# Federal Reserve Bulletin 

DECEMBER 1972

BOARD OF GOVERNORS $\quad$ THE FEDERAL RESERVE SYSTEM ■ WASHINGTON, D.C.

A copy of the Federal Reserve Bulletin is sent to each member bank without charge; member banks desiring additional copies may secure them at a special $\$ 2.00$ annual rate. The regular subscription price in the United States and its possessions, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Republic of Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay, and Venezuela is $\$ 6.00$ per annum or 60 cents per copy; elsewhere, $\$ 7.00$ per annum or 70 cents per copy. Group subscriptions in the United States for 10 or more copies to one address, 50 cents per copy per month, or $\$ 5.00$ for 12 months. The Bulletin may be obtained from the Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D. C. 20551, and remittance should be made payable to the order of the Board of Governors of the Federal Reserve System in a form collectible at par in U.S. currency. (Stamps and coupons not accepted)

# One-Bank Holding Companies Before the 1970 Amendments 

BANK HOLDING COMPANY organizations are a major element in the American banking system. As of December 31, 1970, when the latest major amendments to the Bank Holding Company Act became law, holding companies accounted for more than half of all U.S. commercial bank deposits. This status has been achieved only recently, however, and it is attributable in large part to the growth of one-bank holding companies during the last few years.

The importance of the one-bank type of holding company is indicated by the fact that such organizations-a total number of 1,352 located throughout the United States-held well over a third of the deposits of all commercial banks at the end of 1970. As of the same date, there were 121 multibank holding company groups-organizations that controlled more than one bank. These groups, located in 35 States, operated 895 banks that held one-sixth of all commercial bank deposits.

The importance of holding company organizations in the United States, by geographic region, is illustrated in Figures 1 and 2. Figure 1 shows that in each of 16 States banks owned by multibank holding companies accounted for more than 25 per cent of the deposits in the State at the end of 1970 . Figure 2 shows that all bank holding companies-that is, multibank and one-bank com-bined-had at least that proportion of total deposits in 39 States.

The pervasiveness of holding companies is a recent development. For example, in 1965 only 550 one-bank holding companies were known to exist. These companies were typically small concerns controlling small banks, and they were mainly in unit-banking

1 MULTIBANK HOLDING COMPANIES: total number and per cent of total State deposits controlled

2
ALL BANK HOLDING COMPANIES: total number and per cent of total State deposits controlled

States. Primarily because these one-bank organizations were small, Congress had exempted them from regulation when the Bank Holding Company Act was passed in 1956, and again when the Act was amended in 1966.

During the late 1960's, however, there was a wave of formations of one-bank holding companies. As Table 1 shows, more than one-half of the 1,318 one-bank holding company organi-zations-for which data are available-in existence on December 31, 1970, had become operational after June 1, 1968. Many of the largest banks in the country were involved in this movement. By forming one-bank holding companies, they could enter nonbanking business activities that were not open to commercial banks. By 1970, as a consequence of these developments, one-bank holding companies were operating in every major sector of the American economy.

At the end of 1970, Congress passed the Bank Holding Company Act amendments that brought one-bank holding companies under the regulation of the Board of Governors of the Federal Reserve System. The principal objective of the 1970 amendments was to maintain the separation between banking and commerce, by defining, in general terms, the kinds of nonbanking activities that bank holding companies might enter.

The 1970 amendments to the Bank Holding Company Act required every one-bank holding company to file a registration statement with the Board of Governors of the Federal Reserve System. The registration statement describes the holding company

TABLE 1

[^1]organization, reports data for affiliated banks and nonbank subsidiaries, and reports in detail on the nonbank activities of the company and its subsidiaries. These registration statements represent the first comprehensive set of data available on one-bank holding companies.

This article draws on information from the registration statements to provide an overview of the nature of one-bank holding companies at the time of the amendments in 1970. It focuses on the size distribution of one-bank holding company organizations and their affiliated banks and on the nonbanking activities of these organizations. For this article, if a holding company controls one or more other holding companies, the companies are treated as a single organization. In addition, companies that filed a declaration of intent to divest their bank or any nonbanking subsidiary are included, in order to describe the one-bank holding company movement before it was directly affected by legislation.

## SIZE OF HOLDING COMPANIES AND BANKS

For the discussion of size, a four-way classification of holding companies based on their involvement in nonbanking activities is used. The classes, which are described in the notes to Table 1 , are: (1) banking only; (2) closely related; (3) not closely related; and (4) foreign.

Holding companies. The majority of all one-bank holding companies (parent company only) are small; 74 per cent reported total assets of less than $\$ 5$ million, and 88 per cent had less than $\$ 25$ million, at the end of 1970. A few companies, however, reported total assets of $\$ 1$ billion or more.

TABLE 2
SIZE OF ONE-BANK HOLDING COMPANY ORGANIZATIONS BY CLASS OF COMPANY, DECEMBER 31, $1970^{1}$

| Class of company | Number of companies |  |  |  |  |  |  |  |  | Amount of assets (in millions of dollars) |  |

|  | Total | Asset size (in millions of dollars) |  |  |  |  |  |  |  |  |  |
|  |  | Less than 5 | 5-10 | 10-25 | 25-50 | 50-100 | 100-500 | 500-1.000 | $\begin{aligned} & 1,000 \text { and } \\ & \text { over } \end{aligned}$ | Total, all companies | Average per company |
| Banking only ... | 252 | 230 | 8 | 8 | 2 | 3 | 1 | $\ldots$ | $\ldots$ | 928.5 | 3.7 |
| Closely related: $>1 / 4$ banking. | 301 | 275 | 9 | 7 | 4 | 2 | 2 | 2 |  | 2,534.2 | 8.4 15.3 |
| $<1 / 4$ banking. | 24 | 11 | 5 | 5 | ... | 2 | 1 | ... | $\ldots$ | 367.3 | 15.3 |
| Total .......... | 325 | 286 | 14 | 12 | 4 | 4 | 3 | 2 |  |  |  |
| Not closely related: |  |  |  |  |  |  |  |  |  |  |  |
| $>1 / 4$ banking. | 500 | 374 | 34 | 35 | 20 | 15 | 17 | 3 | 2 | 13,020.6 | 26.0 |
| <1/4 banking | 215 | 86 | 31 | 32 | 20 | 10 | 17 | 8 | 11 | 29,298.1 | 136.3 |
| Total .......... | 715 | 460 | 65 | 67 | 40 | 25 | 34 | 11 | 13 |  |  |
| Foreign ......... | 17 |  | 2 | 1 | 1 | $\ldots$ | 7 | $\ldots$ | 6 | 32,799.6 | 1,929.4 |
| Not classifiable ${ }^{2}$. | 9 | 4 | 1 | ... | 1 | $\ldots$ | 3 | $\ldots$ | $\ldots$ | 455.3 | 50.6 |
| Total ......... | 1,318 | 980 | 90 | 88 | 48 | 32 | 48 | 13 | 19 | 79,403.6 | 60.2 |

${ }^{1}$ Excludes 34 holding companies that submitted late registration statements.
${ }^{2}$ Mainly trusts.

As Table 2 shows, holding companies engaged in nonbanking activities are likely to be larger than those engaged only in banking. Of the 252 one-bank holding companies classified as banking only, 91 per cent reported total assets of less than $\$ 5$ million; 88 per cent of the 325 companies classified as closely related had assets of less than $\$ 5$ million; and 64 per cent of the 715 companies classified as not closely related had assets of less than $\$ 5$ million. The foreign holding companies are, on the average, the largest type of holding company; none of the 17 companies in the foreign class had assets of less than $\$ 5$ million. The only companies with assets of over $\$ 1$ billion were in the not closely related or foreign classes.

Table 2 also shows that investments in banks accounted for more than 25 per cent of total assets for most of the holding companies that reported nonbanking activities. The larger size classes tend to have a greater proportion of companies for which banking is relatively unimportant.

Banks. Most of the banking subsidiaries of one-bank holding companies are relatively small, as Table 3 shows. Seventy-one per cent had total deposits of less than $\$ 25$ million. Still, most of the Nation's largest banks have been absorbed into one-bank holding companies since the late 1960's, and as of the end of 1970 there were 28 companies whose banking subsidiaries had $\$ 1$ billion or more of deposits. (In this study, a bank is considered a subsidiary if the holding company owns at least 25 per cent of the outstanding voting stock.)

TABLE 3

| Total ......... | 1,318 | 343 | 296 | 296 | 130 | 91 | 116 | 18 | 28 | 190,967.6 | 144.9 |

[^2]${ }^{2}$ Mainly trusts.

The larger subsidiary banks-those with deposits of $\$ 100$ million and over-are generally controlled by one-bank holding companies that are in either the not closely related to banking or foreign classes, as Table 3 shows. In fact, 23 of the 28 subsidiary banks with deposits of $\$ 1$ billion or more are controlled by holding companies in the not closely related class.

In addition to owning stock in subsidiary banks, some one-bank holding companies own stock in nonsubsidiary banks-that is, banks in which they own less than 25 per cent of the stock. Of the one-bank holding companies in existence on December 31, 1970, 163 owned stock in 307 nonsubsidiary banks with total deposits of $\$ 8.5$ billion as of June 1971. While the average stock holding in nonsubsidiary banks was 16.5 per cent, 44 of the 163 holding companies owned 24.9 per cent of the outstanding voting stock.

## NONBANKING ACTIVITIES

As noted earlier, the activities of one-bank holding companies were not subject to the Bank Holding Company Act prior to 1970. Hence, many one-bank holding companies engaged in nonbank activities, although usually on a relatively small scale. Then in the 1965-70 period diversification increased dramatically. Whereas only 34 nonbank subsidiaries had been formed or acquired by bank holding companies between 1930 and 1939 and 290 between 1950 and 1959, the number of acquisitions and formations jumped to 2,571 in the 6-year period 1965-70. Part of this accelerated diversification was attributable to anticipation of regulatory legislation. (Readers may refer to the tables on pages A-99 to A-101 for detailed statistics on which some of the comments in this section are based.)

Of the 1,318 holding company organizations for which data are available as of December 31, 1970, 1,149 were engaged in nonbank activities. Of this number, 584 owned nonbank subsidiaries and 565 engaged directly in nonbank activities. As of that date, onebank holding companies were operating in 276 of the industries with three-digit SIC codes. However, there were very few one-bank holding companies in most of these industries. In fact, there was only one holding company or holding company subsidiary represented in 70 industries and no more than five in 185 of the 276 industries.

Not surprisingly, the nonbank activities of one-bank holding companies were heavily concentrated in the areas of finance, insurance, and real estate. Table 4, which presents separate data on financial and nonfinancial activities and provides finer breakdowns of activities where possible, shows the three-digit SIC industries that are engaged in by 50 or more holding companies or holding company subsidiaries.

TABLE 4

${ }^{1}$ Includes all three-digit activities engaged in by 50 or more one-bank holding companies or their subsidiaries. For purposes of this article, financial and nonfinancial activities are defined in accordance with the 1967 SIC system. Financial activities include banks and trust companies, credit agencies other than banks, holding companies, other investment companies, brokers and dealers in securities and commodity contracts, and security and commodity exchanges. These activities are in major SIC groups 60, 61, 62 and 67.
${ }^{2}$ In cases where the SIC system is not sufficiently refined for purposes of this article and no four-digit code is shown, the industry groupings are those devised by the Board's staff.

# 3 <br> ONE-BANK HOLDING COMPANIES and number of subsidiaries 

Of the 584 holding companies that owned nonbank subsidiaries, most owned relatively few, as Figure 3 indicates. Among those reporting information for the year-end 1970, there were 423 that had less than 6 nonbank subsidiaries.

Large one-bank holding companies-measured by total assets of the parent corporation-account for a relatively large share of nonbank activities, as Table 5 shows. Holding companies with assets of $\$ 100$ million and over (parent only) accounted for 57 per cent of all assets of nonbank subsidiaries. The largest size class ( $\$ 1$ billion or more of total assets) accounted for only about 2.5 per cent of the total number of diversified companies at the end of 1970, but these companies owned almost 8 per cent of all nonbank subsidiaries.

There are two reasons for the dominance of large companies: One is that, although many more small one-bank holding companies have nonbank subsidiaries than large ones, larger one-bank holding companies have, on the average, a larger number of nonbank subsidiaries. The second is that nonbank subsidiaries of larger companies tend to be substantially larger than those of the small ones.

[^3]TABLE 5

${ }^{1}$ Five companies are not included because data reported for them are inadequate.
Note.-Details may not add to totals because of rounding.

Generally speaking, the larger the size of the affiliated bank, the greater the number of its nonbank subsidiaries (Table 5). For the two smallest size classes of banks, the parent companies account for 13 per cent of all nonbank subsidiaries but only 2 per cent of the assets of nonbank subsidiaries. On the other hand, for the two largest size classes of banks, the parent companies account for 19 per cent of all nonbank subsidiaries and 26 per cent of their assets.

Comparison of the data presented in Table 5 would suggest that the size of the one-bank holding company rather than the size of the bank determines the extent of nonbank activities.

SUMMARY
By December 31, 1970, one-bank holding companies accounted for 38 per cent of the Nation's commercial bank deposits. Because of their unregulated status prior to December 31, 1970, these companies operated in every major sector of the economy. The 1970 amendments to the Bank Holding Company Act of 1956 brought
all bank holding companies under the regulation of the Board of Governors of the Federal Reserve System, and required them to file registration statements with the Board.

The registration statements of the one-bank holding companies in existence at the end of 1970 provide the first comprehensive body of data available on such companies. The data examined here indicate that:

- The majority of both holding companies and their affiliate banks are small, and large holding companies tend to be involved in nonbank activities to a greater extent than small companies.
- Banking is relatively less important in the operation of large companies than of small companies.
- One-bank holding companies, as a group, engage in a wide range of nonbank activities, but most of them, taken singly, engage in only a few such activities.
- The most important nonbank financial activities among holding companies are establishments performing functions closely related to banking, personal and business credit institutions, and loan correspondents and brokers.
- The most important nonfinancial activities are insurance agents and brokers, real estate operators and agents, and business services.
- And finally, large holding companies account for a relatively large share of the nonbank activities in which one-bank holding companies are engaged.

# Evolution of the Payments Mechanism 

The following statement was prepared by the Federal Reserve System Steering Committee on Improving the Payments Mechanism to inform the Nation's bankers and the public of the general direction of payments mechanism development as currently envisioned by the Committee.

The essential features of the payments system that is evolving in response to electronic technology are reasonably clear. These features are not likely to change drastically unless a new technology develops. Private and public roles in this system probably will be very similar to those in being today with financial institutions interfacing with the public and the Federal Reserve maintaining the interface among financial institutions. The Federal Reserve has indicated its intent to accommodate visible evolution in the payments mechanism by continuously improving and updating its facilities to handle a growing volume of funds transfers along the channels of likely development. Thus, the regional processing centers and expanded clearinghouse arrangements now being established by the Federal Reserve System in some 40 trade centers for handling checks may become the nuclei of interconnected regional communications networks for handling wire transfers of funds and financial data.

The System's role in facilitating the development of automated clearing facilities and the linkage of such facilities to provide a nationwide network for automated crediting systems or preauthorized debiting systems may pioneer a similar role in the experimental point-of-sale terminals. Such terminals, now linked to a single bank's computer and energized by a unique credit-card authorization system, with appropriate standards and interlinkage, may potentially provide merchants and consumers with a convenient means of consummating transactions at the point of sale over a broad range of merchants and financial institutions and over
large geographic areas. These transactions encompass use of an electronic communications network to transfer payments originating (a) at a point of sale, (b) with a wage, salary, or other income payment, or (c) with an authorization to charge a depositor's account. This network would serve all accounts from which, or to which, payments are made.

## CHANGES IN PROSPECT

The Nation's payments mechanism can be expected to evolve in the direction of a system where credit to the payee's account is made at the same time the payor's account is charged. Increasingly, these transfers will be made over a computer-directed communications network. As electronic transfers become technologically and economically superior, checks would be largely displaced. The use of the credit card, or a similar means of activating electronic payments transfers, should expand greatly. Much of today's paper-oriented operation would be displaced by electronic terminals at the point of sale for making direct funds transfers, with the related accounting being done by computers. Significant reductions in the volume of transactions made through the use of paper currency may also take place-by the use of point-of-sale terminals and through other electronic techniques.

The electronic funds transfer system is expected to evolve in a modular fashion through the development and interlinkage of a comprehensive series of computer-directed communications networks. At the local level, the system would include commercial banks and possibly other depositary institutions linked to point-of-sale terminals in retail establishments, to computers in businesses, and possibly to terminal devices in homes. Through these financial institutions, connection would be made to regional, national, and international networks, enabling the movement of funds nearly everywhere in the world.

## OBJECTIVES

The payments system as it evolves will need to be aimed at providing the public with a convenient, economical, and secure means of moving funds. In comparison to the present check and other funds transfer systems, the new payments system should:

- be more efficient, as electronic data processing and communications technologies replace labor-intensive processing procedures.
- provide a more secure method of payment, less subject to theft, loss, forgery, and alteration of payments data, and a method of tracing all transactions.
- assure a more equitable balance of the debit and credit effect on participants.
- accommodate both debit and credit transfers.

The system would continue to:

- provide for the continuation of competition among financial institutions.
- involve public participation and surveillance over private institutions' money role.
- be capable of providing timely and detailed data on money flows, trade volumes, and other pay-ments-related information for use in monetary policy and other relevant applications.

## FEDERAL RESERVE INVOLVEMENT

The Federal Reserve Act directs the Federal Reserve System to provide an efficient payments mechanism for the public. The policy statement of the Board of Governors on June 18, 1971, called for 'basic changes in the Nation's system for handling money payments [as] essentially transitional steps toward replacing the use of checks with electronic transfer of funds."

In further development of the payments mechanism, the convenience and needs of the participants should continue to be the primary considerations. These needs may be summarized as follows:

Consumers need an economical means of payment that is acceptable anywhere; is less subject to theft than cash; is less subject to loss, forgery, and alteration than checks; facilitates the keeping of necessary personal records; and enables them convenient access to a wide range of services from financial institutions.

Businesses need a system that reduces the time, costs, and risks in making and receiving payments; that facilitates the transmitting,
storage, and retrieval of associated information; and that provides better integration of business electronic data processing capabilities with the payments mechanism.

Financial institutions need a more efficient system of transferring funds-one that is less labor intensive-a system that will enable them to offer customers a wider variety of services, including informational services based on the improved data generated by the payments system.

Government needs are similar to those of business, but with the additional special need for greater security against theft of checks issued to the public.

## ROLE OF THE FEDERAL RESERVE SYSTEM

It is anticipated that the Federal Reserve will install and manage a nationwide communications network through which interregional settlements between financial institutions will be made.

A number of other networks may exist. In part, these will be local and regional funds transfer networks in which Federal Reserve involvement may be minimal. The total of transfers internal to banking institutions may expand if demand deposit market shares become more concentrated. Thrift institutions may set up their own networks. Credit-card clearing networks may become more widespread.

The level of Federal Reserve involvement in different regional or local networks for transfer of funds will vary depending on the banking structure. The Federal Reserve should expect to monitor the regional and local networks to assure that a satisfactory degree of security is being maintained and that the capability for interfacing with the national network is obtained.

Since the payments mechanism will evolve continuously, the Federal Reserve should expect to continue its participation in this evolutionary process in order to assure the desired development and coordination of the payments system, to insure the continued competition among providers of financial services, and to protect the public interest.

## ROLE OF FINANCIAL INSTITUTIONS

It is anticipated that private financial institutions will continue to play the predominant role in local and regional communications networks through which intraregional payments will flow.

The number of private facilities engaged in processing payments transactions may decline as branching systems and holding companies centralize their accounting operations, or as correspondent banks expand their accounting services, or as smaller institutions use specialized service bureaus or band together to perform demand deposit and other accounting services.

Nearly all financial institutions will be linked together through local, regional, or national communications networks by means of compatible input and output devices. Customers with larger volumes of transactions will interface into their banks' equipment. Competitive marketing of collection and payments services may become less localized. Through the use of advanced equipment, more and better services will be available to customers.

