BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM, WASHINGTON, D.C.

PUBLICATIONS COMMITTEE

Joseph R. Coyne, *Chairman* □ Michael Bradfield □ S. David Frost □ Griffith L. Garwood □ Donald L. Kohn □ Michael J. Prell □ Edwin M. Truman

The FEDERAL RESERVE BULLETIN is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. It is assisted by the Economic Editing Section headed by Mendelle T. Berenson, the Graphic Communications Section under the direction of Peter G. Thomas, and Publications Services supervised by Linda C. Kyles.

Table of Contents

893 HOUSING AND MORTGAGE MARKETS: THE POST-1982 EXPANSION

This article examines factors behind the boom in housing construction that followed the 1980–82 recession and considers the near-term outlook for the housing market.

904 INDUSTRIAL PRODUCTION

Industrial production increased an estimated 0.2 percent in September.

907 STATEMENTS TO CONGRESS

Alan Greenspan, Chairman, Board of Governors, explores the structure of the financial services industry, with an emphasis on the regulatory framework that applies to banking and securities activities, and says that the Board hopes to be in a position to advise the Congress on how best to implement the changes that are urgently needed to assure that the financial system continues to serve public policy goals, before the Subcommittee on Telecommunications and Finance of the House Committee on Energy and Commerce, October 5, 1987.

- 910 Martha R. Seger, Member, Board of Governors, discusses home equity lines of credit and H.R. 3011, a proposed bill to amend the Truth in Lending Act to require creditors to provide consumers with more information about home equity programs in advertisements and in initial account disclosure statements, before the Subcommittee on Consumer Affairs and Coinage of the House Committee on Banking, Finance and Urban Affairs, October 6, 1987.
- 913 Wayne D. Angell, Member, Board of Governors, reviews the functioning and effectiveness of the small business and agricultural Advisory Councils to the Federal

Reserve Banks and says that the Advisory Councils have become a valuable part of the informal structure of the Federal Reserve System, before the Subcommittee on Domestic Monetary Policy of the House Committee on Banking, Finance and Urban Affairs and the Subcommittee on Procurement, Innovation, and Minority Enterprise Development of the House Committee on Small Business, October 30, 1987.

914 ANNOUNCEMENTS

Announcement by Chairman Greenspan on the availability of liquidity to the financial system.

Revised list of OTC stocks subject to margin regulations now available.

Publication of Annual Statistical Digest, 1986.

List of "Bank Holding Companies and Subsidiary Banks as of December 31, 1986," now available.

Changes in Board staff.

Admission of six state banks to membership in the Federal Reserve System.

919 LEGAL DEVELOPMENTS

Various bank holding company, bank service corporation, and bank merger orders; and pending cases.

Housing and Mortgage Markets: The Post-1982 Expansion

Stuart A. Gabriel, of the Board's Division of Research and Statistics, wrote this article. Mark T. Cammarota and James P. Rothberg provided research assistance.

Housing construction rebounded strongly in the years following the 1980-82 recession. A confluence of positive movements in a wide range of economic and demographic factors fueled the boom in construction. Interest rates on conventional fixed-rate mortgages declined from their 1981 high of more than 18 percent to a nine-year low of about half that amount in early 1987. Lower mortgage rates and higher household income made housing more affordable, releasing demand pent up from previous years. Changes in tax laws, enacted in 1981, also stimulated the construction of housing, particularly of rental units. A rise in household formations similarly boosted construction activity. Early years of the recovery were further marked by the robust economic expansion and increases in construction in growing Sunbelt areas.

Moreover, new financial instruments for homebuyers and investors aided the surge in housing activity. New lending instruments in the market—especially adjustable-rate mortgages (ARMs), which were offered at initial interest rates well below those of their fixed-rate counterparts—helped make housing more affordable. Also, lenders in the primary market, including thrift institutions, increasingly sold new mortgages in the secondary market; the "securitization" of many of these loans in the form of both standard pass-throughs and new derivative securities has accelerated in recent years. By broadening the base of mortgage finance, securitization helped reduce housing's vulnerability to nonprice credit rationing.

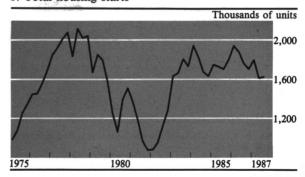

Under the influence of these developments, the pace of housing starts quickened from 1.1 million units per year in the 1981–82 period to almost 1.75 million units during 1983–86 (chart 1). The average annual rate of new-home sales during 1983–86 jumped 60 percent from the relatively low 1981–82 rate; resales of existing homes advanced by about 40 percent. By mid-1987, however, some determinants of housing construction, especially fixed-rate mortgage interest rates, took a turn for the worse, causing perceptible contraction in housing activity and raising concern about prospects for the housing market.

HOUSING AFFORDABILITY

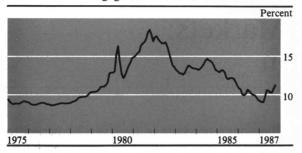

The cost of homeownership strongly influences the demand for housing. Indexes of housing affordability measure costs of homeownership as a percentage of average household disposable income. One index uses mortgage payments on a standard-quality new home as a proxy for costs; the loan amount is 80 percent of the home's value. Another, more comprehensive index adds operating and transactions expenses, tax effects, and expected appreciation to its measure of homeownership costs.

By early 1987, mortgage interest rates had declined precipitously (chart 2), house prices had

1. Total housing starts

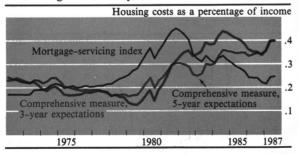

Contract interest rate on conventional fixed-rate mortgage commitments

risen only moderately, and household income had strengthened from levels of the 1980-82 recession. As a result, mortgage costs for a standard-quality new home, which had reached as high as 45 percent of mean household disposable income during the early 1980s, fell off sharply, to about 20 percent of household income in early 1987 (chart 3). The post-recession resurgence in housing demand was due largely to sharp improvements in this measure of housing affordability. Although the mortgage burden rose markedly in mid-1987 because of runups in mortgage interest rates, it remained moderate relative to its levels of the previous 10 years.

The trend of the more comprehensive index of housing affordability during the post-1983 period was similar to that of the mortgage-servicing index. However, the comprehensive index remained higher than the mortgage-servicing index during the post-recession period and high relative to the late 1970s, largely because of reduced price appreciation and higher real interest rates. Lower expected appreciation in home prices reduces housing affordability as measured by the comprehensive index. In the calculation of the

3. Housing affordability¹

 See text for description of indexes. Income is average household disposable income.

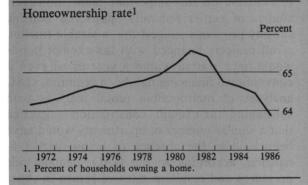

comprehensive index, expected capital gains are represented by changes in the price of the average quality-adjusted home. In one version of the index, the price changes cover the preceding three years; in another, the preceding five years. Expectations about longer-term appreciation are relevant to homebuyers, who typically expect to stay for several years. If price expectations are based on experience, homeownership may have been perceived to be substantially more affordable during the late 1970s and early 1980s than the mortgage-servicing burden suggested. Likewise, moderated gains in housing prices during the later 1980s relative to the earlier period tended to keep the comprehensive measure high, while the mortgage-servicing burden showed a marked drop.

Many series on housing prices are available for use in constructing indexes of housing affordability. The Census Bureau publishes a quality-adjusted series of new home prices, which was used in the above analysis. The quality-adjusted price series measures variations in the price of new homes, taking account of basic features (floor area, number of bathrooms, presence of air conditioning, and so on). The regional distribution of home sales used in calculating the quality-adjusted index is that of the base year, 1982.

Inflation of housing prices as measured by the adjusted series has diverged sharply from that in the unadjusted series in recent years; average prices of new homes have been rising much more quickly than the prices of constant-quality homes. This divergence stems in part from improvements in the size and attributes of new homes relative to their 1982 counterparts. The average living area of new homes increased 12 percent, to 1,864 square feet, between 1982 and mid-1987; lot size rose from 11,554 to 13,061 square feet. Furthermore, new homes sold in mid-1987 were significantly more likely to include such amenities as a fireplace, basement, garage, and more than two bathrooms. Such improvements are to be expected given the increases in household income and wealth since the relatively depressed base year; they also reflect the greater proportion of older, more affluent repeat buyers among those purchasing new homes. According to surveys by the Na-

WHY HAS THE HOMEOWNERSHIP RATE DECLINED?

The homeownership rate among American families rose steadily in the decades after World War II. By the 1970s, more than 6 of every 10 families owned a home. During the 1980s, however, the homeownership rate contracted by about 2 percentage points (see chart).

As indicated in the accompanying table, ownership rates rise appreciably with age. Advancing age is often accompanied by growth in income, at least through middle age, sufficient to make a home more affordable; established, older households move less often than younger families and are therefore also more likely to buy a home.

Homeownership rates in the 1980s declined primarily among households headed

someone under age 40—a falloff of about 5 percentage points between 1981 and 1987. In that period, the cost of owning—as measured by the indexes discussed in the text-rose significantly relative to the residential rent component of the consumer price index, especially during the cyclical downturn of the early 1980s. Younger people as a group are the most sensitive to the relative costs of owning and renting: older households typically have already purchased homes and do not respond to the higher costs of owning—as measured by the indexes discussed in the text—by changing to renter status. A report from the Joint Center for Housing Studies estimates that about 800,000 prospective first-time homebuyers delayed the purchase of a home during 1979-83 because of the relatively high costs of owneroccupancy.

tional Association of Home Builders, the proportion of first-time homebuyers among all newhome buyers declined from about 40 percent in 1984 to about 36 percent in the first quarter of 1987. In addition, the substantial increase in the share of homes built in high-priced metropolitan areas and in California has boosted the pace of housing price inflation as measured by the unadjusted series of new-home prices. This divergence arises because the quality-adjusted index of new-home prices weights the weak rates of price inflation in "oil-patch" states more strongly than the unadjusted series does and weights the housing price advances in California and elsewhere more weakly.

Changes in unadjusted values of new or existing homes imply levels of housing affordability lower than do changes in the quality-adjusted series; however, most indexes point to improved affordability from 1983 through early 1987, largely because of the downtrend in interest rates. Although declines in the mortgageservicing burden figured heavily in the postrecession resurgence in housing demand, those effects were partially offset by the relatively high levels of comprehensive homeownership costs. Housing affordability on all indexes deteriorated in the wake of the interest rate increases of mid-1987, causing housing activity to fall somewhat.

TAX CHANGES

The 1981 Economic Recovery Tax Act (ERTA), which dramatically altered many features of the federal tax system, stimulated housing construction. The act made major changes in the treatment of rental housing: it reduced the taxation of capital gains, accelerated depreciation writeoffs, and provided incentives for the expanded use of real estate tax shelters that allow individuals to shelter earned income with "passive" real estate losses. These changes substantially increased investor returns on rental housing. In the wake of those tax provisions and the other positive developments for housing already recited, the pace of multifamily housing starts rose by about twothirds, from 378,000 units in 1981 to 635,000 units in 1983. Within that sector, the biggest increase was in the construction of rental units rather than of condominiums.

Other effects of the tax bill, especially the rapid expansion in real estate limited partnerships, also may have indirectly contributed to the acceleration of multifamily housing construction. Large public syndications—those with 30 or more limited partners—became much more popular after the passage of ERTA. During 1984–85, equity funds raised through public and private syndications reached about \$20 billion. Combined with mortgage borrowing, this sum would have financed almost all the considerable rental housing construction of that period. However, much of the partnership money either funded nonresidential construction or was invested in existing residential structures. Tax-driven syndications may have stimulated new construction indirectly by bidding up the prices of existing structures and improving the profitability of new multifamily projects.

Tax-exempt mortgage revenue bonds, issued by state and local governments, also contributed to the surge in multifamily housing construction during the post-recession period. A 1980 amendment to the Internal Revenue Code directed the use of this instrument for providing housing to lower- and middle-income individuals. The annual issuance of such bonds, only \$1 billion in 1980-81, subsequently rose to \$5 billion in 1982 and skyrocketed to \$20 billion in 1985. The General Accounting Office (GAO) estimated that

approximately 200,000 new housing units were constructed with the proceeds of tax-exempt mortgage revenue bonds issued in 1983 and 1984, about one-quarter of all multifamily rental construction during that period.

Although a vast number of multifamily units were built with tax-exempt financing, a large portion of the construction might have been financed conventionally if the tax-exempt instruments had not been available. No direct evidence is available on this important point; however, studies of earlier federally sponsored housing subsidy programs suggest that a sizable fraction of all projects financed with tax-exempt bonds would have started within a year or so even if conventional financing had been required. GAO analyses of metropolitan rental markets with substantial tax-exempt construction suggested that a similar number of apartments would have been built in the absence of below-market financing; according to the GAO, demand-side pressures and resultant rates of return in those areas likely would have prompted large increases in conventionally financed construction.

The Tax Reform Act of 1986 likely has strong implications for residential construction. The major real estate features of the Tax Reform Act reversed the provisions in ERTA regarding multifamily construction; it raised the tax on capital gains, and it restricted individual sheltering of earned and "portfolio" income with losses arising from passive investments. The 1986 act further diminished depreciation writeoffs, which had already been scaled back by legislation passed in 1982 and 1984.

The reduction in investor tax benefits from the 1986 act, combined with the relatively low level of rents in many local markets, reduces the rate of return on investment in rental housing below that considered adequate for new construction. The tax reform provisions therefore imply some reduction in the pace of multifamily construction. Such a decline would be expected, in time, to boost rents sufficiently to offset the loss of tax benefits. The controversy that surrounds the tax status of the marginal rental housing investor makes uncertain the rent increase necessary to reallocate resources into rental housing, but most studies suggest the increase is likely to be substantial.

HOUSING DEMOGRAPHICS

A recovery in the rate of household formations has supported the post-1982 housing expansion. The number of new households plunged to a 30-year low of 400,000 in the year ended in March 1983; but formations rebounded to reach an average annual rate of more than 1.5 million during the ensuing three years, a pace close to the annual readings of 1975-79. The rate of household formations fell to 1 million during the year ended in March 1987, with the drop concentrated among households whose head is under the age of 25. The coming of age of the "baby bust" generation suggests that net household formations likely will remain below 1.5 million units per year, on average, through the remainder of the decade. This factor should significantly restrain housing demand because, historically, a large majority of newly constructed housing units have been built to accommodate, directly or indirectly, additional households.

Total household formations reflect age-specific living arrangements plus marriage and divorce rates, all of which vary with economic conditions and social change. The post-1983 rise in household formations undoubtedly was associated with the improvement in employment opportunities as well as with the greater affordability of homes.

A 9 percent decline between 1980 and 1987 in the number of young adults (ages 14 to 24) served to damp the pace of household growth. Furthermore, despite some recent increase, the current proportion of young adults who are household heads—13.8 percent in 1987—remains somewhat below its 1980 value. The propensity of young adults to cluster in households of unrelated individuals did not increase sufficiently to account for this decline in their headship rate. Instead, the decline stemmed from a significant rise in the tendency of young adults to remain in the parental home. The percentage of individuals 18-24 years old living with their parents increased to almost 54 percent in 1987 from about 48 percent in 1980.

Analysts point to a number of economic and social factors to explain this contraction in young-adult households. According to the report of consumer income by the Census Bureau, the

population aged 15 to 24 was the only age group whose real median household income declined between 1980 and 1986, from \$16,900 to \$15,300, or 9.5 percent. Further, the increase in the inclination of young adults to remain at home may result from changing social attitudes as well as an easing of the "sibling squeeze"—the presence of fewer younger siblings in the parental home, which reduces the pressure to move away. Availability of space in the parental home perhaps interacted with economic constraints in slowing household formation by young adults.

In contrast, the growth of households has been relatively robust among "baby boom" age groups; between 1980 and 1987 the number of new households increased 11 percent in the 25–34 age group and 34 percent in the 35–44 age group. The headship rate among the baby boomers in this period remained stable or declined; the growth in households, many of them nonfamily households, derived entirely from the growth in the population of these groups.

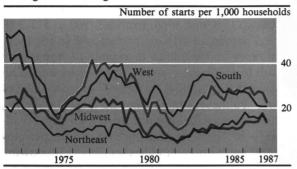

For the remainder of the decade, the number of households in the 15-24 age group is expected to decline further, while household formations among those aged 25-54 should be maintained through continued growth in their population.

REGIONAL ECONOMIC GROWTH AND HOUSING CONSTRUCTION

The early years of the post-1982 housing expansion reflected a strong cyclical recovery in the South and West, coupled with a moderate trending up in the pace of construction in the other regions. Since 1985, however, housing demand has weakened in oil-patch states, while the housing markets in many metropolitan areas of the Northeast have been booming. This shifting of economic growth to higher-cost areas should work to slow the aggregate pace of housing construction.

The high level of production achieved in 1983 has generally been sustained in the West but not in the oil-patch markets of the South (chart 4). Although the South's share of total construction activity continues to exceed that of other regions, it has declined from 50 percent in 1982–83 to about 39 percent in mid-1987. In contrast, the

4. Regional housing starts

Northeast's share in that period has risen from 11 percent to 17 percent.

During the first half of the 1980s, many house-holds migrated from the Northeast and North Central regions to the South and West, as they had since the 1970s, thereby giving a strong push to housing demand in the Sunbelt. Those house-holds were drawn by, and contributed to, the expanding Sunbelt economy: growth in nonagricultural employment in major census divisions of the South and West far exceeded that of their counterparts in the Northeast and North Central regions (table 1). Expanding areas of the Sunbelt typically lacked the housing demanded by the growing population but had abundant and relatively inexpensive land, whose development was limited by few regulatory constraints.

Economic growth has slowed in some Sunbelt markets. The surge in multifamily construction earlier in the decade, together with weak demand for multifamily units, has produced record-high rates of rental vacancy in the South, rates far higher than those in other regions. Weakness in the oil-patch economy dragged down nationwide

Source. Bureau of Labor Statistics.

new-home sales during mid-1986. One-third of the national rise in existing home sales in the third quarter of 1986 derived from the wave of distress sales and emigration that swept over Texas, Oklahoma, Louisiana, and Arkansas.

In contrast, housing demand and construction have remained strong in the Northeast, where economic restructuring and diversification have substantially improved employment and income. By mid-decade, New England had become the most affluent of the Census divisions, with per capita personal income in 1986 at 117 percent of the national average. The vacancy rate for rental housing in the Northeast has remained low, at 4 percent (chart 5); and prices of existing homes have risen by two to three times the national average during the recent period. Housing starts in the Northeast rose 20 percent in 1984 and again in 1985, while starts in the rest of the country remained virtually unchanged.

Housing affordability as measured by the mortgage-servicing and comprehensive indexes exhibits regional variation consistent with underlying regional economic trends. Affordability according to the mortgage-servicing measure rose in all areas during the mid-1980s and fell somewhat in all areas during the 1987 runup in mortgage interest rates. Housing prices in the Northeast have escalated sharply in recent years under the twin pressures of rising demand and constraints on supply. Local land-use ordinances restrict development in many metropolitan areas of the Northeast and West; research suggests such policies may add appreciably to the price of a standard dwelling. The recently heightened inflation of home prices in the Northeast improves affordability under the comprehensive index because of higher expected capital gains; but it worsens affordability under the mortgage-

5. Rental vacancy rates

burden index because of the significant rise in mortgage-servicing costs. Typical Northeast households that purchased homes in late 1987 allocated more than one-third of monthly income to mortgage expenses on a standard-quality new home; housing affordability according to the mortgage-burden index fell considerably below that of other regions.

DEVELOPMENTS IN MORTGAGE MARKETS

The rate of growth of mortgage debt on residential properties rose strongly following the 1980-82 slump, moving from 4.8 percent in 1982 to 14 percent in 1986, a rate among the most rapid of the past three decades.

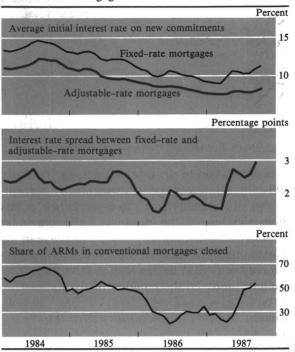

While the post-recession expansion in housing activity stimulated the demand for mortgage credit, other factors helped to enhance the availability of mortgage funds to homebuyers. The secondary mortgage market continued to develop, introducing a variety of innovations in mortgage securitization. Also, the proliferation of adjustable-rate mortgages allowed homebuyers greater access to credit. Mortgages with periodic rate adjustments were not widely available before the 1980s; in the wake of the runup in mortgage interest rates during the early eighties, ARMs became an important choice on mortgage menus nationwide.

ARMS

Adjustable-rate home mortgages grew from only a small share of originations before the cyclical downturn to almost two-thirds of all conventional purchase loans closed in mid-1984 (chart 6). The share trended down during subsequent years to reach about one-fifth of the total in early 1987, but then expanded in subsequent months, supporting housing demand despite the increased costs of fixed-rate mortgage credit.

Both the level of fixed-rate mortgage interest rates and the interest rate differential between fixed- and adjustable-rate credit appear to be important factors affecting the market share of ARMs. The spread between the rate on fixed-rate financing and the initial rate offered with ARMs has varied widely since late 1985 (chart 6). The

6. Comparison of adjustable-rate and fixed-rate mortgages

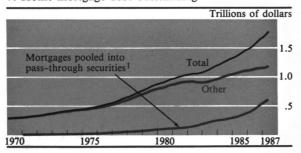

sharp runup in the costs of fixed-rate mortgage credit in 1987 doubled the spread to a record 300 basis points and resulted in a substantial increase in ARM market share.

Adjustable-rate mortgages have proven attractive to both borrowers and lenders. The lower initial interest rate on ARMs (chart 6) enables more buyers to qualify for purchase of a particular home, hence increasing the effective demand for housing. Because most borrowers are qualified on the basis of initial monthly payments, ARMs likely support housing demand during periods of high or rising rates on fixed-rate mortgages. Homebuyers expecting some decline in rates also are attracted to ARMs, which pass declines to borrowers without costly refinancing. Further, ARMs likely are attractive to homebuyers with short expected durations of residence, given the low initial ARM interest rate relative to fixed-rate loans. Lenders, especially thrift institutions, favor ARMs as a means of increasing their holdings of rate-sensitive instruments.

ARM features have become increasingly standardized. The dominant form to have emerged

7. Home mortgage debt outstanding

1. GNMA, FHLMC, and FNMA pass-throughs only.

sets indexation to the rate on one-year Treasury bills, limits interest rate adjustments to 2 percentage points annually and 5 to 6 percentage points over the life of the mortgage, and precludes negative amortization (that is, an increase in the outstanding principal on the loan). Standardization of both ARM design and underwriting criteria has improved the liquidity of ARMs.

Expansion of the Secondary Market

Developments in the secondary mortgage market have broadened the supply of mortgage credit to homebuyers while linking the mortgage market more closely to capital markets. Since 1982, 60 percent of the growth of home mortgage debt has been in the form of pass-through securities, which represent undivided ownership interests in a pool of mortgages (table 2). The trend toward securitization has become especially pronounced in recent years: since the beginning of 1986, four-fifths of the growth in home mortgage debt outstanding has been in the form of pass-through securities (chart 7).

Investors value these securities in part because the return of principal and interest on the collateral is usually guaranteed by a federal agency, the Government National Mortgage Association, or a federally chartered private entity, either the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation. Potential investors who otherwise would be forced to evaluate separately the quality of individual mortgage loans can buy standardized securities with little if any risk of default and with a diversified risk of prepayment. As a result, the expanded issuance of pass-through securities has attracted a variety of nontraditional investors to the mortgage market and facilitated the provision of credit to the housing sector.

In addition to broadening the investor base, the maturation of the secondary market has reduced the risk to mortgage originators by providing a reliable market for their product. At a certain cost, lenders can negotiate forward commitments to sell their loans, thereby shifting to secondary market dealers the risk that an upturn in interest rates will reduce the value of mortgages during the interval between lock-in of the borrower's rate and loan delivery.

During the 1970s, the leading traditional portfolio lenders—thrift institutions—made little use of the secondary market; they largely originated and retained fixed-rate loans, which were funded out of short-term retail deposits. Early in this decade, however, higher interest rates raised the cost of loanable funds above the return on holdings of long-term, fixed-rate mortgage loans. In the wake of those changing financial conditions, thrift institutions suffered large losses, prompting them to increase the rate sensitivity of their portfolios. After legislative and regulatory changes, thrift institutions increasingly marketed adjustable-rate mortgages. Further, they turned to the secondary market, selling off seasoned fixed-rate loans so as to shorten the maturities of their assets. Thrift institutions also securitized their holdings of fixed-rate mortgages through swap transactions with FHLMC and FNMA. Mortgage-backed securities provide thrift institutions with relatively liquid holdings that may be used as collateral for borrowing. Borrowers increasingly sought fixed-rate loans as rates trended down during 1985 and 1986; in contrast

8. Mortgage activity at FSLIC-insured thrift institutions¹

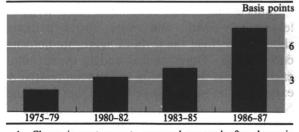

1. The data for 1970-82 are annual averages; for 1987, Jan.-Aug. at seasonally adjusted annual rates.

to earlier years, and largely because of the prevalence of fixed-rate lending, thrift institutions during this period sold most of their mortgage originations in the secondary market (chart 8).

The increase in the tendency of thrift institutions to emphasize mortgage banking functions originating loans and selling them into the secondary market-reduced the risk these institutions faced earlier when holding fixed-rate mortgages; but this change in behavior also worked to diminish the insulation of primary market rates from fluctuations in the overall capital market. Indeed, statistical tests indicate that in recent years conventional fixed-rate mortgage rates have responded more fully and more quickly to movements in the yield on Treasury securities of comparable maturity. During the mid- to late 1970s, only 20 percent of a change in 10-year Treasury yields was mirrored in mortgage rate movements within a week (chart 9). Short-term responsiveness increased nearly threefold by 1986-87, when nearly 80 percent of any change

Average change in mortgage rates per 10-basis-point change in yield on 10-year Treasury securities¹

1. Change in mortgage rate measured one week after change in Treasury yield. Mortgage and Treasury rates are one-week averages. Mortgage rate is the commitment rate on conventional fixed-rate home loans.

in Treasury yields was reflected in mortgage rates within a week.

Derivative Mortgage Securities

Another development in the secondary mortgage market has been the introduction of a new breed of instruments, collectively known as derivative mortgage securities. These securities restructure the cash flow from the underlying pool of mortgages and are typically backed by pass-through securities guaranteed by a federally related institution. Derivative mortgage securities are designed to exploit the varying risk-return requirements of market participants and in certain cases reduce the exposure of some investors to mortgage prepayment. The issuance of derivative securities has grown rapidly in recent years—the volume for the first nine months of 1987 was \$62 billion—but remains substantially less than that of traditional mortgage pass-through securities. Opinion remains divided on the effects of derivative securities on primary market rates. Their issuance may improve the marketability of mortgages in the secondary market, thereby broadening the base of investors and possibly exerting some downward pressure on mortgage rates; but otherwise they lack substantive benefits to mortgage borrowers. Alternatively, finely tailored derivative securities may provide arbitrage profits to a small number of issuers.

Recent innovations in mortgage securities include the multiclass pay-through bond, known as the collateralized mortgage obligation or CMO. The multiclass nature of the CMO means that schedules for the repayment of principal vary for each class of bond, so that anticipated maturities differ. CMOs may attract investors who limit their purchases to certain maturities and who thus otherwise might ignore mortgage investments. Particular CMO classes attempt to minimize the variability of cash flows associated with prepayment options. This lessened investment risk could translate into lower rates in the primary market, but the statistical analyses undertaken to date typically fail to show such an effect.

Other innovations in mortgage-backed securities include so-called stripped securities, or "strips," and senior/subordinated securities. Strips allow the issuer to allocate principal and

interest payments from the underlying mortgage pool separately or in any combination. Investors can then purchase that part of the mortgage cash flow they most desire. Strips vary considerably in their composition and performance. This instrument, introduced in 1986, may further broaden the attractiveness of derivative mortgage securities to a range of potential investors; however, the relatively small magnitude of issuance to date suggests this innovation has yet to affect rates in the primary market. Senior/subordinated securities are structured to represent senior and subordinated interests in the underlying mortgage assets; risk and hence yield on the subordinated interest will exceed that of the senior interest, thereby promoting development of a high-yield component in the mortgage securities market.

