79 RESIDENTIAL LENDING TO LOW-INCOME AND MINORITY FAMILIES: EVIDENCE FROM THE 1992 HMDA DATA

In recent years, the access of lower-income and minority households to mortgage credit has drawn considerable attention, as more information about mortgage lending has become available under the Home Mortgage Disclosure Act (HMDA). This article uses the HMDA data to analyze patterns of loan applications and their disposition by the income, race, or ethnicity of the applicant and by the location of the property pertaining to the loan. It also examines lending in different types of neighborhoods, including those in central city and in noncentral city locations, and describes the role of mortgage originators and of institutions that purchase mortgages. Finally, it reviews the use of HMDA data to monitor the way institutions comply with laws pertaining to fair lending, community reinvestment, and affordable housing.

109 INDUSTRIAL PRODUCTION AND CAPACITY UTILIZATION

Industrial production rose 0.9 percent in November, following a revised gain of 0.7 percent in October. The recent strength in output boosted the utilization of total industrial capacity 0.6 percentage point in November and 0.5 percentage point in October. Capacity utilization in November stood at 83.0 percent.

In December, industrial production rose 0.7 percent. At 114.0 percent of its 1987 average, industrial production in December was 4.6 percent above its level a year earlier. Reflecting the sustained strong growth in output, the utilization of total industrial capacity rose 0.5 percentage point in December. Capac-

ity utilization at the end of 1993 stood at 83.5 percent, 2.5 percentage points above its year-ago level but still below its most recent 1988–89 peak.

114 STATEMENT TO THE CONGRESS

J. Virgil Mattingly, General Counsel, Board of Governors, testifies in connection with the hearing into requests that Sheikh Zayed al-Nahyan and two of his adult sons be granted head-of-state immunity in connection with pending civil litigation relating to the acquisition of the First American banking organization by the Bank of Credit and Commerce International, S.A. (BCCI) and briefly summarizes the BCCI matter and the Board's enforcement actions relating to it, before the House Committee on Banking, Finance and Urban Affairs, December 9, 1993.

118 ANNOUNCEMENTS

Appointment of new members to the Thrift Institutions Advisory Council.

Amendments to Regulation A.

Amendments to Regulation B.

Amendments to the risk-based capital guidelines affecting the treatment of certain multifamily housing loans.

Proposal to assess charges for examinations of U.S. branches, agencies, and representative offices of foreign banks; proposal to amend the risk-based capital guidelines for state member banks and bank holding companies to include in tier 1 capital net unrealized holding gains and losses on securities available for sale.

Change in Board staff.

120 MINUTES OF OF THE FEDERAL OPEN MARKET COMMITTEE MEETING

At its meeting on November 16, 1993, the Committee adopted a directive that called for maintaining the existing degree of pressure on reserve positions and that did not include a presumption about the likely direction of any adjustment to policy during the intermeeting period. The directive stated that in the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, slightly greater or slightly lesser reserve restraint might be acceptable during the intermeeting period. The reserve conditions associated with this directive were expected to be consistent with modest growth in M2 and M3 over coming months.

129 LEGAL DEVELOPMENTS

Various bank holding company, bank service corporation, and bank merger orders; and pending cases.

Residential Lending to Low-Income and Minority Families: Evidence from the 1992 HMDA Data

Glenn B. Canner and Wayne Passmore, of the Board's Division of Research and Statistics, and Dolores S. Smith, of the Division of Consumer and Community Affairs, prepared this article. Kim Koenig, of the Division of Research and Statistics, and Cyndi Johnson, Jeffrey Phipps, and Marilyn Rhyne, of the Division of Information Resources Management, provided assistance.

Since 1976, the Home Mortgage Disclosure Act (HMDA) has required most depository institutions with offices in metropolitan areas to provide data on the geographic location of the home purchase and home improvement loans they originate or buy. In recent years, as more information about mortgage lending has become available under HMDA, the access of lower-income and minority households to mortgage credit has drawn considerable attention and has stimulated initiatives in the private and public sectors to increase availability.

The expanded data have come about as the result of legislative amendments in 1989 and 1991 that increased the scope of the information that lenders must collect and the coverage of lenders required to report. Under HMDA, lenders now disclose information on the disposition of home loan applications and on the race or national origin, gender, and annual income of loan applicants and borrowers. They also disclose the type of secondary market purchaser for loans that are originated or bought by the lender in the same year as the sale. Independent mortgage companies (firms not affiliated with a depository institution) now are among the lenders covered by the act; many of them are

active lenders, often extending credit in dozens of metropolitan areas.

This article uses the HMDA data to study developments in the mortgage market and continues the analyses published in two previous *Bulletin* articles.² It uses the 1992 data to analyze patterns of loan applications and their disposition by the income, race, or ethnicity of the applicant and by the location of the property involved in the loan. It examines lending in different types of neighborhoods, including those in central city and in noncentral city locations, and describes the role of mortgage originators and of institutions that purchase mortgages. Finally, it reviews the use of HMDA data to monitor the way institutions comply with laws pertaining to fair lending, community reinvestment, and affordable housing.

SUMMARY OF THE FINDINGS FOR 1992

The HMDA data show that by far the most common type of home loan requested by consumers during 1992 was for refinancing, which accounted for more than half of all home loan applications. Among loans used to purchase homes, the share of loans insured by the Federal Housing Administration (FHA) dropped sharply from the previous year. The drop probably resulted from the recent increases in the costs to homebuyers of using FHA-insured loans and from the greater availability of conventional loan products designed to reach lowand moderate-income homebuyers.

^{1.} The Financial Institutions Reform, Recovery and Enforcement Act of 1989 contains the 1989 amendments to HMDA; the Federal Deposit Insurance Corporation Improvement Act of 1991 contains the 1991 amendments.

^{2.} See Glenn B. Canner and Dolores S. Smith, "Home Mortgage Disclosure Act: Expanded Data on Residential Lending," Federal Reserve Bulletin, vol. 77 (November 1991), pp. 859–81; and Glenn B. Canner and Dolores S. Smith, "Expanded HMDA Data on Residential Lending: One Year Later," Federal Reserve Bulletin, vol. 78 (November 1992), pp. 801–24.

Most applications in 1992 for home loans were approved, particularly those to buy homes or to refinance existing loans. The rates of denial varied among applicants grouped by their income and racial or ethnic characteristics (see the box "Denial Rates for Home Loans, by Racial or Ethnic Characteristics of Applicants"). Differences in the distribution of applicants by income accounted for some of the differences in loan disposition rates among racial or ethnic groups, but other factors also seemed to be important because white applicants in all income groups had lower rates of denial than black or Hispanic applicants. These disparities raise the possibility of unlawful discrimination against some minority applicants.

The HMDA data provide little information about other factors that might explain differences in denial rates among racial or ethnic groups. For example, the data do not include detailed information about the financial circumstances of loan applicants or the characteristics of the properties that applicants sought to purchase, refinance, or improve. When used in conjunction with other information, however, the HMDA data facilitate assessment by government agencies of lenders' compliance with the fair lending laws.

The HMDA data show that the 1992 rates of loan approval rose and rates of denial fell from those of the previous year for black and for white applicants for government-backed and for conventional home purchase loans. They show a large increase in the number of conventional home purchase loans extended to low-income and to black families. The types and quantities of home loans extended in 1992 varied considerably across neighborhoods grouped by median family income, racial or ethnic composition, and location (that is, whether central city or noncentral city); differences in the socioeconomic and housing characteristics of neighborhoods offer possible explanations for these lending patterns.

The HMDA data also shed light on the secondary market for mortgages. Institutions in the secondary mortgage market play a prominent role in the U.S. housing market. Secondary market participants generally do not originate loans, but they do specify the underwriting guidelines that loans must meet to be eligible for purchase or securitization. Two government-sponsored enterprises dominate secondary market purchases in conventional mort-

Denial Rates for Home Loans, by Racial or Ethnic Characteristics of Applicants

The 1992 HMDA data show that rates of loan application denial vary by racial and ethnic characteristics. For example, for conventional home purchase loans, about 36 percent of black applicants, 27 percent of Hispanic applicants, 16 percent of white applicants, and 15 percent of Asian applicants were denied credit. As discussed in detail in the text, many factors may account for these differences.

Proportion of home loan applications denied, by purpose of loan and characteristics of applicant, 1992

gage loans—the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac). Recent legislation directs both agencies to meet loan-purchase targets for low-income and for central city borrowers. The HMDA data have limitations for measuring Fannie Mae's and Freddie Mac's performance in helping to meet these affordable housing goals. However, the data suggest that the mortgages purchased by other secondary market institutions in 1992 generally included higher proportions of conventional home loans extended to lower-income families and to families living in central cities relative to the purchases by Fannie Mae and Freddie Mac.

A BRIEF DESCRIPTION OF THE 1992 HMDA DATA

In 1992, 9,073 home lenders submitted HMDA data, including 5,468 commercial banks, 1,395 savings associations, 1,706 credit unions, and 504

1.	Residential lending activity reported by financial
	institutions covered by HMDA, 1981–92

mortgage companies, of which 224 were independent entities (table 1).3 The number of creditors disclosing lending data fell about 3 percent from 1991, a decrease reflecting the effects of acquisitions, mergers, and failures.4 Nonetheless, total reported loan applications and purchased loans increased more than 50 percent, from 7.9 million to 12.0 million. (For information on how members of the public can receive HMDA data, see the box "Public Access to HMDA Data.")

In 1992, lenders covered by HMDA acted on roughly 10.0 million home loan applications and reported information on nearly 2.0 million loans they purchased from other institutions. Of the 3.5 million applications for home purchase loans, 2.8 million (more than three-fourths) were for conventional mortgage loans (table 2). The remainder were for government-backed credit—loans insured or guaranteed by the Federal Housing Administra-

Public Access to HMDA Data

To make public access to HMDA data easier, the Federal Financial Institutions Examination Council (FFIEC) makes the data available for purchase in several media. Facsimiles of disclosure reports for the individual institutions and the aggregate reports for each metropolitan statistical area (MSA) are available in hard copy and on microfiche. The HMDA Loan/ Application Register (HMDA-LAR) records and selected census data for each census tract in each MSA are available on PC diskette, and those for the entire nation are available on computer tape. In the near future, disclosure statements and HMDA-LAR records will be available on CD-ROM. The sociodemographic data used to prepare the HMDA disclosure reports include data from the 1980 and the 1990 decennial Census of Population and Housing and annual estimates of the median four-person family income for each MSA from the Department of Housing and Urban Development; these data can also be obtained from the FFIEC.

The FFIEC also makes available a series of reports drawn from the HMDA data analysis system that has been developed by the regulatory agencies to enhance their fair lending enforcement and Community Reinvestment Act assessment efforts. These reports provide information about the lending activity of individual institutions in forms different from the standard tables used for the disclosure statements. For instance, one report provides information about the number and dollar amount of loan applications and their disposition by census tract; it also displays a variety of socioeconomic data for each census tract.

For information about the availability of data or to request data from the FFIEC, contact the HMDA Operations Unit, Mail Stop 502, Board of Governors of the Federal Reserve System, Washington DC 20551. A copy of the HMDA data order form may be obtained by calling the HMDA Assistance Line (202) 452-2016.

tion (FHA), the Department of Veterans Affairs (VA), or the Farmers Home Administration (FmHA). (See the box "How HMDA Data Are Collected and Distributed.")

Lending institutions specialize in different types of loans (table 3). In 1992, depository institutions originated about 60 percent of home loans of all types; independent mortgage companies or the mortgage company affiliates of depository institutions originated the rest. Home purchase loan orig-

inations of all types were about evenly divided between depositories and mortgage companies, whereas almost three-fourths of the government-backed home purchase loans were originated by mortgage companies (including those affiliated with depositories). Depository institutions, excluding their mortgage company affiliates, were the dominant source of home improvement and multifamily loans, with commercial banks providing most of the home improvement loans and savings associations providing the majority of multifamily loans.

APPLICATIONS FOR HOME LOANS

In 1992, by far the most common type of home loan requested by consumers was for refinancing

In 1992, a decline in FHA activity from 1991 resulted in an increase in the conventional mortgage share of home purchase loan applications. Applications for FHA-insured loans accounted for 15.7 percent of all applications for home purchase

a mortgage. Applications for refinancing grew almost 150 percent from the previous year, causing the total number of home loan applications to increase markedly. The substantial increase in refinancing applications reflected lower mortgage rates, the greater availability of no-fee loans, and the more efficient processing of applications.⁵

^{5.} With a no-fee loan, the borrower incurs no out-of-pocket expenses for either closing costs or discount points on the loan. Such loans are often written with a higher interest rate to compensate the lender, and closing costs are frequently added to the outstanding mortgage balance.

Includes dwellings for five or more families.Source. FFIEC, Home Mortgage Disclosure Act.

loans compared with 20.4 percent in 1991. Concurrently, the share of all home purchase loan originations insured by the FHA fell from 20.5 percent to 16.3 percent. Increases in the cost to homebuyers of using FHA-insured loans, along with the greater availability of conventional loan products for low-and moderate-income homebuyers, may have encouraged the shift. Still, tens of thousands of households—particularly first-time homebuyers—used the program to buy homes.⁶

Homeowners infrequently use the FHA program, compared with conventional loans, to refinance an existing mortgage. In 1992, applications for FHA loans accounted for only 3.8 percent of the applications for refinancing loans. The small share of refinancings insured by the FHA is not surprising because households that refinance often have sufficient equity in their homes and have accumulated enough other assets to cover the larger downpayment typically required for a conventional mortgage.

In general, households with lower incomes are more likely than households with higher incomes to use government-sponsored home loan programs, particularly those of the FHA and the FmHA. In 1992, one-third of applicants for home purchase loans with incomes below the median family income for their metropolitan statistical area (MSA) applied for government-backed loans; in contrast, only 13 percent of applicants with incomes greater than 120 percent of the median family income for their MSA applied for such loans (table 4).

The greater reliance of lower-income households on government-backed loans reflects several factors. The limits on the amount of FHA loan insurance make these loans unavailable to households seeking to buy more expensive properties, and the low downpayment requirements make them particularly attractive to lower-income households and to first-time homebuyers, who are likely to have fewer financial resources for downpayments and closing costs.

How HMDA Data Are Collected and Distributed

Under the provisions of the Federal Reserve Board's Regulation C (Home Mortgage Disclosure), each institution covered by HMDA completes and submits a HMDA Loan/Application Register (HMDA-LAR). The HMDA-LAR is a report form used to record data for each loan application acted on and for each loan purchased. It includes information on the race or national origin, gender, and annual income of the applicants or borrowers; the size of the loan; the geographic location of the property; and the identity of the secondary market purchaser if the loan was sold. Lenders send this report form to their respective federal supervisory agency, which then forwards the data to the Board for processing. (Institutions supervised by the National Credit Union Administration, the Comptroller of the Currency, or the Federal Deposit Insurance Corporation submit databeginning with HMDA data for 1993—directly to the Federal Reserve Board.) The Board, acting on behalf of the Federal Financial Institutions Examination Council (FFIEC) and the Department of Housing and Urban Development (HUD) produces, for each covered lender, a HMDA disclosure statement that includes a report about the lender's activities for each metropolitan statistical area (MSA) in which the lender has an office. For 1992, disclosure statements consisted of nearly 28,782 reports, an increase from the 25,934 prepared for 1991 (table 1). The Board also produces aggregate reports describing overall lending activity by covered institutions in each MSA.

The public can obtain a copy of an individual lender's disclosure statement from a central data depository (typically a library or an office of a local government agency) located in the MSA where the lender has offices or from the lender itself. The central data depositories also make the aggregate MSA reports available to the public.

Among racial groups, applicants who are black are more likely than other applicant groups to seek government-backed home purchase loans. In 1992, about 41 percent of the black applicants who applied for a home purchase loan sought a government-backed mortgage; the comparable figures for Hispanics, whites, and Asians were 31 percent, 21 percent, and 11 percent respectively.

As in previous years, the differences in the use of government-backed home purchase loan programs

^{6.} In 1992, approximately 49 percent of those who used section 203(b) FHA loans (the principal type of FHA single-family loan program) were first-time homebuyers. The proportion was even higher in 1991, when 57 percent of the borrowers were first-time homebuyers. See U.S. Department of Housing and Urban Development, Characteristics of FHA Single-Family Mortgages: Selected Sections of the National Housing Act, 1991 and 1992.

by various racial groups reflected more than differences in income. For instance, among low-income loan applicants, 53 percent of black applicants sought FHA or VA loans compared with 40 percent of Hispanic applicants, 31 percent of white applicants, and 22 percent of Asian applicants. One possible explanation for this relatively greater reliance of black applicants on government-backed programs is that black households, on average,

have smaller holdings of liquid assets compared with those of other low-income households.⁷

The patterns of applications for refinancings by the income and race or ethnic characteristics of the applicants differed from those for home purchase loans. Higher-income households accounted for

MSA median is median family income of the metropolitan statistical area (MSA) in which the property related to the loan is located.

62 percent of all refinancing applications and for 47 percent (calculated from table 4) of all applications for home purchase loans. Also, white applicants accounted for a higher proportion of refinancing applications than of home purchase loan applications, reflecting the fact that, among homeowners with mortgages, most are white.

As noted earlier, lower-income and minority applicants were more likely to request government-backed mortgages. Consistent with this pattern, applicants who were seeking homes in low-or moderate-income neighborhoods requested government-backed mortgage programs more often than those seeking homes in upper-income neighborhoods. Requests for government-backed loans also accounted for a higher share of all home purchase loan applications in neighborhoods with higher proportions of minority residents.

THE DISPOSITION OF HOME LOAN APPLICATIONS

The HMDA data show that lenders approve most home loan applications (table 5).8 In 1992, lenders approved nearly three-quarters of the applications for home purchase loans and about 78 percent of the applications for refinancings. A lower proportion, about two-thirds, of the applications for home improvement and multifamily loans were approved. Applications that were not approved may have been denied by the lender or withdrawn or left incomplete by the applicant. (Applicants who were denied at one institution but later accepted by another institution in the same year appear as both a denial and an approval in the HMDA data.) In general, relatively small proportions of the applications for home purchase and refinancing loans are denied.

The high rates of approval for home purchase loans are to be expected. Before filing an application, potential homebuyers often obtain information about the size of loan for which they are likely to qualify. This information comes from several sources, including real estate agents, who are involved in most home purchase transactions, and loan officers, who are often asked to prequalify prospective homebuyers. Many applicants also know from experience their likelihood of obtaining a home loan and tailor their search for a home with that information in mind. Finally, prospective borrowers have an incentive to learn about prevailing standards for credit and to postpone an application until they are likely to qualify because they usually incur some upfront costs in filing an application—to cover, at a minimum, a property appraisal and a credit bureau report. These forms of prescreening are not as prevalent for home improvement applications, and the result is a higher rate of loan denials.

Disposition Rates for Applicants Grouped by Income, Race, or Ethnicity

Although most applications for home loans are approved, the rates of approval and denial vary among applicants grouped by their income and racial or ethnic characteristics (table 6).

In 1992, about 81 percent of the applicants for conventional home purchase loans whose incomes placed them in the highest income group were approved for loans, compared with 69 percent for the lowest income group. A similar relation between approval rates and applicant income has been found for other types of home loans, including government-backed home purchase loans, refinancings, and home improvement loans.

Income can be expected to affect an applicant's ability to qualify for a home purchase loan, but it is just one element that lenders consider when evaluating creditworthiness. Other factors include the amount of the loan requested, nonhousing debt, assets available for downpayment and closing costs, employment experience, and credit history. On average, low-income households have fewer assets and lower net worth and experience more frequent employment disruptions than high-income households; these factors combined with a low income often result in higher loan denial rates.

Compared with Asian and white applicants, greater proportions of black and Hispanic loan

^{8.} The approval rate is the sum of the proportion of loans originated from the pool of applications and the proportion of loans approved but not accepted by the applicant. Applicants who do not accept an approved loan may have decided not to complete the transaction or may have applied for and accepted a loan from another lender.

applicants were turned down for mortgage credit in 1992. For conventional home purchase loans, about 36 percent of black applicants, 27 percent of Hispanic applicants, 15 percent of Asian applicants, and 16 percent of white applicants were denied credit. Consistent with these findings, the HMDA data indicate that the rate of denial for conventional home purchase loans generally increases as the proportion of minority residents in a neighborhood increases (table 7).

Differences in denial rates for applicants grouped by race or ethnicity reflect a variety of factors, including differences in the proportion of each group with relatively low income. In 1992, 21 percent of the white applicants who applied for conventional home purchase loans had incomes that were less than 80 percent of the median family income for their MSA (data not shown in tables). The comparable percentages were roughly 37 percent for blacks, 28 percent for Hispanics, and 16 percent for Asians. Differences in the distribution of applicants by income account for some, but clearly not all, of the differences in denial rates among these groups. Within each income group, white applicants for conventional home purchase loans had lower rates of denial than black or Hispanic applicants (table 8).

The differences in denial rates between white and black or Hispanic applicants have led some to conclude that widespread racial discrimination characterizes home lending. Although these disparities raise questions, the reasons for the differences in denial rates are difficult to determine from the HMDA data. The HMDA data provide little information about the characteristics of the properties that applicants seek to purchase, refinance,

programs, the traditional loan underwriting guidelines have been made more flexible. For example, under the affordable housing programs sponsored by Fannie Mae and Freddie Mac, the proportion of the downpayment and closing costs that must come from the applicant's own savings has been reduced, and lenders may consider rent and utility payment records in lieu of other credit history information.¹²

Evaluating the effect of these targeted loan programs on homeownership by low- and moderate-income households is difficult because many of the programs have been operating only a short time. Still, the HMDA data may indicate that these programs are having a positive effect. In particular, the number of conventional home purchase loans extended to applicants with incomes below the median family income for their respective MSA increased 27 percent from 1991 to 1992 (table 9, memo item), compared with an increase of 10 percent for borrowers with incomes greater than 120 percent of the median family income.

From 1991 to 1992, the number of conventional home loans extended to black borrowers increased 26 percent, whereas those to white borrowers increased 21 percent and those to Hispanic and Asian borrowers rose 8 percent and 6 percent respectively. Within each racial or ethnic group, the changes were largest among lower-income borrowers. For black borrowers whose incomes were below the median, the increase was 34 percent; for whites, 28 percent; for Hispanics, 25 percent; and for Asians, 42 percent (data not shown in tables).

During the same period, rates of loan approval rose and rates of loan denial fell for black and for white applicants for both government-backed and conventional home purchase loans. For example, the denial rates nationwide for conventional home purchase loans were 37.4 percent for blacks and 17.3 percent for whites in 1991, compared with 35.9 percent and 15.9 percent respectively in 1992. In contrast, changes in the approval and denial rates for Hispanic and Asian applicants were mixed.

For low-income applicants, the approval rates rose sharply and the denial rates fell for applications for both government-backed and conventional home purchase loans. For other income

LENDING ACTIVITY IN NEIGHBORHOODS WITH DIFFERENT CHARACTERISTICS

Using the HMDA data, one can compare lending activity across neighborhoods (that is, census tracts) in MSAs grouped by their residents' median family income and by racial or ethnic composition. Comparisons of lending among neighborhoods in the central city and noncentral city portions of MSAs are also possible.13 Considerable caution should be exercised in making comparisons. Although the Bureau of the Census draws the boundaries of census tracts to include relatively homogenous populations, the residents of a given census tract can and sometimes do differ considerably. Diversity across and within neighborhoods influences the volume and types of lending that flow to different communities. Once these variations are taken into account, analyses suggest that neighborhood income and racial or ethnic characLending in Neighborhoods with Different Median Incomes

The 1992 HMDA data reveal that the types and quantities of home loans extended by lenders vary considerably across neighborhoods grouped by their median family income, racial or ethnic composition, and central city or noncentral city location. The 1990 census information described in the appendix provides possible explanations for these variations.

Overall, roughly 10 percent of the home loans extended by lenders covered by HMDA in 1992 went to borrowers in low- or moderate-income neighborhoods; nearly half the loans went to borrowers in middle-income neighborhoods; and the rest went to borrowers in upper-income neighborhoods (table 10). These differences closely match the distribution of the home loan applications received by lenders (data not shown in table). The distribution of the dollar value of home loans and of applications is more heavily skewed than the

teristics are often not important factors in determining the risk or profitability of loans.¹⁴

^{13.} For both census and HMDA data, if any portion of a census tract falls within a central city boundary, the entire census tract is considered to be located in a central city.

Applicant income shown as percentage of the median family income of the metropolitan statistical area in which the property related to the loan is located.

number of home loans and applications toward upper-income neighborhoods, reflecting factors that include the higher average home values in these neighborhoods.

The HMDA data also indicate that borrowers who buy, refinance, or improve their homes tend to have incomes that are higher than the incomes of other residents of their neighborhoods (compare table 10 with table A.1). 15 For example, in 1992 borrowers in low- and moderate-income neighborhoods had incomes equal to 101 percent of the median family income of their MSA, whereas the

average income for all residents of these neighborhoods was 58 percent.

When all neighborhoods are grouped by income, there are fewer low- and moderate-income neighborhoods than middle- or upper-income neighborhoods, and those low-income neighborhoods contain only about 26 percent of the housing units and a similar percentage of the population residing in metropolitan areas. Lower levels of lending in low-and moderate-income neighborhoods result partly from the existence of fewer homes and people. Also, the relatively small proportion of home loans in these neighborhoods likely reflects the lower incomes of residents and the smaller proportion of owner-occupied housing units relative to other neighborhoods.

Loans backed by the Federal Housing Administration, the Department of Veterans Affairs, and the Farmers Home Administration. Source, FFIEC, Home Mortgage Disclosure Act.

Differences in the types of loans extended are also apparent across neighborhoods. Home improvement loans are relatively more common in low- and moderate-income neighborhoods, where the housing units are, on average, older and probably in greater need of repair or modernization. FHA-insured home purchase loans are also more common, reflecting the low downpayment requirements, the relatively higher debt-to-income ratios permitted by FHA underwriting standards, and the limits placed on the size of loan that may be insured. Home purchase loans extended to nonoccupant owners (frequently landlords) are also more common, a finding consistent with the high proportion of rental properties in low- and moderate-income neighborhoods.

Median loan amounts across neighborhoods reflect large differences in home values and the different proportions of home improvement loans. For example, in 1992 the median home loan in low- and moderate-income neighborhoods equaled \$63,600, compared with \$124,000 in upper-income neighborhoods. 16 The median 1990 home values in these neighborhoods were \$69,000 and \$179,000 respectively (table 10). The high loan amounts relative to housing values in low- and moderateincome neighborhoods, particularly given the prev-

^{16.} To calculate the median value of home loans for a category of neighborhoods, a median value was determined for each census tract, and then the median values for census tracts in a group were averaged. For home purchase loans in low- and moderate-income neighborhoods, the median value was \$60,100, and for highincome neighborhoods it was \$115,200. Because these numbers are similar to the median values for all loans, dropping home improvement loans and refinancings does not significantly affect the median loan amount in a census tract.

alence of home improvement loans, may reflect a lack of wealth among borrowers purchasing homes in these neighborhoods and thus relatively smaller downpayments on home purchase loans.

The distribution of borrowers by racial or ethnic group also differs by neighborhood income groups. Asian borrowers, like Asian residents, are more uniformly spread across neighborhoods; both black and Hispanic borrowers, like black and Hispanic residents, are more concentrated in low- and moderate-income neighborhoods. Regardless of neighborhood income, however, lenders have higher proportions of Asian borrowers relative to the Asian population in the neighborhood groups and lower proportions of black and Hispanic borrowers compared with the proportions of black and Hispanic residents. These differences probably reflect the relatively higher incomes of Asian residents.

Lending in Neighborhoods with Different Racial or Ethnic Compositions

Overall, the 1992 HMDA data indicate that 8 percent of the home loans extended by lenders covered by HMDA were granted to borrowers in predominantly minority neighborhoods (table 11).

Residents of predominantly white neighborhoods received 54 percent of the home loans granted, and residents of neighborhoods whose minority population was between 10 and 50 percent of the total population received the rest. The distribution of the dollar value of home loans across neighborhoods grouped by racial or ethnic composition is similar to the distribution of the number of loans.

Predominantly minority neighborhoods contain 18 percent of the housing units and 20 percent of the population in metropolitan areas; these relatively small proportions partly account for the low percentage of all home loans extended in these neighborhoods (compare tables 11 and A.2). The relatively low proportion of home loans also reflects the lower income of residents and the composition of the housing stock, which contains a markedly higher proportion of rental units.

In neighborhoods grouped by racial or ethnic composition, as in neighborhoods grouped by income, borrowers who buy, refinance, or improve their homes tend to have higher incomes than the incomes of the other residents of their neighborhoods. For example, borrowers in predominantly white neighborhoods had incomes equal to 136 percent of the median family income of their MSA, compared with 115 percent for all residents of

^{1.} Census tracts are categorized by the median family income for the tract relative to the median family income for the metropolitan statistical area (MSA) in which the tract is located. Categories are defined as follows: Low or moderate, median family income less than 80 percent of the median family income for MSA; Middle income, median family income 80 percent

to 120 percent of MSA median; Upper income, median family income more than 120 percent of MSA median.

SOURCE. FFIEC, Home Mortgage Disclosure Act data.

these neighborhoods. Borrowers in predominantly minority neighborhoods typically had incomes equal to 112 percent of the median family MSA income, compared with 66 percent for all residents of these neighborhoods.

Matching the patterns found in low- and moderate-income neighborhoods, the proportion of home improvement loans granted is slightly higher, and the proportion of home purchase loans slightly lower, in predominantly minority neighborhoods. Also, borrowers tend to rely more on FHAinsured loans, and loans to nonoccupant-owners are more common in predominantly minority neighborhoods.

Lending in Central City and Noncentral City Locations

Of loans made to borrowers residing in MSAs, roughly 38 percent were extended to borrowers in

central city locations and the rest to borrowers in noncentral city locations (table 12). This lending pattern closely matches the pattern of applications received by lenders (data not shown in table). Roughly half of the housing units in MSAs are located in central cities, but the proportion of loans extended in central cities is smaller. This difference probably reflects the relatively higher proportions of low-income families, unemployed individuals, and renters in central cities.

The mix of loans used by borrowers in central city locations is similar to that used by borrowers in noncentral city locations with a couple of exceptions. Twenty percent of home purchase loans granted in central cities were FHA-insured compared with 15 percent in noncentral cities. Also the proportion of multifamily loans is higher in central cities (data not shown in table), and partly reflects these areas' higher proportion of multifamily and rental houses.

tional home purchase loans to low-income borrowers than do independent mortgage companies (table 13). Twenty percent of the families receiving conventional home purchase loans through depositories have low incomes, compared with 15 percent of families receiving them from independent mortgage companies. The higher proportion may reflect the use by depositories of more flexible underwriting standards. Generally, independent mortgage companies follow the underwriting guidelines set by secondary market institutions because they sell most of their loans. Mortgage company affiliates of depositories focus on selling loans in the secondary market, but they sell to their affiliated depository institutions as well. Depository institutions also sell loans, but they often choose to hold them in portfolio, which gives depositories and their mortgage company affiliates greater flexibility in underwriting standards.

^{2.} Excludes multifamily loans.

Source. FFIEC, Home Mortgage Disclosure Act data.

^{2.} Excludes multifamily loans.

^{3.} Averaged across census tracts in category.

Source. FFIEC, Home Mortgage Disclosure Act data.

On the other hand, depositories provide a smaller proportion of home purchase and refinancing loans to minorities than do independent mortgage companies. The higher origination by independent mortgage companies reflects in part a greater proportion of loans to "joint" borrowers—that is, households with one minority applicant and one white applicant—and to Asian borrowers—possibly a reflection of the fact that the independent mortgage companies reporting 1992 HMDA data were more likely than depositories to have originated loans in California, a state with a large Asian population.

Somewhat surprisingly, government-backed loans extended by depositories and those extended by independent mortgage companies have distributions across income groups that are similar to the distributions for conventional loans. About 38 percent of the government-backed loans originated by depositories and their affiliates are to low-income borrowers, compared with 32 percent of the loans originated by independent mortgage companies. One would have expected the distribution of FHA and VA loans across income groups to be similar for all lenders because the underwriting standards are determined by the FHA or VA, not by the originator. The greater proportion of low-income borrowers among the government-backed home purchase loans extended by depositories may reflect other factors, such as the location of bank branches in low-income communities or the effect of depositories' being subject to the Community Reinvestment Act (CRA).

HMDA DATA AND THE SUPERVISION OF DEPOSITORY INSTITUTIONS

Although the HMDA data alone are not sufficient for assessing the fairness of the mortgage lending process or determining whether institutions have violated the fair lending laws, they are a valuable tool used extensively by the Federal Reserve and other federal agencies in the enforcement of fair lending laws. Because these agencies have access to lenders' files on loan applications and to information about applicable credit standards, they can overcome many of the limitations of the HMDA data regarding the assessment of applicant credit-worthiness and of property characteristics.

The Federal Reserve's program for enforcing fair lending, like that of the other agencies, focuses

Educational Material on Fair Lending

As part of its consumer education program, the Board distributes a brochure published by the FFIEC entitled "Home Mortgage Lending and Equal Treatment." This brochure identifies lending standards and practices that may produce unintended discriminatory effects, and it cautions lenders about their use. It focuses on race and includes examples of subtle forms of discrimination, such as unduly conservative appraisal practices in changing neighborhoods; property standards like size and age that may exclude homes in older neighborhoods; and unrealistically high minimum-loan amounts. The Board has published a pamphlet entitled "Home Mortgages: Understanding the Process and Your Right to Fair Lending." This pamphlet informs consumers about the mortgage application process and their rights under fair lending and consumer protection laws.

The Federal Reserve Bank of Boston has published a booklet entitled *Closing the Gap: A Guide to Equal Opportunity Lending*. It addresses lending discrimination and challenges lenders to reconsider every aspect of their lending operations—from the hiring of loan officers to the treatment and evaluation of applicants—to ensure that loan decisions are not made on the basis of race or ethnicity.

Through its Community Affairs program, the Federal Reserve provides outreach services and educational and technical assistance to help financial institutions and the public understand and address community development and reinvestment issues. Community Affairs officials at the Reserve Banks respond to requests for information and assistance on the CRA, fair lending, and community development. Efforts extend to working with banking institutions and associations, governmental entities, businesses, and community groups to develop programs that promote community development. Overall, efforts of the Reserve Banks in Community Affairs involve about a hundred programs a year with thousands of participants as a way of encouraging economic development and ensuring fair lending.

on examining for compliance with fair lending laws and more broadly on ensuring that credit is made available to low- and moderate-income areas, including areas with substantial minority populations. It involves an aggressive approach to investigating consumer complaints. It also extends to providing consumer and creditor education and gaining insight into the mortgage markets through research (see the box "Educational Material on Fair Lending").

Fair Lending Enforcement

The Federal Reserve System's program of consumer compliance examinations began in 1977. These examinations, carried out by specially trained examiners, emphasize identifying potential discrimination of the kind prohibited by the Equal Credit Opportunity and Fair Housing acts. On average, the Reserve Banks examine about two-thirds of all state member banks each year.

Procedures for fair lending enforcement focus primarily on comparing the treatment of members of a minority or protected class with other loan applicants. Starting with a review of loan policies and procedures and interviews with lending personnel, an examiner seeks to determine, among other things, the bank's credit standards. Then, using a sample of actual loan applicants, the examiner judges whether bank personnel apply those standards uniformly in evaluating loan applications from minorities, women, and others whom the fair lending laws were designed to protect.

The examiner attempts to look at the same information the bank used to make its credit decision, including credit history, income stability, and total debt burden. If it appears that credit standards were not followed or were not applied consistently, these findings are discussed with bank management and a more intensive investigation is undertaken. Violations discovered through any of these techniques will result in correction by the institution, noti-

fication of the applicant, and referral of the matter to the Department of Justice or HUD when appropriate.

Examiners also meet with members of the bank's community, including private citizens and local government officials who may have knowledge about the credit concerns of their community. Examiners thus can learn about public perceptions of credit availability for minorities and low- and moderate-income persons. These meetings may suggest additional scrutiny of particular areas and may provide insight into the way a bank is serving its local community.

The Federal Reserve's consumer complaint program is another component of the enforcement of the fair lending laws. Consumer complaints that allege loan discrimination are investigated and may prompt onsite review. Mortgage complaints may also be referred to the Department of Housing and Urban Development. As with the examinations program, considerable attention is given to ensuring personal contact with complainants and making the public aware of agency procedures.

A New Fair Lending Examination Tool

Because determining whether lenders are complying with fair lending laws is difficult for examiners, even with these procedures, the Federal Reserve has searched for better tools. In recent months, it has been testing a computerized statistical model for use in bank examinations and has shared it with the other financial regulators.

The new tool identifies potential problems through statistical techniques but relies on examiner judgment for determinations of whether discrimination has actually taken place. It automates the approach of onsite fair lending exams. First, the examiners use HMDA data to identify institutions that may require a more intensive review of their mortgage lending decisions. This initial analysis is done with a multivariate model of the institution's decisions to accept or reject loan applicants based on the limited information available from HMDA, including the applicant's income, the amount of the loan requested, the applicant's race and gender, and the disposition of the application.

When the results of this evaluation show measurable differences among racial or ethnic groups or

between males and females that are not explained by differences in income or the amount of the loan requested, the system automatically selects a sample of applications to be reviewed more extensively. Examiners gather additional information from loan application files, including data on the value of the property being purchased and on the applicant's credit history, debts, and employment history. These data are analyzed in a more comprehensive multivariate statistical model to determine whether they appear to explain the differences in denial rates by race, ethnicity, or gender observed in the initial analysis. The new system then pairs a given applicant with one or several other applicants (of different races or ethnic groups, for instance) who have similar financial characteristics but who experienced different outcomes on their loan requests. After reviewing the loan files of the selected pairings to determine what, if any, important factors were omitted in the statistical analysis, examiners can discuss with bank management the applications for which the credit decisions are suspect. If the bank appears to have discriminated, various enforcement actions are possible, including asking the Department of Justice to investigate further.

Besides this "micro" use of the HMDA data, the Federal Reserve analyzes the data with a computerized system that is also accessible to the Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency. The system allows the data to be segmented by applicant and borrower characteristics, such as race, gender, and income, or by geographic boundaries. Examiners can thus quickly sort through vast quantities of data, focus on data for specific lending markets, and draw comparisons, for example, of an individual HMDA reporter's performance against that of all lenders in the area. Through these analyses, examiners can more readily determine whether a bank is serving all segments of its community.

The Federal Reserve has also developed the ability to map by computer the geographic location of a bank's loans and to integrate demographic information for the bank's local community. This type of analysis and presentation increases an examiner's ability to assess a bank's performance in helping to meet the credit needs of its community.

MSA median is the median family income of the metropolitan statistical area (MSA) in which the property related to the loan is located.

PURCHASES OF HOME LOANS: THE ROLE OF THE SECONDARY MORTGAGE MARKETS

Institutions in the secondary mortgage market buy and sell billions of dollars of mortgage loans or securities backed by mortgage loans each year. Some participants also guarantee payments on pass-through securities issued against pools of residential mortgage loans. The secondary mortgage market enables mortgage originators to raise new funds. The originators sell assets that are otherwise relatively illiquid and can then extend new loans or use the funds for other purposes.

MSA; *Middle income*, median family income 80 percent to 120 percent of MSA median; *Upper income*, median family income more than 120 percent of MSA median.

Secondary market participants generally do not originate loans, but they do specify the underwriting guidelines that loans must meet to be eligible for purchase or securitization. These guidelines and related limitations on loan-size purchases vary among secondary market participants; thus, for the loans that these institutions purchase or securitize, the characteristics of the borrowers and neighborhoods in which their properties are located can be expected to differ.

The 1989 amendments to HMDA require lenders in the primary market to report home loans that they sell to secondary market purchasers if they

^{2.} Census tracts are categorized by the median family income for the tract relative to the median family income for the MSA in which the tract is located. Categories are defined as follows: Low or moderate, median family income for census tract less than 80 percent of median family income for

originated or purchased the loans during the same year. The HMDA data are the only publicly available source of information on the characteristics of borrowers whose loans are purchased by secondary market institutions and of the neighborhoods in which these borrowers reside.

Government-sponsored Enterprises

Three government-sponsored enterprises (GSEs) dominate the secondary mortgage market—Fannie Mae, Freddie Mac, and the Government National Mortgage Association (Ginnie Mae). Fannie Mae and Freddie Mac are publicly chartered private entities; Ginnie Mae is a government agency. In 1992, the GSEs accounted for 74 percent of the roughly 5.4 million loans sold in the secondary

market by lenders covered under HMDA (calculated from table 14). Other types of institutions—such as pension funds, insurance companies, mortgage companies, and depository institutions—are active secondary market participants. They buy the same types of loans purchased by the GSEs and provide an outlet for so-called jumbo loans—conventional loans that exceed in size the maximum single-family mortgage that may be purchased by Fannie Mae or Freddie Mac (in 1992, \$202,300).¹⁷ These non-GSE institutions some-

^{17.} The loan limit varies by the number of units in the property and by geographic location. In 1992 the maximum loan limits for single-family mortgages on properties with one to four units ranged from \$202,300 to \$388,800 except in Alaska, Guam, and Hawaii, where these limits were 50 percent higher.

times purchase other loans such as mobile home loans, adjustable-rate mortgages, and loans that do not conform to GSE standards or that the GSEs are prohibited from purchasing.

Fannie Mae and Freddie Mac buy mainly conventional mortgage loans, convert them into securities, and sell the securities to investors such as pension and mutual funds. But they also hold some loans in portfolio. ¹⁸ Ginnie Mae does not purchase loans but guarantees the timely payment of principal and interest for privately issued securities backed by FHA, FmHA, and VA loans.

Basic underwriting guidelines (for instance, those applying to monthly debt-to-income and maximum loan-to-value ratios) differ among the secondary market participants. Fannie Mae and Freddie Mac follow essentially the same guidelines, which they themselves set for the conventional loans they purchase. For Ginnie Mae, the underwriting standards are established by HUD for FHA-insured loans and by the VA for VA-guaranteed loans.¹⁹

FHA and VA borrowers differ from conventional loan borrowers because HUD and the VA generally allow borrowers to have more debt relative to income and to make smaller downpayments than do conventional lenders. Also, HUD and the VA have restrictions on the maximum size of loans they will back and, on average, insure or guarantee a higher proportion of smaller loans relative to loans made by conventional lenders. In general, borrowers whose loans are securitized by Ginnie Mae have lower incomes, are more likely to be from a minority group, and are more likely to reside in a low- or moderate-income or minority neighborhood than are borrowers whose loans are sold to, or securitized by, Fannie Mae or Freddie Mac. For example, in 1992 about half the loans backed by Ginnie Mae were made to borrowers with incomes less than the median family income for their MSA, compared with about a quarter of the loans backed by Fannie Mae and Freddie Mac (table 14).

The underwriting standards used by purchasers of mortgages other than the GSEs vary considerably. In general, these institutions purchase a larger proportion of mortgages extended to borrowers with incomes below the median for their MSAs than do Fannie Mae and Freddie Mac. The exceptions are life insurance companies, whose purchases include only 22 percent of mortgages from families with incomes below the median family income for their MSAs, and affiliates of institutions whose purchases include about the same share of mortgages to families with below-median incomes as do Fannie Mae and Freddie Mac.

Using HMDA Data To Measure GSE Achievements in Affordable Housing

One objective in the charters of Fannie Mae and Freddie Mac is to promote the availability of mortgage credit to low- and moderate-income families. HUD also sets annual goals for Fannie Mae and Freddie Mac, as required by the Federal Housing Enterprises Financial Safety and Soundness Act of 1992.²¹ The goals specify that a certain proportion of their purchases be mortgages extended to low-and moderate-income families and to families residing in central cities. Furthermore, the two GSEs must purchase a set dollar amount of mortgages extended to families who reside in low-income areas or who have very low incomes.²²

As provided by the GSE legislation, HUD set interim goals for 1993 and 1994; final goals will go into effect after 1994. In 1993, 30 percent of the

^{18.} Their annual reports for calendar year 1992 indicate that Fannie Mae's mortgage portfolio equaled 26 percent of its outstanding mortgage securities and mortgage holdings whereas Freddie Mac's portfolio equaled 8 percent. However, Freddie Mac is currently expanding its portfolio at a faster rate than Fannie Mae.

^{19.} Ginnie Mae also securitizes loans backed by the FmHA. Because it is relatively small and few lenders covered by HMDA report such loans, the FmHA program is not discussed here.

^{20.} The underwriting standards of these institutions are heavily influenced by the credit-rating agencies that rate their securities. The credit-rating agencies determine how much credit enhancement is required to earn an investment-grade rating; the level of the required credit enhancement directly influences the cost to the originator.

^{21.} The goals are described in detail in Department of Housing and Urban Development, Office of the Secretary, "Interim Housing Goals for the Federal Home Loan Mortgage Corporation" and "Interim Housing Goals for the Federal National Mortgage Association" (September 16, 1993).

^{22.} The last goal is referred to as the special affordable housing goal. The performance of the GSEs in meeting the special affordable housing goal cannot be evaluated because the HMDA data do not include many of the mortgages purchased by Fannie Mae and Freddie Mac and because the special affordable housing goals are stated in dollar amounts.

Excludes loans of less than \$5,000, those with loan-to-income ratios that exceed four, and loans to nonowner-occupants.

(MSA) in which the tract is located. Categories are defined as follows: Low or moderate, median family income for census tract less than 80 percent of median family income for MSA; Middle income, median family income 80 percent to 120 percent of MSA median; Upper income, median family income more than 120 percent of MSA median.

dwelling units financed by mortgages purchased by Fannie Mae had to be occupied by low- or moderate-income families, and 28 percent of the units financed had to be secured by properties in central cities. For Freddie Mac, the respective goals were 28 percent and 26 percent. In 1994, both of these goals are set at 30 percent for the two companies.

In assessing Fannie Mae's and Freddie Mac's performance in meeting affordable housing goals, HUD will use information collected by these companies on the mortgages they purchase. This information will provide much greater detail than the

HMDA data for the loans purchased; however, the HMDA data provide information on both the primary and the secondary mortgage markets in metropolitan areas and thus will allow comparisons that can be used to evaluate the difficulties and opportunities that the GSEs encounter in attaining these goals.

The HMDA data can be used to derive only rough estimates of how close the GSEs are to meeting the low-income and central city goals because of substantial deficiencies in the data when used for this purpose. Specifically, HMDA does not require lenders to record the specific number of

GNMA and FmHA are not included because they do not back conventional mortgage loans.

^{3.} Census tracts are categorized by the median family income for the tract relative to the median family income for the metropolitan statistical area

^{4.} Includes only census tracts located in MSAs.

dwelling units financed by a loan, and for some mortgages it does not provide reliable data on the income of the occupants of the property. For example, the HMDA data on mortgages extended for rental properties do not include information about the income of tenants. HUD will use estimates of the income of tenants or the rents they pay to calculate Fannie Mae's and Freddie Mac's performance. HMDA also excludes thousands of depository institutions that make mortgages but that have no offices within an MSA; in 1992, it still excluded independent mortgage companies that had less than \$10 million in assets. Finally, with regard to mortgages originated in central cities, HMDA classifies all mortgages from a particular census tract as being within the central city, even if only a portion of the census tract is part of the central city. For purposes of the GSEs' central city goal, HUD counts only loans on properties that are in the central city portions of census tracts.

According to calculations using only HMDA data on owner-occupied properties, roughly 24 percent of the conventional home purchase and refinancing loans purchased by Fannie Mae and Freddie Mac were extended to borrowers with incomes smaller than the median family income for their MSA (table 15).²³ In the primary market, 27 percent of the conventional home purchase loans and refinancings for amounts less than \$202,300 were extended to borrowers with such incomes.

Refinancings significantly influence the calculation of these 1992 market shares. Compared with borrowers in the home purchase loan market, many of whom are first-time homebuyers, a larger proportion of borrowers who refinance have high incomes. First-time homebuyers generally have lower incomes than homeowners who refinance an

In 1992, because of the large volume of refinancings, Fannie Mae and Freddie Mac would have had difficulty in meeting a low-income goal of 30 percent solely by purchasing single-family mortgages. But even in "normal" years for refinancings, they may have difficulty meeting the goal by purchasing mostly single-family mortgages. The GSEs can limit the influence of refinancings either by restricting their purchases of such loans or by expanding the purchase of other loans.

In the future, to increase their share of loans extended to borrowers with below-median incomes, Fannie Mae and Freddie Mac could follow several strategies. Among these are acquiring a larger share of new conventional loans extended to these borrowers, purchasing seasoned loans to lowincome borrowers from portfolio lenders, and expanding new mortgage programs with liberalized underwriting guidelines to compete with government-backed and with depositories' portfolio loan programs. They could also focus more on loans that finance rental properties. Relatively more loans for rental properties are in lowerincome neighborhoods, where there are more renters (see table A.1 and table 10). For 1992, roughly 4 percentage points would have been added to Fannie Mae's and Freddie Mac's low-income ratios had loans for rental properties been included in the calculation.25 If, however, the GSEs pursue more

existing mortgage. Excluding refinancings, roughly 28 percent of Fannie Mae's and Freddie Mac's purchases were mortgages extended to owner-occupant homebuyers with below-median incomes. Borrowers with below-median incomes accounted for about 33 percent of the conventional home purchase loans made in the primary market.²⁴

^{23.} These calculations excluded loans purchased by lenders in the primary market, government-backed loans (which do not count toward the goals), loans above the conforming, single-family loan limits, loans to nonoccupant owners, home improvement loans (which may not count toward the goals), conventional loans below \$5,000 (such loans are likely to be home improvement loans, second mortgages, or home equity loans), and loans for which the ratio of the loan amount to the borrower's income exceeded four. In addition, HMDA data does not distinguish between first and second homes; HUD considers only first homes in calculating the affordable housing goals. Including the second home mortgages in these calculations may slightly understate the proportions of low-income housing financed.

^{24.} The home purchase loan market also includes mobile home loans. Lower-income families are more likely to seek such loans, suggesting one explanation for the share of low-income loans purchased by the GSEs being less than the share of such loans in the primary home purchase loan market. However, the importance of the mobile home loan market is difficult to determine. Fannie Mae and Freddie Mac can purchase only mobile home loans that are secured by real property as determined under state law.

^{25.} We estimated the number of rental units by taking the number of loans secured by a rental property and multiplying it by the number of units financed per loan. We used both two and three units financed per loan secured by nonowner-occupied one- to four-family properties; and for multifamily properties, we calculated the number of units by assuming that each unit required

extensive involvement in rental properties to meet their goals, they may be undertaking greater risks because this area of real estate lending is prone to higher, and more difficult to predict, levels of credit losses compared with mortgages secured by singlefamily, owner-occupied properties.

Unlike the low-income goals, the central city goals appear to be met by Fannie Mae and Freddie Mac, according to the HMDA data. In 1992, Fannie Mae's proportion of central city purchases of conventional home purchase loans and refinancings was about 34 percent and Freddie Mac's proportion was about 35 percent—both approximating the primary market's proportion of about 35 percent (table 15).

Refinancings influence the overall proportion of central city purchases somewhat because refinancings are disproportionately from borrowers in noncentral city locations. Excluding refinancings, Fannie Mae's share would have been about 36 percent and Freddie Mac's about 37 percent, shares similar to those in the primary market.

Although Fannie Mae and Freddie Mac appear to easily meet their central city goals, other factors suggest that these estimates may be too high. As mentioned earlier, the HMDA data overstate the share of all mortgages originated in central cities. HMDA classifies all loans originated in a census tract that is partially in a central city as a central city loan. If all of these loans were instead classified as noncentral city loans, the ratios would drop 6–7 percentage points. Of course, the actual decline would not be this extreme because some of the loans from these "split" census tracts are in the central cities and some are not.

