## MONTHLY SUPPLEMENT TO COMMERCE REPORTS

# UNITED STATES DEPARTMENT OF COMMERCE <br> WASHINGTON <br> SURVEY OF CURRENT BUSINESS 

JULY, 1924
No. 35

COMPILED BY

## BUREAU OF THE CENSUS BUREAU OF FOREIGN AND DOMESTIC COMMERCE BUREAU OF STANDARDS

In addition to figures given from Government sources, there are also incorporated for completeness of service the figures from other sources generally accepted by the trades, the authority and responsibitity for which are noted in the text

Subscription price of the Survey of Current Business is $\$ 1.50$ a year; single copies (monthly), 10 cents, quarterly issues, 20 cents. Foreign subscriptions, $\$ 2.25$; single copies, (monthly issues) including postage, 14 cents, quarterly issues, 20 cents. Subscription price of Commerce Reports is $\$ 4$ a year; with the Survey, $\$ 5.50$ a year. Make remittances only to Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency at sender's risk. Postage stamps or foreign money not accepted

## INTRODUCTION

The Survey of Current Business is designed to present each month a picture of the business situation by setting forth the principal facts regarding the various lines of trade and industry. At quarterly intervals detailed tables are published giving, for each item, monthly figures for the past two years and yearly comparisons, where available, back to 1913 . In the intervening months the more important comparisons only are given in the table entitled "Trend of business movements" (p.35).

In the quarterly numbers (see issue for May, 1924, No. 33) blank lines covering the next three months have been left at the bottom of each detailed table which will enable those who care to do so to enter new figures as soon as they appear.

## ADVANCE SHEETS

Realizing that current statistics are highly perishable and that to be of use they must reach the business man at the earliest possible moment, the department has arranged to distribute advance leaflets almost every week,' whenever sufficient material is available, to those subscribers who request them. The leaflets are usually mailed on Wednesdays, and give such information as has been received during the preceding week. The information contained in these leaflets is also published in "Commerce Reports," issued weekly by the Bureau of Foreign and Domestic Commerce. The complete bulletin is distributed as quickly as it can be completed and printed.

## BASIC DATA

The figures reported in the accompanying tables are very largely those already in existence. The chief function of the department is to bring together these data which, if available at all, are scattered in hundreds of different publications. A portion of these data are collected by Government departments, other figures are compiled by technical journals, and still others are reported by trade associations.

## INDEX NUMBERS

To facilitate comparison between different items and render the trend of a movement more apparent, index or relative numbers have been calculated. The index numbers enable the reader to see at a glance the general upward or downward tendency of a movement which can not so easily be grasped from the actual figures.

In computing these index numbers the last pre-war year, 1913, or in some instances a five-year average, 1909-1913, has been used as a base equal to 100 wherever possible. In many instances comparable
figures for the pre-war years are not available, and in such cases the year 1919 has usually been taken as the base. For some industries 1919 can not be regarded as a proper base, due to extraordinary conditions in the industry, and some more representative period has been chosen. In a few cases other base periods are used for special reasons. In all cases the base period is clearly indicated.

The index numbers are computed by allowing the monthly average for the base year or period to equal 100. If the movement for a current month is greater than the base, the index number will be greater than 100 , and vice versa. The difference between 100 and the index number will give at once the per cent increase or decrease compared with the base period. Thus an index number of 115 means an increase of 15 per cent over the base period, while an index number of 80 means a decrease of 20 per cent from the base.

Index numbers may also be used to calculate the approximate percentage increase or decrease in a movement from one period to the next. Thus if an index number at one month is 120 and for a later month it is 144 there has been an increase of 20 per cent.

## BUSINESS INDICATORS

The diagrams on page 2 have been prepared to facilitate comparisons between a few of the more important business movements. The lines are plotted on what are known as ratio charts (logarithmic scale). These charts show the percentage increase and allow direct comparisons between the slope of one curve and that of any other curve regardless of its location on the diagram; that is, a 10 per cent increase in an item is given the same vertical movement whether its curve is near the bottom or near the top of the chart.

The difference between this and the ordinary form of a chart can be made clear by an example. If a certain item, having an index number of 400 in one month, increases 10 per cent in the following menth, its index number will be 440 , and on an ordinary chart would be plotted 40 equidistant scale points higher than the preceding month. Another movement with an index number of, say, 50 , also increases 10 per cent. making its index number 55. On the ordinary (arithmetic) scale this item would rise only 5 equidistant points, whereas the previous item rose 40 points, yet each showed the same percentage increase. The ratio charts avoid this difficulty and give to each of the two movements exactly the same vertical rise, and hence the slopes of the two lines are directly comparable. The ratio charts compare percentage changes, while the arithmetic charts compare absolute changes.

## SUMMARY FOR MAY

## (See note at botiom of opposite cover page. Summary for June based on early items given on p. 29.)

Industrial activity in May was generally less than in the previous month or a year ago. Decreases in manufacturing output from April and a year ago were registered in the production of iron and steel, automobiles, tires, shoes, maple flooring; silica and clay fire brick, and in the mill consumption of cotton, wool, and tin. Production increases over both periods occurred in zinc, face brick, oak flooring, Portland cement, cigarettes, and silk consumption, while increases over April alone were registered in the production of railway locomotives, prepared roofing, lumber, coke, refined sugar, manufactured tobacco and cigars. Mineral output in May registered decreases from a year ago in coal, petroleum, and silver, each of these minerals showing increased output, however, over April, while the mine output of zinc in May was larger than in April and a year ago, and copper, although smaller than in April, was larger than a year ago. Unfilled steel orders at the end of May were lower than on April 30.

Sales at retail by mail-order houses declined in May from April and a year ago, while sales of 10 -cent chains, although larger than a year ago, registered a decline
from April. Wholesale prices and the cost of living continued to decline in May, while retail food prices remained unchanged. Business failures were more numerous, while defaulted liabilities of failing firms were smaller than in either the previous month or a year ago. Average prices of 25 industrial stocks were slightly lower than in April, while bond prices rose and interest rates averaged lower.
Check transactions were larger in New York City than in April or a year ago, while for the rest of the country they were smaller than in either of these periods. The Federal reserve ratio averaged higher, while the rediscount rate of the New York and Boston Federal Reserve Banks were lowered.

Weekly car loadings in May averaged higher than in April but were less than a year ago, while the net available freight-car surplus continued to increase. Imports into the United States declined in May from the previous month and a year ago, while exports, although larger than in May, 1923, were smaller than in April. The general index of foreign exchange averaged lower in May.

## BUSINESS INDICATORS: 1920-1924

(1913 monthly averages-100. See explanation on inside front cover. Except tor "net freight ton-milos" latest month plotted is May, 1924.)

## BUSINESS INDICATORS

The following table gives comparative index numbers for a selected list of important business movements. It is believed that this table will prove useful, because it separates out from the large mass of material a comparatively small number of items which are often regarded as indicative of business in general.

The table has been divided into two parts, the first containing those items for which index numbers can be calculated, using 1913 as a base. The second part contains items for which comparable data back to 1913 are not available. This latter group of index numbers is calculated by letting the 1919 monthly average equal 100. Care should therefore be exercised in comparing the absolute value of the two sets of data. In either group, however, the upward or downward trend of the index numbers, compared to previous months, does reflect the present tendency in each item and will give a basis for business judgment.

Where available at the time of going to press, July 14, June indicators have bere been included, thus bringing this table up to date. It should be noted that the oharts on page $\mathcal{Z}$ show May data as the latest plotted.

## WHOLESALE PRICE COMPARISONS--MAXIMUM PRICE COMPARED TO PRICE IN RECENT MONTHS

Note.-Prices to producer on farm products and market price of wool are from U. S. Department of Agricullure, Bureau of Agricultural Economics. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics. As far as possible all quotations represent prices to producer or at mill. See diagram on page 4 .

