SUMMARY FOR DECEMBER.

Well-sustained business and industrial activity is shown by the figures for the month of December. In many instances increases were noted over the preceding month, although there is usually a let-up in industrial movements in December. The improvement in the transportation situation enabled heavier shipments to be made in many commodities, particularly in building materials.

Retail sales were of record proportions and current reports indicate that sales have been well maintained during January. Prices remained relatively stable, with further increases in agricultural products, thus bringing these more nearly into line with other commodities. Prices received by farmers for crops increased from an index number of 118 in November to 123 in December. This is the highest figure reached since January, 1921. The farm price of live stock declined slightly, giving an index number of only 104 in December, compared with 100 as the average for 1913. The cost of living has continued to rise gradually, due largely to increases in food and fuels.

In the textile field, cotton consumption declined from the November high record, wool receipts increased, and silk consumption declined slightly.

Pig-iron production increased, but the output of steel ingots fell off slightly, and unfilled orders of the United States Steel Corporation again declined, a factor taken in the trade as indicative of better deliveries and sustained production rather than a falling off in the volume of orders received.

Building contracts awarded in December were about 10 per cent greater than in December, 1921, and almost three times as large, measured by floor space, as in December, 1920.

Fabricated structural-steel sales increased over November, whereas a seasonal decline might have been expected. Some seasonal declines were shown in the production of lumber, but the movement was far in excess of a year ago.

Coal production continued heavy. The output of automobiles declined but slightly in a seasonal movement.

On the whole, a bright outlook for the immediate future, so far as domestic trade and industry is concerned, is shown by these statistics. The disturbed foreign situation has so far appeared to have but little effect upon such delicate indicators of industrial and commercial health as the stock and bond market.

BUSINESS INDICATORS.

The following table gives comparative index numbers for a selected list of important business movements. It is believed that this table will prove useful, because it separates out from the large mass of material a comparatively small number of items which are often regarded as indicative of business in general.

The table has been divided into two parts, the first containing those items for which index numbers can be calculated, using 1913 as a base. The second part contains items for which comparable data back to 1913 are not available. This latter group of index numbers is calculated by letting the 1919 monthly average equal 100. Care should therefore be exercised in comparing the absolute value of the two sets of data. In either group, however, the upward or downward trend of the index numbers, compared to previous months, does reflect the present tendency in each item and will give a basis for business judgment.

*Monthly statistics on the movements since January, 1913, or as far back as available, are given on pages 47-49 of the December Survey (No. 16).

¹ Monthly prices are for the 15th of the month indicated.

² Based on the total computed production reported by 5 associations. Includes southern pine, Douglas fir, western pine, North Carolina pine, and Michigan hard and soft woods. The total production of these associations in 1919 was equal to 11,190,000,000 board feet, compared with a total lumber production for the country of 34,552,000,000 board feet reported by the census.

³ Less than 1.

⁴ Yearly figures are monthly averages for the crop year ending July 31 of year indicated.

COMPARISON OF PRESENT WHOLESALE PRICES WITH PEAK AND PRE-WAR.

(Relative prices 1913=100.)

WHOLESALE PRICE COMPARISONS.—MAXIMUM PRICE COMPARED TO PRICE IN RECENT MONTHS.

NOTE.—Prices to the producer on farm products are from U. S. Department of Agriculture, Bureau of Agricultural Economics. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics, except market price of wool compiled by U. S. Department of Commerce, Bureau of the Census. As far as possible all quotations represent prices to the producer or at the mill. See diagram on opposite page.

Sulphuric acid, 66 degrees (New York).....	Feb., 1916	250	73	70	70	0.0

COMPARISON OF WHOLESALE PRICES BY GROUPS.

(U. S. Department of Labor index numbers. Relative prices 1913=100.)

BUSINESS CONDITIONS IN DECEMBER.

The following pages contain a review by the principal industries of the more important statistics shown in the table on the "Trend of business movements" (p. 24). Summaries of production, stocks, sales, and price changes are given also.

PRODUCTION.

Productive activity always shows a seasonal decline in the last month of the year. In December, 1922, this decline was not so marked as in many preceding years. Reports indicated that manufacturing plants reduced the holiday vacations to a minimum and in most industries endeavored to keep their plants running on full time. That some reduction in the average output did occur is indicated by figures in the accompanying table, which gives index numbers showing the course of production since 1919.

Out of the 50 commodities for which figures are available, at the time this is written, 32 showed a decline compared with November and 18 increased. If the comparison is made with the corresponding month a year ago a better idea is obtained of the progress which industry has made during the 12 months. Of the same 50 commodities, 44 show an increase over the output in December, 1921, and only 6 declined.

Compared with the average for 1919, there were 32 commodities [whose output in December, 1922, was equal to or exceeded that level, and only 18 which had a smaller output.

Last month we gave a table showing the 11-month total production for a number of commodities for 1921 and 1922. The accompanying table gives the total for each of the last three calendar years for a number of industries.

COURSE OF PRODUCTION SINCE 1919.

	RELATIVE PRODUCTION (1919=100).									RELATIVE PRODUCTION (1919=100).

Last month we also gave a table showing the output in per cent of capacity and some employment figures taken from the advance reports of the 1921 census of manufactured products. The accompanying table, which supplements the former one, gives correspond-

ing data from such advance reports as have appeared during the past month. Copies of these advance reports showing many other figures may be obtained on application to the Bureau of the Census, Washington, D. C.

COURSE OF PRODUCTION SINCE 1919.

COMPARISON OF DECEMBER PRODUCTION WITH PRE-WAR.

STOCKS.

On the whole, stocks in the hands of manufacturers tended to increase in December. Out of 42 commodities on which stock figures are available at the time of writing, 24 showed an increase over November, 16 declined and 2 showed no change. Compared with a year ago stocks, on the whole, are smaller. Of the same 42 commodities, 27 showed smaller stocks than in December, 1921, 14 showed increases, and 1 no change.

COURSE OF COMMODITY STOCKS SINCE 1919. (Taken at end of month.)

SALES.

As brought out elsewhere in this bulletin, retail sales were of record proportion in December. As usual, some declines occurred in the orders received by manufacturers during the last month of the year. Of the 13 individual commodities listed in the accompanying table, 6 increased and 7 declined compared with November. In most cases the decreases were slight.

Compared with December, 1921, every one of the 13 commodities showed a very marked increase, while 12 out of the 13 showed larger December sales than the average for the year 1919.

¹ Items based on value.² Relative proportion of orders to total transactions.

PRICES.

The most significant movement in prices during December was the increase in farm products, thus bringing them more into line with other commodities. The index of the Department of Agriculture on the farm prices of crops rose to 123 in December. This is an increase of 5 points, or 4.2 per cent, and represents the highest level since January, 1921. The prices of live stock declined slightly, making the farm price index only 104. A portion of this decline is seasonal, although the level is lower than other groups of commodities.

The wholesale price index of the Department of Labor showed no change in December, compared with November. The index number of 156 represents the highest level reached since February, 1921, and may be compared with the peak of 247 in May, 1920. In December, increases in farm products, foodstuffs, cloth and clothing, chemicals and drugs, and house furnishing goods were offset by declines in fuel and lighting and in metals and metal products. The groups of building materials and miscellaneous commodities showed no change.

The grouping of these same prices by the Federal Reserve Board showed slight increases in the prices of total raw products and in consumers' goods, while producers' goods declined. Under raw products increases occurred in agricultural and forest products.

Dun's wholesale index number showed no change in December, while Bradstreet's index declined one point.

The retail price of food rose from 145 in November to 147 in December, marking the highest level for the year.

The monthly index of cost of living as compiled by the National Industrial Conference Board rose one point in December, reaching an index of 159. This increase was due to the higher cost of food and of fuel and light. The quarterly figures on the cost of living as compiled by the United States Department of Labor rose from 166.3 in September to 169.5 in December. By far the largest increase occurred in foods.

Foreign wholesale prices remained relatively stationary, with the exception of a significant rise for France.

The prices of individual commodities, as shown in the diagram and table on pages 4 and 5, indicate the upward tendency in farm products and foods. Of the 9 farm products for which relative prices to the producer are given, 7 increased and 2, beef cattle and hogs, declined.

Of the remaining 52 wholesale market prices given, 25 increased, 13 declined, and 14 showed no change. Fifteen of the 25 commodities showing increases were in the groups of farm products and foods.

TEXTILES.

Wool consumption declined slightly from the high November figures. Foreign wool receipts at Boston made a new high record since April, 1921, but domestic receipts were small, only half those of a year ago. Machinery activity in woolen mills showed further increases, with all classes of machinery except narrow looms working at over 80 per cent of capacity operation. The average price of raw wool to the producer advanced to over 35 cents per pound, the highest since June, 1920, but fine Ohio wool at Boston declined slightly. Yarns and fabrics remained unchanged.

The consumption of cotton declined from the November high record, but exceeded the December, 1921, consumption. Stocks at mills increased con-

EXPORTS AND CONSUMPTION OF COTTON.

siderably, while warehouse stocks declined and the world visible supply of American cotton showed a seasonal decline at about 15 per cent less than last year's visible. Exports of raw cotton were almost 30 per cent less than the November high mark, while cotton-cloth exports declined slightly. The number of active cotton spindles was larger than at any time since 1919, but total activity was less than in November. Prices increased slightly all along the line.

COTTON CONSUMPTION IN NORTHERN AND SOUTHERN MILLS.

COTTON GINNED TO SPECIFIED DATES.

STOCKS OF COTTON: NUMBER OF DAYS' SUPPLY AT DAILY RATE OF CONSUMPTION.

Production of knit underwear in December was the lowest, with one exception, since July, 1921, but orders increased and unfilled orders at the end of December were the highest on record.

Consumption of raw silk, as reported by the association, again declined, while stocks continued to mount to a new high record since October, 1920. The price of raw silk advanced to the highest point since April, 1920.

IRON AND STEEL.

Iron-ore movement for the 1922 season was 65 per cent greater than for 1921. Pig-iron production in December continued its increase, making a new record since October, 1920, but steel-ingot production declined. Sales of merchant pig iron were the heaviest since February, 1920, and unfilled orders for merchant iron made the first increase since April, 1921. Unfilled orders of the United States Steel Corporation again dropped slightly. Bookings of steel castings were larger than in November and represented 71 per cent of shop capacity. Foundry production in Ohio declined slightly. Exports of iron and steel increased over November and prices in general declined, with pig iron especially weak.

Locomotive shipments increased over November while unfilled orders declined slightly from the November high mark, foreign orders making a new low mark since last June. Freight-car orders, in December, were, with one exception, the highest since the armistice.

Production of steel sheets made a seasonal decline in December, but was twice as large as a year ago.

Sales of sheets were the highest on record and unfilled orders were the highest since October, 1920. Shipments of steel barrels declined.

PRODUCTION OF PIG IRON AND STEEL INGOTS AND U. S. STEEL CORP.'S UNFILLED ORDERS.

LOCOMOTIVE SHIPMENTS AND UNFILLED ORDERS.

Sales of fabricated structural steel increased in December, contrary to the expected seasonal trend, and forecast a continuation of the building boom for the spring. The following table shows the actual tonnage booked, as reported to the Bureau of the Census, by 158 identical firms with a capacity of 220,790 tons per month, and the estimated total bookings, based on a total capacity of 250,000 tons per month.

FABRICATED STRUCTURAL STEEL SALES.

[Reported by 158 firms with a capacity of 220,790 tons per month.]

MONTH.	Actual tonnage booked.	Per cent of capacity.	Estimated total bookings.
April.....	198,529	89.9	224,800
May.....	180,558	81.8	204,500
June.....	162,139	73.4	183,500
July.....	152,023	68.9	172,300
August.....	150,700	68.3	170,800
September.....	141,418	64.1	160,300
October.....	126,535	57.3	143,300
November.....	¹ 106,315	48.4	121,000
December.....	² 125,479	58.3	145,800

¹ Two firms missing out of 158.

² From 141 firms who reported in time for this report.