HMDA's coverage of loans made in nonmetropolitan areas is limited, even though some institutions located in metropolitan areas make and report nonmetropolitan loans, because it excludes most institutions located in rural areas. Roughly 14– 20 percent of all mortgage originations are from rural areas, suggesting that including these loans in the central city calculations would lower the share

\$50,000 of financing and that HMDA covers only one-half of Fannie Mae's and Freddie Mac's multifamily units. We then estimated the number of low-income borrowers by assuming that the number equaled the proportion of loans secured by rental properties in low- or moderate-income census tracts plus the proportion secured in middle-income census tracts.

of central city loans 4–6 percentage points.²⁶ Also, small mortgage companies that are not required to report under HMDA may be more heavily concentrated in suburban or semirural areas.²⁷ The effect of omitting these companies' data from HMDA is difficult to estimate, but including these purchases would probably lower the estimates of the proportion of central city loans purchased by Fannie Mae and Freddie Mac.

For the reasons cited earlier, the HMDA data are not adequate when used for measuring Fannie Mae's and Freddie Mac's performance in meeting their goals. However, the comparison of their performance relative to that of other secondary market institutions, as measured by the HMDA data, may be informative because the limitations highlighted above influence the calculations for all institutions. The HMDA data suggest that secondary market institutions other than Fannie Mae and Freddie Mac generally have a somewhat higher proportion of loans extended to lower-income families and to families living in the central cities (table 15). This relationship is most evident in the home purchase loan market. Only life insurance companies seem to finance a lower proportion of loans extended to lower-income families, although they purchase a higher proportion of loans from the central cities.

APPENDIX: CHARACTERISTICS OF DIFFERENT GROUPS OF NEIGHBORHOODS

In 1992, lenders were required for the first time, when identifying the location of the properties

^{26.} The estimated range of the proportion of rural mortgage originations is calculated from data in U.S. Department of Commerce, Economics and Statistics Administration, Bureau of the Census and U.S. Department of Housing and Urban Development, Office of Policy Development and Research, American Housing Survey in the United States (Government Printing Office, biennually). The lower bound reflects the distribution of occupied housing units across metropolitan and rural areas, whereas the upper bound reflects the distribution of mortgage originations of all types in 1990 and part of 1991. An additional source of information suggests that the share of conventional home purchase loan originations in rural areas is roughly 14 percent. See Federal Housing Finance Board, "Effect of Federal Home Loan Bank System District Banks on the Housing Finance System in Rural Areas" (FHFB, April 23, 1993).

^{27.} As mentioned earlier, institutions with less than \$10 million in assets were not required to report in 1992 or in earlier years. Beginning in 1993, any nondepository institution that originated more than 100 home purchase loans was required to report, and this requirement may substantially increase the number of mortgage companies reporting HMDA data.

^{28.} The 1990 U.S. Census of Population and Housing reflects circumstances at the time the survey was conducted in the spring of

the 1992 HMDA data with the lending information reported for preceding years.

Neighborhoods with Different Incomes

A comparison of neighborhoods grouped by their median family incomes reveals differences in population, housing, and employment characteristics. To demonstrate these relationships, census tracts in MSAs have been divided into three broad income categories—low or moderate, middle, and upper income based on the relationship between the median family income of a census tract and the median family income of the MSA in which it is located.29

Nationwide, the low- or moderate-income neighborhoods have median family incomes that are, on average, only 58.2 percent of the median family income for their respective MSA (table A.1). Although these neighborhoods exhibit some diversity in the incomes of their residents, on average they have a high concentration of relatively poor families and have relatively few families at the highest income levels. Overall, 56 percent of the families residing in low- or moderate-income neighborhoods had 1989 incomes below \$25,000, and nearly 35 percent had 1989 incomes below \$15,000. These low levels of income are reflected both in elevated poverty rates and in higher unemployment—28 percent of the residents of these neighborhoods had incomes that placed them below the poverty level, and nationwide their average unemployment rate was more than three times the rate for residents of upper-income neighborhoods.

The differences in the income and employment circumstances of households across groups of neighborhoods partly account for the variation in owner-occupancy rates. In low- or moderateincome neighborhoods, 53 percent of the housing units in 1990 were rentals, a share nearly two and one-half times that in upper-income neighborhoods. This difference is reflected in the composition of the housing stock: Whereas 69 percent of the housing units in upper-income neighborhoods were in structures housing one to four families, only 36 percent of the units in low- or moderateincome neighborhoods were in such structures. Low- or moderate-income neighborhoods, on average, had not only low owner-occupancy rates but also high concentrations of residential properties with relatively low market values. For example, nearly 35 percent of the owner-occupied homes in low- or moderate-income neighborhoods in 1990 were valued at less than \$40,000, compared with only 2 percent of the owner-occupied homes in upper-income neighborhoods. 30

Vacancy rates, the median age of housing units, and the proportion of boarded-up units provide insight into the condition of residential properties. Vacancy rates in low- or moderate-income neighborhoods were, on average, nearly double those in upper-income neighborhoods. The median age of housing units also was substantially higher than in upper-income neighborhoods. Finally, the proportion of housing units that were boarded up (a sign of deterioration) was greater than that in either moderate- or upper-income neighborhoods.

Besides the income, employment, housing, and property condition characteristics identified thus far, population characteristics differ across neighborhoods grouped by median family income. The residents of low- or moderate-income neighborhoods in 1990 were, on average, more than 50 percent black or Hispanic. These minority groups together accounted for only 9 percent of the population in upper-income neighborhoods. Asians, in contrast, were relatively equally distributed across neighborhoods, accounting for approximately 3-4 percent of the residents of both low- or moderate- and upper-income neighborhoods.

^{1990,} except for income information, which is based on 1989 year-end data. This section draws on material in the "Report to the Congress on Community Development Lending."

^{29.} Census tracts were classified in the following manner: Lowor moderate-income census tracts are those in which median family income is less than 80 percent of the median family income for the MSA in which the tract is located; middle-income census tracts are those in which median family income is 80 to 120 percent of the MSA median family income; and upper-income census tracts are those in which median family income exceeds 120 percent of the MSA median. Census tracts in each small county (total population of 30,000 or less) are aggregated to create a small county total to be consistent with the way HMDA data are reported. In all, eighty-six small counties are included in the analysis shown in tables 10, 11, and 12.

^{30.} Median monthly rents also reflect differences in the value of residential properties across neighborhoods. The median rent in low- or moderate-income neighborhoods in 1990 was \$397, whereas the median rent in high-income neighborhoods was \$643.

reveal differences in socioeconomic and demographic status (table A.2). The residents of predominantly minority neighborhoods (defined here as census tracts in which the minority population exceeds half of the total population) typically have

Figures are simple averages of the values for the census tracts in a category; they are calculated by summing the values for all census tracts in the category and dividing by the number of tracts in the category.

lower relative incomes than the residents of other neighborhoods. On average, roughly one-third of the families in predominantly minority neighborhoods had 1989 incomes below \$15,000, and 28 percent of the residents had incomes below the poverty level. In contrast, about one-tenth of the families in predominantly white neighborhoods had incomes below \$15,000, and only 7 percent of the residents had incomes below the poverty level. This pattern is reversed at the opposite end of the income scale: About 17 percent of the families in predominantly minority neighborhoods had incomes above \$50,000, compared with 38 percent of the families in predominantly white neighborhoods.

Neighborhoods with large proportions of minority residents are also characterized by high unemployment rates. At the time of the 1990 census, the average unemployment rate of residents of predominantly minority neighborhoods was 14 percent compared with 5 percent for residents of predominantly white neighborhoods. Predominantly minority neighborhoods typically have lower owner-occupancy rates, higher vacancy rates, more boarded-up properties, older homes, and a higher proportion of lower-valued, owner-occupied homes. These characteristics are most evident in minority neighborhoods with large proportions of black residents.

Central City Neighborhoods Compared with Other Neighborhoods

The 1990 Census provides information that can be used to describe the population, housing, and employment characteristics of residents of MSAs categorized by whether they reside in neighborhoods in the central city or in the noncentral city portions. In turn, the 1992 HMDA data provide information on the characteristics of the borrowers and types of loans extended to households in central and in noncentral city locations.

The reader is cautioned that population and economic characteristics often vary greatly within the neighborhoods of any particular central city or noncentral city location. Moreover, central cities differ in characteristics from each other, depending, for instance, on the region of the country.

Central and noncentral city areas are nearly identical in total numbers of housing units. As of 1990,

Includes only census tracts in MSAs. If any portion of a census tract is located within a central city boundary, the census tract is classified in the central city category.

Source. Derived from 1990 U.S. census data.

Figures are simple averages of the values for the census tracts in a category; calculated by summing the values for all census tracts in the category and dividing by the number of tracts in the category.

Median family income for census tracts as a percentage of MSA median family income.

central cities had 38.1 million housing units, and noncentral city neighborhoods had 38.7 million units (table A.3). Nonetheless, census information reveals significant differences, on average, in the characteristics of central city and noncentral city populations. The residents of central city areas had median family incomes that averaged 91 percent of the median family incomes of the MSAs in which they are located. The residents of neighborhoods in noncentral city areas, in contrast, had significantly higher incomes on average. Both poverty and unemployment rates reflect these differences: On average, the poverty rate in central city areas was 18.7 percent in 1990, and the unemployment rate was 8.9 percent; in contrast, for noncentral city

areas, these rates were 8.1 percent and 5.3 percent.

The housing characteristics of central city and noncentral city areas also reflect the income and employment circumstances of households. In central city areas, on average, 43.9 percent of the units in 1990 were rentals, a rate nearly 70 percent higher than that in noncentral city areas. Central city neighborhoods also typically had higher vacancy rates, older homes, and greater proportions of boarded-up units.

Finally, central city and noncentral city areas are substantially different in their racial or ethnic composition. In 1992, blacks and Hispanics accounted for 32.9 percent of central city residents but only 14 percent of noncentral city residents.

Industrial Production and Capacity Utilization for November and December 1993

Released for publication December 15

Industrial production rose 0.9 percent in November; the revised gain for October was 0.7 percent. The growth in recent months has been led by sharp increases in the motor vehicles and parts industry,

where the level of production rose 20 percent between August and November. Excluding motor vehicles and parts, industrial production grew 0.5 percent in November, with solid gains in the output of construction supplies and information processing equipment. At 113.2 percent of its 1987

2. Change from preceding month.

average, industrial production was 4.4 percent above its level a year ago. The recent strength in output boosted the utilization of total industrial capacity 0.6 percentage point in November and 0.5 percentage point in October. Capacity utilization now stands at 83.0 percent, the highest rate since August 1989 and more than 1.0 percentage point above its 1967–92 average.

When analyzed by market group, the data show that gains in motor vehicles have generated sharp increases in the production of durable consumer goods in each of the past three months. Excluding autos and trucks, the level of production of consumer durables in November was about 2 percent higher than in September, a margin reflecting net gains in appliances, carpeting, and furniture. Production of consumer nondurables remained sluggish, however, advancing just 0.2 percent, and was

only 0.5 percent higher than it was a year earlier. Over the past year, the production of clothing has been particularly weak.

The rapid expansion in the output of business equipment over the past three months has been led by gains in motor vehicles and computers. On balance, output of the other components in this market group has changed little since July; declines in commercial aircraft and related equipment have largely offset gains in other categories.

Among materials, the sharp rise in the output of durables in the past three months has been spurred by sizable increases in the production of semiconductors and motor vehicle parts. The production of nondurable goods materials increased 1.1 percent, largely because of a pickup in the production of paper, paperboard, textiles, and chemicals. Nevertheless, output of nondurable

^{3.} Contains components in addition to those shown.

r Revised.

p Preliminary

goods was only slightly higher than in August. The output of energy materials was about unchanged last month.

When analyzed by industry group, the data show that manufacturing output expanded 1.0 percent in November and had a revised gain of 0.7 percent in October. The output of durable goods manufacturers was up 1.3 percent, and the output of nondurable goods manufacturers rose 0.6 percent. The utilization of manufacturing capacity increased 0.7 percentage point, to 82.2 percent, a level 1 percentage point above the 1967-92 average. The utilization rate in advanced processing increased 0.6 percentage point, to 80.8 percent, a level about equal to the 1967–92 average. The recent increase for the advanced-processing group was concentrated in the motor vehicles and parts industry, where utilization increased more than 5 percentage points in each of the past two months; at 83.2 percent, the utilization rate in motor vehicles and parts now stands nearly 8 percentage points above its 1967–92 average. The utilization rate in primary processing increased 0.8 percentage point in November, to 85.5 percent, a level more than 3.0 percentage points above the 1967–92 average. Last month's increase was concentrated in lumber products, paper and products, petroleum products, and stone, clay, and glass products. At 91.7 percent and 94.1 percent respectively, the November utilization rates in lumber and petroleum were each nearly 9.0 percentage points above their 1967–92 averages.

The output at utilities rose 0.3 percent, and the output of mines declined 0.3 percent.

Released for publication January 14

Industrial production rose 0.7 percent in December. For the fourth quarter as a whole, total output advanced at an annual rate of 7.5 percent. Continuing the pattern begun in September, December's growth was boosted by developments in the motor vehicles and parts industry, where production grew 4.9 percent for the month, and has increased approximately 25 percent since August. Excluding motor vehicles and parts, industrial production grew 0.5 percent in December, about the same as November's increase; this gain reflected continued

growth in the output of construction supplies, durable goods materials, and business equipment. At 114.0 percent of its 1987 average, industrial production in December was 4.6 percent above its level a year ago. Reflecting the sustained strong growth in output, the utilization of total industrial capacity rose 0.5 percentage point in December after having increased 0.7 percentage point in November. Capacity utilization at the end of 1993 stood at 83.5 percent, 2.5 percentage points above its year-ago level but still below its most recent peak, which was in 1988–89.

When analyzed by market group, the data show that the output of consumer goods was pushed up by another sizable gain in automotive products. However, the output of other consumer durable goods, such as appliances, eased in December after two months of strong growth. Despite last month's decline, the production of consumer durables excluding automotive products grew at an annual rate of more than 6 percent during the fourth quarter. The output of nondurables remained sluggish: The output of clothing and consumer paper products continued to be weak, and the production of consumer fuels, mainly gasoline, declined sharply last month.

The rapid expansion in the output of business equipment since August continued in December, led by strong gains in motor vehicles and computers. The production of most other categories of business equipment, except commercial aircraft, also increased.

Among materials, another sharp rise in the output of durables in December was driven largely by sizable increases in the production of semiconductors and parts for motor vehicles. However, the production of nondurable goods materials declined slightly, as the output of chemical materials rose but the output of paper materials declined. The output of energy materials expanded 0.8 percent, with coal, crude oil, and utilities production all up noticeably. Nevertheless, production for this market group was down about 1 percent from its December 1992 level.

When analyzed by industry group, the data show that manufacturing output expanded 0.7 percent in December after a gain of 1.1 percent in November. Production by manufacturers of durable goods grew 1.3 percent, with particularly strong increases recorded by the iron and steel, nonelectrical

Change from preceding month.

machinery, and motor vehicles and parts industries. By contrast, output of nondurable goods manufacturers declined 0.2 percent on a broad front; food, apparel, paper, printing and publishing, and petroleum all posted lower output for the month. The output at utilities rose 1.0 percent, and the output of mines increased 0.5 percent.

Manufacturing capacity utilization increased 0.4 percentage point in December to 82.7 percent. Rising utilization in durable goods manufacturing has accounted for all of the increase in the factory utilization rate over the past two months. Increases in utilization have been particularly sharp in primary metals and in motor vehicles and parts. By contrast, the utilization rate in nondurables manufacturing declined 0.2 percentage point.

Notice of Revised Indexes

Revised indexes of industrial production and rates of capacity utilization will be published in the G.17 (419) statistical release in February 1994. Revised production statistics will begin in 1991 and revised capacity utilization statistics will begin in 1990.

- The revisions to production primarily reflect the incorporation of more comprehensive monthly source data, review of the production factor coefficients, and updated seasonal factors.
- The revisions to capacity utilization will reflect improved estimates of capital stocks and preliminary results from the Census Survey of Plant Capacity for 1991 and 1992.

^{3.} Contains components in addition to those shown.

r Revised.p Preliminary.

• Diskettes containing the revised data will be available on the day of release from the Board of Governors of the Federal Reserve System, Publications Services, at (202) 452-3245.

NOTE. This issue contains two releases on industrial production and capacity utilization, the one for December 15, 1993 (November data) and the one for January 14, 1994 (December data). The release for February 1994 (containing January data) will appear in the March issue.

Statement to the Congress

Statement by J. Virgil Mattingly, General Counsel, Board of Governors of the Federal Reserve System, before the Committee on Banking, Finance and Urban Affairs, U.S. House of Representatives, December 9, 1993

I am pleased to appear today to testify in connection with the committee's hearing into recent requests that Sheikh Zayed al-Nahyan and two of his adult sons be granted head of state immunity in connection with pending civil litigation. The litigation relates to the acquisition of the First American banking organization by the Bank of Credit and Commerce International, S.A., and its affiliates (collectively BCCI). Sheikh Zayed is the President of the United Arab Emirates (UAE) and the ruler of Abu Dhabi, one of the emirates that make up the UAE.

FEDERAL RESERVE ENFORCEMENT ACTIONS RELATED TO THE BCCI

At the outset, you have asked me to summarize briefly the BCCI matter and the Board's enforcement actions relating to the BCCI. The irregular and unlawful operations of the BCCI have been described in detail at previous hearings before this and other congressional committees. In brief, before the BCCI closed in July 1991, it operated banking offices in numerous countries throughout the world but was not subject to supervision as a consolidated organization in its home country. This lack of consolidated supervision facilitated the BCCI's ability to carry out fraudulent transactions by, for example, allowing the manipulation of accounts through transfers of funds among its affiliates.

Much evidence has now come to light disclosing a complex and massive fraud at the BCCI, including mismanagement, substantial loan and treasury account losses, misappropriation of funds, unrecorded deposits, the creation and

manipulation of fictitious accounts to conceal bank losses, and concealment from regulatory authorities of the BCCI's true financial position. The BCCI never received regulatory approval to accept deposits from the general public in the United States, although it did operate several agencies here. However, evidence uncovered as a result of formal investigations by the Federal Reserve and other authorities shows that the BCCI did engage in the United States in a scheme to acquire controlling interests in U.S. banking organizations without the required previous regulatory approval. The BCCI carried out this scheme by causing persons financed by the BCCI to acquire voting shares of banking organizations as the nominees of the BCCI. As a result of this scheme, the BCCI acquired controlling interests in the Credit and Commerce American Holdings, N.V. (CCAH), the holding company established to acquire the First American banks, which operated in Virginia, Maryland, Washington, D.C., New York, and Tennessee, as well as the Independence Bank in California and the National Bank of Georgia.

A series of administrative enforcement actions by the Federal Reserve Board have grown out of the BCCI's unlawful acquisition of banking organizations in the United States. First, the Board instituted actions against the BCCI itself and related persons arising out of the First American and National Bank of Georgia transactions. The Board's charges were resolved as part of a comprehensive plea agreement that also resolved parallel criminal prosecutions against the BCCI brought by the Justice Department and the New York County District Attorney. The BCCI pled guilty to the criminal charges, and the BCCI's U.S. assets, estimated at several hundred million dollars, were forfeited to the United States. Under the agreement, half of the forfeited assets would then be paid to a worldwide victims' fund to compensate innocent depositors. The BCCI also consented to the Board's \$200 million civil

money penalty, with the Board agreeing to stay collection of the penalty in light of the asset forfeiture. The plea agreement also incorporated a requirement that the BCCI's interest in the First American banks would be fully divested, which has now been accomplished, and that the proceeds from the sale of that interest would be forfeited as an asset of the BCCI under the agreement.

Federal Reserve enforcement actions were also aimed at various persons who served as the BCCI's senior management or as nominees of the BCCI in acquiring and retaining control of U.S. banking organizations. These persons include Kamal Adham, a Saudi Arabian businessman who was charged with acquiring and holding shares of First American's holding company as a nominee for the BCCI. Adham has paid a \$10 million civil money penalty as well as \$3 million in reimbursement to cover investigative costs. He has also been permanently barred from banking in the United States.

The second major BCCI-related enforcement action by the Federal Reserve involves Ghaith Pharaon, another Saudi businessman. This action seeks a civil money penalty of \$37 million and an order prohibiting Pharaon from the banking industry, primarily for his alleged participation in the BCCI's unlawful acquisition of the Independence Bank. The Board's proceedings against Pharaon are pending. To assure that any possible civil money penalty assessed by the Board can be collected, the Board has obtained a federal district court order freezing Pharaon's U.S. assets until administrative proceedings before the Board have been completed. Pharaon is also facing three federal indictments and an indictment in New York County.

Of the other persons charged in this proceeding and those of First American, five are now subject to Board orders assessing penalties or banning them from banking, including Agha Hasan Abedi, the founder and president of the BCCI, and Swaleh Naqvi, a principal officer of the organization. Actions seeking to impose similar sanctions against three other persons are pending.

A third major enforcement action brought by the Federal Reserve involves Clark Clifford and Robert Altman, who, among other things, served as counsel for the BCCI and the CCAH and as senior management of the First American organization. The Board's case has been stayed pending a final decision on whether federal criminal charges against these persons will be reinstated.

The fourth major BCCI-related action is against Khalid bin Mahfouz, a Saudi banker, and the bank his family owns in Saudi Arabia, who are charged with unlawfully acquiring and holding a 28 percent block of shares of First American's holding company from 1986 through at least 1990 without regulatory approval. The Board's action seeks a \$170 million civil money penalty from Mahfouz. As a result of a federal court asset freeze lawsuit, letters of credit, totaling \$122 million, have been provided to the Board in connection with the civil penalty proceeding. Mahfouz has also been indicted in the County of New York.

INVOLVEMENT OF THE RULING FAMILY OF ABU DHABI WITH THE BCCI

The Abu Dhabi ruling family had substantial ownership interests in both the BCCI and the First American organization. After the Board's August 1981 approval of the acquisition of the First American banks by CCAH, Sheikh Zayed and his oldest son, Khalifa, became substantial investors in the CCAH, each one holding about 10 percent of its voting shares. Since the formation of the CCAH, the Abu Dhabi Investment Authority (ADIA) has separately owned between 6 percent and 8 percent of voting shares of that company.

At this time, none of the Federal Reserve's pending enforcement actions names the Abu Dhabi ruling family or the ADIA; nor in any of the actions brought by the Federal Reserve against others has the Abu Dhabi ruling family or ADIA been alleged to have served as BCCI nominees in controlling the shares of First American's holding company.

The Federal Reserve has not, however, had access to all of the evidence relating to the ownership of CCAH shares by members of the Abu Dhabi ruling family and related interests and has requests outstanding for access to witnesses and documents in Abu Dhabi. We are continuing to pursue all relevant information relating to the ownership of shares of the CCAH.

REQUESTS FOR HEAD OF STATE IMMUNITY BY SHEIKH ZAYED AND HIS SONS

Sheikh Zayed and his sons have moved to be dismissed as defendants in a civil lawsuit brought against them and several other BCCI-related persons by the First American organization. The lawsuit, filed in federal district court in Washington, D.C., seeks, among other things, damages for injuries to the organization resulting from its unlawful acquisition by the BCCI. As we understand, Sheikh Zayed asserts that, under the doctrine of head of state immunity, he, as the head of state of the UAE, and his immediate family are not subject to lawsuits in the United States. We understand that the State Department has been requested to express a view on whether head of state immunity applies to Sheikh Zayed and his sons.

Thus, the specific question as to whether head of state immunity requires the dismissal of Sheikh Zayed and his sons as defendants in the pending civil suit is now before the federal district court and the Department of State, which traditionally speaks for the executive branch on questions of immunity for foreign rulers. The Board is not a party to the civil litigation and has not taken a position on the head of state immunity issue. Staff members of the State Department have solicited the views of the Board's staff on the possible effects on the Board's bank regulatory powers if this immunity request was granted.

EFFECT OF GRANTING IMMUNITY TO THE ABU DHABI RULING FAMILY

If, as a result of the Board's ongoing investigation into BCCI matters, a formal enforcement action were to be taken against the ruler of Abu Dhabi, it is very possible that the Board's ability to prosecute such an action could be impaired if immunity were granted. As we understand it, the scope of head of state immunity has not been precisely defined, but it is possible that such immunity could be interpreted as affording complete protection against any type of civil action in this country, including a regulatory enforcement proceeding. Moreover, it is not clear whether the grant of head of state immunity to the ruler would cover his adult sons. We are not aware of any situation in the past in which a bank regulatory agency sought to take formal enforcement action against a foreign head of state.

IMPACT OF IMMUNITY GRANT ON REGULATION OF FOREIGN GOVERNMENT-OWNED BANKS

With regard to the more general question, a grant of immunity to a head of state who owns or controls a banking organization operating in the United States could restrict the Board's ability to ensure compliance with the banking laws. As explained earlier, in such a case the grant of head of state immunity could be interpreted as barring the Board from taking any enforcement action against a head of state who was a principal shareholder of the organization. In addition, because of this potential limitation on the exercise of an important regulatory tool, the issue of head of state immunity would be a significant factor in any application by a head of state to acquire a U.S. bank unless there was an effective waiver of immunity by the head of state.

Based on a review of available data, we are unaware of any instance in which a person who can be identified as a head of state, or as a member of the household of a head of state, at the present time owns 5 percent or more of the shares of a bank with operations in the United States. However, in shareholder lists required to be filed with the Federal Reserve we do not request that a head of state be identified as such, so that we cannot say for certain that no head of state currently owns shares of a bank doing business here.

As this committee is aware, foreign government entities own several banking organizations operating in the United States. The scope of the immunity granted to a foreign government entity in a civil action is governed by the Foreign Sovereign Immunities Act (FSIA). That act does not extend immunity to commercial activity by a foreign state entity in the United States, which we believe should include the acquisition and control of U.S. banks or the conduct by a foreign bank of activities in this country. Accordingly, under this view of the FSIA, we believe that a

defense of sovereign immunity should not interfere with the effective regulation of the operations of foreign government owned banks in the United States in the future. In this regard, the defense of sovereign immunity has not been raised in any of the enforcement actions taken to date by the Board against foreign governmentowned banks.

CONCLUSION

Although questions as to the existence and scope of immunity for the heads of foreign states or foreign government entities are determined by authorities other than the Federal Reserve, a grant of head of state immunity to an person controlling a banking organization with operations in the United States could possibly block regulatory actions against the head of state to enforce the banking laws. However, we are not aware of any situation in the past when immunity has restricted the exercise of regulatory powers over foreign government-owned banking organizations, and possible problems related to immunity for foreign heads of state might be dealt with in the future by requiring a waiver of such immunity as a condition for approval.

Announcements

APPOINTMENT OF NEW MEMBERS TO THE THRIFT INSTITUTIONS ADVISORY COUNCIL

The Federal Reserve Board announced on December 8, 1993, the names of three new members of its Thrift Institutions Advisory Council (TIAC) and designated a new president and vice president of the council for 1994.

The council is an advisory group composed of twelve representatives from thrift institutions. The Board established the panel in 1980, and it includes representatives from savings and loans, savings banks, and credit unions. The council meets at least four times each year with the Board of Governors to discuss developments relating to thrift institutions, the housing industry, mortgage finance, and certain regulatory issues.

Beatrice D'Agostino, Chairman, President, and CEO of the New Jersey Savings Bank, Somerville, New Jersey, will serve as president of the council for 1994, and Charles John Koch, President and CEO of Charter One Bank, F.S.B., Cleveland, Ohio, will serve as vice president.

The three new members, named for two-year terms beginning January 1, 1994, are the following:

Malcolm E. Collier, Chairman and CEO, First Federal Savings Bank, Lakewood, Colorado

Stephen D. Taylor, President and CEO, American Savings of Florida, F.S.B., Miami, Florida

John M. Tippets, President and CEO, American Airlines Employees Federal Credit Union, Dallas-Fort Worth Airport, Texas.

Other members of the council are the following:

William A. Cooper, Chairman and CEO, TCF Bank Savings fsb, Minneapolis, Minnesota

Paul L. Eckert, Chairman and President, Citizens Federal Savings Bank, Davenport, Iowa

George R. Gligorea, Chairman, President, and CEO, First Federal Savings Bank, Sheridan, Wyoming

Kerry Killinger, Chairman, President, and CEO, Washington Mutual Savings Bank, Seattle, Washington

Robert McCarter, Chairman and CEO, New Bedford Institution for Savings, New Bedford, Massachusetts

Nicholas W. Mitchell, Jr., President and CEO, Piedmont Federal Savings and Loan Association, Winston-Salem. North Carolina

Stephen W. Prough, President and CEO, Western Financial Savings Bank, Irvine, California.

REGULATION A: AMENDMENTS

The Federal Reserve Board issued on December 16, 1993, amendments to Regulation A (Extensions of Credit by Federal Reserve Banks) to implement section 142 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) regarding limits on Federal Reserve Bank credit. The amendments were effective January 30, 1993.

Under section 142, after December 19, 1993, the Board may be financially liable to the Federal Deposit Insurance Corporation (FDIC) for certain losses incurred by the insurance funds administered by the FDIC. Section 142 amended section 10B of the Federal Reserve Act to discourage advances under that section to undercapitalized and critically undercapitalized insured depository institutions. The Congress was concerned that such advances could lead to increased losses to the insurance funds.

Besides making several technical and stylistic changes to update and clarify the regulation, the amendments accomplish the following:

- Place limitations on Federal Reserve Bank credit to undercapitalized and critically undercapitalized insured depository institutions
- Describe the calculation of amounts that may be payable to the FDIC
- Define undercapitalized and critically undercapitalized insured depository institutions
- Clarify the term "viable," as it applies to an undercapitalized insured depository institution
- Provide for assessments of the Federal Reserve Banks for amounts that the Board may be required to pay the FDIC under section 142.

The revised regulation will guide the Federal Reserve Banks in their dealings with undercapitalized and critically undercapitalized institutions and will advise these institutions and their banking supervisors of potential limitations on the availability of Federal Reserve Bank credit.

REGULATION B: AMENDMENTS

The Federal Reserve Board issued on December 10, 1993, amendments to its Regulation B (Equal Credit Opportunity) regarding the right of credit applicants to receive copies of appraisal reports.

The amendments define the coverage of the appraisal requirements to be loans secured by a lien on a residential structure containing one to four units. The regulation provides alternative methods of compliance with the law. Creditors may choose to automatically provide a copy of appraisal reports to all applicants for covered loans. Or they may choose to provide a copy upon the applicant's request and be subject to other provisions in the regulation. For creditors that do not automatically provide copies of appraisal reports, the regulation includes a requirement that applicants be notified of the right to receive a copy and limits when an applicant must request (and the creditor must provide) it.

The Regulation B amendments implement and clarify the amendments to the Equal Credit Opportunity Act contained in the Federal Deposit Insurance Corporation Improvement Act of 1991, which took effect in December 1991. The amendments to the regulation were effective December 14, 1993, but compliance with the regulatory requirements is optional until June 14, 1994.

RISK-BASED CAPITAL GUIDELINES: AMENDMENTS

The Federal Reserve Board announced on December 20, 1993, adoption of amendments to its risk-based capital guidelines affecting the treatment of certain multifamily housing loans. This rule was effective December 31, 1993.

The revised guidelines for state member banks and bank holding companies lower the risk weight

from 100 percent to 50 percent for multifamily housing loans that meet criteria specified in the proposal. This change was directed by a provision of section 618(b) of the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991 (RTCRRIA).

In a separate action on December 16, 1993, the Board approved a recommendation from the Federal Financial Institutions Examination Council to seek public comment on a Notice of Proposed Rulemaking and an advance Notice of Proposed Rulemaking concerning the regulatory treatment of recourse arrangements and direct credit substitutes, which, to the extent that they apply to multifamily housing loans, would if adopted also satisfy the requirements of certain provisions of section 628(b) of RTCCRIA. This notice will be issued at a later date.

PROPOSED ACTIONS

The Federal Reserve Board requested on December 10, 1993, public comment on a proposal to assess charges for examinations of U.S. branches, agencies, and representative offices of foreign banks. Comments should be received by April 20, 1994.

The Federal Reserve Board also requested on December 20, 1993, public comment on a proposal to amend its risk-based capital guidelines for state member banks and bank holding companies to include in tier 1 capital net unrealized holding gains and losses on securities available for sale. This component of common stockholders' equity was created by the Financial Accounting Standards Board (FASB) Statement No. 115 "Accounting for Certain Investments in Debt Equity Securities." Comments were requested by January 21, 1994.

CHANGE IN BOARD STAFF

Effective January 1, 1994, the Division of Banking Supervision and Regulation assumed the responsibility for the National Information Center (NIC). Concurrently, the NIC Function Office was established in the division. Also effective January 1, 1994, William Schneider transferred to the division to continue as NIC Project Director.

Minutes of the Federal Open Market Committee Meeting of November 16, 1993

A meeting of the Federal Open Market Committee was held in the offices of the Board of Governors of the Federal Reserve System in Washington, D.C., on Tuesday, November 16, 1993, at 9:00 a.m.

Present:

Mr. Greenspan, Chairman

Mr. McDonough, Vice Chairman

Mr. Angell

Mr. Boehne

Mr. Keehn

Mr. Kelley

Mr. LaWare

Mr. Lindsey

Mr. McTeer

Mr. Mullins

Ms. Phillips

Mr. Stern

Messrs. Broaddus, Jordan, Forrestal, and Parry, Alternate Members of the Federal Open Market Committee

Messrs. Hoenig, Melzer, and Syron, Presidents of the Federal Reserve Banks of Kansas City, St. Louis, and Boston respectively

Mr. Kohn, Secretary and Economist

Mr. Bernard, Deputy Secretary

Mr. Coyne, Assistant Secretary

Mr. Gillum, Assistant Secretary

Mr. Mattingly, General Counsel

Mr. Patrikis, Deputy General Counsel

Mr. Prell, Economist

Mr. Truman, Economist

Messrs. R. Davis, Lang, Lindsey, Promisel, Rolnick, Rosenblum, Scheld, Siegman, Simpson, and Slifman, Associate Economists

Ms. Lovett, Manager for Domestic Operations, System Open Market Account

Mr. Fisher, Manager for Foreign Operations, System Open Market Account Mr. Winn, Assistant to the Board, Office of Board Members, Board of Governors¹

Mr. Ettin, Deputy Director, Division of Research and Statistics, Board of Governors

Mr. Madigan, Associate Director, Division of Monetary Affairs, Board of Governors

Mr. Stockton, Associate Director, Division of Research and Statistics, Board of Governors

Ms. Low, Open Market Secretariat Assistant, Division of Monetary Affairs, Board of Governors

Mr. Beebe, Ms. Browne, Messrs. J. Davis, T. Davis, Dewald, Goodfriend, and Ms. Tschinkel, Senior Vice Presidents, Federal Reserve Banks of San Francisco, Boston, Cleveland, Kansas City, St. Louis, Richmond, and Atlanta respectively

Mr. Guentner, Assistant Vice President, Federal Reserve Bank of New York

By unanimous vote, the minutes for the meeting of the Federal Open Market Committee held on September 21, 1993, were approved.

The Report of Examination of the System Open Market Account, conducted by the Board's Division of Reserve Bank Operations and Payment Systems as of the close of business on April 30, 1993, was accepted.

The Manager for Foreign Operations reported on developments in foreign exchange markets during the period since the September meeting. There were no open market transactions in foreign currencies for the System account during this period, and thus no vote was required of the Committee.

By unanimous vote, the Committee authorized the renewal for further periods of one year of the

^{1.} Attended portion of meeting on the review of FOMC practices with regard to recording and transcribing FOMC meeting discussions and the release of information about such discussions.

System's reciprocal currency ("swap") arrangements with foreign central banks and the Bank for International Settlements. The amounts and maturity dates of these arrangements are indicated in the table that follows:

Foreign bank	Amounts (millions of dollars equivalent)	Term (months)	Maturity dates
Austrian National Bank	250	12	12/04/93
Bank of England	3.000	î.	12/04/93
Bank of Japan	5,000	*	12/04/93
Bank of Mexico	700	**	12/04/93
Bank of Norway	250	Ħ	12/04/93
Bank of Sweden	300	н	12/04/93
Swiss National Bank	4,000	"	12/04/93
Bank for International Settlements

currencies	1,250	"	12/04/93
National Bank of Belgium	1,000	n	12/18/93
Bank of Canada	2,000	**	12/28/93
National Bank of Denmark	250	u u	12/28/93
Bank of France	2,000	**	12/28/93
German Federal Bank	6,000	н	12/28/93
Bank of Italy	3,000	P	12/28/93
Netherlands Bank	500	"	12/28/93

The Manager for Domestic Operations reported on developments in domestic financial markets and on System open market transactions in U.S. government securities and federal agency obligations during the period September 21, 1993, through November 15, 1993. By unanimous vote, the Committee ratified these transactions.

The Committee then turned to a discussion of the economic and financial outlook and the formulation of monetary policy for the intermeeting period ahead. A summary of the economic and financial information available at the time of the meeting and of the Committee's discussion is provided below, followed by the domestic policy directive that was approved by the Committee and issued to the Federal Reserve Bank of New York.

The information reviewed at this meeting suggested some strengthening in the expansion of economic activity in recent months. Consumer spending had picked up; housing activity was quickening; and business spending for durable equipment had continued to trend higher, though at a reduced pace. Industrial production, particularly manufacturing, and employment had posted solid gains. At the same time, inflation had remained muted, with consumer prices increasing moder-

ately on balance in recent months and producer prices falling.

Total nonfarm payroll employment rose appreciably in September and October after declining slightly in August. Although job gains were widespread in October, a large part of the increase was in various business services, notably temporary employment agencies. In other categories, construction employment registered its largest monthly rise since last spring, and jobs in manufacturing increased after seven months of declines. The civilian unemployment rate edged up to 6.8 percent in October.

Industrial production rose sharply in October, with manufacturing more than accounting for the increase. Part of the gain in manufacturing reflected a further rebound in the output of motor vehicles and parts. Aside from motor vehicles, however, the production of business equipment was lifted by another surge in office and computing equipment, and the output of consumer goods was boosted by strength in furniture and appliances. Utilization of total industrial capacity rose in October, reaching a level last seen in the fourth quarter of 1992.

Nominal retail sales were up substantially in October after changing little in September. Sales in October were boosted by a turnaround in spending at automobile dealerships and by a surge at building materials and supply stores. Sales at other types of retail outlets were mixed. Purchases at general merchandise stores were brisk. However, sales at apparel outlets and at furniture and appliance stores edged down after rising strongly for several months, and the increase in spending at gasoline stations entirely reflected the effects of the new federal gasoline tax on pump prices. Housing activity strengthened further in the third quarter. Starts of single-family homes in August and September were at their highest levels in almost five years; starts of multifamily units also picked up in September, although construction activity in this sector remained at a very low level. Sales of new and existing homes moved up further in the third quarter and were especially strong in September.

Real business capital spending increased in the third quarter at a considerably slower pace than earlier in the year. The slowdown largely reflected a smaller rise in spending for producers' durable equipment, as reduced outlays for aircraft and motor vehicles more than offset continued strong gains in spending for computing equipment and other capital goods. Nonresidential construction was down slightly in the third quarter after a sizable advance over the first half of the year. Office and industrial building activity appeared to have bottomed out, but high vacancy rates and declining property values continued to limit new construction.

Business inventories climbed significantly further in September; for the third quarter as a whole, however, stocks were accumulated at a somewhat slower pace than in the first half of the year. At the retail level, inventories rebounded in September after declining on balance over July and August. The ratio of inventories to sales for retailing edged up in September but remained near the low end of its range over the past year. Inventory accumulation in the wholesale sector slowed in September after rising substantially in August; the inventoryto-sales ratio for this sector was unchanged at the midpoint of its range over the past several years. In manufacturing, stocks dropped in September after changing little over the two previous months; with factory shipments up, the stocks-to-shipments ratio for manufacturing as a whole fell in September to its lowest level in recent years.

The nominal U.S. merchandise trade deficit declined further in August, but for July and August combined the deficit was about the same as its average rate for the second quarter. The value of both exports and imports was slightly lower in July-August than in the second quarter. The decline in the value of exports primarily reflected shortfalls in shipments of aircraft and automotive products, and the drop in imports was associated with reduced imports of oil and automotive products. Available data indicated that the performance of the major foreign industrial economies continued to be mixed. Economic activity appeared to have remained weak in Japan in the third quarter and to have stagnated in western Germany after increasing moderately in the second quarter. On the other hand, the recessions in France and Italy seemed to have bottomed out, and the economies of Canada and the United Kingdom to have recovered somewhat further.

Producer prices for finished goods fell in October, retracing the small increase in September; excluding the effects of higher prices for finished foods and energy goods, producer prices were down over the September-October period. Over the twelve-month period ended in October, producer prices for nonfood, non-energy finished goods were fractionally higher on balance, the lowest yearly increase on record for this index, which was introduced in 1973. Consumer prices rose in October after being unchanged in September, with the increase partly reflecting the effect of the implementation of the new federal gasoline tax. For nonfood, non-energy consumer items, the rise in consumer prices over the twelve months ended in October was considerably smaller than the rise over the comparable period ended in October 1992. Labor compensation costs did not show a comparable downtrend. The increase in hourly compensation for private industry workers in the third quarter was about the same as in the second quarter. For the twelve months ended in September, hourly compensation advanced slightly faster than over the comparable year-earlier period.

At its meeting on September 21, 1993, the Committee adopted a directive that called for maintaining the existing degree of pressure on reserve positions and that did not include a presumption about the likely direction of any adjustment to policy during the intermeeting period. Accordingly, the directive indicated that in the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, slightly greater or slightly lesser reserve restraint might be acceptable during the intermeeting period. The reserve conditions associated with this directive were expected to be consistent with modest growth of M2 and M3 over the balance of the year.

Open market operations during the intermeeting period were directed toward maintaining the existing degree of pressure on reserve positions. Adjustment plus seasonal borrowing averaged somewhat above anticipated levels as a result of increased demands for adjustment credit associated with quarter-end pressures in financial markets and an unexpected swing in the Treasury balance. The federal funds rate remained close to 3 percent over the period.

Most other interest rates were up somewhat over the period since the Committee's September meeting. Treasury bill rates rose in part because of the Treasury's need to rely more heavily on bill issuance in a quarter containing a reduced schedule for auctioning long-term debt. Intermediate- and long-term yields fell in the weeks following the September meeting and reached twenty-year lows. These declines were more than reversed subsequently, however, when investors interpreted incoming data as suggesting stronger economic growth and credit demands over the intermediate term and a somewhat greater likelihood of some tightening of monetary policy. Most indexes of stock market prices posted robust gains early in the intermeeting period, but these gains subsequently were pared back as interest rates moved higher.

In foreign exchange markets, the trade-weighted value of the dollar in terms of the other G-10 currencies appreciated over the intermeeting period. The strengthening of the dollar, and the associated rise in U.S. long-term interest rates relative to foreign rates, reflected both more optimistic expectations for growth in the United States and more pessimistic assessments for the course of economic activity in continental Europe and Japan.

M2 registered a relatively strong advance in September, but growth slowed again in October. The September pickup partly reflected an unexpected surge in the volatile overnight repurchase agreement (RP) component of M2. M1 also was strong, but the total of time and savings deposits continued to decline, apparently in large part because of the persisting allure of capital market instruments. Growth of M3 strengthened somewhat more than M2 over the two months, reflecting a run-up in institution-only money market funds. For the year through October, M2 and M3 were estimated to have grown at rates a little above the lower ends of the Committee's ranges for the year. Total domestic nonfinancial debt expanded at a moderate rate in recent months, and for the year through September it was estimated to have increased at a rate in the lower half of the Committee's monitoring range.

The staff projection prepared for this meeting suggested that economic activity, after advancing relatively strongly in the fourth quarter, would expand moderately next year, about in line with the potential rate of economic growth over time, and thus would be associated with limited, if any, further reductions in margins of unemployed labor and capital. Consumer spending, which had buoyed growth recently, was expected to expand at the

same pace as incomes over the year ahead. In addition, fiscal restraint and uncertainty about other government policies would continue to inhibit the expansion, and a sluggish acceleration in foreign industrial economies pointed to only modest improvement in export demand. However, improving balance sheet positions and credit supply conditions were lifting an unusual constraint on spending, and the lower interest rates would encourage further increases in business fixed investment and housing construction. The continued slack in labor and product markets, coupled with some tempering of inflation expectations, was expected to foster further reductions in wage and price inflation.

In the Committee's discussion of the economic outlook, members commented that the economic data and anecdotal reports received since the September meeting had tended to reinforce their earlier forecasts that moderate economic expansion would be sustained. After a sluggish performance in the first half of the year, overall economic activity had picked up somewhat more in the third quarter than most members had anticipated, and available indicators of spending and production pointed to relatively robust economic growth in the current quarter. Looking ahead to 1994, the members expected the expansion to slow somewhat from its apparent pace over the closing months of this year. Fluctuations in the rate of quarterly GDP growth undoubtedly would occur, but the economy over the year ahead was thought likely to continue on a trend of moderate expansion averaging close to the economy's long-run potential or somewhat higher. Most members saw the probability of a sharp deviation in either direction from their current forecasts as relatively remote, though a number also believed that any deviation was more likely to be in the direction of somewhat stronger rather than weaker growth. In general, members expected core inflation to change little or to edge lower next year, but a few saw some danger of marginally higher inflation.

In their assessment of developments underlying the economic outlook, members referred to indications in many areas of some strengthening in business conditions and in related business sentiment, though economic activity clearly remained sluggish or even depressed in some parts of the country and overall business attitudes could still be described as cautious. Current financial conditions,

including the strength in equity markets, reduced intermediate- and long-term interest rates, and an apparently improving availability of business credit from financial institutions, provided a favorable backdrop for further economic expansion. Moreover, businesses and households had made substantial progress in improving their financial positions. These factors were seen as reducing downside risks to the expansion. At the same time, while there were signs of significant firming in the economic expansion, a number of members observed that at this point they did not see the usual indications of any near-term intensification of inflationary pressures such as general increases in commodity prices, lengthening delivery lead times along with efforts to increase inventories, and strong growth of credit. Indeed, the risks of an overheated and inflationary expansion in the near term seemed quite limited in light of various constraints on the economy such as those associated with a restrictive fiscal policy and the continuing weakness in key export markets.

With regard to the outlook for specific sectors of the economy, a step-up in consumer spending, notably for motor vehicles and housing-related durable goods, had contributed substantially to the strengthening of the economic expansion. Indications of improving consumer confidence, reflected in turn in the growing optimism expressed by business contacts regarding the outlook for holiday sales, should help to sustain relatively ebullient consumer spending through the year-end. Contacts in the motor vehicles industry also appeared to be relatively optimistic about the prospects for sales of the new models. The outlook for the consumer sector also was subject to some constraining influences. Growth in consumer spending had tended to exceed the expansion in consumer incomes, and a number of members questioned the extent to which the acceleration in such spending was likely to extend into the new year. The saving rate already was near the low end of its historic range, at least on the basis of current estimates, and was unlikely to decline significantly, if at all. Much would depend on consumers' outlook for employment and incomes. Growing demands should eventually be translated into faster employment gains, but at this point business firms continued to resist adding to their workforces despite increasing sales and many firms were still announcing workforce reductions.

While net gains in employment, including growth associated with increases in self-employment and new business formations, were continuing, expansion in jobs and consumer incomes probably would be at a moderate pace over the year ahead. Against this background, members generally expected moderate growth in consumer spending to be maintained, but they did not see such spending as likely to give extra impetus to growth in economic activity in 1994.

The members anticipated appreciable further expansion in business investment spending, especially in the context of reduced interest rates, improved business balance sheets, and ongoing efforts to improve productivity. Growth in spending for business equipment probably would continue at a relatively vigorous pace, though perhaps somewhat below the growth rates experienced in recent quarters, and other investment activity seemed poised to pick up. In this connection, several members reported that vacancy rates in commercial office buildings were declining in some areas and while this development was not yet being translated into appreciable new construction, investment funds appeared to be flowing more freely into commercial real estate. Clear indications of strengthening were observed in housing construction in many parts of the country and the outlook for such building activity seemed promising in the context of reduced mortgage rates and improving consumer sentiment.

Fiscal policy developments, including the effects on business attitudes of the uncertainties surrounding health care reform legislation, were likely to continue to inhibit the expansion over the year ahead. Some members again emphasized the negative effects that the ongoing retrenchment in defense spending was having on local economies as well as on the economy more generally. On the taxation side, the rise in tax liabilities on higher incomes could have an especially pronounced effect during the early months of next year, given the retroactive inclusion of 1993 incomes subject to the new tax, but some members noted that the increased tax payments probably had been widely anticipated and the negative implications for the economy might well be less than many observers expected. Nonetheless, the overall posture of fiscal policy and associated business concerns about the cost implications of possible future legislation were likely to be an important factor tending to limit the strength of the expansion.

Net exports were seen as another constraining factor in the performance of the economy next year. On the import side, even moderate expansion in domestic economic activity was likely to stimulate appreciable further growth in U.S. demands for foreign goods. At the same time, the prospects for exports to a number of major industrial countries were not promising, at least for the nearer term, given lagging economies in Europe and Japan. In this connection, a number of members referred to reports of weak export demand for specific U.S. products and also noted that an extended coal mining strike had cut supplies of coal available for export and had induced some domestic firms to turn to imports to help fill their requirements. On the other hand, some markets for U.S. exports, notably those in a number of East Asian nations and some Latin American countries, were likely to continue to experience considerable growth, thereby mitigating an otherwise fairly gloomy outlook for exports.

With regard to the outlook for inflation over the year ahead, views did not vary greatly among the members. They ranged from expectations of some limited progress toward price stability to forecasts of a marginal increase in the core rate of inflation. Members who anticipated a relatively favorable inflation performance tended to underscore the likely persistence of appreciable slack in labor and other production resources on the assumption that growth in overall economic activity would remain on a moderate trend in line with their forecasts. Some also pointed to the absence of inflationary pressures in most commodity markets, the persistence of intense competition in local markets across the nation, and the outlook for relatively subdued increases in labor costs in part because of ongoing improvements in productivity. Other members gave more emphasis to the possibility that the economic expansion next year, especially if it turned out on the high side of the range encompassing the members' current projections, was more likely to be associated with some upward pressures on costs and prices. In this connection, relatively rapid growth in economic activity, should it persist into the early part of next year, probably would trigger attempts to raise prices and wages somewhat more rapidly even in the context of some continuing

slack in overall capacity and labor utilization. At this point, however, there were no significant indications of accelerating inflation, and business contacts around the nation did not currently see or seem to anticipate increasing inflationary pressures.

In the Committee's discussion of policy for the intermeeting period ahead, the members generally agreed that despite various indications of a pickup in economic growth, the underlying economic situation and the outlook for inflation had not changed sufficiently to warrant an adjustment in monetary policy. Looking beyond the intermeeting period, however, several members commented that the Committee might well have to consider the need to move from the currently stimulative stance of monetary policy toward a more neutral policy posture, should concerns about rising inflationary pressures begin to be realized. The members recognized the desirability of taking early action to arrest incipient inflationary pressures before they gathered strength, especially given the Committee's commitment not just to resist greater inflation but to foster sustained progress toward price stability. In appropriate circumstances, a prompt policy move also might allay market concerns about inflation with favorable implications for longer-term interest rates and the performance of interestsensitive sectors of the economy. The members acknowledged that current measures of inflation and anecdotal reports from around the nation did not on the whole suggest an intensification of inflation at this point. Moreover, the Committee had to be wary of misleading signals that were inherent in the saw-tooth pattern of typical economic expansions, and it needed to avoid a policy move that would incur an unnecessary risk to the expansion, given uncertainties about the degree to which recent strength in spending would persist.

Most of the members concluded that on balance current economic conditions warranted a steady policy course and, in light of prevailing uncertainties, that it would be premature to anticipate any particular policy change or its timing. As a consequence, the members also concluded that the currently unbiased instruction in the directive relating to the direction of possible intermeeting policy changes should be retained; in any case, significant changes in the outlook requiring policy action were viewed as unlikely in the relatively short period

until the next scheduled meeting on December 21. One member expressed the differing view that a less accommodative policy would be more consistent over time with the Committee's desire to foster sustained economic expansion and progress toward price stability. However, this member also felt that a policy tightening move at this time might be seen as a response to a stronger economy, rather than an action that clearly was intended to underscore the Committee's commitment to price stability and therefore would elicit a favorable response in intermediate- and long-term debt markets.

