SURVEY OF
CURRENT BUSINESS

SEPTEMBER, 1926

No. 61

COMPILED BY
BUREAU OF THE CENSUS
BUREAU OF FOREIGN AND DOMESTIC COMMERCE
BUREAU OF STANDARDS

IMPORTANT NOTICE

In addition to figures given from Government sources, there are also incorporated for completeness of service figures from other sources generally accepted by the trades, the authority and responsibility for which are noted in the "Sources of Data" on pages 152-155 of the August semiannual issue

Subscription price of the SURVEY OF CURRENT BUSINESS is \$1.50 a year; single copies (monthly), 10 cents; semiannual issues, 25 cents. Foreign subscriptions, \$2.25; single copies (monthly issues), including postage, 14 cents; semiannual issues, 36 cents. Subscription price of COMMERCE REPORTS is \$4 a year; with the SURVEY, \$5.50 a year. Make remittances only to Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency at sender's risk. Postage stamps or foreign money not accepted

INTRODUCTION

THE SURVEY OF CURRENT BUSINESS is designed to present each month a picture of the business situation by setting forth the principal facts regarding the various lines of trade and industry. At semiannual intervals detailed tables are published giving, for each item, monthly figures for the past two years and yearly comparisons, where available, back to 1913; also blank lines sufficient for six months have been left at the bottom of each table enabling those who care to do so to enter new figures as soon as they appear (see issue for August, 1926, No. 60). In the intervening months the more important comparisons only are given in the table entitled "Trend of business movements."

ADVANCE SHEETS

Realizing that current statistics are highly perishable and that to be of use they must reach the business man at the earliest possible moment, the department has arranged to distribute advance leaflets every week to subscribers in the United States. The leaflets are usually mailed on Tuesdays and give such information as has been received during the preceding week. The information contained in these leaflets is also reprinted in "Commerce Reports," issued weekly by the Bureau of Foreign and Domestic Commerce. The monthly bulletin is distributed as quickly as it can be completed and printed.

BASIC DATA

The figures reported in the accompanying tables are very largely those already in existence. The chief function of the department is to bring together these data which, if available at all, are scattered in hundreds of different publications. A portion of these data are collected by Government departments, other figures are compiled by technical journals, and still others are reported by trade associations.

RELATIVE NUMBERS

To facilitate comparison between different items and render the trend of a movement more apparent, relative numbers (often called "index numbers," a term referring more particularly to a special kind of number described below) have been calculated. The relative numbers enable the reader to see at a glance the general upward or downward tendency of a movement which can not so easily be grasped from the actual figures.

In computing these relative numbers the last pre-war year, 1913, or in some instances a five-year average, 1909-1913, has been used as a base equal to 100 wherever possible.

The relative numbers are computed by allowing the monthly average for the base year or period to equal 100. If the movement for a current month is greater than the base, the relative number will be greater than 100, and vice versa. The difference between 100 and the relative number will give at once the per cent increase or decrease compared with the base period. Thus a relative number of 115 means an increase of 15

per cent over the base period, while a relative number of 80 means a decrease of 20 per cent from the base.

Relative numbers may also be used to calculate the approximate percentage increase or decrease in a movement from one period to the next. Thus, if a relative number at one month is 120 and for a later month it is 144 there has been an increase of 20 per cent.

In many instances comparable figures for the pre-war years are not available, and in such cases the year 1919 has usually been taken as the base. For some industries 1919 can not be regarded as a proper base, due to extraordinary conditions in the industry, and some more representative period has been chosen. In many cases relative numbers of less importance have been temporarily omitted.

Most of the relative numbers appear in a special section of the semiannual issues, as in Tables 111 to 131 of the August, 1926, number, thus allowing easy comparison on a pre-war base for all items for which relatives could be computed.

INDEX NUMBERS

When two or more series of relative numbers are combined by a system of weightings the resulting series is denominated an index number. The index number, by combining many relative numbers, is designed to show the trend of an entire group of industries or for the country as a whole, instead of for the single commodity or industry which the relative number covers. Comparisons with the base year or with other periods are made in the same manner as in the case of relative numbers.

RATIO CHARTS

In many instances the charts used in the SURVEY OF CURRENT BUSINESS are of the type termed "Ratio Charts" (logarithmic scale), notably the Business Indicator charts on page 2. These charts show the percentage increase and allow direct comparisons between the slope of one curve and that of any other curve regardless of its location on the diagram; that is, a 10 per cent increase in an item is given the same vertical movement whether its curve is near the bottom or near the top of the chart.

The difference between this and the ordinary form of a chart can be made clear by an example. If a certain item, having a relative number of 400 in one month, increases 10 per cent in the following month, its relative number will be 440, and on an ordinary chart would be plotted 40 equidistant scale points higher than the preceding month. Another movement with a relative number of, say, 50 also increases 10 per cent, making its relative number 55. On the ordinary (arithmetic) scale this item would rise only 5 equidistant points, whereas the previous item rose 40 points, yet each showed the same percentage increase. The ratio charts avoid this difficulty and give to each of the two movements exactly the same vertical rise and hence the slopes of the two lines are directly comparable. The ratio charts compare percentage changes, while the arithmetic charts compare absolute changes.

This issue presents practically complete data for the month of July and also items covering the early weeks of August, received up to August 26. (See charts and table, pp. 4 and 5.) As most data covering a particular month's business are not available until from 15 to 30 days after the close of the month, a complete picture of that month's operations can not be presented at an early date, but the advance leaflets give every week the latest data available.

PRELIMINARY SUMMARY FOR AUGUST

Business activity in August continued to gain over the corresponding period of last year, as shown from preliminary figures. Among the industrial indicators, bituminous coal and petroleum continued to increase in output and were higher than a year ago, while beehive coke, though declining from July, was also higher than in August of last year. Contracts awarded for building construction declined from both periods, however.

Wheat receipts continued the large volume shown in July, though declining somewhat from the peak, and have almost doubled the receipts in August, 1925. Cattle receipts declined considerably from a year ago, while the advent of the new cotton crop during August seemed to be at about the same rate as last year. Wool

receipts at Boston showed little change from a year ago.

Wholesale prices continued to decline, reaching a new low level for the past two years. Such important items as wheat, cotton, steel and lumber averaged lower in price than in July, while copper and chemicals were slightly higher.

Check payments were larger in August than a year ago. Interest rates were higher than in July and also above the levels prevailing a year ago. The Federal reserve ratio declined from the high level reached in July. Stock prices continued to mount while bond prices showed little change. Business failures declined week by week in August but were slightly above the July average.

MONTHLY BUSINESS INDICATORS: 1920-1926

[Ratio charts—see explanations on inside front cover. The curve on bank debits has been adjusted for normal seasonal variations and that on manufacturing production for the varying number of working days in the month]

MONTHLY BUSINESS INDICATORS

The following table gives comparative relative numbers for a selected list of important business movements. It is believed that this table will prove useful, because it segregates from the large mass of material a comparatively small number of items which are often regarded as indicative of business in general.

The table has been divided into two parts, the first containing those items for which relative numbers can be calculated, using 1913 as a base. The second part contains items for which comparable data back to 1913 are not available. This latter group of relative numbers is calculated by letting the 1919 monthly average equal 100. Care should therefore be exercised in comparing the absolute value of the two sets of data. In either group, however, the upward or downward trend of the relative numbers, compared to previous months, does reflect the present tendency in each item and will give a basis for business judgment.

¹ Data since January, 1925, cover only stocks east of California, and hence are not directly comparable with figures for earlier periods.