The following table shows yearly figures of structural-steel sales, based on new estimated capacities as the result of the special survey of the industry recently conducted by the Bureau of the Census, and the percentage of sales to shop capacity as reported by the Bridge Builders and Structural Society to April, 1922, and by the reports to the Bureau of the Census since then:

YEAR.	Estimated monthly tonnage capacity.	Per cent of sales to capacity.	Estimated tonnage sales.
1913.....	190,000	50.3	1,146,800
1914.....	191,000	50.4	1,155,200
1915.....	194,000	70.0	1,629,600
1916.....	200,000	69.4	1,665,600
1917.....	207,000	60.2	1,495,400
1918.....	218,000	55.6	1,454,500
1919.....	224,000	53.4	1,435,400
1920.....	232,000	53.8	1,496,500
1921.....	237,000	35.1	997,200
1922.....	250,000	64.3	1,929,400

NONFERROUS METALS.

Copper production in December at 103,845,000 pounds was the largest since 1920. Exports of copper declined slightly, but the price of electrolytic copper rose above 14 cents per pound for the first time since November, 1920.

PRODUCTION AND EXPORTS OF COPPER.

Zinc production continued to increase and made a new high record since May, 1920. Stocks again declined, receipts and shipments at St. Louis were slightly less than in November, and the price of zinc decreased fractionally.

Stocks of tin continued to rise in December, making a new high record since September, 1920. The price of tin rose to the highest mark since October, 1920.

Receipts of lead at St. Louis increased slightly but shipments declined. A fractional increase took place in the price of lead

FUELS.

December production of coal was well maintained, bituminous showing a slight increase and anthracite a slight decrease. Coke output again made a new high record. Exports of coal declined but coke exports increased. Coal prices were irregular compared with November. Stocks of bituminous coal on January 1, 1923, are estimated at 36,000,000 tons, as against 48,000,000 tons a year ago and 45,800,000 tons two years ago.

PRODUCTION OF BITUMINOUS AND ANTHRACITE COAL.

The production of crude petroleum in December totaled 50,137,000 barrels, an increase of 5.5 per cent over November, and established another new high record for this industry. Stocks of crude at the end of December were slightly lower than in other recent months. Consumption totaled 57,181,000 barrels, a record over 7,000,000 barrels greater than ever reported before. Imports of crude declined slightly, while the price of Kansas-Oklahoma crude showed no change.

Gasoline figures for November, the latest available, show a slight increase in production and further increase in stocks to a new high record. Production

and stocks of kerosene oil and lubricating oil increased in November, while declines took place in the production and stocks of gas and fuel oil.

PRODUCTION, CONSUMPTION, EXPORTS, AND STOCKS OF PETROLEUM.

STOCKS OF PETROLEUM AS REPORTED AND AS TRANSLATED INTO DAY'S SUPPLY.

PAPER AND PRINTING.

Declines occurred in the production of both mechanical and chemical wood pulp. Stocks of mechanical pulp declined to a new low record, but chemical stocks increased slightly.

Production of all grades of paper declined, the December total being the smallest since last July, but stocks at mills increased owing to the large increase in the wrapping-paper supply. Newsprint stocks declined considerably, especially in publishers' hands, and consumption of newsprint declined. Prices of newsprint were irregular. Exports increased.

PRODUCTION AND STOCKS OF NEWSPRINT PAPER.

The production of corrugated board boxes showed a decline in December, while for solid fiber boxes there was little change. Output of folding boxes was the smallest since January, 1922, but orders increased. New orders for labels also rose. Shipments of rope-paper sacks were the smallest since April, 1922.

Printing activity in November was about the same as in October, but paper purchases by printers and sales of printing declined.

AUTOMOBILES.

Production of automobiles at 206,418 passenger cars and 20,138 trucks made only a very slight decline from November, whereas a year ago a very considerable downward movement occurred in December. Shipments of automobiles also declined but slightly.

GLASS.

Slight declines occurred in production of glass bottles and illuminating glassware. Sales of spectacle frame and mounting declined from the relatively

high record reached in November. Unfilled orders also declined.

BUTTONS.

Reports furnished to the Department of Commerce by the National Association of Button Manufacturers show the following weekly comparisons regarding stocks of fresh-water pearl buttons and machinery activity by 16 companies representing 93.3 per cent of the machine capacity of the association members.¹

DATE.	STOCKS ON HAND (GROSS).		PER CENT OF MACHINES ACTIVE.	
	1923	1922	1923	1922
Jan. 1.....	13,599,614	12,100,792		
Jan. 6.....	13,378,766	11,930,906	43.6	33.8
Jan. 13.....	13,420,440	11,920,613	52.1	45.1
Jan. 20.....	13,442,932	11,976,769	52.1	51.4
Jan. 27.....	13,461,883	12,040,558	53.2	51.4

BUILDING MATERIALS.

Lumber production made its usual seasonal decline in December, the exceptions being Michigan softwoods and hardwoods. Shipments, however, increased for most species, as against a decline noted in each case a year ago. Stocks declined except in the case of western pine, and prices increased slightly.

Oak flooring production and orders declined in December, but maple flooring made a slight increase in both respects. Both showed decreased shipments, higher stocks, and larger unfilled orders.

Clay fire-brick production, new orders and unfilled orders declined, with stocks about stationary. Silica-brick production and shipments decreased slightly, but stocks increased. Face-brick production, shipments, and unfilled orders increased, while stocks declined. Brick prices advanced.

The production and shipments of cement made a seasonal decline in December but were well above the December, 1921, figures. Stocks rose but were considerably less than a year ago and the price of Portland cement was slightly reduced.

Shipments and new orders of sanitary enamel ware again increased and all classes made new high records since 1919, except orders for sinks, which declined from November. Stocks also increased slightly. Orders for sanitary pottery again declined.

¹ The National Association of Button Manufacturers has entered into cooperative arrangements with the Department of Commerce for the wider distribution of the statistics completed and issued by that association. The statistics cover the quantity and price of orders received weekly for fresh-water pearl buttons specified by kinds and grade. Persons desiring to obtain this service may either apply direct to the secretary of the association, 1182 Broadway, New York City, or if they prefer may send their names to the SURVEY OF CURRENT BUSINESS for forwarding to the association. A limited number of free copies is available for distribution by the association. If the demand for these becomes greater than the supply, a charge will be made by the association sufficient to cover merely the cost of distribution. A summary of the statistics issued by this association will be given in later issues of the Survey.

BUILDING CONSTRUCTION.

Building costs declined very slightly in December, the chief declines being in materials, as shown in the indices for frame and brick houses, where declines of 2 and 1½ per cent, respectively, took place.

A seasonal decline in building contracts awarded in December reduced the total floor space to 38,603,000 square feet as against 46,946,000 square feet in November, but the December figures were 10 per cent greater than in December, 1921. All classes of buildings except educational participated in the decline.

VOLUME OF BUILDING CONTRACTS AWARDED, BY CLASSES.

HIDES AND LEATHER.

Production of sole leather, skivers and oak and union harness declined slightly in December. Exports of sole leather increased, but upper leather exports declined. Exports of boots and shoes increased slightly. Prices of hides declined, but leather and boots remained unchanged.

STOCKS OF CATTLE HIDES (PACKER) AND PRODUCTION AND STOCKS OF LEATHER (SOLE AND BELTING).

CHEMICALS AND OILS.

Production of acetate of lime and wood alcohol in November reached a new high record since 1919. Exports of sulphuric acid and dyestuffs increased slightly in December, but fertilizer exports made a decline from the large November shipments.

Turpentine receipts at southern ports declined in December and stocks increased. For rosin, on the other hand, receipts increased and stocks declined.

Seasonal declines occurred in December in the production of cottonseed oil and in stocks of cottonseed and cottonseed oil, but all were higher than a year ago. The price of cottonseed oil increased.

Receipts, shipments, and stocks of flaxseed declined.

CEREALS.

Receipts of wheat at the principal markets were larger in December than in the preceding month, while shipments were slightly less. Both receipts and shipments in December were nearly double what they were in the corresponding month a year ago. For the 12 months of 1922, receipts were 3.7 per cent less and shipments 5 per cent less than in 1921. The visible supply of wheat increased 7 per cent during December. Exports declined slightly, but at 16,428,000 bushels they were larger than in December, 1921. Exports of wheat for the year were 35 per cent less than in 1921. Prices of both wheat and flour increased during December.

Exports of corn declined in December, with a total of less than 5,000,000 bushels. Corn exports, including meal, for the year 1922 amounted to 166,022,000 bushels, or 25.8 per cent more than in 1921. The price of No. 2 corn at Chicago rose nearly 2 per cent during the month.

Exports of oats, barley, and rye each showed marked declines in December compared with the preceding month. Prices, however, increased in each case.

The exports of all cereals, including flour and meal as grain, were equivalent to 26,834,000 bushels, compared with 35,704,000 bushels in November and 28,880,000 bushels in December, 1921. Measured in this way, cereal exports for the calendar year 1922 were 9.4 per cent less than in 1921.

MEATS AND LIVE STOCK.

Receipts and shipments of cattle at the principal markets showed a seasonal decline in December. However, each of these movements was significantly larger than a year ago. It is of importance to note that for the year, as a whole, stocker and feeder shipments of cattle have been 39 per cent larger than in 1921.

INSPECTED SLAUGHTER, CONSUMPTION, AND COLD-STORAGE HOLDINGS OF BEEF PRODUCTS.

Exports of beef products declined in December, while cold-storage holdings showed the usual seasonal increase. Inspected slaughter production of beef de-

INSPECTED SLAUGHTER, CONSUMPTION, EXPORTS, AND COLD-STORAGE HOLDINGS OF PORK.

29011—°—23—2

clined in November from the relatively high figure reached in October.

Receipts, shipments, and slaughter of hogs showed the usual seasonal increases in December. These movements have been larger for the past year than for 1921. Exports of pork products increased in December, with a total of 156,067,000 pounds, which is the largest for any month since September, 1921. Cold-storage holdings of pork products increased seasonally in December, with total holdings about 35 per cent larger than a year ago.

Prices of hogs remained relatively stationary in December compared with November while pork prices declined.

The movements of sheep and lambs showed the usual seasonal decline in December, but with stocker and feeder shipments for the year nearly 34 per cent greater than in 1921 and the slaughter 17 per cent less. Cold-storage holdings of mutton increased about 25 per cent, with the total about 30 per cent less than a year ago.

Receipts of poultry at five markets increased 63 per cent during the month, while cold-storage holdings on January 1 were nearly double those a month before, but slightly less than on January 1, 1922.

OTHER FOODSTUFFS.

Receipts of butter, cheese, and eggs at five markets each declined in December, but the total receipts for the year 1922 were from 10 to 14 per cent greater than in 1921. Cold-storage holdings showed the usual seasonal declines, with stocks of eggs 50 per cent greater than a year ago and stocks of creamery butter about 45 per cent less than on January 1, 1922. Prices of butter and eggs increased.

Meltings and stocks of raw sugar declined in December, while exports of refined were 31 per cent less than in the preceding month. Prices increased slightly.

The Cuban movement of raw sugar showed an increase of 90 per cent in port receipts, while both exports and stocks declined.

STOCKS OF RAW SUGAR IN CUBA AND SUGAR EXPORTS FROM CUBA.

Reports furnished to the Department of Commerce by the Iowa-Nebraska Cannery Association show that unsold stocks of sweet corn in all the 36 canneries of Iowa and Nebraska amounted to 569,417 cases of corn on January 1, 1923.¹ Unsold stocks on previous dates were as follows: February 15, 1921, 1,956,700 cases; November 18, 1921, 1,644,000 cases; February 1, 1922, 1,400,000 cases; August 1, 1922, 519,600 cases; and November 1, 1922, 649,000 cases. Stocks sold but not delivered on January 1, 1923, amounted to 431,335 cases, with reports from 8 companies missing, which are said to have less than 5,000 cases each unsold.

TOBACCO.

