bank Holding Company Act ('Act'), has tendered an application for the Board's approval under $\S 4(\mathrm{c})(8)$ of the Act ( 12 U.S.C. § $1843(\mathrm{c})(8)$ ) and $\S 225.4(\mathrm{~b})(2)$ of the Board's Regulation Y ( 12 CFR § 225.4(b)(2)), to retain 100 per cent of the voting shares of First Security Savings and Loan Association, Pocatello, Idaho ("FSS\&L'"), a company engaged in the business of operating a savings and loan association. Although FSC is subject to an outstanding Order of the Board to effect divestiture of FSS\&L, it has not done so, and it is apparently of the view that the tender of the application tolls the time for divestiture. For the reasons set forth below, the Board denies any further extension of the time for divestiture of FSS\&L by FSC, and, accordingly, will not process the tendered application.

FSC is a multi-State, multi-bank holding company whose predecessor ("Old FSC'") was organized in 1928. Old FSC was, at the time of the enactment of the Bank Holding Company Act of 1956, engaged in both banking and nonbanking activities (including the operation of FSS\&\&) in the States of Idaho, Utah, and Wyoming. As` a result of the 1956 Act, Old FSC was required to divest of its impermissible nonbanking activities, including FSS\&L. However, these activities were held until 1959 when Old FSC took steps to divide its bank and nonbank assets (the latter including FSS\&L) among two corporations-FSC, which came to hold the bank assets, and First Security Investment Company ('FSIC"), a company holding the impermissible nonbank activities of Old FSC. The division was accomplished through a pro-rata "spin-off"' of the company controlling the bank assets. Following this "spin-off'" there existed and continued to exist not only a substantial identity of ownership, but significant officer and director interlocks between FSC and FSIC. ${ }^{1}$

On September 30, 1969, FSIC contracted to sell FSS\&L to U.I.P. Corporation, Milwaukee, Wisconsin ('UIP''), ${ }^{2}$ contingent upon UIP obtaining the necessary Federal Home Loan Bank Board

[^23]('FHLBB'') approval. The contract of sale provided that an escrow agent, First Security Bank of Utah, N.A, Salt Lake City, Utah, FSC's own lead bank, would hold the shares of FSS\&L pending consummation of the sale. The contract further provided that the escrow agreement was to be terminated on June 30, 1970, if regulatory approval were not obtained.

On April 1, 1970, while the UIP application for FHLBB approval was still pending and FSIC was still the owner of the FSS\&L shares, FSIC and FSC merged. FSC thereby became the owner of FSS\&L's shares in clear violation of the Bank Holding Company Act. ${ }^{3}$ It was not until six months later, on September 30, 1970, that the FHLBB denied UIP's application to acquire FSS\&L. Following that denial, the escrow was terminated, and all rights with respect to the FSS\&L shares reverted to the merged company.

In June 1971, after the Federal Reserve Bank of San Francisco became aware of the unlawful reacquisition of FSS\&L by FSC, it advised FSC to divest FSS\&L ' as soon as possible." Later in 1971, however, FSC filed an application with the Board for permission to retain FSS\&L. On August 21, 1972, the Board returned this application without acting upon it and directed FSC to initiate steps to dispose of FSS\&L ' as soon as practicable." In its letter the Board stated that it had decided not to include operation of a savings and loan association on its list of permissible activities at that time. FSC has nevertheless continued to retain its ownership of FSS\&L.

Based on the foregoing and other facts of record, the Board has determined that FSC has held FSS\&L in clear violation of the Act since the merger of FSC and FSIC in April 1970. Because of this violation, the separation of FSC's banking and impermissible nonbanking assets that was required when the Act was passed in 1956 has been frustrated. For the Board to extend the time for divestiture further, or to consider approving retention of FSS\&L by FSC would serve only to encourage violations of the Act and delays in effecting divestiture by other bank holding companies. Accordingly, FSC is denied any further extension of the time for divesting FSS\&L and is hereby ordered to divest itself of any and all

[^24]direct or indirect interest in and control over FSS\&L by no later than November 1, 1976. FSC is further directed to file a plan of divestiture with the Board by no later than September 15, 1976. Divestiture shall be accomplished in such a manner that neither FSC nor any successor thereto will exercise or be capable of exercising any direct or indirect control or controlling influence over FSS\&L, its management or policies.

By order of the Board of Governors, effective July 30, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Coldwell and Jackson.
[seal] Assistant Secretary of the Board.

Mellon National Corporation, Pittsburgh, Pennsylvania

## Order Approving

Acquisition of Local Loan Company
Mellon National Corporation, Pittsburgh, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under §4(c)(8) of the Act ( 12 U.S.C. §1843(c)(8)) and $\S 225.4(\mathrm{~b})(2)$ of the Board's Regulation Y (12CFR $\S 225.4(\mathrm{~b})(2)$ ), to acquire 100 percent of the voting shares of Local Loan Company ("Local"), Chicago, Illinois, a company that, directly and through 19 wholly-owned subsidiaries, engages in the activities of a consumer finance company by making secured and unsecured consumer instalment loans and by purchasing consumer instalment sales finance contracts. Local also acts as agent or broker for the sale of credit life, accident and health insurance, directly related to its extensions of credit. Such activities have been determined by the Board to be closely related to banking ( 12 CFR $\S \S 225.4(a)(1)$ and (9)).

Notice of receipt of the application, affording opportunity for interested persons to submit comments and views with respect to the proposed transaction, was published in the Federal Register (39 Federal Register 42719) on December 6, 1974. By letter dated January 6, 1975, Mr. Anthony R. Martin-Trigona ('Protestant''), Chicago, Illinois, requested the Board to hold a formal hearing on the subject application. Applicant responded by challenging the timeliness of Mr .

Martin-Trigona's request for a hearing and his standing. Following an exchange of correspondence and an informal hearing concerning Mr. Martin-Trigona's standing, the Board, by Order dated July 28, 1975 (40 Federal Register 33072), directed that a public hearing be held with respect to the application, the issue to be considered at said hearing to be whether the proposed acquisition can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. While the Board was skeptical concerning Mr. Martin-Trigona's claim of standing as a possible entrant into the consumer finance business, the Board expressly reserved judgment on that question and determined to permit Mr. MartinTrigona to participate in the hearing.

The hearing, held in accordance with the Board's Rules of Practice for Formal Hearings (12 CFR Part 263), commenced on September 3, 1975, in Washington, D.C., with proceedings held thereafter on September 4-6, 29 and 30, October 1-3, 6-7, 9-10, and November 11, 1975. On November 24, 1975, the Administrative Law Judge, over Protestant's untimely objection, ${ }^{1}$ closed the proceedings. A substantial record on the application was developed through extensive cross-examination by Protestant of Applicant's witnesses and through numerous exhibits submitted by all parties to the proceedings.
In a Recommended Decision dated March 11, 1976, the Administrative Law Judge concluded that consummation of the proposed acquisition of Local by Applicant "can reasonably be expected to produce benefits to the public that outweigh possible adverse effects within the meaning of section 4(c)(8) of the [Bank Holding Company] Act." Accordingly, the Administrative Law Judge recommended that the Board of Governors approve the subject application.

The Board, having considered the entire record of the hearing, including the transcript, exhibits, rulings, briefs filed in connection with the hearing, and the Recommended Decision filed by the Administrative Law Judge, together with Protestant's Exceptions and Applicant's and Board Counsel's

[^25]response thereto, has determined that the Administrative Law Judge's findings of fact, conclusions and recommendations, as modified and supplemented herein, are fully supported by the evidence of record and should be adopted as the findings and conclusions of the Board. Accordingly, the Board now makes its findings as to the facts, its conclusions drawn therefrom, and its Order. ${ }^{2}$

Applicant is the largest banking organization in Pennsylvania and the sixteenth largest banking organization in the United States. Applicant controls Mellon Bank, N.A., Pittsburgh, Pennsylvania, ("Bank'"), which holds domestic deposits of $\$ 5.1$ billion, representing approximately 12 per cent of the total deposits in commercial banks in Pennsylvania. ${ }^{3}$ Applicant controls no other banking subsidiaries but does control nonbanking companies engaged in equipment leasing on a full pay-out basis, real estate financing and mortgage banking.

Local, the seventieth largest consumer finance company in the country in terms of capital funds, is a moderately sized, multi-regional consumer finance company with net consumer finance receivables of $\$ 82.4$ million. Local engages principally in making direct instalment loans to individuals. Of its total receivables, 82 per cent are derived from this activity. The balance of its receivables consist of purchased consumer instalment sales finance contracts.

Local operates 124 offices in twelve States, ${ }^{4}$ with approximately 55 per cent of its business generated in the four western States of California, Colorado, Oregon, and Washington in which Local has 72 of its offices. Local derives an additional 30 per cent of its business from the States of Illinois and Wisconsin, in which it has 32 offices. The balance of Local's business is derived from 20 offices in Florida, Indiana, Kentucky, Minnesota, Nebraska, and New York.

The relevant product lines to be considered in evaluating the competitive effects of this proposal are direct personal instalment loans and purchased consumer sales finance contracts. The geographic

[^26]market for direct personal instalment loans is considered to be local in nature. ${ }^{5}$ Although it is possible to engage in the purchasing of sales finance contracts over an unlimited geographic area, Local generally purchases such contracts from dealers located in Local's service areas as a means of attracting new customers for its direct loan services. In view of the limited nature of Local's credit-related insurance activities, the Board finds that no significant existing or potential competition with respect to such insurance activities would be eliminated upon consummation of this proposal.

Applicant, through the 102 branch offices of Bank, makes substantially all of its consumer loans in the six-county metropolitan area of Pittsburgh, ${ }^{6}$ some 350 miles distant from the closest Local service area. Bank also purchases consumer sales finance contracts from dealers outside its market. However, none of these dealers, except for mobile home servicing companies, ${ }^{7}$ is located in any of the markets Local serves. As of June 30, 1974, Bank's total consumer credit extensions amounted to $\$ 360$ million, representing approximately 4 per cent of its total assets and 9 per cent of its total loans. Of this amount, about $\$ 1$ million (including both direct consumer loans and purchased sales finance contracts) or less then .5 per cent of Bank's total consumer credit resulted from loans extended to residents of Local's markets. In addition, none

[^27]of these consumer loans was directly solicited by Bank, but rather was the result of Bank borrowers moving from the Pittsburgh banking market to a Local service area or resulted from credit accommodations being granted to users of Bank's other services residing in Local's markets. Thus, since there is no meaningful geographic overlap between the services offered by Applicant and Local, consummation of the proposal would not eliminate any significant existing competition in any relevant market.

With respect to the question of whether consummation of the proposal would eliminate any significant competition in the future, Applicant has evidenced within the past few years a desire to expand its activities. This has been manifested in its establishment of a corporate management team to plan and guide expansion, the sizeable growth and diversification of the subsidiary bank's activities both domestically and in the foreign area, and Applicant's entry, either de novo or by acquisition, into a number of nonbanking endeavors. Furthermore, considering Applicant's extensive resources, its stated view as to the importance to its structure of a consumer finance subsidiary, and the relatively low barriers to entry into the industry, the Board believes it reasonably likely that, absent approval of the instant application, Applicant might well within the foreseeable future enter the consumer finance business, if not de novo, ${ }^{8}$ then through the acquisition of one or more smaller consumer finance companies, coupled with some de novo expansion.

In this connection, the Board does not agree with the Administrative Law Judge's characterization of Applicant's proposed acquisition of Local as a foothold entry into the consumer finance industry. While Local is clearly not one of the larger firms in the industry as a whole, it is one

[^28]of the larger of the few remaining independent consumer finance companies in the country. In addition, Local has achieved a more than insignificant presence among consumer finance companies in certain of the markets in which it operates. ${ }^{9}$

While the Board cannot conclude that Applicant, absent approval of the instant application, would enter any particular market either de novo or through acquisition of a smaller consumer finance company, the Board is nevertheless of the view that consummation of the proposal would result in the elimination of some potential competition. However, that loss is regarded by the Board as very slight, since Applicant will not gain a substantial share of the consumer loan business in any of the markets presently served by Local and in view of the size and large number of financial institutions already competing in these markets as well as the number of available potential entrants and the low barriers to entry.

Each of the markets in which Local operates contains numerous competitors, including in nearly all cases many of the largest consumer finance companies in the United States as well as other finance companies larger in receivables and capital funds than Local. Moreover, in each of its markets Local competes with a significant number of credit unions and commercial banks. As a result, Local's share of the individual markets in which it operates is small, ranging from .21 per cent to 4.38 per cent, with a median of 1.37 per cent. In the Los Angeles and Chicago markets, from which Local derives about 30 per cent of its receivables and in which it operates 31 offices, Local's share of the consumer loan market (including direct consumer loans and purchased consumer sales finance contracts) is .47 per cent and .94 per cent, respectively. In no market does Local appear to have a dominant position in any product line in which it operates.

As discussed more fully below, any adverse effect of the proposal on potential competition is further and substantially mitigated by the lack of competitive aggressiveness exhibited by Local's present management and policies, ${ }^{10}$ and the fact

[^29]that the acquisition, which constitutes Applicant's initial entry into the consumer finance business, will provide it with expertise and a market position from which to successfully and vigorously compete in the industry and thereby, in the Board's view, increase competition and serve the public interest.

The Board notes that Bank, as of June 30, 1974, had credit commitments of $\$ 456$ million and loans outstanding of $\$ 118$ million to 59 consumer finance companies, some of which compete with Local. Since Applicant has assured the Board that Bank's lending policies toward such companies will not change if the application is approved, the Board concludes that consummation of the proposal will not result in any unfair competition.

With respect to whether consummation of the proposal would involve an unsound banking practice, the Administrative Law Judge concluded that both Applicant and Local were prudent and conservative institutions and that approval of the acquisition would not lead to unsound banking. Protestant argues, without any apparent or specified support in the record, that the proposed acquisition and Applicant's growth plans for Local will adversely affect the capital position and earnings of Applicant.

As of June 30, 1975, Applicant had total assets of $\$ 9.2$ billion and equity capital and valuation reserves of $\$ 698$ million. Its earnings for the first half of 1975 were $\$ 33.7$ million, an increase of 14.5 per cent over the comparable 1974 period. Applicant's ratio of equity capital to non-cash assets is 9.5 per cent, which is the second highest of the thirty largest bank holding companies in the country. Applicant's ratio of consolidated liabilities to equity capital and valuation reserves is $12.2: 1$ and is considered by the Board to be conservative. During the five-year period ending December 31, 1974, Applicant's consolidated assets increased by 90 per cent, its consolidated net income by 26 per cent, its domestic and foreign deposits by 71 per cent, and its total equity capital by 21 per cent. During the same period, Applicant maintained one of the highest equity to asset ratios of the nation's large bank holding companies.

Applicant also ranks high among comparable bank holding companies in terms of certain other generally accepted standards for measuring capital adequacy, earnings performance and loan loss coverage and experience. In 1974, Bank, which accounts for about 96 per cent of Applicant's consolidated assets, was first among the nation's

18 banks with deposits in excess of $\$ 5$ billion in terms of its ratio of earnings to assets. In this group, Bank also had the second highest ratio of equity capital and reserves to assets and to risk assets, and the highest loan loss coverage and lowest ratio of net charge-offs to total loans. During the period 1970-1974, Applicant's ratio of net charge-offs to average loans outstanding was .16, the fourth lowest in its peer group.

Applicant proposes to pay $\$ 30$ million in cash for 100 per cent of Local's outstanding stock from funds already allocated by Applicant for this purpose and derived from its sale in March 1974 of $\$ 125$ million in capital notes. Local, an established and consistently profitable business, ${ }^{11}$ had, as of June 30, 1975, total consolidated assets of $\$ 93$ million, including $\$ 82.4$ million in net receivables, total equity capital of $\$ 28.6$ million, and an allowance for loan losses of $\$ 5.9$ million. Local is a well capitalized institution, with a debt to equity ratio (exclusive of loan loss reserves) of 2.3:1, which is significantly lower than the industry average or the average for consumer loan firms of comparable size. In these circumstances, Applicant's acquisition of Local and its plans to expand Local's lending operations by approximately 100 per cent over a five-year period, while maintaining a debt to equity ratio no higher than the consumer loan industry average, would not, in the Board's opinion, significantly affect Applicant's capital position. ${ }^{12}$

Moreover, according to Applicant, the proposed acquisition does not involve a high business risk and is a prudent way for it to enter the consumer finance industry because of the small premium involved in the proposed acquisition, the high quality of Local's receivables resulting from its conservative loan policies, Local's more than adequate loan loss reserve, and the ability and experience of Local's management. Applicant's assessment of the quality of Local's receivables and the adequacy of its loan loss reserve is fully borne out by the fact that Local's loan reserve as a percentage of its net receivables ( 4.7 per cent) is significantly higher than the industry average (3.9 per cent) or the average for consumer finance companies of Local's size ( 3.4 per cent), while

[^30]Local's rate of net loan write-offs has been less than average from 1970 through 1973. In addition, Local's loan loss reserve has in recent years been more than adequate to cover its actual loan losses, despite Local's policy of charging off as worthless at year end generally all instalment receivables on which no payment has been received in the 90-day period ending November 30 of each year.

In connection with managerial considerations the Board notes that Local's present management has demonstrated its ability to operate a conservatively run and profitable institution in a highly competitive industry. The acquisition will not, therefore, constitute a drain upon Applicant's managerial resources and will provide Applicant with a competent and experienced management upon which to base its growth plans for Local.
In view of the foregoing and other facts of record, the Board concludes that the overall financial aspects of the proposal are not adverse and that consummation of the proposal, as the Administrative Law Judge correctly found, will not involve unsound banking practices. The Board is also of the view, from its examination of the evidence of record, that consummation of the proposal will not result in an undue concentration of resources, conflicts of interest or any other adverse effects on the public interest.

As the Administrative Law Judge correctly points out, in order for the Board to approve an acquisition under $\S 4(\mathrm{c})(8)$ of the Bank Holding Company Act, it must determine that approval can "reasonably be expected to produce benefits to the public such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests or unsound banking practices." Thus, the basic balancing test of $\S 4(\mathrm{c})(8)$ requires a showing of positive public benefits that outweigh any possible adverse effects associated with the proposed acquisition.

In seeking to meet its burden of demonstrating that the proposed acquisition will be in the public interest, Applicant asserts that consummation of the proposal would result over a five-year period in a 100 per cent expansion in Local's consumer lending activities with a corresponding increase in competition and greater convenience to the public. Applicant contends that these results can be achieved through geographic expansion and a significant broadening of the types of services Local offers the public. Applicant proposes to market
more aggressively the small direct loans currently being made by Local and, at the same time, to expand the volume of larger size and longer maturity direct loans in Local's portfolio by offering a wide variety of new consumer loans and services such as loan consolidation programs, second mortgage loans, mobile home loans, recreational vehicle and boat loans, insurance premium financing, and home modernization loans. Applicant also proposes to open de novo some 50 to 57 consumer loan offices within the next five years, within the States where Local presently operates. A majority of these new offices will be in markets not presently served by Local.

Additionally, Applicant contends that consummation of the proposal will provide Local with ready access to funds at generally lower rates and with greater assurance of availability, primarily through Applicant's access to the commercial paper market. Local currently does not utilize commercial paper markets, but relies for shortterm financing primarily on bank loans, which is generally slightly more expensive than commercial paper operations. Finally, Applicant contends that consummation of the proposal will avoid a significant reduction in the number of Local's offices and the amount of its outstanding receivables. This contraction in operations has been planned by Local's management as a method both to improve Local's declining profitability and, following the death of Mr. Fred B. Snite, Local's founder and controlling stockholder, ${ }^{13}$ to provide his estate [through redemption of Mr. Snite's Local stock] with the necessary liquidity to meet an estate and inheritance tax liability.

In his Exceptions to the Recommended Decision, Protestant asserts that the proposed public benefits were "fraudulent and designed to induce approval of the application. ${ }^{14}$ In addition, Pro-

[^31]testant argues that Local presently is offering or could offer the additional services proposed by Applicant, and that, in any event, the benefits proposed to flow from the acquisition will inure to the benefit of Applicant and Local rather than to the public.