Because of their avallablity at the time of going to press, July 14, the Jnne price data have here been included, thus bringing this table up to date. It should be noted that the chart on page 4 shows May prites only.

| COmmodities | Date and masmum relative price |  | $\substack{\text { March, } \\ \text { 1924 }}$ <br> 1913 ave | $\underbrace{\substack{\text { Aprill, } \\ 1824}}_{\text {A }}$ | May: 1924 $\qquad$ <br> price | June, | $\begin{aligned} & \text { Per cent } \\ & \text { Increase } \\ & \text { ( }+ \text { ) } \\ & \text { or } \\ & \text { dercease } \\ & \text { in June } \\ & \text { from } \\ & \text { May } \end{aligned}$ |

## COURSE OF BUSINESS IN MAY

- The following pages contain a review, by principal industries, of the more important statistics shown in the table on " Trend of business movements (p. 35). Summaries of production, stocks, sales, and price changes are also given, based on data in the tables on "Indexes of business (p.31).

## PRODUCTION

Manufacturing output as seen from the combined weighted index of 64 commodities based on 1919 as 100, declined to 112 in May from 118 in April and 135 at the peak reached a year ago. By major groups the production indexes of manufactured commodities show foodstuffs at 114 for May against 100 for April and 116 for a year ago; textiles at 82 against 97 and 127; iron and steel at 92 against 115 and 148; other metals at 174 against 176 and 158; lumber at 147 against 142 and 150 ; leather at 79 against 86 and 103; paper at 117 against 112 and 121; chemicals at 154 against 141 and 136; stone, clay, and glass at 139 against 129 and 139; and tobacco at 114 against 100 and 109.
Mineral production, as measured by the weighted index, on 1919 as 100 , stood at 113 for May against

106 for April and 141 for a year ago. All products of the mine, except copper and gold, registered increased output over April, but except for copper, gold, lead, and zinc, the May production of minerals was less than a year ago.
Marketings of animal products, based on 1919 monthly average marketings as 100 , increased seasonally to 124 from 118 in April and may be compared with 127 a year ago. Declines from a year ago in the movement to market were registered in cattle and calves, hogs, sheep, and eggs, while increases over May, 1923, were noted in the marketings of wool, poultry, fish, and milk.
Crop marketings registered an increase in May over both the previous month and May, 1923, the combined index based on 1919 as 100 standing at 60 for May as against 54 for April and 55 a year ago. The movement to market of crops by major groups shows grains at 63 for May against 55 for April and 57 a year ago; vegetables at. 124 against 121 and 118; fruits at 155 against 87 and 153; cotton and cotton products at 35 against 35 and 31 ; and miscellaneous crops (hay, tobacco, flaxseed, and cane sugar) at 27 against 24 and 22.

Buginess Indicators-Comparison or May with May, 1923.

## COMMODITY STOCKS

Commodity stocks, as seen from the weighted index of 45 basic commodities, after due allowance for seasonal variations, registered an increase over the previous month; the index based on 1919 as 100, standing at 142 for May 31 as against 136 for April 30 and 111 a year ago. Stocks of raw foodstuffs at the end of May on the same base were computed at 185 as against 164 for April 30 and 143 a year ago; stocks of other raw materials for manufacture at 105 against 110 and 93 ; manufactured foodstuffs at 84 against 86 and 79; and other manufactured commodities at 168 against 164 and 117. (See diagrams on pp. 9 and 22.)

## SALES

Sales of commodities by manufacturers in May were generally lower than in April or a year ago. Declines from April and a year ago were registered in the sales of steel castings, steel sheets, railroad locomotives, freight cars, power pumps, mechanical stokers, leather belting, abrasive paper and cloth, clay fire brick, maple flooring, all classes of enameled sanitary ware, tubular plumbing, elastic webbing, and finished cotton goods. Sales increases over April and a year ago were registered in merchant pig iron and oak flooring, while new orders for California redivood were larger in May than in April but smaller than a year ago, and new orders for southern pine and structural steel, although
larger than in May, 1923, were smaller than in April, 1924. The index of unfilled orders on manufacturers ${ }^{*}$ books, based on the 1920 monthly average as 100 , stood at 47 at the end of May as compared with 54 for April 30 and 87 a year ago.

Wholesale trade declined slightly from April, being in May 5 per cent smaller than a year ago. Sales of dry goods, shoes, and hardware, were considerably smaller than a year ago, while drug sales were slightly larger. Retail trade at department stores and mailorder houses also declined from the previous month, being in May 2 per cent and 6 per cent smaller, respectively, than in May, 1923. Sales at retail by $10-$ cent chains also declined from April but were 14 per cent greater than a year ago. Grocery chains, drug chains, and cigar chains registered larger sales in May than in either the previous month or a year ago, while music chains recorded less business in May than in either of those periods, and shoe and candy chains noted sales declines from the previous month but increased business over a year ago. Department-store stocks declined in May but were still 4 per cent larger than a year ago.

## PRICES

Prices received by producers for their crops at 39 per cent above pre-war, may be compared with 40 per cent in April and 40 per cent a year ago, while for livestock the producers' price index in May at 103, based upon 1913 average prices as 100 , may be compared with 102 in April and 105 a year ago.

Wholesale prices as compiled by the Department of Labor, based on 1913 average prices as 100, stood at 147 for May as against 148 in April and 156 a year ago. Price indexes of all groups of commodities, except food which remained unchanged, registered declines from the previous month. As regrouped by the Federal Reserve Board this index shows raw products at 152 as compared with 154 in April and 161 a year ago; producers' goods at 133 as against 135 and 148; and consumers' goods at 150 against 151 and 156 . On page 27 is given a full page chart showing the comparison between wholesale prices for raw materials, producers' goods, and consumers' goods, plotted by months since January, 1913. Dun's and Bradstreet's indexes of wholesale prices registered corresponding declines from April and a year ago.
The Federal Reserve Board's index of wholesale prices for international comparison at 156 for May, based on 1913 as 100 , may be compared with 158 for April and 167 a year ago, while French prices remained unchanged and British prices declined 2 per cent.
Retail prices of food in May showed no change from the previous month but were more than 1 per cent lower than a year ago. The cost-of-living index at 161 for May, based upon July, 1914, as 100, may be compared with 162 for April and 160 a year ago.

TEXTILES
Increases of 12 per cent occurred over April in May receipts of wool at Boston, domestic increasing 14 per cent and foreign 10 per cent. Compared with a year ago, domestic receipts increased but foreign receipts declined over 80 per cent. Imports of wool also declined considerably, and consumption by textile mills was less than in April. Machinery activity in woolen mills was also less than in April, cards, combs, spinning spindles, and carpet and rug looms showing reduced operations, although wide and narrow looms were operated at increased activity. Price comparisons show a decline in raw wool from April but no change in its products.

Cotton brought into sight in May exceeded the figures for April, 1924, and May, 1923. Imports of raw cotton declined from both periods, while exports exceeded the previous month by almost 2 per cent and were over 104 per cent larger than a year ago. Consumption of cotton by textile mills declined to 413,649 bales in May from 480,010 in April and 620,854 a year ago. Stocks of raw cotton held at both mills and warehouses were smaller than a year ago, while the world visible supply of American cotton shows an increase over May, 1923.
Fewer spindles were active in May than in April, 1924, or in May, 1923. Orders, billings, shipments, and stocks of goods at cotton finishing plants also declined from both these periods, while the operating activity
of finishing plants stood at 52 per cent of capacity as against 62 per cent in April and 74 a year ago. Exports of cotton cloth increased over the previous month and a year ago, while elastic webbing sales declined from both periods. The average price of cotton to the producer declined from April 15 to May 15, while the monthly average price of middling cotton rose. Cotton yarns and sheeting declined while print cloth remained unchanged in price.

Increases over April occurred in deliveries and stocks of silk, whereas, compared with a year ago, deliveries were larger and stocks smaller. The price of silk averaged lower in May than in April.

UNFILLED ORDERS FROM UNFTED STATES STEEL CORPORATION

-

PIG-IRON PRODUCTION AND UNFILLED STEEL ORDERS AT THE END OF EACH MONTH
UNFILLED ORDERS FROM UNITED STATES STEEL CORPORATION

## IRON AND STEEL

Stocks of iron ore on Lake Erie docks increased slightly in May and were about 13 per cent larger than a year ago. Consumption of iron ore dectined from both periods. Shipments from the mines increased in a seasonal movement and were slightly lower than in May, 1923.