With regard to financial developments bearing on the economic outlook and the potential need to adjust monetary policy, members observed that the broader money and credit aggregates had strengthened somewhat since earlier in the year, though to still relatively moderate growth rates. Moreover, much of the acceleration in M2 and M3 could be attributed to special or temporary factors, and according to a staff analysis growth in these aggregates was likely to revert to relatively slow rates in coming months, assuming unchanged reserve conditions. At the same time, growth in M1 and reserves had remained comparatively rapid and in one view such growth might well be indicative of an overly stimulative monetary policy that would promote more inflation over time or at least prove inconsistent with further disinflation.

At the conclusion of the Committee's discussion. all the members indicated their support of a directive that called for maintaining the existing degree of pressure on reserve positions and that did not include a presumption about the likely direction of any adjustment to policy during the intermeeting period. Accordingly, in the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, the Committee decided that slightly greater or slightly lesser reserve restraint might be acceptable during the intermeeting period. The reserve conditions contemplated at this meeting were expected to be consistent with modest growth in M2 and M3 over coming months.

At the conclusion of the meeting, the Federal Reserve Bank of New York was authorized and directed, until instructed otherwise by the Committee, to execute transactions in the System Account in accordance with the following domestic policy directive:

The information reviewed at this meeting suggests some strengthening in the expansion of economic activity in recent months. Total nonfarm payroll employment rose appreciably in September and October, while the civilian unemployment rate edged up to 6.8 percent in October. Industrial production increased sharply in October, partly reflecting a continuing rebound in the output of motor vehicles. Retail sales were up substantially in October after changing little in September. Housing activity picked up further in the third quarter. The expansion of business capital spending has slowed from a robust pace earlier in the year. The nominal U.S. merchandise trade deficit in July-August was about unchanged from its average rate in the second quarter. Consumer prices have increased moderately on balance in recent months and producer prices have fallen.

Most interest rates have increased somewhat since the Committee meeting on September 21. In foreign exchange markets, the trade-weighted value of the dollar in terms of the other G-10 currencies appreciated over the intermeeting period.

Growth of M2 picked up slightly on balance in September and October, while M3 strengthened to a somewhat greater extent over the two months. For the year through October, M2 and M3 are estimated to have grown at rates a little above the lower end of the Committee's ranges for the year. Total domestic nonfinancial debt has expanded at a moderate rate in recent months, and for the year through August it is estimated to have increased at a rate in the lower half of the Committee's monitoring range.

The Federal Open Market Committee seeks monetary and financial conditions that will foster price stability and promote sustainable growth in output. In furtherance of these objectives, the Committee at its meeting in July lowered the ranges it had established in February for growth of M2 and M3 to ranges of 1 to 5 percent and 0 to 4 percent respectively, measured from the fourth quarter of 1992 to the fourth quarter of 1993. The Committee anticipated that developments contributing to unusual velocity increases would persist over the balance of the year and that money growth within these lower ranges would be consistent with its broad policy objectives. The monitoring range for growth of total domestic nonfinancial debt also was lowered to 4 to 8 percent for the year. For 1994, the Committee agreed on tentative ranges for monetary growth, measured from the fourth quarter of 1993 to the fourth quarter of 1994, of 1 to 5 percent for M2 and 0 to 4 percent for M3. The Committee provisionally set the monitoring range for growth of total domestic nonfinancial debt at 4 to 8 percent for 1994. The behavior of the monetary aggregates will continue to be evaluated in the light of progress toward price level stability, movements in their velocities, and developments in the economy and financial markets.

In the implementation of policy for the immediate future, the Committee seeks to maintain the existing degree of pressure on reserve positions. In the context of the Committee's long-run objectives for price stability and sustainable economic growth, and giving careful consideration to economic, financial, and monetary developments, slightly greater reserve restraint or slightly lesser reserve restraint might be acceptable in the intermeeting period. The contemplated reserve conditions are expected to be consistent with modest growth in M2 and M3 over coming months.

Votes for this action: Messrs. Greenspan, McDonough, Angell, Boehne, Keehn, Kelley, LaWare, Lindsey, McTeer, Mullins, Ms. Phillips, and Mr. Stern. Votes against this action: None.

The Committee approved a temporary increase of \$3 billion, to a level of \$11 billion, in the limit on changes between Committee meetings in System Account holdings of U.S. government and federal agency securities. The increase amended paragraph 1(a) of the Authorization for Domestic Open Market Operations and was effective for the intermeeting period ending with the close of business on December 21, 1993.

Votes for this action: Messrs. Greenspan, McDonough, Angell, Boehne, Keehn, Kelley, LaWare, Lindsey, McTeer, Mullins, Ms. Phillips, and Mr. Stern. Votes against this action: None.

RELEASE OF INFORMATION ABOUT FOMC MEETINGS

At this meeting the Committee considered a number of alternatives for releasing detailed information on its deliberations at past and future meetings. Members emphasized that the most important consideration was the preservation of a deliberative process that would enable the Committee to arrive at the best possible monetary policy decisions. Premature release of detailed information, such as transcripts, would sharply curtail the Committee's ability to freely discuss evolving economic and financial trends and alternative policy responses. Moreover, if full transcripts were subject to release before many years had passed, much vital information obtained in confidence could not be discussed in meetings and in any event probably would not be made available by foreign central banks, business firms, and other sources.

The information for all past meetings and many of the intermeeting telephone consultations was contained in unedited transcripts that had been preserved by the FOMC Secretariat since March 1976. Virtually all the tapes from which these transcripts were typed had been reused to record subsequent meetings, and very few tapes currently existed for meetings before September 1993.

In the course of the Committee's discussion, members observed that the purpose of the transcripts had been to assist the FOMC Secretariat in the preparation of minutes that reported the economic and monetary policy discussions and were released after the next meeting. As a result, the transcripts for past meetings had never been edited nor had they been checked by meeting participants for accuracy. It was clear from even a casual perusal that at times the transcripts failed for various reasons to convey an intelligible account of members' comments, and on occasion they even misstated the views that had been expressed. Moreover, most participants at these meetings had not been aware until recently that the transcripts had been preserved and that they could at some point be made public. Their release at this time would represent a sharp break with past practice and would raise an issue of fairness to participants at earlier meetings of the Committee.

The members generally agreed that their reservations about releasing the transcripts could be mitigated through appropriate safeguards such as withholding particularly sensitive materials and providing for a considerable lapse of time after Committee meetings. They noted in this connection that, while there was no legal requirement to prepare transcripts, the substance of existing transcripts needed to be preserved in accordance with the Federal Records Act. With regard to the manner in which the information might be made public, the Committee considered several alternatives including making available the unedited transcripts themselves, or lightly edited versions of the transcripts, or Memoranda of Discussion comparable to those prepared for meetings before late March 1976. The members expressed varying preferences among these alternatives. Some proposed that marginal notations be included with raw or edited transcripts to provide staff explanations or interpretations of unclear or evidently mistranscribed comments. It was understood that preparation of edited

transcripts and especially Memoranda of Discussion would require a considerable amount of time and effort before they would be ready for public release. A majority favored the release of lightly edited transcripts that would retain all substantive comments but would allow for grammatical corrections, the smoothing of some sentences to facilitate the understanding, and the correction of obvious transcription errors. The editing would be patterned after that done for congressional hearings; importantly, no changes would be made in the substance or the intent of the speakers. Before release to the public, particularly sensitive materials would be redacted in accordance with the provisions of the Freedom of Information Act. The Committee agreed that the FOMC Secretariat should be given responsibility for the editing process and that the Committee itself would not undertake to review these transcripts. It was noted in this respect that many former members of the Committee were no longer available to review their comments and that in any event the passage of time would make it impossible for members to recall precisely what they had said or to verify many of their comments. Accordingly, the edited transcripts could not be regarded as official records of the Committee.

With respect to the interval between a meeting and release of a lightly edited transcript, all of the Committee members were concerned that the absence of a substantial lag would seriously harm the Committee's ongoing deliberative process. Many also commented that the absence of a substantial lag would be unfair to meeting participants who had been unaware that their remarks would be released and were unable to review the transcripts for accuracy. Various members argued for lags that ranged from three years to ten years or more, but a majority felt that a five-year lag was necessary to prevent harm to the Committee's

ongoing deliberations. The other members indicated that a five-year lag was acceptable because it represented a reasonable balance among the various considerations.

At the conclusion of this discussion, the members agreed unanimously to authorize the preparation of lightly edited transcripts of past meetings and available telephone conferences since late March 1976 and to release such transcripts to the public five years after the meetings, subject to the redaction of especially sensitive materials as authorized by the Freedom of Information Act. It was understood that the transcripts for the meetings held during 1988 would be edited on a priority basis and released as soon as possible. Providing copies of unedited transcripts for all past meetings and available conference calls to the Chairman or staff of the House Banking Committee in response to a request was not approved by the Committee.

The members reviewed various options for the release of information about the Committee's deliberations at future meetings. These options included continuing the preparation of the minutes in their current form, which members regarded as providing a complete account of the substance of the Committee's deliberations. Some urged that consideration be given to supplementing the minutes with the prompt release after each meeting of information about Committee decisions. Among other options considered were an expanded version of the current minutes and the release, after an appropriate lag, of a lightly edited transcript or a Memorandum of Discussion for each meeting. The members concluded that the complexity of the issues reflected in these alternatives warranted further review by the Committee and accordingly a decision was deferred. It was agreed that the Committee would continue its discussion of these issues at a special meeting during December.

Legal Developments

FINAL RULE—AMENDMENT TO REGULATION A

The Board of Governors is amending 12 C.F.R. Part 201, its Regulation A (Extensions of Credit by Federal Reserve Banks) to implement section 142 of the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), which amends section 10B of the Federal Reserve Act ("FRA") in order to discourage advances, under that section, to undercapitalized and critically undercapitalized depository institutions.

Effective January 30, 1994, 12 C.F.R. Part 201 is amended as follows:

Part 201—Extensions of Credit by Federal Reserve Banks (Regulation A)

1. The authority citation for part 201 is revised to read as follows:

Authority: 12 U.S.C. 343 et seq. 347a, 347b, 347c, 347d, 348 et seq. 374, 374a and 461.

2. Sections 201.1 through 201.6 are revised and sections 201.7 through 201.9 are added to read as follows:

Section 201.1—Authority, scope and purpose.

- (a) Authority and scope. This part is issued under the authority of sections 10A, 10B, 13, 13A, and 19 of the FRA (12 U.S.C. 347a, 347b, 343 et seq. 347c, 348 et seq. 374, 374a, and 461), other provisions of the FRA, and section 7(b) of the International Banking Act of 1978 (12 U.S.C. 347d) and relates to extensions of credit by Federal Reserve Banks to depository institutions and others.
- (b) Purpose. This part establishes rules under which Federal Reserve Banks may extend credit to depository institutions and others. Extending credit to depository institutions to accommodate commerce, industry, and agriculture is a principal function of Federal Reserve Banks. While open market operations are the primary means of affecting the overall supply of reserves, the lending function of the Federal Reserve Banks is an effective method of supplying reserves to meet the particular credit needs of individual depository institutions. The lending functions of the Federal Reserve System are conducted with due re-

gard to the basic objectives of monetary policy and the maintenance of a sound and orderly financial system.

Section 201.2—Definitions.

For purposes of this part, the following definitions shall apply:

- (a) Appropriate Federal banking agency has the same meaning as in section 3 of the FDI Act (12 U.S.C. 1813(q)).
- (b) Critically undercapitalized insured depository institution means any insured depository institution as defined in section 3 of the FDI Act (12 U.S.C. 1813(c)(2)) that is deemed to be critically undercapitalized under section 38 of the FDI Act (12 U.S.C. 1831o(b)(1)(E)) and the implementing regulations.
- (c) (1) Depository institution means an institution that maintains reservable transaction accounts or nonpersonal time deposits and is:
 - (i) An *insured bank* as defined in section 3 of the FDI Act (12 U.S.C. 1813(h)) or a bank which is eligible to make application to become an insured bank under section 5 of such Act (12 U.S.C. 1815);
 - (ii) A mutual savings bank as defined in section 3 of the FDI Act (12 U.S.C. 1813(f)) or a bank which is eligible to make application to become an insured bank under section 5 of such Act (12 U.S.C. 1815);
 - (iii) A savings bank as defined in section 3 of the FDI Act (12 U.S.C. 1813(g)) or a bank which is eligible to make application to become an insured bank under section 5 of such Act (12 U.S.C. 1815);
 - (iv) An *insured credit union* as defined in section 101 of the Federal Credit Union Act (12 U.S.C. 1752(7)) or a credit union which is eligible to make application to become an insured credit union pursuant to section 201 of such Act (12 U.S.C. 1781);
 - (v) A member as defined in section 2 of the Federal Home Loan Bank Act (12 U.S.C. 1422(4)); or
 - (vi) A savings association as defined in section 3 of the FDI Act (12 U.S.C. 1813(b)) which is an insured depository institution as defined in section 3 of the Act (12 U.S.C. 1813(c)(2)) or is eligible to

- apply to become an insured depository institution under section 5 of the Act (12 U.S.C. 1815(a)).
- (2) The term depository institution does not include a financial institution that is not required to maintain reserves under Regulation D (12 CFR Part 204) because it is organized solely to do business with other financial institutions, is owned primarily by the financial institutions with which it does business, and does not do business with the general public.
- (d) Liquidation loss means the loss that any deposit insurance fund in the FDIC would have incurred if the FDIC had liquidated the institution:
 - (1) In the case of an undercapitalized insured depository institution, as of the end of the later of:
 - (i) Sixty days:
 - (A) In any 120-day period;
 - (B) During which the institution was an undercapitalized insured depository institution; and
 - (C) During which advances or discounts were outstanding to the depository institution from any Federal Reserve Bank; or
 - (ii) The 60 calendar day period following the receipt by a Federal Reserve Bank of a written certification from the Chairman of the Board of Governors or the head of the appropriate Federal banking agency that the institution is viable.
 - (2) In the case of a critically undercapitalized insured depository institution, as of the end of the 5-day period beginning on the date the institution became a critically undercapitalized insured depository institution.
- (e) Increased loss means the amount of loss to any deposit insurance fund in the FDIC that exceeds the liquidation loss due to:
 - (1) An advance under section 10B(1)(a) of the FRA that is outstanding to an undercapitalized or critically undercapitalized insured depository institution without payment having been demanded as of the end of the periods specified in paragraphs (d)(1) and (2) of this section; or
 - (2) An advance under section 10B(1)(a) of the Federal Reserve Act that is made after the end of such periods.
- (f) Excess loss means the lesser of the increased loss or that portion of the increased loss equal to the lesser of:
 - (1) The loss the Board of Governors or any Federal Reserve Bank would have incurred on the amount by which advances under section 10B(1)(a) exceed the amount of advances outstanding at the end of the periods specified in paragraphs (d)(1) and (2) of this section if those increased advances had been unsecured; or
 - (2) The interest received on the amount by which the advances under section 10B(1)(a) exceed the amount of advances outstanding, if any, at the end

- of the periods specified in paragraphs (d)(1) and (2) of this section.
- (g) Transaction account and nonpersonal time deposit have the meanings specified in Regulation D (12 C.F.R. Part 204).
- (h) Undercapitalized insured depository institution means any insured depository institution as defined in section 3 of the FDI Act (12 U.S.C. 1813(c)(2)) that:
 - (1) Is not a critically undercapitalized insured depository institution; and
 - (2) (i) Is deemed to be undercapitalized under section of the FDI Act (12 U.S.C. 1831o(b)(1)(C)) and the implementing regulations;
 - (ii) Has received from its appropriate Federal banking agency a composite CAMEL rating of 5 under the Uniform Financial Institutions Rating System (or an equivalent rating by its appropriate Federal banking agency under a comparable rating system) as of the most recent examination of such institution.
 - (i) Viable, with respect to a depository institution, means that the Board of Governors or the appropriate Federal banking agency has determined, giving due regard to the economic conditions and circumstances in the market in which the institution operates, that the institution is not critically undercapitalized, is not expected to become critically undercapitalized, and is not expected to be placed in conservatorship or receivership. Although there are a number of criteria that may be used to determine viability, the Board of Governors believes that ordinarily an undercapitalized insured depository institution is viable if the appropriate Federal banking agency has accepted a capital restoration plan for the depository institution under 12 U.S.C. 1831o(e)(2) and the depository institution is complying with that plan.

Section 201.3—Availability and terms.

(a) Adjustment credit. Federal Reserve Banks extend adjustment credit on a short-term basis to depository institutions to assist in meeting temporary requirements for funds or to cushion more persistent shortfalls of funds pending an orderly adjustment of a borrowing institution's assets and liabilities. Such credit generally is available only for appropriate purposes and after reasonable alternative sources of funds have been fully used, including credit from special industry lenders such as Federal Home Loan Banks, the National Credit Union Administration's Central Liquidity Facility, and corporate central credit unions. Adjustment credit is usually granted at the basic discount rate, but under certain circumstances a special rate or rates above the basic discount rate may be applied.

- (b) Seasonal credit. Federal Reserve Banks extend seasonal credit for periods longer than those permitted under adjustment credit to assist smaller depository institutions in meeting regular needs for funds arising from expected patterns of movement in their deposits and loans. A special rate or rates at or above the basic discount rate may be applied to seasonal credit.
 - (1) Seasonal credit is only available if:
 - (i) The depository institution's seasonal needs exceed a threshold that the institution is expected to meet from other sources of liquidity (this threshold is calculated as certain percentages. established by the Board of Governors, of the institution's average total deposits in the preceding calendar year);
 - (ii) The Federal Reserve Bank is satisfied that the institution's qualifying need for funds is seasonal and will persist for at least four weeks; and
 - (iii) Similar assistance is not available from special industry lenders.
 - (2) The Board may establish special terms for seasonal credit when depository institutions are experiencing unusual seasonal demands for credit in a period of liquidity strain.
- (c) Extended credit. Federal Reserve Banks extend credit to depository institutions under extended credit arrangements where similar assistance is not reasonably available from other sources, including special industry lenders. Such credit may be provided where there are exceptional circumstances or practices affecting a particular depository institution including sustained deposit drains, impaired access to money market funds, or sudden deterioration in loan repayment performance. Extended credit may also be provided to accommodate the needs of depository institutions, including those with longer term asset portfolios, that may be experiencing difficulties adjusting to changing money market conditions over a longer period, particularly at times of deposit disintermediation. A special rate or rates above the basic discount rate may be applied to extended credit.
- (d) Emergency credit for others. In unusual and exigent circumstances, a Federal Reserve Bank may, after consultation with the Board of Governors, advance credit to individuals, partnerships, and corporations that are not depository institutions if, in the judgment of the Federal Reserve Bank, credit is not available from other sources and failure to obtain such credit would adversely affect the economy. The rate applicable to such credit will be above the highest rate in effect for advances to depository institutions. Where the collateral used to secure such credit consists of assets other than obligations of, or fully

guaranteed as to principal and interest by, the United States or an agency thereof, an affirmative vote of five or more members of the Board of Governors is required before credit may be extended.

Section 201.4—Limitations on availability and assessments.

- (a) Advances to or discounts for undercapitalized insured depository institutions. A Federal Reserve Bank may make or have outstanding advances to or discounts for a depository institution that it knows to be an undercapitalized insured depository institution, only:
 - (1) If, in any 120-day period, advances or discounts from any Federal Reserve Bank to that depository institution are not outstanding for more than 60 days during which the institution is an undercapitalized insured depository institution; or
 - (2) During the 60 calendar days after the receipt of a written certification from the Chairman of the Board of Governors or the head of the appropriate Federal banking agency that the borrowing depository institution is viable: or
- (3) After consultation with the Board of Governors.1 (b) Advances to or discounts for critically undercapitalized insured depository institutions. A Federal Reserve Bank may make or have outstanding advances to or discounts for a depository institution that it knows to be a critically undercapitalized insured depository institution only:
 - (1) During the 5-day period beginning on the date the institution became a critically undercapitalized insured depository institution; or
- (2) After consultation with the Board of Governors.2 (c) Assessments. The Board of Governors will assess the Federal Reserve Banks for any amount that it pays to the FDIC due to any excess loss. Each Federal Reserve Bank shall be assessed that portion of the amount that the Board of Governors pays to the FDIC that is attributable to an extension of credit by that Federal Reserve Bank, up to one percent of its capital as reported at the beginning of the calendar year in which the assessment is made. The Board of Governors will assess all of the Federal Reserve Banks for the remainder of the amount it pays to the FDIC in the ratio that the capital of each Federal Reserve Bank bears to the total capital of all Federal Reserve Banks at the beginning of the calendar year in which the

^{1.} In unusual circumstances, when prior consultation with the Board is not possible, a Federal Reserve Bank should consult with the Board as soon as possible after extending credit that requires consultation under this paragraph.

See footnote 1 in section 201.4(a)(3).

assessment is made, provided, however, that if any assessment exceeds 50 percent of the total capital and surplus of all Federal Reserve Banks, whether to distribute the excess over such 50 percent shall be made at the discretion of the Board of Governors.

(d) Information. Before extending credit a Federal Reserve Bank should ascertain if an institution is an undercapitalized insured depository institution or a critically undercapitalized insured depository institution.

Section 201.5—Advances and discounts.

- (a) Federal Reserve Banks may lend to depository institutions either through advances secured by acceptable collateral or through the discount of certain types of paper. Credit extended by the Federal Reserve Banks generally takes the form of an advance.

 (b) Federal Reserve Banks may make advances to any
- (b) Federal Reserve Banks may make advances to any depository institution if secured to the satisfaction of the Federal Reserve Bank. Satisfactory collateral generally includes United States government and Federal agency securities, and, if of acceptable quality, mortgage notes covering 1–4 family residences, State and local government securities, and business, consumer and other customer notes.
- (c) If a Federal Reserve Bank concludes that a depository institution will be better accommodated by the discount of paper than by an advance, it may discount any paper endorsed by the depository institution that meets the requirements specified in the FRA.

Section 201.6—General requirements.

- (a) Credit for capital purposes. Federal Reserve credit is not a substitute for capital.
- (b) Compliance with law and regulation. All credit extended under this part shall comply with applicable requirements of law and of this part. Each Federal Reserve Bank:
 - (1) Shall keep itself informed of the general character and amount of the loans and investments of depository institutions with a view to ascertaining whether undue use is being made of depository institution credit for the speculative carrying of or trading in securities, real estate, or commodities, or for any other purpose inconsistent with the maintenance of sound credit conditions; and
 - (2) Shall consider such information in determining whether to extend credit.
- (c) Information. A Federal Reserve Bank shall require any information it believes appropriate or desirable to insure that paper tendered as collateral for advances or for discount is acceptable and that the credit provided is used in a manner consistent with this part.

(d) Indirect credit for others. No depository institution shall act as the medium or agent of another depository institution in receiving Federal Reserve credit except with the permission of the Federal Reserve Bank extending credit.

Section 201.7—Branches and agencies.

(a) Except as may be otherwise provided, this part shall be applicable to United States branches and agencies of foreign banks subject to reserve requirements under Regulation D (12 C.F.R. Part 204) in the same manner and to the same extent as depository institutions.

Section 201.8—Federal Intermediate Credit Banks.

(a) A Federal Reserve Bank may discount for any Federal Intermediate Credit Bank agricultural paper or notes payable to and bearing the endorsement of the Federal Intermediate Credit Bank that cover loans or advances made under subsections (a) and (b) of section 2.3 of the Farm Credit Act of 1971 (12 U.S.C. 2074) and that are secured by paper eligible for discount by Federal Reserve Banks. Any paper so discounted shall have a period remaining to maturity at the time of discount of not more than nine months.

Section 201.9—No obligation to make advances or discounts.

(a) A Federal Reserve Bank shall have no obligation to make, increase, renew, or extend any advance or discount to any depository institution.

3. In sections 201.108 and 201.109, footnotes 1, 1a, 2, and 3 are redesignated as footnotes 3, 4, 5, and 6, respectively.

FINAL RULE—AMENDMENTS TO REGULATIONS H AND Y

The Board of Governors is amending 12 C.F.R. Parts 208 and 225, its Regulations H and Y (Capital; Capital Adequacy Guidelines). The Board is amending its risk-based capital guidelines for state member banks and bank holding companies. This final rule implements section 618(b) of the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991 and section 305(b)(1)(B) of the Federal Deposit Insurance Corporation Improvement Act of 1991. The effect of the final rule will be to permit state member

banks and bank holding companies to lower from 100 percent to 50 percent the risk weight assigned to certain multifamily housing loans.

Effective December 31, 1993, 12 C.F.R. Parts 208 and 225 are amended as follows:

Part 208—Membership of State Banking Institutions in the Federal Reserve System (Regulation H)

1. The authority citation for part 208 continues to read as follows:

Authority: 12 U.S.C. 36, 248(a) and (c), 321-338, 461, 481-486, 601, 611, 1814, 1823(j), 1831o, 1831p-1, 3906-3909, 3310, 3331-3351; 15 U.S.C. 78b, 78o-4(c)(5), 78q, 78q-1, 78w, 781(b), 781(i), and 1781(g).

2. Appendix A to part 208 is amended by revising the first paragraph of section III.C.3., and Category 3 Item 1. of Attachment III to read as follows:

Appendix A to Part 208—[Amended]

III. Procedures for Computing Weighted Risk Assets and Off-Balance Sheet Items

C. Risk Weights

3. Category 3: 50 percent. This category includes loans fully secured by first liens³⁴ on 1- to 4-family residential properties, either owner-occupied or rented, or on multifamily residential properties,35 that meet certain

criteria.36 Loans included in this category must have been made in accordance with prudent underwriting standards;37 be performing in accordance with their original terms; and not be 90 days or more past due or carried in nonaccrual status. The following additional criteria must also be applied to a loan secured by a multifamily residential property that is included in this category: all principal and interest payments on the loan must have been made on time for at least the year preceding placement in this category, or in the case where the existing property owner is refinancing a loan on that property, all principal and interest payments on the loan being refinanced must have been made on time for at least the year preceding placement in this category; amortization of the principal and interest must occur over a period of not more than 30 years and the minimum original maturity for repayment of principal must not be less than 7 years; and the annual net operating income (before debt service) generated by the property during its most recent fiscal year must not be less than 120 percent of the loan's current annual debt service (115 percent if the loan is based on a floating interest rate) or, in the case of a cooperative or other not-for-profit housing project, the property must generate sufficient cash flow to provide comparable protection to the institution. Also included in this category are privately-issued mortgage-backed securities provided that:

- (1) The structure of the security meets the criteria described in section III(B)(3) above;
- (2) If the security is backed by a pool of conventional mortgages, on 1- to 4-family residential or multifamily residential properties, each underlying mortgage meets the criteria described above in this

^{34.} If a bank holds the first and junior liens(s) on a residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purpose of determining the loan-to-value ratio.

^{35.} Loans that qualify as loans secured by 1- to 4-family residential properties or multifamily residential properties are listed in the instructions to the commercial bank Call Report. In addition, for risk-based capital purposes, loans secured by 1- to 4-family residential properties include loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been presold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgage loans and have made substantial earnest money deposits.

The instructions to the Call Report also discuss the treatment of loans, including multifamily housing loans, that are sold subject to a pro rata loss sharing arrangement. Such an arrangement should be treated by the selling bank as sold (and excluded from balance sheet assets) to the extent that the sales agreement provides for the purchaser of the loan to share in any loss incurred on the loan on a pro rata basis with the selling bank. In such a transaction, from the standpoint of the selling bank, the portion of the loan that is treated as sold is not subject to the risk-based capital standards. In connection

with sales of multifamily housing loans in which the purchaser of a loan shares in any loss incurred on the loan with the selling institution on other than a pro rata basis, these other loss sharing arrangements are taken into account for purposes of determining the extent to which such loans are treated by the selling bank as sold (and excluded from balance sheet assets) under the risk-based capital framework in the same manner as prescribed for reporting purposes in the instructions to the Call Report.

^{36.} Residential property loans that do not meet all the specified criteria or that are made for the purpose of speculative property development are placed in the 100 percent risk category.

^{37.} Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on the lower of the acquisition cost of the property or appraised (or if appropriate, evaluated) value. Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the most current evaluation. All appraisals must be made in a manner consistent with the Federal banking agencies' real estate appraisal regulations and guidelines and with the bank's own appraisal guidelines.

section for eligibility for the 50 percent risk category at the time the pool is originated;

(3) If the security is backed by privately-issued mortgage-backed securities, *each* underlying security qualifies for the 50 percent risk category; and (4) If the security is backed by a pool of multifamily residential mortgages, principal and interest payments on the security are not 30 days or more past due.

Privately-issued mortgage-backed securities that do not meet these criteria or that do not qualify for a lower risk weight are generally assigned to the 100 percent risk category.

Attachment III—Summary of Risk Weights and Risk Categories for State Member Banks

Category 3: 50 Percent

1. Loans fully secured by first liens on 1- to 4-family residential properties or on multifamily residential properties that have been made in accordance with prudent underwriting standards, that are performing in accordance with their original terms, that are not past due or in nonaccrual status, and that meet other qualifying criteria, and certain privately-issued mortgage-backed securities representing indirect ownership of such loans. (Loans made for speculative purposes are excluded.)

Part 225—Bank Holding Companies and Change in Bank Control (Regulation Y)

2. Appendix A to part 225 is amended by revising the first paragraph of section III.C.3., footnote 48 in section III.D.1., and Category 3 Item 1. of Attachment III to read as follows:

Appendix A to Part 225—[Amended]

* * * * *

III. Procedures for Computing Weighted Risk Assets and Off-Balance Sheet Items

C. Risk Weights

* * * * *

3. Category 3: 50 percent. This category includes loans fully secured by first liens³⁷ on 1- to 4-family residential properties, either owner-occupied or rented, or on multifamily residential properties,38 that meet certain criteria.39 Loans included in this category must have been made in accordance with prudent underwriting standards;40 be performing in accordance with their original terms; and not be 90 days or more past due or carried in nonaccrual status. The following additional criteria must also be applied to a loan secured by a multifamily residential property that is included in this category: all principal and interest payments on the loan must have been made on time for at least the year preceding placement in this category, or in the case where the existing property owner is refinancing a loan on that property, all principal and interest payments on the loan being refinanced must have been made on time for at least the year preceding placement in this category; amortization of the principal and interest must occur over a period of not more than 30 years and the minimum original maturity for repayment of principal must not be less than 7 years; and the annual net operating income (before debt service) generated by

^{37.} If a banking organization holds the first and junior lien(s) on a residential property and no other party holds an intervening lien, the transaction is treated as a single loan secured by a first lien for the purpose of determining the loan-to-value ratio.

^{38.} Loans that qualify as loans secured by 1- to 4-family residential properties or multifamily residential properties are listed in the instructions to the FR Y-9C Report. In addition, for risk-based capital purposes, loans secured by 1- to 4-family residential properties include loans to builders with substantial project equity for the construction of 1- to 4-family residences that have been presold under firm contracts to purchasers who have obtained firm commitments for permanent qualifying mortgage loans and have made substantial earnest money deposits.

^{39.} Residential property loans that do not meet all the specified criteria or that are made for the purpose of speculative property development are placed in the 100 percent risk category.

^{40.} Prudent underwriting standards include a conservative ratio of the current loan balance to the value of the property. In the case of a loan secured by multifamily residential property, the loan-to-value ratio is not conservative if it exceeds 80 percent (75 percent if the loan is based on a floating interest rate). Prudent underwriting standards also dictate that a loan-to-value ratio used in the case of originating a loan to acquire a property would not be deemed conservative unless the value is based on the lower of the acquisition cost of the property or appraised (or if appropriate, evaluated) value. Otherwise, the loan-to-value ratio generally would be based upon the value of the property as determined by the most current appraisal, or if appropriate, the most current evaluation. All appraisals must be made in a manner consistent with the Federal banking agencies' real estate appraisal regulations and guidelines and with the banking organization's own appraisal guidelines.

the property during its most recent fiscal year must not be less than 120 percent of the loan's current annual debt service (115 percent if the loan is based on a floating interest rate) or, in the case of a cooperative or other not-for-profit housing project, the property must generate sufficient cash flow to provide comparable protection to the institution. Also included in this category are privately-issued mortgage-backed securities provided that:

- (1) The structure of the security meets the criteria described in section III(B)(3) above;
- (2) If the security is backed by a pool of conventional mortgages, on 1-to 4-family residential or multifamily residential properties, each underlying mortgage meets the criteria described above in this section for eligibility for the 50 percent risk category at the time the pool is originated;
- (3) If the security is backed by privately-issued mortgage-backed securities, each underlying security qualifies for the 50 percent risk category; and
- (4) If the security is backed by a pool of multifamily residential mortgages, principal and interest payments on the security are not 30 days or more past due.

Privately-issued mortgage-backed securities that do not meet these criteria or that do not qualify for a lower risk weight are generally assigned to the 100 percent risk category.

D. Off-Balance Sheet Items

Attachment III—Summary of Risk Weights and Risk Categories for Bank Holding Companies

Category 3: 50 Percent

1. Loans fully secured by first liens on 1- to 4-family residential properties or on multifamily residential properties that have been made in accordance with prudent underwriting standards, that are performing in accordance with their original terms, that are not past due or in nonaccrual status, and that meet other qualifying criteria, and certain privately-issued mortgage-backed securities representing indirect ownership of such loans. (Loans made for speculative purposes are excluded.)

FINAL RULE—AMENDMENT TO RULES REGARDING DELEGATION OF AUTHORITY

The Board of Governors is amending 12 C.F.R. Part 265, its Rules Regarding Delegation of Authority, for determining inconsistencies between state and federal laws to authorize the Director of the Division of Consumer and Community Affairs to make such determinations for the Truth in Savings Act and Regulation DD.

Effective December 3, 1993, 12 C.F.R. Part 265 is amended as follows:

Part 265—Rules Regarding Delegation of Authority

1. The authority citation for Part 265 continues to read as follows:

Authority: 12 U.S.C. 248(i) and (k).

2. Section 265.9 is amended by adding a new paragraph (c)(5) to read as follows:

Section 265.9—Functions delegated to the Director of the Division of Consumer and Community Affairs.

(c) * * *

(5) Section 273 of the Truth in Savings Act (12 U.S.C. 4312) and Regulation DD (12 C.F.R. Part 230).

^{48.} In regulatory reports and under GAAP, bank holding companies are permitted to treat some asset sales with recourse as "true" sales. For risk-based capital purposes, however, such assets sold with recourse and reported as "true" sales by bank holding companies are converted at 100 percent and assigned to the risk category appropriate to the underlying obligor or, if relevant the guarantor or nature of the collateral, provided that the transactions meet the definition of assets sold with recourse (including assets sold subject to pro rata and other loss sharing arrangements), that is contained in the instructions to the commercial bank Consolidated Reports of Condition and Income (Call Report). This treatment applies to any assets, including the sale of 1- to 4-family and multifamily residential mortgages, sold with recourse. Accordingly, the entire amount of any assets transferred with recourse that are not already included on the balance sheet, including pools of 1- to 4-family residential mortgages, are to be converted at 100 percent and assigned to the risk category appropriate to the obligor, or if relevant, the nature of any collateral or guarantees. The only exception involves transfers of pools of residential mortgages that have been made with insignificant recourse for which a liability or specific non-capital reserve has been established and is maintained for the maximum amount of possible loss under the recourse provision.

ORDERS ISSUED UNDER BANK HOLDING COMPANY ACT

Orders Issued Under Section 3 of the Bank Holding Company Act

Credit International Bancshares, LTD. Washington, D.C.

Order Approving the Acquisition of a Bank

Credit International Bancshares, LTD., Washington, D.C. ("CIB"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 3 of the BHC Act (12 U.S.C. § 1842) to acquire all the voting shares of Sequoia National Bank, Bethesda, Maryland ("Sequoia Bank").1 Sequoia Bank will be formed as successor to Sequoia Federal Savings Bank, Bethesda, Maryland ("Sequoia Savings") by merger with Sequoia Bank pursuant to section 5(d)(2)(G) of the Federal Deposit Insurance Act (12 U.S.C. § 1815(d)(2)(G)).2

Notice of the proposal, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 49,514 and 49,515 (1993)). The time for filing comments has expired, and the Board has considered the proposal and all comments received in light of the factors set forth in section 3(c) of the BHC Act.

CIB, with total consolidated assets of \$51.1 million, is the 15th largest commercial banking organization in the District of Columbia, controlling approximately \$44.2 million in deposits, representing less than 1 percent of total deposits in commercial banking organiza-

tions in the District of Columbia.³ Sequoia Savings, with assets of \$95.3 million, is the 35th largest thrift organization in Maryland, controlling approximately \$89 million in deposits, representing less than 1 percent of total deposits in thrift organizations in Maryland. Upon consummation of the proposal, CIB would become the 43d largest commercial banking organization in Maryland, controlling approximately \$89 million in deposits, representing less than 1 percent of the total deposits in commercial banks in Maryland.

Douglas Amendment Analysis

Section 3(d) of the BHC Act ("Douglas Amendment") prohibits a bank holding company from acquiring a bank outside of its home state4 "unless the acquisition of . . . a State bank by an out-of-State bank holding company is specifically authorized by the statute laws of the State in which such bank is located, by language to that effect and not merely by implication." For purposes of the Douglas Amendment, the home state of CIB is the District of Columbia, and the home state of Sequoia Savings is Maryland. The Board has previously determined that the interstate statutes of Maryland and the District of Columbia permit acquisitions of institutions located in the respective states.6 Based on the foregoing and the other facts of record, the Board has determined that approval of this proposal is not prohibited by the Douglas Amendment.⁷

Competitive Considerations

CIB and Sequoia Savings compete directly in the Washington, D.C., banking market.⁸ Upon consummation of this proposal, CIB would become the 61st largest depository institution in the market, controlling deposits of \$64.4 million, representing less than 1 percent of total deposits in depository institutions in the

^{1.} In connection with the acquisition, SBI Voting Trust ("Trust"), a voting trust formed for the purpose of preserving certain tax benefits, has also filed notice pursuant to the Change in Bank Control Act ("CIBC Act") (12 U.S.C. § 1817(j)) to acquire up to 52 percent of the voting shares of CIB and thereby indirectly acquire Federal Capital Bank, N.A., Washington, D.C. ("Federal Capital"), a wholly owned subsidiary bank of CIB, and Sequoia Bank. Trust relates to the shares of a single bank holding company, terminates within 25 years, engages in no other activity except to hold and vote the shares of CIB held in trust, and involves parties who are not participants in any similar voting trust or related agreement with respect to any other bank or nonbank business. See 1 F.R.R.S. 4-185.5. Accordingly, Trust would not be considered a "company" within the meaning of section 2(b) of the BHC Act. Based on all the facts of record, the Board does not intend to disapprove the notice under the CIBC Act.

^{2.} This provision of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 permits a savings association to convert to a bank charter provided the resulting bank remains a Savings Association Insurance Fund member. The Office of Thrift Supervision has approved this conversion subject to other regulatory approval. The Office of the Comptroller of the Currency has not yet acted on the application. The Board's action in this case is conditioned on the relevant companies' obtaining all necessary regulatory approvals for this transaction.

^{3.} Asset and deposit data are as of September 30, 1993.

^{4.} A bank holding company's home state is that state in which the operations of the bank holding company's banking subsidiaries were principally conducted on July 1, 1966, or the date on which the company became a bank holding company, whichever is later. The operations of a bank holding company are considered principally conducted in that state in which the total deposits of such banking subsidiaries are largest.

^{5. 12} U.S.C. § 1842(d).

^{6.} See James Madison, Ltd., 73 Federal Reserve Bulletin 129 (1987); Maryland National Corporation, 73 Federal Reserve Bulletin 310 (1987)

^{7.} See Md. Code Ann. Fin. Inst. § 5-1001 et seq.; D.C. Code Ann. § 26-801 et seq. The Maryland Bank Commissioner has indicated that CIB's proposed acquisition is permitted by the relevant state banking statute.

^{8.} The Washington, D.C., banking market is defined as the Washington, D.C., Ranally Metropolitan Area, which is composed of the District of Columbia and the surrounding suburban areas of Maryland and Virginia.

market.9 After considering the number of competitors that would remain in the market and the relatively small increase in concentration as measured by the Herfindahl-Hirschman Index ("HHI"),10 the Board concludes that consummation of this proposal would not result in a significantly adverse effect on competition in the Washington, D.C., banking market or any other relevant banking market.

Based on all the facts of record, including all the representations and commitments made in connection with this proposal, the Board concludes that financial and managerial resources and future prospects of CIB, its subsidiaries and Sequoia Savings and the other supervisory factors that the Board must consider under section 3 of the BHC Act are consistent with approval of this proposal. Considerations relating to the convenience and needs of the communities to be served are also consistent with approval.

Conclusion

Based upon the foregoing and all the facts of record, including the commitments made in connection with this proposal, the Board has determined that the application should be, and hereby is, approved. The Board's approval is specifically conditioned upon compliance with all of the commitments made in connection with this proposal, and upon receipt of all required state and federal approvals. For the purpose of this action, the commitments and conditions relied upon by the Board in reaching its decision are deemed to be conditions imposed in writing by the Board in connection with its findings and decision, and, as such, may be enforced in proceedings under applicable law.

The acquisition shall not be consummated before the thirtieth calendar day following the effective date of this order, or later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Richmond, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 20, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Angell, Kelley, LaWare, Lindsey, and Phillips.

> JENNIFER J. JOHNSON Associate Secretary of the Board

One Valley Bancorp of West Virginia, Inc. Charleston, West Virginia

Order Approving the Merger of Bank Holding Companies

One Valley Bancorp of West Virginia, Inc., Charleston, West Virginia ("One Valley"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied for the Board's approval under section 3 of the BHC Act (12 U.S.C. § 1842) to merge with Mountaineer Bankshares of W. Va., Inc., Martinsburg ("Mountaineer"), and thereby indirectly acquire Old National Bank. Martinsburg; The Empire National Bank of Clarksburg, Clarksburg; City National Bank of Fairmont, Fairmont; The Bank of Wadestown, Fairview; Mercantile Banking & Trust Company, Moundsville; and The Bank of Cameron, Inc., Cameron, all in West Virginia. One Valley also proposes to acquire Mountaineer's subsidiary bank holding company, Sunrise Bancorp, Inc., Wheeling, and thereby indirectly acquire The Sunshine Bank of Wheeling, Wheeling, both in West Virginia.1

Notice of the application, affording interested persons an opportunity to submit comments, has been published (57 Federal Register 59,267 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the BHC Act.

One Valley is the second largest commercial banking organization in West Virginia, controlling deposits

^{9.} When used in this context, depository institutions include commercial banks and savings associations. Market data are as of June 30, 1992. Market share data are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board previously has indicated that thrift institutions have become, or have the potential to become, major competitors of commercial banks. See Midwest Financial Group, 75 Federal Reserve Bulletin 386 (1989); National City Corporation, 70 Federal Reserve Bulletin 743 (1984). Because the deposits of Sequoia Savings will be transferred to a commercial bank under the proposal, those deposits are included at 100 percent in the calculation of pro forma market share. See First Banks, Inc., 76 Federal Reserve Bulletin 669, 670 n.9 (1990); Norwest Corporation, 78 Federal Reserve Bulletin 452 (1992).

^{10.} The HHI for the market is currently 933 and consummation of the proposed transaction would not increase the HHI for this market. Under the revised Department of Justice Merger Guidelines (49 Federal Register 26,823 (June 29, 1984)), a market in which the post-merger HHI is less than 1000 is considered unconcentrated. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anti-competitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anti-competitive effects implicitly recognize the competitive effect of limited-purpose lenders and other non-depository financial entities.

^{1.} In connection with this application, One Valley has obtained an option to acquire 19.9 percent of the outstanding common stock of Mountaineer and will file an application with the Board before exercising this option.

of \$2.3 billion, representing 14.2 percent of total commercial bank deposits in the state.² Mountaineer is the seventh largest commercial banking organization in West Virginia, controlling deposits of \$607 million, representing 3.7 percent of total commercial bank deposits in the state. Upon consummation of the proposed transaction, One Valley would become the largest commercial banking organization in West Virginia, controlling deposits of \$2.9 billion, representing 17.9 percent of total commercial bank deposits in the state.

Competitive Considerations

One Valley and Mountaineer compete directly in the Martinsburg, Clarksburg, and Wheeling, West Virginia banking markets. In the Martinsburg banking market,3 One Valley is the third largest of eight commercial banking organizations, with deposits of \$129.9 million, representing 15.8 percent of total deposits in commercial banks in the market ("market deposits").4 Mountaineer is the second largest commercial banking organization in the market, with deposits of \$138.8 million, representing 16.9 percent of market deposits. Upon consummation of the proposal, One Valley would become the largest commercial banking organization in the Martinsburg banking market, controlling deposits of \$268.7 million, representing 32.7 percent of market deposits. The Herfindahl-Hirschman Index ("HHI") for the market would increase by 534 points to 1950.5

A number of factors indicate that the increased level of concentration in the Martinsburg banking market, as measured by the HHI, tends to overstate the competitive effect of this proposal. For example, upon consummation of this proposal, seven commercial banking organizations would continue to operate in the Martinsburg banking market, including four of the ten largest banking organizations in West Virginia. The Martinsburg banking market is also attractive to entry. Although West Virginia, as a whole, experienced an 8 percent decline in population between 1980 and 1990, the population in the Martinsburg banking market increased by 24 percent. Deposits in the Martinsburg banking market also have increased at a rate higher than the statewide rate for deposit growth.7 The attractiveness of the Martinsburg banking market for new entrants has been demonstrated by recent entry into the market and the expansion activity of the institutions that already operate in the market. For example, since 1989, two large bank holding companies, including the largest in the state, have entered the Martinsburg banking market through acquisition, and in 1992, West Virginia's ninth largest bank holding company entered the Martinsburg banking market de novo. Between 1989 and 1993, the number of branch locations increased by 48 percent, from 23 to 34. Finally, because West Virginia permits statewide branching and acquisitions by out-of-state bank holding companies on a nationwide reciprocal basis, there are numerous potential entrants to the Martinsburg banking market.8

In addition, the unique geographic location of the Martinsburg banking market provides readily available and easily accessible banking services from out-ofmarket institutions. The Martinsburg banking market is located in the eastern panhandle of West Virginia bordered by Maryland and Virginia, and is in close proximity to larger population clusters in both neighboring states.9 A significant portion of the daily work force (approximately 19 percent) commutes to the surrounding markets in which these population clusters are located. 10 Moreover, a review of advertising media in the market indicates that commercial and consumer customers in the market are exposed to and solicited by financial service providers from surrounding markets.11 Consequently, many businesses and

^{2.} Unless otherwise indicated, deposit and market data are as of June 30, 1993

^{3.} The Martinsburg banking market is approximated by Berkeley and Jefferson Counties, except for the northern part of Berkeley County.

^{4.} No thrifts operate in the Martinsburg banking market.

^{5.} Under the revised Department of Justice Merger Guidelines, 49 Federal Register 26,823 (June 29, 1984), a market in which the post-merger HHI is above 1800 is considered to be highly concentrated. In such markets, the Justice Department is likely to challenge a merger that increases the HHI by more than 50 points. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by more than 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anticompetitive effects implicitly recognize the competitive effect of limited-purpose lenders and other non-depository financial entities.

^{6.} The population of Berkeley County increased 27 percent and the population of Jefferson County increased 19 percent between 1980 and

^{7.} The compound growth rate for total bank deposits in the market in the past three years was 6.3 percent, compared to 4.8 percent for MSAs in the state and 4.2 percent for non-MSA counties in West Virginia.

^{8.} W. Va. Code §§ 31A-8-12, 31A-8A-7.

^{9.} Martinsburg (population 14,000) is 19 miles south of Hagerstown (population 35,900) and 33 miles west of Frederick (population 42,000), both in Maryland, and 22 miles north of Winchester, Virginia (population 22,900).

^{10.} Although there is substantial out-of-market commuting, the level of commuting in any one direction is not sufficient to tie the Martinsburg area to another market. See, e.g., Hartford National Corporation, 73 Federal Reserve Bulletin 720 (1987). An additional 15 percent of the workforce commutes to the Washington, D.C. banking market.

^{11.} For example, five out-of-market depository institutions advertise in the local Martinsburg newspaper, and numerous out-of-market

residents have convenient banking alternatives outside the market, and these alternatives should substantially mitigate any anticompetitive effects of the proposal.

In the Clarksburg and Wheeling markets, ¹² consummation of this proposal would not exceed the threshold standards applied by the Board and set forth in the Department of Justice Merger Guidelines. In addition, numerous competitors would remain in these markets after consummation of this proposal. ¹³

In light of all facts of record, including the number of competitors that would remain in these markets, the number of potential entrants into these markets, and the attractiveness to entry and unique geographic characteristics of the Martinsburg banking market, the Board concludes that consummation of this proposal is not likely to have a significantly adverse effect on competition or the concentration of banking resources in the Martinsburg, Clarksburg or Wheeling banking markets, or in any other relevant banking market.

Other Considerations

The Board concludes that the financial and managerial resources and future prospects of One Valley, Mountaineer and their subsidiary banks are consistent with approval. The Board also concludes that considerations relating to the convenience and needs of the communities to be served, and the other supervisory factors that the Board must consider under section 3 of the BHC Act are consistent with approval of this proposal.

Based on the facts of record, the Board has determined that the application should be, and hereby is, approved. The Board's approval of this proposal is expressly conditioned on compliance with the commitments made in connection with this application. The commitments and conditions relied on by the Board in reaching its decision are both deemed to be conditions imposed in writing in connection with its findings and decisions, and, as such, may be enforced in proceedings under applicable law.

depository institutions pay for a listing in the local telephone directory.

This transaction shall not be consummated before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Richmond, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 20, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Angell, Kelley, LaWare, Lindsey, and Phillips.

JENNIFER J. JOHNSON Associate Secretary of the Board

Orders Issued Under Section 4 of the Bank Holding Company Act

Banc One Corporation Columbus, Ohio

Order Approving Application to Conduct Certain Data Processing Activities

Banc One Corporation, Columbus, Ohio ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied for the Board's approval under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23(a) of Regulation Y (12 C.F.R. 225.23(a)) to acquire all the voting shares of Croghan & Associates, Inc., Boulder, Colorado ("Company"), and thereby to engage *de novo* in certain data processing and data transmission activities pursuant to section 225.25(b)(7) of Regulation Y.

In particular, Applicant intends to operate, through Company, a network for the processing and transmission of medical payment data between health care providers (such as physicians, hospitals, and pharmacies) ("Providers") and entities responsible for providing medical benefits (such as health insurers, health maintenance organizations, and preferred provider organizations) ("Payers"). The network would operate in a manner similar to existing automated-tellermachine ("ATM") and point-of-sale ("POS") networks. In general, Providers would enter claims information into the network with a request for payment, and Payers would authorize electronic fund transfers in full or partial payment of the claims.

In addition, Company proposes to furnish Providers and Payers with software for use in the medical payments network, including claims adjudication software that would automate the determination of what

^{12.} The Wheeling banking market is approximated by Marshall and Ohio Counties in West Virginia, and the eastern third of Belmont County in Ohio; the Clarksburg banking market is approximated by Doddridge, Harrison and Taylor Counties in West Virginia.

^{13.} In the Wheeling banking market, One Valley would become the third largest depository institution, and the HHI would increase by 27 points to 974. In the Clarksburg banking market, One Valley would become the second largest depository institution, and the HHI would increase by 210 points to 1746. Market share data for the Wheeling banking market are as of June 30, 1992 and are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board has regularly included thrift deposits in the calculation of market share on a 50 percent weighted basis. See, e.g., First Hawaiian Inc., 77 Federal Reserve Bulletin 52 (1991).

claims should be paid and the amount of each claim that should be paid. Company also intends to provide by-products of its data processing activities, including statistical information derived from the data transmitted through the payment network, and to furnish additional related services that may result from its research and development efforts.1

Notice of the application, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 33,443 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 4(c)(8) of the BHC Act.