The Board has carefully reviewed the evidence offered by Applicant to support its claimed public benefits, including the testimony of Mr . Barnes, Applicant's vice president in charge of corporate planning, that the application before the Board fully represents Applicant's plan for Local, the testimony of Mr. Kalchik, Local's president, that he anticipates substantial growth in Local's operations upon its affiliation with Applicant, and the application itself, the execution and delivery of which were authorized by Applicant's Board of Directors. On the basis of its examination of the record and in agreement with the Administrative Law Judge's findings on this point, the Board concludes that the evidence of record reflects a firm policy commitment by Applicant to Local's growth to be achieved through more aggressive marketing of the services Local presently offers, introduction of new consumer loan services, and de novo expansion into new geographic markets. Such growth in Local's operations can reasonably be expected to result in increased competition in the consumer finance industry and benefits to the public, including increased convenience and improved services. Moreover, the Board is of the view that this proposed expansion in Local's services to the public is not likely to occur absent approval of this application.

Local's management is presently dominated by the highly conservative and nonexpansionary policies of Mr. Snite. According to Mr. Kalchik, Local's president, these policies, which have prevented Local from expanding geographically and into new service lines, have placed Local at a competitive disadvantage within the consumer finance industry, as evidenced by a decline in its profits and efficiency and inadequate service to its markets. Again according to Mr. Kalchik, this situation is not likely to improve, absent Local's

[^32]sale to Applicant in light of Mr. Snite's attitude and since the other members of Mr. Snite's family, who are not active in the company's management, ${ }^{15}$ are interested in security and earnings rather than in the development and growth of Local. The Board's review of the record indicates that Mr. Kalchik's view as to Local's present position within the consumer finance industry is correct, that Local is essentially a defensive, nonaggressive competitor. This is demonstrated by Local's highly conservative loan policies, its lower than average growth rate, its less than average net income per office, and principally by the fact that Local has not expanded into new product lines within the past few years or entered a new State since 1945, a new market area since 1953, or opened a new office (as opposed to a spin-off of accounts from an existing office) since 1959.

In these circumstances, the Board concludes that substitution of Applicant, which is committed to a policy of revitalization and growth in the volume, scope and character of Local's services to the public and which has the financial resources to adequately support that growth, for Local's present owners represents a public benefit sufficient in and of itself to outweigh the slightly adverse effects associated with the proposal. ${ }^{16}$

Furthermore, affiliation with Applicant would provide Local with access to a broad range of financial services, including the commercial paper market. While industry statistics indicate that commercial paper represents approximately 18.8 per cent of the total liabilities, capital and surplus of consumer loan companies, Local has been principally dependent upon bank loans for shortterm financing. Applicant's plan to rely extensively on commercial paper for Local's short-term financing should result in the long run in less costly debt financing as well as an increase in Local's loanable funds. Affiliation with Applicant will also provide Local with access to a staff sophisticated in planning, marketing, financial analysis and economics which, as the Administrative Law

[^33]Judge found, should strengthen Local's competitive position within the consumer finance industry.

Consummation of the proposal would also avoid the significant contraction in Local's operations planned by Local's management as a method to improve Local's declining profit performance through elimination of some 26 of Local's less profitable offices and tightening of Local's credit standards to reduce loan losses. The plan formulated as an alternative to affiliation with Applicant contemplates the reduction of Local's staff by 140 and its net receivables by approximately $\$ 20$ million and is expected to result in an increase in its profits from $\$ 446,000$ to $\$ 714,000$. The proposed contraction in operations would also enable Local after Mr. Snite's death to redeem Mr. Snite's stock while maintaining Local's traditionally low debt to equity ratio.

Protestant contends that such a contraction in Local's operations will not occur and that Local's loan agreements prohibit such a course of action. While Local's loan agreements prohibit a reduction in Local's liquid net worth below a certain amount, they do not prohibit the planned closing of its less profitable offices or a reduction in its receivables. Moreover, since at least 1966, Local's agreements with its lenders have contemplated and expressly permitted a significant redemption of Local's stock after the death of Mr. Snite for the purpose of making available to Mr. Snite's estate funds for the payment of his estate and inheritance taxes. Local's recent loan agreements limit the amount of such a redemption to $\$ 8$ million. ${ }^{17}$

The Board is satisfied from its review of the evidence of record, including the testimony of Mr. Kalchik concerning Local's need to consolidate its operations to improve its efficiency and its earnings, with the correctness of the Administrative Law Judge's finding that the planned contraction of Local's operations is not a 'mere sham', as Protestant argues. In this regard, the Board notes

[^34]that the plan Local's management has formulated to increase Local's earnings is not at all unreasonable in view of Local's rejection of growth and expansion and its lower than average ratios of net income per office and receivables per employee. Since the proposed contraction in Local's operations would result in a decrease in Local's services to the public as well as a decrease in the amount of competition within the consumer finance industry, the prevention of that contraction through consummation of Applicant's proposal represents a further benefit to the public.

During the course of the hearing in this matter and in a collateral lawsuit challenging the conduct of these proceedings, Protestant raised a question concerning the environmental impact of Applicant's proposal. In view of the nature and extent of the activities involved in Applicant's proposal and the fact that the proposal involves merely a transfer of the ownership of Local and its presently existing 124 offices, the Board concludes that its approval of the instant application would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section $102(2)(C)$ of the National Environmental Policy Act of 1969 (42 U.S.C. $\S 4332(2)(C)$ ). Thus, the Board has determined that the requirements of that section are inapplicable to the Board's action in this case.

With respect to Applicant's plans to establish de novo 50 new Local offices in as yet unspecified locations over the next five years, the Board notes that its action on this application does not constitute approval of the opening of those offices. Under the Board's Regulation Y (12 C.F.R. §§225.4 (b)(1) and (c)(2)), Applicant must obtain the Board's approval prior to establishing any such individual offices. However, since those offices will be located in leased premises on already established commercial sites, where there exists a probable public need or demand for the services offered by such offices and considering the low volume and essentially non-environmental nature of such services, the Board does not believe that any action it may take on those future applications would constitute a major Federal action significantly affecting the quality of the human environment.

On the basis of all the facts of record, including Applicant's commitment to and ability to support an expansion of Local by means of new and improved services to the public, the Board has determined that the balance of the public interest
factors the Board is required to consider under $\S 4(\mathrm{c})(8)$ of the Bank Holding Company Act is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in $\S 225.4(\mathrm{c})$ of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Cleveland.

By order of the Board of Governors, effective July 19, 1976.

Voting for action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns.
(Signed) J. P. Garbarini, [sEaL] Assistant Secretary of the Board.

## Appendix

In his Exceptions to the Administrative Law Judge's Recommended Decision and by various motions and petitions to the Board, Protestant has raised a number of objections to the manner and conduct of the administrative proceedings and has requested the Board to vacate the Recommended Decision, remove the Administrative Law Judge and remand the application for "proper proceedings." In particular, Protestant asserts that in the conduct of the hearing due process was violated as a result of the refusal of the Administrative Law Judge and the Board 'to allow [P] rotestant to present his case or indeed to present any case in rebuttal to [A]pplicant's case"' and by their further refusal to order the production of certain documents and witnesses requested by Protestant. In addition, Protestant contends that due process was further violated by "repeated ex parte contacts on behalf of [A]pplicant to the Board staff and the examiner, and further violated when the Board, staff and examiner refused to disclose the extent of these ex parte contacts."

The Board has carefully examined the record of these proceedings and finds that they were conducted by the Administrative Law Judge fairly,
properly, and in full compliance with both the requirements and spirit of the Administrative Procedure Act and the Board's Rules of Practice for Formal Hearings and that in no respect was Protestant denied a fair hearing. Accordingly and for the reasons set out hereinafter, the Board affirms in all respects the Administrative Law Judge's conduct of the proceedings and denies Protestant's requests to vacate the Administrative Law Judge's decision, remove the Administrative Law Judge, and remand the application for additional proceedings.

Protestant's contention that he was denied the opportunity to present his case is apparently based on the series of events surrounding the Administrative Law Judge's rulings on November 7 and 11, 1975, denying Protestant a postponement of the hearing from November 11, 1975 until December 8, 1975, and the Administrative Law Judge's decision on November 11, 1975, to proceed with the hearing to its close following Protestant's withdrawal from the hearing room after his request for a postponement was denied. Those events occurred generally as follows.

At the close of the thirteenth day of hearings, on October 10, 1975, Protestant requested and received a postponement of the hearing until October 21, 1975, because of health and business reasons. On October 20, 1975, Protestant notified the Administrative Law Judge that because of health reasons he would not be able to proceed on October 21, 1975. On the same date, Applicant also sought from the Administrative Law Judge a postponement of the hearing. With the consent of all parties to the proceeding, except Board Counsel, who objected to any further delays, the Administrative Law Judge scheduled the hearing to reconvene on November 11, 1975, and indicated that the hearing would proceed thereafter to its conclusion.

However, by letter dated October 31, 1975, Protestant requested of the Administrative Law Judge a further postponement of the hearing from November 11, 1975 until December 8, 1975, because of business reasons and in order that he might "reflect on and assess"' his position in the proceedings. By Order dated November 7, 1975, the Administrative Law Judge denied Protestant's request. The hearing reconvened on November 11, 1975, at which time Protestant renewed his request for a postponement for the reasons stated in his letter of October 31, 1975, and, in addition, because of the unavailability of Mr. Suskin, a Fed-
eral Estate Tax expert and the only witness Protestant had indicated he would call. The Administrative Law Judge denied Protestant's request and directed Protestant to continue with his cross-examination of Dr. Shay, Applicant's final witness. The Administrative Law Judge did, however, indicate that the matter of postponements to obtain expert testimony would be taken up at the time Protestant was to proceed with his case.

Protestant then informed the Administrative Law Judge that he intended to leave the hearing room to prepare and file with the Board an appeal from the Administrative Law Judge's ruling and, thereafter, to return to Illinois for business reasons. The Administrative Law Judge informed Protestant that he could file his appeal with the Board during the noon recess and advised Protestant that the hearing would proceed in his absence. On six separate occasions the Administrative Law Judge directed Protestant to proceed with his cross-examination of Dr. Shay. Protestant refused to proceed and withdrew from the hearing room. ${ }^{1}$ Thereafter, the hearing continued with cross-examination of Dr. Shay by Board Counsel and the introduction into evidence by Board Counsel of numerous documents and exhibits. Applicant and Board Counsel then rested their cases.

On November 12, 1975, the Administrative Law Judge issued to all parties to the hearing a notice to show cause by the close of business November 18, 1975, why the hearing should not be closed. At Protestant's request, the time limit to respond to the notice was extended to November 21, 1975. On November 24, 1975 the Administrative Law Judge closed the hearing and rejected

[^35]as untimely Protestant's response to the Show Cause Order. ${ }^{2}$

On November 13, 1975 Protestant filed with the Board's Secretary a "Petition to the Board" seeking special permission of the Board pursuant to § 263.10(e) of its Rules of Practice (12 CFR § 263.10(e)) to appeal "from the ruling or refusal of the Administrative Law Judge to continue the hearings to the week of December 8, 1975." By Order dated November 18, 1975, the Board denied Protestant special permission to appeal ( 40 Federal Register 55720) on the grounds that the Administrative Law Judge's decision involved a matter committed to his sound discretion by both law and regulation.

By undated motion received by the Administrative Law Judge on December 16, 1975, Protestant in addition to requesting the removal of the Admistrative Law Judge, requested that the hearing be reopened to take the testimony of Mr. Suskin and unspecified "others," which testimony Protestant alleged "was muzzled by the current judge without rhyme or reason." By Order dated January 7, 1976, the Administrative Law Judge denied Protestant's motions but permitted him to submit the affidavit of Mr. Suskin, the only prospective witness named by Protestant in response to the Show Cause Order. Mr. Suskin's affidavit was later accepted into evidence by the Administrative Law Judge.

As the Board has previously indicated in its Orders of October 8, and November 18, 1975, denying Protestant special permission to appeal from rulings of the Administrative Law Judge, the decision to grant or deny a continuance in and to otherwise regulate the course and conduct of an administrative hearing are matters committed to the sound discretion of the Administrative Law Judge under both the Board's Rules of Practice and the Administrative Procedure Act. In addition, the Board's Rules of Practice impose upon the Administrative Law Judge the duty and responsibility to take all necessary action to avoid delay in the disposition of the proceedings. Considering all of the relevant circumstances the Board is unable to conclude that the Administrative Law Judge abused his discretion or acted without regard to the convenience and necessity of the parties in denying Protestant's additional request for a fur-

[^36]ther postponement of the hearing on November 11, 1975, and thereafter proceeding with the hearing to its close in the self-imposed absence of Protestant.

In the Board's view, the record clearly demonstrates that the Administrative Law Judge throughout the course of the lengthy and protracted hearings fairly accommodated Protestant. At the hearing session on November 11, 1975, Protestant had nearly four weeks in which to "reflect on and assess" his position and make necessary prepararations for the hearing. Applicant's final witness, whom Protestant had already cross-examined for two days, as well as a previous witness, Mr. Barnes, whom Protestant had asked to be made available for use as his own witness, were both present at the hearing, the former at considerable expense to Applicant. Rather than proceed in an orderly manner with his questioning of these two witnesses, Protestant chose to withdraw from the hearing room in direct contravention of the Administrative Law Judge's express and repeated order to proceed with his cross-examination and with the full and clear knowledge that the hearing would continue in his absence. In these circumstances, Protestant's contention that he was deprived of the right to present his case is, in the Board's view, wholly without merit. This is especially so in view of the fact that the Administrative Law Judge later permitted Protestant to file the affidavit of Mr. Suskin.
Protestant next contends that the administrative proceedings were defective as a result of the refusal of the Administrative Law Judge to order the production of certain documents and witnesses. During the course of the hearing, Protestant demanded of Applicant the production of a large number of documents, including the desk calendar of Mr. Barnes, Applicant's complete correspondence file on the proposed acquisition, Local's profit and operating plans, Applicant's formal analyses of the proposed acquisition of Local and the feasibility of de novo entry into the consumer finance industry, Local's long- and short-term loan agreements, documents and memoranda presented to Applicant's Board of Directors concerning the proposed acquisition as well as related Board minutes, the wills, trust agreements and estate plans of Mr. Fred B. Snite, and current financial information for Bank and Local (as of January 30, 1976). Protestant further demanded the production of some 19 witnesses, including many of Applicant's directors and executive officers, virtually
every individual who was identified during the course of the hearing as having any connection whatsoever with the application, Local's three senior officers as well as Dr. Willis J. Winn, the President of the Federal Reserve Bank of Cleveland.

The Administrative Law Judge declined to order the production of the witnesses and documents requested by Protestant, concluding that the Board, and therefore any Administrative Law Judge appointed pursuant to its Rules of Practice, lacked authority to require by subpoena or by order under section 5(b) of the Bank Holding Company Act the attendance of witnesses or the production of documents in an administrative hearing held under the provisions of the Act. While the Board fully agrees with the Administrative Law Judge's conclusion that the Board lacks subpoena power under the Act, the Board in the circumstances of this case need not and does not determine the extent of its authority to order the production of documents and witnesses under section 5 of the Act, since, in the Board's view, the issuance of an order such as requested by Protestant would for the reasons stated hereinafter be neither appropriate nor warranted.

In response to Protestant's far-ranging requests for the production of documents, Applicant, at Board Counsels' request, voluntarily and in a more than reasonable effort to accommodate Protestant produced the great bulk of the documentary materials demanded, including Applicant's analyses of and position papers on the proposed acquisition, minutes of its Board of Directors, its feasibility studies on de novo entry into the consumer finance business, and Local's loan agreements. With respect to those items not produced, Protestant's requests were not supported by any statement as to the scope or general relevance of the materials sought. Moreover, the Board's review of Protestant's few unsatisfied demands indicates that those demands, including, for example, Local's profit and operating plans, Applicant's complete correspondence file on the proposed acquisition, and Mr. Barnes' office calendar, were either only remotely relevant and material to the issues in the hearing, unreasonable and excessive in scope, or cumulative of evidence already in the record or otherwise available to Protestant. ${ }^{3}$ In the latter

[^37]regard, the Board notes that both Mr. Barnes and Mr. Kalchik were fully available for examination by Protestant and that both did, in fact, testify at length concerning many of these matters.

With respect to the wills and estate plans of Mr. Snite, Protestant contends that these documents were necessary in order to accurately calculate the Federal Estate Tax liability on Mr. Snite's estate. The Administrative Law Judge noted that while no evidence had been produced on the full extent of Mr. Snite's estate, none was necessary to support his conclusions with respect to the anticipated contraction of Local's operations projected to occur on Mr. Snite's demise. The Board fully agrees with the Administrative Law Judge's analysis and conclusion on this aspect of Protestant's request.

In addition to the documentary materials made available to Protestant, Applicant also produced two of the witnesses Protestant requested. With respect to the remaining witnesses demanded by Protestant, the Board concludes from its examination of Protestant's demands therefor that Protestant either failed to establish the need materiality and relevance of the testimony sought to be elicited or that such testimony would be unduly repetitious of testimony and evidence actually produced by Applicant. With respect to Dr. Winn, the Board has considered his affidavit to the effect that he has never analyzed or seen an analysis of the subject application or made any recommendation with respect thereto. His conversations with officials of Applicant in late 1974 were confined to the capital position of Bank, and his knowledge of the same was derived from the report of examination of Bank prepared by the Office of the Comptroller of the Currency. In these circumstances and in view of the Comptroller's refusal to permit the Report of Examination of Bank to be introduced or used in the proceedings and the inability of Dr. Winn to testify concerning matters contained in that report absent permission from the Office of the Comptroller of the Currency, ${ }^{4}$ the Board does not consider any testimony Dr. Winn could give as relevant or necessary to this proceeding.

[^38]In connection with its review of Protestant's demands for the production of documents and witnesses, the Board has also considered the fact that the Administrative Law Judge, while recognizing the ability of the Board to draw adverse inferences from an applicant's refusal to produce "substantial relevant and material evidence," declined to draw any such inference in this case. The Board concludes from this that the Administrative Law Judge did not deem Protestant's unsatisfied demands to be sufficiently material or relevant to warrant such action.

In view of the foregoing and all other relevant circumstances, the Board concludes that the Administrative Law Judge's action in declining to order the production of those documents and witnesses requested by Protestant and not voluntarily produced by Applicant was completely proper and justified and further that Protestant was not thereby denied a fair hearing.

With respect to Protestant's allegation of ex parte contacts between the Administrative Law Judge and counsel for Applicant, the Board notes that Protestant in failing to file a timely and sufficient, or indeed any affidavit of personal bias or other disqualification in connection with his assertions did not comply with § 263.6(a) of the Board's Rules of Practice and the Administrative Procedure Act, 5 U.S.C. § 556(b). In addition, even assuming the alleged communication between the Administrative Law Judge, and Applicant's counsel took place, which communication Applicant's counsel denies, such a communication, involving merely a statement by the Administrative Law Judge that he expects to render his decision within the 45 -day period provided under the Board's Rules of Practice is not viewed by the Board as improper and does not concern "any fact in issue" within the meaning of $\S$ 263.6(a) of the Board's Rules of Practice and the Administrative Procedure Act, 5 U.S.C. § 554(d). ${ }^{5}$
In its consideration of Protestant's Exceptions, the Board has also reviewed Protestant's motions to remove the Administrative Law Judge filed with the Administrative Law Judge on December 16, 1975 and February 10, 1976. The former motion

[^39]sought the Administrative Law Judge's removal because of the pendency of a lawsuit filed against the Administrative Law Judge by Protestant on December 12, 1975, in the United States District Court for the Northern District of Illinois (Civil Action No. 75 C 4238). ${ }^{6}$ In that lawsuit Protestant challenged the Administrative Law Judge's rulings on Protestant's requests for discovery and continuances, as well as his impartiality and qualifications to sit in a banking case. On January 7, 1976, the Administrative Law Judge denied Protestant's motion because of the absence of good cause shown. ${ }^{7}$

Protestant's December 16, 1975 motion sets forth no legal or factual basis constituting sufficient ground or cause for the removal of the Administrative Law Judge. Moreover, the Board's examination of the record, including the procedural rulings to which Protestant's lawsuit was directed, indicates that the Administrative Law Judge's actions were at all times proper, consistent with good practice, and, in fact, demonstrated remarkable patience and restraint on his part in dealing fairly with Protestant. The Board believes Protestant's charges to be utterly baseless and his motion was properly denied.