## ROLE OF BUSINESS

The evolution of the payments system will enable business and governmental units to utilize electronic data processing equipment more fully and streamline their payments procedures. It will be possible to submit payments data to and receive payments data from financial institutions in electronically transferable form. Businesses can now use computer-oriented input to initiate payment from their own deposit accounts or, through preauthorization agreements, initiate payment from the deposit accounts of customers. They will be able to send to their customers machine-readable invoices that, when forwarded to the issuing companies or the customers' banks, will be transformed into electronic payment messages.

Larger business and governmental depositors will establish computer-to-computer connections with the financial institutions that hold their accounts. This option will permit greater competition for accounts because distances will have a diminishing cost impact.

Instantaneous funds transfers will significantly simplify corporate funds management.

Float will largely disappear and will not be a significant factor to consider in determining investable funds. Corporate treasurers will be able to obtain more timely information from financial institutions on the status of corporate balances, and the timing of certain classes of funds' receipts and disbursements will become more predictable.

Informational services provided by financial institutions will enable small- and medium-sized businesses to manage investment of funds in a manner previously practicable only in large businesses.

## ROLE OF THE INDIVIDUAL

It is anticipated that, due to rising costs and delays and given a more convenient, cheaper alternative, most individuals will minimize their writing of checks. Salaries, wages, pensions, dividends, and other income items will predominantly be credited directly into individuals' accounts and, through preauthorization, recurring payments will be deducted automatically from accounts. In addition, a consumer will be able to pay some bills simply by signing a machine-readable invoice and forwarding it to the issuing company or the financial institution holding the consumer's account. Other payments will be made through point-of-sale terminals, with either the individual's demand deposit account or possibly an interest-bearing de-ferred-payment account being debited.

The consumer will be able to complete financial transactions through the use of a card or similar identifying device, and this procedure will be accomplished through automated teller units conveniently located in shopping centers, in other places handling numerous consumer sales, and in the home.

## FUTURE STEPS

As the electronic payments system continues to develop, some areas that may need continuing attention by the Federal Reserve System are as follows:

- public reaction and changes in public attitudes toward payments system improvements.
- impact of payments system improvements on the public's use of coin and currency.
- bank cards and their relationship to the payments mechanism; the competitive impact of bank cards with respect to retail credit cards.
- international electronic funds transfer developments.
- impact of payments system developments on Federal Reserve System operations and policy.
- technological developments in data handling and transmission.
- development of the standards necessary for effi-
cient transmittal and interchange of payments information.
- legal considerations surrounding actions designed to improve the payments system.

The Federal Reserve System will need for some time to continue to devote significant resources to the development of the Nation's payments mechanism.

## Statement to Congress

Statement by Arthur F. Burns, Chairman, Board of Governors of the Federal Reserve System, before the Subcommittee on Priorities and Economy in Government of the Joint Economic Committee, December 7, 1972.

I appreciate this opportunity to discuss with you measures for moderating cyclical swings in the availability of credit for housing. In a report submitted last March, the Federal Reserve Board set forth recommendations to accomplish that objective. Before reviewing those recommendations, it may be useful to comment on recent developments in the markets for housing and mortgage credit, and to assess prospects for the year ahead.

The flow of savings into the thrift institutions that specialize in mortgage lending has shown extraordinary strength for more than 2 years. Commercial banks and other financial institutions have also been abundantly supplied with funds for lending. As generally happens in times of ample credit availability, housing credit and construction have expanded rapidly. In fact, residential mortgage loans have grown at an unprecedented rate. Growth in the first three quarters of this year was at an annual rate of $\$ 46$ billion, compared with $\$ 36$ billion in 1971 and less than $\$ 20$ billion in most other years.

Savings and loan associations and mutual savings banks accounted for about two-thirds of the expansion in residential mortgage loans in 1971 and 1972. Life insurance companies have continued to reduce their investment in mortgages on 1 - to 4 -family dwellings. On the other hand, commercial banks have been able this year to accommodate business and related loan demands and at the same time to expand their portfolios of residential mortgage loans at a record annual rate of $\$ 10$ billion.

Homebuilding began to respond vigorously to easier credit conditions during the second half of 1970, and thereby provided a much needed
stimulus to general economic activity. This year housing starts will probably reach a new peak of more than 2.3 million units, not counting mobile-home shipments, which should exceed 550,000 units.

Interest rates on home-mortgage loans are now only a little higher than they were earlier this year, and the rise has been associated in part with more liberal non-rate terms on conventional loans and larger loan amounts. In October rates for conventional loans on new homes averaged about 7.60 per cent, up 10 to 15 basis points from their recent low last spring, but still somewhat below their August 1971 level and some 90 basis points below their peak in the summer of 1970 .

Further expansion in over-all business activity in 1973 might put upward pressure on shortterm interest rates. There is, however, no imminent threat of a substantial diversion of savings flows from mortgage-oriented thrift institutions into market securities. In recent years, these institutions have managed to increase appreciably the proportion of their liabilities taking the form of longer-term deposit certificates with attractive yields. Moreover, minimum denominations of Treasury bills and various agency issues have been raised, and this too should help to moderate deposit withdrawals. Deposits should thus continue to grow at a good rate, even if the recent phenomenal pace is not sustained. And supplementary support can be expected from FNMA, the Federal home loan banks, and related sources when and as needed.

Since backlogs of demand have been filled and vacancy rates are now rising in some areas, production of housing in 1973 may be below this year's record level. But with funds for mortgage credit continuing in relative abundance, the pace of residential construction should continue ahead of that required to meet the national housing goal established by the Congress in 1968.

Encouraging as these developments are, we should not lose sight of the need to make the mortgage market less vulnerable to the storms by which it has been buffeted periodically in the past. On a sunny autumn day, the prudent commuter gets out his snow tires. Chances are he will need them some time during the winter, and it is best to get them on before the snow falls. It is comforting to know that this committee is mindful of the need to help others prepare for winter weather.

Past experience indicates that at certain stages of the business cycle, forces develop that diminish the availability of funds for home loans. Mortgage credit for housing is typically in short supply when the demand for credit from other sectors rises rapidly. In a briskly expanding economy, business demands for credit from banks and the public market normally increase to finance additions to plant, equipment, and inventories. Interest rates then tend to rise, and the supply of credit available for other borrowers is squeezed. The shortage of credit may be intensified if the aggregate demand for goods and services threatens to exceed the Nation's productive capacity. For in that event monetary policies designed to restrain demand and to curb inflation will further restrict the available supply of credit to borrowers.

The difficulties experienced by the housing industry stem in significant measure from the fact that homebuyers depend heavily for credit on institutions that are in a poor position to compete for funds when market rates of interest rise sharply. Their deposit inflows then shrink, and so does their ability to sustain the flow of mortgage credit. Legislative and regulatory limits on mortgage interest rates also constrict the flow of funds to housing in periods of general credit restraint.

Other classes of borrowers, particularly business firms, are less affected by general credit restraint. Established business enterprises not only enjoy preferred status as customers of commercial banks; they often also have access to alternative sources of credit in money and capital markets. Thus in periods when the aggregate demand for goods and services becomes exuberant, the share of new loan funds absorbed
by business tends to rise, while that for housing falls.

While it may not be possible or even desirable to eliminate cyclical fluctuations in the supply of credit for housing, the feast-to-famine swings that we have experienced in the past have clearly been excessive. In its report to the Congress submitted last March, the Board made several recommendations for smoothing out these cyclical variations in the supply of housing credit and hence in housing construction. I will summarize the reasoning behind these recommendations briefly.

First, the Board believes that the main thrust of new initiatives should strike directly at the sources of fluctuation in housing credit. Accordingly, the Board recommends removal of a number of legislative and regulatory constraints that at times discourage investment in mortgages. Interest-rate ceilings on FHA and VA loans, intended as protection for homebuyers, have meant in practice that this form of financing periodically dries up, or becomes available only if the seller is willing to pay several 'points'" as a loan fee. Recognizing this fact, the Congress has allowed greater flexibility in these ceilings by authorizing their adjustment by administrative action. Even so, the ceiling rates often lag behind market developments. If Congress abolished the ceilings, or tied them directly to market interest rates, it would encourage the States to take similar action with regard to usury laws, which have also served to block the flow of funds into mortgages.

Other changes in Federal legislation would be helpful. The Federal Reserve Act should be amended to permit the Federal Reserve Banks to lend to member banks on the basis of sound mortgage collateral at the regular discount rate. The statutory restrictions on real estate loans by national banks should be eliminated so that mortgage lending by these banks may be governed mainly by considerations of safety and soundness, tested by examinations, as other types of loans are. When that is done, the Comptroller of the Currency should however be authorized to establish safeguards through such regulations as may seem necessary from time to time. Removal of the geographical restric-
tions on conventional mortgage loans of Federal savings and loan associations would help free funds for investment where the need is greatest. As in the case of FHA and VA rate ceilings, such actions at the Federal level could lead to similar liberalization of State laws.

Steps should also be taken to strengthen the ability of depositary institutions to attract and hold consumer savings when yields are rising on market securities. The thrift institutions that specialize in mortgage lending are particularly vulnerable at such times because of the disparity between their assets, which consist of long-term loans with fixed yields, and their liabilities, which are short-term. When market rates rise, savings tend to be diverted from thrift institutions into market securities because the institutions are unable to raise their rates to meet the competition. And when deposit inflows shrink, the supply of mortgage credit also declines.

The sharp swings in deposit inflows and in loan activity at these institutions could be moderated somewhat by lengthening the average maturity of their deposits. Some progress has been made, and is being made, in this direction but more could be done, perhaps by adjusting deposit rate ceilings to allow greater incentives for savers to invest for longer periods.

Some benefits would also accrue from shortening the average life of the earning assets of thrift institutions, although any sizable move in this direction should come only after careful consideration of the potential impact on the supply of mortgage credit in the long run. Some benefits can probably be gained by encouraging the specialized mortgage lenders to put a modest portion of their earning assets into consumer loans. Then their earnings would respond better to changes in market interest rates, and they would be in a somewhat better position to adjust the rates they pay on deposits so as to maintain savings inflows.

Another step well worth considering would be to enable all depositary institutions to offer mortgages with variable interest rates and attendant safeguards, side by side with the traditional fixed-rate mortgage. Since the variablerate mortgage would result in more flexible average earnings rates, the institutions could
compete more effectively for deposits. Steadier deposit inflows, in turn, would mean greater stability in the availability of mortgage credit during business cycles. And this greater stability could be achieved without affecting adversely the long-run supply of mortgage funds.

Along with these benefits would come some costs. The risk of interest rate fluctuations would be a complicating factor in the planning of homebuyers who chose a variable-rate mortgage. But this difficulty could be kept within reasonable bounds by putting limits on the amount that the rate could vary, and by providing that the monthly payment would normally remain fixed, with rate changes affecting only the term to maturity. To protect borrowers and facilitate rational choice, the lenders should be required to make full disclosure about variablerate and fixed-rate mortgages. And needless to say, the contract should provide for adjustments both ways-to reflect reductions as well as increases in interest rates.

It would probably take 10 years or more for variable-rate mortgages to become a substantial element in the portfolios of depositary institutions. But they have the potential, in time, of playing a key role in smoothing out flows of funds into home loans, and their encouragement therefore deserves serious consideration.

For the immediate future, the best hope for greater stability in housing lies in continued progress in controlling inflation, and particularly in better management of our fiscal affairs so that less reliance would need to be placed on credit policy to stabilize the over-all economy. By making greater use of fiscal tools, sectors of the economy that are relatively immune to monetary policies could be made to bear their share of restraint during periods of excess demand.

Specifically, the Board recommends flexible use of the investment tax credit as a means of achieving greater stability in outlays by business firms for machinery and equipment. These expenditures are large, cyclically volatile, and relatively insensitive to monetary policy. During periods of credit restraint, expenditures for machinery and equipment have repeatedly drawn on resources that otherwise would have been available for housing.

If the investment tax credit were lowered in boom times and raised in slack periods, we would experience more stability in business demand for external financing, and therefore also in market interest rates and in the flow of funds for housing. This tax flexibility could be achieved by authorizing the President to vary the investment tax credit within prescribed limits, perhaps from zero to 10 or 15 per cent. Before a change in rate could become effective, a 60 -day waiting period should be allowed for disapproval by either House of the Congress, analogous to the procedure for reorganization plans.

Among the recommendations in its report, the

Board believes that first priority should be given to the proposed variable investment tax credit. Establishment of machinery for flexible use of the investment tax credit would yield benefits more quickly than can be expected from the other recommendations, and the benefits would be substantial, not only for housing but also for other sectors that are sensitive to fluctuations in credit conditions.

In closing, let me commend this committee for drawing attention to the need to improve credit arrangements for housing. We should take advantage of the breathing spell we are now enjoying in order to prepare for problems that may develop in the future.

# Record of Policy Actions <br> of the Federal Open Market Committee 

Records of policy actions taken by the Federal Open Market Committee at each meeting, in the form in which they will appear in the Board's Annual Report, are released approximately 90 days following the date of the meeting and are subsequently published in the Federal Reserve Bulletin

The record for each meeting includes the votes on the policy decisions made at the meeting as well as a résumé of the basis for the decisions. The summary descriptions of economic and financial conditions are based on the information that was available to the Committee at the time of the meeting, rather than on data as they may have been revised since then.

Policy directives of the Federal Open Market Committee are issued to the Federal Reserve Bank of New York-the Bank selected by the Committee to execute transactions for the System Open Market Account.

Records of policy actions have been published regularly in the Bulletin beginning with the July 1967 issue, and such records have continued to be published in the Board's Annual Reports.

The records for the meetings held in 1972 through August 15 were published in the Bulletins for April, pages 390-97; May, pages 455-63; June, pages 562-70; July, pages 640-48; August, pages 707-12; September, pages 790-96; October, pages 899-904; and November, pages 973-78. The record for the meeting held on September 19, 1972, follows:

## MEETING HELD ON SEPTEMBER 19, 1972

## Current economic policy directive.

The information reviewed at this meeting suggested that growth in real output of goods and services in the third quarter would be substantial although well below the annual rate of 9.4 per cent recorded in the second quarter. Growth was expected to be more rapid in the fourth quarter than in the third and to remain at a fast pace in the first half of 1973.

In August retail sales continued to expand, according to the advance report, and they were substantially greater than the monthly average in the second quarter. Industrial production rose moderately, after having increased little in June and July; part of the gain was attributable to recovery from the effects of tropical storm Agnes. Nonfarm payroll employment, which had been adversely affected by strikes as well as by the storm, rose appreciably in August. Reflecting a large increase in the labor force as well as in employment, the unemployment rate-at 5.6 per cent-was essentially unchanged from the rate in June and July.

The advance in hourly earnings of production workers on private nonfarm payrolls in August, as in July, was moderately faster than in the second quarter. The rise in wholesale prices of farm products and foods remained rapid, and the advance in prices of industrial commodities, which had slowed in July, resumed the somewhat faster pace of earlier months this year. In July the increase in the consumer price index was larger than in the immediately preceding months, chiefly because of a sharp rise in retail prices of foods.

Staff projections continued to suggest that expansion in consumption expenditures would be strong in the fourth quarter, in part because of the 20 per cent increase in social security benefits scheduled to begin in early October. It was also anticipated that growth in State and local government purchases of goods and services would be raised by enactment of Federal revenue sharing; that business fixed investment would continue to increase, in line with recent surveys; that residential construction would level off; and that, in response to sustained expansion in final takings of goods, inventory investment would rise appreciably further.

Foreign exchange markets had remained relatively quiet since
mid-August. An increase in short-term interest rates in the United States relative to those in other major countries had contributed to a further strengthening of the dollar against major European currencies, and central bank reserves of most industrial countries had continued to change little. In July both U.S. merchandise imports and exports increased, and the trade deficit was virtually unchanged from the high level of the two preceding months.

Market interest rates generally advanced in the interval between the August and September meetings of the Committee. Increases in rates were significantly larger for short-term than for long-term securities and were greatest for Treasury bills. Bill rates had been unusually low relative to other short-term rates, reflecting mainly demands for bills associated with foreign central bank acquisitions of dollars and with the absence of a short-term issue in the Treasury's August refunding. In the intermeeting period, however, foreign central banks sold bills on balance, and Treasury financing operations added to the market supply of bills. The impact of the change in supply-demand relationships was magnified when a firming in money market conditions just before the Labor Day weekend strengthened market expectations of further increases in interest rates in an environment of strong economic expansion. On the day before this meeting the market rate on 3-month bills was 4.65 per cent, compared with 3.87 per cent on the day before the August meeting.

In markets for long-term securities, increases in rates were greater for Treasury issues than for other securities, chiefly because the rise in short-term rates induced dealers to reduce their inventories of the new longer-term issues acquired in the Treasury's August refunding. The volume of new publicly issued corporate bonds had declined moderately from July to August, and a large decline appeared in prospect for September. While the volume of new State and local government bonds had increased somewhat in August, it appeared likely to decline again in September.

Contract interest rates on conventional new-home mortgages and yields in the secondary market for Federally insured mortgages were stable from July to August. Inflows of savings to nonbank thrift institutions slowed from the rapid rates in June and July.

At commercial banks, outstanding business loans increased sharply further in August, and real estate and consumer loans
continued to expand rapidly. Banks again reduced their holdings of U.S. Government securities-as the Treasury's net borrowing demands remained smaller than customary for that season of the year-but they increased their holdings of other securities. Late in the month, in response to the strength in loan demands and to increases in short-term market rates of interest, most banks raised their prime rates from $51 / 4$ to $51 / 2$ per cent.

Growth in the narrowly defined money stock $\left(M_{1}\right),{ }^{1}$ which was rapid in July following relatively slow growth on the average in May and June, fell back in August. Expansion in the more broadly defined money stock $\left(M_{2}\right)^{2}$ and in the bank credit proxy ${ }^{3}$ also slowed, despite substantial increases in consumer-type time and savings deposits and in the outstanding volume of large-denomination CD's. In late August and early September, however, the money stock grew more rapidly than it had on the average in August.

System open market operations in the period since the August 15 meeting had been guided by the Committee's objective of fostering growth in reserves available to support private nonbank deposits (RPD's) at an annual rate of between 5 and 9 per cent in the August-September period, subject to the proviso that money market conditions should not be permitted to firm markedly. Pursuit of the RPD target was complicated by the need to absorb reserves at a time when the market supply of Treasury bills was increasing. Early in the period, RPD's-and the monetary aggregates-appeared to be expanding rapidly. As the System acted to restrain growth in reserves, short-term interest rates began to rise sharply and financial markets became increasingly sensitive; this was especially evident just before the Labor Day weekend when a number of banks misjudged their reserve needs and bid the Federal funds rate up as high as $5^{1 / 2}$ per cent. In order to avoid a marked firming in money market conditions and unduly sharp increases in interest rates, for a time the System supplied reserves more generously.

[^4]At the time of this meeting it appeared that growth in RPD's would be quite rapid in September, and that the average rate of growth in the August-September period would exceed the upper limit of the target range by a significant amount. However, most of the overage evidently would reflect a temporary increase in excess reserves-and member bank borrowings-around the Labor Day weekend. Apart from the rise in excess reserves, growth in RPD's appeared to be at about the upper limit of the target range. The Federal funds rate, which had been around $43 / 4$ per cent at the time of the preceding meeting, currently was about 5 per cent. In the 5 weeks ending September 13 member bank borrowings averaged about $\$ 440$ million, compared with about $\$ 250$ million in the preceding 4 weeks.

The Committee agreed that the economic situation called for growth in the monetary aggregates in coming months at rates less rapid than those that now appeared likely to be recorded for the third quarter. At the same time, the members noted that conditions in financial markets were still highly sensitive. They also noted that the prospective relationships among bank reserves, monetary aggregates, and money market conditions were more than usually uncertain because of the difficulties of forecasting the behavior of banks during the period of adjustment to the amendments to Regulations D and J that were scheduled to become effective September 21, 1972. The situation was further complicated by uncertainty as to whether implementation of the regulatory actions would be delayed as a consequence of certain court proceedings currently under way.