The output of pigiron in May decreased to 2,615,000 tons from 3,233,000 in April and 3,868,000 a year ago, while both number and capacity of fumaces in blast were reduced about 20 per cent from April. Merolant pig iron statistice show decreases from April in production, shipments, and unfilled orders and increases in seles and in stocks on hand. Prices of pig iron aperaged ahout 81 per ton lower than in April.

Probtctron of Merchamts Bars: 1906-1923

Steel-ingot production for May totaled 2,628,000 tons as against 3,334,000 in April and 4,216,000 m May, 1923. Booking of steel castings also deolined from both periods, as did unfilled orders of the United States Steel Corporation. Statisties for steel sheets for May showed declines in production shipments, sales, unflled orders, and stocks, the operations amounting to 60 per cent of oapacity as against 79 percent in April; all items except unsold stocks were aiso less than a jear ago. Prices of steel averaged lower than in April. Exports of iron and steel increased over April but were less than a year ago.

Frodtomor of Stepl Irgons by mae Oprin Hearme hid Bagsemeri Prooesees: 1909-1923

[^1]Production of Steel Ingots: Percentage Distribution by Principal Processes, 1909-1923

Shipments of steel furniture declined from April and were about the same as a year ago. Bookings of fabricated structural steel, at 59 per cent of capacity, compared with 65 per cent in April and 57 a year ago. Shipments were the same as in April, at 71 per cent of capacity. Comparisons for earlier periods, as re-
ported to the Department of Commerce by 186 identical firms and 7 additional firms now out of business, with a present capacity of 242,940 tons per month, are shown on page 12 , based on a capacity of 250,000 tons per month in 1922 and 260,000 tons in 1923 and 1924.

Locomotive Shipments and Unfilled Orders
(June, 1924 latest plotted)

PRODUCTION OF CUT AND WIRE NAILS

The following table shows statistics of steel barrels reported to the Department of Commerce by 29 manufacturers operating 34 plants, in number of barrels:

Steel Barrels (in Number of Barrels)

| MONTH | On hand first of month | Manufactared | Shipped | On hand end of month | Unfilled orders end of month |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Jantary | 45,588 | 307, 189 | 303, 688 | 49,109 | 615,485 |
| February | 49,109 | 370,966 | 362, 725 | 57, 350 | 608,660 |
| . March. | 57,350 | 394, 478 | 394, 756 | 57,072 | 601, 683 |
| April. | 57, 072 | 416, 628 | 420, 129 | 53, 571 | 614,102 |
| May .- | 53,571 | 418,381 | 427,941 | 44,011 | 582, 022 |

Shipments of railroad locomotives from manufacturing plants were larger than in April but smaller than a year ago. Unfilled orders also increased over the previous month but declined about. 70 per cent from May 31, 1923. Freight-car orders declined from both periods. Vessels completed in May declined in both tonnage and number from April but increased over a year ago, while the uncompleted tonnage of vessels declined from April but increased over a year ago. (Sea diagram at bottom of p. 13.)

Sales of mechanical stokers were less than in April, 1924, or May, 1923.

## NONFERROUS METALS

Both production and exports of copper declined less than 1 per cent from April but exceeded the May, 1923, figures. The price of copper averaged less in May than in April. Sales of tubular plumbing goods declined both from the previous month and a year ago.

## Copper Production and Exports

Zinc production increased over April and was also larger than a year ago. Stocks of zinc in producers' hands increased almost 30 per cent during the month of May. .The price of slab zinc declined.

Relative Production and Stoces of Zino (1913 monthly averages $=109$ )

Tin stocks in warehouses in the United States declined while the world visible supply showed an increase during the month. Deliveries from warehouses declined from April and were also smaller than a year ago. The average price of tin fell 12 per cent from the April average.

Receipts and shipments of lead at St. Louis declined from April and the prices of pig lead averaged 12 per cent lower.

## FUELS

Both production and exports of bituminous coal were larger than in April but smaller than a year ago. Price changes in May were slightly downward, except the wholesale price, which remained the same.
The output and exports of anthracite coal also were both larger than in April but smaller than a year ago. The price of anthracite, however, tended upward.
The output of beehive coke increased 11 per cent, while by-product coke gained 33 per cent over April and also exceeded a year ago, as against a decline in beehive coke. Exports of coke declined from April and from a year ago, while the price in May was about 10 per cent less than in April.
The production of crude petroleum increased in May over the previous month but was smaller than a year ago, while consumption of crude petroleum in May increased over those two periods. Stocks of
petroleum continued to accumulate; being at the end of May 24 per cent larger than the inventories of a year ago. More new oil wells were completed in May than in April, while shipments of crude from the Mexican fields decreased from April and was more than a year ago. The wholesale price of petroleum at the wells averaged lower in May.

Proddction of Beehive and By-Proddct Coke

Production of Bituminods and Anthracite Coal

The accompanying diagram shows a comparison between automobile production, gasoline consumption, and gasoline stocks. It is significant to note from this chart that the movement of gasoline stocks, in general, is similar to that of automobile production except for the time element.

RELATIVE PRODUCTION OF AUTOMOBILES, CONSUMPTION OF GASOLINE, AND GASOLINE STOCKS

## AUTOMOBILES

The output of passenger automobiles dropped from 337,045 in April to 279,439 in May, while truck production declined from 36,154 to 33,374 cars. Shipments from factories decreased correspondingly. Taxes collected in May on sales of both passenger automobiles and accessories, representing April business, increased over the previous month, while taxes on truck sales declined slightly. Taxes from all three groups declined from a year ago.

Production, stocks, and shipments of all classes of tires-pneumatics, solids, and inner tubes-showed declines from April and from a year ago, the greatest relative declines occurring in the solid-tire group. The price of crude rubber advanced over the April average, but was less than a year ago, while imports declined from these same comparative periods.

Cumulative Automobile Truck Production at the End of. Specified Periods

## HIDES AND LEATHER

Imports of hides and skins declined from both the previous month and a year ago, the total inward movement in May being almost 50 per cent smaller than a year ago. All classes of hides and skins shared in this general decline from May, 1923, while calfskin imports alone registered an increase over April, 1924.

Prices of packers' heavy hides declined from the April average, but calfskins rose in price.

- Exports of both sole and upper leather increased slightly over April, with larger increases over May, 1923. Prices of leather were unchanged from April.

Sales of leather belting declined both from April, 1924, and May, 1923. The output of boots and shoes declined from April, and was also less than a year ago, while exports increased over the previous month but declined from May, 1923. No changes were shown in shoe prices from April.

The following table shows the number of leather gloves and mittens cut in May with comparison with April as reported to the Department of Commerce. by 232 identical establishments:

Leather Gloves and Mittens Cut (in Dozen Pairs)

|  | APRIL, 1924 |  | M 4 S, 1024 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Men's boys' |  | Men's and boys' |  |
| Dress and street gloves, etc. | 61, 244 | 10,894 | 59,724 | 11,269 |
| Imported............... | 30,243 | 8,960 | 29,964 | 8, 552 |
| Domestic --.......... | 31,001 | 1,934 | 29, 760 | 2,717 |
| Work gloves, mittens, etc. | 141,239 | 273 | 131,057 | 821 |

## PAPER

Production and shipments of newsprint paper increased over April but were less than a year ago. Stocks at mills increased over both periods. The following diagram gives a comparison between news. print paper production and mill stocks.
The output of paper board shipping boxes declined from April but increased over a year ago, though solid fiber boxes also declined from May, 1923. Operating activity of paper board box manufacturers, at 72 per cent of normal, in May, compared with 76 per cent in April and 80 per cent a year ago.
Declines occurred from the previous month and a year ago in the sales of abrasive paper and cloth, both domestic and foreign.

Nembprint Paper Production and Mill Stocib

buttons
The output of fresh water pearl buttons in May represented 33 per cent of capacity as against 42 per cent in April and 53 per cent a year ago. Stocks of buttons on hand declined slightly during May but were higher than a year ago.