Protestant's unsigned and undated motion received by the Administrative Law Judge on February 10,1976 sought the Administrative Law Judge's removal because of the Board's alleged failure to comply with 5 U.S.C. § 3105 , the section of the Administrative Procedure Act dealing with the appointment of Administrative Law Judges. In his Recommended Decision, the Administrative Law Judge denied Protestant's motion. The Board is also of the view that Protestant's

[^40]belated challenge to the appointment of the Administrative Law Judge is unmeritorious and without validity. The Administrative Law Judge was properly appointed pursuant to 5 U.S.C. § 3105 and was properly selected to conduct the instant hearing pursuant to 5 U.S.C. § 3344 by the Director, Office of Administrative Law Judges, United States Civil Service Commission, with the consent of the Administrative Law Judge's employing agency, the Department of Housing and Urban Development.

On March 26, 1976, Protestant filed with the Board a "Motion to Reopen Hearings for taking of testimony of Snite and S. P. Mellon." Protestant asserts that Mr. Snite "is being held incommunicado and under quasi sedation in California . . . to silence his opposition to sale of Local Loan Company . . .'. With respect to Mr. Mellon, Protestant desires to inquire "relative to his state of mind and views of legal procedures applicable to a civilized society.' Protestant's motion being wholly unsupported by affidavits or any relevant evidence is hereby denied.

On March 26, 1976, Protestant also filed with the Board a motion to dismiss the application as moot, contending that the Stock Purchase Agreement between Local and Applicant expired on March 31, 1976. On March 31, 1976, Applicant filed with the Board and served upon Protestant a copy of a letter agreement extending the closing date under the Stock Purchase Agreement from March 31, 1976 to August 31, 1976. Accordingly, Protestant's motion is hereby denied.

In his Exceptions to the Recommended Decision, Protestant requested oral argument before the Board as provided for in § 263.14 of the Board's Rules of Practice ( 12 CFR § 263.14). Protestant's request, made in a summary fashion, does not show that any purpose would be served by allowing oral argument. Protestant's request is hereby denied.

By motions dated May 26, 1976, Protestant requested the Board to strike Board Counsel's Response to Protestant's Exceptions and to reopen the proceedings. For the reasons stated in its letter of June 8, 1976, to Protestant the Board returned those pleadings to Protestant without considering their substance and with leave to Protestant to resubmit the same in acceptable form. Protestant has not, however, seen fit to do so. Rather, on June 24, 1976, Protestant filed a lawsuit against the Board in the United States District Court for the District of Columbia (Civil Action No. 76-
1168) seeking " $[\mathrm{m}]$ andamus relief to see that the documents are filed instanter." In addition, by letter dated June 24, 1976, Protestant requested the Board's Secretary to include in the record on this application a copy of that complaint with the objectionable pleadings attached. Protestant's request is hereby denied.

Having carefully reviewed the evidence of record in this matter, including the Administrative Law Judge's findings and conclusions, the Board finds that all other motions, demands, and exceptions made by Protestant are without merit, and they are hereby denied.

Board of Governors of the Federal Reserve System, July 19, 1976.

## Recommended Decision

 of the Administrative Law Judge
## Statement of the Case

On October 11, 1974 (by documents dated September 30, 1974), ${ }^{1}$ Mellon National Corporation, the Applicant herein, submitted to the Federal Reserve Bank of Cleveland an application for prior approval to acquire all outstanding shares of Local Loan Co., Local herein, pursuant to Section 4(c)(8) of the Bank Holding Company Act of 1956, as amended, herein the Act, 12 U.S.C. Section 1841 et seq., and the Rules and Regulations of the Board of Governors of the Federal Reserve System, the Board herein, Regulation Y, 12 C.F.R. Section 225 et seq. Additional materials, clarifications, and corrections were requested and thereafter received on October 24, November 6, November 7, and November 13, 1974. On November 19, 1974 (by letter of November 13, 1974), the Application was received by the Board from the Federal Reserve Bank of Cleveland. The receipt by the Board constitutes the filing within the meaning of the Act.

On November 27, 1974, a copy of the application was submitted to Anti-Trust Division, Department of Justice with concurrent notification to the Comptroller of the Currency of the Department of the Treasury and the Federal Deposit Insurance Corporation. None of these agencies thereafter intervened or opposed the acquisition. On November 29, 1974, the Applicant was requested by the Board to supplement its Application

[^41]with additional information. On December 23, 1974 (by letter dated December 13, 1974), the requested supplemental information was filed with the Board: On December 6, 1974 (by Order dated November 27, 1974), the Board published the Notice of Application which provided, inter alia, that expressions of views and requests for hearings should be filed with the Board in writing no later than December 30, 1974. (39 Federal Register 42719).

On January 9, $1975^{2}$ (by letter dated January 6), Anthony Robert Martin-Trigona, Protestant herein, "Renew[ed] [his] demand for a hearing on this application" and adopted by reference his filing of September 5, 1974 (by letter dated August 29, 1974), titled "Notice of Opposition to Proposed Acquisition'" in which the present Application was opposed. On January 27 (by letter dated January 24, 1975), Applicant contested Protestant's standing to intervene. Following a lengthy exchange of correspondence between the parties and the Board, on May 30, 1975, an informal preliminary hearing on the standing of Anthony Robert Martin-Trigona as a Protestant in the matter was scheduled for June 12, 1975 in Washington, D.C. The hearing was held as scheduled before John D. Hawke, Jr., General Counsel of the Board. The Applicant appeared by Counsel and the Protestant appeared in person and by Counsel.

On July 28, 1975, the Board ${ }^{3}$ by formal Order decided to refer the Application to formal hearing ${ }^{4}$ before Administrative Law Judge Phillip J. La Macchia. On August 22, 1975, the-Board designated the undersigned to conduct the hearing and directed the hearing for September 3, 1975. The hearing was held on September 3, 4, 5, 6, ${ }^{5} 29$, 30, October 1, 2, 3, ${ }^{6.7}$ 6, 7, 9, 10, ${ }^{8}$ and November

[^42]11,9 1975. On November 4 (by an undated document), Protestant filed a Motion to Remove Counsel for Applicant. On November 10 and November 11 (by documents dated November 10), Applicant and the Board, respectively, opposed the Motion. On November 10 by telegram, the undersigned denied Protestant's Motion to Remove Counsel.

Following the November 11 adjournment, a telegraphic Notice to Show Cause was issued on November 12 requiring the parties to show cause by the close of business November 18, why the hearing should not be closed. On November 18 (by telegram of the same date), Protestant requested a further extension. On November 19 by telegram, the time for response to the Notice to

[^43]Show Cause was extended to the close of business November 21. The hearing was closed on November 24 and the date for filing briefs was set for December 29. On November 24 (by letter dated November 20 but mailed November 21), Protestant responded to the November 11 Notice to Show Cause. His response was rejected as untimely and not given consideration. ${ }^{10}$ On December 1 (by letter dated November 26), Mr. Banzhaf for Protestant objected to the use of telegraphic notices in the proceedings. ${ }^{11}$ On December 12, Protestant requested service on him of certain documents introduced by Applicant and the Board on November 11 after he had left the hearing room. ${ }^{12}$

On December 16, (by undated document), Protestant filed a Motion to Remove the Administrative Law Judge and to Reopen the Hearing. The Motion was opposed by the Applicant and the Board. Applicant timely filed its Proposed Findings of Fact, Conclusions of Law, and Supporting Brief on December 29. On December 30 (by document dated December 26), Protestant requested a further extension of time for filing briefs. The request was opposed by Applicant. By Order dated January 7, 1976, the Motion to Remove Administrative Law Judge was denied, the Motion to Reopen the Hearing was denied, ${ }^{13}$ and the Motion to Extend Time For Filing Briefs was granted until the close of business January 16, 1976. The Board joined Protestant's Motion to Extend Time For Filing Briefs because of the undersigned's failure to properly file the transcript of testimony with the Secretary of the Board. The transcript of testimony was properly filed with the Secretary on January 14, 1976, whereupon, the time for filing briefs was set for 15 days after

[^44]receipt of notice of the filing of transcript of testimony. On February 2, 1976 (by documents dated January 30, 1976), Protestant filed: (1) a demand for an Order to Produce certain current financial statements; (2) a Motion to Extend Time for Filing Brief until February 10, 1976; and (3) the affidavit of Edward Kenneth Suskin. On the same date, Protestant Petitioned the Board to Remove the Administrative Law Judge. On February 4, 1976 by telegram, the time for filing briefs was extended to the close of business February 9, 1976. By Order dated February 9, 1976, the demand for an order requiring production of documents was denied. ${ }^{14}$ Also on February 9, 1976
${ }^{14}$ The issue of compulsory production of documents came up repeatedly in the hearing. The Board's position as reflected by Mr. Loeser's statement of September 3 and 5, Mr. Oehmann's statement of September 30, and Exhibit 87 was that the Board was not granted subpoena authority under the Bank Holding Company Act unlike other comparable laws. The issue was considered and specifically rejected by Congress as follows:
MR. MORSE: Mr. President, the purpose of the amendment is to grant subpoena power to the Board.

A major defect of the bill is its failure to give the Federal Reserve Board any power to compel the production of documents or the appearance of witnesses. The Board has no such power at the present time. The general statutes creating the Federal Reserve Board and giving it powers in other fields such as enforcement of the Clayton Act do not, as is the case with other administrative agencies, grant to the Board general powers to subpoena witnesses, compel the production of documents, and so forth. Accordingly, anyone requested by the Board or a bank holding company to appear who does not desire to produce documents or to give testimony at a hearing held by the Board under this bill need not do so.

No genuine hearing could be held without this power, which is given by law to almost every other Federal agency exercising regulatory functions comparable to those assigned to the Board by this bill. Unless documents can be required to be produced and witnesses compelled to attend hearings, the hearings may well be abortive.

The amendment proposed is designed to give the Board this necessary power in connection with hearings held under the Act. The provisions are modeled upon corresponding provisions of the Federal Power Act ( 16 U.S.C. 825(b)-(c)).

I submit the amendment. 102 Con. Rec. (Senate) 6959. The Amendment was rejected.

Protestant argued that despite this rejection, the Board could compel production of evidence. His position was stated as follows:
MR. BANZHAF: May I attempt to correct counsel on that. I believe the statute provides that the Board may issue any order which is necessary to carry out its functions. If I can find it, I will refer counsel to it.
MR. LOESER: I think counsel's referring to Section 5B of the -
MR. BANZHAF: Committee--Section 5B, the Board is authorized to issue such regulations and orders as may be necessary to enable it to administer and carry out the purposes of this Act, and prevent evasions thereof. It certainly seems to me a reasonable order to be that if you feel the attendance of witness and the production of documents would be necessary to carry out your functions, to make a complete and detailed
(by document dated February 6), Protestant moved for the admission of the affidavit of Edward Kenneth Suskin. On February 14, 1976, Applicant opposed the admission of the affidavit of Edward Kenneth Suskin. ${ }^{15}$

On February 10, 1976 (by document mailed February 9, 1976) Protestant filed his Proposed Findings of Fact, Conclusions of Law, and Supporting Brief. ${ }^{16}$ On February 10, 1976, Applicant moved to strike "Protestant's Reply Memorandum. ${ }^{17}$ On the same date, Protestant filed a Motion to Remove the Administrative Law Judge. The Motion to Remove was opposed by the Board. ${ }^{18}$ On February 13, 1976, Applicant submitted an affidavit of Lawrence X. Pusateri. ${ }^{19}$ On February 19, 1976, Applicant filed its Answering Brief. ${ }^{20}$ No brief was filed by the Board.

Accordingly, I make the following:

## Findings of Fact

Mellon National Corporation, the Applicant, is a Pennsylvania corporation with principal offices at Pittsburgh, Pennsylvania. Applicant is a one-

[^45]bank holding company which controls Mellon Bank, N.A., the Bank herein. In addition to the commercial banking activities of the Bank, the Applicant is principally engaged in mortgage banking, real estate and leasing, through various other subsidiaries and affiliates. Applicant does not presently have a consumer finance subsidiary. Applicant's total consolidated assets are $\$ 9.9$ billion. ${ }^{21,22}$

The Bank is the largest bank in Pennsylvania with its principal office and place of business located in Pittsburgh. The 102 branches of the Bank are located in the six-county metropolitan area of Pittsburgh. Based upon domestic deposits it is the sixteenth largest commercial bank in the United States. The Bank's deposits of $\$ 5.3$ billion represent $12.4 \%$ of domestic deposits in the State. Ninety-nine per cent ( $\$ 9.5$ billion) of the Applicant's consolidated assets are represented by the assets of the Bank.

During the five years ending December 31, 1974, Applicant has increased consolidated assets by $90 \%$ ( $\$ 9.7$ billion from $\$ 5$ billion), consolidated net income by $26 \%$ ( $\$ 57.7$ million from $\$ 45.8$ million), domestic and foreign deposits by $71 \%$ ( $\$ 7.2$ billion from $\$ 4.2$ billion), and total equity capital by $21 \%$ ( $\$ 569$ million from $\$ 470$ million). The increase has been accomplished by growth as well as acquisitions and de novo operations. During 1973, Applicant through its subsidiary Mellon National Mortgage Company acquired Carruth Mortgage Company (New Orleans, Louisiana). Early in 1973 Applicant, through its subsidiary Mellon National Mortgage Company, began de novo operations of Mellon National Leasing Corporation (Pittsburgh) which is engaged in full pay-out leasing of equipment. In 1974 Applicant, also through its subsidiary Mellon National Mortgage Company, acquired $25 \%$ interest in Banco Bozano Simonsen de Investimento, S.A., an investment bank in Brazil.

The most significant operations of the Applicant are conducted through the Bank, which contributes substantially all of the income of Applicant. As noted above, the Bank is a commercial bank. The

[^46]most significant thrust of Bank activities is in the major heavy industrial area, both domestic and international. ${ }^{23}$ Additionally, it provides the usual retail bank services to customers. This includes both a credit card program (affiliated with Master Charge card system) and consumer lending services. The volume of consumer loans of the Bank represent less than $4 \%$ ( $\$ 360$ million) of the total assets of the Bank. ${ }^{24}$ Substantially, all of these consumer loans originate in the six-county Pittsburgh metropolitan area. The only other loan amount worthy of note is that produced by the purchase of mobile home sales contracts which are not confined to the six-county area.

The Applicant's mortgage banking operations are carried on by Mellon National Mortgage Corporation (a subsidiary of Applicant) and its subsidiaries Laurel Mortgage Co. and Carruth Mortgage Corporation, by the Allamon Corporation (a subsidiary of Applicant) through its subsidiary Mellon National Mortgage Co. of Ohio (Cleveland, Ohio), and by the Bank through its subsidiary Mellon National Mortgage Company of Colorado (Denver, Colorado). Of these, only Mellon National Mortgage Co. of Ohio engages in consumer loan activities. The volume of its consumer loans represents less than $.1 \%$ the assets of Mellon National Mortgage Co. of Ohio. These consumer loans are in the Cleveland Area.

Local Loan Co. is a Delaware Corporation with principal offices in Chicago, Illinois. ${ }^{25}$ Fred B. Snite, the founder, continues at the age of 91 to actively function as Chairman of the Board. Mr. Snite, members of his family, related trusts, and Mr. Snite's private foundation own about $99 \%$ of the outstanding stock of Local and its subsidiaries.

Local through its own operations and those of its 19 subsidiaries is engaged in the consumer finance business. These consolidated operations are conducted in 124 offices in 12 States; the offices are located in 38 identifiable market service

[^47]areas. These are as follows:

| Location | Offices |
| :---: | :---: |
| California |  |
| Southern Los Angeles and |  |

Local's consolidated total assets are $\$ 95.2$ million. Local's ranking among finance companies in the United States is seventieth ( $\$ 32.5$ million) in capital funds and seventy-fifth ( $\$ 84.8$ million) in net receivables. ${ }^{26,27}$

Exclusive of the captive finance companies, Local's ranking is forty-first in capital funds and forty-third in net receivables among independent finance companies. Eighty-two per cent ( $\$ 72.2$ million) of Local's total volume of receivables outstanding represents direct cash loans to individuals on an installment basis; eighteen per cent ( $\$ 15.5$ million), represents retail installment contracts. ${ }^{28,29}$ Four states, California, Illinois, Oregon, and Wisconsin account for $74.2 \%$ of its total volume of receivables.

In the market service areas in which it operates, Local's share of the estimated total market is in a range of $.21 \%$ to $4.38 \%$ with a median of $1.37 \%$. Local's largest share is in Medford, Oregon. In the 28 market service areas in the four States contributing the largest volume of receivables, Local's share of the estimated total market is in the same range, with a median of $1.62 \%$. In the other 10 market service areas (in 8 States) the range is $.63 \%$ to $2.61 \%$ with a median of $.87 \%$. In each of the service areas, Local is competing against numerous other finance companies, both independent and captive, banks and credit union offices. ${ }^{30}$ Most of the 10 highest ranked finance companies as well as many companies ranked above Local, both in total capital funds and net receivables, compete with Local in substantially all significant market areas.

Local uses as a source of funds its equity capital and bank loans, and has not attempted to use commercial paper. Bank loans at the prime rate have provided for compensating balances which can not be withdrawn absent termination of the issues of credit; as of December 31, 1973, \$5.4 million was deposited in these banks. Additionally, the use of these lines of credit has been restricted by agreements requiring the company to

[^48]liquidate its indebtedness to individual banks for 30 or 60 days each year. The agreements also allow cancellation of the credit lines at any time at the lending bank's discretion.

During the three-year period ending December 30, 1974, ${ }^{31}$ Local has increased consolidated assets by $25 \%$ ( $\$ 95.2$ million from $\$ 76.7$ million), and total equity capital by $.2 \%$ ( $\$ 28.3$ million from $\$ 27.7$ million). During the same period, the consolidated net income has decreased $58 \%$ ( $\$ 1.04$ million from $\$ 2.44$ million). Local has not entered a new State since 1945, a new market service area since 1953, nor opened a new office, as distinguished from the division of the accounts of an office into two offices, since 1959. It has expanded its operations from 118 offices to 124 offices by such divisions since 1969. Local's receivables are $\$ 724$ thousand per office as compared to $\$ 942$ thousand per office, and $\$ 127$ thousand per employee as compared to $\$ 198$ thousand per employee for the industry according to Local's and the consumer finance industry statistics. ${ }^{32}$ Local's growth rate has been $3.2 \%$ per year as compared to $7.4 \%$ for the industry according to the same statistics.

The agreement between Applicant and Local provides for the purchase of all of the outstanding shares of Local by Applicant for $\$ 30$ million. ${ }^{33}$ The source of the funds for the purchase of Local is an issuance of $\$ 125$ million in floating rate notes due 1989 issued at $7.8 \%$ in March 1974.

Local is motivated to sell by the expectation of tax liabilities arising from Mr. Snite's eventual demise. It has been anticipated that the liability for taxes at that time will be $\$ 6.3$ million. ${ }^{34}$ The plan for payment of such taxes anticipates Local's purchase of sufficient of Snite's $28.6 \%$ share of the Local stock to provide the necessary funds. This would decrease the equity of Local and, in

[^49]order to maintain the same debt to equity ratio, would substantially contract Local's operations. The effect is illustrated as follows (assuming debt to equity ratio remains constant):

1974 Proposed
Equity
Liabilities $\quad \$ 28.3$ million $\$ 22$ million
( $\$ 6.3$ million $\times 2.36=\$ 14.9$ decline in liabilities)
Net Receivables $\quad \$ 84.8$ million $\$ 63.6$ million
( $\$ 6.3$ million $+\$ 14.9$ million to reduce liabilities $=$ $\$ 21.2$ reduction)
Such an event was contemplated by Local and a bank in a letter of agreement of 1972 which related to lines of credit. ${ }^{35}$ At that time, it was stated as follows:
Sec. 5.18 is amended so that existing Lines 18 , 19 and 20 should be deleted and the following language substituted:
"Purpose of making funds available to the estate of Mr. Fred B. Snite for the payment of estate and/or inheritance taxes on his estate, and/or for the purpose of redeeming any stock in his estate, a sum or sums not exceeding $\$ 10,000,000.00$ in the aggregate to the purchase or redemption, in either case at not more than a reasonable"
The proposed contraction of Local anticipates the withdrawal from three states, Florida, Nebraska, and New York. In addition, eight offices would be closed in Wisconsin, two in California, three in Illinois, two in Minnesota, one in Oregon and two in Washington. The reduction in the number of offices would be from 124 to 98 resulting in a decrease in staff by 140 employees. Additionally, credit standards would be tightened. The projection is to reduce receivables from $\$ 88$ million to $\$ 60$ million. With the economies projected, Local's income would rise from $\$ 446$ thousand to $\$ 714$ thousand. While some contraction apparently has long been anticipated, the above described plan was only developed in the Fall of 1974 as an alternative to approval of this application.