Derivative securities should become more popular because of the 1986 Tax Reform Act. In an effort to establish greater uniformity and certainty in the taxation and trading of mortgagebacked securities, the tax act authorized a new vehicle for issuing those securities, known as the real estate mortgage investment conduit (REMIC). A REMIC is a tax-advantaged entity that holds mortgage assets and issues multiclass mortgage-backed securities. The sponsor of a REMIC has almost unlimited flexibility in structuring its legal and financial form. This flexibility will likely result in wider range and larger volume of mortgage securities and may further broaden the investor base of the housing finance system.

OUTLOOK

Housing activity has diminished since early this year, in part because of the runup in mortgage interest rates. Rates on conventional fixed-rate mortgage loans, at a low of about 9 percent early in the year, rose to well above 11 percent by September. Total housing starts declined sharply during this period; for 1987, the annual pace of housing construction will fall substantially below the robust average of 1.75 million units during the 1983–86 period.

Uncertainty about several variables cloud the outlook for housing affordability. The reduction

in marginal income tax rates resulting from the 1986 tax law lowers the value of the deduction for homeowner mortgage interest and hence reduces housing affordability. However, the reduction in marginal tax rates also tends to boost household disposable income, some of which may be spent on housing. Further, some increase in the demand for real estate stemming from elimination of other tax shelters suggests improved capital gains in housing, which should favorably affect the comprehensive measure of homeownership costs. The net result of these direct and indirect effects remains to be seen.

The continuing decline in formations of young-adult households suggests weakness in the demand for rental apartments. Middle-aged and more-affluent baby boomers should swell the number of buyers who are trading up to better new and existing single-family homes; nonfamily households in this age group will also likely have earnings appropriate for the purchase of such units. Rates of homeownership among baby-boom households should rise and yield a moderate improvement in the overall homeownership index.

In the market for multifamily housing, construction has weakened considerably since the spring of 1986, when the anticipated tax law became binding for newly started projects. By mid-1987, multifamily starts had fallen to about two-thirds of their average post-recession pace. Tax reform was not the only factor impinging on construction in this market, however; recordhigh rates of vacancy in selected local markets also lowered the improvement rate of return on investment in multifamily units. Except for some improvement in those few metropolitan areas with tight housing markets, the pace of starts for multifamily rental units may remain low for some time to come.

Shifts in the location of construction activity to less supply-elastic and more costly markets should also affect the level of aggregate housing construction. Other things equal, those influences suggest that housing will remain relatively expensive on a mortgage-burden basis in the Northeast and West; in turn, the national pace of construction will likely be damped.

Turning to mortgage markets, substantial amounts of mortgage capital have been raised

from individuals and institutions that do not originate mortgage loans but instead are attracted by the yield, liquidity, and diversification of mortgage securities. Recent innovations in derivative securities indicate that the variety of such instruments will increase to meet the demands of different investors; those developments suggest increased efficiency and competitiveness in secondary market operations. This further integration of mortgage and capital markets points to the

continued availability of funds for home mortgages but allows fluctuations in capital costs to be passed along more quickly to the interestsensitive housing sector.

Finally, adjustable-rate mortgages, with their lower initial rates, should continue to be attractive to both borrowers and lenders and to provide support for housing activity during periods of high or increasing interest rates.

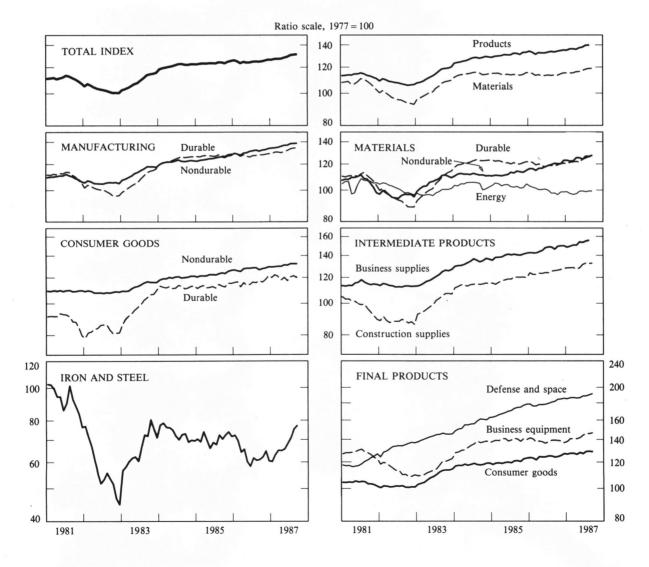

Industrial Production

Released for publication October 16

Industrial production increased 0.2 percent in September following gains of 0.3 and 1.1 percent in August and July respectively. In September, there were continued gains in equipment production, but output of consumer goods fell slightly, and the production of materials changed little. At 131.2 percent of the 1977 average, the total index

in September was 5.4 percent higher than it was a year earlier. Output in the third quarter was about 2 percent higher than it was in the second quarter of 1987.

In market groups among consumer goods, the production of automotive goods dropped 2½ percent. All of the decline was in truck production as autos were assembled at an annual rate of 6.1 million units—close to the low rate of 6.0

million in August. Output of goods for the home eased in September, following strong gains in July and August, bringing the cumulative advance during the past year to almost 7 percent. Total business equipment posted a moderate rise in September. For the third quarter as a whole, production was up 2.5 percent, with particular strength in manufacturing equipment, especially metalworking and general industrial equipment. Output of supplies for construction and business was maintained at high levels during September. Materials production edged up in September. There was a 0.6 percent gain in nondurables, but this gain was largely offset by a slight decrease in durables and no change in energy materials.

In industry groups, total manufacturing output increased fractionally with another sizable in-

crease in primary metals, particularly steel. However, overall motor vehicle production was reduced and in many other industries production was little changed. Mining output rose 0.8 percent but utility production was about unchanged.

Revision of the Indexes

As part of the Federal Reserve's ongoing review of its statistical series, the indexes of industrial production have been revised, beginning with January 1985.

Revision of the Indexes for 1985 and 1986. The revision of the indexes for 1985 and 1986 affects the series primarily through the incorporation of information now available at the time the indexes were originally estimated. In the present revision, unlike the 1985 general revision, no major modifications were introduced; in particular, the reference year, the weights, and the groupings of the index have remained unchanged. The present revision, in addition to the incorporation of data previously not available, reflects the updating of the seasonal adjustment factors for the entire index (including its groupings and the basic series); these are now calculated with the use of

data through December 1986. The production adjustment factors applied to the indexes were updated as well.

The revised data indicate that the growth in the total index of industrial production is essentially the same as previously estimated: a rise of 1.9 percent in 1985 (instead of 2.0 percent), and an increase of 1.1 percent during 1986 (instead of 1.0 percent). The level of the total index in December 1986 was revised upward slightly. However, indexes for several industry and market groups showed significant, but offsetting, revisions. Over the 1985 and 1986 periods, the most notable upward revisions in the market categories occurred in equipment and construction supplies. The largest downward revisions were in home goods and textile materials. Among the major

industry groups, less growth in nondurable manufacturing was countered by an increase in durables.

Revision of 1987 Indexes. The revisions of the data between January and August 1987 reflect in part the revisions undertaken for 1985 and 1986 as well as the receipt of new information for 1987. Like the revisions for 1985 and 1986, the revisions for the first eight months of 1987 indicate, on balance, about the same rate of growth in industrial activity as estimated previously. The overall level of industrial output for August 1987—at 131.0 percent of the 1977 average—was slightly higher than the figure published earlier (130.7).

Statements to Congress

Statement by Alan Greenspan, Chairman, Board of Governors of the Federal Reserve System, before the Subcommittee on Telecommunications and Finance of the Committee on Energy and Commerce, U.S. House of Representatives, October 5, 1987.

I welcome this opportunity to appear before the Subcommittee on Telecommunications and Finance to explore the structure of the financial services industry with an emphasis on the regulatory framework that applies to banking and securities activities. I want to express my appreciation to you for calling this hearing and for focusing the attention of the Congress and this committee on the important issue of the basic rules that should apply to the financial services industries.

Mr. Chairman, in a speech that you made recently in San Francisco, you expressed increasing unease that the financial system has evolved beyond the terms of our laws and is functioning without effective legislative guidelines. You said, the "Congress must be at the center, not the sidelines, of the development of the policy for structuring our financial industry."

I would like to express my strong agreement with that view. It is essential that the Congress come to grips with the difficult decisions that must be made to update our laws to the new circumstances of technology and competition. We all feel considerable frustration that the Congress has not acted, and I very much welcome the pledge made by both the House of Representatives and the Senate in the Competitive Equality Banking Act adopted earlier this year not to extend the moratorium on banking expansion, to review our banking and financial laws, and to make decisions on the need for financial restructuring legislation before the moratorium expires.

Before turning to the questions of financial structure, I believe it is important to reflect on our starting point. We have the strongest, most

competitive, and innovative capital market in the world. Our job is to preserve its strengths and make improvements to assure its role in a substantially more competitive world marketplace. Banking is a vital part of this capital market structure, and despite a difficult economic environment, this industry has shown extraordinary resilience and strength. It has carried a special burden in the transition to a less inflationary economic climate as some of the major sectors it has financed—agriculture, developing countries, energy, and real estate—have been seriously and adversely affected by the transition, experiencing in some cases not only a relative slowdown in the rate of inflation, but actual sharp declines in prices. The banking industry is coming through this experience wiser and stronger.

While profitability levels for many banks remain depressed, regional banks have been strongly profitable and have strengthened themselves in the past three years through regional interstate banking arrangements. In the future, I anticipate the development of a broad interstate banking system as regional arrangements evolve into a national framework. Already 10 states have adopted full interstate banking, 13 states have provided for it after a transition period, and 8 additional states permit interstate acquisition of troubled banks. This constructive trend, especially when fully developed, will result in better service to customers and a strengthened banking system.

Securities markets also are adjusting to substantial change. The global marketplace, involving 24-hour trading in a variety of securities, is now a reality. There has been an explosion in complex new products and services posing new risks and putting a new emphasis on capital adequacy. And here at home attention has focused on a deterioration in ethical standards and the possible need to take corrective action.

All of these concerns have led to a new and searching focus on how our financial structure can be improved. Your San Francisco speech pointed to many of these issues, including international competition, new securitized products, deregulation of interest rates, and expansion of nonbanking organizations into fields traditionally thought of as banking services and vice versa. All of these developments have amounted to a very much more competitive environment for banking, while at the same time banking has been frozen within a regulatory structure fashioned some 50 years ago. Your statement and those of many others reflect what, I believe, is a widespread feeling that our existing structure is too rigid, limiting efficient service to the users of financial services, hampering competition in a way that produces unfair and anomalous results. Senator Proxmire's consideration of a proposal to repeal the Glass-Steagall Act is another example of this serious reevaluation of our financial laws.

Among all these changes there is one development that I believe is of particular importance and is now a permanent feature of the financial environment. This development is the erosion of the role of banks as intermediaries in the creditgranting process as a result of major developments in data processing and telecommunications technology. These changes have taken the form of improvements in productivity, permitting the efficient processing of large volumes of transactions, the linking of geographically separate markets, and a substantial reduction of costs. These changes, in turn, have had a marked impact on the traditional role of banks—intermediation whose function it is to substitute bank credit for the credit of the ultimate borrower. This traditional intermediation, the result of careful credit analysis and diversification of risk, has provided lenders more secure investments than would otherwise have been possible through direct loans from a lender to an ultimate borrower. In this process, the value added by the bank, and a core element of its comparative advantage, is its superior information about the creditworthiness of the borrower.

Now, extensive on-line data bases, powerful computation capacity, and telecommunication facilities provide credit and market information almost instantaneously, allowing the lender to make its own analysis of creditworthiness, and to

develop and execute complex trading strategies to hedge against risk. The result is that the basic products provided by banks—credit evaluation and diversification of risk—are less competitive than they were 10 years earlier. These fundamental changes will have a permanent effect on the competitiveness of depository institutions and will expand the competitive advantage of the market for securitized assets.

The impact of these changes in relative competitiveness because of technological innovation has been accelerated by another simultaneous development. The full force of the technological changes has come at a time when market forces have adversely affected many of the sectors to which a large number of banking institutions have made significant financial commitments. Thus, the growing cost advantage of avoiding the depository institution intermediary, already significant in terms of a reduction in both administrative and regulatory costs, widened as a result of the market downgrading of many banks.

As one important example of the consequences of these changes, we have seen a remarkable expansion of the commercial paper market as a substitute for direct short-term lending by banks to the most creditworthy borrowers. Since 1980, this market has more than doubled—rising from \$31 billion at the end of that year to \$78 billion at midyear 1987.

The same kind of securitization of many other types of lending has proceeded apace, involving everything from home mortgages to automobile loans. Expansion has been most dramatic in the mortgage market where mortgage pass-through securities exceeded \$600 billion at midyear 1987, or about one-third of all residential mortgage debt. The concept of the pass-through security has more recently been extended to other claims on the household sector, notably automobile loans and credit card receivables, which stood at about \$15 billion at midyear. The development of this market, which substitutes securities for bank loans, is now reaching down below the top industrial and commercial firms to a broader segment of the economy. As you know, banks have not been able to participate fully in servicing this extension of their own natural markets because of regulatory restrictions.

These same technological forces are now prev-

alent throughout the world. To remain viable in this highly competitive and innovative environment, financial institutions are seeking to have the broadest range of products available to meet the changing needs of their customers. Thus, we have seen investment firms provide traditional banking services, such as short-term bridge financing, and banking firms, including American and Japanese banks that are under regulatory constraints at home, participate broadly in securities markets overseas. As an aside, I would note that the successful and substantial participation of U.S. banking firms in these overseas markets for debt securities certainly raises important questions about the need for the restrictions on lenders doing the same thing at home. It is considerations of the kind I have outlined above that have led the British and Canadian governments to adopt or propose substantial changes in their previously segmented financial systems to allow banking and other financial service firms to provide integrated services in the single world financial market.

As I have stressed, we do need to make some changes in our segmented financial structure to make it more competitively effective, both domestically and internationally, and I will turn to this in a moment. One thing I do not think we need to do is follow a deliberate policy of allowing our financial institutions to become larger for the specific purpose of meeting international competition.

One argument that is put forward for this proposition is the fact that of the top 25 banks in the world in 1986, 16 were Japanese and only 2 were based here, in contrast with 1981 when 4 were American including the top 2, while 10 were Japanese. At the same time, we must ask ourselves whether these changes in the relative ranking of Japanese firms can be explained largely by Japan's rather highly concentrated banking system, its appreciated currency, its trade surpluses, and very high domestic savings. It is no surprise that in these circumstances Japanese institutions would be growing rapidly, particularly in terms of dollars.

But there is no evidence that extraordinary size is necessary for successful international competition. Many banks in countries other than our own compete successfully in the international marketplace with assets that are significantly smaller than those of their American counterparts. Clearly, many American financial institutions have reached the size that is necessary for effective participation in international markets.

On the other hand, I would rate capital adequacy as an important ingredient in the international competitive environment that does require a great deal more attention. The Federal Reserve has begun an effort, in cooperation with banking supervisors both at home and overseas, to achieve agreement on a uniform system for measuring capital adequacy focused on a risk-based standard. Considerable progress is being made toward an agreement, which I hope will be completed by the end of this year. An agreement of this kind will both strengthen the banking system worldwide and assure greater equity in the competitive environment.

I would like to turn now to consideration of how we should go about restructuring the financial system to deal with the problems that I think we all agree are hampering its performance. You have suggested that the fundamental test for determining the kind and scope of the required changes is what we will need to do to serve better our nation's economic interest. You point out that in the process of considering removal of some or all of the barriers separating banking and securities firms we have to ask ourselves several important questions, including the following: (1) How can we insulate insured deposits from securities activities? (2) How can we ensure the continued safety and soundness of, and public confidence in, banking and securities markets? and (3) How can we prevent conflicts of interest and concentration of resources? To these important considerations I would add the corollary that our basic objective must be to promote a system that provides efficient services to customers large and small in an environment that promotes competition. As part of this analysis, I would add two other points that are of particular importance to the Federal Reserve but are also of vital concern to the economy as a whole: (1) we must have a system in which monetary policy can function efficiently; and (2) we must have a system that maintains the integrity of the nation's payment system.

910

There is, I believe, wide agreement on these goals. We accept as basic to our thinking that any combination of banking and other firms should take place within an organizational structure that separates the bank in such a manner as to assure that only the bank has the benefit of the support of the federal safety net and that includes deposit insurance and access to Federal Reserve lending. There are various ways in which this separation could be accomplished. The three main proposals that have been put before the Congress involve the following ideas:

- 1. Require that all nonbanking activities of a banking enterprise take place in the subsidiary of an overall holding company. This holding company could be subject to the same regulatory framework that we have now for holding companies. This proposal, put forward by the President of the Federal Reserve Bank of New York, suggests that the powers of bank holding companies should not extend beyond securities and insurance activities and that traditional holding company regulation is appropriate in this context.
- 2. In contrast, others suggest that functional regulation should be applied to each of the different kinds of activities owned by a holding company parent, but that there should be little, if any, regulatory authority over the parent enterprise.
- 3. Finally, suggestions have been made, including those recently put forward in a Federal Deposit Insurance Corporation staff paper, that it would be appropriate to expand nonbanking activities of banking institutions within the subsidary of banks themselves without any regulation at all at the holding company level.

While we have yet to come to definitive conclusions about these implementation options, our experience thus far suggests that the most effective insulation of a bank from affiliated financial or commercial activities is achieved through a holding company structure, though we welcome debate on other alternatives.

We also agree that attention must be given to the whole range of relationships between a bank and its affiliated entities to assure that confidence in banks is not compromised and that conflicts of interest are avoided. In addition, we are addressing such issues as the following: (1) the need for limitations on loans by a bank to affiliated enterprises or to customers of affiliated enterprises; (2) the need for adequate separation of directors, officers, and premises; (3) restrictions on the flow of confidential information; (4) the scope of permissible joint marketing; (5) rules on intercorporate provision of services; and (6) the need for public disclosure of affiliate relationships.

As a result of this review, we at the Board hope to be in a position to advise the Congress on how best to implement the changes that we see are so urgently needed to assure that the financial system continues to serve our public policy goals. We expect to have specific recommendations on how best to achieve bank-affiliate insulation, on the maintenance of safety and soundness, on prevention of conflicts of interest, and on avoidance of conferring competitive benefits that are unavailable to all competitors that are similarly situated. We hope that these recommendations will be valuable to the Congress as it proceeds with its consideration of the restructuring of our financial system and that our recommendations will enable the American financial system to remain competitive, serving the needs of customers here and abroad without compromising the strength or stability of our financial markets.

Statement by Martha R. Seger, Member, Board of Governors of the Federal Reserve System, before the Subcommittee on Consumer Affairs and Coinage of the Committee on Banking, Finance and Urban Affairs, U.S. House of Representatives, October 6, 1987.

I appreciate the opportunity to appear before this subcommittee to discuss home equity lines of credit and H.R. 3011. The proposed bill would amend the Truth in Lending Act to require creditors to provide consumers with more information about home equity programs in advertise-

ments and in initial account disclosure statements.

The information that we have regarding home equity lines of credit shows that there has been a substantial growth in this type of credit since 1984, with outstanding balances totaling approximately \$40 billion at the end of 1986. We believe that the total may now be as high as \$65 billion and could reach \$75 billion to \$80 billion by year-end.

The rapid expansion is probably attributable to several factors. For example, the plans have provided consumers convenient access to credit at interest rates that are relatively low compared with other means of financing consumer spending. Tax laws phasing out the deductibility of interest for nonmortgage consumer debt have made home equity loans more desirable to tax-conscious borrowers. In addition, competition among financial institutions to offer diverse financial services to their customers has resulted in vigorous marketing of home equity lines, often at low introductory interest rates and discounted fees.

Recently, the Board and other bank regulatory agencies changed the reporting requirements for credit secured by real estate to provide more complete and accurate information on household borrowing through home equity lines of credit. This change should provide more accurate information for an important segment of the market, and enable us to better gauge the growth of this type of credit and the effect it is having on other consumer borrowing. In addition, the Board has conducted consumer surveys this year to gather information that will allow us to better understand consumer usage of home equity lines of credit.

During the past year, the Board has received inquiries from financial institutions, trade associations, consumer groups, and the Congress concerning home equity lines of credit. Much of the debate has focused on the current disclosure requirements for these loans, and whether these requirements are adequate. The sponsors of H.R. 3011 have sought to address some of these concerns by introducing legislation to require additional disclosures for home equity loans. At the same time, the Board has been reviewing its current regulatory requirements, with the goal of

ensuring that consumers receive sufficient information before contracting for this type of credit.

LEGISLATIVE PROPOSAL

H.R. 3011 would amend the Truth in Lending Act to establish additional disclosure and advertising requirements for open-end credit plans secured by the consumer's dwelling. Currently, the Truth in Lending Act and Regulation Z treat home equity lines of credit like other types of open-end credit plans. As a result, creditors are required to disclose how the finance charge will be determined under the plan, what other charges will be imposed, the security interest being taken, and the consumer's billing rights.

The proposed bill would require creditors to give more extensive and detailed disclosures. For example, it would require more disclosures concerning the annual percentage rate, including, if applicable, a statement that no limit on annual rate increases exists. The bill would also add an example, based on a \$10,000 amount outstanding, showing the payment terms under the plan and how changes in the annual percentage rate could affect payments under the plan. In addition, the proposed bill would call for disclosure of the creditor's ability to unilaterally change the terms and conditions of the plan, a statement that the consumer risks losing his or her home in the event of any default, and a disclosure that interest-only payments increase the cost of the loan since they do not reduce the principal owed. Creditors would also be required to give consumers a pamphlet that is to be prepared by the Board. These additional disclosures would generally have to be given at the time of application, which is earlier than current requirements, and would have to be segregated from other information, which is once again a departure from current truth-in-lending requirements for open-end credit.

The proposed legislation would also add a new advertising section to the Truth in Lending Act for home equity lines. Currently, a creditor is required to make certain cost disclosures in advertisements only when "any specific terms of the plan" are included in the advertisement. Regulation Z limits "specific terms" to items that

are required to be disclosed in the initial disclosures. The bill would add a reference to a periodic payment amount as a term that requires the advertisement to include additional disclosures. The bill also would require, under certain circumstances, a disclosure regarding the tax deductibility of interest paid on home equity loans as "free money" or a "loan at prime."

POSSIBLE REGULATORY ACTION

Since home equity programs are more complex than other types of open-end credit plans and pose a greater risk to consumers if they fail to understand the terms and conditions of the plan, the Board, like the Congress, is concerned about whether the existing disclosure requirements under the Truth in Lending Act and Regulation Z ensure that consumers receive adequate information about these types of loans when they contract for a particular plan. In our review of H.R. 3011, we find that the Congress has identified many of the issues that we ourselves have targeted as major areas of concern that possibly could be addressed through regulatory action.

During the past year, Board staff has been considering the issue of home equity lending within the context of truth-in-lending disclosure requirements. In addition, the Board's Consumer Advisory Council formed a subcommittee at the beginning of this year to look into the issue and has discussed it at its past two meetings. The staff's analysis indicates that the current regulatory requirements for open-end credit may not reflect adequately the complexities that are present in most home equity programs. Specifically, the staff has focused on the content, timing, and format of the disclosures required under Regulation Z as possible candidates for regulatory change. At this time, Board staff is preparing a proposal that would amend Regulation Z to address these issues and expects to present the recommendations of the staff to the Board sometime next month. Although the review is still in process, and neither the staff nor the Board has made any firm decisions about what can and should be done, I would like to share with you some of the particular issues we have been considering.

Under current requirements, when a home equity plan is opened, a creditor need only give those general disclosures that I previously outlined. Creditors are not required to disclose certain items, such as their right to unilaterally change the terms and conditions of the plan, or the possibility that a balloon payment may be required as part of the plan. It is conceivable that Regulation Z could be amended to require disclosure of these features. There also may be a need to require more disclosures in home equity line advertisements. Some questions raised in this regard include whether "teaser" rates are adequately disclosed as only lasting for a limited time period and whether disclosing a payment term in an advertisement should require disclosure of other material terms, such as the annual percentage rate or fees to be charged under the plan. In considering any additional disclosure requirements, however, the Board is guided by the principle that disclosures should provide consumers with essential information, without overloading them with less important information or unnecessarily raising creditors' compliance costs.

Another area we have identified as one to look into concerns the timing of disclosures. Regulation Z currently permits open-end credit disclosures to be given anytime before the first transaction. In the case of home equity lines of credit, therefore, consumers, in many cases, do not receive disclosures about the terms and conditions of the plan until closing. Since most home equity credit plans involve large up-front fees and tend to be more complex than other types of open-end credit, an argument can be made for requiring disclosure of the fees, terms, and conditions of such plans at an earlier time in the credit process.

Finally, concern has been expressed that consumers may not fully understand the terms and conditions of the programs. This concern may be due, in part, to the complexity of these plans and to the fact that the underlying contracts could run several pages in length. Currently, Regulation Z does not require any special format for open-end disclosures. As a result, in most cases, the disclosures given for these plans are not segregated from the contractual provisions or highlighted in any standard manner. We believe that consumers

should be alerted to the most important terms and conditions of the plans for which they contract. To the extent that the current regulatory requirements fail to meet this goal, it might be necessary to require that disclosures about these plans be segregated from other information.

The Federal Reserve Board shares the goal that consumers receive adequate information at a

relevant stage of the credit process when they contract for home equity loans. We believe that it is particularly important that consumers understand these programs since they arguably pose a greater risk because of their complexity, the large credit lines generally involved, and the possibility of losing one's home. Therefore, we look forward to working with you on this important subject.

Statement by Wayne D. Angell, Member, Board of Governors of the Federal Reserve System, before the Subcommittee on Domestic Monetary Policy of the Committee on Banking, Finance and Urban Affairs and the Subcommittee on Procurement, Innovation, and Minority Enterprise Development of the Committee on Small Business, U.S. House of Representatives, October 30, 1987.

I welcome the opportunity to discuss the functioning and effectiveness of the small business and agriculture Advisory Councils to the Federal Reserve Banks. The Board of Governors believes that the Advisory Councils have become a valuable part of the informal structure of the Federal Reserve System, and we are joined in this assessment by the Presidents of the Federal Reserve Banks.

I am pleased to be accompanied today by members from the Advisory Councils of three Districts: Carolyn Draper from the Dallas Reserve Bank's Advisory Council on Small Business and Agriculture, Donald Lynch from the Philadelphia Reserve Bank's Small Business-Agriculture Advisory Council, and William Mathers from the Minneapolis Reserve Bank's Advisory Council on Small Business, Agriculture, and Labor. These Council members have just participated in the meeting of the Board with representatives from the Advisory Councils to the 12 Federal Reserve Districts, which takes place in the fall of each year.

The Advisory Councils to the Federal Reserve Banks were established in 1985, with the encouragement of the Congress, for the purpose of improving communication with various sectors of economic activity within each Federal Reserve District. The Board requested that the membership of the Council include persons from the small business and agricultural communities in the Districts. Other sectors such as community banks and organized labor were also included in some Districts, and their inclusion depended on the then-existing composition of Reserve Bank and Branch boards of directors, the existing formal and informal forums for contact with different sectors, and the economic diversity of the particular District. The size and composition of each Council were left to the discretion of the Reserve Bank.

From the perspective of the Board of Governors, the Councils have successfully met the objectives we envisioned when they were established. The benefit to the Federal Reserve lies in the ability of the Councils to provide economic intelligence about current developments in the District to their respective Reserve Bank. The Banks have found that the concerns raised at Council meetings have a distinctly regional flavor that is of importance in the interpretation and analysis of data on economic activity within the District.

At the meeting each year with Council representatives in Washington, the Board is informed firsthand of current and emerging developments around the country, and the Council members also confer to exchange views. The discussion confirms the diversity of economic developments and the variety of market pressures across Districts, even within the agricultural sector or the small business community.

