OCTOBER 1976

## FEDERAL RESERVE BULLETIN

A copy of the Federal Reserve Bulletin is sent to each member bank without charge; member banks desiring additional copies may secure them at a special $\$ 10.00$ annual rate. The regular subscription price in the United States, its possessions, Canada, and Mexico is $\$ 20.00$ per annum or $\$ 2.00$ per copy; elsewhere, $\$ 24.00$ per annum or $\$ 2.50$ per copy. Group subscriptions in the United States for 10 or more copies to one address, $\$ 1.75$ per copy per month, or $\$ 18.00$ for 12 months.
The Bulletin may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and remittance should be made payable to the order of the Board of Governors of the Federal Reserve System in a form collectible at par in U.S. currency. (Stamps and coupons are not accepted.)

# Recent Growth in Activities of U.S. Offices of Foreign Banks 

#### Abstract

This article was prepared in the International Banking Section of the Division of International Finance.

The rapid expansion of activities of foreign bank offices in the United States in recent years constitutes an increasingly important phase in the widespread growth of international banking. Assets of U.S. banking offices of foreign banks have increased more than two and a half times since November 1972, when the Federal Reserve first began collecting monthly balance sheet data on their operations. Although a few foreign banks have made highly publicized acquisitions of existing U.S. banks, most of the growth has resulted from the expansion in size and number of their U.S. banking offices.

Foreign bank offices are located in major money market centers, primarily in New York and California. In addition, the number of foreign bank offices in Illinois has expanded significantly since passage of State legislation in 1973 permitting the establishment of branches in one part of downtown Chicago, but total assets held by these offices are still relatively small. Foreign banks have a few offices in certain other States and in Puerto Rico and the Virgin Islands. Most States, however, either make no legal provisions concerning foreign bank offices or specifically prohibit such banks from conducting a banking business through offices within their respective jurisdictions.

As of August 1976, 194 U.S. offices of foreign banks reported $\$ 61.9$ billion in total assets-equal to about 12 per cent of total assets held at domestic offices of the large U.S. banks with which they compete most actively in money market operations, in the transfer of funds for international payments, and in the financing of international trade. (Large U.S. banks hold more than half of the assets of all U.S. commerical banks.) Moreover, commer-
cial and industrial loans made by U.S. offices of foreign banks amounted to one-fifth of the loans made by large U.S. banks to domestic and foreign borrowers.
U.S. offices of foreign banks have also become major participants in the U.S. Federal funds market, where they place short-dated funds or borrow for liquidity needs. Many offices actively arbitrage between the U.S. Federal funds market and foreign markets, especially Euro-currency markets. Thus, these offices, acting as extensions of their parent banks, have increasingly served as channels through which economic and financial conditions in their home countries influence U.S. financial markets and vice versa. Consequently, their growth, which has paralleled the rapid expansion in assets of U.S. banks' foreign branches and overseas subsidiaries, has contributed significantly to the integration of international financial markets.

The rapid growth and current scale of operations of foreign bank offices in the United States have drawn attention to their increasing significance in U.S. banking and credit markets and have highlighted major differences in the legal and regulatory treatment of these offices as compared with domestic U.S. banks. In recognition of these differences, the Board of Governors of the Federal Reserve System in late 1974 proposed legislation that would establish uniform national treatment for foreign banks in the United States, thereby placing them on a nondiscriminatory basis vis-a-vis U.S. banks. The Congress has held hearings on this and other proposals but has not passed legislation.

## FORMS OF ORGANIZATION

Foreign banks conduct their U.S. banking activities primarily through agencies, branches, and U.S.-chartered bank subsidiaries. The se-
lection of organizational forms reflects the type of business in which the foreign bank is engaged and the legal and regulatory differences pertaining to the establishment, powers, and regulation of each type of office.

## Agencies

Although individual State laws permitting the establishment of agencies and branches of foreign banks differ, agencies are considered to be banking offices that lend and transfer funds but do not accept deposits from domestic residents; however, they may accept credit balances, which resemble deposits in important respects. In California, agencies of foreign banks may accept deposits from foreigners upon receipt of written authorization from the State banking authorities.

As seen in Chart 1, agencies are the most important form of organization for U.S.-based foreign banking offices both in the number of offices and in total volume of assets. In New York State, agencies are established by Canadian banks and by banks of other countries that are unable to operate branches there because of New York State reciprocity requirements. (The reciprocity requirements preclude a foreign bank from establishing a branch in New York unless New York-chartered banks are permitted to conduct specified banking activities through offices in the country under whose laws the foreign bank is authorized.) Japanese banks in New York, with two exceptions, also use the agency form. The absence of limits on the amount of loans and credits that an agency may make to an individual borrower enables Japanese agencies tofinance the needs of their large customers with less difficulty.

Agencies are also the dominant form of foreign bank organization in California because under California State law foreign branches cannot accept domestic deposits that are not insured by the Federal Deposit Insurance Corporation. Current Federal law does not provide FDIC insurance for any deposits of U.S. branches of foreign banks. California agencies are also not subject to loan limits to individual borrowers unless they accept deposits from foreigners.

## CHART 1

Growth in U.S. offices
of foreign banks by type of office

F.R. data.

Agency assets expanded rapidly from late 1972 to mid-1974; thereafter, these assets have remained relatively stable despite a steady increase in the number of agency offices. This pattern primarily reflects changes in the growth of Japanese agencies, which account for twothirds of all agency assets.

## Branches

In States where they are permitted, branches of foreign banks conduct a full-service banking business, including the acceptance of deposits from domestic and foreign residents. Branches are limited in the amount of credit they can provide to an individual borrower, but these limits are not uniform in all States. For example, in New York such limits are determined by the capital and surplus of the parent bank, whereas in Illinois, loan limits are more complex but large loans to individual customers may be made if funded by borrowings from related institutions.

Branch office assets have almost quadrupled since the initiation of monthly reports in No-
vember 1972. Although starting from a much smaller base, this increase has exceeded that of agencies. The expansion of continental European bank branches in New York has accounted for the major portion of this growth.

## Subsidiaries

Foreign banks also own banks chartered in the United States. Virtually all bank subsidiaries of foreign banks have a State charter because of the requirement in U.S. law that all directors of nationally chartered banks be U.S. citizens. A number of these subsidiaries serve the needs of particular ethnic groups associated with the home country of the parent bank. Since their deposits are insured by the FDIC, subsidiaries frequently engage in a deposit and loan business with consumers and small businesses. Subsidiaries provide trust services, primarily in States where a foreign bank cannot open a branch. Lending limits for subsidiaries, as for domestic U.S. banks, are based on their own capital. Several subsidiaries are members of the Federal Reserve System.

In order to acquire or establish a bank subsidiary, foreign banks must receive the approval of the Board of Governors of the Federal Reserve System under the Bank Holding Company Act. That Act subjects a foreign bank holding company to restrictions against owning chartered banks in more than one State, although several foreign banks own subsidiaries in two States under "grandfather" provisions. However, foreign banks, regardless of whether they own a U.S. banking subsidiary, may have branches or agencies in more than one State, provided such offices are permitted under State law. The Bank Holding Company Act also restricts foreign bank holding companies from acquiring significant interests in U.S. commercial enterprises, including securities firms. Consequently, a few foreign banks that have wanted to maintain U.S. securities firms as affiliates have avoided the bank subsidiary form of operation. Foreign banks may own securities affiliates in conjunction with U.S. branches or agencies, however.

The number of U.S.-based foreign bank sub-
sidiaries has increased by only eight since November 1972. However, assets of foreign bank subsidiaries have tripled since then, for a gain of nearly $\$ 9$ billion. Almost half of this gain resulted from several large, highly publicized acquisitions of assets of existing U.S. banks.

## Other

A limited number of European banks have chosen to establish so-called investment companies chartered under New York State law. These companies resemble agencies in their activities, including the maintenance of credit balances in lieu of deposits, but in addition they have powers to deal in securities, subject to certain limitations. The assets of investment companies, currently five in number, have grown very little.

Recently a Japanese bank utilized a new form of entry by establishing under Section 25 of the Federal Reserve Act an Agreement corporation to conduct international banking activities in Texas, where the bank did not have the option of establishing a banking subsidiary, branch, or agency.

Many foreign banks also have representative offices in several States. These offices act as sales and information-gathering posts for their head offices but do not make loans or accept deposits. Some representative offices are eventually upgraded to branch or agency status in States that permit branch or agency operations. Representative offices are generally exempt from banking regulation. However, the State of California requires them to obtain a license from the State Superintendent of Banking. Although two-thirds of these offices are located in New York, significant numbers are in California, Illinois, and Texas.

## NATURE AND <br> GROWTH OF ACTIVITIES

Several factors have contributed to the marked growth of foreign banks in the United States and to the specialized nature of their operations. The increase-more than fourfold-in the size
of the Euro-dollar market since 1970 and, generally, the use of the U.S. dollar as a vehicle for international transactions have spurred banks in major industrial countries to establish a presence in the United States in order to clear the progressively larger volume of dollar transactions generated by their expanding international activities, to manage their liquidity positions, and to take advantage of arbitrage opportunities in international money markets.

Foreign banks have also established U.S. offices to finance trade and working capital needs and to provide foreign exchange, payments, and other corporate services for large home-country corporations that have invested in the United States. These investments have increased significantly since 1971 . In addition, foreign banks compete with U.S. banks in financing trade of U.S. businesses with their home countries and in meeting the financing needs of multinational companies.

## Assets

U.S. affiliates of foreign banks increased their assets by $\$ 37$ billion, or more than 150 per cent, in the past 4 years (Chart 2). In comparison, assets at domestic offices of large U.S. banks increased by $\$ 107$ billion, or about 28 per cent,

## CHART 2

Total assets of U.S. offices of foreign banks and large U.S. banks

F.R. data. Large U.S. banks consist of member banks that report weekly to the Federal Reserve. Assets of four foreignowned banks are included in both groups.

## CHART 3

Total assets and clearing balances held by U.S. offices of foreign banks

F.R. data. Balances due from other banks include cash items in process of collection, demand deposits due from U.S. banks (with reciprocal demand deposits reported on a net basis) and deposits due from foreign banks (with reciprocal demand deposits reported on a gross basis). Balances due from directly related institutions include all claims on directly related institutions in the United States and abroad including deposit balances, overdrafts, or loans.
over the same period. Growth in both number and assets of U.S.-based foreign bank offices-especially agencies and branches-has been based primarily on the expansion of clearing transactions, money market activities, and commercial lending. As shown in Chart 3, the major importance of these offices in clearing international payments and in engaging in foreign exchange transactions has resulted in a rising volume of collection items and working balances due from other banks, including related institutions here and abroad. Such items constitute a significant proportion of activities on both sides of their balance sheets.

Compared with large U.S. banks, U.S. offices of foreign banks also have a higher proportion of interbank claims relative to nonbank loans, vividly illustrating the role that these offices have assumed in managing the liquid dollar assets of their parent bank networks. As a result of operations in both the U.S. Federal funds and the Euro-dollar markets, interbank money market claims of these offices currently equal about half those of large U.S. banks (Chart 4).

Interbank claims expanded rapidly during the first half of 1974 and in 1975 as U.S. offices

CHART 4
Interbank money market assets

F.R. data. Includes all loans, advances, and time deposits that represent claims on U.S. and foreign commercial banks.
of continental European banks significantly increased their placements in the United States of dollar balances received from parent bank networks and foreign customers. The continued expansion of interbank assets in 1976, however, reflected a growing volume of interbank placements in the Euro-dollar market by U.S. branches of continental European banks. This expansion of interbank claims counterbalanced a slowdown and subsequent decline in growth of commercial and industrial and other nonbank loans.

The structure of the asset portfolio of U.S. offices of foreign banks also reflects their largescale lending to multinational customers. Thus, as seen in Chart 5, more than 80 per cent of the loan portfolios of these offices consist of commercial and industrial loans. In comparison, approximately half of the nonbank loans made by large U.S. banks consist of such diverse credits as mortgages, consumer loans, and agricultural loans. Moreover, greater than 20 per cent of the commercial and industrial loans of U.S. offices of foreign banks consist of claims on foreigners, compared with less than 5 per cent of such loans of large U.S. banks.

In contrast to the decline in commercial and industrial loans at large U.S. banks since early 1975, U.S. offices of foreign banks continued to expand such loans to both domestic and foreign borrowers throughout 1975, albeit at a slower pace than earlier. But in the first half
of 1976, they also suffered a decline. This pattern suggests that both groups of banks were affected, although to a different degree, by the weaker loan demand resulting from the recession in the United States, a slowdown in the growth of world trade, and a shift of corporate borrowers from bank credit to other sources of funds.
U.S. branches and agencies of foreign banks hold only limited amounts of U.S. Government and tax-exempt securities, whereas such securities comprise approximately one-fifth of the asset portfolios of large U.S. banks. However, U.S. subsidiaries of foreign banks include a significant portion of these securities among their total assets (see Appendix Table). In fact, the asset portfolios of U.S. subsidiaries of foreign banks, which tend to conduct a more diversified banking business than agencies and, branches, resemble the portfolios of large U.S. banks.

CHART 5
Nonbank loans and credits

F.R. data. Nonbank loans and credits include commercial and industrial, mortgage, agricultural, and other loans made to nonbanks and foreign official institutions, but exclude sales of Federal funds and loans for purchasing or carrying securities.

## Liabilities

The specialized nature of the activities of U.S. offices of foreign banks also results in sharp contrasts between the structure of their liabilities and that of large U.S. banks. Reflecting the
wholesale activities of agencies and branches, U.S. offices of foreign banks fund only a third of their total assets with deposits and other borrowings from nonbanks, whereas large U.S. banks fund about two-thirds of their total assets in this manner. Nevertheless, as seen in Chart 6, deposits and borrowings from nonbanks have risen from approximately $\$ 6$ billion in November 1972 to more than $\$ 20$ billion as of August 1976, constituting the single most important source of funds for U.S. offices of foreign banks.

The growth in deposits and borrowings from nonbanks has stemmed from two quite different soürces (see Appendix Table). U.S. agencies and branches of foreign banks have accounted for $\$ 7.3$ billion of the increase; nearly twothirds of this amount was derived from foreign sources, mostly in the form of foreign corporate and foreign official time deposits and other nonbank foreign borrowings. U.S. branches of continental European banks provided an active channel for shifting funds from the Euro-dollar market to the United States following the highly publicized collapse in mid-1974 of a German bank heavily engaged in foreign exchange activities. Subsequently, these banks continued to receive funds from foreign nonbank customers that wished to maintain dollar balances in the United States for reasons related to favorable interest differentials between U.S. and foreign money markets, or portfolio diversification, or exchange controls imposed by other countries.
U.S. banking subsidiaries of foreign banks accounted for about $\$ 6.8$ billion of the increase in deposits and other borrowings from nonbanks. This increase, however, consisted largely of domestic liabilities; domestic nonbank demand deposits increased about $\$ 1.9$ billion and domestic time deposits and other borrowings from nonbanks about $\$ 4.3$ billion. Such deposits increased considerably as a result of acquisitions of several existing large U.S. banks by foreign banks during this period.
U.S. agencies and branches of foreign banks also rely heavily on net borrowings from parent banks and other related institutions abroad to fund their lending activities. This dependency parallels the behavior of foreign branches of

CHART 6
U.S. offices of foreign banks: sources of funds

F.R. data. Deposits and borrowings consist of credit balances, deposits, and all other borrowings from nonbanks and official institutions. Net interbank borrowings consist of domestic and foreign interbank money market liabilities less domestic and foreign interbank money market assets. Net advances from directly related institutions abroad include all liabilities to these institutions less all claims due from them.
U.S. banks, which also fund a significant share of their activities through advances from their parent banks and affiliated organizations. U.S. subsidiaries of foreign banks, on the other hand, transfer more limited amounts of funds to and from parent banks. From a low of about $\$ 5$ billion in early 1973, net advances to all U.S. offices of foreign banks from their parent organizations increased to $\$ 81 / 2$ billion through late 1974, but have changed relatively little since. This stable pattern in aggregate net advances from related institutions abroad conceals considerable diversity among offices of different national origin, however. For specific groups of branches and agencies, net flows vis-a-vis parent banks and affiliated organizations abroad fluctuate in response to changing interest rate differentials between U.S. and foreign money markets and to regulatory policies of central banks.

Nevertheless, over the long run, U.S. branches and agencies of all foreign banks have manifested a strong tendency to depend signifi-
cantly on their parent bank organizations for funding their U.S. activities.
U.S. offices of foreign banks-while very active in both lending and borrowing interbank funds-have consistently relied on other banks as an additional net source of funds, except in recent months. Net interbank borrowing rose slowly from approximate balance in November 1972 to a peak of $\$ 4$ billion in February 1975, then tapered off, and since May 1976 has been in near balance.

The aggregate trend of net interbank borrowing, as in the case of net borrowing from directly related foreign institutions, reflects a composite of very diverse patterns among U.S. banking offices of different national origins. U.S. branches of banks of continental Western Europe, especially Switzerland, and to a lesser extent the United Kingdom, have persistently increased the volume of their gross and net interbank placements. An especially marked increase occurred in mid-1974, when a number of foreign banks shifted assets from the Eurodollar market to their U.S. affiliates in the wake of severe strains in international financial markets. U.S. agencies of Canadian banks have also been significant net interbank lenders, although the levels of both gross and net interbank placements have declined over the period.
U.S. agencies of Japanese banks, on the other hand, have accounted for most of the net interbank borrowing of all U.S. offices of foreign banks. In fact, the increase in their net interbank borrowing from $\$ 1$ billion in late 1972 to $\$ 6.5$ billion at the end of 1974 and the decline thereafter to a level of around $\$ 5$ billion since April 1976 has been a dominant influence on the over-all trend of net interbank borrowing of U.S. offices of foreign banks.

## NATIONAL ORIGIN

Although, as a group, U.S. offices of foreign banks engage in a more specialized range of operations than large U.S. banks, offices of different national origin reveal considerable divergence in patterns of growth and in the specific types of activities in which they engage.

The activities and growth of these offices are shaped not only by economic and financial conditions in the United States but also by economic and financial conditions and by banking and exchange regulations in the home countries of the parent banks. Reflecting responses to a wide variety of conditions abroad, the composition of foreign bank activities by country of parent bank has changed markedly since November 1972 (Chart 7).

## JAPAN

Japanese bank offices in this country have concentrated on financing Japanese trade both with the United States and with other countries, and on financing U.S. subsidiaries of Japanese corporations. Commercial and industrial loans of these offices-currently accounting for about half the total for all foreign banks-rose from $\$ 5.4$ billion in November 1972 to $\$ 10.8$ billion in December 1974. Thereafter, these commercial loans declined gradually as a result of the sharp drop-off in U.S.-Japanese bilateral trade and Japanese trade with other countries.
U.S. offices of Japanese banks have remained heavily dependent upon net interbank borrowing from U.S. banks and on net advances from related foreign institutions for funding their lending operations. A substantial proportion of advances from related institutions abroad represents funds borrowed from U.S. banks in the name of parent Japanese banks and then recorded as advances by parent banks to their New York agencies. Similarly, agencies of Japanese banks also raise funds from U.S. banks that are recorded as liabilities of Japanese agencies in California, which in turn show these funds as advances to affiliated agencies in New York.

Following a request by the Board of Governors of the Federal Reserve System in June 1973 that U.S. agencies and branches of foreign banks voluntarily maintain reserves on increases in net borrowings from foreign banks above base-period levels, net advances from related institutions abroad have remained stable; on the other hand, advances from California agencies of Japanese banks to their New York and other U.S. affiliates have risen to more than $\$ 4$ billion.

## CHART 7

## U.S. offices of foreign banks by national origin

F.R. data: 1972-75, November; 1976, August.

Total assets of U.S. offices of Japanese banks increased by $\$ 2$ billion in the past 2 years compared with an increase of $\$ 11$ billion in the previous year and three-quarters (Chart 7). This marked change in trend reflected a decline in Japanese agency assets beginning in early 1975, following earlier rapid increases. As a result, Japanese banks' share of assets of all U.S. offices of foreign banks shrank moderately, from 45 per cent in November 1972 to 40 per cent ( $\$ 24.8$ billion) in August 1976.

## Continental Western Europe

U.S. offices of continental Western European banks concentrate heavily on money market and clearing activities and engage in less trade financing than do U.S. offices of Japanese banks. This is evidenced by large clearing and interbank items on their balance sheets and by the smaller volume of commercial and industrial loans relative to total assets. Moreover, these offices supply on a net basis to the Federal funds
and Euro-dollar markets large amounts of funds received from nonbank deposits and from related offices abroad. Two-thirds of these nonbank deposits are due to foreigners.
U.S. offices of banks in continental Western Europe have nearly quadrupled their assets from $\$ 5$ billion in November 1972 to $\$ 19$ billion as of August 1976, with their share of assets of all U.S.-based foreign bank offices increasing from 21 per cent to 31 per cent. U.S. offices of Swiss banks have accounted for a major share of this growth; currently they account for about one-third of the total assets of this group. U.S. offices whose parent banks are located in Germany, Italy, France, and-to a lesser extentthe Netherlands have also reached significant levels of activity.

In contrast to the preference of Japanese banks for the agency form of organization for conducting their U.S. operations, continental European banks have relied primarily on branches for expanding their activities in the United States. These branches more than tripled in number from November 1972 to August 1976, with an especially sharp expansion in 1974, and their total assets rose by more than $\$ 10$ billion. Assets of U.S. subsidiaries also increased by $\$ 3$ billion, about half of which reflected an acquisition of assets of a large New York bank that failed in late 1974.

During 1975 branches of continental Western European banks continued to expand their balance sheets in response to a more rapid decline in European than in U.S. short-term interest rates-resulting in continued inflows of funds through these branches into the U.S. interbank market-and in response to the growth in activities of branches newly established in 1974. In 1976, however, as the level of foreign deposits and advances from related banks abroad failed to expand further, branches increased their net interbank placements at a slower pace.

## Canada

U.S. offices of Canadian banks, long active in the U.S. money markets, have concentrated on managing and clearing U.S. dollar balances for their parent banks, which derive dollar balances
from a wide variety of sources, including Canadian subsidiaries of U.S. corporations, U.S. and Canadian residents, offices in the Caribbean, and Euro-dollar operations. These balances are invested in the U.S. interbank market and in the Euro-dollar market. The money market position of these offices fluctuates quite sharply in the short run as Canadian banks shift funds among U.S., Canadian, Euro-dollar, and other short-term money markets. Over the longer run, however, the volume of net liabilities to parent banks in Canada has not increased; this may reflect in part a higher effective cost of these funds resulting from the request that reserves be held against increases in net borrowings from foreign banks and related institutions abroad. While their money market operations have remained relatively stable, U.S. offices of Canadian banks have steadily increased their commercial and industrial loans to a current level of $\$ 2.2$ billion. Since the end of 1973, total assets of these offices have ranged mostly between $\$ 6.5$ billion and $\$ 7.5$ billion.

## United Kingdom

U.S. offices of banks in the United Kingdom held $\$ 6.4$ billion in assets as of August 1976, an increase of $\$ 4.4$ billion from November 1972. Of this increase, $\$ 1.4$ billion represented the acquisition of a major banking network in California. That acquisition substantially augmented retail loans and, to a lesser extent,
commercial and industrial loans to U.S. customers of U.K. subsidiaries in the United States and added significantly to their nonbank demand and time deposits. Most of the remaining expansion reflected a steady growth of commercial and industrial loans and of net lending in interbank markets by branch offices. This asset growth was funded by net advances from related offices abroad and by a significant increase inforeign time deposits.

## Other Countries

U.S. offices of banks in other countries increased their total assets by $\$ 3.3$ billion, to $\$ 4.4$ billion as of August 1976. Banks from 5 Latin American countries, 10 Asian countries, and Australia have participated in this increase. These banks have relied on agency and branch offices much more than on subsidiaries for conducting their U.S. activities. U.S. agencies of these banks have expanded commercial and industrial and other loans as well as their net lending to parent banks and overseas affiliates. This growth in assets has been accompanied by an expansion of foreign credit balances and interbank borrowing. U.S. branches of these banks have been active in expanding commercial and industrial loans and are net interbank lenders. They rely primarily on foreign deposits and net borrowing from parent banks and affiliates for funding their operations.

## APPENDIX TABLE

Assets and liabilities of U.S. offices of foreign banks, August 1976

# Changes in Time and Savings Deposits at Commercial Banks, January-April 1976 

For the 3 months ending April 30, 1976, the growth of time and savings deposits of individuals, partnerships, and corporations (IPC) at insured commercial banks proceeded at approximately the same moderate pace observed during the three previous survey quarters. The most recent survey conducted jointly by the Federal Reserve System and the Federal Deposit Insurance Corporation (FDIC) indicates that time and savings deposits, IPC, rose at a 9.6 per cent annual rate to a level of $\$ 401$ billion, not seasonally adjusted, after having risen at a 9.2 per cent rate in the previous 3 months. With interest rates paid on consumer-type time and savings deposits remaining near the maximum allowable rates at most banks and with short-term Treasury bill issues yielding below 5 per cent during most of the period, savings deposits and small denomination (less than $\$ 100,000$ ) time deposits expanded sharply for the second consecutive quarter. In contrast, large-denomination ( $\$ 100,000$ and over) certificates of deposit (CD's)-both negotiable and nonnego-tiable-declined in absolute volume, as banks cut offering rates to slow inflows of such deposits in light of other strong deposit inflows and the continuing weak demand for business loans. ${ }^{1}$
The aggregate weighted-average interest cost on savings and small-denomination time deposits remained at 5.54 per cent-the result of a balancing in the growth of low-cost savings deposits and relatively higher-cost consumertype time deposits. The survey data also indicate that neither bank size nor location is related to

[^1]the average rates offered on specific types of deposits. However, the largest banks, because they hold proportionately more savings than consumer-type time deposits, pay a lower overall average rate on the total of consumer-type time and savings deposits.

## SAVINGS DEPOSITS

With yields on market securities relatively low, offering rates on banks' savings deposits-a significant volume of which earn interest from day of deposit to day of withdrawal-were particularly attractive, and such deposits expanded at an annual rate of about 30 per cent over the February to April interval. This in-crease-the largest since the survey began in 1968-was mainly a reaction to the rate advantage of commercial bank savings deposits relative to money market assets; in early January the 3 -month Treasury bill rate dropped below the ceiling on commercial bank savings deposits for the first time in more than 3 years.

In addition to the inducement offered by relatively attractive rates, regulatory changes in November 1975 permitting profitmaking organizations to hold savings deposits also contributed to the acceleration in growth of such deposits. For the 3 months ending in April, savings balances of businesses at the approximately 320 large commercial banks for which data are available accounted for about one-fifth of the total savings deposit inflows at those banks. According to a survey conducted by the Federal Reserve, a significant proportion of the rise in business savings during the November-December 1975 period probably reflected transfers from demand balances. However, in view of the rate incentives that prevailed during the February-April period, a substantial portion of
the funds deposited in business accounts during that period probably represented a substitution of savings deposits for relatively low-yielding alternative market assets.

## SMALL-DENOMINATION TIME DEPOSITS

Growth in the outstanding volume of small-denomination time deposits remained strong over the January-April interval, registering about a 14.0 per cent annual rate of growth. Deposits with original maturities greater than 4 years recorded the sharpest percentage increase, in large part because Regulation Q permits higher rates to be paid on longer-maturity deposits. Since certificates maturing in 4 years or more were first offered in mid-1973, their proportion of total small-denomination time deposits has
increased from 3.8 to 32.7 per cent in April 1976. For the previous survey year alone, these longer-maturity, small-denomination time deposits increased their relative share of con-sumer-type time deposits by more than 6.0 percentage points. Nevertheless, after having declined absolutely in late 1975, small-denomination time deposits maturing in less than 1 year displayed positive growth for the second consecutive quarter, perhaps reflecting use of such deposits as temporary investments while yields on market instruments remained low.