The production of cigars, cigarettes, and manufactured tobacco as reflected by internal-revenue tax withdrawals showed marked declines in December. For the year as a whole each of these movements was larger than in 1921. Exports of leaf tobacco and of cigarettes both declined slightly in December. For the 12 months, exports of cigarettes were 34 per cent greater than in the preceding year. A marked increase occurred in the sales at loose-leaf warehouses during December. Stocks of all classes of tobacco except cigars increased during the quarter ending December 31, 1922, as reported by the Bureau of the Census.

WATER TRANSPORTATION.

Panama Canal traffic in November totaled 1,427,000 long tons, of which 651,000 tons were carried in American vessels. This figure is only slightly below the record movement of tonnage in the canal made in October.

Traffic on the Sault Ste. Marie Canals was maintained for only a portion of December, with a total of 1,838,000 tons for the month. The total traffic on the canals in 1922 amounted to 66,068,000 tons, or 36.9 per cent more than in 1921.

Receipts at St. Louis in the Mississippi River traffic during December declined 64 per cent, while shipments increased 34.6 per cent.

The tonnage of vessels entering and clearing in the foreign trade was smaller in December than for any recent month. Ocean freight rates to the United Kingdom declined in December, while rates to all European points showed a slight average increase.

¹ The Iowa-Nebraska Cannery Association has entered into cooperative arrangements with the Department of Commerce for the wider distribution of trade statistics collected, compiled, and issued by that association. These statistics cover periodic reports on acreage planted to sweet corn and the production, stocks, and sales of canned corn. Persons desiring to obtain this service may either apply direct to the secretary of the association, at Marshalltown, Iowa, or, if they prefer, may send their names to the SURVEY OF CURRENT BUSINESS for forwarding to the association. A limited number of free copies are available for distribution by the secretary of the association. If the demand for these is greater than the supply, a charge will be made by the association sufficient to cover merely the cost of distribution.

RAILROAD TRANSPORTATION.

Freight-car loadings declined in December, compared with the preceding months, as was to be expected; however, the total loading averaged 839,948 cars per week, which is 150,000 cars a week more than in the corresponding month of 1921. All classes of loadings declined in December. The most marked drop was in ore shipments, due largely to the closing of lake traffic.

There was a further decline in the freight-car shortage, making the daily average only 82,927, compared with 133,786 in November. There was an improvement in the bad-order car situation in December. The total number needing repairs now is about 100,000 less than a year ago.

SHORTAGE, SURPLUS, BAD-ORDER, AND TOTAL LOADINGS OF FREIGHT CARS.

Total railroad operating income was somewhat less in November than in October. Operating expenses were also less, but the net operating income fell from \$85,255,000 in October to \$78,869,000 in November, the latest figures available. Compared with corresponding periods in previous years, this figure represents a distinct improvement in railroad finances.

LABOR.

Further increases in employment and in the total volume of pay rolls are shown by both New York and Wisconsin factories in December. Unemployment made a further decline in Pennsylvania. Employment-agency operations showed on the average 1.11 applicants per job available in November, which is an increase over recent months. Both the number of workers and the number of jobs registered showed a marked decline.

IMMIGRATION, EMIGRATION, AND IMMIGRATION QUOTA.

DISTRIBUTION MOVEMENT.

Retail sales reached a new record in December, 1922. Sales of the two large mail-order houses totaled \$32,379,000, which may be compared with \$24,506,000 in December, 1921, and \$29,227,000 in December, 1920.

December sales of 4 large 10-cent chain stores totaled \$46,415,000, compared with \$40,062,000 in 1921 and \$36,037,000 in December, 1920. The index number for department-stores sales compiled by the Federal Reserve Board reached 188 in December, compared with 176 a year ago and 179 in December, 1920.

SALES OF MAIL-ORDER HOUSES AND CHAIN STORES.

Indexes of wholesale trade in the several Federal Reserve districts showed the usual seasonal decline. This decline was most marked in dry goods. In practically every instance sales in December last were on a distinctly higher level than a year ago.

Magazine advertising declined in December, as is usual for this month. Newspaper advertising showed no significant changes from November, but both movements were larger than a year ago.

Postal receipts in 50 selected cities established a new record of \$29,150,000, which was an increase of 17 per cent over November and \$3,500,000 greater than in December last year.

PUBLIC FINANCE.

The interest-bearing debt of the United States declined 1 per cent in December from the high point reached in the two preceding months. The total of \$22,476,000,000 is the lowest point reached since shortly after the end of the war. Customs receipts in December were less than in November, but over \$11,000,000 greater than in December, 1921. For the year as a whole, customs receipts were 46 per cent greater than in 1921.

Ordinary receipts of the Government in December were more than double the November receipts, due chiefly to the income-tax installment. For the year ordinary receipts have been 26 per cent less than in 1921, while ordinary disbursements declined 29 per cent.

Money in circulation showed a further increase in December and is now more than \$300,000,000 greater than last May.

BANKING AND FINANCE.

The volume of payments by checks outside of New York City rose to \$19,558,000,000 in December, as measured by debits to individual bank accounts. This is an increase of nearly \$2,500,000,000 over the preceding month and \$2,000,000,000 more than a year ago. December debits outside of New York were the largest for any month since November, 1920, and reflect the larger volume of business during the holidays. Debits within New York City also increased in December, but not in as great a proportion as those outside.

BILLS DISCOUNTED AND TOTAL INVESTMENTS OF FEDERAL RESERVE BANKS.

Rather curiously, bank clearings, as compiled by Bradstreet's, show an increase of only \$769,000,000, or about 5.5 per cent, for clearings outside New York, while the corresponding debits as mentioned above show an increase of nearly 14.5 per cent in December.

Bills discounted by the Federal Reserve banks declined slightly in December while investments increased. Total reserves showed a small decline and the reserve ratio of total deposits to total reserves, including Federal Reserve note liabilities, dropped from 76.4 to 72.1, the lowest figure for the year.

Both loans and discounts and total investments of the Federal Reserve member banks increased in December.

New York call-loan rates averaged lower in December than in the preceding month, while rates on prime commercial paper rose from 4.38 to 4.63 per cent. This is the highest average for any month since last March.

INTEREST RATES AND BOND PRICES.

Savings deposits increased in each of the seven Federal Reserve districts for which figures are available. United States postal-savings deposits decreased slightly.

Life-insurance sales increased over November, which in many respects was a low month. The total new life-insurance business for the year was 12.2 per cent greater in value than in 1921. The largest increase occurred in group insurance, which was 151 per cent greater than in the preceding year.

Failures in December were larger both in number and in liabilities than in the preceding months. This seasonable increase did not carry the total as high as in December, 1921, by nearly \$30,000,000 in liabilities.

Dividend and interest payments were larger in December than in either November or in December a year ago. New capital issues were also larger in December. For the year 1922 these issues have been nearly 30 per cent greater than in the preceding year.

NUMBER OF BUSINESS FAILURES AND AMOUNT OF DEFAULTED LIABILITIES.

DEFAULTED LIABILITIES IN PROPORTION TO BANK CLEARINGS, COMPARED WITH NUMBER OF FAILURES.

The average price of 25 industrial stocks increased nearly 3 per cent in December, thus regaining most of the ground lost in November. A decline occurred in the average price of 25 railroad stocks, bringing this movement to the lowest point since last June. Stock

sales on the New York exchange totaled 19,692,000 shares, a decline of 5 per cent from November. For the year, stock sales have been 50 per cent greater than in 1921.

Bond sales on the New York exchange were nearly 5 per cent greater than in November, but with that exception they were the smallest for any month of the year. The December increase was confined to Liberty-Victory sales. Bond prices remained relatively stable in December; the only change of significance was a decline in the average for public utility bonds.

Receipts of gold at the mint were smaller in December than for other recent months. Imports of gold increased over November, although less than a year ago.

Silver production increased in December. Both imports and exports of silver were also larger, while the price both at New York and London declined.

FOREIGN TRADE.

Exports for the month of December totaled \$344,000,000 or nearly 10 per cent less than in November. For the year as a whole, exports have been nearly 15 per cent less in value than in 1921. Much of this decline has been due to lower prices.

Owing to the confusion in the custom offices, resulting from the new tariff law and the difficulty in getting declarations properly made out, the Bureau of Customs Statistics of the Treasury Department was unable to issue even total figures on import trade for the months of October, November, and December. On January 1, 1923, the statistical work formerly with the Treasury Department was transferred to the Bureau of Foreign and Domestic Commerce of this department. Every effort is being made to bring this work up to date and in the future to issue the figures promptly each month.

The detailed tables in this bulletin contain the import figures for October, which have just become available. It should be remembered that for all individual commodities, the imports credited to October cover the period from midnight on September 21, 1922, when the new tariff law went into effect, to midnight October 31, while the figures credited to September cover only the first 21 days of that month.

So far as the total value of imports are concerned, it has been possible to approximate the amount covered in the calendar months of September and October. The figure previously given for the value of the imports in the first 21 days of September was

approximately \$229,000,000. The bureau now estimates that imports were entered during the remaining nine days of September to the value of \$69,000,000, making a total of \$298,000,000 for the whole of September and leaving \$319,000,000 as the value of imports in October, 1922. Imports in October, 1921, were only \$188,000,000.

EXPORTS FROM THE UNITED STATES AND THE UNITED KINGDOM.

Foreign exchange rates tended to increase during December. Sterling rose nearly 3 per cent, bringing the average to \$4.61 compared with \$4.87 as par. The franc also rose to \$0.072 for December but a marked decline has occurred since the 1st of January. The Italian lire rose 11.1 per cent for the month, with an average value of \$0.05.

TRADE OF FOREIGN COUNTRIES.

Imports into the United Kingdom in December remained at about the same level as in November. Exports, on the other hand, were 11 per cent less. For the year 1922 total imports declined nearly 8 per cent, while exports increased 1.2 per cent. Exports of raw material were nearly 60 per cent greater than in 1921.

Rather marked declines occurred in both imports and exports in Canada during December, compared with the high figures reached in November. Canadian exports were 10 per cent greater in 1922 than in 1921, while imports were 4.6 per cent less.

INDEX NUMBERS OF PRODUCTION AND MARKETING.

In recent numbers of the Survey there have been published detailed discussions of certain index numbers of production and marketing dealing with both raw materials and manufactured products. The following tables give the recent figures for each of these index numbers, compared with the corresponding months of 1921. The methods of compiling these indexes and the weighting factors used are discussed in detail in the issues of the Survey referred to. Table 16 (p. 63) gives the total index numbers for each month during the last two years.

INDEX OF MANUFACTURING PRODUCTION.¹

TREND OF BUSINESS MOVEMENTS.

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. The numerical data for the latest months are given and in addition index numbers for the last four months and for two corresponding months of a year ago. In many lines the figures do not lend themselves readily to statistical uniformity, due to lateness of their publication or publication at other than monthly intervals; therefore the following explanations of the various headings are offered to make clear such distinctions and in general to facilitate the use of the table:

November, 1922.—This column gives the November figures corresponding to those for December shown in the next column—in other words, cover the previous month, and in some cases, where indicated by a footnote, refer to the previous quarter; that is, ending September 30, 1922.

December, 1922.—In this column are given the figures covering the month of December, or, as in the case of stocks, etc., the situation on December 31 or January 1. In a few cases (usually where returns are reported quarterly only) the figures are for the quarter ending September 30 or the condition on that date. Where this column is left blank, no figures for December were available at the time of going to press (February 7).

Corresponding month, November or December, 1921.—The figures in this column present the situation exactly a year previous to those in the "December, 1922," column (that is, generally December, 1921), but where no figures are available for December, 1922, the November, 1921, figures have been inserted in this column for comparison with the November, 1922 figures. In the case of quarterly figures, this column shows the corresponding quarter of 1921.

Cumulative total through latest month.—These columns set forth, for those items that can properly be cumulated, the cumulative total for the first twelve months of the calendar years 1921 and 1922, respectively, except where the December, 1922, figures are lacking, in which case the cumulative total for eleven months in each year is given.

Percentage increase (+) or decrease (−) cumulative, 1922 from 1921.—This column shows the per cent by which the cumulated total for the twelve months of 1922 is greater (+) or less (−) than the total for the corresponding period of 1921.

