The Federal Reserve Bulletin is issued monthly under the direction of the staff publications committee. This committee is responsible for opinions expressed except in official statements and signed articles. It is assisted by the Economic Editing Section headed by S. Ellen Dykes, the Graphics Center under the direction of Christine S. Griffith, and Publications Services supervised by Linda C. Kyles.

Table of Contents

1 SURVEY OF FINANCE COMPANIES, 2000

Against a backdrop of robust economic activity, the finance company sector expanded briskly over the second half of the 1990s. The value of receivables held by finance companies in the United States rose nearly 50 percent, or about 11 percent a year, between 1996 and 2000. Business lending remained finance companies' major line of activity; the importance to the sector of consumer lending and leasing declined slightly, and the importance of real estate lending rose a bit. These and other findings from the Federal Reserve's mid-2000 benchmark survey of finance companies, as well as developments in the sector since that time, are discussed in this article.

15 ANNOUNCEMENTS

Federal Open Market Committee directive and discount rate changes.

Resignation of Governor Edward W. Kelley, Jr.

Oath of office taken by new Board Governors Susan Schmidt Bies and Mark W. Olson.

Adoption of revised payment system risk policy.

Final rule amending Regulation Z (Truth in Lending) regarding the Home Ownership and Equity Protection Act (HOEPA) and predatory lending.

Proposed revisions to staff commentary on Regulation Z (Truth in Lending) regarding consumer credit disclosures.

Interagency final rule on capital requirements for asset securitizations.

Interagency guidance on compliance with consumer privacy regulations.

Results of study on retail payment system.

Annual adjustment of trigger fee for additional mortgage loan disclosures.

Board discount rate meeting minutes.

Anthrax tests at Board.

Survey of Finance Companies, 2000

Karen E. Dynan, Kathleen W. Johnson, and Samuel M. Slowinski, of the Board's Division of Research and Statistics, prepared this article with assistance from Greg D. Grothe and Hank Leddon.

Finance companies are important providers of credit to households and businesses. For households, they originate loans and leases to finance the purchase of consumer goods such as automobiles, furniture, and household appliances; they also extend personal cash loans and loans secured by junior liens on real estate, such as home equity loans. For businesses, they supply short- and intermediate-term credit (including leases) for such purposes as the purchase of equipment and motor vehicles and the financing of inventories.¹

With roughly \$1 trillion in financial assets as of mid-2000, the finance company sector occupies an intermediate position among the sectors that typically lend to households and businesses: In terms of assets, it is more than twice as large as the credit union sector, about the same size as the thrift sector, but only about one-fifth as large as the commercial banking sector. The approximately 1,000 companies that make up the sector (down from about 1,200 in 1996) range in size from very small to very large and include the "captive" subsidiary finance companies of motor vehicle manufacturers. The companies tend to be diversified, with more than 90 percent of the sector's assets as of mid-2000 held by companies that did not concentrate in any one type of receivable. The larger firms are more likely to be diversified; of the small firms that specialize, most focus on short- and intermediate-term business receivables. The sector is quite concentrated, and has been for some time, with the twenty largest companies accounting for more than two-thirds of total receivables (see box "Industry Concentration").

The Federal Reserve System has surveyed the assets and liabilities of finance companies at roughly five-year intervals since 1955. The surveys provide

benchmarks for the System's monthly report on the outstanding accounts receivable of finance companies and provide a comprehensive update on these companies' sources of funds. This information in turn becomes an important input to the estimates of total consumer credit and the U.S. flow of funds accounts produced at the Federal Reserve Board. Summarized in this article are the results of the most recent survey, which collected finance company balance sheet information as of June 30, 2000. (Details on sampling procedures are given in appendix A, and complete balance sheet data are provided in table B.1.)

FINANCE COMPANY RECEIVABLES

The total value of receivables owned or securitized by finance companies increased nearly 50 percent between 1996 and 2000, or approximately 11 percent a year on average (table 1).2 The gain occurred against a backdrop of brisk economic expansion, with nominal gross domestic product increasing at an average annual rate of about 6 percent over the period. Business lending remained the largest major line of activity, accounting for just under half of all receivables. There was apparently some shift between the other two major lines of activity, however. The share of total receivables accounted for by consumer lending and leasing declined 2 percentage points (to 39 percent); that decline was matched by a comparable rise in the share accounted for by real estate loans (to 17 percent). With most real estate receivables at finance companies being home equity loans, this shift may indicate that households have been substituting lower-cost, collateralized home equity loans for high-cost, uncollateralized consumer loans as a source of credit.

Finance companies sometimes securitize their loans by pooling them and selling them to a bankruptcy-remote entity, which then sells securities backed by the revenue stream generated by the loans.³ A securitized loan is removed from the

^{1.} For this article, finance companies are defined as financial institutions—other than commercial banks, credit unions, savings and loan associations, cooperative banks, or savings banks—the majority of whose assets are in one or more of the types of accounts receivable described above. (An "account receivable," sometimes referred to as simply a receivable, is a balance due from a debtor on a current account.)

^{2.} Unless otherwise noted, all statistics cited are as of June 30 of the year indicated.

A "bankruptcy-remote" entity is one whose assets will not enter receivership if the originating finance company declares bankruptcy.

Industry Concentration

Overall, concentration in the finance company industry was about unchanged between the 1996 and 2000 surveys, marking a break in the steady trend toward consolidation seen in earlier surveys. Total receivables at the twenty largest firms (based on total net assets) represented 69 percent of total industry receivables in mid-2000, compared with 70 percent in mid-1996 (table).

Owned business receivables became markedly less concentrated, with the twenty largest firms accounting for 11 percentage points less of all such receivables in 2000 than they had four years earlier. The underlying data suggest that the shift in owned business receivables toward smaller firms was attributable primarily to a sizable decline in the concentration of business (non-motor vehicle) equipment receivables. As smaller companies are less likely than large ones to identify themselves as diversified, the decline in the concentration of owned business equipment receivables may suggest that specialization has become an increasingly efficient way of providing funds for this type of investment.

The other major components of finance company receivables became more concentrated between 1996 and 2000. The shares of owned consumer and real estate receivables accounted for by the twenty largest firms moved up 3 percentage points and 4 percentage points, respectively. The concentration of securitized receivables rose sharply, with the share of the twenty largest firms 12 percentage points higher in 2000 than in 1996. The concentration of securitized receivables also rose impressively between the 1990 and 1996 surveys. The upward trend suggests that the relative attractiveness of the products of the larger securitization programs has risen over time, possibly because investors have increasingly associated these more-established programs with lower risk.

finance company's balance sheet, although the company typically continues to collect the service payment and would bear the cost of a default.⁴ After rising rapidly in the early 1990s, when securitization was a relatively new practice, the proportion of finance company loans that was securitized increased only moderately in the late 1990s, from 16 percent in 1996 to 18 percent in 2000.

Business Receivables

Finance companies owned or had securitized \$503 billion in business receivables as of June 30, 2000, accounting for roughly 8 percent of total non-financial business credit and close to 22 percent of short- and intermediate-term business credit (table 2). Between 1996 and 2000, finance company business receivables increased at an average annual rate of 10 percent, approximately matching the rates of growth of alternative sources of short-term business finance, such as bank loans, and longer-term instruments, such as corporate bonds and mortgages. As a result, finance companies maintained their share of the market for nonfinancial business credit over the intrasurvey period.

Finance companies appear to be an important source of funds for small businesses—firms with

^{4.} In most securitization deals, finance companies retain the "excess spread"—the difference between the yield on the loans and such expenses as the investor coupon, servicing fee, and losses associated with defaults. As a result, they typically retain the credit risk of securitized portfolios.

n.e.c. Not elsewhere classified.

fewer than 500 employees. In 1998, about 14 percent of all small businesses, and roughly 30 percent of small businesses with more than 100 employees or annual sales totaling more than \$10 million, used finance companies for loans, leases, and financial management. Small businesses used finance companies mainly for motor vehicle loans and capital leases, areas in which finance companies specialize. Small businesses were only slightly less likely to use a finance company than a commercial bank to finance their motor vehicle purchases and were equally likely to use a finance company or a commercial bank for their capital leases.⁵

Although the overall importance of finance companies in the business credit market apparently remained stable between 1996 and 2000, there were a few shifts in the composition of finance company business lending. These shifts included movements from owned toward securitized equipment loans, from business financing for investment in equipment and motor vehicles toward other types of business finance, and from loans to purchase business motor vehicles toward leases.

Equipment Finance

Loans and leases for business equipment (other than motor vehicles) accounted for close to 60 percent of total finance company business receivables in 2000 (table 3). Such funding typically supports business investment in such items as construction equipment, aircraft, and computers and other office machines.

Although the growth of equipment loans and leases tends to be correlated with the growth of business investment in equipment, finance company equipment loans and leases expanded at an average annual rate of 9 percent between 1996 and 2000, somewhat less than the 11 percent average annual increase in investment in business equipment and software (excluding motor vehicles) over the period. For comparison, commercial paper and commercial and industrial loans extended by commercial banks—other sources of short- and intermediate-term business debt that may be used to finance equipment investment—rose at average annual rates of 13 percent and 12 percent, respectively, over the period.

Equipment leases, which account for the lion's share of equipment receivables at finance companies, increased at an average annual rate of about 9 percent between 1996 and 2000.6 Despite the considerable size of their equipment lease portfolios, finance companies as a whole generally keep these receivables on their balance sheets rather than securitize them. Indeed, only about 3 percent of equipment leases were in securitized pools in 2000. Nonetheless, some small finance companies securitize a large portion of their equipment lease portfolios.

Overall, equipment loans rose at an average annual rate of 8 percent between surveys. Although securitized equipment loans increased much faster (34 percent annually), they continue to account for only a small share of total equipment receivables—about 6 percent in 2000.

^{5.} Marianne P. Bitler, Alicia M. Robb, and John D. Wolken, "Financial Services Used by Small Businesses: Evidence from the 1998 Survey of Small Business Finances," *Federal Reserve Bulletin*, vol. 87 (April 2001), pp. 183–205.

^{6.} Most equipment and business motor vehicle leases extended by finance companies are capital leases. Most capital leases are quite long relative to the useful life of the leased item, and although the finance company retains the title to the item during the leasing period, lease payments are generally applied toward its eventual purchase. In this way, leases are similar to equipment and business motor vehicle loans.

Wholesale Motor Vehicle Finance

Wholesale motor vehicle loans, which are supplied mainly by the captive subsidiary finance companies of motor vehicle manufacturers, are typically used by automobile dealers to finance their inventories (an activity known as floor-planning). Receivables at finance companies from this activity increased roughly 5 percent a year between surveys, to \$65 billion in 2000. As a proportion of total business receivables, however, wholesale motor vehicle loans fell from 16 percent to 13 percent. About 40 percent of wholesale automobile loans were securitized, almost exclusively by the captive financing arms of the Big Three automakers (Chrysler Financial Corporation, Ford Motor Credit, and General Motors Acceptance Corporation).

The growth between 1996 and 2000 of wholesale motor vehicle loans extended by finance companies tracked the growth of inventories at automobile dealers quite closely (chart 1). The rates of growth remained stable until mid-1998, when automobile sales surged. At that time, dealers increased their inventories sharply in order to keep their days' supply of vehicles roughly constant, and they stepped up their borrowing to finance the increase.

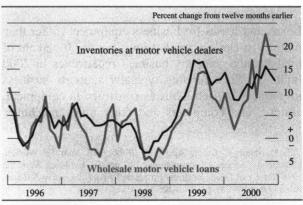

Business Retail Motor Vehicle Finance

Finance companies also provide credit for the retail sale to businesses of passenger cars and commercial

. . . Not applicable.

vehicles such as trucks, buses, taxicabs, and truck trailers. Between 1996 and 2000, retail motor vehicle receivables at finance companies increased an average of 4 percent annually, generally mirroring the expansion of business investment in automobiles and trucks. There has been a clear trend in business retail motor vehicle financing toward leasing. The business retail motor vehicle lease portfolios of finance companies expanded an average of almost 24 percent annually between surveys, and in 2000 leases accounted for just under half of all business retail motor vehicle financing by finance companies. In contrast, finance companies' retail motor vehicle loan portfolios declined an average of 4 percent a year between surveys.

Wholesale motor vehicle lending by finance companies, 1996–2000

Note. The data on inventories are from the U.S. Census Bureau.

Other Business Receivables

"Other business receivables" include commercial accounts receivable, factored commercial accounts, floor-plan loans to dealers in non-automotive goods, and small cash loans to businesses and farms. Financing in this category rose rapidly between 1996 and 2000, increasing from about 14 percent of total business receivables at finance companies to roughly 21 percent. However, little quantitative information is available to determine which types of business receivables accounted for the gain.

Consumer Receivables

The consumer segment of finance company activity expanded at a robust 9 percent annual pace between surveys, with receivables (including securitized loans and leases) reaching \$432 billion by mid-2000 (table 4). At that time, finance company consumer receivables excluding motor vehicle leases accounted for just over 20 percent of total consumer debt.

Finance company consumer receivables increased mainly on the strength of motor vehicle loans. Revolving credit (primarily credit card balances) posted a moderate gain and maintained a fairly small share of overall finance company activity. "Other" consumer loans—a diverse mix of other types of non-mortgage consumer loans—changed little on net in the late 1990s, and as a result, the importance to finance companies of this category of consumer loans continued to diminish.

Consumer Motor Vehicle Finance

Financing of consumer motor vehicles by finance companies increased at an average annual rate of 12 percent between 1996 and 2000, reaching a level of \$338 billion. Most of the gain was due to growth in loans. Growth in receivables associated with leases slowed considerably from the rate of growth between 1990 and 1996. As a result of the slow growth of leases relative to the growth of loans, leases accounted for 9 percentage points less of consumer motor vehicle finance in 2000 than in 1996.

This shift away from leases partly reversed a 25 percentage point rise between 1990 and 1996 in the proportion of consumer motor vehicle finance accounted for by leases. The fourfold increase in car and truck leasing underlying the earlier gain was due largely to aggressive promotion of motor vehicle leases to households by the captive subsidiaries of motor vehicle manufacturers. These subsidiaries, which account for the bulk of finance company consumer motor vehicle lending, have traditionally used financial incentives and other innovations to increase demand for the products of their parent manufacturers. The development of the motor vehicle lease as a consumer product was one such innovation. Generally, consumers became more receptive to leasing as a result of federal tax code revisions in the mid-1980s that phased out the deductibility of consumer loan interest payments, thereby raising the cost of financing vehicle purchases relative to leasing. In addition, leasing was perceived as a way to better reach two specific portions of the consumer market. One portion was households that wanted to drive "new" vehicles at all times but were deterred from replacing their vehicles frequently by the difficulties associated

^{. . .} Not applicable.

with reselling them. The other portion was households that were unable to make regular payments on vehicle loans but could afford the smaller payments typically associated with leasing.

According to industry analysts, the shift away from leasing in recent years has occurred because consumer auto leasing has turned out to be less profitable for finance companies than anticipated. A softer-thanexpected used car market depressed the actual value of many vehicles at the end of the lease period relative to the "residual value" stated in the leasing agreement. The losses associated with these weak used car prices were exacerbated by larger-thanexpected turn-in ratios (the fraction of households not exercising their option to purchase the leased vehicle), which left finance companies with large numbers of previously leased vehicles to sell. Both the weakness in used car prices and the high turn-in ratios appear to be at least partly related to the relatively rapid rate of model development and the small price increases that characterized the new car market in the second half of the 1990s.

One pattern in consumer motor vehicle finance that has not changed since the early 1990s is the trend toward securitization. The value of securitized motor vehicle loans at finance companies rose at an average annual rate of 21 percent between 1996 and 2000. In 2000, securitized loans and leases represented just over 25 percent of finance company consumer motor vehicle receivables, up from roughly 20 percent in 1996 and about 15 percent in 1990. The captive finance companies, which account for a sizable portion of outstanding securitized motor vehicle receivables, continued to have reliable access to the securitization market through 2000 because they dealt mainly with higher quality loans.

Revolving Credit

Finance company revolving credit—mostly credit card receivables—rose from \$30 billion to \$38 billion between 1996 and 2000, or about 6 percent a year on average. Most of the increase was due to an increase in loans in securitized pools. Investor demand for this type of asset remained strong through the late 1990s, as the economic expansion resulted in continued gains in credit quality.

The pace of growth of finance company revolving credit (owned or securitized) was similar to that for such loans from all sources. As a result, finance companies continued to account for a fairly small share of the consumer revolving credit market, about 6 percent of total revolving credit outstanding.

Other Consumer Receivables

Finance company consumer receivables aside from the motor vehicle and revolving credit categories were little changed between 1996 and 2000. The largest component of the "other" category most likely is personal cash loans. Another important component is sales finance contracts—loans typically originated by retail stores to finance the purchase of such items as furniture or appliances and often sold to finance companies. A third component is mobile home loans (these loans constitute the collateral behind most of the securitized loans in the "other" category).

The lackluster performance of finance companies in the "other" category between 1996 and 2000 continued a trend seen in the early 1990s, when growth in the category also lagged growth in the other categories of consumer receivables, albeit to a lesser extent. The declining importance of "other" loans is probably related to the growing role of credit cards. In particular, revolving credit has become more available to consumers who formerly had to rely on non-revolving finance company credit: During the 1990s, banks on balance moved toward riskier households in their marketing of credit cards, and several large finance companies established credit card operations.

Real Estate Receivables

Real estate lending by finance companies increased at an average annual rate of close to 16 percent between 1996 and 2000 (table 5). Despite this impressive pace of expansion, finance companies continued to account for a very small share of total residential and commercial mortgage lending. In mid-2000, outstanding

^{8.} The 1996 data for revolving and "other" consumer receivables in table 4 are lower than those cited in James D. August, Michael R. Grupe, Charles Luckett, and Samuel M. Slowinski, "Survey of Finance Companies, 1996," *Federal Reserve Bulletin*, vol. 83 (July 1997), pp. 543–56. After publication of that article, the receivables of several commercial bank subsidiaries that had been included in the totals reported by some finance companies were removed from the various series.

^{9.} Surveyed companies were first asked about loans for the purchase of motor vehicles, revolving lines of credit, and loans secured by real estate. Then they were asked about loans and other types of credit extended to households that did *not* fall into those three categories; these remaining receivables make up the "other" category. Companies were not asked to report any detail for "other" consumer receivables; see appendix B for more information about the category.

Cotocomi	Amount (billions of dollars)		Growth, 1996 to 2000 (percent)		Share of category (percent)		Share of total (percent)

Note. Commercial includes multifamily and farm.

* Negligible.

finance company loans totaled \$185 billion, less than 3 percent of the overall mortgage market.¹⁰

Loans to individual homeowners secured by oneto four-family homes are by far the largest component of finance company real estate receivables, and they accounted for the bulk of the growth between 1996 and 2000. Such loans rose at a vigorous average annual rate of 20 percent over the period, reaching \$147 billion. Most of the additional lending was retained on the balance sheets of finance companies; securitized loans in this category rose much less rapidly than total loans. Commercial mortgages, including mortgages on farm and multifamily properties, expanded an average of 4 percent a year between 1996 and 2000. As of mid-2000, they represented just under 21 percent of real estate lending by finance companies, down from a 32 percent share in 1996.

Almost all finance company real estate loans to individuals are home equity loans rather than loans to purchase homes.¹¹ As a result, finance companies represent a larger share of the market for home equity loans than they do of the broader mortgage market. Total home equity lending is estimated to have been a little more than \$500 billion in mid-2000. The largest source of this credit was commercial banks, which held more than one-third of the total. Finance companies are estimated to have held about 20 percent of the total, up from roughly 15 percent in mid-1996.

Data on finance company real estate loans to individuals before 1996 are not available. 12 However, the

sharp upward trend in the late 1990s mirrors a rapid growth of total home equity lending that began in the middle of the decade. The increase in home equity lending was probably due at least partly to ongoing increases in households' use of this type of credit to consolidate their debt. The presence of collateral for these loans generally holds the interest rates below rates for most credit cards. Further, the repayment period on a home equity loan is typically longer than the implicit repayment period for credit card borrowing. As a result, borrowers who use home equity loans to pay down their credit card balances can substantially reduce their monthly payments. Another advantage of home equity loans over credit card borrowing is that interest paid on home equity loans is deductible for taxpayers who itemize such expenses.

FINANCE COMPANY FUNDING SOURCES

Finance company funding sources remained relatively stable between 1996 and 2000. The companies continued to operate from a narrow equity base. Capital, surplus, and undivided profits as a proportion of total assets was unchanged at about 11 percent (table 6). The most important source of funds, accounting for more than one-third of finance company funding, remained corporate bonds, the primary component of "debt not elsewhere classified." Finance companies' reliance on commercial paper continued to decline, falling 3 percentage points, to 18 percent. Bank borrowing and "other," unspecified, sources continued to fund about 2 percent and 20 percent of assets, respectively. Debt due to a parent company rose at an average annual rate of 14 percent between 1996 and 2000, reaching 8 percent of total funding. As mentioned earlier, finance companies increased their securitization activity rapidly between 1990 and 1996; however, the growth of securitized pools between 1996 and 2000 about equaled the

^{10.} The figures for finance company real estate receivables (indeed, all figures for finance companies) do not include data for mortgage banking companies. These specialized home mortgage lenders, which act primarily as mortgage originators and finance their lending activities almost exclusively through securitization, are not covered by the finance company survey.

^{11.} Although the survey does not ask for details about real estate loans, this is generally believed to be the case.

Before the 1996 survey, finance companies were not asked to disaggregate their real estate receivables into their home mortgage and commercial components.

growth of other forms of financing, and securitized assets remained at about 13 percent of total managed assets in 2000.¹³

DEVELOPMENTS SINCE THE JUNE 2000 BENCHMARK SURVEY

Securitized receivables

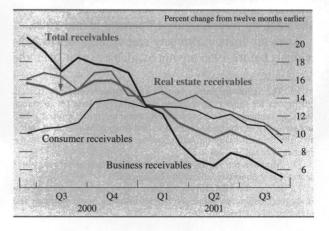

Total managed assets

Information on the pattern of finance company activity since the June 2000 benchmark survey is available from the Federal Reserve System's monthly survey of finance companies. 14 Over the fifteen months between the end of June 2000 and the end of September 2001, finance company receivables, adjusted to remove normal seasonal patterns, grew at an average annual rate of close to 9 percent. This pace was slightly less rapid than the trend over the preceding four years. However, the gains were not spread evenly over the post-benchmark period. In particular, the general weakening of macroeconomic activity since late 2000 showed through to overall finance company lending, and the rate of growth of total receivables trended down steadily (chart 2).

The slowing of overall finance company lending was due primarily to a sharp deceleration in finance company business receivables that began in the second half of 2000. The rate of growth of real estate and consumer receivables moved down much less dramatically. In general, the demand for both home equity loans and consumer loans most likely was buoyed by some households' efforts to sustain the rate of growth of their consumption in the face of what they perceived as a temporary slowing of

100.0

Growth of finance company receivables, June 2000–September 2001

^{13.} Total managed assets equal the sum of total assets and securitized receivables.

income and employment growth. Some category-specific factors probably also came into play. Home equity lending likely was boosted by the combination of low mortgage rates and relatively rapid appreciation of house prices. Generous incentives offered by the captive finance company subsidiaries of motor vehicle manufacturers helped maintain solid growth in consumer motor vehicle receivables. Finally, consumer receivables were boosted in late 2000 when a major finance company absorbed the securitized receivables of one of its non–finance company affiliates.¹⁵

^{15.} This transfer of assets explains some, but not all, of the increase in the rate of growth of finance company consumer receivables in late 2000. Without the transfer, the twelve-month change in the consumer component would have been a little more than 1 percentage point lower beginning in the fourth quarter of 2000, and the twelve-month change in total receivables would have been roughly ½ percentage point lower. Note that estimates of consumer lending from all sources were unaffected by this event because the increase in securitized loans held by finance companies was offset by a decline in securitized loans held elsewhere.

^{14.} Among other differences, the sample for the monthly survey is smaller than that for the benchmark survey; thus, the figures are subject to greater measurement and sampling error.

APPENDIX A: SAMPLING PROCEDURES

As a first step in establishing a population for the 2000 benchmark survey, pre-survey questionnaires were mailed to 2,589 companies that were identified from the mailing list for the 1996 survey and from other sources. Data were collected on the size of the company, its primary type of activity or specialty, and the classification of its parent, if any. Companies that responded to the questionnaire with information showing that they had gone out of business, had been sold to another firm, were not a finance company, or were a subsidiary of another finance company were excluded from the population (table A.1).

Follow-up investigations of companies that did not return the pre-survey questionnaire or whose questionnaires were returned by the Postal Service as undeliverable ("postal returns") were conducted to estimate the number of additional companies that belonged in the population. Investigations of a stratified random sample of 240 companies drawn from the 860 nonresponding companies yielded 78 eligible companies. Projecting this result on the basis of size and specialty class added 280 companies to the population. Similarly, investigations of a stratified random sample of 50 companies drawn from the 573 postal returns yielded 5 eligible companies, adding 57 companies to the population. Combining these estimates with the usable responses to the pre-survey questionnaire, the population of finance companies on June 30, 2000, was initially estimated at 1,012.

The sample for the 2000 benchmark survey consisted of two groups: the 58 finance companies surveyed monthly for the Domestic Finance Company Report (FR 2248) and a stratified random sample of 542 additional companies from the sampling frame. All 58 monthly reporters responded. A total of 121 of the 542 sampled companies provided usable responses. The responses of another 28 of the 542 sampled companies indicated that they no longer fit the definition of "finance company" or had not fit the

A.1. Responses to pre-survey questionnaire

Disposition	Number	Percent of total mailed

Bank subsidiary	26	1.0
Other	20	.8

definition at the time of the questionnaire. These 28 companies were removed from the population, leaving a final estimated population of 984 companies.

Estimates of the assets and liabilities of the finance company population were produced using the stratified mean expansion estimator, where the strata were based on both the size and the lending specialty of the company. The estimator was defined as

$$Y = \Sigma Y(h) = \sum \frac{N(h) * y(h)}{n(h)}$$

where

Y =estimated national total

Y(h) = estimated aggregate total for stratum h

N(h) = total number of companies in stratum h

y(h) = sample aggregate total for companies in stratum h

n(h) = number of sample companies in stratum h

APPENDIX B: DEFINITIONS OF BALANCE SHEET ITEMS AND ADDITIONAL BALANCE SHEET DATA

For purposes of this survey, a finance company was defined as a company (excluding commercial banks, credit unions, savings and loan associations, cooperative banks, and savings banks) in which the largest portion of the company's assets was in one or more of the following kinds of receivables:

- Sales finance receivables. Installment paper arising from retail sales of passenger cars and mobile homes, other consumer goods, such as general merchandise, apparel, furniture, and household appliances, or from outlays for home-improvement loans not secured by real estate.
- Personal cash loans to individuals and families. Unsecured cash loans (including loans to pay for insurance policies) or cash loans secured by insurance policies, autos already paid for, or other collateral.
- Short- and intermediate-term business receivables (including leases). Loans on commercial accounts receivable; inventory loans; factoring; lease financing; retail installment sales (or purchases) of commercial, industrial, and farm equipment and commercial vehicles; and wholesale financing of consumer and business goods.

• Junior liens on real estate. Loans, whatever the purpose, secured by junior liens (for example, equity loans or second mortgages) on real estate as evidenced by junior mortgages, deeds of trust, land contracts, or other instruments.

Asset Items

Receivables include direct loans and loans and paper purchased from manufacturers and retailers before deduction of capitalized unearned income and reserves for losses.

1. Consumer Receivables

- A. Motor Vehicle Financing. Credit arising from retail sales of passenger cars and other vehicles such as vans and pickup trucks to consumers. It excludes fleet sales, personal cash loans secured by automobiles already paid for, loans to finance the purchase of commercial vehicles and farm equipment, and lease financing.
- B. Revolving Credit. Retail credit that is extended on a credit-line basis and that arises from the sale of consumer goods other than passenger cars and other vehicles. A single contract governs multiple use of the account, and purchases may be made with a credit card. Generally, credit extensions can be made at the consumer's discretion, provided that they do not cause the outstanding balance of the account to exceed a prearranged credit limit.
- C. Other Consumer Receivables. All credit arising from retail sales of non-motor vehicle consumer goods that is not extended under a revolving credit line. It includes financing of general merchandise, apparel, furniture, and household appliances; campers, trailers, mobile homes, motorcycles, airplanes, helicopters, and boats purchased for personal use; loans for automobile repair; credit to finance alterations or improvements in existing residential properties occupied by the borrower; secured and unsecured loans made directly to the borrower for household, family, or other personal expenses; and unsecured loans to purchase auto insurance policies as well as loans secured by insurance policies, automobiles already paid for, and other collateral. It excludes loans for business purposes, rediscounted loans, loans secured by real estate, and wholesale and lease financing.

2. Loans Secured by Real Estate

- A. One- to Four-Family. Credit arising from revolving or permanent loans secured by real estate as evidenced by mortgages (FHA, FmHA, VA, or conventional) or other liens (first or junior) on nonfarm property containing one to four dwelling units (including vacation homes) or more than four dwelling units if each is separated from other units by dividing walls that extend from ground to roof (row houses, townhouses, or the like); mobile homes when state laws define the purchase or holding of a mobile home as the purchase or holding of real property and where the loan to purchase the mobile home is secured by that mobile home as evidenced by a mortgage or other instrument on real property; individual condominium dwelling units and loans secured by an interest in individual cooperative units, even if in a building with five or more dwelling units; vacant lots in established single-family residential sections or in areas set aside primarily for one- to four-family homes; and housekeeping dwellings with commercial units combined where use is primarily residential and where only one- to four-family dwelling units are involved.
- B. Multifamily. Credit arising from permanent non-farm residential loans secured by real estate as evidenced by mortgages (FHA or conventional) or other liens on nonfarm properties with five or more dwelling units in structures (including apartment buildings and apartment hotels) used primarily to accommodate households on a more or less permanent basis; housekeeping dwellings of five or more units with commercial units combined where use is primarily residential; cooperative-type apartment buildings containing five or more dwelling units; and vacant lots in established multifamily residential sections or in areas set aside primarily for multifamily residential properties.
- C. Commercial and Farm. Credit arising from loans secured by real estate as evidenced by mortgages or other liens on business and industrial properties, hotels, motels, churches, hospitals, educational and charitable institutions, dormitories, clubs, lodges, association buildings, care facilities for aged persons and orphans, golf courses, recreational facilities, and similar properties. It includes all other nonresidential loans secured by real estate as evidenced by mortgages or other liens. It also includes credit arising

from loans secured by farmland and improvements thereon as evidenced by mortgages or other liens. Farmland includes all land known to be used or usable for agricultural purposes, such as crop and livestock production, and grazing or pasture land, whether tillable or not and whether wooded or not.

3. Business Receivables

- A. Motor Vehicle Financing. Consists of retail credits and wholesale credits.
- (1) Retail (commercial vehicles). Credit arising from retail sales of commercial land vehicles to business. It includes trucks, buses, taxicabs, truck trailers, and other on-the-road vehicles for which motor vehicle licensing is required. It also includes fleet sales of passenger cars, but excludes lease financing and paper on business, industrial, or farm equipment.
- (2) Wholesale. Credit arising from transactions between manufacturers and dealers or other floorplan loans secured by passenger cars and commercial land vehicles. It excludes paper secured by mobile homes, passenger car trailers, boats, airplanes, helicopters, and business, industrial, and farm equipment.
- B. Business, Industrial, and Farm Equipment. Consists of retail and wholesale credits and capital and leveraged leases.
- (1) Retail and wholesale financing. Credit arising from the retail sale to business of (or for the purchase of) business, industrial, and farm equipment. It includes all off-the-road equipment for which motor vehicle licensing is not required as well as airplanes, helicopters, and boats purchased for business use. Loans may be secured by chattel mortgages or conditional sales contracts (purchased money security agreements) on the machinery or equipment. It excludes loans to purchase commercial land vehicles for which motor vehicle licensing is required and loans secured by real estate. It also excludes lease financing. Wholesale financing is credit arising from transactions between manufacturers and dealers or other floor-plan loans secured by business, industrial, and farm equipment. It includes all off-the-road equipment for which motor vehicle licensing is not required, such as airplanes, helicopters, and boats.
- (2) Capital and leveraged leases. Lease receivables arising from the leasing of business, industrial, and farm equipment. It includes lease financing of

all off-the-road equipment for which motor vehicle licensing is not required and lease financing of airplanes, helicopters, and boats leased for business use. It excludes lease financing of airplanes, helicopters, and boats leased for personal or family use (included in asset item 3.C), and excludes operating leases as defined by Financial Accounting Standards Board Statement of Financial Accounting Standards 13 (SFAS 13).

C. Other Business Receivables (Excluding Operating Leases). All other wholesale financing not reported in asset items 3.A.2 and 3.B.1 above, including floor-plan transactions between manufacturers and dealers for items such as mobile homes, campers, and travel trailers. Includes all other business capital and leveraged lease receivables not reported in asset items 3.B.2 above and not reported in asset items 4.A.2, below, including credit arising from the leasing of mobile homes, campers, and travel trailers. Excludes operating leases as defined by SFAS 13 that are included in asset items 4.B and 5 below. Includes business credit with original maturities of up to five years, including loans secured by commercial accounts receivable less the balances withheld for customers pending collection of receivables; commercial accounts receivable purchased from factored clients less any amount due and payable to factored clients; and secured and unsecured advances of funds to factored clients. It includes dealer loans, capital loans, small loans used primarily for business or farm purposes, multicollateral loans, rediscounted receivables of other finance companies less balances withheld, and all other business loans not elsewhere classified. It excludes loans secured by real estate (unless included as part of a multicollateral loan), which are included in asset items 2.