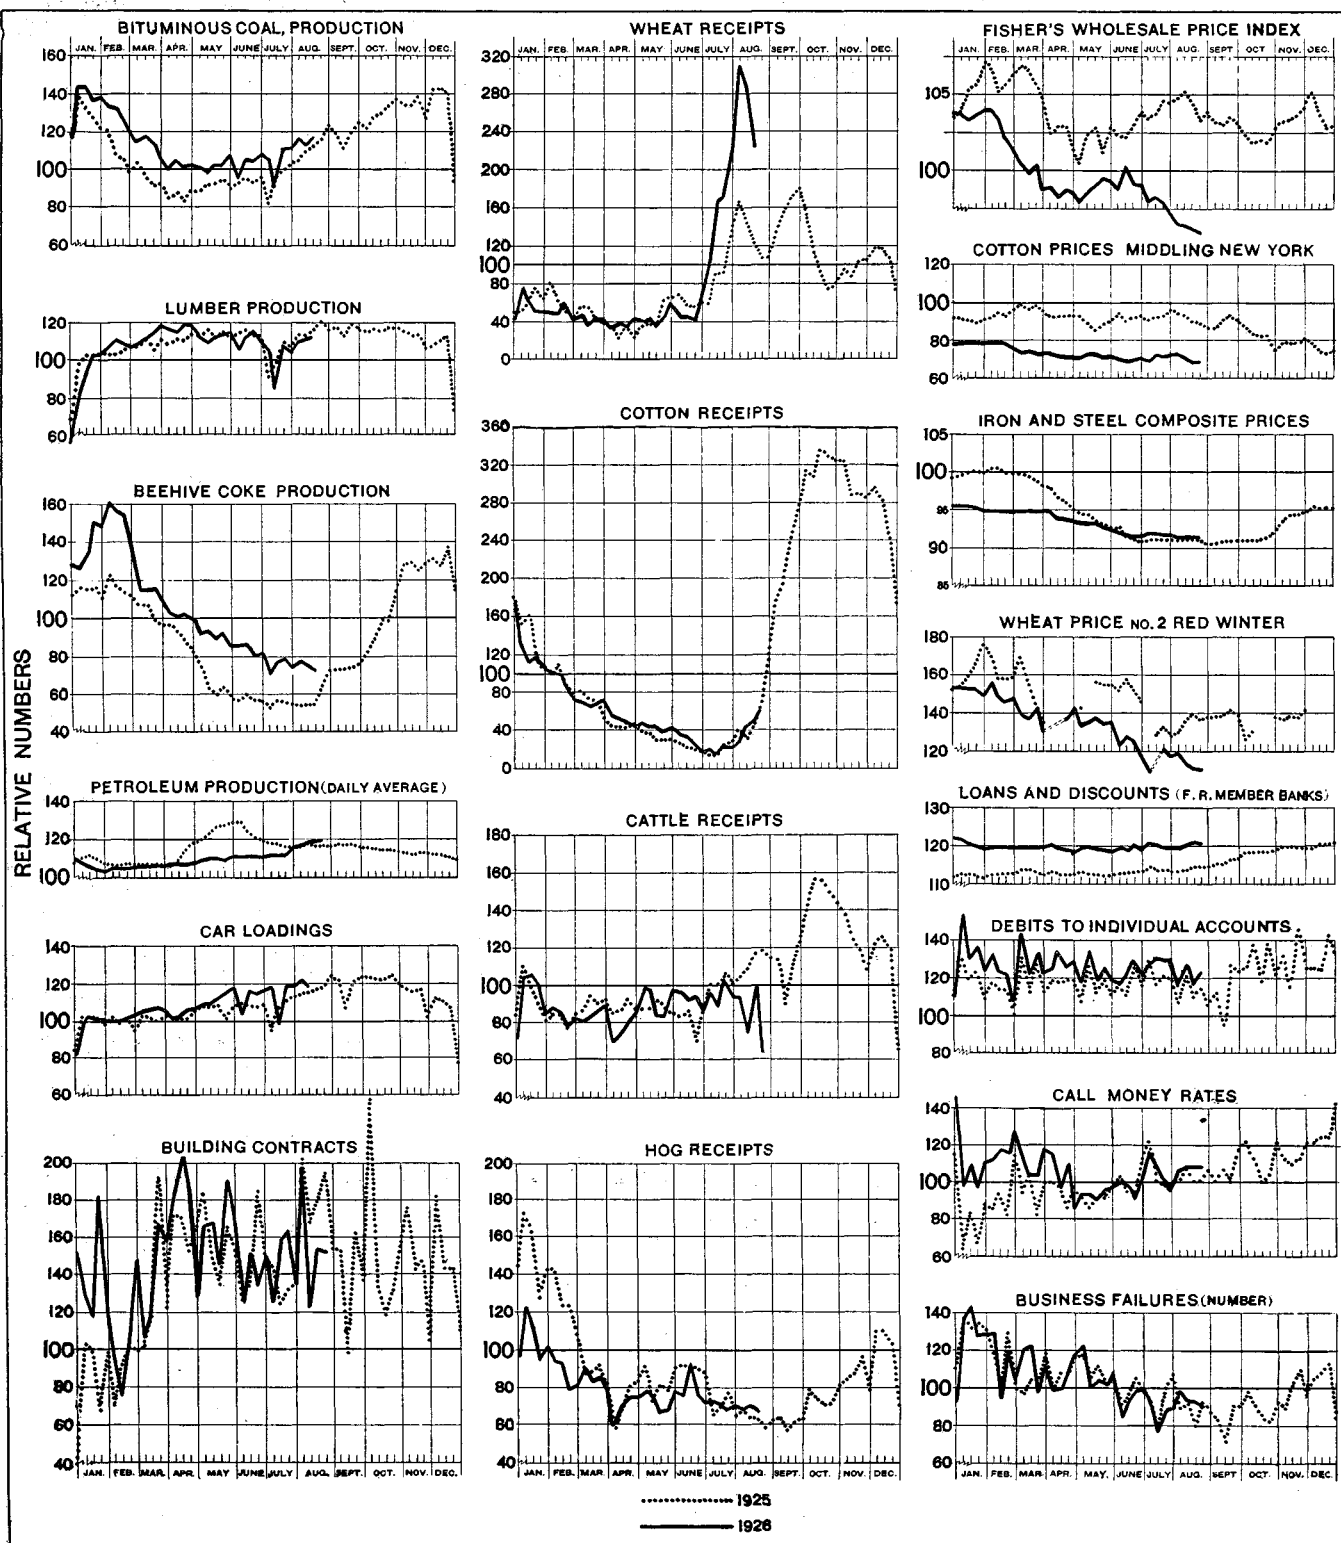

² Wholesale and retail prices from Department of Labor averaged for the month; farm prices from Department of Agriculture.

³ Based on the total computed production reported by 5 associations. Includes southern pine, Douglas fir, western pine, North Carolina pine, and California white pine. The total production of these associations in 1919 was equal to 11,401,000,000 board feet, compared with a total lumber production for the country of 34,552,000,000 board feet reported by the census.

WEEKLY BUSINESS INDICATORS

[See table on page 5]

WEEKLY AVERAGE, 1922 - 1924 = 100. — FISHER'S INDEX, WEEKLY AVERAGE 1923-1924 = 100.

WEEKLY BUSINESS INDICATORS¹

All data are given as relative to the weekly average for 1922 to 1924 as 100, except wholesale prices, which are based on 1923 to 1924 average

WEEK ENDING 2—	Bituminous coal production	Lumber production	Beehive coke pro- duction	Petroleum produc- tion	Car loadings	Building contracts	Receipts of wheat	Receipts of cotton	Receipts of cattle	Receipts of hogs	Wholesale prices	Price of cotton mid- dling	Price of iron and steel (composite)	Price of No. 2 wheat	Bank loans and dis- counts	Debts to individual accounts	Call-money rates	Business failures

WHOLESALE PRICES IN JULY

[Bars denote percentages of increase or decrease in the wholesale prices of specified commodities as compared with the same month of 1925 and 1924]

WHOLESALE PRICE COMPARISONS

NOTE.—Prices to producer on farm products and market price of wool are from U. S. Department of Agriculture, Bureau of Agricultural Economics; nonferrous metal from the *Engineering and Mining Journal-Press*. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics. As far as possible all quotations represent prices to producer or at mill. See diagram on page 6.