Applicant, with \$75.4 billion in total consolidated assets, is the eighth largest commercial banking organization in the United States, controlling \$59.4 billion in deposits.2 Applicant operates subsidiary banks in Ohio, Kentucky, Indiana, Michigan, Illinois, Wisconsin, Texas, Colorado, Arizona, California, Utah, and West Virginia, and engages directly and through its subsidiaries in a broad range of banking and permissible nonbanking activities.

Closely Related to Banking Analysis

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity that the Board determines to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." An activity may be deemed to be closely related to banking if it is demonstrated that:

- (1) Banks generally provide the proposed services;
- (2) Banks generally provide services that are operationally or functionally so similar to the proposed services as to equip them particularly well to provide the proposed services; or
- (3) Banks generally provide services that are so integrally related to the proposed services as to require their provision in a specialized form.3

The Board has determined generally that certain data processing activities are closely related to banking and therefore permissible for bank holding companies under section 4(c)(8) of the BHC Act. Section 225.25(b)(7) of Regulation Y permits bank holding companies to provide data processing and data transmission services, facilities (including software), data bases, or access to such services, facilities, or data bases by any technological means, so long as the data to be processed or furnished are "financial, banking, or economic" in nature.4 In addition, Regulation Y provides that bank holding companies may engage in incidental activities that are necessary to carry on an activity that is closely related to banking. See 12 C.F.R. 225.21(a)(2). In the data processing context, such incidental activities include the provision of by-products of permissible data processing and data transmission services, so long as such by-products are not designed, or appreciably enhanced, for the purpose of marketability. See 12 C.F.R. 225.123(e)(2).

For analytical purposes, Applicant's proposal can be viewed in three parts:

- (1) The basic operation of a medical payments network:
- (2) The provision of claims adjudication software;
- (3) The provision of statistical and other information derived from the data flowing over the network.
- (1) Basic Network Services. Under the medical payments system proposed by Company, Payer organizations would issue to their members a medical benefits card similar to a credit or debit card.5 Before receiving health care services, a patient would present this medical benefits card to the relevant Provider. The Provider could then use the card to obtain access through Company to a central database containing information on patient eligibility, co-payment requirements, year-to-date deductible values, and other cov-

^{1.} The Board has relied on Applicant's commitment to consult with the Federal Reserve System before Company offers new data processing services or products not specifically discussed in the application to ensure that the activity will satisfy the criteria set forth in the BHC Act and Regulation Y, and to allow the Federal Reserve System an opportunity to consider whether a separate application should be reviewed in any particular case.

Asset and deposit data are as of June 30, 1993.

^{3.} See National Courier Association v. Board of Governors of the Federal Reserve System, 516 F.2d 1229, 1237 (D.C. Cir. 1975). In addition, the Board may consider any other basis that may demonstrate that the proposed activity has a reasonable or close connection or relationship to banking or managing or controlling banks. See Board Statement Regarding Regulation Y, 49 Federal Register 806

^{(1984);} Securities Industry Association v. Board of Governors of the Federal Reserve System, 468 U.S. 207, 210-211 n. 5 (1984).

^{4.} Regulation Y also requires that the services be provided pursuant to a written agreement, and places certain limitations on the facilities and hardware provided with the data processing services. In particular, the facilities must be designed, marketed, and operated for the processing and transmission of financial, banking, or economic data; hardware must be provided only in conjunction with permissible software; and general purpose hardware must not constitute more than 30 percent of the cost of any packaged offering. See 12 C.F.R. 225.25(b)(7). Applicant has committed that Company will provide the proposed services pursuant to a written agreement, and will provide facilities and hardware within the limitations established by Regulation Y.

^{5.} Company would perform embossing and encoding functions with respect to these medical benefits cards. Applicant expects that medical benefits cards may be developed with debit or credit card features, so that the cards could be used by consumers to obtain access to, and authorize medical payments from, their banking or other accounts.

erage data. After medical services are furnished, the Provider would transmit claim information to the relevant Payer through Company's medical payments network. This claim information would include the amount charged and a description of the services rendered that is sufficient to allow the Payer to determine the eligibility of the claim and the amount that should be paid. The Payer would then authorize electronic payment of the appropriate amount through Company and participating financial institutions. Throughout this process, Providers would be able to ascertain the status of the claim and any related payment.⁶

Company's primary activities would include the routing and processing of medical payment transactions through direct connections between Company's computer switch and Payer and Provider terminals. Company also would perform the accounting functions necessary to settle the payments processed through the network, and would provide electronic transaction and settlement reports to participating financial institutions, Providers, and Payers. In addition, Company would provide other services analogous to functions performed by the operator of an ATM or POS network, including switching, gateway, and terminal driving services. These functions represent the processing of banking, financial, and economic data of the type previously approved for bank holding companies.⁷

In addition to banking, financial, and economic information, however, Company would process and transmit medical treatment data sufficient to allow Payers to make decisions regarding the legitimacy of a claim and the appropriate degree of coverage. Similarly, when Providers obtain access to the coverage information database, Company would transmit data

Provider, with payments to be made at regular intervals upon presen-

tation of satisfactory documentation - also could be accommodated by

relating to the terms of a particular Payer's medical coverage contract and the extent to which specific medical treatments would be covered by the patient's insurance policy.

While such medical and coverage data are not financial data, processing and transmitting this data are essential components in the transmission and processing of the medical payments and financial information in the network. For example, the medical data submitted by Providers as part of a claim (such as descriptions of a patient's symptoms and of medical procedures performed by the Provider) are necessary to the Payer's decision to authorize an electronic funds transfer payment. Similarly, a Payer must furnish insurance policy coverage information to a Provider in order to permit the Provider to calculate the payment reasonably to be expected from the Payer and the charges that should be allocated to the patient.

Moreover, the purpose of the data processing services rendered by Company in its operation of the network would be to permit the electronic transfer of funds from patient and Payer accounts to Provider accounts. The Board also notes that banking organizations transmit and process similar incidental data (though in less significant quantities) in connection with bill-paying services provided to consumers and accounts payable services rendered to corporate customers. In addition, the Office of the Comptroller of the Currency ("OCC") has permitted national banks to operate a medical payments network that processed a somewhat more limited amount of non-financial medical treatment and claims eligibility data.9 For the foregoing reasons, the Board believes that Company's processing and transmission of medical and coverage data in connection with its operation of a payments network are permissible as incidental activities. 10

Accordingly, and on the basis of all the facts of record, the Board has concluded that, although the operation of a medical payments network would involve the processing and transmission of medical and

the proposed network.

^{6.} Alternative financial arrangements among Providers and Payers
— for example, pricing based on the number of patients treated by a

^{7.} Company also proposes to provide and maintain software and hardware used in the medical payments network. The hardware provided by Company would consist primarily of general purpose hardware which, together with operating system, database and network access, and network processing software, would comprise the basic operating environment for the medical payments network. The software provided by Company for use in the network would be an essential component in the operation of the medical payments system. Applicant has stated that Company would provide hardware and software only in accordance with the limitations established by Regulation Y. System software would constitute general purpose software and be considered part of the general purpose hardware of the system, subject to the 30 percent limitation in Regulation Y. Other software would include database and network access products, as well as network processing software similar to that used in the operation of ATM and POS networks. This software, together with the adjudication software discussed below, would be special purpose software designed to carry out the billing, accounts payable, and electronic fund transfer functions of the network.

^{8.} Applicant has represented that this medical data submitted by Providers would include only information required to assess the appropriateness, validity, and amount of a claim for payment, or otherwise necessary to authorize payment for a claim, and that Providers would not be transmitting data for general medical use.

^{9.} For example, the proposal approved by the OCC did not appear to include an adjudication mechanism (such as that discussed below) that permits an immediate analysis and payment of claims that fall within specifications set by the Payer. In many other respects, however, the network considered by the OCC involved the transmission of non-financial data, including medical treatment data, such as that at issue in this proposal. The OCC concluded that operation of the network was a permissible activity because it constituted the provision of a data processing system in connection with electronic fund transfers. See OCC Interpretive Letter No. 419 (February 16, 1988), reprinted in Federal Banking Law Reporter (CCH) ¶ 85,643 (May 27, 1988).

^{10.} See 12 C.F.R. 225.21(a)(2).

coverage data, as well as data of a financial, banking, or economic nature, Company's proposed operation of a medical payments network would constitute permissible data processing and data transmission activities under the BHC Act.

(2) Adjudication Software. In addition to the software used in the basic operation of the medical payments network, Company proposes to provide claims adjudication software to Payers. This software would represent an electronic version of the basic rules of a Payer's coverage contract, and would be designed for the processing of routine claims. In general, the claims adjudication software would automate a large portion of the process by which a Payer determines the extent to which a submitted claim should be paid.

Company would not make decisions or render advice as to what portions, if any, of the claims adjudication process should be automated for any particular Payer, and each adjudication program developed by Company would contain only the information necessary to process submitted claims. In addition, Company would not play any role in determining the extent to which a claim would be covered: all parameters for payment of insurance claims would be set by the Payer, and questions, payment decisions, or disputes about the extent of coverage would be handled by the Payer (and not by Company).¹¹

The claims adjudication process essentially involves the interaction of financial and banking data (the amount of a submitted claim and a request for an electronic funds transfer) and medical and coverage data (treatment information and the basic rules of a Paver's coverage contract). Claims adjudication is a central aspect of the authorization function in the proposed network, and is necessary to the consummation of an electronic funds transfer. For these reasons, claims adjudication is functionally similar to the payment authorization services rendered by operators of ATM and POS networks to their financial institution and other customers. In addition, the provision of claims adjudication software is an integral part of the accounts payable function Company proposes to provide to Payers.

Accordingly, the Board believes that the processing of medical and coverage data involved in claims adjudication is an integral part of, and therefore necessary to, the processing of related financial and banking information, and Company's processing of the underlying payment transactions. Hence, on the basis of all the facts of record, the Board has concluded that Company's provision of claims adjudication software that processes such medical and coverage data is permissible as an activity incidental to its provision of software for the processing of banking and financial data, and its operation of a medical payments network.12

(3) Electronic Data Interchange. Company also proposes to furnish participants in the medical payments system with statistical and other data derived from the information contained in Company's database. 13 Each customer would have on-line access to all the data it places in the system, and third parties designated by a Payer or Provider also could receive access to data owned by such customer.¹⁴ Applicant has indicated that the information comprising the database for these services would consist solely of medical claims data necessary for the authorization of payments, other data transmitted through Company's network, and similar claims and payment information provided to Company by actual and potential processing and adjudication customers.

The Board has stated that bank holding companies may provide by-products of permissible data processing and data transmission activities, so long as such by-products are not designed, or appreciably enhanced, for the purpose of marketability. 12 C.F.R. 225.123(e)(2). The Board has indicated that by-products include data, software, or data processing techniques that may be applicable to the data processing requirements of other industries. See Citicorp. 68 Federal Reserve Bulletin 505, 510-511 (1982).

Company expects that, in most instances, raw data will be transmitted to a customer from the network's central computer upon the customer's electronic request, without any intervention by Company personnel. The customer would then analyze the data to suit its own particular needs. In some cases, however, pursuant to a customer's instructions, Company may perform limited selection, combination, and similar functions upon raw data so that it can be transmitted to

^{11.} These limitations should ensure that Company does not become engaged in the provision of insurance-related services or advice. Company would only provide the electronic media and software for adjudication and payment of benefits, and would not be engaged in insurance agency activities or in the sale of medical insurance. In this regard, Applicant has committed that Company would not conduct any activity that would require it to be licensed as an insurance agent or broker under state law.

^{12.} See 12 C.F.R. 225.21(a)(2).

^{13.} Applicant has stated that these electronic data interchange services would be offered as part of a package of services purchased by a Payer or Provider. Company also would make these services available on an independent basis to potential customers of Company's network processing and claims adjudication services. Company would not, in any event, market these services to the general public.

^{14.} All data furnished by Company in rendering these services would be formatted so that individual Providers and patients could not be identified by persons not authorized to receive access to such information. In addition, such data would be furnished only to the extent permitted by relevant patient and other consent forms.

the customer in a reorganized and more usable form. Company also may design software that would enable customers to perform similar reorganization functions upon raw data. Company would not, however, render advisory or consulting services in connection with the provision or use of these electronic data interchange capabilities, and would not engage in any scientific, actuarial, or clinical research or analysis of the information contained in the database. Moreover, Company would not, under any circumstances, make data available to the general public.

On the basis of all the facts of record, including the limitations discussed in the application and the limitations discussed above, the Board has concluded that the proposed electronic data interchange services would constitute permissible by-products of Company's primary data processing activities, and that such services are, therefore, permissible as an incidental activity.

Other Considerations

In every case involving a nonbanking acquisition by a bank holding company under section 4 of the BHC Act, the Board considers the financial condition and resources of the applicant and its subsidiaries and the effect of the transaction on those resources. ¹⁵ Based on all the facts of record, the Board has concluded that financial and managerial considerations are consistent with approval of this proposal.

In order to approve this application, the Board also must determine that the performance of the proposed activities by Applicant through Company "can reasonably be expected to produce benefits to the public . . . that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. § 1843(c)(8). The Board expects that the participation of Company in the market for the proposed data processing services would increase the level of competition among providers of those services. The Board also anticipates that Company's proposed activities would result in new products and services, greater efficiencies, and increased convenience for consumers. In addition, there is no evidence in the record that consummation of the proposed activities would result in any significantly adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. Accordingly, the Board concludes that the balance of the public interest factors that it is required to consider under section 4(c)(8) of the BHC Act is favorable.

Based on all the facts of record, the Board has determined that the application should be, and hereby is, approved. The Board's approval is specifically conditioned on compliance with the commitments made in connection with this application and with the conditions referred to in this order. The Board's determination also is subject to all the conditions set forth in Regulation Y, including those in sections 225.4(d) and 225.23(b) of Regulation Y, and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to ensure compliance with, and to prevent evasion of, the provisions of the BHC Act and the Board's regulations and orders issued thereunder. For purposes of this action, these commitments and conditions are deemed to be conditions imposed in writing by the Board in connection with its findings and decision, and, as such, may be enforced in proceedings under applicable law.

This transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Cleveland, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 22, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Kelley, Lindsey, and Phillips. Absent and not voting: Governors Angell and LaWare.

JENNIFER J. JOHNSON Associate Secretary of the Board

Creditanstalt-Bankverein Vienna, Austria

Order Approving an Application to Engage in Investment Advisory Services

Creditanstalt-Bankverein, Vienna, Austria ("Applicant"), a foreign bank subject to the provisions of the Bank Holding Company Act ("BHC Act"), has applied pursuant to section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23(a)(3) of the Board's Regulation Y (12 C.F.R. 225.23(a)(3)) to engage de novo, through a joint venture, in investment advisory activities pursuant to section 225.25(b)(4) of Regulation Y (12 C.F.R. 225.25(b)(4)). Applicant pro-

^{15.} See 12 C.F.R. 225.24. See also The Fuji Bank, Limited, 75 Federal Reserve Bulletin 94 (1989); Bayerische Vereinsbank AG, 73 Federal Reserve Bulletin 155 (1987).

^{1.} Specifically, Company will:

poses to establish a limited partnership, Steinberg Asset Management Company, L.P., New York, New York ("Company"), between its wholly owned subsidiary Creditanstalt International Advisers Group, Inc., New York, New York, and Steinberg Asset Management Inc., New York, New York ("Coventurer"). Company will conduct the proposed activities throughout the United States and abroad.

Notice of the application, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 57,611 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 4(c)(8) of the BHC Act.

Applicant, with total consolidated assets of \$48.4 billion, is the 97th largest banking organization in the world.² In the United States, Applicant operates a branch in New York, New York, and representative offices in Atlanta, Georgia, and San Francisco, California.3 Applicant also engages in permissible nonbanking activities in the United States and abroad.

The Board previously has determined by regulation that providing investment advisory services is an activity that is closely related to banking and permissible for bank holding companies under section 4(c)(8) of the BHC Act.⁴ Applicant has stated that Company will engage in these activities in accordance with the Board's regulations.

In prior decisions, the Board has expressed concern that joint ventures could potentially lead to a matrix of relationships between co-venturers and their affiliates that could break down the legally mandated separation of banking and commerce, create the possibility of conflicts of interests and other adverse effects that the BHC Act was designed to prevent, or impair or give the appearance of impairing the ability of the banking organization to function effectively as an independent and impartial provider of credit.5 Further, joint ventures must be carefully analyzed for any possible adverse effects on competition and on the financial condition of the banking organization involved in the proposal.

Currently, Coventurer engages only in investment advisory activities that are permissible for a bank holding company.6 Applicant has committed to notify the Board in the event Company, Coventurer, or any of its affiliates, determines to engage in any securities activity that is impermissible for a state member bank under the Glass-Steagall Act or any other activity that is impermissible under the BHC Act, and to seek Board approval of Applicant's retention of its interest in Company should such activities of Coventurer or its affiliates be inconsistent with the Board's order approving this application. Based on these and other commitments made by Applicant, the Board believes that the structure of the joint venture in this case is consistent with the provisions of section 4 of the BHC Act and prior Board cases.

In order to approve this application, the Board also is required to determine that the performance of the proposed activities by Applicant can reasonably be expected to produce benefits to the public that would outweigh possible adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act.7

Under the framework established in this and prior Board decisions, consummation of this proposal is not likely to result in any significantly adverse effects, such as an undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. Moreover, the Board has determined that performance of the proposed activities by Applicant can reasonably be expected to produce public benefits that would outweigh any adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act.

In weighing these factors under section 4 of the BHC Act, the Board considers the financial condition and resources of Applicant and its subsidiaries and the effect of the proposal on these resources. In this case, the Board notes that Applicant meets the relevant risk-based capital standards consistent with the Basle Accord, and has capital equivalent to that which would be required for United States banking organizations. In view of these and other facts of record, the Board has determined that the financial factors are consistent with approval of this application. The man-

⁽¹⁾ Serve as investment adviser (as defined in section 2(a)(20) of the Investment Company Act of 1940, 15 U.S.C. § 80a-2(a)(20)) to an investment company registered under that act, including sponsoring, organizing, and managing a closed-end investment company;

⁽²⁾ Provide portfolio investment advice to any other person; and (3) Furnish general economic information and advice, general economic statistical forecasting services and industry studies. See 12 C.F.R. 225.25(b)(4)(ii),(iii), and (iv).

^{2.} Asset data are as of June 30, 1993.

^{3.} Under section 8(a) of the International Banking Act of 1978 (12 U.S.C. § 3106(a)), a foreign bank that operates a branch, agency, or commercial lending company subsidiary in the United States is subject to the BHC Act as if it were a bank holding company.

^{4.} See 12 C.F.R. 225.25(b)(4).

^{5.} See, e.g., The Fuji Bank, Limited, 75 Federal Reserve Bulletin 577 (1989); Amsterdam-Rotterdam Bank, N.V., 70 Federal Reserve Bulletin 835 (1984).

^{6.} See 12 C.F.R. 225.25(b)(4). In addition, Coventurer's affiliate, Michael A. Steinberg & Company, Inc., New York, New York, provides securities brokerage services which also are permissible for bank holding companies under the BHC Act. See 12 C.F.R. 225.25(b)(15).

^{7. 12} U.S.C. § 1843(c)(8).

agerial resources of Applicant and its subsidiaries also are consistent with approval.

Based on the foregoing and all the facts of record, the Board has determined to, and hereby does, approve the application subject to the terms and conditions set forth in this order, and in the Board regulations and orders noted above. The Board's determination also is subject to all the terms and conditions set forth in its Regulation Y, including those in sections 225.4(d) and 225.23(b), and to the Board's authority to require modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, and to prevent evasion of, the provisions of the BHC Act, and the Board's regulations and orders issued thereunder. The Board's decision is specifically conditioned on compliance with all the commitments made in this application, including the commitments discussed in this order and the conditions set forth in the Board orders noted above. These commitments and conditions shall be deemed to be conditions imposed in writing by the Board in connection with its findings and decisions, and may be enforced in proceedings under applicable law.

This transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective December 16, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

> JENNIFER J. JOHNSON Associate Secretary of the Board

Crestar Financial Corporation Richmond, Virginia

Crestar Bank Richmond, Virginia

Order Approving Mergers of Savings Associations with a Commercial Bank

Crestar Financial Corporation, Richmond, Virginia ("Crestar"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23 of the Board's Regulation Y (12 C.F.R. 225.23) to acquire Providence Savings and Loan Association, F.A., Vi-

enna, Virginia ("Providence"). Crestar's subsidiary bank, Crestar Bank, Richmond, Virginia ("Bank"), a state member bank, has applied under section 18(c) of the Federal Deposit Insurance Act ("FDI Act") (12 U.S.C. § 1828(c)) ("Bank Merger Act") to acquire Providence and Virginia Federal Savings Bank, Richmond, Virginia ("VFSB").

Crestar and Bank have also applied under section 5(d)(3) of the FDI Act (12 U.S.C. § 1815(d)(3)), as amended by the Federal Deposit Insurance Corporation Improvement Act of 1991, Pub. L. No. 102-242, § 501, 105 Stat. 2236, 2388 (1991), to acquire Providence and VFSB,1 and Bank has applied to establish branches at the present locations of Providence and VFSB pursuant to section 9 of the Federal Reserve Act (12 U.S.C. § 321 et seq.).2

Notice of the applications, affording interested persons an opportunity to submit comments, has been published in accordance with the Bank Merger Act and the Board's Rules of Procedure (12 C.F.R. 262.3(b)). Reports on the competitive effects of the merger were requested from the United States Attorney General, the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Office of Thrift Supervision. The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in the Bank Holding Company Act, the Bank Merger Act, and the Federal Reserve

Crestar, with total consolidated assets of \$13 billion, operates subsidiary banks in Virginia, Maryland, and the District of Columbia.3 Bank is the second largest commercial banking organization in Virginia, controlling approximately \$7.8 billion in deposits, representing 13.8 percent of total deposits in commercial banking organizations in the state. Providence is the 14th largest thrift institution in Virginia, controlling deposits of \$329.4 million, representing 3.3 percent of total deposits in thrift institutions in the state. VFSB is the fifth largest thrift institution in Virginia, controlling approximately \$552.8 million in deposits, representing 4.8 percent of total deposits in thrift institutions in the state. Upon consummation of the proposed transaction, Crestar would remain the second largest commercial bank in Virginia, controlling approximately

^{1.} Section 5(d)(3) of the FDI Act requires the Board to review any proposed merger between a bank owned by a bank holding company and a savings association, or branch of a savings association, in which the resulting institution is insured by the Bank Insurance Fund, and in reviewing these proposals, to follow the procedures and consider the factors set forth in section 18(c) of the Bank Merger Act.

^{2.} These branches are set forth in the Appendix. Providence will close its branch in Maryland prior to consummation of the proposal.

^{3.} Banking data are as of December 31, 1992.

\$8.7 billion in deposits, representing 13.3 percent of total deposits in commercial banks in the state.

Competitive Considerations

Crestar competes directly with VFSB in the Virginia banking markets of Charlottesville, Newport News-Hampton, Richmond-Petersburg, and Staunton; and with Providence in the Washington, D.C., Ranally Metro Area ("Washington RMA"). Consummation of this proposal would not exceed the Department of Justice Merger Guidelines⁴ as applied to depository institutions⁵ in any of these banking markets. Based on all the facts of record, including the relatively small increase in the market concentration and market share,⁶ the Board concludes that consummation of this proposal would not have a significantly adverse effect on competition or the concentration of banking resources in the Virginia and Washington RMA banking markets or any other relevant banking market.

Convenience and Needs Considerations

In analyzing the convenience and needs factor, the Board has carefully considered comments submitted by Hamler Development Co., Inc., Concord, Virginia ("Protestant"). Protestant alleges generally that Bank discriminates against blacks in its lending activities,7 and in particular, practices illegal discrimination against minorities and low-income individuals in a lending program that includes participating financial institutions and the City of Lynchburg and is sponsored by the United States Department of Housing and Urban Development ("HUD").8 In assessing the impact of this proposal on the convenience and needs of the communities to be served, the Board has considered Protestant's comments in light of Crestar's record of performance under the Community Reinvestment Act (12 U.S.C. § 2901 et seq.) ("CRA").

Initially, the Board notes that all of Crestar's subsidiary banks received "outstanding" or "satisfactory" ratings from their primary regulators in their most recent examinations for CRA performance. In particular, Bank received an "outstanding" rating for CRA performance from the Federal Reserve Bank of Richmond in May 1993.9 As part of this 1993 examination, examiners reviewed denied and approved loan files and conducted interviews with 27 loan officers to ascertain compliance with regulatory requirements when collecting information from loan applicants. Examiners found no evidence of illegal discrimination or illegal credit practices at Bank.10

The Board also has previously reviewed Protestant's allegations of illegal discriminatory practices relating to the administration of the HUD-sponsored Community Development Block Grant program in connection with applications filed by Crestar and Central Fidelity Bank and, for the reasons more fully stated in those orders, concluded that these allegations did not warrant denial under the convenience and needs factor. 11 Subsequent to the Board's action on those applications, HUD completed its investigation

^{4.} Under the revised Department of Justice Merger Guidelines, 49 Federal Register 26,823 (June 29, 1984), a market in which the post-merger HHI is above 1800 is considered to be highly concentrated. In such markets, the Justice Department is likely to challenge a merger that increases the HHI by more than 50 points. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by more than 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anticompetitive effects implicitly recognize the competitive effect of limited-purpose lenders and other non-depository financial entities.

^{5.} In this context, depository institutions include commercial banks, savings banks, and savings associations. Market share data before consummation are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board previously has indicated that thrift institutions have become, or have the potential to become significant competitors of commercial banks. See WM Bancorp, 76 Federal Reserve Bulletin 788 (1990); National City Corporation, 70 Federal Reserve Bulletin 743 (1984). Because the deposits of Providence and VFSB would be transferred to a commercial bank under this proposal, those deposits are included at 100 percent in the calculation of pro forma market share. See Norwest Corporation, 78 Federal Reserve Bulletin 452 (1992); First Banks, Inc., 76 Federal Reserve Bulletin 669 (1990).

^{6.} Market data are as of June 30, 1992. Consummation of this proposal would result in the following structural changes as measured by the HHI and increases in Crestar's share of total deposits in depository institutions in these banking markets ("market share"): Charlottesville (HHI unchanged at 1989 points and 14.2 percent market share); Newport News-Hampton (HHI increase by 48 points to 1250 and 24.5 percent market share); Richmond-Petersburg (HHI increase by 75 points to 1666 and 22.5 percent market share); Staunton (HHI increase by 55 points to 1796 and 17.1 percent market share); and Washington RMA (HHI increase by 6 points to 949 and 9.4 percent market share).

^{7.} Protestant believes that Bank's denial of a recent loan request by Protestant's principal on financial considerations evidences Bank's illegal discriminatory lending policies. The Board has considered this allegation in its review of these applications.

^{8.} Protestant also alleges that Crestar and other financial institutions have illegally excluded the principal of Protestant from participation in the loan program in retaliation for complaints about the administration of the program.

^{9.} The Statement of the Federal Financial Supervisory Agencies Regarding the Community Reinvestment Act provides that a CRA examination is an important and often controlling factor in the consideration of an institution's CRA record, and that these reports will be given great weight in the applications process. 54 Federal Register 13,742, 13,745 (1989).

^{10.} Examiners noted two isolated incidences of noncompliance with consumer credit laws. In one case, Bank failed to notify a consumer of adverse action on a loan and this error was corrected during the examination. The other case involved failure to retain a record as required under the Board's Regulation B. Examiners determined that Bank's compliance policies were sufficient to prevent similar violations in the future.

^{11.} Crestar Bank, 76 Federal Reserve Bulletin 879 (1990); Central Fidelity Bank, 77 Federal Reserve Bulletin 675 (1991).

of Protestant's allegations in November 1991. In a formal written determination of compliance, HUD concluded that the denial of a funding request by the principal of Protestant as well as the administration of the loan program was in compliance with the Housing and Community Development Act of 1974.

In light of the foregoing and other facts of record, the Board does not believe that Protestant's comments warrant denial of these applications. 12 In this regard. the Board concludes on the basis of all the facts of record that considerations relating to the convenience and needs of the communities to be served, including Crestar's record of performance under the CRA, are consistent with approval.

Other Considerations

The Board has determined that the operation of a savings association by a bank holding company is closely related to banking for purposes of section 4(c)(8) of the BHC Act. 12 C.F.R. 225.25(b)(9). Crestar has committed to operate Providence in accordance with the Board's regulations and the record does not indicate that consummation of this proposal is likely to result in any significantly adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices that are not likely to be outweighed by the public benefits of this proposal. Accordingly, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the BHC Act is favorable and consistent with approval of the application.

The Board also concludes that the financial and managerial resources and future prospects of Crestar, Providence, and VFSB are consistent with approval of this application. In addition, the Board also has considered the specific factors it must review under section 5(d)(3) of the FDI Act, and the record in this case shows that:

(1) The transaction will not result in the transfer of any federally insured depository institution's federal deposit insurance from one federal deposit insurance fund to the other:

(2) Crestar and Bank currently meet, and upon consummation of the proposed transaction will continue to meet, all applicable capital standards; and (3) The proposed transaction would comply with the interstate provisions of the BHC Act if Providence and VFSB were state banks that Crestar was applying to acquire directly. See 12 U.S.C. § 1815(d)(3).

The Board has also reviewed the factors it is required to consider in applications for the establishment and operation of branches under the Federal Reserve Act and finds these factors to be consistent with approval.

Based on the foregoing and all the facts of record, the Board has determined that these applications should be, and hereby are, approved. The Board's approval of these applications is conditioned upon compliance by Crestar and Bank with the commitments made in connection with these applications. For purposes of this action, the commitments and conditions relied on in reaching this decision are both conditions imposed in writing by the Board and, as such, may be enforced in proceedings under applicable law.

The acquisitions by Bank may not be consummated before the thirtieth calendar day following the effective date of this Order, and this proposal may not be consummated later than three months after the effective date of this order, unless such period is extended by the Board or by the Federal Reserve Bank of Richmond, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 22, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins and Governors Kelley, Lindsey, and Phillips. Absent and not voting: Governors Angell and LaWare.

^{12.} Protestant has characterized Bank's participation in one community development program as a pretense. The Board notes that Bank's 1993 CRA examination concluded that the bank supports the development or implementation of specific projects promoting community revitalization consistent with its size, financial condition and local conditions. This examination also identifies a number of programs and activities as demonstrating Bank's involvement and commitment to local community organizations aside from the program mentioned by Protestant.

The Dai-Ichi Kangyo Bank, Limited Tokyo, Japan

Order Approving Application to Engage in Certain Nonbanking Activities

The Dai-Ichi Kangyo Bank, Limited, Tokyo, Japan ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied for the Board's approval under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23(a) of the Board's Regulation Y (12 C.F.R. 225.23(a)) to engage de novo. through its wholly owned subsidiary, DKB Securities Corporation, New York, New York ("Company"), in the purchase and sale for its own account of certain options and options on futures contracts with respect to certain bank-eligible securities and money market instruments, for purposes other than hedging.1 Company proposes to conduct these activities on a worldwide basis.

Notice of the application, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 52,760 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 4(c)(8) of the BHC Act.

Applicant, with total consolidated assets of approximately \$484.1 billion, is the largest banking organization in the world.² In the United States, Applicant owns a state nonmember bank based in Los Angeles, California; operates branches in New York, New York and Chicago, Illinois; and maintains agencies in Los Angeles, California, San Francisco, California, and Atlanta, Georgia, as well as a loan production office in Houston, Texas. In addition to these banking operations. Applicant owns several nonbanking subsidiaries in the United States, including Company.3

Company is, and will continue to be, a broker-dealer registered with the Securities and Exchange Commission ("SEC") and a member of the National Association of Securities Dealers, Inc. ("NASD"). Accordingly, Company is subject to the record-keeping, reporting, fiduciary standards, and other requirements of the Securities Exchange Act of 1934 (15 U.S.C. § 78a et seq.), the SEC, and the NASD. Company currently engages in a variety of securities-related activities.4

^{1.} In particular, Company proposes to trade the derivative instruments listed in Appendix A to this order. Company would hedge its positions in these instruments by trading in the contracts listed in Appendix B.

^{2.} Asset and ranking data are as of March 31, 1993, and employ exchange rates then in effect.

^{3.} These nonbanking subsidiaries include, in addition to Company: (1) DKB Financial Products, Inc., New York, New York, which is engaged primarily in lending, leasing, financial advisory, loan marketing, and swap and swap derivative products activities, pursuant to section 4(c)(8) of the BHC Act and sections 225.25(b)(1), (b)(4), and (b)(5) of Regulation Y;

⁽²⁾ DKB Financial Futures Corp., Chicago, Illinois ("DKB Futures"), which is engaged primarily in futures commission merchant activities, pursuant to section 4(c)(8) of the BHC Act and section 225.25(b)(18) of Regulation Y; and

⁽³⁾ The CIT Group Holdings, Inc., New York, New York, which is engaged primarily in financing and leasing activities, pursuant to section 4(c)(8) of the BHC Act and sections 225.25(b)(1) and (b)(5) of Regulation Y. See The Dai-Ichi Kangyo Bank, Limited, 77 Federal Reserve Bulletin 670 (1991); The Dai-Ichi Kangyo Bank, Limited, 76 Federal Reserve Bulletin 975 (1990); The Dai-Ichi Kangyo Bank, Limited, 76 Federal Reserve Bulletin 75 (1990).

^{4.} The activities that Company currently has authority to conduct include:

⁽¹⁾ Underwriting and dealing in, to a limited extent, certain municipal revenue bonds, 1-4 family mortgage-backed securities, commercial paper, and consumer receivable-related securities:

⁽²⁾ Underwriting and dealing in securities that state member banks are authorized to underwrite and deal in under sections 5(c) and 16 of the Glass-Steagall Act (12 U.S.C. §§ 335 and 24(7)), pursuant to section 225.25(b)(16) of Regulation Y (12 C.F.R. 225.25(b)(16));

⁽³⁾ Providing securities brokerage and investment advisory services, on both a separate and combined basis, pursuant to sections 225.25(b)(4) and (b)(15) of Regulation Y (12 C.F.R. 225.25(b)(4) and (b)(15));

⁽⁴⁾ Acting as agent in the private placement of all types of securities, and providing related advisory services;

⁽⁵⁾ Buying and selling all types of securities on customer order as a "riskless principal"; and

⁽⁶⁾ Providing various types of financial and transaction advice to financial and nonfinancial institutions.

See The Dai-Ichi Kangyo Bank, Limited, 77 Federal Reserve Bulletin 184 (1991). In connection with its securities dealing business, Company also trades in futures, options, and options on futures on securities for hedging purposes.

Closely Related to Banking Analysis

The Board previously has determined by order that purchasing and selling exchange-traded and over-the-counter derivative instruments based on bank-eligible securities and certain money market instruments, for purposes other than hedging, is closely related to banking. See Swiss Bank Corporation, 77 Federal Reserve Bulletin 759 (1991) ("Swiss Bank"). In this case, as in Swiss Bank, the securities on which the proposed instruments would be based are eligible to be underwritten and dealt in by national banks and state-chartered banks that are members of the Federal Reserve System. 6

Proper Incident to Banking Analysis

In order to approve the proposal, the Board must determine that the proposed activities to be conducted by Company "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. § 1843(c)(8).

Applicant and Company have substantial experience in trading bank-eligible securities and related derivative products. Company currently engages in a significant volume of dealing in U.S. government securities for its own account, and has broad experience in trading and monitoring bank-eligible securities positions. Company has gained substantial experience in trading derivative products based on bank-eligible securities through its use of such instruments to reduce risks arising from its cash positions in U.S. government securities and money market instruments. Moreover, Applicant has extensive, worldwide experience in trading futures, options, and options on futures contracts with respect to U.S. and Japanese government securities and money market instruments.

The Board has carefully reviewed the operational, accounting, and risk management policies and systems proposed to be implemented by Company in conducting and monitoring the proposed activities. These policies and systems are currently in place and have been used in connection with Company's existing

securities dealing business and related derivatives activities, and should assist in minimizing the likelihood of significant losses that could result from the activities that are the subject of this application.

For example, Company has instituted internal controls to restrict the credit risk, market risk, and operations risk associated with futures and options trading. Company's board of directors has established a credit committee that determines counterparty credit exposure limits. These credit risk limits are reviewed periodically by the credit committee and board of directors, and by Applicant's Credit Supervision Division in Tokyo. Broker selection procedures also are established by the board of directors. Business cannot begin with a new broker without the prior approval of the credit committee, which reviews a potential broker's capital adequacy, general financial condition, management, and other matters, and sets and periodically reviews dealing limits for each broker to minimize settlement risk. Applicant's Credit Supervision Division reviews all brokers selected by Company.

Market risk is controlled by imposing limits on Company's gross long and short positions for each contract, and on gross and net positions (on a riskadjusted basis) for the portfolio as a whole. In addition, trading limits restrict each trader's authority to open or close a position. These position and trading limits are approved by Company's board of directors and set forth in Company's Internal Rules for Trading. Company's board of directors has established "loss cut" rules, which apply to Company's trading activities as a whole. These rules, which are substantially equivalent to stop loss limitations, are triggered whenever position losses reach specified limits, and require that positions be liquidated or reduced to prevent the accumulation of substantial losses in the portfolio. Company has established both daily and monthly loss cut rules. The Board also notes that Company would use the instruments listed in Appendix B to hedge the market risk resulting from the proposed activities.

Operations risk, similarly, is mitigated by comprehensive review and monitoring procedures, including independent verification of trade data and compliance with trading limits, as well as the hiring of experienced operations staff and the implementation of detailed recordkeeping procedures and systems. Monitoring and enforcement of Company's risk management policies and procedures is facilitated by sophisticated computer systems that report all positions and approximate profit and loss figures, as well as information regarding compliance with credit, position, trading, and loss cut limits, on a real-time basis.

Senior management and internal auditing personnel will be closely involved with the conduct of the proposed derivatives trading activities. As noted pre-

^{5.} The Board also has indicated that trading in such derivative instruments for risk-reduction purposes is a permissible activity for bank holding companies and their subsidiaries. See 12 C.F.R. 225.142.

^{6.} See 12 U.S.C. § 24(7) and 335. The instruments proposed to be traded by Company for purposes other than hedging, and the exchanges and markets on which these activities would be conducted, are identical to those approved in Swiss Bank.

viously, the credit committee and board of directors, as well as other members of senior management, play a central role in establishing the parameters of the trading operation, including with respect to setting credit, position, and trading limits and loss cut rules, and the selection and approval of brokers and counterparties. In addition, Company's chief trader will oversee directly all of the proposed trading activities, and will review all positions on a daily basis with senior management. Company's computer systems will generate daily reports of futures and options positions for approval by senior management and Company's chief compliance officer. The operations staff will independently monitor all futures and options transactions and counterparty exposure.

The Board also notes that Company intends to engage in the proposed activities for a limited range of purposes, and does not propose to trade in derivative products trading for speculative purposes. The size of the proposed derivatives trading operation appears reasonable in relation to Company's government securities business. As a registered broker-dealer, Company will be required to comply with the SEC's net capital rule. The Board has relied upon the fact that Company's proposed loss cut limits and procedures should help to ensure that any losses that might result from the proposed activities are small in relation to the total capital of Company and of Applicant.

The Board also expects that Company's engaging in the proposed activities *de novo* would enhance market competition and provide greater convenience to Company's customers. Applicant also maintains that consummation of the proposal would increase market liquidity and enable Company to operate more efficiently in its government securities business.

On the basis of the foregoing and all the other facts of record, the Board has concluded that the balance of public interest factors it is required to consider under section 4(c)(8) of the BHC Act is favorable, and therefore that the proposed derivatives trading activities constitute a proper incident to banking within the meaning of the BHC Act. In making this determination, the Board has considered the financial and managerial resources of Applicant and its subsidiaries, including Company, and the effect of this proposal upon such resources, and has concluded that these factors are consistent with approval of this application. 10 In this regard, the Board has noted that Applicant's capital ratios satisfy applicable risk-based standards established under the Basle Accord, and are considered equivalent to the capital levels that would be required of a U.S. banking organization. The Board specifically has considered the size of the investment expected to be required by this proposal, and the projected volume of Company's proposed derivatives trading activities, in relation to Applicant's consolidated capital.

Based on all the facts of record, including all the representations and commitments made by Applicant in this case, the Board has determined that the application should be, and hereby is, approved. The Board's approval is specifically conditioned on compliance with all of the commitments made in connection with this application and with the conditions referred to in this order. The Board's determination also is subject to all of the conditions set forth in Regulation Y, including those in sections 225.4(d) and 225.23(b) of Regulation Y, and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to ensure compliance with, and to prevent evasion of, the provisions of the BHC Act and the Board's regulations and orders issued thereunder. For purposes of this action, these commitments and conditions are deemed to be conditions imposed in writing by the Board in connection with its findings and decision, and, as such, may be enforced in proceedings under applicable law.

This transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of San Francisco, acting pursuant to delegated authority.

^{7.} Applicant has indicated that the proposed trading activities will be integrated with Company's government securities trading operation, and will not function as an independent unit seeking separate profits solely from the options and futures markets. Applicant also has committed that Company will not act as a specialist or market-maker with respect to these instruments.

^{8.} See 15 C.F.R. 240.15c3-1.

^{9.} Applicant engages in the United States in futures commission merchant activities and related advisory services with respect to certain of the instruments proposed to be traded by Company. In order to minimize any potential conflicts of interests that could result from the related activities of Company and DKB Futures, Applicant has committed that DKB Futures will disclose to its customers its affiliate relationship with Company, and the fact that Company trades futures, options, and options on futures contracts for its own account. This disclosure will occur both at the beginning of the customer relationship and upon confirmation of any order. In addition, Applicant has committed that DKB Futures will not share non-public customer information with Company without the express written consent of the customer, and that in any case in which DKB Futures knowingly executes a transaction to which Company is a party, it will make prior disclosure of that fact to its customer and obtain the customer's prior consent to the arrangement. These commitments are similar to commitments relied upon by the Board in similar previous cases. See, e.g., The Long-Term Credit Bank of Japan, Limited, 79 Federal Reserve Bulletin 347, 348 n.13, n.14 (1993); The Sanwa Bank, Limited, 77 Federal Reserve Bulletin 64, 67 n.12 (1991); The Hongkong and Shanghai Banking Corporation, et al., 76 Federal Reserve Bulletin 770, 771 n.9, 772 n.10 (1990).

^{10.} See 12 C.F.R. 225.24. See also The Fuji Bank, Limited, 75 Federal Reserve Bulletin 94 (1989); Bayerische Vereinsbank AG, 73 Federal Reserve Bulletin 155 (1987).

By order of the Board of Governors, effective December 13, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

J.P. Morgan & Co. Incorporated New York, New York

Order Approving an Application to Engage in Futures Commission Merchant Activities

J.P. Morgan & Co. Incorporated ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)), and section 225.23 of the Board's Regulation Y (12 C.F.R. 225.23), to provide futures commission merchant ("FCM") execution, clearance, and advisory services to unaffiliated customers with respect to futures and options on futures on non-financial commodities.1 Neither JPMFI nor JPMSI would

Applicant must provide at least 20 days prior written notice to the Federal Reserve System before:

^{1.} Applicant proposes to conduct these FCM activities through two wholly owned subsidiaries, J.P. Morgan Futures, Inc. ("JPMFI"), and J.P. Morgan Securities, Inc. ("JPMSI"), both located in New York, New York, and would conduct the proposed activities on the New York Mercantile Exchange ("NYMEX"), and the Singapore International Monetary Exchange Limited ("SIMEX"). Applicant proposes initially to broker futures and options on futures on fuel oil, gas oil, crude oil, heating oil, gasoline, propane, and natural gas. A complete list of the proposed contracts is set forth in the Appendix.

trade in the proposed derivative instruments for their own accounts for any purpose, or would trade in the physical commodities themselves, except when necessary to assist in the orderly resolution of an account.2 JPMFI and JPMSI would provide the proposed FCM services only to institutional customers and natural persons whose individual net worth (or joint net worth

(i) Engaging in FCM activities with respect to additional exchange-traded derivative contracts on agricultural, energy, or non-precious metal commodities (unless the Board has approved the contracts for any other bank holding company under the BHC Act) to assure that such contracts are comparable to previously approved contracts: or

(ii) Becoming a clearing or non-clearing member of any commodities exchange that previously has been reviewed and approved by the Board under the BHC Act.

Applicant must obtain Board approval before becoming a clearing or non-clearing member of any commodities exchange that has not been reviewed and approved by the Board under the BHC Act. JPMFI and JPMSI may each conduct FCM activities through omnibus trading accounts established in their own names with clearing members of exchanges on which JPMFI or JPMSI would not themselves be clearing members. 79 Federal Reserve Bulletin 723, 724 (1993) ("Northern Trust"). Applicant has committed that, with respect to their omnibus account customers, JPMFI and JPMSI will employ the same credit approval and risk management procedures developed for their respective executing and clearing activities.

Applicant also proposes to provide execution-only and clearingonly services to customers pursuant to customer agreements and 'give-up agreements' that would afford the clearing FCM the right to refuse to clear customer trades that the clearing FCM reasonably deems unsuitable in light of market conditions or a customer's financial situation or objectives. These activities have been approved by the Board. See Northern Trust; The Sakura Bank, Limited, 79 Federal Reserve Bulletin 728 (1993) ("Sakura"). JPMFI and JPMSI would each conduct its proposed execution-only and clearing-only activities in a manner largely consistent with Northern Trust and Sakura. In this regard, Applicant has committed that neither JPMFI nor JPMSI will serve as the primary or qualifying clearing firm for any unaffiliated parties.

Applicant's proposal, however, differs from the proposals approved in Northern Trust and Sakura in some respects. JPMFI and JPMSI will not subject their execution-only customers to the same formal credit review procedures to which their execution-and-clearing and clearing-only customers are subject, in view of the reduced credit exposures and levels of risk that Applicant believes are involved in execution-only activities compared to execution-and-clearing activities and clearing-only activities. Neither JPMFI nor JPMSI would accept a client as an execution-only customer unless the company's senior management is satisfied that the acceptance of the client as an execution-only customer would not subject the company to unacceptable levels of credit risk based on:

- (i) The market reputation of the client (or its advisor), or the senior management's general knowledge of the creditworthiness of the client; and
- (ii) The market reputation of the client's give-up clearing firm. The FCMs that would execute customer trades that JPMFI or JPMSI would clear pursuant to give-up agreements would not necessarily be independent from the customer.
- 2. In those circumstances when a customer defaults on a contract after the contract expires and JPMFI or JPMSI is required to make or take delivery of the underlying commodity, or where JPMFI or JPMSI exercises its rights to liquidate a customer's account, the company is permitted to take those actions necessary to mitigate its damages, including acting for its own account in retendering or redelivering the commodity, entering into an exchange-for-physical transaction, or entering into an offsetting transaction in the cash market, provided these or other appropriate actions are taken as soon as commercially practicable.

with spouse) exceeds \$1 million.3 Neither JPMFI nor JPMSI would provide such services to retail brokerage customers or locals. However, JPMFI and JPMSI proposes to provide FCM execution, clearance, and advisory services for non-financial commodity derivatives to market makers.4

Notice of the application, affording interested persons an opportunity to submit comments on the proposal, has been published (58 Federal Register 34,054, 51,349 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Applicant, with total consolidated assets of \$129.3 billion, is the fifth largest commercial banking organization in the United States, and engages directly and through subsidiaries in a broad range of permissible nonbanking activities.⁵ JPMFI⁶ and JPMSI⁷ are both FCMs registered with the CFTC, are both members of the NFA, and are, therefore, both subject to the recordkeeping, reporting, fiduciary standards, and other requirements of the Commodity Exchange Act (7 U.S.C. § 1 et seq.), the CFTC, and the NFA.8 In

- 3. Applicant anticipates that, following consummation of the proposal, a relatively small percentage of JPMFI's and JPMSI's respective businesses would be conducted on behalf of managed commodity funds (or commodity pools), which are regulated and supervised by the Commodity Futures Trading Commission ("CFTC") and the National Futures Association ("NFA"). None of JPMFI's or JPMSI's managed commodity fund customers would be owned or sponsored by, or otherwise affiliated with, Applicant. Applicant, JPMFI, and JPMSI will not act as a commodity pool operator without prior Board approval. However, JPMFI and JPMSI may provide FCM investment advisory services to commodity pools. Both JPMFI and JPMSI will apply their credit approval procedures to their respective managed commodity fund customers. Applicant has committed to provide the Federal Reserve System with prior notice of any material change in the characteristics of JPMFI's or JPMSI's customer base.
- 4. Applicant states that certain of its customers may become market makers in new financial contracts in order to facilitate the introduction of the contracts, or to assist in the ongoing trading of the contracts.
 - 5. Data are as of September 30, 1993.
- 6. JPMFI, formerly Morgan Futures Corporation, is a clearing member of the NYMEX, the SIMEX, the Commodity Exchange, Inc., the Chicago Board of Trade, and the Chicago Mercantile Exchange ("CME"), and is currently engaged in executing and clearing on major commodities exchanges futures and options on futures on financial commodities and certain broad-based and widely traded stock and bond indices. See J.P. Morgan & Co. Incorporated, 71 Federal Reserve Bulletin 251 (1985); J.P. Morgan & Co. Incorporated, 70 Federal Reserve Bulletin 780 (1984); J.P. Morgan & Co. Incorporated, 69 Federal Reserve Bulletin 733 (1983); J.P. Morgan & Co. Incorporated, 68 Federal Reserve Bulletin 514 (1982).
- 7. JPMSI is currently engaged in limited bank-ineligible securities underwriting and dealing activities permissible under section 20 of the Glass-Steagall Act (12 U.S.C. § 377). See J.P. Morgan & Co. Incorporated, et al., 75 Federal Reserve Bulletin 192 (1989), aff'd sub nom. Securities Industries Ass'n v. Board of Governors of the Federal Reserve System, 900 F.2d 360 (D.C. Cir. 1990).
- 8. JPMSI is a member of the New York Stock Exchange Inc., the American Stock Exchange Inc., and the Chicago Stock Exchange. In connection with this proposal, Applicant intends to transfer to JPMSI all of JPMFI's FCM activities except for JPMFI's clearing activities

addition, JPMSI is, and will continue to be, a broker-dealer registered with the Securities and Exchange Commission ("SEC"), and a member of the National Association of Securities Dealers, Inc. ("NASD"). Accordingly, JPMSI is subject to the recordkeeping, reporting, fiduciary standards, and other requirements of the Securities Exchange Act of 1934 (15 U.S.C. § 78a et seq.), the SEC, and the NASD.

FCM Activities

The Board has determined that executing and clearing futures and options on futures on non-financial commodities are activities closely related to banking for purposes of the BHC Act, and thus activities permissible for bank holding companies.9 The Board also has permitted bank holding companies to provide, on a stand-alone basis, investment advice with respect to trading futures and options on futures on non-financial commodities. 10 Moreover, the Board has allowed bank holding companies to provide a combination of execution and clearing services and investment advisory services in connection with executing and clearing exchange-traded derivatives of financial commodities (e.g., futures and options on futures on foreign exchange, bullion, government securities, and money market instruments).11 Based on all the facts of record, the Board has determined that the proposed activities, including providing a combination of advisory services regarding nonfinancial commodity derivatives and acting as an FCM in the execution and clearance of these derivatives, are closely related to banking within the meaning of section 4 of the BHC Act.

on the SIMEX and the CME. After the transfer, JPMSI would offer its U.S. clients direct access to the overseas trading desks of Edge Act subsidiaries of Morgan Guaranty Trust Company of New York ("Morgan Guaranty"). Employees of these Edge Act subsidiaries would act as agent for JPMSI in selling derivative instruments, and would become employees of JPMSI for the limited purpose of permitting these employees to become registered with the Commodity Futures Trading Commission in connection with this activity. These employees would not sell securities in the U.S., and JPMSI would not sponsor the employees to be licensed to sell securities in the U.S.