## LARGE-DENOMINATION TIME DEPOSITS

Between January and April commercial banks allowed a substantial volume of large-denomination time deposits to run off, reflecting pro-

${ }^{1}$ Includes time deposits, open account, issued in passbook, state ment, or other forms that are direct alternatives for regular savings accounts. Most of these are believed to be in accounts totaling less accounts. Most of these are believed to be in accounts totaling less the appropriate maturity category.
Note-Data were compiled jointly by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance

Corporation. The information was reported by a probability sample of all insured commercial banks.

Some deposit categories include a small amount of deposits outstanding in a relatively few banks that no longer issue these types of deposits and are not included in the number of issuing banks. Dollar amounts may not add to totals because of rounding.

For notes, see p. 831 .
longed weak business loan demand, coupled with the rapid growth in consumer-type time and savings deposits. This continues the pattern that began in early 1975; between January 1975 and April 1976 the outstanding volume of large-denomination time deposits-including negotiable and nonnegotiable CD's and open accountscontracted by $\$ 26.0$ billion. Moreover, the decline was proportionally divided between negotiable and nonnegotiable deposits, with both
categories declining approximately 25 per cent. With yields on commercial paper and on other money market instruments dropping from 10 to 25 basis points, rates of interest on large-denomination time deposits also declined during the 3 months ending in April. At the end of April, three-fourths of all large CD's outstanding were at banks offering rates of less than 5.5 per cent; the proportion in January was about three-fifths.

## NOTES TO APPENDIX TABLES 1-8:

[^2] banks. The data were expanded to provide universe estimates.

Figures exclude banks that reported no interest rate paid and that held no deposits on the survey dates, and they also exclude a few banks that had discontinued issuing these instruments but still had some deposits outstanding on the survey date. Dollar amounts may not add to totals because of rounding.
In the headings of these tables under "Most common rate paid (per cent)" the rates shown are those being paid by nearly all reporting banks. However, for the relatively few banks that reported a rate in between those shown, the bank was included in the next higher rate.

## NOTES TO TABLE 2:

deposit inflows during the 30 -day period. If the rate changed during that period, the rate reported was the rate prevailing on the largest dollar volume of infows from the time of the last rate change to the survey date.
While rate ranges of $1 / 4$ or $1 / 2$ of a percentage point are shown in this and other tables, the most common rate reported by most banks was the top rate in the range; for example, $4.00,4.50$, etc. Some deposit categories exclude a small amount of deposits outstanding in a relatively few banks that no longer issue these types of deposits and are not included in the number of issuing banks.
Figures may not add to totals because of rounding.

## Statement to Congress

Statement by Philip C. Jackson, Jr., Member, Board of Governors of the Federal Reserve System, before the Subcommittee on Commerce, Consumer, and Monetary Affairs of the Committee on Government Operations, U.S. House of Representatives, September 16, 1976.

I welcome the opportunity to testify today before the Subcommittee on Commerce, Consumer, and Monetary Affairs regarding the issue of enforcement of the Truth in Lending Act. The Board of Governors appreciates your interest in our enforcement efforts. As you are aware, the Board's staff and members of the subcommittee staff have met on a number of occasions during the last few weeks in preparation for these hearings. I would like to begin by presenting an overview of the Federal Reserve System's previous effort at enforcement of Truth in Lending and the new plan for enforcement of all consumer laws and regulations in the future.

The Federal Reserve System has a dual responsibility under the Truth in Lending Act. First, the Board of Governors has the responsibility to issue regulations to implement the Act. To this end, the Board issued Regulation Z in 1969. These regulations apply to all persons and entities who regularly extend consumer credit. This task also includes the issuance of numerous amendments and interpretations designed to resolve uncertainties as to the impact of the legislation. The staff has also issued more than 1,100 public position letters regarding the Regulation.

While the Board's emphasis has been on rulewriting, the Federal Reserve System also has responsibility to enforce the Regulation among some 1,050 State chartered banks that are members of the System. This enforcement responsibility is carried out in the first instance
by the 12 Federal Reserve Banks, which maintain a force of examining personnel who perform annual examinations of the State member banks.

Compliance by State member banks is monitored through a review of each bank's formal policies and procedures, as well as an examination of the actual practices followed. To illustrate, compliance with Truth in Lending requirements is verified through review of the bank's policies and procedures in granting direct and indirect consumer loans, the disclosure forms used in connection with those loans, and copies of its advertising. Violations are called to the attention of management with a view toward informing the bank of the law's requirements, obtaining correction, and getting the bank to adopt measures to prevent future occurrences. Violations and the bank management's plan for correction are also noted on a separate page in the Examination Report. Depending upon the nature and seriousness of the violation, the Federal Reserve Bank, in transmitting a copy of the Examination Report to the bank, may highlight the violation and ask for management's response by a given date as to the action taken to prevent recurrences of the violation. Of course, during any subsequent examination, a determination is made as to whether violations previously cited have been corrected.

Enforcement of the Truth in Lending Act is also carried out through the investigation of consumer complaints concerning the State member banks. During the first half of 1976, the 12 Federal Reserve Banks handled 1,131 complaints. Two-thirds of these complaints were investigated by the Reserve Banks, as they related to State member banks. The remaining one-third involved creditors not under the System's direct supervision and were forwarded to the appropriate enforcement agency. Where
violations of the Act have been found, the banks are told to correct them. The Board is made aware of compliance deficiencies at State member banks by the Reserve Banks, which prepare a quarterly report for the Board summarizing the consumer complaint activity.

The Board and the Federal Reserve Banks have taken a number of steps to provide examiners with the training and investigatory tools needed to perform effective Truth in Lending compliance reviews. Before Regulation Z became effective (July 1, 1969), members of the Board's staff conducted seminars for examiners at the Federal Reserve Banks explaining the requirements of the Regulation. This program was repeated in 1973. In addition, the Board prepared an extensive examination manual and checklist on Truth in Lending designed to be used by examiners for enforcing Regulation Z . In connection with the Fair Credit Billing Act, the Board conducted intensive reviews of the new requirements for both the key examination personnel of the Reserve Banks and for persons from the other Federal enforcement agencies. In addition, the Federal Reserve Banks have held numerous training sessions for examiners, particularly newly appointed examiners.

Each System examiner attends our Assistant Examiner and Examiner Schools, which devote time to explaining Regulation Z and to training examiners to determine whether State member banks are in compliance with the law. It should be noted that some examiners from State banking departments also attend the System's schools.

Since enactment of the Truth in Lending Act in 1968, the Board has conducted an extensive consumer and creditor educational program relating to the Act and to Regulation Z. Education to assist the consumer in understanding the information and other benefits that the legislation is intended to provide is regarded as very important. Newspaper articles, interviews, and radio appearances continue to be used in our efforts to acquaint the general public with the Truth in Lending Act. Consumer affairs liaison officers and staff at the Federal Reserve Banks also conduct frequent meetings and seminars for creditor and consumer groups.

The Board believes that education of creditors is an important device in preventing noncompliance problems. As an example of this educational program, following the passage of the recent Fair Credit Billing Amendments to the Act and the Board's issuance of implementing amendments to Regulation Z, the Board's staff participated in numerous meetings and seminars for the purpose of explaining to creditors the new provisions and requirements. Approximately 6,200 creditors attended these meetings, which were held throughout the United States during 1975.

The System has also distributed more than two million copies of a pamphlet that contains provisions of both the Act and Regulation Z, as well as questions and answers concerning compliance matters. In addition, more than $31 / 2$ million copies of a leaflet explaining the basics of Truth in Lending to consumers have been distributed, including more than a half-million copies of a Spanish language version. Our staff is developing similar pamphlets on the provisions of the Fair Credit Billing and Equal Credit Opportunity Acts.

Up to this point, the System has been able to utilize the standard bank examination process to determine State member bank compliance with Truth in Lending. However, with the growth of consumer credit legislation, we recognize the need for expanding our enforcement efforts. These new consumer-oriented laws, all of which have been enacted during the past 2 years, include the Fair Credit Billing Act, Equal Credit Opportunity Act, Consumer Leasing Act, Home Mortgage Disclosure Act, Real. Estate Settlement Procedures Act, and the provisions of the Federal Trade Commission Improvement Act relating to unfair and deceptive acts and practices by banks. In recognition of this expansion, the Board has recently approved the following program.

1. The establishment of a special consumer compliance examination school to be held in Washington, D.C. This school will acquaint examiners more fully with the requirements of the many consumer credit regulations and the methods for enforcing them. The first school is scheduled to begin September 27, 1976, and
additional schools will be scheduled thereafter.
2. Institution of an intensive educational and advisory service in each Federal Reserve Bank to assist State member banks in their efforts toward compliance. Each Reserve Bank is establishing a team of specialists to assist State member banks in complying with the Board's consumer regulations.
3. Special examination of State member banks shortly to be initiated by bank examiners who have received special training in the consumer credit regulations. These examinations ordinarily would be conducted and scheduled to coincide with the regular commercial examinations, but they may, at times, be scheduled separately. After the first 24 months of the program (December 31, 1978), a thorough evaluation of the program would be conducted.
4. The immediate formation of a special task force, comprised of representatives from the Board and the examining departments of the Federal Reserve Banks, to study and promptly report to the Board on the following issues:
a. The implementation of specific examination procedures to carry out consumer regulation compliance.
b. The appropriate sample size needed to measure a bank's compliance with the regulations, for example, the quantity of disclosure forms, finance charge computations, and annual percentage rate calculations to be reviewed.
c. The determination of what steps should be taken when violations are discovered.
d. The expansion of the System's public education program to inform creditors and consumers about the new consumer legislation.
5. A plan to involve the new Consumer Advisory Council to the fullest extent possible in bringing to its attention Truth in Lending abuses.

The efforts outlined above should result in an even more effective enforcement program. In this connection, the Comptroller of the Currency and the Federal Deposit Insurance Corporation have also been evaluating existing procedures. During the last 3 months, the staff of the Board has been working with the staffs of these two agencies toward developing a uniform
approach to examinations of commercial banks. To date, the product of this effort includes development of examination manuals, report pages, training manuals, and interagency instructors for the agencies' consumer regulations training schools.

The subcommittee also requested that the Board present its position on the merits of three issues relating to noncompliance disclosure. These issues are: (1) notification to individual borrowers that their loan transaction may contain a violation of some section of the Truth in Lending regulations; (2) disclosure through the media of the degree of individual bank noncompliance with Truth in Lending regulations; and (3) the relationship of disclosure to the self-enforcing nature of the Truth in Lending Act.

The Board believes it would be premature to take positions on these issues prior to receipt of the task force report mentioned earlier. These issues involve numerous and difficult considerations that the Board believes need the results of further analysis and experience before being decided. I can assure you, however, that the Board will give these matters the attention they deserve, and I would be happy to report to you when the Board finally adopts its positions. However, in order to be as helpful to this subcommittee as possible, I would like to now raise some of our primary concerns with the points you mention.

As the Board has repeatedly indicated both in testimony and reports to the Congress, the majority of violations of the Truth in Lending Act are purely technical in nature. Given the highly complex nature of the Regulation, technical violations will occur due to unintentional and inevitable human error. An example of such an error would be the failure to denote a prepaid finance charge as such (although it is disclosed as a finance charge). In most violations, the customer is neither overcharged nor misled. It may be unwarranted to notify borrowers and/or the media that a bank has committed such technical violations. Such a procedure may unduly encourage a proliferation of civil actions to be brought against the offending bank even when only technical violations have occurred.

Much of the present complexity of the Act and Regulation Z reflects the impact of the civil liability considerations. The threat of severe penalties for relatively minor technical violations has led many creditors to seek greater certainty by requesting official Board amendments and interpretations, which further complicate the Regulation. Although private causes of action provide an important enforcement tool for the Act, the Board believes that the Congress should carefully review the present civil liability provisions to determine whether modification of them might reduce needless litigation and the resulting regulatory complications.

The Board has taken one action and is considering another that may assist in reducing unnecessary litigation. The Board has adopted procedures implementing the provisions of Public Laws 94-222 and 94-239, which provide a defense for creditors relying upon letters issued by duly authorized officials of the Board in connection with Regulations B and Z. In addition, the Board is considering the development of standardized Truth in Lending disclosure forms, or portions of forms, on which creditors could rely in complying with the Act. It is hoped that these forms will prove especially beneficial to those creditors, such as small retailers, who do not have access to, or cannot afford, specialized legal counsel to design their own forms.

While these measures should reduce the present volume of litigation and help alleviate confusion resulting from the complexity of the Act and the Regulation, the Board has asked that the Congress also study the possibility of limiting the penalty provisions of the statute to violations that actually interfere with the consumer's ability to make meaningful comparisons of credit terms. Only a limited number of terms
seem to be genuinely helpful in this regard. These probably include the annual percentage rate, the finance charge, the amount financed, and the repayment schedule. Perhaps only material misstatements of these terms should be brought to the attention of consumers and civil liability should attach only when such misstatements have occurred. This would leave technical violations to be dealt with by administrative remedies. Under present law, a creditor may be penalized for purely technical violations of which the consumer may have been unaware at the time and which in no way entered into the decision to accept or reject the credit terms offered. This situation lends itself to abuse and has overburdened some courts with Truth in Lending litigation.

From 1972 through September 1975, approximately 6,100 suits were filed in Federal District courts alleging violations of the Truth in Lending Act. This indicates to some degree that the self-enforcement mechanism within the Act is being exercised. Many of these suits, however, were the result of technical violations being committed and were not initiated solely on the basis of a violation of the Act, but as a part of a bankruptcy or other collection proceeding; thus, it would appear that the thrust of civil actions brought under the Act has not been directed to improving those pertinent disclosure items that assist consumers in shopping for credit. The Board shares the concern of the Congress that these issues concerning compliance with Truth in Lending and other con-sumer-oriented regulations must be resolved.

The Board sincerely appreciates the opportunity to come before this subcommittee and to be of assistance to it in its oversight responsibilities. I would be more than glad to answer any questions you may have.

# Record of Policy Actions of the Federal Open Market Committee 

## MEETING HELD ON AUGUST 17, 1976

## 1. Domestic Policy Directive

Preliminary estimates of the Commerce Department indicated that growth in real output of goods and services had slowed to a rate of 4.4 per cent in the second quarter from the rate of 9.2 per cent to which it had accelerated in the first quarter. The preliminary estimates also indicated that the fixed-weighted price index for gross domestic business product ${ }^{1}$ had risen at an annual rate of 4.6 per cent in the second quarter, up from the relatively low rate of 3.7 per cent in the first quarter. Staff projections continued to suggest that real GNP would expand at a moderate pace in the current quarter and that moderate growth in output would continue well into 1977. The projections also suggested that average prices in the current quarter and in subsequent quarters would rise somewhat faster than they had during the second quarter.

Retail sales, which had declined in May and then rebounded in June, fell again in July and in current dollars were no higher than in March. In July sales were particularly weak at automobile outlets and at food and general merchandise stores. Sales of automobiles apparently picked up in early August, owing in part to special sales incentives provided by manufacturers.

In contrast with the recent behavior of consumer demands, business demands for plant and equipment appeared to be gaining some momentum. New orders for nondefense capital goods rose in June for the sixth consecutive month. While orders in real terms were still below the pre-recession peak in the summer of 1974, they were up substantially from the level of last December. Unfilled orders for nondefense capital goods, which had declined persist-

[^3]ently since the summer of 1974, stabilized in May and June. In addition, contract awards for commercial and industrial buildings (measured in terms of floor space) advanced in June. More significantly, from the first to the second quarter, contract awards expanded sharply to the highest level since the first quarter of 1975.

The index of industrial production increased only a little in July. As in June, output of both durable and nondurable consumer goods was about unchanged. The expansion in production of business equipment slowed more in June than had been indicated at first, and the rise continued at a reduced rate in July. Over-all output of materials increased slightly, reflecting further gains among durable goods materials. Capacity utilization in the materialsproducing industries registered 81 per cent, the same as in May and June.

Over the 4-month period April through July the rise in industrial production slowed to an annual rate of about 5 per cent from a rate of about 12 per cent over the first 3 months of the year. This retardation apparently was in response to an accumulation of nondurable goods inventories beyond desired levels as well as to the easing in consumer demands. Over-all output of nondurable goods grew no further after March. Output of durable goods continued to advance, but the rise was somewhat less rapid than earlier in the year and was concentrated in production of steel and other durable goods materials.

In manufacturing, both employment (adjusted for strikes) and the average workweek continued to change little in July. However, employment gains were large in State and local government, trade, and services. In consequence, total nonfarm payroll employment rose substantially after 2 months of little change. The civilian labor force, as well as total employment, apparently increased sharply, and the unemployment rate rose further-to 7.8 per cent in July from 7.5 per cent in June. From May to July unemployment rates for adult males and for household heads rose along with the rate for females.

The employment gains in July suggested that wage and salary disbursements had risen, after having fallen in June for the first time in 16 months. In addition, a large increase in transfer payments was anticipated, owing to a cost-of-living increase of 6.4 per cent in social security payments. As a result, the expansion in total
personal income-which had slowed in June-was estimated to have accelerated considerably in July.

Private housing starts were little higher in the second quarter than in the first, as had been reported at the time of the July meeting of the Committee; data for July were not yet available at the time of the August meeting. In June, the latest month for which figures were reported, total mortgage debt financed by savings and loan associations reached a new high, and their outstanding mortgage commitments were near a record level at the end of the month. The ready availability of mortgage credit was helping to keep mortgage interest rates from rising significantly even though demands for such credit were increasing.

The index of average hourly earnings for private nonfarm production workers advanced more in July than in June. Over the first 7 months of this year, however, the rise in the index was somewhat below the rapid rate of increase during 1975. In the second quarter, productivity in the private business sector of the economy continued to improve at a good pace, and the rate of increase in labor costs per unit of output remained moderate.

The wholesale price index for all commodities continued to rise at a moderate rate in July. Prices of industrial commodities, which had risen more in June than on the average during the first 4 months of the year, rose at a somewhat higher rate in July. The advance was accounted for in large part by increases in prices for three major groups of commodities: fuels and power, metals and metal products, and lumber and plywood. At the same time, average prices of farm products and foods declined, reflecting mainly decreases in prices of livestock and meats.

The consumer price index rose at an annual rate of about 6 per cent in June and also over the second quarter, compared with a rate of only 3 per cent over the first quarter and more than 7 per cent over the second half of 1975. The sharp first-quarter deceleration and the subsequent acceleration were attributable in large part to prices of foods and petroleum products: Foods advanced throughout the second quarter after having declined throughout the first, and gas and oil increased in May and June after having declined for 5 months.

Staff projections for the second half of 1976 differed little from those of 4 weeks earlier; they continued to suggest that the slack-
ening in economic growth in recent months would prove to be temporary. It was expected that expansion in business fixed investment would accelerate and that business investment in inventories would increase further as manufacturers and distributors endeavored to maintain stocks in line with rising sales. It was anticipated that disposable personal income and personal consumption expenditures would grow at faster rates than they had in the second quarter and that residential construction activity would continue to recover. Projected growth in State and local government expenditures for goods and services was a little stronger now than a month earlier.

The U.S. foreign trade balance-which had remained in deficit in May, according to revised figures-was in still larger deficit in June, reflecting an upsurge in imports of fuels from a reduced level. In the second quarter as a whole, however, the deficit in the trade balance was slightly below that in the first quarter. Exports of agricultural products rose considerably in the latest quarter, and exports of other commodities continued their upward trend in response to further recovery in economic activity abroad. However, the gain in exports was offset by an expansion in imports of fuels, which reflected rising business activity in this country and declining domestic production of fuels. Imports of other commodities were about unchanged after having risen sharply in the first quarter.

The average value of the dollar against leading foreign currencies changed little in the interval between the July and August meetings of the Committee. On balance, the dollar remained close to the level reached in April following the rise of some 15 per cent during the previous 12 months.

Late in the inter-meeting period, a rise in the German mark, triggered by substantial orders for marks just before the monthend, revived market expectations that the relatively low rate of inflation in Germany would eventually require a revaluation of the mark. The mark's rise exerted pressure on the exchange-rate margins maintained among certain European currencies; this pressure subsided in the wake of significant increases in interest rates in Belgium and the Netherlands.

Total loans and investments at U.S. commercial banks increased further during July. For the first time in many months, most of the gain in the total was accounted for by an increase in loans. Outstanding business loans rose, on a seasonally adjusted basis,
and with outstanding commercial paper of nonfinancial businesses continuing to expand, total short-term business credit advanced for the third consecutive month.

Bank holdings of securities changed little during July. While holdings of U.S. Government securities declined-in contrast to the preceding 18 months when acquisitions of Treasury securities had accounted for the bulk of the expansion in total bank creditholdings of other securities, chiefly short-term State and local government notes, increased.

The narrowly defined money stock $\left(M_{1}\right)$ grew at a seasonally adjusted annual rate of nearly 7 per cent in July, after the mild contraction in June that had resulted in part from a large increase in U.S. Treasury cash balances. Much of the renewed growth in July appears to have reflected a reversal of the earlier build-up in Treasury balances. Over the first 7 months of this year the annual growth rate of $M_{1}$ averaged about $53 / 4$ per cent.

Growth of $M_{2}$ and $M_{3}$ accelerated in July-to annual rates of 12.5 and 13.2 per cent, respectively-reflecting not only the rebound in $M_{1}$ but also increased flows into savings and consumertype time deposits at commercial banks and thrift institutions. Savings accounts at commercial banks, which had held steady in June after several months of rapid growth, expanded rapidly in July. Inflows at thrift institutions, which had fallen off somewhat in June, resumed the strong growth evident over the first 5 months of the year.

The bank credit proxy expanded at a much slower rate in July, following the surge that had developed in June when banks, partly to increase deposit totals on their midyear statements, raised the outstanding amount of negotiable CD's by nearly $\$ 2.5$ billion. In July banks resumed net redemptions of CD's, reducing their amounts outstanding by about $\$ 1$ billion.

System open market operations since the July meeting had been guided by the Committee's decision to seek bank reserve and money market conditions consistent with moderate growth in the monetary aggregates over the period ahead. As the inter-meeting period progressed, incoming data suggested that in the July-August period growth in $M_{1}$ and $M_{2}$ would be close to the midpoints of the ranges specified by the Committee. In these circumstances, System open market operations were directed toward maintaining conditions of
reserve availability consistent with a Federal funds rate of about $51 / 4$ per cent-the rate prevailing at the time of the July meeting and the midpoint of the operating range that the Committee had specified for the inter-meeting period.

With the Federal funds rate holding at about $51 / 4$ per cent, with money growth remaining moderate, and with other data suggesting less economic strength than had been generally anticipated, interest rates declined somewhat further during the inter-meeting period. In short-term markets these declines ranged from about 10 to 20 basis points; the market yield on 3-month Treasury bills was 5.14 per cent on the day before this meeting compared with 5.23 per cent on the day before the July meeting. In early August major commercial banks responded to the further declines in short-term market rates by cutting the rate on their prime business loans from $71 / 4$ to 7 per cent.

In markets for longer-term securities, rate declines during the inter-meeting period also ranged up to nearly 20 basis points. Investor demand was strong for the new securities offered in the Treasury's large mid-August refinancing. Three new Treasury issues were involved: $\$ 2$ billion of a 3 -year note, auctioned on August 3 to yield 6.91 per cent; $\$ 1$ billion of a 25 -year bond, auctioned on August 6 to yield 8.01 per cent; and $\$ 4$ billion-or more, at the discretion of the Treasury-of an 8 per cent, 10 -year note, sold at par on subscriptions accepted through August 4. Subscriptions for the 10 -year note were heavy, and the Treasury announced that it had made allotments totaling $\$ 7.6$ billion. Accordingly, new cash raised in the refinancing amounted to $\$ 6.1$ billion, instead of the $\$ 2.5$ billion originally announced. Even so, prices of the new Treasury securities-particularly the two longerterm issues-rose to a premium in the secondary market. Prices also rose in the markets for corporate and municipal bonds. The volume of new debt offerings in those markets declined about seasonally in July and was expected to remain relatively modest in August.

The unexpectedly large sale of 10 -year notes by the Treasury boosted its net cash borrowing in July and the first half of August to $\$ 11.5$ billion. As a result, Treasury cash needs for the remainder of the third quarter were expected to be covered with no difficulty. At its July meeting, the Committee had agreed that from the
second quarter of 1976 to the second quarter of 1977 average rates of growth in the monetary aggregates within the following ranges appeared to be consistent with broad economic aims: $M_{1}, 41 / 2$ to 7 per cent; $M_{2}, 71 / 2$ to $91 / 2$ per cent; and $M_{3}, 9$ to 11 per cent. The associated range for growth in the bank credit proxy was 5 to 8 per cent. It was agreed that the longer-term ranges, as well as the particular aggregates for which such ranges were specified, would be subject to review and modification at subsequent meetings. It also was understood that short-run factors might cause growth rates from month to month to fall outside the ranges contemplated for annual periods.

In the discussion of current policy at this meeting, it was brought out that the accelerated expansion in $M_{1}$ since early this year, taken in conjunction with the reduced rate of growth in nominal GNP and with relatively little change in interest rates, could indicate that the downward shift in the demand for money that was so evident in the latter part of 1975 was proceeding much more slowly. It was also suggested that $M_{1}$ and $M_{2}$ might grow at moderate rates over the August-September period, although wide fluctuations in Treasury deposits could have an impact on the rate of monetary growth from month to month. With respect to $M_{2}$, inflows to banks of time and savings deposits other than money market CD's might be temporarily restrained in August by payments for the new 8 per cent, 10 -year note sold by the Treasury.

It was anticipated that demands in credit markets would be modest in the weeks ahead. The monthly volume of corporate and of State and local government bonds offered to the public in the August-September period was expected to be well below the average in the first 6 months of this year. However, dealers in Government securities held a large volume of U.S. Government and Federal agency issues that had yet to be distributed to ultimate holders.

During the Committee's discussion at this meeting no member expressed substantial disagreement with the staff projection of moderate growth in real GNP, although several members did stress the elements of weakness that had developed in the past few months. It was felt that uncertainty about the precise course of economic developments had increased, and a few members who earlier had viewed the outlook as somewhat stronger than suggested
by the staff projections no longer did so. One member who had been concerned about the possibility of a boom during the next 12 months-with attendant shortages, bottlenecks, and intensified upward price pressures-now regarded that as unlikely.

While agreeing that moderate growth in the economy was the most likely outcome, a few members suggested that one could place more emphasis on the elements of current and potential weakness in the situation. With respect to consumer demands, for example, one could note that retail sales of automobiles had been stimulated to a degree by extension of maturities on instalment credit, which could not be counted on as a continuing stimulus; that sales of other consumer goods had not been especially buoyant; and that the rapid rise in prices of various consumer services might be dampening growth in sales of goods. It was also noted that questions could be raised about the outlook for residential construction, for purchases of goods and services by State and local governments, and for business fixed investment. With respect to the last, while the expansion in new orders for nondefense capital goods was promising, one member noted that it did not seem to be confirmed by reports from machine tool producers. Moreover, one member observed that business attitudes toward both fixed and inventory investment might be more conservative in this expansion than in the past because of the severe impact of the preceding recession on many businessmen who had forgotten about the business cycle.

It was repeatedly pointed out, however, that the current lull in the expansion had not lasted long enough to suggest that a decline in economic activity was imminent. In this connection it was stressed that detailed studies of business cycles in the United States and other industrial countries had revealed that the expansion phase was frequently characterized by retardation in growth of activity or even a brief minor decline at some time during its second year. Afterwards growth accelerated again. In large part, those subcyclical movements reflected minor and transitory inventory adjustments. The notion that a business cycle expansion is a continuous upward movement at a constant or gradually diminishing rate does not conform to experience.