## BUILDING CONSTRUCTION

During May the cost indexes of building construction were reduced, while the price index of plumbing fixtures also declined. Fire losses declined from April and were also less than a year ago.

VOLUME OF BUILDING .CONTRACTS AWARDED, BY CLASSES

Building contracts awarded during May in the 27 Northeastern States declined in both floor space and Value from April and from a year ago. Residential and industrial construction accounted for the decline from April as the other groups showed small increases.

Compared with a year ago, business and industrial buildings declined, while the other classes increased. The following monthly statistics covering the awards for construction in 36 States represent seven-eighths of the total construction lettings in the United States.

Constrdction Contracts Awarded in 36 States ${ }^{1}$

## BUILDING MATERIALS

Lumber production figures show increases over April for southern pine, California redwood, California white and sugar pine, western pine, Michigan softwoods, and northern pine lumber and lath, while decreases were noted in Douglas fir, Michigan hardwoods, western pine and North Carolina pine. Compared with a year ago, decreased production and shipments were general except for southern pine and North Carolina pine. Stocks of lumber were larger than a year ago, except for Michigan softwoods and hardwoods. Lumber prices were lower than in April. Exports increased over both the previous month and a year ago.

Oak flooring production, shipments, new orders and stocks all increased, both over April, 1924, and May, 1923, while unfilled orders declined from both periods. Maple flooring data show declines in May from both periods for production, shipments, orders and unfilled orders, while stocks increased over both periods.

Clay fire and silica brick reports show declines in May production and shipments from the previous month and a year ago, while stocks increased over both periods. New orders received and unfilled orders on hand for clay fire brick declined from both periods.

Relative Production of Lumber and Cement and Sales of Structural Steel (Monthly averages $1919=100$ )

Production and shipments of face brick were larger than in April and also larger than a year ago. Stocks and unfilled orders declined from both periods. No change was noted in the prices of common brick.

Paving brick production, at 69 per cent of capacity, compared with 44 per cent in April and 71 per cent a year ago. Shipments also declined from a year ago but exceeded April shipments. New orders received and unfilled orders on hand were greater than in the previous month and a year ago, while cancellations were smaller than in either of these periods.
Production and shipments of cement increased over both April, 1924, and May, 1923, while stocks declined from April but were higher than a year ago. No changes in prices were noted in May.
The output of roofing felt increased slightly over April but was less than in May, 1923.

New orders, unfilled orders, and shipments of all classes of enameled sanitary ware declined from April, while stocks on hand, except for baths, increased. Compared with a year ago, shipments and stocks increased, while new orders and unfilled orders declined for all classes.

The following table compares the output of lighting equipment in 1922 and 1923 as reported to the Department of Commerce. The miscellaneous item was not given in 1922, so comparison between the two years sbould exclude this item.

Output of Lighting Equipment

The following table shows the bookings for architectural terra cotta by 26 manufacturers, who produced about 95 per cent of the architectural terra cotta made in 1922. Values exclude freight, cartage, duty, and setting charges.

| Bookings of Amchitectural Terra Cotta |  |  |
| :---: | :---: | :---: |
| MONTH | Net tons | Value |
| January- | 16, 240 | \$1, 561, 518 |
| March | 13, 227 | 1,467, 539 |
| April. | 12,022 | 1,316,553 |
| May.- | 13,011 | 1, 570, 117 |
| June..-- | 10, 171 | $1,229,551$ $1,127,923$ |
|  | 10,807 | 1,127, 923 |

## CHEMICALS AND OILS

Imports of potash declined from both April and a year ago, while the inward movement of nitrate of soda increased in May over April but was considerably
below a year ago. A total of 93,760 long tons of potash was imported during the first five months of 1924, representing a decline of 4 per cent from tho same period of 1923, while the imports of nitrate of soda during the same period totaled 571,557 long tons, equivalent to an increase of 9 per cent over the total imported during the first five months of 1923.

Exports of sulphuric acid and of fertilizer and the value of dyes and dyestuffs exported increased over April and, except for dyes and dyestuffs, were also higher than a year ago.

The price index of crude drugs rose over 10 per cent from April, but essential oils and drugs and pharmaceuticals declined. The index of chemical prices declined, but the sulphuric acid price remained unchanged.

Seasonal increases took place in receipts and stocks of turpentine and rosin at southern ports, while all increased over a year ago also.
Production of cottonseed oil was higher than in May, 1923, and stocks of both cottonseed and cottonseed oil held by mills were larger than a year ago. The price of cottonseed oil declined from the April average.

Receipts and shipments of flaxseed at two northwestern terminals totaled slightly less than in May, 1923, while stocks were higher than a year ago. Shipments of linseed oil and oilcake from Minneapolis were considerably less than in April or in May, 1923.

Exports of vegetable oils declined from both the previous month and a year ago.

## CEREALS

Receipts and shipments of wheat during May were less than a year ago. Exports were about half as large as in May, 1923, while the visible supply at the end of May was $8,000,000$ bushels greater than a year ago in the United States and over 20,000,000 bushels larger in Canada. Wheat prices wero irregular, but flour prices advanced.
The following table shows the output of wheat flour reported by over 1,000 mills, each month, which made about 84 per cent of the flour produced in 1921, according to the census of manufactures.

Wheat floun Production

| year and honth | $\begin{aligned} & \text { Wheat } \\ & \text { (tround } \\ & \text { (thous, of } \\ & \text { bushels) } \end{aligned}$ | Flour produced (thous. bushels) | Grain oflal thous. of pounds) | $\begin{aligned} & \text { Per cent } \\ & \text { of } \\ & \text { capacity } \\ & \text { popated } \end{aligned}$ |

| Aprii..........-------- | 35,680 36,235 | 7,682 7,801 | 643,588 671,680 | 45.0 47.0 |

Receipts and shipments of corn were larger in May than a year ago, and the visible supply also increased over last year. Exports were smaller than in either the previous month or a year ago, and grindings of corn into glucose and starch were also less than in either of these periods. Prices of contract corn averaged slightly less than in April.
Receipts of oats were larger than in May, 1923, but the visible supply was only half as large as on May 31 last year. Exports were less than in April and considerably smaller than a year ago. The price of oats averaged slightly lower than in April.

Barley receipts and exports, though smaller than the April movement, exceeded May, 1923. Barley prices averaged less than in April.

Receipts of rye increased over May, 1923, while ${ }^{\circ}$ exports declined. Prices of rye rose as compared with April.

Total grain exports, including flour reduced to grain equivalent, were smaller than in April and less than half as large as a year ago. Visible supplies of corn and wheat in Argentina were reported as larger than a year ago, while flaxseed supplies were smaller.

The movement of paddy rice to the mills was considerably smaller than a year ago and declines were also noted in shipments from mills and in stocks of both paddy rice in California and in cleaned rice in the hands of southern mills and dealers. Exports of rice declined from both the previous month and a year ago.

Increases over a year ago were shown in May in the car-lot shipments and storage holdings of apples, in the car-lot shipments of potatoes, onions, and citrus fruits, and in receipts of hay.

## MEATS AND DAIRY PRODUCTS

The movement and local slaughter of cattle and calves declined from May, 1923, except total shipments. Exports and storage holdings of beef products increased over last year, however. Cattle prices averaged lower than in April, carcass beef was unchanged, while steer rounds advanced in price.
The movement and slaughter of hogs was also smaller than a year ago, except for total shipments. Exports of pork products were less than in April and also lower than a year ago, while storage holdings were slightly higher than at the end of May last year. Exports and storage holdings of lard show similar comparisons. As compared with April, hog prices averaged higher, as did prices of smoked hams, while lard prices declined

The movement and loc 1 slaughter of sheep declined from a year ago and cold-storage holdings of lamb were about half as large as on May 31, 1923. Prices of sheep declined in May, especially ewes.
Receipts of dressed poultry at principal markets were larger than a year ago, but storage holdings were
less. Storage holdings of fish were larger than a year ago.

Receipts and storage holdings of eggs declined from last year, but butter and cheese showed increases in both these items. Little change from April was shown in butter and cheese prices. Exports of condensed milk declined both from April and from a year ago.