COMMODITIES	Unit	ACTUAL PRICE (dollars)			PER CENT INCREASE (+) OR DECREASE (-)		RELATIVE PRICE (1913 average=100)

BUSINESS SUMMARY

[Index and relative numbers based on the 1919 monthly average as 100—except unfilled orders which are based on the 1920 average—enable comparisons to be made of the relative condition of the several phases of business. The use of index and relative numbers is more fully explained on the inside front cover, and details of this summary are given in the table entitled "Indexes of Business," beginning on page 23]

	YEARLY AVERAGE			1925			1926			PER CENT INCREASE (+) OR DECREASE (-)

¹ See p. 28, Jan., 1925, issue (No. 41), for details of adjustment.

COURSE OF BUSINESS IN JULY

GENERAL CONDITIONS

Industrial output as a whole in July declined slightly from a year ago, although such important factors as pig iron, steel ingots, copper, cement, and coal gained in production. A decline in production occurred in most industries, as compared with June, in accordance with the usual seasonal conditions. Building awards in July were smaller than in June and also less than a year ago. Carloadings in July, however, showed a heavier freight movement than last year. Unfilled steel orders turned upwards for the first time this year.

Prices at wholesale, at retail, and at the farms averaged lower than in June and considerably less than a year ago. Retail trade, as seen from mail-order and

chain-store sales, was considerably higher than a year ago, but wholesale trade showed a slight decline. Check payments in July were also larger than a year ago, in spite of the lower level of prices.

Interest rates, both on time and call money, were somewhat stronger in July than a year ago, while loans and discounts of member banks of the Federal reserve system were substantially larger. The Federal reserve ratio at the end of July was higher than at any time within the last 12 months. Prices of stocks continued to average higher, both as compared with June and a year ago. Smaller liabilities were reported by failing firms than a year ago, although increasing over June.

SUMMARY OF INDEXES OF BUSINESS

Manufacturing output in July declined from June, though increases were recorded in the chemical, clay-products, and tobacco groups. Compared with a year ago, the decline in manufacturing was less but of wider fluctuations, increases of 9 per cent or more in the iron-and-steel, paper, foodstuffs, and clay-products groups being balanced by decreases of 9 per cent or more in the leather, nonferrous metals, and miscellaneous groups, the latter declining 16 per cent.

Raw-material output increased 17 per cent over both June, 1926, and July, 1925, due to the large increase in crop marketings. Mineral output increased slightly over both periods, declines from June occurring in anthracite coal, zinc, and silver and, from a year ago, in petroleum, anthracite coal, and silver. In spite of wool receipts almost doubling, and a smaller increase in the fish catch, animal marketings were less than in June, but increased over a year ago, declines occurring only in cattle and milk. Large increases in the marketings of grains and fruits were responsible for the increase in crop marketings over both periods, other groups declining, except for a gain in vegetable marketings over a year ago. Forest products declined in output from both periods, although gum and distilled wood showed increases.

COMMODITY STOCKS

Commodity stocks, when corrected for seasonal variation, increased slightly over June, although raw materials, other than foodstuffs, declined. Compared with July, 1925, stocks were considerably

higher, due almost entirely to the large increase in raw materials, especially foodstuffs, as manufactured commodities other than foodstuffs declined.

SALES

The index of unfilled orders for iron, steel and building materials remained unchanged on July 31 from the previous month, iron and steel orders increasing while building materials declined. The index was slightly lower than a year ago, iron and steel increasing slightly while building material unfilled orders dropped off considerably.

The index of wholesale trade declined from June, only dry goods showing an increase, and a decline was also noted from July, 1925, although shoes and drugs made increases. Sales of mail-order houses showed a seasonal decline from June but were materially higher than a year ago. Cigar, grocery, drug, and candy chains showed increased sales over June, while ten-cent, shoe, and music chains declined, but all were above the July, 1925, figures. Department-store sales were seasonally lower than in June but exceeded a year ago, while stocks were slightly larger than July 31, 1925.

PRICES

A decline occurred in the prices received by farmers in July, all groups except dairy and poultry and the unclassified participating therein, the latter group remaining unchanged. Compared with a year ago, all groups, except fruits and vegetables and meat animals, declined in price.

RELATIVE PRODUCTION, STOCKS, AND UNFILLED ORDERS FOR MANUFACTURED COMMODITIES

[1920 monthly average=100. Adjustment has been made for both stocks and production for their respective seasonal movements. Unfilled orders are principally those of iron, steel, and building materials. July, 1926, is latest month plotted]

The wholesale-price index declined from the June average, although metals and building materials showed increases, while the chemical and miscellaneous groups were unchanged. Compared with a year ago, the index was 6 per cent less, only fuels and building materials being higher, while the metals group was unchanged. The commercial wholesale price indexes also show slight declines from June and considerable decreases from a year ago.

The cost-of-living index also declined one point from June, declines in food and clothing offsetting an increase in sundries, while shelter, fuel, and light

remained unchanged. Compared with a year ago, the index declined 2 per cent, fuel alone showing an increase.

EMPLOYMENT

The index of employment declined from June but was higher than a year ago. The leather group alone increased over June, while, compared with July, 1925, increases occurred in the iron and steel, paper, chemicals, stone, clay, and glass products, vehicles and miscellaneous groups. The pay-roll index also declined from June and increased over a year ago.

COMPARISON OF WHOLESALE AND RETAIL FOOD PRICE INDEX NUMBERS

WITH INDEX OF ALL COMMODITIES AT WHOLESALE

[U. S. Department of Labor index numbers. Relative prices, 1913=100. July, 1926, is latest month plotted]

REVIEW BY PRINCIPAL BRANCHES OF INDUSTRY AND COMMERCE

TEXTILES

Wool receipts at Boston increased in July in a seasonal movement with the influx of the new domestic clip. Total receipts were ahead of July, 1925, notwithstanding a decrease in foreign receipts, which were also less than in June of this year. Imports of wool continued to decline and were 40 per cent less than a year ago.

WOOL IMPORTS (GREASE EQUIVALENT)¹

October.....	20,403	29,941	-----
November.....	20,511	31,114	-----
December.....	41,519	27,910	-----

¹ Through the segregation of figures on grease and scoured wool since the beginning of 1924 in the reports of the U. S. Department of Commerce Bureau of Foreign and Domestic Commerce, it is now possible to present import figures on wool in grease equivalent, similar to the consumption and stock figures. Scoured wool is multiplied by 2 to get grease equivalent in that conversion.

The consumption of wool by textile mills was slightly less than in June and also lower than a year ago; the activity of wool machinery was correspondingly lower than in the previous periods. Prices of raw wool averaged higher than in June while wool products showed no change; both wool and its products were lower in price than a year ago.

The August 16 estimate of the 1926 cotton crop by the Department of Agriculture showed a decline from the August 1 figures and was about the same as the 1925 crop. Raw-cotton imports declined from June but increased over a year ago, while exports increased over both periods, exceeding the July, 1926, total by 80 per cent. On the other hand, less cotton was consumed in textile mills than in either previous period. The activity of cotton spindles was correspondingly lower, especially when the hours of activity are considered. Cotton stocks, both for the United States and for the world, declined seasonally during July but were considerably higher than on July 31, 1925. Cotton prices received by the producer averaged less than in June and the New York market quotations showed little change, but both declined from 25 to 34 per cent from a year ago.