4. Motor Vehicle Leases

Lease receivables arising from leasing of passenger cars and commercial land vehicles, but excluding leasing of mobile homes, campers, motor trailers, boats, airplanes, helicopters, and business, industrial, and farm equipment.

- A. Capital and Leveraged Leases. Consists of consumer and business leases.
- (1) Consumer. Refer to credit on types of receivables covered by asset items 1.A above.

- (2) Business. Refer to credit on types of receivables covered by asset items 3.A.1 above.
- B. Operating Leases (as defined by SFAS 13). Consists of consumer and business leases.
- (1) Consumer. Refer to credit on types of receivables covered by asset items 1.A above.
- (2) Business. Refer to credit on types of receivables covered by asset items 3.A.1 above.

5. Non-Motor Vehicle Operating Leases

For business, industrial, and farm equipment, refer to credit on types of receivables covered by asset items 3.B.1 above. For all other equipment, refer to credit on types of receivables covered by asset items 1.C and 3.C above. It includes all operating leases as defined by SFAS 13 that are excluded from the asset items above.

- A. Consumer. Refer to credit on types of receivables covered by asset items 1.C above.
- B. Business. Refer to credit on types of receivables covered by asset items 3.B.1 and 3.C above.

6. All Other Assets and Accounts and Notes Receivable

All assets not already included above, including consolidated companies' investments in nonconsolidated foreign and domestic subsidiaries and affiliates. Nonconsolidated subsidiary and affiliate company claims on consolidated companies (except debt due to parent) are netted against the consolidated companies' investment. It excludes operating leases reported as asset items 4.B and 5 above and excludes overdrafts.

7. Reserves

- A. Reserves for Unearned Income. Includes unearned discounts and service charges on the above receivables.
- B. Reserves for Losses. Allowances for bad debts, unallocated charge-offs, and any other valuation allowances except the amount of unearned income applicable to the receivables included above.

8. Total Assets, Net

Sum of asset items 1.A through 6 minus asset items 7.A and 7.B.

Securitized Asset Items

Securitized assets include receivables that have been packaged and sold by the reporting finance company to a trustee or other third party who uses the receivables package as collateral for an asset-backed security that is sold to investors. These assets are no longer on the balance sheet of the reporting finance company and thus are not included in the asset items. Securitized assets consist of the total amount outstanding, including all receivables securitized in the current month and in prior months. They include assets such as leases that were never on the company books, but whose securitizations may be counted as a managed asset, and exclude the amounts of outright asset sales that have not been packaged to collateralize an asset-backed security. Securitized assets are reported using the same definitions used for their unsecuritized counterparts in asset items 1 through 5 above.

Liabilities and Capital Items

1. Bank Loans

Short- and long-term loans and notes payable to banks. Includes overdrafts but excludes commercial paper and bank portions of participation loans.

2. Commercial Paper

Promissory notes of large denominations sold directly or through dealers to investors and issued for not longer than 270 days. It includes short-term or demand "master" notes and paper backed by letters of credit or other guarantees, but excludes nonnegotiable promissory notes held by officers of the firm, their families, and other individuals (which are included in liabilities and capital item 4).

3. Debt Due to Parent

For a company that is the subsidiary of another company (which is not a finance company), it

includes all short- and long-term indebtedness owed to the parent company, but excludes the parent company's equity (which is included in liabilities and capital item 6).

4. Debt Not Elsewhere Classified

All other short- and long-term loans, notes, certificates, negotiable paper, or other indebtedness not elsewhere classified. It excludes bank debt already included in liabilities and capital items 1 and 3.

5. All Other Liabilities

All liabilities not already reported above or netted against assets. It includes dealer reserves, all tax accruals, short-term certificates of thrift or investment, deposit liabilities (other than those not withdrawable during term of loan), and all other liabilities. It excludes liabilities of consolidated companies to nonconsolidated subsidiaries of affiliated companies, which are netted against assets in asset items 6 or shown in liabilities and capital items 3. It also excludes borrower repayment deposits accumulated but not credited against indebtedness until repayment is made in full, which are netted against appropriate receivables under asset items above.

6. Capital, Surplus, and Undivided Profits

All common and preferred stock and other capital or surplus accounts, including undivided profits.

7. Total Liabilities and Capital

Sum of liabilities and capital items 1 through 6. \Box

Table B.1 appears on the following page.

Announcements

FOMC DIRECTIVE AND DISCOUNT RATE DECREASE

The Federal Open Market Committee decided on December 11, 2001, to lower its target for the federal funds rate by 25 basis points to 1³/₄ percent. In a related action, the Board of Governors approved a 25 basis point reduction in the discount rate to 1¹/₄ percent.

Economic activity remains soft, with underlying inflation likely to edge lower from relatively modest levels. To be sure, weakness in demand shows signs of abating, but those signs are preliminary and tentative. The Committee continues to believe that, against the background of its long-run goals of price stability and sustainable economic growth and of the information currently available, the risks are weighted mainly toward conditions that may generate economic weakness in the foreseeable future.

Although the necessary reallocation of resources to enhance security may restrain advances in productivity for a time, the long-term prospects for productivity growth and the economy remain favorable and should become evident once the unusual forces restraining demand abate.

In taking the discount rate action, the Federal Reserve Board approved the requests submitted by the boards of directors of the Federal Reserve Banks of Boston, New York, Philadelphia, Chicago, and San Francisco.

The Federal Reserve Board also approved action by the board of directors of the Federal Reserve Bank of St. Louis, decreasing the discount rate at the bank from 1½ percent to 1¼ percent, effective Wednesday, December 12, 2001.

On December 13, 2001, the Federal Reserve Board approved actions by the boards of directors of the Federal Reserve Banks of Cleveland, Richmond, Atlanta, Minneapolis, Kansas City, and Dallas, decreasing the discount rate at the banks from 1½ percent to 1½ percent, effective immediately.

RESIGNATION OF BOARD GOVERNOR KELLEY

Edward W. Kelley, Jr., submitted his resignation Wednesday, December 12, 2001, as a member of the

Board of Governors of the Federal Reserve System, effective December 31, 2001.

Kelley, who has been a member of the Board since May 26, 1987, submitted his letter of resignation to President Bush. In view of his impending departure and in keeping with Board practice, he did not attend the December 11 meeting of the Federal Open Market Committee.

"During his more than fourteen years on the Board, I have valued his sound judgment, hard work and, above all, his friendship," Chairman Alan Greenspan said. "I know of no one in public life with greater integrity or higher principles."

Kelley, the senior member of the Board, said he was resigning to turn his attention to family and other personal interests. He had announced on June 4 that he planned to leave the Board after at least one of two vacant seats was filled. Susan Schmidt Bies and Mark W. Olson were sworn in to fill those seats on December 7, 2001.

Kelley, 69, was first appointed to the Board by President Ronald Reagan. President George H.W. Bush reappointed him in 1990 to a term that expires on January 31, 2004. During much of his tenure, he served as chairman of the Board's Committee on Reserve Bank Affairs, overseeing the operations and payment services of the twelve Federal Reserve Banks. He led the Reserve Banks' efforts to prepare their computer systems for a smooth transition during the century date change.

Before becoming a member of the Board, Kelley had been chairman of the board of Investment Advisers, Inc., in Houston, Texas, and president and chief executive officer of Kelley Industries, Inc., a Houston-based company with subsidiaries in manufacturing, distribution, and business services.

NEW BOARD GOVERNORS BIES AND OLSON SWORN IN TO OFFICE

Susan Schmidt Bies and Mark W. Olson took the oath of office as members of the Board of Governors of the Federal Reserve System on Friday, December 7, 2001. The oath was administered by Chairman Alan Greenspan in the Chairman's office.

President Bush announced his intention to nominate Dr. Bies on June 8 and his intention to nominate Mr. Olson on July 10. The Senate confirmed them on December 6.

Dr. Bies was nominated to a vacant seat last held by Susan M. Phillips, whose term expired. Dr. Bies's term expires January 31, 2012.

Dr. Bies was born on May 5, 1947, in Buffalo, New York. She received a B.S. in education from the State College of New York at Buffalo in 1967 and an M.A. (1968) and a Ph.D. (1972), both in economics, from Northwestern University. Dr. Bies has served as a Fellow at the Federal Reserve Bank of Chicago (1969–70) and as a Fellow at the Northwestern University Center for Urban Affairs (1968–69).

Before becoming a member of the Board, Dr. Bies was the executive vice president for risk management and auditor at First Tennessee National Corporation, Memphis, Tennessee (1995–2001). From 1979 to 1995, she served in various other positions at First Tennessee, including executive vice president and chief financial officer, senior vice president and chief financial officer, senior vice president and treasurer, vice president for corporate development, tactical planning manager, and economist.

Before joining First Tennessee, Dr. Bies was associate professor of economics, Rhodes College, Memphis, Tennessee (1977–79); assistant professor of economics, Wayne State University, Detroit, Michigan (1972–77); and chief regional and banking structure economist at the Federal Reserve Bank of St. Louis (1970–72).

Dr. Bies has been active in leadership positions for various organizations, including the Emerging Issues Task Force of the Financial Accounting Standards Board, the Committee on Corporate Reporting of the Financial Executives Institute, the End Users of Derivatives Association, the American Bankers Association, and the Bank Administration Institute.

She has also served with numerous other business, professional, academic, civic, and charitable organizations, including the American Economic Association, Institute of Management Accountants, International Women's Forum, American Economic Association, Economic Association of Memphis, University of Memphis, Memphis Area Chamber of Commerce, Memphis Youth Initiative, and Memphis Partners. Dr. Bies is married and has two adult sons.

Mr. Olson was nominated to the seat vacated by the resignation of Alice M. Rivlin on July 16, 1999. The term expires January 31, 2010.

Mr. Olson was born March 17, 1943, in Fergus Falls, Minnesota. He received a B.A. in economics in 1965 from Saint Olaf College.

Before becoming a member of the Board, Mr. Olson served as staff director of the Securities Subcommittee of the Banking, Housing, and Urban Affairs Committee, U.S. Senate (2000–01). The Securities Subcommittee's legislative jurisdiction included the Securities and Exchange Commission, accounting policy issues, and the insurance industry. During Mr. Olson's tenure, the subcommittee

held oversight hearings on implementation of key sections of the Gramm-Leach-Bliley Act.

From 1988 to 1999, he served as a partner with Ernst & Young LLP and its predecessor, Arthur Young & Company. At Ernst and Young, he was national director of the firm's Regulatory Consulting Practice for the financial services industry. Mr. Olson also consulted on issues of management and board corporate governance, strategic planning, and management evaluation. In addition, Mr. Olson was selected to join a 1991–92 Treasury Department effort to assist Eastern European bankers in adapting to a free-market economy.

From 1976 to 1988, Mr. Olson was president and chief executive officer of Security State Bank, Fergus Falls, Minnesota. Mr. Olson's father had been the lead organizer in chartering Security State Bank in 1957. During his years at Security State Bank, Mr. Olson was also actively involved in public policy issues involving the banking industry. He served on the American Bankers Association board of directors and as chairman of the ABA Government Relations Council. In 1986, Mr. Olson, at age 43, became the youngest person ever elected as president of the American Bankers Association.

Mr. Olson served former Congressman Bill Frenzel (R-Minn.) as legislative assistant for banking issues (1971–72) and as director of his Minnesota district office (1974–76). Mr. Olson began his banking career in 1966 with First Bank System (now U.S. Bancorp) and was named an officer in 1969.

Mr. Olson has been a frequent author and speaker on the public policy aspects of financial services. He has testified before the Congress, and his articles have appeared in numerous industry publications.

Mr. Olson is married to Renee Korda and has two children, Ben and Stephanie.

REVISION OF PAYMENTS SYSTEM RISK POLICY

The Federal Reserve Board announced on December 11, 2001, that it had revised its Policy Statement on Payments System Risk (PSR policy).

The revised PSR policy incorporates, with minor modifications, the Board's interim policy that became effective May 30, 2001. This policy allows certain depository institutions to pledge collateral to the Federal Reserve to access additional daylight overdraft capacity above their net debit caps. The revised policy also modifies the net debit cap calculation for U.S. branches and agencies of foreign banks. These changes should alleviate liquidity pressures identified during a broad review of the PSR policy.

The revised policy also modifies the time electronic check presentments are posted to depository institutions' Federal Reserve accounts for purposes of measuring daylight overdrafts, which should remove a potential impediment to the use of electronic check presentment. In addition, the Board has decided to retain the \$50 million limit on the value of book-entry securities transfers.

The revised policy statement is effective December 10, 2001, with the following exceptions: (1) revisions to the criteria used to determine the U.S. capital equivalency measure for foreign banking organizations will take effect on February 21, 2002, and (2) the modification to post electronic check presentments to depository institutions' Federal Reserve accounts at 1:00 p.m. local time will take effect on April 1, 2002.

FINAL AMENDMENT TO REGULATION Z REGARDING HOEPA AND PREDATORY LENDING

The Federal Reserve Board approved on December 12, 2001, and sent for publication to the *Federal Register* on December 14, 2001, a final rule that amends its regulations aimed at curbing predatory lending. Compliance with the amendments becomes mandatory on October 1, 2002.

The amendments to Regulation Z (Truth in Lending) broaden the scope of loans subject to the protections of the Home Ownership and Equity Protection Act (HOEPA) of 1994 by adjusting the price triggers that determine coverage under the act. The rate-based trigger is lowered by 2 percentage points for first-lien loans, and the fee-based trigger is revised to include the cost of optional insurance and similar debt protection products paid at closing. Certain acts and practices in connection with home-secured loans are prohibited, including a rule to restrict creditors from engaging in repeated refinancings of their own HOEPA loans over a short time period when the transactions are not in the borrower's interest.

HOEPA's prohibition against extending credit without regard to a consumer's repayment ability is strengthened by requiring creditors to document and verify income for HOEPA-covered loans.

Disclosures received by consumers before closing for HOEPA-covered loans would include the total amount of money borrowed and whether that amount includes the cost of optional credit insurance or similar products.

HOEPA was enacted in response to anecdotal evidence of predatory lending practices in the home equity lending market. HOEPA imposes additional disclosure requirements. It also imposes substantive limitations, such as restrictions on short-term balloon notes, on certain home equity loans with rates and fees above a certain percentage or amount.

HOEPA authorizes the Board to expand HOEPA's coverage and prohibit certain acts and practices in connection with mortgage lending generally. After holding public hearings on possible ways to curb

predatory lending using its regulatory authority, the Board published proposed amendments in December 2000

The term "predatory lending" encompasses a variety of practices. Oftentimes homeowners in certain communities—particularly the elderly and minorities—are targeted with offers of high-cost, home-secured credit. The loans carry high up-front fees and may be based on the homeowners' equity in their homes, not their ability to make the scheduled payments. When homeowners have problems repaying the debt, they are often encouraged to refinance the loan. Frequently this leads to another high-fee loan that provides little or no economic benefit to the borrower.

PROPOSED REVISIONS TO STAFF COMMENTARY ON REGULATION Z REGARDING CONSUMER CREDIT DISCLOSURES

The Federal Reserve Board published on December 7, 2001, proposed revisions to the official staff commentary that applies and interprets the requirements of Regulation Z, which implements the Truth in Lending Act. Comment is requested by February 1, 2002.

The proposed revisions clarify how creditors that place Truth in Lending Act disclosures on the same document with the credit contract may satisfy the requirement for providing the disclosures in a form the consumer may keep before consummation. In addition, the proposed revisions provide guidance on disclosing costs for certain credit insurance policies and on the definition of "business day" for purposes of the right to rescind certain home-secured loans.

INTERAGENCY ADOPTION OF FINAL RULE ON RECOURSE OBLIGATIONS, DIRECT CREDIT SUBSTITUTES, AND RESIDUAL INTERESTS

The federal bank and thrift regulatory agencies announced on November 29, 2001, the publication of a final rule that changes their regulatory capital standards to address the treatment of recourse obligations, residual interests, and direct credit substitutes that expose banks, bank holding companies, and thrift institutions (collectively, banking organizations) to credit risk.

The final rule, published in the *Federal Register*, synthesizes the capital treatment outlined in two notices of proposed rulemakings issued in 2000—"Recourse and Direct Credit Substitutes" and

"Residual Interests in Asset Securitizations or Other Transfers of Financial Assets." The final rule treats recourse obligations and direct credit substitutes more consistently than the agencies' current risk-based capital standards and introduces a credit-ratings-based approach to assigning risk weights within a securitization. The final rule also imposes a "dollar-for-dollar" capital charge on residual interests and a concentration limit on credit-enhancing, interest-only strips, a subset of residual interests.

The rule is effective on January 1, 2002. Any transactions settled on or after January 1, 2002, are subject to this final rule. Banking organizations that enter into transactions before January 1, 2002, may elect early adoption, as of November 29, 2001, of any provision of the final rule that results in a reduced capital requirement. Conversely, banking organizations that have entered into transactions before January 1, 2002, that result in increased capital requirements under the final rule may delay the application of this rule to those transactions until December 31, 2002.

INTERAGENCY GUIDANCE ON COMPLIANCE WITH CONSUMER PRIVACY REGULATIONS

Staff of the federal agencies that supervise banks, thrift institutions, and credit unions issued guidance on December 12, 2001, to help financial institutions comply with these agencies' consumer privacy regulations.

The agencies' regulations implementing the privacy provisions of the Gramm-Leach-Bliley Act of 1999 were issued last year after interagency consultation and coordination. Financial institutions have been required to comply with the privacy rules since July 1, 2001. The agencies' privacy rules are substantially identical, although each agency's rule differs slightly due to the type of financial institutions subject to that agency's jurisdiction. In general, the privacy regulations govern the circumstances under which a financial institution must provide a consumer with a notice explaining the institution's privacy policies and practices and provide a consumer a reasonable opportunity to prevent, or "opt out" of, disclosures of certain information to nonaffiliated third parties.

The staff guidance issued a series of frequently asked questions, or FAQs, covering various aspects of the privacy rules, including the following:

- Which entities are covered by the privacy rules
- When financial institutions must deliver privacy and opt-out notices

- Limits that apply to the use and disclosure of customer information received from an unrelated financial institution
- Limits that apply to the disclosure of customer account numbers
- How to comply with the exception for disclosures under a joint marketing arrangement with an unrelated financial institution.

These FAQs were developed jointly by staff of the Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation, National Credit Union Administration, Office of the Comptroller of the Currency, and Office of Thrift Supervision. They consulted with staff of the Commodity Futures Trading Commission, Federal Trade Commission, and Securities and Exchange Commission. Staff of the depository institution agencies may supplement or revise the FAQs as necessary or appropriate in light of further questions and experience.

Each of these agencies will both post the FAQs on its web site and make them available to the financial institutions the agency supervises.

RESULTS OF STUDY ON RETAIL PAYMENT SYSTEMS

New data collected by the Federal Reserve System, released on November 14, 2001, suggest that check writing in the United States is steadily giving way to electronic forms of payment as consumers, businesses, and financial institutions seek to be more efficient and cost-effective.

American consumers and businesses make 80 billion retail payments annually, nearly 50 billion by check and 30 billion by electronic instruments, such as credit cards, debit cards, and the automated clearinghouse (ACH), according to the first comprehensive studies of the retail payment system by the Federal Reserve System in more than twenty years. Checks have declined from approximately 85 percent of non-cash payments since the last study in 1979 to about 60 percent today.

Approximately 1,300 financial institutions, including banks, thrift institutions, and credit unions, and 89 electronic payment processors responded to three surveys that looked at methods and volumes of retail payments.

"The Federal Reserve Banks conducted the study to gain a better understanding of the dynamics of the retail payment system," said Roger W. Ferguson, Jr., vice chairman of the Federal Reserve Board, "and we believe the results clearly paint a picture of a payments system in migration. The data show strong growth in electronic payments since the early 1980s and lower-than-expected check volumes."

Since 1979, the total number of non-cash retail payments has doubled from approximately 37 billion to 80 billion. The number of checks has grown about 55 percent from the 1979 estimate of 32 billion. Although checks remain the dominant form of non-cash payment, over the past twenty years, electronic payments have replaced checks in large numbers.

The data collection effort was commissioned by the Reserve Banks and consisted of three main studies—the Depository Financial Institution (DFI) Check Study, the Check Sample Study, and the Electronic Payment Instruments Study. The DFI Check Study was designed to count the total or aggregate number of checks processed in the United States for a twelve-month period. The Check Sample Study gathered information on the composition of the check market, namely, who (consumers, businesses, or government) writes checks to (consumers, businesses, or government) and why (remittance, point of sale, income, or casual payment). The Electronic Payment Instruments Study gathered data on the volume and value of electronic payments processed during 2000.

The DFI check study, which gathered paid check volume and value data from financial institutions, estimates that about 50 billion checks are written annually in the United States, totaling about \$48 trillion in payments. The study also revealed that approximately 30 percent of checks are "on-us" items, meaning the bank of first deposit for these items is also the paying bank. The remaining checks are cleared and settled between financial institutions.

Conducted as a complementary study, the Check Sample Study involved 149 financial institutions examining more than approximately 29,000 randomly selected deposited checks and categorizing them by type of payor, payee, and purpose. The study found that consumers write approximately 50 percent of all checks and businesses receive about half of all checks. The study also established that more checks are written for remittance or bill payment than for any other purpose (25.7 percent of check volume). The next primary use for checks was at the point of sale, where 19 percent of checks are written. Income payments, such as salary and benefits payments, from businesses and governments to consumers equal 17.8 percent of all check payments.

The results from the third study on electronic payment instruments show that during 2000, about 30 billion retail electronic payments were originated in the United States with a value of more than \$7 tril-

lion. Major electronic funds transfer networks, credit card associations, ACH operators, electronic benefits transfer contractors, and private label credit card issuers, eighty-nine in all, shared data on their 2000 volume and value of electronic payment transactions.

Credit card transactions represent about half of electronic payments (15 billion, worth \$1.23 trillion). Debit cards remain the second most dominant electronic instrument with 8.3 billion transactions worth \$348 billion. Surprisingly, the survey revealed that while the ACH is the third most commonly used electronic payment method for retail transactions (5.6 billion items, which does not include cash concentration settlement transactions), the ACH carries more than three-quarters of all electronic payment value (\$5.67 trillion).

"If you compare these results with 1979 research estimates, it seems clear that the proportion of check payments is declining as substitution for electronic payment instruments accelerates," according to Cathy E. Minehan, president of the Federal Reserve Bank of Boston. "Not only do we have a much better idea about the size of the total retail payments system, we clearly see that electronic payments are taking a strong hold of the market and are poised for significant growth in the next few years." The Fed anticipates repeating the study every two to three years to provide detailed information on changing behaviors and trends in the use of payment instruments.

According to Patrick K. Barron, first vice president of the Atlanta Federal Reserve Bank, "We are hopeful that these data and further details we will share with the industry in the future will enable all participants in the payment system to make more informed decisions regarding future investments in payments technology."

The Reserve Banks hired Boston-based strategy firm Dove Consulting to conduct the electronic payment study and Global Concepts and Westat to execute the two check studies. The Federal Reserve Bank of Atlanta and the Bank Administration Institute conducted the last study of this type in 1979.

Additional details on the research studies are available on the Federal Reserve System's financial services website: www.frbservices.org.

ANNUAL ADJUSTMENT IN TRIGGER AMOUNT FOR ADDITIONAL MORTGAGE LOAN DISCLOSURES

The Federal Reserve Board published on November 14, 2001, its annual adjustment of the dollar

amount that triggers additional disclosure requirements under the Truth in Lending Act for mortgage loans that bear rates or fees above a certain amount.

Under the revision to the Board's staff commentary to Regulation Z, the dollar amount of the fee-based trigger has been adjusted from \$465 for 2001 to \$480 for 2002 based on the annual percent change reflected in the consumer price index that was in effect on June 1, 2001. The adjustment is effective January 1, 2002.

The Home Ownership and Equity Protection Act of 1994 bars credit terms such as balloon payments and requires additional disclosures when total points and fees payable by the consumer exceed the feebased trigger, initially set at \$400 and adjusted annually, or 8 percent of the total loan amount, whichever is larger.

BOARD DISCOUNT RATE MEETING MINUTES

The Federal Reserve Board released on November 16, 2001, the minutes of its discount rate meetings from September 24 to October 2, 2001.

ANTHRAX TESTS AT THE BOARD

On December 6, 2001, the Board announced that a preliminary test of mail delivered to a secure, closed mail-handling facility outside the main Federal Reserve Board building tested positive for anthrax exposure that afternoon.

Board officials notified, and are working with, the FBI. This mail, handled by three Board and three contract employees, all wearing protective environmental suits, has been secured within the mail-handling facility. Further testing will be conducted within this secured facility. Any mail found to be contaminated will be sent to a military facility for analysis by the FBI.

Since the first public reports of anthraxcontaminated mail surfaced, the Board has processed all mail through the secure mail-handling facility, and it is not distributed inside Federal Reserve buildings until it has been cleared.

The Board announced that it would be open for business on Friday, December 7, 2001. However, while the investigation is under way, the Board decided to postpone public events for security reasons. A public Board meeting scheduled for 10:00 a.m. that Friday was rescheduled.

ELIMINATION OF SELECTED REPRINTS IN THE FEDERAL RESERVE BULLETIN

The Federal Reserve Board announced on December 11, 2001, that five documents that have regularly been reprinted in the *Federal Reserve Bulletin* will not appear in the *Bulletin* after the December 2001 issue.

The materials are being eliminated from the monthly journal because they are widely available both in a more timely fashion on the web and in print copies available by subscription. The documents are the following:

- "Industrial Production and Capacity Utilization"
- "Minutes of the Federal Open Market Committee"
 - "Testimony of Federal Reserve Officials"
- The quarterly report "Treasury and Federal Reserve Foreign Exchange Operations"
- The annual report "Domestic Open Market Operations."

What follows is a Q&A section that explains the reasons for the elimination of the reprints and where they may be obtained elsewhere.

What documents will not be reprinted in the Bulletin after December 2001? The documents are (1) the "Industrial Production and Capacity Utilization" statistical release, (2) the "Minutes of the Federal Open Market Committee," (3) the "Testimony of Federal Reserve Officials," (4) the quarterly report "Treasury and Federal Reserve Foreign Exchange Operations," and (5) the annual report "Domestic Open Market Operations."

Industrial Production and Capacity Utilization

How do I obtain the release when it is published? The Federal Reserve's monthly G.17 statistical release "Industrial Production and Capacity Utilization" is available as soon as it is released on the Board's web site (www.federalreserve.gov/releases/g17). The releases are also available in paper copies by subscription and on diskettes from Publications Services, Mail Stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551 (phone: 202-452-3244).

How do I obtain archival copies of the release? Historical data back to 1919 are available on the Board's web site (www.federalreserve.gov/releases/g17).

Where should I direct my questions about the availability of the release? Questions should be directed to Public Affairs, Mail Stop 58, Board of Governors of the Federal Reserve System, Washington, DC 20551 (phone: 202-452-3204).

Minutes of the Federal Open Market Committee

How do I obtain the minutes? When the minutes are released to the public, usually two days after the next FOMC meeting, they are simultaneously placed on the Board's public web site (www.federalreserve.gov/fomc). Paper copies of the minutes are available by subscription from Publications Services, Mail Stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551 (phone: 202-452-3244).

How do I obtain archival copies of the minutes? The minutes are available back to 1996 on the Board's web site (www.federalreserve.gov/fomc); they are also reprinted in the Board's Annual Report (www.federalreserve.gov/boarddocs/RptCongress). Paper copies of the minutes, including those before 1996, are available from Publications Services.

Where should I direct my questions about the availability of the minutes? Questions should be directed to Public Affairs, Mail Stop 58, Board of Governors of the Federal Reserve System, Washington, DC 20551 (phone: 202-452-3204).

Testimony of Federal Reserve Officials

How do I obtain testimony? When testimony is released to the public, it is simultaneously placed on the Board's public web site (www.federalreserve.gov/boarddocs/testimony). Paper copies are available by subscription from Publications Services, Mail Stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551 (phone: 202-452-3244).

How do I obtain archival copies of testimony? Testimony back to 1996 is available on the Board's web site (www.federalreserve.gov/boarddocs/testimony/1996). Paper copies, including testimony before 1996, are available from Publications Services.

Where should I direct my questions about the availability of testimony? Questions should be directed to Public Affairs, Mail Stop 58, Board of Governors of the Federal Reserve System, Washington, DC 20551 (phone: 202-452-3204).

Treasury and Federal Reserve Foreign Exchange Operations

How do I obtain the report when it is published? This report is published quarterly by the Federal Reserve Bank of New York. Each quarter's report is available soon after the end of the quarter on the web site of the New York Reserve Bank (www.newyorkfed.org/pihome/news/forex). Paper copies of the reports are available from the Public Information Department, Federal Reserve Bank of New York, 33 Liberty Street, New York, NY 10045 (phone: 212-720-5424).

How do I obtain archival copies of the report? Reports back to 1996 are available on the web site of the Federal Reserve Bank of New York (www.newyorkfed.org/pihome/news/forex). Paper copies of the reports, including those before 1996, are available from the Public Information Department, Federal Reserve Bank of New York.

Where should I direct my questions about the availability of the report? Questions should be directed to the Public Information Department, Federal Reserve Bank of New York, 33 Liberty Street, New York, NY 10045 (phone: 212-720-5424).

Domestic Open Market Operations

How do I obtain the annual report "Domestic Open Market Operations" when it is published? This report is published annually by the Federal Reserve Bank of New York and is available soon after the end of the year on the web site of the New York Reserve Bank (www.newyorkfed.org/pihome/annual.html). Paper copies of the reports are available from the Public Information Department, Federal Reserve Bank of New York, New York, NY 10045 (phone: 212-720-5424). The text portion of "Domestic Open Market Operations" will be reprinted in the Board's Annual Report beginning with the report for 2001.

How do I obtain archival copies of the report? The reports back to 1996 are available on the web site of the Federal Reserve Bank of New York (www.newyorkfed.org/pihome/annual.html). Paper copies of the reports, including those before 1996, are available from the Public Information Department, Federal Reserve Bank of New York.

Where should I direct my questions about the availability of the report? Questions should be directed to the Public Information Department, Federal Reserve Bank of New York, 33 Liberty Street, New York, NY 10045 (phone: 212-720-5424).

PUBLICATION OF THE DECEMBER 2001 UPDATE TO THE BANK HOLDING COMPANY SUPERVISION MANUAL

The December 2001 update to the *Bank Holding Company Supervision Manual*, Supplement No. 21, has been published and is now available. The *Manual* comprises the Federal Reserve System's bank holding company supervisory and inspection guidance. The supplement includes new or revised supervisory information and examiner guidance on the following:

1. FFIEC Interagency Policy Statement on the Allowance for Loan and Lease Losses Methodologies and Documentation for Banks and Savings Institutions. The policy statement, issued on July 2, 2001, is briefly summarized. It clarifies the agencies' expectations for the documenta-

tion that supports the allowance for loan and lease losses (ALLL) methodology. The statement supplements existing guidance and emphasizes the need for appropriate ALLL policies and procedures, including an effective loan-review system. The statement provides examples of appropriate supporting documentation and illustrations on how to implement this guidance. See Supervision and Regulation (SR) Letter 01-17 and its attachment. (SR Letters are the Federal Reserve's primary means of communicating key policy directives to its examiners, supervisory staff, and the banking industry. SR Letters can be viewed on the Board's public web site at www.federalreserve.gov/board/docs/srletters.)

- 2. Interagency Guidance on Leveraged Financing. This federal bank supervisory guidance, issued on April 9, 2001, emphasized the sound risk management of leveraged financing by depository institutions. It focuses on risk rating of leveraged-finance loans and how the imputed value of a business (enterprise value) should be evaluated in the risk-rating process. Institutions must use sound valuation methodologies in addition to ongoing stress testing and monitoring of those values. The holding company's board of directors and senior management should consider the guidance as they oversee the holding company's depository institution subsidiaries and as they supervise the leveraged-financed lending activities of nonbank subsidiaries. (See SR Letter 01-9.)
- 3. Intercompany Transactions with Affiliates. Several new interim and final rules, exemptions, and interpretations are discussed that pertain to the limitations imposed on intercompany transactions by sections 23A and 23B of the Federal Reserve Act. The interpretations and exemptions involve derivatives, intraday extensions of credit, and transactions involving depository institution loans made to a customer who uses the loan's proceeds (1) to purchase a security or other asset through a depository institution broker-dealer affiliate that acts as a riskless principal or (2) to purchase a security from a depository institution broker-dealer affiliate when the loan was made pursuant to a pre-existing line of credit that was not entered into in contemplation of the purchase of securities from the depository institution affiliate. Another final rule expands the types of securities that are eligible for a bank to purchase from its registered broker-dealer affiliates under section 23A(d)(6) of the act, consistent with safe and sound banking practices.
- 4. Consequences of U.S. Depository Institutions of Financial Holding Companies Failing to Comply with Well-Capitalized, Well-Managed, and CRA Rating Requirements. This update revises the discussion of the December 2000 Regulation Y standards for U.S. BHCs that are electing to operate as FHCs. The update discusses the consequences when an FHC controls a depository institution subsidiary that fails to continue meeting the well-capitalized and well-managed requirements. It also includes the consequences when an FHC controls a depository institution subsidiary that fails to maintain a satisfactory or better Community Reinvestment Act rating. See Regulation Y, sections 225.83 and 225.84. For additional related statutory, regulatory, and supervisory procedures and guidance, see SR Letter 00-01.
- 5. Standards for Safeguarding Customer Information. The federal banking agencies, in implementing sections 501 and 505 of the Gramm-Leach-Bliley Act, jointly

issued guidelines, effective July 1, 2001, establishing standards for safeguarding customer information. The standards pertain to administrative, technical, and physical safeguards for customer records and information. The Federal Reserve's guidelines require FHCs and BHCs to establish written information security programs to assess and control the risks to customer information. The programs must be appropriate for the institution's size, complexity, nature, and the scope of its operations. (See SR Letter 01-15.)