I can also report that the Presidents of the Reserve Banks are of the view that the Council members contribute additional information or insight that only "grass roots" sources can provide. Council meetings have provided a forum for a two-way flow of information—as the Councils learn about the analysis of data that is performed by the Reserve Banks, and the Banks learn about the perceptions and expectations of the small business and agricultural communities that underlie the data. This additional information has been helpful to the directors of some of the Reserve Banks who have considered it in conjunction with their discount rate deliberations.

In your letter of invitation to this hearing, the Subcommittee Chairmen have raised a number of questions about the organization and functioning of the Advisory Councils. I have provided detailed responses in an appendix to this statement. However, let me just briefly indicate that, while there is considerable organizational variation across the Districts, the Reserve Banks all consider a wide range of sources of potential candidates for Council membership. All seek diversity in geographic, industry, and other characteristics in their selection of Council members, and all have integrated the Councils fully into their systems for gathering information about economic activity in their District.

The small business and agricultural Advisory Councils to the Federal Reserve Banks are now in their third year of activity. Last year, at the Board's request, the Council members who met in Washington assessed the activities of the Councils in terms of meeting the objectives for improved communication between the Federal Reserve and leaders of certain sectors of the economy. The Council members unanimously agreed that the activities of the Councils are beneficial and should be continued. They believed that, with the Councils, policymakers within the Federal Reserve are better informed of the nature of the concerns of small business. agriculture, and other sectors, as well as the regional diversity of the problems confronting these sectors.

Citing the diversity of issues across Reserve Districts, the Council members also agreed that decisions as to how the Council should function should continue to be made within the Districts. The Board specifically raised the possibility of formal reporting to the Board and received a unanimous reply that uniform reporting requirements need not, indeed should not, be imposed by the Board. The Council members felt that flexibility at the District level would best serve the purpose of the Advisory Councils and that the economic intelligence provided by Council members to the Reserve Banks appropriately makes its way into the policymaking process through the participation of the Reserve Bank Presidents in deliberations of the Federal Open Market Committee and in other forums. In fact, the Council members argued persuasively that increased formality would be counterproductive to the advisory process that had developed.

The Board appreciates your interest in the Advisory Councils. I will be happy to answer any questions you may have.

Announcements

STATEMENT BY CHAIRMAN GREENSPAN ON PROVIDING LIQUIDITY TO THE FINANCIAL SYSTEM

Chairman Alan Greenspan issued the following statement on October 20, 1987:

The Federal Reserve, consistent with its responsibilities as the Nation's central bank, affirmed today its readiness to serve as a source of liquidity to support the economic and financial system.

REVISED LIST OF OTC STOCKS SUBJECT TO MARGIN REGULATIONS NOW AVAILABLE

The Federal Reserve Board on October 23, 1987, published a revised list of over-the-counter (OTC) stocks that are subject to its margin regulations, effective November 10, 1987.

This List of Marginable OTC Stocks supersedes the revised list that was effective on August 11, 1987. Changes that have been made in the list, which now includes 3,328 OTC stocks, are as follows: 182 stocks have been included for the first time, 153 under NMS designation; 36 stocks previously on the list have been removed for substantially failing to meet the requirements for continued listing; 56 stocks have been removed for reasons such as listing on a national securities exchange or involvement in an acquisition.

The list includes all over-the-counter securities designated by the Board pursuant to its established criteria as well as all stocks designated as National Market System (NMS) securities for which transaction reports are required to be made pursuant to an effective transaction reporting plan. Additional OTC securities may be designated as NMS securities in the interim between the Board's quarterly publications and will be immediately marginable. The next publication of the Board's list is scheduled for February 1988.

In addition to NMS-designated securities, the Board will continue to monitor the market activity of other OTC stocks to determine which stocks meet the requirements for inclusion and continued inclusion on the list.

PUBLICATION OF ANNUAL STATISTICAL DIGEST, 1986

The Annual Statistical Digest, 1986, is now available. This one-year Digest is designed as a compact source of economic, and especially financial, data. The Digest provides a single source of historical continuations of the statistics carried regularly in the Federal Reserve Bulletin. The Digest also offers a continuation of series that formerly appeared regularly in the Bulletin, as well as certain special, irregular tables that the Bulletin also once carried.

This issue of the *Digest* covers only 1986 unless data were revised for earlier years. It serves to maintain the historical series first published in *Banking and Monetary Statistics*, 1941–1970, and the *Digest* for 1970–79 and yearly issues thereafter. A *Concordance of Statistics* will be included with all orders. The *Concordance* provides a guide to tables that cover the same material in the current and the previous two years' issues of the *Digest*, the ten-year *Digest* for 1970–79, and the BULLETIN.

Copies of the *Digest* are available from Publications Services, Mail Stop 138, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The price is \$15.00 per copy.

LIST OF BANK HOLDING COMPANIES NOW AVAILABLE

The annual list of "Bank Holding Companies and Subsidiary Banks as of December 31, 1986," is available. The report is \$20.00 per copy, and remittance should be made payable to the Board of Governors of the Federal Reserve System. To order a copy, please forward the request and payment to the Office of the Controller, Federal Reserve Board, Washington, D.C. 20551.

The report includes assets and deposits for domestic and consolidated companies that have reported to the Board pursuant to the requirements of the Bank Holding Company Act.

CHANGES IN BOARD STAFF

The Board of Governors has announced the following appointments to the official staff, effective October 28, 1987.

In the Office of the Controller, Darrell R. Pauley has been appointed Assistant Controller for Finance, and Stephen J. Clark has been appointed Assistant Controller for Programs and Budgets.

In the Division of Federal Reserve Bank Operations, Louise L. Roseman has been appointed Assistant Director for the Check Payments and Electronic Payments Sections.

Mr. Clark joined the Board's staff in June 1979 and most recently was Chief of the Program Analysis and Budgets Section in the Office of the Controller. He has an M.S. in Business Administration from Boston University.

Mr. Pauley joined the Board's staff in August 1975 and most recently was Chief of the Finance and Accounting Section in the Office of the Controller. He has a B.B.A. from Marshall University and is a Certified Public Accountant.

Ms. Roseman came to the Board in August 1985 and was most recently a senior program leader in the Division of Federal Reserve Bank Operations. She has an M.B.A. from George Washington University.

The Board also announced the following changes, effective November 16, 1987:

Division of Research and Statistics

The appointment of Mark N. Greene as Assistant Director and Chief of the Automation and Research Computing Section.

The appointment of Myron L. Kwast as Assistant Director with oversight responsibilities for the Financial Structure and Monetary and Financial Studies Sections.

The appointment of David J. Stockton as Assistant Director and Chief of the Economic Activity Section.

The promotion of Thomas D. Simpson, Deputy Associate Director, to Associate Director.

The promotion of Lawrence Slifman, Deputy Associate Director, to Associate Director.

Division of Monetary Affairs

The appointment of Brian F. Madigan as Assistant Director of the Division with oversight responsibilities for the Banking and Money Market Analysis, Money and Reserves Projections, and Banking and Money Market Statistics Sections.

Mr. Greene joined the Board's staff in August 1982 and was promoted to Chief of the Automation and Research Computing Section in July 1985. Mr. Greene has a Ph.D. in Economics from the University of Michigan.

Mr. Kwast joined the Board's staff in June 1978 and became Chief of the Financial Studies Section in March 1985. Mr. Kwast has a Ph.D. in Economics from the University of Wisconsin.

Mr. Stockton joined the board's staff in September 1981 and became a senior economist in the Economic Activity Section in September 1986. Mr. Stockton has a Ph.D. in Economics from Yale University.

Mr. Madigan joined the Board's staff in July 1979 and was reappointed in September 1983, after a brief period as senior financial economist at the Federal National Mortgage Association. He was promoted to Chief of the Banking Section in April 1985. He has a Ph.D. in Economics from the Pennsylvania State University.

PROGRAM APPROVED FOR AMORTIZATION OF LOSSES ON AGRICULTURAL LOANS

The Federal Reserve Board announced approval on October 30, 1987, of a program allowing eligible state member banks to amortize losses on agricultural loans over several years. The eligible

state member banks include banks with less than \$100 million in assets but with at least 25 percent of those assets in qualified agricultural loans.

Although the program is effective beginning November 9, 1987, amortized loans will first appear on reports of condition as of December 31, 1987. Consequently, interested state member banks may contact their Reserve Banks to determine whether they are eligible beginning October 30. Additionally, the Board is requesting comment on the regulation. Comments on this matter should be received by the Board by December 3, 1987.

The program was created by Title VIII of the Competitive Equality Banking Act of 1987. Similar programs have been adopted by the Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency.

SYSTEM MEMBERSHIP: ADMISSION OF STATE BANKS

The following state banks were admitted to membership in the Federal Reserve System during the period from October 1 to October 31, 1987:

California
Palo Alto Mid-Peninsula Bank
Colorado
La Junta Ark Valley Industrial Bank
Lamar Lamar Industrial Bank
Florida
Boca Raton First Southern Bank
Fernandina Beach First Coast
Community Bank
Orange City First Community Bank
of Orange City

Note. On Page 861 of the November 1987 BULLETIN, United Virginia Bank (now Crestar Bank) was incorrectly listed as a recently admitted member of the Federal Reserve System when in fact it had been a member for many years.

Legal Developments

FINAL GUIDELINES REGARDING THE BANK BRIBERY ACT

The Board of Governors has approved final guidelines regarding the Bank Bribery Act as required by the Bank Bribery Amendments Act of 1985. The guidelines were developed by the Interagency Bank Fraud Enforcement Working Group and submitted to the Federal Financial Institutions Examination Council for its consideration and submission to each of the federal financial institutions regulatory agencies. The final guidelines encourage all state member banks and bank holding companies to adopt codes of conduct or written policies that describe the prohibitions of the bank bribery law. They also identify situations that, in the opinion of the Board of Governors, do not constitute violations of the federal bank bribery law. In addition, the final guidelines suggest that State member banks and bank holding companies themselves establish, in their own codes of conduct or written policies, a range of internally acceptable dollar amounts for the various benefits that their officials may receive from those doing or seeking to do business with them.

Effective October 21, 1987, as required by the Bank Bribery Amendments Act of 1985 (P.L. 99–370), the Board adopts the following guidelines regarding the Bank Bribery Act, 18 U.S.C. section 215:

Final Guidelines

The final guidelines encourage all State member banks and bank holding companies to adopt internal codes of conduct or written policies or amend their present codes of conduct or policies to include provisions that explain the general prohibitions of the bank bribery law. The guidelines relate only to the bribery law and do not address other areas of conduct that a State member bank or bank holding company would find advisable to cover in its code of conduct or written policy. Consistent with the intent of the statute to proscribe corrupt activity within financial institutions, the code or policy should prohibit any employee, officer, director, agent or attorney of a State member bank or bank holding company (hereinafter "Bank or Bank Holding Company Official" or "Bank or Bank Holding Company Officials") from:

(1) soliciting for themselves or for a third party (other than the bank or bank holding company itself) anything of value from anyone in return for any business, service or confidential information of the bank or bank holding company and from:

(2) accepting anything of value (other than bona fide salary, wages and fees as referred to in 18 U.S.C. Section 215(c)) from anyone in connection with the business of the bank or the bank holding company, either before or after a transaction is discussed or consummated.

The State member banks' and bank holding companies' codes or policies should be designed to alert Bank or Bank Holding Company Officials about the bank bribery statute, as well as to establish and enforce standards relating to acceptable business practices.

In its code of conduct or written policy, the State member bank or bank holding company may, however, specify appropriate exceptions to the general prohibition of accepting something of value in connection with bank or bank holding company business. There are a number of instances where a Bank or Bank Holding Company Official, without risk of corruption or breach of trust, may accept something of value from one doing or seeking to do business with the bank or bank holding company. The most common examples are the business luncheon or the holiday gift from a customer. In general, there is no threat of a violation of the statute if the acceptance is based on a family or personal relationship existing independent of any business of the institution; if the benefit is available to the general public under the same conditions on which it is available to the Bank or Bank Holding Company Official; or if the benefit would be paid for by the bank or bank holding company as a reasonable business expense if not paid for by another party. Indeed, by adopting a code of conduct or written policy with appropriate allowances for such circumstances, a State member bank or bank holding company recognizes that acceptance of certain benefits by its Bank or Bank Holding Company Officials does not amount to a corrupting influence on the bank's or bank holding company's transactions.

In issuing guidance under the statute in the area of business purpose entertainment or gifts, it is not advisable for the Board of Governors to establish rules about what is reasonable or normal in fixed dollar terms. What is reasonable in one part of the country may appear lavish in another part of the country. A State member bank or bank holding company should seek to embody the highest ethical standards in its code of conduct or written policy. In doing this, a State member bank or bank holding company may establish in its own code or policy a range of dollar values which cover the various benefits that its Bank or Bank Holding Company Officials may receive from those doing or seeking to do business with the bank or bank holding company.

The code of conduct or written policy should provide that, if a Bank or Bank Holding Company Official is offered or receives something of value beyond what is authorized in the bank's or bank holding company's code of conduct or written policy, the Bank or Bank Holding Company Official must disclose that fact to an appropriately designated official of the financial institution. The State member bank or bank holding company should keep contemporaneous written reports of such disclosures. An effective reporting and review mechanism should serve to prevent situations that might otherwise lead to implications of corrupt intent or breach of trust and should enable the bank or bank holding company to better protect itself from selfdealing. However, a Bank or Bank Holding Company Official's full disclosure evidences good faith when such disclosure is made in the context of properly exercised supervision and control. Management should review the disclosures and determine that what is accepted is reasonable and does not pose a threat to the integrity of the State member bank or bank holding company. Thus, the prohibitions of the bank bribery statute cannot be avoided by simply reporting to management the acceptance of various gifts.

The Board of Governors recognizes that a serious threat to the integrity of a State member bank or bank holding company occurs when its Bank or Bank Holding Company Officials become involved in outside business interests or employment that gives rise to a conflict of interest. Such conflicts of interest may evolve into corrupt transactions that are covered under the bank bribery statute. Accordingly, State member banks and bank holding companies are encouraged to prohibit, in their codes of conduct or policies, their Bank or Bank Holding Company Officials from selfdealing or otherwise trading on their positions with the bank or bank holding company or accepting from one doing or seeking to do business with the bank or bank holding company a business opportunity not available to other persons or that is made available because of such official's position with the State member bank or bank holding company. In this regard, a State member

bank's or bank holding company's code of conduct or policy should require that its Bank or Bank Holding Company Officials disclose all potential conflicts of interest, including those in which they have been inadvertently placed due to either business or personal relationships with customers, suppliers, business associates, or competitors of the bank or bank holding company.

Exceptions

In its code of conduct or written policy, a State member bank or bank holding company may describe appropriate exceptions to the general prohibition regarding the acceptance of things of value in connection with bank or bank holding company business. These exceptions may include those that:

- (a) permit the acceptance of gifts, gratuities, amenities or favors based on obvious family or personal relationships (such as those between the parents, children or spouse of a Bank or Bank Holding Company Official) where the circumstances make it clear that it is those relationships rather than the business of the bank or bank holding company concerned which are the motivating factor;
- (b) permit acceptance of meals, refreshments, travel arrangements or accommodations, or entertainment, all of reasonable value and in the course of a meeting or other occasion the purpose of which is to hold bona fide business discussions, provided that the expenses would be paid for by the State member bank or bank holding company as a reasonable business expense, if not paid for by another party (the bank or bank holding company may establish a specific dollar limit for such an occasion);
- (c) permit acceptance of loans from other banks or financial institutions on customary terms to finance proper and usual activities of Bank or Bank Holding Company Officials, such as home mortgage loans, except where prohibited by law;
- (d) permit acceptance of advertising or promotional material of reasonable value, such as pens, pencils, note pads, key chains, calendars and similar items; (e) permit acceptance of discounts or rebates on merchandise or services that do not exceed those available to other customers;
- (f) permit acceptance of gifts of reasonable value that are related to commonly recognized events or occasions, such as a promotion, new job, wedding, retirement, Christmas or bar or bat mitzvah (the bank or bank holding company may establish a specific dollar limit for such an occasion); or
- (g) permit the acceptance of civic, charitable, educational, or religious organizational awards for recognition of service and accomplishment (the bank or

bank holding company may establish a specific dollar limit for such an occasion).

The policy or code may also provide that, on a case by case basis, a State member bank or bank holding company may approve of other circumstances, not identified above, in which a Bank or Bank Holding Company Official accepts something of value in connection with bank or bank holding company business, provided that such approval is made in writing on the basis of a full written disclosure of all relevant facts and is consistent with the bank bribery statute.

Disclosures and Reports

To make effective use of these guidelines, the Board of Governors recommends the following additional procedures:

- (a) The State member bank or bank holding company should maintain a copy of any code of conduct or written policy it establishes for its Bank or Bank Holding Company Officials, including any modifications thereof.
- (b) The State member bank or bank holding company should require an initial written acknowledgement of its code or policy and a written acknowledgement of any subsequent material changes to the code or policy from its Bank or Bank Holding Company Officials and the Bank or Bank Holding Company Officials' agreement to comply therewith. (c) The State member bank or bank holding company should maintain contemporaneous written reports of any disclosures made by its Bank or Bank

Holding Company Officials in connection with a

ORDERS ISSUED UNDER BANK HOLDING COMPANY ACT, BANK MERGER ACT, BANK SERVICE CORPORATION ACT, AND FEDERAL

code of conduct or written policy.

Orders Issued Under Section 3 of the Bank Holding Company Act

Alaska Mutual Bancorporation Anchorage, Alaska

Order Approving the Merger of Bank Holding Companies

Alaska Mutual Bancorporation, Anchorage, Alaska, a bank holding company within the meaning of the Bank Holding Company Act of 1956, as amended (12 U.S.C. § 1841 *et seq.*) ("BHC Act"), has applied for the

Board's approval under section 3(a)(5) of the BHC Act (12 U.S.C. § 1842(a)(5)) to merge with United Bancorporation Alaska, Inc., Anchorage, Alaska ("United"), also a bank holding company within the meaning of the BHC Act. After the merger with United, Applicant will retain its charter, but will conduct business under a new name, Alliance Bancorporation.

Notice of the application, affording an opportunity for interested persons to submit comments, has been given in accordance with section 3(b) of the BHC Act (12 U.S.C. § 1842(b)). The time for filing comments has expired and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the BHC Act (12 U.S.C. § 1842(c)).

Applicant is the second largest commercial banking organization in Alaska, controlling one subsidiary bank with total deposits of \$692 million, representing 17 percent of the total deposits in commercial banks in the state. United is the fifth largest commercial banking organization in Alaska, controlling two subsidiary banks with total deposits of \$440 million, representing 10.8 percent of the total deposits in commercial banks in the state. Upon consummation of the proposed transaction, Applicant would become the largest commercial banking organization in the state, with total deposits of \$1.1 billion, representing 27.8 percent of the total deposits in commercial banks in the state.

The Board has considered carefully the effects of the combination of the second and fifth largest commercial banking organizations in Alaska on the concentration of banking resources in the state. The Board notes that after consummation of the proposal, numerous banking alternatives would remain in Alaska. Based on the foregoing and other facts of record, the Board concludes that the proposed transaction would have no substantial adverse effects on the concentration of banking resources in Alaska.

In evaluating this application, the Board has considered the financial resources of Applicant and the effect on those resources of the proposed acquisition. The Board has stated and continues to believe that capital adequacy is an especially important factor in the analysis of bank holding company proposals, particu-

RESERVE ACT

^{1.} As part of this merger, United's subsidiary bank, United Bank Alaska, Anchorage, a state-chartered bank, will merge into Applicant's subsidiary bank, Alaska Mutual Bank, Anchorage ("AMB"), a state-chartered stock savings bank. The resulting bank will continue to do business under the charter of AMB and its new name, Alliance Bank. Subsequent to this bank merger, United's other subsidiary bank, United Bank Alaska Southeastern, Juneau, Alaska, also a state-chartered bank, will be merged into Alliance Bank. Federal Deposit Insurance Corporation approval of both bank mergers is being sought, pursuant to the Bank Merger Act, 12 U.S.C. § 1828(c), contemporaneously with this application.

^{2.} State banking data are as of December 31, 1986.

larly in transactions such as this in which the acquisition of a large organization experiencing financial problems is proposed.

This proposal is designed to significantly enhance the financial resources of Applicant. This acquisition has been structured as an exchange of shares, and Applicant will not incur any debt in connection with this proposal. The Board has given special attention to Applicant's commitment to issue significant amounts of additional primary capital to augment its capital base following consummation of this proposal. In addition, the Federal Deposit Insurance Corporation has agreed to make a significant capital contribution to Applicant, which will assist its recapitalization plan. This increase in primary capital is considered to be a significant factor weighing in favor of the proposal.

After a review of Applicant's proposal in light of the financial condition of Applicant and United and the current difficulties in the Alaska economy, the Board concludes that the pro forma financial and managerial resources of Applicant and its subsidiary bank, are consistent with approval. In reaching this decision, the Board has noted as a matter of particular importance the circumstances under which this merger has been arranged. Due in part to a weak state economy, Applicant and United have experienced a decline in operating performance and recently have experienced significant financial losses. The merger of the two companies and resulting cost savings are anticipated to position Applicant to better withstand the current difficult economic situation in the energy and real estate sectors of the economy.

The Board also has considered that this proposal, under the circumstances, represents the best available alternative to address the financial difficulties of Applicant and United. Based on all of the preceding financial factors and other facts of record, the Board concludes that, on balance, the financial resources of Applicant and its subsidiary bank are consistent with approval of this application.

Applicant and United compete directly in the Anchorage banking market.³ Applicant is the largest of 11 commercial banking organizations in the market, with total deposits of \$516 million, representing 22.3 percent of total deposits in commercial banks in the market.⁴ United is the third largest commercial banking organization in the market, with total deposits of \$320 million, representing 13.8 percent of total depos-

its in commercial banks in the market. Upon consummation of this proposal, Applicant would remain the largest commercial banking organization in the market and would control 36.1 percent of the total deposits in commercial banks in the market. The Anchorage banking market is moderately concentrated, with the four largest banking organizations in the market controlling 66.1 percent of the deposits in the market. Upon consummation of the proposal, the market would become concentrated, with the four-firm concentration ratio increasing to 77 percent. The market's Herfindahl-Hirschman Index ("HHI") would increase by 615 points from 1424 to 2039.

Although consummation of this application would eliminate some existing competition between Applicant and United in the Anchorage banking market, certain facts and circumstances of this case mitigate the anticompetitive effects that would otherwise result from the consummation. Numerous other banking organizations, including two thrift institutions, would remain in the market following consummation of the proposal. Moreover, the record of this application indicates that this transaction would provide substantial benefits to the convenience and needs of the community by averting further deterioration of the financial condition of Applicant and United. In this context, the Board concludes that the benefit of maintaining services to the customers of Applicant and United that would be derived from this proposal are so substantial as to outweigh any anticompetitive effects of this proposal.

Based on the foregoing and other facts of record, the Board has determined that the application under the BHC Act should be and hereby is approved. The transaction shall not be consummated before the fifth calendar day following the effective date of this Order or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of San Francisco pursuant to delegated authority.

By order of the Board of Governors, effective October 28, 1987.

^{3.} The Anchorage, Alaska, banking market consists of the Anchorage Ranally Metropolitan Area.

^{4.} Market data are as of June 30, 1985.

^{5.} Under the revised Department of Justice Merger Guidelines (49 Federal Register 26,823 (1984)) a market in which the post-merger HHI is over 1800 is considered concentrated. In such markets, the Department is likely to challenge a merger that increases the HHI by more than 50 points. The Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by at least 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anticompetitive effects implicitly recognizes the competitive effect of limited-purpose lenders and other non-depository financial entities.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, Heller, and Kelley.

JAMES MCAFEE

[SEAL]

Associate Secretary of the Board

Fairfax Bancshares, Inc. Fairfax, Missouri

Order Approving Acquisition of a Bank

Fairfax Bancshares, Inc., Fairfax, Missouri, a bank holding company within the meaning of the Bank Holding Company Act ("Act"), 12 U.S.C. § 1841 et seq., has applied pursuant to section 3(a)(3) of the Act, 12 U.S.C. § 1842(a)(3), to acquire 30 percent of the voting shares of The Farmers and Valley Bank, Tarkio, Missouri.

Notice of the application, affording interested persons an opportunity to submit comments, has been given in accordance with section 3(b) of the Act. The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act.

Applicant is a Missouri corporation with one bank subsidiary, controlling deposits of \$13.5 million, representing 0.03 percent of total deposits in commercial banking organizations in the state. Bank is the 464th largest commercial bank in Missouri, controlling deposits of \$14 million, representing 0.03 percent of total deposits in commercial banking organizations in the state. Upon consummation of this proposal, Applicant would continue to rank among the smallest commercial banking organizations in the state, controlling 0.06 percent of total deposits in commercial banking organizations in the state. Consummation of the proposal would not significantly increase the concentration of banking resources in Missouri.

Applicant's subsidiary bank competes directly with Bank in the Atchison County banking market.² Applicant is the smallest of five banking organizations in the market, controlling deposits of \$13.5 million, representing 12.8 percent of total market deposits. Bank is the fourth largest bank in the market, controlling \$14 million in deposits, representing 13.3 percent of total market deposits. Upon consummation of this proposal, Applicant would become the second largest commercial banking organization in the market, controlling 26 percent of total market deposits. The market is considered highly concentrated, with a four-firm

concentration ratio of 87.2 percent and a Herfindahl-Hirschman Index ("HHI") of 2288. Upon consummation of this proposal the four-firm concentration ratio would increase to 100 percent and the HHI would increase by 339 points to 2627.³

Although consummation of this proposal would eliminate existing competition between Applicant and Bank, several factors mitigate the competitive effects of the proposal. Competition between Applicant's subsidiary bank and Bank has been reduced by the long-term involvement of a principal of Applicant and its subsidiary bank as a management official of Bank. In addition, the Board has previously considered the impact of market demographic and economic factors as factors mitigating adverse competitive effects. 4 The Atchison County banking market is a rural, sparsely populated area experiencing a severe economic decline. The population of Atchison County has declined and the county lags the state in most measures of economic performance, including per capita income. Both Applicant and Bank are small in absolute size and may derive some economies of scale from consolidation. In addition, Applicant and Bank have not been active competitors in the market, as evidenced by their relatively low shares of loans, rates of deposit growth, and ratios of loans to deposits.⁵ Finally, one of the competing organizations that would remain in the market is a subsidiary of the seventh largest bank holding company in the state. Consequently, the Board has determined that, in view of all of the facts of record, consummation of this proposal would not have a significant adverse effect on existing competition in the Atchison County banking market. Thus, the Board concludes that competitive aspects are consistent with approval.

The financial and managerial resources of Applicant, its subsidiary bank, and Bank are consistent with approval. Considerations relating to the convenience and needs of the communities to be served are also consistent with approval.

^{1.} All banking data are as of December 31, 1986.

^{2.} The Atchison County banking market is approximated by Atchison County, Missouri.

^{3.} Under the revised Department of Justice Merger Guidelines (49 Federal Register 26,823 (June 29, 1984)), any market in which the post-merger HHI is over 1800 is considered highly concentrated, and the Department is likely to challenge a merger that increases the HHI by more than 50 points unless other factors indicate that the merger will not substantially lessen competition. The Department of Justice has informed the Board that a bank merger or acquisition is likely to be challenged (in the absence of other factors indicating an anticompetitive effect) if the post-merger HHI is at least 1800 and the merger increases the HHI by at least 200 points.

The Department of Justice has informed Board staff that the Department will not challenge this acquisition on antitrust grounds.

^{4.} See St. Ansgar State Bank, 70 FEDERAL RESERVE BULLETIN 473 (1984).

^{5.} As of December 31, 1985, the loan to deposit ratios of Bank and Applicant were 8.33 and 5.35, respectively. The loan to deposit ratios for the three competing banks in the market averaged 41.03.

Based on the foregoing and other factors of record, the Board has determined that the application should be, and hereby is, approved. The acquisition shall not be consummated before the thirtieth calendar day following the effective date of this Order or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City, acting pursuant to delegated authority.