JPMSI also will utilize the GLOBEX trading system, an after-hours international multi-exchange derivatives trading system. Because JPMSI will not operate a 24-hour sales desk in the U.S., JPMSI will pass its book of client GLOBEX orders to a London Edge Act subsidiary of Morgan Guaranty, which will execute the GLOBEX orders of JPMSI's U.S. customers.

Financial Factors, Managerial Resources, and Other Considerations

In order to approve this application, the Board must determine that the performance of the proposed activities by Applicant can reasonably be expected to produce public benefits that would outweigh possible adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act. In this regard, in every case under section 4 of the BHC Act, the Board must consider the financial condition and resources of the applicant and its subsidiaries and the effect of the proposal on these resources. Based on the facts of this case, the Board concludes that the financial considerations are consistent with approval of this application. The managerial resources of Applicant also are consistent with approval.

The Board expects that the de novo entry of Applicant into the market for the proposed services in the United States would provide added convenience to Applicant's customers, and would increase the level of competition among existing providers of these services. To address the potential adverse effects of the proposed activities, Applicant has committed to conduct the proposed activities subject to the same rules and procedures imposed by the Board on FCM activities in derivatives of financial commodities. 13 In addition, in order to minimize risks associated with the delivery of non-financial commodities, Applicant has committed to take a number of steps in the event one of Company's customers has an open position in a contract after the contract has expired, and the customer is unable or unwilling to make or take delivery.14

Based on the commitments made by Applicant regarding its conduct of the proposed activities, the limitations on the activities noted in this order, and all the facts of record, the Board has determined that the performance of the proposed activities by Applicant could reasonably be expected to produce public benefits that would outweigh the possible adverse effects

^{11.} See, e.g., Citicorp, 68 Federal Reserve Bulletin 776 (1982).

^{12. 12} C.F.R. 225.24; The Fuji Bank, Limited, 75 Federal Reserve Bulletin 94 (1989); Bayerische Vereinsbank AG, 73 Federal Reserve Bulletin 155 (1987).

^{13.} See 12 C.F.R. 225.25(b)(18). Applicant also has committed that Company will not enter into any impermissible tying arrangements with any lending affiliates, and that all customer trading positions of JPMFI and JPMSI will be marked to market at least daily.

^{14.} Among the steps Applicant will take are:

⁽¹⁾ retendering the commodity;

⁽²⁾ offsetting the customer's open position through an exchange-forphysical transaction;

⁽³⁾ offsetting the commodity in the cash market; and

⁽⁴⁾ seeking to avoid delivery through some other mechanism. See Bank of Montreal, 79 Federal Reserve Bulletin 1049, 1052 n.21 (1993)

under the proper incident to banking standard of section 4(c)(8) of the BHC Act.

Based on the foregoing and all the facts of record, the Board has determined to, and hereby does, approve the application subject to all the terms and conditions set forth in this order, and in the above noted Board regulations and orders that relate to these activities. 15 The Board's determination is also subject to all of the terms and conditions set forth in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b), and to the Board's authority to require modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with. and to prevent evasion of, the provisions of the BHC Act, and the Board's regulations and orders issued thereunder. The Board's decision is specifically conditioned on compliance with all of the commitments made in this application, including the commitments discussed in this order and the conditions set forth in this order and in the above-noted Board regulations and orders. These commitments and conditions shall be deemed to be conditions imposed in writing by the Board in connection with its findings and decisions, and may be enforced in proceedings under applicable law.

This transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors, effective December 23, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Kelley, Lindsey, and Phillips. Absent and not voting: Governors Angell and LaWare.

NationsBank Corporation Charlotte, North Carolina

Order Approving Application to Engage in Certain Nonbanking Activities

NationsBank Corporation, Charlotte, North Carolina ("NationsBank"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23(a) of the Board's Regulation Y (12 C.F.R. 225.23(a)), through its wholly owned subsidiary, Nations Financial Capital Corporation, Stamford, Connecticut ("Company"), to acquire substantially all the assets and assume certain of the liabilities of US WEST Financial Services, Inc., Stamford, Connecticut ("Financial Services"), and to engage in the following nonbanking activities:

- (1) Making, acquiring, and servicing loans and other extensions of credit, pursuant to section 225.25(b)(1) of Regulation Y:1
- (2) Leasing personal and real property, pursuant to sections 225.25(b)(5)(i) and (ii) of Regulation Y; and (3) Credit-related insurancé activities, pursuant to sections 225.25(b)(8)(i) and (ii) of Regulation Y.

NationsBank proposes to conduct these activities throughout the United States.

Notice of the application, affording interested persons an opportunity to submit comments on the pro-

^{15.} The Board also considered Applicant's request for prior approval for certain foreign subsidiaries of Morgan Guaranty to market the securities and underwriting services of JPMSI overseas. The Board has approved this request by a separate letter.

^{1.} In particular, NationsBank proposes that Company continue to engage in the following lines of business currently conducted by Financial Services: corporate finance; commercial real estate finance; special industries finance; mortgage investments; consumer finance; project finance; and portfolio management. In connection with these activities, Financial Services also purchases and holds for investment purposes various corporate debt and mortgage-backed securities. NationsBank has stated that Company will not engage in any underwriting, dealing, brokerage, private placement, "riskless principal" or similar activities with respect to such corporate and mortgagebacked securities.

posal, has been published (58 Federal Register 47,457 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 4(c)(8) of the BHC Act.

NationsBank, with total consolidated assets of \$158 billion, is the third largest commercial banking organization in the United States, and operates bank subsidiaries in North Carolina, Texas, Georgia, Virginia, Maryland, the District of Columbia, Tennessee, Kentucky, Florida, South Carolina, and Delaware. NationsBank engages through its subsidiaries in a broad range of banking and permissible nonbanking activities. Company is a newly established corporation formed for the purpose of this transaction.

The Board has previously determined by regulation that, subject to the limitations established by Regulation Y, Company's proposed credit, leasing, and insurance activities are closely related to banking within the meaning of the BHC Act, and therefore permissible for bank holding companies.⁴ NationsBank has committed that these proposed activities will be conducted in conformity with the limitations established by Regulation Y.⁵ Accordingly, the Board has concluded that these proposed activities are closely related to banking.⁶

In every case involving a nonbanking acquisition by a bank holding company under section 4 of the BHC Act, the Board considers the financial condition and

2. Asset data are as of October 1, 1993.

resources of the applicant and its subsidiaries and the effect of the transaction on those resources. Based on all the facts of record, the Board has concluded that financial and managerial considerations are consistent with approval of this proposal.

In order to approve this application, the Board also must determine that the performance of the proposed activities by Company can reasonably be expected to produce public benefits that would outweigh possible adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act. In this regard, the Board expects that Company's conduct of the proposed activities would provide added convenience and services to NationsBank's customers. NationsBank also maintains that consummation of the proposal would preserve the level of competition among existing providers of these services, and would increase the availability of credit, in markets currently served by Financial Services. Moreover, consummation of this proposal is not likely to result in any significant adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. Accordingly, the Board has concluded that the performance of the proposed activities by Company can reasonably be expected to produce public benefits that would outweigh possible adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act.

On the basis of the foregoing and all the facts of record, including the commitments furnished by NationsBank, the Board has determined that the application should be, and hereby is, approved. The Board's approval is specifically conditioned upon compliance with the commitments made in connection with this application and with the conditions referred to in this order. The Board's determination also is subject to all the terms and conditions set forth in Regulation Y, including those in sections 225.4(d) and 225.23(b) of Regulation Y, and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to ensure compliance with, and to prevent evasion of, the provisions of the BHC Act and the Board's regulations and orders issued thereunder. For purposes of this action, these commitments and conditions are deemed to be conditions imposed in writing by the Board in connection with its findings and decision, and, as such, may be enforced in proceedings under applicable law.

Company currently has no assets or operations, and is owned by NationsBank indirectly through Nations Financial Holding Corporation.

^{4.} NationsBank has proposed that Company provide substantial senior and subordinated debt financing to certain companies together with warrants exercisable for up to 24.9 percent of the borrower's voting shares. NationsBank has made a number of commitments governing these investments, including that Company would own no equity in any of these borrowers, and that the proposed subordinated debt would not be convertible into equity. Company would have no agreement to acquire the borrower, and would have no director or employee interlocks with the borrower. In general, the warrants would not be exercisable by Company without prior Board approval, and could be transferred only in a manner approved by the Board. See Policy Statement on Nonvoting Equity Investments by Bank Holding Companies (12 C.F.R. 225.143). On the basis of these and other limitations proposed by NationsBank, and all the facts of record, the Board has determined that the structure and terms of the proposed transactions appear consistent with the BHC Act.

^{5.} See 12 C.F.R. 225.25(b)(1) (making, acquiring, and servicing loans and other extensions of credit); 12 C.F.R 225.25(b)(5) (leasing of real and personal property); and 12 C.F.R. 225.25(b)(8)(i) and (ii) (certain credit-related insurance activities).

^{6.} Certain of the assets proposed to be acquired from Financial Services are not permissible for bank holding companies under section 4 of the BHC Act. In general, these impermissible assets consist of stock, or unrestricted warrants exercisable for stock, representing more than 5 percent of the voting shares of companies whose activities are not closely related to banking. NationsBank has committed that within two years following the date of this order, it will either dispose of these assets or conform their terms and amounts to those permissible for bank holding companies.

^{7.} See 12 C.F.R. 225.24. See also The Fuji Bank, Limited, 75 Federal Reserve Bulletin 94 (1989); Bayerische Vereinsbank AG, 73 Federal Reserve Bulletin 155 (1987).

This transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Richmond, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 6, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Governor Angell.

JENNIFER J. JOHNSON Associate Secretary of the Board

Societe Generale Paris, France

Order Approving an Application to Engage in Full-Service Brokerage Activities and Dealing in Government Obligations and Money Market Instruments

Societe Generale, Paris, France ("Applicant"), a foreign bank subject to the provisions of the Bank Holding Company Act ("BHC Act"), has applied for the Board's approval under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) and section 225.23 of the Board's Regulation Y (12 C.F.R. 225.23), to engage de novo, domestically and internationally, through its wholly owned indirect subsidiary, FIMAT Futures USA, Inc., Chicago, Illinois ("Company"), in the following securities-related activities:

- (1) Executing without clearing, executing and clearing, and providing investment advisory services with regard to exchange-traded derivative securities, such as foreign currency options and stock index options, that are subject to regulation by the Securities and Exchange Commission ("SEC");
- (2) Providing securities brokerage and investment advisory services, both separately and on a combined basis, with respect to:
 - (a) Obligations of the United States government and its agencies, general obligations of the various states and their political subdivisions, other exempted securities, and options thereon;
 - (b) Registered and unregistered securities issued by foreign governments that are full members of the Organization for Economic Cooperation and Development, and options thereon; and

- (c) Over-the-counter securities, such as stock index options and money market instrument options, that are subject to regulation by the SEC; and
- (3) Buying and selling on the order of investors as a "riskless principal" obligations of the United States government, general obligations of the various states and their political subdivisions, and other obligations that state member banks of the Federal Reserve System may be authorized to underwrite and deal in under 12 U.S.C. § 24 and 335 ("bankeligible securities").²

Notice of the application, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 32,135 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Applicant, with total consolidated assets equivalent to approximately \$257.3 billion, is the 19th largest bank in the world, and the fourth largest commercial banking organization in France.³ In the United States, Applicant operates branches in New York, New York, Chicago, Illinois, and Los Angeles, California; an agency in Dallas, Texas; and representative offices in Houston, Texas, and San Francisco, California. Applicant engages, both directly and through subsidiaries, in a variety of permissible nonbanking activities in the United States.

Company is a futures commission merchant registered with the Commodity Futures Trading Commission ("CFTC") and a member of the National Futures Association ("NFA"), and is, therefore, subject to the recordkeeping, reporting, fiduciary standards, and other requirements of the Commodity Exchange Act (7 U.S.C. § 1 et seq.), the CFTC, and the NFA. Company also intends to register as a broker-dealer with the Securities and Exchange Commission ("SEC"), and to seek admission to the National Association of Securities Dealers Inc. ("NASD"). Upon such registration with the SEC and admission to the NASD, Company would be subject to the recordkeeping, reporting, fiduciary standards, and other requirements of the Securities Exchange Act of 1934 (15 U.S.C. § 78a et seq.), the SEC, and the NASD.

^{1.} Company is wholly owned by FIMAT International, Paris, France, a wholly owned subsidiary of Applicant. Company also maintains an office in New York, New York.

Company's investment advisory services will be furnished primarily to financially sophisticated customers, including pension fund managers, corporate treasurers, banks, insurance companies, offshore and onshore investment companies, hedge funds, and other types of institutional money managers.

^{3.} Data are as of December 31, 1992.

The Board previously has determined, by regulation, that the proposed activities are closely related to banking under section 4(c)(8) of the BHC Act. The execution, clearance, and brokerage of securities, either on a stand-alone basis or in combination with the provision of investment advisory services, is authorized by sections 225.25(b)(4) and (15) of Regulation Y (12 C.F.R. 225.25(b)(4) and (15)). Buying and selling bank-eligible securities on the order of investors as a "riskless principal" is a permissible activity pursuant to the dealing authority of section 225.25(b)(16) of Regulation (12 C.F.R. 225.25(b)(16)). Applicant has committed that Company will engage in the proposed activities in accordance with all the conditions and limitations placed on those activities as set forth in Regulation Y.4

In order to approve this application, the Board also must determine that the performance of the proposed activities by Applicant can reasonably be expected to produce public benefits that would outweigh possible adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act. Under the framework established in Regulation Y and prior Board decisions, consummation of this proposal is not likely to result in any significant adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. The Board expects that the de novo entry of Applicant into the market for the proposed services in the United States would provide added convenience to Applicant's customers, and would increase the level of competition among existing providers of these services. Accordingly, the Board has determined that the performance of the proposed activities by Applicant could reasonably be expected to produce public benefits that would outweigh possible adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act.

On the basis of the foregoing and all the facts of record, the Board has determined to, and hereby does, approve the application subject to all the terms and conditions set forth in this order. The Board's determination is also subject to all the terms and conditions set forth in Regulation Y, including those in sections 225.4(d), 225.23(b), 225.25(b)(4), 225.25(b)(15) and 225.25(b)(16), and to the Board's authority to require modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, and to prevent evasion of, the provisions of the BHC Act, and the Board's regulations and orders issued thereunder. The Board's decision is specifically conditioned on compliance with all the commitments made in connection with this application, including the commitments discussed in this order and the conditions set forth in this order and in the above noted Board regulations and orders. These commitments and conditions shall be deemed to be conditions imposed in writing by the Board in connection with its findings and decisions, and may be enforced in proceedings under applicable law.

This transaction shall not be consummated later than three months after the effective date of this order unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of New York acting pursuant to delegated authority.

By order of the Board of Governors, effective December 16, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

> JENNIFER J. JOHNSON Associate Secretary of the Board

The Sumitomo Bank, Limited Osaka, Japan

Order Approving an Application to Engage in Foreign Exchange Advisory and Transactional Activities

The Sumitomo Bank, Limited, Osaka, Japan ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)), and section 225.23 of the Board's Regulation Y (12 C.F.R. 225.23), to engage through its wholly owned subsidiary, Sumitomo Bank Capital Markets, Inc., New York, New York ("Company"), in providing foreign exchange advisory and transactional services ("FX services") pursuant to section 225.25(b)(17) of the Board's Regulation Y (12 C.F.R. 225.25(b)(17)).1 Company currently engages in commercial lending and personal and real property leasing activities, brokers and deals in interest rate and currency swaps and swap-derivative products, and acts as a market maker in foreign currencies.

^{4.} Company does not propose to underwrite or act as a principal with respect to bank-eligible securities.

^{1.} These services are providing, by any means, general information and statistical forecasting with respect to foreign markets; advisory services designed to assist customers in monitoring, evaluating, and managing their foreign exchange exposures; and transactional services with respect to foreign exchange by arranging for "swaps" among customers with complementary foreign exchange exposures and for the execution of foreign exchange transactions.

Notice of the application, affording interested persons an opportunity to submit comments on the proposal, has been published (58 Federal Register 33,444 (1993)). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the public interest factors set forth in section 4(c)(8) of the BHC Act.

Applicant, with total consolidated assets of \$481.6 billion, is the third largest banking organization in Japan and in the world.² Applicant controls banks in California and Hawaii, and operates branches in San Francisco and Los Angeles, California; Chicago, Illinois; and New York, New York. Applicant also operates agencies in Atlanta, Georgia; and Houston, Texas. Applicant engages directly and through subsidiaries in a broad range of permissible nonbanking activities.

The Board has previously determined that FX services are closely related to banking. See 12 C.F.R. 225.25(b)(17). The Board also is required to determine that the performance of the proposed activities by Applicant "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. § 1843(c)(8).

Section 225.25(b)(17) of the Board's Regulation Y permits a bank holding company to provide FX services as long as the bank holding company conducts these activities in a separate subsidiary that does not take positions in foreign exchange. Company has already been permitted to take positions in foreign exchange, to a limited extent, in connection with its currency swap activities. In 1989, the Board permitted Company to act as a principal and broker in interest rate and currency swaps and swap-derivative products, and to provide advice to institutional customers on interest rate and currency swaps and swap derivative products.³ As part of its approved currency swap activities, Company takes positions in foreign currency, either as part of a matched swap transaction or for the purpose of hedging any unmatched positions pending a suitable match, but does not enter into unmatched or unhedged swaps or currency positions for speculative purposes. Thus, under the proposal, Company would be providing foreign exchange advisory services while having a position in foreign exchange by virtue of these swap activities.4

The Board has, in very limited circumstances, permitted the same nonbanking subsidiary simultaneously to conduct foreign exchange advisory services and to take positions for the company's own account. The Board has been concerned in these cases about the potential conflicts of interests that may arise when these activities are combined.5

Sumitomo has made a number of commitments to address the potential conflicts of interests in this proposal. In particular, Sumitomo has committed that Company will disclose to each of its FX services customers the fact that Company may take positions in foreign exchange and thus have an interest in the course of action ultimately chosen by the customer. Moreover, in any case in which Company has an interest in a specific transaction as an intermediary or principal, Company will advise its customer of that fact before recommending participation in that transaction. Further, Company will offer its FX services only to sophisticated customers who would be unlikely to place undue reliance on investment advice received, and who would be better able to detect investment advice motivated by self-interest. These commitments and limitations on the customer base are similar to those relied on by the Board in previous cases.

The Board also notes that Company's positiontaking activities in foreign exchange are limited to the circumstances required by its swap activities, and that Company does not engage in taking positions for its own account for speculative purposes. Company also will not engage in direct execution of foreign exchange transactions as part of its FX services.

Based on the foregoing and all the facts of record, the Board believes that these commitments address the potential conflicts of interests that may result from Sumitomo's proposal.

In every case under section 4 of the BHC Act, the Board also must consider the financial condition and resources of the applicant and its subsidiaries and the effect of the proposal on these resources.6 Based on the facts of this case, the Board concludes that the financial considerations are consistent with approval of this application. The managerial resources of Applicant also are consistent with approval.

^{2.} Asset and ranking data are as of March 31, 1993.

^{3.} The Sumitomo Bank, Limited, 75 Federal Reserve Bulletin 582 (1989).

^{4.} Company will itself execute foreign exchange transactions only for the positions it takes in connection with its swap activities.

^{5.} See Final Rule, 49 Federal Register 794, 816 (1984); Hongkong and Shanghai Banking Corporation, 69 Federal Reserve Bulletin 221, 223 (1983). See also The Bank of Tokyo, Ltd., 76 Federal Reserve Bulletin 654 (1990); NationsBank Corporation, 79 Federal Reserve Bulletin 892 (1993)

^{6. 12} C.F.R. 225.24; The Fuji Bank, Limited, 75 Federal Reserve Bulletin 94 (1989); Bayerische Vereinsbank AG, 73 Federal Reserve Bulletin 155 (1987).

Consummation of the proposal as a whole would provide added convenience to Applicant's and Company's customers. In addition, the Board expects that the *de novo* entry of Company into the market for the proposed services would increase the level of competition among providers of these services. Consummation of this proposal subject to the terms and conditions discussed in this order is not likely to result in any significantly adverse effects. Accordingly, the Board has determined that the performance of the proposed activities by Applicant can reasonably be expected to produce public benefits that would outweigh potential adverse effects under the proper incident to banking standard of section 4(c)(8) of the BHC Act.

Based on the foregoing and other facts of record, and subject to the commitments made by Applicant, the Board has determined that the balance of public interest factors it is required to consider under section 4(c)(8) is favorable. Accordingly, the Board has determined that the application should be, and hereby is, approved. This determination is subject to all of the terms and conditions set forth in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b), and to the Board's authority to require modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, and to prevent evasion of, the provisions of the BHC Act, and the Board's regulations and orders issued thereunder. The Board's decision is also specifically conditioned on compliance with all of the commitments made in connection with this application, including the commitments discussed in this order and the conditions set forth in this order and in the above-noted Board regulations. These commitments and conditions shall be deemed to be conditions imposed in writing by the Board in connection with its findings and decisions, and, as such, may be enforced in proceedings under applicable law.

This transaction shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of San Francisco, pursuant to delegated authority.

By order of the Board of Governors, effective December 22, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Kelley, Lindsey, and Phillips. Absent and not voting: Governors Angell and LaWare.

Jennifer J. Johnson
Associate Secretary of the Board

Orders Issued Under Sections 3 and 4 of the Bank Holding Company Act

First National Bank Shares, Ltd. Great Bend, Kansas

Order Approving Acquisition of Bank Holding Company and General Insurance Agencies

First National Bank Shares, Ltd., Great Bend, Kansas ("First National"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 3(a)(3) of the BHC Act (12 U.S.C. § 1842(a)(3)) to acquire all the voting shares of The Home State Building, Inc., Lewis, Kansas ("Home State"), and thereby indirectly acquire all the voting shares of Home State Bank, Kinsley, Kansas ("Home State Bank"). As part of this proposal, First National also has applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) to acquire Lewis Insurance Service, Inc., Lewis, Kansas ("Lewis Insurance"), and thereby to engage in general insurance agency activities in a small town that has a population not exceeding 5,000, pursuant to section 225.25(b)(8)(iii) of the Board's Regulation (12 C.F.R. 225.25(b)(8)(iii)).

Notice of the applications, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 48,067 (1993)). The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in the BHC Act.

First National operates one subsidiary bank in Kansas. The principal shareholder of First National controls another bank holding company, which operates a subsidiary bank in Missouri (collectively, the "Burcham Chain"). The Burcham Chain is the 52d largest commercial banking organization in Kansas, controlling deposits of \$84.1 million, representing less than 1 percent of total deposits in commercial banks in the state.1 Home State is the 287th largest commercial banking organization in Kansas, controlling deposits of \$15.8 million, representing less than 1 percent of total deposits in commercial banks in the state. Upon consummation of the proposed transaction, the Burcham Chain would become the 41st largest commercial banking organization in Kansas, controlling deposits of \$99.9 million, representing less than 1 percent of total deposits in commercial banks in the state.

^{1.} State deposit data are as of June 30, 1993.

The Burcham Chain and Home State do not compete in any banking market.² Based upon this and other facts of record, the Board has concluded that consummation of the proposal would not result in a significantly adverse effect on competition in any relevant banking market.

On the basis of all the facts of record, including the applicant's representations and commitments, the Board also has concluded that the financial and managerial resources and future prospects of First National, Home State, their respective subsidiary banks, and affiliated organizations in the Burcham Chain, as well as convenience and needs considerations and all other supervisory factors the Board is required to consider under section 3 of the BHC Act, also are consistent with approval of this application.

As part of this proposal, First National also has applied, under section 4(c)(8) of the BHC Act, to acquire Lewis Insurance, and thereby to engage in general insurance agency activities in a town with a population not exceeding 5,000. The Board previously has determined by regulation that the proposed insurance agency activities are closely related to banking and permissible for bank holding companies under section 4(c)(8) of the BHC Act.³ First National has committed that it will conduct these activities subject to the limitations in Regulation Y.

In order to approve the acquisition of Lewis Insurance under section 4(c)(8) of the BHC Act, the Board also must find that the performance of the proposed activities by First National "can reasonably be expected to produce benefits to the public . . . that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. § 1843(c)(8). The Board expects that continuation of the services provided by Lewis Insurance would maintain the level of competition among insurance agencies in its market and provide a convenient source of insurance agency services to the public. In addition, there is no evidence in the record that consummation of this proposal would result in any significantly adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. Accordingly, the Board has concluded that the balance of the public interest factors it is required to consider under section 4(c)(8) of the BHC Act is favorable and consistent with approval of these applications.

Based on the foregoing and other facts of record, including the representations and commitments made in this case, the Board has determined that the applications should be, and hereby are, approved. Approval is specifically conditioned upon compliance with all of the commitments made in connection with these applications and with the conditions noted in this order. The determinations with respect to First National's nonbanking activities also are subject to the conditions set forth in Regulation Y, including those in sections 225.4(d) and 225.23(b) of Regulation Y, and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to ensure compliance with, and to prevent evasion of, the provisions of the BHC Act and the Board's regulations and orders issued thereunder. The commitments and conditions relied on by the Board in reaching this decision are deemed to be conditions imposed in writing by the Board in connection with its findings and decision, and, as such, may be enforced in proceedings under applicable law.

The acquisition of Home State shall not be consummated before the thirtieth calendar day after the effective date of this order, and the proposal shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 1, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Angell, Kelley, and LaWare. Absent and not voting: Governors Lindsey and Phillips.

> JENNIFER J. JOHNSON Associate Secretary of the Board

Norwest Corporation Minneapolis, Minnesota

Order Approving Acquisition of a Bank Holding Company

Norwest Corporation, Minneapolis, Minnesota ("Norwest"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 3 of the BHC Act (12 U.S.C. § 1842) to acquire First United Bank Group, Inc.,

^{2.} Home State Bank operates in Lewis, Kansas and Kinsley, Kansas, in the Edwards County, Kansas banking market, which is approximated by Edwards County, Kansas. The Burcham Chain's bank subsidiaries operate in three banking markets, the Kansas City, Missouri-Kansas market, the Barton County, Kansas market, and the Pawnee County, Kansas market.

^{3.} See 12 C.F.R. 225.25(b)(8)(iii)(A). See also 12 U.S.C. § 1843(c)(8)(C)(i).

Albuquerque, New Mexico ("First United"), and thereby acquire First United's subsidiary bank holding companies, United New Mexico Financial Corporation, Albuquerque, New Mexico ("UNMFC"), and Ford Bank Group, Inc. ("FBG") and FBG's subsidiary, Ford Bank Group Holdings, Inc., both of Lubbock, Texas. Norwest also proposes to indirectly acquire the subsidiary banks of both UNMFC and FBG listed in the Appendix to this order.

In addition, Norwest has applied under section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)) to acquire United New Mexico Trust Company, Albuquerque, New Mexico, and thereby engage in trust company activities pursuant to section 225.25(b)(3) of the Board's Regulation Y; and United New Mexico Credit Life Insurance Company, Phoenix, Arizona, and thereby engage as principal and agent in credit life and credit accident and health insurance activities directly related to extensions of credit by Norwest and its subsidiaries pursuant to section 225.25(b)(8)(i) of the Board's Regulation Y. Two Norwest subsidiaries also propose to acquire assets from First United's subsidiary banks and engage in the following nonbanking activities:

- (1) Norwest Investment Services, Inc., to engage in providing discount brokerage in combination with investment advisory services ("full-service brokerage") together with incidental safekeeping services pursuant to section 225.25(b)(15) of the Board's Regulation Y;
- (2) Norwest Investment Services, Inc., to act as agent in the sale of variable-rate annuities pursuant to section 225.25(b)(8)(vii) of the Board's Regulation Y;² and
- (3) Norwest Mortgage, Inc., to engage in mortgage lending activities pursuant to section 225.25(b)(1) of the Board's Regulation Y.

Notice of the applications, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 52,110 (1993)). The time for filing comments has expired, and the Board has considered all comments received in light of the factors set forth in sections 3(c) and 4(c)(8) of the BHC Act.³

Norwest, with total deposits of approximately \$28.0 billion, controls 86 banking subsidiaries in 13 states, but currently does not control any banks in New Mexico or Texas.4 First United is the second largest commercial banking organization in New Mexico, controlling deposits of \$1.6 billion, representing 14.7 percent of the total deposits in commercial banks in the state. First United is the 11th largest commercial banking organization in Texas, controlling deposits of \$1.4 billion, representing less than 1 percent of the total deposits in commercial banks in the state. Upon consummation of this proposal, Norwest would become the second largest commercial banking organization in New Mexico, controlling 14.7 percent of the total deposits in commercial banks in New Mexico and the 11th largest commercial banking organization in Texas, controlling less than 1 percent of the total deposits in commercial banks in Texas.

Norwest and First United do not compete directly in any relevant banking markets. Based on all the facts of record, the Board concludes that the acquisition of First United and its subsidiary holding companies and banks by Norwest would not result in any significantly adverse effects on competition in any relevant banking market.

Douglas Amendment Analysis

Section 3(d) of the BHC Act, the Douglas Amendment, prohibits the Board from approving an application by a bank holding company to acquire control of any bank located outside of the bank holding company's home state, unless such acquisition is "specifically authorized by the statute laws of the State in which such bank is located, by language to that effect and not merely by implication." For purposes of the Douglas Amendment, the home state of Norwest is Minnesota.6

^{1.} Norwest proposes to acquire First United and its subsidiaries indirectly through a merger with its wholly owned subsidiary, GST Company ("GST"), and GST also has applied pursuant to section 3 of the BHC Act to become a bank holding company. In connection with this proposal, Norwest also has requested Board approval to acquire an option to purchase approximately 19.4 percent of the outstanding common stock of First United, which will become moot upon consummation of this proposal.

^{2.} The Board previously has determined that Norwest may engage in general insurance agency activities, including the sale as agent of annuities, pursuant to section 4(c)(8)(G) of the BHC Act ("Exemption G"). Norwest Corporation, 76 Federal Reserve Bulletin 873 (1990). This exemption, one of seven specific exemptions (A through G) enacted by Title VI of the Garn-St Germain Depository Institutions Act of 1982 to the Garn Act's general prohibition on insurance activities by bank holding companies, authorizes those bank holding companies that engaged in insurance agency activities prior to 1971 with prior Board approval, to engage, or control a company engaged in insurance agency activities.

^{3.} The Board has considered comments filed after the close of the public comment period. Under the Board's rules, the Board may in its discretion, take into account the substance of such comments. 12 C.F.R. 262.3(e).

^{4.} State deposit data are as of June 30, 1993.

^{5. 12} U.S.C. § 1842(d).

^{6.} A bank holding company's home state is that state in which the operations of the bank holding company's banking subsidiaries were principally conducted on July 1, 1966, or the date on which the company became a bank holding company, whichever is later.

This proposal would represent the initial entry of a Minnesota bank holding company into New Mexico and Texas. The interstate banking laws of both New Mexico⁷ and Texas⁸ specifically authorize the acquisition of banking organizations in these respective states by out-of-state bank holding companies. In addition, state banking officials in New Mexico and Texas have confirmed that the proposed acquisitions are authorized by their respective state banking statutes. Based on all facts of record, the Board concludes that approval of this proposal is not prohibited by the Douglas Amendment. This conclusion is conditioned upon Norwest's satisfying all state requirements.

Convenience and Needs Considerations

In connection with these applications, the Board received comments from the Community Reinvestment and Development Taskforce, Albuquerque, New Mexico, expressing general concern about the acquisition of the largest remaining independent banking chain in New Mexico and Texas and the effect of the acquisition upon the access of local consumers to banking services. The Board also received comments from the Consumer Protection Division of the Office of the Attorney General of Texas ("Texas CPD"), which were adopted by reference by the Lubbock Hispanic Chamber of Commerce ("COMA") and the League of United Latin American Citizens ("LULAC") regarding the lending performance of FBG's subsidiary, First National Bank of West Texas, Lubbock, Texas ("Texas Bank"), under the Community Reinvestment Act ("CRA"), 12 U.S.C. § 2901 et seq.

With regard to its activities in New Mexico, Norwest has committed to implement United New Mexico's recently announced five-year, 12 point Community Lending Initiative designed to assist in meeting the financial service needs of all communities served in New Mexico. This program, totaling \$250 million, sets statewide lending goals for home mortgages to low-

income residents, small business, and federally insured student loans. This initiative also provides for the funding of more ATMs in low- and moderate-income areas, two internal reviews of all denied loan applications from low-income and minority customers, and seminars on personal money management.

The Board has reviewed carefully the Home Mortgage Disclosure Act (12 U.S.C. et seq.) ("HMDA") data reported by Texas Bank in the Lubbock MSA, in light of the comments received. These data indicate some weaknesses in the level of lending to low- and moderate-income communities. In this regard, the Board notes that Texas Bank received a "satisfactory" rating in its last examination for CRA performance from its primary regulator, the Office of the Comptroller of the Currency ("OCC"), as of July 1991. The OCC examiners found no evidence of prohibited discriminatory or other illegal credit practices during the examination. The Board also notes that in order to strengthen Texas Bank's lending performance, Norwest has committed to a 5-year/\$20 million program for mortgages to low- and moderate-income residents served by Texas Bank. In addition, Norwest will offer its Community Home Ownership Program to provide mortgages to low- and moderate-income residents who do not qualify for mortgage products that can be sold in the secondary market. Norwest will also implement its Community Marketing Initiative, which provides contact with community members and groups to ascertain community needs and address the credit needs identified. In light of all the information provided by Norwest, the Texas CPD withdrew its comments.

Based on all the facts of record, including all comments received and Norwest's responses, the Board concludes that the convenience and needs considerations are consistent with approval.⁹

^{7.} See N.M. Stat. Ann. § 58-26-1 et seq. (Michie 1992). New Mexico's interstate banking laws permit out-of-state banks and bank holding companies to acquire New Mexico banks or bank holding companies, provided that the interstate acquisition does not result in undue concentration of deposits totalling 40 percent or more of the total deposits in all financial institutions in the state. As of June 30, 1992, the New Mexico banks to be acquired by Norwest had approximately 12.8 percent of the total deposits in all financial institutions in the state.

^{8.} See Tex. Code Ann. § 342-912. The Texas Interstate Banking Act permits an out-of-state bank holding company to acquire control of a Texas banking organization if certain conditions are met, including the limitation that the aggregate deposits of Texas banks controlled by the out-of-state bank holding company may not exceed 25 percent of the total deposits of all banks domiciled in Texas. As of June 30, 1993, the Texas banks subject to this proposal controlled less than one percent of the total deposits of all banks domiciled in Texas.

^{9.} The Board has carefully considered two requests for a public hearing or meeting to permit communities in New Mexico to furnish Norwest with information concerning the credit needs of those communities. Section 3(b) of the BHC Act does not require the Board to hold a public hearing or meeting on an application unless the appropriate supervisory authority for the bank to be acquired makes a timely written recommendation of denial of the application. In this case, neither the New Mexico Director of the Financial Institutions Division, nor the Texas Banking Commissioner, has recommended denial of the proposal.

Generally, under the Board's rules, the Board may, in its discretion, hold a public hearing or meeting on an application to clarify factual issues related to the application and to provide an opportunity for testimony, if appropriate. 12 C.F.R. 262.3(e) and 262.25(d). In the Board's view, all interested parties have had ample opportunity to submit their views, and substantive written submissions have been received. Moreover, commenters have indicated general disagreement regarding the appropriate conclusions to be drawn from the facts of record, but have not identified facts that are in dispute and material to the Board's decision. Based on all the facts of record, the Board has determined that a public meeting or hearing is not necessary to clarify the factual record in this application, or otherwise warranted in this

Other Considerations

The Board also finds that the financial and managerial resources and future prospects of Norwest, GST, First United, and their respective subsidiaries, and other supervisory factors the Board must consider under section 3 of the BHC Act, are consistent with approval.

Norwest also has applied for approval to engage in certain nonbanking activities pursuant to section 4 of the BHC Act. As noted above, the Board previously has determined that these activities are permissible for bank holding companies under section 4(c)(8) of the BHC Act and the Board's Regulation Y, and Norwest proposes to conduct these activities in accordance with the Board's regulations. The record in this case indicates that there are numerous providers of these nonbanking services, and there is no evidence in the record to indicate that consummation of this proposal is likely to result in any significantly adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices that would outweigh the public benefits of this proposal. Accordingly, the Board has determined that the balance of public interest factors it must consider under section 4(c)(8) of the BHC Act is favorable and consistent with approval of the acquisition of the nonbanking subsidiaries of First United.

Conclusion

Based on the foregoing and other facts of record, the Board has determined that the applications should be, and hereby are, approved. 10 The Board's approval is specifically conditioned upon compliance with all the commitments made by Norwest in connection with these applications and with the conditions referred to in this order, including satisfying all state requirements. The determinations as to the nonbanking activities are subject to all the conditions set forth in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b)(3) (12 C.F.R. 225.4(d) and 225.23(b)(3)), and to the Board's authority to require

such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, or to prevent evasions of, the provisions and purposes of the BHC Act and the Board's regulations and orders issued thereunder. For purposes of this action, the commitments and conditions relied on in reaching this decision shall be deemed to be conditions imposed in writing by the Board and, as such, may be enforced in proceedings under applicable law.

The acquisition of First United's subsidiary banks shall not be consummated before the thirtieth calendar day following the effective date of this order, and the acquisition of First United's subsidiary banks and nonbanking subsidiaries shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Federal Reserve Bank of Minneapolis, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 13, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

JENNIFER J. JOHNSON

Norwest Corporation Minneapolis, Minnesota

Order Approving the Acquisition of a Bank Holding Company

Norwest Corporation, Minneapolis, Minnesota ("Norwest"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), has applied under section 3(a)(3) of the BHC Act (12 U.S.C. § 1842(a)(3)) to acquire all the voting shares of Lindeberg Financial Corporation ("Lindeberg"), and thereby indirectly acquire Forest Lake State Bank ("Bank"), both of Forest Lake, Minnesota. Norwest also has applied, pursuant to section 4(c)(8) of the BHC Act (12 U.S.C. § 1843(c)(8)), and section 225.23 of the Board's Regulation Y (12 C.F.R. 225.23) to acquire the mortgage origination operations of Bank, and thereby engage in the making and servicing of loans pursuant to section 225.25(b)(1) of the Board's Regulation Y (12 C.F.R. 225.25(b)(1)).

Notice of the applications, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 49,050 (1993)). The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in sections 3 and 4 of the BHC Act.

Norwest, with total consolidated assets of \$47.8 billion, operates 86 banking subsidiaries located in 13 states.1 Norwest is the second largest commercial banking organization in Minnesota, controlling approximately \$9.9 billion in deposits, representing 22.4 percent of the deposits in commercial banks in the state.2 Lindeberg, with total consolidated assets of \$58.2 million, is the 111th largest commercial banking organization in the state, controlling \$51.7 million in deposits, representing less than 1 percent of the deposits in commercial banks in the state. Upon consummation of the proposal, Norwest would remain the second largest commercial banking organization in Minnesota, controlling approximately \$10 billion in deposits, representing 22.5 percent of the total deposits in commercial banks in the state.

Competitive Considerations

Norwest and Lindeberg compete directly in the Minneapolis-St. Paul banking market.3 Norwest is the second largest commercial bank or thrift institution ("depository institution") in the market, controlling deposits of \$7.5 billion, representing 27.9 percent of total deposits in depository institutions in the market ("market deposits").4 Lindeberg is the 44th largest depository institution in Minnesota, controlling approximately \$49.1 million in deposits, representing less than 1 percent of total state commercial bank deposits. Upon consummation of this proposal, Norwest would remain the second largest depository institution in the market, controlling deposits of \$7.5 billion, representing 28.1 percent of total market deposits. The Herfindahl-Hirschman Index ("HHI") would increase by approximately 10 points to 2037.5

The Board previously has indicated that merger transactions in the Minneapolis-St. Paul banking market involving one of the two largest depository institutions in the market warrant close review because of the size of these institutions relative to other market

^{1.} Asset data are as of June 30, 1993.

^{2.} State data are as of June 30, 1993. Market data are as of June 30, 1992, but have been adjusted to reflect all subsequent mergers and acquisitions through December 1, 1993.

^{3.} The Minneapolis-St. Paul banking market is comprised of Anoka, Hennepin, Ramsey, Washington, Carver, Scott, and Dakota Counties, and portions of Chisago, Le Sueur, Sherburne, and Wright Counties in Minnesota, and the town of Hudson in St. Croix County, Wisconsin.

^{4.} Market share data are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board previously has indicated that thrift institutions have become, or have the potential to become, significant competitors of commercial banks. See Midwest Financial Group, 75 Federal Reserve Bulletin 386 (1989); National City Corporation, 70 Federal Reserve Bulletin 743 (1984). Thus, the Board has regularly included thrift deposits in the calculation of market share on a 50 percent weighted basis. See, e.g., First Hawaiian Inc., 77 Federal Reserve Bulletin 52 (1991).

^{5.} Under the revised Department of Justice Merger Guidelines, 49 Federal Register 26,823 (June 29, 1984), a market in which the post-merger HHI is above 1800 is considered highly concentrated. In such markets, the Justice Department is likely to challenge a merger that increases the HHI by more than 50 points. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anti-competitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anti-competitive effects implicitly recognize the competitive effects of limited-purpose lenders and other non-depository financial entities.

competitors.⁶ Even considering the effect on market concentration in light of previous acquisitions by the two largest depository organizations, this proposal is not likely to have a significantly adverse competitive effect in the market.

In this case, Lindeberg is one of the smaller depository organizations in the Minneapolis-St. Paul banking market, controlling less than 1 percent of market deposits. In addition, the Board notes that 102 competitors would remain in the market, including 92 commercial banks and 10 thrifts, upon consummation of this proposal.

The Minneapolis-St. Paul banking market is a major urban area and is attractive for entry. Moreover, this acquisition is not likely to affect the availability of attractive entry points for potential entrants. In this regard, the market has experienced both *de novo* entry and entry by acquisition in recent years. For example, seven commercial banking institutions, including two banks chartered *de novo* in 1990, have entered the market in the past ten years. One of the commercial banking institutions that entered the market during this period has become the fourth largest depository institution in the market.

As in other cases, the Board sought comments on the application from the United States Attorney General, the General Deposit Insurance Corporation ("FDIC") and the Attorney General of the State of Minnesota. The Attorney General, the FDIC and the Minnesota Attorney General have not objected to consummation of this proposal or indicated that the proposal would have any significantly adverse competitive effects.

On the basis of all the facts of record, including the number of competitors remaining in the market and the size of Lindeberg, the Board concludes that consummation of this proposal would not have a significantly adverse effect on competition or the concentration of banking resources in the Minneapolis-St. Paul banking market or any other relevant banking market in which Norwest and Lindeberg compete.

Other Considerations

The Board also concludes that the financial and managerial resources and future prospects of Norwest and Lindeberg, and their respective subsidiaries, as well as

the convenience and needs of the communities to be served and the other supervisory factors that the Board must consider under section 3 of the BHC Act, are consistent with approval.

Norwest also has applied, pursuant to section 4(c)(8) of the BHC Act, to acquire the mortgage origination activities of Bank. As noted above, the Board has previously determined that these activities are closely related to banking and generally permissible for bank holding companies under section 4(c)(8) of the BHC Act and the Board's Regulation Y (12 C.F.R. 225.25(b)(1)). Norwest proposes to conduct these activities in accordance with the Board's regulations.

In order to approve the acquisition of Bank's mortgage origination operations under section 4(c)(8) of the BHC Act, the Board also must find that the performance of the proposed activities by Norwest "can reasonably be expected to produce benefits to the public . . . that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. § 1843(c)(8). There are numerous providers of mortgage lending services, and this proposal would not have a significantly adverse effect on the market for the nonbanking services. In addition, there is no evidence in the record to indicate that consummation of this proposal is likely to result in any significantly adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. Accordingly, the Board concludes that the balance of the public interest factors that it is required to consider under section 4(c)(8) of the BHC Act is favorable, and consistent with approval of Norwest's application to acquire Bank's mortgage origination operations.

Conclusion

Based upon the foregoing and all the other facts of record, including the commitments made by Norwest in connection with these applications, the Board has determined that the applications should be, and hereby are, approved. The Board's approval is expressly conditioned upon compliance with the commitments made in connection with these applications. The Board's determination with respect to Norwest's nonbanking activities is also subject to all of the conditions contained in the Board's Regulation Y, including those in sections 225.4(d) and 225.23(b) (12 C.F.R. 225.4(d) and 225.23(b)), and to the Board's authority to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with, and to prevent evasion of, the provisions of the BHC Act

^{6.} See First Bank System, Inc., 79 Federal Reserve Bulletin 50 (1993). In this regard, acquisitions by either of these two banking organizations of a series of depository organizations with relatively small market shares could, on a cumulative basis, lead to significant anti-competitive effects.

^{7.} The Minneapolis-St. Paul metropolitan area, with a population of 2.46 million, is the 16th largest in the United States according to 1990 Census data, and has increased 15.3 percent in population since 1980.

and the Board's regulations and orders thereunder. For purposes of this action, the commitments and conditions relied upon by the Board in reaching its decision are both conditions imposed in writing by the Board and, as such, may be enforced in proceedings under applicable law.

The banking acquisition shall not be consummated before the thirtieth calendar day following the effective date of this order, and all acquisitions shall not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Minneapolis, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 21, 1993.

> JENNIFER J. JOHNSON Associate Secretary of the Board

Dissenting Statement of Governors Angell, Kelley, and LaWare

We reaffirm the position we took in July 1993 when the Board voted 4-3, to permit Norwest to acquire M&D Holding Company.

ORDERS ISSUED UNDER BANK HOLDING COMPANY ACT AMENDMENTS OF 1970

First Union Corporation Charlotte, North Carolina

Order Approving an Exemption from the Anti-Tying **Provisions**

First Union Corporation, Charlotte, North Carolina ("First Union"), a bank holding company within the meaning of the Bank Holding Company Act, has requested that the Board grant an exemption from the anti-tying provisions of the Bank Holding Company Act Amendments of 1970 (12 U.S.C. § 1971) ("Section 106(b)") to permit First Union Brokerage Services, Inc., Charlotte, North Carolina ("Brokerage Company"), to offer discounts on commissions for brokerage services to customers who maintain a minimum balance in accounts at any First Union bank.

Notice of this request, affording interested persons an opportunity to submit comments, has been published (58 Federal Register 59,073 (1993)). The time for filing comments has expired, and the Board has considered the request and all comments received in light of the Board's authority to grant exemptions to Section 106(b)'s tie-in prohibitions.1

First Union is the sixth largest banking organization in the nation, controlling deposits of \$52 billion.² First Union operates subsidiary banks in the District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Tennessee, and Virginia, and engages directly and through subsidiaries in a broad range of permissible nonbanking activities.

Section 106(b) generally prohibits a bank from varying the consideration for credit or other services on the condition that the customer obtain some additional service from the bank, its bank holding company, or any other subsidiary of its bank holding company. Section 106(b) provides that the Board may, by regulation or order, permit an exception to the tie-in prohibitions where the Board determines that an exception will not be contrary to the purposes of the section. The legislative history provides that the purpose of Section 106(b) is to prohibit anti-competitive practices which require bank customers to accept or provide some other service or product or refrain from dealing with other parties in order to obtain the bank product or service they desire.³ The legislative history also indicates that the Board should exercise its exemptive authority selectively and that the Board should continue to allow appropriate traditional banking practices based on sound economic analysis.4

In considering previous requests for an exemption, the Board has reviewed a number of factors, including whether the tied products are offered separately to customers at market prices, and whether the bank could impair the availability of the products or otherwise engage in unfair competition by tying the proposed products.5

^{1.} The Board received ten comments on this proposal, all in favor of granting First Union's request.

^{2.} Deposit data are as of June 30, 1993.

^{3.} S. Rep. No. 1084, 91st Cong., 2d Sess. 17 (1970) ("Senate Report'').

^{4.} Senate Report at 17 and 46.

^{5.} In 1990, the Board granted an exemption to the tie-in prohibitions. to permit subsidiary banks of Norwest Corporation, Minneapolis, Minnesota ("Norwest"), and NCNB Corporation, Charlotte, North Carolina ("NCNB"), to offer a price reduction on credit cards issued to customers of their affiliated banks. See Norwest Corporation and NCNB Corporation, 76 Federal Reserve Bulletin 702 (1990). In granting this exception, the Board determined that neither Norwest nor NCNB could exercise sufficient market power to impair competition in the tied product market for the traditional banking services, and emphasized that the credit card and traditional banking products offered as part of the arrangement were made available by the bank holding companies separately at competitive prices. By subsequent rulemaking, the Board made this exemption available to bank holding companies generally. See 12 C.F.R. 225.4(d)(2).

First Union proposes that Brokerage Company be allowed to vary the consideration charged for brokerage services if a customer maintains a minimum balance in accounts at any First Union bank.⁶ Brokerage Company is an operating subsidiary of First Union National Bank of North Carolina, Charlotte, North Carolina.

First Union contends that its proposal is not anticompetitive because the market for retail brokerage services is national in scope and very competitive. In this regard, First Union maintains that Brokerage Company does not have enough market power in this market to cause a lessening of competition by providing discounts on brokerage services to customers with deposit relationships at a First Union bank. In addition, First Union argues that the proposal will not limit the availability of products to consumers because the brokerage services offered by Brokerage Company and the deposit services offered by First Union's subsidiary banks will be separately available to customers at competitive prices.

In determining whether the proposed exemption would be consistent with Section 106(b), it is appropriate to consider the competitiveness of the relevant retail brokerage market. In analyzing the potential competitive effects of a proposal, the Board has considered the availability of the tying product in its relevant geographic market. The geographic market for retail brokerage services — the tying product in this case — is national in scope and highly competitive. In each of the states in which First Union competes, there are at least 50 competing brokerage firms, including major nationwide brokerage firms, and other banks offering retail brokerage services. Overall, First Union possesses a small market share in the retail brokerage market.

Therefore, it is unlikely that First Union will be able to substantially lessen competition for brokerage services in a particular market. Similarly, First Union's small market share in brokerage services and the presence of many other competitors providing retail brokerage services indicate that it is unlikely that, by tying discounts on brokerage services to deposit services, First Union could exercise sufficient market power to impair competition in the market for the traditional banking services.

For these reasons, the Board believes that the requested exemption is not contrary to the purpose of Section 106(b), and that granting the exemption would be consistent with the legislative authorization to permit exemptions for traditional banking services on the basis of economic analysis. The Board, however, reserves the right to terminate the exemption in the event that facts develop in the future that indicate that the tying arrangement is resulting in anticompetitive practices and thus would be inconsistent with the purpose of Section 106(b).

Based on the above, and all facts of record, the Board has determined to grant an exemption to permit Brokerage Company to offer discounts on commissions for brokerage services to customers who maintain a minimum balance in accounts at any First Union bank on the conditions discussed above. This approval is subject to the Board's authority to modify or terminate the exemption as set forth above and to all of the conditions that may be imposed by the Board in Regulation Y.

By order of the Board of Governors, effective December 22, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Governor Angell.

WILLIAM W. WILES Secretary of the Board

Under antitrust precedent, concerns over tying arrangements are substantially reduced where the buyer is free to take either product by itself even though the seller may also offer the two items as a unit at a single price. As noted above, First Union will continue to offer brokerage services and deposit services separately. Given the competitive nature of the retail brokerage market, it is expected that First Union will be required to offer these brokerage services at competitive prices. There are no other facts to suggest in this case that First Union has sufficient market power to affect adversely the market or availability for the brokerage services through its proposal to provide discounts.

^{6.} The proposed exemption would provide relief from section 106(b)(1), which prohibits banks from tying their own products, and section 106(b)(2), which prohibits banks from tying their products with those offered by affiliates. See 12 U.S.C. §§ 1972(1)(A) and (B).