6. Risk-Based Capital Treatment for Forward Equity Transactions Involving a Banking Organization's Common Stock. Some banking organization's common stock, covered by forward equity transaction agreements, has been treated as tier 1 capital. The Federal Reserve determined that any banking organization's common stock that is covered by forward equity transactions entered into after November 9, 2001, must be excluded from tier 1 capital (of a bank holding company or state member bank), other than those specified for deferred compensation or other employee benefit plans. (See SR Letter 01-27.)

A more detailed summary of changes is included with the update package. The *Manual* and updates, including pricing information, are available from Publications Services, Mail Stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551 (or charge by facsimile: 202-728-5886). The *Manual* is also available on the Board's public web site (www.federalreserve.gov/boarddocs/supmanual).

ENFORCEMENT ACTIONS

Federal and state banking regulators announced on November 14, 2001, the issuance of a joint order to cease and desist and order of assessment of a civil money penalty and monetary payment against the State Bank of India, Mumbai, India, and the bank's three branches in New York, New York, its branch in Chicago, Illinois, and its agency in Los Angeles, California.

The State Bank of India, without admitting to any allegations, consented to the issuance of the order.

The State Bank of India paid a total of \$7.5 million in fines under the order issued by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the New York State Banking Department. One-half of this amount will be paid to the U.S. Department of the Treasury and the other half to the State of New York under applicable federal and state laws.

The fines result from the bank's apparent engagement in unsafe and unsound practices related to its failure to establish and maintain procedures reasonably designed to ensure and monitor compliance with

the Bank Secrecy Act, violations of the FDIC's regulations relating to Bank Secrecy Act compliance, failure to maintain correct and accurate books and records, and violations of New York State law relating to the bank's obligation to maintain accurate books and records and to make reports to the New York State Banking Department.

The Federal Reserve Board announced on November 16, 2001, the execution of a written agreement by and among Cerritos Valley Bancorp, Artesia, California; the Cerritos Valley Bank, Artesia, California; and the Federal Reserve Bank of San Francisco.

The Federal Reserve Board announced on November 28, 2001, the issuance of a cease and desist order against the Gulf Bank, Miami, Florida.

The Federal Reserve Board announced on December 3, 2001, the execution of a written agreement by and among the Bank of Little Rock, Little Rock, Arkansas, the Federal Reserve Bank of St. Louis, and the Arkansas State Bank Department.

BOARD ORGANIZATIONAL AND STAFF CHANGES

The Board has approved the following organizational changes, changes in officer assignments, and officer appointments, effective December 17, 2001.

Management Division

The Division of Support Services will merge with the Management Division. Mr. William R. Jones has been appointed director of the newly constituted division.

The EEO Programs Office will be transferred from the Management Division to the Office of the Staff Director for Management.

Office of Board Members

Mr. Donald Winn, Assistant to the Board, will assume the role of division director. Ms. Michelle Smith, Assistant to the Board, has been promoted and will continue to manage the Public Affairs Office. She will become Senior Adviser to the Board for communications policy and serve as assistant secretary to the FOMC.

Ms. Lynn Fox, Assistant to the Board, will assume responsibility for coordinating projects under way

within the Office of Board Members and the Office of Staff Director for Management related to internal communications, Board publications, and recruitment.

Division of Monetary Affairs

Mr. James Clouse has been appointed Assistant Director and Chief of Monetary and Financial Market Analysis, and Mr. William English has been appointed Assistant Director.

Mr. Clouse has oversight responsibility for the Monetary and Financial Market Analysis Section. He joined the Board in 1989 in the Money and Reserve Projections Section, where he moved up to the position of senior economist. In 1998, he became Chief of the Monetary and Financial Market Analysis Section. Mr. Clouse holds a bachelor's degree in economics from Princeton University and master's and doctoral degrees in economics from Northwestern University.

Mr. English is responsible for overseeing the work of the Banking Analysis Section. This includes overseeing the construction, projection, publication, interpretation, and seasonal adjustment of bank credit aggregates and monitoring developments in commercial banking. Coming from the faculty of the University of Pennsylvania, Mr. English joined the Board in 1992 as an economist in the Banking and Money Market Statistics Section. Mr. English has a bachelor's degree in mathematics and economics from Yale College and a doctorate in economics from MIT.

Mr. William Whitesell has been promoted to Deputy Associate Director over Money and Reserve Analysis and Monetary Studies.

Mr. Richard Porter will become Senior Adviser, responsible for overseeing the recruitment of economists and planning and budgeting of information resources.

Reorganization of the Division of Reserve Bank Operations and Payment Systems

A new section, Clearance and Settlement, has been created in the Division of Reserve Bank Operations and Payment Systems. The section will develop and shape policies that foster sound risk controls, promote efficiency, and serve as a source of technical and policy expertise on clearing and settlement issues. Mr. Jeff Stehm, Assistant Director, will provide oversight of the new section.

Mr. Jack Walton has been appointed Assistant Director. He will have oversight responsibility for the division's Retail Payments and Wholesale Payments Programs. Since 1999, Mr. Walton has been the manager of the Retail Payments Program. He joined the Board in 1977 as an economist in the Division of Research and Statistics. He moved to the Division of Reserve Bank Operations in 1982 to assist in the implementation of the priced-services requirements of the Monetary Control Act. In 1994, he became manager of the Check Payments Section. Mr. Walton received his bachelor's degree in economics and mathematics from Rockhurst College and his master's degree in economics from the University of Maryland.

Division of Information Technology

Mr. Robert Taylor has been appointed Assistant Director and will be responsible for planning and managing program resources of the Supervisory Systems Branch, including statistical data collection, information systems development for the National Information Center (NIC), and Banking Organization National Desktop (BOND) programs. Mr. Taylor joined the Board in 1970 and has managed various sections in the Division of Information Technology. He has managed the development of many of the Board's most complex and critical software development projects. Mr. Taylor holds a bachelor's degree in economics from Dickinson College.

Ms. Tillena Clark, Assistant Director, will complete her rotational assignment in the Division of Reserve Bank Operations and Payment Systems. She will return to the division and assume responsibility of the Financial Systems Branch and the division's administrative function.

Ms. Sharon Mowry, Assistant Director, will begin a rotational assignment in February 2002 to the Office of the Secretary as Visiting Assistant Secretary.

On November 26, 2001, the Board announced that Raymond H. Massey, associate director in the Division of Information Technology, would retire on December 3, 2001, after more than twenty-nine years of service at the Federal Reserve Board.

Legal Developments

FINAL RULE-AMENDMENT TO REGULATION A

The Board of Governors is amending 12 C.F.R. Part 201, its Regulation A (Extensions of Credit by Federal Reserve Banks; Change in Discount Rate), to reflect its approval of a decrease in the basic discount rate at each Federal Reserve Bank. The Board acted on requests submitted by the Boards of Directors of the twelve Federal Reserve Banks.

Effective November 6, 2001, 12 C.F.R. Part 201 is amended as follows:

Part 201—Extensions of Credit by Federal Reserve Banks (Regulation A)

1. The authority citation for 12 C.F.R. Part 201 continues to read as follows:

Authority: 12 U.S.C. 343 et seq., 347a, 347b, 347c, 347d, 348 et seq., 357, 374, 374a and 461.

2. Section 201.51 is revised to read as follows:

Section 201.51—Adjustment credit for depository institutions.

The rates for adjustment credit provided to depository institutions under section 201.3(a) are:

Federal Reserve Bank	Rate	Effective
Boston	1.5	November 8, 2001
New York	1.5	November 6, 2001
Philadelphia	1.5	November 7, 2001
Cleveland	1.5	November 8, 2001
Richmond	1.5	November 6, 2001
Atlanta	1.5	November 8, 2001
Chicago	1.5	November 7, 2001
St. Louis	1.5	November 7, 2001
Minneapolis	1.5	November 7, 2001
Kansas City	1.5	November 8, 2001
Dallas	1.5	November 8, 2001
San Francisco	1.5	November 6, 2001

FINAL RULE-AMENDMENT TO REGULATION Z

The Board of Governors is amending 12 C.F.R. Part 226, its Regulation Z (Truth in Lending). The final rule amends the staff commentary that interprets the requirements of Regulation Z. The Board is required to adjust annually the dollar amount that triggers requirements for certain mortgages bearing fees above a certain amount. The Home Ownership and Equity Protection Act of 1994 (HOEPA) sets forth rules for home-secured loans in which the total points and fees payable by the consumer at or before loan

consummation exceed the greater of \$400 or 8 percent of the total loan amount. In keeping with the statute, the Board has annually adjusted the \$400 amount based on the annual percentage change reflected in the Consumer Price Index that is in effect on June 1. The adjusted dollar amount for 2002 is \$480.

Effective January 1, 2002, 12 C.F.R. Part 226 is amended as follows:

Part 226— Truth in Lending (Regulation Z)

 The authority citation for Part 226 continues to read as follows:

Authority: 12 U.S.C. 3806; 15 U.S.C. 1604 and 1637(c)(5).

2. In Supplement 1 to Part 226, under Section 226.32—Requirements for Certain Closed-End Home Mortgages, under Paragraph 32(a)(1)(ii), paragraph 2.vii, is added.

Supplement I to Part 226-Official Staff Interpretations

Subpart E-Special Rules for Certain Home Mortgage Transactions

Section 226.32—Requirements for Certain Closed-End Home Mortgages

32(a) Coverage

Paragraph 32(a)(1)(ii)

2. Annual adjustment of \$400 amount.

vii. For 2002, \$480, reflecting a 3.27 percent increase in the CPI-U from June 2000 to June 2001, rounded to the nearest whole dollar.

JOINT FINAL RULE—AMENDMENT TO RISK-BASED CAPITAL GUIDELINES, CAPITAL ADEQUACY GUIDELINES, AND CAPITAL MAINTENANCE

The Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (Board), the Federal Deposit Insurance Corporation (FDIC), and the Office of Thrift Supervision (OTS) (collectively, the agencies) are changing their regulatory capital standards to address the treatment of recourse obligations, residual interests and direct credit substitutes that expose banks, bank holding companies, and thrifts (collectively, banking organizations) primarily to credit risk. The final rule treats recourse obligations and direct credit substitutes more consistently than the agencies' current risk-based capital standards and adds new standards for the treatment of residual interests, including a concentration limit for credit-enhancing interest-only strips. In addition, the agencies use credit ratings and certain alternative approaches to match the risk-based capital requirement more closely to a banking organization's relative risk of loss for certain positions in asset securitizations. The final rule does not include the proposed requirement that the sponsor of a revolving credit securitization that involves an early amortization feature hold capital against the amount of assets under management.

This rule is intended to result in a more consistent treatment for similar transactions among the agencies, more consistent regulatory capital treatment for certain transactions involving similar risk, and capital requirements that more closely reflect a banking organization's relative exposure to credit risk.

The text of the other Agencies' final rules can be found in 12 C.F.R. Parts 3, 325, and 567, and was published in the Federal Register on November 29, 2001 (66 Federal Register 59613 (2001)). The Board adopted the amendment to Regulation H, Membership of State Banking Institutions in the Federal Reserve System, and Regulation Y, Bank Holding Companies ad Change in Bank Control, 12 C.F.R. Parts 208 and 225, on November 8, 2001.

Effective January 1, 2002, 12 C.F.R. Parts 208 and 225 are amended as follows. Any transactions settled on or after January 1, 2002, are subject to this final rule. Banking organizations that enter into transactions before January 1, 2002, may elect early adoption, as of November 29, 2001, of any provision of the final rule that results in a reduced capital requirement. Conversely, banking organizations that enter into transactions before January 1, 2002, that result in increased capital requirements under the final rule may delay the application of this rule to those transactions until December 31, 2002.

Part 208—Membership of State Banking Institutions in the Federal Reserve System (Regulation H)

1. The authority citation for Part 208 continues to read as follows:

Authority: 12 U.S.C. 24, 24a, 36, 92a, 93a, 248(a), 248(c), 321-338a, 371d, 461, 481-486, 601, 611, 1814, 1816, 1818, 1820(d)(9), 1823(j), 1828(o), 1831o, 1831p-1, 1831r-1, 1831w, 1835a, 1882, 2901-2907, 3105, 3310, 3331-3351, and 3906-3909; 15 U.S.C. 78b, 78l(b), 78l(g), 781(i), 780-4(c)(5), 78q, 78q-1, and 78w; 31 U.S.C. 5318; 42 U.S.C. 4012a, 4104a, 4104b, 4106, and 4128.

2. In Appendix A to Part 208:

- A. The three introductory paragraphs of section II, the first five paragraphs of section II.A.1, and the first seven paragraphs of section II.A.2. are revised and footnote 5 is removed and reserved;
- B. In section II.B., a new paragraph (i)(c) is added, section II.B.1.b. and footnote 14 are revised, new sections II.B.1.c. through II.B.1.g. are added, and section II.B.4.
- C. In section III.A., a new undesignated fifth paragraph is added at the end of the section;
- D. In section III.B., paragraph 3 is revised and footnote 23 is removed, and in paragraph 4, footnote 24 is removed;
- E. In section III.C., paragraphs 1 through 3, footnotes 25 through 39 are redesignated as footnotes 23 through 37, and paragraph 4 is revised;
- F. In section III.D., the introductory paragraph and paragraph 1 are revised;
- G. In sections III.D. and III.E., footnote 46 is removed and footnotes 47 through 51 are redesignated as footnotes 44 through 48;
- H. In section IV.B., footnote 52 is removed; and
- I. Attachment II is revised.

Appendix A To Part 208 — Capital Adequacy Guidelines For State Member Banks: Risk-Based Measure

11. * * *

A bank's qualifying total capital consists of two types of capital components: "core capital elements" (comprising tier 1 capital) and "supplementary capital elements" (comprising tier 2 capital). These capital elements and the various limits, restrictions, and deductions to which they are subject, are discussed below and are set forth in Attachment II.

The Federal Reserve will, on a case-by-case basis, determine whether and, if so, how much of any instrument that does not fit wholly within the terms of one of the capital categories set forth below or that does not have an ability to absorb losses commensurate with the capital treatment otherwise specified below will be counted as an element of tier 1 or tier 2 capital. In making such a determination, the Federal Reserve will consider the similarity of the instrument to instruments explicitly treated in the guidelines, the ability of the instrument to absorb losses while the bank operates as a going concern, the maturity and redemption features of the instrument, and other relevant terms and factors. To qualify as an element of tier 1 or tier 2 capital, a capital instrument may not contain or be covered by any covenants, terms, or restrictions that are inconsistent with safe and sound banking practices.

Redemptions of permanent equity or other capital instruments before stated maturity could have a significant impact on a bank's overall capital structure. Consequently, a bank considering such a step should consult with the Federal Reserve before redeeming any equity or debt capital instrument (prior to maturity) if such redemption could have a material effect on the level or composition of the institution's capital base.⁴

A. ***

- Core capital elements (tier 1 capital). The tier 1 component of a bank's qualifying capital must represent at least 50 percent of qualifying total capital and may consist of the following items that are defined as core capital elements:
 - (i) Common stockholders' equity;
 - (ii) Qualifying noncumulative perpetual preferred stock (including related surplus); and
 - (iii) Minority interest in the equity accounts of consolidated subsidiaries.

Tier 1 capital is generally defined as the sum of core capital elements⁵ less goodwill, other intangible assets, and interest-only strips receivables that are required to be deducted in accordance with section II.B.1. of this appendix.

* * * * *

- 2. Supplemtary capital elements (tier 2 capital). The tier 2 component of a bank's qualifying capital may consist of the following items that are defined as supplementary capital elements:
 - (i) Allowance for loan and lease losses (subject to limitations discussed below);
 - (ii) Perpetual preferred stock and related surplus (subject to conditions discussed below);
 - (iii) Hybrid capital instruments (as defined below), and mandatory convertible debt securities;
 - (iv) Term subordinated debt and intermediate-term preferred stock, including related surplus (subject to limitations discussed below);
 - (v) Unrealized holding gains on equity securities (subject to limitations discussed in section II.A.2.e. of this appendix).

The maximum amount of tier 2 capital that may be included in a bank's qualifying total capital is limited to 100 percent of tier 1 capital (net of goodwill, other intangible assets, and interest-only strips receivables that are required to be deducted in accordance with section II.B.1. of this appendix).

* * * * *

- B. ***
 - (i) ***
 - (c) Certain credit-enhancing interest-only strips receivables deducted from the sum of core capital elements in accordance with sections II.B.1.c. through e. of this appendix.

* * * * *

- Goodwill, other intangible assets, and residual interests. * * *
 - b. Other intangible assets.
 - i. All servicing assets, including servicing assets on assets other than mortgages (i.e., nonmortgage servicing assets), are included in this appendix as identifiable intangible assets. The only types of identifiable intangible assets that may be included in, that is, not deducted from, a bank's capital are readily marketable mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships. The total amount of these assets that may be included in capital is subject to the limitations described below in sections II.B.1.d. and e. of this appendix.
 - ii. The treatment of identifiable intangible assets set forth in this section generally will be used in the calculation of a bank's capital ratios for supervisory and applications purposes. However, in making an overall assessment of a bank's capital adequacy for applications purposes, the Board may, if it deems appropriate, take into account the quality and composition of a bank's capital, together with the quality and value of its tangible and intangible assets.
 - Credit-enhancing interest-only strips receivables (I/Os).
 - i. Credit-enhancing I/Os are on-balance sheet assets that, in form or in substance, represent the contractual right to receive some or all of the interest due on transferred assets and expose the bank to credit risk directly or indirectly associated with transferred assets that exceeds a pro rata share of the bank's claim on the assets, whether through subordination provisions or other credit enhancement techniques. Such I/Os, whether purchased or retained, including other similar "spread" assets, may be included in, that is, not deducted from, a bank's capital subject to the limitations described below in sections II.B.1.d. and e. of this appendix.
 - ii. Both purchased and retained creditenhancing I/Os, on a non-tax adjusted basis, are included in the total amount that is used for purposes of determining whether a bank

^{4.} Consultation would not ordinarily be necessary if an instrument were redeemed with the proceeds of, or replaced by, a like amount of a similar or higher quality capital instrument and the organization's capital position is considered fully adequate by the Federal Reserve.

^{5.} Reserved.

exceeds the tier 1 limitation described below in this section. In determining whether an I/O or other types of spread assets serve as a credit enhancement, the Federal Reserve will look to the economic substance of the transaction.

Fair value limitation. The amount of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that a bank may include in capital shall be the lesser of 90 percent of their fair value, as determined in accordance with section II.B.1.f. of this appendix, or 100 percent of their book value, as adjusted for capital purposes in accordance with the instructions in the commercial bank Consolidated Reports of Condition and Income (Call Reports). The amount of I/Os that a bank may include in capital shall be its fair value. If both the application of the limits on mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships and the adjustment of the balance sheet amount for these assets would result in an amount being deducted from capital, the bank would deduct only the greater of the two amounts from its core capital elements in determining tier 1 capital.

Tier 1 capital limitation. e.

- i. The total amount of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that may be included in capital, in the aggregate, cannot exceed 100 percent of tier 1 capital. The aggregate of nonmortgage servicing assets and purchased credit card relationships are subject to a separate sublimit of 25 percent of tier 1 capital. In addition, the total amount of credit-enhancing I/Os (both purchased and retained) that may be included in capital cannot exceed 25 percent of tier 1 capital.14
- ii. For purposes of calculating these limitations on mortgage servicing assets, nonmortgage servicing assets, purchased credit card relationships, and credit-enhancing I/Os, tier 1 capital is defined as the sum of core capital

elements, net of goodwill, and net of all

- iii. Banks may elect to deduct disallowed mortgage servicing assets, disallowed nonmortgage servicing assets, and disallowed creditenhancing I/Os (both purchased and retained) on a basis that is net of any associated deferred tax liability. Deferred tax liabilities netted in this manner cannot also be netted against deferred-tax assets when determining the amount of deferred-tax assets that are dependent upon future taxable income.
- Valuation. Banks must review the book value of all intangible assets at least quarterly and make adjustments to these values as necessary. The fair value of mortgage servicing assets, nonmortgage servicing assets, purchased credit card relationships, and credit-enhancing I/Os also must be determined at least quarterly. This determination shall include adjustments for any significant changes in original valuation assumptions, including changes in prepayment estimates or account attrition rates. Examiners will review both the book value and the fair value assigned to these assets, together with supporting documentation, during the examination process. In addition, the Federal Reserve may require, on a case-by-case basis, an independent valuation of a bank's intangible assets or credit-enhancing I/Os.
- Growing organizations. Consistent with longstanding Board policy, banks experiencing substantial growth, whether internally or by acquisition, are expected to maintain strong capital positions substantially above minimum supervisory levels, without significant reliance on intangible assets or credit-enhancing I/Os.

4. Defferred-tax assets.

The amount of deferred-tax assets that is dependent upon future taxable income, net of the valuation allowance for deferred-tax assets, that may be included in, that is, not deducted from, a bank's capital may not exceed the lesser of:

identifiable intangible assets other than mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships, prior to the deduction of any disallowed mortgage servicing assets, any disallowed nonmortgage servicing assets, any disallowed purchased credit card relationships, any disallowed credit-enhancing I/Os (both purchased and retained), and any disallowed deferred-tax assets, regardless of the date acquired.

^{14.} Amounts of servicing assets, purchased credit card relationships, and credit-enhancing I/Os (both retained and purchased) in excess of these limitations, as well as all other identifiable intangible assets, including core deposit intangibles and favorable leaseholds, are to be deducted from a bank's core capital elements in determining tier 1 capital. However, identifiable intangible assets (other than mortgage servicing assets and purchased credit card relationships) acquired on or before February 19, 1992, generally will not be deducted from capital for supervisory purposes, although they will continue to be deducted for applications purposes.

- i. The amount of these deferred-tax assets that the bank is expected to realize within one year of the calendar quarter-end date, based on its projections of future taxable income for that year.²⁰ or
- ii. 10 percent of tier 1 capital.
- The reported amount of deferred-tax assets, net of any valuation allowance for deferred-tax assets, in excess of the lesser of these two amounts is to be deducted from a bank's core capital elements in determining tier 1 capital. For purposes of calculating the 10 percent limitation, tier 1 capital is defined as the sum of core capital elements, net of goodwill and net of all identifiable intangible assets other than mortgage servicing assets, nonmortgage servicing assets, purchased credit card relationships, prior to the deduction of any disallowed mortgage servicing assets, any disallowed nonmortgage servicing assets, any disallowed purchased credit card relationships, any disallowed creditenhancing I/Os, and any disallowed deferredtax assets. There generally is no limit in tier 1 capital on the amount of deferred-tax assets that can be realized from taxes paid in prior carryback years or from future reversals of existing taxable temporary differences, but, for banks that have a parent, this may not exceed the amount the bank could reasonably expect its parent to refund.

III. * * *

11. ** * * A. * * *

The Federal Reserve will, on a case-by-case basis, determine the appropriate risk weight for any asset or credit equivalent amount of an off-balance sheet item that does not fit wholly within one of the risk weight categories set forth below or that imposes risks on a bank that are incommensurate with the risk weight otherwise specified below for the asset or off-balance sheet item. In addition, the Federal Reserve will, on a case-by-case basis, determine the

appropriate credit conversion factor for any offbalance sheet item that does not fit wholly within one of the credit conversion factors set forth below or that imposes risks on a bank that are incommensurate with the credit conversion factors otherwise specified below for the offbalance sheet item. In making such a determination, the Federal Reserve will consider the similarity of the asset or off-balance sheet item to assets or off-balance sheet items explicitly treated in the guidelines, as well as other relevant factors.

B. * * *

- 3. Recourse obligations, direct credit substitutes, residual interests, and asset- and mortgage-backed securities. Direct credit substitutes, assets transferred with recourse, and securities issued in connection with asset securitizations and structured financings are treated as described below. The term "asset securitizations" or "securitizations" in this rule includes structured financings, as well as asset securitization transactions.
 - a. Definitions
 - that allows one party (the "protection purchaser") to transfer the credit risk of an asset or off-balance sheet credit exposure to another party (the "protection provider"). The value of a credit derivative is dependent, at least in part, on the credit performance of the "reference asset."
 - Credit-enhancing representations and ii. warranties means representations and warranties that are made or assumed in connection with a transfer of assets (including loan servicing assets) and that obligate the bank to protect investors from losses arising from credit risk in the assets transferred or the loans serviced. Credit-enhancing representations and warranties include promises to protect a party from losses resulting from the default or nonperformance of another party or from an insufficiency in the value of the collateral. Credit-enhancing representations and warranties do not include:
 - Early default clauses and similar warranties that permit the return of, or premium refund clauses covering, 1–4 family residential first mortgage loans that qualify

^{20.} To determine the amount of expected deferred-tax assets realizable in the next 12 months, an institution should assume that all existing temporary differences fully reverse as of the report date. Projected future taxable income should not include net operating loss carry-forwards to be used during that year or the amount of existing temporary differences a bank expects to reverse within the year. Such projections should include the estimated effect of tax-planning strategies that the organization expects to implement to realize net operating losses or tax-credit carry-forwards that would otherwise expire during the year. Institutions do not have to prepare a new 12-month projection each quarter. Rather, on interim report dates, institutions may use the future-taxable income projections for their current fiscal year, adjusted for any significant changes that have occurred or are expected to occur.

- for a 50 percent risk weight for a period not to exceed 120 days from the date of transfer. These warranties may cover only those loans that were originated within 1 year of the date of transfer;
- 2. Premium refund clauses that cover assets guaranteed, in whole or in part, by the U.S. Government, a U.S. Government agency or a government-sponsored enterprise, provided the premium refund clauses are for a period not to exceed 120 days from the date of transfer; or
- 3. Warranties that permit the return of assets in instances of misrepresentation, fraud or incomplete documentation.
- iii. Direct credit substitute means an arrangement in which a bank assumes, in form or in substance, credit risk associated with an on- or off-balance sheet credit exposure that was not previously owned by the bank (thirdparty asset) and the risk assumed by the bank exceeds the pro rata share of the bank's interest in the third-party asset. If the bank has no claim on the third-party asset, then the bank's assumption of any credit risk with respect to the third party asset is a direct credit substitute. Direct credit substitutes include, but are not limited to:
 - 1. Financial standby letters of credit that support financial claims on a third party that exceed a bank's pro ratashare of losses in the financial claim;
 - 2. Guarantees, surety arrangements, credit derivatives, and similar inbacking financial struments claims that exceed a bank's pro rata share in the financial claim;
 - 3. Purchased subordinated interests or securities that absorb more than their pro rata share of losses from the underlying assets;
 - Credit derivative contracts under which the bank assumes more than its pro rata share of credit risk on a third party exposure;
 - Loans or lines of credit that provide credit enhancement for the financial obligations of an account party;

- 6. Purchased loan servicing assets if the servicer is responsible for credit losses or if the servicer makes or assumes creditenhancing representations and warranties with respect to the loans serviced. Mortgage servicer cash advances that meet the conditions of section III.B.3.a.viii. of this appendix are not direct credit substitutes: and
- 7. Clean-up calls on third party assets are direct credit substitutes. Clean-up calls that are 10 percent or less of the original pool balance that are exercisable at the option of the bank are not direct credit substitutes.
- iv. Externally rated means that an instrument or obligation has received a credit rating from a nationallyrecognized statistical rating organization.
- Face amount means the notional principal, or face value, amount of an off-balance sheet item; the amortized cost of an asset not held for trading purposes; and the fair value of a trading asset.
- Financial assset means cash or other monetary instrument, evidence of debt, evidence of an ownership interest in an entity, or a contract that conveys a right to receive or exchange cash or another financial instrument from another party.
- Financial standby letter credit means a letter of credit or similar arrangement that represents an irrevocable obligation to a third-party beneficiary:
 - 1. To repay money borrowed by, or advanced to, or for the account of, a second party (the account par-
 - 2. To make payment on behalf of the account party, in the event that the account party fails to fulfill its obligation to the beneficiary.
- viii. Mortgage servicer cash advance means funds that a residential mortgage loan servicer advances to ensure an uninterrupted flow of payments, including advances made to cover foreclosure costs or other expenses to facilitate the timely collection of the

loan. A mortgage servicer cash advance is not a recourse obligation or a direct credit substitute if:

- The servicer is entitled to full reimbursement and this right is not subordinated to other claims on the cash flows from the underlying asset pool; or
- For any one loan, the servicer's obligation to make nonreimbursable advances is contractually limited to an insignificant amount of the outstanding principal balance of that loan.
- ix. Nationally recognized statistical rating organization (NRSRO) means an entity recognized by the Division of Market Regulation of the Securities and Exchange Commission (or any successor Division) (Commission) as a nationally recognized statistical rating organization for various purposes, including the Commission's uniform net capital requirements for brokers and dealers.
- Recourse means the retention, by a Χ. bank, in form or in substance, of any credit risk directly or indirectly associated with an asset it has transferred and sold that exceeds a pro rata share of the bank's claim on the asset. If a bank has no claim on a transferred asset, then the retention of any risk of credit loss is recourse. A recourse obligation typically arises when a bank transfers assets and retains an explicit obligation to repurchase the assets or absorb losses due to a default on the payment of principal or interest or any other deficiency in the performance of the underlying obligor or some other party. Recourse may also exist implicitly if a bank provides credit enhancement beyond any contractual obligation to support assets it has sold. The following are examples of recourse arrangements:
 - Credit-enhancing representations and warranties made on the transferred assets;
 - Loan servicing assets retained pursuant to an agreement under which the bank will be responsible for credit losses associated with the loans being serviced. Mortgage servicer cash advances

- that meet the conditions of section III.B.3.a.viii. of this appendix are not recourse arrangements;
- 3. Retained subordinated interests that absorb more than their *pro* rata share of losses from the underlying assets;
- 4. Assets sold under an agreement to repurchase, if the assets are not already included on the balance sheet:
- 5. Loan strips sold without contractual recourse where the maturity of the transferred loan is shorter than the maturity of the commitment under which the loan is drawn:
- 6. Credit derivatives issued that absorb more than the bank's *pro* rata share of losses from the transferred assets; and
- 7. Clean-up calls at inception that are greater than 10 percent of the balance of the original pool of transferred loans. Clean-up calls that are 10 percent or less of the original pool balance that are exercisable at the option of the bank are not recourse arrangements.
- xi. Residual interest means any onbalance sheet asset that represents an interest (including a beneficial interest) created by a transfer that qualifies as a sale (in accordance with generally accepted accounting principles) of financial assets, whether through a securitization or otherwise, and that exposes the bank to credit risk directly or indirectly associated with the transferred assets that exceeds a pro rata share of the bank's claim on the assets, whether through subordination provisions or other credit enhancement techniques. Residual interests generally include credit-enhancing I/Os, spread accounts, cash collateral accounts, retained subordinated interother ests, forms of overcollateralization, and similar assets that function as a credit enhancement. Residual interests further include those exposures that, in substance, cause the bank to retain the credit risk of an asset or exposure that had qualified as a residual interest before it was sold. Residual interests generally do

- not include interests purchased from a third party, except that purchased credit-enhancing I/Os are residual interests for purposes of this appendix.
- Risk participation means a participation in which the originating party remains liable to the beneficiary for the full amount of an obligation (e.g., a direct credit substitute) notwithstanding that another party has acquired a participation in that obligation.
- xiii. Securitization means the pooling and repackaging by a special purpose entity of assets or other credit exposures into securities that can be sold to investors. Securitization includes transactions that create stratified credit risk positions whose performance is dependent upon an underlying pool of credit exposures, including loans and commitments.
- xiv. Structured finance program means a program where receivable interests and asset-backed securities issued by multiple participants are purchased by a special purpose entity that repackages those exposures into securities that can be sold to investors. Structured finance programs allocate credit risks, generally, between the participants and credit enhancement provided to the program.
- Traded position means a position that XV. is externally rated and is retained, assumed, or issued in connection with an asset securitization, where there is a reasonable expectation that, in the near future, the rating will be relied upon by unaffiliated investors to purchase the position; or an unaffiliated third party to enter into a transaction involving the position, such as a purchase, loan, or repurchase agreement.
- b. Credit equivalent amounts and risk weight of recourse obligations and direct credit substitutes.
 - Credit equivalent amount. Except as otherwise provided in sections III.B.3.c. through f. and III.B.5. of this appendix, the credit equivalent amount for a recourse obligation or direct credit substitute is the full amount of the credit-enhanced assets

- for which the bank directly or indirectly retains or assumes credit risk multiplied by a 100 percent conversion factor.
- ii. Risk-weight factor. To determine the bank's risk-weight factor for offbalance sheet recourse obligations and direct credit substitutes, the credit equivalent amount is assigned to the risk category appropriate to the obligor in the underlying transaction, after considering any associated guarantees or collateral. For a direct credit substitute that is an on-balance sheet asset (e.g., a purchased subordinated security), a bank must calculate riskweighted assets using the amount of the direct credit substitute and the full amount of the assets it supports, i.e., all the more senior positions in the structure. The treatment of direct credit substitutes that have been syndicated or in which risk participations have been conveyed or acquired is set forth in section III.D.1 of this appendix.
- c. Externally-rated positions: credit equivalent amounts and risk weights of recourse obligations, direct credit substitutes, residual interests, and asset- and mortgagebacked securities (including asset-backed commercial paper).
 - Traded positions. With respect to a recourse obligation, direct credit substitute, residual interest (other than a credit-enhancing I/O strip) or assetand mortgage-backed security (including asset-backed commercial paper) that is a traded position and that has received an external rating on a long-term position that is one grade below investment grade or better or a short-term rating that is investment grade, the bank may multiply the face amount of the position by the appropriate risk weight, determined in accordance with the tables below. Stripped mortgage-backed securities and other similar instruments, such as interest-only or principal-only strips that are not credit enhancements, must be assigned to the 100 percent risk category. If a traded position has received more than one external rating, the lowest single rating will apply.