Except for a considerable increase in unfilled orders, cotton-finishing statistics were generally lower than in either June, 1926, or July, 1925, although orders increased over June and shipments over July, 1925. The production of cotton goods was less in July than in June, except for pajama checks and osnaburgs. Stocks on July 31 were generally much less than a

month previous and unfilled orders much higher, except again for pajama checks and osnaburgs. The production of fine cotton goods in the New Bedford district declined both from June and a year ago.

RAW COTTON CONSUMPTION IN COTTON GROWING AND ALL OTHER STATES

[July, 1926, is latest month plotted]

SPINDLE ACTIVITY IN COTTON MILLS

[July, 1926, is latest month plotted]

WHOLESALE PRICES OF TEXTILES AND CLOTHING

[July, 1926, is latest month plotted]

Cotton-cloth exports increased over both periods but the seven-month total was still less than the corresponding 1925 period. Elastic-webbing sales increased over June but declined from a year ago. Cotton-goods prices were, in general, slightly less than in June, with greater declines noted from July, 1925.

Imports of silk, while only slightly higher than in July, 1925, were the largest since February of this year. Deliveries from warehouses were also the largest since February but declined from a year ago, both as respects July and the seven-month total. Warehouse stocks continued to decline and were considerably less than a year ago. The price of silk averaged less than in both previous periods.

Burlap and fiber imports increased both over June, 1926, and July, 1925. Production of fresh-water pearl buttons declined from June and was slightly greater than a year ago, while stocks were slightly less than at either previous period. Dividends of both Fall River and New Bedford cotton mills were less in the second quarter of 1926 than in the corresponding 1925 quarter.

IRON AND STEEL

Although July shipments of iron ore were larger than a year ago, the total movement for 1926 was still less than the corresponding 1925 shipments. Stocks on Lake Erie docks on July 31 declined from a year ago. Pig-iron production showed little change from June in both the United States and Canada but considerable increases over a year ago, Canadian output trebling. The merchant furnaces made a greater comparative increase than the steel plants in pig-iron output over the seven-month cumulative for 1925. Slightly fewer furnaces were in blast at the end of July than at the end of June and the increase over a year ago was somewhat less than the increase in pig-iron output. Pig-iron prices averaged less than in June but the trends from a year ago were mixed.

Steel-ingot production was slightly lower than in June but increased over a year ago, both for July and the seven-month total. Canadian steel production showed similar comparisons but with relatively larger fluctuations. Unfilled orders of the United States Steel Corporation turned upward in July and were slightly above those registered a year ago. Bookings of steel castings were considerably larger than in either the previous month or a year ago, while production showed little change from June. Production and stocks of steel sheets declined from June but shipments, sales, and unfilled orders increased. Compared with a year ago, all factors increased except production. Production, shipments, stocks, and unfilled orders for steel barrels were less than in June but higher than a year ago, except for stocks. Steel

prices remained about the same as in June, though structural beams were quoted higher.

Bookings of fabricated structural steel were somewhat smaller than in June and a year ago, while shipments increased over both periods. Bookings for the fabrication of steel-plate work were considerably lower than in June but higher than a year ago, the total to date being 32 per cent higher than the 1925 corresponding period. Steel-furniture orders and shipments declined from June but unfilled orders rose. Compared with a year ago, orders, shipments, and unfilled orders all increased. A large increase in iron and steel imports and a correspondingly large decline in exports caused imports of iron and steel to exceed exports for the first time since total export figures have been available in quantities.

Machine-tool orders were slightly lower than in June but considerably larger than a year ago. Stoker sales declined from both comparable periods. Vacuum-cleaner sales for the second quarter of the year increased over the previous quarter and the corresponding quarter of 1925, while the six-month total was 18 per cent larger than for the first half of 1925. Fewer patents were issued in July than a year ago.

AUTOMOBILES

Automobile production declined from June and was slightly less than in July, 1925, but, for seven months of the year, passenger-car output was 8 per cent ahead of 1925 and trucks 9 per cent higher. Exports increased over June and over a year ago, the increase in truck and accessory shipments being particularly noticeable. Exports from Canada declined except for truck exports from a year ago. Shipments of electric industrial trucks and tractors declined from June.

1922.....		95,712,839	101,601,917	5,612,445

NONFERROUS METALS

Copper production, at all stages, showed slight changes from either the previous month or a year ago. Domestic shipments of refined copper declined slightly from June but exceeded the July, 1925, total. Exports declined from both periods. Stocks of copper in North and South America declined slightly during July, refined stocks being considerably less than a year ago while blister stocks were higher. The price of electrolytic copper averaged higher than in June.

COPPER PRODUCTION AND EXPORTS

[July, 1926, is latest month plotted]

Sales of tubular plumbing goods increased over June but declined in quantity from July, 1925. Wholesale prices of plumbing fixtures continued to decline. Orders and shipments of brass faucets increased over June but declined from a year ago. In shipments of fire-extinguishing equipment, motor vehicles declined from both periods, while hand extinguishers showed little change.

Tin deliveries increased both over June and over a year ago. Stocks in the United States increased over both periods, while world stocks were less. Imports of tin into the United States also increased over both periods and the price rose.

TIN: IMPORTS, VISIBLE SUPPLY, AND DELIVERIES TO MILLS

[July, 1926, is latest month plotted]

Production of zinc increased slightly over the previous month and a year ago, while on July 31 there was a gain of 9 per cent over the previous month in retorts in operation. Zinc stocks declined from June but increased over a year ago. Ore shipments from the Joplin district increased over both previous periods but ore stocks declined. The price of zinc averaged higher than in June.

RELATIVE PRODUCTION AND STOCKS OF ZINC

[1913 monthly average=100. July, 1926, is latest month plotted]

Orders, shipments, stocks and unfilled orders of enameled sanitary ware declined from June and, except for stocks, were also less than a year ago. Band-instrument sales were less than in June but higher than a year ago.

Bookings of the principal electrical manufacturers decreased in the second quarter of the year from the first quarter but increased over the corresponding 1925 quarter, the half year showing a gain of almost 9 per cent. Orders and shipments of electric hoists declined in July from both the previous month and from July, 1925.

FUELS

Bituminous-coal production increased over June and also over a year ago, the seven-month total showing a gain of 13 per cent. Exports gained considerably over both previous periods, as did consumption by vessels. Consumption of coal by coke plants was slightly larger than in June and considerably higher than a year ago, especially in Canada. Bituminous-coal prices tended to increase slightly over June.

Anthracite production declined from June and was slightly larger than in July, 1925. Exports increased slightly over June but declined from last year. Prices showed little change from June.

PRODUCTION OF BITUMINOUS AND ANTHRACITE COAL

[July, 1926, is latest month plotted]

Coke production in both the United States and Canada increased over June, as well as over a year ago, and exports gained over both periods also. The price of furnace coke averaged higher than in June.

PRODUCTION OF BEEHIVE AND BY-PRODUCT COKE

[July, 1926, is latest month plotted]

Petroleum production continued to increase, as did exports of gasoline. Less gas and fuel oil was consumed by vessels than in June but more than a year ago. Price changes in the petroleum industry were mixed, crude and gasoline showing no change, gas and fuel oil averaging higher than in June and kerosene and lubricating oil lower.

HIDES AND LEATHER

Imports of hides and skins were smaller than in June but larger than a year ago, cattle hides declining from both periods. Hide prices averaged higher than in June but considerably lower than a year ago.