By order of the Board of Governors, effective October 26, 1987.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, Heller, and Kelley.

JAMES MCAFEE [SEAL] Associate Secretary of the Board

M & F Capital Corporation Macon, Mississippi

Order Approving Formation of a Bank Holding Company

M & F Capital Corporation, Macon, Mississippi, has applied for the Board's approval pursuant to section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) (the "BHC Act") to become a bank holding company by acquiring all of the voting shares of Merchants and Farmers Bank, Macon, Mississippi ("Bank").

Notice of the application, affording interested persons an opportunity to submit comments, has been published (52 Federal Register 27,460 (1987)). The time for filing comments has expired, and the Board has considered the application and all comments received, including comments in opposition to the application from the Mississippi Legal Services Coalition ("Mississippi Coalition"), in light of the factors set forth in section 3(c) of the BHC Act (12 U.S.C. § 1842(c)).

Applicant is a nonoperating company with no subsidiaries, formed for the purpose of acquiring Bank. Bank is the largest of three commercial banking organizations in the Noxubee County market, controlling deposits of \$42.2 million representing 60.3 percent of total market deposits. None of the principals of Applicant or Bank is associated with any other financial institutions located within the relevant banking

market. Accordingly, consummation of this proposal would not have any significant effect on existing or probable future competition, nor would it significantly increase the concentration of banking resources in the relevant banking market.

The financial and managerial resources of Applicant and Bank are considered satisfactory and consistent with approval. In considering the convenience and needs of the communities to be served, the Board has also taken into account Applicant's record under the Community Reinvestment Act (12 U.S.C. § 2901 et seq. ("CRA")). The CRA requires the Board, in its evaluation of a bank holding company application, to assess the record of an applicant in meeting the credit needs of the entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation. The Board has received comments from the Mississippi Coalition, which represents low-income and minority groups and individuals in Macon. The Mississippi Coalition contends that Bank has failed to "accurately serve" the convenience and needs of low-income and minority persons in the Noxubee and Kemper County area.³

In accordance with the Board's practice and procedures for handling protested applications,⁴ the Board reviewed the allegations made by the Mississippi Coalition and Applicant's response. Bank has met privately with the Mississippi Coalition and has made a number of commitments designed to tailor its services more closely to the convenience and needs of its community. Bank has committed to: continue to pursue the establishment of a mortgage loan department offering VA and FHA loans; advertise that an unaffiliated mortgage company will accept VA and FHA applications on Bank's premises; increase the number of home improvement and business loans made to minorities; advertise loan products on a local radio station; and increase its number of minority employees and officers.

The Board notes that the FDIC has previously determined that the CRA record of Bank is satisfactory. The Board has carefully reviewed Bank's record in meeting the convenience and needs of all segments

The Noxubee County market is approximated by Noxubee County, Mississippi.

^{2.} All banking data are as of December 31, 1986.

^{3.} The Mississippi Coalition asserts that the Board should not approve this application, unless Bank establishes an affirmative lending program that would target loans to low income and minority neighborhoods and areas within Bank's service area; increases the number of home improvement loans, short-term working capital for neighborhood businesses, loans for community development corporations, and FHA, FmHA and VA loans made to minorities and low-to-moderate income residents; includes an aggressive marketing program such as targeting advertising to minority groups and neighborhoods; and establishes a dollar goal for lending in the low-income and minority neighborhoods in Bank's service area.

^{4.} See 12 C.F.R. § 262.25(c).

of its community.⁵ Based on this review and after taking into account Bank's commitments to enhance its service to meet the convenience and needs of its community, including low- and moderate-income segments, the Board concludes that convenience and needs considerations are consistent with approval of this application.⁶

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. The acquisition of Bank shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than 90 days after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of St. Louis, pursuant to delegated authority.

By order of the Board of Governors, effective October 13, 1987.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, and Heller. Absent and not voting: Governor Kelley.

JAMES MCAFEE

[SEAL]

Associate Secretary of the Board

Wake Bancorp, Inc. Wakefield, Massachusetts

Order Approving Formation of a Bank Holding Company

Wake Bancorp, Inc., Wakefield, Massachusetts, has applied for the Board's approval pursuant to section

3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) (the "BHC Act") to become a bank holding company by acquiring all of the voting shares of Wakefield Savings Bank, Wakefield, Massachusetts ("Bank"), an FDIC insured savings bank. Bank presently operates as a mutual association and will convert to stock form in connection with the acquisition

Notice of the application, affording interested persons an opportunity to submit comments, has been published (52 Federal Register 28,192 (1987)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. § 1842(c)).

Applicant is a nonoperating company formed for the purpose of acquiring Bank. Bank is the 75th largest banking organization in Massachusetts, with approximately \$215.4 million in deposits, controlling less than one percent of the total deposits in banking organizations in Massachusetts.²

Bank is the 15th largest of 58 banking organizations in the Boston market,³ controlling less than one percent of total deposits in banks in the market.⁴ In view of the fact that the proposal represents a corporate reorganization, consummation of this proposal would not result in any adverse effects upon competition or increase the concentration of banking resources in any relevant market. Accordingly, the Board concludes that competitive considerations under the BHC Act are consistent with approval.

In evaluating the financial resources of Applicant and Bank, the Board has taken into consideration the fact that Bank engages through subsidiaries in real estate investment and development activities authorized pursuant to state law. The Board notes that the Competitive Equality Banking Act of 1987 amended the BHC Act to provide that "notwithstanding any other provision of [the BHC] Act, any qualified savings bank which is a subsidiary of a bank holding company may engage, directly or through a subsidiary, in any activity in which such savings bank may engage (as a State chartered savings bank) pursuant to express, incidental or implied powers under any stat-

^{5.} The record demonstrates that Bank has made over 50 percent of its installment loans secured by real estate or mobile homes and 28 percent of its total commercial real estate loans to minority residents. Moreover, over 50 percent of the government guaranteed student loans made by bank and over half of its automobile loans were made to minority residents. In addition, Bank currently offers free checking to persons 65 years and older as well as checking accounts at reduced rates for low-income individuals. As noted above, Applicant has committed to continue to pursue establishing a VA, FHA, or FmHA mortgage loan program.

^{6.} The Mississippi Coalition has also requested that the Board order a public meeting to receive public testimony on the issues presented by these applications. Although section 3(b) of the BHC Act does not require a public meeting or formal hearing in this instance, the Board may, in any case, order a public meeting or hearing. See 12 C.F.R. § 262.25(d). In its request for a public meeting, the Mississippi Coalition does not present any material questions of fact that are in dispute. In accordance with the Board's guidelines, Applicant and the Mississippi Coalition have met privately to discuss this application and have exchanged extensive correspondence. In the Board's view, the parties have had ample opportunity to present their arguments in writing and respond to one another's submissions. Based on these facts, the Board has determined that a public hearing or an informal public meeting is not necessary to clarify the record in this case and would serve no useful purpose. Accordingly, the Mississippi Coalition's request for a public meeting is hereby denied.

^{1.} As an FDIC insured institution, Bank would qualify as a "bank" under section 2(c) of the BHC Act, as amended by section 101(a) of the Competitive Equality Banking Act of 1987 ("CEBA"), Pub. L. No. 100–86, 100 Stat. 552, 554 (1987) (to be codified at 12 U.S.C. § 1841(c)).

^{2.} Deposit data are as of March 31, 1987.

^{3.} The Boston market is approximated by the Boston RMA minus the New Hampshire towns of Brentwood, Chester, and Derry plus the Massachusetts towns of Ayer, Berlin, Groton, Harvard, Pepperell, Shirley, and those portions of Bellingham, Carver, Lakeville, Middleboro, and Plymouth not already included in the RMA.

^{4.} Market data are as of June 30, 1985.

ute or regulation, or under any judicial interpretation of any law, of the State in which such savings bank is located." Under this provision, a qualified savings bank may engage directly or through a subsidiary in any activity permitted by state law for the savings bank to conduct as a savings bank, even though the Board has not determined that the activity is closely related to banking under section 4(c)(8) of the BHC Act and the activity is thus not generally permissible for bank holding companies under the Act.

While this provision of CEBA authorizes qualified savings banks to conduct activities that may not be permissible for bank holding companies under the BHC Act, CEBA does not negate the Board's responsibility in the context of every bank holding company application to evaluate the financial resources of the bank holding company and the bank to be acquired.6 In addition, under the International Lending Supervision Act ("ILSA"), the Board is responsible for ensuring that bank holding companies and their nonbank subsidiaries maintain adequate levels of capital.⁷ In this regard, the Board notes that the Senate Report on this provision of CEBA states that, while it was intended to allow qualified savings banks to engage in state authorized activities, "[t]he Board would, however, be authorized under its general supervisory authority over bank holding companies and their subsidiaries to prevent unsafe or unsound activities; or to require the bank holding company to maintain higher levels of capital to support such activities."8

As part of the Board's analysis in this case, including its evaluation of the capital and financial resources of the bank holding company and bank involved, the Board has considered the risk to Applicant and Bank of the real estate development activities conducted by Bank through its nonbank subsidiaries. The Board has serious reservations with this and similar applications by bank holding companies to acquire savings banks engaged directly or through subsidiaries in real estate development activities. In its December 31, 1986 proposal regarding the real estate development activities of bank holding companies and their subsidiaries, the Board expressed the view that such activities involve a significant degree of risk beyond other activities conducted by banks and bank holding companies. (52 Federal Register 543 (1987)).

Accordingly, in its proposal the Board asked for comment on a series of prudential safety and soundness limitations to ensure that the risk from these activities is insulated to the maximum extent possible from federally insured banking organizations affiliated within a bank holding company system. Among these limitations was a proposed requirement that real estate development activities be authorized only through a nonbank subsidiary of the bank holding company and not through subsidiaries of a holding company bank. The Board indicated such a requirement would be intended to separate the subsidiary banks of bank holding companies as much as possible from real estate development activities, including the direct legal obligation for losses that might result from the conduct of such activities.

In the Board's view, the conduct of real estate development activities through a holding company subsidiary rather than a bank subsidiary would provide more effective corporate separateness between the bank and the real estate affiliate with a corresponding minimization of the risk that the bank's resources and those of the federal safety net would be used to support the affiliate or could be affected by difficulties of the affiliate. Under such a structure, the bank would be removed from the affiliate's ownership chain and the concomitant responsibility for the management and operations of the affiliate. This separation would be particularly important from the standpoint of corporate separateness in a situation of financial stress. The Board notes that in such a situation the management of the bank may feel compelled to dispense with normal corporate formalities and take direct control over the management and operations of a subsidiary, thereby subjecting the bank to the increased risk of liability for the losses of that subsidiary. The Board also notes that in such a situation the bank may feel pressured to lend its resources to the affiliate or its customers or business associates, to relax normal credit judgments, or to provide financial support to its subsidiary, or to customers or business associates of the subsidiary, other than through a direct credit extension.

Moreover, under the holding company structure, the losses of the holding company affiliate would not be consolidated with the bank's earnings and customers of the bank and the public may be less likely to perceive the affiliate to be an integral part of the bank, providing additional safeguards for maintaining public confidence in the bank.

The Board intends to review these and other questions raised by this application, including questions related to the appropriate capital requirements for bank holding companies that control savings banks engaged in real estate development activities as well as for their nonbank subsidiaries, in connection with the Board's pending real estate investment and develop-

^{5. 101} Stat. at 561-562 (to be codified at 12 U.S.C. § 1842(f)). This exception applies only to "qualified savings banks." A savings bank loses its qualification if it is controlled by a bank holding company that has less than 70 percent of its assets invested in savings banks.

^{6. 12} U.S.C. § 1842(c).

^{7. 12} U.S.C. §§ 3901-3912.

^{8.} S. Rep. No. 100-19, 100th Cong., 1st Sess. 36 (1987).

ment proposal. 52 Federal Register 543, 551 (1987). In that proceeding, the Board has asked for comment on whether it should modify its existing regulation (section 225.22(d)(2)) to prohibit holding company banks from holding shares of a company engaged in real estate development activities. The Board has also proposed for consideration whether additional safety and soundness limitations are appropriate for the conduct by bank holding companies and their nonbank subsidiaries of real estate development activities.

The Board believes that it is appropriate to resolve these important issues that affect a large number of other institutions through a rulemaking proceeding in which the Board has had the benefit of extensive public comment and in which all parties interested in this question may participate. In this regard, the Board has also today asked for comment on certain additional measures that the Board is considering to ensure that banking organizations and the resources of the federal safety net are appropriately insulated from the risks of real estate development activities. These include proposals to determine that a real estate subsidiary of a bank, as well as under certain circumstances, a partner or co-venturer of such a subsidiary, would be an "affiliate" of the bank for purposes of section 23A of the Federal Reserve Act (12 U.S.C. § 371c(b)(2)), thereby regulating transactions between the bank and its real estate subsidiaries and partners; to impose special capital requirements on bank holding companies and their nonbank subsidiaries engaged in real estate development activities; and to require, as a matter of safety and soundness and as a condition of its approval for bank holding companies to acquire qualified savings banks, that new real estate development investments by such organizations be made by the parent bank holding company or its direct nonbank subsidiaries rather than by the bank or subsidiaries of the bank. This latter proposal would be in the event the Board authorizes bank holding companies to engage in real estate development activities (subject to certain prudential limitations) at the expiration of the real estate moratorium imposed under Title II of CEBA. In the interim, the Board will continue to evaluate applications involving qualified savings banks on a case by case basis.

Based upon its review of the facts in this case as well as certain commitments by Applicant regarding its capital position and that of Bank, the Board concludes that the financial and managerial resources and future prospects of Applicant and Bank are consistent with approval of the proposal. In reaching this decision, the Board has relied upon Applicant's commitment to comply with the results of the Board's real estate development rulemaking. The Board's approval of this application is conditioned upon compliance with these commitments.

Considerations relating to the convenience and needs of the community to be served are consistent with approval.

Bank also underwrites and sells Savings Bank Life Insurance ("SBLI") through a department of Bank pursuant to state law. Such activities are expressly authorized for qualified savings banks under CEBA, 10 and are thus not subject to the insurance moratorium provisions of Title II of CEBA. 11 The Board has previously expressed its opinion that these activities do not raise serious financial or safety and soundness concerns. Accordingly, the Board has determined that Bank's SBLI activities do not preclude approval of this application.

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. The acquisition of Bank shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than 90 days after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston, pursuant to delegated authority.

By order of the Board of Governors, effective October 30, 1987.

Voting for this action: Chairman Greenspan and Governors Seger, Heller, and Kelley. Voting against this action: Governors Johnson and Angell.

JAMES MCAFEE
[SEAL] Associate Secretary of the Board

We share the concerns expressed by the majority of the Board in this case regarding the risks associated

^{9.} Under section 225.22(d)(2) of Regulation Y, a state bank subsidiary of a bank holding company may, without Board approval under the BHC Act, acquire and retain all of the voting shares of a company that engages solely in activities that the bank may conduct directly at locations at which the bank may conduct the activity and subject to the same limitations as would apply to the bank. 12 C.F.R. 225.22(d)(2).

^{10. 101} Stat. at 562 (to be codified at 12 U.S.C. § 1842(f)(3)).

^{11.} Section 201(b)(3) and (4), 101 Stat. at 582.

with the conduct of real estate investment and development activities by banks and subsidiaries of banks. Given the nature of these activities and their significant risk beyond the risks associated with traditional banking and permissible nonbanking activities, we believe that, consistent with safe and sound banking practices, these activities should not be conducted by a subsidiary of a holding company bank as proposed by Applicant.

We note that the Board has proposed regulations that would establish a framework and prudential limitations for the conduct of real estate development activities within a holding company system. As the majority notes, among these limitations is a requirement that the activities be conducted only by a direct nonbank subsidiary of the bank holding company and not through a subsidiary of a holding company bank. In light of the significant risks associated with real estate development activities, we would defer action on this application until after the Board completes its rulemaking proposal in this area. In the event that the Board were to adopt the proposed framework for the conduct of real estate development activities within a bank holding company system, we would condition approval of this application on a requirement that the Applicant conduct its real estate activities within that prudential framework. Accordingly, we do not agree with the Board's decision to approve the application at this time.

October 30, 1987

ORDERS ISSUED UNDER SECTION 4 OF THE BANK HOLDING COMPANY ACT

First Interstate Bancorp Los Angeles, California

Order Conditionally Approving Application to Underwrite and Deal in Certain Securities to a Limited Extent

First Interstate Bancorp, Los Angeles, California, a bank holding company within the meaning of the Bank Holding Company Act, 12 U.S.C. § 1841 et seq. ("BHC Act"), has applied for the Board's approval under section 4(c)(8) of the BHC Act and section 225.21(a) of the Board's Regulation Y, 12 C.F.R. § 225.21(a), to engage through a wholly owned subsidiary, First Interstate Capital Markets, Inc. ("Company"), in underwriting and dealing in, on a limited basis, the following securities:

(1) municipal revenue bonds, including certain industrial development bonds;

- (2) 1-4 family mortgage-related securities; and
- (3) commercial paper.¹

Company currently underwrites and deals in securities that state member banks are permitted to underwrite and deal in under section 16 of the Banking Act of 1933 (the "Glass-Steagall Act") (12 U.S.C. §§ 24 Seventh and 335) (hereinafter "bank-eligible securities"), as permitted by section 225.25(b)(16) of Regulation Y (12 C.F.R. § 225.25(b)(16)).

Applicant, with consolidated assets of \$51.8 billion, is the ninth largest banking organization in the nation.² It operates 24 subsidiary banks in California, Oregon, Arizona, Washington, Nevada, Utah, Idaho, Colorado, New Mexico, Montana, Oklahoma, and Alaska and engages in a broad range of permissible nonbanking activities in the United States.

Notice of the application, affording interested parties an opportunity to submit comments, has been given in accordance with section 3(b) of the BHC Act (52 Federal Register 32,606 (1987)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the BHC Act.

On April 30, the Board approved applications by Citicorp, J.P. Morgan and Bankers Trust to underwrite and deal in, through their bank-eligible securities underwriting subsidiaries, 1-4 family mortgagebacked securities, municipal revenue bonds (and certain industrial development bonds) and commercial paper (hereinafter "bank-ineligible securities"). The Board concluded that the underwriting subsidiaries would not be "engaged principally" in underwriting or dealing in securities within the meaning of section 20 of the Glass-Steagall Act provided they derived no more than 5 percent of their total gross revenues from underwriting and dealing in the bank-ineligible securities over any two-year period and their underwriting and dealing activities did not exceed 5 percent of the market for each particular type of security involved.4 The Board further found that, subject to the prudential

^{1.} Applicant proposes to conduct Company's underwriting and dealing activity in these securities in the same manner and to the same extent as previously approved by the Board in its Orders approving similar applications. See Citicorp, J.P. Morgan & Co. Incorporated, Bankers Trust New York Corporation, 73 FEDERAL RESERVE BULLETIN 473 (1987).

^{2.} Asset data are as of June 30, 1987. Banking data are as of December 31, 1986.

^{3.} Citicorp/Morgan/Bankers Trust, supra. The Board subsequently approved similar applications by a number of other bank holding companies. See, e.g., Marine Midland Banks, Incorporated, 73 FEDERAL RESERVE BULLETIN 738 n.3 (1987).

^{4.} Section 20 of the Glass-Steagall Act (12 U.S.C. § 377) prohibits the affiliation of a member bank with "any corporation . . . engaged principally in the issue, flotation, underwriting, public sale, or distribution at wholesale or retail or through syndicate participation of stocks, bonds, debentures, notes, or other securities"

framework of limitations established in those cases to address the potential for conflicts of interest, unsound banking practices or other adverse effects, the proposed underwriting and dealing activities were so closely related to banking as to be a proper incident thereto within the meaning of section 4(c)(8) of the BHC Act.

For the reasons set forth in the Board's Citicorp/ Morgan/Bankers Trust Order, the Board concludes that Applicant's proposal to engage through Company in underwriting and dealing in the proposed bankineligible securities⁵ would not result in a violation of section 20 of the Glass-Steagall Act and is closely related and a proper incident to banking within the meaning of section 4(c)(8) of the BHC Act, provided Applicant limits Company's activities as set forth in the Citicorp/Morgan/Bankers/Trust Order. Accordingly, the Board has determined to approve the application subject to all of the terms and conditions established in the Citicorp/Morgan/Bankers Trust Order. The Board hereby adopts and incorporates herein by reference the reasoning and analysis contained in the Citicorp/Morgan/Bankers Trust Order.

The Board's approval of this application extends only to activities conducted within the limitations of the Citicorp/Morgan/Bankers Trust Order, including the Board's reservation of authority to establish additional limitations to ensure that the subsidiary's activities are consistent with safety and soundness, conflict of interest and other relevant considerations under the BHC Act. Underwriting or dealing in the approved securities in any manner other than as approved in that Order is not within the scope of the Board's approval and is not authorized for Company.

The Board's determination is subject to all of the conditions set forth in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b), and to the Board's authority to require modification or termination of the activities of the holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The Board notes that Title II of the Competitive Equality Banking Act of 1987, enacted on August 10, 1987, prohibits the Board from authorizing a bank holding company to engage in underwriting or dealing in securities under the "engaged principally" provision of the Glass-Steagall Act, unless the effective date of the Order is delayed until the expiration of a moratorium time period established under the Act.⁶ Accordingly, the Board has determined to delay the effective date of this Order until the moratorium ends on March 1, 1988.

In addition, the Board notes that the SIA has sought judicial review in the U.S. Court of Appeals for the Second Circuit of the Citicorp/Morgan/Bankers Trust Order to which this Order pertains, as well as subsequent Board Orders approving the underwriting applications of a number of other bank holding companies. The Board notes that the court has stayed the effectiveness of these Board Orders pending judicial review. In light of the pendency of this litigation, the Board has determined that this Order should be stayed for such time as the stay of the prior decisions is effective.

By order of the Board of Governors, effective October 7, 1987.

Voting for this action: Vice Chairman Johnson and Governors Seger, Heller, and Kelley. Voting against this action: Governor Angell. Absent and not voting: Chairman Greenspan.

JAMES MCAFEE
[SEAL] Associate Secretary of the Board

Dissenting Statement of Governor Angell

I regret I am unable to join the majority in approving this application.

As I have stated previously, the regret reflects the fact that, as a matter of policy, I support the idea that affiliates of bank holding companies underwrite and deal in commercial paper, municipal revenue bonds, and 1–4 family mortgage-related securities, the activities involved in the Board's decision. Moreover, I agree generally with the nature of the limitations placed upon the activities in the Board decision, assuming the threshold question of their legality in the particular form proposed can be answered affirmatively.

My point of difference involves precisely that question of law. Section 20 of the Glass-Steagall Act provides that no member bank may be affiliated with

^{5.} The industrial development bonds approved in those applications and for Applicant in this case are only those tax exempt bonds in which the governmental issuer, or the governmental unit on behalf of which the bonds are issued, is the owner for federal income tax purposes of the financed facility (such as airports, mass commuting facilities, and water pollution control facilities). Without further approval from the Board, Company may underwrite or deal in only these types of industrial development bonds.

^{6.} Pub. L. No. 100-86, §§ 201-02, 101 Stat. 552, 582 (1987).

^{1.} I have joined earlier decisions of the Board authorizing some of these activities in non-securities affiliates.

any corporation engaged principally in the underwriting of stocks, bonds, debentures, notes or other securities. I believe the plain words of the statute, read together with earlier Supreme Court and circuit opinions, as I understand them, indicate that government securities are indeed "securities" within the meaning of section 20. Consequently, it appears to me that the application approved here, as a matter of law, involves affiliations of member banks with corporations that are in fact not only "principally engaged" in dealing and underwriting in securities, but in fact would be wholly engaged in such activities, thereby exceeding the authority of law.²

My point is not merely one of legal formalisms. The interpretation adopted by the majority would appear to make feasible, as a matter of law if not Board policy, the affiliations of banks with some of the principal underwriting firms or investment houses of the country. Such a legal result, I feel, is inconsistent with the intent of Congress in passing the Glass-Steagall Act.

As the Board as a whole has repeatedly urged, the plain and desirable remedy to this legal and substantive morass is a fresh Congressional mandate. I urge the Congress to provide straightforwardly the authority for bank holding companies to conduct, with appropriate safeguards, the kinds of activities permitted by the Board in its decision, the practical import of which is confined to a relative handful of large bank holding companies with substantial government securities operations.

October 7, 1987

Manufacturers Hanover Corporation New York, New York

Order Approving Application to Engage in Combined Investment Advisory and Securities Brokerage Activities

Manufacturers Hanover Corporation, New York, New York, a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied for the Board's approval under section 4(c)(8) of the BHC Act and section 225.21(a) of the Board's Regulation Y, 12 C.F.R. § 225.21(a), to expand the authority of its wholly owned subsidiary, Manufacturers Hanover Securities Corporation ("MHSC"), to include the activities of providing investment advisory and research services to "Insti-

tutional Customers," and furnishing general economic information and advice, general economic statistical forecasting services and industry studies to such customers.²

MHSC presently engages in securities brokerage services throughout the United States pursuant to section 225.25(b)(15) of Regulation Y, 12 C.F.R. § 225.25(b)(15), and now proposes to combine investment advice with its brokerage services for institutional customers only.³

Applicant, with total consolidated assets of \$73.8 billion, is the sixth largest commercial banking organization in the nation.⁴ It operates two subsidiary banks in New York and Delaware and engages directly and through other subsidiaries in a broad range of nonbanking activities.

Notice of the application, affording interested persons an opportunity to submit comments on the proposal, has been duly published (52 Federal Register 2,807 (1987)). The time for filing comments has expired, and the Board has considered the application and all comments received, including comments op-

^{2.} Without elaborating on the legal debate reviewed in the Board's Order, I wish to reiterate that I fully support earlier Board decisions allowing the underwriting and dealing of government securities to take place in an affiliate. My point of disagreement is whether that authority can, in effect, be used to bootstrap securities activities that Congress clearly wished to restrain or prohibit.

^{1.} An Institutional Customer is defined by Applicant to be a person that is:

⁽¹⁾ a bank (acting in an individual or fiduciary capacity); a savings and loan association; an insurance company; a registered investment company under the Investment Company Act of 1940; or a corporation, partnership, proprietorship, organization or institutional entity that regularly invests in the types of securities as to which investment advice is given, or that regularly engages in transactions in securities;

⁽²⁾ an employee benefit plan with assets exceeding \$1,000,000 or whose investment decisions are made by a bank, insurance company or investment adviser registered under the Investment Advisers Act of 1940;

⁽³⁾ a natural person whose individual net worth (or joint net worth with his or her spouse) at the time of receipt of the investment advice or brokerage services exceeds \$1,000,000;

⁽⁴⁾ a broker-dealer or option trader registered under the Securities Exchange Act of 1934, or other securities professionals; or

⁽⁵⁾ an entity all of the equity owners of which are Institutional Customers.

^{2.} MHSC will also provide its services to other subsidiaries of the Applicant as permissible servicing activities under section 225.22 of the Board's Regulation Y, 12 C.F.R. § 225.22.

^{3.} In addition, MHSC underwrites and deals in securities that national and state member banks are permitted to underwrite and deal in under the Glass-Steagall Act, as permitted by section 225.25(b)(16) of Regulation Y (12 C.F.R. § 225.25(b)(16)). MHSC also has previously received Board approval under section 4(c)(8) of the BHC Act to underwrite and deal in, to a limited extent, certain municipal revenue bonds (including "public ownership" industrial development bonds), 1-4 family mortgage-related securities, commercial paper and consumer-receivable-related securities, which are eligible for purchase by member banks for their own account but not eligible for member banks to underwrite and deal in ("ineligible securities"). MHSC may not currently underwrite and deal in ineligible securities under the terms of the judicial stay imposed by the U.S. Court of Appeals for the Second Circuit pending its review of the Board's Order authorizing MHSC to engage in that activity and the moratorium contained in the Competitive Equality Banking Act of 1987. Pub. L. No. 100-86, §§ 201-02, 101 Stat. 552, 582 (1987). MHSC's brokerage services are currently conducted separately from its securities underwriting and dealing activities.