Long-term Rating Category	Examples	Risk Weight
Highest or second highest investment grade	AAA, AA	20 percent
Third highest investment grade Lowest investment grade One category below investment grade	А ВВВ ВВ	50 percent 100 percent 200 percent
Short-term Rating	Examples	Risk Weight
Highest investment grade Second highest investment grade Lowest investment grade	A-1, P-1 A-2, P-2 A-3, P-3	20 percent 50 percent 100 percent

- ii. Non-traded positions A recourse obligation, direct credit substitute, or residual interest (but not a creditenhancing I/O strip) extended in connection with a securitization that is not a traded position may be assigned a risk weight in accordance with section III.B.3.c.i. of this appendix if:
 - It has been externally rated by more than one NRSRO;
 - 2. It has received an external rating on a long-term position that is one grade below investment grade or better or on a short-term position that is investment grade by all NRSROs providing a rating;
 - 3. The ratings are publicly available; and
 - 4. The ratings are based on the same criteria used to rate traded positions. If the ratings are different, the lowest rating will determine the risk category to which the recourse obligation, direct credit substitute, or residual interest will be assigned.
- d. Senior positions not externally rated. For a recourse obligation, direct credit substitute, residual interest, or asset- or mortgagebacked security that is not externally rated but is senior or preferred in all features to a traded position (including collateralization and maturity), a bank may apply a risk weight to the face amount of the senior position in accordance with section III.B.3.c.i. of this appendix, based on the traded position, subject to any current or prospective supervisory guidance and the bank satisfying the Federal Reserve that this treatment is appropriate. This section will apply only if the traded subordinated position provides substantive credit support to

- the unrated position until the unrated position matures.
- e. Capital requirement for residual interests -Capital requirement for creditenhancibg I/O strips. After applying the concentration limit to creditenhancing I/O strips (both purchased and retained) in accordance with sections II.B.2.c. through e. of this appendix, a bank must maintain riskbased capital for a credit-enhancing I/O strip (both purchased and retained), regardless of the external rating on that position, equal to the remaining amount of the creditenhancing I/O strip (net of any existing associated deferred tax liability), even if the amount of risk-based capital required to be maintained exceeds the full risk-based capital requirement for the assets transferred. Transactions that, in substance, result in the retention of credit risk associated with a transferred creditenhancing I/O strip will be treated as
 - ii. Capital requirement for other residual interests.

ferred.

if the credit-enhancing I/O strip was

retained by the bank and not trans-

- 1. If a residual interest does not meet the requirements of sections III.B.3.c.or d. of this appendix, a bank must maintain risk-based capital equal to the remaining amount of the residual interest that is retained on the balance sheet (net of any existing associated deferred tax liability), even if the amount of risk-based capital required to be maintained exceeds the full risk-based capital requirement for the assets transferred. Transactions that, in substance, result in the retention of credit risk associated with a transferred residual interest will be treated as if the residual interest was retained by the bank and not trans-
- Where the aggregate capital requirement for residual interests and other recourse obligation in connection with the same transfer of assets exceed the full risk-based capital requirement for those assets, a bank must maintain risk-based capital equal to the greater of the risk-based capital

requirement for the residual interest as calculated under section III.B.3.e.ii.1 of this appendix or the full risk-based capital requirement for the assets transferred.

f. Positions that are not rated by an NRSRO. A position (but not a residual interest) maintained in connection with a securitization and that is not rated by a NRSRO may be risk-weighted based on the bank's determination of the credit rating of the position, as specified in the table below, multiplied by the face amount of the position. In order to obtain this treatment, the bank's system for determining the credit rating of the position must meet one of the three alternative standards set out in sections III.B.3.f.i. through III.B.3.f.iii. of this appendix.

Rating Category	Examples	Risk Weight
Highest or second highest investment grade	AAA,AA	100 percent
Third highest investment grade Lowest investment grade One category below investment grade	A BBB BB	100 percent 100 percent 200 percent

- i. Internal risk rating used for assetbacked programs. A direct credit substitute (other than a purchased creditenhancing I/O) is assumed in connection with an asset-backed commercial paper program sponsored by the bank and the bank is able to demonstrate to the satisfaction of the Federal Reserve, prior to relying upon its use, that the bank's internal credit risk rating system is adequate. Adequate internal credit risk rating systems usually contain the following criteria:
 - 1. The internal credit risk system is an integral part of the bank's risk management system, which explicitly incorporates the full range of risks arising from a bank's participation in securitization activi-
 - 2. Internal credit ratings are linked to measurable outcomes, such as the probability that the position will experience any loss, the position's expected loss given default, and the degree of variance in losses given default on that position:
 - The bank's internal credit risk system must separately consider

- the risk associated with the underlying loans or borrowers, and the risk associated with the structure of a particular securitization transaction:
- 4. The bank's internal credit risk system must identify gradations of risk among "pass" assets and other risk positions;
- 5. The bank must have clear, explicit criteria that are used to classify assets into each internal risk grade, including subjective factors:
- 6. The bank must have independent credit risk management or loan review personnel assigning or reviewing the credit risk ratings;
- 7. The bank must have an internal audit procedure that periodically verifies that the internal credit risk ratings are assigned in accordance with the established criteria:
- 8. The bank must monitor the performance of the internal credit risk ratings assigned to nonrated, nontraded direct credit substitutes over time to determine the appropriateness of the initial credit risk rating assignment and adjust individual credit risk ratings, or the overall internal credit risk ratings system, as needed; and
- 9. The internal credit risk system must make credit risk rating assumptions that are consistent with, or more conservative than, the credit risk rating assumptions and methodologies of NRSROs.
- ii. Program Ratings. A direct credit substitute or recourse obligation (other than a residual interest) is assumed or retained in connection with a structured finance program and a NRSRO has reviewed the terms of the program and stated a rating for positions associated with the program. If the program has options for different combinations of assets, standards, internal credit enhancements and other relevant factors, and the NRSRO specifies ranges of rating categories to them, the bank may apply the rating category that corresponds to the bank's position. In order to rely on a program rating, the bank must demonstrate to the Federal Reserve's satisfaction that the credit risk rating as-

signed to the program meets the same standards generally used by NRSROs for rating traded positions. The bank must also demonstrate to the Federal Reserve's satisfaction that the criteria underlying the NRSRO's assignment of ratings for the program are satisfied for the particular position. If a bank participates in a securitization sponsored by another party, the Federal Reserve may authorize the bank to use this approach based on a programmatic rating obtained by the sponsor of the program.

- iii. Computer Program. The bank is using an acceptable credit assessment computer program to determine the rating of a direct credit substitute or recourse obligation (but not residual interest) issued in connection with a structured finance program. NRSRO must have developed the computer program, and the bank must demonstrate to the Federal Reserve's satisfaction that ratings under the program correspond credibly and reliably with the rating of traded positions.
- g. Limitations on risk-based capital requirements.
 - Low-level exposure. If the maximum i. contractual exposure to loss retained or assumed by a bank in connection with a recourse obligation or a direct credit substitute is less than the effective risk-based capital requirement for the enhanced assets, the risk-based capital requirement is limited to the maximum contractual exposure, less any recourse liability account established in accordance with generally accepted accounting principles. This limitation does not apply when a bank provides credit enhancement beyond any contractual obligation to support assets it has sold.
 - ii. Mortgage-related securities or participation certificates retained in a mortgage loan swap. If a bank holds a mortgage-related security or a participation certificate as a result of a mortgage loan swap with recourse, capital is required to support the recourse obligation plus the percentage of the mortgage-related security or participation certificate that is not covered by the recourse obligation. The total amount of capital required for the onbalance sheet asset and the recourse obligation, however, is limited to the

- capital requirement for the underlying loans, calculated as if the bank continued to hold these loans as on-balance sheet assets.
- iii. Related on-balance sheet asssets. If a recourse obligation or direct credit substitute subject to section III.B.3. of this appendix also appears as a balance sheet asset, the balance sheet asset is not included in a bank's riskweighted assets to the extent the value of the balance sheet asset is already included in the off-balance sheet credit equivalent amount for the recourse obligation or direct credit substitute, except in the case of loan servicing assets and similar arrangements with embedded recourse obligations or direct credit substitutes. In that case, both the onbalance sheet assets and the related recourse obligations and direct credit substitutes must be separately riskweighted and incorporated into the risk-based capital calculation.

C. * * *

- 4. Category 4: 100 percent.
 - a. All assets not included in the categories above are assigned to this category, which comprises standard risk assets. The bulk of the assets typically found in a loan portfolio would be assigned to the 100 percent category.
 - b. This category includes long-term claims on, and the portions of long-term claims that are guaranteed by, non-OECD banks, and all claims on non-OECD central governments that entail some degree of transfer risk.³⁶ This category includes all claims on foreign and domestic private-sector obligors not included in the categories above (including loans to nondepository financial institutions and bank holding companies); claims on commercial firms owned by the public sector; customer liabilities to the bank on acceptances outstanding involving standard risk claims;³⁷ investments in fixed assets,

^{36.} Such assets include all nonlocal currency claims on, and the portions of claims that are guaranteed by, non-OECD central governments and those portions of local currency claims on, or guaranteed by, non-OECD central governments that exceed the local currency liabilities held by the bank.

^{37.} Customer liabilities on acceptances outstanding involving nonstandard risk claims, such as claims on U.S. depository institutions, are assigned to the risk category appropriate to the identity of the obligor or, if relevant, the nature of the collateral or guarantees

premises, and other real estate owned; common and preferred stock of corporations, including stock acquired for debts previously contracted; all stripped mortgagebacked securities and similar instruments; and commercial and consumer loans (except those assigned to lower risk categories due to recognized guarantees or collateral and loans secured by residential property that qualify for a lower risk weight).

- Also included in this category are industrialdevelopment bonds and similar obligations issued under the auspices of states or political subdivisions of the OECD-based group of countries for the benefit of a private party or enterprise where that party or enterprise, not the government entity, is obligated to pay the principal and interest, and all obligations of states or political subdivisions of countries that do not belong to the OECDbased group.
- d. The following assets also are assigned a risk weight of 100 percent if they have not been deducted from capital: investments in unconsolidated companies, joint ventures, or associated companies; instruments that qualify as capital issued by other banking organizations; and any intangibles, including those that may have been grandfathered into capital.

D. * * *

The face amount of an off-balance sheet item is generally incorporated into risk-weighted assets in two steps. The face amount is first multiplied by a credit conversion factor, except for direct credit substitutes and recourse obligations as discussed in section III.D.1. of this appendix. The resultant credit equivalent amount is assigned to the appropriate risk category according to the obligor or, if relevant, the guarantor or the nature of the collateral.38 Attachment IV to this appendix sets forth the conversion factors for various types of off-balance sheet items.

- Items with a 100 percent conversion factor.
 - a. Except as otherwise provided in section III.B.3. of this appendix, the full amount of

backing the claims. Portions of acceptances conveyed as risk participations to U.S. depository institutions or foreign banks are assigned to the 20 percent risk category appropriate to short-term claims guaranteed by U.S. depository institutions and foreign banks.

38. The sufficiency of collateral and guarantees for off-balance-sheet items is determined by the market value of the collateral or the amount of the guarantee in relation to the face amount of the item, except for derivative contracts, for which this determination is generally made in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section III.B. of this appendix A.

- an asset or transaction supported, in whole or in part, by a direct credit substitute or a recourse obligation. Direct credit substitutes and recourse obligations are defined in section III.B.3. of this appendix.
- b. Sale and repurchase agreements and forward agreements. Forward agreements are legally binding contractual obligations to purchase assets with certain drawdown at a specified future date. Such obligations include forward purchases, forward forward deposits placed,39 and partly-paid shares and securities; they do not include commitments to make residential mortgage loans or forward foreign exchange contracts.
- Securities lent by a bank are treated in one of two ways, depending upon whether the lender is at risk of loss. If a bank, as agent for a customer, lends the customer's securities and does not indemnify the customer against loss, then the transaction is excluded from the risk-based capital calculation. If, alternatively, a bank lends its own securities or, acting as agent for a customer, lends the customer's securities and indemnifies the customer against loss, the transaction is converted at 100 percent and assigned to the risk weight category appropriate to the obligor, or, if applicable, to any collateral delivered to the lending bank, or the independent custodian acting on the lending bank's behalf. Where a bank is acting as agent for a customer in a transaction involving the lending or sale of securities that is collateralized by cash delivered to the bank, the transaction is deemed to be collateralized by cash on deposit in the bank for purposes of determining the appropriate risk-weight category, provided that any indemnification is limited to no more than the difference between the market value of the securities and the cash collateral received and any reinvestment risk associated with that cash collateral is borne by the customer.
- d. In the case of direct credit substitutes in which a risk participation⁴⁰ has been conveyed, the full amount of the assets that are supported, in whole or in part, by the credit enhancement are converted to a credit equivalent amount at 100 percent. However, the pro rata share of the credit equivalent amount that has been conveyed through a

^{39.} Forward forward deposits accepted are treated as interest rate contracts.

^{40.} That is, a participation in which the originating bank remains liable to the beneficiary for the full amount of the direct credit substitute if the party that has acquired the participation fails to pay when the instrument is drawn.

risk participation is assigned to whichever risk category is lower: the risk category appropriate to the obligor, after considering any relevant guarantees or collateral, or the risk category appropriate to the institution acquiring the participation.41 Any remainder is assigned to the risk category appropriate to the obligor, guarantor, or collateral. For example, the pro rata share of the full amount of the assets supported, in whole or in part, by a direct credit substitute conveyed as a risk participation to a U.S. domestic depository institution or foreign bank

- is assigned to the 20 percent risk category.⁴² In the case of direct credit substitutes in which a risk participation has been acquired, the acquiring bank's percentage share of the direct credit substitute is multiplied by the full amount of the assets that are supported, in whole or in part, by the credit enhancement and converted to a credit equivalent amount at 100 percent. The credit equivalent amount of an acquisition of a risk participation in a direct credit substitute is assigned to the risk category appropriate to the account party obligor or, if relevant, the nature of the collateral or guarantees.
- In the case of direct credit substitutes that take the form of a syndication where each bank is obligated only for its pro rata share of the risk and there is no recourse to the originating bank, each bank will only include its pro rata share of the assets supported, in whole or in part, by the direct credit substitute in its risk-based capital calculation.43

Attachment II—Summary of Definition of Qualifying Capital for State Member Banks*

3. In Appendix B to part 208, section II.b is revised to

read as follows:

Appendix B To Part 208—Capital Adequacy Guidelines For State Member Banks: Tier 1 Leverage Measure

11. ***

b. A bank's tier 1 leverage ratio is calculated by dividing its tier 1 capital (the numerator of the ratio) by its average total consolidated assets (the denominator of the ratio). The ratio will also be calculated using period-end assets whenever necessary, on a case-by-case basis. For the purpose of this leverage ratio, the definition of tier 1 capital as set forth in the riskbased capital guidelines contained in appendix A of this part will be used.² As a general matter, average total consolidated assets are defined as the quarterly average total assets (defined net of the allowance for loan and lease losses) reported on the bank's Reports of Condition and Income (Call Reports), less goodwill; amounts of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that, in the aggregate, are in excess of 100 percent of tier 1 capital; amounts of nonmortgage servicing assets, purchased credit card relationships that, in the aggregate, are in excess of 25 percent of tier 1 capital; amounts of credit-enhancing interest-only strips that are in excess of 25 percent of tier 1 capital; all other identifiable intangible assets; any investments in subsidiaries or associated companies that the Federal Reserve determines should be deducted from tier 1 capital; and deferred tax assets that are dependent upon future taxable income, net of their valuation allowance, in excess of the limitation set forth in section II.B.4 of appendix A of this part.3

^{41.} A risk participation in bankers acceptances conveyed to other institutions is also assigned to the risk category appropriate to the institution acquiring the participation or, if relevant, the guarantor or nature of the collateral.

^{42.} Risk participations with a remaining maturity of over one year that are conveyed to non-OECD banks are to be assigned to the 100 percent risk category, unless a lower risk category is appropriate to the obligor, guarantor, or collateral.

^{43.} For example, if a bank has a 10 percent share of a \$10 syndicated direct credit substitute that provides credit support to a \$100 loan, then the bank's \$1 pro rata share in the enhancement means that a \$10 pro rata share of the loan is included in risk weighted assets.

^{2.} Tier 1 capital for state member banks includes common equity, minority interest in the equity accounts of consolidated subsidiaries, and qualifying noncumulative perpetual preferred stock. In addition, as a general matter, tier 1 capital excludes goodwill; amounts of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that, in the aggregate, exceed 100 percent of tier 1 capital; amounts of nonmortgage servicing assets and purchased credit card relationships that, in the aggregate, exceed 25 percent of tier 1 capital; amounts of credit-enhancing interest-only strips in excess of 25 percent of tier 1 capital; all other identifiable intangible assets; and deferred tax assets that are dependent upon future taxable income, net of their valuation allowance, in excess of certain limitations. The Federal Reserve may exclude certain investments in subsidiaries or associated companies as appropriate.

^{3.} Deductions from tier 1 capital and other adjustments are discussed more fully in section II.B. of appendix A of this part.

Part 225—Bank Holding Companies and Change in Bank Control (Regulation Y)

1. The authority citation for part 225 continues to read as follows:

Authority: 12 U.S.C. 1817(j)(13), 1818, 1828(o), 1831i, 1831p-1, 1843(c)(8), 1843(k), 1844(b), 1972(1), 3106, 3108, 3310, 3331-3351, 3907, and 3909.

- 2. In appendix A to part 225:
 - A. The three introductory paragraphs of section II, the first six paragraphs of section II.A.1, and the first seven paragraphs of section II.A.2. are revised and footnote 6 is removed and reserved;
 - B. In section II.B., a new paragraph (i)(c) is added, section II.B.1.b. and footnote 15 are revised, new sections II.B.1.c. through II.B.1.g. are added, and section II.B.4. is revised;
 - C. In section III.A., a new undesignated fourth paragraph is added at the end of the section;
 - D. In section III.B., paragraph 3 is revised and footnote 26 is removed, and in paragraph 4, footnote 27 is removed;
 - E. In section III.C., paragraphs 1 through 4, footnotes 28 through 42 are redesignated as footnotes 26 through 40, and paragraph 4 is revised;
 - F. In section III.D., the introductory paragraph and paragraph 1 are revised;
 - G. In sections III.D. and III.E., footnotes 50 and 52 are removed, footnote 51 is redesignated as footnote 47, footnotes 53 through 55 are redesignated as footnotes 48 through 50;
 - H. In sections IV.A. and IV.B., footnote 57 is removed and footnote 56 is redesignated as footnote 51; and
 - I. Attachment II is revised.

Appendix A To Part 225-Capital Adequacy Guidelines For Bank Holding Companies: Risk-Based Measure

* * * * *

II. ***

An institution's qualifying total capital consists of two types of capital components: "core capital elements" (comprising tier 1 capital) and "supplementary capital elements" (comprising tier 2 capital). These capital elements and the various limits, restrictions, and deductions to which they are subject, are discussed below and are set forth in Attachment II.

The Federal Reserve will, on a case-by-case basis, determine whether, and if so how much of, any instrument that does not fit wholly within the terms of one of the capital categories set forth below or that does not have an ability to absorb losses commensurate with the capital treatment otherwise specified below will be counted as an element of tier 1 or tier 2 capital. In making such a determination, the

Federal Reserve will consider the similarity of the instrument to instruments explicitly treated in the guidelines, the ability of the instrument to absorb losses while the institution operates as a going concern, the maturity and redemption features of the instrument, and other relevant terms and factors. To qualify as an element of tier 1 or tier 2 capital, a capital instrument may not contain or be covered by any covenants, terms, or restrictions that are inconsistent with safe and sound banking practices.

Redemptions of permanent equity or other capital instruments before stated maturity could have a significant impact on an organization's overall capital structure. Consequently, an organization considering such a step should consult with the Federal Reserve before redeeming any equity or debt capital instrument (prior to maturity) if such redemption could have a material effect on the level or composition of the organization's capital base.⁵

* * *

A. ***

- Core capital elements (tier 1 capital). The tier 1 component of an institution's qualifying capital must represent at least 50 percent of qualifying total capital and may consist of the following items that are defined as core capital elements:
 - (i) Common stockholders' equity;
 - (ii) Qualifying noncumulative perpetual preferred stock (including related surplus);
 - (iii) Qualifying cumulative perpetual preferred stock (including related surplus), subject to certain limitations described below; and
 - (iv) Minority interest in the equity accounts of consolidated subsidiaries.

Tier 1 capital is generally defined as the sum of core capital elements⁶ less goodwill, other intangible assets, and interest-only strips receivables that are required to be deducted in accordance with section II.B.1. of this appendix.

* * * * *

^{5.} Consultation would not ordinarily be necessary if an instrument were redeemed with the proceeds of, or replaced by, a like amount of a similar or higher quality capital instrument and the organization's capital position is considered fully adequate by the Federal Reserve. In the case of limited-life tier 2 instruments, consultation would generally be obviated if the new security is of equal or greater maturity than the one it replaces.

^{6. [}Reserved.]

Attachment II -- Summary of Definition of Qualifying Capital for State Member Banks*

Using the Year-End 1992 Standard

Components	Minimum Requirements
CORE CAPITAL (Tier 1)	Must equal or exceed 4% of weighted-risk assets
Common stockholders' equity	No limit
Qualifying noncumulative perpetual preferred stock	No limit; banks should avoid undue reliance on preferred stock in tier 1.
Minority interest in equity accounts of consolidated subsidiaries	Banks should avoid using minority interests to subsidiaries introduce elements not otherwise qualifying for tier 1 capital.
Less: Goodwill, other intangible assets, and credit- enhancing interest-only strips required to be deducted from capital ¹	
SUPPLEMENTARY CAPITAL (Tier 2)	Total of tier 2 is limited to 100% of tier 12
Allowance for loan and lease losses	Limited to 1.25% of weighted-risk assets ²
Perpetual preferred stock	No limit within tier 2
Hybrid capital instruments and equity contract notes	No limit within tier 2
Subordinated debt and intermediate-term preferred stock (original weighted average maturity of 5 years or more)	Subordinated debt and intermediate-term preferred stock are limited to 50% of tier 1, ² amortized for capital purposes as they approach maturity.
Revaluation reserves (equity and building)	Not included; banks encouraged to disclose; may be evaluated on a case-by-case basis for international comparisons; and taken into account in making an overall assessment of capital
DEDUCTIONS (from sum of tier 1 and tier 2)	
Investment in unconsolidated subsidiaries	As a general rule, one-half of the aggregate investments will be deducted from tier 1 capital and one-half from tier 2 capital. ³
Reciprocal holdings of banking organizations' capital securities	
Other deductions (such as other subsidiaries or joint ventures) as determined by supervisory authority	On a case-by-case basis or as a matter of policy after a formal rulemaking
TOTAL CAPITAL (tier 1 + tier 2 - deductions)	Must equal or exceed 8% or weighted-risk assets

Requirements for the deduction of other intangible assets and residual interests are set forth in section II.B.1. of this appendix.
 Amount in excess of limitations are permitted but do not qualify as capital.
 A proportionately greater amount may be deducted from tier 1 capital, if the risks associated with the subsidiary so warrant.

^{*} See discussion in section II of the guidelines for a complete description of the requirements for, and the limitations on, the components of qualifying capital.

2. Supplementary capital elements (tier 2 capital)

The tier 2 component of an institution's qualifying capital may consist of the following items that are defined as supplementary capital elements:

- (i) Allowance for loan and lease losses (subject to limitations discussed below):
- (ii) Perpetual preferred stock and related surplus (subject to conditions discussed below);
- (iii) Hybrid capital instruments (as defined below), perpetual debt, and mandatory convertible debt securities;
- (iv) Term subordinated debt and intermediate-term preferred stock, including related surplus (subject to limitations discussed below);
- (v) Unrealized holding gains on equity securities (subject to limitations discussed in section II.A.2.e. of this appendix).

The maximum amount of tier 2 capital that may be included in an institution's qualifying total capital is limited to 100 percent of tier 1 capital (net of goodwill, other intangible assets, and interest-only strips receivables that are required to be deducted in accordance with section II.B.1. of this appendix).

* * * * *

B. * * *

(i) * * *

(c) Certain credit-enhancing interest-only strips receivables - deducted from the sum of core capital elements in accordance with sections II.B.1.c. through e. of this appendix.

* * * * *

- Goodwill, other intangible assets, and residual interests. * * *
 - b. Other intangible interests.
 - i. All servicing assets, including servicing assets on assets other than mortgages (i.e., nonmortgage servicing assets), are included in this appendix as identifiable intangible assets. The only types of identifiable intangible assets that may be included in, that is, not deducted from, an organization's capital are readily marketable mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships. The total amount of these assets that may be included in

- capital is subject to the limitations described below in sections II.B.1.d. and e. of this appendix.
- ii. The treatment of identifiable intangible assets set forth in this section generally will be used in the calculation of a bank holding company's capital ratios for supervisory and applications purposes. However, in making an overall assessment of a bank holding company's capital adequacy for applications purposes, the Board may, if it deems appropriate, take into account the quality and composition of an organization's capital, together with the quality and value of its tangible and intangible assets.
- c. Credit-enhancing interest-only strips receivables (I/Os).
 - Credit-enhancing I/Os are on-balance sheet assets that, in form or in substance, represent a contractual right to receive some or all of the interest due on transferred assets and expose the bank holding company to credit risk directly or indirectly associated with transferred assets that exceeds a pro rata share of the bank holding company's claim on the assets, whether through subordination provisions or other credit enhancement techniques. Such I/Os, whether purchased or retained, including other similar "spread" assets, may be included in, that is, not deducted from, a bank holding company's capital subject to the limitations described below in sections II.B.1.d. and e. of this appendix.
 - ii. Both purchased and retained creditenhancing I/Os, on a non-tax adjusted basis, are included in the total amount that is used for purposes of determining whether a bank holding company exceeds the tier 1 limitation described below in this section. In determining whether an I/O or other types of spread assets serve as a credit enhancement, the Federal Reserve will look to the economic substance of the transaction.
- d. Fair value limitation. The amount of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that a bank holding company may include in capital shall be the lesser of 90 percent of their fair value, as determined in

accordance with section II.B.1.f. of this appendix, or 100 percent of their book value, as adjusted for capital purposes in accordance with the instructions to the Consolidated Financial Statements for Bank Holding Companies (FR Y-9C Report). The amount of credit-enhancing I/Os that a bank holding company may include in capital shall be its fair value. If both the application of the limits on mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships and the adjustment of the balance sheet amount for these assets would result in an amount being deducted from capital, the bank holding company would deduct only the greater of the two amounts from its core capital elements in determining tier 1 capital.

e. Tier 1 capital limitation.

- i. The total amount of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that may be included in capital, in the aggregate, cannot exceed 100 percent of tier 1 capital. Nonmortgage servicing assets and purchased credit card relationships are subject, in the aggregate, to a separate sublimit of 25 percent of tier 1 capital. In addition, the total amount of credit-enhancing I/Os (both purchased and retained) that may be included in capital cannot exceed 25 percent of tier 1 capital.¹⁵
- ii. For purposes of calculating these limitations on mortgage servicing assets, nonmortgage servicing assets, purchased credit card relationships, and credit-enhancing I/Os, tier 1 capital is defined as the sum of core capital elements, net of goodwill, and net of all identifiable intangible assets other than mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships, prior to the deduction of any disallowed mortgage servicing assets, any disal-

- lowed nonmortgage servicing assets, any disallowed purchased credit card relationships, any disallowed creditenhancing I/Os (both purchased and retained), and any disallowed deferred-tax assets, regardless of the date acquired.
- iii. Bank holding companies may elect to deduct disallowed mortgage servicing assets, disallowed nonmortgage servicing assets, and disallowed creditenhancing I/Os (both purchased and retained) on a basis that is net of any associated deferred tax liability. Deferred tax liabilities netted in this manner cannot also be netted against deferred-tax assets when determining the amount of deferred-tax assets that are dependent upon future taxable income.
- f. Valuation. Bank holding companies must review the book value of all intangible assets at least quarterly and make adjustments to these values as necessary. The fair value of mortgage servicing assets, nonmortgage servicing assets, purchased credit card relationships, and credit-enhancing I/Os also must be determined at least quarterly. This determination shall include adjustments for any significant changes in original valuation assumptions, including changes in prepayment estimates or account attrition rates. Examiners will review both the book value and the fair value assigned to these assets, together with supporting documentation, during the inspection process. In addition, the Federal Reserve may require, on a caseby-case basis, an independent valuation of a bank holding company's intangible assets or credit-enhancing I/Os.
- g. Growing organizations. Consistent with long-standing Board policy, banking organizations experiencing substantial growth, whether internally or by acquisition, are expected to maintain strong capital positions substantially above minimum supervisory levels, without significant reliance on intangible assets or credit-enhancing I/Os.

4. Deferred-tax assets.

a. The amount of deferred-tax assets that is dependent upon future taxable income, net of the valuation allowance for deferred-tax assets, that may be included in, that is, not deducted from, a bank holding company's capital may not exceed the lesser of:

^{15.} Amounts of servicing assets, purchased credit card relationships, and credit-enhancing I/Os (both retained and purchased) in excess of these limitations, as well as all other identifiable intangible assets, including core deposit intangibles and favorable leaseholds, are to be deducted from a bank holding company's core capital elements in determining tier 1 capital. However, identifiable intangible assets (other than mortgage servicing assets and purchased credit card relationships) acquired on or before February 19, 1992, generally will not be deducted from capital for supervisory purposes, although they will continue to be deducted for applications purposes.

- i. The amount of these deferred-tax assets that the bank holding company is expected to realize within one year of the calendar quarter-end date, based on its projections of future taxable income for that year.23 or
- 10 percent of tier 1 capital. ii.
- b. The reported amount of deferred-tax assets, net of any valuation allowance for deferredtax assets, in excess of the lesser of these two amounts is to be deducted from a banking organization's core capital elements in determining tier 1 capital. For purposes of calculating the 10 percent limitation, tier 1 capital is defined as the sum of core capital elements, net of goodwill and net of all identifiable intangible assets other than mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relationships, prior to the deduction of any disallowed mortgage servicing assets, any disallowed nonmortgage servicing assets, any disallowed purchased credit card relationships, any disallowed credit-enhancing I/Os, and any disallowed deferred-tax assets. There generally is no limit in tier 1 capital on the amount of deferred-tax assets that can be realized from taxes paid in prior carry-back years or from future reversals of existing taxable temporary differences.

III. * * * A. * * *

> The Federal Reserve will, on a case-by-case basis, determine the appropriate risk weight for any asset or credit equivalent amount of an off-balance sheet item that does not fit wholly within the terms of one of the risk weight categories set forth below or that imposes risks on a bank holding company that are incommensurate with the risk weight otherwise specified below for the asset or off-balance sheet item. In addition, the Federal Reserve will, on a case-by-case basis, determine the appropriate credit conversion

factor for any off-balance sheet item that does not fit wholly within the terms of one of the credit conversion factors set forth below or that imposes risks on a banking organization that are incommensurate with the credit conversion factors otherwise specified below for the off-balance sheet item. In making such a determination, the Federal Reserve will consider the similarity of the asset or off-balance sheet item to assets or off-balance sheet items explicitly treated in the guidelines, as well as other relevant factors.

B ***

- 3. Recourse obligations, direct credit substitutes, residual interests, and asset- and mortgagebacked securities. Direct credit substitutes, assets transferred with recourse, and securities issued in connection with asset securitizations and structured financings are treated as described below. The term "asset securitizations" or "securitizations" in this rule includes structured financings, as well as asset securitization transactions.
 - a. Definitions.
 - i. Credit derivative means a contract that allows one party (the "protection purchaser") to transfer the credit risk of an asset or off-balance sheet credit exposure to another party (the "protection provider"). The value of a credit derivative is dependent, at least in part, on the credit performance of the "reference asset."
 - ii. Credit-enhancing representations and warranties means representations and warranties that are made or assumed in connection with a transfer of assets (including loan servicing assets) and that obligate the bank holding company to protect investors from losses arising from credit risk in the assets transferred or the loans serviced. Credit-enhancing representations and warranties include promises to protect a party from losses resulting from the default or nonperformance of another party or from an insufficiency in the value of the collateral. Creditenhancing representations and warranties do not include:
 - 1. Early default clauses and similar warranties that permit the return of, or premium refund clauses covering, 1-4 family residential first mortgage loans that qualify for a 50 percent risk weight for a

^{23.} To determine the amount of expected deferred-tax assets realizable in the next 12 months, an institution should assume that all existing temporary differences fully reverse as of the report date. Projected future taxable income should not include net operating loss carry-forwards to be used during that year or the amount of existing temporary differences a bank holding company expects to reverse within the year. Such projections should include the estimated effect of tax-planning strategies that the organization expects to implement to realize net operating losses or tax-credit carry-forwards that would otherwise expire during the year. Institutions do not have to prepare a new 12-month projection each quarter. Rather, on interim report dates, institutions may use the future-taxable income projections for their current fiscal year, adjusted for any significant changes that have occurred or are expected to occur.