The Committee took note of a staff analysis suggesting that an average rate of expansion in RPD's in September and October in a range equivalent to 9.5 to 13.5 per cent ${ }^{4}$ would be likely to lead to more moderate growth in monetary aggregates over the months ahead. The members decided to seek an RPD growth rate

[^5]in that range-preferably, in the lower part-unless disturbances arose in financial markets or unless growth rates in the monetary aggregates appeared to be falling far short of expectations. In view of the sensitive state of financial markets and the uncertainties associated with Regulations D and J, they also decided that the System Account Manager should have more than the usual degree of discretion in making operating decisions and that he should give more than customary attention to money market conditions, while continuing to avoid marked changes in such conditions. It was agreed that account also should be taken of international financial developments, and it was understood that the Chairman might call upon the Committee to consider the need for supplementary instructions before the next scheduled meeting if it appeared that the Committee's objectives and constraints were not being met satisfactorily.

The following current economic policy directive was issued to the Federal Reserve Bank of New York:

The information reviewed at this meeting suggests a substantial increase in real output of goods and services in the current quarter, although well below the unusually large rise recorded in the second quarter. In July and August, wages and prices advanced somewhat more rapidly on balance than in the immediately preceding months, while the unemployment rate remained substantial. Foreign exchange market conditions have remained quiet in recent weeks and the central bank reserves of most industrial countries have continued to change little. In July, the large excess of U.S. merchandise imports over exports persisted.

In August on average, growth slowed in the narrowly and broadly defined money stock and in the bank credit proxy, but in recent weeks the money stock has been expanding more strongly. Since mid-August, interest rates on Treasury bills have increased sharply, while yields on most other market securities have advanced more moderately.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster financial conditions conducive to sustainable real economic growth and increased employment, abatement of inflationary pressures, and attainment of reasonable equilibrium in the country's balance of payments.

To implement this policy, while taking special account of the effects of possible bank regulatory changes, developments in credit
markets, and international developments, the Committee seeks to achieve bank reserve and money market conditions that will support more moderate growth in monetary aggregates over the months ahead.

Votes for this action: Messrs. Burns, Hayes, Brimmer, Bucher, Coldwell, Daane, Eastburn, Mayo, Mitchell, and Sheehan. Votes against this action: Messrs. MacLaury and Robertson.

Absent and not voting: Mr. Winn. (Mr. Mayo voted as Mr. Winn's alternate.)

Mr. MacLaury dissented from this action because he had become increasingly disturbed by the rapid rates of growth in the aggregates, given the prospective strength of the economy, and he felt that the Committee's current operating procedures did not assure that money market conditions would be permitted to tighten sufficiently to slow this excessive monetary growth in the near future.

Mr. Robertson dissented because of his belief that with the existing potentiality for increased inflationary pressures, the Committee was not doing enough to curb the rate at which reserves were being fed into the banking system by the Federal Reserve and to slow down the rate of growth in the monetary aggregates. In his view, the failure to do so might result in a new ground swell of inflation later on.

# Law Department 

Statutes, regulations, interpretations, and decisions

## SECURITY CREDIT TRANSACTIONS: MAXIMUM LOAN VALUE OF STOCKS

The Board of Governors has amended the Supplements to Regulation G, "Securities Credit by Persons Other than Banks, Brokers, or Dealers'"; Regulation T, "Credit by Brokers and Dealers'"; and Regulation U, "Credit by Banks for the Purpose of Purchasing or Carrying Margin Stocks", effective November 24, 1972. The amendments raised the margin requirement from 55 to 65 per cent for credit extended by brokers, dealers, banks, and other lenders to finance purchase of stocks. No change was made in the 50 per cent margin requirement for purchasing or carrying convertible bonds or in the 70 per cent retention requirement applicable to undermargined accounts. The text of the amendments to the Supplements reads as follows:

## SUPPLEMENT TO REGULATION G

Effective November 24, 1972, section 207.5(a) (the Supplement to Regulation G) is amended to read as follows:

## SECTION 207.5—SUPPLEMENT

(a) Maximum loan value of margin securities. For the purpose of section 207.1 , the maximum loan value of any margin security, except convertible securities subject to section $207.1(\mathrm{~d})$, shall be 35 per cent of its current market value as determined by any reasonable method.

## SUPPLEMENT TO REGULATION T

Effective November 24, 1972, section 220.8(a)(1) and (d) (the Supplement to Regulation T ) is amended to read as follows:

## SECTION 220.8-SUPPLEMENT

(a) Maximum loan value for general accounts. The maximum loan value of securities in a general account subject to $\S 220.3$ shall be:
(1) of a registered non-equity security held in the account on March 11, 1968, and continuously
thereafter, and of a margin equity security (except as provided in §220.3(c) and paragraphs (b) and (c) of this section), 35 per cent of the current market value of such securities.
(d) Margin required for short sales. The amount to be included in the adjusted debit balance of a general account, pursuant to $\S 220.3(\mathrm{~d})(3)$, as margin required for short sales of securities (other than exempted securities) shall be 65 per cent of the current market value of each security.

## SUPPLEMENT TO REGULATION U

Effective November 24, 1972, section 221.4(a) (the Supplement to Regulation U ) is amended to read as follows:

## SECTION 221.4-SUPPLEMENT

(a) Maximum loan value of stocks. For the purpose of $\S 221.1$, the maximum loan value of any stock, whether or not registered on a national securities exchange, shall be 35 per cent of its current market value, as determined by any reasonable method.

> Dividends-Meaning of "net profits."

Section 5199(b) of the Revised Statutes of the United States ( 12 U.S.C. 60), as made applicable to State member banks by the 6th paragraph of section 9 of the Federal Reserve Act ( 12 U.S.C. 324), provides that:
"The approval of [the Board of Governors] shall be required if the total of all dividends declared by [a State member bank] in any calendar year shall exceed the total of its net profits of that year combined with its retained net profits of the preceding two years, less any required transfers to surplus or a fund for the retirement of any preferred stock."

The term 'net profits'" is defined in Section 5199(c) to mean "the remainder of all earnings from current operations plus actual recoveries on loans and investments and other assets, after deducting from the total thereof all current operating expenses, actual losses, accrued dividends on pre-
ferred stock, if any, and all Federal and State taxes.',

For the purpose of employing a uniform means for the determination of net profits before dividends on common stock, as required by Section 5199(b), it is the Board's view that net profits shall be the amount of "net income" determined in accordance with the Report of Income (FR Form 107a), adjusted as set forth hereinafter. The statutory adjustments prescribed by Section 5199 require the recognition of actual losses and recoveries on loans and investments and other assets recorded in reserve accounts and the elimination of corresponding provisions for such items entered against income. Further, to ascertain net profits available for common stock cash dividends, net profits for the current year and preceding two years shall be adjusted for preferred stock dividends paid or accrued and for required transfers to surplus or a fund for the retirement of preferred stock.

In light of the prevalent use of accrual accounting by banks, it also may be appropriate to recognize 'pro forma'' income tax adjustments in the determination of net profits. The adjustment, if any, would be related to the amount of difference between provisions for losses (or reversal of provisions) included in the determination of "net income'' and actual net losses or recoveries incorporated in the Section 5199 (b) calculations. If the 'pro forma"' income tax adjustment amounts to less than five per cent of net profits before such adjustment, it need not be recognized.

The following guideline schedule sets forth the most common adjustments required in calculating net'profits for Section 5199 (b) purposes.

## Computations of net profits for purposes of Section 5199(b)

Net income (Schedule A)
Add: (a) Recoveries credited to reserve accounts (Schedule D)
(b) Provision for loan losses (Schedule A)
(c) Any other provisions charged against income (Schedule A) constituting additions to reserve accounts (Schedule D)
(d) Pro forma income tax adjustment (representing decrease of applicable income tax)

Sub-total
Deduct: (a) Losses charged to reserve accounts (Schedule D)
(b) Preferred stock dividends paid or accrued for the period
(c) Pro forma income tax adjustment (representing increase of applicable income tax)

Sub-total
Net profits as defined
Deduct: (a) Required transfers to surplus or a fund for the retirement of preferred stock
(b) Common stock dividends paid or accrued for the period

## Sub-total

Retained net profits available for common stock dividends.
NOTE 1. Schedule references are to supervisory Report of Income (FR Form 107a).
2. Contra elements to applicable captions should be shown in parenthesis.
The above schedule for the determination of net profits will also be employed by the Comptroller of the Currency and its use will be uniform for all member banks.

Special factors affecting net profits, such as charge-offs of bank premises in excess of normal annual depreciation or unusual security losses, will be weighed by the Board in consideration of requests by State member banks to declare dividends which would be prohibited by Section 5199(b) without Board approval. Accordingly, any unusual chargeoffs should be presented for Board consideration.

The objective of Section 5199 is to restrict the payment of dividends where such payments would result in dissipating needed capital funds. The law is designed to prevent the declaration of dividends which are not justified by current and recent accumulated earnings and which would result in a weakened and under-capitalized bank and violate safe and sound banking practices.

## BANK HOLDING COMPANY AND BANK MERGER ORDERS ISSUED BY THE BOARD OF GOVERNORS

## ORDERS PRINTED IN THIS ISSUE

During November 1972, the Board of Governors issued the following orders, which were accompanied by a statement (or statements):

# AMERICAN BANCORPORATION, LOS ANGELES, CALIFORNIA 

Order Denying Formation of Bank Holding Company

American Bancorporation, Los Angeles, California, has applied for the Board's approval, under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)), of formation of a bank holding company through acquisition of 50 per cent, plus one share, of the outstanding voting shares of Ranchers Bank, Quartz Hill, California.

Notice of receipt of the application has been given in accordance with $\S 3(b)$ of the Act, and the time for filing comments and views has expired. The Board has considered the application and all comments received in light of the factors set forth in $\S 3(c)$ of the Act (12 U.S.C. 1842(c)).

On the basis of the record, the application is denied for the reasons set forth in the Board's Statement of this date.

By order of the Board of Governors, effective November 14, 1972.
Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.
(Signed) Michael A. Greenspan, [SEAL] Assistant Secretary of the Board.

## Statement

American Bancorporation, Los Angeles, California, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. $1842(\mathrm{a})(1)$ ) of formation of a bank holding company through acquisition of 50 per cent, plus one share, of the outstanding voting shares of Ranchers Bank, Quartz Hill, California.

Statutory considerations. Applicant is a nonoperating corporation formed for the express purpose of acquiring Ranchers Bank which has aggregate deposits of approximately $\$ 7$ million. Since Applicant has no present operations or subsidiaries, consummation of the proposal would not adversely affect existing or potential competition, nor have any adverse effect on any bank in the area.

Applicant filed this application to become a bank holding company through acquisition of shares of stock of Ranchers Bank on June 1, 1972. Officers and directors of Ranchers Bank have opposed the action of Applicant, and in fact have a pending merger agreement with California Republic Bank, Bakersfield, California. The management and stockholders of both banks have approved this latter merger proposal presently under review by State and Federal supervisory authorities.

Applicant's financial plans are based upon cash commitments for a total of $\$ 450$ thousand in order to achieve control of Ranchers Bank. Servicing of this debt is dependent upon projected improvements in earnings of Ranchers Bank. In addition, Applicant's projected income includes an annual management fee of $\$ 18$ thousand. This management fee would amount to approximately 49.5 per cent of Ranchers Bank's 1971 net income, and would be applied to the servicing of Applicant's acquisition debt. Since Applicant would control only 50 per cent, plus one share, of the outstanding shares of Ranchers Bank, this management fee appears to be unjustified in that it would be applied to the servicing of Applicant's acquisition debt at the expense of Ranchers Bank's minority shareholders.

Comments and views on the proposal were solicited from the State Banking Department for the State of California. The California Superintendent of Banks concluded that the acquisition would not be in the best interests of Ranchers Bank's depositors and shareholders, nor in the public interest. Applicant was granted an extension of time in which to reply to the Superintendent's comments, and its own views have also been considered in the Board's determination of this case.

The Board believes that a holding company should be a source of financial and managerial strength for the banks in its system and that every proposed acquisition should be closely examined to determine whether it serves certain private interests to the undue disadvantage of the interests of the bank or its shareholders. The Board carefully scrutinizes all proposals involving bare majority of a bank's shares since contending factions within bank may contribute adversely to the bank's
future welfare. In this regard, the Board concludes that considerations relating to the financial and management factors weigh against approval of Applicant's proposal.

The convenience and needs of the communities to be served are already adequately being served and there is no evidence that approval of the instant proposal would give rise to any significant public benefits. On the contrary, in order to service Applicant's substantial acquisition debt, additional stress might be placed on the resources of Ranchers Bank. Considerations relating to the convenience and needs of the communities to be served lend no weight toward approval of the application.

Under all the circumstances of this case, the Board concludes that the leverage contemplated, the unfair treatment of minority shareholders, and the managerial resources of Applicant present adverse circumstances weighing against approval. These circumstances are not outweighed by any pro-competitive factors or by considerations relating to the convenience and needs of the communities to be served. Accordingly, approval of this application is not in the public interest and it should be denied.

## BANK OF IDAHO, BOISE, IDAHO

## Order Approving Application for Merger of Banks

Bank of Idaho, Boise, Idaho ('"Boise Bank'’), a member State bank of the Federal Reserve System, has applied for the Board's approval pursuant to the Bank Merger Act (12 U.S.C. 1828(c)) of the merger of that bank with Cassia National Bank, Burley, Idaho (''Cassia Bank'), under the charter and title of Boise Bank. As an incident to the merger, the three present offices of Cassia Bank and an approved but unopened branch would become branches of the resulting bank.

As required by the Act, notice of the proposed merger, in form approved by the Board, has been published, and the Board has requested reports on competitive factors from the Attorney General, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation.

The Department of Justice commented on the proposed transaction, concluding that it might have an adverse competitive effect. Justice stated that it believed that the merger would not eliminate any significant existing competition. However, Justice declared that Boise Bank would be eliminated as the most likely potential entrant into the

Burley area and, further, that acquisition of Cassia Bank by Boise Bank would lead to further concentration at the Statewide level. Boise Bank responded to Justice's comments by arguing that the Burley area was unattractive for de novo entry. Moreover, Boise Bank stated that the proposed merger could enhance competition in the Burley area by making Cassia Bank a more positive competitive force. Boise Bank concluded by indicating its belief that consummation of the merger would have little effect on Statewide concentration and would not serve as a precedent for future mergers that might lead to undue concentration in Idaho.

The Board has considered the application and all comments and reports received in the light of the factors set forth in the Act, and finds that:

Boise Bank (deposits of about $\$ 205$ million) operates 25 banking offices throughout Idaho and controls about 12 per cent of the deposits of commercial banks in the State. (Boise Bank is a subsidiary of Western Bancorporation which, as of March 31, 1972, controlled 23 banks in 11 western States with aggregate resources of $\$ 13.1$ billion.) Acquisition of Cassia Bank (deposits of about $\$ 15$ million) would add about 1 per cent to Boise Bank's share of Statewide deposits and would not result in a significant increase in the concentration of banking resources in Idaho. ${ }^{1}$

Cassia Bank ranks third among four banks in Burley, as measured by area deposits, with approximately 22 per cent of such deposits. There is no existing substantial competition between Boise Bank and Cassia Bank, nor does there seem to be a reasonable probability of significant potential competition developing between the two. The closest banking office of Boise Bank to the Burley area is about 39 miles away and there are banks in the intervening area. The closest banking office of Boise Bank to Lava Hot Springs, where Cassia Bank has a branch, is 38 miles north and west of Lava Hot Springs in Pocatello. The area between Pocatello and Lava Hot Springs is sparsely populated and is not an attractive area for an additional bank or branch. Boise Bank has attempted within the last two years to establish a de novo branch in Burley, but was turned down by the Board due to the Board's belief that the Burley area could not economically support an additional banking office. Subsequent to the

[^6]Board's decision, an additional branch by another banking organization was established in Burley so that it seems even more unlikely now that Boise Bank would be permitted to establish a de novo branch in Burley. Because of these several factors the Board concludes that the merger would not have an adverse effect upon competition in any relevant area.

The financial and managerial resources of Boise Bank are generally satisfactory, and the prospects for the resulting bank appear favorable, particularly in light of Boise Bank's commitment to add $\$ 4$ million in equity capital within the next four months. Considerations relating to the convenience and needs of the communities to be served lend some weight toward approval since Boise Bank plans to considerably expand real estate loans in the Burley area, a service that Cassia Bank has not provided to a significant degree. Based upon the foregoing it is the Board's judgment that consummation of the proposal would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of San Francisco pursuant to delegated authority.

By order of the Board of Governors, effective November 7, 1972.

Voting for this action: Chairman Burns and Governors Mitchell, Daane, Brimmer, and Sheehan. Present and abstaining: Governor Bucher. Voting against this action: Governor Robertson.
[SEAL]
(Signed) Tynan Smith, Secretary of the Board.

## Dissenting Statement of Governor Robertson

I dissent from the approval of the merger of the tenth largest bank in Idaho into the third largest bank located in the State. Concentration of banking resources in Idaho is extremely high with the top three banks controlling almost 80 per cent of aggregate deposits of commercial banks in the State. Given that Idaho is a small State, with a relatively stable population in recent years, we cannot expect substantial additional entry into commercial banking as a reasonable probability for
the foreseeable future. Therefore, extreme care must be taken to ensure that the already high concentration within the State is not increased by mergers or acquisitions.

Part of the underlying philosophy of this country is manifested in section 7 of the Clayton Act and a basic premise of that law is embodied in the concept ". . . that competition will be most vital 'when there are many sellers, none of which has any significant market share.' ", United States v. Alcoa 377 U.S. 271, 280 (1964). The other side of the coin is that as the Supreme Court put it in the same case, also at page 280 , the greater the concentration in the market ". . . the greater is the likelihood that parallel policies of mutual advantage, not competition, will emerge."

Approval of this merger will serve as a precedent that will likely lead to the second situation postulated by the Supreme Court. There will be three large banks confronting each other in the various significant markets in Idaho with few other substantial competitors in those markets. You need not be a cynic to believe that accommodation rather than competition may flow from such a situation. I cannot assent to such a result.

As a final footnote, my view is that permitting Western Bancorporation to expand its banking operations in Idaho through the mechanism of allowing Bank of Idaho to merge with other Idaho banks violates the spirit of section 3(d) of the Bank Holding Company Act. Section 3(d) limits acquisitions of additional banks by bank holding companies to banks located in the State where the holding company's banking subsidiaries principally conduct their business unless certain conditions not applicable in this case are met. Western Bancorporation's principal banking business is conducted in California. However, I recognize the authority to the contrary and do not rely on this point as a basis of my dissent.

FIRST INTERNATIONAL BANCSHARES, INC., DALLAS, TEXAS

## Order Approving Formation of Bank Holding Company

First International Bancshares, Inc., Dallas, Texas, has applied for the Board's approval, under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)), of formation of a bank holding company through the acquisition of 100 per cent (less directors' qualifying shares) of the voting shares of the successors to First National Bank in Dallas, Dallas, and Houston-Citizens Bank \&

Trust Company, Houston. As an incident to the proposal, Applicant will acquire indirect control of 26.4 per cent of the voting shares of Guaranty Bank, Dallas (formerly South Oak Cliff Bank), through an interest now held directly by First National Bank in Dallas under a debt previously contracted. In addition, Applicant also will acquire indirectly through HB\&T Stockholders Company, Houston (a trusteed affiliate of Houston-Citizens Bank \& Trust Company) a 6.7 per cent interest in First Alief Bank, Alief, Texas.

Notice of application, affording opportunity for interested persons to submit comments and views has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in $\S 3(\mathrm{c})$ of the Act ( 12 U.S.C. 1842(c)).

On the basis of the record, the application is approved for the reasons set forth in the Board's Statement of this date. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective November 30, 1972.

Voting for this action: Chairman Burns and Governors Mitchell, Daane, Sheehan, and Bucher. Voting against this action: Governors Robertson and Brimmer.
(Signed) Michael A. Greenspan, [sEal] Assistant Secretary of the Board.