Upon approval of the acquisition, Applicant plans to begin a program of expansion of Local's operations. ${ }^{36}$ The expansion is to be accomplished by the concurrent increase in loanable funds, the increase of the debt to adjusted capital ratio from 2.4:1 to $5: 1$, and the reduction of the reserve for bad debts from $4.7 \%$ to $3.9 \%$ of receivables. The

[^50]number of offices is to be increased by 50 with 280 additional employees. Additionally during the first year, Local is to begin offering new loan services such as, loan consolidation loans, second mortgage loans, executive and professional loans, insurance premium loans, and home improvement loans. Other new loan services would be offered later. In addition to new types of loans, Applicant will raise the loan amounts and extend the maturity terms of loans. All of these were offered by Applicant as benefits to the public and are discussed below.

Applicant denies that it would enter the market on a de novo basis. ${ }^{37}$ In support of its rejection of de novo entrance into the consumer finance industry through a non-banking subsidiary Applicant cites the cost, the lack of an organization and trained staff (primarily qualified management), and the risk of a de novo entry. The evidence is uncontradicted that the investment would be in the range of $\$ 100$ million to $\$ 120$ million ( $\$ 10$ million to $\$ 30$ million to duplicate Local's operations and $\$ 88$ million in loanable funds). In addition, Applicant cites the need to employ an entire 650 person staff including top and mid-level management. Assuming Applicant could establish an operational company it is Applicant's position that the risk involved would be too high to justify the endeavor.

## Conclusions

The Applicant is one of the major financial institutions in the United States. The evidence supports Applicant's self-characterization as a prudent and conservative bank holding company. Local is a medium sized sub-national or multiregional consumer finance company. The states and market service areas where it does not operate cannot be regarded as insignificant in the national consumer finance market; its absence from these

[^51]markets preclude its being termed national. On the other hand, the number and dispersal of market areas where it does operate are substantially greater than normally contemplated by the term regional. Like Applicant, Local could be characterized by the terms prudent and conservative. The company is a significant participant in many of its market service areas, however, it is not the dominant participant in any. Local's business philosophy is reflected by its better than average quality of accounts receivable, its lower than average debt to equity ratio, its above average loan loss reserve, its consistency as a profit making concern, and the conservative policies of Mr. Snite and his management team. Local's growth reflects its other conservative policies; it has grown in total assets and equity while failing to expand geographically. Recently, there has also been a decrease in net income. ${ }^{38}$
The 1970 Amendments to the Act require that consideration be given to whether a proposed enterprise "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. ${ }^{39}$ The burden of proof is on the applicant to show, "that its carrying on a particular nonbank activity would produce benefits to the public that outweigh any adverse effects." House Conference Report on the 1970 Amendments to the Act. H. R. Report No. 91-1747, 91 st Cong. 2d Sess. 17 (1970) [Hereinafter cited as House Conference Report.] ${ }^{40}$ Only if this test is met can the Board lawfully approve an application. ${ }^{41}$
Applicant proposes as public benefits of the acquisition the following:

1. Removal of the constraints on Local imposed by the projected repurchase of outstanding shares and the resultant contraction of the business.
2. Substitution of a policy of growth and revitalization of Local:

[^52]a. 50 new offices in five years in new market service areas in states where Local now operates;
b. Increase in loan receivables by $100 \%$ in five years, from the present $\$ 88$ million to $\$ 176$ million which would exceed Local's projection by $\$ 116$ million ( $193 \%$ );
c. Addition of new services to customers.
3. Increased efficiency of Local resulting in more effective competition in the market place including:
a. Availability of more funds primarily by the Applicant's access to the commercial paper markets;
b. Better organization resulting in economic efficiencies of larger scale operations;
c. Availability of corporate planning, marketing, economics and statistical departments.
The first proposed benefit is based on averting the planned contraction of Local upon Mr. Snite's demise. As noted above, the proposal contemplates abandonment of market service areas, the reduction of accounts (both number and amount), and more restrictive lending policies. Protestant argues that there are viable alternatives to the plan; these include an increase in the low debt to equity ratio and the public sale of Local stock. The existence of alternatives for Local, however, is not the issue before the Board, and determination of the case on this basis would be substituting the Board's business judgment for Local's own management. It is sufficient that there exists a valid basis for the course of action, that Local's management has decided on a reasonable course of action (in this case the sale of the company as an operating business), and that the plan is not a mere sham created in expectation of these proceedings. The issue before the Board is whether the Applicant should be allowed to buy Local.
There is no doubt that abandonment of the market (both full or partial) by a significant seller of services decreases competition. ${ }^{42}$ It is concluded that removal of the inevitable contraction of Local is a benefit to the public.

The second proposed benefit is based on a policy

[^53]of growth to be established after acquisition as an alternative to Local's contraction plan. Financially, the plan is initiated by infusing new money into Local, reducing the debt to capital ratio from 2.4:1 to $5: 1$, and reducing the debt reserve by $\$ 1.5$ million to the industry average of $3.9 \%$. Operationally, the expansion contemplates increasing the number of offices by 50 , the loan receivables by $100 \%$ to $\$ 176$ million, and the addition of new services in the form of new types of loans, increased loan limits and length of maturity of loan. Protestant argues that the proposal is a sham which would not, in fact, benefit the public.

All the evidence in the hearing is consistent with the existence of Applicant's plans for expansion of Local. The plans as presented to the Board and to Applicant's directors all contemplate a detailed expansionary scenario. The Board has on numerous occasions determined the provision of more services to the public to be pro-competitive and a benefit to the public. ${ }^{43}$ In view of the objective evidence of a firm policy commitment of Applicant to the expansion of current services, it is concluded that the proposed expansion of services constitute a benefit to the public. ${ }^{44}$

The final benefit proposed by Applicant is increased efficiency through availability of new funds to Local, better organization resulting in economies of scale, and the availability of Applicant's corporate strategic services. Protestant attacks the availability of funds as contemplated by commercial paper as not an advantage. He also denies the existence of economies of scale in the consumer finance industry. Protestant also questions the need for management services to Local.

As noted above, Local has been a successful consumer finance company for 70 years. This alone is an indication of the competence of management, both executive and operational. It has

[^54]traditionally operated with a low asset to equity ratio using bank lines of credit as a source of funds at an effective rate higher than prime. Applicant plans to primarily rely on commercial paper as a source of funds and to rely on bank loans as a supplement. The evidence is uncontradicted that commercial paper on a long run basis pays lower interest than bank base prime rate. The Board has recognized easier access to funds as a public benefit. BankAmerica Corporation, supra., Carolina BanCorp., Inc., supra., and First National Holding Corp., supra. The economies of scale other than the availability to the commercial paper market are not sufficiently established or defined to support a finding as a benefit. It would appear, however, that the availability of corporate services could represent a significant improvement in efficiency. The services listed by Applicant, planning, marketing, economics, personnel and statistics, should all strengthen Local's position among consumer finance companies. ${ }^{45}$ These appear to be the type of services necessary for Local to become a national competitor in the field.

It is concluded that the availability of funds and corporate strategic services should result in strengthening of Local as a consumer finance company which should result in its being more competitive in the market.

Although it appears that there are benefits to the public to be obtained by approval of the acquisition, it is also necessary to determine whether possible adverse effects may exist which should prevent approval of the application. The adverse effects listed in Section 4(c)(8) are "concentration of resources, decreased or unfair competition, conflicts of interest, and unsound banking practices."

Of the first of the possible adverse effects, the Conference Report on the 1970 amendment to the Act stated in part as follows:

The danger of undue concentration of economic resources and power is one of the factors which led to the enactment of this legislation, and constitutes a significant threat to the continued healthy evolution of our free economy. American trade has always operated on the principle that relationships between businessmen, large and small, should be founded on economic merit rather than monopoly power. Our national policies of limited

[^55]governmental regulation and interference in trade and commerce, however, do make it possible for undue concentrations of resources and economic power to override fundamental fairness and economic merit when responding to the profit motive. This possibility is enhanced when concentrations of power are centered about money, credit and other financial areas, the common denominators of the economy. . . . The dangers of undue concentration of resources include, but are not limited to, specific competitive effects, which are themselves relevant factors under the Act. It should be clear that this legislation directs the Board to consider all reasonable ramifications of the concentration of resources in fulfilling its responsibilities under section $4 .{ }^{46}$

The Board rulings are instructive as to situations contemplated as undue concentrations.

In Chase Manhattan Corp., supra., the second largest bank holding company, which did not previously have a consumer finance company subsidiary, sought to acquire Dial Finance Corporation, the twenty-first largest independent consumer finance company. In its decision denying approval the Board commented on concentration of credit granting resources as follows:
"It is the Board's judgment that approval of this application involving acquisition by one of the nation's largest bank holding companies of a major consumer finance company with a large national network of offices and a commanding position in the market for provision of data processing services to the industry involves the issue of concentration of credit granting resources that was within the intent of Congress in enacting the 1970 amendments. While the matter is not free of doubt, and is one on which reasonable differences of judgment may occur, the Board has concluded that at a minimum, this factor weighs against approval of the application."

Thus in addition to size, the Board emphasized that Dial was in the business of providing vital data processing services to Dial's competitors. Also, in Chase Manhattan there was substantial direct competition between the applicant's banks and Dial in the New York State market.

In a comparable situation, the Board in BankAmerica Corporation, supra., approved the acquisition by the largest bank holding company,

[^56]which did not have a consumer finance company subsidiary, of the eleventh largest consumer finance company, GAC Finance, Inc. In that case, GAC was not in the business of providing necessary credit related services to competitors. The major concern in that case was the effect on actual competition in several market areas, and BankAmerica was required to divest itself of the GAC operations as operating units in areas of competition. The Board found the post-divestiture acquisition not to constitute an undue concentration of resources. The elimination of the situation which would have decreased direct competition resulted in approval of the application.

Finally, in Citicorp, Fed. Reg._-,
Fed. Res. Bul.__ (November 10, 1975), the Board rejected the application of the second largest bank holding company to acquire through its consumer finance subsidiary, Nationwide, two additional consumer finance subsidiaries, Federal Discount, the twentieth, and Amfac Credit, the twenty-eighth largest consumer finance company. The Board stated as follows:

While the elimination of existing, future, and potential competition between Nationwide and each of the Finance Companies is a source of concern to the Board when viewed as individual factors, it represents an even more serious adverse effect of these proposals when examined, as the Board believes it must be, in conjunction with a collateral issue that has greater implications with respect to the public interest. The facts on record of these applications show that Applicant is one of the leading bank holding companies in the United States, that it already has a consumer finance subsidiary which is both substantial and growing in size, that Applicant's subsidiary has achieved a significant presence in the finance company industry, and that Applicant has gained expertise and managerial talent in this financial area. The Board is of the view that, when all of these factors are present, a proposal involving subsequent acquisitions of additional finance companies which are more than insignificant footholds in the consumer finance industry offers substantially diminished returns to the public interest.

Further, the Board stated:
If banking organizations that already have fairly sizable consumer finance subsidiaries are permitted to make additional acquisitions of the relatively few remaining independent consumer finance firms, substantial barriers to entry into the consumer finance industry would be raised.

The concentration of credit granting resources here proposed is not of the magnitude, or in the absence of a concentration of necessary services to the industry, of the type commented on in Chase Manhattan. Neither is it comparable to the actual concentration approved of in BankAmerica. Furthermore, the concentration disapproved of in Citibank is not reflected here in the absence of an existing subsidiary of Applicant in the consumer finance industry. It is concluded, therefore, that acquisition sought herein does not constitute "concentration of resources" as contemplated by the Act.

The second adverse effect listed in the statute is "decreased or unfair competition." The Conference Report ${ }^{47}$ stated on this subject as follows:
"Where a bank holding company seeks to engage in related activities through acquisition, in whole or in part, of a going concern, the elimination of existing competition will be an important negative factor, for other subsidiaries of the bank holding company, or the company itself, may already be providing the products and services in the market served by the company to be acquired. In such circumstances, where the possible benefits to the public of bank holding company activity are already being provided, the elimination of an independent competitive alternative will weigh heavily in the balance against approval."
The Board has determined that consumer finance companies generally compete with commercial banks in the area of small loans to individuals. Bankers Trust New York Corporation, supra. This has been interpreted by the Board to require the disapproval of applications where there is direct competition between the applicant and the finance company to be acquired unless the direct competition can be eliminated by divestiture. Chase Manhattan Corporation, supra., BankAmerica Corporation, supra., First Commercial Bank, Inc., 37 Fed. Reg. 25795, 59 Fed. Res. Bul. 1036 (1972), and First National Holding Corp., 38 Fed. Reg. 5285, 59 Fed. Res. Bul. 203 (1973). Absent the existence of direct competition, the Board has determined that all "acquisition can[not] be presumed per se to affect competition adversely." BankAmerica Corporation, supra. Under the circumstances the only reasonable con-
clusion is that approval of the application will not result in decreased or unfair competition.

Finally, "unsound banking practices" is listed as an adverse effect. The Board has required that proposed acquisitions be a source of strength of the bank holding company. Where the consumer finance company's financial situation has been so impaired that it might significantly weaken the bank involved, approval has been denied. Continental Banksystem, Inc., 38 Fed. Reg. 18491, 59 Fed. Res. Bul. 597 (1973), and UB Financial Corp., 39 Fed. Reg. 37831, 60 Fed. Res. Bul. 791 (1974). The evidence here does not support such a conclusion. Both Applicant and Local are prudent and conservative with low asset to equity ratios. Also regardless of Local's equity, the addition of Local's assets to those of Applicant would not significantly affect the Applicant's asset to equity ratio. It is, therefore, concluded that approval of the acquisition will not lead to unsound banking.
There is no evidence to support a conclusion that Applicant should be perceived as a potential de novo entrant in the consumer finance industry. However, presently Local has numerous bank, captive and independent consumer finance company, credit union, and retail merchant competitors in each of its market service areas. Further the Board has found that extension of consumer finance companies by de novo entrance into new market service areas is relatively easy. First Commercial Bank, Inc. and First National Holding Corp., supra. Further the Board has found that entrance de novo into the consumer finance industry is feasible for some bank holding companies. Chase Manhattan Corporation, supra. and BankAmerica Corp., supra. Thus it appears that despite Applicant's rejection of de novo entrance in the industry and the absence of a consumer finance subsidiary of Applicant to enter market areas de novo, there exist numerous present and potential competitors of Local. ${ }^{48}$

On the basis of the foregoing and the entire record, it is concluded that significant benefits to the public exist and that there are no reasonable adverse effects to the Applicant's application for prior approval to acquire Local. Further, it appears

[^57]that the only basis upon which the application could be denied would be a conclusion that bigness per se is contrary to the purposes of the Act and that any acquisition of a significant consumer finance company by a leading or major bank holding company should be prohibited. There exists no legal authority for such a conclusion. On the contrary Applicant's acquisition of Local is a "foothold acquisition'" as contemplated in Chase Manhattan Corporation, supra., and BankAmerica Corporation, supra. Accordingly, it is recommended that the application be approved.

## Conclusions of Law

1. The Applicant is a bank holding company within the meaning of Section 2(a)(1) of the Act [12 C.F.R. 225.2(a)(1)].
2. Local is engaged in the consumer finance business, an activity determined by the Board to be closely related to the business of banking within the meaning of Section $4(a)(1)$ and (2) of the Act [12 C.F.R. 225.4(a)(1) and (2)].
3. Approval of the acquisition by Applicant of Local and the consummation of the proposal can reasonably be expected to produce benefits to the public that outweigh possible adverse effects within the meaning of Section $4(\mathrm{c})(8)$ of the Act [12 C.F.R. 225.4(c)(8)].

## Recommended Order

It is recommended that the application of Mellon National Corporation, for prior approval to acquire all outstanding shares of Local Loan Co. and its subsidiaries, pursuant to Section 4(c)(8) of the Bank Holding Company Act of 1956 as amended, be approved.
Issued at Washington, D.C. on March 11, 1976. (Signed) James W. Mast, Administrative Law Judge Department of Housing and Urban Development Washington, D.C. 20410

Worcester Bancorp, Inc., Worcester, Massachusetts

## Order Approving <br> Management Consulting Activities

Worcester Bancorp, Inc., Worcester, Massachusetts, a bank holding company within the meaning of the Bank Holding Company Act, has
applied for the Board's approval under § 4(c)(8) of the Act $(12$ U.S.C. $\S 1843(c)(8))$ and $\S$ 225.4(b)(2) of the Board's Regulation Y (12 CFR $\S 225.4(\mathrm{~b})(2)$ ), to engage de novo in the activity of providing management consulting advice to nonaffiliated commercial banks through Applicant's wholly-owned subsidiary, Empire Group, Inc. ('Empire'’), Natick, Massachusetts. Such activities have been determined by the Board to be closely related to banking ( 12 CFR § 225.4(a)(12)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 9936). The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by the United States Department of Justice, in the light of the public interest factors set forth in $\S$ $4(c)(8)$ of the Act ( 12 U.S.C. § 1843(c)(8)).

Applicant, the seventh largest commercial banking organization in Massachusetts, controls five banks with aggregate deposits of approximately $\$ 531$ million, representing 3.7 per cent of the total deposits in commercial banks in the State. ${ }^{1}$ Applicant presently engages in a variety of permissible nonbank activities through a number of direct and indirect nonbank subsidiaries. Applicant's nonbank activities include factoring, making loans secured by second mortgages on real property, personal property leasing on a fullpayout basis, and selling credit life and credit accident and health insurance which is related to extensions of credit by Applicant's lending subsidiaries.

Through Empire, Applicant proposes to engage de novo in providing management consulting advice to nonaffiliated commercial banks on an explicit fee basis. Such advice would relate principally to the collection of consumer loans, including but not limited to offering advice on bank collection procedures, loan documentation, repossession techniques, disposal of repossessed property, personnel management, and compliance with consumer protection laws. Since Applicant proposes to engage in these activities de novo, it does not appear that any meaningful competition would be eliminated or potential competition fore-

[^58]closed as a result of approval of the application. Rather, it appears that Applicant's de novo entry into this industry should have a procompetitive effect by increasing the number of firms offering this specialized consulting advice. Furthermore, by making this service available on an explicit fee basis rather than as a correspondent banking service, clients will be able to more accurately analyze the cost of such services and may be able to more efficiently allocate their funds.

There is no evidence in the record to indicate that Applicant's engaging in the activity of providing management consulting advice would result in any undue concentration of resources, unfair competition, conflicts of interests or unsound banking practices. ${ }^{2}$

[^59]Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under $\S$ 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston.

By order of the Board of Governors, effective July 7, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, Partee and Lilly.
(Signed) J. P. Garbarini, [seal] Assistant Secretary of the Board.

## Orders Approved Under Bank Holding Company Act

## By the Board of Governors

During July 1976, the Board of Governors approved the applications listed below. The orders have been published in the Federal Register, and copies are available upon request to Publications Services, Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

## Announcements

## REGULATION G: Amendments

The Board of Governors has announced a reduction in the paperwork and reporting required in the regulation of securities credit, effective August 20, 1976.

Amendments to the Board's Regulation G governing securities credit by lenders other than banks and broker-dealers will reduce by half the number of persons subject to the regulation, yet continue to regulate 98 per cent of the credit covered under the regulation.

The action is part of a continuing effort by the Board to reduce the reporting burden on the public and to deregulate lenders over which regulatory control is no longer essential.

Regulation G, issued in 1968, applies to certain types of securities credit extended, arranged, or maintained by lenders other than banks and broker-dealers, such as credit unions and insurance companies. The regulation is designed to prevent the excessive use of securities credit by such lenders.