^{4.} Banking data are as of June 30, 1987.

posing the proposal from the Securities Industry Association ("SIA"), a national trade association of the securities industry, in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.⁵

Section 4(c)(8) imposes a two-step test for determining the permissibility of nonbanking activities for bank holding companies: (1) whether the activity is closely related to banking; and (2) whether the activity is a "proper incident" to banking-that is, whether the proposed activity can reasonably be expected to produce benefits to the public that outweigh possible adverse effects. 12 U.S.C. § 1843(c)(8).

The Board has previously determined that the combined offering of investment advice with securities execution services to institutional customers from the same bank holding company subsidiary is closely related and a proper incident to banking under section 4(c)(8) of the BHC Act and does not violate the Glass-Steagall Act.⁶ National Westminister Bank PLC, et al., 72 FEDERAL RESERVE BULLETIN 584 (1986) ("NatWest"); J.P. Morgan and Company, Inc. 73 FEDERAL RESERVE BULLETIN 810 (1987) ("J.P. Morgan").

As in *NatWest*, under this proposal, MHSC will not act as principal or take a position (i.e., bear the financial risk) in any securities it brokers or recommends. MHSC will execute a transaction only at the direction of a customer and will not exercise discretion with respect to any customer account. MHSC will not execute any transaction where an affiliate exercises investment discretion without customer authorization. MHSC proposes to offer investment advice, as well as to provide securities execution services, to institutional customers on an integrated basis, i.e., MHSC will not charge an explicit fee for the investment advice and will receive fees only for transactions executed for customers.⁷

Applicant has however proposed several modifications to the conduct of the proposed activities as approved in *NatWest*. These modifications are:

- (1) Applicant proposes to lower the test for institutional customers from the \$5 million threshold approved in NatWest to \$1 million;8
- (2) MHSC would share customer lists with its affiliates, but not confidential information obtained from its customers; and
- (3) MHSC would have officer and director interlocks with the parent bank holding company, Manufacturers Hanover Corporation, but not with its bank affiliates.

In the Board's view and for the reasons set forth below, these modifications do not alter the underlying rationale of the Board's decision in NatWest that the combined activities are closely related to banking or a proper incident thereto.9

Definition of Institutional Customer

Applicant proposes a \$1 million threshold for its institutional customers who would be eligible to receive the combined investment advisory and securities brokerage services. The applicants in *NatWest* proposed a \$5 million threshold for such institutional customers. The Board in its NatWest Order viewed the institutional customers to be served as financially sophisticated and thus unlikely to place undue reliance on investment advice received and better able to detect investment advice motivated by self-interest.

Applicant notes that both it and its subsidiaries generally employ a \$1 million, rather than a \$5 million, threshold for high net worth individuals in connection with their marketing of institutional services and money market products. Moreover, Applicant contends that the proposed \$1 million threshold is consistent with the definition of an "accredited investor" contained in Regulation D promulgated by the SEC

^{5.} The SIA has stated that it opposes the application for the reasons stated in its earlier protest to a virtually identical proposal previously approved by the Board. National Westminister Bank PLC, 72 FED-ERAL RESERVE BULLETIN 584 (1986).

^{6.} The SIA argues that the combination of investment advice and buying and selling securities on behalf of customers constitutes the "public sale" of securities under the Glass-Steagall Act. The SIA also contends that the combination gives rise to the "subtle hazards" the Glass-Steagall Act was meant to eliminate, such as damage to the bank's reputation and its position as an impartial provider of credit.

For the reasons noted in NatWest, and on the basis of the facts appearing in the record, the Board concludes that the combination of investment advice and execution services as proposed here does not constitute a "public sale" of securities for purposes of section 20 or 32 of the Glass-Steagall Act and that the proposal is consistent with the intent of that Act. In this regard, the Board notes that the U.S. Court of Appeals for the District of Columbia Circuit has recently upheld the Board's similar determination in the virtually identical NatWest proposal. Securities Industry Ass'n v. Board of Governors of the Federal Reserve System, 821 F.2d 810 (D.C. Cir. 1987).

In line with NatWest, Applicant has also committed that MHSC will fully disclose its dual role as securities broker and investment

advisor to its customers. MHSC will hold itself out as a separate and distinct corporation with its own properties, assets, liabilities, capital, books and records. All of MHSC's notices, advice, confirmations, correspondence and other documentation will clearly indicate MHSC's separate identity in order to avoid any confusion between MHSC and its bank affiliates. MHSC will specify in all customer agreements that MHSC is solely responsible for its contractual obligations and commitments. The Board notes that MHSC must also advise its customers that its bank affiliates are not responsible for MHSC's obligations. MHSC will not transmit advisory research or recommendations to the commercial lending department of any affil-

^{8.} Applicant's definition of an institutional customer is otherwise identical to that in NatWest and J.P. Morgan.

^{9.} The Board hereby incorporates by reference its rationale and findings in the NatWest and J.P. Morgan Orders regarding the consistency of the proposed activity with the closely-related and proper incident to banking criteria of section 4(c)(8).

under the Securities Act of 1933 regarding private placements of securities. 10 The SEC views such investors as being of sufficient financial sophistication to participate in limited offerings of securities without being furnished the detailed disclosure documents normally required in securities offerings by the Securities Act of 1933.

Applicant further notes that a \$1 million threshold would be consistent with the requirements of the SEC rule promulgated under the Investment Advisers Act of 1940 with respect to clients who may enter into performance compensation arrangements. 11 In such arrangements, the amount of the adviser's compensation is based on a share of the client's capital appreciation or gain. The SEC has limited such arrangements to clients who have at least \$500,000 under an adviser's management or with a net worth of over \$1 million on the theory that such arrangements may lead the adviser to take undue risks with clients' funds. Consequently, only clients who are financially experienced and able to bear the risks associated with performance fees are permitted to enter into such arrangements. 12 Based on these factors, Applicant submits that individuals with a net worth in excess of \$1 million can reasonably be considered as having the sophistication and capacity to bear the risks that are customarily identified with institutional investors.

For these reasons and based upon these facts of record, the Board concludes that, while Applicant's proposal to lower the minimum net worth threshold would result in a substantial increase in the number of qualified customers, those customers would be of sufficient financial sophistication such that the proposal would not be materially different from that approved by the Board in NatWest.

Sharing Customer Lists

Applicant has proposed that MHSC exchange customer lists with its affiliates limited to the names, addresses and telephone numbers of such customers,

and would in no instance convey confidential customer information. The Board in NatWest determined that the commitment of the applicants therein not to exchange customer information, including customer lists, between the full-service brokerage subsidiary and its affiliates would reduce the possibility that depositors of that subsidiary's bank affiliates might be solicited by the brokerage subsidiary for their business. The commitment would thereby mitigate the potential for loss of depositor confidence in the event that such depositors are furnished with poor advice. The commitment was also designed to reduce the possibility that personnel at the brokerage subsidiary would recommend the purchase of securities of a company which borrows from an affiliated bank. thereby indirectly benefitting the bank.

Applicant contends that the exchange of customer lists will not adversely affect the confidence of depositors in Applicant's bank affiliates since MHSC and Applicant's lead bank, Manufacturer Hanover Trust Company ("MHTC"), solicit the same institutional market. Consequently, many potential institutional customers would be solicited by both MHTC and MHSC, even without sharing customer lists. 13

In the Board's view, Applicant's more limited commitment should be sufficient to accomplish the Board's objective of protecting the reputation of Applicant's bank subsidiaries from the investment recommendations of the brokerage subsidiary. The customer lists MHSC will receive from its affiliates will not indicate whether the customers are depositors or borrowers of its bank affiliates or include any information regarding extensions of credit by any affiliate. In addition, the fact that MHSC intends to provide investment advice to institutional customers, who are likely to be financially sophisticated and thus able to appreciate the distinction between a bank and its other affiliates in a holding company, will safeguard against any loss of depositor confidence in the event that such depositors are furnished with poor advice by another affiliate within the bank holding company organization.¹⁴

The Board also notes the limited amount of customer information to be exchanged, which will not include the relationship of the customer to the bank affiliate or any details regarding that relationship. Accordingly, the Board has determined to permit

^{10.} Regulation D defines an "accredited investor" as:

⁽¹⁾ any bank, insurance company, investment company or employee benefit plan;

⁽²⁾ any business development company;

⁽³⁾ any charitable or educational institution with assets of more than \$5 million:

⁽⁴⁾ any director, executive officer or general partner of the issuer;

⁽⁵⁾ any person who purchases at least \$150,000 of the securities being offered, provided the purchase does not exceed 20 percent of his net worth:

⁽⁶⁾ any person with a net worth of more than \$1 million; and

⁽⁷⁾ any person with an annual income of more than \$200,000. 17 C.F.R. § 230.501(a)(6).

^{11. 17} C.F.R. § 275.205-3(b).

^{12.} Investment Advisers Act of 1940 Release No. 1A 996 (November 14, 1985).

^{13.} In support of its position, Applicant notes that MHSC presently maintains a customer list on which many of the customers of its bank affiliates are listed.

^{14.} Moreover, as the Board previously has stated, the potential for loss of depositor confidence is present in every situation where a bank affiliate (or the bank itself through its trust department) provides investment advice. See, e.g., NatWest, 72 FEDERAL RESERVE BUL-LETIN at 589.

Applicant to exchange customer lists with its affiliates, subject to the limitations set forth herein.

Interlocks Between the Brokerage Subsidiary and the Parent Bank Holding Company

Applicant has proposed to have interlocking officers and directors between MHSC and its parent holding company, Manufacturers Hanover Corporation.¹⁵

In the recently decided underwriting cases, including Applicant's own proposal to underwrite and deal in ineligible securities through MHSC,16 the Board addressed the issue of whether a securities subsidiary of a bank holding company may have officer, director or employee interlocks with its parent holding company. The Board determined that a prohibition against such interlocks was unnecessary in those cases to guard against conflicts of interest or other adverse effects. given the absence of such relationships with bank affiliates and the other limitations in those cases designed to separate the bank from the securities affiliates. Applicant has committed not to have officer, director or employee interlocks between MHSC and its bank affiliates. This commitment, in conjunction with the other limitations contained in this Order, will, in the Board's view, adequately guard against conflicts of interest such as unsound lending practices or biased investment advice.

CONCLUSION

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the public benefits associated with consummation of this proposal can reasonably be expected to outweigh possible adverse effects, and that the balance of the public interest factors that the Board is required to consider under section 4(c)(8) of the BHC Act is favorable. Accordingly, the application is hereby approved, subject to the commitments made by Applicant and the conditions (whether explicitly stated or

incorporated by reference) in this Order. This determination is further subject to all of the conditions set forth in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b), and to the Board's authority to require modification or termination of the activities of the holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

This transaction shall not be consummated later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective October 1, 1987.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, Heller, and Kelley.

JAMES McAFEE Associate Secretary of the Board

MCorp Dallas, Texas

[SEAL]

MCorp Financial, Inc. Wilmington, Delaware

Order Approving Acquisition of a Data Processing Company

MCorp, Dallas, Texas, and its wholly owned subsidiary, MCorp Financial, Inc., Wilmington, Delaware, bank holding companies within the meaning of the Bank Holding Company Act ("BHC Act") (12 U.S.C. § 1841 et seq.) (collectively referred to as "Applicant"), have applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.25(b)(7) of the Board's Regulation Y (12 C.F.R. § 225.25(b)(7)) for Applicant's subsidiary MTech Corp., Irving, Texas, to acquire Kalvar Corporation, Minneapolis, Minnesota ("Company"), a company engaged in data processing activities.

Notice of the application, affording interested persons an opportunity to submit comments on the proposal, has been duly published (52 Federal Register 33,878 (1987)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Applicant, through its subsidiary, MTech Corp., seeks to acquire 100 percent of Company and engage

^{15.} In NatWest and J.P. Morgan, the applicants committed not to have interlocking officers or directors among the brokerage subsidiaries and their bank affiliates. In connection with this commitment, the Board in NatWest recognized that, as a practical matter, a bank cannot be completely insulated from the fortunes of a nonbank subsidiary of its holding company, since the securities markets, the general public and the holding company itself typically look upon the bank and its affiliate as part of a consolidated organization. However, the Board also recognized that conducting nonbanking activities in a separate affiliate can to some extent prevent problems associated with the nonbanking activity from affecting the bank. Applicant, of course, has proposed interlocks between MHSC and parent holding company only, and not with any of Applicant's bank subsidiaries.

^{16.} Manufacturers Hanover Corporation, 73 FEDERAL RESERVE BULLETIN 620 (1987).

in data processing and computer output to microfilm ("Com") services, including offering enhanced Com services to MTech's data processing customers and providing optical storage capability on optical digital disks and computer assisted retrieval for data stored on microfilm and microfiche. Applicant also proposes to sell certain equipment and supplies necessary to utilize the processed microfiche or microfilm, including reading machines, scanners and paper, which, at all times, would constitute less than 30 percent of any packaged offering.²

Applicant maintains that the foregoing activities are permissible under section 4(c)(8) of the BHC Act and the data processing provisions of section 225.25(b)(7) of the Board's Regulation Y (12 C.F.R. 225.25(b)(7)). Applicant's proposal meets the terms of the expanded data processing activities of Regulation Y as revised by the Board in 1982, because the data to be processed or furnished are financial, banking or economic data and the Com services qualify as data processing and data transmission services as those terms are used in the Board's data processing regulation. In addition, Applicant's proposal to engage in the sale of equipment and supplies to Com customers³ meets the requirements of section 225.25(b)(7)(iii).⁴

In evaluating this application, the Board has considered the financial and managerial resources of Applicant and its subsidiaries. The Board notes that the acquisition will be made through MTech, Applicant's data processing subsidiary, which is in satisfactory financial condition. The proposed acquisition is considered relatively small and should enhance MTech's earnings. Overall, financial and managerial factors are consistent with approval.

In view of the facts of record, the Board concludes that Applicant's acquisition of Company would not significantly affect competition in any relevant market. Furthermore, there is no evidence in the record to indicate that approval of this proposal would result in undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices, or other adverse effects on the public interest. Accordingly, the Board has determined that the balance of the public interest factors it must consider under section 4(c)(8) of the BHC Act is favorable and consistent with approval of the application.

Based on the foregoing and other facts of record, the Board has determined that the application under section 4 of the BHC Act should be, and hereby is, approved. The acquisition shall not occur later than three months after the effective date of this Order, unless the latter period is extended for good cause by the Board or by the Federal Reserve Bank of Dallas, acting pursuant to delegated authority. Applicant's acquisition of Company is subject to all of the conditions set forth in Regulation Y, including sections 225.4(d) and 225.23(b) (12 C.F.R. §§ 225.4(d) and 225.23(b)), and to the Board's authority to require such modifications or termination of activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective October 14, 1987.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, and Heller. Absent and not voting: Governor Kelley.

JAMES MCAFEE [SEAL] Associate Secretary of the Board

Trustcorp, Inc. Toledo, Ohio

Order Approving Application to Retain Shares of a General Insurance Agency

Trustcorp, Inc., Toledo, Ohio, a registered bank holding company within the meaning of the Bank Holding Company Act ("BHC Act") (12 U.S.C. § 1841 et seq.), has applied for the Board's approval under section 4(c)(8)(D) of the BHC Act (12 U.S.C. § 1843(c)(8)(D)) and section 225.25(b)(8)(iv) of Regulation Y (12 C.F.R. § 225.25(b)(8)(iv)) to retain shares of St. Joseph Insurance Agency, Inc., South Bend, Indiana ("Agency"), a company that proposes to

^{1.} Com services involve reading computer data from magnetic tape, disk or diskette, and through the use of software, microcomputers and recorders transferring the data to microfilm or microfiche.

^{2.} Applicant also proposes to provide, as an incident to the above services, a process involving the conversion of large volumes of banking, financial and economic data from paper onto microfilm or microfiche, pursuant to section 225.123(e)(1) and (e)(2) of the Board's Regulation Y (12 C.F.R. § 225.123(e)(1) and (e)(2)). The Com services equipment would not be purchased for the purposes of marketing this incidental service, but rather would be the minimum equipment needed to properly perform permissible Com services.

^{3.} Applicant has not proposed to produce or manufacture such equipment and supplies.

^{4.} The Board notes that, in 1975, it determined that a bank holding company could offer Com services as a permissible data processing activity only if the Com services were offered as an output option for data otherwise being permissibly processed by the bank holding company system and not as a separate line of endeavor. 12 C.F.R. § 225.123(e)(4). The Com services of Company are materially different from the type of Com services which were being performed in 1975 when the Board adopted its interpretation. In light of the technological developments in the Com industry and the Board's expansion of the permissible data processing activities of Regulation Y in 1982, the Board intends to revoke its 1975 Com services interpretation. 12 C.F.R. § 225.123(e)(4).

engage in general insurance agency activities in Indiana and adjacent states. These activities include all types of credit and noncredit-related personal, commercial and casualty insurance, except life insurance.

Notice of this application, affording opportunity for interested persons to submit comment, has been duly published (51 Federal Register 31,665 (1987)). The time for filing comments has expired, and the Board has considered all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Applicant operates six subsidiary banks in Indiana and is the 8th largest commercial banking organization in that state. Applicant controls \$945 million of deposits in Indiana representing 3.71 percent of the total deposits in commercial banks in that state. Applicant also owns banks in Ohio and Michigan, controlling deposits representing 2.35 percent and 0.28 percent of total deposits, respectively, in those states.² Applicant engages through wholly-owned subsidiaries in various nonbanking activities which the Board previously has determined are permissible for bank holding companies.

Agency is a wholly owned subsidiary of St. Joseph Bancorporation, Inc., South Bend, Indiana ("St. Joseph"), which was acquired by Trustcorp in December 1986 pursuant to approval granted by the Federal Reserve Bank of Cleveland. TrustCorp filed a separate application seeking approval from the Board to retain indirect control of Agency pursuant to section 4(c)(8)(G) of the BHC Act ("exemption G").3 The Board denied that application on the grounds that a company qualifying for exemption G rights may not retain its grandfather status upon acquisition by another non-grandfathered bank holding company. Trustcorp, Inc., 73 Federal Reserve Bulletin 827 (1987). The Board noted, however, that its determination was without prejudice to any claim that Agency might have to more limited grandfather privileges under exemption D.4 Based on the unique legislative history and limited scope of that provision, the Board previously has determined that exemption D rights do not expire following the purchase of a grandfathered company by another banking firm.⁵ Trustcorp thereafter submitted this application under section 4(c)(8)(D) of the BHC Act for approval to retain Agency's general insurance activities.

Trustcorp claims that Agency was engaged lawfully in general insurance activities on May 1, 1982, the grandfather date under exemption D, that Agency did not thereafter abandon its insurance operations, and that Agency therefore may retain its exemption D rights after its acquisition by Trustcorp. Protestants argue to the contrary that Agency forfeited its grandfather status in June 1982 when it sold substantially all of its assets to another local insurance firm, and that Agency consequently has no exemption D rights to preserve.

Based on the record of this case, the Board believes that Agency qualified for exemption D grandfather rights on May 1, 1982 and did not thereafter abandon its authorization under the BHC Act to conduct insurance agency activities. In accordance with Board precedent, Agency may continue to conduct its general insurance operations in Indiana and adjacent states following the proposed acquisition pursuant to exemption D.

The record in this case shows that Agency qualified initially for exemption D grandfather privileges. Agency was established in 1914 and commenced operations selling homeowners and automobile insurance. In 1961, Agency received Board approval to conduct a general insurance business, including all types of credit and noncredit-related personal, commercial and casualty insurance (except life insurance). 47 Federal Reserve Bulletin 290 (1961). The Board notes that Agency still was conducting these activities throughout Indiana on May 1, 1982, and therefore was engaged lawfully in insurance activities on the applicable grandfather date.

In the years following, moreover, Agency effectively preserved its exemption D grandfather status. Despite its sale of assets in June 1982, there is no evidence in the record to suggest that Agency abandoned its authorization under the BHC Act to conduct

^{1.} The Board received comments in opposition to Applicant's proposal from the Independent Insurance Agents of America, Inc.; the National Association of Casualty and Surety Agents; the National Association of Surety Bond Producers; the National Association of Life Underwriters; and the National Association of Professional Insurance Agents ("Protestants").

^{2.} State deposit data are as of March 31, 1987.

^{3.} Exemption G is the broadest exception to the insurance agency and underwriting prohibitions of the Garn-St Germain Depository Institutions Act ("Garn Act") in that it potentially allows a qualifying company to sell any type of insurance anywhere in the country. 12 U.S.C. § 1843(c)(8)(G).

^{4.} Exemption D of the Garn Act provides exception for "any insurance activity which was engaged in by the bank holding company or any of its subsidiaries on May 1, 1982." 12 U.S.C. § 1843(c)(8)(D). Such activities may be conducted in the grandfathered company's home state, states adjacent thereto or any state where the company

was authorized to operate an insurance business before the grandfather date.

On October 3, 1986, the Board amended Regulation Y to include the insurance agency activities delineated in the seven exemptions to the Garn Act among the list of activities that the Board has found to be closely related to banking and permissible within the meaning of section 4(c)(8) of the BHC Act. 51 Federal Register 36,201 (1986), codified at 12 C.F.R. § 225.25(b)(8) (1987).

^{5.} MNC Financial Corporation, 73 FEDERAL RESERVE BULLETIN 740 (1987) and Sovran Financial Corporation, 73 FEDERAL RESERVE BULLETIN 672 (1987).

general insurance activities. On the contrary, in connection with this sale, Agency and the purchasing firm entered a five-year referral/noncompetition agreement, the terms of which show that Agency fully intended to preserve its insurance agency authority. In essence, the agreement permitted Agency to continue soliciting insurance business, but required it to refer all customers to the other agency for a stated fee. During this time, moreover, Agency maintained its status as a corporation in good standing as well as its license to conduct a general insurance agency business in Indiana. Agency also retained officers and directors, rented office space, hired part-time consultants and provided periodic financial reports.

On the basis of these facts, the Board concludes that Agency qualifies for grandfather privileges under exemption D.

The Board previously has determined that any company entitled to engage in insurance agency activities under exemption D does not lose those rights upon its acquisition by another non-grandfathered banking firm, provided that the grandfathered entity retains it separate corporate structure and its insurance activities are not conducted by other companies within the acquiring banking organization. In keeping with this precedent, the Board observes that upon its acquisition by Trustcorp, St. Joseph was retained as a separate bank holding company, and Agency as a separate nonbank subsidiary thereof. As a consequence, Agency's grandfathered insurance activities would be wholly self-contained and isolated from the operations of other Trustcorp subsidiaries. The Board, therefore, concludes that Agency may retain its exemption D grandfather privileges even after its purchase by another non-grandfathered banking firm.

Under the terms of section 4(c)(8)(D), however, Agency may conduct grandfathered insurance activities only in St. Joseph's home state of Indiana, states adjacent thereto, or states in which it lawfully engaged in insurance activities on May 1, 1982. 12 U.S.C. § 1843(c)(8)(D). Because Agency has confined its grandfathered insurance activities to the State of Indiana and has never received approval to conduct insurance operations in any other state, the Board notes that Agency may continue to engage in general insurance activities only in Indiana and adjacent states.

In considering any application under section 4(c)(8) of the BHC Act, the Board must determine whether the proposed activity is a proper incident to banking; that is, whether performance of the activity can reasonably be expected to produce benefits to the public

that outweigh possible adverse effects. As a result of Trustcorp's proposal, consumers in Indiana and adjacent states would benefit from ongoing access to Agency as a source of insurance products and services. The continuation of grandfathered operations by Agency thus would serve to maintain existing business relationships and expectations, and also would preserve Agency as a viable competitor in the insurance agency industry. Conversely, there is no evidence to suggest that Trustcorp's proposal would result in undue concentration of resources, unfair or decreased competition, conflicts of interest or other adverse effects. The balance of public interest factors therefore weighs in favor of Trustcorp's ability to retain indirect control of a company such as Agency that engages in exemption D grandfathered insurance activities.

Based on the foregoing and other facts of record, the Board has determined that the application under section 4 should be, and hereby is, approved. This determination is subject to all of the conditions set forth in Regulation Y, and provided that the insurance activities are conducted solely by Agency, which must remain an independent subsidiary of Trustcorp. It is also subject to the Board's authority to require such modifications or termination of activities of the bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, and prevent evasions of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder.

By order of the Board of Governors, effective October 5, 1987.

Voting for this action: Vice Chairman Johnson and Governors Seger, Angell, Heller, and Kelley. Absent and not voting: Chairman Greenspan.

JAMES MCAFEE
[SEAL] Associate Secretary of the Board

ORDERS ISSUED UNDER SECTIONS 3 AND 4 OF THE BANK HOLDING COMPANY ACT

One National Bancshares, Inc. North Little Rock, Arkansas

Order Approving Formation of a Bank Holding Company and Acquisition of a Nonbanking Company

One National Bancshares, Inc., North Little Rock, Arkansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act of

^{6.} Sovran Financial Corp., 73 FEDERAL RESERVE BULLETIN 672 (1987).

1956, as amended ("BHC Act") (12 U.S.C. § 1842(a)(1)), to become a bank holding company through the consolidation of Hunt and Howell Bancshares, Inc., Fayetteville, Arkansas ("Hunt and Howell"), and First American Bancshares, Inc., North Little Rock, Arkansas ("First American"), and thereby to indirectly acquire the following bank subsidiaries: First National Bank of Fayetteville, Fayetteville, Arkansas; One National Bank of North Little Rock, North Little Rock, Arkansas; One National Bank of Little Rock, Little Rock, Arkansas; and One National Bank of Hot Springs, Hot Springs, Arkansas. Applicant has also applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23(a)(2) of Regulation Y (12 C.F.R. § 225.23(a)(2)) to acquire First American's nonbanking subsidiary, First American Life Insurance Company, North Little Rock, Arkansas, and thereby engage in the issuance of credit-related life and disability insurance. These activities have been previously determined by the Board to be closely related to banking pursuant to section 4(c)(8)(A) of the BHC Act (12 U.S.C. § 1843(c)(8)(A)) and section 225.25(b)(8) of the Board's Regulation Y (12 C.F.R. § 225.25(b)(8)).

Notice of the application, affording interested persons an opportunity to submit comments, has been published (52 Federal Register 29,066 (1987)). The time for filing comments has expired, and the Board has considered the application and all comments received, including comments submitted by the Little Rock Community Reinvestment Alliance ("Protestant"), in light of the factors set forth in sections 3(c) and 4(c)(8) of the BHC Act.

Applicant is a nonoperating company with no subsidiaries, formed for the purpose of acquiring Hunt and Howell and First American. Currently, Applicant, Hunt and Howell, and First American are controlled by the same individuals, with the proposed transactions representing a reorganization of existing ownership interests. The Hunt and Howell/First American banking chain is the sixth largest commercial banking organization in Arkansas, with total deposits of approximately \$493.5 million, representing approximately 3.1 percent of total deposits in commercial banks in the state. Based on all the facts of record, the Board believes that consummation of the proposal would have no significantly adverse effect on the concentration of banking resources in the state.

The Board has considered the effects of the proposal upon competition in the relevant banking markets. Hunt and Howell and First American do not operate in the same banking market, and are controlled by the same individuals.² Based on the facts of this case, consummation of this proposal would not result in any adverse effect upon existing or future competition or increase the concentration of banking resources in any relevant banking market. Accordingly, the Board concludes that competitive factors are consistent with approval.

The financial and managerial resources of Applicant and the banks to be acquired are considered satisfactory and consistent with approval. In considering the convenience and needs of the communities to be served, the Board has also taken into account Applicant's record under the Community Reinvestment Act (12 U.S.C. § 2901 et seq.) ("CRA"). The CRA requires the Board, in its evaluation of a bank holding company application, to assess the record of an applicant in meeting the credit needs of the entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation. The Board has received comments from Protestant, which represents low-income and minority groups and individuals in Little Rock. Protestant contends that One National Bank of North Little Rock ("Bank") has failed to serve the convenience and needs of lowincome and minority persons in the Little Rock area.³

The Board has carefully reviewed Bank's record in meeting the convenience and needs of all segments of its community. The Board notes that all of the banks to be acquired by Applicant, including Bank, have received satisfactory CRA ratings at the most recent examinations.