## Statement

First International Bancshares, Inc., Dallas, Texas ('Applicant''), has filed with the Board, pursuant to §3(a)(1) of the Bank Holding Company Act of 1956 , an application for approval of action to become a bank holding company through the acquisition of 100 per cent (less directors, qualifying shares) of the voting shares of First National Bank in Dallas, Dallas, Texas ('First National''), and Houston-Citizens Bank \& Trust Company, Houston, Texas ('Houston-Citizens''). By virtue of acquisition of First National, Applicant would also acquire indirect control of 26.4 per cent of the voting shares of Guaranty Bank, Dallas (''Guaranty Bank,'" formerly South Oak Cliff Bank), an interest now held directly by First National under a debt previously contracted. Applicant will also acquire indirectly through HB\&T

Stockholders Company, Houston (a trusteed affiliate of Houston-Citizens), a 6.7 per cent interest in First Alief Bank, Alief, Texas.

First National now holds certain minority interests in fourteen banks ('Other Banks'') located in Dallas County, Texas, as follows: 24 per cent of the shares of American Bank and Trust Company; 21.34 per cent of the shares of Citizens State Bank, Irving; 20 per cent of the shares of The Dallas County State Bank, Carrollton; 24.76 per cent of the shares of DeSoto State Bank; 24.52 per cent of the shares of East Dallas Bank \& Trust Company; 24 per cent of the shares of First National Bank of Richardson; 24 per cent of the shares of Grove State Bank; 22.42 per cent of the shares of North Dallas Bank and Trust Company; 24.9 per cent of the shares of Northpark National Bank; 19.47 per cent of the shares of Park City's Bank and Trust Company; 24.5 per cent of the shares of Southwest Bank and Trust Company, Irving; 24 per cent of the shares of Texas National Bank; 10.67 per cent of the shares of White Rock National Bank; and 26.41 per cent of the shares of Guaranty Bank, formerly South Oak Cliff Bank.

Board approval of Applicant's proposal to become a bank holding company does not signify Board approval of the retention or acquisition of the above-referred to minority interests in Other Banks. It is the Board's understanding, from representations by Applicant, that Applicant will file separate applications for prior approval by the Board for each of such minority holdings it seeks to retain and cause its minority interests in all Other Banks, other than those for which such applications are filed, to be completely and permanently divested by it. It is further understood that in this manner any such applications so filed by Applicant will be subject to the ordinary regulatory and legal process, subject to statutory standards as set forth in both section 3 of the Bank Holding Company Act and section 7 of the Clayton Act.

Statutory considerations. Applicant is a recently organized corporation, formed for the express purpose of acquiring First National ( $\$ 1.7$ billion in deposits) and Houston-Citizens ( $\$ 219$ million in deposits). (All banking data are as of December 31, 1971, and reflect holding company formations and acquisitions approved through August 31, 1972.) First National is the second largest banking organization in the Dallas banking market and the second largest in the State, holding 5.6 per cent of total State deposits. While it holds approximately one-fourth of deposits in the Dallas banking market, many of these deposits are not derived
from that particular market. For example, as of April 1972, deposits totaled $\$ 1,417$ million. Of these, $\$ 180$ million were due to banks and $\$ 218$ million represented public funds. Moreover, the bank has historically had a substantial number of large deposits (i.e., those of $\$ 100,000$ and over); in the main these are owned by corporations, financial institutions, and State and local governments. The total in such accounts amounts to about three-fourths of the bank's entire deposit aggregate.

The principal market in which First National competes consists of the entire Dallas SMSA, wherein a total of 118 banks are located. In addition, First National is in competition with large banks throughout the Southwest, and to a lesser extent throughout the Nation. It is also engaged in international banking through branch or representative offices in London, Tokyo, Nassau and Singapore.

Houston-Citizens is the fifth largest of 149 banks in the Houston SMSA, controlling 3.12 per cent of total commercial deposits in that market and 0.7 per cent of total State deposits. Houston-Citizens is the resulting institution from a merger in 1970 between Houston Bank \& Trust Company and Citizens Bank. Today, Houston-Citizens has a relatively low liquidity position as reflected in its asset composition. Its loan account as a per cent of total assets is substantially above the average for banks of similar size in its district, while its cash and securities as a per cent of total assets is substantially below the average for similar sized banks. Due to its capital and asset problems, Houston-Citizens is not in a position to serve as the lead bank of an independent Statewide or regional bank holding company.

It appears that consummation of the proposal would not have any adverse effect on existing competition inasmuch as First National and Hous-ton-Citizens are located in separate banking markets 250 miles apart. Deposit concentration in the Houston and Dallas markets would not be altered, and Statewide concentration would increase by only 0.7 per cent.

The Board notes that there has been a significant increase in bank holding company representation in Houston in recent years, and that in Houston, as in other major Texas banking markets, newly formed holding companies are assimilating their former chain bank affiliates into the holding company structure. Despite this trend, there are 134 banks in the market not affiliated with a multibank holding company. Sixteen of these have deposit aggregates of more than $\$ 50$ million. Several could
serve as vehicles for entry by bank holding companies based outside of Houston or as components of a newly formed Houston based holding company.

The large number of small banks in Houston is the result of both the legislative prohibition against branch banking in Texas and the high rate of economic growth in the Houston SMSA. Because of the number of recent bank formations, population per banking office for the Houston area has fallen from 22,876 in 1960 to 13,322 in 1970 (a lower ratio than often found in large cities located in unit banking States).

While First National may be viewed as a potential entrant into the Houston banking market, if it entered either de novo or through acquisition of a small bank, its competitive impact on the Houston banking market would be deferred for some time.

Furthermore, the Board is interested in expanding the competitive environment, not only in Houston and Texas markets, but also in the southwest and national markets as well. Construed within the context of the national market, the proposed formation will enhance a Texas bank holding company's ability to compete with other banks providing nationwide credit services, particularly for major Texas corporations. The economic development of Texas and the southwest region will be fostered by acquisitions such as this one which will encourage the development of local institutions capable of servicing the growing domestic and international interests of Texas corporations.

Specifically, consummation of the proposal herein would substantially enhance the potential for Houston-Citizens in meeting the financial needs of its customers, particularly those of the me-dium-sized and larger commercial and industrial firms in Houston and the Houston-Gulf Coast region. Moreover, the shared expertise from First National in specialized commercial loans, international, correspondent bank, portfolio management, and trust services would permit Houston-Citizens to better serve its customers and provide more vigorous competition in these services to the three largest banks in the Houston market. Due to Houston-Citizens status as a State chartered bank, its efforts to extend international banking services in Houston (the third largest port city in the nation) have been limited by State laws preventing it from having foreign branches. Thus, extension of international services through First National's existing and planned branch and representative office network would provide Houston-Citizens with signif-
icantly enlarged international banking capabilities for its customers. It is the Board's judgment that the convenience and needs factors lend weight toward approval of the application.

Applicant plans to increase the equity capital accounts of Houston-Citizens by $\$ 10$ million, and will strengthen management by providing a senior officer and other needed personnel. Considerations relating to the financial and managerial resources and future prospects of Applicant and the banks concerned are satisfactory and consistent with approval.

Summary and conclusion. On the basis of all relevant facts contained in the record and in light of the factors set forth in section 3(c) of the Act, it is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

## Dissenting Statement of Governor Robertson

Applications to form holding companies in Texas, as well as applications by holding companies to acquire additional banks in Texas, are presently being processed on a "first come-first served'" basis. Perhaps this is in the American tradition, but it ill serves the needs of a State in the throes of reshaping its own banking structure. The present application demonstrates a need for Board analysis going beyond the ad hoc approach and for a more thorough examination of Texas banking markets not only as they exist today but as they are reasonably likely to develop over the next decade, utilizing our knowledge of other alignments, past as well as prospective, in approving or disapproving any specific formation.

In previous years, chain banking relationships were established in Texas as a means of circumventing the State's prohibition against branch banking. Today, holding companies in Texas are seeking to acquire their chain bank affiliates. In Houston, for example, the three largest holding companies have a total of 24 affiliates which hold 9.9 per cent of commercial deposits in the Houston market. These three holding companies have indicated that they plan to acquire 16 of these affiliates having total deposits of $\$ 507.2$ million, or 7.2 per cent of market deposits. While not attempting to prejudge in any manner these proposed acquisitions, it would appear to me that one or more of these affiliates could well serve as an appropriate vehicle for entry into the Houston banking market by other bank holding companies, thus enhancing competition and better serving the public's banking needs.

In my view, those large holding companies having the resources and capability for effectuating successful entry on a de novo basis should be required to follow that course. There is no dispute that Applicant, through First National Bank in Dallas (with deposits of $\$ 1.7$ billion), has the resources and capability to enter the Houston market de novo. The record informs us that two of the 15 banks in the downtown area of Houston were chartered within the past three years, and six were chartered within the past ten years. At present there are applications on file with the Texas Commissioner of Banking to charter two additional de novo banks in downtown Houston. It is evident that Applicant's opportunity to enter this fast growing market is equal to that of these other de novo entrants, and that its likelihood of becoming an effective competitor in the Houston market is greater still.

The majority's reliance upon the convenience and needs factor as support for including a bank the size of Houston-Citizens in Applicant's formation is ill-founded. Complete banking services are currently available to the residents of the Houston SMSA banking market. And international banking services are readily available in this market from at least five other Houston banks, as well as from two Edge Act corporations representing the Bank of America N.T. \& S.A. and First National City Bank, New York City. Thus, at best, the benefits to the public are insignificant when compared to the serious anticompetitive effects resulting from the combination of Houston-Citizens (with its deposits of $\$ 219$ million) and the $\$ 1.7$ billion (deposit size) First National Bank in Dallas.

On the basis of the foregoing, I dissent to approval of the formation of First International Bancshares, Inc. The affiliation of the second largest bank in Texas, the First National Bank of Dallas, with a large Houston bank, whose problems are not by any means irreparable, leads the Board down the road to the form of concentration whose ultimate reductio ad absurdum is described in the Appendix to this Statement.

## APPENDIX To

Dissenting Statement of Governor

## Robertson

Every time you pick up the newspaper you read about one company merging with another company. Of course, we have laws to protect competition in the United States, but one can't help thinking that, if the trend continues, the whole country will soon be merged into one large company.

It is 1978 and by this time every company west of the Mississippi will have merged into one giant corporation known as Samson Securities. Every company east of the Mississippi will have merged under an umbrella corporation known as the Delilah Company.

It is inevitable that one day the chairman of the board of Samson and the president of Delilah would meet and discuss merging their two companies.
"If we could get together," the president of Delilah said, "we would be able to finance your projects and you would be able to finance ours."
"Exactly what I was thinking," the chairman of Samson said.
"That's a great idea and it certainly makes everyone's life less complicated."

The men shook on it and then they sought out approval from the Anti-Trust Division of the Justice Department.

At first the head of the Anti-Trust Division indicated that he might have reservations about allowing the only two companies left in the United States to merge.
"Our department," he said, "will take a close look at this proposed merger. It is our job to further competition in private business and industry, and if we allow Samson and Delilah to merge we may be doing the consumer a disservice."

The chairman of Samson protested vigorously that merging with Delilah would not stifle competition, but would help it. "The public will be the true beneficiary of this merger," he said. "The larger we are, the more services we can perform, and the lower prices we can charge."

The president of Delilah backed him up. "In the Communist system the people don't have a choice. They must buy from the state. In our capitalistic society the people can buy from either the Samson Company or the Delilah Company."
"But if you merge," someone pointed out, "there will be only one company left in the United States."
"Exactly," said the president of Delilah. "Thank God for the free enterprise system."

The Anti-Trust Division of the Justice Department studied the merger for months. Finally the Attorney General made this ruling. "While we find some drawbacks to only one company being left in the United States, we feel the advantages to the public far outweigh the disadvantages.
'Therefore, we're making an exception in this case and allowing Samson and Delilah to merge.
"I would like to announce that the Samson and Delilah Company is now negotiating at the White

House with the President to buy the United States. The Justice Department will naturally study this merger to see if it violates any of our strong anti-trust laws."

Art Buchwald, Washington Post, June 2, 1966. (CCH 1966
Trade Cases, $\S 71.790$ at pp. $82,662-82,663$.

## Dissenting Statement of Governor Brimmer

I dissent from the majority's action to create the largest bank holding company in Texas by combining the second largest bank in Dallas with a sizable Houston bank. The net result is to bind the State's two largest financial centers even closer, while the development of a more healthy banking environment Statewide is curtailed. I have previously emphasized the need to encourage the development of a more balanced banking structure in Texas. I have also anticipated the possibility that the large Houston and Dallas banking organizations may-in time-become dominant in all Texas markets. ${ }^{1}$ Approval of the formation of First International Bancshares, Inc. in the manner proposed provides another foundation upon which this forecast-unfortunately-may become a reality.

The majority bases its decision, in part, upon the present financial condition of Houston-Citizens Bank \& Trust Company, and it points to the capital improvements that will accrue to this Houstonbased bank once it comes under Applicant's control. However, it is important to examine the patient before speaking of cures. Houston-Citizens is the result of a Board-approved merger between Houston Bank \& Trust Company and Citizens Bank on September 22, 1970 (which I supported). The unsatisfactory financial condition of Citizens Bank was a factor influencing Board approval of that merger. Even today, a substantial portion of the classified assets of Houston-Citizens can be attributed to the deterioration of two major lines of credit made prior to the merger. Yet, HoustonCitizens' capital ratios compare favorably with other large Houston-area banks, and its earnings are above average. Prospective earnings appear sufficient to support the sale of additional capital. Houston-Citizens has capable management and, given sufficient time, can be restored to a viable competitive position. Bank supervision-both on

[^7]the State and federal regulatory level-is designed for this very purpose. Thus, there is no need for Houston-Citizens to lose its independence now, having undergone a successful merger designed two years ago to cure its financial illness. The prescription today (if one is needed) is to give it additional time-not another merger.

Although the majority considers the inability of Houston-Citizens to form a holding company of its own one of the factors upon which approval can be based, I would completely divorce this factor from consideration of the application. The question is not one of how many bank holding companies can be formed in Texas-since this presupposes that all $\$ 200$ million banks in Texas will eventually form or become members of a bank holding company. Thus, any Board analysis based in part on the ability, or inability, of a bank to form a holding company of its own is subject to certain deficiencies, as it ignores a very real alter-native-that of continued existence as an independent bank.

I would consider it appropriate, however, in any analysis of a bank holding formation, to take into account the number of banking organizations in the State, with special reference to their deposit size class. Without a clear perspective of the number of banks that remain outside the holding company structure, it is possible that all large banks might soon be absorbed by holding companies. Such a development could very likely strangle the growth of banks in the small deposit size categories. As the data in Table 1 indicate, there is only a limited number of Houston or Dallas based banks with deposits over $\$ 100$ million, and there are fewer still in the San Antonio and Fort Worth markets. Banks in these four key financial centers in Texas have a unique advantage over banks in smaller Texas SMSA's where growth is more limited. That advantage can only be compounded by allowing, as in the present proposal, consolidation of the resources of a large Dallas bank with another large Houston bank. I would prefer to see these first tier banks in Texas preserved, either as independents, or as the base for their own holding company, rather than see them pyramid their resources further. Such consolidations add nothing to the convenience and needs of the Texas financial centers, but they are certain to lessen banking competition in the State as a whole.

My dissent also applies to two additional actions of the Board related to the subject transac-tion-approval of the acquisition of 7 per cent of
the voting shares of First International Bancshares, Inc., by Perpetual Corporation, Los Angeles, California, and approval of the merger of Jefferson Street State Bank, Houston, Texas, with HoustonCitizens Bank \& Trust Company, Houston, Texas, each of which is the subject of a separate order of the Board mailed this date and as to each of which my dissent is noted.

## JEFFERSON STREET STATE BANK, HOUSTON, TEXAS

## Order Approving Merger of Banks

Jefferson Street State Bank, Houston, Texas, a nonoperating proposed State member bank of the Federal Reserve System, has applied pursuant to the Bank Merger Act (12 U.S.C. 1828(c)) for the Board's prior approval to merge with HoustonCitizens Bank \& Trust Company, Houston, Texas ('Bank'"), under the name of Bank and charter of Applicant, as a means to facilitate the acquisition of the voting shares of Bank by First International Bancshares, Inc., Dallas, Texas.

As required by the Act, notice of the proposed merger, in form approved by the Board, has been published, and the Board has requested reports on competitive factors from the Attorney General, the

Comptroller of the Currency, and the Federal Deposit Insurance Corporation. The Board has considered all relevant material contained in the record in the light of the factors set forth in the Act.

On the basis of the record, the application is approved for the reasons summarized in the Board's Order of this date, approving the application of First International Bancshares, Inc., to become a bank holding company through acquisition of 100 per cent of the voting shares (less directors' qualifying shares) of the successors by merger to First National Bank in Dallas, Dallas, Texas, and Houston-Citizens Bank \& Trust Company. The transaction shall not be consummated (a) before the thirtieth calendar day following the date of this Order or (b) later than three months after the date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective November 30, 1972.

Voting for this action: Chairman Burns and Governors Mitchell, Daane, Sheehan, and Bucher. Voting against this action: Governors Robertson and Brimmer.
(Signed) Michael A. Greenspan, [seal] Assistant Secretary of the Board.

## PERPETUAL CORPORATION, LOS ANGELES, CALIFORNIA

Order Approving Acquisition of Bank Shares
Perpetual Corporation, Los Angeles, California, has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842 (a)(3)), to acquire 7.1 per cent of the voting shares of First International Bancshares, Inc., Dallas, Texas ('First International'), a proposed multibank holding company.

Notice of the receipt of the application has been given in accordance with $\S 3(b)$ of the Act, and the time for filing comments and views has expired. The Board has considered the application and all comments received in light of the factors set forth in $\S 3(c)$ of the Act ( 12 U.S.C. 1842 (c)), and finds that:

Applicant, a bank holding company since December 31, 1970, by operation of law, presently holds 63.3 per cent of the voting stock of Hous-ton-Citizens Bank \& Trust Company, Houston, Texas ('Houston-Citizens'"), of which 18.8 per cent of said shares are directly held by Applicant and 44.5 per cent through a wholly-owned sub-
sidiary, Pierce National Life Insurance Company, Los Angeles, California. Subject application is a companion to an application filed by First International, which proposes to form a new multibank holding company with First National Bank in Dallas and Houston-Citizens as its subsidiary banks. As a result of the latter proposal, which the Board has approved under a separate Order of this date, Applicant will acquire 7.1 per cent of the shares of First International in exchange for its present 63.3 per cent interest in Houston-Citizens. In addition, the president of Applicant will serve as a director of First International; thus, Applicant's stock interest in First International, plus the existence of a common director between Applicant and First International, establishes Applicant as a bank holding company under section 2(g)(3) of the Bank Holding Company Act. ${ }^{1}$

Since the transaction involves only a restructuring in corporate ownership, consummation of the proposal will have no adverse effects on existing or potential competition. Applicant's financial resources and future prospects as they apply to Applicant's investment in First International appear favorable. Approval of the proposed transaction will have no effect on the convenience and needs of the communities involved. It is the Board's judgment that the transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors, effective November 30, 1972.

Voting for this action: Chairman Burns and Governors Mitchell, Daane, Sheehan, and Bucher. Voting against this action: Governors Robertson and Brimmer.
(Signed) Michael A. Greenspan, [sEal] Assistant Secretary of the Board.

## Announcements

## Change in margin requirements

The Board of Governors of the Federal Reserve System increased the initial margin requirement for purchasing or carrying stocks from 55 per cent to 65 per cent, effective Friday, November 24.

Federal Reserve margin requirements set the minimum downpayment that must be made to purchase margin securities. Under a 65 per cent margin, a purchaser is required to pay 65 per cent of the purchase price and may obtain credit for the remaining 35 per cent.