In general, Committee members felt that the pace of expansion in over-all economic activity would soon pick up again. Business
fixed investment was seen to be recovering, even if at a slower pace than had been anticipated. It was noted that, in addition to the rise in new orders for nondefense capital goods over the first 6 months of the year, the physical volume of contracts for commercial and industrial buildings was increasing for the first time in this business expansion, and that construction of pipelines, power plants, and refineries for some time had been an expansive force. Moreover, corporate profits had experienced a considerable recovery. It was observed that business confidence had been badly shaken by the severity of the recession-especially because many businessmen had come to believe that fluctuations in business activity could be prevented or at least minimized-but that now confidence was gradually reviving and business fixed investment was again becoming the driving force of the economy. The caution that now existed, it was noted, assured avoidance of excesses and promised continuance of the expansion.

As to policy for the period immediately ahead, Committee members in general advocated continuation of the current stance. Most members favored directing operations toward maintaining about the current Federal funds rate. Accordingly, they preferred to give more weight than usual to money market conditions in formulating the operating instructions contained in the last paragraph of the domestic policy directive, and they advocated specifying a relatively narrow range for the Federal funds rate centered on the prevailing rate of $51 / 4$ per cent. A range of 5 to $5^{1 / 2}$ per cent was suggested.

Some members preferred to specify a somewhat wider range for the Federal funds rate and to continue to base operating decisions in the period immediately ahead primarily on the behavior of the monetary aggregates. However, the range they favored- $-43 / 4$ to $53 / 4$ per cent-also was centered on the prevailing rate of $51 / 4$ per cent.

One or two members indicated that, whereas a case might be made for a slight easing in money market conditions in reaction to the elements of weakness in the business expansion, they were not prepared to urge that case. A number of reasons were advanced by various members against such a course at this time: Liquidity already was ample to finance a good rate of expansion; the degree of easing that was being contemplated was too slight to have a
beneficial effect in the short run, and the pace of expansion in activity probably would have picked up long before the easing would have had much effect; and any easing at this time might be misinterpreted-perhaps increasing rather than allaying uncertainties and making business attitudes still more cautious.

There was near unanimity in the preferences expressed for ranges of growth in the monetary aggregates over the August-September period. The members favored a 2 -month range of 4 to 8 per cent for $M_{1}$ and either $71 / 2$ to $111 / 2$ or 7 to 11 per cent for $M_{2}$.

At the conclusion of the discussion the Committee decided to seek to maintain prevailing bank reserve and money market conditions over the period immediately ahead, provided that monetary aggregates appeared to be growing at about the rates now expected. Specifically, the Committee concluded that growth in $M_{1}$ and $M_{2}$ over the August-September period at annual rates within ranges of 4 to 8 per cent and $71 / 2$ to $111 / 2$ per cent, respectively, would be appropriate. As at other recent meetings, the Committee decided that, in assessing the behavior of the aggregates, approximately equal weight should be given to $M_{1}$ and $M_{2}$.

It was agreed that System operations until the next meeting would be directed toward maintaining the weekly-average Federal funds rate at about its current level of $51 / 4$ per cent. The members also agreed that, if growth in the aggregates should appear to be deviating significantly from the rates expected, the weekly-average Federal funds rate might be expected to vary in an orderly fashion within a range of 5 to $51 / 2$ per cent. As customary, it was understood that the Chairman might call upon the Committee to consider the need for supplementary instructions before the next scheduled meeting if significant inconsistencies appeared to be developing among the Committee's various objectives.

The following domestic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests that growth in real output of goods and services is remaining moderate in the current quarter. In July industrial production changed little, but total employment expanded by a substantial amount. The civilian labor force also increased sharply, and the unemployment rate rose from 7.5 to 7.8 per cent. Retail sales declined in July, following the rebound in June. The rise in the wholesale price index for all
commodities remained moderate, as average prices of farm products and foods declined. However, average prices of industrial commodities rose more than in other recent months. So far this year the advance in the index of average wage rates has been somewhat below the rapid rate of increase during 1975.

The average value of the dollar against leading foreign currencies has remained relatively steady in recent weeks, despite some disturbances in exchange markets for European currencies. In June the U.S. foreign trade deficit increased, but the deficit for the second quarter as a whole was somewhat smaller than that for the first quarter.
$M_{1}$, which had declined slightly in June, expanded appreciably in July. Inflows of the time and savings deposits included in the broader aggregates were considerably stronger than in June, and growth in $M_{2}$ and $M_{3}$ was rapid. Market interest rates have declined somewhat further in recent weeks.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions that will encourage continued economic expansion, while resisting inflationary pressures and contributing to a sustainable pattern of international transactions.

To implement this policy, while taking account of developments in domestic and international financial markets, the Committee seeks to maintain prevailing bank reserve and money market conditions over the period immediately ahead, provided that monetary aggregates appear to be growing at about the rates currently expected.

Votes for this action: Messrs. Burns, Volcker, Black, Coldwell, Gardner, Jackson, Kimbrel, Lilly, Partee, Wallich, Winn, and Guffey. Absent and not voting: Mr. Balles. (Mr. Guffey voted as alternate for Mr. Balles.)

## 2. Open Market Operations in Federal Agency Issues

At this meeting the Committee reviewed its current practices with regard to System operations in Federal agency issues. In the discussion it was noted that operations in such securities had proved to be useful in achieving the Committee's reserve objectives. At the conclusion of the discussion, the members agreed to continue the System's participation in the markets for the securities of the various agencies.

Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's Annual Report, are released about a month after the meeting and are subsequently published in the Bulletin.

## Credit by Brokers and Dealers

The Board of Governors has adopted amendments to its Regulation T instituting a uniform margin requirement in connection with options writing.

1. Effective January 1, 1977, section 220.3(d) is amended and a new paragraph (i) is added as follows:

## Section 220.3-General Account

(d) Adjusted debit balance. For the purpose of this part, the adjusted debit balance of a general account, special bond account, or special convertible debt security account shall be calculated by taking the sum of the following items:
(5) The amount of margin as provided for in paragraph (i) of this section and section 220.8 (the Supplement to Regulation T) for each transaction involving the issuance, endorsement or guarantee of any put, call or combination thereof.
(i) Options. (1) The amount to be included in the adjusted debit balance of an account as the margin required for each transaction involving the issuance, endorsement or guarantee of any put or call shall be such amount as the Board shall prescribe from time to time in section 220.8 (the Supplement to Regulation $T$ ) as the margin required for the writing of options, increased by any unrealized loss on each such commitment, or reduced by any excess of the exercise price over the current market value of the underlying security in the case of a call or any excess of the current market value of the underlying security over the exercise price in the case of a put. Such sum, however, shall not exceed the current market value of the underlying security in the case of a call, or the exercise price in case of a put, nor be less than $\$ 250$ in the case of either a call or a put.

Such sum need not be included in the adjusted debit balance when there is held in the account any of the following:
(i) The underlying security in the case of a call or a short position in the underlying security in the case of a put;
(ii) Securities immediately convertible into or exchangeable for the underlying security without restriction or the payment of money in the case of a call, provided that the right to convert or exchange does not expire on or before the expiration date of the option;
(iii) An agreement under which a bank, which is holding the underlying securities or the required cash, is obligated to deliver, in the case of a call, or accept, in the case of a put, the underlying securities against payment of the exercise price upon exercise of the option;
(iv) A long position in a call on the same number of shares of the same underlying security which does not expire before the expiration date of the call issued, endorsed or guaranteed, provided that there is also added to the adjusted debit balance the amount, if any, by which the exercise price of such long position exceeds the exercise price of the call issued, endorsed or guaranteed;
(v) A long position in a put on the same number of shares of the same underlying security which does not expire before the expiration date of the put issued, endorsed or guaranteed, provided that there is also added to the adjusted debit balance the amount, if any, by which the exercise price of the put issued, endorsed or guaranteed exceeds the exercise price of such long position; or
(vi) A warrant to purchase the underlying security, in the case of a call, which does not expire on or before the expiration date of the call, provided that there is also added to the adjusted debit balance the amount, if any, by which the exercise price of the warrant exceeds the exercise price of the call, issued, endorsed or guaranteed. A warrant used in lieu of the required margin under this provision shall have no loan value in the account.
(2) When a security held in the account serves in lieu of the margin required for a call, such security shall be valued at no greater than the exercise price of the call.
(3) When a short position held in the account serves in lieu of the margin required for a put, the amount prescribed by paragraph (d)(3) of this section as the amount to be added to the adjusted debit balance in respect of short sales shall be increased by any unrealized loss on the position.
(4) When both a put and a call are issued, endorsed or guaranteed in a general account, special bond account or special convertible debt security account on the same number of shares of the same underlying security with the same expiration date and the same exercise price (a straddle), the amount of margin required shall be the margin on either the put or the call whichever is greater plus any unrealized loss on the other option.
(5) Any security position held in the account which serves in lieu of the margin required for a put or a call shall be unavailable to support any other option transaction in the account.
(6) The customer may either designate at the time the option order is entered which security position held in the account is to serve in lieu of the margin required or have a standing agreement with the creditor as to the method to be used for making the determination on any given day as to which security position will be used in lieu of the margin to support an option transaction.
2. Effective January 1, 1977, section 220.4(i) is amended and a new subparagraph (6) is added to paragraph ( j ) as set forth below:

## Section 220.4-Special Accounts

(i) Special bond account. In a special bond account a creditor may effect and finance transactions in exempted securities and registered nonequity securities for any customer. ${ }^{5}$ Call options may be issued, endorsed or guaranteed in this account on shares of any underlying equity security which is held in this account because it is an exempted security.
(j) Special convertible debt security account.***
(6) Without regard to the margin required for the writing of options in section 220.8(j) (Supplement to Regulation T), call options may be issued, endorsed or guaranteed in this account on the number of shares of an underlying security into
which a margin debt security held in the account is convertible, and put options may be issued, endorsed or guaranteed in this account on the number of shares of an underlying security sold short in the account. Such option positions may be carried in the account in conformity with the requirements of section 220.3 (d) and (i).
3. Effective January 1, 1977, a new paragraph (j) is added to section 220.8 as set forth below:

## Section 220.8-Supplement

(j) Margin required for the writing of options. The amount to be included in the adjusted debit balance of a general account, special bond account or special convertible debt security account pursuant to paragraphs (d)(5) and (i) of section 220.3, as the margin required for the issuance, endorsement or guarantee of any put or call shall be 30 per cent of the current market value of the underlying security with an adjustment for any applicable increase or reduction.

## Unfair or Deceptive Acts or Practices

The Federal Trade Commission Act as amended (Public Law 93-637) requires each of the Federal bank supervisory agencies to establish a separate division of consumer affairs and to institute a procedure for handling consumer complaints regarding unfair or deceptive acts or practices of banks under their jurisdiction. Pursuant to § 18(f) of that Act, the Board of Governors has instituted a procedure for receiving and handling consumer complaints regarding State-chartered banks that are members of the Federal Reserve System.

Effective September 27, 1976, the Board of Governors amends 12 CFR Chapter II by adding a new Part 227, to read as follows:

## Section 227.1—Definitions

For the purposes of this Part, ${ }^{1}$ unless the context indicates otherwise, the following definitions apply:
(a) Board means the Board of Governors of the Federal Reserve System.
(b) Consumer complaint means an allegation by or on behalf of an individual, group of individ-

[^4]uals, or other entity that a particular act or practice of a State member bank is unfair or deceptive, or in violation of a regulation issued by the Board pursuant to a Federal statute, or in violation of any other Act or regulation under which the bank must operate.
(c) State member bank means a bank that is chartered by a State and is a member of the Federal Reserve System.
(d) Unless the context indicates otherwise, "bank" shall be construed to mean a "State member bank," and "complaint" to mean a "consumer complaint."
Section 227.2-Consumer Complaint Procedure
(a) Submission of complaints. (1) Any consumer having a complaint regarding a State member bank is invited to submit it to the Federal Reserve System. The complaint should be submitted in writing, if possible, and should include the following information:
(i) a description of the act or practice that is thought to be unfair or deceptive, or in violation of existing law or regulation, including all relevant facts;
(ii) the name and address of the bank that is the subject of the complaint; and
(iii) the name and address of the complainant.
(2) Consumer complaints should be made to:
(i) the Director, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or
(ii) the Federal Reserve Bank of the District in which the bank is located. The addresses of the Federal Reserve Banks are as follows:

Federal Reserve Bank of Boston
30 Pearl Street
Boston, Massachusetts 02106
Federal Reserve Bank of New York 33 Liberty Street
New York, New York 10045
Federal Reserve Bank of Philadelphia 100 North 6th Street
Philadelphia, Pennsylvania 19105
Federal Reserve Bank of Cleveland 1455 East Sixth Street
Cleveland, Ohio 44101

Federal Reserve Bank of Richmond 100 North Ninth Street
Richmond, Virginia 23261
Federal Reserve Bank of Atlanta
104 Marietta Street, N.W.
Atlanta, Georgia 30303
Federal Reserve Bank of Chicago
230 South LaSalle Street
Chicago, Illinois 60690
Federal Reserve Bank of St. Louis
411 Locust Street
St. Louis, Missouri 63166
Federal Reserve Bank of Minneapolis
250 Marquette Street
Minneapolis, Minnesota 55480
Federal Reserve Bank of Kansas City
925 Grand Avenue
Kansas City, Missouri 64198
Federal Reserve Bank of Dallas
400 South Akard Street
Dallas, Texas 75222

## Federal Reserve Bank of San Francisco 400 Sansome Street <br> San Francisco, California 94120

(b) Response to complaints. Within 15 business days of receipt of a written complaint by the Board or a Federal Reserve Bank, a substantive response or an acknowledgment setting a reasonable time for a substantive response will be sent to the individual making the complaint.
(c) Referrals to other agencies. Complaints received by the Board or a Federal Reserve Bank regarding an act or practice of an institution other than a State member bank will be forwarded to the Federal agency having jurisdiction over that institution.

## Rules Regarding Delegation of Authority

The Board of Governors has delegated to the Committee on Federal Reserve Bank Activities certain responsibilities with respect to supervision of the sale by Federal Reserve Banks of real property in connection with construction programs.

1. Effective September 8, 1976, paragraph 6 of section 265.1a is amended to read as follows:

Section 265.1a—Specific
Functions Delegated to Board Members
(a) The Committee on Federal Reserve Bank Activities, consisting of at least three members of the Board designated by the Chairman, is authorized, to act upon matters as set forth in this section pursuant to the twenty-second paragraph of section 4 and $11(\mathrm{j})$ of the Federal Reserve Act ( 12 U.S.C. $\S \S 307$ and $248(\mathrm{j})$ ) and subject to such general guidelines as may be prescribed by the Board. With respect to any approval action taken by the Committee pursuant to authority delegated herein involving a controversial matter, a policy consideration, or an expenditure of funds exceeding $\$ 500,000$, the Committee will inform the Board by memo before giving notice of its approval to the Reserve Bank. For a period of three days, any member of the Board may request that the matter be scheduled for review by the Board. The Committee is authorized:
(6) To approve or disapprove specific Reserve Bank proposals to acquire or dispose of real property for current or future building purposes, provided that the Board has previously authorized the
general Reserve Bank expansion or building program in connection with which the real property is being sought or disposed of and provided that each proposed acquisition requires commitment of no more than one million dollars $(\$ 1,000,000)$.

The Board of Governors has delegated to the Secretary of the Federal Open Market Committee authority to approve policy record entries for inclusion in the annual report if no Board member has asked for review at a Board meeting of a draft distributed for review by Board members individually.
2. Effective September 1, 1976 section 265.2 is amended by adding a new paragraph (i) to read as follows:

Section 265.2-Specific Functions Delegated to Board Employees and to Federal Reserve Banks
(i) The Secretary of the Federal Open Market Committee (or, in his absence, the Deputy Secretary) is authorized:

To approve for inclusion in the Board's annual report to Congress records of policy actions of the Federal Open Market Committee.

## Bank Holding Company and Bank Merger Orders Issued by the Board of Governors

## Orders Under Section 3 of Bank Holding Company Act

Agri-Bank Corporation, Webster City, Iowa

Order Approving
Formation of Bank Holding Company
Agri-Bank Corporation, Webster City, Iowa, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 80 per cent or more of the voting shares of The Farmers National Bank of Webster City, Webster City, Iowa ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b)
of the Act. The time for filing comments and views has expired. The Board has considered the application and all comments received, including those of the Comptroller of the Currency, in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was organized for the purpose of becoming a bank holding company through the acquisition of Bank. Bank, with deposits of $\$ 32.2$ million, ${ }^{1}$ is the largest of six banking organizations and controls approximately 41 per cent of the total deposits in the relevant banking market. ${ }^{2}$ Upon acquistion of Bank, Applicant would control the 66 th largest banking organization in Iowa, holding

[^5].27 per cent of the total commercial bank deposits in the State. Inasmuch as the proposed transaction is merely a reorganization whereby the shareholders who presently control Bank directly will control Bank indirectly through Applicant, and since Applicant presently has no subsidiaries nor engages in any activities, consummation of the proposal would not eliminate existing or potential competition or increase the concentration of banking resources in the relevant market. Therefore, competitive considerations are consistent with approval of the application.

The financial and managerial resources of Applicant, which are dependent upon those of Bank, are considered to be generally satisfactory, and their future prospects appear favorable. Although Applicant will incur some debt as a result of this proposal, it appears that the projected earnings to be derived from Bank by way of dividends should provide Applicant with sufficient revenue to meet its debt service requirements and preferred stock dividends without adversely affecting the financial position of Bank. While the principals of Applicant have certain interests in and relationships with other banking organizations in the State of Iowa, the financial and managerial resources of such organizations are such that they may be regarded as generally consistent with approval of the application. Accordingly, considerations relating to banking factors are consistent with approval of the application. While no major changes are contemplated in Bank's services, considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. Accordingly, it is the Board's judgment that the proposed transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective September 29, 1976.

Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Wallich.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

First Wewoka Bancorporation, Inc., Wewoka, Oklahoma

## Order Denying <br> Formation of Bank Holding Company

First Wewoka Bancorporation, Inc., Wewoka, Oklahoma, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) ("Act’) of formation of a bank holding company through acquisition of 80 per cent or more of the voting shares of First National Bank in Wewoka, Wewoka, Oklahoma ('Bank').

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with §3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by the Comptroller of the Currency recommending denial of the application, in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842 (c)).

Applicant is a nonoperating company formed for the express purpose of becoming a bank holding company through the acquistion of Bank. The proposed transaction involves the transfer of control of Bank from individuals to a corporation owned by the same individuals. Bank holds deposits of approximately $\$ 11.3$ million, ${ }^{1}$ representing 20.9 per cent of the total deposits in commercial banks in the Seminole County banking market, ${ }^{2}$ and ranks as the second largest of six banks operating in the market. Since the subject proposal is essentially a corporate reorganization and Applicant has no subsidiaries, it does not appear that consummation of the proposal would have any adverse effects on existing or potential competition, increase the concentration of banking resources, or have other adverse effects on any other banks in any relevant area. Thus, the Board

[^6]concludes that competitive considerations are consistent with approval of the application.

Under § 3(c) of the Act, the Board is required to consider the financial and managerial resources and future prospects of the proposed bank holding company and the bank to be acquired. With respect to the subject application, it appears that the future prospects of Applicant are entirely dependent upon the profitable operations of Bank. In this regard, Applicant proposes to service a debt of more than $\$ 430,000,{ }^{3}$ which it will incur as part of this transaction, over a twelve-year period primarily through dividends from Bank. In view of Bank's operating history, the Board is unable to conclude that Applicant's projected earnings for Bank are reasonable or attainable. The Board is of the view that the future earnings of Bank would not provide Applicant with the financial flexibility necessary to meet its debt servicing requirements as well as any unexpected problems that might arise at Bank. Furthermore, the dividends involved in the subject proposal may not provide Applicant with the necessary financial strength to service its acquisition debt while maintaining Bank's capital position. On the basis of the foregoing and other facts of record, the Board concludes that the considerations relating to the banking factors weigh against approval of the application. ${ }^{4}$

As stated previously, the proposed formation of Applicant merely represents a restructuring of Bank's ownership with no changes in Bank's operations or services. Consequently, considerations relating to the convenience and needs of the community to be served lend no weight toward approval of the application. Moreover, in view of Applicant's debt servicing requirements, consummation of the subject proposal could diminish Bank's ability to continue to serve the area as a viable banking alternative.

On the basis of all of the facts of record, it is the Board's judgment that the subject proposal would result in a bank holding company with financial resources that would be inadequate to service its debt while maintaining Bank's capital account. Accordingly, the Board concludes that consummation of the proposed transaction would

[^7]not be in the public interest and that the application should be denied.

By order of the Board of Governors, effective September 22, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, and Lilly. Absent and not voting: Governor Partee.
(Signed) Richard D. Abrahamson, [sEal] Assistant Secretary of the Board.

First Bank System, Inc., Minneapolis, Minnesota

## Order Approving Acquisition of Bank

First Bank System, Inc., Minneapolis, Minnesota, a bank holding company within the meaning of the Bank Holding Comany Act, has applied for the Board's approval under $\S 3(a)(3)$ of the Act (12 U.S.C. § $1842(\mathrm{a})(3)$ ) to acquire all of the voting shares, less directors' qualifying shares, of First National Bank of Burnsville, Burnsville, Minnesota ('Bank'’), a proposed new bank.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S 3(\mathrm{~b})$ of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of the Minnesota Commissioner of Banks and the Independent Bankers Association of Minnesota (''Protestants'), in light of the factors set forth in §3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant controls 49 banks in Minnesota with aggregate deposits of $\$ 3.9$ billion, ${ }^{1}$ representing approximately 26.4 per cent of the total commercial bank deposits in Minnesota, and is the largest banking organization in the State. ${ }^{2}$ Since Bank is a proposed new bank, its acquisition by Applicant would not immediately increase Applicant's share of commercial bank deposits in the State.

Bank is a new bank which has received preliminary charter approval from the Comptroller of the Currency and is to be located in Burnsville, a suburban community within the Minneapolis-St. Paul banking market. ${ }^{3}$ With 16 subsidiaries in the

[^8]Minneapolis-St. Paul market (the relevant market), Applicant controlled, as of June 30, 1975, deposits of $\$ 2.8$ billion, representing about 39 per cent of the market deposits, and was the largest banking organization in the market. The second and third largest banking organizations in the market controlled, respectively, about 28.7 per cent and 3.4 per cent of the market deposits. Since Bank is a proposed new bank, consummation of Applicant's proposal would not eliminate any existing competition, nor would it have any immediate effect on Applicant's share of commercial bank deposits in the market. Although Applicant is the largest banking organization in the market, it is noted that its growth in the market in the recent past has been primarily internal; it has acquired only one bank in the market since 1956. Since that time, 37 charters for new banks within the market have been issued, and Applicant's market share has declined slightly from 43.0 per cent to 39.0 per cent. In the market, Applicant faces competition from over 100 commercial banking organizations.

In its analysis of the subject application, the Board has also considered the comments and requests for a hearing submitted by Protestants. Generally speaking, Protestants contend that the proposal would have anticompetitive effects and have requested a hearing to discuss the impact this proposal would have upon competition and the concentration of financial resources in the relevant market. Protestants argue that the area to be served by Bank cannot support another bank at this time and that the acquistion of Bank by Applicant will adversely affect the viability of two new banks in the proposed service area of Bank.

The Board has examined the records of the hearings held in connection with the chartering of Bank, the written submissions of Protestants, and the responses thereto by Applicant and concludes that a formal hearing would not add significant new information or raise issues not already discussed at length in the written submissions of Protestants and Applicant and in the record of the hearings held by the Comptroller of the Currency in December 1973 and November 1974. In view of the failure of Protestants to present new information, raise new issues or demonstrate that a hearing would elicit new information or present new issues, the Board concludes that the record is sufficiently complete to enable it to make an informed judgment. Accordingly, Protestants' requests for a formal hearing are hereby denied.

The Board has analyzed the information sub-
mitted by Protestants in support of the issues they have raised and, for the reasons set forth hereinafter, it is the Board's judgment that the issues raised by Protestants are not sufficient to warrant denial of the subject application.

With respect to the first issue, the Board disagrees with Protestants' assessment of the adverse effects that the proposal would have on the viability of the two new banks in the proposed service area of the Bank. The only bank in Burnsville opened in 1972 and in 1975 became a subsidiary of American Bancorporation, the third largest banking organization in the market with total deposits of $\$ 243$ million. This bank has total deposits of $\$ 6.4$ million and appears to be well established in the market. The second new bank in the proposed service area of Bank has obtained $\$ 5.9$ million of deposits since it opened in 1974, and has become profitable in its second year of operation. On the basis of the record, the Board concludes that the attractive growth of the Burnsville area in recent years ${ }^{4}$ and the corresponding demand for banking services will continue to support existing banks, and Applicant's new bank will not seriously threaten their viability.

Similarly, the Board is unable to conclude that Protestants' assessment of the effects that this acquisition would have on the concentration of financial resources in the relevant market is correct. On the contrary, the record indicates that the Minneapolis-St. Paul area has been experiencing substantial economic growth. As noted above, this growth has resulted in new banking entrants and has reduced Applicant's market share of total deposits. Furthermore, there is no evidence in the record to suggest that Applicant is using its size and resources to the disadvantage of other banking organizations to preempt a desirable future banking location before a new bank is needed, or that this acquisition in and of itself would significantly affect the trend towards deconcentration of financial resources in the relevant market. On the basis of the facts of record, including the records of the two chartering hearings, the submissions of Protestants, and the submissions of Applicant, the Board concludes that, given the growth of the market, the large number of competing organizations, and the propensity for deconcentration,

[^9]consummation of this proposal would not result in a concentration of financial resources in the relevant market or adversely affect competition in the relevant market.

Accordingly, on the basis of the facts of record and having considered the comments of Protestants, the Board concludes that consummation of the proposed acquisition would not have significant adverse effects on existing or potential competition and that competitive considerations are consistent with approval of the application.

The financial and managerial resources of Applicant and its subsidiaries are regarded as generally satisfactory based upon the information in the record, including all bank examination information available to the Board. Bank, a proposed new bank, has no financial or operating history; however, its prospects as a subsidiary of Applicant appear favorable. Considerations relating to banking factors, therefore, are consistent with approval of the application.

Bank will serve as an additional full service banking facility to the residents of the area, including the businesses and customers of the new shopping center in which Bank will be located. Applicant has proposed that Bank will offer some services not being comparably offered by nearby banks and Bank will be open more hours than the other banks in the service area. Accordingly, these considerations relating to the convenience and needs of the community to be served lend some weight toward approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) First National Bank of Burnsville, Burnsville, Minnesota, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Minneapolis, pursuant to delegated authority.

By order of the Board of Governors, effective September 15, 1976.

[^10]abstaining: Governor Lilly. Absent and not voting: Chairman Burns and Governor Partee.
(Signed) Griffith L. Garwood,
[seal] Assistant Secretary of the Board.

The First National Bancorporation, Inc., Denver, Colorado

## Order Approving Acquisition of Bank

The First National Bancorporation, Inc., Denver, Colorado, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act [12 U.S.C. § 1842(a)(3)] to acquire 80 per cent or more of the voting shares of The First National Bank of Montrose, Montrose, Colorado ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by the Attorney General of the State of Colorado and by the Comptroller of the Currency, ${ }^{1}$ in light of the factors set forth in § 3(c) of the Act [12 U.S.C. § 1842(c)].

Applicant, the largest banking organization in Colorado, controls 11 banks (including the largest bank in the State) with aggregate deposits of $\$ 1.2$ billion, representing approximately 16 per cent of the total deposits held by commercial banks in that State. ${ }^{2}$ Colorado currently has 10 multi-bank holding companies that collectively control approximately 67 per cent of the total deposits and 34 per cent of all the banks in the State. The five largest banking organizations (all multi-bank holding companies) control approximately 57 per cent of total deposits and 25 per cent of all banks

[^11]in Colorado. Acquisition of Bank ${ }^{3}$ by Applicant would contribute to some extent to increasing deposit concentration in Colorado; however, the Board regards the effects upon concentration to be only slight inasmuch as Applicant's share of State deposits would increase by no more than approximately four-tenths of one per cent.