The diagram, below, drawn on a logarithmic scale (see explanation inside front cover), shows the relative movements to market of butter, cheese, and eggs, based upon the average monthly marketings of these foodstuffs in the year 1919 as 100.

Relative Receipts of Butter, Cheese, and Eggs at Pbimary Markets

Meltings of raw sugar at refineries declined from a year ago, but stocks were larger. Exports of refined sugar were also smaller than in May, 1923. Sugar prices averaged less than in April. The movement of raw sugar in Cuba shows increases over a year ago in receipts and stocks but a decline in exports.

## COFFEE

The visible supply of coffee; both throughout the world and in the United States; decreased from May 31, 1923. Receipts of coffee in Brazil and clearances
from Brazil were much larger than a year ago. Imports into the United States increased over both the provious month and a year ago, while tea imports declined in May from these two comparative periods.

## TOBACCO

The consumption of cigars, cigarettes, and manufactured tobacco and snuff, as shown by tax-paid withdrawals; increased over April but, except for cigarettes, was less than a year ago. Exports of cigarettes increased over both periods; while exports of unmanufactured leaf tobacco declined from April but increased over a year ago. Sales at loose-leaf warehouses were much greater than a year ago. Prices remained stationary.

## WATER TRANSPORTATION

Compared with a year ago, cargo traffic through the Sault Ste. Marie Canal was slightly lower in May, while Ohio River traffic between Pittsburgh and Wheeling increased. Entrances and clearances of vessels in foreign trade increased both over April, 1924, and May, 1923, increases occurring for both American and foreign vessels over April but in American vessels only over a year ago. Freight rates to Europe increased slightly over April.

Comparigon of California Petroleum Production Wita Panama Canal Eabtbound Traffic
(1920 monthly averages $=100$ )

RAILROAD TRANSPORTATION
The surplus of idle freight cars rose from 329,489 cars at the end of April to 338,526 at the end of May, while shortage of cars was negligible. The number of bad-order cars increased from 7.9 to 8.3 per cent of
the total in use. Car loadings increased over April but declined from a year ago, only grain products showing an increase.

Shortage, Surplus, Bad-Order, and Total Loadings of Freight Cars.

The following figures show the current conditions of freight-car equipment on Class I railroads:

Equipment, Freiget Cars

TREND OF COMMODITY STOCKS BY MAJOR GROUPS: 1919-1924
(Sold line represents the course after due allowance for seasonal variations, while the broken line represents the index witirno adjustment for seasonal conditions. Indexes plotted are relative to 1919 as 100 . May is latest month shown.)

## EMPLOYMENT IN MANUFACTURING INDUSTRIES BY MAJOR INDUSTRIAL GROUPS

[Drawn from data complled by the U.S. Department of Labor and representing weighted inderes based upon the namber of wage carners in the respective Industries in 1919. Detailed data may be lound in the May "Survey" (No. 33, p. 38) and in the Monthly Labor Review for Junc, 1924, (p. 122).]

## (Average monthly employment 1923-100)

## EMPLOYMENT

Decreases in the number of workers employed in factories are noted in reports from the country at large and from the various States for May, the numbers employed being also less than a year ago. Average weekly earnings, as calculated by State reports in New York, Illinois, and Massachusetts, declined, but larger earnings were shown for Wisconsin.

Immigration, Emigation, and Immigration Quota

## DISTRIBUTION MOVEMENT

Sales of mail-order houses declined from April in a seasonal movement and were also less than in May, 1923. Sales of 10 -cent chains declined slightly from April but increased over a year ago. Sales of restau-
rant chains were greater than in April, but below last year.

Candy sales by manufacturers in April, as computed from May tax collections, show a decline from the previous month but an increase over a year ago. Magazine advertisfing for June publications was higher than a year ago, but May newspaper advertising declined from last year. Postal receipts were less than in April but larger than a year ago.

Internal-revenue taxes collected in May declined from a year ago on theater admissions, on firearms and shells, on bond and stock issues and conveyances, and on capital stock transfers, while tax collections on jewelry sales increased.
Sales of Mail-Order Hodses and Chain Ten-Cent Stores

SALES at retail by mail-ORDER HOUSES and money ORDERS paid and issued in 50 PRINCIPAL CITIES.

The diagram at the bottom of page 24 compares mail-order sales by four houses, the value of payments of money orders, and money-order issues in 50 principal cities. It should be noted that the payments of money orders represent all domestic money orders issued on 50 principal post offices by all post offices in the United States, while the money-order issues represent only those sold in the 50 principal cities, this line being shown on the diagram principally as indicating the steady growth of the moneyorder business in urban communities. The similarity between mail-order business and money-order payments as shown on this chart is significant.

## PUBLIC FINANCE

Further decreases occurred in the outstanding debt of the Government during May. Customs receipts and total ordinary receipts were less than in April, the latter decreasing 11 per cent, while expenditures chargeable against such receipts declined 22 per cent. Total money in circulation outside of the Treasury and the Federal reserve system increased from $\$ 42.33$ to $\$ 42.78$ per capita.

## BANKING AND FINANCE

Check transactions, as shown by debits and bank clearings, increased over both April and a year ago in New York City, but declined from both periods for the rest of the country.

During May decreases occurred in the discounts, investments, note circulation, reserves, and deposits of the Federal reserve system. The Federal reserve ratio increased slightly. Member bank statements of the Federal reserve system show declines in both loans and deposits but an increase in investments. Interest rates continued to decline.
Bills Discounted and Total Investments of Federal Reserve Banks

Loans, Discounts, and Total Invegtments of Federal Reserve Member Bankg

Except for group insurance, the amount of new life insurance business in May was greater than in April as to both number of policies and amount of insurance, while compared with a year ago total insurance increased, except for group business, while number of policies were less, except for ordinary business. Premium collections increased over April in all classes except group insurance and gained over a year ago in all classes. Sales of ordinary life insurance by districts increased over April in the western agricultural and far western districts but declined in the other sections. Compared with a year ago, the only decrease occurred in the western agricultural and southern sections.

The two diagrams on page 26 show since January, 1923, the distribution of investments by 41 life insurance companies haring 82 per cent of the total admitted life insurance assets of the United States legal reserve companies. The first drawing gives this distribution as between real estate mortgages, bonds and stocks, and policy loans, premium notes, and all other assets, while the second drawing shows the distribution of bond and stock holdings (approximately $98 \frac{1}{2}$ per cent, bonds) divided as between Government, railroad, and public utility and other bonds and stocks. Of total admitted assets amounting to $\$ 7,993,917,089$ at the end of May, bond and stock holdings totaled $\$ 3,403,133,895$ and mortgages $\$ 3,084,481,122$.
Business failures were more numerous in May than in either April, 1924, or May, 1923, while total liabilities were less than in either of these periods. All classes of failures showed this same trend, except that the liabilities of manufacturing establishments increased slightly over a year ago.

Dividend and interest payments scheduled for June increased over a year ago and for the year to date gained 5 per cent over last year. Dividend payments alone increased in about the same proportion over a year ago, with gains in all classes. Street railways increased 10 per cent in dividends over the first five months of 1923, steam railroads 4 per cent, and industrials 4 per cent.

Distribution of Admitted Assets of 41 Life Insurance Companies, by Classes of Sectrities

Distribution of Bond Investments of 41 Life Insurance Companies, by Classes of Bonds

Number of Business Fallures and Amount of Defaulited Liabilities
(June, 1924, is latest month platted)

New incorporations, in point of value and authorized capital, declined in May from April and a year ago, as did new capital issues of existing corporations. Permanentissues of States and municipalities declined from April but increased over a year ago.

Fewer loans were closed by both the Federal farm loan banks and by the joint-stock land banks in May than in the previous month or in May, 1923. War Finance Corporation loans were also less and the balance outstanding was diminished. The loaning operations of the 12 intermediate credit banks are given in the table following:

Loans and Rediscounts of Federal Intermediate Credit Banis ${ }^{1}$

${ }^{1}$ The intermediate credit banks are located in the same cities as the 12 Federal land baks, as follows: 8pringteld, Mass.; Batitimore, Md.; Columbis, 8. C.; LouisFille, Ky.; New Orleans, La.; Et. Louis, Mo.; St. Paul, Minn.; On
Wichita, Kans.; Houston, Tex.; Berkeley, Calli, and Spokane, Wash.