Applicant acquired control of First American and Bank in October 1986, after the date of Bank's last examination, and replaced the prior management of

^{1.} Banking data are as of December 31, 1986.

^{2.} The First National Bank of Fayetteville operates in the Fayetteville/Springdale banking market, which is approximated by Benton and Washington Counties, Arkansas.

One National Bank of North Little Rock and One National Bank of Little Rock operate in the Little Rock banking market, which is approximated by Pulaski and Saline Counties, plus part of Lonoke County, Arkansas. The Office of the Comptroller of the Currency ("OCC") has approved the merger of these two banks.

One National Bank of Hot Springs operates in the Garland County banking market, which is approximated by Garland County, Arkansas.

^{3.} Protestant asserts that the Board should not approve this application unless Bank provides below market financing and other favorable terms for mortgages and commercial loans for residents and businesses in the low- and moderate- income areas; establishes a Community Development Corporation to assist residents in the target areas in meeting residential and community needs; markets home-improvement and housing rehabilitation loans in designated areas; establishes a CRA Advisory Board to review loan denials and withdrawals; increases advertising and marketing in targeted areas; provides loans to non-profit entities; and establishes lifeline services. As part of the proposal, Protestant requests that Bank commit to provide \$9 million in loans, \$600 thousand in lines of credit for organizations to be designated by Protestant, and \$130 thousand in grants or matching funds to Protestant or its affiliates.

Bank. At that time, Bank was in less than satisfactory financial condition. In the year since it gained control of Bank, Applicant has devoted most of its resources to improving the financial condition of Bank, and has achieved significant improvement in the asset quality and earnings of Bank. Applicant expects that the new management, which has a satisfactory CRA record in its other banks, will also improve the CRA performance of Bank. In this regard, Applicant has provided the following commitments to the Board:

- 1. Creation of Mortgage Loan Department. Within six months, Bank will open a full-service residential mortgage lending department. The manager of this department will develop a written plan to market real estate loans throughout the delineated community, specifically addressing low- and moderate-income neighborhoods. Bank will solicit comments from community leaders in low- and moderate-income areas of Little Rock and North Little Rock in formulating its plan.
- 2. Lending. Consistent with safe and sound banking practices, Bank will fund all FHA, VA and conventional real estate loans and small business loans in low- and moderate-income areas that meet Bank's underwriting standards.
- 3. Community Outreach Program. Within three months, Bank will initiate a comprehensive community outreach program designed to educate the banking public in low- and moderate-income areas on loan application preparation and loan terms and availability, especially as these relate to subparagraphs (1) and (2) above.
- 4. Community Service Officer. A Community Service Officer will be designated by the president of Bank. The Community Service Officer will be properly trained to manage the Community Outreach Program within the three months allowed for its establishment. The Community Service Officer will serve as a point of contact for community groups, and will monitor the Bank's CRA compliance as well as the commitments contained herein and will report directly to the president of Bank on CRA-related matters.
- 5. Responsiveness to the Community. In addition to Bank's ongoing assessment of the credit needs of the community as required by current regulations, Bank will initiate quarterly meetings with community leaders from low- and moderate-income neighborhoods of Little Rock and North Little Rock, to receive recommendations concerning the credit needs of the delineated community, including low- and moderate-income neighborhoods.

In this regard, Applicant has committed to provide the Reserve Bank with semi-annual reports concerning Bank's progress in implementing its commitments to the Board concerning Bank's CRA programs.

In accordance with the Board's practice and procedure for handling protested applications,⁴ the Board reviewed the allegations made by the Protestant and Applicant's response. Bank has met privately with the Protestant and has made a number of commitments designed to tailor its services more closely to the convenience and needs of its community.

The Board notes that this application involves a restructuring of existing ownership interests for the apparent purpose of enabling Applicant to further expand its banking operations. Any such expansion will require an application to the Board. At such time, the Board will carefully scrutinize such an application to determine whether Applicant has made substantial measurable progress in fulfilling the commitments it has made to the Board to improve its service to the convenience and needs of its community.

Based on all the facts of record and after taking into account Bank's commitments to enhance its service to meet the convenience and needs of its community, including low- and moderate-income segments, the Board concludes that convenience and needs considerations are consistent with approval of this application.⁵

As indicated earlier, Applicant also has applied, pursuant to section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) to engage in the issuance of credit life and disability insurance through First American Life Insurance Company ("Company"). These activities have been previously determined by the Board to be closely related to banking pursuant to section 4(c)(8)(A) of the BHC Act (12 U.S.C. § 1843(c)(8)(A)) and section 225.25(b)(8) of the Board's Regulation Y (12 C.F.R. § 225.25(b)(8)). Because Applicant does not currently engage in this activity, the Board concludes that the proposal would not have any significant adverse effect on existing or probable future competition in any relevant market.

^{4.} See 12 C.F.R. § 262.25(c).

^{5.} Protestant has also requested that the Board order a public hearing to receive public testimony on the issues presented by the application. Although section 3(b) of the BHC Act does not require a public meeting or formal hearing in this instance, the Board may, in any case, order a public meeting or formal hearing. See 12 C.F.R. § 262.3(e). The Board's Rules of Procedure also provide that a public meeting may be held to clarify factual issues related to an application or to provide an opportunity for interested persons to testify. 12 C.F.R. § 262.25(d). Protestant does not present any material questions of fact that are in dispute. In accordance with the Board's guidelines, Applicant and Protestant have met privately to discuss this application and have exchanged extensive correspondence. Based on these facts, the Board has determined that a public hearing or an informal public meeting is not necessary to clarify the record in this case and would serve no useful purpose. Accordingly, Protestant's request for a public hearing or public meeting is hereby denied.

There is no evidence in the record to indicate that approval of this proposal would result in decreased competition in other areas or in undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, and other adverse effects on the public interest. Accordingly, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the BHC Act is favorable and consistent with approval of the application.

Based on the foregoing and other facts of record, the Board has determined that the applications should be. and hereby are, approved. The acquisition of banks in this case shall not be consummated before the thirtieth calendar day following the effective date of this Order, and the entire transaction shall be consummated no later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of St. Louis, acting pursuant to delegated authority. The determination as to Applicant's nonbanking activities are subject to all of the conditions contained in Regulation Y, including those in sections 225.4(d) and 225.3(b) (12 C.F.R. §§ 225.4(d) and 225.23(b)(3)), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective October 26, 1987.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, Heller, and Kelley.

> JAMES MCAFEE Associate Secretary of the Board

Sovran Financial Corporation Norfolk, Virginia

Order Approving Acquisition of a Bank Holding Company and a Bank

Sovran Financial Corporation, Norfolk, Virginia ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act (12 U.S.C. § 1841 et seq.) (the "Act"), has applied for the Board's approval under section 3 of the Act (12 U.S.C. § 1842) to acquire Commerce Union Corporation, Nashville, Tennessee ("Company"), and thereby indirectly to acquire its subsidiary banks: Commerce Union Bank, Nashville, Tennessee; Commerce Union Bank/Chattanooga, Chattanooga, Tennessee: Commerce Union Bank/Clarksville, Clarksville, Tennessee; Commerce Union Bank/Eastern, Oak Ridge, Tennessee; Commerce Union Bank/Greeneville, Greeneville, Tennessee; Commerce Union Bank of Memphis, Memphis, Tennessee; Commerce Union Bank/Tri-Cities, Johnson City, Tennessee; Commerce Union Bank/Union City, Union City, Tennessee; Williamson County Bank, Franklin, Tennessee; First National Bank of Lewisburg, Lewisburg, Tennessee; and Planters Bank and Trust Company, Hopkinsville, Kentucky. Applicant also has applied for the Board's approval under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) to acquire Commerce Union Realty Services, Inc., Nashville, Tennessee, and thereby engage in brokering commercial loans, and Tennessee Valley Life Insurance Company, Nashville, Tennessee, and thereby engage in reinsuring credit life, accident, and health insurance directly related to extensions of credit by the subsidiary banks of Company. These activities are authorized for bank holding companies pursuant to the Board's Regulation Y, 12 C.F.R. §§ 225.25(b)(1) and (8). Finally, Applicant has provided notice to the Board under section 4(c)(14) of the Act of its intention to acquire Commerce Trading Corporation, Nashville, Tennessee, an export trading company.

Notice of the applications, affording opportunity for interested persons to submit comments, has been published (52 Federal Register 27,724, 32,054 (1987)). The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in sections 3(c) and 4(c)(8) of the Act.

Applicant is the largest commercial banking organization in Virginia with domestic deposits of approximately \$8.3 billion,² representing approximately 20.4 percent of the total deposits in commercial banks in Virginia.³ Company is the 4th largest commercial banking organization in Tennessee with domestic deposits of approximately \$3.1 billion,⁴ representing approximately 9.7 percent of the total deposits in commercial banks in Tennessee.

[SEAL]

^{1.} In connection with this application, both Applicant and Company have applied for the Board's approval under section 3 of the Act to acquire Security Bank and Trust Company, Centerville, Tennessee ("Bank"). In order to effectuate the acquisition as a non-taxable reorganization, Company will acquire Bank after the consummation of Applicant's acquisition of Company.

^{2.} State data are as of December 31, 1986.

^{3.} Applicant also controls deposits of approximately \$3.2 billion in the District of Columbia, Maryland, and Delaware.

^{4.} Company also controls approximately \$161.9 million in deposits in a subsidiary bank in Kentucky, representing approximately less than one percent of the total deposits in commercial banks in Kentucky.

Section 3(d) of the Act, 12 U.S.C. § 1842(d), the Douglas Amendment, prohibits the Board from approving an application by a bank holding company to acquire a bank located outside the bank holding company's home state, unless such acquisition is "specifically authorized by the statute laws of the state in which such bank is located, by language to that effect and not merely by implication." In this case, Company controls banks in two states: Tennessee and Kentucky. The Tennessee Regional Reciprocal Banking Act (the "Tennessee Act") authorizes a "regional bank holding company" to acquire a Tennessee bank or bank holding company under certain conditions. A "regional bank holding company" is defined by the Tennessee Act as a bank holding company that has its principal place of business in a state within a specified region, and that controls banks within the region that account for more than 80 percent of the total deposits held by all of its bank subsidiaries (the "80 percent deposit test"). Applicant is a bank holding company with its principal place of business in Virginia, a state within the Tennessee Act's region. Applicant, however, does not meet the 80 percent deposit test until after the proposed acquisition.

Tennessee's Commissioner of Financial Institutions has issued an interpretation of the Tennessee Act which states that the 80 percent deposit test is to be applied as of the moment the acquisition is consumated, rather than immediately prior to the acquisition. Further, the Tennessee Commissioner has informed the Board that Applicant's proposals to acquire Company and Bank are permissible under the Tennessee Act, and accordingly, the Commissioner has no objection to the proposals.

Kentucky law authorizes a bank holding company having its principal place of business in any state to acquire a Kentucky bank if that state allows a Kentucky bank holding company to acquire a bank in that state.7 The Kentucky Commissioner of Banking has informed the Board that Applicant's proposal to acquire Planters Bank and Trust Company, Hopkinsville, Kentucky, appears permissible under Kentucky law, and accordingly, the Kentucky Commissioner has no objection to the proposal. Based on the foregoing factors and its own review of the record, the Board has

The Board has considered the effects of the proposal upon competition in the relevant banking markets. Applicant and Company compete in the Bristol-Kingsport market. 8 Applicant is the fifth largest commercial banking organization in the market with deposits of approximately \$108.1 million, representing approximately 9.6 percent of the total deposits in commercial banking organizations in the market. 9 Company is the eighth largest commercial banking organization in the market with deposits of approximately \$52.0 million, representing approximately 4.6 percent of total deposits in commercial banking organizations in the market. Upon consummation of Applicant's acquisition of Company, Applicant will become the second largest commercial banking organization in the market with deposits of approximately \$160.1 million, representing approximately 14.3 percent of the total deposits in commercial banking organizations in the market. The Herfindahl-Hirschman Index would increase by 89 points to 1622, remaining moderately concentrated. In view of the market shares involved and the small increase in concentration in the market, consummation of Applicant's acquisition of Company would not have a substantial adverse effect in the Bristol-Kingsport market.10

The Board also has considered the effects of the proposed acquisition on probable future competition in markets in which Applicant and Company do not compete. In view of the number of probable future entrants into those markets, the Board concludes that consummation of this proposal would not have a significant adverse effect on probable future competition in any relevant banking market.

The financial and managerial resources of Applicant, Company, and Bank are satisfactory. In considering the convenience and needs of the communities to be served, the Board has taken into account the records of Applicant and Company under the Community Reinvestment Act ("CRA"), 12 U.S.C. § 2901 et seq. 11 The Board has received comments from an

determined that the proposed interstate acquisitions are specifically authorized by the statute laws of Tennessee and Kentucky and thus Board approval is not prohibited by the Douglas Amendment.

^{5.} A bank holding company's home state for purposes of the Douglas Amendment is that state in which the total deposits of its banking subsidiaries were largest on July 1, 1966, or on the date it became a bank holding company, whichever date is later. 12 U.S.C. § 1842

^{6.} Tenn. Code Ann. § 45-12-101 et seq. (1986). See, e.g., Dominion Bancshares (Nashville City Bank and Trust Company), 72 FEDERAL RESERVE BULLETIN 847 (1986) (approved by the Federal Reserve Bank of Richmond acting pursuant to authority delegated by the Board)

^{7.} Ky. Rev. Stat. § 287.900(6) (Michie/Bobbs - Merrill 1986).

^{8.} The Bristol-Kingsport market is approximated by the Bristol, Virginia RMA and the Kingsport, Tennessee RMA.

Market data are as of June 30, 1986.

^{10.} Because Applicant and Company do not operate a banking subsidiary in any market in which Bank operates, consummation of Applicant and Company's acquisition of Bank would not eliminate significant existing competition in any relevant banking market.

^{11.} The CRA requires the Board, in its evaluation of a bank holding company application, to assess the record of an applicant in meeting the credit needs of the entire community, including the low- and moderate-income neighborhoods, consistent with safe and sound operation.

individual regarding the record of one of Applicant's subsidiary banks. In an attempt to resolve the concerns raised by the protest, representatives of the bank involved have met and are continuing to meet with the individual regarding the matter raised by the protest. Applicant also has taken steps to increase the awareness of the CRA of the officers of the bank, and will follow this with continuing officer training programs.

The Board has reviewed the record of Applicant in serving the credit and deposit needs of the communities to be served. The Board notes that the Office of the Comptroller of the Currency ("OCC") has expressed certain concerns regarding the CRA record of Applicant's lead bank, Sovran Bank, N.A., Richmond. Virginia. In response, the bank has submitted a plan to the OCC describing specific corrective actions to be taken to strengthen its performance, and has provided the OCC with an update on the bank's CRA activity designed to better document current performance. The OCC has indicated that it is satisfied with the bank's response. Further, the primary regulators of Applicant's remaining bank subsidiaries and of Company and its subsidiaries have determined that the CRA performance of these institutions is satisfactory or better. Based on the foregoing factors and all the facts of record, the Board concludes that convenience and needs considerations are consistent with approval.

As indicated earlier, Applicant also has applied, pursuant to section 4(c)(8), to acquire certain non-banking subsidiaries of Company. Applicant operates subsidiaries which originate residential first mortgage loans that compete with Company's subsidiaries in such activity in the Nashville market.¹² In view of the numerous existing and potential competitors in the market and *de minimis* market shares involved, the Board concludes that the proposal would not have any significant adverse effect on existing or probable future competition in this market.

There is no evidence in the record to indicate that approval of this proposal would result in decreased competition in any other market or undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest. Accordingly, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the Act is favorable and consistent with approval of the applications to acquire Company's nonbanking subsidiaries and activities.

The Board also has considered the notice of Applicant's proposed investment in Commerce Trading

Corporation under section 4(c)(14) of the Act. Based on the facts of record, the Board has determined that disapproval of the proposed investment is not warranted.

Based on the foregoing and other facts of record, the Board has determined that the applications should be, and hereby are, approved. The acquisitions shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order. unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Richmond, acting pursuant to delegated authority. The determinations as to Applicant's nonbanking activities are subject to all of the conditions contained in Regulation Y, including those in sections 225.4(d) and 225.23(b)(3) (12 C.F.R. §§ 225.4(d) and 225.23(b)(3)), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective October 1, 1987.

Voting for this action: Chairman Greenspan and Governors Johnson, Seger, Angell, Heller, and Kelley.

JAMES McAfee
Associate Secretary of the Board

U.S. Bancorp Portland, Oregon

[SEAL]

Order Approving Acquisition of a Bank Holding Company

U.S. Bancorp, Portland, Oregon, a bank holding company within the meaning of the Bank Holding Company Act (12 U.S.C. § 1841 et seq.) (the "Act"), has applied for the Board's approval under section 3 of the Act (12 U.S.C. § 1842) to acquire Peoples Ban Corporation, Seattle, Washington ("Peoples"), and thereby indirectly to acquire its subsidiary bank, Peoples National Bank of Washington, Seattle, Washington.

Applicant also has applied under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.23(a)(2) of Regulation Y (12 C.F.R. § 225.23(a)(2)) to acquire the nonbanking subsidiaries of Peoples. These subsidiaries include the following: Peoples Discount Brokerage Company, Seattle, Washington, and thereby engage in discount brokerage activities; Peoples Insurance, Inc., Seattle, Washington, and thereby engage in the sale of property, casualty, and credit life

^{12.} The Nashville market is approximated by the counties of Davidson, Rutherford, Williamson, and Wilson, and the southern half of the counties of Robertson and Sumner, all in Tennessee.

and disability insurance by the bank holding company; Peoples Services Corporation, Seattle, Washington, and thereby engage in escrow company activities; and Peoples Computer Services, Inc., Seattle, Washington, and thereby engage in data processing activities. These activities are authorized for bank holding companies pursuant to the Board's Regulation Y, 12 C.F.R. §§ 225.25(b)(3), (7), (8)(iv) and (15).

Notice of the applications, affording interested persons an opportunity to submit comments, has been published (52 Federal Register 24,343 (1987)). The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in sections 3(c) and 4(c)(8) of the Act.

Section 3(d) of the Act, 12 U.S.C. § 1842(d), the Douglas Amendment, prohibits the Board from approving an application by a bank holding company to acquire a bank located outside of the bank holding company's home state, unless the acquisition is "specifically authorized by the statute laws of the state in which such bank is located, by language to that effect and not merely by implication." Applicant's home state is Oregon. The Board has previously determined that Washington's interstate banking statute expressly authorizes an Oregon bank holding company, such as Applicant, to acquire a Washington bank holding company, such as Peoples. Accordingly, approval of Applicant's proposal to acquire Peoples is not barred by the Douglas Amendment.

Applicant is the largest commercial banking organization in Oregon, with deposits in Oregon of approximately \$5.7 billion, representing approximately 39.5 percent of the total deposits in commercial banks in that state.² Applicant is also the sixth largest commercial banking organization in Washington, controlling deposits of \$1.5 billion, representing 6.0 percent of commercial bank deposits in the state. Peoples is the fourth largest banking organization in Washington with deposits of \$2.1 billion, representing 8.2 percent of the deposits in commercial banks in the state.

Upon consummation of the proposed transaction, Applicant will become the third largest banking organization in Washington, with total deposits of \$3.6 billion, representing approximately 14.2 percent of total deposits in commercial banks in the state. Consummation of this proposal would not have any significant adverse effect on the concentration of banking resources in Washington.

Applicant and Peoples compete directly in the Seattle, Portland, Yakima, Tri-Cities and Moses Lake-Othello banking markets. In the Seattle³ and Portland⁴ markets, consummation of the proposal would result in an increase of less than 50 points in the Herfindahl-Hirschman Index ("HHI") and numerous competitors would remain in each market.⁵ Accordingly, consummation of the proposal would not have a significant effect on competition in either market.

In the Tri-Cities banking market, Applicant is the third largest of seven commercial banking organizations, controlling \$86 million in deposits, which represents 16.9 percent of total deposits in commercial banks in the market. Peoples is the fourth largest commercial banking organization in the market, controlling \$78 million in deposits, which represents 15.0 percent of total deposits in commercial banks in that market. The Tri-Cities banking market is highly concentrated with the four largest commercial banks controlling 87.8 percent of deposits in that market. Following acquisition of Peoples, Applicant would become the largest commercial banking organization in the market, controlling 31.9 percent of the deposits in commercial banks in the market. The four-firm concentration ratio would increase by 4.5 percentage points to 92.3 and the HHI for the market would increase by 508 points to 2777.

In the Yakima County banking market, Applicant is the fifth largest of eight commercial banking organizations, controlling \$48 million in deposits, which represents 6.6 percent of the deposits in commercial banks in the market. Peoples is the third largest commercial banking organization in the market, controlling \$136 million in deposits, which represents 18.6 percent of total deposits in commercial banks in the market. The Yakima County market is concentrated with a four-

^{1.} A bank holding company's home state for purposes of the Douglas Amendment is that state in which the total deposits of its banking subsidiaries were largest on July 1, 1966, or on the date it became a bank holding company, whichever date is later. 12 U.S.C. § 1842(d).

^{2.} State banking data are as of December 31, 1986. Local banking data are as of June 30, 1985, unless otherwise noted.

^{3.} The Seattle banking market is approximated by the Seattle-Tacoma-Everett RMA.

^{4.} The Portland banking market is approximated by the Portland RMA.

^{5.} Under the revised Department of Justice Merger Guidelines (49 Federal Register 26,823) a market in which the post-merger HHI is over 1800 is considered concentrated. In such markets, the Department is likely to challenge a merger that increases the HHI by more than 50 points. The Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the postmerger HHI is at least 1800 and the merger increases the HHI by at least 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anticompetitive effects implicitly recognizes the competitive effect of limited purpose lenders and other non-depository financial entities.

^{6.} The Tri-Cities banking market is approximated by the Pasco-Kennewick-Richland RMA.

^{7.} The Yakima banking market is approximated by Yakima County, Washington.

firm concentration ratio of 81.6 percent. Upon consummation of this proposal, Applicant would become the second largest commercial banking organization in the market, controlling \$184 million in deposits, representing 25.2 percent of the market share. The fourfirm concentration ratio in the market would increase to 88.2 percent, and the HHI would increase by 246 points to 2047.

In the Moses Lake-Othello banking market, 8 Applicant is the smallest of the six commercial banking organizations in the market, with total deposits of \$15.2 million, representing 5.8 percent of the deposits in commercial banks in the market.9 Company is the largest commercial banking organization in the market, with deposits of \$81.2 million, representing 31.2 percent of the deposits in commercial banks in the market. After consummation of the proposal, Applicant's share of the deposits in commercial banks in the market would be 37.0 percent. The Moses Lake-Othello banking market is considered highly concentrated with a four-firm concentration ratio of 86.9 percent which, upon consummation, would increase to 92.7 percent. The HHI would increase by 363 points to 2511.

Although consummation of this proposal would eliminate some existing competition between Applicant and Peoples in the Yakima County, Tri-Cities and Moses Lake-Othello banking markets, numerous other commercial banking organizations would continue to operate in each market after consummation of the proposal. In addition, the Board has considered the presence of thrift institutions in these banking markets in its analysis of this proposal. These institutions account for a significant percentage of the total deposits in each of the markets. The Board previously has indicated that thrift institutions have become, or have the potential to become, major competitors of commercial banks. 10 Thrift institutions already exert a considerable competitive influence in the market as providers of NOW accounts and consumer loans, and many are engaged in the business of making commercial loans. Based upon the number, size, market shares and commercial lending activities of thrift institutions in their markets, the Board has concluded that thrift institutions exert a significant competitive influence that mitigates the anticompetitive effects of this proposal in the Yakima, Tri-Cities and Moses Lake-Othello banking markets. 11

On the basis of the above facts and other facts of record, the Board concludes that consummation of Applicant's proposal would not have a significantly adverse effect on existing competition in any relevant market.

The financial and managerial resources of Applicant and Peoples as well as their bank subsidiaries are consistent with approval.

In considering the convenience and needs of the communities to be served, the Board has taken into account the records of the subsidiary banks of Applicant and Peoples under the Community Reinvestment Act ("CRA"), 12 U.S.C. § 2901 et seq. 12 The Board has received comments regarding the CRA record of Peoples National Bank of Washington ("PNB") from the South End Seattle Community Organization ("SESCO") and the Yakima County Community Reinvestment Committee ("Yakima Committee"). The protestants generally allege PNB has failed to meet the credit needs of the low- and moderate-income areas of Seattle and Yakima. In addition, one of the protestants alleges that PNB does not meet the credit needs of minority areas in the community it serves. Further, the protestants allege that PNB is not making special efforts, such as communication, marketing, or special programs, to ascertain or to meet the credit needs of its community.

In accordance with the Board's practice and procedures for handling protested applications, 13 the Board reviewed the protestants' allegations and Applicant's response to the allegations. In an attempt to resolve the concerns raised by the protests, Applicant and PNB have met with SESCO and the Yakima Committee on several occasions to discuss the issues raised by

^{8.} The Moses Lake-Othello banking market is approximated by southern Grant County, Washington, and the city of Othello in Adams County, Washington.

^{9.} Data for the Moses Lake-Othello banking market are as of June 30. 1986.

^{10.} National City Corporation, 70 FEDERAL RESERVE BULLETIN 743 (1984); The Chase Manhattan Corporation, 70 FEDERAL RESERVE BULLETIN 529 (1984); NCNB Bancorporation, 70 FEDERAL RESERVE BULLETIN 225 (1984); General Bancshares Corporation, 69 FEDERAL RESERVE BULLETIN 802 (1983); First Tennessee Corporation, 69 FEDERAL RESERVE BULLETIN 298 (1983).

^{11.} The following data indicate the market share and the change in the HHI if 50 percent of the deposits controlled by thrift institutions were included in the calculation of market concentration:

In the Yakima County market, Applicant and Peoples would control 5.0 percent and 14.1 percent of total market deposits, respectively. The HHI would increase by 140 points to 1329 upon consummation of the proposal.

In the Tri-Cities banking market, Applicant and Peoples would control 12.4 percent and 11.3 percent of total market deposits, respectively. The HHI would increase by 280 points to 1662 upon consummation of the proposal.

In the Moses Lake-Othello banking market, Applicant and Peoples would control 5.0 percent and 26.9 percent of total market deposits, respectively. The HHI would increase by 269 points to 1930 upon consummation of the proposal.

^{12.} The CRA requires the Board, in its evaluation of a bank holding company application, to take into account the record of the applicant's subsidiary banks in meeting the credit needs of the entire community, including the low- and moderate-income neighborhoods, as reflected in the examinations by the bank's primary federal banking regulator. 12 U.S.C. § 2903.

^{13.} See 12 C.F.R. § 262.25(c).

the protestants. The parties, however, were unable to come to a resolution of their differences.

Initially, the Board notes that PNB as well as Applicant's subsidiary banks have received satisfactory CRA assessments from their primary supervisory agencies. Furthermore, Applicant has adopted an extensive plan to enhance PNB's service to its communities. Applicant has indicated that it will adopt the following measures:

- 1. PNB will conduct educational seminars in the South End community of Seattle, to provide residents with financial counseling regarding residential loans and small business loans, as well as promotional campaigns, to market its products, including the use of price incentives;
- 2. PNB will continue to meet with community organizations, including SESCO, to review community needs and determine appropriate courses of action; and
- 3. PNB has established goals to increase residential real estate and small business loans in the South End community of Seattle.

Applicant has adopted a CRA plan for the Yakima area similar to that adopted for South End:

- 1. PNB will increase its marketing efforts in all segments of the Yakima market and has pledged to continue to meet with the Yakima Committee and other members of the community to ascertain community banking needs;
- 2. PNB has committed to render financial assistance to the City of Yakima Multi-Family Rehabilitation Program;
- 3. PNB will consider "sweat equity," i.e., an individual's home improvement efforts, as part of an owner's equity contribution to the purchase of an owner-occupied single-family residence for low- and moderate-income households; and
- 4. PNB has established goals to increase residential real estate and small business loans in Yakima community and will continue to participate in federal, state and local programs aimed at increasing the accessibility of credit to new or undercapitalized small businesses.