- period not to exceed 120 days from the date of transfer. These warranties may cover only those loans that were originated within 1 year of the date of transfer;
- Premium refund clauses that cover assets guaranteed, in whole or in part, by the U.S. Government, a U.S. Government agency or a government-sponsored enterprise, provided the premium refund clauses are for a period not to exceed 120 days from the date of transfer; or
- Warranties that permit the return of assets in instances of misrepresentation, fraud or incomplete documentation.
- iii. Direct credit substitute means an arrangement in which a bank holding company assumes, in form or in substance, credit risk associated with an on- or off-balance sheet credit exposure that was not previously owned by the bank holding company (thirdparty asset) and the risk assumed by the bank holding company exceeds the pro rata share of the bank holding company's interest in the third-party asset. If the bank holding company has no claim on the third-party asset, then the bank holding company's assumption of any credit risk with respect to the third- party asset is a direct credit substitute. Direct credit substitutes include, but are not limited to:
 - Financial standby letters of credit that support financial claims on a third party that exceed a bank holding company's pro rata share of losses in the financial claim;
 - Guarantees, surety arrangements, credit derivatives, and similar instruments backing financial claims that exceed a bank holding company's pro rata share in the financial claim;
 - Purchased subordinated interests or securities that absorb more than their *pro rata* share of losses from the underlying assets;
 - Credit derivative contracts under which the bank holding company assumes more than its pro rata

- share of credit risk on a third party exposure;
- Loans or lines of credit that provide credit enhancement for the financial obligations of an account party;
- 6. Purchased loan servicing assets if the servicer is responsible for credit losses or if the servicer makes or assumes creditenhancing representations and warranties with respect to the loans serviced. Mortgage servicer cash advances that meet the conditions of section III.B.3.a.viii. of this appendix are not direct credit substitutes; and
- 7. Clean-up calls on third party assets are direct credit substitutes. Clean-up calls that are 10 percent or less of the original pool balance that are exercisable at the option of the bank holding company are not direct credit substitutes.
- iv. Externally rated means that an instrument or obligation has received a credit rating from a nationallyrecognized statistical rating organization.
- v. Face amount means the notional principal, or face value, amount of an off-balance sheet item; the amortized cost of an asset not held for trading purposes; and the fair value of a trading asset.
- vi. Financial asset means cash or other monetary instrument, evidence of debt, evidence of an ownership interest in an entity, or a contract that conveys a right to receive or exchange cash or another financial instrument from another party.
- vii. Financial standby letter of credit means a letter of credit or similar arrangement that represents an irrevocable obligation to a third-party beneficiary:
 - To repay money borrowed by, or advanced to, or for the account of, a second party (the account party), or
 - 2. To make payment on behalf of the account party, in the event that the account party fails to ful-

fill its obligation to the beneficiary.

- viii. Mortgage servicer cash advance means funds that a residential mortgage loan servicer advances to ensure an uninterrupted flow of payments, including advances made to cover foreclosure costs or other expenses to facilitate the timely collection of the loan. A mortgage servicer cash advance is not a recourse obligation or a direct credit substitute if:
 - The servicer is entitled to full reimbursement and this right is not subordinated to other claims on the cash flows from the underlying asset pool; or
 - For any one loan, the servicer's obligation to make nonreimbursable advances is contractually limited to an insignificant amount of the outstanding principal balance of that loan.
- ix. Nationally recognized statistical rating organization (NRSRO) means an
 entity recognized by the Division of
 Market Regulation of the Securities
 and Exchange Commission (or any
 successor Division) (Commission) as
 a nationally recognized statistical rating organization for various purposes,
 including the Commission's uniform
 net capital requirements for brokers
 and dealers.
- Recourse means the retention, by a X. bank holding company, in form or in substance, of any credit risk directly or indirectly associated with an asset it has transferred and sold that exceeds a pro rata share of the banking organization's claim on the asset. If a banking organization has no claim on a transferred asset, then the retention of any risk of credit loss is recourse. A recourse obligation typically arises when a bank holding company transfers assets and retains an explicit obligation to repurchase the assets or absorb losses due to a default on the payment of principal or interest or any other deficiency in the performance of the underlying obligor or some other party. Recourse may also exist implicitly if a bank holding company provides credit enhancement beyond any contractual obligation to

- support assets it has sold. The following are examples of recourse arrangements:
- Credit-enhancing representations and warranties made on the transferred assets:
- Loan servicing assets retained pursuant to an agreement under which the bank holding company will be responsible for credit losses associated with the loans being serviced. Mortgage servicer cash advances that meet the conditions of section III.B.3.a.viii. of this appendix are not recourse arrangements;
- Retained subordinated interests that absorb more than their pro rata share of losses from the underlying assets;
- 4. Assets sold under an agreement to repurchase, if the assets are not already included on the balance sheet:
- 5. Loan strips sold without contractual recourse where the maturity of the transferred loan is shorter than the maturity of the commitment under which the loan is drawn;
- Credit derivatives issued that absorb more than the bank holding company's pro rata share of losses from the transferred assets;
- 7. Clean-up calls at inception that are greater than 10 percent of the balance of the original pool of transferred loans. Clean-up calls that are 10 percent or less of the original pool balance that are exercisable at the option of the bank holding company are not recourse arrangements.
- xi. Residual interest means any onbalance sheet asset that represents an interest (including a beneficial interest) created by a transfer that qualifies as a sale (in accordance with generally accepted accounting principles) of financial assets, whether through a securitization or otherwise, and that exposes the bank holding company to credit risk directly or indirectly associated with the transferred assets that exceeds a pro rata share of the bank

holding company's claim on the assets, whether through subordination provisions or other credit enhancement techniques. Residual interests generally include credit-enhancing I/Os, spread accounts, cash collateral accounts, retained subordinated interother forms of overcollateralization, and similar assets that function as a credit enhancement. Residual interests further include those exposures that, in substance, cause the bank holding company to retain the credit risk of an asset or exposure that had qualified as a residual interest before it was sold. Residual interests generally do not include interests purchased from a third party, purchased except that creditenhancing I/Os are residual interests for purposes of this appendix.

- xii. Risk participation means a participation in which the originating party remains liable to the beneficiary for the full amount of an obligation (e.g., a direct credit substitute) notwithstanding that another party has acquired a participation in that obligation.
- xiii. Securitization means the pooling and repackaging by a special purpose entity of assets or other credit exposures into securities that can be sold to investors. Securitization includes transactions that create stratified credit risk positions whose performance is dependent upon an underlying pool of credit exposures, including loans and commitments.
- xiv. Structured finance program means a program where receivable interests and asset-backed securities issued by multiple participants are purchased by a special purpose entity that repackages those exposures into securities that can be sold to investors. Structured finance programs allocate credit risks, generally, between the participants and credit enhancement provided to the program.
- xv. Traded position means a position that is externally rated, and is retained, assumed, or issued in connection with an asset securitization, where there is a reasonable expectation that, in the near future, the rating will be relied

- upon by unaffiliated investors to purchase the position; or an unaffiliated third party to enter into a transaction involving the position, such as a purchase, loan, or repurchase agreement.
- b. Credit equivalent amounts and risk weight of recourse obligations and direct credit substitutes.
 - i. Credit equivalent amount. Except as otherwise provided in sections III.B.3.c. through f. and III.B.5. of this appendix, the credit-equivalent amount for a recourse obligation or direct credit substitute is the full amount of the credit-enhanced assets for which the bank holding company directly or indirectly retains or assumes credit risk multiplied by a 100 percent conversion factor.
 - ii. Risk-weight factor. To determine the bank holding company's risk-weight factor for off-balance sheet recourse obligations and direct credit substitutes, the credit equivalent amount is assigned to the risk category appropriate to the obligor in the underlying transaction, after considering any associated guarantees or collateral. For a direct credit substitute that is an on-balance sheet asset (e.g., a purchased subordinated security), a bank holding company must calculate riskweighted assets using the amount of the direct credit substitute and the full amount of the assets it supports, i.e., all the more senior positions in the structure. The treatment of direct credit substitutes that have been syndicated or in which risk participations have been conveyed or acquired is set forth in section III.D.1 of this appen-
- c. Externally-rated positions: credit-equivalent amounts and risk weights of recourse obligations, direct credit substitutes, residual interests, and asset- and mortgagebacked securities (including asset-backed commercial paper).
 - i. Traded positions. With respect to a recourse obligation, direct credit substitute, residual interest (other than a credit-enhancing I/Ostrip) or assetand mortgage-backed security (including asset-backed commercial paper) that is a traded position and that has received an external rating on a

long-term position that is one grade below investment grade or better or a short-term rating that is investment grade, the bank holding company may multiply the face amount of the position by the appropriate risk weight, determined in accordance with the tables below. Stripped mortgagebacked securities and other similar instruments, such as interest-only or principal-only strips that are not credit enhancements, must be assigned to the 100 percent risk category. If a traded position has received more than one external rating, the lowest single rating will apply.

Long-term Rating Category	Examples	Risk Weight
Highest or second highest investment grade	AAA, AA	20 percent
Third highest investment grade Lowest investment grade One category below investment grade	A BBB BB	50 percent 100 percent 200 percent
Short-term Rating	Examples	Risk Weight
Highest investment grade	A-1, P-1	20 percent
Second highest investment grade Lowest investment grade	A-2, P-2 A-3, P-3	50 percent 100 percent

- ii. Non-traded positions. A recourse obligation, direct credit substitute, or residual interest (but not a creditenhancing I/O strip) extended in connection with a securitization that is not a traded position may be assigned a risk weight in accordance with section III.B.3.c.i.of this appendix if:
 - It has been externally rated by more than one NRSRO;
 - It has received an external rating on a long-term position that is one grade below investment grade or better or on a short-term position that is investment grade by all NRSROs providing a rating;
- The ratings are publicly available; and
 The ratings are based on the same criteria used to rate traded positions. If the ratings are different, the lowest rating will determine the risk category to which the recourse obligation, direct credit substitute, or residual interest will be assigned.

- d. Senior positions not externally rated. For a recourse obligation, direct credit substitute, residual interest, or asset- or mortgagebacked security that is not externally rated but is senior or preferred in all features to a traded position (including collateralization and maturity), a bank holding company may apply a risk weight to the face amount of the senior position in accordance with section III.B.3.c.i. of this appendix, based on the traded position, subject to any current or prospective supervisory guidance and the bank holding company satisfying the Federal Reserve that this treatment is appropriate. This section will apply only if the traded subordinated position provides substantive credit support to the unrated position until the unrated position matures.
- e. Capital requirement for residual interests.
 - Capital requirement for creditenhancing I/O strips. After applying the concentration limit to creditenhancing I/O strips (both purchased and retained) in accordance with sections II.B.2.c. through e. of this appendix, a bank holding company must maintain risk-based capital for a credit-enhancing I/O strip (both purchased and retained), regardless of the external rating on that position, equal to the remaining amount of the creditenhancing I/O (net of any existing associated deferred tax liability), even if the amount of risk-based capital required to be maintained exceeds the full risk-based capital requirement for the assets transferred. Transactions that, in substance, result in the retention of credit risk associated with a transferred credit-enhancing I/O strip will be treated as if the creditenhancing I/O strip was retained by the bank holding company and not transferred.
 - ii. Capital requirements for other residual interest.
 - If a residual interest does not meet the requirements of sections III.B.3.c. or d. of this appendix, a bank holding must maintain riskbased capital equal to the remaining amount of the residual interest that is retained on the balance sheet (net of any existing associated deferred tax liability), even if the amount of risk-based capital required to be maintained exceeds the full risk-based capital requirement for the assets transferred.

- Transactions that, in substance, result in the retention of credit risk associated with a transferred residual interest will be treated as if the residual interest was retained by the bank holding company and not transferred.
- 2. Where the aggregate capital requirement for residual interests and other recourse obligations in connection with the same transfer of assets exceed the full risk-based capital requirement for those assets, a bank holding company must maintain risk-based capital equal to the greater of the risk-based capital requirement for the residual interest as calculated under section III.B.3.e.ii. 1. of this appendix or the full risk-based capital requirement for the assets transferred.
- f. Positions that are not rated by an NRSRO.

 A position (but not a residual interest) maintained in connection with a securitization and that is not rated by a NRSRO may be risk-weighted based on the bank holding company's determination of the credit rating of the position, as specified in the table below, multiplied by the face amount of the position. In order to obtain this treatment, the bank holding company's system for determining the credit rating of the position must meet one of the three alternative standards set out in sections III.B.3.f.i. through III.B.3.f.iii. of this appendix.

Rating Category	Examples	Risk Weight
Highest or second highest investment grade	AAA,AA	100 percent
Third highet investment grade Lowest investment grade One category below investment grade	A BBB BB	100 percent 100 percent 200 percent

i. Internal risk rating used for assetbacked program. A direct credit substitute (other than a purchased creditenhancing I/O) is assumed in connection with an asset-backed commercial paper program sponsored by the bank holding company and the bank holding company is able to demonstrate to the satisfaction of the Federal Reserve, prior to relying upon its use, that the bank holding company's internal credit risk rating system is adequate. Adequate internal credit risk rating systems usually contain the following criteria:

- The internal credit risk system is an integral part of the bank holding company's risk management system, which explicitly incorporates the full range of risks arising from a bank holding company's participation in securitization activities;
- Internal credit ratings are linked to measurable outcomes, such as the probability that the position will experience any loss, the position's expected loss given default, and the degree of variance in losses given default on that position:
- 3. The bank holding company's internal credit risk system must separately consider the risk associated with the underlying loans or borrowers, and the risk associated with the structure of a particular securitization transaction;
- The bank holding company's internal credit risk system must identify gradations of risk among "pass" assets and other risk positions;
- The bank holding company must have clear, explicit criteria that are used to classify assets into each internal risk grade, including subjective factors;
- The bank holding company must have independent credit risk management or loan review personnel assigning or reviewing the credit risk ratings;
- The bank holding company must have an internal audit procedure that periodically verifies that the internal credit risk ratings are assigned in accordance with the established criteria;
- 8. The bank holding company must monitor the performance of the internal credit risk ratings assigned to nonrated, nontraded direct credit substitutes over time to determine the appropriateness of the initial credit risk rating assignment and adjust individual credit risk ratings, or the overall internal credit risk ratings system, as needed; and
- The internal credit risk system must make credit risk rating assumptions that are consistent with, or more conservative than,

the credit risk rating assumptions and methodologies of NRSROs.

- ii. Program Ratings. A direct credit substitute or recourse obligation (other than a residual interest) is assumed or retained in connection with a structured finance program and a NRSRO has reviewed the terms of the program and stated a rating for positions associated with the program. If the program has options for different combinations of assets, standards, internal credit enhancements and other relevant factors, and the NRSRO specifies ranges of rating categories to them, the bank holding company may apply the rating category that corresponds to the bank holding company's position. In order to rely on a program rating, the bank holding company must demonstrate to the Federal Reserve's satisfaction that the credit risk rating assigned to the program meets the same standards generally used by NRSROs for rating traded positions. The bank holding company must also demonstrate to the Federal Reserve's satisfaction that the criteria underlying the NRSRO's assignment of ratings for the program are satisfied for the particular position. If a bank holding company participates in a securitization sponsored by another party, the Federal Reserve may authorize the bank holding company to use this approach based on a programmatic rating obtained by the sponsor of the program.
- iii. Computer Program. The bank holding company is using an acceptable credit assessment computer program to determine the rating of a direct credit substitute or recourse obligation (but not residual interest) issued in connection with a structured finance program. A NRSRO must have developed the computer program, and the bank holding company must demonstrate to the Federal Reserve's satisfaction that ratings under the program correspond credibly and reliably with the rating of traded positions.
- g. Limitations on risk-based capital requirements.
 - Low-level exposure. If the maximum contractual exposure to loss retained or assumed by a bank holding company in connection with a recourse obligation or a direct credit substitute

- is less than the effective risk-based capital requirement for the enhanced assets, the risk-based capital requirement is limited to the maximum contractual exposure, less any liability account established in accordance with generally accepted accounting principles. This limitation does not apply when a bank holding company provides credit enhancement beyond any contractual obligation to support assets it has sold.
- Mortgage-related securities or participation certificates retained in a mortgage loan swap. If a bank holding company holds a mortgage-related security or a participation certificate as a result of a mortgage loan swap with recourse, capital is required to support the recourse obligation plus the percentage of the mortgage-related security or participation certificate that is not covered by the recourse obligation. The total amount of capital required for the on-balance sheet asset and the recourse obligation, however, is limited to the capital requirement for the underlying loans, calculated as if the organization continued to hold these loans as on-balance sheet assets.
- Related on-balance sheet assets. If a iii. recourse obligation or direct credit substitute subject to section III.B.3. of this appendix also appears as a balance sheet asset, the balance sheet asset is not included in an organization's risk-weighted assets to the extent the value of the balance sheet asset is already included in the offbalance sheet credit equivalent amount for the recourse obligation or direct credit substitute, except in the case of loan servicing assets and similar arrangements with embedded recourse obligations or direct credit substitutes. In that case, both the onbalance sheet assets and the related recourse obligations and direct credit substitutes are incorporated into the risk-based capital calculation.

C. * * *

- 4. Category 4: 100 percent.
 - a. All assets not included in the categories above are assigned to this category, which comprises standard risk assets. The bulk of the assets typically found in a loan portfolio

- would be assigned to the 100 percent category.
- This category includes long-term claims on, and the portions of long-term claims that are guaranteed by, non-OECD banks, and all claims on non-OECD central governments that entail some degree of transfer risk.39 This category includes all claims on foreign and domestic private-sector obligors not included in the categories above (including loans to nondepository financial institutions and bank holding companies); claims on commercial firms owned by the public sector; customer liabilities to the organization on acceptances outstanding involving standard risk claims;40 investments in fixed assets, premises, and other real estate owned; common and preferred stock of corporations, including stock acquired for debts previously contracted; all stripped mortgage-backed securities and similar instruments; and commercial and consumer loans (except those assigned to lower risk categories due to recognized guarantees or collateral and loans secured by residential property that qualify for a lower risk weight).
- c. Also included in this category are industrial-development bonds and similar obligations issued under the auspices of states or political subdivisions of the OECD-based group of countries for the benefit of a private party or enterprise where that party or enterprise, not the government entity, is obligated to pay the principal and interest, and all obligations of states or political subdivisions of countries that do not belong to the OECD-based group.
- d. The following assets also are assigned a risk weight of 100 percent if they have not been deducted from capital: investments in unconsolidated companies, joint ventures, or associated companies; instruments that qualify as capital issued by other banking

organizations; and any intangibles, including those that may have been grandfathered into capital.

* * * * *

D. * * *

The face amount of an off-balance sheet item is generally incorporated into risk-weighted assets in two steps. The face amount is first multiplied by a credit conversion factor, except for direct credit substitutes and recourse obligations as discussed in section III.D.1. of this appendix. The resultant credit equivalent amount is assigned to the appropriate risk category according to the obligor or, if relevant, the guarantor or the nature of the collateral.⁴¹ Attachment IV to this appendix A sets forth the conversion factors for various types of off-balance sheet items.

- 1. Items with a 100 percent conversion factor.
 - a. Except as otherwise provided in section III.B.3. of this appendix, the full amount of an asset or transaction supported, in whole or in part, by a direct credit substitute or a recourse obligation. Direct credit substitutes and recourse obligations are defined in section III.B.3. of this appendix.
 - b. Sale and repurchase agreements and forward agreements. Forward agreements are legally binding contractual obligations to purchase assets with certain drawdown at a specified future date. Such obligations include forward purchases, forward forward deposits placed,⁴² and partly-paid shares and securities; they do not include commitments to make residential mortgage loans or forward foreign exchange contracts.
 - c. Securities lent by a banking organization are treated in one of two ways, depending upon whether the lender is at risk of loss. If a banking organization, as agent for a customer, lends the customer's securities and does not indemnify the customer against loss, then the transaction is excluded from the risk-based capital calculation. If, alternatively, a banking organization lends its own securities or, acting as agent for a customer, lends the customer's securities and indemnifies the customer against loss, the transaction is converted at 100 percent and assigned to the risk weight category appropriate to the obligor, or, if applicable, to any collateral deliv-

^{39.} Such assets include all nonlocal currency claims on, and the portions of claims that are guaranteed by, non-OECD central governments and those portions of local currency claims on, or guaranteed by, non-OECD central governments that exceed the local currency liabilities held by subsidiary depository institutions.

^{40.} Customer liabilities on acceptances outstanding involving nonstandard risk claims, such as claims on U.S. depository institutions, are assigned to the risk category appropriate to the identity of the obligor or, if relevant, the nature of the collateral or guarantees backing the claims. Portions of acceptances conveyed as risk participations to U.S. depository institutions or foreign banks are assigned to the 20 percent risk category appropriate to short-term claims guaranteed by U.S. depository institutions and foreign banks.

^{41.} The sufficiency of collateral and guarantees for off-balance-sheet items is determined by the market value of the collateral or the amount of the guarantee in relation to the face amount of the item, except for derivative contracts, for which this determination is generally made in relation to the credit equivalent amount. Collateral and guarantees are subject to the same provisions noted under section III.B. of this appendix A.

^{42.} Forward forward deposits accepted are treated as interest rate contracts.

ered to the lending organization, or the independent custodian acting on the lending organization's behalf. Where a banking organization is acting as agent for a customer in a transaction involving the lending or sale of securities that is collateralized by cash delivered to the banking organization, the transaction is deemed to be collateralized by cash on deposit in a subsidiary depository institution for purposes of determining the appropriate risk-weight category, provided that any indemnification is limited to no more than the difference between the market value of the securities and the cash collateral received and any reinvestment risk associated with that cash collateral is borne by the customer.

- In the case of direct credit substitutes in which a risk participation⁴³ has been conveyed, the full amount of the assets that are supported, in whole or in part, by the credit enhancement are converted to a credit equivalent amount at 100 percent. However, the pro rata share of the credit equivalent amount that has been conveyed through a risk participation is assigned to whichever risk category is lower: the risk category appropriate to the obligor, after considering any relevant guarantees or collateral, or the risk category appropriate to the institution acquiring the participation.⁴⁴ Any remainder is assigned to the risk category appropriate to the obligor, guarantor, or collateral. For example, the pro rata share of the full amount of the assets supported, in whole or in part, by a direct credit substitute conveyed as a risk participation to a U.S. domestic depository institution or foreign bank is assigned to the 20 percent risk category.45
- e. In the case of direct credit substitutes in which a risk participation has been acquired, the acquiring banking organization's percentage share of the direct credit substitute is multiplied by the full amount of the assets that are supported, in whole or in part, by the credit enhancement and converted to a credit equivalent amount at 100 percent. The credit equivalent amount of an acquisition of a risk participation in a direct credit substitute is assigned to the risk category

- f. In the case of direct credit substitutes that take the form of a syndication where each banking organization is obligated only for its *pro rata* share of the risk and there is no recourse to the originating banking organization, each banking organization will only include its *pro rata* share of the assets supported, in whole or in part, by the direct credit substitute in its risk-based capital calculation.⁴⁶
- 3. In Appendix D to part 225, section II.b. is revised to read as follows:

Appendix D To Part 225—Capital Adequacy Guidelines For Bank Holding Companies: Tier 1 Leverage Measure

II. * * *

b. A banking organization's tier 1 leverage ratio is calculated by dividing its tier 1 capital (the numerator of the ratio) by its average total consolidated assets (the denominator of the ratio). The ratio will also be calculated using period-end assets whenever necessary, on a case-by-case basis. For the purpose of this leverage ratio, the definition of tier 1 capital as set forth in the risk-based capital guidelines contained in appendix A of this part will be used.3 As a general matter, average total consolidated assets are defined as the quarterly average total assets (defined net of the allowance for loan and lease losses) reported on the organization's Consolidated Financial Statements (FR Y-9C Report), less goodwill; amounts of mortgage servicing assets, nonmortgage servicing assets, and purchased credit card relation-

appropriate to the account party obligor or, if relevant, the nature of the collateral or guarantees

^{43.} That is, a participation in which the originating banking organization remains liable to the beneficiary for the full amount of the direct credit substitute if the party that has acquired the participation fails to pay when the instrument is drawn.

^{44.} A risk participation in bankers acceptances conveyed to other institutions is also assigned to the risk category appropriate to the institution acquiring the participation or, if relevant, the guarantor or nature of the collateral.

^{45.} Risk participations with a remaining maturity of over one year that are conveyed to non-OECD banks are to be assigned to the 100 percent risk category, unless a lower risk category is appropriate to the obligor, guarantor, or collateral.

^{46.} For example, if a banking organization has a 10 percent share of a \$10 syndicated direct credit substitute that provides credit support to a \$100 loan, then the banking organization's \$1 pro rata share in the enhancement means that a \$10 pro rata share of the loan is included in risk weighted assets.

^{3.} Tier 1 capital for banking organizations includes common equity, minority interest in the equity accounts of consolidated subsidiaries, qualifying noncumulative perpetual preferred stock, and qualifying cumulative perpetual preferred stock. (Cumulative perpetual preferred stock is limited to 25 percent of tier 1 capital.) In addition, as a general matter, tier 1 capital excludes goodwill; amounts of mortage servicing assets, nonmortgage servicing assets, and purchased credit card relationships that, in the aggregate, exceed 100 percent of tier 1 capital; amounts of nonmortgage servicing assets and purchased credit card relationships that, in the aggregate, exceed 25 percent of tier 1 capital; amounts of credit-enhancing interest-only strips that are in excess of 25 percent of tier 1capital; all other identifiable intangible assets; and deferred tax assets that are dependent upon future taxable income, net of their valuation allowance, in excess of certain limitations. The Federal Reserve may exclude certain investments in subsidiaries or associated companies as appropriate.

ships, that, in the aggregate, are in excess of 100 percent of tier 1 capital; amounts of nonmortgage servicing assets, and purchased credit card relationships that, in the aggregate, are in excess of 25 percent of tier 1 capital; the amounts of creditenhancing interest-only strips that are in excess of 25 percent of tier 1 capital; all other identifiable intangible assets; any investments in subsidiaries or associated companies that the Federal Reserve determines should be deducted from tier 1 capital; and deferred tax assets that are dependent upon future taxable income, net of their valuation allowance, in excess of the limitation set forth in section II.B.4. of appendix A of this part.⁴

ORDERS ISSUED UNDER BANK HOLDING COMPANY ACT

Orders Issued Under Section 3 of the Bank Holding Company Act

The Royal Bank of Scotland Group plc Edinburgh, Scotland

The Royal Bank of Scotland plc Edinburgh, Scotland

RBSG International Holdings Ltd. Edinburgh, Scotland

Citizens Financial Group, Inc. Providence, Rhode Island

Order Approving the Acquisition of Banks

The Royal Bank of Scotland Group plc ("RBS Group"), The Royal Bank of Scotland plc ("RBS"), RBSG International Holdings Ltd., and Citizens Financial Group, Inc. ("Citizens") (collectively, "Applicants"), have requested the Board's approval under section 3 of the Bank Holding Company Act ("BHC Act") (12 U.S.C. § 1842) to acquire all the voting shares of Citizens Bank of Pennsylvania, Philadelphia, Pennsylvania ("Citizens PA"), and Citizens Bank, Wilmington, Delaware ("Citizens DE"), both in formation. Citizens PA and Citizens DE are being formed to acquire 345 of the Mid-Atlantic retail branches of banks controlled by Mellon Financial Corporation, Pittsburgh, Pennsylvania ("Mellon"), and certain other business operations of Mellon. The proposed acquisition of the branches

and other operations of Mellon are subject to review by the FDIC under the Bank Merger Act (12 U.S.C. § 1828(c)).² The FDIC has completed its review under the Act and has approved the transaction after reviewing essentially the same factors that the Board is required to review under the BHC Act.³

Notice of the proposal, affording interested persons an opportunity to submit comments, has been published (66 Federal Register 45,588 (2001)). The time for filing comments has expired, and the Board has considered the proposal and all comments received in light of the factors set forth in section 3 of the BHC Act.

RBS Group, with total consolidated assets equivalent to approximately \$479.9 billion is the 18th largest banking organization in the world.⁴ Citizens, with total consolidated assets of \$32.3 billion, is the 32nd largest commercial banking organization in the United States.⁵ Citizens operates subsidiary depository institutions in Rhode Island, Massachusetts, Connecticut, and New Hampshire that control approximately \$23.3 billion in deposits, representing less than 1 percent of total deposits in insured depository institutions in the United States ("total U.S. insured deposits").⁶

Mellon operates subsidiary depository institutions in California, Delaware, Florida, Massachusetts, New Jersey, and Pennsylvania that control approximately \$29 billion in deposits, representing less than 1 percent of total U.S. insured deposits. The branches of Mellon to be acquired by Citizens are in Pennsylvania, Delaware, Maryland, and New Jersey and control deposits of approximately \$13.4 billion.⁷ On consummation of this proposal, Citi-

- 4. Foreign asset and ranking data are as of June 30, 2001.
- 5. Asset and domestic ranking data are as of June 30, 2001.
- 6. Deposit data are as of June 30, 2001, unless otherwise noted.

^{4.} Deductions from tier 1 capital and other adjustments are discussed more fully in section II.B. of appendix A of this part.

^{1.} Applicants propose to form Citizens PA as a Pennsylvania-chartered savings bank and Citizens DE as a Delaware-chartered bank, both of which would be insured and supervised by the Federal Deposit Insurance Corporation ("FDIC").

^{2.} Through the proposed purchase-and-assumption transaction, Citizens PA would acquire 321 retail branches in Pennsylvania, New Jersey, and Maryland from Mellon Bank, N.A., Pittsburgh, Pennsylvania ("Mellon Bank"), and Citizens DE would acquire 19 retail branches in Delaware from Mellon Bank (DE) National Association, Wilmington, Delaware ("Mellon DE"), together with certain related assets and liabilities. Citizens PA also would acquire five additional branch buildings in Pennsylvania from Mellon Bank, but not the deposits or loans of these branches. In addition, Mellon would transfer to Citizens PA and Citizens DE its automatic teller machine network and the consumer lending, lower middle-market commercial lending, and automobile dealer floor plan lending operations of Mellon Bank and Mellon DE. Mellon also would transfer its interests in certain insurance brokerage and agency-related activities to Citizens PA and Citizens' subsidiary bank, Citizens Bank of Rhode Island, Providence, Rhode Island, which also is supervised by the FDIC.

^{3.} The FDIC also has granted deposit insurance to Citizens PA and Citizens DE under the Federal Deposit Insurance Act (12 U.S.C. § 1815), and each relevant state banking regulatory authority has approved the proposal under applicable state laws.

^{7.} Under the proposal, Citizens would acquire assets from Mellon totaling approximately \$11 billion. Citizens PA would acquire 315 branches in Pennsylvania that control deposits of approximately \$12.8 billion, representing approximately 11.9 percent of the total deposits of insured depository institutions in the state ("state deposits"); and four branches in New Jersey that control deposits of approximately \$114.2 million, representing less than 1 percent of state deposits. In addition, Citizens PA would acquire two branches from Mellon in Maryland that control deposits of approximately \$50 mil-

zens, with total consolidated assets of \$48.9 billion, would become the 22nd largest commercial banking organization in the United States, controlling deposits of approximately \$36.7 billion, representing approximately 1.1 percent of total U.S. insured deposits.8

Factors Governing Board Review of Bank Acquisition

The BHC Act sets forth the factors that the Board must consider when reviewing the formation of bank holding companies or the acquisition of banks. These factors are the competitive effects of the proposal in the relevant geographic markets; the convenience and needs of the community to be served, including the records of performance of the insured depository institutions involved in the transaction under the Community Reinvestment Act ("CRA");9 the financial and managerial resources and future prospects of the companies and banks involved in the proposal; the availability of information needed to determine and enforce compliance with the BHC Act and other applicable federal banking laws; and, in the case of applications involving a foreign bank such as RBS, whether the foreign bank is subject to comprehensive supervision and regulation on a consolidated basis by its home country supervisor. 10 The Board also must consider the concentration of deposits in the nation and relevant individual states as well as compliance with other provisions of section 3(d) of the BHC Act in reviewing proposed interstate acquisi-

The Board has considered these factors in light of a record that includes information provided by Applicants, confidential supervisory and examination information, publicly reported financial and other information, and public comments submitted on the proposal. The Board also has consulted with and considered information collected from the primary home country supervisor of RBS Group and various federal and state supervisory agencies, including the FDIC, the Pennsylvania Department of Banking, and the State of Delaware Office of the State Bank Commissioner.

Interstate Analysis

Section 3(d) of the BHC Act allows the Board to approve an application by a bank holding company to acquire control of a bank located in a state other than the home state of such bank holding company if certain conditions are met. For purposes of the BHC Act, the home state of Applicants is Rhode Island, and Applicants would acquire banks in Pennsylvania, New Jersey, Maryland, and Delaware.¹² All the conditions for an interstate acquisition enumerated in section 3(d) are met in this case.¹³ In view of all the facts of record, the Board is permitted to approve the proposal under section 3(d) of the BHC Act.

Competitive Considerations

Section 3 of the BHC Act prohibits the Board from approving a proposal that would result in a monopoly or be in furtherance of a monopoly. The BHC Act also prohibits the Board from approving a proposal that would substantially lessen competition in any relevant banking market unless the anticompetitive effects of the proposal in that banking market are clearly outweighed in the public interest by the probable effects of the proposal in meeting the convenience and needs of the community to be served.14

The subsidiary depository institutions of Citizens and Mellon currently do not compete directly in any banking market where the Mellon branches to be acquired are located, and the number of competitors in the relevant banking markets would remain unchanged or increase after consummation of the proposal. Accordingly, based on all the facts of record, the Board concludes that consummation of the proposal would not have a significantly adverse effect on competition or on the concentration of banking resources in any relevant banking market, and that competitive considerations are consistent with approval.

Convenience and Needs Considerations

In acting on a proposal under section 3 of the BHC Act, the Board is required to consider the effects of the proposal on the convenience and needs of the communities to be served and to take into account the records of the relevant insured depository institutions under the CRA. The CRA requires the federal financial supervisory agencies to encourage financial institutions to help meet the credit needs of local communities in which they operate, consistent with safe and sound operation, and requires the appropriate federal financial supervisory agency to take into account an institution's record of meeting the credit needs of its entire

lion, as of March 31, 2001. The branches in Maryland did not begin accepting deposits until September 1999. Citizens DE would acquire 19 branches in Delaware that control deposits of approximately \$392 million, representing less than 1 percent of state deposits. State deposits data in this footnote are as of June 30, 2000.