Average prices of stocks were slightly higher than in April, but the index of 103 stocks at the end of May was somewhat lower than a month previous. Sales of both stocks and bonds declined from April, but bond sales were greater than a year ago, except for Liberties. Bond prices advanced over April in all classes except public utilities.

COMPARISON OF WHOLESALE PRICES FOR RAW PRODUCTS, PRODUCERS' GOODS,
(1913 average prices taken as 100. May is latest month platted)

## GOLD AND SILVER

Domestic receipts of gold at the mint declined slightly both from April, 1924, and May, 1923. Imports and exports also declined from both periods, the n8t imports of gold for May at $\$ 40,481,000$ comparing with $\$ 44,027,000$ in April and $\$ 45,332,000$ a year ago.

Silver production increased over April but declined from a year ago. Both imports and exports increased over both periods, with an export balance of $\$ 4,047,000$ comparing with $\$ 3,894,000$ in April and an import balance of $\$ 962,000$ a year ago. Silver prices averaged higher than in April.

## FOREIGN EXCHANGE AND TRADE

Except for French and Belgian francs, which declined, and Italian lire, which remained unchanged, the principal European exchanges averaged higher than in April, but the increases were, in general, very slight. Other increases were shown in exchanges on India, Canada, and Chile, while declines occurred in Japan, Argentina, and Brazil. The general index of foreign exchange declined from 63 to 62 per cent of normal.

Imports into the United States declined from both the previous month and a year ago, while exports were also less than in April but were greater than in May, 1923. The excess of exports amounted to $\$ 32,000,000$ in May as against $\$ 22,000,000$ in April.

## Exports from the United States and the United Kingdom

CENSUS OF MANOFACTURES: 1923-PRELIMINARY REPORTS
The Bureau of the Census has announced preliminary figures on eight additional manufacturing industries collected pursuant to the census of manufactures for the year 1923. The following table sum-
marizes the more important data made available since those published in the June issue, and as further similar reports are released they will be correspondingly summarized for the readers of the Surver. More details can be obtained with respect to each of the industries above outlined from the bureau's complete preliminary statement for each industry in connection with the census of manufactures for 1923.

the service in Weshington under the jurisdiction of the fourth civiservice

## JUNE DATA

The following table gives such June data as have been receioed to and including July 11, 1924

JUNE DATA-Continued

## PRELIMINARY SUMMARY FOR JUNE

Productions of manufactures in June registered declines from May and a year ago in the output of pig iron, steel ingots, automobiles, and in the mill consumption of cottòn, silk, and tin, while declines from May alone were recorded in the production of zinc and cement. More railroad locomotives were produced in June than in May, while new awards for building construction although smaller than in May were higher than a year ago. Construction costs, averaged lower than in the previous month or a year ago. Unfilled orders of the U. S. Steel Corporation at the end of June were 10 per cent lower than on May 31, while orders for locomotives, unfilled on June 30, called for 531 as against 643 at the end of May, and 1,958 on June 30, 1923.

Sales at retail by mail-order houses and ten-cent chains declined from May but were 8 per cent and 6
per cent, respectively, larger than a year ago. Wholesale prices continued the downward trend, while business failures, although larger than a year ago, were less numerous than in May. Average prices of industrial and railroad stocks were higher than those in either May or a year ago, while bond prices also averaged higher in June. Interest rates, both call and commercial, continued to average lower. Check payments in New York City although larger than a year year ago were smaller than in May, while for the rest of the country check transactions were smaller than in either of these two periods.

Both imports and exports were smaller in June than in either the previous month or a year ago, while the general index of foreign exchange averaged lower in June and ocean freight rates continued to decline.

## INDEXES OF BUSINESS

The index numbers presented in this table are designed to show the trend in production, prices, trade, etc., in various groups of industry and commerce. They consist in general of weighted combinations of series of individual index numbers; often the individual index numbers making up the series are also given. The base year of all the index numbers is 1919, except prices which are on a 1913 base, and unfilled orders, on a 1920 base. The function of index numbers is explained on the inside front cover. A condensed form of this table is given on page 7.

| EXPLANATION <br> Alindez numbers are relatioc to 1919 as 100, except prices which are relative to 1919, and unfilled orders, which are relative to 1980. | $\begin{gathered} \text { Maxirnum } \\ \text { since Jan. } \\ 1,1920 \end{gathered}$ | $\underset{\text { slice Jan. }}{\substack{\text { Minimum }}}$ 1, 1020 | 1923 |  | 1024 |  |  |  |  |

## TREND OF BUSINESS MOVEMENTS

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. The numerical data for the latest months are given and in addition index numbers for the last four months and for two corresponding months of a year ago. In many lines the figures do not lend themselves readily to statistical uniformity, due to lateness of their publication or publication at other than monthly intervals; therefore the following explanations of the various headings are offered to make clear such distinctions and in general to facilitate the use of the table:

April, 1924.--This column gives the April figures corresponding to those for May shown in the next column-in other words, cover the previous month.
May, 1924.- In this column are given the figures covering the month of May, or, as in the case of stocks, etc., the situation on May 30 or June 1.
Corresponding month, A pril, 1923, or May, 192s.-The figures in this column present the situation exactly a year previous to those in the "May, 1924," column (that is, generally May, 1923), but where no figures are available for May, 1924, the April, 1923, figures have been inserted in this column for comparison with the April, 1924, figures.
Cumulative total from January 1 through latest month. -These columns set forth, for those items that properly can be cumulated, the cumulative totals for the five months ending May, 1023 and 1924, respectively, except where the May, 1924, figures are lacking, in which case the cumulative totals for the first four months of 1923 and 1924 are given.
Percentage increase ( + ) or decrease ( - ) cumulative, 1924 from 1923 . -This column shows the per cent by which the cumulated total for the five months ending May, 1024, is greater ( $\psi$ ) or less ( - ) than the total for the corresponding period ended May, 1923.
Base year or period.-For purposes of comparison with a previous more or less normal period, all items, so far as possible, are related to such a period by index numbers. The period taken for each item, called the base, is the monthly average of the year or period stated in this column. Wherever possible, the year 1913 is taken as a base, and if no pre-war figures are available, 1919 is usually taken to avoid using a war year as a basis. In some cases it will be noted that figures were not available prior to 1920 or even 1921, and that sometimes a month, or an average of a few months, has to be used rather than a year's average. Also, for some industries, 1919 would not be a proper base on account of extraordinary conditions in the industry and therefore some more representative year has been chosen.
Index numbers.-In order to visualize the trend of each movement, index or re'ative numbers are given for the last four months and for two corresponding months of a year ago. These index numbers are computed by allowing the monthly average for the base period, usually 1913 or 1919 , to equal 100 . If the movement for a current month is greater than the base the index number will be greater than 100. If the converse is true the index number will be less than 100 . The difference between 100 and any index number gives at once the per cent increase or decrease compared with the base period. Index numbers may also be used to compute the approximate per cent increase or decrease from one month to the next.
Percentage increase $(+)$ or decrease ( - ) May from April. -The last column shows the per cent increase or decrease of the figure for the last month compared with the preceding month.

| Nore.-Back data on the following items may be found in the detailed tables of the quarterly issues of the Surver. The May issue (No. 33) showed complete data for the period Sept, 1921, to Mar., 1924, inclusive. Detailed tabulations of several new items appear at the end of this issue. See Contents, p. 1 . <br> In many cases June figures are now available and may be found in the special table on page 29. | NUMERICAL DATA |  |  |  |  | Per ct.increas!$(+)$or de-crease$(-)$cumu-lative1924rom1923 | $\begin{gathered} \text { BASE } \\ \text { YEAR } \\ \text { ORROD } \\ \text { PERIOD } \end{gathered}$ | INDEX NUMBERS |  |  |  |  |  | Perct. # PUBLICATIONS OF THE DEPARTMENT OF COMMERCE 

Recent publications of the Department of Commerce having the most direct interest to readers of the Survey of Current Business are listed below. A complete list may be obtained by addressing the Division of Publications, Department of Commerce, at Washington. Copies of the publications may be purchased from the Superintendent of Documents, Government Printing Office, Washington, at the prices stated. If no price is mentioned, the publication is distributed free.