Output of sole and harness leather declined both from June and a year ago, while unfilled orders for harness leather increased over both periods. Exports

of sole leather declined from June while upper leather showed an increase; both classes increased over July, 1925, though for the seven-month period sole leather exports declined from 1925. Sole-oak leather prices declined from June, chrome calf remaining unchanged. Shoe production declined both from June and from a year ago and prices in general were lower. Exports of shoes increased over both comparative periods.

RUBBER

Imports of rubber increased both over June and a year ago, the seven-month total showing a gain of 8 per cent over the 1925 period. Quarterly data show declines in rubber consumption from both the first quarter of 1926 and the second quarter of 1925, while stocks of rubber increased slightly over March 31 and 24 per cent over a year ago, in spite of declines from both periods in holdings by dealers and importers. The price of rubber continued to decline and for July was less than half as high as a year ago.

Except for solid tires, production, stocks, and shipments of tires and tubes declined from June, though shipments of inner tubes also gained. Compared with a year ago, production and shipments declined while stocks were much larger. Operations of reclaimers for the first half of the year were over 50 per cent greater than in the 1925 period, stocks of both scrap and reclaimed rubber on June 30 also showing gains of over 50 per cent from the previous year.

PAPER AND PRINTING

Wood-pulp imports declined from June. Compared with a year ago, mechanical-pulp imports gained while chemical pulp showed a decline. The price of sulphite pulp remained unchanged.

Newsprint production declined from June in the United States but increased in Canada; in both cases large increases were noted over a year ago. Shipments from mills showed little change from June but increased considerably over a year ago in both countries. Stocks at United States mills declined from June, while at Canadian mills increases were noted; in both cases stocks were far below those carried a year ago. No change was noted in newsprint prices.

The production of paperboard shipping boxes increased slightly over June and was considerably larger than a year ago.

NEWSPRINT PAPER PRODUCTION AND MILL STOCKS

[July, 1926, is latest month plotted]

BUILDING CONSTRUCTION AND HOUSING

A seasonal decline in rental advertisements was shown in July, but in both recording cities, Minneapolis and Portland, Oreg., the lineage surpassed slightly the July, 1925, figures.

Building costs were about the same as in June, the material index increasing slightly as of July 1, while the indexes for brick construction, with steel frame, and for reinforced-concrete construction declined. The other building-cost indexes remained unchanged.

Contracts awarded for building construction were less than in June and also less than a year ago, in both floor space and value, but still exceeded 1925 for the seven-month total. Increases over June, however, were made in industrial and educational-building contracts, while public-utility awards increased in value. Compared with July, 1925, industrial-building contracts increased in both floor space and value and utility contracts in value. Canadian building contracts awarded totaled much less than in June but were half again as large as in 1925 both for July and for seven months.

An increase in fire losses was noted over both June and a year ago, the seven-month cumulative also showing an increase over the 1925 period.

LUMBER PRODUCTS

Production of most species of lumber was lower in July than in June, although southern pine and northern pine showed no change. Declines also occurred from July, 1925, except in Douglas fir and hardwoods.

Lumber shipments increased over June for southern pine, western pine, northern pine and hardwoods, while Douglas fir, cypress, California pine and redwoods declined. Compared with a year ago, southern pine and Douglas fir had smaller shipments but other species showed increases. New orders were generally less than in June, though southern pine showed an increase. Redwood and hardwoods alone reported increased orders over July, 1925. Stocks in general were slightly less than in June, oak and California pine being exceptions, while stocks were higher than a year ago, except for southern pine and gum. Unfilled orders for cypress increased over the end of June while hardwoods declined; hardwood unfilled orders were considerably above these recorded on July 31, 1925, however. Exports of lumber declined from June and from a year ago. No change was noted in Douglas-fir lumber while southern-pine flooring declined. Hardwood prices declined while softwoods, as a whole, were unchanged.

Production of oak flooring increased over June but maple flooring declined; both were higher than a year ago. Stocks of both classes declined from June but increased over July 31, 1925, while unfilled orders were slightly less than a month previous and considerably lower than a year ago.

Production of barrel headings was materially increased over June, as were sales, while unfilled orders and stocks both declined slightly from June 30.

ORDERS FOR ENAMELED BATHS AND CONTRACTS AWARDED FOR RESIDENTIAL CONSTRUCTION IN 27 NORTHEASTERN STATES

[July, 1926, latest month plotted]

STONE, CLAY, AND GLASS PRODUCTS

Face-brick production increased over both the previous month and a year ago, while shipments declined from June and were about the same as in July, 1925. Stocks and unfilled orders showed slight increases over the end of June and much greater gains over July 31, 1925.

Paving-brick production increased over June but declined from July, 1925. Shipments, new orders, and unfilled orders increased over both periods while stocks and cancellations were less.

Bookings of architectural terra cotta were materially larger than in either June, 1926, or July, 1925.

7135-26†-3

Orders, shipments, stocks, and unfilled orders of vitreous-china plumbing fixtures declined from June and increased over a year ago, except for unfilled orders.

Cement production increased slightly over June but shipments and stocks declined. Compared with a year ago, production and shipments were somewhat larger while stocks increased by 24 per cent. Cement prices showed no change. A slight increase occurred over June in awards of concrete-paving contracts, but awards were less than a year ago.

Orders and production of glass containers increased over June while shipments, stocks, and unfilled orders declined.

CHEMICALS AND OILS

Sulphuric-acid exports were much larger than in either June, 1926, or July, 1925, while prices were unchanged. Imports of nitrate of soda and potash both increased considerably over June but were smaller than a year ago. Fertilizer consumption in Southern States was materially higher than in July, 1925, while exports declined. Exports of vegetable dyes declined both from June and a year ago, while coal-tar dyes were exported in greater quantity. Outside of declines in the index numbers of essential oils and oils and fats, the prices of chemicals and oils were generally stable.

The refining of methanol increased over June and over a year ago, stocks of refined increasing over June and declining from July, 1925, while crude stocks held by refiners were considerably less than at either previous period.

Receipts of turpentine and rosin increased slightly over both previous periods, stocks increasing over June in both cases while declining from a year ago. Prices of both naval stores increased.

Exports of vegetable oils increased slightly over June but were 64 per cent less than a year ago. Imports increased considerably over both periods. Cottonseed-oil production for July and stocks on July 31 were higher than a year ago, while cottonseed stocks were lower. Flaxseed receipts at Minneapolis and Duluth declined from July, 1925, and stocks increased.

Monthly data on sales of animal glues are presented in the following table:

SALES OF ANIMAL GLUES¹

[Actual shipments]

MONTH	Total glue (pounds)	Bone glue (pounds)	Hide glue (pounds)
January.....	7,269,774	3,286,915	3,982,859
February.....	7,011,753	2,962,909	4,048,844
March.....	6,942,696	2,733,921	4,208,775
April.....	7,524,610	3,224,568	4,280,042
May.....	6,012,764	2,342,191	3,670,573
June.....	6,225,945	2,350,679	3,875,266
July.....			

¹ Compiled by the *National Association of Glue Manufacturers* from reports of 15 companies estimated to represent 70 per cent of the glue industry. Figures shown do not include sales to members, owing to duplications.

COMPARISON OF CHEMICAL PRICES BY GROUPS

[July, 1926, is latest month plotted]

CEREALS

The visible supply of wheat at the end of July was 35 per cent greater than a year ago. Receipts and shipments of wheat at the interior markets were each larger than in July, 1925, with the total receipts for the first seven months recording an increase of 18 per cent over the corresponding period of the previous year. Shipments of wheat from the principal markets during the seven-month period, however, were 17 per cent smaller than during the same period of 1925. Exports of wheat in July were double those of June and 73 per cent greater than a year ago. For the first seven months of this year wheat exports, however, were 18 per cent smaller than during the same period of last year. Prices of wheat averaged lower than last year and for No. 2 red winter lower also than in the previous month.