The increase in margin was adopted under authority granted to the Board in the Securities Exchange Act of 1934 to prevent the excessive use of credit to finance securities transactions. In making the change, the Board noted that margin debt had increased sharply over the past year. Margin debt at brokers and dealers has risen about $\$ 3$ billion since November 1971, and the amount outstanding at the end of October was $\$ 7.8$ billion, a record level for margin debt of this type. At banks, loans for the purpose of purchasing or carrying margin securities increased by more than \$330 million since November 1971.

The Board also noted that recent behavior of the stock market suggested that the use of margin credit, following a leveling off in late summer, was again in the process of expanding. Further rapid increases in such credit could stimulate inflationary expectations.

The Board's action is applicable to new extensions of credit by brokers and dealers (Regulation T) and loans by banks and other lenders (Regulations U and G , respectively) for the purpose of purchasing or carrying stocks registered on a national stock exchange or named in the Board's over-the-counter margin list.

At the same time, the Board increased the required deposit on short sales from 55 per cent to 65 per cent, effective November 24. No change was made in the 50 per cent margin requirement for purchasing or carrying convertible bonds or in the 70 per cent "retention requirement" that applies to undermargined accounts. This latter requirement specifies the portion of the proceeds of a sale of securities that must be retained in a margin account if the equity does not match the initial margin requirement.

The initial margin requirement was last changed on December 6, 1971, when it was reduced from 65 per cent to 55 per cent.

## VFCR AMENDMENT

The Board of Governors announced on December 1, 1972, the adoption of an amendment to exempt from the Voluntary Foreign Credit Restraint guideline ceilings foreign assets acquired in connection with settlement of claims under insurance and guarantees of the U.S. Overseas Private Investment Corporation (OPIC). Without the amendment, the purchase of such foreign assets by U.S. banks and other U.S. financial institutions would have been subject to guideline ceilings, even though no new capital outflow would have resulted.

The amendments are to add to the guidelines, as both Sections II-B-4 and III-E-7, the following:
"Insurance and Guaranty Settlements of OPIC
A foreign asset acquired directly or through purchase of a participation in a pool of foreign assets, provided the foreign asset or the participation is covered by a payment guarantee issued by the U.S. Overseas Private Investment Corporation (OPIC) under its insurance and guaranty claims settlement authority, is exempted from an institution's ceiling."

## NEW PUBLICATION

Industrial Production-1971 Edition is available for distribution. In this edition of the production index detailed adjustments have been made to independently compiled Census-Federal Reserve benchmark and annual production levels for individual series. Many new series have been developed for a total of 227. About two-thirds of the monthly measurements based on manhours have been replaced by series based on consumption of electric power. New weight bases have been in-corporated-the latest being for the year 1967and various new measurement features have been added to improve analysis of national economic developments.

All of the revisions have been carried back in detail to 1954 and in a more limited fashion to 1939. The index comparison-base has been up-
dated from the 1957-59 average to the single year 1967. Conversion to the new comparison base has been carried back to the beginning of the index in January 1919.

Copies may be obtained from Publications Services, Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The price is $\$ 4.00$ per copy; in quantities of 10 or more sent to one address, $\$ 3.50$ each.

## BANKING DATA ON MAGNETIC TAPES

Selected data reported by individual banks to Federal banking agencies in their official Reports of Condition for June 1972 are now available to the public on 9 -track, 800 -bpi magnetic tape. The tape may be obtained at a cost of $\$ 50$ from Publications Services, Division of Administrative Services, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

Information regarding the availability and price of similar tapes for June and December calls for the period June 1960 through December 1971 is given in the July Bulletin, page 683.

# National Summary of Business Conditions 

Released for publication December 15

Industrial production and nonfarm employment increased further in November and the unemployment rate declined. Retail sales were about unchanged. The wholesale price index rose further. Commercial bank credit, the money stock, and time and savings deposits increased. Between mid-November and mid-December, yields on U.S. Government securities increased while yields on seasoned corporate securities declined.

## INDUSTRIAL PRODUCTION

Industrial production rose an estimated 1.1 per cent further in November and at 118.5 per cent $(1967=100)$ was 10.3 per cent above a year earlier. Gains in output were widespread among final products and materials. The current estimate for the October index is 0.4 per cent higher than the level reported a month earlier, and the September index was revised upwards by 0.3 per cent.

Consumer goods output continued to advance strongly. Auto assemblies increased 6 per cent in November to an annual rate of 9.6 million units. Auto production schedules for December indicate little change from the November rate. Output of some durable home goods and nondurable consumer goods also increased in November. Production of business equipment showed a substantial gain and was close to the 1969 pre-recession peak. Output of defense and space equipment remained at the level prevailing since July. Output of con-

## industrial production

F.R. indexes, seasonally adjusted. Latest figures: November.
struction products, some durable goods materials, and the textile, paper, and chemical group advanced further.

## EMPLOYMENT

Nonfarm payroll employment rose substantially further in November with strong gains in manufacturing, State and local government, and service industries. The average factory workweek rose by 0.2 hour to 40.9 hours. The unemployment rate declined by 0.3 percentage point to 5.2 per cent, reflecting a drop in the labor force and a small gain in total employment.

## RETAIL SALES

The value of retail sales was about unchanged in November from the sharply advanced October rate and was 9.5 per cent above a year earlier, according to the advance report. Sales at both durable and nondurable goods stores changed little from October.

## AGRICULTURE

Red meat and poultry production in November was 2 per cent higher than in October, but about even with 1970 and 1971 levels. Mid-December prices of livestock, grain, soybeans, and cotton were appreciably higher than a month earlier.

## WHOLESALE AND CONSUMER PRICES

The wholesale price index, seasonally adjusted, rose 0.6 per cent between October and November. Prices of farm and food products increased 1.4 per cent while the index of industrial commodities was up 0.4 per cent, largely because of increased prices for materials.

The consumer price index, seasonally adjusted, rose 0.3 per cent in October. Food prices increased less rapidly than in the preceding 3 months but service costs rose faster. Nonfood commodity prices declined slightly, largely because of the introduction into the index of 1973 model autos. Manufacturers had not yet been granted permission to raise prices to cover the cost of safety and emission control equipment.

Bureau of Labor Statistics. "Farm products and foods" is BLS "Farm products, and processed foods and feeds." Latest figures: Consumer, October; Wholesale, November.

## BANK CREDIT, DEPOSITS, AND RESERVES

Commercial bank credit, after adjustments for transfers of loans between banks and their affiliates, grew at an annual rate of nearly 20 per cent in November, the most rapid rate of increase since May. Real estate and consumer loans continued strong. Borrowing by businesses and nonbank financial institutions also was heavy, although down somewhat from the very high level during October. Holdings of U.S. Government securities rose in November as the result of a large Treasury issue late in the period, and holdings of other securities increased sharply following no growth during the preceding month.

The narrowly defined money stock increased at an annual rate of about 6.5 per cent in November, up somewhat from the preceding 2 months. Time and savings deposits, excluding large CD's, grew at almost a 9 per cent rate, down slightly from the September and October growth rates. Net sales of CD's were quite small for the second consecutive month, following sizable increases in the second and third quarters.

Net borrowed reserves averaged about $\$ 270$ million for the 5 weeks ending November 29, down a little from October. Both member bank borrowings and excess reserves were above the October levels.

## SECURITY MARKETS

Treasury bill rates rose by about 10 to 30 basis points between mid-November and mid-December. The 3 -month bill was bid at around 5.00 per cent in the middle of December, up from 4.75 per cent a month earlier. Yields on U.S. Government notes and bonds advanced by some 5 to 20 basis points over the same period.

Yields on new corporate security issues increased slightly on balance between midNovember and mid-December. Seasoned corporate security yields declined steadily and municipal security rates fell slightly on balance.

Common stock prices rose to record levels on heavy volume.

INTEREST RATES

Discount rate, range or level for all F.R. Banks. Weekly average market yields for U.S. Govt. bonds maturing in 10 years or more and for 90 -day Treasury bills. Latest figures: week ending Dec. 9.

[^9]5 Part allowed as reserves Dec. 1, 1959-Nov. 23, 1960; all allowed thereafter. Beginning with Jan. 1963, figures are estimated except for weekly averages. Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date
${ }^{6}$ Includes securities loaned-fully secured by U.S. Govt. securities pledged with F.R. Banks.
7 Reflects securities sold, and scheduled to be bought back, under matched sale/purchase transactions.
${ }^{8}$ Adjusted to include $\$ 450$ million of certain reserve deficiencies on which penalties can be waived for a transition period in connection with bank adaptation to Regulation J as amended effective Nov. 9, 1972.
(In millions of dollars)

${ }^{1}$ Discounts of eligible paper and advances secured by such paper or by U.S. Govt. obligations or any other obligations eligible for F.R. Bank purchase. Maximum maturity: 90 days except that discounts of certain bankers' acceptances and of agricultural paper may have maturities not over 6 months and 9 months, respectively.
2 Advances secured to the satisfaction of the F.R. Bank. Maximum maturity: 4 months.
3 Advances to individuals, partnerships, or corporations other than
member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the U.S. Govt. or any agency thereof. Maximum maturity: 90 days.
$\dagger$ A rate of $41 / 2$ per cent was approved Sept. 19, 1972, on advances to nonmember banks, to be applicable in special circumstances resulting from implementation of the then pending changes in Regulation J. See "Announcements" on p. 942 of the Oct. 1972 Bulletin and p. 994 of the Nov. 1972 Bulletin.

Note.-Rates under Secs. 13 and 13a (as described in table and notes above). For data before 1955, see Banking and Monetary Statistics, 1943, pp. 439-42, and Supplement to Section 12, p. 31.
(Deposit intervals are in millions of dollars. Requirements are in per cent of deposits.)

1 When two dates are shown, the first applies to the change at reserve city banks and the second to the change at country banks. For changes prior to 1963 see Board's Annual Reports.

2 (a) Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances due from domestic banks.
(b) Requirement schedules are graduated, and each deposit interval applies to that part of the deposits of each bank.
(c) Since Oct. 16, 1969, member banks have been required under Regulation $M$ to maintain reserves against balances above a specified base due from domestic offices to their foreign branches. Effective Jan. 7, 1971, the applicable reserve percentage was increased from the original 10 per cent to 20 per cent. Regulation D imposes a similar reserve requirement on borrowings above a specified base from foreign banks by domestic offices of a member bank. For details concerning these requirements, see Regulations $D$ and $M$ and appropriate supplements and amendments thereto.
${ }^{3}$ Effective Jan. 5, 1967, time deposits such as Christmas and vacation club accounts became subject to same requirements as savings deposits.

See also notes 2(b) and 2(c) above.
4 Effective Nov. 9, 1972, a new criterion was adopted to designate reserve cities, and on the same date requirements for reserves against net demand deposits of member banks were restructured to provide that each
member bank will maintain reserves related to the size of its net demand deposits. The new reserve city designations are as follows: A bank having net demand deposits of more than $\$ 400$ million is considered to have the character of business of a reserve city bank, and the presence of the head office of such a bank constitutes designation of that place as a reserve city. Cities in which there are Federal Reserve Banks or branches are also reserve cities. Any banks having net demand deposits of $\$ 400$ million or reserve cities. Any banks having net demand deposits of $\$ 400$ milfion or
less are considered to have the character of business of banks outside of less are considered to have the character of business of banks outside of
reserve cities and are permitted to maintain reserves at ratios set for banks reserve cities and are permitted to maintain reserves at ratios set for banks 1972 Bulletins: Juiy, pp. 649, 679; Oct., p. 942; Nov., 994.

5 Reserve city banks.
6 The $161 / 2$ per cent requirement applied for one week, only to former reserve city banks. For other banks, the 13 per cent requirement was continued in this deposit interval.
${ }^{7}$ See preceding columns for earliest effective date of this rate.
Note.-All required reserves were held on deposit with F.R. Banks June 21, 1917, until Dec. 1959. From Dec. 1959 to Nov. 1960, member banks were allowed to count part of their currency and coin as reserves; effective Nov. 24, 1960, they were allowed to count all as reserves. For further details, see Board's Ánnual Reports.

MARGIN REQUIREMENTS
(Per cent of market value)

Note.-Regulations G, T, and U, prescribed in accordance with the Securities Exchange Act of 1934, limit the amount of credit to purchase and carry margin stocks that may be extended on securities as collateral by prescribing a maximum loan value, which is a specified percentage of the market value of the collateral at the time the credit is extended; margin requirements are the difference between the market value ( 100 percent) and the maximum loan value. The term margin stocks is defined in the corresponding regulation.
Regulation $G$ and special margin requirements for bonds convertible into stocks were adopted by the Board of Governors effective
Mar. 11, 1968.

# MAXIMUM INTEREST RATES PAYABLE ON TIME AND SAVINGS DEPOSITS 

(Per cent per annum)

${ }^{1}$ Closing date for the Postal Savings System was Mar. 28, 1966. Maximum rates on postal savings accounts coincided with those on savings deposits.
${ }_{2}$ For exceptions with respect to certain foreign time deposits, see Bulletins for Oct. 1962, p. 1279; Aug. 1965, p. 1084; and Feb. 1968, p. 167 .
${ }_{3}$ Multiple-maturity time deposits include deposits that are automatically renewable at maturity without action by the depositor and deposits that are payable after written notice of withdrawal.
4 The rates in effect beginning Jan. 21 through June 23, 1970, were $61 / 4$ per cent on maturities of $30-59$ days and $61 / 2$ per cent on maturities of
$60-89$ days. Effective June 24, 1970, maximum interest rates on these maturities were suspended until further notice.

Note.-Maximum rates that may be paid by member banks are established by the Board of Governors under provisions of Regulation $Q$; however, a member bank may not pay a rate in excess of the maximum rate payable by State banks or trust companies on like deposits under the laws of the State in which the member bank is located. Beginning Feb. 1, 1936, maximum rates that may be paid by nonmember insured commercial banks, as established by the FDIC, have been the same as those in effect for member banks.

1 Outside Treasury and F.R. Banks. Before 1955 details are slightly overstated because they include small amounts of paper currency held by the Treasury and the F.R. Banks for which a denominational breakdown is not available.

2 Paper currency only; $\$ 1$ silver coins reported under coin.
Note-Condensed from Statement of United States Currency and Coin, issued by the Treasury.

## KINDS OF UNITED STATES CURRENCY OUTSTANDING AND IN CIRCULATION

(Condensed from Circulation Statement of United States Money, issued by Treasury Department. In millions of dollars)

1 Outside Treasury and F.R. Banks. Includes any paper currency held outside the United States and currency and coin held by banks. Estimated totals for Wed. dates shown in table on p. A-5.
${ }^{2}$ Consists of credits payable in gold certificates, the Gold Certificate Fund-Board of Governors, FRS.
${ }_{3}$ Redeemable from the general fund of the Treasury.

4 Does not include all items shown, as gold certificates are secured by gold. Duplications are shown in parentheses.

Note.-Prepared from Statement of United States Currency and Coin and other data furnished by the Treasury. For explanation of currency reserves and security features, see the Circulation Statement or the Aug. 1961 Bulletin, p. 936.

1 Includes, in addition to currency and demand deposits, savings deposits time deposits open account, and time certificates of deposits other than negotiable time certificates of deposit issued in denominations of $\$ 100,000$ or more by large weekly reporting commercial banks.
${ }^{2}$ Includes $M_{2}$, plus the average of the beginning and end of month
deposits of mutual savings banks and savings and loan shares.
Negotiable time certificates of deposit issued in denominations of $\$ 100,000$ or more by large weekly reporting commercial banks.
4 Average of the beginning and end-of-month figures for deposits of mutual savings banks and savings capital at savings and loan associations.
${ }^{5}$ At all commercial banks.
Note.-For description of revised series and for back data, see pp. 88093 of the November Bulletin.

Average of daily figures. Money stock consists of (1) demand deposits all commercial banks other than those due to domestic commercial banks and the U.S. Govt., less cash items in process of collection and F.R. foat: (2) foreign demand balances at F.R. Banks; and (3) currency outside the Treasury, F.R. Banks, and vaults of all commercial banks. Time deposits adjusted are time deposits at all commercial banks other than those due to domestic commercial banks and the U.S. Govt.

1 Averages of daily figures. Member bank reserve series reflects actual reserve requirement percentages with no adjustment to eliminate the effect of changes in Regulations $D$ and $M$. Required reserves were increased by $\$ 660$ million effective Apr. 16,1969 , and $\$ 400$ million, effective Oct. 16, 1969. Required reserves were reduced by $\$ 500$ million (net) effective Oct. 1, 1970.

2 Reserves available to support private nonbank deposits are defined as (1) required reserves for (a) private demand deposits, (b) total time and savings deposits, and (c) nondeposit sources subject to reserve requirements, and (2) excess reserves. This series excludes required reserves for net interbank and U.S. Govt. demand deposits.
3 Averages of daily figures. Deposits subject to reserve requirements include total time and savings deposits and net demand deposits as defined by Regulation D. Private demand deposits include all demand deposits
except those due to the U.S. Govt., less cash items in process of collection and demand balances due from domestic commercial banks. Data for 1968 are not comparable with later data due to the withdrawal from the System on Jan. 2, 1969, of a large member bank.

4 Total member bank deposits subject to reserve requirements, plus Euro-dollar borrowings, bank-related commercial paper, and certain other nondeposit items. This series for deposits is referred to as "the adjusted bank credit proxy.'

Note.-Due to changes in Regulations $M$ and $D$, member bank reserves include reserves held against nondeposit funds beginning Oct. 16, 1969. Back data may be obtained from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

${ }^{1}$ Includes Special Drawing Rights certificates beginning Jan. 1970.
2 Beginning with data for June 30, 1966, about $\$ 1.1$ billion in "Deposits accumulated for payment of personal loans" were excluded from "Time deposits" and deducted from "Loans" at all commercial banks. These changes resulted from a change in Federal Reserve regulations. See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. A-32.

See footnote 1 on p. A-23.
${ }^{3}$ After June 30, 1967, Postal Savings System accounts were eliminated from this Statement.
${ }_{5}^{4}$ See second paragraph of note 2.
5 Figures for this and later dates take into account the following changes (beginning June 30, 1969) for commercial banks: (1) inclusion of consolidated reports (including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis-that is, before deduction of valuation reserves. See also note 1.
${ }^{6}$ Series began in 1946; data are available only for last Wed. of month.
7 Other than interbank and U.S. Govt., less cash items in process of collection.

8 See first paragraph of note 2.
9 Includes relatively small amounts of demand deposits. Beginning with June 1961, also includes certain accounts previously classified as other liabilities.

10 Reclassification of deposits of foreign central banks in May 1961 reduced this item by $\$ 1,900$ million ( $\$ 1,500$ million to time deposits and $\$ 400$ million to demand deposits).

Note.-For back figures and descriptions of the consolidated condition statement and the seasonally adjusted series on currency outside banks and demand deposits adjusted, see "Banks and the Monetary System," Section 1 of Supplement to Banking and Monetary Statistics, 1962, and Bulletins for Jan. 1948 and Feb. 1960. Except on call dates, figures are partly estimated and are rounded to the nearest $\$ 100$ million.

For description of substantive changes in official call reports of condition beginning June 1969, see Bulletin for Aug. 1969, pp. 642-46.

[^16]9 Regarding reclassification as a reserve city, see Aug. 1962 Bulletin, p. 993. For various changes between reserve city and country status in 1960-63, see note 6, p. 587, May 1964 Bulletin

10 Beginning May 6,1972 , two New York City country banks, with deposits of $\$ 1,412$ million, merged and were reclassified as a reserve city bank.

Note.-Data are for all commercial banks in the United States (including Alaska and Hawaii, beginning with 1959). Commercial banks represent all commercial banks, both member and nonmember; stock savings banks; and nondeposit trust companies.

For the period June 1941 -June 1962 member banks include mutual savings banks as follows: three before Jan. 1960, two through Dec. 1960, and one through June 1962. Those banks are not included in insured commercial banks.

Beginning June 30, 1969, commercial banks and member banks exclude a small national bank in the Virgin Islands; also, member banks exclude, and noninsured commercial banks include, through June 30, 1970, a small member bank engaged exclusively in trust business.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.

Data for national banks for Dec. 31, 1965, have been adjusted to make them comparable with State bank data.