## OFFICE OF THE SECRETARY

Recommended Minimum Requirements for Plumbing in Dwellings in Similar Buildings.-This final report of the subcommittee on plumbing, of the building code committee, is a part of the Elimination of Waste Series. It covers 260 pages and includes 11 tables and 100 figures by way of illustration. The report is divided into four parts as follows: Part I, Introduction; Part II, Recommended Plumbing Code for Dwellings and Similar Buildings; Part III, Experimental Investigation, Standardization, Administration, and Comments; Part IV, Appendices. Price, 35 cents.
Simplified Practice Recommendations: Range Boilers and Expansion Tanks, Recommendation No. 8; Lumber, supplementary recommendations adopted April 22, 1924. Price, 5 cents each.

## BUREAU OF THE CENSUS

The Integration of Industrial Operation, by Willard L. Thorp. Census Monograph III; 272 pages, 72 tables, 188 charts. A statistical and descriptive analysis of the development and growth of industrial establishments operated from central offices. Price, $\$ 1$.
Cotton Production and Distribution, Season of 1922-23.Covers production of cotton from the crop of 1922, and the consumption, imports, exports and stocks of cotton and number of cotton spindles for the year ended June 31, 1923, and for cottonseed received, crushed, and on hand, and for cottonseed products manufactured, shipped, and on hand for the same period. 103 pages, 47 tables, 9 diagrams, 12 maps. Price, 15 cents.
Kumber, Lath, and Shingles.-This bulletin was compiled in cooperation with the Forest Service of the Department of Agriculture. Deals with lumber cut by groups of States sawmills classified according to production, production of lumber by States and by kinds of wood. 32 pages, 44 tables, 2 diagrams. Price, 5 cents.

## BUREAU OF FOREIGN AND DOMESTIC COMMERCE

Commerce Reports.-A weekly survey of foreign trade. Cable summaries of world conditions and articles on situation in various commodities in foreign countries. Quarto, 72 pages. Price, 10 cents per copy; $\$ 3$ per year ( $\$ 5$ for foreign).

Monthly Summary of Foreign Commerce of the United States.-Parts 1 and 2. Gives total values by countries and by customs districts, movements of gold and silver in foreign trade, merchandise remaining in warehouse, and trade with noncontiguous territories of the United States. Price, 10 cents, including both parts; $\$ 1$ per year.
Index to Commerce Reports, Nos. 1-13, January, February, and March, 1924. Price, 5 cents.
Trade and Economic Reviews, 1923.-These are based on annual reports of trade and industries submitted by American consular officers. The following have been issued since the June announcements: No. 5, Czechoslovakia; No. 6, Canada; No. 7, Switzerland.
German Dyestuffs Industry, by Thomas W. Delahanty, assistant chief, Chemical Division. Miscellaneous Series No. 126; 63 pages of text, graphs, and tabular material setting forth the history of the German Dye Cartel, the production of dyes in 1922 and the first eight months of 1923, and the distribution of German dye production. Price, 10 cents.
Import Duties on Wheat, Wheat Flour, Meat, and Meat Products, by Frank W. Fetter, Special Agent, and Henry Chalmers, chief, Foreign Tariffs Division. Trade Information Bulletin No. 233; 37 pages. This bulletin is part No. 5 of the survey of world trade in agricultural products, under direction of Frank M. Surface. This section presents a detailed analysis of the course of official policy in the principal foreign markets toward the importation of American agricultural products.
British Dyestuffs Industry, by Frederick E. Breithut, American trade commissionei. Trade Information Bulletin No. 231; 30 pages. This report is one of a series on the dyestuffs industries of European countries.
Italian Dyestuffs Industry, by Frederick E. Breithut, American trade commissioner. Trade information Bulletin No. 234;

11 pages. The growth of the Italian dye industry after being cut off from the German sources of supply in 1915 forms the basis of this study.
European Economic Conditions Which Affect the Markets for Agricultural Products, by H. B. Smith, special representative. Trade Information Bulletin No. 235; 62 pages. This report comprises part No. 6 of the survey of world trade in agricultural products.
Selling American Hosiery Abroad, prepared in the Textile Division from reports by representatives of the Department of State and the Department of Commerce. Trade Information Bulletin No. 236; 19 pages. American hosiery has only in recent years found its way into foreign markets and in certain countries has been able to compete successfully with the products of other countries
Italy's Foreign Trade in Iron and Steel and Nonferrous Metals in 1923, by A. A. Osborne, American trade commissioner, Rome. Trade Information Bulletin No. 237; 6 pages. Because of Italy's lack of coal, that country's efforts to build up a flourishing iron and steel industry is of special interest to those concerned with the Italian market for iron and steel. Statistics are given covering the Italian trade in metals during 1922 and 1923.
Italian Hydroelectric Industry, by Leon Dominian, American consul at Rome. Trade Information Bulletin, No. 238; 17 pages. Italy is increasingly relying upon its waterpower resources to make up for the country's lack of coal.

## BUREAU OF FISHERIES

Oyster Culture Problems of Connecticut, by J. S. Gutsell, scientific assistant. Documents No. 960; 10 pages. Price, 5 cents.
Experiments in the Artificial Propagation of Oysters, by Herbert F. Prytherch, scientific assistant. Document No. 961; 14 pages. Price, 5 cents.

## BUREAU OF STANDARDS

Pulp and Paper Fiber Composition Standards, by Muriel F. Merritt, laboratory assistant. Technologic Paper No. 250; $4 \frac{1}{2}$ pages of text and 9 pages of colored plates illustrating a variety of fibers and methods of treatment with various stains for use in the identification and estimation of fiber composition with paper. Price, 15 cents.
United States Government Specifications: No. 80, Standards Circular 157, Coal-Tar Pitch for Roofing; No. 85, Standards Circular No. 160, Asphalt for Waterproofing and Damp Proofing. These specifications have been officially adopted by the Federal Specifications Board for use in purchasing materials for Government use. Price, 5 cents.

## BUREAU OF NAVIGATION

Radio Service Bulletin, June 2, 1924, No. 86.-This monthly publication contains a list of new stations, changes in preceding lists, information concerning radio regulations, current publications, and other matters. Price, 5 cents a copy; annual subscription price, 25 cents.
Note.-All orders for radio publications listed by the Bureau of Navigation, and inquiries concerning these publications, should be addressed to the Superintendent of Documents, Government Printing Office, Washington, D. C. Do not make remittances to the Bureau of Navigation or to radio inspectors.
UNITED STATES COAST AND GEODETIC SURVEY
Effect of Variations in the Assumed Figure of the Earth on the Mapping of a Large Area, by Walter D. Lambert, Mathematician. The report contains 35 pages, with formulas, tables, and diagrams. Price, 5 cents.

## LIGHTHOUSE SERVICE

Buoy Lists. Second District, Coast of Massachusetts (corrected to May 10): Second District, Delaware Bay and Harbor, including Philadelphia Harbor (corrected to April 15); Fifth District, Cape Henlopen to Cape Lookout, including Chesapeake Bay and North Carolina Sounds (corrected to April 1).

## DEPARTMENT OF COMMERCE

## HERBERT HOOVER, Secretary of Commerce

BUREAU OF THE CENSUS<br>William M. Steuart, Director Chief functions

The taking of the decennial census covering population, agriculture, manufactures, mines and quarries, and forest products.

Decennial report on wealth, public debt, and taxation, including principal financial statistics on Federal, State, county, city, and township governments.

Annual financial statistics of State and municipal govern-ments-Sources of revenue, objects of payments, debt, tax levies.

Decennial statistics relating to inmates of institutions, including paupers, insane, prisoners, and juvenile delinquents.

A quadrennial census of agriculture, a biennial census of manufactures, a quinquennial census of electrical public utilities, and statistics of marriage and divorce.

Annual statistics of births, deaths, causes of death, etc., in the registration area of the United States.