The amendments will:

1. Reduce the frequency of reporting by Regulation $G$ lenders. Reports will be required of all Regulation $G$ lenders on an annual instead of a quarterly basis.
2. Decrease the number of persons subject to the regulation. This will be done by increasing the minimum amount of credit that subjects a lender to the regulation. The minimum amount of credit extended or arranged will be $\$ 100,000$ in any calendar quarter (instead of $\$ 50,000$ ) and in the case of credit outstanding, the minimum amount will be raised from $\$ 100,000$ to $\$ 500,000$ at any time during the calendar quarter.
3. Establish a floor of $\$ 200,000$ for credit outstanding during any 6 -month period for deregistration of a lender. Under the present rule deregistration may occur only when no credit is outstanding.

These provisions will cut in half the approximately 700 lenders registered under Regulation G
and will cut the annual reporting burden from 2,800 reports to 350 reports.

Revisions will be made to Forms G-1 (Registration Statement), G-2 (Deregistration Statement), and G-4 (Quarterly Report) to reflect the new amendments.

## BOARD STATEMENT: Ceiling Rate on IRA's

The Board of Governors has said that it will give further consideration early next year to the question of whether commercial banks should be permitted to pay the same ceiling rate of interest on individual retirement accounts as do thrift institutions.
Further consideration of possible action to permit member banks to offer IRA's on a fully competitive basis with thrift institutions will be appropriate in early 1977 when the Congress is considering an extension of interest rate ceilings for financial institutions, the Board added.
There is some evidence, as yet inconclusive, indicating that member banks may be at a competitive disadvantage in competing with thrift institutions for IRA deposits, the Board said. Savings institutions generally may pay rates of interest on such deposits $1 / 4$ of a per cent higher than commercial banks. The Board will continue to monitor the growth of IRA accounts at all financial institutions.
The Board indicated that under the provisions of Public Law 94-200, passed in December 1975, any action by the Board to eliminate or reduce an interest rate differential for any category of deposit that was in effect on December 10, 1975, would require approval by the Congress before it could become effective.
Individual retirement accounts are retirement savings deposits that may be established under the Employee Retirement Income Security Act of 1974 by individuals not covered by an employer retirement plan.

## PROPOSED AMENDMENTS AND INTERPRETATION

The Board of Governors has announced that it would consider possible adoption of providing management consulting advice to certain types of nonaffiliated financial institutions as an activity permissible for bank holding companies (Regulation Y-Bank Holding Companies). The Board will receive comment on the proposed amendments and on a related application, through September 8, 1976.

The Board has also proposed an interpretation of its Regulation $Z$ (Truth in Lending) to state that when a dealer and a creditor share in the interest on a consumer credit contract such participation
need not be separately stated in disclosures given to the consumer. The Board requested comment by September 27, 1976.

## SYSTEM MEMBERSHIP: Admission of State Bank

The following bank was admitted to membership in the Federal Reserve System during the period July 16, 1976, through August 15, 1976:

## California

San Francisco ................. Pacific Securities Depository Trust Company

## Industrial Production

## Released for publication August 13

Industrial production increased by an estimated 0.2 per cent in July following rises of 0.4 in June and 0.9 in May. Most major sectors of production showed little change or small increases last month. Over-all activity was also dampened somewhat in July by increased strike activity, notably in coal mining. At 130.4 per cent of the 1967 average, the index is now almost 17 per cent above the March 1975 trough.

Output of consumer goods was apparently unchanged in July. After allowance for model changeover, auto assemblies edged off slightly from June; production schedules that are currently available indicate little change for the remainder of the third quarter. Production of other consumer durable goods was almost unchanged, as small rises in furniture, carpeting, and miscellaneous goods were offset by a decline in appliance production. After a substantial rise early this year, output of business equipment has shown only modest increases in recent months, rising by 0.3 per cent in both June and July. Production of construction supplies rose 0.4 per cent in July.

Output of nondurable goods materials, which had rebounded strongly in the early part of the

Note.-Historical industrial production data on the newly revised basis is expected to be available by mid-September.
recovery, has recently been sluggish. However, production of durable goods materials continued to advance strongly in July to a level approximately 25 per cent above the low in the second quarter of 1975 but still 6 per cent below the pre-recession high. The materials capacity utilization rate was 81 per cent in July, 13 per cent below the 1973 peak.

F.R. indexes, seasonally adjusted. Latest figures: July.

* Auto sales and stocks include imports.

A82 INDEX TO STATISTICAL TABLES

[^62][^63]
with voluntary participation by nonmember institutions in the F.R. System's program of credit restraint.
As of Dec. 12, 1974, the amount of voluntary nonmember bank and foreign-agency and branch deposits at F.R. Banks that are associated with marginal reserves are no longer reported. However, two amounts are reported: (1) deposits voluntarily held as reserves by agencies and branches of foreign banks operating in the United States; and (2) Euro-dollar of foreign
${ }_{5}{ }^{\text {a }}$ Part allowed as reserves Dec. 1, 1959-Nov. 23, 1960; all allowed thereafter. Beginning Jan. 1963, figures are estimated except weekly averages. Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date.
${ }^{6}$ Beginning with week ending Nov. 15, 1972, includes $\$ 450$ million of
reserve deficiencies on which F.R. Banks were allowed to waive penalties for transition period associated with bank adaptation to Regulation J, as amended effective Nov. 9, 1972. For 1973, allowable deficiencies included are (beginning with first statement week of quarter): Q1, $\$ 279$ million; Q2, \$172 million; Q3, \$1 12 million; Q4, \$84 million. For 1974 , Q1, $\$ 67$ million, Q2, $\$ 58$ million. Transition period ended after 1974 , Q2,
Beginning with week ending Nov. 19, 1975, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy, effective Nov. 19, 1975, of permitting transitional relief on a graduated basis over a 24 -month period when a nonmember bank merges into an existing member bank, or when a nonmember bank joins the Federal Reserve System.

[^64]existing member bank, or when a nonmember bank joins the Federal Reserve System.
${ }^{2}$ Beginning Nov. 9, 1972, designation of banks as reserve city banks for reserve-requirement purposes has been based on size of bank (net demand deposits of more than $\$ 400$ million), as described in the Bulletin for July 1972, p. 626. Categories shown here as "Large" and "All other" parallel the previous "Reserve city" and "Country" categories, respectively (hence the series are continuous over time).

Note.-Monthly and weekly data are averages of daily figures within the month or week, respectively.
Borrowings at F. R. Banks: Based on closing figures.
Effective Apr. 19, 1973, the Board's Regulation A, which governs lending by F.R. Banks, was revised to assist smaller member banks to meet the seasonal borrowing needs of their communities.

## BASIC RESERVE POSITION, AND FEDERAL FUNDS AND RELATED TRANSACTIONS

(In millions of dollars, except as noted)

[^65]banks, repurchase agreements (purchases of securities from dealers subject to resale), or other lending arrangements.

4 Federal funds borrowed, net funds acquired from each dealer by clearing banks, reverse repurchase agreements (sales of securities to dealers subject to repurchase), resale agreements, and borrowings secured by Govt. or other issues.
Note.-Weekly averages of daily figures. For description of series and back data, see Aug. 1964 Bulletin, pp. 944-74. Revised data for Jan. 1976 may be obtained from the Public Information Office, Office of the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

1 When two dates are shown, the first applies to the change at reserve city banks and the second to the change at country banks. For changes prior to 1963 see Board's Annual Reports.
2 (a) Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.
(b) Requirement schedules are graduated, and each deposit interval applies to that part of the deposits of each bank.
(c) Since Oct. 16, 1969, member banks have been required under Regulation $M$ to maintain reserves against foreign branch deposits computed on the basis of net balances due from domestic offices to their foreign branches and against foreign branch loans to U.S. residents. Since June 21, 1973 loans aggregating $\$ 100,000$ or less to any U.S. resident have been excluded from computations, as have total loans of a bank to U.S. residents if not exceeding $\$ 1$ million. Regulation $D$ imposes a similar U.S. residents if not exceeding $\$ 1$ million. Regulation $D$ imposes a similar reserve requirement on borrowings from foreign banks by domestic offices
of a member bank. The reserve percentage applicable to each of these of a member bank. The reserve percentage applicable to each of these
classifications is 4 per cent. The requirement was 10 per cent originally, classifications is 4 per cent. The requirement was 10 per cent originally,
was increased to 20 per cent on Jan. 7,1971 , was reduced to 8 per cent was increased to 20 per cent on Jan. 7,1971 , was reduced to 8 per cent
effective June 21,1973 , and was reduced to the current 4 per cent effective effective June 21, 1973, and was reduced to the current 4 per cent effective
May 22,1975 . Initially certain base amounts were exempted in the computation of the requirements, but effective Mar. 14, 1974, the last of these reserve-free bases were eliminated. For details, see Regulations $D$ and $M$.
${ }^{3}$ Effective Jan. 5, 1967, time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits. Beginning Nov. 10,1975 , profitmaking businesses may maintain savings deposits of $\$ 150,000$ or less at member banks. For details of 1975 action, deposits of $\$ 150,000$ or less at member banks. For details of 1975 action,
see Regulations $D$ and Q, and also Bulletins for Oct. 1975, p. 708, and see Regulations $D$
Nov. 1975 , p. 769.
Nov. 1975 , p. 769 . (c) above are also relevant to time deposits.
4 Effective Nov. 9, 1972, a new criterion was adopted to designate reserve cities, and on the same date requirements for reserves against net demand deposits of member banks were restructured to provide that each
member bank will maintain reserves related to the size of its net demand deposits. The new reserve city designations are as follows: A bank having net demand deposits of more than $\$ 400$ million is considered to have the character of business of a reserve city bank, and the presence of the head office of such a bank constitutes designation of that place as a reserve city. Cities in which there are F.R. Banks or branches are also reserve cities. Any banks having net demand deposits of $\$ 400$ million or less are considered to have the character of business of banks outside of reserve cities and are permitted to maintain reserves at ratios set for banks not in reserve cities. For details, see Regulation $D$ and appropriate supplements and amendments.

5 A marginal reserve requirement was in effect between June 21, 1973, and Dec. 11, 1974, against increases in the aggregate of the following types of obligations: (a) outstanding time deposits of $\$ 100,000$ or more, (b) of obligations: (a) outstanding time deposits of $\$ 100,000$ or more, (b) outstanding funds obtained by the bank through issuance by a bank's affiliate of obligations subject to existing reserve requirements on time
deposits, and (c) beginning July 12,1973 , funds from sales of finance bills. deposits, and (c) beginning July 12, 1973 , funds from sales of finance bills.
The requirement applied to balances above a specified base, but was not The requirement applied to balances above a specified base, but was not
applicable to banks having obligations of these types aggregating less than $\$ 10$ million. For details, including percentages and maturity classifications, see "Announcements" in Bulletins for May, July, Sept., and Dec. 1973 and Sept. and Nov. 1974.

6 The $161 / 2$ per cent requirement applied for one week, only to former reserve city banks. For other banks, the 13 per cent requirement was continued in this deposit interval.

7 See columns above for earliest effective date of this rate.
${ }^{8}$ The average of reserves on savings and other time deposits must be at least 3 per cent, the minimum specified by law. For details, see Regulation $D$.

NotE.-Required reserves must be held in the form of deposits with F.R. Banks or vault cash.

1 For exceptions with respect to certain foreign time deposits, see Bulletin for Feb. 1968, p. 167.
2 Multiple-maturity time deposits include deposits that are automatically renewable at maturity without action by the depositor and deposits that are payable after written notice of withdrawal.
${ }^{3}$ Maximum rates on all single-maturity time deposits in denominations of $\$ 100,000$ or more have been suspended. Rates that were effective Jan. 21, 1970, and the dates when they were suspended are:

$61 / 4$ per cent
$61 / 2$ per cent
$63 / 4$ per cent
${ }^{63 / 4}$ per cent
$71 / 2$ per cent

June 24, 1970

Rates on multiple-maturity time deposits in denominations of $\$ 100,000$ or more were suspended July 16,1973 , when the distinction between single- and multiple-maturing deposits was eliminated
4 Effective Dec. 4, 1975, the $\$ 1,000$ minimum denomination does not apply to time deposits representing funds contributed to an Individua Retirement Account established pursuant to 26 U.S.C. (I.R.C. 1954) §408.

5 Between July 1 and Oct. 31, 1973, there was no ceiling for certificates maturing in 4 years or more with minimum denominations of $\$ 1,000$ The amount of such certificates that a bank could issue was limited to

5 per cent of its total time and savings deposits. Sales in excess of that amount were subject to the $61 / 2$ per cent ceiling that applies to time deposits maturing in $21 / 2$ years or more.
Effective Nov. 1, 1973, a ceiling rate of $71 / 4$ per cent was imposed on certificates maturing in 4 years or more with minimum denominations of $\$ 1,000$. There is no limitation on the amount of these certificates that banks may issue.

6 Prior to Nov. 27, 1974, no distinction was made between the time deposits of governmental units and of other holders, insofar as Regulation Q ceilings on rates payable were concerned. Effective Nov. 27, 1974 governmental units were permitted to hold savings deposits and could receive interest rates on time deposits with denominations under $\$ 100,000$ irrespective of maturity, as high as the maximum rate permitted on such deposits at any Federally insured depositary institution.

Note.-Maximum rates that may be paid by member banks are established by the Board of Governors under provisions of Regulation Q; however, a member bank may not pay a rate in excess of the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Beginning Feb. 1, 1936, maximum rates that may be paid by nonmember insured commercial banks, as established by the FDIC, have been the same as those in effect for member banks.
For previous changes, see earlier issues of the Bulletin.

MARGIN REQUIREMENTS
(Per cent of market value)

[^66]TRANSACTIONS OF THE SYSTEM OPEN MARKET ACCOUNT
(In millions of dollars)

${ }^{1}$ Before Nov. 1973 Bulletin, included matched sale-purchase transactions, which are now shown separately.
2 Includes special certificates acquired when the Treasury borrows directly from the Federal Reserve, as follows (millions of dollars): June 1971,955; Sept. 1972, 38; Aug. 1973, 351; Sept. 1973, 836; Nov. 1974, 131; Mar. 1975, 1,560; Aug. 1975, 1,989.
${ }^{3}$ Net change in U.S. Govt. securities, Federal agency obligations, and bankers acceptances.

Note.-Sales, redemptions, and negative figures reduce System holdings; all other figures increase such holdings. Details may not add to totals because of rounding.

Note.-Composition of the money stock measures is as follows:
$M_{1}$ : Averages of daily figures for (1) demand deposits of commercial banks other than domestic interbank and U.S. Govt., less cash items in process of collection and F.R. float; (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, F.R. Banks, and vaults of Banks; and (3) cur
$M_{2}$ : Averages of daily figures for $M_{1}$ plus savings deposits, time deposits open account, and time certificates of deposit other than negotiable CD's of $\$ 100,000$ of large weekly reporting banks.
$M_{3}: M_{2}$ plus the average of the beginning and end-of-month deposits
of mutual savings banks, savings and loan shares, and credit union shares (nonbank thrift).
$M_{4}: M_{2}$ plus large negotiable CD's.
$M_{5}: M_{3}$ plus large negotiable CD's.
For a description of the latest revisions in $M_{1}, M_{2}, M_{3}, M_{4}$, and $M_{5}$, see "Revision of Money Stock Measures" on pp. 82-87 of the Feb. 1976 Bulletin. Beginning Oct. 1975, money stock measures and related data have been revised to incorporate benchmark data from the Dec. 31, 1975, call report.
Latest monthly and weekly figures are available from the Board's H. 6 release. Back data are available from the Banking Section, Division of Research and Statistics.

${ }^{1}$ Averages of daily figures. Member bank reserve series reflect actual reserve requirement percentages with no adjustment to eliminate the effect of changes in Regulations D and M. There are breaks in series because of changes in reserve requirements effective Dec. 12, 1974, Feb. 13, May 22, and Oct. 30, 1975, and Jan. 8, 1976. In addition, effective Jan. 1, 1976, statewide branching in New York was instituted. The subsequent merger of a number of banks raised required reserves because of higher reserve requirements on aggregate deposits at these banks.
2 Reserves available to support private nonbank deposits are defined as (1) required reserves for (a) private demand deposits, (b) total time and savings deposits, and (c) nondeposit sources subject to reserve requirements, and (2) excess reserves. This series excludes required reserves for net interbank and U.S. Govt. demand deposits.

#### Abstract

${ }^{3}$ Averages of daily figures. Deposits subject to reserve requirements include total time and savings deposits and net demand deposits as defined by Regulation D. Private demand deposits include all demand deposits except those due to the U.S. Govt., less cash items in process of collection and demand balances due from domestic commercial banks.

4 "Total member bank deposits" subject to reserve requirements, plus Euro-dollar borrowings, loans sold to bank-related institutions, and certain other nondeposit items. This series for deposits is referred to as "the adjusted bank credit proxy." NOTE.- Back data and estimates of the impact of required reserve changes may be obtained from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

${ }^{1}$ Adjusted to exclude domestic commercial interbank loans
${ }^{2}$ Loans sold are those sold outright to banks' own foreign branches, nonconsolidated nonbank affiliates of the bank, the banks' holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company. Prior to Aug. 28, 1974, the institutions included had been defined somewhat differently, and the reporting panel of banks was also different. On the new basis, both "Total loans" and "Commercial and industrial loans" were reduced by about $\$ 100$ million.
${ }^{3}$ Reclassification of loans at one large bank reduced these loans by about $\$ 400$ million as of June 30,1972 and by about $\$ 1.2$ billion as of March 31, 1976

4 Farmers Home Administration insured notes included in "Other securities" rather than in loans beginning June 30, 1971, when such notes totaled about $\$ 700$ million
${ }^{5}$ Data beginning June 30, 1974, include one large mutual savings bank that merged with a nonmember commercial bank. As of that date there were increases of about $\$ 500$ million in loans, $\$ 100$ million in "Other securities," and $\$ 600$ million in "Total loans and investments."

As of Oct. 31, 1974, "Total loans and investments" of all commercial banks were reduced by $\$ 1.5$ billion in connection with the Iiquidation of one large bank. Reductions in other items were: "Total loans," $\$ 1.0$ billion (of which $\$ 0.6$ billion was in "Commercial and industrial loans"), and "Other securities," $\$ 0.5$ billion. In late November "Commercial and industrial loans" were increased by $\$ 0.1$ billion as a result of loan reclassifications at another large bank.

Note.-Total loans and investments: Back data for 1959-75 available from Banking Section, Division of Research and Statistics; for 1948-58, See. Aug. 1968 Bulletin, pp. A-94-A-97. For description of seasonally adjusted series for total loans and investments, see Dec. 1971 BuLLEmN, pp. 971-73 and for commercial and industrial loans, see July 1972 BuL LETIN, p. 683. Data are for last Wed. of month except for June 30 and Dec. 31 ; data are partly or wholly estimated except when June 30 and Dec. 31 are call dates.

1 Loans to farmers directly guaranteed by CCC were reclassified as securities and Export-Import Bank portfolio fund participations were reclassified from loans to securities effective June 30, 1966. This reduced "Total loans" and increased "Other securities" by about $\$ 1$ billion. "Total loans" include Federal funds sold, and beginning with June 1967 securities purchased under resale agreements, figures for which are insecurities purchased under resale agreements, figur
cluded in "Federal funds sold, etc." on p. A-16.
Effective June 30, 1971, Farmers Home Administration notes were classified as "Other securities" rather than "Loans." As a result of this change, approximately $\$ 300$ million was transferred to "Other securities" for the period ending June 30, 1971, for all commercial banks.

Effective Mar. 31, 1976, includes "reserves for loan losses" and "unearned income on loans.'
See also table (and notes) at the bottom of p. A-24.
${ }^{2}$ See first 2 paragraphs of note 1.
3 Reciprocal balances excluded beginning with 1942.
4 Includes items not shown separately. See also note 1.
Effective Mar. 31, 1976, "reserves for loan losses"" and unearned income on loans," which for all commercial banks are estimated to be approximately $\$ 14.5$ billion, have been netted against "other assets" and "other liabilities" and, therefore, against "total assets/liabilities."
${ }_{6}^{5}$ See third paragraph of note 1 above.
${ }^{6}$ Effective Mar. 31, 1976, includes "reserves for securities" and a portion of "reserves for loan losses."
${ }^{7}$ For the last-Wednesday-of-the-month series, figures for call dates are shown for June and December as soon as they became available.
${ }^{8}$ Beginning with Dec. 31, 1947, the series was revised; for description, see note 4, p. 587, May 1964 Bulletin.
${ }^{9}$ Figure takes into account the following changes, which became effective June 30, 1969 ; (1) inclusion of consolidated reports (including
figures for all bank-premises subsidiaries and other significant majorityowned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis-that is, before deduction of valuation reserves-rather than net as previously reported.