Figures are partly estimated except on call dates.
For revisions in series before June 30, 1947, see July 1947 Bulletin, pp. 870-71.
(In millions of dollars)

1 Beginning with June 30, 1948, figures for various loan items are shown gross (i.e., before deduction of valuation reserves); they do not add to the total and are not entirely comparable with prior figures. Total loans continue to be shown net. See also note 10 .

2 Includes securities purchased under resale agreements. Prior to June $\mathbf{3 0}$, 1967, they were included in loans-for the most part in loans to "Banks." Prior to Dec. 1965, Federal funds sold were included with "Total"' loans Prior to Dec. 1965, Fe
${ }_{3}$ See table (and notes), Deposits Accumulated for Payment of Personal Loans, p. A-32.
${ }^{4}$ Breakdowns of loan, investment, and deposit classifications are not available before 1947; summary figures for 1941 and 1945 appear in the table on pp. A-20-A-23.
5 Beginning with June 30, 1966, loans to farmers directly guaranteed by CCC were reclassified as "Other securities," and Export-Import Bank portfolio fund participations were reclassified from loans to "Other portfolio fund participations were reclassified from loans to
curities." This increased "Other securities" by about $\$ 1$ billion.
6 Beginning with Dec. 31,1965 , components shown at par rather than at book value; they do not add to the total (shown at book value) and are not entirely comparable with prior figures. See also note 10.
For other notes see opposite page.

${ }_{7}$ Beginning with 1942 , excludes reciprocal bank balances.
8 Through 1960 demand deposits other than interbank and U.S. Govt., less cash items in process of collection; beginning with 1961, demand deposits other than domestic commercial interbank and U.S. Govt., less cash items in process of collection.

9 For reclassification of certain deposits in 1961, see note 6, p. 589, May 1964 Bulletin.
${ }_{10}$ Beginning June 30, 1969, reflects (1) inclusion of consolidated reports (including figures for all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis-that is, before deduction of valuation reserves. See also notes 1 and 6 .

Note.-Data are for all commercial banks in the United States; member banks in U.S. possessions were included through 1.968 and then excluded. For the period June 1941-June 1962 member banks include mutual savings banks as follows: three before Jan. 1960, two through Dec. 1960 and one through June 1962. Those banks are not included in all insured or total banks.
A small noninsured member bank engaged exclusively in trust business is treated as a noninsured bank and not as a member bank for the period June 30, 1969 -June 30, 1970.

Comparability of figures for classes of banks is affected somewhat by changes in F.R. membership, deposit insurance status, and the reserve classifications of cities and individual banks, and by mergers, etc.
For other notes see opposite page.

## ASSETS AND LIABILITIES OF LARGE COMMERCIAL BANKS

(In millions of dollars)

Note.-Beginning Feb. 1971 the Quarterly Survey of Interest Rates on
Business Loans was revised. For description of revised series see pp. 468-
77 of the June 1971 Bulletin.

MONEY MARKET RATES
(Per cent per annum)

1 Averages of the most representative daily offering rate quoted by dealers
${ }_{2}$ Averages of the most representative daily offering rate published by finance companies, for varying maturities in the $90-179$ day range.
${ }^{3}$ Seven-day average for week ending Wednesday.
4 Except for new bill issues, yields are averages computed from daily closing bid prices.

5 Bills quoted on bank discount rate basis.
${ }^{6}$ Certificates and selected note and bond issues.
${ }^{7}$ Selected note and bond issues.
Note.-Figures for U.S. Government securities are the revised series described on p. A-35 of the Oct. 1972 Bulletin.

| Number of issues | 9 | 20 | 5 | 5 |  | 121 | 20 | 30 | 41 | 30 | 40 | 14 | 500 | 500 |

1 Includes bonds rated $A$ a and $A$, data for which are not shown separately. Because of a limited number of suitable issues, the number of corporate bonds in some groups has varied somewhat. As of Dec. 23,1967 , there is no longer an Aaa-rated railroad bond series.
2 Number of issues varies over time; figures shown reflect most recent count.

Note.-Annual yields are averages of monthly or quarterly data. Bonds: Monthly and weekly yields are computed as follows: (1) U.S. Govt.: Averages of daily figures for bonds maturing or callable in 10 years or more. (2) State and local govt.: General obligations only, based on

Thurs. figures. (3) Corporate: New-issue Aaa utility rates are weekly averages compiled by the Board of Governors of the Federal Reserve System. Rates for seasoned issues are averages of daily figures from Moody's Investors Service.

Stocks: Standard and Poor's corporate series. Dividend/price ratios are based on Wed. figures; carnings/price ratios are as of end of period Preferred stock ratio is based on eight median yields for a sample of non callable issues-12 industrial and two public utility; common stock ratios on the 500 stocks in the price index. Quarterly earnings are seasonally adjusted at annual rates.

Notes to tables on opposite page:

## Security Prices:

1 Begins June 30, 1965, at 10.90 . On that day the average price of a share of stock listed on the American Stock Exchange was $\$ 10.90$.

Note.-Annual data are averages of monthly figures. Monthly and weekly data are averages of daily figures unless otherwise noted and are computed as follows: U.S. Govt. bonds, derived from average market yields in table on preceding page on basis of an assumed 3 per cent, 20-year bond. Municipal and corporate bonds, derived from average yields as computed by Standard and Poor's Corp., on basis of a 4 per cent, 20 -year bond; Wed. closing prices. Common stocks, derived from component common stock prices. Average daily volume of trading, normaily conducted 5 days per week for $51 / 2$ hours per day, or $271 / 2$ hours per week. In recent years shorter days and/or weeks have cut total weekly trading to the following number of hours: 1967-Aug. 8-20, 20; 1968-Jan. 22Mar. 1, 20; June 30-Dec. 31, 22; 1969-Jan. 3-July 3, 20; July 7-Dec. 3122.5; 1970-Jan. 2-May 1, 25.

## Terms on Mortgages:

1 Fees and charges--related to principal mortgage amount-include loan commissions, fees, discounts, and other charges, which provide added income to the lender and are paid by the borrower. They exclude any closing costs related solely to transfer of property ownership.

Note.-Compiled by Federal Home Loan Bank Board in cooperation with Federal Deposit Insurance Corporation. Data are weighted averages based on probability sample survey of characteristics of mortgages originated by major institutional lender groups (including mortgage companies) for purchase of single-family homes. Data exclude loans for refinancing, reconditioning, or modernization; construction loans to homebuilders; and permanent loans that are coupled with construction loans to owner-builders. Series beginning 1965, not strictly comparable with earlier data. See also the table on Home-Mortgage Yields, p. A-55.

1 Margin credit includes all credit extended to purchase or carry stocks or related equity instruments and secured at least in part by stock (see Dec. 1970 Bulletin). Credit extended by brokers is end-of-month data Dec. 1970 BULLETIN). Credit extended by brokers is end-of-month data
for member firms of the NYSE. June data for banks are universe totals; for member firms of the NYSE. June data for banks are universe totals;
all other data for banks represent estimates for all commercial banks all other data for banks represent estimates for all commercial banks
based on reports by a reporting sample, which accounted for 60 per cent of security credit outstanding at banks on June 30, 1971.
${ }_{2}$ In addition to assigning a current loan value to margin stock generaliy, Regulations T and U permit special loan values for convertible bonds and stock acquired through exercise of subscription rights.

## EQUITY STATUS OF MARGIN ACCOUNT DEBT AT BROKERS

(Per cent of total debt, except as noted)

1 See note 1 to table above.
Note.-Each customer's equity in his collateral (market value of collateral less net debit balance) is expressed as a percentage of current collateral values.
${ }^{3}$ Nonmargin stocks are those not listed on a national securities exchange and not included on the Board of Governors of the Federal Reserve System's list of OTC margin stocks. At banks, loans to purchase or carry nonmargin stocks are unregulated; at brokers, such stocks have no loan value.
4 Includes loans to purchase or carry margin stock if these are unsecured or secured entirely by unrestricted collateral (see Dec. 1970 BULLETIN).
5 Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

SPECIAL MISCELLANEOUS ACCOUNT BALANCES AT BROKERS, BY EQUITY STATUS OF ACCOUNTS
(Per cent of total, except as noted)

| End of period | Net credit status | Equity class of accounts in debit status |  | Total balance (millions of dollars) |
| :---: | :---: | :---: | :---: | :---: |
|  |  | 60 per cent or more | Less than 60 per cent |  |
| 1971-Sept. | 44.2 | 47.0 | 8.8 | 4,160 |
| Oct. | 45.5 | 45.2 | 9.3 | 4,060 |
| Nov. | 44.6 | 45.1 | 10.2 | 4,000 |
| Dec. | 35.0 | 55.7 | 9.4 | 7,300 |
| 1972-Jan. | 36.8 | 55.9 | 7.3 | 5,780 |
| Feb. | 35.1 | 57.0 | 7.9 | 5,910 |
| Mar. | 35.8 | 56.0 | 8.1 | 5,990 |
| Apr. | 35.5 | 56.5 | 8.0 | 5,920 |
| May. | 34.7 | 57.1 | 8.0 | 5,860 |
| June. | 34.3 | 56.3 | 9.4 | 5,770 |
| July . | 34.4 | 55.2 | 11.4 | 5,930 |
| Aug. | 33.4 | 55.2 | 11.4 | 5,990 |
| Sept. | 33.7 | 53.8 | 12.5 | 6,000 |

Note.-Special miscellaneous accounts contain credit balances that may be used by customers as the margin deposit required for additional purchases. Balances may arise as transfers based on loan values of other collateral in the customer's margin account or deposits of cash (usually sales proceeds) occur.

${ }^{1}$ Also includes securities of foreign governments and international organizations and nonguaranteed issues of U.S. Govt. agencies.
${ }_{2}$ See note 8, p. A-19.
${ }_{3}^{2}$ See note 8, p. A-19. the Savings Banks Assn. of the State of New York. Data include building loans beginning with Aug. 1967.
${ }_{4}$ Balance sheet data beginning Jan. 1972 are reported on a gross of valuation reserves basis. The data differ somewhat from balance sheet
data previously reported by NAMSB which were net of valuation reserves For most items, however, the differences are relatively small.

Note.-National Assn. of Mutual Savings Banks data; figures are estimates for all savings banks in the United States and differ somewhat from those shown elsewhere in the Bulletin; the latter are for call dates and are based on reports filed with U.S. Govt. and State bank supervisory agencies.

1 U.S. Govt. securities only through 1967. Beginning 1968 the total reflects liquid assets and other investment securities. Included are U.S. Govt. obligations, Federal agency securities, State and local govt. securities, time deposits at banks, and miscellaneous securities, except FHLBB stock. Compensating changes have been made in "Other assets."

2 Includes other loans, stock in the Federal home loan banks, other investments, real estate owned and sold on contract, and office buildings and fixtures. See also note 1.
${ }^{3}$ Consists of advances from FHLBB and other borrowing.
${ }^{4}$ Insured savings and loan assns. only. Data on outstanding commit-
ments are comparable with those shown for mutual savings banks (on preceding page) except that figures for loans in process are not included above but are included in the figures for mutual savings banks.

5 Balance sheet data for all operating savings and loan associations were revised by the Federal Home Loan Bank Board for 1969 and 1970.

Note.-Federal Home Loan Bank Board data; figures are estimates for all savings and loan assns, in the United States. Data are based on monthly reports of insured assns. and annual reports of noninsured assns. Data for current and preceding year are preliminary even when revised.

Note.-Data from Federal Home Loan Bank Board, Federal National Mortgage Assn., and Farm Credit Admin. Among omitted balance sheet items are capital accounts of all agencies, except for stock of FHLB's. Bonds, debentures, and notes are valued at par. They include only publicly
offered securities (excluding, for FHLB's bonds held within the FHLB System) and are not guaranteed by the U.S. Govt.; for a listing of these securities, see table below. Loans are gross of valuation reserves and represent cost for FNMA and unpaid principal for other agencies.

OUTSTANDING ISSUES OF FEDERALLY SPONSORED AGENCIES, OCTOBER 31, 1972

Note.-These securities are not guaranteed by the U.S. Govt.; see also note to table at bottom of opposite page.

FEDERAL FISCAL OPERATIONS: SUMMARY
(In millions of dollars)

1 Equals net expenditures plus net lending.
2 The decrease in Federal securities resulting from conversion to private ownership of Govt.-sponsored corporations (totaling $\$ 9,853$ million) is not included here. In the bottom panel, however, these conversions decrease the outstanding amounts of Federal securities held by the public mainly by reductions in agency securities. The Federal National Mortgage Association (FNMA) was converted to private owership in Sept. 1968 and the Federal intermediate credit banks (FICB) and banks for cooperatives in Dec. 1968.
${ }^{3}$ Represents non-interest-bearing public debt securities issued to the International Monetary Fund and international lending organizations. New obligations to these agencies are handled by letters of credit.

4 Includes accrued interest payable on public debt securities, deposit funds, miscellaneous liability and asset accounts, and seigniorage.

5 As of Jan. 3, 1972, the Treasury operating balance was redefined to exclude the gold balance and to include previously excluded "Other depositaries" (deposits in certain commercial depositaries that have been converted from a time to a demand basis to permit greater flexibility in Treasury cash management).

6 Includes debt of Federal home loan banks, Federal land banks, R.F.K. Stadium Fund, FNMA (beginning Sept. 1968), FICB, and banks for cooperatives (beginning Dec. 1968).

Note.-Half years may not add to fiscal year totals due to revisions in series which are not yet available on a monthly basis.

1 Old-age, disability, and hospital insurance, and Railroad Retirement accounts.
2 Supplementary medical insurance premiums and Federal employee retirement contributions.
${ }^{3}$ Deposits of earnings by Federal Reserve Banks and other miscellaneous receipts.
4 Outlays by functional categories are published in the Monthly Treasury Statement (beginning April 1969). Monthly back data (beginning July 1968) are published in the Treasury Bulletin of June 1969.

5 Consists of government contributions for employee retirement and interest received by trust funds.
${ }^{6}$ Estimates presented in the Jan. 1973 Budget Document. Breakdowns do not add to totals because special allowances for contingencies, Federal pay increase (excluding Department of Defense), and revenue sharing, totaling $\$ 6,275$ million for fiscal 1973, are not included.
7 On June 5, 1972, the administration revised the Budget estimatesincreasing total outlays to $\$ 250.0$ billion; revised figures for the functional breakdown are not available.

Nore.-Direct public issues only. Based on Treasury Survey of Ownership.
Beginning with Dec. 1968, certain Govt.-sponsored but privately owned agencies and certain Govt. deposit accounts have been removed from U.S. Govt. agencies and trust funds and added to "All others." Comparable data are not available for earlier periods.
Data complete for U.S. Govt. agencies and trust funds and F.R. Banks but for other groups are based on Treasury Survey data. Of total mar-
ketable issues held by groups, the proportion held on latest date by those reporting in the Survey and the number of owners surveyed were: (1) about 90 per cent by the 5,642 commercial banks, 485 mutual savings banks, and 738 insurance companies combined; (2) about 50 per cent by the 466 nonfinancial corporations and 487 savings and loan assns.; and (3) about 70 per cent by 505 State and local govts.
"All others," a residual, includes holdings of all those not reporting in the Treasury Survey, including investor groups not listed separately.

Note.-The figures include all securities sold by dealers under repurchase contracts regardless of the maturity date of the contract, unless the contract is matched by a reverse repurchase (resale) agreement or delayed delivery sale with the same maturity and involving the same amount of securities. Included in the repurchase contracts are some that more clearly represent investments by the holders of the securities rather than dealer trading positions.

Average of daily figures based on number of trading days in the period.

Note.-The transactions data combine market purchases and sales of U.S. Govt. securities dealers reporting to the F.R. Bank of New York. They do not include allotments of, and exchanges for, new U.S. Govt. securities, redemptions of called or matured securities, or purchases or sales of securities under repurchase agreement, reverse repurchase (resale), or similar contracts. Averages of daily figures based on the number of trading days in the period.

NET CHANGE IN OUTSTANDING CORPORATE SECURITIES
(In millions of dollars)

1 Excludes investment companies.
2 Extractive and commercial and miscellaneous companies.
${ }^{3}$ Railroad and other transportation companies.
Note.-Securities and Exchange Commission estimates of cash transactions only. As contrasted with data shown on opposite page, new issues
exclude foreign sales and include sales of securities held by affiliated companies, special offerings to employees, and also new stock issues and cash proceeds connected with conversions of bonds into stocks. Retirements are defined in the same way and also include securities retired with internal funds or with proceeds of issues for that purpose.

${ }^{1}$ Includes loans held by nondeposit trust companies, but not bank trust depts.
${ }^{2}$ Data for 1941 and 1945, except for totals, are special F.R. estimates.
Note.-Second and fourth quarters, Federal Deposit Insurance Corpoation series for all commercial and mutual savings banks in the United

States and possessions. First and third quarters, estimates based on special F.R. interpolations after 1963 or beginning 1964. For earlier years, the basis for first- and third-quarter estimates included F.R. commercial bank call report data and data from the National Assn. of Mutual Savings Banks.

${ }^{1}$ Includes mortgage loans secured by land on which oil drilling or extracting operations are in process.

Note.-Institute of Life Insurance data. For loans acquired, the monthly figures may not add to annual totals; and for loans outstanding
the end-of-Dec. figures may differ from end-of-year figures because (1) monthly figures represent book value of ledger assets, whereas year-end figures represent annual statement asset values, and (2) data for year-end adjustments are more complete. Beginning 1970 monthly and year-earlier data are on a statement balance basis.

Nore.-Life Insurance Association of America data for new commitments of $\$ 100,000$ and over each on mortgages for multifamily and noncompanies account for a little more than one-half of both the total assets and the nonfarm mortgages held by all U.S. life insurance companies. Averages, which are based on number of loans, vary in part with loan composition by type and Iocation of property, type and purpose of loan, and loan amortization and prepayment terms. Data for the following are
limited to cases where information was available or estimates could be made: capitalization rate (net stabilized property earnings divided by property value); debt coverage ratio (net stabilized earnings divided by debt service); and per cent constant (annual level payment, including principal and interest, per $\$ 100$ of debt). All statistics exclude construction loans, increases in existing loans in a company's portfolio, reapprovals, and loans secured by land only.

Note.-Federal National Mortgage Assn. data. Total holdings include conventional loans. Data prior to Sept. 1968 relate to secondary market portfolio of former FNMA. Mortgage holdings include loans used to back bond issues guaranteed by GNMA. Mortgage commitments made during the period include some multifamily and nonprofit hospital loan commitments in addition to 1- to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMA-GNMA Tandem Plan (Program 18).

| 13. | 78.7 | 49.2 | 7.72 |  |  |  |
| 27. | 60.8 | 36.2 | 7.70 |  |  |  |

Note.-Average secondary market yields are gross-before deduction of 38 basis-point fee paid for mortgage servicing. They reflect the average accepted bid yield for home mortgages assuming a prepayment period of 12 years for 30 -year loans, without special adjustment for FNMA commitment fees and FNMA stock purchase and holding requirements. Beginning Oct. 18, 1971, the maturity on new short-term commitments was extended from 3 to 4 months. Mortgage amounts offered by bidders are total eligible bids received.

| Oct. | 237.8 | 164.1 | . . . . . . . . |

Note.--Government National Mortgage Assn. data. Under the Mort-gage-Backed Security Program, GNMA guarantees the timely payment of principal and interest on both pass-through and bond-type securities, which are backed by a pool of mortgages insured by FHA or Farmers Home Admin. or guaranteed by VA and issued by an approved mortgagee. To date, bond-type securities have been issued only by FNMA and FHLMC.

| Oct. . | 7.62 | 7.56 | 7.70 | 7.57 |

Note.-Annual data are averages of monthly figures. The HUD(FHA) data are based on opinion reports submitted by field offices on prevailing local conditions as of the first of the succeeding month. Yields on FHA-insured mortgages are derived from weighted averages of private secondary market prices for Sec. 203, 30-year mortgages with minimum downpayment and an assumed prepayment at the end of 15 years. Gaps in data are due to periods of adjustment to changes in maximum permissible contract interest rates. The HUD(FHA) interest rates on conventional first mortgages in primary markets are unweighted and are rounded to the nearest 5 basis points. The FHLBB effective rate series reflects fees and charges as well as contract rates (as shown in the table on conventional firstmortgage terms, p. A-37) and an assumed prepayment at end of 10 years.