Base year or period.—For purposes of comparison with a previous more or less normal period, all items, so far as possible, are related to such a period by index numbers. The period taken for each item, called the base, is the monthly average of the year or period stated in this column. Wherever possible, the year 1913 is taken as a base, and if no pre-war figures are available, 1919 is usually taken to avoid using a war year as a basis. In some cases it will be noted that figures were not available prior to 1920 or even 1921 and that sometimes a month, or an average of a few months, has to be used rather than a year's average. Also, for some industries, 1919 would not be a proper base on account of extraordinary conditions in the industry and therefore some more representative year has been chosen.

Index numbers.—In order to visualize the trend of each movement, index or relative numbers are given for the last four months and for two corresponding months of a year ago. These index numbers are computed by allowing the monthly average for the base period, usually 1913 or 1919, to equal 100. If the movement for a current month is greater than the base the index number will be greater than 100. If the converse is true the index number will be less than 100. The difference between 100 and any index number gives at once the per cent increase or decrease compared with the base period. Index numbers may also be used to compute the approximate per cent increase or decrease from one month to the next.

Percentage increase (+) or decrease (−) December from November.—The last column shows the per cent increase or decrease of the figure for the last month compared with the preceding month.

NOTE.—Because of the confusion resulting from the new tariff schedules, the Bureau of Customs Statistics, Treasury Department, has not been able to compile the import figures for either November or December. All import figures are therefore omitted from this table.

NOTE.—Detailed tables covering all items are given in this number. Consult index at end of bulletin.	NUMERICAL DATA.					Per-centage increase (+) or decrease (−) cumulative 1922 from 1921.	BASE YEAR OR PERIOD.	INDEX NUMBERS.						Per-centage increase (+) or decrease (−), Dec. from Nov.

^a Revised.^b Not directly comparable with monthly figures prior to July, 1922. The index numbers have been computed by chain relatives and take account of the percentage variation rather than the absolute variation in the figures, and hence show the trend of the movement irrespective of the change in the number of firms reporting.

TREND OF BUSINESS MOVEMENTS—Continued.

¹ Receipts of wool at Boston compiled by Boston Chamber of Commerce; Imports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and quarterly stocks from U. S. Department of Agriculture, Bureau of Agricultural Economics, until April, 1922, beginning with April, 1922, compiled by U. S. Department of Commerce, Bureau of the Census, in cooperation with U. S. Department of Agriculture, Bureau of Agricultural Economics.

² These figures have been revised to include only comparable reports each month and thus do not contain the figures for the American Woolen Company and a few small firms, for which estimates had been made in previous compilations. Stocks include wool, tops and noils.

³ Average of the last two quarters of 1920.

⁴ Average of the first three quarters of 1921.

⁵ Includes U. S. Government stocks.

⁶ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October

COTTON.

¹ Except receipts into sight, compiled by *New Orleans Cotton Exchange*, and world visible supply of American cotton, compiled by *Commercial and Finance Chronicle*. Production estimates from *U. S. Department of Agriculture, Bureau of Agricultural Economics*; imports and exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; consumption and stocks at mills and warehouses from *U. S. Department of Commerce, Bureau of the Census*.

² These figures are for fiscal years; those following are for calendar years.

³ Running bales counting round as half bales; linters are included.

⁴ 500-pound bales.

⁵ Figures listed for years 1913 through 1922 represent monthly averages of cotton consumed and on hand at end of month during crop years (beginning Aug. 1 of the preceding year and ending July 31 of the year to which the figure is credited). Figures are in running bales, counting round as half bales, and do not include linters. Note that February, 1919, cotton stocks shown on page 49 December Survey (No. 16) should read 6,093,361.

⁶ These figures represent world visible supply of American cotton.

⁷ The yearly figures represent the latest revised estimates of total production for the year. The monthly figures show the current estimates of total production as reported each month.

⁸ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

COTTON MANUFACTURES.

¹ Except exports of cotton cloth from the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce. The figures for knit underwear are secured from the *Knit-Goods Manufacturers of America*; those relating to fine cotton goods from the *Fine Cotton Goods Exchange*.

² These figures are for fiscal years; others are for calendar years.

³ Includes duck and other cloth, bleached, unbleached, and colored. Beginning with January, 1921, the figures are reported in square yards instead of linear yards, which probably makes the figures slightly smaller than when given in linear yards.

⁴ Reported by 24 identical mills in the New Bedford district, representing about 50 per cent of this industry in New England and from 20 to 30 per cent throughout the United States.

⁵ Calculated from reports in percentage of capacity, based on a normal production of 900,000 dozen per month. Reports on production cover from 50 to 60 mills, while for other items the reports cover from 30 to 40 mills.

⁶ Average for last six months of year.

⁷ Nine months' average, April to December.

MISCELLANEOUS TEXTILES.

¹ Imports of total raw silk, unmanufactured fibers and burlap are from U.S. Department of Commerce, Bureau of Foreign and Domestic Commerce; consumption and stock at warehouses of raw silk are from the Silk Association of America; sales of elastic webbing are from the Webbing Manufacturers Exchange.

² Total unmanufactured silk, including raw silk, cocoons and waste.

³ Consumption figures represent withdrawals from warehouses. Note that February to December, 1920, inclusive, is used as the base period.

⁴ Includes flax, hemp,istle, jute, kapok, manila, New Zealand flax, sisal, etc.

⁵ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ Data from U. S. Department of Commerce, Bureau of Census.² Formerly reported as of the first of the following month representing previous month's operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.³ The monthly averages are for cotton crop years (beginning Aug. 1 and ending July 31). Figures opposite any one year represent the monthly average number of active cotton spindles for the period beginning Aug. 1 of the preceding year.⁴ Data for 1913 collected by the National Association of Wool Manufacturers.

¹ Compiled by U. S. Department of Commerce, Bureau of the Census.

² Formerly reported as of the first of the following month representing previous months' operations but now reported as of the month to which the figures apply. In the present table each figure shows the activity for the month to which it is credited.

³ Overtime was reported sufficient to offset all idle hours and leave an excess for November of 65,380 hours or 11.4 per cent and for December an excess of 20,427 hours or 3.8 per cent.

TEXTILE WHOLESALE PRICES.

¹ Prices of cotton and wool to the producer on the 1st and 15th of each month, respectively, are weighted averages of prices received by producers throughout the United States for all grades of cotton and wool as compiled by the U. S. Department of Agriculture, Bureau of Agricultural Economics. All other prices are averages of weekly quotations compiled by the U. S. Department of Labor, Bureau of Labor Statistics, except wool prices from compilation by U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, until June, 1922, and beginning with June, 1922, compiled by U. S. Department of Commerce, Bureau of the Census.

² The prices of cotton and wool to the producer represent a composite of all grades as they come from the farms. The market prices, especially in the case of wool, are quoted on a specific grade above the average and includes handling and transportation charges.

¹ Iron ore movement from the U. S. War Department, Engineer Corps; figures for pig-iron production (anthracite and coke, not including charcoal iron) furnished by the Iron Age; merchant pig iron by the American Pig Iron Association; Ohio foundry iron by Ohio State Foundrymen's Association; wholesale prices, average of weekly quotations, from U. S. Department of Labor, Bureau of Labor Statistics, except composite pig iron, which is compiled by the American Metal Market.

² No allowance made for seasonal variation in computing these index numbers. The figures represent the total iron ore movement, both for the United States canal and the Canadian canal which is equivalent to about 85 per cent of the total iron ore production of the United States. Figures for 1913 to 1922 represent monthly averages computed from the total movement for the year on a six months' basis during the equivalent of which period the total movement takes place. The canals, however, are open from April to December, inclusive, and the monthly data here shown covers the entire season during which the canals are open.

¹ Relative to 11 months' average, February-December, 1921.

² Represents percentages of actual to normal melt of gray iron foundries in Ohio. Prior to September, 1921, reports represent the month beginning with the 15th day of the calendar month. September, 1921, figures are for the period Sept. 15 to 30 only. Subsequent figures are for calendar months.

³ Relative to 10 months' average, March-December, 1921.

⁴ The composite pig iron price compiled by the *American Metal Market* is the average price of 10 tons of iron distributed as follows: One ton each of Bessemer Valley; No. 2 foundry valley; No. 2 X foundry at Philadelphia and at Buffalo; No. 2 foundry at Cleveland and at Chicago; two tons each of basic valley and No. 2 Southern foundry, Cincinnati.

⁵ Less than one.

¹ Yearly figures represent the monthly averages of total production of all companies as compiled annually by the *American Iron and Steel Institute*. The institute reports monthly production figures for 30 companies which produced 84.2 per cent of the total output of the country in 1920 and 87.48 per cent in 1921. In order to make the monthly figures comparable, they have been calculated to a 100 per cent production on the basis of the above percentages, the 1922 figures being calculated on the 1921 average.

² Unfilled orders of steel and earnings reported by *U. S. Steel Corporation*.

³ Sheets, blue, black, and galvanized, reported by the *National Association of Sheet and Tin Plate Manufacturers*, representing almost all the independent sheet manufacturers.

⁴ Bookings of commercial steel castings reported by the *Steel Foundry Society* and principal nonmember firms to the *U. S. Department of Commerce, Bureau of the Census*. Reports are by 65 identical firms with a capacity of 99,900 tons per month, of which 53,700 tons are usually devoted to railway specialties. This represents over two-thirds of the castings capacity of the United States devoted to commercial castings (as distinguished from castings used in further manufacture in the same plant).

⁵ Railway specialties include such items as bolsters, side arms, draft arms, couplers, and cast-steel car wheels, and are reported by identical firms throughout.

¹ The figures for composite steel compiled by the *American Metal Market* represent the average price per pound of steel products weighted as follows: 2½ pounds bars, 1½ pounds plates, 1½ pounds shapes, 1½ pounds pipe, 1½ pounds wire nails, 1 pound galvanized sheets, and ½ pound tin plate.

² Composite price of finished steel products compiled by the *Iron Age* includes: Steel bars, beams, tank plates, plain wire, open-hearth rails, black pipe, and black sheets. These products, according to the *Iron Age*, constitute 88 per cent of the United States output of finished steel.

³ Average of weekly prices compiled by the *Iron Trade Review* on the following 14 products: Pig iron, billets, slabs, sheet bars, wire rods, steel bars, plates, structural shapes, black galvanized and blue annealed sheets, tin plate, wire nails, and black pipe. Pig iron average in turn is average of 13 different quotations.

⁴ Average of weekly prices from U. S. Department of Labor, Bureau of Labor Statistics.

¹ Locomotive shipments and unfilled orders reported direct by principal locomotive companies; Freight car orders by domestic railroads compiled by the *Iron Trade Review*; vessels under construction and vessels completed, *U. S. Department of Commerce, Bureau of Navigation*; fabricated structural steel by the *Bridge Builders and Structural Society* up to April, 1921, and since then compiled by *U. S. Department of Commerce, Bureau of the Census*, including reports from the *Structural Steel Society*; iron and steel exports by *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*.

² Gross ton represents in units of 100 cubic feet the entire cubical capacity of the vessel, including crew and engine space.

¹ Tonnage under construction on the first of the month refers to the gross tons of shipping, building or under contract to build for private owners. Includes only steel vessels of over 100 gross tons. Does not include Government ships or ships building or contracted for by U. S. Shipping Board.² Includes ocean-going, lake and river vessels built and officially numbered by the U. S. Department of Commerce, Bureau of Navigation. Includes vessels of the U. S. Shipping Board and private American owners, but not vessels built for foreign owners.³ Percentages of capacity calculated from reports of the Bridge Builders and Structural Society up to April, 1922, and applied to estimated total capacity each year based on a special survey by the Bureau of the Census (see text, page —, for details). Beginning with April, reports received from 158 firms with a total capacity of 220,790 tons have been prorated to the estimated total capacity of the United States, 250,000 tons for comparison with previous figures.⁴ This column gives a total of pig iron and rolled products as used in the Iron Trade Review, which is comparable each month back to 1913.⁵ Beginning with January, 1922, all commodities are given in quantities in the export reports, many of which were previously available only on a value basis. This column gives the total of all pig iron and rolling-mill products as compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.