^{7.} See, e.g., BankAmerica Corporation, 69 Federal Reserve Bulletin 105, 110 (1983).

^{8.} First Union states that its 1991 brokerage revenues represented less than one-half of 1 percent of total nationwide brokerage revenues.

^{9.} Northern Pacific R. Co. v. United States, 356 U.S. 1, 6, n.4 (1958).

ORDERS ISSUED UNDER BANK MERGER ACT

First Interstate Bank of California Los Angeles, California

Order Approving the Merger of Banks

First Interstate Bank of California, Los Angeles, California ("First Interstate-California"), a state member bank, has applied for the Board's approval under section 18(c) of the Federal Deposit Insurance Act (12 U.S.C. § 1828(c)) ("Bank Merger Act") to merge with First State Bank of the Oaks, Thousand Oaks, California ("Bank of the Oaks"), and establish branches under section 9 of the Federal Reserve Act (12 U.S.C. § 321).

Notice of this application, affording interested persons an opportunity to submit comments, has been given in accordance with the Bank Merger Act and the Board's Rules of Procedure (12 C.F.R. 262.3(b)). As required by the Bank Merger Act, reports on the competitive effects of the merger were requested from the United States Attorney General, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation ("FDIC"). The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in the Bank Merger Act and section 9 of the Federal Reserve Act.

First Interstate-California, with consolidated assets of \$20.1 billion, is the third largest commercial banking organization in California, controlling deposits of \$17.1 billion, representing approximately 7.2 percent of total deposits in commercial banking organizations in the state.2 Bank of the Oaks is the 131st largest commercial banking organization in California, controlling deposits of \$129 million, representing less than 1 percent of total deposits in commercial banking organizations in the state. Upon consummation of this proposal, First Interstate-California would remain the third largest commercial banking organization in California, controlling deposits of \$17.3 billion, representing approximately 7.3 percent of the total deposits in commercial banking organizations in the state.

First Interstate-California and Bank of the Oaks compete directly in the Los Angeles and Oxnard banking markets.³ Upon consummation of this proposal, the Los Angeles banking market would remain unconcentrated and the Oxnard banking market would remain moderately concentrated as measured by the Herfindahl-Hirschman Index ("HHI").4 After considering the competition offered by other depository institutions in the markets,5 the number of competitors remaining in the respective markets, the relatively small increase in market share and market concentration in the respective markets, and all other factors of record, the Board concludes that consummation of the proposal would not have a significantly adverse effect on competition in any relevant banking market.

Convenience and Needs Considerations

In acting on an application to acquire a depository institution under the Bank Merger Act, the Board must consider the convenience and needs of the communities to be served, and take into account the records of the relevant depository institutions under the Community Reinvestment Act (12 U.S.C. § 2901 et seq.) ("CRA"). The CRA requires the federal financial supervisory agencies to encourage financial institutions to help meet the credit needs of the local communities in which they operate, consistent with the safe and sound operation of such institutions. To accomplish this end, the CRA requires the appropriate federal supervisory authority to "assess the institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of such institution," and to take that record into account in its evaluation of these applications.6

In this regard, the Board has received comments the California Reinvestment Committee ("CRC") and an individual (collectively, "Protestants") critical of the efforts of First Interstate-California and Bank of the Oaks to meet the credit and banking needs of their communities. Protestants allege

^{1.} Asset data are as of September 30, 1993.

State deposit data are as of June 30, 1993.

^{3.} The Los Angeles banking market is defined as the Los Angeles Ranally Metropolitan Area, and the Oxnard banking market is defined as the Oxnard Ranally Metropolitan Area.

^{4.} Under the revised Department of Justice Merger Guidelines, 49 Federal Register 26,823 (June 29, 1984), a market in which the post-merger HHI is below 1000 is considered unconcentrated, and a market in which the post-merger HHI is between 1000 and 1800 is considered moderately concentrated. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anticompetitive effects) unless the post-merger HHI is at least 1800 and the merger increases the HHI by more than 200 points. The Justice Department has stated that the higher than normal HHI thresholds for screening bank mergers for anticompetitive effects implicitly recognize the competitive effect of limited-purpose lenders and other non-depository financial institutions.

^{5.} In this context, depository institutions include commercial banks, savings banks, and savings associations. Market deposit data are as of June 30, 1992, and are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board previously has indicated that thrift institutions have become, or have the potential to become, significant competitors of commercial banks. See WM Bancorp, 76 Federal Reserve Bulletin 788 (1990); National City Corporation, 70 Federal Reserve Bulletin 743 (1984).

^{6. 12} U.S.C. § 2903.

generally that First Interstate-California and Bank of the Oaks have not met the credit needs of minorities and low- and moderate-income individuals, particularly in the Oxnard-Ventura metropolitan statistical area ("MSA").7

In its consideration of the convenience and needs factor, the Board has carefully reviewed the entire record of CRA performance of First Interstate-California and Bank of the Oaks; all comments received regarding this application, including the response of First Interstate-California to those comments; and all the other relevant facts of record, in light of the CRA, the Board's regulations, and the Statement of the Federal Financial Supervisory Agencies Regarding the Community Reinvestment Act ("Agency CRA Statement").8

Record of CRA Performance

A. CRA Performance Examinations

The Agency CRA Statement provides that a CRA examination is an important and often controlling factor in the consideration of an institution's CRA record, and that these reports will be given great weight in the applications process.9 The Board notes that First Interstate-California received a "satisfactory" rating from its primary federal regulator, the Federal Reserve Bank of San Francisco, at its most recent examination for CRA performance as of August 10, 1992. In addition, Bank of the Oaks received a "satisfactory" rating from its primary regulator, the FDIC, at its most recent examination for CRA performance as of April 23, 1992.10

B. Previous Review of First Interstate-California's CRA Record

The Board recently reviewed the CRA performance record of First Interstate-California in connection with

its applications to acquire California Republic Bank. 11 This review included consideration of First Interstate-California's record of lending in low- and moderate-income and minority areas, community development activities, and other CRA programs and policies in light of comments received from several commenters, including CRC. For the reasons more fully set forth in the First Interstate Order, the Board concluded that the overall CRA performance record of First Interstate-California was generally consistent with approval.

C. Record of Lending in the Oxnard-Ventura

Protestants have alleged in this application that 1992 data required to be filed under the Home Mortgage Disclosure Act (12 U.S.C. § 2801 et seq.) ("HMDA") show that First Interstate-California and Bank of the Oaks discriminate against borrowers located in lowand moderate-income and minority communities in the Oxnard-Ventura MSA. These 1992 HMDA data reveal mixed results. In some categories, First Interstate-California's performance met or exceeded the performance of its peers. For example, the number of mortgage applications received from minorities by First Interstate-California in the Oxnard-Ventura MSA, and the number of originations, increased substantially from 1991 to 1992.12 Furthermore, mortgage loan approval and denial rates for African-Americans and Asian-Americans in the Oxnard-Ventura MSA were the same or better than the rates for whites in 1992,13

However, the 1992 HMDA data for both First Interstate-California and Bank of the Oaks also indicate disparities in approvals and denials of loan applications for Hispanics and individuals residing in lowto moderate-income neighborhoods in the Oxnard-Ventura MSA. Because all banks are obligated to adopt and implement lending practices that ensure not only safe and sound lending, but also equal access to credit by creditworthy applicants regardless of race, the Board is concerned when the record of an institution indicates disparities in lending to applicants in low- and moderate-income and minority communities. The Board recognizes, however, that HMDA data

^{7.} CRC alleges that First Interstate-California neglects home mortgage lending statewide, and that plans to expand its mortgage loan portfolio have not increased the number of mortgage originations. CRC also believes that Bank of the Oaks's efforts to extend credit and services to minorities and low-income individuals are inadequate. CRC has requested that First Interstate-California specify CRA products and outreach efforts, and commit to CRA goals in California, for affordable housing development, community economic development, and consumer needs.

^{8. 54} Federal Register 13,742 (1989)

^{9. 54} Federal Register 13,745 (1989).

^{10.} Although Bank of the Oaks is an approved Small Business Administration ("SBA") lender, it no longer actively markets SBAsponsored products. However, Bank of the Oaks continues to extend credit to small businesses. As of June 30, 1993, the bank had outstanding 191 small business loans totalling approximately \$13 million.

^{11.} See First Interstate Bancorp, 80 Federal Reserve Bulletin 40 (1994) ("First Interstate Order").

^{12.} In 1992, First Interstate-California's mortgage lending to African-Americans was proportional to their presence in the Oxnard-Ventura MSA. During that year, the bank made 2 percent of its mortgage loans to African-Americans (2 percent of the population of the MSA).

^{13.} In 1992, the denial rate for African- and Asian-Americans in the Oxnard-Ventura MSA was 17 percent, and the denial rate for whites was 29 percent.

alone provide only a limited measure of any given institution's lending in its community. The Board also recognizes that HMDA data have limitations that make the data an inadequate basis, absent other information, for conclusively determining whether an institution has engaged in illegal discrimination in making lending decisions.

As noted in the First Interstate Order, First Interstate-California's 1992 CRA performance examination found no evidence of any pattern or practice of illegal discriminatory credit practices, or other practices designed to discourage credit applications. In this regard, examiners noted that the bank continually assesses its lending activity for HMDA-reportable loans. In addition, in conducting its 1992 CRA examination of Bank of the Oaks, the FDIC reviewed mortgage loans denied by the bank and found no evidence of any pattern or practice of illegal discriminatory credit practices, or other practices designed to discourage credit applications.

First Interstate-California also has committed to steps to improve its mortgage lending in the Oxnard-Ventura MSA. For example, First Interstate-California will market all of its CRA-related programs and products described in the First Interstate Order, including three special mortgage programs and the F.I.R.S.T. consumer loan program, to all segments of its banking community in the Oxnard-Ventura MSA. In addition, the bank has committed to make its "second look" program for denied loans available to customers in the Oxnard-Ventura MSA, and operate its "mystery shopper" program in the Bank of the Oaks branches being acquired to test for compliance with fair lending laws.

On the basis of all the facts of record, including the comments provided by Protestants, First Interstate-California's response to those comments, and relevant reports of examination, as well as the information and commitments referenced in the First Interstate Order, the Board concludes that convenience and needs considerations, including the records of performance under the CRA of First Interstate-California and Bank of the Oaks, are consistent with approval of this application. The Board expects First Interstate-California to implement fully all commitments made in connection with this proposal, including its proposed CRA initiatives for the Oxnard-Ventura MSA, and to comply with all the conditions and commitments discussed in the First Interstate Order.

Other Considerations

The financial and managerial resources and future prospects of First Interstate-California and Bank of the Oaks, and other supervisory factors the Board must consider under the Bank Merger Act and the Federal Reserve Act, are consistent with approval of this proposal.

Conclusion

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. The Board's approval is specifically conditioned upon compliance with all the commitments made by First Interstate-California in connection with this application. This approval is further subject to First Interstate obtaining the approval of the California Superintendent of Banks for the proposed transaction under applicable state law. For purposes of this action, the commitments and conditions relied on in reaching this decision shall be deemed to be conditions imposed in writing by the Board and, as such, may be enforced in proceedings under applicable law.

The acquisition of Bank of the Oaks shall not be consummated before the thirtieth calendar day following the effective date of this order, or later than three months after the effective date of this order, unless such period is extended for good cause by the Federal Reserve Bank of San Francisco acting pursuant to delegated authority.

By order of the Board of Governors, effective December 13, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

JENNIFER J. JOHNSON
Associate Secretary of the Board

Fleet Bank of New York Albany, New York

Order Approving Acquisition of Branches

Fleet Bank of New York, Albany, New York ("Fleet Bank"), a state member bank, has applied for the Board's approval under the Bank Merger Act (12 U.S.C. § 1828(c)) to acquire certain assets and assume certain liabilities of 29 branches of Chemical Bank, New York, New York ("Chemical Bank"), also a state member bank. These branches are located throughout upstate New York. Fleet Bank also has applied for the Board's approval, pursuant to section 9 of the Federal Reserve Act (12 U.S.C. § 321), to

^{1.} The branch locations proposed to be acquired are listed in the Appendix.

establish and operate branch offices at each of these locations.

Notice of the applications, affording interested persons an opportunity to submit comments, has been published in accordance with the Bank Merger Act and the Board's Rules of Procedure (12 C.F.R. 262.3(b)). As required by the Bank Merger Act, reports on the competitive effects of the proposal have been requested from the United States Attorney General, the Office of the Comptroller of the Currency ("OCC"), and the Federal Deposit Insurance Corporation. The time for filing comments has expired, and the Board has considered the applications and all the comments received in light of the factors set forth in the Bank Merger Act and the Federal Reserve Act.

On the basis of commercial bank deposits, Fleet Bank, with total deposits of approximately \$10.2 billion, is the seventh largest commercial bank in New York.² Chemical Bank, with total deposits of approximately \$50.9 billion, is the largest commercial bank in the state.

Competitive Considerations

Fleet Bank and Chemical Bank compete directly in six banking markets in New York.³ In each of these markets, the increase in the Herfindahl-Hirschman Index ("HHI") would not exceed the thresholds set forth in the Department of Justice's Revised Merger Guidelines⁴ after considering the competition offered by thrift institutions.⁵ In light of these facts, and after considering the number of competitors remaining in the markets, the small increases in market concentra-

2. State deposit data are as of June 30, 1993.

tion,⁶ the attractiveness of these markets for entry by new competitors, and the other facts of record, the Board has concluded that consummation of the proposal would not result in a significantly adverse effect on competition in any of these banking markets.

Based on all the facts of record in this case, the Board concludes that consummation of the proposal would not have a significantly adverse effect on competition or the concentration of banking resources in any relevant banking market.

Convenience and Needs Considerations

In considering an application by a state member bank to acquire another insured depository institution by merger or to establish an additional branch, the Board is required to consider the convenience and needs of the communities to be served and to take into account the record of performance of the state member bank under the Community Reinvestment Act (12 U.S.C. § 2901 et seq.) ("CRA").7 The CRA requires the federal financial supervisory agencies to encourage financial institutions to help meet the credit needs of the local communities in which they operate, consistent with the safe and sound operation of such institutions. To accomplish this end, the CRA requires the appropriate federal supervisory authority to "assess an institution's record of meeting the credit needs of its entire community, including low- and moderateincome neighborhoods, consistent with the safe and sound operation of the institution," and to take that record into account in its evaluation of applications under the Bank Merger Act and to establish domestic branches.8

In this regard, the Board has considered comments filed by an organization ("Protestant") that alleges that Fleet Bank and Chemical Bank have failed to meet the credit needs of the communities they serve, based on 1991 HMDA data indicating disparities in the rates of housing-related loan denials between minority and non-minority applicants. Protestant also maintains that allegations made in several pending lawsuits regarding improper mortgage lending practices by a nonbanking mortgage affiliate of Fleet Bank raise issues regarding the convenience and needs consider-

^{3.} These markets are the Albany, Buffalo, Elmira-Corning, Olean, Rochester, and Syracuse banking markets.

^{4.} Under the revised Department of Justice Merger Guidelines, 49 Federal Register 26,823 (June 29, 1984), a market in which the post-merger HHI is above 1800 is considered to be highly concentrated. In such markets, the Justice Department is likely to challenge a merger that increases the HHI by more than 50 points. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anti-competitive effects) unless the post-merger HHI is at least 1800 and the merger or acquisition increases the HHI by at least 200 points. The Justice Department has stated that the higher than normal threshold for an increase in HHI when screening bank mergers and acquisitions for anti-competitive effects implicitly recognizes the competitive effect of limited-purpose lenders and other non-depository financial entities. See Appendix B for the increases in concentration in these markets on a pro forma basis as measured by HHI.

^{5.} The Board previously has indicated that thrift institutions have become, or have the potential to become, major competitors of commercial banks. See Midwest Financial Group, 75 Federal Reserve Bulletin 386 (1989); National City Corporation, 70 Federal Reserve Bulletin 743 (1984). Thus, the Board has regularly included thrift deposits in the calculation of market share on a 50 percent weighted basis. See, e.g., First Hawaiian, Inc., 77 Federal Reserve Bulletin 52 (1991). In considering the competition offered by thrifts in all banking markets in this case, thrift deposits are weighted at 50 percent.

^{6.} Upon consummation of this proposal, the HHI in these markets would increase as follows: (1) Albany, 67 points to 1039; (2) Buffalo, 56 points to 2130; (3) Elmira-Corning, 26 points to 906; (4) Olean, 171 points to 1903; (5) Rochester, 56 points to 1179; and (6) Syracuse, 109 points to 1547.

^{7.} See 12 U.S.C. §§ 321, 1828(c), 2902(3)(C), and 2903(2); see also 12 C.F.R. 208.5 and 208.9.

^{8. 12} U.S.C. § 2903.

ations in this proposal.9 The Board has carefully reviewed the CRA performance records of Fleet Bank and Chemical Bank, as well as Protestant's comments, Fleet Bank's response, and all of the other relevant facts, in light of the CRA, the Board's regulations, and the Statement of the Federal Financial Supervisory Agencies Regarding the Community Reinvestment Act ("Agency CRA Statement").10

Record of Performance Under the CRA

A. CRA Performance Examination

The Agency CRA Statement provides that a CRA examination is an important and often controlling factor in the consideration of an institution's CRA record and that these reports will be given great weight in the applications process.¹¹ In this case, the Board notes that Fleet Bank received an "outstanding" rating from its primary federal regulator, the Federal Reserve Bank of New York, at its most recent examination for CRA performance as of December 16, 1991.12 Chemical Bank also received an "outstanding" rating for CRA performance from the Federal Reserve Bank of New York at its most recent examination for CRA performance as of July 22, 1991.

B. Analysis of HMDA Data

The Board has carefully reviewed the 1991 and 1992 HMDA data reported by Fleet Bank and Chemical Bank in light of Protestant's comments. 13 These data indicate that Fleet Bank and Chemical Bank have extended a significant number and percentage of home mortgage loans in low- and moderate-income neighborhoods. In certain areas, however, the data for Fleet Bank reflect disparities in loan originations and loan rejection rates for minority applicants when compared to non-minority applicants. The Board is concerned when the record of an institution indicates disparities in lending to minority applicants, and believes that all banks are obligated to ensure that their lending practices are based on criteria that assure not only safe and sound lending, but also equal access to credit by creditworthy applicants regardless of race. The Board recognizes, however, that HMDA data alone provide only an incomplete measure of an institution's lending in its community. The Board also recognizes that HMDA data have limitations that make the data an inadequate basis, absent other information, for conclusively determining that an institution has engaged in illegal discrimination in making lending decisions.

The Board notes that the most recent examination of Fleet Bank found no evidence of illegal discrimination or of credit practices that were inconsistent with the substantive provisions of antidiscrimination laws and regulations. In this regard, examiners noted that Fleet Bank solicited credit applications from all segments of its community, including low- and moderate-income neighborhoods, and that the board of directors and senior management of Fleet Bank had developed comprehensive written policies, procedures, training programs, and internal reviews to ensure that the bank did not illegally discourage or pre-screen applicants. The examination also found that HMDA data indicated a reasonable penetration of lending activity in low- and moderate-income census tracts, that the bank's delineation of its community was reasonable and did not arbitrarily exclude any low- and moderate-income neighborhoods, and that its branches were reasonably accessible by, and all its products and services were available to, all segments of its community.

Fleet Bank also has taken steps since its last CRA examination to increase lending to minority and lowand moderate-income borrowers. For example, Fleet Bank implemented a program in February 1992 requiring a senior consumer lending officer to review all rejected minority HMDA loan applications, using more flexible loan underwriting criteria. Since March 1992, Fleet Bank has convened focus groups among minority customers and among minority branch officers, in order to identify unfilled minority credit and service needs and improved methods of delivering services to minority customers. HMDA data for 1992 reflect improvement in both the number of applications received from and the number of loans made to

^{9.} Protestant requests that Fleet Bank and Chemical Bank be required to conduct an audit of their minority lending practices and to make certain commitments to improve their overall minority lending records.

^{10. 54} Federal Register 13,742 (1989)

^{11. 54} Federal Register at 13,745.

^{12.} On October 1, 1992, in an internal reorganization, Fleet Bank, N.A., Buffalo, New York ("Buffalo Bank"), was merged into Fleet Bank, with Fleet Bank the surviving entity. Buffalo Bank received a "satisfactory" rating from its primary federal regulator, the OCC, as of May 20, 1991, the date of its last examination for CRA performance prior to the merger with Fleet Bank.

^{13.} The actual data cited by Protestant in its comments relate to Fleet Bank's affiliate bank, Fleet National Bank, Providence, Rhode Island ("Fleet-RI"), which is a bank that is not involved in this merger transaction. Although the 1991 Rhode Island data indicate some disparities between rejection rates for minority applicants when compared to non-minority applicants, the data also show that Fleet-RI extended 16 percent of its loans in low- and moderate-income areas and received and granted a higher percentage of housing-related loan applications from minorities than did other lenders in its community. Data in 1992 show some decrease in Fleet-RI's minority and lowincome lending, but the percentage of loans made to minority borrowers remained equal to the average of other lenders in its community. In addition, Fleet-RI received an "outstanding" CRA performance rating from its primary federal regulator, the OCC, at its most recent examination as of October 29, 1990.

minorities by Fleet Bank. 14 Fleet Bank also introduced a Community Revitalization Mortgage product, which provides mortgages with no closing fees and reduced minimum down payments for low- and moderate-income homebuyers in distressed areas.

The Board also has carefully reviewed Protestant's comments regarding allegedly improper mortgage lending practices, principally in Georgia by Fleet Finance, Inc. ("Fleet Finance"), a nonbanking financing subsidiary of Fleet Financial Group, Inc., Providence, Rhode Island ("Fleet") which is the parent holding company of Fleet Bank.15 The Board notes that Fleet has taken a number of steps to address the issues raised by these allegations. For example, Fleet has discontinued its practice of purchasing individual third-party loans, except for packages in bulk from regulated financial institutions or the Resolution Trust Corporation, and has stopped financing home improvements. In addition, Fleet has made significant changes in senior executive management at the holding company level and the subsidiary level, has reorganized reporting responsibilities under functional lines, and has centralized decision making authority, which appear to have improved the operations of its mortgage subsidiaries. Fleet has also recently entered into a substantial settlement agreement with the Georgia attorney general that has concluded a year-long investigation by the attorney general into Fleet's mortgage lending practices in Georgia.16

On the basis of these and all the other facts of record, including comments received and relevant examination reports, the Board concludes that convenience and needs considerations, including the CRA performance records of Fleet Bank and Chemical Bank, are consistent with approval of these applications. The Board specifically retains jurisdiction and full supervisory authority to take appropriate action in

involving similar allegations. Other Considerations The Board has considered the managerial factor in this case in light of the recently completed examination of Fleet Bank conducted by the Federal Reserve Bank of New York and a full-scope inspection of Fleet conducted by the Federal Reserve Bank of Boston at the request of the Board. In this regard, Fleet has taken substantive steps to improve the operations of all of its banking and nonbanking subsidiaries, including the management reorganization and initiatives described above as well as other modifications to its internal controls, policies, training, and management information systems. While many of these changes are relatively recent and are still being implemented, the Board also notes that this proposal represents a rela-

tively small acquisition for Fleet. Based on all the facts

of record in this case, including the reforms initiated

by Fleet, the relative size of the acquisition, and the

results of examinations and inspections, the Board

concludes that managerial considerations are consis-

tent with approval. Financial resources of Fleet and

Fleet Bank are satisfactory, and future prospects of

Fleet Bank and of Chemical Bank, and the other

supervisory factors the Board must consider under the

Bank Merger Act are also consistent with approval. In

addition, the Board has considered the factors it is

required to consider when approving applications for the establishment of branches pursuant to section 9 of the Federal Reserve Act, and finds those factors to be

consistent with approval.17

the event that a court determines, or a subsequent

examination finds, that a subsidiary of Fleet has en-

gaged in illegal activities or that Fleet's initiatives in any of its subsidiaries prove to be inadequate. Fleet

Bank and Fleet are hereby directed to inform the

Board promptly of each material development in the

pending litigation, and of any future claims or lawsuits

^{14.} For example, minority applications increased by 110 percent between 1991 and 1992, while non-minority applications increased by 47 percent. Loans by Fleet Bank to minority borrowers increased from 2.8 percent to 4.0 percent of all loans, while the average for all lenders in its community declined from 5.2 percent to 4.5 percent.

^{15.} Fleet has been sued in a number of cases in Georgia and other states. Some of these cases, including a racial discrimination case in Georgia and a mortgage escrow account overcharge case involving a number of states, have been settled. In other cases, Fleet's practices have been found to be consistent with applicable law. Cases that are still pending against Fleet have not gone to trial.

^{16.} Under the terms of this settlement, qualified borrowers are entitled to compensatory damages, interest rate reductions, and rebate of origination "points" in excess of 10 percent, and Fleet has committed to fund \$70 million in loans to low-income borrowers over the next three to five years. Fleet has also agreed to certain limitations on fees and interest charges for three years following the agreement. In addition, Fleet has reached an agreement with the Massachusetts Attorney General by establishing a \$12 million mortgage program to compensate Fleet borrowers in that state, and has established a nationwide, 10-point program to permit refinancings by qualifying borrowers from Fleet Finance.

^{17.} Protestant has requested that the Board hold a public meeting or hearing on these applications. The Board is not required to hold a public hearing in these applications under the Bank Merger Act or the Federal Reserve Act. Under its rules, the Board may, in its discretion, hold a public meeting or hearing on an application to clarify factual issues related to the application and to provide an opportunity for testimony, if appropriate. 12 C.F.R. 262.3(e) and 262.25(d). The Board has carefully considered Protestant's request, and the written comments submitted by Protestant. In the Board's view, interested parties have had ample opportunity to submit and have submitted substantial written comments that have been considered by the Board. In light of the foregoing and all the facts of record, the Board has determined that a public meeting or hearing is not necessary to clarify the factual record in this application, or otherwise warranted in this case. Accordingly, the request for a public meeting or hearing on these applications is hereby denied.

Based on the foregoing and other facts of record, the Board has determined that the application should be, and hereby is, approved. The Board's approval is specifically conditioned upon compliance by Fleet Bank with all the commitments made in its applications. For purposes of this action, the commitments discussed in this order shall be deemed to be conditions imposed in writing by the Board in connection with its findings and decisions, and, as such, may be enforced in proceedings under applicable law.

This transaction shall not be consummated before the thirtieth calendar day following the effective date of this order, or later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 23, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Angell, Kelley, LaWare, and Phillips. Voting against this action: Governor Lindsey.

Appendix B

Banking markets in which the pro forma increase in the HHI would not exceed the Department of Justice's Revised Merger Guidelines:

- (1) The Albany banking market is approximated by Albany, Columbia, Fulton, Greene, Hamilton, Montgomery, Rensselaer, Saratoga, Schenectady, Schoharie, Warren, and Washington Counties in New York. The HHI would increase by 67 points to 1039, and the market would become moderately concentrated.
- (2) The Buffalo banking market is approximated by Erie and Niagara Counties in New York. The HHI would increase by 56 points to 2130, and the market would remain highly concentrated.
- (3) The Elmira-Corning banking market is approximated by Chemung and Steuben Counties in New York. The HHI would increase by 26 points to 906, and the market would remain unconcentrated.
- (4) The Olean banking market is approximated by Allegany County (less the eastern and two northern tiers of townships) and Cattaraugus County (less the two western and northern tiers of townships) in New York. The HHI would increase by 171 points to 1903, and the market would become highly concentrated
- (5) The Rochester banking market is approximated by Genessee, Livingston, Monroe, Ontario, Orleans, Seneca, Wayne, Wyoming, and Yates Counties in New York. The HHI would increase by 56 points to 1179, and the market would remain moderately concentrated.
- (6) The Syracuse banking market is approximated by Cayuga, Cortland, Madison, Onondaga, and Oswego Counties in New York. The HHI would increase by 109 points to 1547, and the market would remain moderately concentrated.

Dissenting Statement of Governor Lindsey

I dissent from the Board's action in this case because, in my view, the record is not sufficient to demonstrate that managerial factors support approval of this acquisition.

The record in this case contains a number of allegations of improper practices by Fleet's nonbanking subsidiaries and criticisms of other practices by Fleet. These practices appear to have been possible because of weak internal controls by management in a number of areas. Fleet's management has recently taken steps to change its policies and improve its internal controls and supervision, including instituting training, compliance and reporting policies. However, in a number of areas, including compliance procedures and practices, the evidence indicates that Fleet has not fully implemented its corrective measures or that these measures have not been in place for a sufficient period of time to evaluate their effectiveness.

In reaching this conclusion I have carefully considered Fleet's announced remedial programs, its recently announced settlement of a year-long investigation by the Georgia Office of the Attorney General and its efforts to resolve some of its outstanding litigation. I believe that the applications process places more importance on the corrective measures that have a demonstrated record of preventing problems from occurring rather than providing remedies for past problems. I have also considered these steps in light of a recent full-scope inspection of Fleet by the Federal Reserve Bank of Boston.

In my view, the acquisition of 29 branches is a significant expansion that should not be undertaken without a clear record of effective steps to address identified weaknesses of performance. Because this record is not sufficient to date, in my weighing of the evidence, I would deny this proposal.

December 23, 1993

West One Bank, Idaho Boise, Idaho

Order Approving the Merger of Banks and the Establishment of Branches

West One Bank, Idaho, Boise, Idaho ("Bank"), a state member bank, has applied under section 18(c) of the Federal Deposit Insurance Act (12 U.S.C. § 1828(c)) (the "Bank Merger Act") to acquire Idaho State Bank, Glenns Ferry, Idaho ("Idaho Bank"). Bank also has applied under section 9 of the Federal Reserve Act (12 U.S.C. § 321) to establish branches at the locations where Idaho Bank currently operates branches.

Notice of the applications, affording interested persons an opportunity to submit comments, has been given in accordance with the Bank Merger Act and the Board's Rules of Procedure (12 C.F.R. 262.3(b)). As

required by the Bank Merger Act, reports on the competitive effects of the merger were requested from the United States Attorney General, the Office of the Comptroller of the Currency ("OCC"), and the Federal Deposit Insurance Corporation ("FDIC"). The time for filing comments has expired, and the Board has considered the applications and all comments received in light of the factors set forth in the Bank Merger Act and in section 9 of the Federal Reserve Act.

Bank is the largest commercial banking organization in Idaho, controlling deposits of \$2.7 billion, representing approximately 35 percent of total deposits in commercial banks in the state. Idaho Bank is the 14th largest commercial banking organization in Idaho, controlling deposits of \$43.6 million, representing less than 1 percent of total deposits in commercial banks in the state. Upon consummation of this proposal, Bank would remain the largest commercial banking organization in Idaho, controlling deposits of \$2.8 billion, representing approximately 35.6 percent of total deposits in commercial banks in the state.

Competitive Considerations

Under the Bank Merger Act, the Board is required to consider the effects that a proposed merger would have on competition.² Bank and Idaho Bank compete directly in five banking markets in Idaho: Mountain Boise. Payette-Ontario-Weiser, County, and Twin Falls. In the Mountain Home banking market,3 Bank is the second largest commercial bank or thrift institution ("depository institution"), controlling deposits of \$25.4 million, representing 34.9 percent of total deposits in depository institutions in the market ("market deposits").4 Idaho Bank is the fourth largest depository institution in the market, controlling deposits of \$3.9 million, representing 5.4 percent of market deposits. Upon consummation of this proposal, Bank would remain the second largest depository institution and the third largest financial institution in the Mountain Home banking market, controlling deposits of

^{1.} State deposit data are as of June 30, 1993.

^{2.} See 12 U.S.C. § 1828(c)(5).

^{3.} The Mountain Home banking market includes the towns of Mountain Home and Grand View, Idaho.

^{4.} Market data for the Mountain Home banking market are as of June 30, 1993. Market share data are based on calculations in which the deposits of thrift institutions are included at 50 percent. The Board previously has indicated that thrift institutions have become, or have the potential to become, major competitors of commercial banks. See Midwest Financial Group, 75 Federal Reserve Bulletin 386 (1989); National City Corporation, 70 Federal Reserve Bulletin 743 (1984). Thus, the Board has regularly included thrift deposits in the calculation of market share on a 50 percent weighted basis. See, e.g., First Hawaiian Inc., 77 Federal Reserve Bulletin 52 (1991).

\$29.3 million, representing 40.3 percent of market deposits. The Herfindahl-Hirschman Index ("HHI") would increase 376 points to 3833.5

The Board believes that several factors indicate that this increased level of concentration in the Mountain Home banking market, as measured by the HHI, overstates the competitive effects of this proposal. In particular, Idaho Bank is a very weak competitor and consummation of this proposal would have little effect on actual competition in the Mountain Home banking market. Idaho Bank has been the subject of state and federal supervisory actions, and the bank currently makes no loans in the market and does not employ a loan officer to serve the market. Idaho Bank's presence in the market is limited to a single bank branch with two tellers. The competitive effects of this proposal also are mitigated by the presence of a large credit union in the Mountain Home banking market. This credit union, the largest financial institution in the Mountain Home banking market, is open for membership to almost all residents in the market.

The Board also has considered the public benefits of the proposal on the convenience and needs of the community to be served. Idaho Bank is the only depository institution in Grand View, Idaho, and Bank has committed to maintain the Grand View branch of Idaho Bank as a full-service branch, employ a full-time loan officer, and offer loans and a full range of other banking services.

The Attorney General indicated that consummation of this proposal would not have a significantly adverse effect on competition in the Mountain Home banking market or any other relevant banking market. Neither the OCC nor the FDIC objected to consummation of the proposal or indicated that the proposal would have any significantly adverse competitive effects. Accordingly, based on all the facts of record, including the number of mitigating competitive considerations and benefit to the convenience and needs of the communities served, the Board concludes that consummation of this proposal is not likely to result in any significantly adverse effect on competition in the Mountain Home banking market.

In the Boise, Payette-Ontario-Weiser, Blaine County, and Twin Falls banking markets, consummation would result in slight increases in the concentration of market deposits that do not exceed the Department of Justice Merger Guidelines.⁶ In addition, numerous competitors would remain in all these markets. Based on all the facts of record, the Board concludes that consummation of this proposal would not result in significantly adverse effects on competition in these or any other relevant banking market.

Other Considerations

Based on all the facts of record, the Board concludes that considerations relating to the financial and managerial resources and future prospects of Bank and Idaho Bank, and the convenience and needs of the community to be served,7 also are consistent with approval of the applications filed by Bank under the Bank Merger Act.

The Board also has reviewed the factors it is reguired to consider in applications for the establishment and operation of branches under the Federal Reserve Act.8 Based on all the facts of record, the Board believes that these factors, including the financial condition of Bank, the general character of its management, and the proposed exercise of corporate pow-

^{5.} Under the revised Department of Justice Merger Guidelines, 49 Federal Register 26,823 (June 29, 1984), a market in which the post-merger HHI is between 1000 and 1800 is considered moderately concentrated. A market in which the post-merger HHI is above 1800 is considered to be highly concentrated. In such markets, the Justice Department is likely to challenge a merger that increases the HHI by more than 50 points. The Justice Department has informed the Board that a bank merger or acquisition generally will not be challenged (in the absence of other factors indicating anti-competitive effects) unless the post-merger HHI is at least 1800 and the merger or acquisition increases the HHI by at least 200 points. The Justice Department has stated that the higher than normal threshold for an increase in the HHI when screening bank mergers and acquisitions for anti-competitive effects implicitly recognizes the competitive effect of limited-purpose lenders and other non-depository financial entities.

^{6.} Market share data for the four remaining banking markets are as of June 30, 1992. Upon consummation of this proposal, Bank would become the largest of nine depository institutions in the Boise banking market, controlling deposits of \$902 million, representing 45 percent of market deposits. The HHI would increase 37 points to 2764. Bank would become the second largest of ten depository institutions in the Payette-Ontario-Weiser banking market, controlling deposits of \$101 million, representing 24 percent of market deposits. The HHI would increase 91 points to 1741. In the Blaine County banking market, Bank would become the smallest of four depository institutions, controlling deposits of \$11.5 million, representing 7 percent of market deposits. The HHI would increase 18 points to 3115. Finally, in the Twin Falls banking market, Bank would become the second largest of nine depository institutions, controlling deposits of \$214 million, representing 28.1 percent of market deposits. The HHI would increase 116 points to 2344.

^{7.} The Board has received comments from an individual ("Protestant") who claims generally that Bank's acquisition of Idaho Bank will result in the loss of a small bank that has been responsive to the credit needs of the community, and replace it with a large institution whose centralized decision making will not be responsive to community credit needs. The Board notes that Bank received a satisfactory rating for performance under the Community Reinvestment Act from the Federal Reserve Bank of San Francisco in September 1993. In addition, Bank has committed to expand the products and services offered to customers of Idaho Bank, increase lending to customers of Idaho Bank, and enhance the resulting institution's ability to service the needs of its delineated community. Based on all facts of record, the Board does not believe that Protestant's comments warrant denial of this proposal

^{8.} See 12 U.S.C. § 322.

ers, are consistent with approval and the purposes of section 9 of the Federal Reserve Act.

Conclusion

Based on the foregoing and other facts of record, the Board has determined that the applications should be, and hereby are, approved. The Board's approval is specifically conditioned upon compliance by Bank with all the commitments made in connection with these applications. For purposes of this action, these commitments and conditions are both considered conditions imposed in writing by the Board in connection with its findings and decisions, and, as such, may be enforced in proceedings under applicable law.

This transaction shall not be consummated before the thirtieth calendar day following the effective date of this order, or later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of San Francisco, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 20, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Angell, Kelley, LaWare, Lindsey, and Phillips.

JENNIFER J. JOHNSON Associate Secretary of the Board

ORDERS ISSUED UNDER FEDERAL RESERVE ACT

Republic National Bank of New York New York, New York

Order Granting Consent to Acquire Westpac (U.K.) Limited, London, England, and Granting Approval to Engage in Platinum and Palladium Dealing Activities Abroad

Republic National Bank of New York ("Republic Bank"), New York, New York, a national bank, has applied under section 25 of the Federal Reserve Act and section 211.5(c)(3) of the Board's Regulation K (12 C.F.R. 211.5(c)(3)) for consent to acquire 100 percent of the shares of Westpac (U.K.) Limited ("WUKL"), London, England, thereby acquiring indirectly Mase Westpac Limited ("Mase Westpac"), a U.K. bank wholly owned by WUKL, and for approval to engage through Mase Westpac and its subsidiaries

in trading and dealing in gold, silver, platinum and palladium, and in related activities.

Republic Bank is a subsidiary of Republic New York Corporation, a bank holding company. Republic New York Corporation is the 20th largest banking organization in the United States, with consolidated assets of \$38 billion as of September 30, 1993. WUKL had consolidated assets of approximately \$1.5 billion as of September 30, 1993. Republic Bank engages in, among other lines of business, gold and silver dealing and the provision of related depository services. Republic Bank proposes to acquire 100 percent of the shares of WUKL through Republic Overseas Banks Holding Corporation, a wholly owned operating subsidiary of RNB. WUKL's sole holding is its 100 percent interest in Mase Westpac, an authorized bank licensed and supervised by the Bank of England.

Mase Westpac is one of the leading dealers in gold, silver, platinum and palladium in world markets. Mase Westpac deals and makes markets in these metals in the spot and forward market, buys and sells options on precious metals, and is one of the five members of the London Gold Fixing, which twice daily sets the price that is a leading reference point in gold transactions in world markets.² As part of its precious metals business, Mase Westpac also clears bullion transactions, holds gold and silver for customers and counterparties, maintains deposits for customers and provides loans, leases and consignment agreements relating to gold and silver to gold and silver producers, fabricators and industrial users.

Mase Westpac and subsidiaries of Mase Westpac are members of the New York Commodity Exchange and the Sydney Futures Exchange, where they buy and sell options on gold and platinum for their own account and for the account of affiliates, in each case solely for hedging purposes. In addition, Republic Bank proposes to engage, through Mase Westpac and its subsidiaries, in other activities permissible to U.S. banking organizations under Regulation K, such as foreign exchange trading, project financing, gold and silver loans and leases, and extension of gold and silver consignment arrangements.

Mase Westpac conducts its business from its London headquarters and through subsidiaries and representative offices in Australia and Hong Kong.³ In

^{1.} Republic Bank had consolidated assets of \$28.8 billion as of September 30, 1993.

^{2.} Mase Westpac also is a market-making member of The London Bullion Market Association and a member of the London Platinum and Palladium Market. Mase Westpac's activities in precious metals are supervised and regulated by the Bank of England and the United Kingdom's Securities and Futures Authority.

^{3.} Mase Westpac Hong Kong Limited, Mase Westpac's direct wholly owned Hong Kong subsidiary, makes a market in gold and

addition, Mase Westpac maintains a state licensed branch in New York, New York, and does business through a wholly owned subsidiary, Mase Westpac, Inc. ("MWI"), a Delaware corporation based in New York, New York. The New York branch of Mase Westpac presently engages in precious metals trading and precious-metals-related financing activities. MWI currently holds a limited number of gold loans and does not propose to solicit or make any other loans or engage in any other activities. Republic Bank has committed to the Board that it will terminate all of the activities of MWI and Mase Westpac's New York branch within six months of the proposed acquisition, and that it will not reactivate MWI without the written consent of the Board.4 Mase Westpac also operates a representative office in Denver, which would be converted into a loan production office of Republic Bank within three months of consummation of the acquisi-

The activities of trading or dealing in platinum and palladium are not on the list of activities that the Board has found to be usual in connection with the transaction of banking or financial operations abroad. 12 C.F.R. 211.5(d).5 In reviewing proposals by U.S. banking organizations to engage in activities overseas, the Board has recognized that local institutions in other banking and financial systems are often permitted to engage in activities that have not been authorized for U.S. banking organizations under applicable U.S. laws and regulations. In the Federal Reserve Act, the Board has been granted authority to permit activities abroad that are generally not authorized in the

silver on a spot and forward basis. Mase Westpac also owns 91.3 percent of the shares of Mase Westpac Australia Limited ("Mase Westpac Australia"), a limited liability company based in Sydney, Australia, which trades precious metals for its own account, provides quotes in gold and silver and buys and sells precious metals options. Westpac Banking Corporation, WUKL's current owner, owns the additional shares of Mase Westpac Australia, which will be transferred to Republic Bank or Republic Overseas Banks Holding Corporation in connection with the sale of WUKL. Mase Westpac Australia holds a portfolio of gold loans to gold producers, markets precious metals hedging facilities, and wholly owns Mase Westpac Australia (NZ) Limited, which facilitates lending transactions between its parent and New Zealand customers.

United States for bank holding companies and subsidiaries of national banks. 12 U.S.C. § 601.

In the exercise of that authority, the Board has adhered to the policy that the foreign activities it authorizes should be of a banking or financial, as opposed to commercial, nature, or that such activities should be usual in connection with banking or other financial operations abroad. The Board also may consider whether the conduct of the activity would enable U.S. banking organizations to compete more effectively with foreign organizations in the provision of banking and other financial services. In addition, the Board takes into account whether the performance of the activity by a U.S. banking organization overseas is consistent with the prudent conduct and management of the company's banking and nonbanking organizations. In this regard the Board takes into consideration the risks inherent in the activity, especially whether those risks are of a type and nature normally associated with banking or activities conducted by banks. The Board also examines the effect of the activity on the capital and managerial resources of the U.S. banking organization.

The Board previously has approved trading and dealing in platinum in the spot, forward, futures and options markets in the U.K. by a subsidiary of a U.S. bank.6 The Board's determination in that instance that platinum dealing is financially-related and usual in connection with the transaction of banking or other financial operations in the United Kingdom applies equally to this case.7

The Board has not previously approved palladium trading outside the United States by either regulation or order. Several factors indicate that trading in palladium is not functionally different from trading in platinum. The markets for the two metals have much in common. Platinum and palladium are members of the same family of metals and generally trade in tandem; precious metals counterparties view trading in both metals as closely related. The London Platinum and Palladium Market ("LPPM"), a professional association of which Mase Westpac is a marketmaking member, sets standards, prices and settlement

^{4.} Section 211.5(b)(4) of Regulation K requires that United States banking organizations divest themselves of their stakes in any foreign subsidiary that engages directly or indirectly in any U.S. activity not permissible to an Edge corporation, unless the Board authorizes retention.

^{5.} National banks are authorized to trade gold and silver in the spot, forward and options markets for their own accounts, and such activities are permissible abroad under Regulation K. 12 U.S.C. 24 (Seventh) expressly authorizes national banks to buy and sell 'coin and bullion', which consistently has been read to include gold and silver coin and bullion. The Office of the Comptroller of the Currency ("OCC") has determined that national banks may buy and sell options on gold and silver for hedging purposes and for purposes of arbitrage. See, e.g., OCC Interpretive Letter No. 494 (December 20, 1989).

^{6.} J.P. Morgan & Co. Incorporated, 76 Federal Reserve Bulletin 552 (1990) ("Morgan").

^{7.} In making this determination in its Morgan order, the Board noted functional similarities between platinum dealing and the permissible activities of dealing in gold and silver bullion, the fact that the same types of participants are active in the gold, silver and platinum markets, and the substantial involvement of banking organizations in the U.K. platinum market. These factors remain unchanged in this case. Moreover, since the issuance by the Board of the Morgan order, the OCC has determined that national banks have the power to buy and sell platinum coins and bullion for their own account and the account of customers, thereby further establishing that platinum trading is of a banking or financial nature. OCC Interpretive Letter No. 553 (May 2, 1991).

procedures for platinum and palladium alike, and requires that any LPPM member that makes a market in platinum also make a market in palladium. According to Republic Bank, just as in the gold, silver and platinum markets, the predominant participants in the palladium market are central banks, institutional investors and industrial users. U.K. banks also play a major role in the palladium market, since six of the nine market-making members of the LPPM are banks. Finally, Republic Bank contends that its competitive position in foreign precious metals markets would be injured if Mase Westpac's palladium market-making activities were required to be discontinued, because the rules of the LPPM would then require Mase Westpac to cease making a market in platinum as well. Based on the foregoing and other facts of record, the Board has determined that the palladium dealing and related activities proposed by Republic Bank are financially-related and usual in connection with the transaction of banking or other financial operations in the United Kingdom.

In assessing whether the risks of platinum dealing were consistent with approval in the *Morgan* order, the Board noted the applicant's experience in managing the related risks posed by bullion dealing, as well as the applicant's proposed policies and procedures for assessing and controlling the risks of platinum dealing. As a major established dealer in bullion, platinum and palladium, Mase Westpac has substantial expertise and a record of success in managing the risks associated with the trading of platinum and palladium. Republic Bank, which also has expertise in trading bullion under existing risk limitation and control policies of its own, has stated that it plans to integrate Mase Westpac's operations into Republic Bank's existing risk management systems.

Republic Bank's investment in WUKL will be relatively minor in relation to Republic Bank's total capital. In view of the size of the investment, Republic Bank's and Mase Westpac's experience in precious metals trading and management of the associated risks, and Republic Bank's plans to integrate Mase Westpac into Republic Bank's existing risk management and monitoring systems, it does not appear that the conduct of platinum and palladium trading and the other activities proposed to be conducted would result in undue risk to Republic Bank.

Based on the foregoing and other facts of record, and the fact that the proposed acquisition would enhance Republic Bank's ability to compete in the precious metals markets outside the United States through expanded global precious metals trading capability and Mase Westpac's membership in the London Gold Fixing, the Board has determined that the proposed acquisition should be approved. The Board

has further determined on the basis of the record that the conduct of the proposed activities is consistent with the supervisory purposes of the Federal Reserve Act. Accordingly, the application is approved. Approval of this application is specifically conditioned on compliance by Republic Bank with the commitments made in connection with this application. The commitments referred to above are conditions imposed in writing by the Board in connection with its decision, and may be enforced under applicable law against Republic Bank and its affiliates.

By order of the Board of Governors, effective December 22, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Kelley, Lindsey, and Phillips. Absent and not voting: Governors Angell and Laware.

JENNIFER J. JOHNSON Associate Secretary of the Board

ORDERS ISSUED UNDER INTERNATIONAL BANKING ACT

Banco de Chile Santiago, Republic of Chile

Order Approving Establishment of an Agency

Banco de Chile ("Bank"), Santiago, Republic of Chile, a foreign bank within the meaning of the International Banking Act ("IBA"), has applied under section 7(d) of the IBA (12 U.S.C. § 3105(d)) to establish a state-licensed agency in Miami, Florida. A foreign bank must obtain the approval of the Board to establish a branch, agency, commercial lending company, or representative office in the United States under the Foreign Bank Supervision Enhancement Act of 1991 ("FBSEA"), which amended the IBA.

Notice of the application, affording interested persons an opportunity to submit comments, has been published in a newspaper of general circulation in Miami, Florida (*The Miami Herald*, November 2, 1992). The time for filing comments has expired and no public comments were received.

Bank is the largest private bank in Chile with consolidated assets of \$5.2 billion as of June 30, 1993. The shares of Bank are widely held and are listed and traded on the Santiago Stock Exchange. Bank is authorized to provide a full range of banking services and concentrates in corporate lending and trade finance.

Bank has six subsidiaries in Chile engaged in financial services, and has investments in four Chilean

servicing companies engaged in ATM network and credit card administration and securities activities. Bank maintains a federal branch in New York and a representative office in Frankfurt, Germany.

Bank does not engage in nonbanking activities in the United States and will remain a qualifying foreign banking organization under Regulation K after establishing the proposed agency. 12 C.F.R. 211.23(b).

In order to approve an application by a foreign bank to establish an agency in the United States, the IBA and Regulation K require the Board to determine that the foreign bank engages directly in the business of banking outside of the United States and has furnished to the Board the information it needs to assess adequately the application. The Board also must determine that each of the foreign bank applicant and any foreign bank parent is subject to comprehensive supervision or regulation on a consolidated basis by its home country supervisor. 12 U.S.C. § 3105(d)(2), 12 C.F.R. 211.24(c)(1). The IBA and Regulation K also permit the Board to take into account additional standards. 12 U.S.C. § 3105(d)(3)-(4); 12 C.F.R. 211.24(c)(2).

Bank engages directly in the business of banking outside of the United States through its banking operations in Chile. Bank also has provided the Board with the information necessary to assess the application through submissions that address the relevant issues.

Regulation K provides that a foreign bank will be considered to be subject to comprehensive supervision or regulation on a consolidated basis if the Board determines that the foreign bank is supervised and regulated in such a manner that its home country supervisor receives sufficient information on the bank's worldwide operations, including its relationship to any affiliate, to assess the bank's overall financial condition and its compliance with law and regulation. 1 12 C.F.R. 211.24(c)(1). In making its determination on this application, the Board considered the following information.

The Superintendency of Banks and Financial Institutions (the "Superintendency") is the primary supervisory authority for all banks in Chile and, as such, is the home country supervisor of Bank. The Superintendency authorizes the creation of new banks through issuance of licenses, and monitors the compliance of existing banks with applicable laws and regulations. In addition, approval of the Superintendency is required for Chilean banks to complete mergers and acquisitions, to engage in new activities and to establish operations outside of Chile. The Central Bank of Chile exercises a supplementary role in supervising Chilean banks through its control of reserve requirements, interest rates, and foreign exchange. The Central Bank consults with the Superintendency regarding the condition of Chilean banks and receives regulatory reports submitted by banks to the Superintendency.

The Superintendency obtains information on Bank's operations through on-site examinations and its review of audit and financial reports submitted by Bank. The Superintendency conducts targeted on-site examinations approximately once a year. These targeted examinations focus on specific areas of Bank's operaincluding accounting procedures, processes, compliance with lending limits, conformity with restrictions on insider transactions, internal controls, or policies and procedures for compliance with applicable laws and regulations. Bank's asset quality also is reviewed annually. In addition, the Superintendency conducts surprise on-site examinations as necessary. The Superintendency receives frequent and comprehensive reports on Bank's condition and operations on both an unconsolidated and consolidated basis. Bank is required annually to file financial statements audited by its external auditors.