${ }^{1}$ Monthly figures do not reflect mortgage amendments included in annual totals.

2 Not ordinarily secured by mortgages.
${ }^{3}$ Includes a small amount of alteration and repair loans, not shown separately; only such loans in amounts of more than $\$ 1,000$ need be secured.

Note.-Federal Housing Admin. and Veterans Admin. data. FHA-insured loans represent gross amount of insurance written; VA-guaranteed loans, gross amounts of loans closed. Figures do not take into account principal repayments on previously insured or guaranteed loans. For VA-guaranteed loans, amounts by type are derived from data on number and average amount of loans closed.

${ }^{1}$ Holdings of financial institutions; holdings of retail outlets are included in "other consumer goods paper."

Note.-Consumer credit estimates cover loans to individuals for house-
hold, family, and other personal expenditures, except real estate mortgage loans. For back figures and description of the data, see "Consumer Credit," Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965 and Bulletins for Dec. 1968 and Oct. 1972.

[^28]Note.-Estimates are based on accounting records and often include financing charges. Renewals and refinancing of loans, purchases and
sales of instalment paper, and certain other transactions may increase the amount of extensions and repayments without affecting the amount outstanding.

For back figures and description of the data, see "Consumer Credit," Section 16 (New) of Supplement to Banking and Monetary Statistics, 1965 and Bulletins for Dec. 1968 and Oct. 1972.

Note.-Published groupings include series and subtotals not shown separately. A description and historical data will be available at a later
date. Figures for individual series and subtotals are published in the monthly Business Indexes release.

## SELECTED BUSINESS INDEXES

(1967 $=100$, except as noted)

${ }^{1}$ Employees only: excludes personnel in the Armed Forces.
2 Production workers only.
${ }_{4}{ }^{3}$ F.R. index based on Census Bureau figures.
4 Prices are not seasonally adjusted. Latest figure is final.

Capacity utilization: Based on data from Federal Reserve, McGrawHill Economics Department, and Department of Commerce.

Construction contracts: F. W. Dodge Co. monthly index of dollar value of total construction contracts. including residential, nonresidential, and heavy engineering; does not include data for Alaska and Hawaii.
Employment and payrolls: Based on Bureau of Labor Statistics data includes data for Alaska and Hawaii beginning with 1959.
Prices: Bureau of Labor Statistics data.

Note.-All series: Data are seasonally adjusted unless otherwise noted.

## CONSTRUCTION CONTRACTS AND PRIVATE HOUSING PERMITS

(In millions of dollars, except as noted)

Because of improved collection procedures, data for 1 -family homes beginning Jan. 1968 are not strictly comparable with those for earlier periods. To improve comparability, earlier levels may be raised by approximately 3 per cent for total and private construction, in each case, and by 8 per cent for residential building.

Note.-Dollar value of construction contracts as reported by the F. W. Dodge Co. does not include data for Alaska or Hawaii. Totals of monthly data exceed annual totals because adjustments-negative-are made into accumulated monthly data after original figures have been published.
Private housing units authorized are Census Bureau series for 13,000 reporting areas with local building permit systems.

## VALUE OF NEW CONSTRUCTION ACTIVITY

(In millions of dollars)

| Period | Total | Private |  |  |  |  |  |  | Public |  |  |  |  |

## Notes <br> Line

1. Total funds raised (line I of p. A-72) excluding corporate equities. 2. Sum of lines 3-6 or 7-10
2. Includes farm and commercial mortgages.
3. Credit market funds raised by Federally sponsored credit agencies. Included below in lines 13 and 33. Includes all GNMA-guaranteed security issues backed by mortgage pools.
4. Line 1 less line 2 plus line 11. Also line 19 less line 26 plus line 32. Also sum of lines 27 through 41 excluding subtotals.
5. Includes farm and commercial mortgages.
6. Lines $39+41$.
7. Excludes equity issues and investment company shares. Includes line 18.
8. Foreign deposits at commercial banks, bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign af filiates.
9. Demand deposits at commercial banks.
10. Excludes net investment of these reserves in corporate equities.
11. Mainly retained earnings and net miscellaneous liabilities.
12. Line 12 less line 19 plus line 26 .

33-37. Lines 13-17 less amounts acquired by private finance. Line 37 includes mortgages.
$39+41$. See line 25 .
42. Mainly an offset to line 9 .
43. Lines 32 plus 38 or line 12 less line 27 plus line 42.
44. Line 2 /line 1.
45. Line $19 /$ line 12.
46. Lines 10 plus 28.

Corporate equities
Line
1 and 3 Includes issues by financial institutions.

1 Includes purchase from Denmark of $\$ 25$ milion
2 Includes purchase from Kuwait of \$25 million
3 Includes sales to Algeria of $\$ 150$ million in 1967 and $\$ 50$ million in 1968

4 Data for IMF include the U.S. payment of $\$ 385$ million increase in its gold subscription to the IMF and gold sold by the IMF to the United States in mitigation of U.S. sales to other countries making gold payments States in mitigation of U.S. sales to other countries making gold payments to the IMF. The country data include U.S. gold sales to various countries
in connection with the IMF quota payments. Such U.S. sales to countries in connection with the IMF quota payments. Such U.S. sales to count
and resales to the United States by the IMF total $\$ 548$ million each.
3 Includes IMF gold sales to and purchases from the United States,
U.S. payment of increases in its gold subscription to IMF, gold deposits by the IMF (see note 1 (b) to Table 4), and withdrawal of deposits. The first withdrawal ( $\$ 17$ million) was made in June 1968 and the last withdrawal ( $\$ 144$ million) was made in Feb. 1972

IMF sold to the United States a total of $\$ 800$ million of gold ( $\$ 200$ million in 1956, and $\$ 300$ million in 1959 and in 1960) with the right of repurchase; proceeds from these sales invested by IMF in U.S. Govt. securities. IMF repurchased $\$ 400$ million in Sept. 1970 and the remaining $\$ 400$ million in Feb. 1972.

6 Payment to the IMF of $\$ 259$ million increase in U.S. goid subscription less gold deposits by the IMF.

## Notes to Table 5 on opposite page:

> ${ }^{1}$ Represents net IMF sales of gold to acquire U.S. dollars for use in IMF operations. Does not include transactions in gold relating to gold deposit or gold investment (see Table 6).

> 2 Positive figures represent purchases from the IMF of currencies of other members for equivalent amounts of dollars; negative figures represent repurchase of dollars, including dollars derived from charges on purchases and from other net dollar income of the IMF. The United States has a commitment to repurchase within 3 to 5 years, but only to States has a commitment to repurchase within 3 to 5 years, but only to
the extent that the holdings of dollars of the IMF exceed 75 per cent of the extent that the holdings of dollars of the IMF exceed 75 per cent of
the U.S. quota. Purchases of dollars by other countries reduce the U.S. the U.S. quota. Purchases of dollars by other countr
> ${ }^{3}$ Includes dollars obtained by countries other than the United States from sales of gold to the IMF.

> 4 Represents the U.S. gold tranche position in the IMF (the U.S. quota minus the holdings of dollars of the IMF), which is the amount that the United States could purchase in foreign currencies automatically
if needed. Under appropriate conditions, the United States could purchase additional amounts equal to its quota.

Includes $\$ 259$ milion gold subscription to the IMF in June 1965 for a U.S. quota increase, which became effective on Feb. 23, 1966. In figures published by the IMF from June 1965 through Jan. 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position

6 Includes $\$ 30$ million of Special Drawing Rights.
7 Represents amount payable in dollars to the IMF to maintain the value of IMF holdings of U.S. dollars.

Note,-The initial U.S. quota in the IMF was $\$ 2,750$ million. The U.S. quota was increased to $\$ 4,125$ million in 1959 , to $\$ 5,160$ million in Feb. 1966 , to $\$ 6,700$ million in Dec. 1970 , and to $\$ 7,274$ million in May 1972 as a result of the change in par value of the U.S. dollar. Under the Articles of Agreement, subscription payments equal to the quota have been made 25 per cent in gold and 75 per cent in dollars.

1 Includes (a) gold sold to the United States by the IMF with the right of repurchase, and (b) gold deposited by the IMF to mitigate the impact on the U.S. gold stock of foreign purchases for the purpose of making gold subscriptions to the IMF under quota increases. For corresponding liabilities, see Table 6.

2 Includes gold in Exchange Stabilization Fund.
${ }^{3}$ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions the United States could purchase additional amounts equal to the U.S. quota. See Table 5.
4 Includes allocations by the IMF of Special Drawing Rights as follows: $\$ 867$ million on Jan. 1, 1970; $\$ 717$ million on Jan. 1, 1971 ; and $\$ 710$ million on Jan. 1, 1972; plus net transactions in SDRs.

5 For holdings of F.R. Banks only, see pp. A-12 and A-13.
6 Reserve position includes, and gold stock excludes, $\$ 259$ million gold subscription to the IMF in June 1965 for a U.S. quota increase which
became effective on Feb. 23, 1966. In figures published by the IMF from June 1965 through Jan. 1966, this gold subscription was included in the U.S. gold stock and excluded from the reserve position.

7 Includes gain of $\$ 67$ million resulting from revaluation of the German mark in Oct. 1969, of which $\$ 13$ million represents gain on mark holdings at time of revaluation.

8 Includes $\$ 28$ million increase in dollar value of foreign currencies revalued to reflect market exchange rates as of Dec. 31, 1971.

9 Total reserve assets include an increase of $\$ 1,016$ million resulting from change in par value of the U.S. dollar on May 8, 1972; of which, total gold stock is $\$ 828$ million (Treasury gold stock $\$ 822$ million), reserve position in IMF $\$ 33$ million, and SDR's $\$ 155$ million.

Note.--See Table 24 for gold held under earmark at F.R. Banks for oreign and international accounts. Gold under earmark is not included in the gold stock of the United States.

1 Includes (a) liability on gold deposited by the IMF to mitigate the mpact on the U.S. gold stock of foreign purchases for gold subscriptions to the IMF under quota increases, and (b) U.S. Govt. obligations at cost value and funds awaiting investment obtained from proceeds of sales of gold by the IMF to the United States to acquire income-earning assets.
2 Includes BIS and European Fund.
${ }_{3}$ Derived by applying reported transactions to benchmark data; breakdown of transactions by type of holder estimated 1960-63. Includes securities issued by corporations and other agencies of the U.S. Govt. securities issued by corporations and othe
which are guaranteed by the United States.
${ }^{4}$ Includes nonguaranteed securities of U.S. Federally-sponsored agencies, beginning Feb. 1972.
${ }^{5}$ 'Excludes notes issued to foreign official nonreserve agencies.
6 Includes short-term liabilities payable in dollars to commercial banks abroad and short-term hiabilities payable in foreign currencies to commercial banks abroad and to "other foreigners."
7 Includes marketable U.S. Govt. bonds and notes held by commercial banks abroad.

8 Principally the International Bank for Reconstruction and Development and the Inter-American and Asian Development Banks. From Dec. 1957 through Jan. 1972 includes difference between cost value and face 1957 through Jan. 1972 includes difference between
value of securities in IMF gold investment account.

9 Includes total foreign holdings of U.S. Govt. bonds and notes, for which breakdown by type of holder is not available.

10 Not available.
${ }^{11}$ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on first line are comparable with those shown for the preceding date; figures on second line are comparable with those shown for the following date.

12 Includes $\$ 101$ million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969 as follows: liquid, $\$ 17$ million, and nonliquid, $\$ 84$ million.
${ }^{13}$ Data on the second line differ from those on first line because certain accounts previously classified as "official institutions" are included with "banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury securities payable in foreign currencies issued to official institutions of foreign countries have been increased in value to reflect market exchange rates as of Dec. 31, 1971.

Note,--Based on Treasury Dept. data and on data reported to the Treasury Dept. by banks and brokers in the United States. Data correspond generally to statistics following in this section, except for the exclusion of nonmarketable, nonconvertible U.S. Treasury notes issued to foreign official nonreserve agencies, the inclusion of investments by foreign official reserve agencies in nonguaranteed bonds of U.S. Federally oficial reserve agencies in nonguaranteed bonds of e.S. Federaly "holdings of dollars,"' and holdings of U.S. Treasury letters of credit and non-negotiable, non-interest-bearing special U.S. notes held by other international and regional organizations.

1 Includes Bank for International Settlements and European Fund
${ }^{2}$ Includes countries in Oceania and Eastern Europe, and Western European dependencies in Latin America.

3 See note 11 to Table 6
4 Includes $\$ 101$ million increase in dollar value of foreign currency liabilities resulting from revaluation of the German mark in Oct. 1969.

5 Data on second line differ from those on the first line because certain accounts previously classified as "Official institutions" are included in "Banks"; a number of reporting banks are included in the series for the first time; and U.S. Treasury liabilities payable in foreign currencies
to official institutions of foreign countries have been increased in value by $\$ 110$ million to refiect market exchange rates as of Dec. 31, 1971.

Note.-Data represent short- and long-term liabilities to the official institutions of foreign countries, as reported by banks in the United States; foreign official holdings of marketable and nonmarketable U.S. Govt. securities with an original maturity of more than 1 year, except for nonmarketable notes issued to foreign official nonreserve agencies; and investments by foreign official reserve agencies in nonguaranteed bonds of U.S. Federally-sponsored agencies.

${ }^{1}$ Data exclude "holdings of dollars" of the IMF.
${ }^{2}$ Excludes negotiable time certificates of deposit, which are included in "Other."
${ }^{3}$ Includes nonmarketable certificates of indebtedness issued to official institutions of foreign countries.
4 Principally bankers' acceptances, commercial paper, and negotiable time certificates of deposit. See also note 8(a).

5 U.S. Treasury bills and certificates obtained from proceeds of sales of gold by the IMF to the United States to acquire income-earning assets. Upon termination of investment, the same quantity of gold was reacUpon termination of
6 , Principally the International Bank for Reconstruction and Development and the Inter-American Development Bank.
Includes difference between cost value and face value of securities in IMF gold investment account.
${ }^{7}$ Data on the two lines shown for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage with those shown for the preceding date; figures on the second line are comparable with those shown for the following date.
${ }^{8}$ Data on second line differ from those on first line because (a) those liabilities of U.S. banks to their foreign branches and those liabilities of U.S. agencies and branches of foreign banks to their head offices and foreign branches, which were previously reported as deposits, are included in "Other short-term liabilities"; (b) certain accounts previously classified as "Official institutions" are included in "Banks"; and (c) a number of reporting banks are included in the series for the first time.
${ }^{9}$ Foreign central banks and foreign central govts. and their agencies and Bank for International Settlements and European Fund.

10 Excludes central banks, which are included in "Official institutions."
Note.-"Short term"' refers to obligations payable on demand or having an original maturity of 1 year or less. For data on long-term liabilities reported by banks, see Table 10. Data exclude the "holdings of dollars" of the International Monetary Fund; these obligations to the IMF constitute contingent liabilities, since they represent essentially the amount of dollars available for drawings from the IMF by other member countries. Data exclude also U.S. Treasury letters of credit and non-negotiable, non-interest-bearing special U.S. notes held by the Inter-American Development Bank and the International Development Association.

${ }^{1}$ Excludes central banks, which are included with "Official institutions." ${ }^{2}$ Data on second line differ from those on first line because (a) those claims of U.S. banks on their foreign branches and those claims of U.S. agencies and branches of foreign banks on their head offices and foreign
branches, which were previously reported as "Loans", are included in "Other short-term claims"; and (b) a number of reporting banks are included in the series for the first time.

## 20. FOREIGN CREDIT AND DEBIT

 BALANCES IN BROKERAGE ACCOUNTS(Amounts outstanding; in millions of dollars)

| End of period | Credit balances (due to foreigners) | Debit balances (due from foreigners) |
| :---: | :---: | :---: |
| 1969-Dec.. | 434 | 278 |
| 1970-Mar. | 368 | 220 |
| June. | 334 | 182 |
| Sept. | 291 | 203 |
| Dec. | 349 | 281 |
| 1971-Mar. | 511 | 314 |
| June. | 419 | 300 |
| Sept. | 333 | 320 |
| Dec. | 311 | 314 |
| 1972-Mar. | 325 | 379 |
| June. | 312 | 339 |
| Sept. ${ }^{2}$. | 286 | 336 |

Note-Data represent the money credit balances and money debit balances appearing on the books of reporting brokers and dealers in the United States, in accounts of foreigners with them, and in their accounts carried by foreigners.

Notes to Tables 21a and 21b on following pages:

[^40]For a given month, total assets may not equal total liabilities because some branches do not adjust the parent's equity in the branch to reflect unrealized paper profits and paper losses caused by changes in exchange rates, which are used to convert foreign currency values into equivalent dollar values.

## 21a. ASSETS OF FOREIGN BRANCHES OF U.S. BANKS

(In millions of dollars)

FOREIGN EXCHANGE RATES
(In cents per unit of foreign currency)

1 Effective Aug. 10, 1969, the French franc was devalued from 4.94 to 5.55 franes per U.S. dollar

2 A new Argentine peso, equal to 100 old pesos, was introduced on Jan. 1, 1970. Since Apr. 6, 1971, the official exchange rate is set daily by the Government of Argentina. Average for Feb. 1-27, 1972.
${ }^{3}$ On June 1, 1970, the Canadian Government announced that, for the time being, Canada will not maintain the exchange rate of the Canadian dollar within the margins required by IMF rules.

4 Effective May 9, 1971, the Austrian schilling was revalued to 24.75 per U.S. dollar
5 Danish krone-Sept. 26, 1972, n.a.; Sept. 27 and 28 rates nominal.
6 Effective Oct. 26, 1969, the new par value of the German mark was set at 3.66 per U.S. dollar.
7 Effective May 10, 1971, the German mark and Netherlands guilder have been floated.
${ }^{8}$ Effective May 10, 1971, the Swiss franc was revalued to 4.08 per U.S. dollar

9 Effective Oct. 20, 1971, the Spanish peseta was revalued to 68.455 per U.S. dollar.

10 Effective June 23, 1972, the U.K. pound was floated.
${ }^{11}$ South Africa repegged the rand at $\$ 1.2732$ Oct. $25,1972$.
Note.-Effective Aug. 16, 1971, the U.S. dollar convertibility to gold was suspended; as from that day foreign central banks did not have to support the dollar rate in order to keep it within IMF limits.

During December 1971, certain countries established central rates against the U.S. dollar in place of former IMF parities.
Averages of certified noon buying rates in New York for cable transfers. For description of rates and back data, see "International Finance," Section 15 of Supplement to Banking and Monetary Statistics, 1962.