¹ Stoker sales from the *Stoker Manufacturers' Association*, said to represent approximately 99 per cent of the industry; steel barrels and drums from the *Steel Barrel Manufacturers' Association*; agricultural pump shipments compiled by the *Federal Reserve Bank of Chicago* in cooperation with the *National Association of Farm Equipment Manufacturers* and covers 22 firms, except for May and June, when only 21 firms reported; brass stop cocks from *The National Association of Brass Manufacturers*.

² Relative to six months' average, July to December, 1921.

³ These figures include, besides the articles shown in the other two columns, the value of cylinders shipped separately.

⁴ Data represent the total of 22 different classes of stop cocks reported to the association by its members.

⁵ Figures are incomplete owing to the failure of 2 or 3 member companies to report.

⁶ Average for last seven months of 1922.

¹ Weighted average of 9 commodities representing about 87 per cent of the total mineral production; for details, see May, 1922, issue (No. 9) and September, 1922, issue (No. 13) of Survey of Current Business.

² Weighted average of 26 commodities representing about 94 per cent of the total crop production; for details, see July, 1922, issue (No. 11) of Survey of Current Business.

³ Weighted average of 9 commodities representing about 99 per cent of marketed live stock and live-stock products; for details, see June, 1922, issue (No. 10) of Survey of Current Business.

⁴ Weighted average of 13 commodities representing about 80 per cent of forest products marketed; for details see August, 1922, issue (No. 12) of Survey of Current Business.

⁵ Weighted average of above groups; for details see September, 1922, issue (No. 13) of Survey of Current Business.

⁶ Weighted average of 62 commodities with comparable monthly figures from January, 1920, and representing about 36 per cent of the entire manufacturing industry, based on value added by manufacture; for details, see January, 1923, issue (No. 17) of Survey of Current Business.

⁷ Weighted average of 70 commodities with comparable monthly figures from November, 1921, and representing about 44 per cent of the entire manufacturing industry; for details, see January, 1923, issue (No. 17) of Survey of Current Business.

⁸ Weighted average of 14 commodities; for details, see March, 1922, issue of Federal Reserve Bulletin.

⁹ Weighted average of 7 commodities; for details, see March, 1922, issue of Federal Reserve Bulletin.

¹⁰ Weighted average of 34 commodities; for details, see March, 1922, issue of Federal Reserve Bulletin.

¹¹ Weighted average of 22 commodities corrected for seasonal variations; for details, see December, 1922, issue of Federal Reserve Bulletin.

¹ Copper production, representing smelter production from domestic ores, for 1913 through 1920, from *U. S. Geological Survey*, 1921 and 1922 figures from *American Bureau of Metal Statistics* representing mine production; Stocks of tin from *New York Metal Exchange*; Production and stocks of total primary zinc from *American Zinc Institute*; Receipts and shipments of zinc and lead at St. Louis from *Merchants Exchange of St. Louis*; Exports and imports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; Wholesale prices from *U. S. Department of Labor, Bureau of Labor Statistics*, representing average of weekly prices.

² Converted from data in slabs of 80 pounds each.

³ Converted from data in pigs of 50 pounds each.

⁴ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ Mexican petroleum shipments from the three ports, Tampico, Port Lobos, and Tuxpam, form the best current measure of Mexican oil production. These figures are compiled from those published in the *Oil Trade Journal*. Current month is approximate from the *Wall Street Journal*.² Stocks held by refiners.³ "Exports of gasoline," as used by the Bureau of Mines, includes the items "gasoline" and "all other naphtha, etc.," as reported by the U. S. Department of Commerce, less exports to the Philippine Islands.⁴ Represents production transported from field of production, does not include oil consumed at locality of production.⁵ Covers first 21 days only, during which period the old tariff law was in effect.

¹ Automobile shipments from *National Automobile Chamber of Commerce*; automobile production from *U. S. Department of Commerce, Bureau of the Census*; internal revenue taxes on automobiles and accessories from *U. S. Treasury Department, Bureau of Internal Revenue*.

² Represents shipments from factories covering almost the entire automobile production of the United States.

³ Total of membership of the *National Automobile Chamber of Commerce*, to which are added reports from outside manufacturers, representing practically complete production. Annual figures represent complete production as compiled by *National Automobile Chamber of Commerce*.

⁴ Data represent internal revenue taxes collected under the revenue acts of 1918 and 1921. For taxes on automobiles and motor cycles ("including tires, inner tubes parts, and accessories therefor, sold in connection therewith") the rate is 5 per cent and payable by the manufacturer. For taxes on automobile trucks and automobile wagons ("including tires, etc., sold on or in connection therewith") the rate is 3 per cent and payable by the manufacturer. For taxes on "automobile accessories and parts sold to any person other than a manufacturer (of automobiles)" the rate is 5 per cent and payable by the manufacturer.

⁵ Six months' average, July to December, inclusive.

¹ Data furnished by the Rubber Association of America. The number of firms has increased from 36 in November, 1920, to a maximum of 66 in 1922. It is stated by the Rubber Association that this variation in the number of firms does not change the totals to any great degree, except for the omission of the Firestone Tire Company, beginning in September, 1921.

² India-rubber imports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; wholesale prices, average weekly, from U. S. Department of Labor, Bureau of Labor Statistics.

³ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹Based on figures compiled by the U. S. Department of Commerce, Bureau of the Census. The data embrace returns from packers, tanners, dealers, importers, and manufacturers. As given in the detailed monthly reports, which can be obtained upon request from the Bureau of the Census, the returns for hides and skins are expressed in numbers of hides and skins. For the above summary these have been reduced to pounds on the basis of the average weights of each class. Similarly data on leather have been converted to pounds or square feet from reports in skins, sides, backs, butts, pounds, etc.

²Prior to July, 1922, these figures were compiled by the Tanners' Council. Since July, 1922, they have been compiled by the Bureau of the Census and for skiver and harness production represent returns from a much larger number of firms than reported to the Tanners' Council. Hence the figures from July, 1922, on are not directly comparable with those for preceding months. The index numbers in Table 27 for the months after July, 1922, have been computed by chain relatives and take account of the percentage variation rather than the absolute variation in the figures. The index numbers show the trend of the industries irrespective of the change in the number of firms reporting.

¹ Beginning December, 1919, these statistics cover amount of harness leather "stuffed" rather than that produced, but it is stated that the variation between these items is small.² Includes estimated production of firms outside *Tanners' Council*.³ Data on sales of oak leather belting from the *Leather Belting Exchange*, and is estimated to represent from 65 to 75 per cent of the industry.⁴ Includes skins with and without wool, but does not include weight of wool.⁵ Compiled by U. S. Department of Commerce, Bureau of the Census, from over 1,000 firms each month. Figures for the years 1919 and 1921 are those reported by the Census of Manufactures for those years.

¹ Data from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.² Data from U. S. Department of Labor, Bureau of Labor Statistics, represent average monthly prices.³ Includes calf and kip, goat and kid, grain and finished splits.⁴ Represent five-year (1909-1913) monthly average imports for total hides and skins, total goatskins and total sheepskins. Calfskins and cattle hides based on four-year average, 1910-1913.⁵ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

¹ Except printing activity from *United Typothetae of America* and printing purchases and sales from *American Writing Paper Company*. Other data from the *Federal Trade Commission*, except imports and exports from the *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*.

² Prior to Sept. 1, 1916, includes only paper valued at not above 2.5 cents per pound; from Sept. 1, 1916, to Apr. 24, 1920, not above 5 cents per pound, and from Apr. 24, 1920, to date not above 8 cents per pound.

³ Reported by about 660 of the principal publishers.

⁴ Printing activity based on productive hours reported by plants in 52 cities in 30 states, each department being weighted for the combined index number.

⁵ Purchases of printing paper and sales of printed product by about 350 concerns, doing from 20 to 25 per cent of the total commercial printing business of the country. As the paper industry was abnormal in 1919, index numbers based on that year are not regarded as true indices; therefore 1918 was taken as a base.

⁶ Stocks on hand end of year.

⁷ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

PAPER AND PAPER BOXES.

¹ Data on production and stocks of paper at mills from *Federal Trade Commission*; exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce* (1913 monthly average—4,772 tons); paper boxes from *The Container Club* and *National Association of Corrugated and Fibre Box Manufacturers*.

² Average of last six months of year.

³ Per cent of normal operating time and left-hand production column represent 17 and 16 identical firms, respectively, as reported by *The Container Club*, except that, for the first three of the six months of 1919 reported, two companies are omitted which do not appreciably effect the total. The figures in the right-hand production column are from 17 identical firms as reported by the *National Association of Corrugated and Fibre Box Manufacturers*. No index numbers have been calculated on these latter figures or on the per cent of operating time.

⁴ Per cent of normal operating time and left-hand production column reported by *The Container Club* from six or seven firms. The right-hand figures are from the *National Association of Corrugated and Fibre Box Manufacturers*, comprising three firms, except November, 1921, when four firms reported, and December, 1921, when two firms reported. No index numbers have been calculated on these latter figures or on the per cent of operating time.

⁵ Stocks at end of year.

¹ Folding paper boxes and labels from the Association of Folding Box and Label Manufacturers; said to represent approximately 60 per cent for the folding box industry and 75 per cent for the label industry.

² Rope paper sacks from Rope Paper Sack Manufacturers' Association, said to represent approximately 95 per cent of the industry.

³ Data compiled by the Abrasive Paper and Cloth Manufacturers' Exchange estimated to represent 90 per cent of the industry. The totals given include the sales of garnet, emery, flint, and artificial (silicon, carbide, and aluminous oxide) paper, cloth, and combinations. Figures are stated in equivalent reams, 9 by 11 inches in size. The data submitted show that in 1919 the total domestic sales were made up of the following approximate percentages: Garnet 39, emery 8, flint 32, and artificial 20 per cent.

⁴ Twelve months' average, July, 1921, to June, 1922. Numerical data not furnished by the association.

¹ Data compiled by the F. W. Dodge Co., covering small towns and rural districts as well as large cities. Prior to May, 1921, these figures covered 25 northeastern states and the District of Columbia. The states are those north and east of, and including, North Dakota, South Dakota, Iowa, Missouri, Tennessee, and Virginia, together with portions of eastern Kansas and Nebraska. Beginning May, 1921, North Carolina and South Carolina were added to the list, but this addition is stated to have little effect upon the total.

² Estimates made by the F. W. Dodge Co.

¹ Except building material price indices, from the U. S. Department of Commerce, Bureau of Standards, Division of Building and Housing and Bureau of the Census, which is based on prices paid for material by contractors in some 60 cities of the United States. The prices are weighted by the relative importance of each commodity in the construction of a six-room house.

² This index number, furnished through the courtesy of the *Aberthaw Construction Co.*, is designed to show the relative changes in the cost of constructing a standard concrete factory building. The company believes that the year 1914 gives a normal base and that July, 1920, with an index number of 265, represented the peak of building costs.

³ The construction cost index, computed by the *Engineering News Record*, is based upon the costs of steel (structural shapes, Pittsburgh base), cement (f. o. b. Chicago, exclusive of bags), lumber (southern pine, New York base), and the rates paid common labor in the steel industry. The prices are weighted on the basis of the total production of steel, cement, and lumber, and the total supply of common labor.

⁴ Compiled by the *Engineering News Record*, on the basis of contracts let as reported by this publication and its construction cost index number, based on 1913 costs.

⁵ Data from *National Bottle Manufacturers Association*, based on reports of identical firms representing approximately 90 per cent of the capacity of the industry.

⁶ Data from reports of identical firms by the *Illuminating Glassware Guild*, estimated to represent from 70 to 75 per cent of the capacity of the industry, based on a normal capacity of 6,000 turns.

⁷ Data from the *Optical Manufacturers Association*, representing about 60 per cent of the industry.

⁸ Twelve months' average, May, 1921-April, 1922.

¹ Data on Michigan hardwoods (chiefly maple, birch, basswood, and beech) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

² Quarterly average.