Bank (deposits of $\$ 30$ million) is the larger of two banks ${ }^{4}$ in the relevant banking market ${ }^{5}$ and controls approximately 63 per cent of the total deposits in that market. Applicant has no subsidiaries operating in the relevant banking market, and its closest bank subsidiary to Bank is located 61 miles to the northwest of Montrose. It appears that no meaningful competition currently exists between Bank and any of Applicant's subsidiary banks, and that it is unlikely that significant competition between these institutions would develop in the future in view of the distances involved. On the basis of the facts of record, the Board concludes that consummation of the proposal would not have any significant adverse effect upon existing competition in the relevant banking market.

Applicant, as the largest banking organization in Colorado, appears to possess the financial and managerial resources necessary to establish a de novo bank in the relevant market and, thereby, to increase the number of banking alternatives operating therein. Although population per banking office for the market is $7,800,{ }^{6}$ compared to 9,300 for the State, and deposits per bank in the market ${ }^{7}$ are below the average deposits per bank for the entire State, Montrose is growing rapidly and exhibits good prospects for continued growth in population, income, and employment opportunities. ${ }^{8}$ As a result, the Montrose banking market may be regarded as marginally attractive for $d e$

[^12]novo entry in the future. In light of the future economic prospects for the Montrose area and Applicant's ability to effect an alternative means of entry into the area, consummation of this proposal would eliminate Applicant as a potential de novo entrant into the relevant market. However, the effects of this elimination are minimized by the existence of several other potential entrants into the relevant market, including several Colorado multi-bank holding companies that have not entered the market but have the resources to do so. Inasmuch as the relevant market is only marginally attractive for de novo entry in the future and there exist other potential entrants into that market, it is the Board's judgment that, on balance, consummation of Applicant's proposal would have only slightly adverse effects upon potential competition.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are considered to be generally satisfactory based upon information in the record, including all bank examination information available to the Board. In addition, Applicant's overall financial condition will enable it to augment the capital of any of its subsidiaries should there be a need to do so in the future. Accordingly, the Board regards the banking factors as being consistent with approval of the application.

Affiliation of Bank with Applicant would enable Bank to receive Applicant's financial and managerial expertise and would provide a variety of additional services to the market. In view of the increase in economic activity that is expected in the Montrose area, it appears that the provision of these additional services by Applicant, through Bank, will have some beneficial effect upon the area in providing for its convenience and needs for banking services. Accordingly, the Board concludes that the considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application and are sufficient to outweigh any slightly adverse effects that the proposal may have on potential competition. It is the Board's judgment that consummation of the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the
effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors, effective September 30, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, and Lilly. Voting against this action: Governor Coldwell. Absent and not voting: Chairman Burns and Governor Partee.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

## Dissenting Statement of Governor Coldwell

I would deny the application of The First National Bancorporation, Inc., to acquire The First National Bank of Montrose ("Bank"), since I believe that the proposal would have significant adverse effects upon both concentration of banking resources in the State of Colorado and potential competition in the relevant banking market. In my view, such adverse effects are not clearly outweighed by other considerations reflected in the record and, therefore, the application should be denied.

Colorado is a State whose banking resources are becoming more concentrated, as is evidenced by the fact that ten multi-bank holding companies control approximately 67 per cent of the total deposits held by commercial banks in the State and 34.3 per cent of all the banks in the State. The five largest banking organizations (all multibank holding companies) control approximately 57 per cent of total deposits and 25.6 per cent of all the banks. Furthermore, among the nation's unit banking States, Colorado ranks as one of the most concentrated in terms of commercial bank deposits and among those shows the highest rate of concentration over the past seven years. Applicant, the largest bank holding company (controlling the largest bank) in Colorado, has 11 subsidiary banks and controls approximately 15.8 per cent of the total deposits held by commercial banks in that State. Applicant has been engaged in an aggressive plan of expansion since its formation in 1968 and the present proposal represents a further effort by Applicant to entrench its leading position in the State through the acquisition of a market's leading banking organization. Bank holds 63 per cent of the deposits in its market. Approval of this application would enable the State's largest banking
organization to acquire Bank, and, thereby, to continue what I regard as an undesirable trend toward increased concentration of banking resources in Colorado. This result is further exacerbated by the fact that Applicant has chosen the largest bank as a means of expanding into a new market.

In addition to the adverse effects upon concentration and banking structure in Colorado, I am concerned about the impact that the proposal would have upon potential competition in the relevant market. The Board's majority concludes, and the record supports the conclusion, that the market is somewhat attractive for de novo entry. It is clear that Applicant possesses the capabilities to enter the Montrose area through the establishment of a new banking organization and that Applicant must be perceived as a likely entrant into that market. Accordingly, consummation of this proposal would eliminate Applicant as a potential entrant into the market and, since the proposal involves the largest bank in that market, that elimination would have significant adverse effects upon potential competition.

Therefore, in view of the rapidly increasing concentration of banking resources in Colorado, the aggressive expansion of Applicant, and the adverse effects of this proposal upon potential competition, the application should be denied unless the anticompetitive effects of the proposal are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

The Board's majority has concluded that the anticompetitive effects of this proposal are outweighed by benefits that would accrue to the public. I disagree with that conclusion. Bank appears to be a strong, well-capitalized, independent institution that is already maintaining its competitive standing against the other Montrose bank, which is a subsidiary of the State's second largest bank holding company. The benefits to the public that may result from this acquisition are, in my view, weak and insufficient to outweigh the anticompetitive effects inherent in this acquisition. If the affiliation of Bank with another banking organization is thought to be desirable and beneficial to the public, such affiliation should be with another banking organization that is not one of the larger banking organizations in Colorado.

For the foregoing reasons, I would deny the application.

## IB\&T Corp.,

Pocatello, Idaho

## Order Approving Acquisition of Bank

IB\&T Corp., Pocatello, Idaho, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § $3(\mathrm{a})(3)$ of the Act ( 12 U.S.C. § 1842(a)(3)) to acquire 80 per cent of more of the voting shares of First Bank of Troy, Troy, Idaho ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received, including those of the Idaho Department of Finance recommending approval of the subject application, have been considered by the Board in light of the factors set forth in §3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the fourth largest banking organization in Idaho, controls one bank with total deposits of $\$ 209$ million, representing 7.94 per cent of the total deposits in commercial banks in the State. ${ }^{1}$ Acquisition of Bank (deposits of $\$ 22$ million) would increase Applicant's share of Statewide deposits by .82 of one per cent. Consummation of the proposed transaction would not result in a significant increase in the concentration of banking resources in Idaho, nor would it alter Applicant's Statewide ranking.

Bank is the second largest of four banks located in the Moscow-Troy, Idaho banking market (the relevant banking market for purposes of this proposal), and controls 35 per cent of market deposits. Applicant's nearest office is 33 miles from Bank and no significant competition exists between them. Under Idaho banking law, Applicant could branch de novo into the Moscow-Troy market but such entry appears unlikely in view of the fact that the area has been growing less rapidly than other parts of the State. In view of the foregoing and other factors of record, the Board concludes that approval of this application would not have any significant adverse effects upon competition.

The financial and managerial resources of Applicant and its subsidiary are considered satisfactory and their future prospects appear favorable.

[^13]As a result of consummation of this proposal, Bank's financial and managerial resources and future prospects will be strengthened. Accordingly, considerations relating to banking factors lend weight toward approval of the application. While no major changes are contemplated in Bank's services, the proposal will improve Bank's ability to continue to serve its customers and the community. Therefore, considerations relating to convenience and needs of the community to be served are consistent with, and lend some weight toward, approval of the application. Accordingly, it is the Board's judgment that the proposed acquisition would be in the public interest and should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of San Francisco pursuant to delegated authority.

By order of the Board of Governors, effective September 10, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, and Coldwell. Absent and not voting: Governors Jackson, Partee, and Lilly.
(Signed) Griffith L. Garwood, [SEAL] Assistant Secretary of the Board.

Lisco State Company, Lisco, Nebraska

## Order Approving Formation of a Bank Holding Company

Lisco State Company, Lisco, Nebraska ("Applicant"), has applied for prior approval pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)) and section 225.3(a) of Regulation Y (12 CFR 225.3(a)) to become a bank holding company through the acquisition of 89 per cent or more of the voting shares of Lisco State Bank, Lisco, Nebraska ("Bank").

Notice of the application, affording an opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act (41 Federal Register 30068). Time for filing comments and views has expired and the application and all comments received have been
considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Upon acquisition of Bank (deposits of $\$ 3.6$ million), Applicant would control the 356th largest bank in Nebraska, holding .05 per cent of total deposits in commercial banks in the State. ${ }^{1}$ Bank is the smallest of the three banks located in Garden County, which approximates the relevant banking market, and controls 20.52 per cent of deposits therein. Acquisition of Bank would result in no immediate change in banking services available in the relevant market.

Applicant's principal shareholder has ownership interests in one Colorado and two Nebraska onebank holding companies. The subsidiary banks of these holding companies are located considerable distances from Bank and operate in different banking markets. Inasmuch as the proposal to form a bank holding company represents a restructuring of the existing ownership of Bank into corporate form, consummation of the proposal would eliminate neither existing nor potential competition, nor does it appear that there would be any adverse effects on other banks in the trade area.

The financial and managerial resources and future prospects of Applicant, which are dependent on those of Bank, are considered satisfactory and consistent with approval. The debt to be incurrred by Applicant appears to be serviceable from the income derived from Bank without having an adverse effect on the financial condition of either Applicant or Bank. Accordingly, considerations relating to banking factors are consistent with approval of the application.

Although consummation of the proposal would cause no changes in the banking services offered by Bank, considerations relating to the convenience and needs of the community to be served are consistent with approval. It has been determined that consummation of the transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction involving acquisition of shares of Bank shall not be consummated before the thirtieth calendar day following the effective date of this Order and Bank should not be acquired later than three months after the effective date of this Order, unless

[^14]such period is extended for good cause by the Board of Governors or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Secretary of the Board, acting pursuant to delegated authority from the Board of Governors, effective September 16, 1976.
[SEAL] Assistant Secretary of the Board
M \& S BanCorp, Janesville, Wisconsin

## Order Approving Acquisition of Bank

M \& S BanCorp, Janesville, Wisconsin, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under $\S 3(\mathrm{a})(3)$ of the Act ( 12 U.S.C. § 1842(a)(3)) to acquire 98.83 per cent of the voting shares of Merchants Bank of Evansville, Evansville, Wisconsin ('Bank').

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant, the seventeenth largest banking organization in Wisconsin, controls two banks with aggregate deposits of approximately $\$ 84$ million, representing 0.6 per cent of the total deposits in commercial banks in the State. ${ }^{1}$ Acquisition of Bank, which opened for business on May 3, 1976, would neither immediately increase Applicant's share of commercial bank deposits in Wisconsin nor result in a significant increase in the concentration of banking resources in the State.

Bank recently commenced operations in Evansville, a city located in the south-central portion of Wisconsin, with a population of approximately 3,000 persons, according to the 1970 Census. Prior to Bank's entry a few months ago, only one other bank operated in Evansville. Applicant, through its two existing subsidiary banks, is the largest of 14 banking organizations in the relevant

[^15]banking market ${ }^{2}$ and controls approximately 21 per cent of total deposits in that market. The second largest banking organization therein controls 19 per cent of total deposits in the market. The office of Applicant's banking subsidiary closest to Bank is in Janesville, 16 miles southwest of Evansville. However, neither of Applicant's subsidiary banks may branch into Evansville because of the "home office protection'' afforded by Wisconsin's restrictive branching laws. Accordingly, in view of the fact that this proposal involves the acquisition of essentially a de novo bank, it appears that the proposed transaction would have no significant adverse effects on existing or potential competition. Therefore, based upon all facts of record, the Board has determined that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks, and Bank are regarded as generally satisfactory. Therefore, considerations relating to banking factors are consistent with approval of the application. The addition of a second banking alternative in Evansville should enhance banking competition and thus increase services to the residents of the area. In fact, apparently in response to Bank's formation, the other competing bank has increased both the interest paid on savings accounts and its banking hours to include Saturday morning banking services. Accordingly, considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective September 22, 1976.

Voting for this action: Chairman Burns and Gover-

[^16]nors Gardner, Wallich, Coldwell, Jackson and Lilly. Absent and not voting: Governor Partee.
(Signed) Richard D. Abrahamson, [seal] Assistant Secretary of the Board.

## National Detroit Corporation, Detroit, Michigan

## Order Approving Acquisition of Bank

National Detroit Corporation, Detroit, Michigan, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire all of the voting shares, less directors' qualifying shares, of National Bank of Port Huron, Port Huron, Michigan ("Bank'"), a proposed new bank.
Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those of The Commercial and Savings Bank of St. Clair County, St. Clair, Michigan ("Commercial Bank'") and the Peoples Bank of Port Huron, Port Huron, Michigan ('Peoples Bank'"), in light of the factors set forth in § 3(c) of the Act (12 U.S.C. § $1842(\mathrm{c})$ ).

Applicant controls five banks in Michigan with aggregate deposits of $\$ 4.9$ billion, representing approximately 16.7 per cent of the total commercial bank deposits in Michigan, and is the largest banking organization in the State. ${ }^{1}$ Since Bank is a proposed new bank, its acquisition by Applicant would not immediately increase Applicant's share of commercial bank deposits in the State.

Applicant is seeking to make its initial entry into the Port Huron banking market (the relevant market), ${ }^{2}$ and Bank will be located in the city of Port Huron. Applicant has no offices within the relevant market and the nearest office of any of Applicant's subsidiary banks to Bank's proposed location is 40 miles southwest of Bank in the Detroit banking market.

In its consideration of the subject application, the Board has also considered the comments sub-

[^17]mitted by the two Protestants. Generally speaking, Protestants contend that the proposal would have anticompetitive effects and would adversely affect the viability of existing banks in the market. The Board has analyzed the information submitted by each of the Protestants and, for the reasons set forth below, it is the Board's judgment that the issues raised by Protestants are not sufficient to warrant denial of the subject application. ${ }^{3}$

The first Protestant, Commercial Bank, principally argues that consummation of the proposal would (1) increase market concentration, (2) hinder market deconcentration and (3) adversely affect Peoples Bank. Commercial Bank contends that the relevant market for analyzing the competitive effects of this proposal encompasses the sixcounty area of Wayne, Oakland, Macomb, Washtenaw, Livingston and St. Clair counties. It is the Board's opinion, however, that Protestant Commercial Bank's definition of the relevant market is too broad as it includes the Detroit banking market and portions of several other banking markets ${ }^{4}$ and that the correct market for purposes of analyzing the competitive effects of this proposal is the Port Huron market as defined above (see footnote two). It is the Board's view that consummation of this proposal, would add an additional full service banking competitor to this highly concentrated market in which the three largest banking organizations hold approximately 86 per cent of the total commercial bank deposits and would increase the likelihood of eventual market deconcentration. Finally, the Board disagrees with Commercial Bank's assessment of the adverse effect that consummation of the proposal would have on Peoples Bank. The Board notes that

[^18]Peoples Bank increased its deposits 13.6 per cent between year-end 1974 and 1975, that its return on assets for 1975 was far in excess of the Statewide average for like-sized banks, and that it was better capitalized during 1975 than the average like-sized banks in Michigan.
The second Protestant, Peoples Bank, contends that the Port Huron area has experienced significant economic deterioration since the hearings held by the Comptroller of the Currency in connection with the chartering of Bank, and therefore, the Port Huron area could not now support an additional bank. The record shows that the population of St. Clair County increased 7.4 per cent from 1970-1975. At the same time, the banking organizations with their head offices in St. Clair County increased their deposits at almost twice the average rate for all banks in the State for the period June 1974 to December 1975. Similarly, the record does not support Peoples Bank's assessment of the effect this acquisition would have on the existing banks in the market. With the exception of a small branch of a bank whose main office is located outside of the relevant market, the banking organizations in the market are well established institutions, and as noted above, those banking organizations with their head offices in St. Clair County have experienced significant deposit growth. As already noted, Peoples Bank itself has experienced above average growth of deposits and an above average return on its assets. On the basis of the above and other facts of record, the Board is of the view that the Port Huron banking market will continue to support the existing banks in the market and that Bank will not have a serious adverse effect upon those institutions.

Having considered the comments of the Protestants and all of the facts of record, the Board concludes that consummation of the proposed.acquisition would not have an adverse effect on future competition and that Applicant's acquisition of Bank can be reasonably expected to stimulate competition in this highly concentrated market by introducing an additional banking alternative without significantly adversely affecting any of the existing banks in the market. Therefore, for the reasons summarized above, the Board concludes that competitive considerations are consistent with, and lend some weight toward, approval of the application.

The financial and managerial resources and future prospects of Applicant and its subsidiaries are regarded as satisfactory. As a proposed new bank,

Bank has no financial or operating history; however, its prospects as a subsidiary of Applicant appear favorable. Considerations relating to banking factors, therefore, are consistent with approval of the application.

Bank will serve as an additional full service banking alternative to the residents of Port Huron, increasing the number of banks in that city from two to three. Bank will offer all services normally considered to be full service banking including trust services, selected week-day evening hours, and Saturday hours. Accordingly, these considerations relating to the convenience and needs of the community to be served lend some weight toward approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after that date, and (c) National Bank of Port Huron, Port Huron, Michigan, shall be opened for business not later than six months after the effective date of this Order. Each of the periods described in (b) and (c) may be extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors, effective September 27, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Jackson, Partee, and Lilly. Absent and not voting: Governor Coldwell.
(Signed) Griffith L. Garwood, [sEal] Assistant Secretary of the Board.

## Roger Billings, Incorporated

 Delphos, Kansas
## Order Approving Acquisition of Additional Shares of Bank

Roger Billings, Incorporated, Delphos, Kansas, a registered bank holding company, ${ }^{1}$ has applied

[^19]for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. § 1842(a)(3)) to acquire an additional 4.6 per cent of the voting shares of The State Bank of Delphos, Delphos, Kansas ('Bank'’).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S 3(\mathrm{~b})$ of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3(\mathrm{c})$ of the Act ( 12 U.S.C. § 1842(c)).

Applicant currently owns 22.2 per cent of the voting shares of Bank, ${ }^{2}$ and also engages in insurance activities. ${ }^{3}$ Bank, with total deposits of approximately $\$ 4.5$ million, ${ }^{4}$ controls approximately .05 per cent of the total deposits in commercial banks in the State and is the fourth largest of the five banks in the relevant market with approximately 15.2 per cent of the total deposits in the market. ${ }^{5}$ Applicant proposes to acquire 23 shares of Bank from a principal shareholder of Bank and Applicant.

The proposed acquisition of additional shares of Bank would have no effect on competition, since Applicant and its officers, directors and principal shareholders together already control a majority of Bank's outstanding voting shares. Thus, competitive considerations are consistent with approval of the application.

The financial condition and managerial resources of Applicant and Bank are considered satisfactory. Applicant will not incur any debt in connection with this acquisition and the banking factors are consistent with approval. Although there will be no immediate change in the services or facilities of Bank as a result of this acquisition of additional voting shares, considerations relating to the convenience and needs of the community

[^20]to be served are consistent with approval of the application. Therefore, it is the Board's judgment that the proposed transaction is consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or the Federal Reserve Bank of Kansas City.
By order of the Board of Governors, effective September 14, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Coldwell, Jackson and Lilly. Absent and not voting: Governors Wallich and Partee.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

## Orders Under Section 4 Of Bank Holding Company Act

C.I.T. Financial Corporation, New York, New York

## Order Approving Acquisition of Assets

C.I.T. Financial Corporation, New York, New York, has applied for the Board's approval under § 4(c)(8) of the Bank Holding Company Act ("Act'") ( 12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § $225.4(\mathrm{~b})(2)$ ), to acquire substantially all of the assets of Guardian Commercial Corporation, Roslyn, Heights, New York, a company that engages in consumer finance activities. Such activities have been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(1)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors has been duly published (41 Federal Register 2169). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the public interest factors set forth in $\S 4(\mathrm{c})(8)$ of the Act (12 U.S.C. § $1843(\mathrm{c})(8)$ ).

On the basis of the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8)
is favorable. Accordingly, the application is hereby approved for the reasons set forth in the Board's Statement, which will be released at a later date. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York.

By order of the Board of Governors, effective August 27, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Jackson.
(Signed) Theodore E. Allison, [SEAL] Secretary of the Board.

> Statement by Board of Governors of the Federal Reserve System regarding the application by C.I.T. Financial Corporation for approval to acquire assets of Guardian Commercial Corporation
C.I.T. Financial Corporation, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act, applied for the Board's approval, under $\S 4(\mathrm{c})(8)$ of the Act (12 U.S.C. § $1843(\mathrm{c})(8)$ ) and $\S 225.4$ (b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), to acquire substantially all of the assets of 27 subsidiary consumer finance offices of Guardian Commercial Corporation ("Guardian'"), Roslyn Heights, New York. Consumer finance activities have been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(1)). By Order of August 27, 1976, the Board acted to approve the application for the reasons that are set forth in this Statement.

Applicant controls one bank, National Bank of North America ("Bank'). Bank, with total domestic deposits of $\$ 2.2$ billion, representing 1.6 per cent of the total commercial bank deposits in the State, is a full-service commercial bank with

141 offices in the New York City metropolitan area and is the tenth largest bank in New York State. ${ }^{1}$ Applicant has total assets of about $\$ 7$ billion and engages in four principal lines of activity: business and consumer finance, banking, manufacturing and merchandising, and insurance. ${ }^{2}$ Applicant, with approximately 1,000 consumer and business finance offices located throughout the United States, Puerto Rico and Canada, is one of the largest diversified finance companies in the United States. Business and consumer finance activities comprise approximately 50 per cent of Applicant's assets and 56 per cent of Applicant's net income.

Guardian, with total assets of approximately $\$ 36$ million, is a subsidiary of First Jersey National Corporation ('FJNC''), Jersey City, New Jersey, a registered bank holding company, and engages through its three direct subsidiaries, Guardian Loan Company, Tilden Commercial Alliance, and Tilden Life Insurance, in consumer and sales financing, automobile and equipment lease financing, the sale of credit life and credit accident and health insurance in connection with extensions of credit, and the reinsuring of credit life and credit disability insurance. Applicant proposed to acquire approximately $\$ 12$ million of Guardian's assets, representing substantially all of the assets relating to the consumer finance business of 27 subsidiary offices of Guardian located in the four States of Pennsylvania, New Jersey, Delaware and Connecticut. These assets include consumer finance and sales finance receivables, customer lists, furniture, fixtures, and leasehold interests.

Applicant and Guardian operate one office each in the Wilmington and Harrisburg markets. Applicant and Guardian operate two offices and five offices, respectively, in the Philadelphia-Camden market. Accordingly, consummation of this acquisition would result in the elimination of some existing competition. However, in each of these markets the share of the estimated total dollar volume of direct consumer loans outstanding held by Applicant and Guardian combined is less than 1 per cent, and a large number of small loan companies operate in each of the markets. Fur-

[^21]thermore, the facts of record of this application indicate that the consumer finance activities of Guardian have not been profitable due to its high cost of obtaining operating funds. This situation has necessitated a contraction of Guardian's consumer finance business and the closing of numerous loan offices. Unless the operating difficulties in the consumer finance business of Guardian are overcome, FJNC may find it more expedient to liquidate additional finance offices than to continue to incur the losses associated with such operations. On the basis of these considerations, the Board concludes, with respect to existing competition, that Guardian does not have a significant competitive presence in the markets it serves.

With respect to potential and future competition, the facts of record show that Applicant has the financial and managerial capabilities to open additional offices in markets where it presently competes with Guardian and to expand on a de novo basis into other attractive areas presently served by Guardian. However, in view of Guardian's uncertain viability as a competitor in the markets it serves and the unsuccessful attempt by FJNC over the last three years to sell Guardian, it does not appear that any significant competition between Applicant and Guardian would be likely to develop in the future absent approval of this application. The Board further notes that Guardian's uncertain future, past operating performance, and relatively wide geographic diversification within Pennsylvania and New Jersey, tend to lessen its attractiveness as a ''going concern'’ acquisition vehicle for bank holding companies that have not yet entered the consumer finance field. In light of the foregoing and other facts of record, it appears conjectural whether Applicant's acquisition of Guardian would foreclose an amount of future or potential competition that would be regarded as significant.

Under $\S 4(c)(8)$ of the Act, the Board is required to consider the public benefits that are likely to be derived from the acquisition of a nonbanking concern by a bank holding company and, in the context of this application, the Board believes that some public benefit may reasonably be expected to result from consummation of the proposal. Consummation of the proposal would insure a continuity of services to Guardian's existing loan customers, while relieving FJNC of the necessity of funding Guardian's consumer finance business and enabling FJNC to retain Guardian's other, more profitable activities, particularly its leasing
activities. In addition, Applicant has committed to expand the services offered to current and prospective customers by making available larger loans (where permitted by State law) and real estate loans, and by offering additional credit insurance coverage. Applicant would bring to the markets served by Guardian its substantial financial and managerial resources and broadened, more sophisticated, financing services. While the Board is concerned about some aspects of this proposal to which adverse weight has been accorded in previous Orders dealing with similar proposals by other bank holding companies, ${ }^{3}$ the Board concludes that, on balance, this proposal can be expected to result in benefits to the public that are sufficient to outweigh possible adverse effects.

Board of Governors of the Federal Reserve System, September 23, 1976.
(Signed) Theodore E. Allison, [SEAL] Secretary of the Board.

[^22]
## Citicorp,

New York, New York
Order Approving De Novo Expansion of the Activities of Gateway Life Insurance Company

Citicorp, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under § 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to ex-
pand the activities of its indirect subsidiary Gateway Life Insurance Company ('‘Gateway'’), Phoenix, Arizona. ${ }^{1}$ Gateway, a subsidiary of Applicant's consumer finance subsidiary, Nationwide Financial Services Corporation ('Nationwide''), St. Louis, Missouri, currently engages in the activity of underwriting, as reinsurer, credit life and credit accident and health insurance directly related to extensions of credit by Nationwide in the 13 States in which Nationwide operated at the time of its acquisition by Applicant in 1973. ${ }^{2}$ If the instant proposal is approved, Applicant proposes to expand Gateway's reinsurance activities de novo to include Applicant's lending subsidiaries in 13 additional States ${ }^{3}$ and the Commonwealth of Puerto Rico. Applicant further proposes to modify the scope of Gateway's underwriting activities by causing Gateway to act as a direct underwriter, rather than as reinsurer, in those States in which it has developed the greatest reinsurance experience. This modification of the activity would be instituted on a selective State-by-State basis. The Board has previously determined that the activity of direct underwriting or underwriting as reinsurer of credit life and credit accident and health insurance which is directly related to extensions of credit by the bank holding company system is closely related to banking. ${ }^{4}$

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 32668 (1976)). The time for filing comments and views has expired, and the Board has considered the application

[^23]and all comments received in the light of the public interest factors set forth in $\S 4(\mathrm{c})(8)$ of the Act (12 U.S.C. § 1843 (c)(8)).

Applicant, the largest banking organization in New York State and the second largest banking organization in the United States, controls two subsidiary banks with aggregate domestic deposits of approximately $\$ 19.5$ billion, representing about 14.4 per cent of the total deposits in commercial banks in New York State. ${ }^{5}$ Applicant engages in a variety of permissible nonbank activities through 85 direct and indirect domestic nonbank subsidiaries. Applicant's nonbank activities include mortgage banking activities, ${ }^{6}$ leasing activities, consumer and sales finance activities, and insurance agency activities for the sale of insurance which is directly related to extensions of credit.

Gateway's activities will be limited to acting as direct underwriter or as reinsurer of credit life and credit accident and health insurance directly related to extensions of credit by Nationwide and Applicant's other lending subsidiaries. Since this proposal essentially involves a de novo expansion and modification of Applicant's existing underwriting/reinsuring activities, approval of this proposal would not have any adverse effects on either existing or potential competition in any relevant market.