10 See last paragraph of note 1 , second paragraph of note 4, and note 6 .

Note.-Data are for all commercial banks in the United States (including Alaska and Hawaii, beginning with 1959). Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; nondeposit trust companies; and U.S. branches of foreign banks.

Figures for member banks before 1970 include mutual savings banks as follows: 3 before Jan. 1960 and 2 through Dec. 1960. Those banks are not included in insured commercial banks.

Effective June 30, 1969, commercial banks and member banks exclude a small national bank in the Virgin Islands; also, member banks exclude, and noninsured commercial banks include, through June 30, 1970, a small member bank engaged exclusively in trust business; beginning 1973, exclude 1 national bank in Puerto Rico
Beginning Dec. 31, 1973, June 30, 1974, and Dec. 31, 1974, June 30, 1975, respectively, member banks exclude and noninsured nonmember banks include 1,2,3, and 4 noninsured trust companies that are member of the Federal Reserve System.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and by mergers etc.

For revisions in series before June 30, 1947, see July 1947 Bulletin, pp. 870-71.
(Assets and liabilities are shown in millions of dollars.)

${ }^{1}$ Member banks exclude and nonmember banks include 4 noninsured trust companies that are members of the Federal Reserve System, and member banks exclude 2 national banks outside the continental United States.
${ }^{2}$ See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. 24.
${ }^{3}$ Demand deposits adjusted are demand deposits other than domestic commercial interbank and U.S. Govt., less cash items reported as in process of collection.

NoTE,-Data include consolidated reports, including figures for all bank-premises subsidiaries and other significant majority-owned domestic bank-premises subsidiaries and other significant majority-owned domestic
subsidiaries. Figures for total loans and for individual categories of securities are reported on a gross basis-that is, before deduction of valuation reserves.
Back data in lesser detail were shown in previous Bulletins. Beginning with the fall Call Report, data for future spring and fall Call Reports will be available from the Data Production Section of the Division of Data Processing.

Details may not add to totals because of rounding.

A Effective with changes in New York State branch banking laws, beginning Jan. 1, 1976, three large New York City banks are now reporting combined totals for previously affiliated banks that have been converted to branches.
The principal effects of these changes were to increase the reported data for New York City (total assets, by about $\$ 5.5$ billion) and to decrease the
reported data for "Outside New York City" (total assets, by about $\$ 4.0$ billion).

Historical data (from Jan. 1972) on a basis comparable with 1976 data are available from the Public Information Department of the Federal Reserve Bank of New York on request.

For other notes see p. A-22.

Beginning Nov. 9, 1972, designation of banks as reserve city banks for reserve-requirement purposes has been based on size of bank (net demand reserve-requirement purposes has been based on size of bank (net demand
deposits of more than $\$ 400$ million), as described in the BuLLETIN for deposits of more than $\$ 400$ million), as described in the BuLETIN for
July 1972, p. 626. Categories shown here as "Other large" and "All other member"' parallel the previous "Reserve City" (other than in New York City and the City of Chicago) and "Country" categories, respectively (hence the series are continuous over time).

Note. - Hypothecated deposits, as shown in this table, are treated one way in monthly and weekly series for commercial banks and in another way in monthly and weekly series for commercial banks and in another, way in call-date series. That is, they are excluded from "Time deposits" and "Loans" in the monthly (and year-end) series as shown on p. A-14;
from the figures for weekly reporting banks as shown on pp. A-18-A-22 from the figures for weekly reporting banks as shown on pp. A-18-A-22
(consumer instalment loans); and from the figures in the table at the (consumer instalment loans); and from the figures in the table at the
bottom of $p$. A-13. But they are included in the figures for "Time deposits" and "Loans"' for call dates as shown on pp. A-14-A-17.

${ }^{1}$ Averages of the most representative daily offering rate quoted by dealers.
2 Averages of the most representative daily offering rate published by finance companies, for varying maturities in the 90-179 day range.
${ }^{3}$ ance companies, for varying maturities in the $90-179$ day range. ${ }^{3}$ Beginning Aug. 15, 1974, the rate is the average of the midpoint of data are averages of the most representative daily offering rate quoted by dealers.

4 Seven-day averages of daily effective rates for week ending Wednesday. Since July 19, 1973, the daily effective Federal funds rate is an average of the rates on a given day weighted by the volume of transactions at these
rates. Prior to this date, the daily effective rate was the rate considered most representative of the day's transactions, usually the one at which most representative of the
most transactions occurred.
Except for new bill issues, yields are averages computed from daily closing bid prices.
${ }_{7}^{6}$ Bills quoted on bank-discount-rate basis.
7 Selected note and bond issues.

Note.-Figures for Treasury bills are the revised series described on $p$. A- 35 of the Oct. 1972 Bulletin.

1 Includes bonds rated $A$ and $A$, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat. As of Dec of corporate bonds in some groups has varied somewhat.
23,1967 , there is no longer an Aaa-rated railroad bond series.
2 Number of issues varies over time; figures shown reflect most recent count.

Note.-Annual yields are averages of weekly, monthly, or quarterly data.

Bonds: Monthly and weekly yields are computed as follows: (1) U.S Govt., averages of daily figures for bonds maturing or callable in 10 years or more; from Federal Reserve Bank of New York. (2) State and local
govt., general obligations only, based on Thurs. figures, from Moody's Investors Service. (3) Corporate, rates for "New issue" and "Recently offered" Aaa utility bonds, weekly averages compiled by the Board of Governors of the Federal Reserve System; and rates for seasoned issues, averages of daily figures from Moody's Investors Service.

Stocks: Standard and Poor's corporate series. Dividend/price ratios are based on Wed. figures. Earnings/price ratios as of end of period. Preferred stock ratio based on 8 median yields for a sample of noncallable issues- 12 industrial and 2 public utility. Common stock ratios on the 500 stocks in the price index. Quarterly earnings are seasonally adjusted at annual rates

## NOTES TO TABLES ON OPPOSITE PAGE:

## Security Prices:

1 Standard and Poor's corporate series. Effective July 1976, Standard and Poor added a new financial group, including banks and insurance companies, to the index. Stocks in this revised group are 400 industrials (formerly 425 ), 20 transportation (formerly 15 rail), 40 public utility (formerly 60 ), and 40 financial.

NoTE.-Annual data are averages of daily or weekly figures. Monthly and weekly data are averages of daily figures unless otherwise noted and are computed as follows: U.S. Govt. bonds, derived from average market yields in table on p. A-28 on basis of an assumed 3 per cent, 20 -year bond. Municipal and corporate bonds, derived from average yields as computed by Standard and Poor's Corp., on basis of a 4 per cent, 20 year bond; Wed. closing prices. Common stocks, derived from component common stock prices. Average daily volume of trading, presently conducted 5 days per week for 6 hours per day.

## Stock Market Customer Financing:

${ }^{1}$ Margin credit includes all credit extended to purchase or carry stocks or related equity instruments and secured at least in part by stock (Dec. 1970 Bulletin, p. 920 ). Credit extended by brokers is end-of-month data for member firms of the New York Stock Exchange. June data for banks are universe totals; all other data for banks represent estimates for all are universe totals; all other data for banks represent estimates for all counted for 60 per cent of security credit outstanding at banks on June 30 , 1971.

2 In addition to assigning a current loan value to margin stock generally, Regulations $T$ and $U$ permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.
${ }^{3}$ Nonmargin stocks are those not listed on a national securities exchange and not included on the Federal Reserve System's list of over the counter margin stocks. At banks, loans to purchase or carry nonmargin stocks are unregulated; at brokers, such stocks have no loan value.
4 Free credit balances are in accounts with no unfulfiled commitments to the brokers and are subject to withdrawal by customers on demand.

${ }^{1}$ Excludes stock of the Federal Home Loan Bank Board. Compensating changes have been made in "Other" assets.
2 Includes net undistributed income, which is accrued by most, but not all, associations.

3 Advances from FHLBB and other borrowing.
4 Data comparable with those shown for mutual savings banks (on opposite page) except that figures for loans in process are not included above but are included in the figures for mutual savings banks.
${ }^{5}$ Beginning 1973, participation certificates guaranteed by the Federal Home Loan Mortgage Corporation, loans and notes insured by the Farmers Home Administration, and certain other Govt.-insured mortgagetype investments, previously included in mortgage loans, are included
in other assets. The effect of this change was to reduce the mortgage total by about $\$ 0.6$ billion.

Also, GNMA-guaranteed, mortgage-backed securities of the passthrough type, previously included in "Cash" and "Investment securities" are included in "Other" assets. These amounted to about $\$ 2.4$ billion at the end of 1972.

Note.-FHLBB data; figures are estimates for all savings and loan assns. in the United States. Data are based on monthly reports of insured assns. and annual reports of noninsured assns. Data for current and preceding year are preliminary even when revised.

FEDERAL FISCAL OPERATIONS: SUMMARY
(In millions of dollars)

[^73]taries" (deposits in certain commercial depositaries that have been converted from a time to a demand basis to permit greater flexibility in Treasury cash management).

4 Includes debt of Federal home loan banks, Federal land banks, R.F.K. Stadium Fund, FNMA (beginning Sept. 1968), and Federal intermediate credit banks and banks for cooperatives (both beginning Dec. 1968).
5 Beginning July 1974, public debt securities excludes $\$ 825$ million of notes issued to International Monetary Fund to conform with Office of Management and Budget's presentation of the budget.

Note.-Half years may not add to fiscal year totals due to revisions in series that are not yet available on a monthly basis.

FEDERAL FISCAL OPERATIONS: DETAIL
(In millions of dollars)

${ }^{1}$ Old-age, disability, and hospital insurance, and Railroad Retirement accounts.

2 Supplementary medical insurance premiums and Federal employee retirement contributions

3 Deposits of earnings by F. R. Banks and other miscellaneous receipts. 4 Consists of interest received by trust funds, rents and royalties on the Outer Continental Shelf, and Govt. contributions for employee retirement. 5 Estimates presented in Mid-session Review of the 1977 Budget, July 16, 1976. Figures for outlay categories exclude special allowances for
civilian agency pay raises totaling $\$ 800$ million for fiscal year 1977 , and therefore do not add to totals.

6 Effective in calendar year 1976, the fiscal year for the U.S. Govt. is being changed from July 1-June 30 to Oct. 1-Sept. 30. The period July 1Sept. 30 of 1976 , data for which are shown separately from fiscal year 1976 and fiscal year 1977 totals, will be a transition quarter.

Note.-Half years may not add to fiscal year totals due to revisions in series that are not yet available on a monthly basis.

${ }^{1}$ Includes non-interest-bearing debt (of which $\$ 613$ million on July 31 , 1976, was not subject to statutory debt limitation).
${ }^{2}$ Includes Treasury bonds and minor amounts of Panama Canal and postal savings bonds.
${ }_{3}$ Includes (not shown separately): depositary bonds, retirement plan bonds, Rural Electrification Administration bonds, State and local government bonds, and Treasury deposit funds.

4 Nonmarketable certificates of indebtedness, notes, and bonds in the Treasury foreign series and foreign-currency-series issues.
${ }^{5}$ Held only by U.S. Govt. agencies and trust funds and the Federal home loan banks.

Note.-Based on Monthly Statement of the Public Debt of the United States, published by U.S. Treasury. See also second paragraph in Note to table below.

${ }^{1}$ Consists of investments of foreign and international accounts in the United States.
${ }^{2}$ Consists of savings and loan assns., nonprofit institutions, corporate pensions trust funds, and dealers and brokers. Also included are certain Govt. deposit accounts and Govt.-sponsored agencies.
Note.-Reported data for F.R. Banks and U.S. Govt. agencies and trust funds; Treasury estimates for other groups.

The debt and ownership concepts were altered beginning with the Mar. 1969 Bulletin. The new concepts (1) exclude guaranteed securities and (2) remove from U.S. Govt. agencies and trust funds and add to other miscellaneous investors the holdings of certain Govt.-sponsored but privately owned agencies and certain Govt. deposit accounts. Beginning in July 1974, total gross public debt includes Federal Financing Bank bills and excludes notes issued to the IMF (\$825 million).

## OWNERSHIP OF MARKETABLE SECURITIES, BY MATURITY

[^74]banks, and 729 insurance companies combined, each about 90 per cent; (2) 452 nonfinancial corporations and 486 savings and loan assns., each about 50 per cent; and (3) 501 State and local govts., about 40 per cent. "All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

DAILY-AVERAGE DEALER TRANSACTIONS
(Par value, in millions of dollars)

${ }^{1}$ Since Jan. 1972 has included transactions of dealers and brokers in securities other than U.S. Govt.
Note.-The transactions data combine market purchases and sales of U.S. Govt. securities dealers reporting to the F.R. Bank of New York.

Note.-The figures include all securities sold by dealers under repurchase contracts regardless of the maturity date of the contract, unless the contract is matched by a reverse repurchase (resale) agreement or delayed delivery sale with the same maturity and involving the same amount of securities. Included in the repurchase contracts are some that more clearly represent investments by the holders of the securities rather than dealer trading positions.
Average of daily figures based on number of trading days in the period.

They do not include allotments of, and exchanges for, new U.S. Govt. securities, redemptions of called or matured securities, or purchases or sales of securities under repurchase agreement, reverse repurchase (resale), or similar contracts. Averages of daily figures based on the number of trading days in the period.

1 Gross proceeds are derived by multiplying principal amounts or number of units by offering price.

2 Includes guaranteed issues.
3 Issues not guaranteed.
4 See Note to table at bottom of preceding page.

5 Foreign governments and their instrumentalities, International Bank for Reconstruction and Development, and domestic nonprofit organizations.

Note,-Securities and Exchange Commission estimates of new issues maturing in more than 1 year sold for cash in the United States.

NET CHANGE IN OUTSTANDING CORPORATE SECURITIES
(In millions of dollars)

${ }_{1}$ Excludes investment companies.
${ }^{2}$ Extractive and commercial and miscellaneous companies.
${ }^{3}$ Railroad and other transportation companies.
Note.-Securities and Exchange Commission estimates of cash transactions only. As contrasted with data shown on preceding page, new issues
exclude foreign sales and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements are defined in the same way and also include securities retired with internal funds or with proceeds of issues for that purpose.

## OPEN-END INVESTMENT COMPANIES

- Historical data covering revisions for the textile, apparel, and leather industry, as well as total nondurables and all manufacturing, are available upon request from the Capital Markets Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.
i'Profits after taxes unadjusted are as reported by the individual companies. These data are not adjusted to eliminate differences in accounting treatments of special charges, credits, and other nonoperating items.
2 Includes 21 corporations in groups not shown separately.
${ }^{2}$ Includes 25 corporations in groups not shown separately.

Note-Data are obtained from published reports of companies and reports made to the Securities and Exchange Commission. Sales are net of returns, allowances, and discounts, and exclude excise taxes paid directly by the company. Total revenue data include, in addition to sales, income from nonmanufacturing operations and nonoperating income Profits are before dividend payments and have been adjusted to exclude special charges and credits to surplus reserves and extraordinary items not related primarily to the current reporting period. Income taxes (not shown) include Federal, State and local government, and foreign.

Previous series last published in June 1972 Bulletin, p. A-50.

1 Includes conventional loans not shown separately.
NoTe.-Data from FNMA and FHLMC, respectively.
For FNMA : Holdings include loans used to back bond issues guaranteed by GNMA. Commitments include some multifamily and nonprofit hospital loan commitments in addition to 1- to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMAGNMA Tandem Plans.

For FHLMC: Holdings and transactions cover participations as well as whole loans. Holdings include loans used to back bond issues guranteed by GNMA. Commitments cover the conventional and Govt.-underwritten loan programs.

Note.-American Life Insurance Association data for new commitments of $\$ 100,000$ and over each on mortgages for multifamily and nonresidential nonfarm properties located largely in the United States. The 15 companies account for a little more than one-half of both the total assets and the nonfarm mortgages held by all U.S. life insurance companies. Averages, nonfarm mortgages held by all U.S. life insurance companies. Averages, by type and location of property, type and purpose of loan, and loan amortization and prepayment terms. Data for the following are limited
to cases where information was available or estimates could be made: capitalization rate (net stabilized property earnings divided by property value); debt coverage ratio (net stabilized earnings divided by debt service); and per cent constant (annual level payment, including principal and interest, per $\$ 100$ of debt). All statistics exclude construction loans, increases in existing loans in a company's portfolio, reapprovals, and loans secured by land only.

[^79](as shown in first column of this table) and an assumed prepayment at end of 10 years.

4 Rates on first mortgages, unweighted and rounded to the nearest 5 basis points.

5 Based on opinion reports submitted by field offices of prevailing local conditions as of the first of the succeeding month. Yields are derived from weighted averages of private secondary market prices for Sec. 203, 30 -year mortgages with minimum downpayment and an assumed prepayment at the end of 15 years. Any gaps in data are due to periods of adjustment to changes in maximum permissible contract interest rates.

Note--Rates are reported on an annual percentage rate basis as specified in Regulation Z (Truth in Lending) of the Board of Governors. Commercial bank rates are "most common" rates for direct loans with
specified maturities; finance company rates are weighted averages for purchased contracts (except personal loans). For back figures and description of the data, see Bulletin for Sept. 1973.

1 Data beginning Jan. 1976 are not strictly comparable with prior data because of change by Census Bureau in its procedure for estimating construction outlays of State and local governments. Such governments accounted for 86 per cent of all public construction expenditures in 1974.

2 Includes religious, educational, hospital, institutional, and other buildings.

Note.-Census Bureau data; monthly series at seasonally adjusted annual rates.

## Notes

Line

1. Line 2 of p. A-56.
2. Sum of lines 3-6 or 7-10.
3. Includes farm and commercial mortgages.
4. Credit market funds raised by Federally sponsored credit agencies. Included below in lines 13 and 33. Includes all GNMA-guaranteed security issues backed by mortgage pools.
5. Line 1 less line 2 plus line 11. Also line 19 less line 26 plus line 32. Also sum of lines 27, 32, 39, and 44.
6. Includes farm and commercial mortgages.
7. Lines 39 plus 44.
8. Excludes equity issues and investment company shares. Includes line 18.
9. Foreign deposits at commercial banks, bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign afbranch
10. Demand deposits at commercial banks.
11. Excludes net investment of these reserves in corporate equities.
12. Mainly retained earnings and net miscellaneous liabilities.
13. Line 12 less line 19 plus line 26.

33-37. Lines 13-17 less amounts acquired by private finance. Line 37 includes mortgages.
$39+44$. See line 25.
45. Mainly an offset to line 9.
46. Lines 32 plus 38 or line 12 less line 27 plus line 45.
47. Line 2 /line 1 .
48. Line $19 /$ line 12.
49. Lines 10 plus 28.

## Corporate equities

Lines 1 and 3. Includes issues by financial institutions.

${ }^{1}$ Exports of domestic and foreign merchandise (f.a.s. value basis); excludes Department of Defense shipments under military grant-aid programs.
${ }_{2}$ General imports, which includes imports for immediate consumption plus entries into bonded warehouses. See also note 3 .
${ }_{3}{ }^{3}$ Beginning with 1974 data, imports are reported on an f.a.s. transactions value basis; prior data are reported on a Customs import value
basis. For calendar year 1974, the f.a.s. import transactions value was $\$ 100.3$ billion, about 0.7 per cent less than the corresponding Customs import value of $\$ 10 t .0$ billion.

4 Sum of unadjusted figures.

1 Includes (a) gold sold to the United States by the IMF with the right of repurchase, and (b) gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making on the U.S. gold stock of foreign purchases for the purpose of making
gold subscriptions to the IMF under quota increases. For corresponding gold subscriptions to
liabilities, see Table 5.
${ }_{2}$ Includes gold in Exchange Stabilization Fund.
3 Includes allocations by the IMF of Special Drawing Rights as follows: $\$ 867$ million on Jan. 1, 1970; $\$ 717$ million on Jan. 1, 1971 ; and $\$ 710$ million on Jan. 1, 1972; plus net transactions in SDR's.