Based on Applicant's commitments and the overall satisfactory CRA record of PNB as well as of Applicant's existing subsidiary banks, the Board concludes that convenience and needs considerations in this case are consistent with approval of the applications. 14

As indicated above, Applicant also has applied, pursuant to section 4(c)(8), to acquire certain nonbanking subsidiaries of Peoples. Applicant currently operates nonbanking subsidiaries that offer services similar to those services offered by Peoples. In view of the small market shares of Applicant and Peoples in those geographic areas in which they compete for these services and the large number of competitors for these services, the Board concludes that the proposal would not have any significant adverse effect on existing or probable future competition in any relevant market.

There is no evidence in the record to indicate that approval of this proposal would result in decreased competition, undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects on the public interest. Accordingly, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the Act is favorable and consistent with approval of the applications to acquire Peoples' nonbanking subsidiaries and activities.

Applicant has requested the Board's authorization to retain the insurance agency activities of Peoples' wholly owned subsidiary, Peoples Insurance, Inc., which currently engages in the sale of property, casualty, and credit life and disability insurance pursuant to exemption D of the Garn-St. Germain Depository Institutions Act of 1982 (the "Garn Act"). 15 Exemption D of the Garn Act permits a bank holding company to engage in "any insurance activity which was engaged in by the bank holding company or any of its subsidiaries on May 1, 1982."

On November 25, 1981, Peoples obtained approval for Peoples Insurance, Inc., to engage in the sale of property, casualty and credit life and disability insurance and was engaged in those activities on the grandfathered date, under its former name "Western States Agencies, Inc." Accordingly, Peoples Insurance, Inc., is entitled to continue to sell insurance under exemp-

The Board has previously determined in Sovran Financial Corporation, 73 FEDERAL RESERVE BULLE-TIN 672 (1987), that an insurance agency which is entitled to continue to sell insurance under exemption D does not lose its grandfathered rights if the agency is

^{14.} The protestants requested that the Board order a public meeting. Under the Board's rules, the Board may hold a public meeting on an application to clarify factual issues related to the application and to provide an opportunity for testimony, if appropriate. 12 U.S.C.

^{§ 262.25(}d). In this case, the Federal Reserve Bank of San Francisco has arranged private meetings for this purpose. Moreover, Applicant and the protestants have exchanged extensive correspondences. Based on this and on the other facts of record, the Board has determined that a public meeting would serve no useful purpose. Accordingly, the requests for public meetings are denied.

^{15. 12} U.S.C. § 1843(c)(8)(D). Such activities may be conducted in the grandfathered company's home state, states adjacent thereto or any state where the company was authorized to operate an insurance business before the grandfather date.

acquired by another bank holding company provided the agency maintains its separate corporate structure and its insurance activities are not extended to other subsidiaries within the acquiror's banking organization. Applicant has committed that Peoples Insurance, Inc., will remain a separate subsidiary of Peoples, which will remain a separate bank holding company, and its insurance activities will not be conducted by any of Applicant's subsidiaries. Accordingly, the Board has determined to permit Peoples Insurance, Inc., to continue to engage in insurance activities following its acquisition by Applicant. ¹⁶

Based on the foregoing and other facts of record, the Board has determined that the applications should be, and hereby are, approved. The acquisition of Peoples shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of San Francisco, acting pursuant to delegated authority. The determinations as to Applicant's nonbanking activities are subject to all of the conditions contained in Regulation Y, including those in sections 225.4(d) and 225.23(b)(3) (12 C.F.R. §§ 225.4(d) and 225.23(b)(3)), and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors, effective October 20, 1987.

Voting for this action: Chairman Greenspan and Governors Seger, Angell, Heller, and Kelley. Absent and not voting: Governor Johnson.

16. Pursuant to exemption D, Peoples Insurance, Inc., may sell insurance only in the home state of Peoples under the Douglas Amendment, and states adjacent to Washington.

JAMES MCAFEE
[SEAL] Associate Secretary of the Board

ORDERS APPROVED UNDER BANK HOLDING COMPANY ACT

By Federal Reserve Banks

Recent applications have been approved by the Federal Reserve Banks as listed below. Copies are available upon request to the Reserve Banks.

1. Unless otherwise noted, rates of change are calculated from average

1. Unless otherwise noted, rates of change are calculated from average amounts outstanding in preceding month or quarter.
2. Figures incorporate adjustments for discontinuities associated with the implementation of the Monetary Control Act and other regulatory changes to reserve requirements. To adjust for discontinuities due to changes in reserve requirements on reservable nondeposit liabilities, the sum of such required reserves is subtracted from the actual series. Similarly, in adjusting for discontinuities in the monetary base, required clearing balances and adjustments to compensate for float also are subtracted from the actual series.
3. The monetary base not adjusted for discontinuities consists of total reserves plus required clearing balances and adjustments to compensate for float at Federal Reserve Banks plus the currency component of the money stock less the amount of vault cash holdings of thrift institutions that is included in the currency component of the money stock plus, for institutions not having required to satisfy current reserve requirements. After the introduction of contemporaneous reserve requirements (CRR), currency and vault cash over the amount applied to satisfy current reserve requirements of the monetary base other than excess reserves are seasonally adjusted as a whole, rather than by component, and excess reserves are added on a not seasonally adjusted basis. After CRR, the seasonally adjusted series consists of seasonally adjusted basis, After CRR, the seasonally adjusted series consists of seasonally adjusted basis, plus the seasonally adjusted as a whole.

4. Composition of the money stock measures and debt is as follows:

M1: (1) currency outside the Treasury, Federal Reserve Banks, and the vaults

currency component of the money stock plus the remaining items seasonally adjusted as a whole.

4. Composition of the money stock measures and debt is as follows:
M1: (1) currency outside the Treasury. Federal Reserve Banks, and the vaults of commercial banks; (2) travelers checks of nonbank issuers; (3) demand deposits at all commercial banks other than those due to domestic banks, the U.S. government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float; and (4) other checkable deposits (OCD) consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. The currency and demand deposit components exclude the estimated amount of vault cash and demand deposits respectively held by thrift institutions to service their OCD liabilities.

M2: M1 plus overnight (and continuing contract) repurchase agreements (RPs) issued by all commercial banks and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, Money Market Deposit Accounts (MMDAs), savings and small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$\$100,000), and balances in both taxable and tax-exempt general purpose and broker/dealer money market mutual funds. Excludes individual retirement accounts (IRA) and Keogh balances at depository institutions and money market funds. Also excludes all balances held by U.S.

commercial banks, money market funds (general purpose and broker/dealer), foreign governments and commercial banks, and the U.S. government. Also subtracted is a consolidation adjustment that represents the estimated amount of demand deposits and vault cash held by thrift institutions to service their time and savings deposits.

M3: M2 plus large-denomination time deposits and term RP liabilities (in amounts of \$100,000 or more) issued by commercial banks and thrift institutions, term Eurodollars held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada, and balances in both taxable and tax-exempt, institution-only money market mutual funds. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Also subtracted is a consolidation adjustment that represents the estimated amount of overnight RPs and Eurodollars held by institution-only money market mutual funds. L: M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper and bankers acceptances, net of money market mutual fund holdings of these assets.

Debt: Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments, and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances, and other debt instruments. The source of data on domestic nonfinancial debt is the Federal Reserve Board's flow of funds accounts. Debt data are based on monthly averages. Growth rates for debt reflect adjustments for discontinuities over time in the levels of debt presented in other tables.

5. Sum of overnight RPs and Eurodollars, money market fund balances (general purpose and broker/dealer). MMDAs, and savings and small time deposits less the estimated amount of overnight RPs and Eurodollars he

- Excludes MMDAS.
 Small-denomination time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRA and Keogh accounts at commercial banks and thrifts are subtracted from small time deposits.
 Large-denomination time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.
 Large-denomination time deposits at commercial banks less those held by
- money market mutual funds, depository institutions, and foreign banks and official institutions.
 - 11. Changes calculated from figures shown in table 1.23.

Includes securities loaned—fully guaranteed by U.S. government securities
pledged with Federal Reserve Banks—and excludes any securities sold and
scheduled to be bought back under matched sale-purchase transactions.
 Revised for periods between October 1986 and April 1987. At times during
this interval, outstanding gold certificates were inadvertently in excess of the gold

stock. Revised data not included in this table are available from the Division of Research and Statistics, Banking Section.

3. Excludes required clearing balances and adjustments to compensate for float.

Note. For amounts of currency and coin held as reserves, see table 1.12.

^{1.} Excludes required clearing balances and adjustments to compensate for

Excludes required clearing balances and adjustments to compensate for float.
 Dates refer to the maintenance periods in which the vault cash can be used to satisfy reserve requirements. Under contemporaneous reserve requirements, maintenance periods end 30 days after the lagged computation periods in which the balances are held.
 Equal to all vault cash held during the lagged computation period by institutions having required reserve balances at Federal Reserve Banks plus the amount of vault cash equal to required reserves during the maintenance period at institutions having no required reserve balances.

4. Total vault cash at institutions having no required reserve balances less the amount of vault cash equal to their required reserves during the maintenance period.

^{5.} Total reserves not adjusted for discontinuities consist of reserve balances with Federal Reserve Banks, which exclude required clearing balances and adjustments to compensate for float, plus vault cash used to satisfy reserve requirements. Such vault cash consists of all vault cash held during the lagged

computation period by institutions having required reserve balances at Federal Reserve Banks plus the amount of vault cash equal to required reserves during the maintenance period at institutions having no required reserve balances.

6. Reserve balances with Federal Reserve Banks plus vault cash used to satisfy reserve requirements less required reserves.

7. Extended credit consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as there is with traditional short-term adjustment credit, the money market impact of extended credit is similar to that of nonborrowed reserves.

8. Before February 1984, data are prorated monthly averages of weekly averages, beginning February 1984, data are prorated monthly averages of biweekly averages.

Note: These data also appear in the Board's H.3 (502) release. For address, see inside front cover.

inside front cover.

somewhat above rates on market sources of funds ordinarily will be charged, but in no case will the rate charged be less than the basic discount rate plus 50 basis points. The flexible rate is re-established on the first business day of each two-week reserve maintenance period. At the discretion of the Federal Reserve Bank, the time period for which the basic discount rate is applied may be shortened.

4. For earlier data, see the following publications of the Board of Governors: Banking and Monetary Statistics, 1914-1941, and 1941-1970; Annual Statistical Digest, 1970-1979.

Banking and Monetary Statistics, 1914–1941, and 1941–1970; Annual Statistical Digest, 1970–1979.

In 1980 and 1981, the Federal Reserve applied a surcharge to short-term adjustment credit borrowings by institutions with deposits of \$500 million or more that had borrowed in successive weeks or in more than 4 weeks in a calendar quarter. A 3 percent surcharge was in effect from Mar. 17, 1980 through May 7, 1980. There was no surcharge until Nov. 17, 1980, when a 2 percent surcharge was adopted; the surcharge was subsequently raised to 3 percent on Dec. 5, 1980, and to 4 percent on May 5, 1981. The surcharge was reduced to 3 percent effective Sept. 22, 1981, and to 2 percent effective Oct. 12, 1981. As of Oct. 1, 1981 the formula for applying the surcharge was changed from a calendar quarter to a moving 13-week period. The surcharge was eliminated on Nov. 17, 1981.

^{1.} Adjustment credit is available on a short-term basis to help depository institutions meet temporary needs for funds that cannot be met through reasonable alternative sources. After May 19, 1986, the highest rate established for loans to depository institutions may be charged on adjustment credit loans of unusual size that result from a major operating problem at the borrower's facility. Seasonal credit is available to help smaller depository institutions meet regular, seasonal needs for funds that cannot be met through special industry lenders and that arise from a combination of expected patterns of movement in their deposits and loans. A temporary simplified seasonal program was established on Mar. 8, 1985, and the interest rate was a fixed rate ½ percent above the rate on adjustment credit. The program was re-established on Feb. 18, 1986 and again on Jan. 28, 1987; the rate may be either the same as that for adjustment credit or a fixed rate ½ percent higher.

2. Extended credit is available to depository institutions, where similar assistance is not reasonably available from other sources, when exceptional circumstances or practices involve only a particular institution or when an institution is experiencing difficulties adjusting to changing market conditions over a longer period of time.

period of time.

3. For extended-credit loans outstanding more than 30 days, a flexible rate

1.15 RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS¹

Percent of deposits

Type of deposit, and deposit interval	Depository institution requirements after implementation of the Monetary Control Act			
deposit intervai	Percent of deposits	Effective date		
Net transaction accounts ^{3,4} \$0 million=\$36.7 million More than \$36.7 million	3 12	12/30/86 12/30/86		
Nonpersonal time deposits ⁵ By original maturity Less than 1½ years 1½ years or more	3 0	10/6/86 10/6/83		
Eurocurrency liabilities All types	3	11/13/80		

1. Reserve requirements in effect on Dec. 31, 1986. Required reserves must be held in the form of deposits with Federal Reserve Banks or vault cash. Nonmembers may maintain reserve balances with a Federal Reserve Bank indirectly on a pass-through basis with certain approved institutions. For previous reserve requirements, see earlier editions of the Annual Report and of the FEDERAL RESERVE BULLETIN. Under provisions of the Monetary Control Act, depository institutions include commercial banks, mutual savings banks, savings and loan associations, credit unions, agencies and branches of foreign banks, and Edge corporations. Edge corporations.
2. The Garn-St. Germain Depository Institutions Act of 1982 (Public Law

2. The Garn-St. Germain Depository Institutions Act of 1982 (Public Law 97-320) requires that \$2\$ million of reservable liabilities (transaction accounts, nonpersonal time deposits, and Eurocurrency liabilities) of each depository institution be subject to a zero percent reserve requirement. The Board is to adjust the amount of reservable liabilities subject to this zero percent reserve requirement each year for the succeeding calendar year by 80 percent of the percentage increase in the total reservable liabilities of all depository institutions, measured on an annual basis as of June 30. No corresponding adjustment is to be made in the event of a decrease. On Dec. 30, 1986, the exemption was raised from \$2.6 million to \$2.9 million. In determining the reserve requirements of depository institutions, the exemption shall apply in the following order: (1) net NOW accounts (NOW accounts less allowable deductions); (2) net other transaction accounts; and (3) nonpersonal time deposits or Eurocurrency liabilities starting

with those with the highest reserve ratio. With respect to NOW accounts and other transaction accounts, the exemption applies only to such accounts that would be subject to a 3 percent reserve requirement.

3. Transaction accounts include all deposits on which the account holder is permitted to make withdrawals by negotiable or transferable instruments, payment orders of withdrawal, and telephone and preauthorized transfers in excess of three per month for the purpose of making payments to third persons or others. However, MMDAs and similar accounts subject to the rules that permit no more than six preauthorized, automatic, or other transfers per month, of which no more than three can be checks, are not transaction accounts (such accounts are savings deposits subject to time deposit reserve requirements).

4. The Monetary Control Act of 1980 requires that the amount of transaction accounts against which the 3 percent reserve requirement applies be modified annually by 80 percent of the percentage increase in transaction accounts held by all depository institutions, determined as of June 30 each year. Effective Dec. 30, 1986, the amount was increased from \$31.7 million to \$36.7 million.

5. In general, nonpersonal time deposits are time deposits, including savings

5. In general, nonpersonal time deposits are time deposits, including savings deposits, that are not transaction accounts and in which a beneficial interest is held by a depositor that is not a natural person. Also included are certain transferable time deposits held by natural persons and certain obligations issued to depository institution offices located outside the United States. For details, see section 204.2 of Regulation D.

^{1.} Figures incorporate adjustments for discontinuities associated with the implementation of the Monetary Control Act and other regulatory changes to reserve requirements. To adjust for discontinuities due to changes in reserve requirements on reservable nondeposit liabilities, the sum of such required reserves is subtracted from the actual series. Similarly, in adjusting for discontinuities in the monetary base, required clearing balances and adjustments to compensate for float also are subtracted from the actual series.

2. Total reserves not adjusted for discontinuities consist of reserve balances with Federal Reserve Banks, which exclude required clearing balances and adjustments to compensate for float, plus vault cash held during the lagged computation period by institutions having required reserve balances at Federal Reserve Banks plus the amount of vault cash equal to required reserves during the maintenance period at institutions having no required reserve balances.

3. Extended credit consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as there is with traditional short-term adjustment credit, the money market impact of extended credit is similar to that of nonborrowed reserves.

4. The monetary base not adjusted for discontinuities consists of total reserves plus required clearing balances and adjustments to compensate for float at Federal Descendence of the compensate of the level and the compensate of the compensate for float at Federal

of vault cash holdings of thrift institutions that is included in the currency

of vault cash holdings of thrift institutions that is included in the currency component of the money stock plus, for institutions not having required reserve balances, the excess of current vault cash over the amount applied to satisfy current reserve requirements. After the introduction of contemporaneous reserve requirements (CRR), currency and vault cash figures are measured over the weekly computation period ending Monday.

Before CRR, all components of the monetary base other than excess reserves are seasonally adjusted as a whole, rather than by component, and excess reserves are added on a not seasonally adjusted basis. After CRR, the seasonally adjusted excess reserves on a not seasonally adjusted total reserves, which include excess reserves on a not seasonally adjusted basis, plus the seasonally adjusted currency component of the money stock and the remaining items seasonally adjusted as a whole.

5. Reflects actual reserve requirements, including those on nondeposit liabilities, with no adjustments to eliminate the effects of discontinuities associated with implementation of the Monetary Control Act or other regulatory changes to reserve requirements.

reserve requirements.

Note. Latest monthly and biweekly figures are available from the Board's H.3(502) statistical release. Historical data and estimates of the impact on required reserves of changes in reserve requirements are available from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

plus required clearing balances and adjustments to compensate for float at Federal Reserve Banks and the currency component of the money stock less the amount

For notes see following page.

NOTES TO TABLE 1.21

1. Composition of the money stock measures and debt is as follows:

M1: (1) currency outside the Treasury, Federal Reserve Banks, and the vaults of commercial banks; (2) travelers checks of nonbank issuers; (3) demand deposits at all commercial banks other than those due to domestic banks, the U.S. government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float; and (4) other checkable deposits (OCD) consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. The currency and demand deposits components exclude the estimated amount of vault cash and demand deposits respectively held by thrift institutions to service their OCD liabilities.

M2: M1 plus overnight (and continuing contract) repurchase agreements (RPs) issued by all commercial banks and overnight Eurodollars issued to U.S. residents by foreign branches of U.S banks worldwide, MMDAs, savings and small-denomination time deposits time deposits—including retail RPs—in amounts of less than \$100,000), and balances in both taxable and tax-exempt general purpose and broker/dealer money market mutual funds. Excludes individual retirement accounts (IRA) and Keogh balances at depository institutions and money market funds (general purpose and broker/dealer), foreign governments and commercial banks, and the U.S. government. Also subtracted is a consolidation adjustment that represents the estimated amount of demand deposits and vault cash held by thrift institutions to service their time and savings deposits.

M3: M2 plus large-denomination time deposits and term RP liabilities (in amounts of \$100,000 on one) issued by commercial banks and thrift institutions

thrift institutions to service their time and savings deposits.

M3: M2 plus large-denomination time deposits and term RP liabilities (in amounts of \$100,000 or more) issued by commercial banks and thrift institutions, term Eurodollars held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada, and balances in both taxable and tax-exempt, institution-only money market mutual funds. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Also subtracted is a consolidation adjustment that represents the estimated amount of overnight RPs and Eurodollars held by institution-only money market mutual funds.

L: M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper and bankers acceptances, net of money market mutual fund holdings of these assets.

Debt: Debt of domestic nonfinancial sectors consists of outstanding credit

Debt: Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments, and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances, and other debt instruments. The source of data on domestic nonfinancial debt is the Federal Reserve Board's flow of funds accounts. Debt data are based on monthly averages.

2. Currency outside the U.S. Treasury, Federal Reserve Banks, and, vaults of commercial banks. Excludes the estimated amount of vault cash held by thrift institutions to service their OCD liabilities.

3. Outstanding amount of U.S. dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions are included

in demand denosits

in demand deposits.

4. Demand deposits at commercial banks and foreign-related institutions other than those due to domestic banks, the U.S. government, and foreign banks and official institutions less cash items in the process of collection and Federal Reserve float. Excludes the estimated amount of demand deposits held at commercial banks by thrift institutions to service their OCD liabilities.

5. Consists of NOW and ATS balances at all depository institutions, oredit union share draft balances, and demand deposits at thrift institutions. Other checkable deposits seasonally adjusted equals the difference between the seasonally adjusted demand deposits. Included are all ceiling free "Super NOWs," authorized by the Depository Institutions Deregulation committee to be offered beginning Jan. 5, 1983

1983.

5. Sum of overnight RPs and overnight Eurodollars, money market fund balances (general purpose and broker/dealer), MMDAs, and savings and small time deposits, less the consolidation adjustment that represents the estimated amount of demand deposits and vault cash held by thrift institutions to service their time and savings deposits liabilities.

7. Sum of large time deposits, term RPs, and term Eurodollars of U.S. residents, money market fund balances (institution-only), less a consolidation adjustment that represents the estimated amount of overnight RPs and Eurodollars held by institution-only money market funds.

8. Savings deposits exclude MMDAs.

9. Smnall-denomination time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All individual retirement accounts (IRA) and Keogh accounts at commercial banks and thrifts are subtracted from small time deposits.

deposits.

10. Large-denomination time deposits are those issued in amounts of \$100,000 to the properties of the propert or more, excluding those booked at international banking facilities.

11. Large-denomination time deposits at commercial banks less those held by

money market mutual funds, depository institutions, and foreign banks official institutions.

NOTE: Latest monthly and weekly figures are available from the Board's H.6 (508) release. Historical data are available from the Banking Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

^{1.} Commercial banks are those in the 50 states and the District of Columbia with national or state charters plus agencies and branches of foreign banks. New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.

2. Includes seasonally adjusted federal funds, RPs, and other borrowings from nonbanks and not seasonally adjusted net Eurodollars.

3. Other borrowings are borrowings on any instrument, such as a promissory note or due bill, given for the purpose of borrowing money for the banking business. This includes borrowings from Federal Reserve Banks and from foreign

banks, term federal funds, overdrawn due from bank balances, loan RPs, and participations in pooled loans.

4. Averages of daily figures for member and nonmember banks.

5. Averages of daily data.

6. Based on daily average data reported by 122 large banks.

7. Includes U.S. Treasury demand deposits and Treasury tax-and-loan notes at commercial banks. Averages of daily data.

8. Averages of Wednesday figures.

1. Data have been revised because of benchmarking to new Call Reports and new seasonal factors beginning July 1985. Back data are available from the Banking Section. Board of Governors of the Federal Reserve System, Washington, D.C., 20551.

Figures are partly estimated. They include all bank-premises subsidiaries and other significant majority-owned domestic subsidiaries. Loan and securities data for domestically chartered commercial banks are estimates for the last Wednesday of the month based on a sample of weekly reporting banks and quarter-end

condition report data. Data for other banking institutions are estimates made for the last Wednesday of the month based on a weekly reporting sample of foreign-related institutions and quarter-end condition reports.

2. Commercial banking institutions include insured domestically chartered commercial banks, branches and agencies of foreign banks, Edge Act and Agreement corporations, and New York State foreign investment corporations.

3. Insured domestically chartered commercial banks include all member banks and insured nonmember banks.

ALL LARGE WEEKLY REPORTING COMMERCIAL BANKS with Domestic Assets of \$1.4 Billion or More on December 31, 1982, Assets and Liabilities

^{1.} Figures include cash items in process of collection. Estimates of gross deposits are based on reports supplied by a sample of commercial banks. Types of depositors in each category are described in the lune 1971 BULLETIN, p. 466. Figures may not add to totals because of rounding.

2. Beginning in March 1984, these data reflect a change in the panel of weekly reporting banks, and are not comparable to earlier data. Estimates in billions of dollars for December 1983 based on the new weekly reporting panel are: financial business, 24.4; nonfinancial business, 80.9; consumer, 30.1; foreign, 3.1; other

<sup>9.5.

3.</sup> Beginning March 1985, financial business deposits and, by implication, total gross demand deposits have been redefined to exclude demand deposits due to

thrift institutions. Historical data have not been revised. The estimated volume of such deposits for December 1984 is \$5.0 billion at all insured commercial banks and \$3.0 billion at weekly reporting banks.

4. Historical data back to March 1985 have been revised to account for corrections of bank reporting errors. Historical data before March 1985 have not been revised, and may contain reporting errors. Data for all commercial banks for March 1985 were revised as follows (in billions of dollars): all holders, -3; financial business, -8; nonfinancial business, -4; consumer, 9; foreign, 1; other, -1. Data for weekly reporting banks for March 1985 were revised as follows (in billions of dollars): all holders, -1; financial business, -.7; nonfinancial business, -.5; consumer, 1.1; foreign, .1; other, -.2.

^{1.} Effective Dec. 1, 1982, there was a break in the commercial paper series. The key changes in the content of the data involved additions to the reporting panel, the exclusion of broker or dealer placed borrowings under any master note agreements from the reported data, and the reclassification of a large portion of bank-related paper from dealer-placed to directly placed.

2. Correction of a previous misclassification of paper by a reporter has created a break in the series beginning December 1983. The correction adds some paper to nonfinancial and to dealer-placed financial paper.

3. Institutions engaged primarily in activities such as, but not limited to, commercial savings, and mortgage banking; sales, personal, and mortgage financing; factoring, finance leasing, and other business lending; insurance underwriting; and other investment activities.

- 4. Includes all financial company paper sold by dealers in the open market.

 5. As reported by financial companies that place their paper directly with investors.
- 6. Includes public utilities and firms engaged primarily in such activities as communications, construction, manufacturing, mining, wholesale and retail trade,
- Transportation, and services.

 7. Beginning October 1984, the number of respondents in the bankers acceptance survey were reduced from 340 to 160 institutions—those with \$50 million or more in total acceptances. The new reporting group accounts for over 95 percent of total acceptances activity.

places. Thus, average issuing rates in bill auctions will be reported using two

- places. Thus, average issuing rates in bill auctions will be reported using two rather than three decimal places.

 11. Yields are based on closing bid prices quoted by at least five dealers.

 12. Yields adjusted to constant maturities by the U.S. Treasury. That is, yields are read from a yield curve at fixed maturities. Based on only recently issued, actively traded securities.

 13. Averages (to maturity or call) for all outstanding bonds neither due nor callable in less than 10 years, including one very low yielding "flower" bond.

 14. General obligations based on Thursday figures; Moody's Investors Service.

 15. General obligations only, with 20 years to maturity, issued by 20 state and local governmental units of mixed quality. Based on figures for Thursday.

 16. Daily figures from Moody's Investors Service. Based on yields to maturity on selected long-term bonds.

 17. Compilation of the Federal Reserve. This series is an estimate of the yield on recently-offered, A-rated utility bonds with a 30-year maturity and 5 years of

- on recently-offered, A-rated utility bonds with a 30-year maturity and 5 years of call protection. Weekly data are based on Friday quotations.

 18. Standard and Poor's corporate series. Preferred stock ratio based on a sample of ten issues: four public utilities, four industrials, one financial, and one transportation. Common stock ratios on the 500 stocks in the price index.

 Note: These data also appear in the Board's H.15 (519) and G.13 (415) releases.

For address, see inside front cover.

^{1.} Weekly and monthly figures are averages of all calendar days, where the rate for a weekend or holiday is taken to be the rate prevailing on the preceding business day. The daily rate is the average of the rates on a given day weighted by the volume of transactions at these rates.

2. Weekly figures are averages for statement week ending Wednesday.

3. Rate for the Federal Reserve Bank of New York.

4. Unweighted average of offering rates quoted by at least five dealers (in the case of commercial paper), or finance companies (in the case of finance paper). Before November 1979, maturities for data shown are 30–59 days, 90–119 days, and 120–179 days for commercial paper; and 30–59 days, 90–119 days, and 150–179 days for finance paper.

5. Yields are quoted on a bank-discount basis, rather than in an investment yield basis (which would give a higher figure).