Credit life and credit accident and health insurance is generally made available by banks and other lenders and is designed to assure repayment of a loan in the event of death or disability of the borrower. In connection with its addition of the underwriting of such insurance to the list of permissible activities for bank holding companies, the Board stated:

To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally, such a

[^24]showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. (12 CFR § 225.4(a)(10) n. 7)
Applicant's proposal involves two aspects: (1) the expansion of reinsurance activities into 13 additional States and the Commonwealth of Puerto Rico, and (2) the conversion of some of the existing reinsurance activities into direct underwriting activities. Applicant has stated that following approval of this proposal, Gateway will offer at reduced permiums the several types of credit insurance policies that it will reinsure in the additional areas it proposes to enter. Applicant's proposed rate reductions vary according to the various prima facie rates established in each of the respective additional States and in Puerto Rico. Thus, Applicant's proposal involves rate reductions for credit life insurance ranging from 2.3 per cent to 15 per cent below the maximum allowable premium rates established in each respective State and Puerto Rico, and rate reductions for credit accident and health insurance of 5 per cent below the maximum allowable rate established in each respective State and Puerto Rico. The Board is of the view that these reductions in insurance premiums which Applicant proposes to establish are procompetitive and in the public interest. With regard to the portion of Applicant's proposal relating to the conversion of reinsurance activities into direct underwriting activities in those States where Applicant has already gained reinsurance experience, the Board regards this change as being primarily a change in form which will not materially alter the facts considered by the Board in connection with the original approval of Applicant's acquisition of Gateway. In this regard, Applicant will maintain the public benefits to which it was previously committed.

Based upon the foregoing and other considerations reflected in the record, including a commitment by Applicant to maintain on a continuing basis the public benefits that the Board has found to be reasonably expected to result from this proposal and upon which the approval of this proposal is based, the Board has determined that the balance of the public interest factors the Board is required to consider under $\S 4(\mathrm{c})(8)$ is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any
of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to authority hereby delegated.

By order of the Board of Governors, effective September 20, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Jackson, and Lilly. Absent and not voting: Governors Coldwell and Partee.
(Signed) Richard D. Abrahamson, [seal] Assistant Secretary of the Board.

First Security Corporation, Salt Lake City, Utah
Order Amending Requirement
for Filing a Plan of Divestiture
By Order dated July 30, 1976, the Board denied further extensions of time for divestiture by First Security Corporation, Salt Lake City, Utah (' ${ }^{\prime}$ FSC'), of First Security Savings and Loan Association, Pocatello, Idaho ("FSS\&L"), a company engaged in the business of operating a savings and loan association, and determined not to process FSC's tendered application to retain FSS\&L pursuant to $\S 4(\mathrm{c})(8)$ of the Bank Holding Company Act. The Board's Order required FSC to divest itself of any and all direct or indirect interest in and control over FSS\&L by no later than November 1, 1976. FSC was further directed to file a plan of divestiture with the Board by no later than September 15, 1976.

By letter dated August 25, 1976, and attachments thereto, FSC has requested that the Board grant reconsideration of its July 30 Order. The Board expects to act on such petition shortly and has determined that pending its action it is appropriate to extend the deadline by which FSC is to file a plan of divestiture with the Board. Accordingly, in the event the Board acts to deny the petition, FSC is hereby directed to file a plan of divestiture no later than two weeks subsequent to the date of such Board action.

By order of the Board of Governors, effective September 15, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, and Lilly. Absent and not voting: Chairman Burns and Governor Partee.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

Hampton Bankshares Corporation, Clayton<br>Bancshares Corporation, and Crestwood Bank<br>Shares Corporation, St. Louis, Missouri

## Order Approving

Retention of Clayton Trust Company
Hampton Bankshares Corporation, Clayton Bancshares Corporation, and Crestwood Bank Shares Corporation, all of St. Louis, Missouri, bank holding companies within the meaning of the Bank Holding Company Act, have each applied for the Board's approval, under $\S 4(\mathrm{c})(8)$ of the Act and § 225.4(b)(2) of the Board's Regulation Y , to retain indirectly 32.8 percent ${ }^{1}$ of the voting shares of Clayton Trust Company, Clayton, Missouri ("Company'), a company that engages in activities that may be carried on by a trust company including providing services of a trust, fiduciary, agency, or custodian nature. Such activities have deen determined by the Board to to be closely related to banking (12 CFR § 225.4(a)(4)).

Notice of the applications, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 27133). The time for filing comments and views has expired, and the Board has considered all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)).

Each Applicant is a separate one-bank holding company and each controls a different bank; Applicants are affiliated with each other through common ownership. Their three subsidiary banks have aggregate deposits of approximately $\$ 272.4$ million. ${ }^{2}$ Company, which commenced operations in 1973, was organized by the individual who serves as chief executive officer and is principal shareholder of each of Applicants. In 1974, the shares of Company were placed in a voting trust

[^25]and voting trust certificates were issued to Applicants' three subsidiary banks. As a result, each Applicant controls approximately 32.8 per cent of the voting shares of Company. ${ }^{3}$ Company had total trust assets of approximately $\$ 12.5$ million as of April 30, 1976.

In acting on applications submitted pursuant to $\S 4(\mathrm{c})(8)$ of the Act, the Board analyzes an application to retain a company engaged in § 4(c)(8) activities by the same standards that it analyzes an application to acquire a company engaged in such activities. In addition, the Board analyzes the competitive effects of a proposal both at the time of the acquisition and at the time of the application for retention. Applicants acquired their interests in Company from Company's organizer through the above-described voting trust arrangement. That transaction was essentially a reorganization in which control of voting shares of Company was transferred from an individual to companies, not then engaged directly or indirectly in providing trust services, but controlled by the same individual and the transaction does not appear to have had any significant adverse effects on competition at that time. At present, Company competes with several other companies offering similar services in the St. Louis market. ${ }^{4}$

The retention of Company by Applicants should

[^26]provide benefits to the public by assuring a convenient and continued source of trust and related services. There is no evidence in the record indicating that retention of Company would lead to any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that, in accordance with the provisions of section 4(c)(8), retention of shares of Company by Applicants can reasonably be expected to result in benefits to the public that outweigh possible adverse effects. Accordingly, the applications are hereby approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation $Y$ and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective September 27, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Jackson, Partee, and Lilly. Absent and not voting: Governor Coldwell.

## (Signed) Griffith L. Garwood, Assistant Secretary of the Board.

[SEAL]

## Philadelphia National Corporation,

 Philadelphia, Pennsylvania
## Order Approving Acquisitions of Liberal Finance Company and

## Liberal Consumer Discount Company

Philadelphia National Corporation, Philadelphia, Pennsylvania, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under $\S 4(\mathrm{c})(8)$ of the Act ( 12 U.S.C. § $1843(\mathrm{c})(8)$ ) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), to purchase, through Signal Finance Corporation, Pittsburgh, Pennsylvania ('Signal''), a wholly-owned indirect subsidiary of Applicant engaged in the consumer finance business, all the outstanding shares of Liberal Finance Company and Liberal Consumer Discount Company ('Liberal Companies'"), both of Edwardsville, Pennsylvania, both of which engage in the
activities of making instalment loans for personal, family or household purposes; purchasing sales finance contracts in connection with the sale of personal, family or household goods or services; selling credit life insurance and credit disability insurance (both of which will be reinsured by existing subsidiaries of Applicant) and casualty insurance in connection with personal instalment loans made and sales contracts purchased, and generally engaging in the business of a consumer finance company. Upon approval of these applications, the name of the Liberal Companies will be changed to "Signal Consumer Discount Company." All of the above activities have been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(1) and (9)).

Notice of the applications, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 141). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in the light of the public interest factors set forth in § 4(c)(8) of the Act (12 U.S.C. § $1843(\mathrm{c})(8)$ ).

Applicant, the third largest banking organization in Pennsylvania, controls The Philadelphia National Bank ("Bank'") with total domestic deposits of $\$ 2.4$ billion. ${ }^{1}$ Signal Financial Corporation, Pittsburgh, Pennsylvania ("Financial"), is a holding company and direct parent of Signal, the corporation through which Applicant will acquire the Liberal Companies, and is a wholly-owned subsidiary of Applicant. ${ }^{2}$ Financial's subsidiaries are engaged in consumer lending and, to a lesser extent, the sale of credit related life, disability, and property insurance to its customers through 73 consumer loan offices in twelve States, two insurance companies, and a thrift and loan association in California.

The Liberal Companies with total assets of \$1.6 million together are engaged at a common location in Edwardsville, Pennsylvania, in the general consumer finance business including the extension of direct personal loans, the purchase of retail instalment paper and the sale of credit-related

[^27]insurance. Applicant's direct subsidiary, Financial, conducts through its subsidiaries including Signal, substantially the same activities as the Liberal Companies. Bank is also active in consumer lending and credit insurance sales. The Liberal Companies' only office is located in the Wilkes-Barre market; ${ }^{3}$ within that market, 25 consumer finance companies operate 36 offices. In addition, 16 commercial banks operate 46 offices and there are at least 7 large credit unions active in consumer lending.

Financial operates offices in northeastern Pennsylvania, its office nearest to that of the Liberal Companies is 21 miles distant. However, they operate in separate geographic markets and service area overlap is minimal. Bank does not maintain an office in the Wilkes -Barre market and has not originated or purchased a significant amount of consumer loans in the market. Accordingly, the proposal would not eliminate significant existing competition.

Applicant, through Financial, is a potential entrant into the Wilkes-Barre market. However, there are also numerous other entrants. Of the more than 200 consumer finance organizations in Pennsylvania alone, only 25 are currently represented in the Wilkes-Barre market. The WilkesBarre market is considered competitive with no significant barriers to entry known to exist. Hence, no adverse effects on potential competition in the Wilkes-Barre market are expected. The current owners of the Liberal Companies have committed themselves to the sale of their business and subsequent retirement. Since the Liberal Companies appear to be so small and nonaggressive, the probability of their branching is minimal. Hence, the Liberal Companies are not considered likely entrants to other markets and their disappearance is not likely to affect potential competition.

The proposed acquisition of the Liberal Companies through Signal is expected to yield public benefits. Applicant intends to market aggressively the larger and longer term loans permissible under the Pennsylvania Consumer Discount Act. Applicant also plans the introduction of reduced rate loans to select customers within a year. Upon consummation of this proposal, credit insurance rates at the Edwardsville office of Signal Consumer

[^28]Discount Company would be reduced from the maximums permitted by Pennsylvania law. ${ }^{4}$ Furthermore, it is expected that customers will be afforded greater expedience in insurance claims handling because Applicant owns the reinsurer of insurance that would be sold at that office. Moreover, there is no evidence in the record indicating that consummation of the proposed transaction would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices or other adverse effects on the public interest.

Based on the foregoing and other considerations reflected in the record, the Board has determined, in accordance with the provisions of section 4(c)(8) of the Act, that consummation of the proposal can reasonably be expected to produce benefits to the public that outweigh possible adverse effects. Accordingly, the applications are hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y (12 CFR § 225.4(c)) and to the authority of the Board to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board may find necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations or orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Philadelphia, pursuant to authority hereby delegated.

By order of the Board of Governors, effective September 24, 1976.
Voting for this action: Chairman Burns and Governors Wallich, Jackson, Partee, and Lilly. Present and abstaining: Governor Gardner. Absent and not voting: Governor Coldwell.

[seal] Assistant Secretary of the Board.

[^29]
## Harlan National Company,

 Harlan, IowaOrder Approving Formation<br>of Bank Holding Company and Engaging in Insurance Agency Activities

Harlan National Company, Harlan, Iowa, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) of formation of a bank holding company through acquisition of 98.2 per cent of the voting shares of The Harlan National Bank, Harlan, Iowa ("Bank").

At the same time, Applicant has applied, pursuant to §4(c)(8) of the Bank Holding Company Act (12 U.S.C. § $1843(\mathrm{c}(8))$ and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire voting shares of Bank Insurance Agency, Harlan, Iowa ("Agency"), and thereby engage as agent in the sale of credit life and credit accident and health insurance directly related to extensions of credit or the provision of other financial services by Bank and Applicant. Such activities have been determined by the Board in $\S 225.4(\mathrm{a})(9)$ (ii) (a) and (b) of Regulation Y to be permissible for bank holding companies, subject to Board approval of individual proposals in accordance with procedures of § 225.4(b).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with $\S \S 3$ and 4 of the Act (41 Federal Register 26077). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in § 3(c) of the Act and the considerations specified in §4(c)(8) of the Act.

By Order dated October 31, 1975, the Board of Governors denied the application of Harlan National Company to become a bank holding company through the acquisition of Bank (40 Federal Register 52440). ${ }^{1}$ Thereafter, Applicant filed a Request for Reconsideration pursuant to § $262.3(\mathrm{~g})(5)$ of the Board's Rules of Procedure (12 CFR § 262.3(g)(5)). By Order dated June 11, 1976 (41 Federal Register 26077), the Board agreed to reconsider the application.

[^30]Applicant is a nonoperating corporation organized for the purposes of becoming a bank holding company through acquisition of Bank and of acquiring the insurance agency business of the principal shareholders of Bank. Bank ( $\$ 24.6$ million in deposits) controls .2 of 1 per cent of the total commercial bank deposits in Iowa. Bank is the largest of seven commercial banks operating in the Shelby County banking market (the relevant market), ${ }^{2}$ holding approximately 30 per cent of the total commercial bank deposits in the market. Inasmuch as the proposal represents merely a restructuring of Bank's ownership from individuals to a corporation owned by the same individuals and Applicant has no other subsidiary banks, acquisition of Bank by Applicant would have no adverse effects on competition in any relevant area. Accordingly, the Board concludes that competitive considerations are consistent with approval of the application.

In its earlier Order denying the application, the Board noted that the financial and managerial resources and future prospects of Bank were generally satisfactory but expressed concern over such factors as applied to Applicant. In the Board's view, Applicant lacked the necessary financial flexibility and resources to meet its annual debt servicing requirements as well as any unforeseen financial problems that might arise at Bank. This situation was aggravated by the substantial acquisition debt involved in the formation of another bank holding company, First National Company of Missouri Valley, Inc., Missouri Valley, Iowa, ${ }^{3}$ also wholly owned by Applicant's sole owner, Mr. Fred R. Horne, Jr., and the apparent lack of sufficient financial resources on Mr. Horne's part to retire the personal debt associated with both the previously approved formation and the instant proposal without adversely affecting the resources of the subsidiary banks.

In connection with its Request for Reconsideration, Applicant has submitted current information with respect to the financial conditions of Bank, Mr. Horne and the First National Company of Missouri Valley. This new information indicates that Applicant will have significantly greater financial resources and flexibiilty as a result of the improvement in both Bank's capital and earnings

[^31]position and Mr. Horne's personal financial condition. The strengthened financial condition of Bank and Mr. Horne and the recent actions of Mr. Horne to reduce to an acceptable level the acquisition debt involved in the Missouri Valley formation causes the Board to believe that the acquisition debt involved in both the proposed formation of Applicant and in the Missouri Valley formation can now be serviced by both holding companies as well as by the resources of Mr. Horne without adversely affecting the subsidiary banks.

Accordingly, the Board is of the view that considerations relating to the financial and managerial resources and future prospects of Applicant's proposal are now consistent with approval of the application. The Board, however, reiterates its concern with holding company formations involving substantial acquisition debt where, as here, the owner or owners are already principals in one or more other bank holding companies whose formations likewise involved a considerable amount of acquisition debt incurred by both the proposed holding company and the principals. As it has previously stated, ${ }^{4}$ the Board believes it advisable to apply to such cases the more restrictive standards regularly applied in analyzing multibank holding company proposals.

With respect to convenience and needs considerations, Applicant proposes to increase business and installment loans and to host local seminars for area farmers. These considerations are consistent with approval of the application. Accordingly, it is the Board's view that consummation of the proposal to form a bank holding company would be consistent with the public interest and that the application to acquire Bank should be approved.

With respect to the proposed acquisition of Agency, there is no evidence in the record indicating that proposal would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest. On the other hand, approval of the application would allow the continued convenience to Bank's customers of a readily accessible source of creditrelated insurance services. This result is regarded as being in the public interest.

Based on the foregoing and other considerations

[^32]reflected in the record, it is the Board's judgment that considerations relating to the factors under $\S$ 3(c) of the Act and the balance of the public interest factors under $\S 4(c)(8)$ of the Act both favor approval of Applicant's proposals.

Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this Order. The acquisition of Bank and the commencement of insurance agency activities shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority. The determination as to Applicant's insurance activities is subject to the conditions set forth in $\S 225.4$ (c) of Regulation $Y$ and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to present evasion thereof.

By order of the Board of Governors, effective September 20, 1976.

Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, and Lilly. Absent and not voting: Governor Partee.
(Signed) Richard D. Abrahamson, [seal] Assistant Secretary of the Board.

## First Progressive Bank,

Brewton, Alabama

## Order Approving Application to Become a Member of the Federal Reserve System

First Progressive Bank, Brewton, Alabama ("Applicant’), a proposed new bank chartered under the laws of the State of Alabama, has applied, pursuant to section 9 of the Federal Reserve Act [12 U.S.C. 321-338] and the Board's Regulation H [12 CFR 208], to become a member of the Federal Reserve System.

Applicant, which has not opened for business, was organized in 1974 for the purpose of obtaining
a State bank charter and engaging in a commercial banking business. After denial of its initial application for a State bank charter, Applicant reapplied and its application was approved by the State Banking Department of Alabama by letter dated July 11, 1975. Approval of Applicant's charter was conditioned, in part, upon Applicant obtaining insurance coverage for its deposits from the Federal Deposit Insurance Corporation ("FDIC'"). Consequently, Applicant filed an application for insurance pursuant to section 5 of the Federal Deposit Insurance Act [12 U.S.C. 1815]. That application was denied by the FDIC on the basis of the FDIC's unfavorable findings with regard to the future earnings prospects of Applicant and the convenience and needs of the community to be served.

Under section 9 of the Federal Reserve Act, the Board, in acting upon an application to become a member of the Federal Reserve System, is required to consider the financial condition of the applying bank, the general character of its management, and whether or not the corporate powers of the institution are consistent with the purposes of the Federal Reserve Act. In addition, under section 4(b) of the Federal Deposit Insurance Act [12 U.S.C. 1814], the admission to membership in the Federal Reserve System of an uninsured State bank automatically confers deposit insurance upon the bank from the time the Board certifies to the FDIC that the bank is a member of the Federal Reserve System. The Board's certificate to the FDIC is required to state that the Board has given consideration to the factors enumerated in section 6 of the Federal Deposit Insurance Act [12 U.S.C. 1816], namely, the financial history and condition of the bank; the adequacy of its capital structure; the bank's future earnings prospects; the general character of its management; the convenience and needs of the community to be served by the bank; and whether or not the bank's corporate powers are consistent with the purposes of the Federal Deposit Insurance Act.

The Board has considered the subject application and all comments received with respect thereto, including those submitted by First National Bank of Brewton, Brewton, Alabama, and by Bank of Brewton, Brewton, Alabama (hereinafter referred to as 'Protestants'), in light of the statutory factors enumerated above, and, on the basis of the record, the Board makes the following findings.

Brewton is located in southwestern Alabama
and is the seat of Escambia County (population 34,906 ). The population of Brewton and contiguous East Brewton was 9,083 as of the 1970 Census. According to Applicant, its proposed service area would include the eastern three-quarters of Escambia County, Alabama, the southern portion of adjacent Conecuh County, Alabama, and fringe areas of Santa Rosa and Escambia Counties, Florida. The economic base of the area is diversified, consisting of agricultural, forest and manufacturing production, as well as service activities related to Brewton's position as the county seat. In recent years the area has derived significant economic benefit from newly developed oil fields, and it is estimated that the residents of the Jay, Florida-Brewton, Alabama, area will derive significant income from future oil production. On balance, it appears that the area has experienced moderate though steady growth. Between 1970 and 1973, the per capita income of Escambia County increased by approximately 20 per cent. Personal income for the same period increased by an even greater percentage. Retail sales in the Brewton-East Brewton area increased from \$48.9 million in 1970 to $\$ 72$ million in 1974. During the first nine months of 1975 retail sales in Escambia County increased by 5.5 per cent while Statewide retail sales declined by 2.7 per cent. Deposits in Escambia County, Alabama, commercial banks increased from $\$ 48$ million in 1968 to $\$ 107$ million in 1974, an increase of 121 per cent. From 1974 to 1975, deposits in First National Bank of Brewton and Bank of Brewton, the only banks in Brewton, grew by 16.6 per cent and 10.5 per cent, respectively. Based on the foregoing and other information in the record, it is apparent that the economy of the area that would be served by Applicant has expanded in recent years, and in the Board's view, it is reasonable to conclude that it will continue to expand in the foreseeable future.

Presently Protestants operate five banking offices in the Brewton area. Despite the fact that most of the services that would be provided by Applicant are currently being offered by Protestants, the record reflects a desire on the part of a significant number of local residents for a locally owned bank such as Applicant. Approval of the subject application would result in an additional banking alternative being made available to residents of the area. Based on the local economic conditions and the apparent local support the Applicant would enjoy, the Board concludes that considerations with regard to the convenience and needs of the
community to be served by Applicant are consistent with approval of the subject application.

Applicant has no operating history, and its future earnings prospects are, of course, related to the amount of deposits Applicant will be able to attract. The FDIC, in denying Applicant's application for deposit insurance, questioned whether Applicant could attract sufficient deposits to achieve profitability within a reasonable time. The FDIC's uncertainty as to Applicant's ability to achieve profitability in a reasonable period of time was apparently due, at least in part, to the FDIC's view of the prevailing economic conditions in the area. The Board views the local economic conditions and prospects of the area as generally favorable to the introduction of an additional banking alternative. The Board's assessment of the prospects for the area is based on the information of record, including some financial and population data that were not available to the FDIC in November 1975, the time of the FDIC's action.

Applicant would be located about five blocks from the main business section of Brewton. Although removed somewhat from the principal area of commercial activity, Applicant should benefit by its ability to provide ample parking facilities not currently available in the downtown area. Businesses currently operating in the vicinity and the establishment of new businesses nearby should further enhance Applicant's profitability. In general, it appears that Applicant's location, while it may not be optimum, is sufficiently attractive to enable Applicant to operate at a profitable level. Furthermore, as mentioned previously, there are indications in the record of strong community support for a new bank in the area of Brewton. Applicant's initial stock offering of $\$ 1$ million was oversubscribed. According to Applicant, the 260 subscribers to its stock (none of whom will own more than 5 per cent of the stock) have each pledged to bring all of his or her banking business to Applicant. From the list provided by Applicant, it appears that many of its subscribers are owners of businesses or self employed professionals who will be able to provide Applicant with an initial nucleus of customers to serve. In the Board's judgment, such expressions of local support for the proposal are a positive factor not only with respect to the convenience and needs of the community but also with respect to the future earnings prospects of Applicant.
In assessing the future earnings prospects of Applicant, the Board has also considered the views
of the staff of the State Banking Department, ${ }^{1}$ the staff of the FDIC, the Federal Reserve Bank of Atlanta and the Board's staff, all of which project that Applicant will achieve profitability by the end of its third year of operation. Protestants have averred that Applicant would not achieve profitability in that period due primarily to lower deposit projections and higher operating and fixed expense projections than were used by the above organizations. It is the Board's judgment that the Protestant's projections with regard to deposits and expenses of Applicant are overly pessimistic and therefore do not accurately reflect the likely profitability of Applicant. Based on the above information and other information in the record, the Board has concluded that Applicant's future earnings prospects are consistent with approval of the subject application.

While Applicant has no operating or financial history, it appears that it would open with adequate capital structure. The general character of Applicant's management also appears satisfactory, particularly in view of the fact that Applicant's executive vice president would be an experienced banker familiar with the area. The corporate powers of Applicant are consistent with the Federal Reserve Act and the Federal Deposit Insurance Act.

In view of the foregoing discussion and having considered the facts of record and all the comments of Protestants in light of the statutory factors the Board must consider under section 9 of the Federal Reserve Act and section 6 of the Federal Deposit Insurance Act, it is the Board's judgment that the application should be approved.

Protestant, First National Bank of Brewton, has expressed the opinion that the decision of the FDIC denying deposit insurance for Applicant creates a presumption against the Applicant in this proceeding such that the Board must deny the present application unless the Applicant can produce evidence that overcomes that presumption. In acting on the subject application, the Board has carefully considered the findings of the FDIC. The Board does not believe, however, that those findings create any presumption as to the relevant statutory

[^33]factors that must be considered by the Board, and it has accordingly considered the subject application de novo.

The Board recognizes that in seeking membership in the Federal Reserve System Applicant was following an alternative means of obtaining FDIC insurance after the FDIC itself had denied such insurance. However, Applicant's motive in filing this application is not a relevant statutory consideration. The proposal before the Board is an application for membership in the Federal Reserve System and only incidentally may it be considered an application for Federal deposit insurance. Such membership provides certain benefits to member banks but also carries with it certain obligations not applicable to insured nonmember banks. Federal banking laws reflect the judgment of Congress that a State bank, in order to obtain Federal deposit insurance, need not become a member of the Federal Reserve System, but that if a State bank chooses to become a member and thereby subject itself to all of the laws and regulations applicable to member banks, then the deposits of such bank will automatically be subject to Federal deposit insurance. ${ }^{2}$ Congress has required the Board, when passing on a membership application, to consider the same statutory factors as does the FDIC in passing upon an insurance application. Implicit in this statutory structure is the potential for differing judgments by the two agencies on similar facts. The Board's responsibility, however, is to exercise its independent judgment with respect to the subject application after giving due regard to the recommendations and findings of other agencies and organizations, and, based on the record, it is the Board's judgment that the application should be, and it is, hereby approved for the reasons summarized herein.

By order of the Board of Governors, effective September 27, 1976.

Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.
(Signed) Griffith L. Garwood, [seal] Assistant Secretary of the Board.

## Announcements

## REGULATION AA

The Board of Governors of the Federal Reserve System on September 28, 1976, published its procedures for handling complaints by consumers alleging unfair or deceptive practices by banks.

The Board embodied its consumer complaint procedures in a new Regulation AA, effective immediately. The regulation formalizes procedures for handling consumer complaints, in use since early this year, under statutes for which the Congress has given the Board implementing responsibilities.

In an announcement the Board emphasized that any consumer having a complaint regarding an unfair or deceptive practice by a bank, or a violation of law or regulation, can obtain an investigation of the complaint by submitting it, preferably in writing, to the Director of the Division of Consumer Affairs at the Board of Governors of the Federal Reserve System, Washington, D.C. 20551. Complaints may also be registered at the Federal Reserve Bank for the district in which the bank is located.

The Board said the complaint should describe the bank practice or action objected to, give the name and address of the bank concerned, and furnish the name and address of the person complaining.

The Board will attempt to make a substantive reply within 15 days; if that is not possible, the Board will acknowledge the complaint within 15 days and set a reasonable time within which a substantive reply will be made.

The Board will receive complaints regarding any bank. For banks other than State-chartered banks that are members of the Federal Reserve System, complaints will be referred to the relevant Federal bank regulator (Comptroller of the Currency for national banks and Federal Deposit Insurance Corporation for State-chartered banks that are not members of the Federal Reserve System).

The Board noted that more than 2 years ago it established a separate Office of Saver and Con-
sumer Affairs to administer consumer legislation for which the Board writes regulations or has other responsibilities. These laws now include the Truth in Lending Act, the Fair Credit Billing Act, the Equal Credit Opportunity Act, the Home Mortgage Disclosure Act, the Consumer Leasing Act, the Fair Credit Reporting Act, and the provisions against unfair and deceptive practices by banks in recent amendments to the Federal Trade Commission Act.