Exports of wheat flour in the United States were larger in July than in either the preceding month or a year ago, but the seven-month total was 24 per cent smaller than in 1925. Wholesale prices for wheat flour, standard patents, averaged higher than in either the preceding month or a year ago with prices for winter straights showing declines for both of these periods.

Wheat and flour stocks held by flour mills at the end of each quarter are shown in the following table:

STOCKS OF WHEAT AND WHEAT FLOUR HELD BY MILLS¹

DATE	Wheat (in bushels)	Wheat flour (in barrels)
June 30, 1925	32,313,691	3,346,913
Dec. 31, 1925	103,108,573	4,584,411
Mar. 31, 1926	64,639,294	3,888,377
June 30, 1926	35,834,316	3,121,724

¹ Compiled by the U. S. Department of Commerce, Bureau of the Census, from reports of companies operating about 1,000 mills representing about 88 per cent of the total wheat-flour output, according to the census of manufactures, 1923. These stocks include all wheat and flour held by mills, whether in mills, elevators, or in transit. Details for wheat stocks by class of elevator, etc., are shown in press releases.

The visible supply of corn at the end of July was almost four times as large as a year ago. Corn receipts and shipments at the principal markets during July were likewise larger than in the same month of 1925. Grindings of corn for the manufacture of starch and glucose, although smaller than in the preceding month, were 41 per cent larger than a year ago. Exports of corn, including meal, were 61 per cent larger than in July, 1925, with the aggregate outward movement during the first seven months showing an increase of more than 200 per cent. Prices for corn, although 25 per cent below a year ago, averaged higher than in June.

The visible supply of oats at the end of July was 23 per cent larger than a year ago, receipts of oats at the principal interior markets being smaller than during either the preceding month or July, 1925, with the seven-month total showing a decline in receipts amounting to 20 per cent. Exports of oats, including meal, were likewise smaller than in either the preceding month or July, 1925, with a similar decline in the seven-month total. Prices for oats averaged higher than in the previous month but were lower than in July, 1925.

The visible supply of barley on July 31 was more than twice as large as a year ago. Barley receipts, however, showed a decline of more than 50 per cent from July, 1925, with the aggregate for the first seven months recording a decrease of 21 per cent from the corresponding period of last year. Barley exports, although larger than in June, were 29 per cent smaller than in July, 1925, with a similar decline noted in the total for the seven months ending July. Prices for barley, although higher than in June, averaged 18 per cent below the prevailing quotations of a year earlier.

The visible supply of rye at the end of July was more than two and one-half times as large as a year earlier. Rye receipts were twice as large as in July, 1925, but the seven month's total was 37 per cent smaller than during the same period of the previous year. Exports of rye were smaller than in July, 1925, with a decline of 67 per cent in the seven month's total.

Receipts of southern paddy rice at mills were larger than a year ago, making the total for the first seven months 180 per cent greater. Shipments of rice from mills also recorded an increase over a year ago, both as compared with July and the seven-month period. Rice stocks at the end of July were eight times as large as a year ago. Rice exports and imports were also larger than in July, 1925, with the import movement showing an increase also in the seven-month total, amounting to more than 100 per cent.

FRUITS AND VEGETABLES

Car-lot shipments of potatoes were larger than a year ago but onion shipments showed a decline. Fewer carloads of potatoes were shipped during the first

seven months than during the same period of last year with a greater number of carloads in the case of onions. Shipments of citrus fruits were larger than last year, both as compared with July and the seven-month total.

MEATS AND DAIRY PRODUCTS

Receipts, shipments, and local slaughter of cattle and calves at the primary markets were less than for either the previous month or for July, 1925. The movement and slaughter of hogs also declined to a considerable extent from the previous month, although receipts and local slaughter were each larger than a year ago. Similar declines from June were recorded in the movements and slaughter of sheep and lamb, the receipts and shipments, however, being larger than a year ago. Cold-storage holdings of beef, mutton, and lamb were smaller and those of pork larger than at the end of the previous month; holdings of beef and pork, on the other hand, were smaller, and those of mutton much larger than a year ago. Prices of beef cattle and ewes were higher than for June, while those of corn-fed cattle, lamb, and pork declined. All prices were less than a year ago by from 3 to 18 per cent.

Receipts and cold-storage holdings of poultry were slightly less than for June, receipts being greater and cold-storage holdings less than a year ago. Cold-storage holdings of fish, on the other hand, were considerably larger than at the end of either prior period.

Receipts of butter were less than for either the previous month or a year ago, and receipts of cheese, while larger than in June, much smaller than a year ago. Cold-storage holdings, both of butter and of cheese, were considerably larger than at the end of either prior period. Receipts of eggs declined seasonally from the previous month but were slightly larger than for July, 1925. Cold-storage holdings of eggs continued to increase seasonally but were 2 per cent less than a year ago.

CATTLE AND CALVES: RECEIPTS, SHIPMENTS, AND LOCAL SLAUGHTER

[July, 1926, is latest month plotted]

RELATIVE RECEIPTS OF BUTTER, CHEESE, AND EGGS AT PRIMARY MARKETS

[1919 monthly average = 700. July, 1926, is latest month plotted]

SUGAR, COFFEE, AND TEA

Imports of sugar continued to decline seasonally and were also less than in July, 1925. For the year to date sugar imports were only slightly less than for the corresponding month of last year, the increase in imports from Hawaii and Porto Rico being insufficient to offset the decline in imports from Cuba and other foreign countries. Meltings of sugar were less than for either the previous month or for July, 1925, and stocks, while declining sharply from the previous month, exceeded by 32 per cent those reported a year ago.

RAW CANE SUGAR: TOTAL IMPORTS, MELTINGS AND REFINERY STOCKS

[July, 1926, is latest month plotted]

Imports of coffee were substantially larger than in June and almost as great as a year ago. The visible supply both for the United States and the world also exceeded that for the previous month but was less than a year ago. Total receipts of coffee in Brazil were 19 per cent larger than for the previous month but were slightly less than a year ago. Clearances of Brazilian coffee for the United States exceeded those of the previous month by 28 per cent but were 7 per cent less than in July, 1925. Imports of tea increased seasonally but were 6 per cent less than a year ago.

WATER TRANSPORTATION

Clearings of vessels engaged in foreign trade were considerably larger than for either the previous month or for a year ago. Traffic through the Sault Ste. Marie Canals continued to increase and was considerably larger than a year ago. Traffic on the Mississippi and Ohio Rivers, on the other hand, declined from the previous month, although exceeding last year's figures. The tonnage of ships completed during July was much smaller than either in June or a year ago, the seven-month total this year also being considerably less than for the corresponding period of 1925.

RAILROADS

Carloadings for the five weeks ending in July exceeded those of the corresponding weeks of 1925 by 6 per cent, all classes of freight participating in the increase. The average weekly carloadings in July were very little larger than those of June, most of the apparent increase from the previous month being due to the additional week's figures included in the July totals. Surplus freight cars continued to decline and were 25 per cent less than a year ago. Shipments of railway locomotives by manufacturers were less than in June but considerably greater than a year ago.

SURPLUS, SHORTAGE AND BAD-ORDER FREIGHT CARS

[July, 1926, is latest month plotted]

DISTRIBUTION MOVEMENT

Sales by mail-order houses declined from the previous month, but were substantially larger than a year ago. The sales by the four largest ten-cent chain stores showed an increase over the previous month and were considerably larger than a year ago. Chain cigar-store sales showed a similar tendency, although those of music and restaurant chains declined from June. Newspaper and magazine advertising exhibited a sharp seasonal decline from the previous month but exceeded the total of the corresponding month of last year. Postal receipts at the principal cities declined from the previous month, while those for the important industrial cities were larger than in June, postal receipts from both types of cities being larger than a year ago. Delinquent accounts in the electrical trade were substantially less than in either the previous month or a year ago.