Quarterly statistics of leaf tobacco stocks and of production, stocks, and consumption of fats and oils.

Monthly or semimonthly statistics of cotton ginning; cotton stocks and consumption; the production, stocks, and consumption of hides and leather; the production of shoes; and statistics of active textile machinery and of movements in an increasing number of other industries.

The compilation and publication, in the "Survey of Current Business," of monthly commercial and industrial statistics.

## BUREAU OF FOREIGN AND DOMESTIC COMMERCE

Julide Klain, Director

Chief functions

The compilation of timely information concerning world market conditions and openings for American products in foreign countries secured through commercial attachés and trade commissioners of the Department of Commerce and the foreign service of the Department of State. The distribution of such information to American business through weekly "Commerce reports," special bulletins, confidential circulars, the news and trade press, correspondence, and personal contact.
The maintenance of commodity, technical, and geographical divisions to afford special service to American export industries.

The compilation and distribution of names of possible buyers and agents for American products in all parts of the world and publication of weekly lists of specific sales opportunities abroad.

The maintenance of district and cooperative offices in 33 cities in the United States to expedite delivery of market information to business men and to keep the department advised as to the urgent requirements of American trades and industries.

The publication of official statistics on imports and exports.
The study of the processes of domestic trade and commerce, with a view to their improvement and the dissemination of information obtained for the benefit of the public, as well as of those directly concerned.

## BUREAU OF STANDARDS

## George K. Burgess, Director

## Chief functions

Custody of standards of measurement, quality, performance, or practice adopted or recognized by the Government. Development and construction of such standards when necessary. Testing and calibration of apparatus and comparison of standards used by scientific or other institutions with those in the custody of the bureau.

Determination of physical constants and properties of materials.

The testing of materials and establishment of standards and processes in cooperation with commercial firms or organizations.

Industrial researches covering structural, engineering, and miscellaneous materials, radio, radium, mechanical appliances, sugar technology, leather, paper, rubber, and textiles; clay products, glass, and refractories, metals and metallurgy, and similar groups of subjects.
The collection and dissemination of information showing approved methods in building, planning, and construction, including building materials and codes and such other matters as may encourage, improve, and cheapen construction and housing.

Studies on simplified commercial practices and establishment of such practices through cooperative business organizations.

The Bureau publishes six series of scientific and technical publications, reporting the results of its researches and giving technical data fundamental to industry.
The Director has supervision of the preparation of technical specifications through the Federal Specifications Board.

## BUREAU OF FISHERIES

Henry O'Malley, Commissioner Chief functions

The propagation of useful food fishes, including lobsters; oysters, and other shellish, and their distribution to suitable waters.

Investigations of fish culture, fish diseases, and for the conservation of fishery resources and the development of commercial fisheries.

The study of the methods of the fisheries and fishery industriea and the utilization of fishery products.

The collection of statistics of fisheries.
The administration of the Alaska salmon fisheries, the fur-seal herd on the Pribilof Islands, and the law for the protection of sponges off the coast of Florida.

## BUREAU OF LIGHTHOUSES

George R. Putnam, Commissioner
Chief functions
The establishment and maintenance of lighthouses, lightships, buoys, and other aids to navigation on the sea and the lake coast and on the rivers of the United States, including Alaska, Hawaiian Islands, and Porto Rico.

The publication of Light Lists, Buoy Lists, and Notices to Mariners, including information regarding all aids to navigation maintained by the Lighthouse Service.

## COAST AND GEODETIC SURVEY

## E. Lester Jones, Director Chief functions

The survey of the coasts of the United States and the publication of charts needed for the navigation of the adjacent waters, including Alaska, the Philippine Islands, Hawaii, Porto Rico, the Virgin Islands, and the Canal Zone.

A comprehensive geodetic system, extending into the interior, connects and coordinates the surveys of the coasts, and is dosigned to furnish accurately determined points and elevations in all parts of the country. These are available as a basis for Federal, State, and municipal surveys, and engineering projects of every kind. The magnetic declination has been determined at a large number of stations throughout the country, and the results are available for the use of surveyors and engineers.

The technical operations include base measures, triangulation, traverse, precise leveling, the determination of latitude and azimuth, the determination of difference of longitude by telegraph or radio, magnetic observations and researches, the preparation of magnetic maps, the determination of the force of gravity, topography, hydrography, deep-sea soundings, water temperatures, tidal and current observations.

The results are published in the form of charts on various scales, annual reports, coast pilots, tide tables (published annually in advance), current tables, digests of geodetic publications, and special publications.

## BUREAU OF NAVIGATION

## D. B. Carson, Commissioner Chief functions

General superintendence of commercial marine and merchant seamen.
Supervision of registering, enrolling, licensing, numbering, etc., of vessels under the United States flag, and the annuat publication of a list of such vessels.

The enforcement of the navigation and steamboat inspection laws and the laws governing radio co munication, as well as duties connected with fees, fines, tonnage taxes, refunds, ete., originating under such laws.

## STEAMBOAT INSPECTION SERVICE

## George Uhler, Supervising Inspector General Chief functions

The inspection of vessels, the examination and licensing of the officers of vessels, and the administration of laws relating to such vessels and their officcre. The certification of able seamen who form the crews of merchant vessels.

The inspection of vessels, including the types of boilers; the testing of all materials subject to tensile strain in marine boilers; the inspection of hulls and of life-saving equipment.

The investigation of violations of the steamboat-inspection laws.

[^0]:    This issue presents practically complete data for the month of May and also, on page 29, items covering June received up to July 14. As most data covering a particular month's business are not available until from 15 to 30 days after the close of the month, a complete picture of that month's operations, including index numbers, cumulative totais, text, and charts, can not be presented in printed form under 45 days after its close, but the advance leafcts described above give considerable information as early as 15 days after its close and present almost every week the latest data available. Summary for June based upon early items is given on page 29.

[^1]:    1 Fibported by 167 from with a eapaelto of $238,970$.

[^2]:    ${ }^{2}$ Maximum and minimum monthly indeses for the individual districts were selected from the series beginning January, 1921, and hence are not to be compared witt

[^3]:    ${ }^{1}$ Compiled by the $U_{\text {. }} S$. Department of the Interior, Bureau of Mines, from reports from 24 companies. Data do not include reports of manufaeturers of ammunition and firoworks, nor production of nitroglycerin, except in so far as nitraglycerin is used in the manufacture of other explosives.
    ${ }^{2}$ All black powder with sodium or potassiom nitrate as a constituent is bere classified as black blasting powder.
    aseous ermissible explosives" are high explosives that, because of having passed certain tests prescribed by the Bureau of Mines, aro considered reasonably safe for use in an excess dusty coal mines. They include ammonium nitrate explosives, hydrated explosives, organic nitrate explosives, and certain nitroglycerin explosives containing excess of free water or carbon. Dynamite and all other high explosives are totaled here with permissible explosives

[^4]:    ${ }^{1}$ The data on shipments and unfilled orders for railway equipment were obtained from the Interstate Commerce Commission. these figures are reight cars by domestic railroads compiled by the Iron Trade Revieto. Comparable distribution of the data by months are not available prior to 1920. As ${ }^{1}$ Index less than 1.

[^5]:    ${ }^{1}$ Monthly production data beginning January, 1922, represent complete production including total membership of the Enameled Sanitary Ware Manufacturers' Asso1924 and reports to the Bureau of the Chate 924. Data prior to 1922 are totals of the association reports representing about 98 per cent of the industry.

    - Amall ware includes lavatories, sinks, and miscellaneous.
    ${ }^{1}$ Average of 8 months, May to December, inclusive.

[^6]:    ${ }^{2}$ Irtigated rice in Java and Madura. Exclusive of China: Chinese crop estimated at $52,788,000,000$ pounds in 1920 and $70,218,867,000$ in 1917 . Summer crop only given.
    colved by thatdiled by V. S. Department of Agriculture, Bureau of Agricuitural Economics, and corrected monthly in accordance with latest avallable information reCorrected to June 2ot or by U. S. Department of Commerce, Bureau of Foreign and Domeatic Commerce. Countries are placed in the order in which crops are harveated