6. Dealer closing offered rates for top-rated banks. Most representative rate (which may be, but need not be, the average of the rates quoted by the dealers).

7. Unweighted average of offered rates quoted by at least five dealers early in the day.

the day

the day.

8. Calendar week average. For indication purposes only.

9. Unweighted average of closing bid rates quoted by at least five dealers.

10. Rates are recorded in the week in which bills are issued. Beginning with the Treasury bill auction held on Apr. 18, 1983, bidders were required to state the percentage yield (on a bank discount basis) that they would accept to two decimal

^{1.} Effective July 1976, includes a new financial group, banks and insurance companies. With this change the index includes 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40

"margin securities" (as defined in the regulations) when such credit is collateralized by securities. Margin requirements on securities other than options are the difference between the market value (100 percent) and the maximum loan value of collateral as prescribed by the Board. Regulation T was adopted effective Oct. 15, 1934; Regulation U, effective May 1, 1936; Regulation G, effective Mar. 11, 1968; and Regulation X, effective Nov. 1, 1971.

On Jan. 1, 1977, the Board of Governors for the first time established in Regulation T the initial margin required for writing options on securities, setting it at 30 percent of the current market-value of the stock underlying the option. On Sept. 30, 1985, the Board changed the required initial margin, allowing it to be the same as the option maintenance margin required by the appropriate exchange or self-regulatory organization; such maintenance margin rules must be approved by the Securities and Exchange Commission. Effective Jan. 31, 1986, the SEC approved new maintenance margin rules, permitting margins to be the price of the option plus 15 percent of the market value of the stock underlying the option.

^{425), 20} transportation (formerly 15 rail), 40 public utility (tormerly 60), and 40 financial.

2. Beginning July 5, 1983, the American Stock Exchange rebased its index effectively cutting previous readings in half.

3. Beginning July 1983, under the revised Regulation T, margin credit at broker-dealers includes credit extended against stocks, convertible bonds, stocks acquired through exercise of subscription rights, corporate bonds, and government securities. Separate reporting of data for margin stocks, convertible bonds, and subscription issues was discontinued in April 1984.

4. Free credit balances are in accounts with no unfulfilled commitments to the brokers and are subject to withdrawal by customers on demand.

5. New series beginning June 1984.

6. These regulations, adopted by the Board of Governors pursuant to the Securities Exchange Act of 1934, limit the amount of credit to purchase and carry

Savings banks: Estimates by the National Council of Savings Institutions for all savings banks in the United States and for FDIC-insured savings banks that have converted to federal savings banks.

Credit unions: Estimates by the National Credit Union Administration for federally chartered and federally insured state-chartered credit unions serving natural persons.

Life insurance Companies: Estimates and the same and

natural persons.

Life insurance companies: Estimates of the American Council of Life Insurance for all life insurance companies in the United States. Annual figures are annual-statement asset values, with bonds carried on an amortized basis and stocks at year-end market value. Adjustments for interest due and accrued and for differences between market and book values are not made on each item separately but are included, in total, in "other assets."

^{1.} Holdings of stock of the Federal Home Loan Banks are in "other assets."
2. Includes net undistributed income accrued by most associations.
3. Excludes checking, club, and school accounts.
4. Data include all federally insured credit unions, both federal and state chartered, serving natural persons.
5. Direct and guaranteed obligations. Excludes federal agency issues not guaranteed, which are shown in the table under "Business" securities.
6. Issues of foreign governments and their subdivisions and bonds of the International Bank for Reconstruction and Development.

NOTE: Savings and loan associations: Estimates by the FHLBB for all associations in the United States based on annual benchmarks for non-FSLIC-insured associations and the experience of FSLIC-insured sasociations.

FSLIC-insured federal savings banks: Estimates by the FHLBB for federal savings banks insured by the FSLIC and based on monthly reports of federally insured institutions.

^{1.} In accordance with the Balanced Budget and Emergency Deficit Control Act of 1985, all former off-budget entries are now presented on-budget. The Federal Financing Bank (FFB) activities are now shown as separate accounts under the agencies that use the FFB to finance their programs. The act has also moved two social security trust funds (Federal old-age survivors insurance and Federal disability insurance trust funds) off-budget.

2. Includes SDRs; reserve position on the U.S. quota in the IMF; loans to international monetary fund; other cash and monetary assets; accrued interest payable to the public; allocations of special drawing rights; deposit funds;

miscellaneous liability (including checks outstanding) and asset accounts; seigniorage; increment on gold; net gain/loss for U.S. currency valuation adjustment; net gain/loss for IMF valuation adjustment; and profit on the sale of gold. Reflecting the change in Monthly Treasury Statement classification, Table 2, monthly data as well as fiscal year data now include monetary assets other than operating cash with "other", sources of financing, (line 12). Source: "Monthly Treasury Statement of Receipts and Outlays of the U.S. Government." and the Budget of the U.S. Government.

Transactions are market purchases and sales of securities as reported to the Federal Reserve Bank of New York by the U.S. government securities dealers on its published list of primary dealers.
 Averages for transactions are based on the number of trading days in the period.
 The figures exclude allotments of, and exchanges for, new U.S. Treasury securities, redemptions of called or matured securities, purchases or sales of securities under repurchase agreement, reverse repurchase (resale), or similar

contracts.

2. Data for immediate transactions do not include forward transactions.

3. Includes, among others, all other dealers and brokers in commodities and

securities, nondealer departments of commercial banks, foreign banking agencies, and the Federal Reserve System.

4. Futures contracts are standardized agreements arranged on an organized exchange in which parties commit to purchase or sell securities for delivery at a future date.

5. Forward transactions are agreements arranged in the over-the-countermarket in which securities are purchased (sold) for delivery after 5 business days from the date of the transaction for Treasury securities (Treasury bills, notes, and bonds) or after 30 days for mortgage-backed agency issues.

^{1.} Data for dealer positions and sources of financing are obtained from reports submitted to the Federal Reserve Bank of New York by the U.S. Treasury securities dealers on its published list of primary dealers.

Data for positions are averages of daily figures, in terms of par value, based on the number of trading days in the period. Positions are net amounts and are shown on a commitment basis. Data for financing are in terms of actual amounts borrowed or lent and are based on Wednesday figures.

2. Immediate positions are net amounts (in terms of par values) of securities owned by nonbank dealer firms and dealer departments of commercial banks on a commitment, that is, trade-date basis, including any such securities that have been sold under agreements to repurchase (RPs). The maturities of some repurchase agreements are sufficiently long, however, to suggest that the securities involved are not available for trading purposes. Immediate positions include

reverses to maturity, which are securities that were sold after having been obtained under reverse repurchase agreements that mature on the same day as the securities. Data for immediate positions do not include forward positions.

3. Figures cover financing involving U.S. Treasury and federal agency securities, negotiable CDs, bankers acceptances, and commercial paper.

4. Includes all reverse repurchase agreements, including those that have been arranged to make delivery on short sales and those for which the securities obtained have been used as collateral on borrowings, that is, matched agreements.

5. Includes both repurchase agreements undertaken to finance positions and "matched book" repurchase agreements.

NOTE. Data on positions for the period May 1 to Sept. 30, 1986, are partially estimated.

6. Off-budget.

7. Includes outstanding noncontingent liabilities: notes, bonds, and debentures, Some data are estimated.

8. Before late 1981, the Association obtained financing through the Federal Financing Bank (FFB).

9. The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other federal agencies. Since FFB incurs debt solely for the purpose of lending to other agencies, its debt is not included in the main portion of the table in order to avoid double counting.

10. Includes FFB purchases of agency assets and guaranteed loans; the latter contain loans guaranteed by numerous agencies with the guarantees of any particular agency being generally small. The Farmers Home Administration interpretation agency being generally small. The Farmers Home Administration to make the support of the

^{1.} Consists of mortgages assumed by the Defense Department between 1957 and 1963 under family housing and homeowners assistance programs.

2. Includes participation certificates reclassified as debt beginning Oct. 1, 1976.

3. Off-budget Aug. 17, 1974, through Sept. 30, 1976; on-budget thereafter.

4. Consists of debentures issued in payment of Federal Housing Administration insurance claims. Once issued, these securities may be sold privately on the securities market.

5. Certificates of participation issued before fiscal 1969 by the Government National Mortgage Association acting as trustee for the Farmers Home Administration; Department of Health, Education, and Welfare; Department of Housing and Urban Development; Small Business Administration; and the Veterans Administration. Administration.

^{1.} Weighted averages based on sample surveys of mortgages originated by major institutional lender groups; compiled by the Federal Home Loan Bank Board in cooperation with the Federal Deposit Insurance Corporation.

2. Includes all fees, commissions, discounts, and "points" paid (by the borrower or the seller) to obtain a loan.

3. Average effective interest rates on loans closed, assuming prepayment at the end of 10 years.

4. Average contract rates on new commitments for conventional first mortgages; from Department of Housing and Urban Development.

5. Average gross yields on 30-year, minimum-downpayment, Federal Housing Administration-insured first mortgages for immediate delivery in the private secondary market. Based on transactions on first day of subsequent month. Large monthly movements in average yields may reflect market adjustments to changes monthly movements in average yields may reflect market adjustments to changes in maximum permissable contract rates.

^{6.} Average net yields to investors on Government National Mortgage Association guaranteed, mortgage-backed, fully modified pass-through securities, assuming prepayment in 12 years on pools of 30-year FHA/VA mortgages carrying the prevailing ceiling rate. Monthly figures are averages of Friday figures from the Wall Street Journal.

7. Includes some multifamily and nonprofit hospital loan commitments in addition to 1- to 4-family loan commitments accepted in FNMA's free market auction system, and through the FNMA-GNMA tandem plans.

8. Includes participation as well as whole loans.

9. Includes conventional and government-underwritten loans. FHLMC's mortgage commitments and mortgage transactions include activity under mortgage.

gage commitments and mortgage transactions include activity under mortgage/ securities swap programs, while the corresponding data for FNMA exclude swap activity.

Based on data from various institutional and governmental sources, with some quarters estimated in part by the Federal Reserve. Multifamily debt refers to loans on structures of five or more units.
 Includes loans held by nondeposit trust companies but not bank trust departments.
 Includes savings banks and savings and loan associations. Beginning 1987:1, data reported by FSLIC-insured institutions include loans in process and other contra assets.

4. Assumed to be entirely 1- to 4-family loans.

^{5.} FmHA-guaranteed securities sold to the Federal Financing Bank were reallocated from FmHA mortgage pools to FmHA mortgage holdings in 1986: 4, because of accounting changes by the Farmers Home Administration.

6. Outstanding principal balances of mortgage pools backing securities insured or guaranteed by the agency indicated.

7. Other holders include mortgage companies, real estate investment trusts, state and local credit agencies, state and local retirement funds, noninsured pension funds, credit unions, and other U.S. agencies.

^{1.} The Board's series cover most short- and intermediate-term credit extended to individuals that is scheduled to be repaid (or has the option of repayment) in two or more installments.

More detail for finance companies is available in the G.20 statistical release.
 Excludes 30-day charge credit held by travel and entertainment companies.
 All data have been revised.

Notes by LINE NUMBER

1. Line 1 of table 1.57.
2. Sum of lines 3-6 or 7-10.
6. Includes farm and commercial mortgages.
11. Credit market funds raised by federally sponsored credit agencies, and net issues of federally related mortgage pool securities.
13. Line 1 less line 2 plus line 11 and 12. Also line 20 less line 27 plus line 33. Also sum of lines 28 and 47 less lines 40 and 46.
18. Includes farm and commercial mortgages.
26. Line 39 less lines 40 and 46.
27. Excludes equity issues and investment company shares. Includes line 19.
29. Foreign deposits at commercial banks, bank borrowings from foreign branches, and liabilities of foreign banking agencies to foreign affiliates, less claims on forfeign affiliates and dedposits by banking in foreign banks.
30. Demand deposits and note balances at commercial banks.

^{31.} Excludes net investment of these reserves in corporate equities.
32. Mainly retained earnings and net miscellaneous liabilities.
33. Line 13 less line 20 plus line 27.
34–38. Lines 14–18 less amounts acquired by private finance plus amounts borrowed by private finance. Line 38 includes mortgages.
40. Mainly an offset to line 9.
47. Lines 33 plus 39, or line 13 less line 28 plus 40 and 46.
48. Line 2/line 1.
49. Line 2/line 1.
50. Sum of lines 10 and 29.

Sum of lines 10 and 29.
 Sum of lines 10 and 29.
 Sa. Includes issues by financial institutions.
 Note. Full statements for sectors and transaction types in flows and in amounts outstanding may be obtained from Flow of Funds Section, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

^{1.} A major revision of the industrial production index and the capacity utilization rates was released in July 1985. See "A Revision of the Index of Industrial Production" and accompanying tables that contain revised indexes (1977=100) through December 1984 in the FEDERAL RESERVE BULLETIN, vol. 71 (July 1985), pp. 487-501. The revised indexes for January through June 1985 were shown in the September BULLETIN.

2. Ratios of indexes of production to indexes of capacity. Based on data from Federal Reserve, McGraw-Hill Economics Department, Department of Commerce, and other sources.

3. Index of dollar value of total construction contracts, including residential, nonresidential and heavy engineering, from McGraw-Hill Information Systems Company, F. W. Dodge Division.

4. Based on data in Employment and Earnings (U.S. Department of Labor). Series covers employees only, excluding personnel in the Armed Forces.

Note. Basic data (not index numbers) for series mentioned in notes 4, 5, and 6, and indexes for series mentioned in notes 3 and 7 may also be found in the Survey of Current Business.

Figures for industrial production for the last two months are preliminary and

estimated, respectively

^{5.} Based on data in Survey of Current Business (U.S. Department of Com-

Based on Bureau of Census data published in Survey of Current Business.
 Data without seasonal adjustment, as published in Monthly Labor Review.
 Seasonally adjusted data for changes in the price indexes may be obtained from the Bureau of Labor Statistics, U.S. Department of Labor.

Thousands of persons; monthly data are seasonally adjusted. Exceptions noted.

[▲] A major revision of the industrial production index and the capacity utilization rates was released in July 1985. See "A Revision of the Index of Industrial Production" and accompanying tables that contain revised indexes (1977=100) through December 1984 in the FEDERAL RESERVE BULLETIN, vol. 71

⁽July 1985), pp. 487–501. The revised indexes for January through June 1985 were shown in the September BULLETIN.

NOTE. These data also appear in the Board's G.12.3 (414) release. For address, see inside front cover.

2.14 HOUSING AND CONSTRUCTION

Monthly figures are at seasonally adjusted annual rates except as noted.

Note. Census Bureau estimates for all series except (1) mobile homes, which are private, domestic shipments as reported by the Manufactured Housing Institute and seasonally adjusted by the Census Bureau, and (2) sales and prices of existing units, which are published by the National Association of Realtors. All back and current figures are available from the originating agency. Permit authorizations are those reported to the Census Bureau from 16,000 jurisdictions beginning with 1978.

^{1.} Not at annual rates.
2. Not seasonally adjusted.
3. Value of new construction data in recent periods may not be strictly comparable with data in prior periods because of changes by the Bureau of the Census in its estimating techniques. For a description of these changes see Construction Reports (C-30-76-5), issued by the Bureau in July 1976.

^{1.} Seasonal factors are not calculated for lines 6, 10, 12-16, 18-20, 22-34, and

4. Primarily associated with military sales contracts and other transactions arranged with or through foreign official agencies.

5. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and state and local governments.

Note. Data are from Bureau of Economic Analysis, Survey of Current Business (Department of Commerce).

Seasonal factors are not calculated for all seasons.
 Data are on an international accounts (IA) basis. Differs from the Census basis data, shown in table 3.11, for reasons of coverage and timing. Military exports are excluded from merchandise data and are included in line 6.
 Includes reinvested earnings.

3.11 U.S. FOREIGN TRADE¹

Millions of dollars; monthly data are not seasonally adjusted.

	I.	1094	1005	1096				1987			
	Item	1984	1985	1986	Feb.	Mar.	Apr.	May	June	July	Aug.
1	EXPORTS of domestic and foreign merchandise excluding grant-aid shipments, f.a.s. value	223,976	218,815	226,808	19,360	21,776	20,496	20,784	21,126	21,008	20,222
2	GENERAL IMPORTS including merchandise for immediate consumption plus entries into bonded warehouses, c.i.f. value	346,364	352,463	382,964	33,725	34,694	33,459	34,822	36,838	37,483	35,905
3	Trade balance	-122,389	-133,648	-156,156	-14,365	-12,918	-12,963	~14,039	-15,711	-16,475	-15,683

^{1.} The Census basis data differ from merchandise trade data shown in table 3.10, U.S. International Transactions Summary, for reasons of coverage and timing. On the export side, the largest adjustment is the exclusion of military sales (which are combined with other military transactions and reported separately in the "service account" in table 3.10, line 6). On the import side, additions are made for gold, ship purchases, imports of electricity from Canada, and other transac-

tions; military payments are excluded and shown separately as indicated above. As of Jan. 1, 1987 census data are released 45 days after the end of the month. As of Jan. 1, 797 census and are reflect adjustments for undocumented exports to Canada.

3.13 FOREIGN OFFICIAL ASSETS HELD AT FEDERAL RESERVE BANKS

Millions of dollars, end of period

Assets	1004	1985	1986	1987									
Assets	1984	1985	1986	Mar.	Apr.	May	June	July	Aug.	Sept. ^p			
1 Deposits	267	480	287	268	342	319	318	261	294	456			
Assets held in custody 2 U.S. Treasury securities ¹	118,000 14,242	121,004 14,245	155,835 14,048	167,423 14,036	172,929 14,031	175,849 14,031	176,657 14,034	171,269 14,010	179,484 14,022	179,097 14,015			

Marketable U.S. Treasury bills, notes, and bonds; and nonmarketable U.S.
 Treasury securities payable in dollars and in foreign currencies.
 Earmarked gold is valued at \$42.22 per fine troy ounce.

Note. Excludes deposits and U.S. Treasury securities held for international and regional organizations. Earmarked gold is gold held for foreign and international accounts and is not included in the gold stock of the United States.

^{1.} Gold held under earmark at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States; see table 3.13. Gold stock is valued at \$42.22 per fine troy ounce.

2. Beginning July 1974, the IMF adopted a technique for valuing the SDR based on a weighted average of exchange rates for the currencies of member countries. From July 1974 through December 1980, 16 currencies were used; from January 1981, 5 currencies have been used. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

^{3.} Includes allocations by the International Monetary Fund of SDRs as follows: \$867 million on Jan. 1, 1970; \$717 million on Jan. 1, 1971; \$710 million on Jan. 1, 1972; \$1,139 million on Jan. 1, 1979; \$1,152 million on Jan. 1, 1980; and \$1,093 million on Jan. 1, 1981; plus transactions in SDRs.

4. Valued at current market exchange rates.

^{1.} Beginning with June 1984 data, reported claims held by foreign branches have been reduced by an increase in the reporting threshold for "shell" branches

from \$50 million to \$150 million equivalent in total assets, the threshold now applicable to all reporting branches.

^{1.} Data on claims exclude foreign currencies held by U.S. monetary author-

States that represent claims on foreigners held by reporting banks for the accounts of the domestic customers.

Includes the Bank for International Settlements.
 Principally demand deposits, time deposits, bankers acceptances, commercial paper, negotiable time certificates of deposit, and borrowings under repurchase agreements.
 Includes nonmarketable certificates of indebtedness (including those payable in foreign currencies through 1974) and Treasury bills issued to official institutions of foreign countries.
 Excludes notes issued to foreign official nonreserve agencies. Includes bonds and notes payable in foreign currencies.

Debt securities of U.S. government corporations and federally sponsored agencies, and U.S. corporate stocks and bonds.
 Includes countries in Oceania and Eastern Europe.
 NOTE. Based on Treasury Department data and on data reported to the Treasury Department by banks (including Federal Reserve Banks) and securities dealers in the United States.

ities.

2. Assets owned by customers of the reporting bank located in the United

^{1.} Remaining time to maturity.

of their domestic customers.

^{3.} Principally negotiable time certificates of deposit and bankers acceptances.

4. Includes demand and time deposits and negotiable and nonnegotiable certificates of deposit denominated in U.S. dollars issued by banks abroad. For description of changes in data reported by nonbanks, see July 1979 BULLETIN, p. 550.

Note. Beginning April 1978, data for banks' own claims are given on a monthly basis, but the data for claims of banks' own domestic customers are available on a quarterly basis only.

^{2.} Includes nonmonetary international and regional organizations.

^{1.} The banking offices covered by these data are the U.S. offices and foreign branches of U.S.-owned banks and of U.S. subsidiaries of foreign-owned banks. Offices not covered include (1) U.S. agencies and branches of foreign banks, and (2) foreign subsidiaries of U.S. banks. To minimize duplication, the data are adjusted to exclude the claims on foreign branches held by a U.S. office or another foreign branch of the same banking institution. The data in this table combine foreign branch claims in table 3.14 (the sum of lines 7 through 10) with the claims of U.S. offices in table 3.18 (excluding those held by agencies and branches of foreign banks and those constituting claims on own foreign branches).

2. Beginning with June 1984 data, reported claims held by foreign branches have been reduced by an increase in the reporting threshold for "shell" branches

from \$50 million to \$150 million equivalent in total assets, the threshold now applicable to all reporting branches.

3. This group comprises the Organization of Petroleum Exporting Countries shown individually, other members of OPEC (Algeria, Gabon, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, and United Arab Emirates), and Bahrain and Oman (not formally members of OPEC).

4. Excludes Liberia.

5. Includes Canal Zone beginning December 1979.

6. Foreign branch claims only.

7. Includes New Zealand, Liberia, and international and regional organizations.

^{1.} For a description of the changes in the International Statistics tables, see July 1979 BULLETIN, p. 550.
2. Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

Comprises Algeria, Gabon, Libya, and Nigeria.
 Includes nonmonetary international and regional organizations.
 Revisions include a reclassification of transactions, which also affects the totals for Asia and the grand totals.

^{1.} Estimated official and private transactions in marketable U.S. Treasury securities with an original maturity of more than 1 year. Data are based on monthly transactions reports. Excludes nonmarketable U.S. Treasury bonds and notes held by official institutions of foreign countries.

2. Includes U.S. Treasury notes publicly issued to private foreign residents denominated in foreign currencies.

Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).
 Comprises Algeria, Gabon, Libya, and Nigeria.

3.26 DISCOUNT RATES OF FOREIGN CENTRAL BANKS

Percent per annum

	Rate on Sept. 30, 1987			Rate on S	Sept. 30, 1987		Rate on Sept. 30, 1987		
Country	Percent	Month effective	Country	Percent	Month effective	Country	Percent	Month effective	
Austria Belgium Brazil Canada Denmark	3.5 7.25 49.0 9.57 7.0	Jan. 1987 July 1987 Mar. 1981 Sept. 1987 Oct. 1983	France ¹	7.5 3.0 12.0 2.5 4.5	July 1987 Jan. 1987 Aug. 1987 Feb. 1987 Mar. 1986	Norway Switzerland United Kingdom ² Venezuela.	8.0 3.5 8.0	June 1983 Jan. 1987 Oct. 1985	

^{1.} As of the end of February 1981, the rate is that at which the Bank of France discounts Treasury bills for 7 to 10 days.

2. Minimum lending rate suspended as of Aug. 20, 1981.

Note. Rates shown are mainly those at which the central bank either discounts

or makes advances against eligible commercial paper and/or government commercial banks or brokers. For countries with more than one rate applicable to such discounts or advances, the rate shown is the one at which it is understood the central bank transacts the largest proportion of its credit operations.

^{1.} Value in U.S. cents.
2. Index of weighted-average exchange value of U.S. dollar against the currencies of 10 industrial countries. The weight for each of the 10 countries is the 1972-76 average world trade of that country divided by the average world trade of all 10 countries combined. Series revised as of August 1978 (see Federal Reserve Bulletin, vol. 64, August 1978, p. 700).

^{3.} Currency reform.

NOTE. Averages of certified noon buying rates in New York for cable transfers.

Data in this table also appear in the Board's G.5 (405) release. For address, see inside front cover.

Guide to Tabular Presentation, Statistical Releases, and Special Tables

GUIDE TO TABULAR PRESENTATION

Symbols and Abbreviations

С	Corrected	0	Calculated to be zero
e	Estimated	n.a.	Not available
p	Preliminary	n.e.c.	Not elsewhere classified
Γ	Revised (Notation appears on column heading when	IPCs	Individuals, partnerships, and corporations
	about half of the figures in that column are changed.)	REITs	Real estate investment trusts
*	Amounts insignificant in terms of the last decimal place	RPs	Repurchase agreements
	shown in the table (for example, less than 500,000	SMSAs	Standard metropolitan statistical areas
	when the smallest unit given is millions)		Cell not applicable

General Information

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

"U.S. government securities" may include guaranteed issues of U.S. government agencies (the flow of funds figures also include not fully guaranteed issues) as well as direct

obligations of the Treasury. "State and local government" also includes municipalities, special districts, and other political subdivisions.

In some of the tables details do not add to totals because of rounding.

Publications of Interest

FEDERAL RESERVE REGULATORY SERVICE

To promote public understanding of its regulatory functions, the Board publishes the Federal Reserve Regulatory Service, a three-volume looseleaf service containing all Board regulations and related statutes, interpretations, policy statements, rulings, and staff opinions. For those with a more specialized interest in the Board's regulations, parts of this service are published separately as handbooks pertaining to monetary policy, securities credit, and consumer affairs.

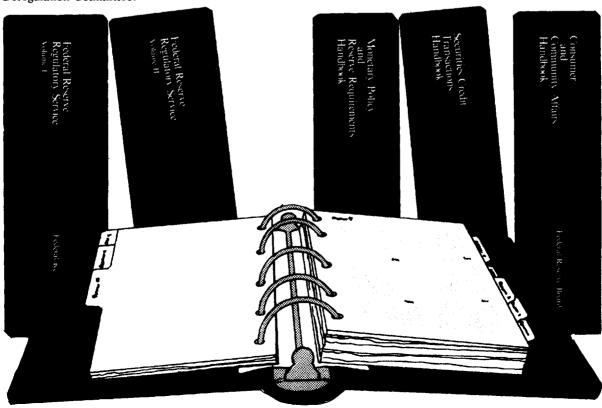

These publications are designed to help those who must frequently refer to the Board's regulatory materials. They are updated at least monthly, and each contains conversion tables, citation indexes, and a subject index.

The Monetary Policy and Reserve Requirements Handbook contains Regulations A, D, and Q plus related materials. For convenient reference, it also contains the rules of the Depository Institutions Deregulation Committee.

The Securities Credit Transactions Handbook contains Regulations G, T, U, and X, dealing with extensions of credit for the purchase of securities, together with all related statutes, Board interpretations, rulings, and staff opinions. Also included is the Board's list of OTC margin stocks.

The Consumer and Community Affairs Handbook contains Regulations B, C, E, M, Z, AA, and BB and associated materials.

For domestic subscribers, the annual rate is \$200 for the Federal Reserve Regulatory Service and \$75 for each handbook. For subscribers outside the United States, the price including additional air mail costs is \$250 for the Service and \$90 for each Handbook. All subscription requests must be accompanied by a check or money order payable to Board of Governors of the Federal Reserve System. Orders should be addressed to Publications Services, Mail Stop 138, Federal Reserve Board, 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551.

Publications of Interest

FEDERAL RESERVE CONSUMER CREDIT PUBLICATIONS

The Federal Reserve Board publishes a series of pamphlets covering individual credit laws and topics, as pictured below. The series includes such subjects as how the Equal Credit Opportunity Act protects women against discrimination in their credit dealings, how to use a credit card, and how to resolve a billing error.

The Board also publishes the Consumer Handbook to Credit Protection Laws, a complete guide to consumer credit protections. This 44-page booklet ex-

plains how to use the credit laws to shop for credit, apply for it, keep up credit ratings, and complain about an unfair deal.

Protections offered by the Electronic Fund Transfer Act are explained in *Alice in Debitland*. This booklet offers tips for those using the new "paperless" systems for transferring money.

Copies of consumer publications are available free of charge from Publications Services, Mail Stop 138, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. Multiple copies for classroom use are also available free of charge.