The Board said its procedures for dealing with consumer complaints are designed to:

1. Assure consumers of prompt and responsive action on complaints involving State member banks, and prompt referral of complaints involving other banks.
2. Through records kept of complaints, and of findings concerning them, provide the means to single out banking practices or acts that are widespread or frequent enough to require possible regulatory action by the Board.

The Board obtains quarterly reports from the FDIC and the Comptroller on the number and nature of complaints they receive.

In announcing procedures by which consumers can get the assistance of the Federal Reserve in investigating complaints alleging unfair or deceptive practices by banks, the Board said the following:

The Board's complaint procedure is not limited to those persons who are customers of the State member bank in question, nor to those acts or practices which are already the subject of Federal regulation. Any person with knowledge of an act or practice which that person considers unfair or deceptive may utilize the complaint procedure.

Similarly, while a consumer complaint may arise under an existing Federal statute or Board regulation, a complaint may also be directed at an act or practice which is either expressly authorized, or not prohibited, by current Federal or State laws or regulation.

However, the complaint procedure does not apply to requests for general information or
publications such as statistical data. Nor does it apply to complaints regarding such matters as monetary policy, fiscal policy, or Treasury issues.

## REGULATION F: Amendment

The Board of Governors has amended Regulation F (Securities of Member State Banks) to make its reporting requirements conform to comparable rules of the Securities and Exchange Commission, effective November 15, 1976.

The Board acted under the Depository Institutions Act of 1974 that requires the Board to make its Regulation F conform to like SEC rules unless the Board determines that such changes are unnecessary or inappropriate.

Under the amended regulation, State member banks that are subject to Regulation $F$ will file expanded quarterly reports to include a condensed balance sheet, a summary statement of changes in financial position, a narrative analysis of results of company operations, and additional financial disclosures deemed appropriate by management. The amended regulation provides also for certain changes in accounting procedures-including revised reporting treatment of a bank's reserve for loan losses, of subordinated debt, of unearned income on loans, and of direct loan financingand for specified additional information in the annual financial reports of certain larger member banks subject to Regulation F .

The amendment as adopted was substantially similar to changes in Regulation F proposed by the Board in February, except that the due date of the new quarterly report will be 45 days after the end of the quarter, instead of 30 days.

## REGULATION T: Amendment

The Board of Governors has adopted an amendment to its Regulation T (Credit by Brokers and Dealers), effective January 1, 1977. The amendment is designed to prevent the excessive use of credit in connection with the issuance, endorsement, or guarantee of puts and calls, which are options to sell or buy stock.

The principal effect of the amendment to Regulation T will be to set the level of margin required for the writing of uncovered options at 30 per cent of the market value of the underlying security, with additional adjustment for unrealized losses and gains. This is the current minimum require-
ment of the major stock exchanges, and it is not anticipated that the amendment will require material changes in current industry practices.

No margin will be required where the option is covered, that is, where the security itself or its equivalent is held in the option writer's account. The amendment specifies what the Board regards as adequate cover.

The amendment will apply to brokers and dealers when they effect transactions in options written by their customers. Under a previous Board ruling no credit could be extended by brokers and dealers to their customers for the purchase of options.

## REGULATION Y: Ruling

The Board of Governors announced on October 13, 1976, that it will continue to allow automobile leasing to be an activity permissible to bank holding companies under the conditions of its existing personal property leasing regulation.

The Board issued public notice on November 11, 1975, of a request for comment on the question of whether automobile leasing should continue to be a permissible activity for bank holding companies and, if so, under what conditions and limitations. The Board also held a public hearing on the question last March 23.

These actions were taken after the National Automobile Dealers Association had sought judicial review of the Board's leasing regulation insofar as it permitted bank holding companies to engage in auto leasing. The case had been remanded to the Board for further study.

Automobile leasing has been a permissible activity since April 17, 1974, when the Board permitted bank holding companies to engage in the general activity of leasing real or personal property under certain conditions.

On the basis of the record before it, the Board concluded that automobile leasing by bank holding companies is essentially financial rather than commercial, is equivalent to a bank's lending functions, does not cause unfair competition, and is not contrary to the provisions of the Consumer Leasing Act of 1976.

The Board also added a footnote to the regulation providing a more specific definition of the requirement that a lease may only be made by a bank holding company on a nonoperating basis. The definition specifies, among other things, that for the purposes of automobile leasing ". . . the
bank holding company may not, directly or indirectly, provide for the servicing, repair or maintenance of the leased vehicle (or) provide for the loan of an automobile during servicing of the leased vehicle; purchase insurance for the lessee. . . ."

## REGULATION Z: Amendments

The Board of Governors has announced adoption of regulatory amendments to carry out provisions of the Consumer Leasing Act of 1976 requiring disclosure of terms under which personal property is leased.

The amendments to Regulation Z (Truth in Lending) will become effective March 23, 1977, when the Consumer Leasing Act becomes effective. The Act requires accurate, meaningful disclosure of the terms of leases of personal property, basically automobiles and furniture, leased primarily for personal, family, or household use, for more than 4 months and for which the total contractual obligation is less than $\$ 25,000$. Enforcement will be the responsibility of the same agencies that enforce the Truth in Lending Act. ${ }^{1}$

The disclosures required by the Consumer Leasing Act have been added as a new section (Section 226.15) of Regulation Z. Other amendments have been made elsewhere in the regulation to comply with the Act, including the provisions of sections dealing with general disclosures, definitions, advertising, and exemptions of States with substantially similar laws.

To assist in compliance with the new law the Board will propose sample disclosure forms for use with leases of personal property subject to the Act. Proper use of these forms will ensure compliance with the Board's regulation.

The amendments to Regulation Z reflect consideration of written suggestions and comment received by the Board following publication of proposed consumer leasing disclosure rules on July 1, 1976, and consideration of testimony received in a hearing held by the Board on August 3, 1976.

[^37]The main disclosures required are as follows:

1. A brief description of the leased property adequate to identify it to both parties to the lease.
2. The total amount of any payment or payments the lessee is to pay at the consummation of the lease, such as a refundable security deposit, advance payment, or the like.
3. The number, amount, and due dates of periodic payments and their total.
4. The total amount of taxes, fees, and other charges involved.
5. Identification of those responsible for maintaining or servicing the leased property.

6 . The means by which any penalty or delinquency charge will be determined, and the amount.
7. A statement as to whether the lessee has an option to purchase the property at the end of the lease term, or earlier, and at what price.
8. A statement of the conditions under which either party to the lease may terminate it, and the method used in determining any penalty or other charge.
9. A statement that the lessee shall be responsible for the difference between the estimated value of the property leased and its realized value at the end of the lease or upon earlier termination, if such liability exists.
10. A statement that in an open-end lease the lessee may obtain a professional appraisal of the property by an independent third party at the end of the lease or upon earlier termination, and that this appraisal will be binding.
11. When the lessee's liability at the end of the lease term is based upon the estimated value of the property:
-A statement of the value of the property at the consummation of the lease, the itemized total lease obligation at the end of the lease, and the difference between them.
-When the estimated value of the leased property exceeds three times the average monthly lease payment for the property concerned, a statement that there is a rebuttable presumption that the estimated value is unreasonable and can only be collected by legal action of the lessor, taken at his expense, with certain exceptions.

The final regulation permits lessors to understate the estimated value of the property in leases with a purchase option as a safety factor in open-end automobile leasing.

At the same time, the Board exempted from the amendments many applications of the Act to leases
of personal property that are incidental to the lease of real property, such as furniture in a rented, furnished apartment.
In letters to the Senate and House banking committees, the Board said neither the Act nor its legislative history mentions combined leases of real and personal property. After considering all comments received on this question, the Board concluded that an exemption provides the most equitable solution pending specific legislative action, and imposes the smaller burden on consumers and lessors.

A new paragraph has been added to the advertising requirements of the regulation to permit the use of merchandise tags without full advertising disclosures when a number of items are being leased, so long as the tags clearly and conspicuously refer to a posted schedule of required disclosures.
The requirement in the July 1 proposal that all disclosures be made on a single page has been eliminated.
The consumer leasing requirements do not apply to:

1. Transactions over $\$ 25,000$.
2. Agricultural credit transactions.
3. Leases of personal property that are incident to the lease of real property and that provide that the lessee (a) has no liability for the value of the property at the end of the lease other than for abnormal wear and tear and (b) has no option to purchase the property leased.

## PROPOSED AMENDMENT

The Board of Governors has proposed to ease its rules to permit interlocking relationships between a member bank and a minority bank (Regulation L-Interlocking Bank Relationships under the Clayton Act). The Board will receive comment through November 15, 1976.

## NEW PUBLICATION Annual Statistical Digest

The first issue of the Annual Statistical Digest, which covers the period 1971-75, is now available. The purpose of the Digest is twofold: First, to provide historical data for many of the tables in the statistical section of the Federal Reserve Bulletin. Second, to make available materials that are no longer being published in the Bulle-

TIN; henceforth these materials to be published only in the Digest. The Digest is designed to provide a convenient source of economic, and especially financial, data for a broad range of users. The availability of such a publication is considered to be of particular importance in view of the changes that are expected to be made soon in the statistical section of the Bulletin.
Many of the series in the Digest represent continuations of series that appear in Banking and Monetary Statistics, 1941-70. In such cases, the table in the Digest usually overlaps its counterpart table in Banking and Monetary Statistics by repeating the last week or month of the data for 1970.

Copies of the Digest are available from Publications Services, Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The cost is $\$ 5.00$ per copy except for each paid Bulletin subscription the cost is $\$ 4.00$ per copy.

## INDUSTRIAL PRODUCTION DATA AVAILABILITY

The four major industrial production series (1976 revision) that were published for the period 1963-75 in the June 1976 Bulletin-total, consumer goods, business equipment, and materi-als-are now available for the period 1954-75 with corrected rounding and have been mailed with the October 1976 G. 12.3 release.

Also, the data that are obtainable in computer tape form (page 812, September Bulletin) have been printed out for noncomputer users and may be ordered at a cost of $\$ 28.80$ from Publications Services, Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. These printed data-both seasonally adjusted and not seasonally adjusted-generally begin in 1954 and end in March 1976; a listing in ascending F.R. code order is also included.

## CHANGES IN BOARD STAFF

The Board's Office of Saver and Consumer Affairs was changed to the Division of Consumer Affairs effective October 1, 1976. This redesignation reflects the expanding responsibilities of this department within the Board's organizational framework.

Robert S. Plotkin, Assistant Director of the Office of Saver and Consumer Affairs, has been named Assistant Director, Division of Banking Supervision and Regulation, effective September 28, 1976.

## SYSTEM MEMBERSHIP: <br> Admission of State Banks

The following banks were admitted to membership
in the Federal Reserve System during the period September 16, 1976, through October 15, 1976:

## Ohio

Canal Winchester .......... The Central Trust Company of Canal Winchester
Illinois
Northbrook ........ Bank of the North Shore
Utah
Salt Lake City .................Tracey-Collins
Bank \& Trust Company

## Industrial Production

## Released for publication October 15

Industrial production is estimated to have been unchanged in September, following increases of 0.5 per cent in each of the two preceding months. In September, production losses from the auto strike more than offset post-strike gains in the rubber and bituminous coal industries; the net effect of these strike developments reduced the total index by an estimated 0.3 per cent. In September, at 131.3 per cent of the 1967 average, total industrial production remained slightly below its peak of 131.9 per cent reached in June 1974.

Output of consumer goods declined by approximately 0.7 per cent, reflecting the effects of the auto strike. Auto assemblies, at a 7.7 -million-unit annual rate in September, were down from an 8.8 million rate in August. Production of consumer durable goods other than autos and utility vehicles expanded further in September, and output of nondurable consumer goods rose somewhat. Production of business equipment is estimated to have increased 0.3 per cent in September, after having increased slightly in August (based on revised data). Output of construction products and business supplies increased further.

Materials production was about unchanged in September as some renewed increases in nondurable materials production, notably chemicals, were offset by declines in steel and automotive parts.

member bank reserves, federal reserve bank credit, and related items
(In millions of dollars)

[^38][^39]
with voluntary participation by nonmember institutions in the F.R. System's program of credit restraint.

As of Dec. 12, 1974, the amount of voluntary nonmember bank and foreign-agency and branch deposits at F.R. Banks that are associated with marginal reserves are no longer reported. However, two amounts are reported: (1) deposits voluntarily held as reserves by agencies and branches of foreign banks operating in the United States; and (2) Euro-dollar liabilities.

5 Part allowed as reserves Dec. 1, 1959-Nov. 23, 1960; all allowed thereafter. Beginning Jan. 1963, figures are estimated except weekly averages. Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date.

6 Beginning with week ending Nov. 15, 1972, includes $\$ 450$ million of
reserve deficiencies on which F.R. Banks were allowed to waive penalties for transition period associated with bank adaptation to Regulation $\mathbf{J}$, as amended effective Nov. 9, 1972. For 1973, allowable deficiencies included are (beginning with first statement week of quarter): Q1, \$279 million; Q2, $\$ 172$ million; Q3, $\$ 12$ million; Q4, $\$ 84$ million. For 1974 , Q1, $\$ 67$ million, Q2, $\$ 58$ million. Transition period ended after 1974, Q2

Beginning with week ending Nov. 19, 1975, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy effective Nov. 19, 1975, of permitting transitional relief on a graduated basis over a 24 -month period when a nonmember bank merges into an existing member bank, or when a nonmember bank joins the Federal Reserve System.

${ }^{1}$ Beginning with week ending Nov. 15, 1972, includes $\$ 450$ million of reserve deficiencies on which F.R. Banks are allowed to waive penalties for a transition period in connection with bank adaptation to Regulation $J$ as amended effective Nov. 9, 1972. Beginning 1973, allowable deficiencies included are (beginning with first statement week of quarter): Q1, $\$ 279$ million; $\mathrm{Q} 2, \$ 172$ million; $\mathrm{Q} 3, \$ 112$ million; $\mathrm{Q} 4, \$ 84$ million. Beginning 1974, Q1, $\$ 67$ million; Q2, $\$ 58$ million. Transition period ended after second quarter, 1974. For weeks for which figures are preliminary, figures by class of bank do not add to the total because adjusted data by class are not available.
Beginning with week ending Nov. 19, 1975, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy, effective Nov. 19, 1975, of permitting transitional relief on a graduated basis over a 24 -month period when a nonmember bank merges into an
existing member bank, or when a nonmember bank joins the Federal Reserve System.
2 Beginning Nov. 9, 1972, designation of banks as reserve city banks for reserve-requirement purposes has been based on size of bank (net demand deposits of more than $\$ 400$ million), as described in the BULLETIN for July 1972, p. 626. Categories shown here as "Large" and "All other" parallel the previous "Reserve city" and "Country" categories, respectively (hence the series are continuous over time).

Note.-Monthly and weekly data are averages of daily figures within the month or week, respectively.

Borrowings at F.R. Banks: Based on closing figures
Effective Apr. 19,1973 , the Board's Regulation A, which governs lend ing by F.R. Banks, was revised to assist smaller member banks to meet the seasonal borrowing needs of their communities.

## BASIC RESERVE POSITION, AND FEDERAL FUNDS AND RELATED TRANSACTIONS

(In millions of dollars, except as noted)

${ }^{1}$ Based upon reserve balances, including all adjustments applicable to the reporting period. Prior to Sept. 25, 1968, carryover reserve deficiencies, if any, were deducted. Excess reserves for later periods are net of all carryover reserves. Beginning with week ending Jan. 7, 1976, adjusted to include waivers of penalties for reserve deficiencies in accordance with Board policy change effective Nov. 19.1975.
${ }_{2}$ Derived from averages for individual banks for entire week. Figure for each bank indicates extent to which the bank's weekly average purchases and sales are offsetting.

Federal funds loaned, net funds supplied to each dealer by clearing
banks, repurchase agreements (purchases of securities from dealers subject to resale), or other lending arrangements.

4 Federal funds borrowed, net funds acquired from each dealer by clearing banks, reverse repurchase agreements (sales of securities to dealers subject to repurchase), resale agreements, and borrowings secured by Govt. or other issues.
Note.-Weekly averages of daily figures. For description of series and back data, see Aug. 1964 Bulletin, pp. 944-74. Revised data for Jan. 1976 may be obtained from the Public Information Office, Office of the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551

${ }^{1}$ Discounts of eligible paper and advances secured by such paper or by U.S. Govt. obligations or any other obligations eligible for F.R. Bank purchase.
2 Advances secured to the satisfaction of the F.R. Bank. Advances secured by mortgages on 1 - to 4 -family residential property are made at the Section 13 rate.
${ }^{3}$ Applicable to special advances described in Section 201.2(e)(2) of Regulation A.
4 Advances to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the U.S. Govt. or any agency thereof.

SUMMARY OF EARLIER CHANGES
(Per cent per annum)

Note.-Rates under Secs. 13 and 13a (as described in table and notes above).

RESERVE REQUIREMENTS ON DEPOSITS OF MEMBER BANKS
(Deposit intervals are in millions of dollars. Requirements are in per cent of deposits.)

Beginning Nov. 9, 1972

| Effective |
| :--- |
| date |

1 When two dates are shown, the first applies to the change at reserve city banks and the second to the change at country banks. For changes prior to 1963 see Board's Annual Reports.
2 (a) Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.
(b) Requirement schedules are graduated, and each deposit interval applies to that part of the deposits of each bank.
(c) Since Oct. 16, 1969, member banks have been required under Regulation $M$ to maintain reserves against foreign branch deposits computed on the basis of net balances due from domestic offices to their foreign branches and against foreign branch loans to U.S. residents. Since June 21, 1973, loans aggregating $\$ 100,000$ or less to any U.S. resident have been excluded from computations, as have total loans of a bank to U.S. residents if not exceeding $\$ 1$ million. Regulation $\mathbf{D}$ imposes a similar reserve requirement on borrowings from foreign banks by domestic offices of a member bank. The reserve percentage applicable to each of these classifications is 4 per cent. The requirement was 10 per cent originally, was increased to 20 per cent on Jan. 7 , 1971, was reduced to 8 per cent effective June 21, 1973, and was reduced to the current 4 per cent effective May 22, 1975. Initially certain base amounts were exempted in the computation of the requirements, but effective Mar. 14, 1974, the last of these putation of the requirements, but effective Mar. 14, reserve-free bases were eliminated. For details, see Regulations D and M.
reserve-free bases were eliminated. For details, see Regulations $D$ and $M$.
3 Effective Jan. 5,1967 , time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits. Beginning Nov. 10, 1975, profitmaking businesses may maintain savings deposits of $\$ 150,000$ or less at member banks. For details of 1975 action, see Regulations D and Q, and also Bulletins for Oct. 1975, p. 708, and Nov. 1975, p. 769.

Notes 2(b) and 2(c) above are also relevant to time deposits.
4 Effective Nov. 9, 1972, a new criterion was adopted to designate reserve cities, and on the same date requirements for reserves against net demand deposits of member banks were restructured to provide that each
member bank will maintain reserves related to the size of its net demand deposits. The new reserve city designations are as follows: A bank having net demand deposits of more than $\$ 400$ million is considered to have the net demand deposits of more than $\$ 400$ million is considered to have the character of business of a reserve city bank, and the presence of the head office of such a bank constitutes designation of that place as a reserve city. Cities in which there are F.R. Banks or branches are also reserve cities. Any banks having net demand deposits of $\$ 400$ million or less are considered to have the character of business of banks outside of reserve cities and are permitted to maintain reserves at ratios set for banks not in reserve cities. For details, see Regulation D and appropriate supplements and amendments.
5 A marginal reserve requirement was in effect between June 21, 1973, and Dec. 11, 1974, against increases in the aggregate of the following types of obligations: (a) outstanding time deposits of $\$ 100,000$ or more, (b) outstanding funds obtained by the bank through issuance by a bank's affiliate of obligations subject to existing reserve requirements on time deposits, and (c) beginning July 12, 1973, funds from sales of finance bills. The requirement applied to balances above a specified base, but was not applicable to banks having obligations of these types aggregating less than $\$ 10$ million. For details, including percentages and maturity classifications, see "Announcements" in Bulletins for May, July, Sept., and cations, see "Announcements" in B
Dec. 1973 and Sept. and Nov. 1974 .
6 The $161 / 2$ per cent requirement applied for one week, only to former reserve city banks. For other banks, the 13 per cent requirement was continued in this deposit interval.

7 See columns above for earliest effective date of this rate.
8 The average of reserves on savings and other time deposits must be at least 3 per cent, the minimum specified by law. For details, see Regulation D.

Note--Required reserves must be held in the form of deposits with F.R. Banks or vault cash.

MAXIMUM INTEREST RATES PAYABLE ON TIME AND SAVINGS DEPOSITS
(Per cent per annum)

| Rates July $20,1966 —$ June 30,1973 |
| :--- |

${ }^{1}$ For exceptions with respect to certain foreign time deposits, see Bulletin for Feb. 1968 , p. 167.
2 Multiple-maturity time deposits include deposits that are automatically renewable at maturity without action by the depositor and deposits that are payable after written notice of withdrawal.
${ }^{3}$ Maximum rates on all single-maturity time deposits in denominations of $\$ 100,000$ or more have been suspended. Rates that were effective Jan. 21, 1970, and the dates when they were suspended are:
$\left.\begin{array}{lll}\begin{array}{l}\text { 30-59 days } \\ 60-89 \text { days } \\ 90-179 \text { days } \\ 180 \text { days to } 1 \text { year } \\ 1 \text { year or more }\end{array} & \begin{array}{l}61 / 4 \text { per cent } \\ 61 / 2 \text { per cent } \\ 63 / 4 \text { per cent } \\ 7\end{array} & 71 / 2 \text { per cent } \\ 7\end{array}\right\} \quad$ June 24, 1970

Rates on multiple-maturity time deposits in denominations of $\$ 100,000$ or more were suspended July 16, 1973, when the distinction between single- and multiple-maturing deposits was eliminated.

4 Effective Dec. 4, 1975, the $\$ 1,000$ minimum denomination does not apply to time deposits representing funds contributed to an Individual Retirement Account established pursuant to 26 U.S.C. (I.R.C. 1954) $\$ 408$
${ }^{5}$ Between July 1 and Oct. 31, 1973, there was no ceiling for certificates maturing in 4 years or more with minimum denominations of $\$ 1,000$. The amount of such certificates that a bank could issue was limited to

5 per cent of its total time and savings deposits. Sales in excess of that amount were subject to the $61 / 2$ per cent ceiling that applies to time deposits maturing in $21 / 2$ years or more.
Effective Nov. 1, 1973 , a ceiling rate of $71 / 4$ per cent was imposed on certificates maturing in 4 years or more with minimum denominations of $\$ 1,000$. There is no limitation on the amount of these certificates that banks may issue.
${ }^{6}$ Prior to Nov. 27, 1974, no distinction was made between the time deposits of governmental units and of other holders, insofar as Regulation $Q$ ceilings on rates payable were concerned. Effective Nov. 27, 1974, governmental units were permitted to hold savings deposits and could receive interest rates on time deposits with denominations under $\$ 100,000$ irrespective of maturity, as high as the maximum rate permitted on such irrespective at any Federally insured depositary institution.

Note.-Maximum rates that may be paid by member banks are established by the Board of Governors under provisions of Regulation Q; however, a member bank may not pay a rate in excess of the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Beginning Feb. 1, 1936, maximum rates that may be paid by nonmember insured commercial banks, as established by the FDIC, have been the same as those in effect for member banks.
For previous changes, see earlier issues of the Bulletin.

Note.-Composition of the money stock measures is as follows:
$M_{1}$ : Averages of daily figures for (1) demand deposits of commercial banks other than domestic interbank and U.S. Govt., less cash items in process of collection and F.R. float; (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, F.R. Banks, and vaults of commercial banks.
$M_{2}$ : Averages of daily figures for $M_{1}$ plus savings deposits, time deposits open account, and time certificates of deposit other than negotiable CD's of $\$ 100,000$ of large weekly reporting banks.
$M_{3}: M_{2}$ plus the average of the beginning and end-of-month deposits
of mutual savings banks, savings and loan shares, and credit union shares (nonbank thrift).
$M_{4}$ : $M_{2}$ plus large negotiable CD's.
$M_{5}$ : $M_{3}$ plus large negotiable CD's
For a description of the latest revisions in $M_{1}, M_{2}, M_{3}, M_{4}$, and $M_{5}$, see "Revision of Money Stock Measures" on pp. 82-87 of the Feb. 1976 Bulletin. Beginning Oct. 1975, money stock measures and related data have been revised to incorporate benchmark data from the Dec. 31, 1975, call report.
Latest monthly and weekly figures are available from the Board's H. 6 release. Back data are available from the Banking Section, Division of Research and Statistics.

1 Averages of daily figures. Member bank reserve series reflect actua reserve requirement percentages with no adjustment to eliminate the effect of changes in Regulations $D$ and $M$. There are breaks in series because of changes in reserve requirements effective Dec. 12, 1974, Feb. 13, May 22, and Oct. 30, 1975, and Jan. 8, 1976. In addition, effective Jan. 1, 1976, statewide branching in New York was instituted. The subJan. 1, 1976, statewide branching in New York was instituted. The subsequent merger of a number of banks raised required reserves beca
higher reserve requirements on aggregate deposits at these banks.
2 Reserves available to support private nonbank deposits are defined as (1) required reserves for (a) private demand deposits, (b) total time and savings deposits, and (c) nondeposit sources subject to reserve requirements, and (2) excess reserves. This series excludes required reserves for net interbank and U.S. Govt. demand deposits.

3 Averages of daily figures. Deposits subject to reserve requirements include total time and savings deposits and net demand deposits as defined by Regulation $D$. Private demand deposits include all demand deposits except those due to the U.S. Govt., less cash items in process of collection and demand balances due from domestic commercial banks.

4 "Total member bank deposits" subject to reserve requirements, plus Euro-dollar borrowings, loans sold to bank-related institutions, and certain other nondeposit items. This series for deposits is referred to as "the adjusted bank credit proxy."
Note.-Back data and estimates of the impact of required reserve changes may be obtained from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

[^42]As of Oct. 31, 1974, "Total loans and investments" of all commercial banks were reduced by $\$ 1.5$ billion in connection with the liquidation of one large bank. Reductions in other items were: "Total loans," \$1.0 billion (of which $\$ 0.6$ billion was in "Commercial and industrial loans"), and "Other securities," $\$ 0.5$ billion. In late November "Commercial and industrial loans" were increased by $\$ 0.1$ billion as a result of loan reclassifications at another large bank.

Note.-Total loans and investments: Back data for 1959-75 available from Banking Section, Division of Research and Statistics; for 1948-58, see Aug. 1968 Bulletin, pp. A-94-A-97. For description of seasonally adjusted series for total loans and investments, see Dec. 1971 Bulletin, pp. 971-73 and for commercial and industrial loans, see July 1972 BulLETIN, p. 683. Data are for last Wed. of month except for June 30 and Dec. 31; data are partly or wholly estimated except when June 30 and Dec. 31 are call dates.

[^43]figures for all bank-premises subsidiaries and other significant majorityowned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis-that is, before deduction of valuation reserves-rather than net as previously reported. 10 See last paragraph of note 1 , second paragraph of note 4 , and note 6 .

Note.-Data are for all commercial banks in the United States (including Alaska and Hawaii, beginning with 1959). Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; nondeposit trust companies; and U.S. branches of foreign banks.
Figures for member banks before 1970 include mutual savings banks as follows: 3 before Jan. 1960 and 2 through Dec. 1960. Those banks are not included in insured commercial banks.
Effective June 30, 1969, commercial banks and member banks exclude a small national bank in the Virgin Islands; also, member banks exclude, and noninsured commercial banks include, through June 30, 1970, a smal member bank engaged exclusively in trust business; beginning 1973, exclude 1 national bank in Puerto Rico.
Beginning Dec. 31, 1973, June 30, 1974, Dec. 31, 1974, June 30, 1975, and March 31, 1976, respectively, member banks exclude and noninsured nonmember banks include 1, 2, 3, 4, and 5 noninsured trust companies that are members of the Federal Reserve System.
Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and by mergers etc.
Figures are partly estimated except on call dates.
For revisions in series before June 30, 1947, see July 1947 Bulletin, pp. 870-71.
(Assets and hiabilities are shown in millions of dollars.)