SALES BY MAIL-ORDER HOUSES AND TEN-CENT CHAIN STORES

[July, 1926, is latest month plotted]

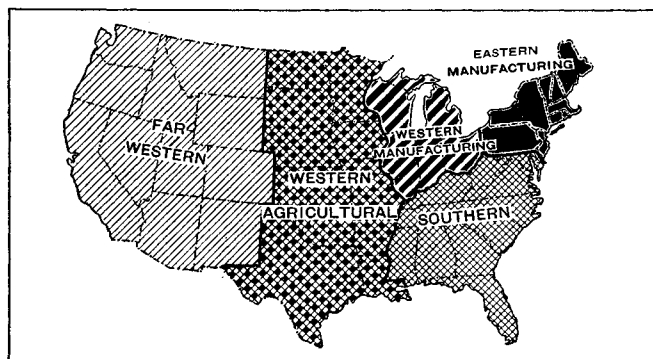

LIFE INSURANCE

The number of new ordinary life-insurance policies sold, as reported by 45 companies, was considerably less than in June and the amount of insurance also declined. The number of new policies was slightly less than a year ago, although the total insurance represented exceeded that of July, 1925, by 6 per cent. The decline in sales of new insurance was quite generally distributed over the entire country, the smallest decline from the previous month being 5 per cent in the eastern manufacturing district, while the largest decline was in the western agricultural district.

SALES OF ORDINARY LIFE INSURANCE, BY GEOGRAPHICAL DIVISIONS

[July, 1926, is latest month plotted]

BANKING AND FINANCE

Check payments and bank clearings in New York City declined 2 per cent from the previous month's totals but exceeded those for July, 1925. The region outside New York, on the other hand, showed increases both over the previous month and a year ago. The reserve ratio of the Federal reserve banks increased over the previous month but was 1 per cent less than a year ago. Bills discounted and total reserves of the banks also increased over June, while notes in circulation and total investments declined,

although they were larger than those reported a year ago. Deposits, loans and discounts, and investments of the Federal reserve member banks all declined from the previous month but each exceeded those of a year ago. Brokers' loans by member banks in New York City, on the other hand, were slightly larger than in June. The interest rate both on call loans and on commercial paper averaged higher than during either the previous month or July, 1925.

BILLS DISCOUNTED AND TOTAL INVESTMENTS OF FEDERAL RESERVE BANKS

[July, 1926, is latest month plotted]

LOANS, DISCOUNTS, AND TOTAL INVESTMENTS OF FEDERAL RESERVE MEMBER BANKS

[July, 1926, is latest month plotted]

Business failures were less than in June, although liabilities were slightly greater, in spite of a decline in the liabilities of failing trade establishments. Compared with a year ago, failures were less, in both number and liabilities, increases occurring only in manufacturing establishments as regards liabilities and in agents and brokers as regards number of failures.

Prices of stocks averaged slightly higher than during June and considerably higher than a year ago. The number of shares sold, on the other hand, declined from both the previous month and July, 1925. Bond prices declined from the previous month but were slightly higher than in June, 1925.

NUMBER OF BUSINESS FAILURES AND DEFAULTED LIABILITIES

[July, 1926, is latest month plotted]

GOLD AND SILVER

Domestic receipts of gold at the mint exceeded those of the previous month by 21 per cent but were less than the receipts in July, 1925. Imports and exports of gold also increased over the previous month and were much larger than a year ago. The Rand output, on the other hand, was only slightly larger than in June but in excess of a year ago. Silver production declined both from the previous month and from July, 1925.

GOLD TRADE BALANCE, SHOWING EXCESS OF IMPORTS OR EXPORTS

[July, 1926, is latest month plotted]

FOREIGN TRADE AND EXCHANGE

European rates of exchange with England and the Latin countries declined from the previous month while rates with the Asiatic and South American

countries advanced. Compared with a year ago exchange rates with Europe were the same or less for all countries, while rates of exchange with the other important countries increased in every case except that of India. Very sharp declines in the rate of exchange both from the previous month and a year ago took place in the case of both the Belgian and the French francs.

Total imports were slightly larger than in June and 4 per cent greater than a year ago. Exports, on the other hand, exceeded those of the previous month and of June, 1925, by 9 per cent.

IMPORTS AND EXPORTS OF MERCHANDISE

[July, 1926, is latest month plotted]

INDEXES OF BUSINESS

The index numbers presented in this table are designed to show the trend in production, prices, trade, etc., in various groups of industry and commerce. They consist in general of weighted combinations of series of individual relative numbers; often the individual relative numbers making up the series are also given. The function of index and relative numbers is explained on the inside front cover. A condensed form of this table is given on page 9.

¹ Compiled by the Bureau of the Census from reports of 57 life-insurance companies, estimated to have more than 85 per cent of the admitted assets of all legal reserve life-insurance companies in the United States. This tabulation is a consolidated summary of Schedule B, Part I, used by reporting companies in their annual statements. The totals do not include mortgage investments in Canada and other foreign countries, which if included would account for an additional \$20,000,000.

² Represents total loans outstanding at date indicated.

³ Contains data from two or three companies not allocated between farm and other properties.

TREND OF BUSINESS MOVEMENTS

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. These data represent continuations of the figures presented in the latest semiannual number (August, 1926), in which monthly figures for 1925 and 1926 may be found, together with explanations as to the sources and exact extent of the figures quoted. The figures given below should always be read in connection with those explanations. Data on stocks, unfilled orders, etc., are given as of the end of the month referred to. For explanations of relative numbers, including base periods, see introduction on inside front cover.

The cumulatives shown are through July except where otherwise noted. Earlier data for items shown here may be found on pages 22 to 151 of the August, 1926, "Survey"	1926					1925		PER CENT INCREASE (+) OR DECREASE (-)		CUMULATIVE TOTAL FROM JANUARY 1 THROUGH JULY 31		Per cent increase (+) or decrease (-) cumulative 1926 from 1925

PUBLICATIONS OF THE DEPARTMENT OF COMMERCE

Recent publications of the Department of Commerce having the most direct interest to readers of the *SURVEY OF CURRENT BUSINESS* are listed below. A complete list may be obtained by addressing the Division of Publications, Department of Commerce, at Washington. Copies of the publications may be purchased from the Superintendent of Documents, Government Printing Office, Washington, at the prices stated. If no price is mentioned, the publications are distributed free.

BUREAU OF THE CENSUS

[For information concerning plan of publication and distribution of census publications, address the Director of the Census.]

Census of Agriculture, 1925.—State bulletins containing county statistics concerning farms and farm property, crops, livestock, etc. Wyoming, 25 pages, price 5¢; California, 43 pages, price 10¢; Nebraska, 64 pages, price 10¢; and Iowa, 67 pages, price 10¢.

Census of Manufactures, 1923.—Statistics for industries, States, and cities, 250 pages, 35¢. This bulletin is a reprint from Report of Census of Manufacturers, 1923, and contains detailed statistics for all manufacturing industries by States and by cities having 100,000 inhabitants.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

Monthly Summary of Foreign Commerce of the United States, June, 1926. Parts I and II.—Part I contains statistics of exports of domestic merchandise, and imports, by articles, for June, 1926 and 1926, and for 12 months ended June, 1925 and 1926. Part II contains summaries of export and import trade; monthly average import and export prices; statistics of trade with Alaska, Hawaii, and Porto Rico. Single copies, Part I, 10¢; Part II, 5¢. Annual subscription, \$1.25.