³ Ten months' average.

⁴ Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills. These figures represent actual reports from 60 to 75 mills each month. The hardwoods cut are mostly maple, birch, and beech.

⁵ Compiled by *American Walnut Manufacturers' Association* from reports of identical firms representing from 50 to 60 per cent of the walnut lumber industry.

¹ The figures given for production and stocks of yellow pine are computed from data furnished by the *Southern Pine Association*. The method of computing is first to find the per cent which the actual production of the mills reporting is to the normal production of these same mills. This per cent is then applied to the normal production of 192 mills. Assuming that the mills reporting are a good sample of the industry, the resulting figure in each month is equivalent to the actual production of the 192 identical mills and hence shows the trend of the industry. The same procedure is followed in the case of stocks. The normal monthly production of the 192 mills is given as 484,065,392 feet and the normal stocks of the same mills as 1,262,450,326 feet. By normal production the *Southern Pine Association* means the average output for the first 4 months of 1916 and normal stocks refer to the average stocks during the 16 months ending with April, 1916.

² The *Western Pine Manufacturers' Association* has supplied figures showing the actual and normal production for the mills reporting in each of the periods shown. From these figures the per cent of normal production is obtained in each case, and this per cent is applied to the normal production of 54 identical mills. The normal monthly production of these 54 mills is given as 148,000,000 board feet and is estimated to represent 70 per cent of the output of the western pine territory.

³ Actual figures reported by about 20 mills each month to the *California White and Sugar Pine Association*; the number of mills varies from 13 to 26.

⁴ Northern pine from the *Northern Pine Manufacturers' Association*, and includes reports from some 24 mills, both member and nonmember, located chiefly in Minnesota.

¹ Data computed from reports on actual production and shipments as furnished by the *North Carolina Pine Association, Inc.*, for mills varying in number from 31 to 56. The computed figures given are obtained by first determining for a given month the per cent which the actual production is of the normal production of the identical mills reporting. This per cent is then applied to an arbitrary figure of 70,000,000 board feet which represents the approximate monthly average normal production of the mills which reported in 1919. A similar per cent of actual shipments to normal production is applied to the same figure to obtain the computed shipment figures. The resulting figures represent a computed production as of identical mills for each month. The figures are of the same order of magnitude as the actual reported production and shipments, but avoid the rather wide variations due to different mills reporting in different months.

⁶ Data from *U. S. Department of Labor, Bureau of Labor Statistics* and represent average weekly prices for the month. The 1913 monthly average on which the index numbers are based, is \$23.04 per thousand feet.

¹ The figures of production and shipments of Douglas fir were obtained by applying the percentage figures of actual production and shipments to normal production of reporting mills as supplied by the *West Coast Lumbermen's Association* to the actual production of 124 mills for May, 1920. The production in that month was 447,654,540 board feet.

² Data from *U. S. Department of Labor, Bureau of Labor Statistics*, and represent average weekly prices for the month for the State of Washington.

³ Data on Michigan softwoods (chiefly hemlock) are actual figures reported by about 40 mills each month to the *Michigan Hardwood Manufacturers' Association*. The number of mills varies from 35 to 62, but 44 is the highest number reporting since the beginning of 1920.

⁴ Compiled by the *Northern Hemlock and Hardwood Manufacturers' Association*, representing chiefly Wisconsin and upper Michigan mills, from actual reports of from 60 to 75 mills each month.

¹ The California Redwood Association has furnished to the Bureau of the Census the figures on the actual production, shipments, and orders received by 7 identical mills for each month of 1918, 1919, and 1920. These 7 mills represent 40 per cent of the capacity of all listed mills for these years. For the first 4 months of 1921 reports were furnished from 10 mills representing 564 per cent of the capacity of all listed mills. For the remaining months of 1921 reports are available from 11 mills representing 71 per cent of the total listed capacity, and for 1922 reports are available from 14 mills representing 73 per cent of the total listed capacity. The actual average monthly production of the 7 reporting mills for 1918 was 14,984,000 feet. On the basis of 40 per cent capacity of the 1918 average monthly production of all mills is computed as 37,460,000 feet. Regarding this as normal production, there has been computed the probable production of the total redwood capacity based on the proportion which capacity of the reporting mills bears to the total of all mills. The columns on shipments and orders received represent a similar relationship between the actual reported figures and the total capacity of all mills.

² Figures in this column represent the total cut of 10 species of lumber—yellow pine, Douglas fir, hemlock, western pine, redwood, maple, birch, white fir and, beech and sugar pine—representing over 70 per cent of the total cut of lumber in the United States. Annual figures for 1913 and 1914 are from actual reports to the U. S. Department of Agriculture, Forest Service, and from 1915 through 1920 are computed on the basis of actual reports to the Forest Service. Monthly figures for 1920 are obtained by prorating the cut of each species as reported by the associations whose figures are carried in these columns to the Forest Service totals. For subsequent months prorating is done on an approximate average for the years 1917 to 1920.

³ Exports of lumber are from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.

⁴ These indices are for the first week in each month as published in "Lumber," and represent a combined weighted average for the respective series of lumber, based on quotations on various grades for each species, and the species weighted according to annual production of the previous year, changing about May of each year, when the new production figures are available. The softwood index is based upon seven species: Yellow pine, Douglas fir, North Carolina pine, white pine, hemlock, spruce and cypress. The hardwood index is based upon 13 species: Maple, birch, basswood, elm, beech, oak, gum, ash, cottonwood, chestnut, poplar, hickory, and walnut.

¹ Except wholesale prices, monthly averages, from U. S. Department of Labor, Bureau of Labor Statistics. The sources of the other data in this table are: Clay fire and silica brick from the Refractories Manufacturers' Association and face brick from the American Face Brick Association.² Figures for 1921 are from reports of 68 identical mills with a monthly capacity of 78,645,942 bricks, which is estimated by the association to represent from 68 to 70 per cent of the total clay fire brick capacity of the United States. Figures for 1919, 1920, and 1922 are computed to this capacity, respectively, from reports from 53, 56, and 60 mills having a monthly capacity for the years in question of 71,572,196 and 73,526,103, and 73,307,190 bricks.

BRICK.

¹ Figures for 1921 are from reports of 15 identical mills with a monthly capacity of 27,305,500 bricks, which is estimated by the association to represent from 78 to 80 per cent of the total silica brick producing capacity of the United States. Figures for earlier years are computed to this capacity from reports of 12 identical mills with a monthly capacity of 25,448,833 bricks.

² The figures on face brick include data from all firms reporting to the American Face Brick Association each month. The variation in the number of firms reporting does not materially affect the comparison, as it has been checked on a small number of identical firms.

³ Ten months' average.

¹ Data furnished by the *Enamelled Sanitary Ware Manufacturers' Association* and said to represent approximately 98 per cent of the total output in the United States. The Association explains that orders shipped are the best current index of the industry. Orders received are likely to pyramid during periods of great activity to be followed by cancellations if the demand drops off. Stocks always increase during the winter and spring months because more efficient work at the enameling ovens can be done in cold weather and manufacturers operate at maximum capacity as long as they can finance operations and find storage capacity for the products.

² Data furnished by *Sanitary Pottery Association* and include the following articles, with percentages of total orders in 1920: Siphon jets 6.5 per cent, washdowns 54 per cent, reverse traps 4.3 per cent, small tanks 27.7 per cent, large tanks 5.2 per cent, and lavatories (not reported prior to July, 1920) 2.3 per cent.

¹ Data on cement is from the U. S. Department of the Interior, Geological Survey, except prices, which are average of weekly prices reported by the U. S. Department of Labor, Bureau of Labor Statistics; data on concrete pavements for roads, streets, and alleys from Portland Cement Association, Highways Bureau.

² Yearly figures represent stocks at end of year, not an average of monthly stocks, except for 1921 and 1922.

³ Of the numerical 1919 monthly average, 3,221,000 yards was actually reported. The remainder is the prorated portion of a total of 3,338,309 yards for the year of pavement less than 6 inches thick not allocated by class of pavement. This has been prorated to roads on the basis of the roads' share of allocated contracts.

⁴ Includes streets and alleys besides roads.

¹ Data compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce.² Includes potash imported as chemicals and also the muriate and sulphate used in fertilizers.³ Largely phosphate rock.⁴ Covers first 21 days only, during which period the old tariff law was in effect; remaining 9 days included with October.

CHEMICALS—PRODUCTION AND PRICES.

¹ Compiled from reports of the *National Wood Chemical Association* to which are added reports from the principal nonmember firms. Total reports for each month vary from firms with a capacity of 3,200 cords to 4,500 cords daily; all months are therefore prorated to a daily capacity of 4,500 cords, representing about 90 per cent of the industry, on the basis of capacity reporting each month.

² August, 1914.

³ Compiled from weekly wholesale quotations of 35 drugs and pharmaceutical chemicals by the *Oil, Paint, and Drug Reporter*.

⁴ Compiled from weekly wholesale quotations of 20 essential oils by the *Oil, Paint, and Drug Reporter*.

⁵ Compiled from weekly wholesale quotations of 40 crude botanical drugs by the *Oil, Paint, and Drug Reporter*.

⁶ The chemical price index from *Chemical and Metallurgical Engineering* includes quotations on 25 commodities selected on the basis of their importance as representing both qualitatively and quantitatively the principal branches of the chemical industry. These prices are weighted on the basis of total production plus total imports in the year 1919. The figures are averages of weekly prices.

⁷ Wholesale average monthly price of sulphuric acid from *United States Department of Labor, Bureau of Labor Statistics*.

¹Except shipments of linseed oil and cake and meal from Minneapolis Chamber of Commerce. The sources of the other data are: Imports and exports of vegetable oils from the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Cottonseed oil from the U. S. Department of Commerce, Bureau of the Census; and Oleomargarine production and consumption from the U. S. Treasury Department, Bureau of Internal Revenue.

²Includes cottonseed, corn, and linseed oils.

³These figures are for fiscal years beginning July 1.

⁴The following oils are included: Chinese nut, cocoa butter, coconut, cottonseed, olive (inedible), olive (edible), palm, palm kernel, peanut, rapeseed, soya bean. Where certain of these are reported in gallons, they have been converted into pounds, allowing 7½ pounds per gallon.

⁵Colored and uncolored, as represented by tax-paid withdrawal.

⁶Figures for 1917 to 1922 are monthly averages of cottonseed-oil production and stocks on hand at the end of the month during cotton crop years (beginning August 1 of the preceding year and ending July 31 of the year to which the figure is credited).

⁷Covers first 21 days only, during which period the old tariff law was in effect.

VEGETABLE AND FISH OILS.

¹ The figures given on pages 104, 105, and 108 represent the movement of certain more important vegetable and animal fats and oils, as reported quarterly by the Bureau of the Census, Department of Commerce. The data cover factory production, factory consumption, and factory and warehouse stocks. The stock figures refer to the amount on hand at the end of each period.

FARM PRODUCTS, WHOLESALE PRICES.

¹Wheat flour production, consumption, and stocks reported by U. S. Grain Corporation, prior to July, 1920, later months from Russell's Commercial News; Visible supply of wheat and corn from Bradstreet's; Receipts and shipments of wheat and corn and receipts and visible supply (at nearest week to end of month) of oats, compiled by Chicago Board of Trade, from the Price Current-Grain Reporter; receipts of barley and rye compiled from reports of commercial organizations by Federal Reserve Board; grindings of corn by the wet process in the manufacture of cornstarch, glucose, etc., compiled by the American Manufacturers Association of Products from Corn and comprises the entire production of the United States.

²Consumption calculated from production, stocks, imports, and exports. Stocks represent flour in all positions, calculated from actual reports bearing a known relation to total stocks.

³Aggregate stocks in United States and Canada east of the Rocky Mountains, on nearest Saturday to end of the month.

⁴At principal primary markets.

⁵For monthly production figures since January, 1914, see page 47 in the October, 1922 (No. 14) issue of the Survey.

CEREAL EXPORTS.

Table 69.—(A) INDEX NUMBERS AND (B) NUMERICAL DATA.