[^44]4 Not available.
Note.--Data include consolidated reports, including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries. Figures for total loans are shown on a gross basis before deduction of valuation reserve and on a net basis after deduction of valuation reserve. Securities are reported on a gross basis only

Back data in lesser detail were shown in previous Bulletins. Details may not add to totals because of rounding.

## LIABILITIES AND CAPITAL BY CLASS OF BANK, MARCH 31, 1976

A Effective with changes in New York State branch banking laws, beginning Jan. 1, 1976, three large New York City banks are now reporting combined totals for previously affiliated banks that have been converted to branches.

The principal effects of these changes were to increase the reported data for New York City (total assets, by about $\$ 5.5$ billion) and to decrease the
reported data for "Outside New York City" (total assets, by about $\$ 4.0$ billion).
Historical data (from Jan, 1972) on a basis comparable with 1976 data are available from the Public Information Department of the Federal Reserve Bank of New York on request.

For other notes see p. A-22.

## ASSETS AND LIABILITIES OF LARGE COMMERCIAL BANKSA-Continued

(In millions of dollars)

A See p. A-18.
Loan loss reserve and unearned income on loans had been reported as liability items through Mar. 24, 1976. Since then the item is netted against total loans, and therefore against total assets also. As a proxy for this item prior to Mar. 31, 1976, reserves for loans have been used to calculate year-ago figures.

2 Includes securities purchased under agreements to resell.
3 Includes official institutions and so forth.
4 Includes short-term notes and bills.
5 Federal agencies only. 6 Includes corporate stocks.
7 Includes U.S. Govt. and foreign bank deposits, not shown separately.
8 Includes securities sold under agreements to repurchase.
9 Includes minority interest in consolidated subsidiaries. Beginning Mar. 31, 1976, also includes deferred tax portion of reserves for loans. 10 Includes reserves for securities. Beginning Mar. 31, 1976, also includes contingency portion of reserves for loans.
${ }^{11}$ Exclusive of loans and Federal funds transactions with domestic commercial banks.

12 All demand deposits except U.S. Govt. and domestic commercial banks, less cash items in process of collection.
${ }^{13}$ Certificates of deposit issued in denominations of $\$ 100,000$ or more.
14 All other time deposits issued in denominations of $\$ 100,000$ or more (not included in large negotiable CD's).

15 Other than commercial banks.
mercial banks, and official international organizations
rcial banks, and official international organizations. Note.-Effective Mar. 24, 1976, in the city of Chicago and Mar. 31, 1976, in the San Francisco District reclassification of loans resulted in the following major revisions: commercial and industrial, $-\$ 1,168$ million; other nonbank financial institutions, $+\$ 185$ million; real estate, $+\$ 783$ million; other loans, $+\$ 200$ million. These reclassifications are not reflected for earlier dates.

MONEY MARKET RATES
(Per cent per annum)

[^48]rates. Prior to this date, the daily effective rate was the rate considered most representative of the day's transactions, usually the one at which most transactions occurred
5 Except for new bill issues, yields are averages computed from daily closing bid prices.

6 Bills quoted on bank-discount-rate basis
7 Selected note and bond issues.

Note.-Figures for Treasury bills are the revised series described on $p$ A- 35 of the Oct. 1972 Bulletin.

| Number of issues ${ }^{2}$.. | 16 | 20 | 5 | 5 |  |  | 121 | 20 | 30 | 41 | 30 | 40 | 14 | 500 | 500 |

${ }^{1}$ Includes bonds rated Aa and A, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat. As of Dec. 23,1967 , there is no longer an Aaa-rated railroad bond series.

2 Number of issues varies over time; figures shown reflect most recent count.

Note.-Annual yields are averages of weekly, monthly, or quarterly data.

Bonds: Monthly and weekly yields are computed as follows: (1) U.S. Govt., averages of daily figures for bonds maturing or callable in 10 years or more; from Federal Reserve Bank of New York. (2) State and local
govt., general obligations only, based on Thurs. figures, from Moody's Investors Service. (3) Corporate, rates for "New issue", and "Recently offered" Aaa utility bonds, weekly averages compiled by the Board of Governors of the Federal Reserve System; and rates for seasoned issues, averages of daily figures from Moody's Investors Service.

Stocks: Standard and Poor's corporate series. Dividend/price ratios are based on Wed. figures. Earnings/price ratios as of end of period. Preferred stock ratio based on 8 median yields for a sample of noncallable issues- 12 industrial and 2 public utility. Common stock ratios on the 500 stocks in the price index. Quarterly earnings are seasonally adjusted at annual rates.

## NOTES TO TABLES ON OPPOSITE PAGE:

## Security Prices:

1 Standard and Poor's corporate series. Effective July 1976, Standard and Poor added a new financial group, including banks and insurance companies, to the index. Stocks in this revised group are 400 industrials (formerly 425 ), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40 financial.

Note.-Annual data are averages of daily or weekly figures. Monthly and weekly data are averages of daily figures unless otherwise noted and are computed as follows: U.S. Govt. bonds, derived from average market computed as follows: U.S. Govt. bonds, derived from average market
yields in table on p. A- 28 on basis of an assumed 3 per cent, 20 -year bond. Municipal and corporate bonds, derived from average yields as computed by Standard and Poor's Corp., on basis of a 4 per cent, 20 year bond; Wed. closing prices. Common stocks, derived from component common stock prices. Average daily volume of trading, presently conducted 5 days per week for 6 hours per day.

## Stock Market Customer Financing:

${ }^{1}$ Margin credit includes all credit extended to purchase or carry stocks or related equity instruments and secured at least in part by stock (Dec. 1970 Bulletin, p. 920 ). Credit extended by brokers is end-of-month data for member firms of the New York Stock Exchange. June data for banks are universe totals; all other data for banks represent estimates for all commercial banks based on reports by a reporting sample, which accounted for 60 per cent of security credit outstanding at banks on June 30, 1971.
${ }^{2}$ In addition to assigning a current loan value to margin stock generally, Regulations $T$ and $U$ permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.
${ }^{3}$ Nonmargin stocks are those not listed on a national securities exchange and not included on the Federal Reserve System's list of over the counter margin stocks. At banks, loans to purchase or carry nonmargin stocks are unregulated; at brokers, such stocks have no loan value.

4 Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

Note.-Special miscellaneous accounts contain credit balances that may be used by customers as the margin deposit required for additional purchases. Balances may arise as transfers based on loan values of other collateral in the customer's margin account or deposits of cash (usually sales proceeds) occur.

1 Also includes securities of foreign governments and international organizations and nonguaranteed issues of U.S. Govt. agencies.
2 Commitments outstanding of banks in New York State as reported to the Savings Banks Assn. of the State of New York. Data include building
loans.
${ }_{3}$ Balance sheet data beginning 1972 are reported on a gross-of-valua-
tion-reserves basis. The data differ somewhat from balance sheet data previously reported by National Assn. of Mutual Savings Banks, which were net of valuation reserves. For most items, however, the differences are relatively small.

Note.-NAMSB estimates for all savings banks in the United States.

1 Excludes stock of the Federal Home Loan Bank Board. Compensating changes have been made in "Other" assets.
2 Includes net undistributed income, which is accrued by most, but not all, associations.

3 Advances from FHLBB and other borrowing.
4 Data comparable with those shown for mutual savings banks (on opposite page) except that figures for loans in process are not included above but are included in the figures for mutual savings banks.

5 Beginning 1973, participation certificates guaranteed by the Federal Home Loan Mortgage Corporation, loans and notes insured by the Farmers Home Administration, and certain other Govt.-insured mortgagetype investments, previously included in mortgage loans, are included
in other assets. The effect of this change was to reduce the mortgage total by about $\$ 0.6$ billion.

Also, GNMA-guaranteed, mortgage-backed securities of the passthrough type, previously included in "Cash" and "Investment securities" are included in "Other" assets. These amounted to about $\$ 2.4$ billion at the end of 1972.

Note.-FHLBB data; figures are estimates for all savings and loan assns, in the United States. Data are based on monthly reports of insured assns. and annual reports of noninsured assns. Data for current and preceding year are preliminary even when revised.

FEDERAL FISCAL OPERATIONS: SUMMARY
(In millions of dollars)

[^49] exclude the gold balance and to include previously excluded "Other deposi-
taries" (deposits in certain commercial depositaries that have been converted from a time to a demand basis to permit greater flexibility in Treasury cash management)

Includes debt of Federal home loan banks, Federal land banks, R.F.K. Stadium Fund, FNMA (beginning Sept. 1968), and Federal intermediate credit banks and banks for cooperatives (both beginning Dec. 1968).

5 Beginning July 1974, public debt securities excludes $\$ 825$ million of notes issued to International Monetary Fund to conform with Office of Management and Budget's presentation of the budget.

NOTE.-Half years may not add to fiscal year totals due to revisions in series that are not yet available on a monthly basis.

FEDERAL FISCAL OPERATIONS: DETAIL
(In millions of dollars)

1 Old-age, disability, and hospital insurance, and Railroad Retirement accounts.
${ }^{2}$ Supplementary medical insurance premiums and Federal employee retirement contributions
${ }^{3}$ Deposits of earnings by F. R. Banks and other miscellaneous receipts. 4 Consists of interest received by trust funds, rents and royalties on the Outer Continental Shelf, and Govt. contributions for employee retirement. ${ }^{5}$ Estimates presented in Mid-session Review of the 1977 Budget, July 16, 1976. Figures for outlay categories exclude special allowances for
civilian agency pay raises totaling $\$ 800$ million for fiscal year 1977, and therefore do not add to totals.

6 Effective in calendar year 1976, the fiscal year for the U.S. Govt. is being changed from July 1-June 30 to Oct. 1-Sept. 30. The period July 1Sept. 30 of 1976 , data for which are shown separately from fiscal year 1976 and fiscal year 1977 totals, will be a transition quarter.

Note.-Half years may not add to fiscal year totals due to revisions in series that are not yet available on a monthly basis.

1 Includes non-interest-bearing debt (of which $\$ 613$ million on August 31, 1976, was not subject to statutory debt limitation).
2 Includes Treasury bonds and minor amounts of Panama Canal and postal savings bonds.
3 Includes (not shown separately): depositary bonds, retirement plan bonds, Rural Electrification Administration bonds, State and local government bonds, and Treasury deposit funds.

4 Nonmarketable certificates of indebtedness, notes, and bonds in the Treasury foreign series and foreign-currency-series issues.
${ }^{5}$ Held only by U.S. Govt. agencies and trust funds and the Federal home loan banks.

Note.-Based on Monthly Statement of the Public Debt of the United States, published by U.S. Treasury. See also second paragraph in Note to table below.

${ }^{1}$ Consists of investments of foreign and international accounts in the United States.
${ }^{2}$ Consists of savings and loan assns., nonprofit institutions, corporate pensions trust funds, and dealers and brokers. Also included are certain Govt. deposit accounts and Govt.-sponsored agencies.
Note.-Reported data for F.R. Banks and U.S. Govt. agencies and trust funds; Treasury estimates for other groups.

The debt and ownership concepts were altered beginning with the Mar. 1969 Bulletin. The new concepts (1) exclude guaranteed securities and (2) remove from U.S. Govt. agencies and trust funds and add to other miscellaneous investors the holdings of certain Govt.-sponsored but privately owned agencies and certain Govt. deposit accounts. Beginning in July 1974, total gross public debt includes Federal Financing Bank bills and excludes notes issued to the IMF ( $\$ 825$ million).

Note.-Direct public issues only. Based on Treasury Survey of Ownership.
Data complete for U.S. Govt. agencies and trust funds and F.R. Banks but data for other groups include only holdings of those institutions that report. The following figures show, for each category, the number and proportion reporting: (1) 5,511 commercial banks, 471 mutual savings
banks, and 728 insurance companies combined, each about 80 per cent; (2) 451 nonfinancial corporations and 500 savings and loan assns., each about 50 per cent; and (3) 500 State and local govts., about 40 per cent
"All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

1 Since Jan. 1972 has included transactions of dealers and brokers in securities other than U.S. Govt.

Note.-The transactions data combine market purchases and sales of U.S. Govt. securities dealers reporting to the F.R. Bank of New York.

They do not include allotments of, and exchanges for, new U.S. Govt. securities, redemptions of called or matured securities, or purchases or sales of securities under repurchase agreement, reverse repurchase (resale) or similar contracts. Averages of daily figures based on the number of trading days in the period.
(Par value, in millions of dollars)

Note.-The figures include all securities sold by dealers under repurchase contracts regardless of the maturity date of the contract, unless the contract is matched by a reverse repurchase (resale) agreement or delayed delivery sale with the same maturity and involving the same amount of securities. Included in the repurchase contracts are some that more clearly represent investments by the holders of the securities rather than dealer trading positions.

1 Excludes investment companies.
Extractive and commercial and miscellaneous companies.
Railroad and other transportation companies.
Note.-Securities and Exchange Commission estimates of cash trans-
actions only. As contrasted with data shown on preceding page, new issues
exclude foreign sales and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements are defined in the same way and also include securities retired with internal funds or with proceeds of issues for that purpose.

## OPEN-END INVESTMENT COMPANIES

(In millions of dollars)

[^52]Note-Data are obtained from published reports of companies and reports made to the Securities and Exchange Commission. Sales are net of returns, allowances, and discounts, and exclude excise taxes paid directly by the company. Total revenue data include, in addition to sales, income from nonmanufacturing operations and nonoperating income. Profits are before dividend payments and have been adjusted to exclude special charges and credits to surplus reserves and extraordinary items not related primarily to the current reporting period. Income taxes (not shown) include Federal, State and local government, and foreign. Previous series last published in June 1972 Bulletin, p. A-50

1 Includes conventional loans not shown separately.
Note-Data from FNMA and FHLMC, respectively
For FNMA: Holdings include loans used to back bond issues guaranteed For FNMA: Holdings include loans used to back bond issues guaranteed
by GNMA. Commitments include some multifamily and nonprofit hospital loan commitments in addition to 1- to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMAGNMA Tandem Plans.

For FHLMC: Holdings and transactions cover participations as well as whole loans. Holdings include loans used to back bond issues guaranteed by GNMA. Commitments cover the conventional and Govt.-underwritten loan programs.

Note.--American Life Insurance Association data for new commitments of $\$ 100,000$ and over each on mortgages for multifamily and nonresidential nonfarm properties located largely in the United States. The 15 companies account for a little more than one-half of both the total assets and the nonfarm mortgages held by all U.S. life insurance companies. Averages, which are based on number of loans, vary in part with loan composition by type and location of property, type and purpose of loan, and loan amortization and prepayment terms. Data for the following are limited
to cases where information was available or estimates could be made: capitalization rate (net stabilized property earnings divided by property value); debt coverage ratio (net stabilized earnings divided by debt service); and per cent constant (annual level payment, including principal and interest, per $\$ 100$ of debt). All statistics exclude construction loans, increases in existing loans in a company's portfolio, reapprovals, and loans secured by land only.

1 Weighted averages based on probability sample survey of characteristics of mortgages originated by major institutional lender groups (including mortgage companies) for purchase of single-family homes, as compiled by Federal Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation. Data are not strictly comparable with earlier figures beginning Jan. 1973 .

2 Fees and charges-related to principal mortgage amount-include loan commissions, fees, discounts, and other charges, but exclude closing loan commissions, fees, discounts, and other charges,
${ }^{3}$ Effective rate, reflecting fees and charges as well as contract rates
(as shown in first column of this table) and an assumed prepayment at end of 10 years.
${ }_{5}^{4}$ Rates on first mortgages, unweighted and rounded to the nearest basis points.
5 Based on opinion reports submitted by field offices of prevailing local conditions as of the first of the succeeding month. Yields are derived from weighted averages of private secondary market prices for Sec. 203 30 -year mortgages with minimum downpayment and an assumed prepayment at the end of 15 years. Any gaps in data are due to periods of adjustment to changes in maximum permissible contract interest rates.

Note.-Rates are reported on an annual percentage rate basis as specified in Regulation $\mathbf{Z}$ (Truth in Lending) of the Board of Governors. Commercial bank rates are "most common" rates for direct loans with
specified maturities; finance company rates are weighted averages for purchased contracts (except personal loans). For back figures and description of the data, see Bulletin for Sept. 1973.

1 Data beginning Jan. 1976 are not strictly comparable with prior data because of change by Census Bureau in its procedure for estimating contruction outlays of State and local governments. Such governments accounted for 86 per cent of all public construction expenditures in 1974.

2 Includes religious, educational, hospital, institutional, and other buildings.

Note.-Census Bureau data; monthly series at seasonally adjusted annual rates.

## Notes <br> Line

1. Line 2 of p. A. 56.
2. Sum of lines 3-6 or 7-10.
3. Includes farm and commercial mortgages.
4. Credit market funds raised by Federally sponsored credit agencies Included below in lines 13 and 33. Includes all GNMA-guaranteed security issues backed by mortgage pools.
5. Line 1 less line 2 plus line 11. Also line 19 less line 26 plus line 32. Also sum of lines $27,32,39$, and 44 .
6. Includes farm and commercial mortgages.
7. Lines 39 plus 44.
8. Excludes equity issues and investment company shares. Includes line 18.
9. Foreign deposits at commercial banks, bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign affiliates.
10. Demand deposits at commercial banks.
11. Excludes net investment of these reserves in corporate equities
12. Mainly retained earnings and net miscellaneous liabilities.
13. Line 12 less line 19 plus line 26

33-37. Lines 13-17 less amounts acquired by private finance. Line 37 includes mortgages.
45. Mainly an offset to line 9.
46. Lines 32 plus 38 or line 12 less line 27 plus line 45 .
47. Line 2 line 1 .
48. Line $19 /$ line 12.
49. Lines 10 plus 28.

## Corporate equities

Lines 1 and 3. Includes issues by financial institutions.

1 Exports of domestic and foreign merchandise (f.a.s. value basis);
excludes Department of Defense shipments under military grant-aid excludes Department of Defense shipments under military grant-aid programs.
${ }_{2}$ General imports, which includes imports for immediate consumption plus entries into bonded warehouses. See also note 3.
${ }^{3}$ Beginning with 1974 data, imports are reported on an f.a.s. transactions value basis; prior data are reported on a Customs import value
basis. For calendar year 1974, the f.a.s. import transactions value was $\$ 100.3$ billion, about 0.7 per cent less than the corresponding Customs import value of $\$ 101.0$ billion.

Note.-Bureau of the Census data. Details may not add to totals because of rounding.

${ }^{1}$ Includes (a) gold sold to the United States by the IMF with the right of repurchase, and (b) gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the IMF under quota increases. For corresponding liabilities, see Table 5.
${ }_{2}$ Includes gold in Exchange Stabilization Fund.
${ }^{3}$ Includes allocations by the IMF of Special Drawing Rights as follows: $\$ 867$ million on Jan. 1, 1970; $\$ 717$ million on Jan. 1, 1971; and $\$ 710$ million on Jan. 1, 1972; plus net transactions in SDR's.
4 Includes gain of $\$ 67$ million resulting from revaluation of the German mark in Oct. 1969, of which $\$ 13$ million represents gain on mark holdings at time of revaluation.
$\$$ Includes $\$ 28$ million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of Dec. 31, 1971.

6 Total reserve assets include an increase of $\$ 1,016$ million resulting from change in par value of the U.S. dollar on May 8, 1972; of which,
total gold stock is $\$ 828$ million (Treasury gold stock $\$ 822$ million), reserve position in IMF $\$ 33$ million, and SDR's $\$ 155$ million.
7 Total reserve assets include an increase of $\$ 1,436$ million resulting from change in par value of the U.S. dollar on Oct. 18, 1973; of which, total gold stock is $\$ 1,165$ million (Treas. gold stock $\$ 1,157$ million), reserve position in IMF $\$ 54$ million, and SDR's $\$ 217$ million.

8 Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of 16 member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974. At valuation used prior to July 1974 (SDR $1=\$ 1.20635$ ) SDR holdings at end of September amounted to $\$ 2,453$ million, reserve position in IMF, $\$ 4,034$ million, and total U.S. reserves assets, $\$ 19,124$.

Note.-See Table 20 for gold held under earmark at F.R. Banks for foreign and international accounts. Gold under earmark is not included in the gold stock of the United States.

## 4. GOLD RESERVES OF CENTRAL BANKS AND GOVERNMENTS

(In millions of dollars; valued at $\$ 35$ per fine ounce through Apr. 1972, at $\$ 38$ from May 1972-Sept. 1973, and at $\$ 42.22$ thereafter)

${ }^{1}$ Includes reported or estimated gold holdings of international and regional organizations, central banks and govts. of countries listed in this table, and also of a number not shown separately here, and gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold; excludes holdings of the U.S.S.R., other Eastern European countries, and People's Republic of China.
The figures included for the Bank for International Settlements are
the Bank's gold assets net of gold deposit liabilities. This procedure avoids the overstatement of total world gold reserves since most of the gold deposited with the BIS is included in the gold reserves of individual countries.
${ }^{2}$ Net gold assets of BIS, i.e., gold assets minus gold deposit liabilities
${ }^{3}$ Reflects South African Reserve Bank sale of gold spot and repurchase forward.

## 5. U.S. LIABILITIES TO FOREIGN OFFICIAL INSTITUTIONS, AND LIQUID LIABILITIES TO ALL OTHER FOREIGNERS

(In millions of dollars)

1 Includes (a) liability on gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for gold subscriptions to the IMF under quota increases, and (b) U.S. Treasury obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the IMF to the United States to acquire income-earning assets.
2 Includes Bank for International Settlements; also includes European Fund through Dec. 1972.
3 Derived by applying reported transactions to benchmark data.
4 Excludes notes issued to foreign official nonreserve agencies.
${ }_{5}$ Excludes notes issued to roreign official nonreserve agencies. and debt securities of U.S. Federally sponsored agencies and U.S. corporations.
6 Includes short-term liabilities payable in dollars to commercial banks abroad and short-term liabilities payable in foreign currencies to commercial banks abroad and to other foreigners
7 Includes marketable U.S. Treasury bonds and notes held by commercial banks abroad.

8 Principally the International Bank for Reconstruction and Development and the Inter-American and Asian Development Banks.
${ }^{9}$ Data on the 2 lines shown for this date differ because of changes in reporting coverage. Figures on first line are comparable with those
shown for the preceding date; figures on second line are comparable with those shown for the following date.
${ }^{10}$ Includes $\$ 101$ million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969.
${ }^{11}$ Data on the second line differ from those on first line because certain accounts previously classified as official institutions are included with banks; a number of reporting banks are included in the series for the first time; and U.S. Treasury securities payable in foreign currencies issued to official institutions of foreign countries have been increased in issued to official institutions of foreign countries have been
value to reflect market exchange rates as of Dec. $31,1971$.
12 Includes $\$ 162$ million increase in dollar value of foreign currency liabilities revalued to reflect market exchange rates, as follows: shortterm liabilities, $\$ 15$ million; and nonmarketable U.S. Treasury notes, $\$ 147$ million.

Note.-Based on Treasury Dept. data and on data reported to the Treasury Dept. by banks and brokers in the United States. Table excludes IMF holdings of dollars, and U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes held by other international and regional organizations.

## 6. U.S. LIABILITIES TO OFFICIAL INSTITUTIONS OF FOREIGN COUNTRIES, BY AREA

(Amounts outstanding; in millions of dollars)

${ }^{1}$ Includes Bank for International Settlements; also includes European Fund through 1972.
2 Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.
${ }^{3}$ See note 9 to Table 5.
Note.-Data represent short- and long-term liabilities to the official
institutions of foreign countries, as reported by banks in the United States; foreign official holdings of marketable and nonmarketable U.S. Treasury securities with an original maturity of more than 1 year, except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in debt securities of U.S. Federally sponsored agencies and U.S. corporations.

For notes see opposite page.

## 7. SHORT-TERM LIABILITIES TO FOREIGNERS REPORTED BY BANKS

 IN THE UNITED STATES, BY TYPE-Continued(Amounts outstanding; in millions of dollars)

[^64]with those shown for the preceding date; figures on the second line are comparable with those shown for the following date

8 Foreign central banks and foreign central govts. and their agencies, Bank for International Settlements, and European Fund through Dec. 1972.
${ }^{9}$ Excludes central banks, which are included in "Official institutions."
Note.-"Short term" obligations are those payable on demand or having an original maturity of 1 year or less. For data on long-term liabilities reported by banks, see Table 9. Data exclude International Monetary Fund holdings of dollars; these obligations to the IMF constitute contingent liabilities, since they represent essentially the amount of dollars available for drawings from the IMF by other member countries. Data exclude also U.S. Treasury letters of credit and nonnegotiable, noninterest-bearing special U.S. notes held by the Inter-American Development Bank and the International Development Association.

1 Marketable U.S. Treasury bills, certificates of indebtedness, notes, and bonds and nonmarketable U.S. Treasury securities payable in dollars and in foreign currencies.

2 The value of earmarked gold increased because of the changes in par value of the U.S. dollar in May 1972, and in Oct. 1973.

NoTE-Excludes deposits and U.S. Treasury securities held for international and regional organizations. Earmarked gold is gold held for foreign and international accounts and is not included in the gold stock of the United States.

${ }^{1}$ Based on average yield of weekly tenders during month.
2 Based on weekly averages of daily closing rates.
${ }^{3}$ Rate shown is on private securities.

NOTES TO TABLES 19a AND 19b ON PAGES A-70 AND A-71, RESPECTIVELY:
: Cayman Islands included beginning Aug. 1973.
2 Total assets and total liabilities payable in U.S. dollars amounted to $\$ 56,073$ million and $\$ 56,633$ million, respectively, on July 31, 1976.

Note.-Components may not add to totals due to rounding.

For a given month, total assets may not equal total liabilities because some branches do not adjust the parent's equity in the branch to reflect unrealized paper profits and paper losses caused by changes in exchange rates, which are used to convert foreign currency values into equivalent dollar values.
26. CENTRAL BANK RATES FOR DISCOUNTS AND ADVANCES TO COMMERCIAL BANKS
(Per cent per annum)

| Country | Rate as of Sept. 30,1976 |  | Country | Rate as of Sept. 30,1976 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\underset{\text { cent }}{\text { Per }}$ | Month effective |  | Per cent | Month effective |
| Argentina. | 18.0 | Feb. 1972 | Italy. . | 12.0 | Mar. 1976 |
| Austria... | 4.0 | June 1976 | Japan. | 6.5 | Oct. 1975 |
| Belgium. . . . . . . . . . . . . . . . . | 9.0 28.0 | Aug. 1976 | Mexico... | 4.5 | June 1942 |
| Brazil. . | 28.0 | May 1976 | Netherlands | 7.0 | Aug. 1976 |
| Canada | 9.5 | Mar. 1976 | Norway. | 6.0 | Sept. 1976 |
| Denmark | 8.5 | Mar. 1976 | Sweden. | 6.0 | June 1976 |
| France.. | 10.5 | Sept. 1976 | Switzerland. | 2.0 | June 1976 |
| Germany, Fed. Rep. of...... | 3.5 | Sept. 1975 | United Kingdom | 13.0 5.0 | Sept. 1976 Oct. 1970 |

NOTE.-Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt. securities for commercial banks or brokers. For countries with govt. securities for commercial banks or brokers. For countries with
more than one rate applicable to such discounts or advances, the rate more than is the one at which it is understood the central bank transacts shown is the one at which it is understood the central bank transacts
the largest proportion of its credit operations. Other rates for some of the largest proportion
these countries follow:
Argentina- 3 and 5 per cent for certain rural and industrial paper, depending on type of transaction;
Brazil- 8 per cent for secured paper and 4 per cent for certain agricultural paper:

Japan-Penalty rates (exceeding the basic rate shown) for borrowings from the central bank in excess of an individual bank's quota:
United Kingdom-The bank's minimum lending rate, which is the average rate of discount for Treasury bills established at the most recent tender plus one-half per cent rounded to the nearest one-quarter per cent above;
Venezuela-2 per cent for rediscounts of certain agricultural paper, $41 / 2$ per cent for advances against government bonds, and $51 / 2$ per cent for rediscounts of certain industrial paper and on advances against promissory notes or securities of first-class Venezuelan companies.