Transportation and Communication in the United States, 1926. Trade Information Bulletin No. 425. (Reprint from Commerce Yearbook, 1925, pp. 508-549.)—This is a report on operations of railways, ocean and inland waterway shipping lines; on motor-vehicle registrations; telephone, telegraph, and cable communications; and on civil aviation activities. Price, 10¢.

Investments in Latin America: III, Chile, by Frederic M. Halsey and G. Butler Sherwell. Trade Information Bulletin No. 426; ii+55 pages.—In this bulletin is given an account of the financial condition of Chile and of investments in the enterprises of that country. Price, 10¢.

Shipment of Samples and Advertising Matter to Asia, Africa, and Insular Possessions, by Roberta P. Wakefield. Trade Information Bulletin No. 427; ii+57 pages.—This is a study of the regulations of the various countries of the Far East and of Africa relating to shipments of samples and advertising matter. Price, 10¢.

Marketing and Competition in the Scandinavian Countries, by F. A. M. Alfsen. Trade Information Bulletin No. 428; ii+14 pages.—Brief account of the economic resources and business methods of Norway, Sweden, and Denmark. Price, 10¢.

Commercial Travelers' Guide to the Far East. Trade Promotion Series No. 29; viii+384 pages, 22 illustrations, map.—This guide contains detailed information of value to all travelers in the Orient. A bibliography on the Far East is included. Price, 85¢.

Railways of South America: Part I, Argentina, by George S. Brady, American trade commissioner. Trade Promotion Series No. 32; viii+267 pages, 51 illustrations, map.—This bulletin contains information regarding development of railway service in Argentina. A detailed account is given of the organization and operations of each railway line. Price, 50¢.

BUREAU OF STANDARDS

Simplified Practice Recommendations:

No. 39. Dining-Car Chinaware. ii+9 pages.

No. 41. Package Sizes for Insecticides and Fungicides. ii+7 pages.

Copies of the above recommendations may be obtained from the Superintendent of Documents at 5¢ each.

Properties and Manufacture of Concrete Building Units. Circular No. 304; 49 pages, 7 illustrations, 1 plate.—This circular describes the materials used and the method of manufacture of concrete blocks. A bibliography and standard specifications for concrete manufacture are included. Price, 20¢.

BUREAU OF MINES

Mineral Resources of the United States in 1925; Preliminary Summary. ii+120 pages. Price, 20¢.

Fluorspar and Cryolite in 1925. (From Mineral Resources of the United States, 1925, Pt. II, pp. 7-24.) Price, 5¢.

Gold, Silver, Copper, Lead, and Zinc in Nevada in 1924. (From Mineral Resources of the United States, 1924, Pt. I, pp. 419-450.) Price, 5¢.

Red Iron Ores and Ferruginous Sandstones of the Clinton Formation in the Birmingham District, Alabama, by W. R. Crane. Technical Paper 377; iv+41 pages, 23 illustrations.—This is a study of the iron-ore and sandstone deposits in the Birmingham district of Alabama. Price, 10¢.

Accidents in California Petroleum Industry in 1923, by H. C. Miller and C. E. Steidel. Technical Paper 383; iv+30 pages.—In this bulletin are tabulated the accidents incurred and their causes in the petroleum industry of California during 1923. Price, 5¢.

BUREAU OF FISHERIES

Progress in Biological Inquiries, 1925, by Willis H. Rich. Document No. 1003. (Appendix I to the Report of the United States Commissioner of Fisheries for 1926, pp. 1-36.)—In this publication are given accounts of the investigations and experiments undertaken to conserve and develop the fishery resources of the country. Price, 10¢.

New Genus of Darter from Western North Carolina, by R. E. Coker. Document No. 1004. (From Bulletin of Bureau of Fisheries, vol. 42, pp. 105-108, 1 illustration.) Price, 5¢.

BUREAU OF NAVIGATION

American Documented Seagoing Merchant Vessels of 500 Gross Tons and Over, July, 1926. ii+69 pages. Published monthly. Single copies, 10¢; annual subscription, 75¢.

Radio Service Bulletin, July, 1926. 20 pages. Published monthly in interest of radio service. Contains lists of radio stations and references to current radio literature. Single copies, 5¢; annual subscription, 25¢.

COAST AND GEODETIC SURVEY

First-Order Leveling in Oregon, by Henry G. Avers. Special Publication No. 122; ii+78 pages, 7 illustrations, 1 plate, map.—This pamphlet contains descriptions and standard elevations of all bench marks in Oregon that were established by first-order leveling. Price, 15¢.

Tides and Currents in Delaware Bay and River, by L. M. Zeskind and E. A. Le Lachaur. Special Publication No. 123; iv+122 pages, 39 illustrations.—This publication deals with data on tides and currents in Delaware Bay and in the Delaware River from its mouth to Trenton. Price, 25¢.

LIGHTHOUSE SERVICE

Atlantic Coast of the United States: Buoy List, Coast of Massachusetts, Second Lighthouse District, 1926 (corrected to May 10). 71 pages.—This list describes all aids to navigation maintained by the United States on the coast and tributary waters of Massachusetts, excepting Mount Hope Bay and Taunton River. Price, 20¢.

Atlantic Coast of the United States: Buoy List, Maine and New Hampshire, First Lighthouse District, 1926 (corrected to June 5). 79 pages. Price, 20¢.

Pacific Coast of the United States: Buoy List, Alaska, Sixteenth Lighthouse District, 1926 (corrected to May 25). 49 pages. Price, 20¢.

Pacific Coast of the United States: Buoy List, California, Eighteenth Lighthouse District, 1926 (corrected to June 15). 41 pages. Price, 20¢.

Pacific Coast of the United States: Buoy List, Oregon and Washington, Seventeenth Lighthouse District, 1926 (corrected to June 25). 73 pages. Price, 20¢.

REVIEWING AMERICA'S GREATEST INDUSTRIAL YEAR

THE YEAR 1925 WAS A BANNER ONE FOR AMERICAN BUSINESS

Manufacturing output exceeded that of 1923—the previous record year. Exports were greater than in 1924 and, after allowing for the difference in prices, only slightly below the war-inflated peak of 1919. Railroads handled their greatest volume of traffic. Banking transactions, both in New York and outside, exceeded all records.

The complete and authentic record of this outstanding period in American trade and industry is contained in the **Commerce Yearbook** for 1925 which is now ready for distribution. This publication, considered one of the most valuable issued by any government, is a source of facts and figures to be found in no other single volume.

The business man, the economist, the student can obtain in this book a **BIRD'S EYE VIEW OF AMERICAN INDUSTRIAL PROGRESS**. Its material has been gathered from every available source, and carefully digested by experts. Its figures may be quoted with assurance of correctness.

The comprehensive scope of this Yearbook is shown by its contents which include:

A résumé of production, employment, domestic trade, and prices.

Sections devoted to agricultural products and foodstuffs; fuel and power; metals; construction and construction materials; machinery; motor vehicles; railway equipment; electrical apparatus; textiles; rubber; leather and leather products; paper and printing; chemicals.

Discussions of transportation and communication; finance and banking; foreign trade.

Economic surveys of the principal foreign countries.

Bound in cloth, contains nearly 800 pages with numerous charts, maps and tables

WHAT REPRESENTATIVE BUSINESS MEN SAY OF THE YEARBOOK

A leading automobile Manufacturer: "A valuable addition to our library... replete with statistical, graphic, and written data of real value to a company such as ours."

A New York banker: "A publication which fills a very real need in the business community."

Publisher of a widely-read technical journal: "Evidences a grasp of conditions in America's diversified industry that is nothing short of remarkable."

A prominent drug manufacturer: "No American manufacturer has any excuse for neglecting foreign markets after he is in possession of this publication."

Vice President of a well-known fruit company: "A most complete and interesting book."