4 Includes gain of $\$ 67$ million resulting from revaluation of the German mark in Oct. 1969, of which $\$ 13$ million represents gain on mark holdings at time of revaluation.

5 Includes $\$ 28$ million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of Dec. 31, 1971.
6 Total reserve assets include an increase of $\$ 1,016$ million resulting from change in par value of the U.S. dollar on May 8, 1972; of which,
total gold stock is $\$ 828$ million (Treasury gold stock $\$ 822$ million), reserve position in IMF $\$ 33$ million, and SDR's $\$ 155$ million.
7 Total reserve assets include an increase of $\$ 1,436$ million resulting from change in par value of the U.S. dollar on Oct. 18, 1973; of which, from change in par value of the U.S. dollar on Oct. 18, 1973; of which,
total gold stock is $\$ 1,165$ million (Treas. gold stock $\$ 1,157$ million), total gold stock is $\$ 1,165$ million (Treas. gold stock $\$ 1,157$
reserve position in IMF $\$ 54$ million, and SDR's $\$ 217$ million
${ }^{8}$ Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974. At valuation used prior to July 1974 (SDR $1=\$ 1.20635$ ) SDR holdings at end of July amounted to $\$ 2,435$ million, reserve position in IMF, $\$ 3,583$ million, and total U.S. reserves assets, $\$ 18,480$.
Note.-See Table 20 for gold held under earmark at F.R. Banks for foreign and international accounts. Gold under earmark is not included in the gold stock of the United States.
4. GOLD RESERVES OF CENTRAL BANKS AND GOVERNMENTS
(In millions of dollars; valued at $\$ 35$ per fine ounce through Apr. 1972, at $\$ 38$ from May 1972-Sept. 1973, and at $\$ 42.22$ thereafter)

1 Includes reported or estimated gold holdings of international and inional os this table, and also of a number not shown separately here, and gold to be distributed by the Tripartite Commission for the Restitution of Monetary distributed by the Tripartite Commission for the Restitution of Monetary
Gold; excludes holdings of the U.S.S.R., other Eastern European countries, and People's Republic of China.
The figures included for the Bank for International Settlements are
the Bank's gold assets net of gold deposit liabilities. This procedure avoids the overstatement of total world gold reserves since most of the gold deposited with the BIS is included in the gold reserves of individual countries.
${ }_{2}$ Net gold assets of BIS, i.e., gold assets minus gold deposit liabilities. ${ }^{3}$ Reflects South African Reserve Bank sale of gold spot and repurchase forward.

${ }^{1}$ Includes (a) liability on gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the IMF under quota increases, and (b) U.S. Treasury obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the IMF to the United States to acquire income-earning assets.
${ }^{2}$ Includes Bank for International Settlements; also includes European Fund through Dec. 1972.
${ }^{3}$ Derived by applying reported transactions to benchmark data.
4 Excludes notes issued to foreign official nonreserve agencies.
5 Includes long-term liabilities reported by banks in the United States and debt securities of U.S. Federally sponsored agencies and U.S. corporations.

6 Includes short-term liabilities payable in dollars to commercial banks abroad and short-term liabilities payable in foreign currencies to commercial banks abroad and to other foreigners.
7 Includes marketable U.S. Treasury bonds and notes held by commercial banks abroad.
${ }_{8}$ Principally the International Bank for Reconstruction and Development and the Inter-American and Asian Development Banks.
${ }^{9}$ Data on the 2 lines shown for this date differ because of changes in reporting coverage. Figures on first line are comparable with those
shown for the preceding date; figures on second line are comparable with those shown for the following date.

10 Includes $\$ 101$ million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969.

11 Data on the second line differ from those on first line because certain accounts previously classified as official institutions are included with banks; a number of reporting banks are included in the series for the first time; and U.S. Treasury securities payable in foreign currencies issued to official institutions of foreign countries have been increased in issued to official institutions of foreign countries have been
value to reflect market exchange rates as of Dec. 31,1971 .

12 Includes $\$ 162$ million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates, as follows: shortliabilities revalued to reflect market exchange rates, as follows: shortterm liabilities

Note.-Based on Treasury Dept. data and on data reported to the Treasury Dept. by banks and brokers in the United States. Table excludes IMF holdings of dollars, and U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations.

## 6. U.S. LIABILITIES TO OFFICIAL INSTITUTIONS OF FOREIGN COUNTRIES, BY AREA

(Amounts outstanding; in millions of dollars)

${ }^{1}$ Includes Bank for International Settlements; also includes European Fund through 1972.
2 Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.
${ }^{3}$ See note 9 to Table 5.
Note.-Data represent short- and long-term liabilities to the official
institutions of foreign countries, as reported by banks in the United States; oreign official holdings of marketable and nonmarketable U.S. Treasury securities with an original maturity of more than 1 year, except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in debt securities of U.S. Federally sponsored agencies and U.S. corporations.

[^84]with those shown for the preceding date; figures on the second line are comparable with those shown for the following date.
8 Foreign central banks and foreign central govts. and their agencies, Bank for International Settlements, and European Fund through Dec. 1972
${ }^{9}$ Excludes central banks, which are included in "Official institutions."
NoTE.-"Short term" obligations are those payable on demand or having an original maturity of 1 year or less. For data on long-term liabilities reported by banks, see Table 9. Data exclude International Monetary Fund holdings of dollars; these obligations to the IMF constitute contingent liabilities, since they represent essentially the amount of dollars available for drawings from the IMF by other member countries. Data exclude also U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by the Inter-American Development Bank and the International Development Association.

${ }^{1}$ Marketable U.S. Treasury bills, certificates of indebtedness, notes, and bonds and nonmarketable U.S. Treasury securities payable in dollars and in foreign currencies.
2 The value of earmarked gold increased because of the changes in par value of the U.S. dollar in May 1972, and in Oct. 1973.

Note.-Excludes deposits and U.S. Treasury securities held for international and regional organizations. Earmarked gold is gold held for foreign and international accounts and is not included in the gold stock of the United States.

${ }_{1}$ Based on average yield of weekly tenders during month.
2 Based on weekly averages of daily closing rates.
3 Rate shown is on private securities.
4 Rate in effect at end of month.
$s$ Monthly averages based on daily quotations.
Note.-For description and back data, see "International Finance," Section 15 of Supplement to Banking and Monetary Statistics, 1962.

NOTES TO TABLES 19a AND 19b ON PAGES A-70 AND A-71, RESPECTIVELY:

[^89]Note.-Components may not add to totals due to rounding.

For a given month, total assets may not equal total liabilities because some branches do not adjust the parent's equity in the branch to reflect unrealized paper profits and paper losses caused by changes in exchange rates, which are used to convert foreign currency values into equivalent dollar values.

## 26. CENTRAL BANK RATES FOR DISCOUNTS AND ADVANCES TO COMMERCIAL BANKS

(Per cent per annum)

Note.-Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt. securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or adyances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations. Other rates for some of these countries follow:
Argentina-3 and 5 per cent for certain rural and industrial paper, depending on type of transaction;
Brazil- 8 per cent for secured paper and 4 per cent for certain agricultural paper;

Japan-Penalty rates (exceeding the basic rate shown) for borrowings from the central bank in excess of an individual bank's quota;
United Kingdom-The bank's minimum lending rate, which is the average rate of discount for Treasury bills established at the most recent tender plus one-half per cent rounded to the nearest one-quarter per cent above;
Venezuela-2 per cent for rediscounts of certain agricultural paper, 41/2 per cent for advances against government bonds, and $51 / 2$ per cent for rediscounts of certain industrial paper and on advances against promissory notes or securities of first-class Venezuelan companies.

## 27. FOREIGN EXCHANGE RATES

(In cents per unit of foreign currency)

## Index to Statistical Tables

## References are to pages A-2 through A-75 although the prefix " $A$ '" is omitted in this index

ACCEPTANCES, bankers, 9, 25, 27
Agricultural loans of commercial banks, 16, 18
Assets and liabilities (See also Foreigners):
Banks, by classes, 14, 16, 17, 18, 30
Federal Reserve Banks, 10
Nonfinancial corporations, current, 41
Automobiles:
Consumer instalment credit, 45, 46, 47
Production index, 48, 49
BANK credit proxy, 13
Bankers balances, 16, 17, 20
(See also Foreigners)
Banks for cooperatives, 37
Bonds (See also U.S. Govt. securities):
New issues, 37, 38, 39
Yields and prices, 28, 29
Branch banks:
Assets, foreign branches of U.S. banks, 70
Liabilities of U.S. banks to their foreign branches and foreign branches of U.S. banks, 22, 71
Brokerage balances, 69
Business expenditures on new plant and equipment, 41
Business indexes, 50
Business loans (See Commercial and industrial loans)
CAPACITY utilization, 50
Capital accounts:
Banks, by classes, 14, 17, 22
Federal Reserve Banks, 10
Central banks, 60, 75
Certificates of deposit, 22
Commercial and industrial loans:
Commercial banks, 13, 16
Weekly reporting banks, 18, 23
Commercial banks:
Assets and liabilities, 13, 14, 16, 17, 18
Consumer loans held, by type, 45, 46, 47
Deposits at, for payment of personal loans, 24
Loans sold outright, 25
Number, by classes, 14
Real estate mortgages held, by type of holder and property, 42-44
Commercial paper, 23, 25, 27
Condition statements (See Assets and liabilities)
Construction, 50, 51
Consumer instalment credit, 45, 46, 47
Consumer price indexes, 50, 53
Consumption expenditures, 54, 55
Corporations:
Profits, taxes, and dividends, 41
Sales, revenue, profits, and dividends of large manufacturing corporations, 40
Security issues, 38,39
Security yields and prices, 28, 29
Cost of living (See Consumer price indexes)
Currency and coin, 3, 16
Currency in circulation, 3, 12
Customer credit, stock market, 29, 30
DEBITS to deposit accounts, 11
Debt (See specific types of debt or securities)

Demand deposits:
Adjusted, commercial banks, 11, 13, 17
Banks, by classes, 14, 17, 20, 21
Ownership by individuals, partnerships, and corporations, 24
Subject to reserve requirements, 13
Turnover, 11
Deposits (See also specific types of deposits):
Accumulated at commercial banks for payment of personal loans, 24
Banks, by classes, 14, 17, 20, 21, 30
Federal Reserve Banks, 10, 72
Subject to reserve requirements, 13
Discount rates at Federal Reserve Banks (See Interest rates)
Discounts and advances by Reserve Banks (See Loans)
Dividends, corporate, 40, 41
EMPLOYMENT, 50, 52
FARM mortgage loans, 42
Federal agency obligations, 9, 10, 11
Federal finance:
Receipts and outlays, 32, 33
Treasury operating balance, 32
Federal funds, 5, 16, 18, 21, 27
Federal home loan banks, 37
Federal Home Loan Mortgage Corporation, 42, 43
Federal Housing Administration, 42, 43, 44, 45
Federal intermediate credit banks, 37
Federal land banks, 37
Federal National Mortgage Assn., 37, 42, 43
Federal Reserve Banks:
Condition statement, 10
U.S. Govt. securities held, 2, 10, 11, 34, 35

Federal Reserve credit, 2, 4, 10, 11
Federal Reserve notes, 10
Federally sponsored credit agencies, 37
Finance companies:

## GENERAL INFORMATION

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

A heavy vertical rule is used in the following instances: (1) to the right (to the left) of a total when the components shown to the right (left) of it add to that total (totals separated by ordinary rules include more components than those shown), (2) to the right (to the left) of items that are not part of a balance sheet, (3) to the left of memorandum items.
"U.S. Govt. securities" may include guaranteed issues of U.S. Govt. agencies (the flow of funds figures

| N.S.A. | Monthly (or quarterly) figures not adjusted <br> for seasonal variation |
| :--- | :--- |
| IPC | Individuals, partnerships, and corporations |
| SMSA | Standard metropolitan statistical area |
| A | Assets <br> Liabilities |
| L | Siarces of funds |
| S U | Uses of funds |
| $*$ | Amounts insignificant in terms of the partic- <br> ular unit (e.g., less than 500,000 when <br> the unit is millions) |
| $\ldots$ | (1) Zero, (2) no figure to be expected, or <br> (3) figure delayed |
|  |  |

also include not fully guaranteed issues) as well as direct, obligations of the Treasury. "State and local govt." also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.

The footnotes labeled Note (which always appear last) provide (1) the source or sources of data that do not originate in the System; (2) notice when figures are estimates; and (3) information on other characteristics of the data.

## LIST PUBLISHED SEMIANNUALLY, WITH LATEST BULLETIN REFERENCE

[^0]:    The Federal Reserve Bulletin is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. Direction for the art work is provided by Mack R. Rowe. Editorial support is furnished by the Economic Editing Unit headed by Elizabeth B. Sette.

[^1]:    ${ }^{1} M_{1}$ is currency plus private demand deposits adjusted.
    $M_{2}$ is $M_{1}$ plus bank time and savings deposits adjusted other than large CD's.
    $M_{3}$ is $M_{2}$ plus deposits at mutual savings banks and savings and loans and credit union shares.

    ## $M_{4}$ is $M_{2}$ plus large negotiable

    CD's.$M_{5}$ is $M_{3}$ plus large negotiable CD's.
    ${ }^{2}$ Savings and loan associations, mutual savings banks, and credit unions.
    ${ }^{3}$ Total member bank deposits plus funds provided by Euro-dollar borrowings and bank-related commercial paper.

    Note.-Changes are calculated from the average amounts outstanding in each quarter, except where noted. The "end-month-ofquarter" changes are calculated from the average amounts outstanding in the last month of each quarter. Annual rates of change in reserve measures have been adjusted for changes in reserve requirements.

[^2]:    ${ }^{1}$ Includes commercial and other nonresidential as well as farm properties.
    ${ }^{2}$ Quarterly totals, not seasonally adjusted.
    ${ }^{3}$ Less than $\$ 500$ million.
    ${ }^{e}$ Partially estimated.
    ${ }^{r}$ Revised.

[^3]:    Note.-This article was prepared by Anthony W. Cyrnak of the Board's Division of Research and Statistics.

[^4]:    ${ }^{1}$ Average of figures for three call dates-the end of the preceding year and the June 30 and December 31 call dates for the calendar year
    ${ }^{2}$ Includes securities held in trading account.
    ${ }^{3}$ Excludes securities held in trading account.
    ${ }^{4}$ Includes common stock, preferred stock, surplus, undivided profits, and reserves for contingency and other capital reserves.
    ${ }^{5}$ Includes equity capital plus capital notes and debentures.

[^5]:    ${ }^{1}$ Average of loans outstanding for three call datesthe end of the preceding year and the June 30 and December 31 call dates for the calendar year.

[^6]:    ${ }^{2}$ All member banks that do not provide for loan losses on a reserve basis must use their actual net loan losses each year as a minimum "provision for loan losses." Other banks may use this method if they do so on a regular basis.

[^7]:    ${ }^{1}$ See § 207.2(b)
    ${ }^{2}$ See § 207.2(i)
    ${ }^{3}$ See $\S 207.2$ (d)

[^8]:    ${ }^{1}$ All banking data are as of June 30, 1975.
    ${ }^{2}$ The San Juan banking market consists of the San Juan SMSA.

[^9]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ The St. Louis banking market, the relevant geographic market for purposes of analyzing the competitive effects of the proposed transaction, is approximated by the city of St. Louis, St. Louis County, and portions of St. Charles and Jefferson Counties, all in Missouri and portions of Madison and St. Clair Counties in Illinois.
    ${ }^{3}$ Four hundred thousand dollars of this total indebtedness is to be injected into Bank to strengthen its capital.

[^10]:    ${ }^{1}$ All banking data are as of June 30, 1975.
    ${ }^{2}$ The Chicago banking market is approximated by Cook County, DuPage County and portions of Lake County.

[^11]:    ${ }^{3}$ Applicant proposes to exchange its shares of stock and $\$ 2.7$ million of its 10 per cent debentures for all of the stock of Bank and $\$ 600$ thousand of Bank's debentures (\$300 thousand of which bears interest at 5.5 per cent, and the remainder of which bears interest at 7 per cent). Bank's debentures would be converted to equity capital in connection with this exchange. Applicant also proposes to borrow an additional $\$ 300$ thousand to supplement Bank's equity capital.

[^12]:    ${ }^{1}$ All banking data are as of June 30, 1975 and reflect holding company formations and acquisitions approved by the Board through June 30, 1976.

[^13]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ The Appleton RMA, which is the relevant banking market, extends from the northeastern portion of Winnebago County (including the cities of Neenah and Menasha) through the southeastern portion of Outagamie County (including the cities of Appleton, Kaukauna, Kimberly, Little Chute, and Combined Locks) and the southwestern-most portion of Brown County and the northwestern portion of Calumet County.

[^14]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ The relevant banking market is approximated by Flagler County.

[^15]:    ${ }^{3}$ Following the 1966 Amendments to the Act, the DuPont Trust ("Trust'") sought to divest its holdings in 30 Florida banks through an exchange of stock with a newly created bank holding company, Florida National. Subsequently, the Board determined that Trust was still controlling the 30 banks through Florida National and by Order of October 15, 1973, the Board ordered the DuPont Trust to "terminate its control and/or controlling interest over Florida National and/or its subsidiary banks" by December 31, 1974. In May 1974, eight pending § 3(a)(3) applications of Florida National were returned because Trust had not yet complied with the Board's Order of October 15, 1973; and therefore any acquisitions of bank shares by Florida National would have constituted an indirect acquisition by Trust.

[^16]:    *Two of the officers were also directors of Florida National.
    ${ }^{4}$ At the time Florida National placed the loan with the unaffiliated Iender, American National Bank of Jacksonville, it continued to guarantee the loan to its Officers. When Florida National subsequently sought to remove its guarantee of the loan, American National Bank of Jacksonville refused to excuse Florida National from its obligation.

[^17]:    ${ }^{5}$ See Mid America Bancorporation, Inc., 1974 Federal Reserve Bulletin 131; The Jacobus Company and Inland Financial Corporation, 1974 Federal Reserve Bulletin 130.

[^18]:    ${ }^{6}$ As originally enacted, § 3(c)(3) of the Bank Holding Company Act provided that among the factors to be considered by the Board is the "character of [the] management'". Also see Senate Report No. 1095, 84th Cong., 1st Sess., at page 10 , accompanying the 1956 Act. The present § 3(c) of the Act includes the same standard without any substantive change in its meaning having been made by the 1966 Amendments to the Act which brought this section into harmony with the Bank Merger Act. The Federal Home Loan Bank Board has had occasion in a similar context to consider the scope of the "managerial resources'" standard as contained in that section of the National Housing Act dealing with savings and loan holding companies ( 12 U.S.C. § 1730a(e)(2)). The Bank Board concluded that its standard was adopted from the Bank Holding Company Act and that the phrase "managerial resources'" encompasses considerations relating to the integrity of management. Opinion and Order of the Home Loan Bank Board in the matter of the Joint Applications of Fidelity Financial Corporation and Fidelity Savings and Loan Association, Sacramento, California, and Six Rivers Savings and Loan Association, Eureka, California (Resolution No. 731772, December 7, 1973), at page 20.

[^19]:    ${ }^{1}$ Unless otherwise indicated, banking data are as of December 31, 1975.
    ${ }^{2}$ The Dover-Rochester banking market is approximated by all of Strafford County, New Hampshire, the towns of Nottingham and Newmarket in Rockingham County, New Hampshire, the towns of Brookfield and Wakefield in Carroll County, New Hampshire, and the towns of Lebanon, Berwick and South Berwick in York County, Maine.

[^20]:    ${ }^{3}$ As of June 30, 1974.

[^21]:    ${ }^{4}$ See New Hampshire RSA, 384-B:2(I).

[^22]:    ${ }^{5}$ See New Hampshire RSA, 384-B:2(II).
    ${ }^{6}$ Protestant, currently the largest banking organization in the market, previously entered into merger negotiations with Bank and secured regulatory approval to merge with Bank. That merger, which was never consummated, would have produced a banking organization holding 26.6 per cent of the market's deposits.

    7On October 25, 1974, the Board approved Applicant's application to acquire IHBS [39 Federal Register 39107], a company which engages in the permissible nonbanking activity of providing management consulting advice to nonaffiliated banks (section 225.4(a)(12) of Regulation Y, 12 CFR 225.4(a) (12)).