## GENERAL INFORMATION

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

A heavy vertical rule is used in the following instances: (1) to the right (to the left) of a total when the components shown to the right (left) of it add to that total (totals separated by ordinary rules include more components than those shown), (2) to the right (to the left) of items that are not part of a balance sheet, (3) to the left of memorandum items.
"U.S. Govt. securities" may include guaranteed issues of U.S. Govt. agencies (the flow of funds figures

| (3) figure delayed |  |

also include not fully guaranteed issues) as well as direct obligations of the Treasury. "State and local govt." also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.

The footnotes labeled Note (which always appear last) provide (1) the source or sources of data that do not originate in the System; (2) notice when figures are estimates; and (3) information on other characteristics of the data.

[^0]:    The Federal Reserve Bulletin is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. Direction for the art work is provided by Mack R. Rowe. Editorial support is furnished by the Economic Editing Unit headed by Elizabeth B. Sette.

[^1]:    Note.-Virginia Lewis and John R. Williams of the Board's Division of Research and Statistics prepared this article.
    ${ }^{1}$ Business loans at all commercial banks declined $\$ 1.7$ billion, not seasonally adjusted, during the Febru-ary-April period.

[^2]:    ${ }^{1}$ Less than $\$ 500,000$.
    2 Omitted to avoid individual bank disclosure.
    ${ }^{3}$ See p. A-8 for maximum interest rates payable on time and savings deposits at the time of each survey. Note that the ceiling rate is included in the rate interval in the column to the left.

    Note.-Data were compiled from information reported by a probability sample of member and insured nonmember commercial

[^3]:    ${ }^{1}$ Gross domestic business product (GDBP) includes product originating in farm and nonfarm businesses. It excludes product originating in government, in households and nonprofit institutions, and in the rest of the world (and accruing to U.S. residents).

[^4]:    ${ }^{1}$ The words "this Part," as used herein, mean Title 12, Chapter II, Part 227 of the Code of Federal Regulations, cited as 12 CFR 227 and designated as Regulation AA.

[^5]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ The relevant banking market is approximated by Hamilton County.

[^6]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ The Seminole County banking market, the relevant geographic market for purposes of analyzing the competitive effects of the subject proposal, is approximated by all of Seminole County, Oklahoma.

[^7]:    ${ }^{3}$ Two hundred thousand dollars of the total indebtedness is to be injected into Bank to strengthen its capital.
    ${ }^{4}$ The Comptroller of the Currency recommended denial of this application primarily on the basis of the financial considerations involved. When given an opportunity to respond to the Comptroller's comments, Applicant did not do so.

[^8]:    ${ }^{1}$ In all, Applicant controls a total of 86 banks located in five States with aggregate deposits of $\$ 5.7$ billion.
    ${ }^{2}$ Unless otherwise noted, banking data are as of December 31, 1975.
    ${ }^{3}$ The Minneapolis-St. Paul market is approximated by the RMA, adjusted to include all of Carver County.

[^9]:    ${ }^{4}$ The population of Dakota County, which includes Burnsville, has increased 53.6 per cent from 1960-1970. The population for this county is estimated to have increased an additional 12.0 per cent from 1970-1973.

[^10]:    Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, and Jackson. Present and

[^11]:    ${ }^{1}$ In a letter to the Board, dated March 30, 1976, the Comptroller of the Currency recommended approval of this application stating that it was in the public interest. The Attorney General of Colorado, in a letter to the Board, dated March 17, 1976, while not recommending denial of the application, requested that the Board consider issues pertaining to concentration in the Colorado banking industry, competition in both the State and relevant banking markets, convenience and needs of the community to be served, and public benefits to be derived from consummation of the proposal. The Board's conclusions with respect to these issues as they relate to this application are herein set forth.
    ${ }^{2}$ All banking data are as of June 30, 1975, unless otherwise indicated

[^12]:    ${ }^{3}$ Bank is the 18 th largest independent bank and the 50 th largest of the 277 banks in Colorado.
    ${ }^{4}$ The smaller bank is a subsidiary of the second largest banking organization in Colorado. In addition, a new bank opened on August 30, 1976, in Olathe, which is ten miles north of Montrose.
    ${ }^{5}$ The relevant banking market is approximated by the eastern portion of Montrose County, which is divided in half by the Uncompahgre Forest.
    ${ }^{6}$ This figure is reduced to 5,200 when the new bank in Olathe is taken into account.
    ${ }^{7}$ Nevertheless, the market's average for deposits per bank is nearly double that of any of the three adjacent counties.
    ${ }^{8}$ From 1970-1975, the populations of Montrose County and town, respectively, increased 13.6 and 25.9 per cent. In addition, the average household income for Montrose County increased 85.6 per cent during the same period.

[^13]:    ${ }^{1}$ Unless otherwise indicated, all banking data are as of December 31, 1975.

[^14]:    ${ }^{1}$ Unless otherwise indicated, all banking data are as of December 31, 1975.

[^15]:    ${ }^{1}$ All banking data are as of June 30, 1975, and reflect bank holding company formations and acquisitions approved through August 31, 1976.

[^16]:    ${ }^{2}$ The Janesville-Beloit banking market is the relevant market in this case and is approximated by Rock County, Wisconsin.

[^17]:    ${ }^{1}$ Unless otherwise indicated, all banking data are as of December 31, 1975.
    ${ }^{2}$ The Port Huron market is approximated by St. Clair County, excluding a small western portion that includes the town of Capac. All market data are as of June 30, 1975.

[^18]:    ${ }^{3}$ Protestant Peoples Bank, in its original submission, requested that the Board hold a hearing on the application. Under § 3(b) of the Act, the Board is required to hold a hearing only when the primary supervisor of the bank to be acquired recommends disapproval of the application ( 12 U.S.C. § 1842(b)). In this case, the Comptroller of the Currency issued a preliminary charter approval on October 21, 1975 and has not subsequently recommended that the application be denied. Thus, there was no statutory requirement that a hearing be held. Protestant Peoples Bank submitted written material in support of its protest and by letter of May 27, 1976, withdrew its request for a formal hearing.
    ${ }^{4}$ In conjunction with its consideration of a recent application by Michigan National Corporation, Bloomfield Hills, Michigan, to acquire Peoples Bank and Trust, N.A., Trenton, Michigan. (Board Order of August 24, 1976), the Board had occasion to consider the proper definition of the Detroit banking market and found that it was approximated by the counties of Macomb, Oakland and Wayne.

[^19]:    ${ }^{1}$ Applicant registered as a bank holding company in 1971 at the request of the Federal Reserve Bank of Kansas City. Under § 225.2(b) of the Board's Regulation Y (12 CFR § 225.2(b)) a rebuttable presumption exists that Applicant controls The State Bank of Delphos, Delphos, Kansas; however, the Board has not previously made a determination that Applicant controls that bank.

[^20]:    ${ }^{2}$ Applicant acquired additional shares of Bank during 1973 and 1974 without the prior approval of the Board. At the request of the Federal Reserve Bank of Kansas City, Applicant divested those shares and filed this application to reacquire them.
    ${ }^{3}$ Applicant claims § 4(c)(ii) as authority for its continuing to engage in its nonbanking activities. In the event the Board determines that Applicant is not entitled to that exemption, Applicant has agreed to either file an application pursuant to § 4(c)(8) or divest itself of the shares of Bank it has applied to acquire and thus reduce its holdings of Bank's stock to less than 25 per cent of the outstanding voting shares.
    ${ }^{4}$ All banking data are as of December 31, 1975.
    ${ }^{5}$ The relevant market is approximated by northern Ottawa and southern Cloud Counties.

[^21]:    ${ }^{1}$ All banking data are as of December 31, 1975.
    ${ }^{2}$ Certain of Applicant's nonbanking activities are subject to review under $\S 4(a)(2)$ of the Act. It is anticipated that this review will be completed shortly. Pending completion of this review, Applicant may not comingle the assets of Guardian with assets that might be subject to divestiture or for which Applicant may be required to file an application to retain pursuant to $\S 4(\mathrm{c})(8)$ of the Act.

[^22]:    ${ }^{3}$ The Board has previously indicated that it will view a proposed acquisition of a going concern as offering substantially diminished returns to the public interest where the Applicant is a leading bank holding company with a substantial and growing consumer finance subsidiary that has achieved a significant presence in the industry and where the Applicant has the expertise, managerial talent, and financial resources to expand its operations by means other than acquisition (see the Board's Order denying Citicorp's applications to acquire Amfac Credit Corporation, West Coast Credit Corporation and Federal Discount Corporation, 61 Federal Reserve Bulletin 896 (1975)). Although some of these elements are present in the proposed acquisition, the Board notes that Applicant is a diversified corporation that engages primarily in nonbanking activities and already derives the majority of its income from consumer and business finance activities. Accordingly, this proposal does not present the possibility that the resources of its bank may give the holding company some competitive advantage in the performance of the nonbanking activity; and, there is otherwise no evidence in the record to indicate that consummation of this proposal, in and of itself, would result in any undue concentration of resources, conflicts of interests, or unsound banking practices.

[^23]:    ${ }^{1}$ By Order dated September 11, 1973, the Board approved Applicant's application to acquire Gateway and thereby to engage in underwriting/reinsuring activities [38 Federal Register 26507 (1973)].
    ${ }^{2}$ These States are: Arizona, California, Colorado, Georgia, Louisiana, Missouri, Nevada, New Mexico, Oklahoma, Oregon, Utah, Washington, and Wyoming.
    ${ }^{3}$ The additional States are: Alabama, Florida, Idaho, Indiana, Maryland, Mississippi, Montana, Nebraska, New York, North Carolina, South Dakota, Texas, and Virginia.
    ${ }^{4}$ By Order dated May 21, 1973, the Board approved the application of Northwest Bancorporation, Minneapolis, Minnesota, to acquire Banco Credit Life Insurance Company [38 Federal Register 14205 (1973)]. In that Order, the Board stated:

    In adopting Section 225.4(a)(10), the Board did not consider the underwriting of long term, high value decreasing term life insurance where age is a factor in the rate to be charged. Accordingly, underwriting insurance of this type, which is commonly offered in connection with real estate mortgage loans, is not regarded as having been determined to be closely related to banking under Section $225.4(\mathrm{a})(10)$.

[^24]:    ${ }^{5}$ All banking data are as of December 31, 1975.
    ${ }^{6}$ Applicant engages in mortgage banking activities through Advance Mortgage Company ("Advance"), Southfield, Michigan, a nonbank subsidiary which Applicant acquired on June 15, 1970. Under the provisions of § 4(a)(2) of the Act, Applicant may not retain the shares of Advance beyond December 31, 1980, without Board approval. By order dated December 26, 1973, the Board denied Applicant's application to retain Advance pursuant to $\S 4(c)(8)$ of the Act [60 Federal Reserve Bulletin 50].

[^25]:    ${ }^{1}$ Applicants have applied to retain in the aggregate 98.32 per cent of Company's outstanding voting shares.
    ${ }^{2}$ All banking data are as of December 31, 1975.

[^26]:    ${ }^{3}$ Section $2(\mathrm{~g})(2)$ of the Act provides in pertinent part that for purposes of the Act "shares held or controlled directly or indirectly by trustees for the benefit of . . . a company shall be deemed to be controlled by such company." The shares of Company that are subject to the voting trust are held for the benefit of Applicants' subsidiary banks and thus are deemed to be controlled indirectly by Applicants.

    It is the Board's judgment that Applicants, by acquiring control of Company without prior Board approval, violated the Act. It appears, however, from the facts of record that such violations resulted from a misunderstanding of the statutes applicable to nonbanking activities of bank holding companies and were inadvertent. Applicants mistakenly believed that control of shares of Company was permissible without Board approval under section $4(c)(5)$ and $4(c)(1)(C)$ of the Act. The Board has scrutinized the underlying facts surrounding the acquisition of shares of Company without prior Board approval. In particular, the Board notes that Company's activities are in every respect permissible under section $4(c)(8)$ of the Act and that Applicants took prompt action in bringing their activities into compliance with the Act by applying for Board approval upon being advised by the Federal Reserve Bank of Kansas City of the violations. Upon an examination of all the facts of record, the Board believes that the facts are such that they do not warrant denial of the application to retain shares of Company
    ${ }^{4}$ The St. Louis market is approximated by the City and County of St. Louis, portions of St. Charles and Jefferson Counties, Missouri, and portions of Madison and St. Clair Counties in Illinois.

[^27]:    ${ }^{1}$ All banking data are as of December 31, 1975, unless otherwise indicated.
    ${ }^{2}$ Applicant acquired Financial with Board authorization by Board Order of June 18, 1973 (38 Federal Register 16679 (1973)). At that time, Financial was known as Signet Corporation.

[^28]:    ${ }^{3}$ The Wilkes-Barre market encompasses the northern half of Luzerne County, the southwestern half of Wyoming County below the Susquehanna River, and the southern tip of Lackawanna County.

[^29]:    ${ }^{4}$ Board Order of June 18, 1973, approving the acquisition of Financial by Applicant was conditioned on Financial's commitment to sell credit-related insurance at rates below those that would otherwise apply to such insurance sold by the underwriter. Premiums on credit life insurance will be reduced by 3.3 per cent and premiums on credit disability insurance by 5 per cent.

[^30]:    ${ }^{1}$ In view of this action, the Board considered the application to acquire Agency to be moot.

[^31]:    ${ }^{2}$ All banking data are as of December 31, 1975.
    ${ }^{3}$ Approved by the Board, February 20, 1973, 38 Federal Register 5512 (March 1, 1973).

[^32]:    ${ }^{4}$ BHCo. Inc., Hardin, Montana, 60 Federal Reserve Bulletin 123 (1974); Nebraska Banco, Inc., Ord, Nebraska, 62 Federal Reserve Bulletin 638 (1976).

[^33]:    ${ }^{1}$ Under applicable State law, the Superintendent of the State Banking Department, before granting a certificate, is required to satisfy himself that there is sufficient business to support the proposed bank in the community, Code of Alabama, Tit. $5, \S 88$. Approval of Applicant's charter application therefore reflects a favorable determination by State authorities with regard to the future earnings prospects of Applicant.

[^34]:    ${ }^{2}$ Congress has similarly provided that a decision of the Comptroller of the Currency to charter a national bank will carry with it both membership in the Federal Reserve System and Federal deposit insurance [12 U.S.C. 222, 501a].

[^35]:    *This list of pending cases does not include suits against the Federal Reserve Banks in which the Board of Governors is not named a party.

[^36]:    $\dagger$ Decisions have been handed down in these cases, subject to appeals noted.
    $\ddagger$ The Board of Governors is not named as a party in this action.

[^37]:    ${ }^{1}$ Enforcement agencies are: Comptroller of the Currency, Board of Directors of the Federal Deposit Insurance Corporation, Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Corporation), Administrator of the National Credit Union Administration, Civil Aeronautics Board, Secretary of Agriculture, Farm Credit Administration, Board of Governors of the Federal Reserve System, and the Federal Trade Commission.

[^38]:    1 Includes Federal agency issues held under repurchase agreements beginning Dec. 1, 1966, and Federal agency issues bought outright beginning Sept. 29, 1971
    2 Includes, beginning 1969, securities loaned-fully guaranteed by U.S. Govt. securities pledged with F.R. Banks-and excludes (if any) securities sold and scheduled to be bought back under matched sale-purchase transactions.

[^39]:    ${ }^{3}$ Includes acceptances. For holdings of acceptances on Wed. and end-of-month dates, see p. A-10.

    4 Beginning July 1973, this item includes certain deposits of domestic nonmember banks and foreign-owned banking institutions held with member banks and redeposited in full with F.R. Banks in connection

    Notes continued on opposite page.

[^40]:    ${ }^{1}$ Excludes interbank and U.S. Govt. demand deposit accounts.
    2 Boston, Philadelphia, Chicago, Detroit, San Francisco-Oakland, and Los Angeles-Long Beach.

[^41]:    4 Total deposits include, in addition to the member and domestic nonmember deposits shown, deposits due to foreign and international institutions at F. R. Banks and $M_{1}$ type balances at agencies and branches of foreign banks.
    ${ }^{5}$ At all commercial banks.
    See also Note above.

[^42]:    1 Adjusted to exclude domestic commercial interbank loans.
    2 Loans sold are those sold outright to banks' own foreign branches, nonconsolidated nonbank affiliates of the banks, the banks' holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company. Prior to Aug. 28, 1974, the institutions included had been defined somewhat differently, and the reporting panel of banks was also different. On the new basis, both "Total loans" and "Commercial and industrial loans" were reduced by about $\$ 100$ million.
    3 Reclassification of loans at one large bank reduced these loans by about $\$ 400$ million as of June 30,1972 and by about $\$ 1.2$ billion as of March 31, 1976.

    4 Farmers Home Administration insured notes included in "Other securities" rather than in loans beginning June 30,1971 , when such notes totaled about $\$ 700$ million.
    5 Data beginning June 30, 1974, include one large mutual savings bank that merged with a nonmember commercial bank. As of that date there were increases of about $\$ 500$ million in loans, $\$ 100$ million in "Other securities," and $\$ 600$ million in "Total loans and investments."

[^43]:    ${ }^{1}$ Loans to farmers directly guaranteed by CCC were reclassified as securities and Export-Import Bank portfolio fund participations were reclassified from loans to securities epfective June 30, 1966. This reduced "Total loans", and increased "Other securities" by about $\$ 1$ billion. "Total loans" include Federal funds sold, and beginning with June 1967 securities purchased under resale agreements, figures for which are included in "Federal funds sold, etc.," on p. A-16.
    Effective June 30, 1971, Farmers Home Administration notes were classified as "Other securities" rather than "Loans." As a result of this change, approximately $\$ 300$ million was transferred to "Other securities" for the period ending June 30, 1971, for all commercial banks.,

    Effective Mar. 31, 1976, includes "reserves for loan losses" and "unearned income on loans."
    See also table (and notes) at the bottom of p. A-24.
    2 See first 2 paragraphs of note 1 .
    ${ }_{3}^{3}$ Reciprocal balances excluded beginning with 1942.
    4 Includes items not shown separately. See also note 1 .
    Effective Mar. 31, 1976, "reserves for loan losses" and unearned income on loans," which for all commercial banks are estimated to be approximately $\$ 14.5$ billion, have been netted against "other assets" and "other liabilities" and, therefore, against "total assets/liabilities."
    5 See third paragraph of note 1 above.
    6 Effective Mar. 31, 1976, includes "reserves for securities" and a portion of "reserves for loan losses."
    7 For the last-Wednesday-of-the-month series, figures for call dates are shown for June and December as soon as they became available.
    8 Beginning with Dec. 31, 1947, the series was revised; for description, see note 4, p. 587, May 1964 Builetin.

    9 Figure takes into account the following changes, which became effective June 30, 1969: (1) inclusion of consolidated reports (including

[^44]:    1 Member banks exclude and nonmember banks include 5 noninsured trust companies that are members of the Federal Reserve System, and member banks exclude 2 national banks outside the continental United States.

    2 See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. 24.
    ${ }^{3}$ Demand deposits adjusted are demand deposits other than domestic commercial interbank and U.S. Govt., less cash items reported as in process of collection.

[^45]:    1 Reported the last Wednesday of each month
    Note.-For description of series see article "Revised Series on Commercial and Industrial Loans by Industry," Feb. 1967 Bulletin, p. 209.

[^46]:    Commercial and industrial "term" loans are all outstanding loans with an original maturity of more than 1 year and all outstanding loans granted original maturity of the commitment was in excess of 1 year.

[^47]:    1 Beginning Nov. 9, 1972, designation of banks as reserve city banks for reserve-requirement purposes has been based on size of bank (net demand deposits of more than $\$ 400$ million), as described in the Bulletin for July 1972, p. 626. Categories shown here as "Other large" and "All other member"' parallei the previous "Reserve City" (other than in New York member" parallei the previous "Reserve City" (other than in New York (hence the series are continuous over time).

[^48]:    1 Averages of the most representative daily offering rate quoted by dealers.

    2 Averages of the most representative daily offering rate published by finance companies, for varying maturities in the $90-179$ day range.
    ${ }^{3}$ Beginning Aug. 15, 1974, the rate is the average of the midpoint of the range of daily dealer closing rates offered for domestic issues; prior data are averages of the most representative daily offering rate quoted by dealers.
    4 Seven-day averages of daily effective rates for week ending Wednesday. Since July 19, 1973, the daily effective Federal funds rate is an average of the rates on a given day weighted by the volume of transactions at these

[^49]:    ${ }^{1}$ Represents non-interest-bearing public debt securities issued to the International Monetary Fund and international lending organizations. New obligations to these agencies are handled by letters of credit.
    ${ }^{2}$ Includes accrued interest payable on public debt securities until June 1973 and total accrued interest payable to the public thereafter; deposit funds; miscellaneous liability (includes checks outstanding) and asset accounts; seigniorage; increment on gold; fiscal 1974 conversion of interest receipts of Govt. accounts to an accrual basis; gold holdings, gold certificates and other liabilities, and gold balance beginning Jan. 1974; and net gain/loss for U.S. currency valuation adjustment beginning June 1975.

    As of Jan. 3, 1972, the Treasury operating balance was redefined to

[^50]:    1 Only bonds sold pursuant to 1949 Housing Act, which are secured by contract requiring the Housing Assistance Administration to make annual contributions to the local authority.
    ${ }^{2}$ Municipalities, counties, townships, school districts.
    ${ }^{3}$ Excludes U.S. Govt. loans. Based on date of delivery to purchaser and payment to issuer, which occurs after date of sale.

[^51]:    ${ }^{1}$ Includes contractual and regular single-purchase sales, voluntary and contractual accumulation plan sales, and reinvestment of investment income dividends; excludes reinvestment of realized capital gains dividends.
    ${ }^{2}$ Market value at end of period less current liabilities.
    ${ }^{3}$ Cash and deposits, receivables, all U.S. Govt. securities, and other short-term debt securities, less current liabilities.

    4 Beginning Jan. 1976, sales and redemption figures exclude money market funds.

[^52]:    Historical data covering revisions for the textile, apparel, and leather industry, as well as total nondurables and all manufacturing, are available upon request from the Capital Markets Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washing ton, D.C. 20551.
    ${ }^{1}$ Profits after taxes unadjusted are as reported by the individual companies. These data are not adjusted to eliminate differences in accounting treatments of special charges, credits, and other nonoperating items.

    2 Includes 21 corporations in groups not shown separately.
    3 Includes 25 corporations in groups not shown separately.

[^53]:    ${ }_{2}^{1}$ Includes trade, service, construction, finance, and insurance.

[^54]:    1 Includes loans held by nondeposit trust companies but not bank trust departments.
    ${ }_{2}$ Outstanding principal balances of mortgages backing securities insured or guaranteed by the agency indicated.
    ${ }^{3}$ Other holders include mortgage companies, Real Estate Investment Trusts, State and local credit agencies, State and local retirement funds, noninsured pension funds, credit unions, and U.S. agencies for which amounts are small or separate data are not readily available.

[^55]:    Note--Based on data from various institutional and Govt. sources, with some quarters estimated in part by Federal Reserve in conjunction with the Federal Home Loan Bank Board and the Dept. of Commerce. ported directly and interpolations and extrapolations where required are estimated mainly by Federal Reserve. Multifamily debt refers to loans on structures of 5 or more units.

[^56]:    1 Mortgage amounts offered by bidders are total bids received.
    2 Average accepted bid yield (before deduction of 38 basis-point fee paid for mortgage servicing) for home mortgages assuming a prepayment

[^57]:    ${ }^{1}$ Excludes 30 -day charge credit held by retailers, oil and gas companies, and travel and entertainment companies.
    ${ }_{2}$ Mutual savings banks, savings and loan associations, and auto dealers.

[^58]:    ${ }^{1}$ Monthly figures are seasonally adjusted.
    2 Excludes 30 -day charge credit held by retailers, oil and gas companies and travel and entertainment companies.

[^59]:    A Revised data for 1955-62, comparable to the revised data beginning 1963 shown below, will be published later.

    Employees only: excludes personnel in the Armed Forces
    2 Production workers only. Revised back to 1973
    3 F.R. index based on Census Bureau figures.
    4 Prices are not seasonally adjusted. Latest figure is final.
    Note.-All series: Data are seasonally adjusted unless otherwise noted.

[^60]:    ${ }^{1}$ Because of improved procedures for collecting data for 1 -family homes, some totals are not strictly comparable with those prior to 1968. To improve comparability, earlier levels may be raised by approximately 3 per cent for total and private construction, in each case, and by 8 per cent for residential building.

[^61]:    Note.-Dollar value of construction contracts as reported by the McGraw-Hill Informations Systems Company, F.W. Dodge Division. Totals of monthly data may differ from annual totals because adjustments are made in accumulated monthly data after original figures have been published.
    Private housing units authorized are Census Bureau series for 14,000 reporting areas with local building permit systems.

[^62]:    ${ }^{1}$ Dec. $1968=100$.

[^63]:    ${ }^{1}$ Seasonal factors are no longer calculated for capital transactionslines 14 through 49.

    2 Adjusted to a balance of payments basis; among other adjustments, excludes military transactions and includes imports into the Virgin excludes
    ${ }^{3}$ Differs from the definition of "net exports of goods and services" in the national income and product (GNP) account. The GNP definition

[^64]:    1 Data exclude IMF holdings of dollars
    2 Excludes negotiable time certificates of deposit, which are included in "Other short-term liabilities."
    ${ }^{3}$ Includes nonmarketable certificates of indebtedness and Treasury bills issued to official institutions of foreign countries.

    4 Includes liabilities of U.S. banks to their foreign branches, liabilities of U.S. agencies and branches of foreign banks to their head offices and foreign branches, bankers' acceptances, commercial paper, and negotiable time certificates of deposit.
    ${ }_{5}$ Principally the International Bank for Reconstruction and Development and the Inter-American and Asian Development Banks.
    ${ }^{6}$ Principally bankers' acceptances, commercial paper, and negotiable time certificates of deposit.

    7 Data on the 2 lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage

[^65]:    ${ }^{1}$ Excludes central banks, which are included with "Official institutions." 2 Comprises oil-exporting countries as follows: Bahrain, Iran, Iraq,

[^66]:    ${ }^{1}$ Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).
    ${ }_{2}$ Comprises Algeria, Gabon, Libya, and Nigeria.
    Note.-Short-term claims are principally the following items payable on demand or with a contractual maturity of not more than 1 year: loans

[^67]:    made to, and acceptances made for, foreigners; drafts drawn against foreigners, where collection is being made by banks and bankers for their own account or for account of their customers in the United States; and foreign currency balances held abroad by banks and bankers and their customers in the United States. Excludes foreign currencies held by U.S. monetary authorities.

[^68]:    1 Data on the 2 lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable with those shown for the

[^69]:    $\dagger$ On leave of absence

[^70]:    Ellmore C. Patterson, second federal reserve district, President William F. Murray, seventh federal reserve district, Vice President

    Richard D. Hill, first federal reserve district
    James F. Bodine, third federal reserve district
    M. Brock Weir, fourth federal reserve district
    John H. Lumpkin, fifth federal reserve district
    Lawrence A. Merrigan, sixth federal reserve district

    Edwin S. Jones, eighth federal reserve district
    Donald R. Grangaard, ninth federal reserve district
    Eugene H. Adams, tenth federal reserve district
    Ben F. Love, eleventh federal reserve district
    Gilbert F. Bradley, twelfth federal reserve district