¹ Receipts, shipments and stocks at mills from *Rice Millers' Association*, comprising movement of the whole rice crop except California rice. Shipments of rice through New Orleans compiled by *New Orleans Board of Trade*. Stocks of foreign rice in warehouses and imports and exports from *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*, data for rough rice being reduced to the equivalent clean rice at 162 pounds of rough to 100 pounds of clean.

² Rough rice barrels of 162 pounds are equivalent to clean rice pockets of 100 pounds each.

* Covers first 21 days only, during which period the old tariff law was in effect.

LIVE-STOCK MOVEMENT.

¹ Exports reported by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; cold-storage holdings from the U. S. Department of Agriculture, Bureau of Agricultural Economics; production of beef and pork from animals slaughtered under Federal inspection reported by the U. S. Department of Agriculture, Bureau of Animal Industry. Apparent consumption has been computed from the inspected slaughter plus imports less exports and the change in storage holdings. Wholesale prices are average for the month from U. S. Department of Labor, Bureau of Labor Statistics.

² Cold-storage holdings are distinctly seasonal. No allowance for this has been made in calculating index numbers. Figures represent storage holdings on the first day of each month.

³ Total dressed weight slaughtered under Federal inspection, including veal with beef. The slaughter under Federal inspection, according to census figures in 1919, amounted to 68 per cent of the total number of animals slaughtered in the United States in the case of hogs and 82 per cent in the case of beef and 91 per cent for lamb.

⁴ Includes meat produced under Federal inspection only.

⁵ Includes bacon, ham, shoulders, lard, neutral lard, and canned, fresh, and pickled pork.

⁶ Includes fresh, canned, pickled, and cured beef, and oleo oil and tallow.

⁷ Includes beef, frozen, cured, and in process of cure.

⁸ Includes pork, frozen, dry salt, and pickled, both cured and in process of cure, and lard.

⁹ Frozen lamb and mutton.

¹ Data compiled by U. S. Department of Agriculture, Bureau of Agricultural Economics, except fish catch representing landings from vessels at Boston and Gloucester, Mass., Portland, Me., and Seattle, Wash., compiled by U. S. Department of Commerce, Bureau of Fisheries.

² Boston, New York, Philadelphia, Chicago, and San Francisco. Total of weekly figures with first and last weeks of month prorated.

³ At end of the month.

⁴ As of 15th of the month.

⁵ Excluding Portland and Seattle.

⁶ Holdings on first day of month.

⁷ One case of eggs equals 30 dozen, or about 45 pounds net.

⁸ Index number less than 1.

¹ Receipts, stocks, and meltings and Cuban movement reported by the *Statistical Sugar Trade Journal*; Imports and exports from U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce; Wholesale and retail sugar prices, from U. S. Department of Labor, Bureau of Labor Statistics.

² Figures include reports from seven ports: Boston, New York, Philadelphia, Savannah, New Orleans, Galveston, and San Francisco. Meltings are calculated from weekly reports, the odd days being prorated. Stocks represent the amount of raw sugar in the hands of refiners on the dates nearest the end of the month as reported for each port.

³ Covers first 21 days only, during which period the old tariff law was in effect.

¹ Represents the total of plug, twist, fine-cut, smoking tobacco, and snuff.² The Internal Revenue reports the number of large cigars, i. e., those weighing over three pounds per thousand, and the number of small cigars weighing less than the above amount. Likewise they report the number of large and small cigarettes, the former weighing more than three pounds per thousand. Large cigars and small cigarettes represent more than 90 per cent of the total number manufactured in each case and are the only ones given in this table.³ Yearly figures on crop production represent the latest revised estimates as reported by the U. S. Department of Agriculture, Bureau of Agricultural Economics. The monthly figures for 1920 and 1921 are the current monthly estimates of total production.⁴ Partly estimated. Kentucky sales for first half year not available and are estimated as equal to the sum of the sales in the other States, which is approximately the normal proportion of Kentucky sales to the total.

¹ Panama Canal traffic reported by *The Panama Canal*; Tonnage entered and cleared in foreign trade, *U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce*; Sault Ste. Marie Canal traffic, *U. S. War Department, Engineer Corps*; New York State canal traffic from *New York State Superintendent of Public Works*; Re-ceipts and shipments of cargo by river at St. Louis (almost all by Mississippi River) from *Merchants Exchange of St. Louis*; Cargo tonnage on Government-owned barge line from *U. S. War Department, Mississippi-Warrior service*; Index of ocean freight rates from the *Federal Reserve Board, Division of Analysis and Research*.

² Represents tonnage of cargo carried by commercial vessels. Yearly figures refer to fiscal years ending June 30.

³ Figures for 1913 to 1922 represent monthly averages for eight months during which the canals are usually open.

⁴ The index of ocean freight rates represents rates to 7 ports in the United Kingdom and a total of 17 ports for all of Europe. The index numbers are weighted by the geometric means of these rates. The weights include the relative importance of each port and also the relative importance of the 5 principal products—grain, provisions, cotton, cottonseed oil, and sack flour.

TRANSPORTATION—WATER.

Table 87.—NUMERICAL DATA.

⁵ About two-thirds of this traffic is through the Erie Canal and one-third through the Champlain Canal. Figures for 1913 to 1922 represent monthly averages for seven months, during which the canals are usually open.⁶ Net ton represents 100 cubic feet internal carrying capacity after prescribed allowances for crew and engine space.⁷ January, 1920.

¹ Data from the American Railway Association.² Daily average for the last period (7 or 8 days) of the month, exclusive of Canadian roads. The Association reports the number of freight cars which are idle (surplus) and also the number of requests for cars which can not be filled (shortage). The difference between these two figures represents the net freight-car situation for the country as a whole. The car shortages can not ordinarily be filled from the idle cars because of the uneven geographical distribution of the latter.³ Includes other classes than groups listed.⁴ Total includes coke shipments in addition to commodity groups listed.⁵ Index number less than 1.⁶ Number of railroad freight cars in need of repairs on first day of each month. Note that 1913 is the base year, having a monthly average of 150,909 cars in need of repairs.

¹ Data on locomotives in bad order for period 1916 to May, 1918, from *Bureau of Railway Economics*, from June, 1918, to February, 1920, from the *U. S. Railroad Administration* and since February, 1920, from the *American Railway Association*; data on revenues and expenses, from the *Interstate Commerce Commission*, represent Class I roads, those having annual operating revenues in excess of \$1,000,000; data on ton-mile and passenger-mile operation are from the *Bureau of Railway Economics*; Pullman passenger traffic furnished by *The Pullman Co.*; express earnings are reports of the *American Railway Express Co.* to the *Interstate Commerce Commission*, to which are added reports of the *Southeastern Express Co.* from the time of its organization in May, 1921.

² Net railway operating income includes net operating revenue (equal to the difference between total operating revenue and total operating expenses) from which there have been deducted railway tax accruals, uncollectible railway revenues, equipment and joint facility rents.

³ Fiscal year ending June 30, of year indicated.

⁴ These figures are from *Interstate Commerce Commission* reports.

⁵ Deficit.

¹ Internal revenue taxes on admissions to theaters, cabarets, etc., and candy sales from *U. S. Treasury Department, Bureau of Internal Revenue*; postal receipts in 50 selected cities from *U. S. Post Office Department*; magazine advertising as reported by *Printers' Ink*; newspaper advertising compiled by *New York Evening Post*.

² Data represent internal revenue taxes collected under the revenue acts of 1918 and 1921. For taxes on theater and cabaret admissions the rate of tax under the act of 1921 (represented by data for 1922) is "1 cent for each 10 cents or fraction thereof of the amount paid for admission," payable by the person paying such admission, except "where the amount paid for admission is 10 cents or less, no tax shall be paid." The act of 1918 provided for the same rate of taxation but allowed no exceptions and, hence, the data for 1922 are not quite as comprehensive as the earlier data. However, the variance is not such as will not allow comparison.

³ Computed on the basis of a 5 per cent excise tax prior to January, 1922, and since January, 1922, on the basis of a 3 per cent tax (revenue act of 1918 superseded by revenue act of 1921).

⁴ These figures represent the number of lines of advertising carried by the leading magazines dated for the month noted.

⁵ Compiled from 22 identical cities: New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Boston, Baltimore, Los Angeles, Buffalo, San Francisco, Milwaukee, Washington, Cincinnati, New Orleans, Minneapolis, Indianapolis, Columbus, Louisville, St. Paul, Birmingham, and Houston. For the years 1916 to 1918, no reports were available for Boston, Louisville, Houston, and Columbus. The totals for those years were computed from the actual reports of the 18 other cities, allowing 13.85 per cent of the total to the four missing cities, the average ratio of those cities to the total in the subsequent years.

⁶ Six months' average, July to December inclusive.

¹ This table is submitted in response to a demand for publication of the figures of sales of individual stores, which have been compiled from published reports. These figures represent money values of sales. On account of the tremendous increase in J. C. Penney Co. sales, this store is not included in our total of 10-cent store sales. Data on American Wholesale Corporation placed here for convenience. Mail-order and chain store sales are reported directly by the companies or compiled from the *Commercial and Financial Chronicle*. Sales of American Wholesale Corporation are placed here for convenience.

² Includes Sears, Roebuck & Co. and Montgomery Ward & Co.

³ Includes F. W. Woolworth & Co., S. S. Kresge Co., McCrary, and S. H. Kress & Co.

RETAIL SALES.

Table 96.—INDEX NUMBERS.

Based on data from Government sources.¹

[Base year in bold-faced type.]

YEAR AND MONTH.	DEPARTMENT STORES.									MAIL-ORDER HOUSES (4 houses).	CHAIN STORES.²

April																

¹ Compiled by the Federal Reserve Board, Division of Analysis and Research. Index numbers are based upon dollar values.² With the exception of the 4 music chains which operate only locally through the West, these data include the larger individual chain-store systems, which in the aggregate cover practically the entire country. Approximately 10,000 unit stores are represented by the 16 grocery chains; 1,665 unit stores by the 4 five and ten cent chains; 352 unit stores by the 7 drug store chains; 2,250 unit stores by the 3 cigar chains; 210 unit stores by the 5 shoe chains; and 50 unit stores by the 4 music chains.³ In calculating bases estimates are made for sales of stores in the Minneapolis and Dallas districts for the months of 1919 for which there are no reports.

DEPARTMENT STORE STOCKS.

¹ Compiled from weekly reports to the U. S. Department of Labor, Employment Service, by state and municipal employment agencies. Eastern states included in the report are Connecticut, District of Columbia, Massachusetts, New Jersey, New York, and Rhode Island (Delaware, Maryland, and Pennsylvania, now reporting, are excluded to show true comparison). Central states are Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. Southern states include Alabama, Arkansas, Georgia, Kentucky, North Carolina, Oklahoma, Texas, and Virginia. Western states include Arizona, California, Colorado, Idaho, Oregon, and Washington; Montana is included beginning with March, its figures being so small as not to affect the total.

² One week in July estimated for South Dakota.

³ One week in August estimated for Iowa and Michigan.

⁴ Month of September for South Dakota and one week for Iowa estimated.

⁵ First two weeks in July estimated for Arkansas.

⁶ First two weeks in July estimated for Washington.

¹ Except railway employment from the Bureau of Railway Economics, data on New York State factories furnished by the New York Department of Labor; Wisconsin factories by the Wisconsin Industrial Commission; Unemployment in Pennsylvania, estimated as of the first of the month on the basis of reliable statistics, by the Pennsylvania Department of Labor and Industry, Bureau of Employment; Immigration and emigration statistics from U. S. Department of Labor, Bureau of Immigration.

² Figures represent reports from 1,648 firms in New York State employing more than one-third of the factory workers of the state. The 1914 average upon which the index numbers are calculated is an average of the 7 months, June to December, 1914, inclusive. As originally published by the New York Department of Labor, the index numbers are based on June, 1919, and have been recalculated to the 7-month average.

³ Includes total admitted, both immigrants and nonimmigrants.

⁴ Includes total departed, both emigrants and nonemigrants.