Note.-Rates shown are mainly those at which the central bank either discounts or makes advances against eligible commercial paper and/or govt. securities for commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations. Other rates for some of these countries follow:
Argentina- 3 and 5 per cent for certain rural and industrial paper, depending on type of transaction;
Brazil-8 per cent for secured paper and 4 per cent for certain agricultural paper;
Chile-Various rates ranging from 1 per cent to 17 per cent; 20 per cent for loans to make up reserve deficiencies.
Colombia- 5 per cent for warehouse receipts covering approved lists of products, 6 and 7 per cent for agricultural bonds, and 12 and 18 per cent for rediscounts in excess of an individual bank's quota;
Costa Rica-5 per cent for paper related to commercial transactions (rate shown is for agricultural and industrial paper);
Ecuador-5 per cent for special advances and for bank acceptances for agricultural purposes, 7 per cent for bank acceptances for industrial purposes, and 10 per cent for advances to cover shortages in legal reserves; Ethiopia- 5 per cent for export paper and 6 per cent for Treasury bills.
Honduras-Rate shown is for advances only.
Indonesia-Various rates depending on type of paper, collateral, commodity involved, etc.;
Japan-Penalty rates (exceeding the basic rate shown) for borrowings from the central bank in excess of an individual bank's quota;

Morocco-Various rates from 3 per cent to 4.6 per cent depending on type of paper, maturity, collateral, guarantee, etc.
of paper, maturity, collateral, guarantee, etc.
Peru- $3.5,5$, and 7 per cent for small credits to agricultural or fish production, import substitution industries and manufacture of exports; 8 per cent for other agricultural, industrial and mining paper;
Philippines- 6 per cent for financing the production, importation, and distribution of rice and corn and 7.75 per cent for credits to enterprises engaged in export activities. Preferential rates are also granted on credits to rural banks; and
$\dagger$ United Kingdom-On Oct. 9, 1972, the Bank of England announced: "With effect from Friday October 13th the Bank's minimum lending rate will until further notice be the average rate of discount for Treasury bills established at the most recent tender plus one half percent rounded to the nearest one quarter percent above. Although the rate will therefore be nearest one quarter percent above. Although the rate will therefore be automatically determined by this formula it will for convenience be made as the results of the Treasury bill tender. The regular weekly bank rate announcement will be discontinued from now on." Therefore, the minimum lending rate as of last Friday of the month will be carried in place of Bank rate.
Venezuela- 2 per cent for rediscounts of certain agriculture paper, $41 / 2$ per cent for advances against government bonds, and $51 / 2$ per cent for rediscounts of certain industrial paper and on advances against promissory notes or securities of first-class Venezuelan companies.
Vietnam-10 per cent for export paper; treasury bonds are rediscounted at a rate 4 percentage points above the rate carried by the bond; and at a rate 4 percentage points above the rate carried by the bond; and
there is a penatty rate of 24 per cent for banks whose loans exceed quanthere is a penalty
titative ceilings.

Note.-Treasury bills: All rates are on the latest issue of 91 -day bills.
U.S. and Canadian rates are market offer rates 11 a.m. Friday; U.K.
rates are Friday opening market offer rates in London.
Premium or discount on forward pound and on forward Canadian dollar:
Rates per annum computed on basis of midpoint quotations (between
bid and offer) at 11 a.m. Friday in New York for both spot and forward
pound sterling and for both spot and forward Canadian dollars.

All series: Based on quotations reported to F.R. Bank of New York by market sources.

For description of series and for back figures, see Oct. 1964 Bulletin, pp. 1241-60. For description of adjustments to U.K. and Canadian Treasury bill rates, see notes to Table 1, p. 1257, and to Table 2, p. 1260, Oct. 1964 Bulletin.

1 Includes reported or estimated gold holdings of international and regional organizations, central banks and govts. of countries listed in this table, and also of a number not shown separately here, and gold to be distributed by the Tripartite Commission for the Restitution of Monetary Gold; excludes holdings of the U.S.S.R., other Eastern European countries, and China Mainland.
The figures included for the Bank for International Settlements are The figures included for the Bank for International Settlements are the Bank's gold assets net of gold deposit liabilities. This procedure avoids the overstatement of total world gold reserves since most of the
gold deposited with the BIS is included in the gold reserves of individual gold depo
${ }_{\mathbf{2}}$ Adjusted to include gold subscription payments to the IMF made by
some member countries in anticipation of increase in Fund quotas, except those matched by gold mitigation deposits with the United States and United Kingdom; adjustment is $\$ 270$ million.
${ }^{3}$ Excludes gold subscription payments made by some member countries in anticipation of increase in Fund quotas: for most of these countries the increased quotas became effective in Feb. 1966.
4 Net gold assets of BIS, i.e., gold in bars and coins and other gold assets minus gold deposit liabilities.

Note.-For back figures and description of the data in this and the following tables on gold (except production), see "Gold," Section 14 of Supplement to Banking and Monetary Statistics, 1962.

## GOLD PRODUCTION

[^43]were still owned by one-bank holding companies as of December 31, 1970. If, for example, a one-bank holding company acquired or formed a nonbank subsidiary between 1930 and 1939 and disposed of that subsidiary prior to December 31, 1970, it would not be reflected here. Consequently, the number of formations and acquisitions reported is underquently, the number of form
stated in earlier time periods.
Note.-Periods showing date of entry indicate when OBHC's formed or acquired nonbank subsidiaries.

© Federal Reserve Bank Cities
- Federal Reserve Branch Cities

[^0]:    The Federal Reserve BULLETIN is issued monthly under the direction of the staff editorial committee. This committee is responsible for opinions expressed except in official statements and signed articles. Direction for the art work is provided by Mack Rowe.

[^1]:    ${ }^{1}$ Excludes 34 holding companies that submitted late registration statements.
    ${ }^{2}$ Classes are defined as follows: 1) banking only, company is engaged only in banking activities; 2) closely related, company is engaged in banking and activities determined by the Board as closely related to banking; 3) not closely related, company is engaged in any activities other than banking and activities closely related to banking; and 4) foreign, company is chartered in a foreign country and derives at least half of its consolidated revenue or has at least half of its consolidated assets outside the United States.

    The classification of companies is based on the Standard Industrial Classification (SIC) system. This is a comprehensive classification system developed by the Office of Management and Budget to provide a breakdown of aggregate economic activity into narrower, more homogeneous lines of activity as represented by industries and products. For some tabulations, the closely related and the not closely related classes are broken down into two subclasses according to whether the companies have more or less than 25 per cent of their investment in banking. Although 25 per cent is an arbitrary figure, it serves to separate the companies for which banking approaches an incidental activity from those for which banking is relatively important.
    ${ }^{3}$ Mainly trusts.

[^2]:    ${ }^{1}$ Excludes 34 holding companies that submitted late registration statements.

[^3]:    NOTES TO TABLE 4-continued
    ${ }^{3}$ Number of holding companies that are engaged in the activity either directly or through a subsidiary. Numbers of holding companies in the three-digit SIC groups do not necessarily equal the sum of the number of holding companies in the 4-digit SIC's. The numbers exclude subsidiaries reported as inactive.
    ${ }^{4}$ Industry definition developed by the Office of Management and Budget. It should not be confused with the Federal Reserve definition of activities that are closely related to banking. SIC 605 includes foreign exchange establishments, check cashing agencies and currency exchanges, safe deposit companies, clearing house associations, and corporations for banking abroad.
    ${ }^{5}$ Data for this industry group were generally not reported at the four-digit level.
    n.e.c. Not elsewhere classified.

[^4]:    ${ }^{1}$ Private demand deposits plus currency in circulation.
    ${ }^{2} M_{1}$ plus commercial bank time and savings deposits other than large-denomination CD's.
    ${ }^{3}$ Daily-average member bank deposits, adjusted to include funds from nondeposit sources.

[^5]:    ${ }^{4}$ The $R P D$ range originally considered by the Committee incorporated adjustments for the estimated effects that the scheduled changes in the Board's Regulations $D$ and $J$ would have on the prospective relationship between growth rates in RPD's and in the monetary aggregates. However, it was agreed that those adjustments would be inappropriate if there were a delay in implementing the changes, and since such a delay in fact occurred, the adjustments are omitted in the figures cited.

[^6]:    ${ }^{1}$ Banking data are as of December 31, 1971, while market data for the Burley area are as of June 30, 1970.

[^7]:    ${ }^{1}$ See my dissenting Statement to the Board's approval of the application of Texas Commerce Bancshares to acquire San Angelo National Bank, October 6, 1972.

[^8]:    1"Shares transferred after January 1, 1966, by any bank holding company (or by any company which, but for such transfer, would be a bank holding company) . . . to any transferee that . . . has one or more officers . . . in common with . . . the transferor shall be deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the trnsferor is not in fact capable of controlling the transferee."

[^9]:    ${ }^{1}$ Includes Federal agency issues held under repurchase agreements as of Dec. 1, 1966, and Federal agency issues bought outright as of Sept. 29, 1971.
    ${ }_{2}$ Beginning with 1960 reflects a minor change in concept; see Feb. 1961 Bulletin, p. 164.
    3 Beginning Apr. 16, 1969, "Other F.R. assets" and "Other F.R. liabilities and capital" are shown separately; formerly, they were netted together and reported as "Other F.R. accounts"
    4 Includes industrial loans and acceptances until Aug. 21,1959 , when industrial loan program was discontinued. For holdings of acceptances on Wed. and end-of-month dates, see tables on F.R. Banks on following pages. See also note 2 .

[^10]:    ${ }^{1}$ Adjusted to include $\$ 450$ million of certain reserve deficiencies on which penalties can be waived for a transition period in connection with bank adaptation to Regulation J as amended effective Nov. 9, 1972.

    2 Beginning Sept. 12, 1968, amount is based on close-of-business figures for reserve period 2 weeks previous to report date.
    ${ }^{3}$ As of Nov. 9, 1972, the definition of reserve city and country banks was changed (see July 1972 Bulletin, p. 626). The classifications employed here are the same as prior to the change in definition, so these series are

[^11]:    Note.-Averages of daily figures. Monthly data are averages of daily figures within the calendar month; they are not averages of the 4 or 5 weeks ending on Wed. that fall within the month. Beginning with Jan. 1964 reserves are estimated except for weekly averages.

    Total reserves held: Based on figures at close of business through Nov. 1959 ; thereafter on closing figures for balances with F.R. Banks and opening figures for allowable cash; see also note 3 to preceding table.

    Required reserves: Based on deposits as of opening of business each day. Borrowings at F.R. Banks: Based on closing figures.

[^12]:    ${ }^{1}$ Based upon reserve balances, including all adjustments applicable to the reporting period. Prior to Sept. 25,1968, carryover reserve deficiencies, if any, were deducted. Excess reserves for later periods are net of all carryover reserves.
    ${ }_{2}$ Derived from averages for individual banks for entire week. Figure for each bank indicates extent to which the bank's weekly average purchases and sales are offsetting.
    ${ }_{3}$ Federal funds loaned, net funds supplied to each dealer by clearing

[^13]:    ${ }^{1}$ Demand deposits subject to reserve requirements are gross demand deposits minus cash items in process of collection and demand balances

[^14]:    ${ }_{1}^{1}$ Excludes interbank and U.S. Govt. demand deposit accounts.
    ${ }_{2}$ Boston, Philadelphia, Chicago, Detroit, San Francisco-Oakland, and Los Angeles-Long Beach.

[^15]:    ${ }^{1}$ Adjusted to exclude domestic commercial interbank loans.
    ${ }_{2}$ Beginning June 30, 1971, Farmers Home Administration insured notes totaling approximately $\$ 700$ million are included in "Other securities" rather than in "Loans."
    ${ }^{3}$ Loans sold outright by commercial banks to own subsidiaries, foreign branches, holding companies, and other affiliates.

    4 Beginning June 30, 1969, data revised to include all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries; earlier data include commercial banks only. Also, loans and investments are now reported gross, without valuation reserves deducted, rather than net of valuation reserves as was done previously. For a description of the revision, see Aug. 1969 Buldetin pp 642-46, Data shown in this table beginning January 1959 have been revised to include valuation reserves.

[^16]:    1 Beginning June 30, 1966, loans to farmers directly guaranteed by CCC were reclassified as securities, and Export-Import Bank portfolio fund participations were reclassified from loans to securities. This reduced Total loans and increased "Other securities" by about \$1 billion. Total loans include Federal funds sold, and beginning with June 1967 securities loans include Federal funds sold, and beginning with June 1967 securities "'Federal funds sold, etc.,'" on p. A-24.
    'Federal funds sold, etc.' on p. A-24. Home Administration notes are Beginning June 30, 1971, Farmers Home Administration notes are
    classified as "Other securities" rather than "Loans." As a result of this classified as "Other securities" rather than "Loans." As a result of this", change, approximately $\$ 300$ million was transferred to "Other
    for the period ending June 30,1971 , for all commercial banks.
    for the period ending June 30,1971 , for all commercia
    See also table (and notes) at the bottom of p. A-32.
    2 See first two paragraphs of note 1 .
    3 Reciprocal balances excluded beginning with 1942.
    4 Includes items not shown separately. See also note 1
    5 See last paragraph of note 1.
    6 Beginning with Dec. 31, 1947, the series was revised; for description, see note 4, p. 587 , May 1964 Buliletin.

    7 Figure takes into account the following changes beginning June 30, 1969: (1) inclusion of consolidated reports (including figures for all bankpremises subsidiaries and other significant majority-owned domestic subsidiaries) and (2) reporting of figures for total loans and for individual categories of securities on a gross basis-that is, before deduction of categories of securities on a gross basis-that is, before
    valuation reserves-rather than net as previously reported.

    8 As of Nov. 9,1972 , the definitions of reserve city and country banks were changed (see Nov. 1972 Bulletin, p. 994). The classifications employed here are the same as those prior to the change in definition, so these series are continuous over time.

[^17]:    ${ }_{9}^{8}$ Includes minority interest in consolidated subsidiaries.
    ${ }^{9}$ Exclusive of loans and Federal funds transactions with domestic commercial banks.
    10 All demand deposits except U.S. Govt. and domestic commercial banks, less cash items in process of collection.

    11 Certificates of deposit issued in denominations of $\$ 100,000$ or more.

[^18]:    NoTE.-About 160 weekly reporting banks are included in this series; these banks classify, by industry, commercial and industrial loans amounting to about 90 per cent of such loans held by all weekly reporting banks and about 70 per cent of those held by all commercial banks.

    For description of series see article "Revised Series on Commercial and Industrial Loans by Industry," Feb. 1967 Bulleitin, p. 209.

[^19]:    Commercial and industrial "term" loans are all outstanding loans with an original maturity of more than 1 year and all outstanding loans granted under a formal agreement-revolving credit or standby-on which the original maturity of the commitment was in excess of 1 year.

[^20]:    Note.-Half years may not add to fiscal year totals due to revisions in series which are not yet available on a monthly basis.

[^21]:    1 Only bonds sold pursuant to 1949 Housing Act, which are secured by contract requiring the Housing Assistance Administration to make annual contributions to the local authority.

    2 Municipalities, counties, townships, school districts.
    ${ }^{3}$ Excludes U.S. Govt. loans. Based on date of delivery to purchaser and payment to issuer, which occurs after date of sale.

[^22]:    Note.-The figures in the first column differ from those shown on the following page, which are based on Bond Buyer data. The principal difference is in the treatment of U.S. Govt. loans.
    Investment Bankers Assn. data; par amounts of long-term issues based on date of sale unless otherwise indicated.

    Components may not add to totals due to rounding.

[^23]:    ${ }^{1}$ Includes contractual and regular single purchase sales, voluntary and contractual accumulation plan sales, and reinvestment of investment income dividends; excludes reinvestment of realized capital gains dividends.

[^24]:    ${ }^{1}$ Structures of five or more units.
    Note.-Based on data from same source as for "Mortgage Debt Outstanding" table.

[^25]:    ${ }^{1}$ Secured or unsecured loans maturing in 1 year or less.
    ${ }^{2}$ Secured loans, amortized quarterly, having maturities of more than 1 year but not more than 10 years.

    Note.-Federal Home Loan Bank Board data.

[^26]:    Note.-Government National Mortgage Assn. data. Data prior to Sept. 1968 relate to Special Assistance and Management and Liquidating portfolios of former FNMA and include mortgages subject to participation pool of Government Mortgage Liquidation Trust, but exclude conventional mortgage loans acquired by former FNMA from the RFC Mortgage Co., the Defense Homes Corp., the Public Housing Admin., and Community Facilities Admin.

[^27]:    ${ }^{1}$ Finance companies consist of those institutions formerly classified as sales finance, consumer finance, and other finance companies. Miscellaneous lenders include savings and loan associations and mutual savings banks.

[^28]:    ${ }^{1}$ Includes adjustments for differences in trading days.
    ${ }^{2}$ Net changes in credit outstanding are equal to extensions less repayments.

[^29]:    1 Includes adjustments for differences in trading days.
    2 Net changes in credit outstanding are equal to extensions less repayments, except in certain months when data for extensions and repayments have been adjusted to eliminate duplication resulting from large transfers of paper. In those months the differences between extensions and repayments for some particular holders do not equal the changes in

[^30]:    Note.-Bureau of Labor Statistics; data include all full- and partime employees who worked during, or received pay for, the pay period that includes the 12 th of the month. Proprietors, self-employed

[^31]:    ${ }^{1}$ Data adjusted to 1971 benchmark.

[^32]:    Note.-Dept. of Commerce estimates. Monthly data are seasonally
    adjusted totals at annual rates. See also Note to table opposite.

[^33]:    1 Capital outlays are totals for residential and nonresidential fixed capital, net change in inventories, and consumer durables, except outlays by financial business.
    ${ }^{2}$ Capital consumption includes amounts for consumer durables and excludes financial business capital consumption.
    ${ }^{3}$ Excess of net investment over net funds raised.
    Note.-Capital outlays and capital consumption allowances reflect 1969-72 revisions published in the July 1972 issue of Survey of Current Business.
    Funds raised by type and sector. Credit flows included here are the
    net amounts raised by households, nonfinancial business, governments, and foreigners. All funds raised by financial sectors are excluded. U.S. Government budget issues (line 4) are loan participation certificates issued by CCC, Export-Import Bank, FNMA, and GNMA, together with security issues by FHA, Export-Import Bank, and TVA. Issues by federally sponsored credit agencies are excluded as borrowing by financial institusponsored cresit agencies are excluded as borrowing by financial institutions. Such issues are in U.S. Government securities on p. A-73, line 11.
    Corporate share issues are net cash issues by nonfinancial and foreign corporations. Mortgages exclude loans in process. Open market paper is commercial paper issued by nonfinancial corporations plus bankers' acceptances.

[^34]:    For notes see opposite page.

[^35]:    ${ }^{1}$ Excludes central banks, which are included with "Official institutions."

[^36]:    ${ }^{1}$ Includes bonds issued in 1964 to the Government of Canada in connection with transactions under the Columbia River treaty. Amounts outstanding end of 1967 through Oct. 1968, \$114 million; Nov, 1968 through Sept. 1969, $\$ 84$ million; Oct. 1969 through Sept. 1970, $\$ 54$ million; and Oct. 1970 through Oct. 1971, $\$ 24$ million.
    2 Notes issued to the Government of Italy in connection with mili-
    tary purchases in the United States.
    3

[^37]:    Note.-Short-term claims are principally the following items payable on demand or with a contractual maturity of not more than 1 year: loans made to, and acceptances made for, foreigners; drafts drawn against

[^38]:    their own account or for account of their customers in the United States; and foreign currency balances held abroad by banks and bankers and their customers in the Unit

[^39]:    ${ }^{1}$ Excludes central banks, which are included with "Official institutions."

[^40]:    1 Total assets and total liabilities payable in U.S. dollars amounted to $\$ 10,455$ million and $\$ 10,679$ million, respectively, on Aug. 31, 1972.

    Note.-Components may not add to totals due to rounding.

[^41]:    Note--Excludes deposits and U.S. Govt. securities held for international and regional organizations. Ear marked gold is gold held for foreign and international accounts and is not included in the gold stock of the United States.

[^42]:    1 Negotiable and other readily transferable foreign obligations payable on demand or having a contractual maturity of not more than 1 year from the date on which the obligation was incurred by the foreigner.
    2 Data on the two lines for this date differ because of changes in reporting coverage. Figures on the first line are comparable in coverage with those shown for the preceding date; figures on the second line are comparable with those shown for the following date.

    Note.-Data represent the liquid assets abroad of large nonbanking concerns in the United States. They are a portion of the total claims on foreigners reported by nonbanking concerns in the United States and are included in the figures shown in Tables 26 and 27.

[^43]:    ${ }^{1}$ Tabulation is based on the "principal" SIC activities reported for nonbank subsidiaries. It includes each nonbank subsidiary of a holding company regardless of how many subsidiaries are reported in the same principal two-digit group. Inactive subsidiaries are excluded. There are 18 nonbank subsidiaries for which either the principal SIC activities or the nonbank subsidiaries for which either the principal SIC activities or the
    date of acquisition or formation was not provided. These data should be date of acquisition or formation was not provided. These data should be
    interpreted with caution because the number of entries into the various activities for each time period reflect only those nonbank subsidiaries that

[^44]:    *On leave of absence.