^{8.} Mellon would retain four branches in Pennsylvania, one branch in Maryland, one branch in Delaware, and no branches in New Jersey. The deposits to be retained by Mellon in Pennsylvania, Maryland, and Delaware would represent less than 1 percent of total state deposits in each of these states.

^{9. 12} U.S.C. § 2901 et seq. 10. See 12 U.S.C. § 1842(c).

^{11.} See 12 U.S.C. § 1842(d).

^{12.} For purposes of section 3(d), the Board considers a bank to be located in the states in which the bank is chartered or headquartered or operates a branch.

^{13.} See 12 U.S.C. §§ 1842(d)(1)(A) and (B), 1842(d)(2)(A) and (B). Applicants meet the capital and managerial requirements established under applicable law. In addition, Applicants would control less than 10 percent of the total amount of deposits of insured depository institutions in the United States and would not exceed the deposit limits with respect to any state. The laws of Pennsylvania, New Jersey, and Maryland do not impose a minimum age requirement on banks to be acquired, and Delaware law does not impose such a requirement on banks chartered after September 29, 1995. All other requirements under section 3(d) of the BHC Act are met in this case.

^{14.} See 12 U.S.C. § 1842(c)(1).

Attachment II -- Summary of Definition of Qualifying Capital for Bank Holding Companies*

Using the Year-End 1992 Standard

Components	Minimum Requirements
CORE CAPITAL (Tier 1)	Must equal or exceed 4% of weighted-risk assets
Common stockholders' equity	No limit
Qualifying noncumulative perpetual preferred stock	No limit, banks should avoid undue reliance on preferred stock in tier 1.
Qualifying cumulative preferred stock	Limited to 25% of the sum of common stock, qualifying perpetual preferred stock, and minority interests.
Minority interest in equity accounts of consolidated subsidiaries	Banks should avoid using minority interests to subsidiaries introduce elements not otherwise qualifying for tier 1 capital.
Less: Goodwill, other intangible assets, and credit- enhancing interest-only strips required to be deducted from capital ¹	
SUPPLEMENTARY CAPITAL (Tier 2)	Total of tier 2 is limited to 100% of tier 1 ²
Allowance for loan and lease losses	Limited to 1.25% of weighted-risk assets ²
Perpetual preferred stock	No limit within tier 2
Hybrid instruments, perpetual debt and mandatory convertible securities	No limit within tier 2
Subordinated debt and intermediate-term preferred stock (original weighted average maturity of 5 years or more)	Subordinated debt and intermediate-term preferred stock are limited to 50% of tier 1, ² amortized for capital purposes as they approach maturity.
Revaluation reserves (equity and building)	Not included; banks encouraged to disclose; may be evaluated on a case-by-case basis for international comparisons; and taken into account in making an overall assessment of capital
DEDUCTIONS (from sum of tier 1 and tier 2)	
Investment in unconsolidated subsidiaries	As a general rule, one-half of the aggregate investments will be deducted from tier 1 capital and one-half from tier 2 capital. ³
Reciprocal holdings of banking organizations' capital securities	
Other deductions (such as other subsidiaries or joint ventures) as determined by supervisory authority	On a case-by-case basis or as a matter of policy after a formal rulemaking
TOTAL CAPITAL (tier 1 + tier 2 - deductions)	Must equal or exceed 8% or weighted-risk assets

¹ Requirements for the deduction of other intangible assets and residual interests are set forth in section II.B.1. of this appendix.

² Amount in excess of limitations are permitted but do not qualify as capital.
³ A proportionately greater amount may be deducted from tier 1 capital, if the risks associated with the subsidiary so warrant.

^{*} See discussion in section II of the guidelines for a complete description of the requirements for, and the limitations on, the components of qualifying capital.

community, including low- and moderate-income ("LMI") neighborhoods, in evaluating bank expansionary proposals. The Board has carefully considered the convenience and needs factor and the CRA performance records of the subsidiary depository institutions of Citizens and Mellon in light of all the facts of record, including public comments received on the effect the proposal would have on the communities to be served by the institutions resulting from this proposal.

Two community groups jointly submitted comments opposing the proposal and expressing concerns about the record of Citizens in meeting the convenience and needs of the communities it serves. The commenters criticized Citizens' record of home mortgage lending to LMI borrowers and small business lending in LMI communities. Based on data submitted under the Home Mortgage Disclosure Act ("HMDA"), 15 the commenters also alleged that Citizens engaged in disparate treatment of minority individuals in its assessment areas with respect to home mortgage lending.

CRA Performance Examiners

As provided in the CRA, the Board has evaluated the convenience and needs factor in light of examinations by the appropriate federal supervisors of the CRA performance records of the relevant insured depository institutions. An institution's most recent CRA performance evaluation is a particularly important consideration in the applications process because it represents a detailed, on-site evaluation of the institution's overall record of performance under the CRA by its appropriate federal supervisor.¹⁶

Citizens Bank of Massachusetts, Boston, Massachusetts ("CBMA"), the lead depository institution of Citizens, and all of Citizens' other subsidiary depository institutions received "outstanding" ratings at their most recent CRA performance examinations by the FDIC, as of October 12, 1999 (collectively, "1999 Citizens Evaluation").¹⁷ Mellon Bank also received an "outstanding" rating at its most recent CRA performance examination by the Office of the Comptroller of the Currency ("OCC").¹⁸

As noted above, Citizens' two new subsidiary banks would acquire most of the Mid-Atlantic retail banking branches of Mellon, and the branches to be acquired would

become subject to the CRA policies of Citizens. Accordingly, the Board has particularly considered the 1999 Citizens Evaluations and the fair lending policies and procedures of Citizens and its subsidiary banks (collectively, "Citizens banks"). The Board also has consulted with the FDIC and considered confidential supervisory information on the CRA performance of the Citizens banks. In addition, the Board has evaluated substantial information submitted by Citizens concerning the CRA performance of the Citizens banks since the 1999 Citizens Evaluations and has considered the lending policies, practices, and data of Citizens' lending affiliate, Citizens Mortgage Company ("CMC").¹⁹

CRA Performance Record of Citizens

Lending. In the 1999 Citizens Evaluations, examiners commended the Citizens banks for their strong lending record during the review period.20 All the Citizens banks received "outstanding" ratings under the lending tests except CBNH, which received a "high satisfactory" rating. Examiners commended the home mortgage lending activities of the Citizens banks for demonstrating excellent responsiveness to the credit needs of all segments of their assessment areas during the review period, including segments comprised of LMI borrowers and communities. Examiners determined that the records of the Citizens banks in making HMDA-reportable loans to LMI borrowers during the review period were strong and generally exceeded the lending performance of the aggregate of lenders ("aggregate lenders") in 1998.21 For example, CBMA's lending to LMI borrowers as a percentage of its total HMDAreportable lending was almost twice that of the aggregate lenders in 1998. The 2000 HMDA data indicate that the loans to LMI borrowers made by each of the Citizens banks as a percentage of their total HMDA-reportable loans exceeded or were comparable with that of the aggregate lenders. In the 1999 Citizens Evaluation, examiners also noted that the records of the Citizens banks in lending in LMI census tracts during the review period generally were comparable with or exceeded that of the aggregate lenders.22

^{15. 12} U.S.C. § 2801 et seq.

^{16.} See Interagency Questions and Answers Regarding Community Reinvestment, 66 Federal Register 36,620 and 36,639 (2001).

^{17.} These institutions include Citizens Bank of Rhode Island, Providence, Rhode Island ("CBRI"); Citizens Bank of Connecticut, New London, Connecticut ("CBCT"); and Citizens Bank of New Hampshire, Manchester, New Hampshire ("CBNH"). United States Trust Company, Boston, Massachusetts, a subsidiary of Citizens, is a limited-purpose trust company and, therefore, not subject to the CRA.

^{18.} The OCC rated Mellon Bank "outstanding," as of November 26, 1997. Mellon's other subsidiary banks subject to the CRA received "satisfactory" ratings at their most recent CRA performance examinations: Mellon DE, by the OCC, as of December 3, 1997, and Mellon 1st Business Bank, Los Angeles, California, by the FDIC, as of November 29, 1999.

^{19.} CMC is a subsidiary of CBRI. Citizens stated that CMC serves as the central underwriter, processor, and servicer for standard residential first mortgage loan products offered by the Citizens banks, and that the individual Citizens banks originate all other housing-related loans. CMC's HMDA data were considered in the evaluation of the lending records of the Citizens banks in the 1999 Citizens Evaluations by the FDIC.

^{20.} The review period for the 1999 Citizens Evaluations was January 1, 1998, through September 30, 1999.

^{21.} In this context, "HMDA-reportable loans" refers to loans reportable under HMDA, which includes home purchase, home improvement, and multifamily mortgage loans and refinancings of such loans. Loans made by the aggregate of lenders refers to all HMDA-reportable loans made in the assessment areas of the Citizens banks by all lenders required to report under HMDA.

^{22.} Examiners noted that, although CBCT's record of HMDA-reportable lending in LMI census tracts during the review period was adequate, its performance in this category fell below that of the

Examiners commended all the Citizens banks for extensively using innovative and flexible loan programs to better serve local credit needs, particularly those of LMI individuals and communities.23 For example, examiners found that CBMA offered a number of programs with reduced costs and flexible underwriting standards to provide affordable housing loans to LMI families and in LMI communities throughout its Massachusetts assessment area. The bank provided more than 630 loans totaling approximately \$42 million through these programs during the review period. Through similar programs, CBRI provided more than 320 loans totaling approximately \$22 million in its Rhode Island assessment area. Examiners also noted that CBCT developed a flexible mortgage product for homebuyers in the low-income census tracts in New Haven, Connecticut, and committed \$5 million to a program that offers mortgage loans without down payment requirements to homebuyers in LMI communities in three Connecticut cities.

Citizens stated that since the evaluations in 1999, the Citizens banks have increased their lending under these programs. The Citizens banks collectively made more than 1800 housing related loans totaling more than \$180 million through these innovative and flexible loan programs during 2000 and the first six months of 2001.

Examiners also commended the small business lending activities of the Citizens banks. In particular, examiners noted that the banks' records of small business lending reflected a good distribution among various income geographies and businesses of different sizes. Examiners stated that CBRI's record of small business lending in LMI census tracts in Rhode Island compared favorably with that of the aggregate lenders during the review period and commended the bank for consistently being named the leading lender of Small Business Administration ("SBA") loans in Rhode Island.²⁴ In addition, examiners commended CBMA for innovative commercial lending programs, such as its \$40 million commitment to provide

aggregate lenders. Examiners attributed this performance to the strong competition from local and regional banks, the very low percentage of owner-occupied housing units in the low-income census tracts, and the bank's limited number of mortgage loan originators. Examiners found, however, that the percentage of CBCT's HMDA-reportable lending to LMI borrowers during the review period exceeded that of the aggregate lenders in 1998. To further increase its residential lending in LMI communities and to LMI borrowers, CBCT has increased its mortgage staff and added loan products and programs to assist LMI borrowers. The 2000 HMDA data indicate that the percentages of its HMDA-reportable loans made in LMI census tracts and to LMI borrowers exceeded or were comparable with that of the aggregate lenders.

23. All the Citizens banks offer a number of special programs to promote affordable home loans to LMI individuals and in LMI communities, small business lending in LMI communities, and community development. Many of these programs were created by the banks as in-house programs or in partnership with community organizations. In addition, the Citizens banks and CMC offer a full array of government-sponsored or -insured loans.

24. CBRI has been the leading SBA lender in Rhode Island for the last six years, and CBNH has been the leading SBA lender in New Hampshire for the last three years. below-market financing to small businesses in Boston's Enterprise Zone during a 10-year period. Examiners also commended CBCT's participation in three programs that offered flexible loan terms for small businesses in LMI census tracts in several Connecticut cities.

Based on the small business loan data reported by Citizens, the overall volume of small business loans provided by all the Citizens banks increased from 1999 to 2000, except for CBCT. In addition, each of the Citizens banks, including CBCT, outperformed the aggregate lenders in 2000 in terms of the percentage of their total small business loans that were extended to businesses with revenues of \$1 million or less. Moreover, the percentage of each of the Citizens banks' loans to small businesses in LMI census tracts in 1999 and 2000 significantly exceeded that of the aggregate lenders in both years.

In the 1999 Citizens Evaluations, examiners generally found that the majority of the banks' small business loans during the review period were for amounts of \$100,000 or less, but that their percentages of such small business loans were below that of the aggregate lenders in 1998. Examiners noted, however, that community development was the primary purpose of a large number of the loans reported as small business loans by the Citizens banks. For example, examiners found that CBRI made 36 small business loans totaling \$6.7 million that had community development as their primary purpose, including \$2 million in loans to organizations that provide affordable housing for LMI individuals and communities in Rhode Island.

In the 1999 Citizens Evaluations, examiners commended each of the banks for their level of community development lending. During the review period, the banks made community development loans totaling more than \$48 million. For example, CBMA made a \$4.1 million loan to develop an assisted living facility that reserved 50 percent of its units for LMI elders, and CBRI made a loan of \$2.1 million to a nonprofit organization that provided counseling and intervention services to LMI individuals. CBCT issued a \$10 million line of credit for a redevelopment project in a LMI census tract in New London, Connecticut. In addition, examiners reported that most of the \$5.5 million in community development loans that CBNH made during the review period helped finance affordable housing for LMI individuals.

The Citizens banks have maintained a high level of community development lending since the 1999 Citizens Evaluations. Citizens stated that its subsidiary banks collectively made community development loans totaling more than \$83 million during 2000 and the first six months of 2001.

Investment. In the 1999 Citizens Evaluations, examiners rated the investment activities of CBMA and CBRI as "high satisfactory" and those of CBCT and CBNH as "outstanding." During the review period, the banks made qualified CRA investments totaling more than \$58 million and grants totaling more than \$2.3 million. These qualified investments included affordable housing mortgage-backed securities totaling more than \$24 million purchased by CBMA and CBRI. Examiners also noted that CBMA in-

vested \$4.6 million in the Massachusetts Housing Partnership Fund ("MHPF") and committed more than \$2.8 million in new equity to the Massachusetts Housing and Equity Fund ("MHEF").25 Both organizations finance affordable housing in LMI communities throughout the state. In addition, examiners reported that CBCT created new funds to finance affordable housing and economic development in LMI areas in Connecticut. Examiners also noted that CBNH invested \$3 million in an investment fund for low-income multifamily housing projects and invested in tax credit projects and programs through the New Hampshire Community Development Finance Authority to support lending to small businesses and employment-transition programs for welfare recipients. Citizens stated that its subsidary banks collectively made qualified investments and grants totaling more than \$24.8 million during 2000 and the first six months of 2001.

Services. All the Citizens subsidiary banks received an "outstanding" rating under the services test in the 1999 Citizens Evaluations. Examiners determined that the banks' retail banking services were readily accessible to all portions of their assessment areas, including LMI communities. Examiners also noted that the banks offered a variety of alternative delivery systems and low-cost checking accounts for individuals and small businesses. In addition, examiners commended the excellent level of community services provided by the Citizens banks and the active involvement of their employees with community development organizations throughout the banks' assessment areas.

HMDA Data and Fair Lending Record

The Board also has carefully considered Citizens' lending record in light of comments on HMDA data reported by its subsidiaries.²⁶ Except for CBMA, all the Citizens banks experienced a decline in the number of loans reported under HMDA in 2000 compared with 1999, but the aggregate lenders in each bank's assessment area also experienced similar declines during the same time period. Significantly, the percentage of total HMDA-reportable loans that each Citizens bank made to African-American and Hispanic applicants either increased or remained essentially the same in 2000 compared with 1999, despite the general decline in the number of originations. Moreover, the percentage of total HMDA-reportable loans that the Citizens banks originated to African-American and Hispanic individuals and in minority census tracts generally

The HMDA data, however, reflect certain disparities in the rates of loan applications, originations, and denials among members of different racial groups. For example, CBCT's lending to African-American and Hispanic applicants in 1999 and 2000, as a percentage of its total HMDAreportable lending, was slightly below that of the aggregate lenders in both years. However, the bank's denial disparity ratios for African-American and Hispanic applicants in 2000 were less than or comparable with the denial disparity ratios of the aggregate lenders.

Importantly, the HMDA data do not indicate that the Citizens banks were excluding any segment of the population or geographic areas on a prohibited basis. The Board nevertheless is concerned when the record of an institution indicates disparities in lending and believes that all banks are obligated to ensure that their lending practices are based on criteria to ensure not only safe and sound lending, but also equal access to credit by creditworthy applicants regardless of their race or income level. The Board recognizes, however, that HMDA data alone provide an incomplete measure of an institution's lending in its community because these data cover only a few categories of housingrelated lending. HMDA data, moreover, provide only limited information about covered loans.29 HMDA data, therefore, have limitations that make them an inadequate basis, absent other information, for concluding that an institution has not assisted adequately in meeting its community's credit needs or has engaged in illegal lending discrimina-

Because of the limitations of HMDA data, the Board has considered these data carefully in light of other information, including examination reports that provide an on-site evaluation of compliance by the Citizens banks with fair lending laws. Examiners found no evidence of prohibited discrimination or other illegal credit practices at any subsidiary depository institution controlled by Citizens. The record also indicates that Citizens has taken a number of affirmative steps to ensure compliance with fair lending laws. The Citizens banks have a mandatory and ongoing program in which all employees receive training on compliance with fair lending and other consumer protection

exceeded that of the aggregate lenders in 1999 and 2000.27 In addition, the HMDA data indicate that the banks' denial disparity ratios for African-American and Hispanic applicants in 2000 were lower than or comparable with the aggregate lenders' denial disparity ratios for these applicants.28

^{25.} As of the 1999 Citizens Evaluation, CBMA had made total commitments of \$29 million to the MHPF and \$7.1 million to the MHEF.

^{26.} Based on 2000 HMDA data, the commenters alleged that the Citizens banks disproportionately excluded and denied African-American and Hispanic applicants for home mortgage loans in various Metropolitan Statistical Areas ("MSAs") and Primary MSAs in Massachusetts, Rhode Island, Connecticut, New Hampshire, Vermont, and Maine.

^{27.} For purposes of this HMDA analysis, "minority census tracts" means census tracts with a minority population of 80 percent or more.

^{28.} The denial disparity ratio compares the denial rate for minority loan applicants with that for nonminority applicants.

^{29.} The data, for example, do not account for the possibility that an institution's outreach efforts may attract a larger proportion of marginally qualified applicants than other institutions attract and do not provide a basis for an independent assessment of whether an applicant who was denied credit was, in fact, creditworthy. Credit history problems and excessive debt levels relative to income (reasons most frequently cited for a credit denial) are not available from HMDA data.

laws. In addition, Citizens has established a formal fair lending committee ("Committee") that disseminates legislative, regulatory, and industry information on fair lending matters to the appropriate employees of the Citizens banks. The Committee also reviews the Citizens banks' lending data to evaluate potential fair lending issues with respect to credit decisions and compensation incentives, and conducts comparative file analyses. As part of a secondary review process, the Committee also compares denied applicants with approved applicants to ensure that no prohibited basis was a factor in the credit decision.

The Board also has considered the HMDA data in light of Citizens' overall lending and community development activities discussed above, which show that the Citizens banks significantly assist in helping to meet the credit needs of their entire communities.³⁰ The Board believes that, viewed in light of the entire record, the HMDA data indicate that Citizens' record of performance in helping to serve the credit needs of its communities is consistent with approval of the proposal.

Conclusion on Convenience and Needs Considerations

In reviewing the effect of the proposal on the convenience and needs of the communities to be served, the Board has carefully considered the entire record, all the information provided by the commenters and Citizens, evaluations of the performance of the Citizens banks under the CRA, and confidential supervisory information.

Based on all the facts of record and for reasons discussed above, the Board concludes that considerations relating to the convenience and needs factor, including the CRA performance records of the relevant depository institutions, are consistent with approval.

Financial, Managerial, and Other Supervisory Factors

The BHC Act requires the Board to consider the financial and managerial resources and future prospects of the companies and banks involved in a bank acquisition proposal.³¹ In assessing the financial and managerial strength of Applicants and the banks to be acquired, the Board has reviewed information provided by Applicants, confidential supervisory and examination information, publicly reported and other financial information, and public comments.³² In addition, the Board consulted with relevant supervisory authorities in the United Kingdom.

In evaluating financial factors in expansion proposals by banking organizations, the Board consistently has considered capital adequacy to be especially important. The proposed acquisition is structured as a purchase-and-assumption transaction financed with the proceeds of a recent equity issuance by RBS Group. Citizens PA and Citizens DE would be well capitalized and the risk-based regulatory capital ratios of Citizens on a consolidated basis would remain above the well-capitalized thresholds on consummation of the proposal. In addition, the capital ratios of RBS Group on a consolidated basis and RBS would continue to exceed the minimum levels that would be required under the Basel Capital Accord. These ratios are considered equivalent to the capital ratios that would be required of a U.S. banking organization.

The Board also has considered the managerial resources of Applicants, including the examination records of Citizens and its subsidiary depository institutions by the appropriate federal financial supervisory agencies. In addition, the Board has considered the plans of Applicants to implement the proposal, including their available managerial resources and record of successfully integrating acquisitions into existing operations. After reviewing all the facts of record, the Board concludes that Applicants, including the subsidiary depository institutions of Citizens, have adequate managerial resources and appropriate risk management systems in place. Based on these and all the facts of record, the Board concludes that the financial and managerial resources and future prospects of Applicants and their subsidiary banks are consistent with approval.

Section 3 of the BHC Act also provides that the Board may not approve an application involving a foreign bank unless the bank is subject to comprehensive consolidated supervision or regulation on a consolidated basis by the appropriate authorities in the bank's home country.³³ The

^{30.} Commenters alleged that RBS Group has indirectly supported predatory lending by a number of unaffiliated consumer lenders through the securitization activities and warehouse lending services of its subsidiary, Greenwich Capital Markets, Greenwich, Connecticut ("GCM"). Applicants stated that GCM underwrites securities backed by consumer loans, including subprime mortgage loans originated by unaffiliated third parties. In addition, GCM's affiliate, Greenwich Capital Financial Products, Inc. ("GCFP"), provides warehouse finance and repurchase facilities to unaffiliated mortgage originators, including some engaged in subprime lending. Applicants also noted that GCM has invested in securities backed by subprime loan pools that are issued by unaffiliated parties.

The Board has considered all the facts of record, including the relationships of GCM, GCFP, and Citizens with unaffiliated consumer lenders. Applicants stated that GCM, GCFP, and Citizens do not play any formal or informal role in the loan origination process or in developing the loan originator's lending practices or credit approval processes. They noted, however, that GCM conducts due diligence reviews in connection with its securitization activities that typically includes reviews to determine if the originators are complying with federal and state laws. Moreover, the Board notes that the Federal Trade Commission, Department of Housing and Urban Development, and Department of Justice have responsibility for enforcing the compliance with fair lending laws of nondepository institutions.

^{31.} See 12 U.S.C. § 1842(c)(2).

^{32.} The commenters also expressed concern that the activities of RBS Group and its affiliates in Indonesia ignored human rights concerns, damaged the environment, or caused other societal harm. These contentions contain no allegations of illegality or action that would affect the safety and soundness of the institutions involved in the proposal, and are outside the limited statutory factors that the Board is authorized to consider when reviewing an application under the BHC Act. See Western Bancshares, Inc. v. Board of Governors, 480 F.2d 749 (10th Cir. 1973).

^{33. 12} U.S.C. § 1842(c)(3)(B). Under Regulation Y, the Board uses the standards enumerated in Regulation K to determine whether a

home country supervisor of RBS Group is the United Kingdom's Financial Services Agency ("FSA"), which is responsible for the supervision and regulation of United Kingdom financial institutions.

In approving applications under the BHC Act and the International Banking Act (12 U.S.C. §§ 3101 *et seq.*) ("IBA"), the Board previously has determined that United Kingdom banks, including RBS, were subject to home country supervision on a consolidated basis.³⁴ In this case, the Board finds that the FSA continues to supervise RBS in substantially the same manner as it supervised United Kingdom banks at the time of those previous determinations. Based on this finding and all the facts of record, the Board concludes that RBS continues to be subject to comprehensive supervision on a consolidated basis by its home country supervisor.

In addition, section 3 of the BHC Act requires the Board to determine that a foreign bank has provided adequate assurances that it will make available to the Board such information on its operations and activities and those of its affiliates that the Board deems appropriate to determine and enforce compliance with the BHC Act.35 The Board has reviewed the restrictions on disclosure in relevant jurisdictions in which RBS Group operates and has communicated with relevant government authorities concerning access to information. In addition, RBS Group and RBS previously have committed to make available to the Board such information on the operations of RBS Group and its affiliates that the Board deems necessary to determine and enforce compliance with the BHC Act, the IBA, and other applicable federal law. RBS Group and RBS also previously have committed to cooperate with the Board to obtain any waivers or exemptions that may be necessary to enable RBS Group and its affiliates to make such information available to the Board. In light of these commitments, the Board concludes that RBS Group and RBS have provided adequate assurances of access to any appropriate information that the Board may request. Based on these and all the facts of record, the Board concludes that the supervisory factors it is required to consider are consistent with approval,36

foreign bank that has applied under section 3 of the BHC Act is subject to consolidated home country supervision. See 12 C.F.R. 225.13(a)(4). Regulation K provides that a foreign bank will be considered to be subject to comprehensive supervision or regulation on a consolidated basis if the Board determines that the bank is supervised or regulated in such a manner that its home country supervisor receives sufficient information on the worldwide operations of the bank, including its relationship to any affiliates, to assess the bank's overall financial condition and its compliance with law and regulation. See 12 C.F.R. 211.24(c)(1).

34. See Abbey National Treasury Services plc, 87 Federal Reserve Bulletin 750 (2001); see also The Royal Bank of Scotland Group, 82 Federal Reserve Bulletin 428 (1996).

35. See 12 U.S.C. § 1842(c)(3)(A).

36. A commenter questioned the policies and procedures of RBS concerning correspondent banking relationships in connection with certain directives and action requests recently issued to financial institutions by government authorities. In evaluating the managerial and supervisory factors, the Board reviewed these comments in light

Conclusion

Based on the foregoing and in light of all the facts of record, the Board has determined that the applications should be, and hereby are, approved.³⁷ In reaching its conclusion, the Board has considered all the facts of record in light of the factors that it is required to consider under the BHC Act and other applicable statutes. The Board's approval is specifically conditioned on compliance by Applicants with all the representations and commitments made in connection with the application and prior commitments referenced in this order. These representations, commitments, and conditions are deemed to be conditions imposed in writing by the Board in connection with its findings and decision and, as such, may be enforced in proceedings under applicable law.

The transaction shall not be consummated before the fifteenth calendar day after the effective date of this order, and the proposal may not be consummated later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Boston, acting pursuant to delegated authority.

By order of the Board of Governors, effective November 9, 2001.

Voting for this action: Chairman Greenspan, Vice Chairman Ferguson, and Governors Kelley, Meyer, and Gramlich.

ROBERT DEV. FRIERSON Deputy Secretary of the Board

of information submitted by RBS regarding its policies and procedures on correspondent bank and certain other customer account relationships and additional confidential information.

37. The commenters also requested that the Board hold a public hearing on the proposal. Section 3 of the BHC Act does not require the Board to hold a public hearing on an application unless the appropriate supervisory authority for any of the banks to be acquired makes a timely written recommendation of denial of the application. The Board has not received such a recommendation from the appropriate supervisory authority. Under its rules, the Board also may, in its discretion, hold a public meeting or hearing on an application to acquire a bank if a meeting or hearing is necessary or appropriate to clarify factual issues related to the application and to provide an opportunity for testimony. 12 C.F.R. 225.16(e). The Board has considered carefully the commenters' requests in light of all the facts of record. In the Board's view, the public has had ample opportunity to submit comments on the proposal, and in fact, the commenters have submitted written comments that the Board has considered carefully in acting on the proposal. Commenters' requests fail to demonstrate why their written comments do not present their views adequately or why a meeting or hearing otherwise would be necessary or appropriate. For these reasons, and based on all the facts of record, the Board has determined that a public hearing is not required or warranted in this case. Accordingly, the requests for a public hearing on the proposal are denied.

ORDERS ISSUED UNDER INTERNATIONAL BANKING ACT

Jamaica National Building Society Kingston, Jamaica

Order Approving Establishment of a Representative Office

Jamaica National Building Society ("Bank"), Kingston, Jamaica, a foreign bank within the meaning of the International Banking Act ("IBA"), has applied under section 10(a) of the IBA (12 U.S.C. § 3107(a)) to establish a representative office in Fort Lauderdale, Florida. The Foreign Bank Supervision Enhancement Act of 1991, which amended the IBA, provides that a foreign bank must obtain the approval of the Board to establish a representative office in the United States.

Notice of the application, affording interested persons an opportunity to submit comments, has been published in a newspaper of general circulation in Fort Lauderdale (*Sun-Sentinel*, June 26, 1998). The time for filing comments has expired, and all comments have been considered.

Bank, with total consolidated assets of approximately \$527 million, is the fourth largest deposit-taking institution and the largest building society in Jamaica. Bank primarily engages in residential mortgage lending and retail banking activities through 18 domestic offices. Bank also engages in real estate development, investment management, leasing, data processing, mortgage lending, and insurance and stock brokerage activities through a number of domestic subsidiaries. Outside Jamaica, Bank maintains representative offices in London, United Kingdom, and Toronto, Canada, and offers money transmission and mortgage lending services, primarily to Jamaicans living abroad, through subsidiaries operating in London, Toronto, New York, and Fort Lauderdale.

The proposed representative office would provide information on Bank, Bank's services in Jamaica, the Jamaican economy, and opportunities in Jamaica to Bank's members residing in Florida and to the wider population of Jamaicans living in Florida. The proposed office would assist borrowers in completing mortgage application forms, transmit completed loan application documents to the head office in Jamaica for review and approval, and promote Bank's mortgage services generally.

In acting on an application to establish a representative office, the IBA and Regulation K provide that the Board shall take into account whether the foreign bank engages directly in the business of banking outside of the United States and has furnished to the Board the information it needs to assess the application adequately. The Board also shall take into account whether the foreign bank and any

foreign bank parent is subject to comprehensive supervision or regulation on a consolidated basis by its home country supervisor (12 U.S.C. § 3107(a)(2); 12 C.F.R. 211.24(d)(2)).³ The Board will consider that this standard regarding supervision has been met where it determines that the applicant bank is subject to a supervisory framework that is consistent with the activities of the proposed representative office, taking into account the nature of such activities and the operating record of the applicant.⁴ In addition, the Board may take into account additional standards set forth in the IBA and Regulation K (12 U.S.C. § 3105(d)(3)-(4); 12 C.F.R. 211.24(c)(2)).

In connection with this application, Bank has provided certain commitments that limit the activities of the representative office. It has committed that the representative office would not make credit decisions on behalf of the parent building society, solicit deposits on behalf of the home office (other than from institutional investors), or engage in activities related to trading or money transmission. The representative office also would not share office space or premises with Bank's U.S. money transmitter subsidiary.

As noted above, Bank engages directly in the business of banking outside the United States. Bank also has provided the Board with information necessary to assess the application through submissions that address the relevant issues.

Bank has provided the following information regarding home country supervision. Bank's primary home country supervisor is the Bank of Jamaica ("BOJ"), Jamaica's central bank.⁵ The BOJ supervises and regulates Bank through a combination of regular on-site reviews and offsite monitoring. On-site examinations include a review of

These are indicia of comprehensive, consolidated supervision. No single factor is essential, and other elements may inform the Board's determination.

- 4. See, e.g., RHEINHYP Rheinische Hypothekenbank AG, 87 Federal Reserve Bulletin 558 (2001); see also Promstroybank of Russia, 82 Federal Reserve Bulletin 599 (1996); Komercni Banka, a.s., 82 Federal Reserve Bulletin 597 (1996); Commercial Bank "Ion Tiriac", S.A., 82 Federal Reserve Bulletin 592 (1996).
- 5. The BOJ has been supervising building societies, including Bank, since 1995. The laws governing Jamaican building societies are, in some respects, outdated, and the existing supervisory system has certain deficiencies. The BOJ is working to improve its oversight of building societies, however, by, among other things, sponsoring legislation that would strengthen the framework for supervision of such entities and strengthen their operations.

^{1.} Unless otherwise indicated, data are as of March 31, 2001.

^{2.} Bank is a mutual organization with more than 300,000 members. Each of Bank's members is considered to be a shareholder and has one vote. No single shareholder is considered to control the organization.

^{3.} In assessing this standard, the Board considers, among other factors, the extent to which the home country supervisors:

Ensure that the bank has adequate procedures for monitoring and controlling its activities worldwide;

Obtain information on the condition of the bank and its subsidiaries and offices through regular examination reports, and audit reports, or otherwise;

⁽iii) Obtain information on the dealings with and relationship between the bank and its affiliates, both foreign and domestic;

 ⁽iv) Receive from the bank financial reports that are consolidated on a worldwide basis or comparable information that permits analysis of the bank's financial condition on a worldwide consolidated basis;

 ⁽v) Evaluate prudential standards, such as capital adequacy and risk asset exposure, on a worldwide basis.

Bank's head office and branch operations, but not a review of Bank's foreign offices or foreign or domestic subsidiaries. Off-site monitoring consists of a review of periodic reports, most of which contain bank-only data.6 The reports address, among other prudential matters, Bank's compliance with restrictions on transactions with affiliates.7

Bank is required to have its annual financial statements audited by an independent public accountant. External auditors are required to report to the BOJ on significant issues revealed, and the BOJ reviews the results of the external audit. In addition, Bank is required to establish and has established internal controls, policies, and procedures consistent with standards adopted by the BOJ. The BOJ reviews the Bank's internal audit function during on-site examinations.