^e Nine months' average, April to December.

^f Average for the quarter beginning with the month for which figures are shown.

COST OF LIVING.

¹ Index numbers represent retail prices on the first day of the month, except food, which is the retail food index of the U. S. Bureau of Labor Statistics for the 15th of the preceding month. Beginning with March, 1922, all prices shown are as of the 15th of the month indicated. The index is weighted according to the estimated consumption of average wage earners before the war, on the following basis: Food 43.1 per cent, shelter 17.7 per cent, clothing 13.2 per cent, fuel and light 5.6 per cent, sundries 20.4 per cent.

² Index numbers represent averages for the month in 32 cities; food prices reported by 15 to 25 dealers in each city, fuel and light by 10 to 15 firms, including public utilities, in each city; other quotations secured directly from records. Rentals are based on 250 to 950 houses and apartments in each city, and for each item of clothing, furniture, and miscellaneous, four quotations are secured in each city (five in New York City).

PRICES.

¹ Wholesale prices and retail food prices from the U. S. Department of Labor, Bureau of Labor Statistics; farm prices from the U. S. Department of Agriculture, Bureau of Agricultural Economics.² The revised wholesale price index number of the U. S. Department of Labor, Bureau of Labor Statistics, is based on quotations of 404 commodities. These commodities are arranged in 9 groups as given in the table. In computing this index, the price of each commodity is weighted by multiplying it by the estimated quantity of that article marketed in the census year 1919. For comparable yearly data for the period 1890 to 1921, see the Monthly Labor Review for September, 1922, p. 46; and for comparable monthly data for period 1913 to 1922, see the Monthly Labor Review for July, 1922, p. 60.³ The retail food price index compiled by the Bureau of Labor Statistics represents the changes in the price of 22 articles of foods as reported by retail dealers in 51 of the larger cities as of the 15th of the month.⁴ As of the 15th of each month. Farm prices of crops represent the relative average prices to farmers of the 10 leading crops.

¹ First eight columns give the revised wholesale price index numbers of the U. S. Department of Labor, Bureau of Labor Statistics, as reclassified by the Federal Reserve Board into the groupings as shown. The weights are the same as those used by the Bureau of Labor Statistics and the total of all commodities is therefore the same as the revised Department of Labor index. Dun's and Bradstreet's index numbers are calculated as of the first of each month, but really refer to prices in the preceding month; the index numbers have been calculated to a 1913 base from the actual figures as published in these journals. Bradstreet's index is the sum of prices per pound of the commodities, while Dun's is weighted by the amount "annually consumed by each inhabitant."

¹ Data in the first three columns are original compilations of the *Federal Reserve Board* constructed for the purpose of international price comparisons; basic prices are obtained from trade journals and private firms and weighted according to the 1913 volume imported and exported, respectively, for "imported goods" and "exported goods." The total index number includes also goods produced, weighted by production in 1913, and goods consumed, weighted by consumption in 1913.

² Compiled by the *London Economist*; quotations on 44 commodities, mostly raw materials, unweighted.

³ Compiled by British Government *Board of Trade*; quotations on 150 commodities.

⁴ Compiled by *Bulletin de la Statistique Generale* of the French Ministry of Labor and Social Welfare; quotations on 45 commodities, mostly raw materials, unweighted.

⁵ Compiled by *Prof. Bachi*; quotations on 38 commodities until 1920, thereafter 76 commodities.

⁶ Compiled by the *Federal Reserve Board* on the same basis as their United States index for international price comparison. Detailed descriptions of these index numbers may be found in the following numbers of the *Federal Reserve Bulletin*: United Kingdom, February, 1922, pp. 147-153; Canada, July, 1922, pp. 801-806; France, August, 1922, pp. 922-929; Japan, September, 1922, pp. 1052-1059.

⁷ Compiled by *Svensk Handelstidning* as of the middle of each month; 47 quotations.

⁸ Compiled by *Neue Zürcher Zeitung* as of the first of each month; quotations on 71 commodities.

⁹ Compiled by the Canadian *Department of Labor*; quotations on 272 commodities, unweighted.

¹⁰ Compiled by the *Bank of Japan*; quotations in Tokyo on 56 commodities, unweighted.

¹¹ Compiled by the *Australian Commonwealth's Bureau of Census and Statistics*; quotations on 92 commodities, weighted by consumption.

¹² Compiled by the *Indian Department of Statistics*; quotations on 75 commodities.

¹ Compiled by the Association of Life Insurance Presidents. The data represent only new business that has been paid for, exclusive of revivals, increases, and dividend additions. The 40 companies whose new business is included in this table had in force 77.1 per cent of the total legal reserve life insurance outstanding in the United States as of Dec. 31, 1920.

¹ Savings deposits in each Federal Reserve district (including both commercial and savings banks) compiled by Federal Reserve Bank of that district from reports of identical banks, as follows: Boston, 64 banks, New York, 30, Philadelphia, 75, Cleveland, 18, Richmond, 93, Chicago, 219, San Francisco, 75. Deposits in savings banks of New York State furnished by Savings Banks Association of the State of New York; Postal savings from U. S. Post Office Department.

² Yearly figures from 1914 to 1920, inclusive, are averages of deposits on June 30 and December 31 of each year; 1913 figures are for December 31; 1921 is average of quarterly figures.

³ Approximate figure calculated from deposits and withdrawals.

¹ Figures for Debits to individual accounts, condition of Federal Reserve Banks, and condition of reporting member banks are from the *Federal Reserve Board*; Bank clearings from *Bradstreet's*; Interest rates in New York market from the *Commercial and Financial Chronicle*.

² Debits of banks in about 150 of the larger clearing-house centers, covering weekly totals, the first and last weeks of the month being prorated.

³ Condition as of last Wednesday of the month. Prior to April, 1921, figures are of last Friday of month.

⁴ Includes reports from more than 800 banks in the leading cities in the United States on condition as of last Wednesday of month. Prior to April, 1921, figures are as of last Friday of month.

⁵ This column has been recomputed so as to include clearings from 117 identical cities in each year. Estimates had to be made for a few of the smaller cities in the earlier years to complete the data.

⁶ Prior to March, 1921, net deposits were used in calculating reserve ratios.

¹ Except telephone earnings, which are combined reports of 10 largest telephone companies, and telegraph earnings, which are combined reports of the Western Union and Postal Telegraph Companies, as reported to the Interstate Commerce Commission. Business failures are from *Dun's Review*; Dividend and interest payments, New capital issues, and New incorporations from the *New York Journal of Commerce*.

² Represents the value of the authorized capital of new enterprises incorporated in the principal eastern states.

³ Monthly data for the period 1913-1921 will be found in the October SURVEY (No. 14), page 46.

⁴ Includes bank dividends not separately shown for those months where such payments are reported. The total interest payments may be obtained by subtracting total dividend payments from total interest and dividend payments, monthly data of which for the period 1913-1921 were published in the September SURVEY (No. 13), p. 51. It is to be noted that the total dividend and interest payments for July, 1918, should be stated as \$333,011,000, instead of \$633,011,000.

¹ Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of payment items reported bears to the total number of transactions reported. The commodities covered by these transactions are largely textile. The year 1916 is taken as a base, as payments were abnormally high in 1919.

² California, Oregon, and Washington.

³ Arizona, New Mexico, Colorado, Utah, Nevada, Idaho, and Wyoming.

¹ Compiled by the *Credit Clearing House* from reports to it by manufacturers and wholesalers on items of credit facts from their ledgers concerning merchants or jobbers to whom they sell. The numerical data given above show the percentage which the number of items reported relating to orders or to creation of indebtedness bears to the total number of transactions reported. As one transaction may cover both an order and an indebtedness or a payment, the sum of the percentages of orders, indebtedness, and payments will usually exceed 100 per cent. The commodities covered are largely textiles, and the individual orders are stated to average from \$250 to \$500, depending on trade conditions. The year 1916 is taken as a base, as it is believed to be more nearly normal than 1919, in which orders and payments were unusually large and indebtedness unusually small.

For boundaries of districts see page 163.

¹ Daily averages of noon rates for cable transfers reported to the Treasury daily by the New York Federal Reserve Bank. Average figures for the years 1914 to 1918, inclusive, where given, are weekly averages of commercial quotations from the *Annalist*.

² Parity established October, 1920. Prior to that, par value of the rupee was 32.44 cents.

³ The foreign exchange index number recently computed by the Federal Reserve Board is based upon the average rates of exchange for 17 countries, Germany excluded, and is here substituted for the weighted geometric average previously published. The index represents the "aggregative" average of cable transfer rates on these countries and is based on the total volume of imports and exports of merchandise, gold, and silver from and to each country for the preceding twelve months. The countries used in computing the index are Belgium, Denmark, England, France, Italy, Netherlands, Norway, Spain, Sweden, Switzerland, Canada, Argentina, Brazil, Chile, China, India, and Japan. The method of computation and the reasons for the change are explained in detail in the *Federal Reserve Bulletin* for October, 1922, page 1260.

* Average value of the paper peso in 1913.

¹ Compiled by the U. S. Department of Commerce, Bureau of Foreign and Domestic Commerce, and represent imports of merchandise only. Up to and including May, 1921, import values represented "actual market value or wholesale price at the time of exportation to the United States, in the principal markets of the country from whence exported, including the value of all containers and coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchant case in condition, packed ready for shipment to the United States." (Tariff act of 1913.) Beginning with June, 1921, the import values are either the actual foreign market value, as defined above, or "the export value, including any export tax imposed by the country of exportation," whichever is higher. (Emergency tariff act of May 27, 1921.)

² Figures for September, 1922, include only the first 21 days of September, during which the old tariff law was in force.

EXPORTS FROM THE UNITED STATES.

¹ Data on operations of Canadian employment service prorated from weekly reports of Dominion Department of Labor, Employment Service of Canada; foreign trade from Department of Trade and Commerce, Dominion Bureau of Statistics; issues of Canadian bonds compiled by The Financial Post; bank clearings and business failures from Bradstreet's.

² Placements are termed casual when employment lasts one week or less.

Yearly figures represent the monthly averages for the Canadian fiscal year which ends March 31 of the succeeding year.

FOREIGN TRADE OF THE UNITED KINGDOM.

¹ Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Figures for France include lignite (averaging 66,000 tons per month in 1913). Beginning 1919, Alsace-Lorraine (averaging 203,000 tons monthly in 1919 and 264,000 tons in 1920) is included with France instead of with Germany and beginning 1920 the Saar district (784,000 tons per month) is similarly transferred. Upper Silesia, whose disorders were responsible for the curtailment of German production in May, 1921, was included as a whole with Germany until June, 1922, since which time only the part of Upper Silesia allotted to Germany is included.

² One metric ton is equivalent to 2,204.6 pounds.

³ Five weeks period; other months cover four weeks.

⁴ Includes upper Silesia. The old territory produced 837,000 tons in July.

METAL PRODUCTION IN FOREIGN COUNTRIES.

¹ Compiled by the Department of Commerce, Bureau of Foreign and Domestic Commerce, from official sources. Canadian figures furnished direct by Dominion Department of Labour, Employment Service of Canada. The figures, except in the case of British compulsory insurance, which relate to the operations of the Government labor bureau, represent the percentage of trade-union members employed. They have been converted, by inverting, from the original figures showing percentage unemployed.

² December.

³ Average of quarters, March, June, September, and December.

⁴ Quarter ending this month.

⁵ The report for December covers 6,075,755 organized workers of whom only 97,687 or 1.6 per cent were unemployed.

INDEX—Continued.

Page numbers refer to data in detailed tables (pp. 46 to 183) only. Items in the table on "Trend of Business Movements" (pp. 24 to 45) and in the text are arranged in groups which should make reference easy without the necessity of an index. Note that only the page containing the index number tables is given here. Where the numerical data for these items are in a separate table, they will always be found on the page opposite the index numbers.

	Page.		Page.		Page.
Rope paper sacks, shipments.....	82	Sweden:		Vegetable oils:	
Rosin, receipts and stocks.....	94	Employment.....	182	Exports and imports.....	107