In addition to the on-site reviews conducted by the Superintendency, Bank's external auditors conduct on-site reviews of Bank four times a year. Bank's external auditors review Bank's electronic data processing and computer systems, internal controls, financial statements, tax accounting, and policies and procedures.

With respect to Bank's internal methods of monitoring its worldwide operations. Bank relies on internal audits and reporting requirements. As noted above, the Superintendency reviews Bank's internal controls during its examinations and Bank provides reports to the Superintendency on the scope of its internal audits.

The Superintendency receives information and monitors the condition of Bank's affiliates through financial reporting requirements, coordination with other regulatory authorities, and the imposition of lending limits. Bank's financial leasing and financial consulting subsidiaries, as well as the servicing com-

^{1.} In assessing this standard, the Board considers, among other factors, the extent to which the home country supervisor:

⁽i) Ensures that the bank has adequate procedures for monitoring and controlling its activities worldwide;

⁽ii) Obtains information on the condition of the bank and its subsidiaries and offices through regular examination reports, audit reports, or otherwise;

⁽iii) Obtains information on the dealings with and relationships between the bank and its affiliates, both foreign and domestic;

⁽iv) Receives from the bank financial reports that are consolidated on a worldwide basis, or comparable information that permits analysis of the bank's financial condition on a worldwide consolidated basis;

⁽v) Evaluates prudential standards, such as capital adequacy and risk asset exposure, on a worldwide basis. These are indicia of comprehensive, consolidated supervision. No single factor is essential, and other elements may inform the Board's determination.

panies in which it holds shares, are supervised by the Superintendency. These companies provide periodic financial reports to the Superintendency. The Superintendency of Securities and Insurance (the "Superintendency of Securities") supervises Bank's subsidiaries in mutual fund administration and the securities brokerage business through annual examinations and the review of regular financial reports. These subsidiaries are also subject to general regulations imposed by the Superintendency. The Superintendencies of Banks and of Securities are sister agencies under the Chilean Ministry of Finance (the "Ministry"), and engage in both formal and informal arrangements to share supervisory information through the Ministry.

Chilean banking laws prohibit the extension of credit to affiliates on terms more favorable than those offered to third parties. Aggregate loans by Bank to affiliates may not exceed five percent of Bank's total paid-in capital and reserves. The Superintendency receives a number of reports concerning transactions and relationships between Bank and its affiliates.

Based on all of the facts of record, which include the information described above, the Board concludes that Bank is subject to comprehensive supervision and regulation on a consolidated basis by its home country supervisor.

In considering this application, the Board also has taken into account the additional standards set forth in section 7 of the IBA. 12 U.S.C. § 3105(d)(3)-(4). Bank has received the consent of its home country supervisor to establish the proposed agency. In addition, subject to certain conditions, the Superintendency has agreed to cooperate in providing the Board with information on Bank's operations.

Chile has not adopted the risk-based capital standards of the Basle Accord. Under Chilean law, Bank's total liabilities may not exceed a specified multiple of capital and reserves. Bank is in compliance with this requirement. Bank has also provided capital information in a risk-based format and Bank's capital is in excess of the minimum levels that would be required by the Basle Accord and is considered equivalent to capital that would be required of a U.S. banking organization.

Managerial and other financial resources of Bank are also considered consistent with approval.² Bank, which has a branch and representative office outside Chile, appears to have the experience and capacity to support the additional office in the United States. In

addition, Bank has established controls and procedures for its U.S. offices to ensure compliance with U.S. law. Under the IBA, the proposed state-licensed agency may not engage in any type of activity that is not permissible for a federally licensed branch without the Board's approval.

Finally, Bank has committed that it will make available to the Board such information on the operations of Bank and any affiliate of Bank that the Board deems necessary to determine and enforce compliance with the IBA, the Bank Holding Company Act of 1956, as amended, and other applicable federal law, to the extent not prohibited by law or regulation. The Board has reviewed relevant provisions of Chilean law and has communicated with the appropriate government authorities concerning access to information. The Board notes that Bank may not provide certain information without the consent of third parties. In this regard, Bank has committed to cooperate with the Board to obtain approvals or consents that may be required for the Board to gain access to information that the Board may request. In light of these commitments and other facts of record, and subject to the condition described below, the Board concludes that Bank has provided adequate assurances of access to any necessary information the Board may request.

On the basis of all of the facts of record, and subject to the commitments made by Bank, as well as the terms and conditions set forth in this order, the Board has determined that Bank's application to establish an agency should be, and hereby is, approved. Should any restrictions on access to information regarding the operations or activities of Bank and any of its affiliates subsequently interfere with the Board's ability to determine the safety and soundness of Bank's U.S. operations or the compliance by Bank or its affiliates with applicable federal statutes, the Board may require termination of any of Bank's direct or indirect activities in the United States. Approval of this application is also specifically conditioned on compliance by Bank with the commitments made in connection with this application, and with the conditions contained in this order.3 The commitments and conditions referred to above are conditions imposed in writing by the Board in connection with its decision, and may be enforced in proceedings under 12 U.S.C. § 1818 or 12 U.S.C. § 1847 against Bank, its offices and its affiliates.

^{2.} As a result of government intervention to deal with a financial crisis in Chile in the 1980s, Bank is required to make payments to the Central Bank under a subordinated commitment. Despite this requirement, Bank has maintained risk-based capital ratios consistent with the Basle capital standards.

^{3.} The Board's authority to approve the establishment of the proposed agency parallels the continuing authority of the State of Florida Department of Banking and Finance to license offices of a foreign bank. The Board's approval of this application does not supplant the authority of the State of Florida, and its agent, the Department of Banking and Finance, to license the proposed agency of Bank in accordance with any terms or conditions that the Department of Banking and Finance may impose.

By order of the Board of Governors, effective December 16, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

> JENNIFER J. JOHNSON Associate Secretary of the Board

Dah Sing Bank, Ltd. Hong Kong

Order Approving Establishment of a Branch

Dah Sing Bank, Ltd. ("Bank"), Hong Kong, a foreign bank within the meaning of the International Banking Act ("IBA"), has applied under section 7(d) of the IBA (12 U.S.C. § 3105(d)) to establish a federally licensed branch in Alhambra, California. A foreign bank must obtain the approval of the Board to establish a branch, agency, commercial lending company, or representative office in the United States under the Foreign Bank Supervision Enhancement Act of 1991 ("FBSEA"), which amended the IBA.

Notice of the application, affording interested persons an opportunity to submit comments, has been published in a newspaper of general circulation (Star-News, Pasadena, California, September 20, 1991). The time for filing comments has expired and the Board has considered the application and all comments received.

Bank, with assets of \$2.3 billion as of June 30, 1993, is the 18th largest bank in Hong Kong. 1 Bank operates 34 branch offices in Hong Kong and controls eight direct domestic subsidiaries engaged in banking, investment, real estate and insurance activities. Bank also has one branch in the United States.

The proposed branch would engage in trade finance, commercial mortgages, and provide letters of credit, including advising and remittance, services for Bank's Hong Kong operations. The proposed branch intends to take wholesale deposits from both Hong Kong and local customers, but would not take retail deposits.² Bank, which currently operates a branch in San Francisco, California, does not engage in nonbanking activities in the United States and would continue to be a qualifying foreign banking organization within the meaning of Regulation K after establishing the proposed branch (12 C.F.R. 211.23(b)).3

Bank has received approvals to establish the proposed branch from the Hong Kong Monetary Authority ("Monetary Authority") and the Office of the Comptroller of the Currency ("OCC").

In order to approve an application by a foreign bank to establish a branch in the United States, the IBA and Regulation K require the Board to determine that the foreign bank applicant engages directly in the business of banking outside the United States, and has furnished to the Board the information it needs to assess adequately the application. The Board must also determine that the foreign bank applicant is subject to comprehensive supervision or regulation on a consolidated basis by its home country supervisors (12 U.S.C. § 3105(d)(2); 12 C.F.R. 211.24(c)(1)). The Board may also take into account additional standards as set forth in the IBA (12 U.S.C. § 3105(d)(3)-(4)) and Regulation K (12 C.F.R. 211.24(c)).

Bank engages directly in the business of banking outside of the United States through its banking operations in Hong Kong. Bank also has provided the Board with the information necessary to assess the application through submissions that address the relevant issues.

Regulation K provides that a foreign bank will be considered to be subject to comprehensive supervision or regulation on a consolidated basis if the Board determines that the bank is supervised and regulated in such a manner that its home country supervisor receives sufficient information on the foreign bank's worldwide operations, including the relationship of the foreign bank to any affiliate, to assess the overall financial condition of the foreign bank and its compliance with law and regulation (12 C.F.R. 211.24(c)(1)).4

^{1.} Data are as of December 31, 1992, unless otherwise noted.

^{2.} In accepting deposits the proposed branch would not acquire or accept domestic retail deposits that require deposit insurance (12 U.S.C. § 3104(c)). Bank also proposes to enter into an agreement with the Federal Reserve to limit its deposit-taking to that permissible for a corporation organized under section 25A of the Federal Reserve Act (an Edge corporation). 12 U.S.C. § 611 et seq.

^{3.} Bank is a wholly owned subsidiary of Dah Sing Financial Holdings Limited, Hong Kong ("DSFH"), a company that is traded on the Hong Kong stock exchange. Dah Sing Investment Limited, Bermuda ("DSI-Bermuda"), directly owns a 7.4 percent interest in DSFH and indirectly controls an additional 24.4 percent through a subsidiary, Dah Sing Investments Limited, Hong Kong. DSI-Bermuda and DSFH have no U.S. operations other than through Bank. DSI-Bermuda is owned by David S. Y. Wong, who is chairman of both DSFH and Bank. Other large shareholders of DSFH include Mitsui Trust & Banking Company, Ltd., Japan, and Sumitomo Life Insurance Company, Japan, which own 17 percent and 8.5 percent, respectively, of DSFH's shares.

^{4.} In assessing this standard, the Board considers, among other factors, the extent to which the home country supervisors:

⁽i) Ensure that the bank has adequate procedures for monitoring and controlling its activities worldwide:

⁽ii) Obtain information on the condition of the bank and its subsidiaries and offices through regular examination reports, audit reports, or otherwise;

⁽iii) Obtain information on the dealings with and relationship between the bank and its affiliates, both foreign and domestic;

⁽iv) Receive from the bank financial reports that are consolidated on a worldwide basis, or comparable information that permits

In making its determination under this standard, the Board has considered the following information.

The Monetary Authority is Bank's primary supervisor. The Monetary Authority is authorized by law to regulate the domestic and foreign activities of Hong Kong licensed banks. The duties of the Monetary Authority include licensing banks, enforcing the provisions of Hong Kong's banking laws, and conducting examinations of banks and their overseas branches and representative offices. In executing its responsibilities, the Monetary Authority normally conducts annual examinations of Bank, which alternate between off-site and on-site examinations.

The on-site examination includes evaluation of operations, performance, and financial condition. In assessing Bank's condition, examiners evaluate such factors as credit quality, concentrations of credit, adequacy of lending policies and credit administration procedures, capital adequacy, earnings performance, liquidity, adequacy of loan loss provisions, internal controls, management, and compliance with laws and regulations.

Periodic discussions are held with Bank's senior management to discuss current performance, immediate prospects, and issues related to the overall financial market. Further, following the completion of Bank's annual audit, the Monetary Authority holds detailed discussions with the bank's external auditor and bank management on prudential matters, including the results of the audit, adequacy of loan provisions, and compliance with the provisions of Hong Kong banking law.

In addition to direct oversight through the examination process, the Monetary Authority receives frequent and comprehensive financial reports from Bank on a worldwide consolidated basis. The Monetary Authority is empowered to request an external auditor to report on the accuracy of reports submitted and the adequacy of the internal control systems for producing the reports.

A number of enforcement powers are available to the Monetary Authority to use in its supervision of Hong Kong banks. The Monetary Authority may require a bank to take corrective action to correct any financial, operational or managerial deficiencies, appoint an outside advisor to the bank to effect necessary changes, or in the extreme, assume control of the bank. Hong Kong law also provides for the imposition of criminal penalties on bank directors and managers resulting from a conviction of failure to comply accurately with reporting requirements.

The establishment of a foreign branch or representative office requires the prior approval of the Monetary Authority. The Monetary Authority evaluates the adequacy and effectiveness of branch management, the internal control systems of the branch, and procedures at the head office for monitoring and controlling the branch. Every approved foreign branch is required to make periodic reports to the Monetary Authority on the functions and activities of the branch and to allow examiners access to the branch's books and records.

With respect to monitoring of dealings and relationships with affiliates, the Monetary Authority is empowered to obtain any information on an associated or affiliated company of a Hong Kong banking institution. Hong Kong banking law limits Bank's transactions with subsidiaries and affiliates. Bank is required to report affiliate-related transactions to the Monetary Authority quarterly.

The Monetary Authority generally evaluates the financial position and performance of a a bank and its financial subsidiaries on a consolidated basis. This evaluation includes a review of capital adequacy, large exposures, and concentration risks. In addition, where a bank or banking group is part of a larger group which may include non-bank parent or affiliated companies, the Monetary Authority may seek wider voluntary consolidated reporting, or seek sufficient information to ensure that it understands the relationship between the bank and the rest of the group.

Based on all the facts of record, which include the information described above, the Board concludes that Bank is subject to comprehensive supervision and regulation on a consolidated basis by its home country supervisor.

The Board has also taken into account the additional standards set forth in section 7 of the IBA and Regulation K. (See 12 U.S.C. § 3105(d)(3)-(4); 12 C.F.R. 211.24(c)(2)). As noted above, Bank has received the consent of the Monetary Authority to establish the proposed branch. In addition, subject to certain conditions, the Monetary Authority may share information on Bank's operations with other supervisors, including the Board.

Bank must comply with Hong Kong capital standards. Hong Kong has voluntarily subscribed to the Basle Capital Accord ("Accord"). Bank's capital exceeds the minimum standards of the Accord and is equivalent to capital that would be required of a U.S. banking organization conducting similar banking activities. Managerial and other financial resources of Bank are also considered consistent with approval, and

analysis of the bank's financial condition on a worldwide consolidated basis;

⁽v) Evaluate prudential standards, such as capital adequacy and risk asset exposure, on a worldwide basis.

These are indicia of comprehensive, consolidated supervision. No single factor is essential and other elements may inform the Board's determination.

Bank appears to have the experience and capacity to support the proposed branch. Bank has established controls and procedures for its U.S. offices to ensure compliance with U.S. law.

Bank and its parents have committed to make available to the Board such information on the operations of Bank and any affiliate of Bank that the Board deems necessary to determine and enforce compliance with the IBA, the Bank Holding Company Act of 1956, as amended, and other applicable Federal law, to the extent not prohibited by law or regulation. The Board has reviewed the restrictions on disclosure in relevant jurisdictions in which Bank operates and has communicated with the Monetary Authority concerning access to information. The Board notes that Bank, and certain of its affiliates, may not provide information without the consent of third parties. Bank has committed to cooperate with the Board to obtain any approvals or consents that may be needed to gain access to information that may be requested by the Board. In light of these commitments and other facts of record, and subject to the condition described below, the Board concludes that Bank has provided adequate assurances of access to any necessary information the Board may request.

On the basis of all the facts of record, and subject to the commitments made by Bank, as well as the terms and conditions set forth in this order, the Board has determined that Bank's application to establish a branch should be, and hereby is, approved. If any restrictions on access to information on the operations or activities of Bank and any of its affiliates subsequently interfere with the Board's ability to determine the safety and soundness of Bank's U.S. operations or compliance by Bank or its affiliates with applicable Federal statutes, the Board may require termination of any of Bank's direct or indirect activities in the United States or, in the case of any such operation licensed by the OCC, recommend termination of such operation. Approval of this application is also specifically conditioned on compliance by Bank and its parent companies with the commitments made in connection with this application, and with the conditions contained in this order.5 The commitments and conditions referred to above are conditions imposed in writing by the Board in connection with its decision, and may be enforced in proceedings under 12 U.S.C. § 1818 or

12 U.S.C. § 1847 against Bank, including its offices and its affiliates.

By order of the Board of Governors, effective December 16, 1993.

Voting for this action: Vice Chairman Mullins and Governors Angell, Kelley, LaWare, Lindsey, and Phillips. Absent and not voting: Chairman Greenspan.

> JENNIFER J. JOHNSON Associate Secretary of the Board

KorAm Bank Seoul, Korea

Order Approving Establishment of a Branch

KorAm Bank ("Bank"), Seoul, Korea, a foreign bank within the meaning of the International Banking Act ("IBA"), has applied under section 7(d) of the IBA (12 U.S.C. § 3105(d)) to establish a federally licensed branch in Los Angeles, California. A foreign bank must obtain the approval of the Board to establish a branch, agency, commercial lending company, or representative office in the United States under the Foreign Bank Supervision Enhancement Act of 1991 ("FBSEA"), which amended the IBA.

Notice of the application, affording interested persons an opportunity to submit comments, has been published in a newspaper of general circulation (Los Angeles Times, October 13, 1992). The time for filing comments has expired and the Board has considered the application and all comments received.

Bank, with assets of \$7.5 billion, is the eighth largest bank in Korea. Bank operates 53 branch offices and has two affiliates in Korea.²

The proposed branch would limit its activities to those that are incidental to international or foreign business, including: deposit-taking from foreign governments and foreign persons, and internationally related credit activities, payments and collections, foreign exchange, and investment advisory activities. Bank does not engage in nonbanking activities in the United States and would be a qualifying foreign banking organization within the meaning of Regulation K

1. Financial data are as of June 30, 1993, unless otherwise noted.

^{5.} The Board's authority to approve the establishment of the proposed branch office parallels the continuing authority of the OCC to license offices of a foreign bank. The Board's approval of this application does not supplant the authority of the OCC to license the proposed branch office of Bank in accordance with any terms or conditions that the OCC may impose.

^{2.} As of December 31, 1992, Bank of America NT & SA ("BofA") directly owned approximately 31 percent of Bank's shares. As of the same date, a group of 11 Korean corporate shareholders held an aggregate of 25 percent of Bank's stock, with the remaining 44 percent held by the public and the employee shareholder association. In light of BofA's ownership interest in Bank, Bank will limit the activities conducted at the branch to those that are permissible for a corporation organized under section 25A of the Federal Reserve Act (an Edge corporation). 12 U.S.C. § 611 et seq.

after establishing the proposed branch (12 C.F.R. 211.23(b)).

Bank has received approvals to establish the proposed branch from the Korean Ministry of Finance ("Ministry") and the Office of Bank Supervision and Examination ("OBSE") of the Bank of Korea and has applied for approval to the Office of the Comptroller of the Currency ("OCC").

In order to approve an application by a foreign bank to establish a branch in the United States, the IBA and Regulation K require the Board to determine that the foreign bank applicant engages directly in the business of banking outside the United States, and has furnished the Board with the information it needs to assess adequately the application. The Board also must determine that the foreign bank applicant is subject to comprehensive supervision or regulation on a consolidated basis by its home country supervisors (12 U.S.C. § 3105(d)(2); 12 C.F.R. 211.24(c)(1)). The Board may also take into account additional standards as set forth in the IBA (12 U.S.C. 3105(d)(3)-(4)) and Regulation K (12 C.F.R. 211.24(c)).

Bank engages directly in the business of banking outside of the United States through its banking operations in Korea. Bank also has provided the Board with the information necessary to assess the application through submissions that address the relevant issues.

Regulation K provides that a foreign bank will be considered to be subject to comprehensive supervision or regulation on a consolidated basis if the Board determines that the bank is supervised and regulated in such a manner that its home country supervisor receives sufficient information on the foreign bank's worldwide operations, including the relationship of the foreign bank to any affiliate, to assess the overall financial condition of the foreign bank and its compliance with law and regulation (12 C.F.R. 211.24(c)(1)).³

In making its determination under this standard, the Board has considered the following information.

Bank's primary supervisor is the OBSE, which monitors Bank's compliance with all banking laws and regulations and conducts examinations of Bank. In addition, the Ministry has legal authority over Bank's international operations, including the approval of the establishment of foreign banking offices, promulgation of regulations on those operations, reporting requirements, and examination of the international banking operations. The OBSE and Ministry coordinate their supervision of Bank; the Ministry has delegated its examination authority for the international activities of Bank to the OBSE.

The OBSE conducts special and regular on-site examinations of Bank's operations. Special examinations dealing with specific matters and/or specific branch offices, including foreign offices, are carried out when determined necessary by the OBSE. Regular, unannounced examinations of Bank's head office are conducted annually. These examinations normally focus on asset quality, internal controls, the accuracy of financial reports, and compliance with applicable banking laws. In addition, each year approximately 10 percent of Bank's branches are randomly selected to undergo an on-site examination. In connection with its examination, the OBSE has the power to require banking institutions to adjust the book value of their assets, establish reserves against unsound assets, or remove from the books any asset which, in its judgement, has no true value.

As previously indicated, examinations of Bank's international operations are conducted by the OBSE under the delegated authority of the Ministry. Foreign offices of Korean banking institutions undergo regular on-site examinations by the OBSE generally every two years. The focus of these examinations generally parallels that of domestic branch examinations, with an additional review of compliance with the banking laws and regulations of the foreign jurisdiction in which such offices are located. In the year when the OBSE examination is not conducted, Bank's audit department conducts an audit of Bank's foreign offices. The focus of the audit is determined in conjunction with Bank's field audit program, which is submitted to the Ministry annually.

The OBSE also reviews Bank's operations through the periodic receipt of consolidated financial reports. Bank is required to submit a balance sheet and a report outlining its operations on a monthly basis; These reports allow the OBSE to monitor Bank's capital, liquidity and long- and short-term lending operations. The OBSE may also require any other reports that it deems necessary.

With respect to the monitoring of relationships with

^{3.} In assessing this standard, the Board considers, among other factors, the extent to which the home country supervisors:

⁽i) Ensure that the bank has adequate procedures for monitoring and controlling its activities worldwide;

⁽ii) Obtain information on the condition of the bank and its subsidiaries and offices through regular examination reports, audit reports, or otherwise;

⁽iii) Obtain information on the dealings with and relationship between the bank and its affiliates, both foreign and domestic;

⁽iv) Receive from the bank financial reports that are consolidated on a worldwide basis, or comparable information that permits analysis of the bank's financial condition on a worldwide consolidated basis:

⁽v) Evaluate prudential standards, such as capital adequacy and risk asset exposure, on a worldwide basis.

These are indicia of comprehensive, consolidated supervision. No single factor is essential and other elements may inform the Board's determination.

affiliates, Bank must consolidate the financial statements of any subsidiaries in which it is the largest shareholder. Further, Bank must obtain approval from the OBSE to acquire 10 percent or more of a company's shares. The OBSE recognizes as an affiliate any company that is 10 percent or more owned. Additionally, the OBSE reviews all extensions of credit to affiliates.

A number of enforcement powers are available to the OBSE in its supervision of Korean commercial banks. The Bank of Korea may, upon recommendation of the OBSE, suspend bank officers who are involved in willful violations of banking laws and regulations, who decline to follow its orders and instructions, or who otherwise hinder sound banking operations, and may recommend their dismissal to the bank's shareholders. Similarly, the Bank of Korea may suspend a bank's operations or cancel its license if the bank is in violation of relevant banking laws and regulations, declines to follow its orders and instructions, or conducts unsound business.

The OBSE also may review information provided through Bank's internal systems. Bank monitors its own operations through internal audits that review financial performance as well as compliance with applicable banking laws and regulations. The proposed Los Angeles branch will be under the direct supervision and control of Bank's international department. The branch will file monthly, quarterly, semi-annual and annual reports with the international department and various other departments of the head office. As previously indicated, Bank's audit department intends to conduct regular on-site examinations of the proposed branch every other year, alternating with the examination of the OBSE. The proposed branch also will be audited once a year by an outside accounting firm. Further, the branch will retain local counsel to advise it on a continuing basis regarding regulatory requirements. A senior member of the official staff of the proposed branch will be designated as the compliance officer.

Based on all the facts of record, which include the information described above, the Board concludes that Bank is subject to comprehensive supervision and regulation on a consolidated basis by its home country supervisors.

The Board has also taken into account the additional standards set forth in section 7 of the IBA and Regulation K. (See 12 U.S.C. § 3105(d)(3)-(4); 12 C.F.R. 211.24(c)(2)). As noted above, Bank has received the consent of the Ministry and the OBSE to establish the proposed federal branch. In addition, subject to certain conditions, the Ministry and the OBSE may share information on Bank's operations with other supervisors, including the Board.

Bank must comply with risk-based capital standards adopted by Korea. In addition, Bank's capital is in excess of the minimum levels that would be required by the Basle Capital Accord and is considered equivalent to capital that would be required of a U.S. banking organization. Managerial and other financial resources of Bank are also considered consistent with approval, and Bank appears to have the experience and capacity to support the proposed branch. Bank has established controls and procedures for its U.S. offices to ensure compliance with U.S. law.

Bank has committed to make available to the Board such information on the operations of Bank and any affiliate of Bank that the Board deems necessary to determine and enforce compliance with the IBA, the Bank Holding Company Act of 1956, as amended, and other applicable Federal law, to the extent not prohibited by law or regulation. The Board has reviewed the restrictions on disclosure in Korea and has communicated with certain government authorities concerning access to information. The Board notes that Bank, and certain of its affiliates may not provide information without the consent of third parties. In this regard, Bank has committed to cooperate with the Board to obtain any approvals or consents that may be needed to gain access to information that may be requested by the Board. In light of these commitments and other facts of record, and subject to the condition described below, the Board concludes that Bank has provided adequate assurances of access to any necessary information the Board may request.

On the basis of all the facts of record, and subject to the commitments made by Bank, as well as the terms and conditions set forth in this order, the Board has determined that Bank's application to establish a federal branch should be, and hereby is, approved. If any restrictions on access to information on the operations or activities of Bank and any of its affiliates subsequently interfere with the Board's ability to determine the safety and soundness of Bank's U.S. operations or compliance by Bank or its affiliates with applicable Federal statutes, the Board may require termination of any of Bank's direct or indirect activities in the United States or, in the case of any such operation licensed by the OCC, recommend termination of such operation. Approval of this application is also specifically conditioned on compliance by Bank with the commitments made in connection with this application, and with the

^{4.} The Bank of Korea has required Korean banks to meet transitional risk-based capital standards until January 1, 1996, when Korean banks must be in conformance with the Basle minimum standards. For the period of January 1, 1994 to December 31, 1995, Korean banks must maintain a total risk-based capital ratio of at least 7.25 percent. As noted above, Bank's capital exceeds levels required by the Basle Capital Accord.

conditions contained in this order.⁵ The commitments and conditions referred to above are conditions imposed in writing by the Board in connection with its decision, and may be enforced in proceedings under 12 U.S.C. § 1818 or 12 U.S.C. § 1847 against Bank, including its offices and its affiliates.

By order of the Board of Governors, effective December 22, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins and Governors Kelley, Lindsey, and Phillips. Absent and not voting: Governors Angell and LaWare.

JENNIFER J. JOHNSON Associate Secretary of the Board

ACTIONS TAKEN UNDER THE FEDERAL DEPOSIT INSURANCE CORPORATION IMPROVEMENT ACT

By the Board

Montgomery County Bancshares, Inc. Little Rock, Arkansas

Order Approving Application to Acquire a Branch of a Savings Bank

Montgomery County Bancshares, Inc., Little Rock, Arkansas ("Montgomery"), a bank holding company within the meaning of the Bank Holding Company Act ("BHC Act"), proposes to purchase certain assets and assume certain liabilities of the Camden, Arkansas, branch office of First Financial Bank, F.S.B., El Dorado, Arkansas ("First Financial"), by merging the office with Montgomery's wholly owned, nonmember, state-chartered bank subsidiary, Union State Bank, Junction City, Arkansas ("Union Bank"). Montgomery has requested Board approval of this transaction pursuant to section 5(d)(3) of the Federal Deposit Insurance Act (12 U.S.C. § 1815(d)(3) ("FDI Act")), as amended by the Federal Deposit Insurance Corporation Improvement Act of 1991 (12 U.S.C. § 1815(d)(3) ("FDI Act")). Section 5(d)(3) of the FDI Act requires the Board to review any proposed merger between a bank owned by a bank holding company and a savings association, or branch of a savings association, in which the resulting institution is insured by the Bank Insurance Fund, and in reviewing these proposals, to follow the procedures and consider the factors set forth in section 18(c) of the FDI Act (12 U.S.C. § 1828(c) ("the Bank Merger Act")). The proposed transaction also is subject to review under the Bank Merger Act by the Federal Deposit Insurance Corporation ("FDIC"), the primary banking regulator for Union Bank.

Notice of the application, affording interested persons an opportunity to submit comments, has been published in accordance with the Bank Merger Act and the Board's Rules of Procedure (12 C.F.R. 262.3(b)). Reports on the competitive effects of the merger were requested from the United States Attorney General, the Office of the Comptroller of the Currency and the FDIC. The time for filing comments has expired, and the Board has considered the application and all comments received in light of the factors set forth in the Bank Merger Act and section 5(d) of the FDI Act.

Montgomery is the 29th largest commercial banking organization in Arkansas, controlling deposits of \$142.1 million, representing less than 1 percent of the total deposits in commercial banking organizations in the state.2 The Camden office of First Financial controls deposits of \$9.2 million, representing less than 1 percent of the total deposits in thrift institutions in the state. Upon consummation of the proposed transaction, Montgomery would remain the 29th largest commercial banking organization in Arkansas, controlling deposits of \$151.3 million, representing less than 1 percent of the total deposits in commercial banking organizations in the state.3 Montgomery and First Financial do not compete directly in any relevant banking market. Based on all the facts of record, the Board concludes that consummation of this proposal would not result in any significantly adverse effects on competition or the concentration of banking resources in any relevant banking market.

The Board also concludes that the financial and managerial resources and future prospects of Montgomery and its subsidiary banks, the convenience and needs of the communities to be served, and the other factors that the Board must consider under the Bank

^{5.} The Board's authority to approve the establishment of the proposed branch office parallels the continuing authority of the OCC to license offices of a foreign bank. The Board's approval of this application does not supplant the authority of the OCC to license the proposed branch office of Bank in accordance with any terms or conditions that the OCC may impose.

^{1. 12} U.S.C. § 1815(d)(3)(E). These factors include considerations relating to competition, financial and managerial resources, and future prospects of the existing and proposed institutions, and the convenience and needs of the communities to be served. 12 U.S.C. § 1828(c).

^{2.} State deposit data are as of June 30, 1992, and reflect the bank holding company approvals and bank mergers through September 1993

^{3.} The deposits of the Camden office of First Financial would be transferred to a commercial bank under this proposal, and these deposits are included at 100 percent in the calculation of pro forma state deposit share. See Norwest Corporation, 78 Federal Reserve Bulletin 452 (1992); First Banks, Inc., 76 Federal Reserve Bulletin 669, 670 n.9 (1990).

Merger Act are consistent with approval. Moreover, the record in this case reflects that:

- (1) The transaction will not result in the transfer of any federally insured depository institution's federal deposit insurance from one federal deposit insurance fund to the other;
- (2) Montgomery and Union Bank currently meet and upon consummation of the proposed transaction will continue to meet, all applicable capital standards; and
- (3) The proposed transaction would comply with the interstate banking provisions of the Bank Holding Company Act (the "BHC Act") (12 U.S.C. § 1842(d)) if Union Bank were a state bank that Montgomery was applying to acquire directly. See 12 U.S.C. § 1815(d)(3).

Based on the foregoing and all the facts of record, the Board has determined that this application should be, and hereby is, approved. This approval is subject to Union Bank's obtaining the required approval of the FDIC for the proposed transaction under the Bank Merger Act. The Board's approval also is specifically conditioned upon compliance by Montgomery with all the commitments made in connection with this application. The commitments and conditions relied on by the Board in reaching this decision are both conditions imposed in writing by the Board in connection with its findings and decision, and as such may be enforced in proceedings under applicable law.

This transaction shall not be consummated before the thirtieth calendar day following the effective date of this order, or later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of St. Louis, acting pursuant to delegated authority.

By order of the Board of Governors, effective December 1, 1993.

Voting for this action: Chairman Greenspan, Vice Chairman Mullins, and Governors Angell, Kelley, and LaWare. Absent and not voting: Governors Lindsey and Phillips.

^{4.} The Board has received a comment from an individual ("Protestant") alleging improper banking practices in connection with two loans made by Montgomery's subsidiary banks to Protestant's former husband. Protestant believes that a principal of Montgomery, who also serves as a director of Union Bank, and another director of Union Bank facilitated a loan by Union Bank based on an improper appraisal and a loan by another Montgomery subsidiary bank based on Protestant's forged signature. The Board has carefully considered these comments in light of all the facts of record, including Union Bank's response to these allegations describing its appraisal and loan documentation procedures, and the assessment of management in relevant reports of examination by the banks' primary regulator, the FDIC. Based on this review, the Board does not believe that the Protestant's comments warrant denial of this application. The Board also has forwarded these comments to the FDIC for consideration.

PENDING CASES INVOLVING THE BOARD OF GOVERNORS

This list of pending cases does not include suits against the Federal Reserve Banks in which the Board of Governors is not named a party.

Board of Governors v. Oppegard, No. 93-3706 (8th Cir., filed November 1, 1993). Appeal of district court order ordering appellant Oppegard to comply with prior order requiring compliance with Board removal, prohibition, and civil money penalty order.

Scott v. Board of Governors, No. 930905843CV (Dist. Ct., Salt Lake County, Utah, filed October 8, 1993). Action against Board and others for damages and injunctive relief for alleged constitutional and statutory violations caused by issuance of Federal Reserve notes.

Richardson v. Board of Governors, et al., No. 93-C 836A (D. Utah, filed August 30, 1993). Action against Board and others for damages and injunctive relief for alleged constitutional and statutory violations caused by issuance of Federal Reserve notes. On September 20, 1993, the Board filed a motion to dismiss.

First National Bank of Bellaire v. Board of Governors, No. H-93-1708 (S.D. Texas, filed June 8, 1993). Action to enjoin possible enforcement actions by Board of Governors and other bank regulatory agencies. On September 23, 1993, the agencies filed a motion to dismiss.

Kubany v. Board of Governors, et al., No. 93-1428 (D. D.C., filed July 9, 1993). Action challenging Board determination under the Freedom of Information Act. The Board's motion to dismiss was filed on October 15, 1993.

Bennett v. Greenspan, No. 93-1813 (D. D.C., filed April 20, 1993). Employment discrimination action.

Amann v. Prudential Home Mortgage Co., et al., No. 93-10320 WD (D. Massachusetts, filed February 12, 1993). Action for fraud and breach of contract arising out of a home mortgage. On April 17, 1993, the Board filed a motion to dismiss.

Adams v. Greenspan, No. 93-0167 (D. D.C., filed January 27, 1993). Action by former employee under the Civil Rights Act of 1964 and the Rehabilitation Act of 1973 concerning termination of employment.

Sisti v. Board of Governors, No. 93-0033 (D. D.C., filed January 6, 1993). Challenge to Board staff interpretation with respect to margin accounts. The Board's motion to dismiss was granted on May 13, 1993. On June 3, 1993, the petitioner filed a notice of appeal. On October 14, 1993, the Court of Appeals granted the Board's motion for summary affirmance.

U.S. Check v. Board of Governors, No. 92–2892 (D. D.C., filed December 30, 1992). Challenge to partial denial of request for information under the Freedom of Information Act. Dismissed by stipulation on November 9, 1993.

CBC, Inc. v. Board of Governors, No. 92-9572 (10th Cir., filed December 2, 1992). Petition for review of civil money penalty assessment against a bank holding company and three of its officers and directors for failure to comply with reporting requirements. Petition for review denied November 30, 1993.

DLG Financial Corporation v. Board of Governors, No. 392 Civ. 2086-G (N.D. Texas, filed October 9, 1992). Action to enjoin the Board and the Federal Reserve Bank of Dallas from taking certain enforcement actions, and seeking money damages on a variety of tort and contract theories. On October 9, 1992, the court denied plaintiffs' motion for a temporary restraining order. On March 30, 1993, the court granted the Board's motion to dismiss as to it, and also dismissed certain claims against the Reserve Bank. On April 29, the plaintiffs filed an amended complaint. The Board's motion to dismiss the amended complaint was filed on May 17.

Zemel v. Board of Governors, No. 92-1056 (D. D.C., filed May 4, 1992). Age Discrimination in Employment Act case. The parties' cross-motions for summary judgment are pending.

Board of Governors v. Ghaith R. Pharaon, No. 91-CIV-6250 (S.D. New York, filed September 17, 1991). Action to freeze assets of individual pending administrative adjudication of civil money penalty assessment by the Board. On September 17, 1991, the court issued an order temporarily restraining the transfer or disposition of the individual's assets.

FINAL ENFORCEMENT DECISION ISSUED BY THE BOARD OF GOVERNORS

In the Matters of

Ghaith R. Pharaon, and Kahlid Bin Mahfouz

Institution-Affiliated Parties of

BCCI Holdings (Luxembourg) S.A., Luxembourg, and the Bank of Credit and Commerce International S.A., (Luxembourg)

Docket Nos. 91–037-E-I1, 91–037-CMP-I1, 91–043-E-I8, 92–074-CMP-I1

Order Denying Motions for Consolidation and Stay and Setting Briefing Schedule

This is a procedural order addressing a number of motions filed in two enforcement proceedings brought by the Board of Governors of the Federal Reserve System (the "Board") against individuals allegedly affiliated with the Bank of Credit and Commerce International ("BCCI") and its affiliates. All of the parties — Ghaith R. Pharaon, Khalid bin Mahfouz, and Board Enforcement Counsel — agree that the two proceedings raise common legal issues relating to the doctrine of disentitlement. The parties disagree, however, as to the most efficient means of addressing those issues.

The cases are pending in different procedural stages of the administrative adjudication process. The Board's case against Ghaith R. Pharaon, in which the Board seeks an order of prohibition and a civil money penalty of \$37 million, has already been the subject of a decision by the presiding Administrative Law Judge in this proceeding, Walter J. Alprin (the "ALJ"), in which he granted Board Enforcement Counsel's motion for summary disposition against Pharaon based on the doctrine of disentitlement. Following the ALJ's referral of the record in that case to the Board for final decision, Pharaon and Board Enforcement Counsel filed exceptions to the ALJ's recommended decision and Pharaon filed a motion to remand the record to the ALJ for consideration of supplemental authority, which the Board denied. Meanwhile, the Mahfouz case, in which the Board seeks a civil money penalty of \$170 million, is not yet before the Board and is currently the subject of Board Enforcement Counsel's motion for summary disposition, which is pending before the ALJ. The motions now before the Board address the manner and sequence in which the Board should consider the disentitlement issue common to the two cases.

Procedural Posture

Pharaon

On July 12, 1991 and July 29, 1991, the Board issued Notices of Intent to Prohibit against Pharaon, relating to Pharaon's alleged violations of law and regulation in connection with a number of financial institutions. On September 13, 1991, the Board issued an amended Notice of Intent to Prohibit and issued a Notice of Assessment of Civil Money Penalty against Pharaon, imposing a \$37 million civil money penalty. Pharaon filed answers to the charges and requested a hearing as to the civil money penalty assessment.

On July 20, 1993, the ALJ granted Board Enforcement Counsel's motion for summary disposition

^{1.} Briefly stated, the doctrine of disentitlement states that a fugitive from justice may not simultaneously flout legal procedures and seek the benefit of such procedures.

against Pharaon based on the doctrine of disentitlement and recommended that the Board's Final Decision impose civil money penalties in the amount originally assessed and issue an order of prohibition against Pharaon. The record was thereupon referred to the Board for the filing of any exceptions to the recommended decision by the parties and for the Board's final decision. Upon a joint motion by the parties, the deadline for the filing of exceptions was extended until September 20, 1993.

On August 20, 1993, Respondent Pharaon filed a motion to remand the case to the ALJ to supplement the record on the issue of disentitlement. The Board denied that motion, ruling that the significance of the cases raised by Pharaon could be addressed in the context of briefing the exceptions to the recommended decision. On September 24, 1993, Pharaon and Board Enforcement Counsel filed exceptions to the Recommended Decision, and Pharaon filed the motion for consolidation discussed below.

Mahfouz

On July 2, 1992, the Board issued a Notice of Assessment of Civil Money Penalties against Mahfouz, imposing civil money penalties in the amount of \$170 million against Mahfouz on the basis of alleged violations of law and regulation in connection with BCCI-affiliated institutions. Mahfouz answered the charges and requested a hearing.

In the proceedings before the ALJ, Board Enforcement Counsel has filed a motion for summary disposition against Mahfouz on the basis of the doctrine of disentitlement. On September 23, 1993, Mahfouz filed with the ALJ an opposition to the motion for summary disposition, and filed with the Board the motion for consolidation discussed below.

Pending Motions

Pharaon's motion to consolidate the two cases for purposes of resolving the disentitlement issue argues simply that the common issue of disentitlement warrants consolidation;² Pharaon does not suggest a procedure for bringing about the requested consolidation. Mahfouz's corresponding motion supporting consolidation of the two cases, argues that the Board should not resolve the disentitlement issue without considering its application in the factually and legally

distinct context presented by Mahfouz. In particular, Mahfouz argues that he presents arguments not made by Pharaon that should not be lost to Board consideration. Mahfouz suggests that, in order to make consolidation possible, the Board should stay the Pharaon proceeding, which would provide time for the ALJ to resolve the Mahfouz motion for summary disposition, and thus for Mahfouz to catch up with Pharaon in the procedural process. Notwithstanding his request for consolidation, Mahfouz seeks to file a separate brief and to participate independently in oral argument, if oral argument is granted, before the Board.

On October 5, 1993, Board Enforcement Counsel filed an opposition to the motion to stay the Pharaon proceeding and the motions to consolidate, and instead moved that Mahfouz be stayed pending the Board's disposition of *Pharaon*. Board Enforcement Counsel agrees that the Board's authority to apply the disentitlement doctrine is an issue common to both cases, but argues that the efficiencies of consolidated Board consideration of disentitlement would be outweighed by the factual and legal distinctions between the two cases, and by the potential delay in the resolution of *Pharaon* entailed by the time necessary for the ALJ to resolve the motion for summary disposition in Mahfouz. Board Enforcement Counsel therefore argues that a Board stay of the ALJ's consideration of Mahfouz would enable the Board, through the resolution of Pharaon, to provide the ALJ with guidance for his resolution of the summary disposition motion in Mahfouz. Board Enforcement Counsel suggests that, even without consolidation, the Board would have access to Mahfouz's arguments on disentitlement by consulting Mahfouz's opposition to the motion for summary disposition before the ALJ; Board Enforcement Counsel does not indicate, however, what status Mahfouz's arguments should have in the Board's consideration when the case is not yet before the Board.

Also on October 5, 1993, Board Enforcement Counsel filed a motion for leave to respond to Pharaon's exceptions, arguing that Pharaon's exceptions had raised a number of legal issues not specifically addressed in previous briefing. In light of the additional period permitted Pharaon to file exceptions, Board Enforcement Counsel requested that it be permitted until November 30, 1993 to file its response.

On October 19, 1993, Pharaon filed a response, stating that he had no objection to Board Enforcement Counsel's request for an extension of time, so long as such extension was limited to 60 days from the filing of Pharaon's exceptions, and so long as Pharaon was also allowed 60 days to reply to Board Enforcement Counsel's response. Pharaon suggests that this extended

^{2.} The Uniform Rules of Practice and Procedure that control these proceedings provide that the ALJ or the Board "may consolidate, for some or all purposes, any two or more proceedings, if each such proceeding involves . . . at least one common question of law or fact, injustice." 12 C.F.R. 263.22(a)(1); 263.4.

timetable supports his argument that consolidation of the two proceedings would be practicable and efficient.

On October 29, 1993, Board Enforcement Counsel filed a reply to Pharaon's response arguing that Pharaon is not inherently entitled under the procedural rules to file a response to Board Enforcement Counsel's response, for which Board Enforcement Counsel sought leave from the Board. Additionally, Board Enforcement Counsel argues that Pharaon should not be allowed 60 days to respond even if such leave were granted.

Discussion

The Board believes that the administrative process would best be served by the Board's consideration of the issue of disentitlement after full briefing in both proceedings.3 Board Enforcement Counsel's countervailing concern about potential delay in resolving Pharaon is unsupported by any statement that such delay would have any extraordinary consequences that would outweigh the advantages of full briefing. Nor is it clear in the present circumstances that administrative economies strongly support a stay of either Pharaon or Mahfouz.

Accordingly, the Board believes that the advantage of full briefing as to both Pharaon and Mahfouz before the Board addresses the issue of disentitlement outweighs any other administrative consideration that is apparent at this time. While this goal would best be served by a concurrent consideration of the two cases by the Board, the cases need not be formally consolidated, especially in light of their factual, legal and procedural disparities. Instead, the administrative process should continue in each proceeding, through the completion of briefing in Pharaon and resolution of the pending motion for summary disposition in Mahfouz. The Board may then take appropriate action to consider the cases concurrently, which may include the exercise of the Board's discretion to defer consideration of the Pharaon recommended decision, upon the completion of briefing, pending the resolution of the Mahfouz motion for summary disposition.

Accordingly, the Board denies the motions for consolidation and also denies the motion for a stay of either case at this time. Rather, briefing should be completed as to both cases, and the ALJ should complete his consideration of the motion for summary disposition in Mahfouz.

The Board grants Board Enforcement Counsel's motion for leave to file a response to Pharaon's exceptions, and, in view of the procedural uncertainty created by the various cross-motions, extends the time for filing such response to January 31, 1994. The Board will treat Pharaon's October 19th filing as a motion for leave to file a reply and will permit Pharaon to file such a reply within 30 days of the filing of Board Enforcement Counsel's response.

So ordered, this sixth day of December, 1993.

Board of Governors of the Federal Reserve System

> WILLIAM W. WILES Secretary of the Board

FINAL ENFORCEMENT ORDERS ISSUED BY THE **BOARD OF GOVERNORS**

Berrien E. Moore Beverly Hills, California

The Federal Reserve Board announced on December 20, 1993, the issuance of a Consent Order Dismissing a Notice of Assessment of a Civil Money Penalty against Berrien E. Moore, a former director of First Pacific Bancorp, Inc., Beverly Hills, California.

^{3.} The Board believes that procedural confusion would be avoided by consideration of Mahfouz's arguments when the Mahfouz proceeding is properly before the Board, rather than by consulting a copy of Mahfouz's arguments to the ALJ, as suggested by Board Enforcement Counsel.

GENERAL INFORMATION

In many of the tables, components do not sum to totals because of rounding.

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.

"U.S. government securities" may include guaranteed issues of U.S. government agencies (the flow of funds figures also

include not fully guaranteed issues) as well as direct obligations of the Treasury. "State and local government" also includes municipalities, special districts, and other political subdivisions.

1. Unless otherwise noted, rates of change are calculated from average amounts outstanding during preceding month or quarter.

2. Figures incorporate adjustments for discontinuities, or "breaks

1. Unless otherwise noted, rates of change are calculated from average amounts outstanding during preceding month or quarter.

2. Figures incorporate adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements. (See also table 1.20.)

3. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted, break-adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits, and Vault Cash" and for all weekly reporters whose vault cash exceeds their require reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

4. Composition of the money stock measures and debt is as follows:

41: (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, bes cash items in the process of collection and Federal Reserve float, and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. Seasonally adjusted M1 is computed by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.

M2: M1 plus (1) overnight (and continuing-contract) repurchase agreements (RPs) issued by all depository institutions and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, (2) savings (including MMDAs) and small time deposits (time deposits—including retail RPs—in amounts of less than \$100,000, and (3) balances in both taxable and tax-exempt general-p

tax-exempt, institution-only money market funds. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Also excluded is the estimated amount of overnight

banks and official institutions. Also excluded is the estimated amount of overnight RPs and Eurodollars held by institution-only money market funds. Seasonally adjusted M3 is computed by adjusting its non-M2 component as a whole and then adding this result to seasonally adjusted M2.

L: M3 plus the nonbank public holdings of U.S. savings bonds, short-term Treasury securities, commercial paper, and bankers acceptances, net of money market fund holdings of these assetts. Seasonally adjusted L is computed by summing U.S. savings bonds, short-term Treasury securities, commercial paper, and bankers acceptances, each seasonally adjusted separately, and then adding this result to M3. this result to M3

Debt: Debt of domestic nonfinancial sectors consists of outstanding credit Debt: Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments, and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances, and other debt instruments. Data are derived from the Federal Reserve Board's flow of funds accounts. Data on debt of domestic nonfinancial sectors are monthly averages, derived by averaging adjacent month-end levels. Growth rates for debt reflect adjustments for discontinuities over time in the levels of debt presented in other tables.

5. Sum of (1) overnight RPs and Eurodollars, (2) money market fund balances (general numees and holders designed and MMDAcs).

(general purpose and broker-dealer), (3) savings deposits (including MMDAs), and (4) small time deposits.

and (4) small time deposits.

6. Sum of (1) large time deposits, (2) term RPs, (3) term Eurodollars of U.S. residents, and (4) money market fund balances (institution-only), less (5) a consolidation adjustment that represents the estimated amount of overnight RPs and Eurodollars held by institution-only money market funds. This sum is seasonally adjusted as a whole.

7. Small time deposits—including retail RPs—are those issued in amounts of less than SiGO 000 AIII RA and these has expected as a present balance as a supersident and the season and the season are the season and the season and the season are the seaso

less than \$100,000. All IRA and Keogh account balances at commercial banks and thrift institutions are subtracted from small time deposits.

8. Large time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

9. Large time deposits at commercial banks less those held by money market funds, depository institutions, U.S. government and foreign banks and official institutions.

institutions (that is, those whose vault cash exceeds their required reserves) to

^{1.} Data in this table also appear in the Board's H.3 (502) weekly statistical release. For ordering address, see inside front cover.

2. Excludes required clearing balances and adjustments to compensate for float and includes other off-balance-sheet "as-of" adjustments.

3. Total "lagged" vault cash held by depository institutions subject to reserve requirements. Dates refer to the maintenance periods during which the vault cash can be used to satisfy reserve requirements. The maintenance period for weekly reporters ends sixteen days after the lagged computation period during which the vault cash is held. Before Nov. 25, 1992, the maintenance period ended thirty days after the lagged computation period.

after the lagged computation period.

4. All vault cash held during the lagged computation period by "bound" institutions (that is, those whose required reserves exceed their vault cash) plus the amount of vault cash applied during the maintenance period by "nonbound"

institutions (that is, those whose vault cash exceeds their required reserves) to satisfy current reserve requirements.

5. Total vault cash (line 2) less applied vault cash (line 3).

6. Reserve balances with Federal Reserve Banks (line 1) plus applied vault cash (line 3).

7. Total reserves (line 5) less required reserves (line 6).

8. Also includes adjustment credit.

9. Consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as with traditional short-term adjustment credit, the money market impact of extended credit is similar to that of nonborrowed reserves.

ordinarily is charged on extended-credit loans outstanding less than thirty days; however, at the discretion of the Federal Reserve Bank, this time period may be shortened. Beyond this initial period, a flexible rate somewhat above rates on market sources of funds is charged. The rate ordinarily is reestablished on the first business day of each two-week reserve maintenance period, but it is never less than the discount rate applicable to adjustment credit plus 50 basis points.

4. For earlier data, see the following publications of the Board of Governors: Banking and Monetary Statistics, 1914–1941, and 1941–1970; and the Annual Statistical Digest. 1970–1979.

In 1980 and 1981, the Federal Reserve applied a surcharge to short-term adjustment-credit borrowings by institutions with deposits of \$500 million or more that had borrowed in successive weeks or in more than four weeks in a calendar quarter. A 3 percent surcharge was in effect from Mar. 17, 1980, through May 7, 1980. A surcharge of 2 percent was reimposed on Nov. 17, 1980; the surcharge was subsequently raised to 3 percent on Dec. 5, 1980, and to 4 percent on May 5, 1981. The surcharge was reduced to 3 percent effective Sept. 22, 1981, and to 2 percent effective Cet. 12, 1981. As of Oct. 1, 1981, the formula for applying the surcharge was changed from a calendar quarter to a moving thirteen-week period. The surcharge was eliminated on Nov. 17, 1981.