The Jamaican Minister of Finance, in consultation with the BOJ, has the authority to take a range of remedial actions against building societies in appropriate circumstances.

Jamaica has enacted laws and the BOJ has promulgated implementing regulations aimed at preventing money laundering. The laws and regulations require financial institutions, including building societies, to establish and implement policies, procedures, and controls for the purpose of preventing and detecting money laundering, and to report certain cash transactions, as well as suspicious transactions, to appropriate authorities. An institution's compliance with applicable laws and regulations is monitored by the BOJ and the institution's external auditors. Bank has policies and procedures to comply with these laws and regulations.

Based on all the facts of record, including the commitments provided by Bank limiting the activities of the proposed office, it has been determined that factors relating to the supervision of Bank by its home country supervisors are consistent with approval of the proposed representative office.

The additional standards set forth in section 7 of the IBA and Regulation K (see 12 U.S.C. § 3105(d)(3)-(4); 12 C.F.R. 211.24(c)(2)) have also been taken into account. The BOJ has no objection to establishment of the proposed representative office.

With respect to the financial and managerial resources of Bank, taking into consideration Bank's record of operations in its home country, its overall financial resources, and its standing with its home country supervisor, financial and managerial factors are consistent with approval of the proposed representative office. Bank appears to have the experience and capacity to support the proposed representative office and has established controls and procedures for the proposed representative office to ensure compliance with U.S. law.

With respect to access to information on Bank's operations, the restrictions on disclosure in relevant jurisdictions in which Bank operates have been reviewed and relevant government authorities have been communicated with regarding access to information. Bank has committed to make available to the Board such information on the operations of Bank and any of its affiliates that the Board deems necessary to determine and enforce compliance with the IBA, the Bank Holding Company Act of 1956, as amended, and other applicable federal law. To the extent that the provision of such information to the Board may be prohibited by law or otherwise, Bank has committed to cooperate with the Board to obtain any necessary consents or waivers that might be required from third parties for disclosure of such information. In addition, subject to certain conditions, the BOJ may share information on Bank's operations with other supervisors, including the Board. In light of these commitments and other facts of record, and subject to the condition described below, it has been determined that Bank has provided adequate assurances of access to any necessary information that the Board may request.

On the basis of all the facts of record, and subject to the commitments made by Bank, and the terms and conditions set forth in this order, Bank's application to establish the representative office is hereby approved.8 Should any restrictions on access to information on the operations or activities of Bank or any of its affiliates subsequently interfere with the Board's ability to obtain information to determine and enforce compliance by Bank or its affiliates with applicable federal statutes, the Board may require or recommend termination of any of Bank's direct and indirect activities in the United States. Approval of this application also is specifically conditioned on compliance by Bank with the commitments made in connection with this application and with the conditions in this order.⁹ The commitments and conditions referred to above are conditions imposed in writing by the Board in connection with its decision and may be enforced in proceedings against Bank and its affiliates under 12 U.S.C § 1818.

By order, approved pursuant to authority delegated by the Board, effective November 6, 2001.

> ROBERT DEV. FRIERSON Deputy Secretary of the Board

^{6.} The exception to reporting bank-only data is Bank's filing of consolidated audited financial statements annually.

^{7.} These limits were put into place in 1996 after much of the Jamaican financial sector experienced extreme difficulties.

^{8.} Approved by the Director of the Division of Banking Supervision and Regulation, with the concurrence of the General Counsel, pursuant to authority delegated by the Board.

^{9.} The Board's authority to approve the establishment of the proposed representative office parallels the continuing authority of the State of Florida to license offices of a foreign bank. Approval of this application does not supplant the authority of the State of Florida, or its agent, the Florida Department of Banking and Finance ("Department"), to license the proposed office of Bank in accordance with any terms or conditions that the Department may impose.

INDEX OF ORDERS ISSUED OR ACTIONS TAKEN BY THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM (July 1, 2001 - September 30, 2001)

PENDING CASES INVOLVING THE BOARD OF GOVERNORS

This list of pending cases does not include suits against the Federal Reserve Banks in which the Board of Governors is not named a party.

- Community Bank & Trust v. United States, No. 01–571C (Ct. Fed. Cl., filed October 3, 2001). Action challenging failure to pay interest on reserve accounts held at Federal Reserve Bank.
- Emran v. Greenspan, No. 1:01CV1992 (PLF) (D.D.C., filed September 20, 2001). Employment discrimination claim.
- Bettersworth v. Board of Governors, No. 01–444 (United States Supreme Court, docketed September 14, 2001). Petition for *certiorari* seeking review of denial of petitioner's Privacy Act claims. On November 13, 2001, the Supreme Court denied the petition.
- Laredo National Bancshares, Inc. v. Whalen v. Board of Governors, No. 01-CV-134 (S.D. Tex., removed on September 5, 2001, from No. 99CVQ00940-D3 (District Court, 341st Judicial District, Webb County, Texas, originally filed July 26, 2001). Third-party petition seeking indemnification or contribution from the Board in connection with a claim asserted against defendant Whalen alleging tortious interference with a contract.
- Radfar v. United States, No. 1:01CV1292 (PLF) (D.D.C., complaint filed June 11, 2001). Action under the Federal Tort Claims Act for injury on Board premises.

- Artis v. Greenspan, No. 01-CV-0400(ESG) (D.D.C., complaint filed February 22, 2001. Employment discrimination action. On August 15, 2001, the district court consolidated the action with Artis v. Greenspan, No. 99-CV-2073 (EGS) (D.D.C., filed August 3, 1999), also an employment discrimination action.
- Howe v. Bank for International Settlements, No. 00CV12485 RCL (D. Mass., filed December 7, 2000). Action seeking damages in connection with gold market activities and the repurchase of privately-owned shares of the Bank for International Settlements.
- Trans Union LLC v. Federal Trade Commission, et al., No. 01–5202 (D.C. Cir., filed June 4, 2001). Appeal of district court order entered April 30, 2001, upholding an interagency rule regarding Privacy of Consumer Finance Information.
- Albrecht v. Board of Governors, No. 00-CV-317 (CKK) (D.D.C., filed February 18, 2000). Action challenging the method of funding of the retirement plan for certain Board employees. On March 30, 2001, the district court granted in part and denied in part the Board's motion to dismiss.
- Guerrero v. United States, No. CV-F-99-6771(OWW) (E.D. Cal., filed November 29, 1999). Prisoner suit.
- Fraternal Order of Police v. Board of Governors, No. 1:98CV03116 (WBB)(D.D.C., filed December 22, 1998). Declaratory judgment action challenging Board labor practices. On February 26, 1999, the Board filed a motion to dismiss the action.

Membership of the Board of Governors of the Federal Reserve System, 1913–2001

APPOINTIVE MEMBERS 1

Name	Federal Reserve District	Date of initial oath of office	Other dates and information relating to membership ²
Charles S. Hamlin	Boston	Aug. 10, 1914	Reappointed in 1916 and 1926. Served until Feb. 3, 1936. ³
Paul M. Warburg	New York	Aug. 10, 1914	Term expired Aug. 9, 1918.
Frederic A. Delano			Resigned July 21, 1918.
W.P.G. Harding			Term expired Aug. 9, 1922.
Adolph C. Miller			Reappointed in 1924. Reappointed in 1934 from the Richmond District. Served until Feb. 3, 1936. ³
Albert Strauss	New York	Oct. 26, 1918	Resigned Mar. 15, 1920.
Henry A. Moehlenpah			Term expired Aug. 9, 1920.
Edmund Platt	New York	June 8, 1920	Reappointed in 1928. Resigned Sept. 14, 1930.
David C. Wills			Term expired Mar. 4, 1921.
John R. Mitchell			Resigned May 12, 1923.
Milo D. Campbell			Died Mar. 22, 1923.
Daniel R. Crissinger			Resigned Sept. 15, 1927.
George R. James			Reappointed in 1931. Served until Feb. 3, 1936. ⁴
Edward H. Cunningham			Died Nov. 28, 1930.
Roy A. Young	Minnaanolie	Oct 4 1027	Resigned Aug. 31, 1930.
Eugene Meyer			Resigned May 10, 1933.
Wayland W. Magee			Term expired Jan. 24, 1933.
Eugene R. Black			Resigned Aug. 15, 1934.
M.S. Szymczak			Reappointed in 1936 and 1948. Resigned May 31, 196
J. Thomas			Served until Feb. 10, 1936. ³
Marriner S. Eccles		,	Reappointed in 1936, 1940, and 1944. Resigned July 14, 1951.
oseph A. Broderick			Resigned Sept. 30, 1937.
John K. McKee			Served until Apr. 4, 1946. ³
Ronald Ransom			Reappointed in 1942. Died Dec. 2, 1947.
Ralph W. Morrison			Resigned July 9, 1936.
Chester C. Davis	Richmond	June 25, 1936	Reappointed in 1940. Resigned Apr. 15, 1941.
Ernest G. Draper	New York	Mar. 30, 1938	Served until Sept. 1, 1950. ³
Rudolph M. Evans	Richmond	Mar. 14, 1942	Served until Aug. 13, 1954. ³
lames K. Vardaman, Jr	St. Louis	Apr. 4, 1946	Resigned Nov. 30, 1958.
Lawrence Clayton	Boston	Feb. 14, 1947	Died Dec. 4, 1949.
Thomas B. McCabe	Philadelphia	Apr. 15, 1948	Resigned Mar. 31, 1951.
Edward L. Norton			Resigned Jan. 31, 1952.
Oliver S. Powell			Resigned June 30, 1952.
Wm. McC. Martin, Jr			Reappointed in 1956. Term expired Jan. 31, 1970.
A.L. Mills, Jr	San Francisco	Feb. 18, 1952	Reappointed in 1958. Resigned Feb. 28, 1965.
.L. Robertson			Reappointed in 1964. Resigned Apr. 30, 1973.
C. Canby Balderston			Served through Feb. 28, 1966.
Paul E. Miller			Died Oct. 21, 1954.
Chas. N. Shepardson			Retired Apr. 30, 1967.
G.H. King, Jr.			Reappointed in 1960. Resigned Sept. 18, 1963.
George W. Mitchell			Reappointed in 1962. Served until Feb. 13, 1976. ³
Dewey Daane			Served until Mar. 8, 1974. ³
Sherman J. Maisel			Served through May 31, 1972.
Andrew F. Brimmer			Resigned Aug. 31, 1974.
William W. Sherrill			Reappointed in 1968. Resigned Nov. 15, 1971.
Arthur F. Burns			Term began Feb. 1, 1970. Resigned Mar. 31, 1978.

Henry Morgenthau, Jr	. Jan. 1, 1934–Feb. 1,	1936	

1. Under the provisions of the original Federal Reserve Act, the Federal Reserve Board was composed of seven members, including five appointive members, the Secretary of the Treasury, who was ex-officio chairman of the Board, and the Comptroller of the Currency. The original term of office was ten years, and the five original appointive members had terms of two, four, six, eight, and ten years respectively. In 1922 the number of appointive members was increased to six, and in 1933 the term of office was increased to twelve years. The Banking Act of 1935, approved Aug. 23, 1935, changed the name of the Federal Reserve Board to the Board of Governors of the Federal Reserve System and provided that the Board should be composed of seven appointive members; that the Secretary of the Treasury and the Comptroller of the Currency should continue to serve as members until Feb. 1, 1936; that the appointive

members in office on the date of that act should continue to serve until Feb. 1, 1936, or until their successors were appointed and had qualified; and that thereafter the terms of members should be fourteen years and that the designation of Chairman and Vice Chairman of the Board should be for a term of four years.

- 2. Date after words "Resigned" and "Retired" denotes final day of service.
- 3. Successor took office on this date.
- 4. Chairman and Vice Chairman were designated Governor and Vice Governor before Aug. 23, 1935.
- 5. Served as Chairman Pro Tempore from February 3, 1948, to April 15, 1948
- 6. Served as Chairman Pro Tempore from March 3, 1996, to June 20, 1996.

GENERAL INFORMATION

In many of the tables, components do not sum to totals because of

Minus signs are used to indicate (1) a decrease, (2) a negative figure, or (3) an outflow.
"U.S. government securities" may include guaranteed issues

of U.S. government agencies (the flow of funds figures also

include not fully guaranteed issues) as well as direct obliga-

tions of the U.S. Treasury.

"State and local government" also includes municipalities, special districts, and other political subdivisions.

^{1.} Unless otherwise noted, rates of change are calculated from average amounts outstand-

depository institutions, and (4) eurodollars (overnight and term) held by U.S. residents at foreign branches of U.S. banks worldwide and at all banking offices in the United Kingdom and Canada. Excludes amounts held by depository institutions, the U.S. government, money market funds, and foreign banks and official institutions. Seasonally adjusted M3 is calculated by summing large time deposits, institutional money fund balances. RP liabilities, and eurodollars, each seasonally adjusted separately, and adding this result to seasonally adjusted M2

^{1.} Unless otherwise noted, rates of change are calculated from average amounts outstanding during preceding month or quarter.

2. Figures incorporate adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements (See also table 1.20.)

3. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all weekly reporters whose vault cash exceeds their required reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

4. Composition of the money stock measures and debt is as follows:

M1: (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float, and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions, readit union share draft accounts, and demand deposits at thrift institutions. Seasonally adjusted M1 is computed by summing currency, travelers checks, demand deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and (3) balances in retail money market mutual funds. Excludes individual retirement accounts (IRAs) and Keogh balances at depository institutions and money market funds. Seasonally adjusted M2 is calculated by summing savings deposits, small-denomination time deposits, and retail money market mutual funds. Excludes individual retirement accounts (IRAs) and Keogh balances at depository

M3: M2 plus (1) large-denomination time deposits (in amounts of \$100,000 or more), (2) balances in institutional money funds. (3) RP liabilities (overnight and term) issued by all

eurodollars, each seasonally adjusted separately, and adding this result to seasonally adjusted M2.

Debt: The debt aggregate is the outstanding credit market debt of the domestic nonfinancial sectors—the federal sector (U.S. government, not including government-sponsored enterprises or federally related mortgage pools) and the nonfederal sectors (state and local governments, households and nonprofit organizations, nonfinancial corporate and nonfarm noncorporate businesses, and farms). Nonfederal debt consists of mortgages, tax-exempt and corporate bonds, consumer credit, bank loans, commercial paper, and other loans. The data, which are derived from the Federal Reserve Board's flow of funds accounts, are break-adjusted (that is, discontinuities in the data have been smoothed into the series) and month-averaged (that is, the data have been derived by averaging adjacent month-end levels).

S. Sum of (1) savings deposits (including MMDAs). (2) small time deposits, and (3) retail money fund balances, each seasonally adjusted separately.

6. Sum of (1) large time deposits, 2) institutional money fund balances, (3) RP liabilities (overnight and term) issued by depository institutions, and (4) eurodollars (overnight and term) of U.S. addressees, each seasonally adjusted separately.

7. Small time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRA and Keogh account balances at commercial banks and thrift institutions are subtracted from small time deposits.

8. Large time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

9. Large time deposits are omnercial banks less those held by money market funds, depository institutions, the U.S. government, and foreign banks and official institutions.

10. Includes both overnight and term.

- 5. Total vault cash (line 2) less applied vault cash (line 3).
 6. Reserve balances with Federal Reserve Banks (line 1) plus applied vault cash (line 3).
 7. Total reserves (line 5) less required reserves (line 6).
 8. Borrowing at the discount window under the terms and conditions established for the Century Date Change Special Liquidity Facility in effect from October 1, 1999, through April 7, 2000.
 9. Consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as with traditional short-term adjustment credit, the money market effect of extended credit is similar to that of nonborrowed reserves.

^{1.} Data in this table also appear in the Board's H.3 (502) weekly statistical release. For ordering address, see inside front cover. Data are not break-adjusted or seasonally adjusted.

2. Excludes required clearing balances and adjustments to compensate for float and includes other off-balance-sheet "as-of" adjustments.

3. Vault cash eligible to satisfy reserve requirements. It includes only vault cash held by those banks and thrift institutions that are not exempt from reserve requirements. Dates refer to the maintenance periods in which the vault cash can be used to satisfy reserve requirements.

4. All yoult cash held during the layerd computation period by "bound" institutions (that

ments.

4. All vault cash held during the lagged computation period by "bound" institutions (that is, those whose required reserves exceed their vault cash) plus the amount of vault cash applied during the maintenance period by "nonbound" institutions (that is, those whose vault cash exceeds their required reserves) to satisfy current reserve requirements.

^{1.} Available on a short-term basis to help depository institutions meet temporary needs for funds that cannot be met through reasonable alternative sources. The highest rate established

funds that cannot be met through reasonable elarged on adjustment credit loans of depository institutions may be charged on adjustment credit loans of unusual size that result from a major operating problem at the borrower's facility.

2. Available to help relatively small depository institutions meet regular seasonal needs for funds that arise from a clear pattern of intrayearly movements in their deposits and loans and that cannot be met through special industry lenders. The discount rate on seasonal credit takes into account rates charged by market sources of funds and ordinarily is reestablished on the first business day of each two-week reserve maintenance period; however, it is never less than the discount rate applicable to adjustment credit.

3. May be made available to depository institutions when similar assistance is not reasonably available from other sources, including special industry lenders. Such credit may be provided when exceptional circumstances (including sustained deposit drains, impaired access to money market funds, or sudden deterioration in loan repayment performance) or

practices involve only a particular institution, or to meet the needs of institutions experiencing difficulties adjusting to changing market conditions over a longer period (particularly at times of deposit disintermediation). The discount rate applicable to adjustment credit ordinarily is charged on extended-credit loans outstanding less than thirty days; however, at the discretion of the Federal Reserve Bank, this time period may be shortened. Beyond this initial period, a flexible rate somewhat above rates charged on market sources of funds is charged. The rate ordinarily is reestablished on the first business day of each two-week reserve maintenance period, but it is never less than the discount rate applicable to adjustment credit plus 50 basis noints.

^{4.} For earlier data, see the following publications of the Board of Governors: Banking and Monetary Statistics, 1914–1941, and 1941–1970; and the Annual Statistical Digest, 1970– 1979, and 1980–1989. See also the Board's Statistics: Releases and Historical Data web pages (http://www.federalreserve.gov/releases/H15/data.htm).

RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS¹ 1.15

	Requirement					
Type of deposit	Percentage of deposits	Effective date				
Net transaction accounts ² 1 \$0 million–\$42.8 million ³ 2 More than \$42.8 million ⁴	3 10	12/30/99 12/30/99				
3 Nonpersonal time deposits ⁵	0	12/27/90				
4 Eurocurrency liabilities ⁶	0	12/27/90				

1. Required reserves must be held in the form of deposits with Federal Reserve Banks or vault cash. Nonmember institutions may maintain reserve balances with a Federal Reserve Bank indirectly, on a pass-through basis, with certain approved institutions. For previous reserve requirements, see earlier editions of the Annual Report or the Federal Reserve Bulletin. Under the Monetary Control Act of 1980, depository institutions include commercial banks, savings banks, savings and loan associations, credit unions, agencies and branches of foreign banks, and Edge Act corporations.

2. Transaction accounts include all deposits against which the account holder is permitted on make withdrawals by negotiable or transferable instruments, payment orders of withdrawal, or telephone or preauthorized transfers for the purpose of making payments to third persons or others. However, accounts subject to the rules that permit no more than six preauthorized, automatic, or other transfers per month (of which no more than three may be by check, draft, debit card, or similar order payable directly to third parties) are savings deposits, not transaction accounts.

3. The Monetary Control Act of 1980 requires that the amount of transaction accounts against which the 3 percent reserve requirement applies be modified annually by 80 percent of the percentage change in transaction accounts held by all depository institutions, determined as of June 30 of each year. Effective with the reserve maintenance period beginning December 28, 2000, for depository institutions that report quarterly, the amount was decreased from \$44.3 million to \$42.8 million.

Under the Garn-St. Germain Depository Institutions Act of 1982, the Board adjusts the

Under the Garn-St. Germain Depository Institutions Act of 1982, the Board adjusts the amount of reservable liabilities subject to a zero percent reserve requirement each year for the

succeeding calendar year by 80 percent of the percentage increase in the total reservable liabilities of all depository institutions, measured on an annual basis as of June 30. No corresponding adjustment is made in the event of a decrease. The exemption applies only to accounts that would be subject to a 3 percent reserve requirement. Effective with the reserve maintenance period beginning December 28, 2000, for depository institutions that report weekly, and with the period beginning January 18, 2001, for institutions that report quarterly, the exemption was raised from \$5.0 million to \$5.5 million.

4. The reserve requirement was reduced from 12 percent to 10 percent on Apr. 2, 1992, for institutions that report weekly, and on Apr. 16, 1992, for institutions that report quarterly.

5. For institutions that report weekly, the reserve requirement on nonpersonal time deposits with an original maturity of less than 1.5 years was reduced from 3 percent to 1.5 percent for the maintenance period that began Dec. 13, 1990, and to zero for the maintenance period that began Dec. 27, 1990. For institutions that report quarterly, the reserve requirement on nonpersonal time deposits with an original maturity of less than 1.5 years was reduced from 3 percent to zero on Jan. 17, 1991.

The reserve requirement on nonpersonal time deposits with an original maturity of 1.5

The reserve requirement on nonpersonal time deposits with an original maturity of 1.5 years or more has been zero since Oct. 6, 1983.

6. The reserve requirement on eurocurrency liabilities was reduced from 3 percent to zero in the same manner and on the same dates as the reserve requirement on nonpersonal time deposits with an original maturity of less than 1.5 years (see note 5).

^{1.} Latest monthly and biweekly figures are available from the Board's H.3 (502) weekly statistical release. Historical data starting in 1959 and estimates of the effect on required reserves of changes in reserve requirements are available from the Money and Reserves Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.

Reserve System. Washington, DC 20551.

2. Figures reflect adjustments for discontinuities, or "breaks," associated with regulatory changes in reserve requirements. (See also table 1.10.)

3. Seasonally adjusted, break-adjusted total reserves equal seasonally adjusted, break-adjusted required reserves (line 4) plus excess reserves (line 16).

4. Seasonally adjusted, break-adjusted nonborrowed reserves equal seasonally adjusted, break-adjusted nonborrowed reserves equal seasonally adjusted, break-adjusted total reserves (line 1) less total borrowings of depository institutions from the Ederal Reserve (line 2). Federal Reserve (line 17).

5. Extended credit consists of borrowing at the discount window under the terms and conditions established for the extended credit program to help depository institutions deal with sustained liquidity pressures. Because there is not the same need to repay such borrowing promptly as with traditional short-term adjustment credit, the money market effect of extended credit is similar to that of nonborrowed reserves.

of extended credit is similar to that of nonborrowed reserves.

6. The seasonally adjusted, break-adjusted monetary base consists of (1) seasonally adjusted, break-adjusted total reserves (line 1), plus (2) the seasonally adjusted currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the seasonally adjusted, break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.
7. Break-adjusted total reserves equal break-adjusted required reserves (line 9) plus excess

reserves (line 16)

8. To adjust required reserves for discontinuities that are due to regulatory changes in reserve requirements, a multiplicative procedure is used to estimate what required reserves would have been in past periods had current reserve requirements been in effect. Breakadjusted required reserves include required reserves against transactions deposits and nonpersonal time and savings deposits (but not reservable nondeposit liabilities).

9. The break-adjusted monetary base equals (1) break-adjusted total reserves (line 6), plus (2) the (unadjusted) currency component of the money stock, plus (3) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the break-adjusted difference between current vault cash and the amount applied to satisfy current reserve requirements.

10. Reflects actual reserve requirements, including those on nondeposit liabilities, with no

10. Reflects actual reserve requirements, including those on nondeposit liabilities, with no adjustments to eliminate the effects of discontinuities associated with regulatory changes in reserve requirements.

11. Reserve balances with Federal Reserve Banks plus vault cash used to satisfy reserve

11. Reserve balances with Federal Reserve Banks plus vault cash used to satisty reserve requirements.

12. The monetary base, not break-adjusted and not seasonally adjusted, consists of (1) total reserves (line 11), plus (2) required clearing balances and adjustments to compensate for float at Federal Reserve Banks, plus (3) the currency component of the money stock, plus (4) (for all quarterly reporters on the "Report of Transaction Accounts, Other Deposits and Vault Cash" and for all those weekly reporters whose vault cash exceeds their required reserves) the difference between current vault cash and the amount applied to satisfy current reserve requirements. Since February 1984, currency and vault cash figures have been measured over the computation periods ending on Mondays.

13. Unadjusted total reserves (line 11) less unadjusted required reserves (line 14).

NOTES TO TABLE 1.21

- Latest monthly and weekly figures are available from the Board's H.6 (508) weekly statistical release. Historical data starting in 1959 are available from the Money and Reserves Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.
- Projections Section, Division of Monetary Affairs, Board of Governors of the Federal Reserve System, Washington, DC 20551.

 2. Composition of the money stock measures and debt is as follows:
 M1: (1) currency outside the U.S. Treasury, Federal Reserve Banks, and the vaults of depository institutions, (2) travelers checks of nonbank issuers, (3) demand deposits at all commercial banks other than those owed to depository institutions, the U.S. government, and forcign banks and official institutions, less cash items in the process of collection and Federal Reserve float, and (4) other checkable deposits (OCDs), consisting of negotiable order of withdrawal (NOW) and automatic transfer service (ATS) accounts at depository institutions. Seasonally adjusted M1 is computed by summing currency, travelers checks, demand deposits, and OCDs, each seasonally adjusted separately.

 M2: M1 plus (1) savings deposits (including MMDAs), (2) small-denomination time deposits (time deposits—including retail RPs—in amounts of less than \$100,000), and (3) balances in retail money market mutual lunds. Excludes individual retirement accounts (IRAs) and Keogh balances at depository institutions and money market funds. Seasonally adjusted W2 is calculated by summing savings deposits, small-denomination time deposits, and retail money fund balances, each seasonally adjusted separately, and adding this result to seasonally adjusted M1.

 M3: M2 plus (1) large-denomination time deposits (in amounts of \$100,000 or more) issued by all depository institutions, (2) balances in institutional money funds, (3) RP liabilities (overnight and term) held by U.S. residents at foreign branches of U.S. banks wolrdwide and at all banking offices in the United Kingdom and Canada. Excludes amounts held by depository institutions, and envised M3 is calculated by summing large time deposits, institutional money fund balances, RP tabilities, and eurodollars, each seasonally adjusted M2.

 Debt: The debt aggregates is the outstanding credit market debt of the domes

- separately, and adding this result to seasonally adjusted M2.

 Debt: The debt aggregate is the outstanding credit market debt of the domestic nonfinancial sectors—the federal sector (U.S. government, not including government-sponsored enter-

- prises or federally related mortgage pools) and the nonfederal sectors (state and local governments, households and nonprofit organizations, nonfinancial corporate and nonfarm noncorporate businesses, and farms). Nonfederal debt consists of mortgages, tax-exempt and corporate bonds, consumer credit, bank loans, commercial paper, and other loans. The data, which are derived from the Federal Reserve Board's flow of funds accounts, are break-adjusted (that is, discontinuities in the data have been smoothed into the series) and month-averaged (that is, the data have been derived by averaging adjacent month-end levels).

 3. Currency outside the U.S. Treasury, Federal Reserve Banks, and vaults of depository institutions.

 4. Outstanding amount of U.S. dollar-decominated transfer and reserved for the series of the series of
- institutions.

 4. Outstanding amount of U.S. dollar-denominated travelers checks of nonbank issuers. Travelers checks issued by depository institutions are included in demand deposits.

 5. Demand deposits at commercial banks and foreign-related institutions other than those owed to depository institutions, the U.S. government, and foreign banks and official institutions, less cash items in the process of collection and Federal Reserve float.

 6. Consists of NOW and ATS account balances at all depository institutions, credit union share draft account balances, and demand deposits at thrift institutions.

 7. Sum of (1) savings deposits (including MMDAs), (2) small time deposits, and (3) retail money fund balances.

- money fund balances.

 8. Sum of (1) large time deposits, (2) institutional money fund balances, (3) RP liabilities (overnight and term) issued by depository institutions, and (4) eurodollars (overnight and term) of U.S. addressees.
- term) of U.S. addressees.

 9. Small time deposits—including retail RPs—are those issued in amounts of less than \$100,000. All IRAs and Keogh accounts at commercial banks and thrift institutions are subtracted from small time deposits.

 10. Large time deposits are those issued in amounts of \$100,000 or more, excluding those booked at international banking facilities.

 11. Large time deposits at commercial banks less those held by money market funds, depository institutions, the U.S. government, and foreign banks and official institutions.

 12. Includes both overnight and term.

Note. Tables 1.26, 1.27, and 1.28 have been revised to reflect changes in the Board's H.8 statistical release, "Assets and Liabilities of Commercial Banks in the United States." Table 1.27, "Assets and Liabilities of Large Weekly Reporting Commercial Banks," and table 1.28, "Large Weekly Reporting U.S. Branches and Agencies of Foreign Banks," are no longer being published in the Bulletin. Instead, abbreviated balance sheets for both large and small domestically chartered banks have been included in table 1.26, parts C and D. Data are both merger-adjusted and break-adjusted. In addition, data from large weekly reporting U.S. branches and agencies of foreign banks have been replaced by balance sheet estimates of all foreign-related institutions and are included in table 1.26, part E. These data are break-adjusted.

adjusted.
The not-seasonally-adjusted data for all tables now contain additional balance sheet items, which were available as of October 2. 1996.

which were available as of October 2, 1996.

1. Covers the following types of institutions in the fifty states and the District of Columbia: domestically chartered commercial banks that submit a weekly report of condition (large domestic), other domestically chartered commercial banks (small domestic); branches and agencies of foreign banks, and Edge Act and agreement corporations (foreign-related institutions). Excludes International Banking Facilities. Data are Wednesday values or pro rata averages of Wednesday values. Large domestic banks constitute a universe; data for small domestic banks and foreign-related institutions are estimates based on weekly samples and on quarter-end condition reports. Data are adjusted for breaks caused by reclassifications of assets and liabilities.

assers and fabilities.

The data for large and small domestic banks presented on pp. A17-19 are adjusted to remove the estimated effects of mergers between these two groups. The adjustment for mergers changes past levels to make them comparable with current levels. Estimated quantities of balance sheet items acquired in mergers are removed from past data for the bank group that contained the acquired bank and put into past data for the group containing the

acquiring bank. Balance sheet data for acquired banks are obtained from Call Reports, and a

- acquiring balin, brainties since dura for acquired balins are obtained from Call Reports, and a ratio procedure is used to adjust past levels.

 2. Excludes federal funds sold to, reverse RPs with, and loans made to commercial banks in the United States, all of which are included in "Interbank loans."

 3. Consists of reverse RPs with brokers and dealers and loans to purchase and carry

- securities.

 4. Includes vault cash, cash items in process of collection, balances due from depository institutions, and balances due from Federal Reserve Banks.

 5. Excludes the due-from position with related foreign offices, which is included in "Net due to related foreign offices."

 6. Excludes uncarned income, reserves for losses on loans and leases, and reserves for transfer risk. Loans are reported gross of these items.

 7. This balancing item is not intended as a measure of equity capital for use in capital adequacy analysis. On a seasonally adjusted basis, this item reflects any differences in the seasonal patterns estimated for total assets and total liabilities.

 8. Bair value of derivative contracts interest rate, foreign exchange rate, other commodity.
- seasonal patterns estimated for total assets and total liabilities.

 8. Fair value of derivative contracts (interest rate, foreign exchange rate, other commodity and equity contracts) in a gain/loss position, as determined under FASB Interpretation No. 39.

 9. Includes mortgage-backed securities issued by U.S. government agencies, U.S. government-sponsored enterprises, and private entities.

 10. Difference between fair value and historical cost for securities classified as available-for-sale under FASB Statement No. 115. Data are reported net of tax effects. Data shown are restated to include an estimate of these tax effects.

 11. Mainly commercial and industrial loans but also includes an unknown amount of credit extended to other than nonlinancial businesses.
- extended to other than nonfinancial businesses.

 12. Total amount outstanding.

^{1.} The prime rate is one of several base rates that banks use to price short-term business loans. The table shows the date on which a new rate came to be the predominant one quoted by a majority of the twenty-five largest banks by asset size, based on the most recent Call

Report. Data in this table also appear in the Board's H.15 (519) weekly and G.13 (415) monthly statistical releases. For ordering address, see inside front cover.

As reported by financial companies that place their paper directly with investors.
 Includes public utilities and firms engaged primarily in such activities as communications, construction, manufacturing, mining, wholesale and retail trade, transportation, and services.

- Representative closing yields for acceptances of the highest-rated money center banks.
 An average of dealer offering rates on nationally traded certificates of deposit.
 Bid rates for eurodollar deposits collected around 9:30 a.m. Eastern time. Data are for
- 11. But rates for eurocollar deposits collected around 9:30 a.m. Eastern time. Data are for indication purposes only.

 12. Auction date for daily data; weekly and monthly averages computed on an issue-date basis. On or after October 28, 1998, data are stop yields from uniform-price auctions. Before that, they are weighted average yields from multipte-price auctions.

 13. Yields on actively traded issues adjusted to constant maturities. SOURCE: U.S. Department of the Temperature of th
- 13. Yields on actively traded issues adjusted to constant maturiues. SOURCE: U.S. Department of the Treasury.

 14. General obligation bonds based on Thursday figures: Moody's Investors Service.

 15. State and local government general obligation bonds maturing in twenty years are used in compiling this index. The twenty-bond index has a rating roughly equivalent to Moodys' Al rating. Based on Thursday figures.

 16. Daily figures from Moody's Investors Service. Based on yields to maturity on selected long-term bonds.

 17. Standard & Poor's corporate series. Common stock ratio is based on the 500 stocks in the price index.
- the price index.

Note. Some of the data in this table also appear in the Board's H.15 (519) weekly and G.13 (415) monthly statistical releases. For ordering address, see inside front cover.