[^23]:    ${ }^{1}$ FSC and FSIC had the same president and chief executive officer, and three of FSIC's directors were on the board of FSC.
    ${ }^{2}$ UIP was a diversified non-operating holding company engaged in the finance and industrial fields.

[^24]:    ${ }^{3}$ By this merger, FSC apparently also violated § 408(e)(1) (B) of the National Housing Act, 12 U.S.C. § 1730a(e)(1) (B), inasmuch as the merger resulted in FSC becoming a savings and loan holding company without prior approval of the FHLBB.

[^25]:    ${ }^{1}$ See Appendix to this Order, p. 709.

[^26]:    ${ }^{2}$ Protestant's numerous objections to the manner and conduct of the administrative proceedings as well as certain other matters raised by Protestant in motions and petitions to the Board are dealt with in the Appendix to this Order. The Appendix is incorporated herein and made a part of this Order.
    ${ }^{3}$ Unless otherwise noted, all financial data are as of June 30, 1975.
    ${ }^{4}$ In four States (California, Illinois, Kentucky, and Indiana), Local solicits direct consumer loans by mail through its subsidiary, Marlo Finance Company.

[^27]:    ${ }^{5}$ Protestant has excepted to the Administrative Law Judge's acceptance of Applicant's delineation of Local's 38 service areas as overbroad, contending that the relevant geographic markets are the narrowly localized or directly impacted areas. The Board is satisfied from its review of the technique Applicant used to define the markets that the Administrative Law Judge's findings as to the geographic boundaries of the markets are substantially correct. In this regard, the Board has previously determined consumer finance markets to be roughly equivalent to commercial banking markets. Measured against this standard, the Administrative Law Judge's market definitions appear in certain cases to be too narrow, rather than as Protestant suggests overbroad. With respect to the Administrative Law Judge's definition of the Los Angeles, California market, to which Protestant specifically objects, the Board has previously determined that market to be even broader than that found by the Administrative Law Judge. In any event, any error in market definition is viewed by the Board as insignificant in light of its findings with respect to the overall competitive effects of the proposal.
    ${ }^{6}$ Applicant's subsidiary Mellon National Mortgage Company of Ohio, while engaged primarily in mortgage banking, also engages to a very limited extent (less than . 1 per cent of its total assets) in consumer loan activities through its second mortgage lending operations. All of these loans are on properties located in Ohio, and Local has no market that extends into Ohio.
    ${ }^{7}$ Local does not operate in this product sub-market.

[^28]:    ${ }^{8}$ Applicant has submitted evidence indicating that although it has studied in detail the feasibility of a de novo entry into the industry, it has rejected such entry as unwise and imprudent because of the need to hire and train a large staff, the problems and difficulties of locating growth sites for offices, licensing requirements, its lack of experience in the industry, and the significant funds and time required to implement such entry, much less reach a breakeven point. The Administrative Law Judge concluded that the record would not warrant a finding that Applicant should be perceived as a de novo entrant into the industry. However, Applicant's study and rejection of de novo entry into the consumer finance industry does not preclude Applicant's entry by foothold acquisition. Indeed, following rejection of de novo entry, Applicant's corporate planning group considered and studied the acquisition of some 15 consumer finance companies prior to focusing attention upon Local.

[^29]:    ${ }^{9}$ While Local's presence among consumer finance companies is viewed as more than insignificant in certain of its markets, Local's share of the consumer loan business in any such market is small because of the additional competition from banks and credit unions.
    ${ }^{10}$ In view of Local's almost complete lack of geographic expansion over the last decade or more, the Board concludes that Local should not be perceived as a potential entrant into Bank's market.

[^30]:    ${ }^{11}$ As discussed hereinafter, Local's profits have, however, been declining in recent years.
    ${ }^{12}$ Applicant acknowledges that its growth plans for Local will be tempered and coordinated with the needs and requirements of its other subsidiaries, particularly Bank.

[^31]:    ${ }^{13} \mathrm{Mr}$. Snite, presently 91 years of age, owns individually 28.6 per cent of Local's outstanding capital stock and, through his private foundation, members of his immediate family and related trusts, control an additional 70 per cent.
    ${ }^{14}$ Protestant's assertion is based primarily upon the contrasts between Applicant's plans for Local as set forth in its application to the Board and certain assumptions underlying financial projections found in a position paper presented to Applicant's Board of Directors at the time Applicant's Board approved Local's acquisition. The projections in the position assumed an expansion of Local's receivables by 100 per cent without the establishment of new offices or services, a significant reduction in Local's cash and loan loss reserve, and an immediate dividend payment to Applicant of Local's excess capital, with a concomitant increase in Local's debt to equity ratio to 8:1. The postion paper, however, does not purport to represent Applicant's plan for Local. It was prepared in ad-

[^32]:    vance of the application solely to assist Applicant's Board in assessing the merits of the acquisition. In the Board's view, the Administrative Law Judge properly determined that the discrepancies between the position paper's assumptions and Applicant's formal proposal as reflected in its application to the Board are logically explained as evolutionary stages in Applicant's plan for Local.

[^33]:    ${ }^{15}$ Except for Local's vice-chairman who is about to retire.
    ${ }^{16}$ While Local may, as Protestant suggests, presently possess the ability to provide new services and enter new market areas, the record is clear that it has not in fact done so. Nor is there any reason to believe that, absent approval of the instant application, Local would alter in any material respect its nonexpansionary policies. On the contrary, as discussed more fully below, Local's management has formulated a plan to significantly contract Local's operations in the event this application is denied.

[^34]:    ${ }^{17}$ Local's loan agreements do, however, as Protestant points out, require the redemption payment to be made in ten equal and annual instalments in the event Mr. Snite's estate and inheritance taxes could under $\S 6166$ of the Internal Revenue Code of 1954 be paid in such instalments. In the event $\S 6166$ were applicable, the fact that the redemption of Mr. Snite's stock would take place over a ten-year period rather than at one point in time does not mean, as Protestant argues, that the planned contraction in Local's operations is prohibited or would not occur. The Board notes that the planned contraction in Local's operations does not rest solely on Local's need to provide liquidity to Mr. Snite's estate but also upon Local's need to improve its declining earnings.

[^35]:    ${ }^{1}$ Similarly, during the course of the hearing session on October 3, 1975, Protestant withdrew from the hearing room following an adverse ruling from the Administrative Law Judge, without the Administrative Law Judge's permission and despite the Administrative Law Judge's direction to Protestant, repeated four times, to proceed with his cross-examination of Applicant's witness. On that occasion, Protestant filed with the Board's Secretary a "Petition to the Board'' for special permission to appeal from the ruling of the Administrative Law Judge denying Protestant's request that hearing sessions not be held on Saturdays. By Order dated October 8, 1975, the Board denied Protestant special permission to appeal and affirmed the authority of the Administrative Law Judge to regulate the course and conduct of the administrative proceedings. The hearing session scheduled for Saturday, October 4, 1975, was cancelled when at the close of the hearing on Friday, October 3, 1975, Protestant indicated that he had become ill and planned to consult with a physician on Saturday morning. Thereafter, no further Saturday sessions were scheduled.

[^36]:    ${ }^{2}$ The Board has reviewed Protestant's response to the Show Cause Order and finds that it principally restates Protestant's earlier arguments for a continuance.

[^37]:    ${ }^{3}$ Protestant's request for the year-end 1975 financial information for Local and Applicant was filed after the close of the hearing, indeed after Applicant had submitted its Proposed Findings of Fact and Conclusions of Law to the Administrative

[^38]:    Law Judge. Applicant had, however, during the course of the hearing, submitted such information for the first half of 1975, the most recent data then available. Under these circumstances, the Board deems Protestant's request to be wholly improper and unreasonable.
    ${ }^{4}$ See 12 CFR § $4.18(\mathrm{~b})$.

[^39]:    ${ }^{5}$ The Board's examination of the record has revealed no basis whatsover to support Protestant's allegations of ex parte contacts between Applicant and Board staff or other alleged misconduct. The Board considers such allegations to be wholly unwarranted.

[^40]:    ${ }^{6}$ This lawsuit was subsequently dismissed.
    ${ }^{7}$ By unsigned motion dated January 30, 1976, Protestant petitioned the Board pursuant to $12 \mathrm{CFR} \$ 263$. 10 (e) for special permission to appeal the Administrative Law Judge's Order of January 7, 1976. In that petition, Protestant also requested the removal of the Administrative Law Judge because of alleged ex parte contacts between the Administrative Law Judge and counsel for Applicant. In addition, Protestant requested the Board to direct the Administrative Law Judge to rule on his discovery requests.

    On February 10, 1976, the Board's Secretary advised Protestant that his motion to remove the Administrative Law Judge did not comply with $\S 263.6(\mathrm{a})$ of the Board's Rules of Practice, and that his petition for an order directing the Administrative Law Judge to rule on unspecified demands for the production of documents and witnesses was premature. As noted above, the Administrative Law Judge in his Recommended Decision subsequently declined to order the production of the documents and witnesses requested by Protestant.

[^41]:    ${ }^{1}$ Except where noted the documents are of the same date as the action indicated.

[^42]:    ${ }^{2}$ Except where noted, all dates refer to 1975
    ${ }^{3}$ Governors Holland and Coldwell dissenting.
    ${ }^{4}$ The Board determined not to decide the question of Anthony Robert Martin-Trigona's standing as a potential competitor in this case but to permit Mr. Martin-Trigona to participate in the hearing.
    ${ }^{5}$ The hearing was held Saturday without objection.
    ${ }^{6}$ During the course of the hearing, Protestant took exception to the ruling on prospective Saturday sessions, and Protestant later absented himself from the hearing room to file his appeal with the Board. On October 8, the Board affirmed the authority of the Administrative Law Judge. Protestant gave notice of appeal on the issue to the United States Court of Appeals for the District of Columbia Circuit. As it developed, there were coincidentally no further Saturday sessions.
    ${ }^{7}$ Originally it had been intended to continue the hearing Saturday, October 4; however, the Saturday session was cancelled at the request of Protestant for pressing personal health reasons.

[^43]:    ${ }^{8}$ At the close of the hearing on October 10 , it was originally intended that the hearing should resume on October 11 and thereafter on October 14. At the request of Protestant for health and business reasons, the hearing was scheduled to resume on October 21. The setting was agreeable to all parties. On October 20, a telephone call was received from Jerome $W$. Shay, Counsel for Applicant, who reported that Applicant intended to request a postponement to further consider the situation, and that Applicant had been unable to reach Protestant to obtain his position. Mr. Shay was informed that where the date was an agreed setting, the postponement would be looked upon with disfavor unless agreed to by the other parties. The undersigned suggested that he contact Mr. Banzhaf, who possibly would know how to reach Mr. Martin-Trigona, and Mr. Brown. Shortly thereafter, a telephone call was received from Mr. Banzhaf. He reported that Mr. Martin-Trigona was then under a doctor's care and in bed and would not be available for the hearing the following day. He further stated that he had no indication when Mr. Martin-Trigona would be available to proceed with the case, but that he would definitely not be there on October 21. Mr. Banzhaf was then informed of Mr. Shay's call and that Mr. Shay would probably be calling him shortly. A conference call was suggested and arranged. Mr. Shay (for Applicant), Mr. Banzhaf and Mr. MartinTrigona (for Protestant), Mr. Brown (for the Board), and the undersigned participated. After discussion, the postponement was requested and agreed to by all parties except the Board; the date, November 11, was suggested by Mr. Shay and agreed to by Mr. Martin-Trigona. The parties were informed that it should be planned that the hearing would proceed on consecutive days to its conclusion subject only to availability of witnesses.

    Thereafter, on November 3 (by letter dated October 31), Protestant requested a further postponement of the hearing until December 8. On November 4, Applicant opposed such further postponement. On November 7, the request was denied. Protestant appealed this ruling to the Board and simultaneously gave notice of appeal to the United States Court of Appeals for the District of Columbia of the possible adverse ruling, The appeal to the Board was denied November 18.
    ${ }^{9}$ The hearing was opened on this day with Mr. MartinTrigona's demand that the hearing be adjourned until December 8. Upon being denied the adjournment, Mr. Martin-Trigona left the hearing room. The hearing continued in his absence, and before the hearing adjourned both Applicant and the Board rested their cases. The Applicant further moved that the hearing be closed at that time. Although the Board did not object to Applicant's motion, Counsel for the Board suggested that Protestant be given an opportunity to present its direct case.

[^44]:    ${ }^{10}$ The document is in the exhibit file.
    ${ }^{11}$ The use of telegraphic notices was deemed appropriate because of the extraordinary situation.
    ${ }^{12}$ The documents were subsequently served on Protestant.
    ${ }^{13}$ The Notice to Show Cause issued November 12 required any responding party to name any prospective witnesses and to briefly summarize their testimony. Protestant had responded in its untimely letter filed on November 24 by naming only Edward Kenneth Suskin. Of his testimony, Protestant stated, '"I cannot summarize Mr. Suskin's testimony because I do not control his testimony. I have an idea of questions I will be putting to him, but I do not control his answers so I cannot speak for him."

    Despite Protestant's prior failure to comply with the Notice to Show Cause, the Order denying the Motion to Reopen the Record provided that Protestant could "submit appended to his brief a copy of the affidavit of Edward Kenneth Suskin bearing on the material issues of this proceeding, which after consideration may be received in evidence and considered as the testimony of the affiant as if he had been called."

[^45]:    examination of an application, that you could issue exactly such an order.
    It is concluded that the general grant of authority in Section 5 (b) of the Act, ". . . to issue such regulations and orders as may be necessary to enable it to administer and carry out the purposes of this Act and prevent evasion thereof," is insufficient to negate the specific rejection by Congress of the power of compulsory production of evidence. Accordingly, the Board could not compel a party to produce evidence in a Regulation Y proceeding. Since the Board did not have the power, it could not be vested in the Administrative Law Judge designated by the Board. This does not necessarily mean the Board has no recourse where substantial relevant and material evidence is not produced on demand of the Board. The Board could infer that the evidence would not support the Party refusing its production, or in the alternative could allow admission of secondary evidence to establish contested facts. Finally, where the Board deemed the failure to produce evidence to be sufficiently substantial, it obviously would find against the Applicant or Protestant because of failure to support the application or protest, respectively. However, parties would not by this have an open reason to demand production of evidence by opponents since the appropriateness of such demands would be limited not only by relevance and materiality, but also by reasonable limitations of cumulativeness and remoteness.
    ${ }^{15}$ The affidavit of Edward Kenneth Suskin is received in evidence and made a part of the record in the case.
    ${ }^{16}$ The perfunctory request for oral argument appearing on the cover sheet of the submission is denied.
    ${ }^{17}$ Protestant's Proposed Findings of Fact, Conclusions of Law and Supporting Brief is received.
    ${ }^{18}$ The Motion to Remove is denied.
    ${ }^{19}$ The affidavit of Lawrence X. Pusateri is rejected as not bearing on the issues of the case.
    ${ }^{20}$ The Answering Brief is rejected:

[^46]:    ${ }^{21}$ Except where noted, all financial information is as of December 31, 1974.
    ${ }^{22}$ Applicant's Asset $\times$ Equity ratio over the last five-year period has been well below the average for the peer group of bank holding companies.

[^47]:    ${ }^{23}$ The Bank also extends credit to consumer finance companies (both captive and independent). As of June 30, 1974, the total credit commitment was $\$ 456$ million and actual borrowings were $\$ 117$ million. Local has not been a customer of the Bank.
    ${ }^{24}$ It is estimated that there are 180,000 such loans including credit card accounts, personal cash reserve accounts, auto loans, home improvement loans, mobile home financing loans, executive-professional loans, and other consumer loans.
    ${ }^{25}$ Local was founded in 1908 by Fred B. Snite; it was incorporated in 1928.

[^48]:    ${ }^{26}$ It is estimated that Local has outstanding 150,000 loans.
    ${ }^{27}$ Local's debt to adjusted capital ratio in 1973 was 2.4:1. This was well below average for the peer group of independent consumer finance companies.
    ${ }^{28}$ As of December 31, 1973.
    ${ }^{29}$ Local does not presently engage in the mobile home financing business.
    ${ }^{30}$ Within its service areas, Local is in direct competition with 2,137 finance company offices, 3,317 banks and 3,644 credit union offices.

[^49]:    ${ }^{31}$ Five-year figures were not introduced in the hearing.
    ${ }^{32}$ Comparative figures are based upon overall industry figures for 1974 published by the National Consumer Finance Association. These figures do not reflect all companies, or all companies of different size categories, but only of reporting companies.
    ${ }^{33}$ Applicant contends that the $\$ 30$ million represents essentially no premium since book value is conservatively estimated at $\$ 28.5$ million. Based upon book value, the premium would be $5.2 \%$.
    ${ }^{34}$ No evidence was offered on the full extent of Mr. Snite's present estate, nor is it considered necessary to these conclusions that there be such disclosure. This is despite the statement by witness Suskin that the validity of the tax estimate cannot be tested without such evidence.

[^50]:    ${ }^{35}$ To the same effect were agreements with other sources of funds as early as 1966 .
    ${ }^{36}$ See opposite column for footnote.

[^51]:    ${ }^{36}$ The existence of the plan is established by evidence of a firm policy commitment. It is reflected in the several proposals submitted to the Applicant's Board of Directors as well as the testimony of witnesses Barnes and Kalchek. As noted by Protestant, there are certain discrepancies in the four versions [the Application, the base computations (Applicant's Exhibit 17), the July formal proposal (Applicant's Exhibit 29) and the August formal proposal (Applicant's Exhibit 30)] and the testimony of witness Barnes. As far as the issues in this case, there are no material differences in the several presentations which are explained as evolutionary stages of the plan.
    ${ }^{37}$ Witness Barnes testified on Applicant's evaluation of de novo entry.

[^52]:    ${ }^{38}$ This can largely be attributed to the cost of money rather than any problems within Local's organization.
    ${ }^{39}$ Section 4(c)(8) of the Act.
    ${ }^{40}$ Cited by the Board in Bankers Trust New York Corporation, 38 Fed. Reg. 21822, 59 Fed. Res. Bul. 694 (1973).
    ${ }^{41}$ It is uncontested that the business of Local as a consumer finance company is closely related to business of banking within the meaning of the Act.

[^53]:    ${ }^{42}$ BankAmerica Corporation, 58 Fed. Reg. 22578, 59 Fed. Res. [^56]:    ${ }^{46}$ House Conference Report cited by the Board in BankAmerica Corporation, supra.

[^57]:    ${ }^{48}$ Further, the Board has concluded that even for the leading financial institutions a foothold entry is an acceptable alternative to de novo entry.

[^58]:    ${ }^{1}$ All banking data are as of June 30, 1975 and reflect holding company formations and acquisitions approved by the Board through April 30, 1976.

[^59]:    ${ }^{2}$ In connection with the subject application, the United States Department of Justice submitted a letter expressing concern that possible conflicts of interests could result from approval of this proposal. However, at the time the Board adopted the activity of providing management consulting advice to nonaffiliated banks pursuant to section $4(c)(8)$ of the Act, the Board considered the potential for conflicts of interests resulting from a bank holding company's engaging in this activity. In recognition of this potential, the Board incorporated in Regulation $Y$ a number of restrictions upon a bank holding company's performance of this activity, including the stipulation that any bank holding company providing management consulting advice must disclose to each potential client bank the names of all banks which are affiliates of the consulting company and the names of all existing client banks located in the same market area(s) as the potential client. The Board is of the opinion that these restrictions provide ample protection against possible conflicts of interests.

[^60]:    * This list of pending cases does not include suits against the Federal Reserve Banks in which the Board of Governors is not named a party.

[^61]:    $\dagger$ Decisions have been handed down in these cases, subject to appeals noted.
    $\ddagger$ The Board of Governors is not named as a party in this action.

[^62]:    1 Includes Federal agency issues held under repurchase agreements beginning Dec. 1, 1966, and Federal agency issues bought outright begeginning Sept. 29,1971
    ${ }_{2}$ Includes, beginning 1969, securities loaned-fully guaranteed by U.S. Govt. securities pledged with F.R. Banks-and excludes (if any) securities sold and scheduled to be bought back under matched sale-purchase transactions.