^{1.} Available on a short-term basis to help depository institutions meet temporary needs for funds that cannot be met through reasonable alternative sources. The highest rate established for loans to depository institutions may be charged on adjustment-credit loans of unusual size that result from a major operating problem at the borrower's facility.

2. Available to help relatively small depository institutions meet regular seasonal needs for funds that arise from a clear pattern of intrayearly movements in their deposits and loans and that cannot be met through special industry lenders. The discount rate on seasonal credit takes into account rates on market sources of funds and ordinarily is reestablished on the first business day of each two-week reserve maintenance period; however, it is never less than the discount rate applicable to adjustment credit.

3. May be made available to depository institutions when similar assistance is not reasonably available from other sources, including special industry lenders. Such credit may be provided when exceptional circumstances (including sustained deposit drains, impaired access to money market funds, or sudden deterioration in loan repayment performance) or practices involve only a particular institution, or to meet the needs of institutions experiencing difficulties adjusting to changing market conditions over a longer period (particularly at times of deposit disintermediation). The discount rate applicable to adjustment credit

1.15 RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS¹

	Requir	ement
Type of deposit ²	Percentage of deposits	Effective date
Net transaction accounts ³ \$0 million=\$\$1.9 million, More than \$\$1.9 million ⁴	3 10	12/21/93 12/21/93
Nonpersonal time deposits ⁵	0	12/27/90
Eurocurrency liabilities ⁶ .	0	12/27/90

1. Required reserves must be held in the form of deposits with Federal Reserve Banks or vault cash. Nonmember institutions may maintain reserve balances with a Federal Reserve Bank indirectly on a pass-through basis with certain approved institutions. For previous reserve requirements, see earlier editions of the Annual Report or the Federal Reserve Bulletin. Under provisions of the Monetary Control Act, depository institutions include commercial banks, mutual savings banks, savings and loan associations, credit unions, agencies and branches of foreign banks, and Edge Act corporations.

2. The Garn-St Germain Depository Institutions Act of 1982 (Public Law 97-320) requires that \$2 million of reservable liabilities of each depository institution be subject to a zero percent reserve requirement. The Board is to adjust the amount of reservable liabilities subject to this zero percent of the percentage increase in the total reservable liabilities of all depository institutions, measured on an annual basis as of June 30. No corresponding adjustment is to be made in the event of a decrease. On Dec. 21, 1993, the exemption was raised from \$3.8 million to \$4.0 million. The exemption applies in the following order: (1) net negotiable order of withdrawal (NOW) accounts (NOW accounts less allowable deductions); and (2) net other transaction accounts. The exemption applies only to

negotiable order of withdrawal (NOW) accounts (NOW accounts less allowable deductions); and (2) net other transaction accounts. The exemption applies only to accounts that would be subject to a 3 percent reserve requirement.

3. Include all deposits against which the account holder is permitted to make withdrawals by negotiable or transferable instruments, payment orders of withdrawal, and telephone and preauthorized transfers in excess of three per month for the purpose of making payments to third persons or others. However, money market deposit accounts (MMDAs) and similar accounts subject to the rules that

permit no more than six preauthorized, automatic, or other transfers per month, of which no more than three may be checks, are not transaction accounts (such

of which no more than three may be checks, are not transaction accounts accounts accounts against which the 3 percent reserve requirement applies be modified annually by 80 percent of the percentage change in transaction accounts held by all depository institutions, determined as of June 30 each year. Effective Dec. 21, 1993, for institutions reporting quarterly and weekly, the amount was increased from \$46.8 million to \$51.9 million.

4. The reserve requirement was reduced from 12 percent to 10 percent on Apr. 2, 1992, for institutions that report weekly, and on Apr. 16, 1992, for institutions

2, 1992, for institutions that report weekly, and on Apr. 16, 1992, for institutions that report quarterly.

5. For institutions that report weekly, the reserve requirement on nonpersonal time deposits with an original maturity of less than 1½ years was reduced from 3 percent to 1½ percent for the maintenance period that began Dec. 13, 1990, and to zero for the maintenance period that began Dec. 27, 1990. The reserve requirement on nonpersonal time deposits with an original maturity of 1½ years or more has been zero since Oct. 6, 1983.

For institutions that report quarterly, the reserve requirement on nonpersonal time deposits with an original maturity of less than 1½ years was reduced from 3 percent to zero on Jan. 17, 1991.

6. The reserve requirement on Eurocurrency liabilities was reduced from 3 percent to zero in the same manner and on the same dates as was the reserve requirement on nonpersonal time deposits with an original maturity of less than 1½ years (see note 4).

11/2 years (see note 4).

1. Latest monthly and biweekly figures are available from the Board's H.3 (502) weekly statistical release. Historical data and estimates of the impact on required reserves of changes in reserve requirements are available from the Monetary and Reserves Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.

2. Figures reflect adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements. (See also table 1.10)

3. Seasonally adjusted, break-adjusted total reserves equal seasonally adjusted, break-adjusted required reserves (line 4) plus excess reserves (line 16).

4. Seasonally adjusted, break-adjusted nonborrowed reserves equal seasonally adjusted, break-adjusted total reserves (line 1) less total borrowings of depository institutions from the Federal Reserve (line 17).

5. Extended credit consists of borrowing at the discount window under

institutions from the rederal reserve (inc 1/).

5. Extended credit consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as with traditional short-term adjustment credit, the money market impact of extended credit is similar to that of nonborrowed reserves.

that of nonborrowed reserves.

6. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted, break-adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

7. Break-adjusted total reserves equal break-adjusted required reserves (line 9) and the amount applied to satisfy current reserve requirements.

plus excess reserves (line 16).

8. To adjust required reserves for discontinuities that are due to regulatory

changes in reserve requirements, a multiplicative procedure is used to estimate

what required reserves would have been in past periods had current reserve requirements been in effect. Break-adjusted required reserves include required reserves against transactions deposits and nonpersonal time and savings deposits (but not reservable nondeposit liabilities).

9. The break-adjusted monetary base equals (1) break-adjusted total reserves (line 6), plus (2) the (unadjusted) currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

10. Reflects actual reserve requirements, including those on nondeposit liabilities, with no adjustments to eliminate the effects of discontinuities associated with changes in reserve requirements.

ities, with no adjustments to eliminate the effects of discontinuities associated with changes in reserve requirements.

11. Reserve balances with Federal Reserve Banks plus vault cash used to satisfy reserve requirements.

12. The monetary base, not break-adjusted and not seasonally adjusted, consists of (1) total reserves (line 11), plus (2) required clearing balances and adjustments to compensate for float at Federal Reserve Banks, plus (3) the currency component of the money stock, plus (4) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the difference between current vault cash and the amount applied to satisfy current reserve requirements. Since the introduction of changes in reserve requirements (CRR), currency and vault cash figures have been measured over the computation periods ending on Mondays.

13. Unadjusted total reserves (line 11) less unadjusted required reserves (line 14).

NOTES TO TABLE 1.21

NOTES TO TABLE 1.21

1. Latest monthly and weekly figures are available from the Board's H.6 (508) weekly statistical release. Historical data are available from the Money and Reserves Projection Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.

2. Composition of the money stock measures and debt is as follows:
M1: (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float, and (4), other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, credit union share draft accounts, and demand deposits at thrift institutions. Seasonally adjusted M1 is computed by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.

M2: M1 plus (1) overnight (and continuing-contract) repurchase agreements (RPs) issued by all depository institutions and overnight Eurodollars issued to U.S. residents by foreign branches of U.S. banks worldwide, (2) savings (including MMDAs) and small time deposits (interest deposits) and the same and the same deposits of the deposits (including MMDAs) and small time deposits (interest deposits) and the same and the same deposits of the depository i

market fund holdings of these assets. Seasonally adjusted L is computed by summing U.S. savings bonds, short-term Treasury securities, commercial paper, and bankers acceptances, each seasonally adjusted separately, and then adding

and bankers acceptances, each seasonally adjusted separately, and then adding this result to M3.

Debt: Debt of domestic nonfinancial sectors consists of outstanding credit market debt of the U.S. government, state and local governments, and private nonfinancial sectors. Private debt consists of corporate bonds, mortgages, consumer credit (including bank loans), other bank loans, commercial paper, bankers acceptances, and other debt instruments. Data are derived from the Federal Reserve Board's flow of funds accounts. Debt data are based on monthly averages. This sum is seasonally adjusted as a whole.

3. Currency outside the U.S. Treasury, Federal Reserve Banks, and vaults of denository institutions.

depository institutions.

4. Outstanding amount of U.S. dollar-denominated travelers checks of non-bank issuers. Travelers checks issued by depository institutions are included in

Demand deposits at commercial banks and foreign-related institutions other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and

beauts and official institutions, less tash hems in the process of conection and Federal Reserve float.

6. Consists of NOW and ATS account balances at all depository institutions, credit union share draft account balances, and demand deposits at thrift institu-

tions.

7. Sum of (1) overnight RPs and overnight Eurodollars, (2) money market fund balances (general purpose and broker-dealer), (3) savings deposits (including MMDAs), and (4) small time deposits.

8. Sum of (1) large time deposits, (2) term RPs, (3) term Eurodollars of U.S. residents, and (4) money market fund balances (institution-only), less (5) a consolidation adjustment that represents the estimated amount of overnight RPs and Eurodollars held by institution-only money market funds.

9. Small time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRAs and Keogh accounts at commercial banks and thrift institutions are subtracted from small time deposits.

10. Large time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

excluding those booked at international banking facilities.

11. Large time deposits at commercial banks less those held by money market funds, depository institutions, U.S. government, and foreign banks and official institutions.

^{1.} BIF, Bank Insurance Fund. Data in this table also appear in the Board's H.6 (508) Special Supplementary Table monthly statistical release. For ordering address, see inside front cover. Estimates are based on data collected by the Federal Reserve System from a stratified random sample of about 460 commercial banks and 80 savings banks on the last Wednesday of each period. Data are not

seasonally adjusted and include IRA/Keogh deposits and foriegn currency denominated deposits. Data exclude retail repurchase agreements and deposits held in U.S. branches and agencies of foreign banks.

2. Includes personal and nonpersonal money market deposits.

3. BIF-insured savings banks include both mutual and federal savings banks.

1.23 BANK DEBITS AND DEPOSIT TURNOVER¹

^{1.} All commercial banks include domestically chartered insured banks, U.S. branches and agencies of foreign banks, New York state investment companies majority owned by foreign banks, and Edge Act and agreement corporations owned by domestically chartered foreign banks. Data are prorated averages of Wednesday estimates for domestically chartered and foreign related institutions, based on weekly reports of a sample of domestically chartered insured banks and

large branches and agencies and quarterly reports of all domestically chartered insured banks and all agencies, branches, investment companies, and Edge Act and agreement corporation engaged in banking.

2. Adjusted to exclude loans to commercial banks in the United States.

3. Includes nonfinancial commercial paper held.

4. United States includes the fifty states and the District of Columbia.

^{1.} Commercial banks are nationally and state-chartered banks in the fifty states and the District of Columbia, agencies and branches of foreign banks, New York State investment companies majority owned by foreign banks, and Edge Act and agreement corporations owned by domestically chartered and foreign banks.

Data in this table also appear in the Board's G.10 (411) monthly statistical release. For ordering address, see inside front cover.

2. Includes federal funds, repurchase agreements (RPs), and other borrowing from nonbanks and net balances due to related foreign offices.

3. Reflects net positions of U.S. chartered banks, Edge Act corporations, and U.S. branches and agencies of foreign banks with related foreign offices plus net positions with own international banking facilities (IBFs).

4. Borrowings through any instrument, such as a promissory note or due bill, given for the purpose of borrowing money for the banking business. This includes

borrowings from Federal Reserve Banks and from foreign banks, term federal funds, loan RPs, and sales of participations in pooled loans.

5. Figures are based on averages of daily data reported weekly by approximately 120 large banks and on quarterly or annual data reported by other banks.

6. Figures are partly averages of daily data and partly averages of Wednesday data.

data.

7. Time deposits in denominations of \$100,000 or more. Estimated averages of daily data.

8. U.S. Treasury demand deposits and Treasury tax and loan notes at commercial banks. Averages of daily data.

Excludes assets and liabilities of international banking facilities.
 Includes insured domestically chartered commercial banks, agencies and branches of foreign banks, Edge Act and agreement corporations, and New York State investment corporations majority owned by foreign banks. Data are estimates for the last Wednesday of the month based on a sample of weekly reporting foreign-related and domestic institutions and quarter-end condition reports.

This balancing item is not intended as a measure of equity capital for use in capital-adequacy analysis.
 Includes all member banks and insured nonmember banks. Loans and securities data are estimates for the last Wednesday of the month based on a sample of weekly reporting banks and quarter-end condition reports.

9. Affiliates include a bank's own foreign branches, nonconsolidated nonbank affiliates of the bank, the bank's holding company (if not a bank), and nonconsolidated nonbank subsidiaries of the holding company.

10. Credit extended by foreign branches of domestically chartered weekly reporting banks to nonbank U.S. residents. Consists mainly of commercial and industrial loans, but includes an unknown amount of credit extended to other than nonfinancial businesses.

Note. Data that formerly appeared in table 1.28, Assets and Liabilities of Large Weekly Reporting Commercial Banks in New York City, can be obtained from the Board's H.4.2 (504) weekly statistical release. For ordering address, see inside front cover.

Includes certificates of participation, issued or guaranteed by agencies of the U.S. government, in pools of residential mortgages.
 Includes securities purchased under agreements to resell.
 Includes allocated transfer risk reserve.
 Includes negotiable order of withdrawal accounts (NOWs), automatic transfers rervice (ATS), and telephone and preauthorized transfers of savings deposits.
 Includes borrowings only from other than directly related institutions.
 Includes federal funds purchased and securities sold under agreements to repurchase.

repurchase.

7. This balancing item is not intended as a measure of equity capital for use in capital-adequacy analysis.

8. Excludes loans to and federal funds transactions with commercial banks in the United States.

4. Rate for the Federal Reserve Bank of New York.
5. Quoted on a discount basis.
6. An average of offering rates on commercial paper placed by several leading dealers for firms whose bond rating is AA or the equivalent.
7. An average of offering rates on paper directly placed by finance companies.
8. Representative closing yields for acceptances of the highest-rated money center bank.

9. An average of dealer offering rates on nationally traded certificates of deposit.
10. Bid rates for Eurodollar deposits at 11:00 a.m. London time. Data are for

10. But rates for Eurodollar deposits at 11:00 a.m. London time. Data are for indication purposes only.

11. Auction date for daily data; weekly and monthly averages computed on an issue-date basis.

12. Yields on actively traded issues adjusted to constant maturities. Source: U.S. Treasury.

13. General obligations based on Thursday figures; Moody's Investors Service.

14. General obligations only, with twenty years to maturity, issued by twenty state and local governmental units of mixed quality. Based on figures for

Thursday.

15. Daily figures from Moody's Investors Service. Based on yields to maturity on selected long-term bonds.

16. Compilation of the Federal Reserve. This series is an estimate of the yield on recently offered, A-rated utility bonds with a thirty-year maturity and five years of call protection. Weekly data are based on Friday quotations.

17. Standard & Poor's corporate series. Preferred stock ratio is based on a sample of ten issues: four public utilities, four industrials, one financial, and one transportation. Common stock ratio is based on the 500 stocks in the price index. Note. Some of the data in this table also appear in the Board's H.15 (519) weekly and G.13 (415) monthly statistical releases. For ordering address, see inside front cover.

The daily effective federal funds rate is a weighted average of rates on trades through New York brokers.
 Weekly figures are averages of seven calendar days ending on Wednesday of the current week; monthly figures include each calendar day in the month.
 Annualized using a 360-day year or bank interest.
 Rate for the Federal Reserve Bank of New York.

^{1.} Effective July 1976, includes a new financial group, banks and insurance companies. With this change the index includes 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40

on securities other than options are the difference between the market value (100 percent) and the maximum loan value of collateral as prescribed by the Board. Regulation T was adopted effective Oct. 15, 1934; Regulation U, effective May 1, 1936; Regulation G, effective Mar. 11, 1968; and Regulation X, effective Nov. 1, 1971.

1971.

O Jan. 1, 1977, the Board of Governors for the first time established in Regulation T the initial margin required for writing options on securities, setting it at 30 percent of the current market value of the stock underlying the option. On Sept. 30, 1985, the Board changed the required initial margin, allowing it to be the same as the option maintenance margin required by the appropriate exchange or self-regulatory organization; such maintenance margin rules must be approved by the Securities and Exchange Commission. Effective Jan. 31, 1986, the SEC approved new maintenance margin rules, permitting margins to be the price of the option plus 15 percent of the market value of the stock underlying the option. Effective June 8, 1988, margins were set to be the price of the option plus 20 percent of the market value of the stock underlying the option (or 15 percent in the case of stock-index options).

case of stock-index options).

^{2.} On July 5, 1983, the American Stock Exchange rebased its index, effectively cutting previous readings in half.

3. Since July 1983, under the revised Regulation T, margin credit at broker-dealers has included credit extended against stocks, convertible bonds, stocks acquired through the exercise of subscription rights, corporate bonds, and government securities. Separate reporting of data for margin stocks, convertible bonds, and subscription issues was discontinued in April 1984.

4. Free credit balances are amounts in accounts with no unfulfilled commitments to brokers and are subject to withdrawal by customers on demand.

5. New series since June 1984.

6. These requirements, stated in regulations adopted by the Board of Governors pursuant to the Securities Exchange Act of 1934, limit the amount of credit that can be used to purchase and carry "margin securities" (as defined in the regulations) when such credit is collateralized by securities. Margin requirements

^{1.} In accordance with the Balanced Budget and Emergency Deficit Control Act of 1985, all former off-budget entries are now presented on-budget. Federal Financing Bank (FFB) activities are now shown as separate accounts under the agencies that use the FFB to finance their programs. The act has also moved two social security trust funds, (federal old-age survivors insurance and federal disability insurance) off-budget. The Postal Service is included as an off-budget item in the Monthly Treasury Statement beginning in 1990.

2. Includes special drawing rights (SDRs); reserve position on the U.S. quota in the International Monetary Fund (IMF); loans to the IMF; other cash and

monetary assets; accrued interest payable to the public; allocations of SDRs; deposit funds; miscellaneous liability (including checks outstanding) and asset accounts; seigniorage; increment on gold; net gain or loss for U.S. currency valuation adjustment; net gain or loss for IMF loan-valuation adjustment; and profit on sale of gold.

^{1.} Transactions are market purchases and sales of securities are reported to the Federal Reserve Bank of New York by the U.S. government securities dealers on its published list of primary dealers. Averages are based on the number of trading days in the period. Immediate, forward, and futures transactions are reported at principal value, which does not include accrued interest; options transactions are reported at the face value of the underlying securities.

Dealers report cumulative transactions for each week ending Wednesday.

2. Transactions for immediate delivery include purchases or sales of securities (other than mortgage-backed agency securities) for which delivery is scheduled in five business days or less and "when-issued" securities that settle on the issued date of offering. Transactions for immediate delivery of mortgage-backed agency securities include purchases and sales for which delivery is scheduled in thirty business days or less. Stripped securities are reported at market value by maturity of coupon or corpus.

Includes such securities as collateralized mortgage obligations (CMOs), real estate mortgage investment conduits (REMICs), interest-only securities (IOs), and principal-only securities (POs).

^{4.} Futures transactions are standardized agreements arranged on an exchange. Forward transactions are agreements made in the over-the-counter market that specify delayed delivery. All futures transactions are included regardless of time to delivery. Forward contracts for U.S. Treasury securities and federal agency debt securities are included when the time to delivery is more than five business days. Forward contracts for mortgage-backed agency securities are included when the time to delivery is more than thirty business days.

5. Options transactions are purchases or sales of put-and-call options, whether arranged on an organized exchange or in the over-the-counter market, and include options on futures contracts on U.S. Treasury and federal agency securities. Note. In tables 1.42 and 1.43, "n.a." indicates that data are not published because of insufficient activity.

Data for several types of options transactions—U.S. Treasury securities, bills; Federal agency securities, debt; and federal agency securities, mortgage-backed, other than pass-throughs—are no longer available because activity is insufficient.

delivery. Forward contracts for U.S. Treasury securities and federal agency debt securities are included when the time to delivery is more than five business days. Forward contracts for mortgage-backed agency securities are included when the time to delivery is more than thirty business days.

6. Overnight financing refers to agreements made on one business day that mature on the next business day; continuing contracts are agreements that remain in effect for more than one business day be terminated without advance notice by either party; term agreements have a fixed maturity of more than one business day.

7. Matched-book data reflect financial intermediation activity in which the borrowing and lending transactions are matched. Matched-book data are included in the financing breakdowns given above. The reverse repurchase and repurchase numbers are not always equal because of the "matching" of securities of different values or different types of collateralization.

Note. Data for futures and forward commercial paper and bankers acceptances and for term financing of collateralized loans are no longer available because of insufficient activity.

^{1.} Data for positions and financing are obtained from reports submitted to the Federal Reserve Bank of New York by the U.S. government securities dealers on its published list of primary dealers. Weekly figures are close-of-business Wednesday data; monthly figures are averages of weekly data.

2. Securities positions are reported at market value.

3. Net immediate positions include securities purchased or sold (other than mortgage-backed agency securities) that have been delivered or are scheduled to be delivered in five business days or less and "when-issued" securities that settle on the issue date of offering. Net immediate positions of mortgage-backed agency securities include securities purchased or sold that have been delivered or are scheduled to be delivered in thirty business days or less.

4. Includes such securities as collateralized mortgage obligations (CMOs), real estate mortgage investment conduits (REMICs), interest-only securities (IOs), and principal-only securities (POs).

5. Futures positions reflect standardized agreements arranged on an exchange. Forward positions reflect standardized agreements arranged on the specifycle layed delivery. All futures positions are included regardless of time to http://fraser.stlouisfed.org/

Consists of mortgages assumed by the Defense Department between 1957 and 1963 under family housing and homeowners assistance programs.
 Includes participation certificates reclassified as debt beginning Oct. 1, 1976.
 On-budget since Sept. 30, 1976.
 Consists of debentures issued in payment of Federal Housing Administration.

insurance claims. Once issued, these securities may be sold privately on the securities market.

securities market.

5. Certificates of participation issued before fiscal year 1969 by the Government National Mortgage Association acting as trustee for the Farmers Home Administration, the Department of Health, Education, and Welfare, the Department of Housing and Urban Development, the Small Business Administration, and the Veterans' Administration.

6. Off-budget.

7. Includes outstanding noncontingent liabilities: notes, bonds, and debentures. Some data are estimated.

8. Excludes borrowing by the Farm Credit Financial Assistance Corporation, shown on line 17.

Excludes borrowing by the Faim Creat Financial Assistance Corporation, shown on line 17.
 Before late 1982, the Association obtained financing through the Federal Financing Bank (FFB). Borrowing excludes that obtained from the FFB, which is shown on line 22.

10. The Financing Corporation, established in August 1987 to recapitalize the Federal Savings and Loan Insurance Corporation, undertook its first borrowing in October 1987.

October 1987.

11. The Farm Credit Financial Assistance Corporation, established in January 1988 to provide assistance to the Farm Credit System, undertook its first borrowing in July 1988.

12. The Resolution Funding Corporation, established by the Financial Institutions Reform, Recovery and Enforcement Act of 1989, undertook its first borrowing in October 1989.

13. The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other federal agencies. Because FFB incurs debt solely for the purpose of lending to other agencies, its debt is not included in the main portion of the table in order to avoid double counting.

14. Includes FFB purchases of agency assets and guaranteed loans; the latter are loans guaranteed by numerous agencies, with the amounts guaranteed by any one agency generally being small. The Farmers Home Administration entry consists exclusively of agency assets, whereas the Rural Electrification Administration entry consists of both agency assets and guaranteed loans.

^{1.} Data on sales and redemptions exclude money market mutual funds but include limited-maturity municipal bond funds. Data on asset positions exclude both money market mutual funds and limited-maturity municipal bond funds.

2. Includes reinvestment of net income dividends. Excludes reinvestment of capital gains distributions and share issue of conversions from one fund to another in the same group.

3. Excludes sales and redemptions resulting from transfers of shares into or out of money market mutual funds within the same fund family.

^{4.} Market value at end of period, less current liabilities.
5. Includes all U.S. Treasury securities and other short-term debt securities.
SOURCE. Investment Company Institute. Data based on reports of membership, which comprises substantially all open-end investment companies registered with the Securities and Exchange Commission. Data reflect underwritings of new companies.

Figures are amounts anticipated by business.
 "Other" consists of construction, wholesale and retail trade, finance and insurance, personal and business services, and communication.

^{1.} Includes finance company subsidiaries of bank holding companies but not of retailers and banks. Data are before deductions for unearned income and losses. Data in this table also appear in the Board's 6, 20 (422) monthly statistical release. For ordering address, see inside front cover.

2. Includes all loans secured by liens on any type of real estate, for example, first and junior mortgages and home equity loans.

3. Includes personal cash loans, mobile home loans, and loans to purchase other types of consumer goods such as appliances, apparel, general merchandise, and recreation vehicles.

Digitized for FR 4 Quistanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator. http://fraser.stlouisfed.org/

^{2.} Before deduction for unearned income and losses.

^{5.} Passenger car fleets and commercial land vehicles for which licenses are

rassenger car neets and commercial land vehicles for which incenses are required.
 Credit arising from transactions between manufacturers and dealers, that is, floor plan financing.
 Includes loans on commercial accounts receivable, factored commercial accounts, and receivable dealer capital; small loans used primarily for business or farm purposes; and wholesale and lease paper for mobile homes, campers, and travel trailers.

^{1.} Weighted averages based on sample surveys of mortgages originated by major institutional lender groups for purchase of newly built homes; compiled by the Federal Housing Finance Board in cooperation with the Federal Deposit Insurance Corporation.

2. Includes all fees, commissions, discounts, and "points" paid (by the borrower or the seller) to obtain a loan.

3. Average effective interest rate on loans closed for purchase of newly built homes, assuming prepayment at the end of ten years.

4. Average contract rate on new commitments for conventional first mortgages; from U.S. Department of Housing and Urban Development (HUD). Based on transactions on the first day of the subsequent month.

5. Average gross yield on thirty-year, minimum-downpayment first mortgages insured by the Federal Housing Administration (FHA) for immediate delivery in the private secondary market. Based on transactions on first day of subsequent month.

6. Average net yields to investors on fully modified pass-through securities backed by mortgages and guaranteed by the Government National Mortgage Association (GNMA), assuming prepayment in twelve years on pools of thirty-year mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.

7. Does not include standby commitments issued, but includes standby commitments of the properties of the

mitments converted.

8. Includes participation loans as well as whole loans.

9. Includes conventional and government-underwritten loans. The Federal Home Loan Mortgage Corporation's mortgage commitments and mortgage transactions include activity under mortgage securities swap programs, whereas the corresponding data for FNMA exclude swap activity.

Based on data from various institutional and governmental sources; figures for some quarters estimated in part by the Federal Reserve. Multifamily debt refers to loans on structures of five or more units.
 Includes loans held by nondeposit trust companies but not loans held by

Includes loans need by nondeposit trust companies but not loans held by bank trust departments.
 Includes savings banks and savings and loan associations.
 FmHA-guaranteed securities sold to the Federal Financing Bank were reallocated from FmHA mortgage pools to FmHA mortgage holdings in 1986:Q4 because of accounting changes by the Farmers Home Administration.

^{5.} Outstanding principal balances of mortgage-backed securities insured or guaranteed by the agency indicated.

6. Other holders include mortgage companies, real estate investment trusts, state and local cretirement funds, noninsured pension funds, credit unions, and finance companies.

SOURCES. Based on data from various institutional and government sources. Separation of nonfarm mortgage debt by type of property, if not reported directly, and interpolations and extrapolations, when required, are estimated mainly by the Federal Reserve. Line 64, from Inside Mortgage Securities.

^{1.} A major revision of the industrial production index and the capacity utilization rates was released in April 1990. See "Industrial Production: 1989 Developments and Historical Revision," Federal Reserve Bulletin, vol. 76 (April 1987) and Production and Historical Revision, Federal Reserve Bulletin, vol. 76 (April 1987) and Production and Historical Revision, Production and Historical Revision and Historical

1990), pp. 187-204.

2. Ratio of index of production to index of capacity. Based on data from the Federal Reserve, DRI McGraw-Hill, U.S. Department of Commerce, and other

6. Based on data from U.S. Department of Commerce, Survey of Current

7. Based on data not seasonally adjusted. Seasonally adjusted data for changes in the price indexes can be obtained from the U.S. Department of Labor, Bureau of Labor Statistics, Monthly Labor Review.

NOTE. Basic data (not indexes) for series mentioned in notes 4, 5, and 6, and indexes for series mentioned in notes 3 and 7 can also be found in the Survey of Country Marketon.

Figures for industrial production for the latest month are preliminary, and many Figures for industrial production for the latest month are pleinmary, and many figures for the three months preceding the latest month have been revised. See "Recent Developments in Industrial Capacity and Utilization," Federal Reserve Bulletin, vol. 76 (June 1990), pp. 411–35. See also "Industrial Production Capacity and Capacity Utilization since 1987," Federal Reserve Bulletin, vol. 79, (June 1993), pp. 590–605.

Persons sixteen years of age and older, including Resident Armed Forces. Monthly figures are based on sample data collected during the calendar week that contains the twelfth day; annual data are averages of monthly figures. By definition, seasonality does not exist in population figures.
 Includes self-employed, unpaid family, and domestic service workers.
 Includes all full- and part-time employees who worked during, or received

Digitized for FRASER

Earnings.

sources.

3. Index of dollar value of total construction contracts, including residential, nonresidential, and heavy engineering, from McGraw-Hill Information Systems Company, F.W. Dodge Division.

4. Based on data from U.S. Department of Labor, Employment and Earnings. Series covers employees only, excluding personnel in the armed forces.

5. Based on data from U.S. Department of Commerce, Survey of Current Publicates.

Business.

pay for, the pay period that includes the twelfth day of the month; excludes proprietors, self-employed persons, household and unpaid family workers, and members of the armed forces. Data are adjusted to the March 1984 benchmark, and only seasonally adjusted data are available at this time.

SOURCE. Based on data from U.S. Department of Labor, Employment and

Domestic Nonfinancial Statistics ☐ February 1994

^{1.} Data in this table also appear in the Board's G.17 (419) monthly statistical release. For ordering address, see inside front cover. For a detailed description of the series, see "Recent Developments in Industrial Capacity and Utilization," Federal Reserve Bulletin, vol. 76 (June 1990), pp. 411-35. See also "Industrial Production Capacity and Capacity Utilization Since 1987," Federal Reserve Bulletin, vol. 79, (June 1993), pp. 590-605.

2. Capacity utilization is calculated as the ratio of the Federal Reserve's seasonally adjusted index of industrial production to the corresponding index of capacity.

Primary processing includes textiles; lumber; paper; industrial chemicals; petroleum refining; rubber and plastics; stone, clay, and glass; and primary and fabricated metals.

^{4.} Advanced processing includes food, tobacco, apparel, furniture, printing, chemical products such as drugs and toiletries, leather and products, machinery, transportation equipment, instruments, miscellaneous manufacturing, and ordnance.
5. Monthly highs, 1978 through 1980; monthly lows, 1982.
6. Monthly highs, 1988–89; monthly lows, 1990–91.

^{1.} Data in this table also appear in the Board's G.17 (419) monthly statistical release. For ordering address, see inside front cover.

A revision of the industrial production index and the capacity utilization rates

was released in May 1993. See "Industrial Production, Capacity, and Capacity Utilization since 1987," Federal Reserve Bulletin, vol. 79 (June 1993), pp. 590-605.

2. Standard industrial classification.

Institute and seasonally adjusted by the Census Bureau, and (2) sales and prices of existing units, which are published by the National Association of Realtors. All back and current figures are available from the originating agency. Permit authorizations are those reported to the Census Bureau from 17,000 jurisdictions beginning in 1984.

^{1.} Not at annual rates.
2. Not seasonally adjusted.
3. Recent data on value of new construction may not be strictly comparable with data for previous periods because of changes by the Bureau of the Census in its estimating techniques. For a description of these changes, see Construction Reports (C-30-76-5), issued by the Census Bureau in July 1976.
SOURCE. Bureau of the Census estimates for all series except (1) mobile homes, which are private, domestic shipments as reported by the Manufactured Housing

^{1.} Seasonal factors are not calculated for lines 12-16, 18-20, 22-34, and 38-40.

2. Data are on an international accounts basis. The data differ from the Census basis data, shown in table 3.11, for reasons of coverage and timing. Military exports are excluded from merchandise trade data and are included in line 5.

3. Reporting banks include all types of depository institution as well as some brokers and dealers.

4. Associated primarily with military sales contracts and other transactions arranged with or through foreign official agencies.

5. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and state and local governments.

A54 International Statistics ☐ February 1994

3.11 U.S. FOREIGN TRADE¹

Millions of dollars; monthly data seasonally adjusted

Item	1990	1991	1992	1993								
	1770	1551	1792	' Apr.	May	June	July	Aug.	Sept.r	Oct. ^p		
Exports of domestic and foreign merchandise, excluding grant-aid shipments General imports including merchandise for immediate consumption plus entries into bonded warehouses	393,592 495,311	421,730 488,453	448,164 532,665	38,479 48,660	38,930 47,306	37,639 49,698	37,109 47,534	38,050 48,097	38,885 49,506	40,110 50,566		
3 Trade balance	-101,718	-66,723	-84,501	-10,182	-8,376	-12,058	-10,425	-10,047	-10,621	-10,455		

^{1.} Government and nongovernment shipments of merchandise between foreign countries and the fifty states, including the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and U.S. Foreign Trade Zones. Data exclude (1) shipments among the United States, Puerto Rico, the U.S. Virgin Islands, and other U.S. affiliated insular areas, (2) shipments to U.S. Armed Forces and diplomatic missions abroad for their own use, (3) U.S. goods returned to the United States by its Armed Forces, (4) personal and household effects of travelers, and (5) in-transit shipments. Data reflect the total arrival of merchandise from foreign countries that immediately entered consumption channels, warehouses, or U.S. Foreign Trade Zones (general imports). Import data are Customs value; export data are F.A.S. value. Since 1990, data for U.S. exports to Canada have been derived from import data compiled by Canada; similarly, in Canadian statistics, Canadian exports to the United States are derived from import data compiled by

the United States. Since Jan. 1, 1987, merchandise trade data have been released forty-five days after the end of the month; the previous month is revised to reflect late documents.

late documents.

Data in this table differ from figures for merchandise trade shown in the U.S. balance of payments accounts (table 3.10, lines 2 through 4) primarily for reasons of coverage. For both exports and imports, a large part of the difference is the treatment of military sales and purchases. The military sales to foreigners (exports) and purchases from foreigners (imports) that are included in this table as merchandise trade are shifted, in the balance of payments accounts, from "merchandise trade" into the broader category "military transactions."

Gold stock, including Exchange Stabilization Fund Special drawing rights Reserve position in International Monetary Fund Foreign currencies	11,058 10,989 9,076 52,193	11,057 11,240 9,488 45,934	11,056 8,503 11,759 40,005	11,053 9,147 12,195 44,316	11,057 8,987 11,926 41,998	11,057 8,905 12,083 42,094	11,057 9,133 12,118 42,923	11,057 9,203 12,101 43,474	11,056 9,038 11,908 42,548	11,054 9,091 11,827 42,070			

1981, five currencies have been used. U.S. SDR holdings and reserve positions in the IMF also have been valued on this basis since July 1974.

3. Includes allocations of SDRs by the International Monetary Fund on Jan. 1 of the year indicated, as follows: 1970—\$867 million; 1971—\$717 million; 1972—\$710 million; 1979—\$1,139 million; 1980—\$1,152 million; 1981—\$1,093 million; plus net transactions in SDRs.

4. Valued at current market exchange rates.

3.13 FOREIGN OFFICIAL ASSETS HELD AT FEDERAL RESERVE BANKS¹

Millions of dollars, end of period

Asset	1990	1991	1992	1993								
	1990	1791		May	June	July	Aug.	Sept.	Oct.	Nov. ^p		
1 Deposits	369	968	205	193	286	284	357	501	390	596		
Held in custody 2 U.S. Treasury securities ² 3 Earmarked gold ³	278,499 13,387	281,107 13,303	314,481 13,686	345,060 12,854	343,672 12,829	343,378 12,756	356,671 12,686	358,860 12,562	358,975 12,464	373,864 12,381		

^{1.} Excludes deposits and U.S. Treasury securities held for international and regional organizations.

2. Marketable U.S. Treasury bills, notes, and bonds and nonmarketable U.S. Treasury securities payable at face value in dollars or foreign currencies.

3. Held in foreign and international accounts and valued at \$42.22 per fine troy ounce; not included in the gold stock of the United States.

^{1.} Gold held "under earmark" at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States; see table 3.13, line 3. Gold stock is valued at \$42.22 per fine troy ounce.

2. Special drawing rights (SDRs) are valued according to a technique adopted by the International Monetary Fund (IMF) in July 1974. Values are based on a weighted average of exchange rates for the currencies of member countries. From July 1974 through December 1980, sixteen currencies were used; since January

^{1.} Since June 1984, reported claims held by foreign branches have been reduced by an increase in the reporting threshold for "shell" branches from \$50

million to \$150 million equivalent in total assets, the threshold now applicable to all reporting branches.

^{1.} Reporting banks include all kinds of depository institutions besides commercial banks, as well as some brokers and dealers.

foreign bank, and foreign branches, agencies, or wholly owned subsidiaries of head office or parent foreign bank.

3. Assets held by reporting banks in the accounts of their domestic customers.

4. Principally negotiable time certificates of deposit and bankers acceptances.

5. Includes demand and time deposits and negotiable and nonnegotiable certificates of deposit denominated in U.S. dollars issued by banks abroad. For description of changes in data reported by nonbanks, see Federal Reserve Bulletin, vol. 65 (July 1979), p. 550.

Maturity is time remaining to maturity.
 Includes nonmonetary international and regional organizations.

^{1.} The banking offices covered by these data are the U.S. offices and foreign branches of U.S.-owned banks and of U.S. subsidiaries of foreign-owned banks. Offices not covered include (1) U.S. agencies and branches of foreign banks, and (2) foreign subsidiaries of U.S. banks. U.S. office data include other types of U.S.-owned depository institutions as well as some types of brokers and dealers. To minimize duplication, the data are adjusted to exclude the claims on foreign branches held by a U.S. office or another foreign branch of the same banking institution. The data in this table combine foreign branch claims in table 3.14 (the sum of lines 7 through 10) with the claims of U.S. offices in table 3.18 (excluding those held by agencies and branches of foreign banks and those constituting claims on own foreign branches).

Since June 1984, reported claims held by foreign branches have been reduced

by an increase in the reporting threshold for "shell" branches from \$50 million to \$150 million equivalent in total assets, the threshold now applicable to all reporting branches.

2. Organization of Petroleum Exporting Countries, shown individually; other members of OPEC (Algeria, Gabon, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, and United Arab Emirates); and Bahrain and Oman (not formally members of OPEC).

3. Excludes Liberia.

4. Includes Canal Zone.

5. Foreign branch claims only.

6. Includes New Zealand, Liberia, and international and regional organizations.

^{1.} For a description of the changes in the international statistics tables, see Federal Reserve Bulletin, vol. 65, (July 1979), p. 550.
2. Comprises Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

Comprises Algeria, Gabon, Libya, and Nigeria.
 Includes nonmonetary international and regional organizations.
 Revisions include a reclassification of transactions, which also affects the totals for Asia and the grand totals.

Rates shown are mainly those at which the central bank either discounts or
makes advances against eligible commercial paper or government securities for
commercial banks or brokers. For countries with more than one rate applicable to
such discounts or advances, the rate shown is the one at which it is understood
that the central bank transacts the largest proportion of its credit operations.

^{1.} Averages of certified noon buying rates in New York for cable transfers. Data in this table also appear in the Board's G.5 (405) monthly statistical release. For ordering address, see inside front cover.

2. Value in U.S. cents.

3. Index of weighted-average exchange value of U.S. dollar against the currencies of ten industrial countries. The weight for each of the ten countries is

the 1972-76 average world trade of that country divided by the average world trade of all ten countries combined. Series revised as of August 1978 (see Federal Reserve Bulletin, vol. 64 (August 1978), p. 700).

1. Effective March 31, 1984, the report of condition for commercial banks was substantially revised. Some of the changes are as follows: (1) Previously, banks with international banking facilities (IBFs) that had no other foreign offices were considered domestic reporters. Beginning with the March 31, 1984, Call Report these banks are considered foreign and domestic reporters and must file the foreign and domestic report of condition. (2) Banks with assets of more than \$1 billion report additional items. (3) The domestic offices of banks with foreign offices report far less detail. (4) Banks with assets of less than \$25 million are excused from reporting certain detail items.

The notation "n.a." indicates the lesser detail available from banks that don't have foreign offices, the inapplicability of certain items to banks that have only domestic offices or the absence of detail on a fully consolidated basis for banks that have foreign offices.

domestic offices or the absence of detail on a fully consolidated basis for banks that have foreign offices.

All transactions between domestic and foreign offices of a bank are reported in "net due from" and "net due to" lines. All other lines represent transactions with parties other than the domestic and foreign offices of each bank. Because these intraoffice transactions are nullified by consolidation, total assets and total liabilities for the entire bank may not equal the sum of assets and tiabilities respectively of the domestic and foreign offices.

2. Foreign offices include branches in foreign countries, Puerto Rico, and U.S. territories and recessions; subsidiaries in foreign countries, all offices of Edge.

territories and possessions; subsidiaries in foreign countries; all offices of Edge Act and agreement corporations wherever located; and IBFs.

3. "Over 100" refers to banks whose assets, on June 30 of the preceding calendar year, were \$100 million or more. (These banks file the FFIEC 032 or

FFIEC 033 Call Report.) "Under 100" refers to banks whose assets, on June 30 of the preceding calendar year, were less than \$100 million. (These banks file the FFIEC 034 Call Report.)

4. Because the domestic portion of allowances for loan and lease losses and

- Because the domestic portion of allowances for loan and lease losses and allocated transfer risk reserves are not reported for banks with foreign offices, the components of total assets (domestic) do not sum to the actual total (domestic).
 Because the foreign portion of demand notes issued to the U.S. Treasury is not reported for banks with foreign offices, the components of total liabilities (foreign) do not sum to the actual total (foreign).
 The definition of "all other" varies by report form and therefore by column in this table.

- The definition of all other varies by report form and therefore by column in this table.
 Requity capital is not allocated between the domestic and foreign offices of banks with foreign offices.
 Rolly the domestic portion of federal funds sold and securities purchased under agreements to resell are reported here; therefore, the components do not sum to totals.
- Acceptances of other banks is not reported by domestic banks having less than \$300 million in total assets; therefore the components do not sum to totals.
 Only the domestic portion of federal funds purchased and securities sold under agreements to repurchase are reported here; therefore the components do not sum to totals.

11. Components are reported only for banks with total assets of \$1 billion or more; therefore, components do not sum to totals.

4.23 TERMS OF LENDING AT COMMERCIAL BANKS Survey of Loans Made, November 1-5, 1993—Continued

NOTES

- 1. The survey of terms of bank lending to business collects data on gross loan extensions made during the first full business week in the mid-month of each quarter by a sample of 340 commercial banks of all sizes. A sample of 250 banks reports loans to farmers. The sample data are blown up to estimate the lending terms at all insured commercial banks during that week. The estimated terms of bank lending are not intended for use in collecting the terms of loans extended over the entire quarter or residing in the portfolios of those banks. Construction and land development loans include both unsecure loans and loans secured by real estate. Thus, some of the construction and land development loans would be reported on the statement of condition as real estate loans and the remainder as reported on the statement of condition as real estate loans and the remainder as business loans. Mortgage loans, purchased loans, foreign loans, and loans of less that \$1,000 are excluded from the survey. As of September 30, assets of most of the large banks were at least \$7.0 billion. For all insured banks, total assets averaged \$275 million.

 2. Average maturities are weighted by loan size; excludes demand loans.
- Average \$2.75 minion.
 Average maturities are weighted by loan size; excludes demand loans.
 Effective (compounded) annual interest rate calculated from the stated rate and other terms of the loans and weighted by loan size.
- 4. The chances are about two out of three that the average rate shown would differ by less than the amount of the standard error from the average rate that would be found by a complete survey of lending at all banks.

 5. The rate used to price the largest dollar volume of loans. Base pricing rates include the prime rate (sometimes referred to as a bank's "basic" or "reference" rate); the federal funds rate; domestic money market rates other than the federal funds rate; foreign money market rates; and other base rates not included in the foregoing classifications.

 6. Overnight loans mature on the following business day.

 7. Demand loans have no stated date of maturity.

 8. Nominal (not compounded) annual interest rate calculated from the stated rate and other terms of the loans and weighted by loan size.
- Nominal (not component) animal interest rate cancinate in only in the states rate and other terms of the loans and weighted by loan size.
 Calculated by weighting the prime rate reported by each bank by the volume of loans reported by that bank, summing the results, and then averaging over all reporting banks.
 The proportion of loans made at rates below the prime may vary substantially from the proportion of such loans outstanding in banks' portfolios.

^{1.} Data are aggregates of categories reported on the quarterly form FFIEC 002, "Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks." The form was first used for reporting data as of June 30, 1980, and was revised as of December 31, 1985. From November 1972 through May 1980, U.S. branches and agencies of foreign banks had filed a monthly FR 886a report. Aggregate data from that report were available through the Federal Reserve statistical release G.11, last issued on July 10, 1980. Data in this table and in the G.11 tables are not strictly comparable because of differences in reporting panels and in definitions of balance sheet items. IBF, international banking facility.

2. Includes the District of Columbia.

3. Effective December 1981, the Federal Reserve Board amended Regulations D and Q to permit banking offices located in the United States to operate international banking facilities (IBFs). Since December 31, 1985, data for IBFs have been reported in a separate column. These data are either included in or excluded from the total columns as indicated in the headings. The notation "n.a." indicates that no IBF data have been reported for that item, either because the

item is not an eligible IBF asset or liability or because that level of detail is not reported for IBFs. From December 1981 through September 1985, IBF data were included in all applicable items reported.

4. Total assets and total liabilities include net balances, if any, due from or owed to related banking institutions in the United States and in foreign countries (see note 5). On the former monthly branch and agency report, available through the G.11 statistical release, gross balances were included in total assets and total liabilities. Therefore, total asset and total liability figures in this table are not comparable to those in the G.11 tables.

5. Related depository institutions includes the foreign head office and other U.S. and foreign branches and agencies of a bank, a bank's parent holding company, and majority-owned banking subsidiaries of the bank and of its parent holding company (including subsidiaries owned both directly) and indirectly).

6. In some cases two or more offices of a foreign bank within the same metropolitan area file a consolidated report.

^{1.} Senior Vice President.

Publications of Interest

FEDERAL RESERVE CONSUMER CREDIT PUBLICATIONS

The Federal Reserve Board publishes a series of pamphlets covering individual credit laws and topics, as pictured below. The series includes such subjects as how the Equal Credit Opportunity Act protects women against discrimination in their credit dealings, how to use a credit card, and how to resolve a billing error.

The Board also publishes the Consumer Handbook to Credit Protection Laws, a complete guide to consumer credit protections. This forty-four-page booklet explains how to shop and obtain credit, how to maintain a good credit rating, and how to dispute unfair credit transactions.

Three booklets on the mortgage process are also available: A Consumer's Guide to Mortgage Lock-Ins, A Consumer's Guide to Mortgage Refinancings, and A Consumer's Guide to Mortgage Settlement Costs. These booklets were prepared in conjunction with the Federal Home Loan Bank Board and in consultation with other federal agencies and trade and consumer groups.

Copies of consumer publications are available free of charge from Publications Services, mail stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551. Multiple copies for classroom use are also available free of charge.

Federal Reserve Statistical Releases Available on the Commerce Department's Economic Bulletin Board

The Board of Governors of the Federal Reserve System makes some of its statistical releases available to the public through the U.S. Department of Commerce's economic bulletin board. Computer access to the releases can be obtained by subscription. For further information regarding a subscription to the economic bulletin board, please call (202) 482-1986. The releases transmitted to the economic bulletin board, on a regular basis, are the following:

Reference Number	Statistical release	Frequency of release
Н.3	Aggregate Reserves	Weekly/Thursday
H.4.1	Factors Affecting Reserve Balances	Weekly/Thursday
H.6	Money Stock	Weekly/Thursday
H.8	Assets and Liabilities of Insured Domestically Chartered and Foreign Related Banking Institutions	Weekly/Monday
H.10	Foreign Exchange Rates	Weekly/Monday
H.15	Selected Interest Rates	Weekly/Monday
G.5	Foreign Exchange Rates	Monthly/end of month
G.17	Industrial Production and Capacity Utilization	Monthly/midmonth
G.19	Consumer Installment Credit	Monthly/fifth business day
Z .7	Flow of Funds	Quarterly

Publications of Interest

FEDERAL RESERVE REGULATORY SERVICE

To promote public understanding of its regulatory functions, the Board publishes the Federal Reserve Regulatory Service, a three-volume looseleaf service containing all Board regulations as well as related statutes, interpretations, policy statements, rulings, and staff opinions. For those with a more specialized interest in the Board's regulations, parts of this service are published separately as handbooks pertaining to monetary policy, securities credit, consumer affairs, and the payment system.

These publications are designed to help those who must frequently refer to the Board's regulatory materials. They are updated monthly, and each contains citation indexes and a subject index.

The Monetary Policy and Reserve Requirements Handbook contains Regulations A, D, and Q, plus related materials.

The Securities Credit Transactions Handbook contains Regulations G, T, U, and X, dealing with extensions of credit for the purchase of securities, together with related statutes, Board interpretations, rulings, and staff opinions. Also included are the Board's list

of marginable OTC stocks and its list of foreign margin stocks.

The Consumer and Community Affairs Handbook contains Regulations B, C, E, M, Z, AA, and BB, and associated materials.

The Payment System Handbook deals with expedited funds availability, check collection, wire transfers, and risk-reduction policy. It includes Regulation CC, Regulation J, the Expedited Funds Availability Act and related statutes, the official Board commentary on Regulation CC, and policy statements on risk reduction in the payment system.

For domestic subscribers, the annual rate is \$200 for the Federal Reserve Regulatory Service and \$75 for each Handbook. For subscribers outside the United States, the price including additional air mail costs is \$250 for the Service and \$90 for each Handbook. All subscription requests must be accompanied by a check or money order payable to the Board of Governors of the Federal Reserve System. Orders should be addressed to Publications Services, mail stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551.

U.S. MONETARY POLICY AND FINANCIAL MARKETS

U.S. Monetary Policy and Financial Markets by Ann-Marie Meulendyke offers an in-depth description of the way monetary policy is developed by the Federal Open Market Committee and the techniques employed to implement policy at the Open Market Trading Desk. Written from her perspective as a senior economist in the Open Market Function at the Federal Reserve Bank of New York, Ann-Marie Meulendyke describes the tools and the setting of policy, including many of the complexities that differentiate the process from simpler textbook models. Included is an account of a day at the Trading Desk, from morning information-gathering through daily decisionmaking and the execution of an open market operation.

The book also places monetary policy in a broader

context, examining first the evolution of Federal Reserve monetary policy procedures from their beginnings in 1914 to the end of the 1980s. It indicates how policy operates most directly through the banking system and the financial markets and describes key features of both. Finally, the book turns its attention to the transmittal of monetary policy actions to the U.S. economy and throughout the world.

The book is \$5.00 a copy for U.S. purchasers and \$10.00 for purchasers outside the United States. Copies are available from the Public Information Department, Federal Reserve Bank of New York, 33 Liberty Street, New York, NY 10045. Checks must accompany orders and should be payable to the Federal Reserve Bank of New York in U.S. dollars.