1. The daily effective federal funds rate is a weighted average of rates on trades through New York brokers.

2. Weekly figures are averages of seven calendar days, ending on Wednesday of the current week; monthly figures include each calendar day in the month.

3. Annualized using a 360-day year or bank interest.

4. Rate for the Federal Reserve Bank of New York.

5. Quoted on a discount basis.

6. Interest rates interpolated from data on certain commercial paper trades settled by the Depository Trust Company. The trades represent sales of commercial paper by dealers or direct issuers to investors (that is, the offer side). See the Board's Commercial Paper web pages (http://www.federalreserve.gov/releases/cp) for more information.

7. An average of offering rates on commercial paper for firms whose bond rating is AA or the equivalent. Series ended August 29, 1997.

8. An average of offering rates on paper directly placed by finance companies. Series ended August 29, 1997.

^{1.} In July 1976 a financial group, composed of banks and insurance companies, was added to the group of stocks on which the index is based. The index is now based on 400 industrial stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and

6. Margin requirements, stated in regulations adopted by the Board of Governors pursuant to the Securities Exchange Act of 1934, limit the amount of credit that can be used to purchase and carry "margin securities" (as defined in the regulations) when such credit is collateralized by securities. Margin requirements on securities are the difference between the market value (100 percent) and the maximum loan value of collateral as prescribed by the Board. Regulation T was adopted effective Oct. 15, 1934; Regulation U, effective May 1, 1936; Regulation G, effective Mar. 11, 1968; and Regulation X, effective Nov. 1, 1971. On Jan. 1, 1977, the Board of Governors for the first time established in Regulation T the initial margin required for writing options on securities, setting it at 30 percent of the current market value of the stock underlying the option. On Sept. 30, 1985, the Board changed the required initial margin, allowing it to be the same as the option maintenance margin required by the appropriate exchange or self-regulatory organization; such maintenance margin rules must be approved by the Securities and Exchange Commission.

stocks (formerly 425), 20 transportation (formerly 15 rail), 40 public utility (formerly 60), and 40 financial.

2. On July 5, 1983, the American Stock Exchange rebased its index, effectively cutting previous readings in half.

3. Since July 1983, under the revised Regulation T, margin credit at broker-dealers has included credit extended against stocks, convertible bonds, stocks acquired through the exercise of subscription rights, corporate bonds, and government securities. Separate reporting of data for margin stocks, convertible bonds, and subscription issues was discontinued in April 1084.

April 1984.

4. Free credit balances are amounts in accounts with no unfulfilled commitments to brokers and are subject to withdrawal by customers on demand.

5. Series initiated in June 1984.

Functional details do not sum to total outlays for calendar year data because revisions to monthly totals have not been distributed among functions. Fiscal year total for receipts and outlays do not correspond to calendar year data because revisions from the Budget have not been fully distributed across months.
 Old-age, disability, and hospital insurance, and railroad retirement accounts.
 Federal employee retirement contributions and civil service retirement and disability fund.

4. Deposits of earnings by Federal Reserve Banks and other miscellaneous receipts.
5. Includes interest received by trust funds.
6. Rents and royalties for the outer continental shelf, U.S. government contributions for employee retirement, and certain asset sales.

SOURCE. Fiscal year totals: U.S. Office of Management and Budget, Budget of the U.S. Government, Fiscal year 2002: monthly and half-year totals: U.S. Department of the Treasury, Monthly Treasury Statement of Receipts and Outlays of the U.S. Government.

^{1.} The U.S. Treasury first issued inflation-indexed securities during the first quarter of 1997.

Includes (not shown separately) securities issued to the Rural Electrification Administration, depository bonds, retirement plan bonds, and individual retirement bonds.
 Nonmarketable series denominated in dollars, and series denominated in foreign cur-

^{3.} Nonmarketable series denominated in dollars, and series denominated in foreign currency held by foreigners.

4. Held almost entirely by U.S. Treasury and other federal agencies and trust funds.

5. Data for Federal Reserve Banks and U.S. government agencies and trust funds are actual holdings; data for other groups are Treasury estimates.

6. U.S. Treasury securities bought outright by Federal Reserve Banks, see Bulletin table 1.18.

7. In March 1996, in a redefinition of series, fully defeased debt backed by nonmarketable federal securities was removed from "Other miscellaneous investors" and added to "State and local treasuries." The data shown here have been revised accordingly.

^{8.} Includes nonmarketable foreign series Treasury securities and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York.

9. Includes individuals, government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and noncorporate businesses, and other investors. SOUNCES. Data by type of security, U.S. Treasury Department, Monthly Statement of the Public Debt of the United States; data by holder, Federal Reserve Board of Governors, Flow of Funds Accounts of the United States and U.S. Treasury Department, Treasury Bulletin, unless otherwise noted.

^{1.} The figures represent purchases and sales in the market by the primary U.S. government securities dealers reporting to the Federal Reserve Bank of New York. Outright transactions include all U.S. government, federal agency, government-sponsored enterprise, mortgage-backed, and corporate securities scheduled for immediate and forward delivery, as well as all U.S. government securities traded on a when-issued basis between the announcement and issue date. Data do not include transactions under repurchase and reverse repurchase (resale) agreements. Averages are based on the number of trading days in the week.

^{2.} Outright Treasury inflation-indexed securities (THS) transactions are reported at principal value, excluding accrued interest, where principal value reflects the original issuance par amount (unadjusted for inflation) times the price times the index ratio.

NOTE: Major changes in the report form filed by primary dealers induced a break in the dealer data series as of the week ending July 4, 2001. Current weekly data may be found at the Federal Reserve Bank of New York web site (http://www.newyorkfed.org/pihome/statistics) under the Primary Dealer heading.

^{1.} Data for positions and financing are obtained from reports submitted to the Federal Reserve Bank of New York by the U.S. government securities dealers on its published list of primary dealers. Weekly figures are close-of-business Wednesday data. Positions for calendar days of the report week are assumed to be constant. Monthly averages are based on the number of calendar days in the month.

2. Net outright positions include all U.S. government, federal agency, government-sponsored enterprise, mortgage-backed, and corporate securities scheduled for immediate and forward delivery, as well as U.S. government securities traded on a when-issued basis between the announcement and issue date.

Primary Dealer heading.

^{3.} Figures cover financing U.S. government, federal agency, government-sponsored enterprise, mortgage-backed, and corporate securities. Financing transactions for Treasury inflation-indexed securities (TIIS) are reported in actual funds paid or received, except for pledged securities are reported at par value, which is the value of the security at original issuance (unadjusted for inflation).
NOTE. Major changes in the report form filed by primary dealers included a break in many series as of the week ending July 4, 2001. Current weekly data may be found at the Federal Reserve Bank of New York web site (http://www.newyorkfed.org/pihome/statistics) under the Primary Dealer heading.

10. The Financing Corporation, established in August 1987 to recapitalize the Federal Savings and Loan Insurance Corporation, undertook its first borrowing in October 1987.

11. The Farm Credit Financial Assistance Corporation, established in January 1988 to provide assistance to the Farm Credit System, undertook its first borrowing in July 1988.

12. The Resolution Funding Corporation, established by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, undertook its first borrowing in October 1989.

1989.

13. The FFB, which began operations in 1974, is authorized to purchase or sell obligations issued, sold, or guaranteed by other federal agencies. Because FFB incurs debt solely for the purpose of lending to other agencies, its debt is not included in the main portion of the table to avoid double counting.

14. Includes FFB purchases of agency assets and guaranteed loans; the latter are loans guaranteed by numerous agencies, with the amounts guaranteed by any one agency generally being small. The Farmers Home Administration entry consists exclusively of agency assets, whereas the Rural Electrification Administration entry consists of both agency assets and guaranteed loans. guaranteed loans

^{1.} Consists of mortgages assumed by the Defense Department between 1957 and 1963 under family housing and homeowners assistance programs.

2. Includes participation certificates reclassified as debt beginning Oct. 1, 1976.

3. On-budget since Sept. 30, 1976.

4. Consists of debentures issued in payment of Federal Housing Administration insurance claims. Once issued, these securities may be sold privately on the securities market.

5. Certificates of participation issued before fiscal year 1969 by the Government National Mortgage Association acting as trustee for the Farmers Home Administration: the Department of Health. Education, and Welfare; the Department of Housing and Urban Development; the Small Business Administration; and the Veterans Administration.

6. Off-budget.

7. Includes outstanding noncontingent liabilities: notes, bonds, and debentures. Includes Federal Agriculture Mortgage Corporation; therefore, details do not sum to total. Some data are estimated.

^{8.} Excludes borrowing by the Farm Credit Financial Assistance Corporation, which is Before late 1982, the association obtained financing through the Federal Financing Bank (FFB). Borrowing excludes that obtained from the FFB, which is shown on line 22.

Nore. This table has been revised to incorporate several changes resulting from the benchmarking of finance company receivables to the June 1996 Survey of Finance Companies. In that benchmark survey, and in the monthly surveys that have followed, more detailed breakdowns have been obtained for some components. In addition, previously unavailable data on securitized real estate loans are now included in this table. The new information has resulted in some reclassification of receivables among the three major categories (consumer, real estate, and business) and in discontinuities in some component series between May and June 1996.

June 1996.

Includes finance company subsidiaries of bank holding companies but not of retailers and banks. Data in this table also appear in the Board's G.20 (422) monthly statistical release. For ordering address, see inside front cover.

1. Owned receivables are those carried on the balance sheet of the institution. Managed receivables are outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator. Data are shown

before deductions for unearned income and losses. Components may not sum to totals

- before deductions for unearned income and losses. Components may not sum to totals because of rounding.

 2. Excludes revolving credit reported as held by depository institutions that are subsidiaries of finance companies.

 3. Includes personal cash loans, mobile home loans, and loans to purchase other types of consumer goods, such as appliances, apparel, boats, and recreation vehicles.

 4. Outstanding balances of pools upon which securities have been issued; these balances are no longer carried on the balance sheets of the loan originator.

 5. Credit arising from transactions between manufacturers and dealers, that is, floor plan financine.

- Credit arising from transactions between manufacturers and dealers, marks, noor pranfinancing,
 Includes loans on commercial accounts receivable, factored commercial accounts, and receivable dealer capital: small loans used primarily for business or farm purposes; and wholesale and lease paper for mobile homes, campers, and travel trailers.

Weighted averages based on sample surveys of mortgages originated by major institutional lender groups for purchase of newly built homes; compiled by the Federal Housing Finance Board in cooperation with the Federal Deposit Insurance Corporation.
 Includes all fees, commissions, discounts, and "points" paid (by the borrower or the seller) to obtain a loan.
 Average effective interest rate on loans closed for purchase of newly built homes,

Average effective interest rate on loans closed for purchase of newly built homes, assuming prepayment at the end of ten years.
 Average contract rate on new commitments for conventional first mortgages; from U.S. Department of Housing and Urban Development (HUD). Based on transactions on the first day of the subsequent month.
 Average gross yield on thirty-year, minimum-downpayment first mortgages insured by the Federal Housing Administration (FHA) for immediate delivery in the private secondary market. Based on transactions on first day of subsequent month.

^{6.} Average net yields to investors on fully modified pass-through securities backed by mortgages and guaranteed by the Government National Mortgage Association (GNMA), assuming prepayment in twelve years on pools of thirty-year mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs.

7. Does not include standby commitments issued, but includes standby commitments converted.

8. Includes participation leaves a well-security and the process of th

converted.

8. Includes participation loans as well as whole loans.

9. Includes conventional and government-underwritten loans. The Federal Home Loan Mortgage Corporation's mortgage commitments and mortgage transactions include activity under mortgage securities swap programs, whereas the corresponding data for the Federal National Mortgage Association exclude swap activity.

Multifamily debt refers to loans on structures of five or more units.
 Includes loans held by nondeposit trust companies but not loans held by bank trust

Includes loans held by nondeposit trust companies but not loans held by bank trust departments.
 Includes savings banks and savings and loan associations.
 FmHA-guaranteed securities sold to the Federal Financing Bank were reallocated from FmHA mortgage pools to FmHA mortgage holdings in 1986:Q4 because of accounting changes by the Farmers Home Administration.
 Outstanding principal balances of mortgage-backed securities insured or guaranteed by the agency indicated.

^{6.} Includes securitized home equity loans.
7. Other holders include mortgage companies, real estate investment trusts, state and local credit agencies, state and local retirement funds, noninsured pension funds, credit unions, and finance companies.
SOURCE. Based on data from various institutional and government sources. Separation of nonfarm mortgage debt by type of property, if not reported directly, and interpolations and extrapolations, when required for some quarters, are estimated in part by the Federal Reserve. Line 69 from Inside Mortgage Securities and other sources.

^{1.} Data in this table appear in the Board's G.17 (419) monthly statistical release. The data are also available on the Board's web site, http://www.federalreserve.gov/releases/g/17. The latest historical revision of the industrial production index and the capacity utilization rates was released in November 2001. The recent annual revision will be described in an article in an upcoming issue of the Bulletin. For a description of the methods of estimating industrial production and capacity utilization, see "Industrial Production and Capacity Utilization: Historical Revision and Recent Developments," Federal Reserve Bulletin, vol. 83 (February 1997), pp. 67–92, and the references cited therein. For details about the construction of individual industrial production series, see "Industrial Production: 1989 Developments and Historical Revision," Federal Reserve Bulletin, vol. 76 (April 1990), pp. 187–204.

2. Ratio of index of production to index of capacity. Based on data from the Federal Reserve, U.S. Department of Commerce, and other sources.

- 3. Index of dollar value of total construction contracts, including residential, nonresidential, and heavy engineering, from McGraw-Hill Information Systems Company, F.W. Dodge
- Division.

 4. Based on data from the U.S. Department of Labor, Employment and Earnings. Scrics
- Based on data from the U.S. Department of Labor, Employment and Earnings. Series covers employees only, excluding personnel in the armed forces.
 Based on data from U.S. Department of Commerce, Survey of Current Business.
 Based on data not seasonally adjusted. Seasonally adjusted data for changes in the price indexes can be obtained from the U.S. Department of Labor, Bureau of Labor Statistics, Monthly Labor Review.

Note. Basic data (not indexes) for series mentioned in notes 4 and 5, and indexes for series mentioned in notes 3 and 6, can also be found in the Survey of Current Business.

^{1.} Beginning January 1994, reflects redesign of current population survey and population

Source. Based on data from U.S. Department of Labor, Employment and Earnings.

Beginning January 1994, reflects redesign or current population and 17 min from the 1990 census.
 Persons sixteen years of age and older, including Resident Armed Forces. Monthly figures are based on sample data collected during the calendar week that contains the twelfth day; annual data are averages of monthly figures. By definition, seasonality does not exist in contains former. population figures.
3. Includes self-employed, unpaid family, and domestic service workers.

^{4.} Includes all full- and part-time employees who worked during, or received pay for, the pay period that includes the twelfth day of the month; excludes proprietors, self-employed persons, household and unpaid family workers, and members of the armed forces. Data are adjusted to the March 1992 benchmark, and only seasonally adjusted data are available at this

^{1.} Data in this table also appear in the Board's G.17 (419) monthly statistical release. The data are also available on the Board's web site, http://www.federalreserve.gov/rcleases/g17. The latest historical revision of the industrial production index and the capacity utilization rates was released in November 2001. The recent annual revision will be described in an article in an upcoming issue of the Bulletin. For a description of the methods of estimating industrial production and capacity utilization, see "Industrial Production and Capacity Utilization, Historical Revision and Recent Developments," Federal Reserve Bulletin, vol. 36 (February 1997), pp. 67–92, and the references cited therein. For details about the construction of individual industrial production series, see "Industrial Production: 1989 Developments and Historical Revision." Federal Reserve Bulletin, vol. 76 (April 1990), pp. 187–204.

2. Capacity utilization is calculated as the ratio of the Federal Reserve's seasonally adjusted index of industrial production to the corresponding index of capacity.

^{3.} Primary processing includes textiles; lumber; paper: industrial chemicals; synthetic materials; fertilizer materials; petroleum products; rubber and plastics; stone, clay, and glass; primary metals; and fabricated metals.
4. Advanced processing includes foods, tobacco, apparel, furniture and fixtures, printing and publishing, chemical products such as drugs and toiletries, agricultural chemicals, leather and products, machinery, transportation equipment, instruments, and miscellaneous manufacturing.

Monthly highs, 1978–80; monthly lows, 1982.
 Monthly highs, 1988–89; monthly lows, 1990–91.

^{1.} Data in this table appear in the Board's G.17 (419) monthly statistical release. The data are also available on the Board's web site, http://www.federalreserve.gov/releases/g17. The latest historical revision of the industrial production index and the capacity utilization rates was released in November 2001. The recent annual revision will be described in an article in an upcoming issue of the Bulletin. For a description of the methods of estimating industrial production and capacity utilization; see "Industrial Production and Capacity Utilization:

Historical Revision and Recent Developments," Federal Reserve Bulletin, vol. 83 (February 1997), pp. 67–92, and the references cited therein. For details about the construction of individual industrial production series, see "Industrial Production: 1989 Developments and Historical Revision," Federal Reserve Bulletin, vol. 76 (April 1990), pp. 187–204.

SOURCE. Bureau of the Census estimates for all series except (1) mobile homes, which are private, domestic shipments as reported by the Manufactured Housing Institute and seasonally adjusted by the Census Bureau, and (2) sales and prices of existing units, which are published by the National Association of Realtors. All back and current figures are available from the originating agency. Permit authorizations are those reported to the Census Bureau from 19,000 jurisdictions beginning in 1994.

^{1.} Not at annual rates.
2. Not seasonally adjusted.
3. Recent data on value of new construction may not be strictly comparable with data for previous periods because of changes by the Bureau of the Census in its estimating techniques. For a description of these changes, see Construction Reports (C-30-76-5), issued by the Census Bureau in July 1976.

^{1.} Excludes deposits and U.S. Treasury securities held for international and regional

SOURCE, FT900, U.S. Department of Commerce, Bureau of the Census and Bureau of Economic Analysis.

^{1.} Gold held "under earmark" at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States; see table 3.13, line 3. Gold stock is valued at \$42.22 per fine troy ounce.

2. Special drawing rights (SDRs) are valued according to a technique adopted by the International Monetary Fund (IMF) in July 1974. Values are based on a weighted average of exchange rates for the currencies of member countries. From July 1974 through December 1980, sixteen currencies were used; since January 1981, five currencies have been used. U.S.

SDR holdings and reserve positions in the IMF also have been valued on this basis since July 1974.

Includes allocations of SDRs by the International Monetary Fund on Jan. 1 of the year indicated, as follows: 1970—\$867 million; 1971—\$717 million; 1972—\$710 million; 1979—\$1,139 million; 1980—\$1,152 million; 1981—\$1,093 million; plus net transactions in SDRs.
 Valued at current market exchange rates.

organizations

2. Marketable U.S. Treasury bills, notes, and bonds and nonmarketable U.S. Treasury securities, in each case measured at face (not market) value.

^{3.} Held in foreign and international accounts and valued at \$42,22 per fine troy ounce; not included in the gold stock of the United States.

3.15 SELECTED U.S. LIABILITIES TO FOREIGN OFFICIAL INSTITUTIONS

^{1.} The banking offices covered by these data include U.S. offices and foreign branches of U.S. banks, including U.S. banks that are subsidiaries of foreign banks. Offices not covered include U.S. agencies and branches of foreign banks. Beginning March 1994, the data include large foreign subsidiaries of U.S. banks. The data also include other types of U.S. depository institutions as well as some types of brokers and dealers. To eliminate duplication, the data are adjusted to exclude the claims on foreign branches held by a U.S. office or another foreign branch of the same banking institution.

These data are on a gross claims basis and do not necessarily reflect the ultimate country risk or exposure of U.S. banks. More complete data on the country risk exposure of U.S. banks are available in the quarterly Country Exposure Lending Survey published by the Federal Financial Institutions Examination Council.

Organization of Petroleum Exporting Countries, shown individually; other members of OPEC (Algeria, Gabon, Iran, Iraq, Kuwait, Libya, Nigeria, Qatar, Saudi Arabia, and United Arab Emirates), and Bahrain and Oman (not formally members of OPEC).
 Excludes Liberia. Beginning March 1994 includes Namibia.
 As of December 1992, excludes other republics of the former Soviet Union.
 Includes Canal Zone.
 Foreign breach claims only.

Treatment and Zenzi.
 Foreign branch claims only.
 Includes New Zealand, Liberia, and international and regional organizations.

^{1.} Averages of certified noon buying rates in New York for cable transfers. Data in this table also appear in the Baord's G.5 (405) monthly statistical release. For ordering address, see inside front cover.

2. U.S. cents per currency unit.

3. The curo is reported in place of the individual euro area currencies. By convention, the rate is reported in U.S. dollars per curo. The bilateral currency rates can be derived from the euro rate by using the fixed conversion rates (in currencies per euro) as shown below:

Enro	acual	

luais			
13.7603	Austrian schillings		Italian lire
40.3399	Belgian francs		Luxembourg francs
5.94573	Finnish markkas	2.20371	Netherlands guilders
6.55957	French francs		Portuguese escudos
1.95583	German marks	166.386	Spanish pesetas
.787564	Irish pounds	340.750	Greek drachmas

^{4.} Starting with the February 2001 Bulletin, revised index values resulting from the annual revision of data that underlic the calculated trade weights are reported. For more information on the indexes of the foreign exchange value of the dollar, see Federal Reserve Bulletin, vol. 84 (October 1998), pp. 811–818.

5. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of U.S. trading partners. The weight for each currency is computed as an average of U.S. bilateral import shares from and export shares to the issuing country and of a measure of the importance to U.S. exporters of that country's trade in third country markets.

6. Weighted average of the foreign exchange value of the U.S. dollar against a subset of broad index currencies that circulate widely outside the country of issue. The weight for each currency is its broad index weight scaled so that the weights of the subset of currencies in the index sum to one.

index surp to one.

7. Weighted average of the foreign exchange value of the U.S. dollar against a subset of broad index currencies that do not circulate widely outside the country of issue. The weight for each currency is its broad index weight scaled so that the weights of the subset of currencies in the index sum to one.

Note. Components may not sum to totals because of rounding. The priced services financial statements consist of these tables and the accompanying notes.

(1) SHORT-TERM ASSETS

The imputed reserve requirement on clearing balances held at Reserve Banks by depository institutions reflects a treatment comparable to that of compensating balances held at correspondent banks by respondent institutions. The reserve requirement imposed on respondent balances must be held as vault cash or as nonearning balances maintained at a Reserve Bank; thus, a portion of priced services clearing balances held with the Federal Reserve is shown as required reserves on the asset side of the balance sheet. The remainder of clearing balances is assumed to be invested in three-month Treasury bills, shown as investment in marketable requirities.

assumed to be invested in three-month Treasury bills, shown as investment in marketable securities.

Receivables are (1) amounts due the Reserve Banks for priced services and (2) the share of suspense-account and difference-account balances related to priced services.

Materials and supplies are the inventory value of short-term assets.

Items in process of collection are gross Federal Reserve cash items in process of collection (CIPC) stated on a basis comparable to that of a commercial bank. It reflects adjustments for intra-System items that would otherwise be double-counted on a consolidated Federal Reserve balance sheet; adjustments for items associated with non-priced items, such as those collected for government agencies; and adjustments for items associated with providing fixed availability or credit hefore items are received and processed. Among the costs to be recovered under the Monetary Control Act is the cost of float, or net CIPC, during the period (the difference between gross CIPC and deferred-availability items, which is the portion of gross CIPC that involves a financing cost), valued at the federal funds rate.

(2) LONG-TERM ASSETS

Consists of long-term assets used solely in priced services, the priced-services portion of long-term assets shared with non-priced services, and an estimate of the assets of the Board of Governors used in the development of priced services. Effective January 1, 1987, the Reserve Banks implemented the Financial Accounting Standards Board's Statement of Financial Accounting Standards No. 87. Employer's Accounting for Pensions (SFAS 87). Accordingly, the Federal Reserve Banks recognized credits to expenses of \$86.6 million in the third quarter of 2000, \$25.7 million in the first quarter of 2001, \$35.7 million in the first quarter of 2001, \$50.4 million in the first quarter of 2001, \$25.2 million in the first quarter of 2001, \$35.9 million in the first quarter of 2001, \$35.0 million in the second quarter of 2001, \$25.2 million in the first quarter of 2001, \$35.0 million in the second quarter of 2001, \$25.2 million in the first quarter of 2001, \$35.0 million in the second quarter of 2001, \$35.0 million in the first quarter of 2001, \$35.0 million in the second quarter of 2001, \$35.0 million in the first quarter of 2001, \$35.0 million in the second quarter of 2001, \$35.0 million in the first quarter of 2001, \$35.0 million in the second quarter of 2001, \$35.0 million

(3) LIABILITIES AND EQUITY

Under the matched-book capital structure for assets that are not "self-financing," short-term assets are financed with short-term debt. Long-term assets are financed with long-term debt and equity in a proportion equal to the ratio of long-term debt to equity for the fifty largest bank holding companies, which are used in the model for the private-sector adjustment factor (PSAF). The PSAF consists of the taxes that would have been paid and the return on capital that would have been provided had priced services been furnished by a private-sector firm. Other short-term liabilities include clearing balances maintained at Reserve Banks and deposit balances arising from float. Other long-term liabilities consist of obligations on capital leases.

Note. Components may not sum to totals because of rounding. The priced services financial statements consist of these tables and the accompanying notes.

(4) REVENUE

Revenue represents charges to depository institutions for priced services and is realized from each institution through one of two methods: direct charges to an institution's account or charges against its accumulated earnings credits.

(5) OPERATING EXPENSES

Operating expenses consist of the direct, indirect, and other general administrative expenses of the Reserve Banks for priced services plus the expenses for staff members of the Board of Governors working directly on the development of priced services. The expenses for Board staff members totaled \$3.68 million for the first, second, and third quarters of 2001 and \$3.15 million for the first, second, and third quarters of 2000. The credit to expenses under SFAS 87 (see note 2) is reflected in operating expenses.

(6) IMPUTED COSTS

Imputed costs consist of interest on float, interest on debt, sales taxes, and the FDIC assessment. Interest on float is derived from the value of float to be recovered, either explicitly or through per-item fees, during the period. Float costs include costs for checks, book-entry securities, non-cash collection, ACH, and funds transfers.

Interest is imputed on the debt assumed necessary to finance priced-service assets. The sales taxes and FDIC assessment that the Federal Reserve would have paid had it been a private-sector firm are among the components of the PSAF (see note 3).

Float coats are based on the actual float incurred for each priced service, multiplied by the appropriate federal funds rate. Other imputed costs are allocated among priced services according to the ratio of operating expenses less shipping expenses for each service to the total expenses for all services less the total shipping expenses for all services.

The following list shows the daily average recovery of float (before converting to float costs) by the Reserve Banks for the first quarter of 2001 and 2000 in millions of dollars:

	2001	2000
Total float	2,642.0	725.4
Uncovered float	154.8	145.6
Float subject to recovery Sources of float recovery:	2,487.2	579.8
Income on clearing balances	248.2	58.0
As-of adjustments	408.7	430.8
Direct charges	1,696.2	314.2
Per-item fecs	134.1	(223.2)

Unrecovered float includes float generated by services to government agencies and by other central bank services. Float recovered through income on clearing balances is the result of the increase in investable clearing balances: the increase is produced by a deduction for float for eash items in process of collection, which reduces imputed reserve requirements. The income on clearing balances reduces the float to be recovered through other means. As-of adjustments are memorandum adjustments to an institution's reserve or clearing position to recover float incurred when an institution chooses to close on a normal business day and for float incurred when an institution chooses to close on a normal business day and for float incurred on interterritory check transportation. Float recovered through direct charges is valued at cost using the federal funds rate and charged directly to an institution's account. Float recovered through per-item fees is valued at the federal funds rate and has been added to the cost base subject to recovery. The 2001 float levels were unusually high related to the Soptember 11 events. The 2001 float levels were unusually high related to the September 11 events.

(7) OTHER INCOME AND EXPENSES

Consists of imputed investment income on clearing balances and the actual cost of earnings credits. Investment income on clearing balances represents the average coupon-equivalent yield on three-month Treasury bills applied to the *total* clearing balance maintained, adjusted for the effect of reserve requirements on clearing balances. Expenses for earnings credits granted to depository institutions on their clearing balances are derived by applying the average federal funds rate to the *required* portion of the clearing balances, adjusted for the net effect of reserve requirements on clearing balances.

(8) INCOME TAXES

Imputed income taxes are calculated at the effective tax rate derived from the PSAF model (see note 3).

(9) RETURN ON EQUITY

Represents the after-tax rate of return on equity that the Federal Reserve would have earned had it been a private business firm, as derived from the PSAF model (see note 3).

Maps of the Federal Reserve System

LEGEND

Both pages

- Federal Reserve Bank city
- Board of Governors of the Federal Reserve System, Washington, D.C.

Note

The Federal Reserve officially identifies Districts by number and Reserve Bank city (shown on both pages) and by letter (shown on the facing page).

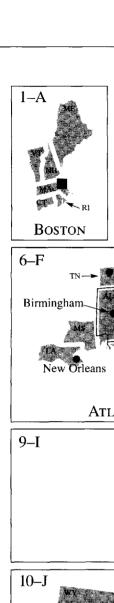

In the 12th District, the Seattle Branch serves Alaska, and the San Francisco Bank serves Hawaii.

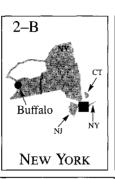

The System serves commonwealths and territories as follows: the New York Bank serves the Commonwealth

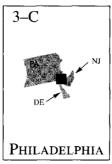

Facing page

- Federal Reserve Branch city
- Branch boundary

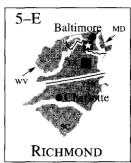

of Puerto Rico and the U.S. Virgin Islands; the San Francisco Bank serves American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. The Board of Governors revised the branch boundaries of the System most recently in February 1996.

Publications of Interest

FEDERAL RESERVE REGULATORY SERVICE

To promote public understanding of its regulatory functions, the Board publishes the *Federal Reserve Regulatory Service*, a four-volume loose-leaf service containing all Board regulations as well as related statutes, interpretations, policy statements, rulings, and staff opinions. For those with a more specialized interest in the Board's regulations, parts of this service are published separately as handbooks pertaining to monetary policy, securities credit, consumer affairs, and the payment system.

These publications are designed to help those who must frequently refer to the Board's regulatory materials. They are updated monthly, and each contains citation indexes and a subject index.

The Monetary Policy and Reserve Requirements Handbook contains Regulations A, D, and Q, plus related materials.

The Securities Credit Transactions Handbook contains Regulations T, U, and X, dealing with extensions of credit for the purchase of securities, together with related statutes, Board interpretations, rulings, and staff opinions. Also included is the Board's list of foreign margin stocks.

The Consumer and Community Affairs Handbook contains Regulations B, C, E, G, M, P, Z, AA, BB, and DD, and associated materials.

The Payment System Handbook deals with expedited funds availability, check collection, wire transfers, and risk-reduction policy. It includes Regulations CC, J, and EE, related statutes and commentaries, and policy statements on risk reduction in the payment system.

For domestic subscribers, the annual rate is \$200 for the *Federal Reserve Regulatory Service* and \$75 for each handbook. For subscribers outside the United States, the price including additional air mail costs is \$250 for the service and \$90 for each handbook.

The Federal Reserve Regulatory Service is also available on CD-ROM for use on personal computers. For a standalone PC, the annual subscription fee is \$300. For network subscriptions, the annual fee is \$300 for 1 concurrent users, \$750 for a maximum of 10 concurrent users, \$2,000 for a maximum of 50 concurrent users, and \$3,000 for a maximum of 100 concurrent users. Subscribers outside the United States should add \$50 to cover additional airmail costs. For further information, call (202) 452-3244.

All subscription requests must be accompanied by a check or money order payable to the Board of Governors of the Federal Reserve System. Orders should be addressed to Publications Services, mail stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551.

GUIDE TO THE FLOW OF FUNDS ACCOUNTS

A new edition of *Guide to the Flow of Funds Accounts* is now available from the Board of Governors. The new edition incorporates changes to the accounts since the initial edition was published in 1993. Like the earlier publication, it explains the principles underlying the flow of funds accounts and describes how the accounts are constructed. It lists each flow series in the Board's flow of funds publication, "Flow of Funds Accounts of the United States" (the Z.1 quarterly statistical release),

and describes how the series is derived from source data. The *Guide* also explains the relationship between the flow of funds accounts and the national income and product accounts and discusses the analytical uses of flow of funds data. The publication can be purchased, for \$20.00, from Publications Services, Mail Stop 127, Board of Governors of the Federal Reserve System, Washington, DC 20551.

Federal Reserve Statistical Releases Available on the Commerce Department's Economic Bulletin Board

The Board of Governors of the Federal Reserve System makes some of its statistical releases available to the public through the U.S. Department of Commerce's economic bulletin board. Computer access to the releases can be obtained by subscription.

For further information regarding a subscription to the economic bulletin board, please call (202) 482-1986. The releases transmitted to the economic bulletin board, on a regular basis, are the following:

Reference Number	Statistical release	Frequency of release
H.3	Aggregate Reserves	Weekly/Thursday
H.4.1	Factors Affecting Reserve Balances	Weekly/Thursday
H.6	Money Stock	Weekly/Thursday
H.8	Assets and Liabilities of Insured Domestically Chartered and Foreign Related Banking Institutions	Weekly/Monday
H.10	Foreign Exchange Rates	Weekly/Monday
H.15	Selected Interest Rates	Weekly/Monday
G.5	Foreign Exchange Rates	Monthly/end of month
G.17	Industrial Production and Capacity Utilization	Monthly/midmonth
G.19	Consumer Installment Credit	Monthly/fifth business day
Z.1	Flow of Funds	Quarterly
