SURVEY OF  
CURRENT BUSINESS

NOVEMBER, 1929

No. 99

ISSUED BY  
BUREAU OF THE CENSUS

IMPORTANT NOTICE

*In addition to figures given from Government sources, there are also incorporated for completeness of service figures from other sources generally accepted by the trades, the authority and responsibility for which are noted in the "Sources of Data" on pages 139-142 of the August, 1929, semiannual issue*

## INTRODUCTION

The SURVEY OF CURRENT BUSINESS is designed to present each month a picture of the business situation by setting forth the principal facts regarding the various lines of trade and industry. The figures reported are very largely those already in existence. The chief function of the department is to bring together these data which, if available at all, are scattered in hundreds of different publications. A portion of these data are collected by Government departments, other figures are compiled by technical journals, and still others are reported by trade associations.

At semiannual intervals detailed tables are published giving, for each item, monthly figures for the past two years and yearly comparisons, where available, back to 1913; also blank lines sufficient for six months have been left at the bottom of each table, enabling those who care to do so to enter new figures as soon as they appear (see August, 1929, issue). In the intervening months the more important comparisons only are given in the table entitled "Trend of business movements."

## WEEKLY SUPPLEMENT

Realizing that current statistics are highly perishable and that to be of use they must reach the business man at the earliest possible moment, the department has arranged to distribute supplements every week to subscribers in the United States. The supplements are usually mailed on Saturdays and give such information as has been received during the week ending on the preceding Tuesday. The monthly information contained in these bulletins is republished in the SURVEY, and the supplements also contain charts and tables of weekly data.

## RELATIVE AND INDEX NUMBERS

To facilitate comparison between different important items and to chart series expressed in different units, relative numbers (often called "index numbers," a term referring more particularly to a special kind of number described below) have been calculated. The monthly average for 1923-1925 has usually been used as a base equal to 100.

The relative numbers are computed by allowing the monthly average for the base year or period to equal 100. If the movement for a current month is greater than the base, the relative number will be greater than 100, and vice versa. The difference between 100 and the relative number will give at once the per cent increase or decrease compared with the base period. Thus a relative number of 115 means an increase of 15 per cent over the base period, while a relative number of 80 means a decrease of 20 per cent from the base.

Relative numbers may also be used to calculate the approximate percentage increase or decrease in a movement from one period to the next. Thus, if a relative number at one month is 120 and for a later month it is 144 there has been an increase of 20 per cent.

When two or more series of relative numbers are combined by a system of weightings, the resulting series is denominated an index number. The index number, by combining many relative numbers, is

designed to show the trend of an entire group of industries or for the country as a whole, instead of for the single commodity or industry which the relative number covers. Comparisons with the base year or with other periods are made in the same manner as in the case of relative numbers.

## RATIO CHARTS

In most instances the charts used in the SURVEY OF CURRENT BUSINESS are of the type termed "Ratio Charts" (logarithmic scale), notably the Business Indicator charts on page 2. These charts show the percentage increase and allow direct comparisons between the slope of one curve and that of any other curve regardless of its location on the diagram; that is, a 10 per cent increase in an item is given the same vertical movement whether its curve is near the bottom or near the top of the chart. The difference between this and the ordinary arithmetic form of chart can be made clear by an example. If a certain item having a relative number of 400 in one month increases 10 per cent in the following month, its relative number will be 440, and on an ordinary chart would be plotted 40 equidistant scale points higher than the preceding months. Another movement with a relative number of, say, 50 also increases 10 per cent, making its relative number 55. On the ordinary (arithmetic) scale this item would rise only 5 equidistant points, whereas the previous item rose 40 points, yet each showed the same percentage increase. The ratio charts avoid difficulty and give to each of the two movements exactly the same vertical rise, and hence the slopes of the two lines are directly comparable. The ratio charts compare percentage changes, while the arithmetic charts compare absolute changes.

## RECORD BOOK

As an aid to readers in comparing present data with monthly statistics in previous years, the department is compiling a RECORD BOOK OF BUSINESS STATISTICS, in which data now carried in the SURVEY OF CURRENT BUSINESS are shown by months as far back as 1909, if available. Full descriptions of the figures and reports of how the data are used in actual practice by business firms are contained in the RECORD Book. The sections covering textiles, metals, and fuels, automobiles, and rubber have already been issued and may be obtained for 10 cents per copy from the Superintendent of Documents, Government Printing Office, Washington, D. C. (Do not send stamps.) Notices of other sections will be given in the SURVEY as they are issued.

## METHODS OF USE

Methods of using and interpreting current business statistics have been collected by the department from many business concerns and are described in a booklet entitled "How to Use Current Business Statistics," together with methods of collecting statistics. This booklet may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 15 cents per copy. (Do not send stamps.)

*This issue presents practically complete data for the month of September and contains text covering the early weeks of October (page 1), for which the basic figures in table and chart form are presented regularly in the weekly supplements. As most data covering a particular month's business are not available until from 15 to 30 days after the close of the month, a complete picture of that month's operations can not be presented at an early date, but the weekly supplements give every week the latest data available.*

# SURVEY OF CURRENT BUSINESS

PUBLISHED BY

UNITED STATES DEPARTMENT OF COMMERCE

Subscription price of the SURVEY OF CURRENT BUSINESS is \$1.50 a year; single copies (monthly), 10 cents, semiannual issues, 25 cents. Foreign subscriptions, \$2.25; single copies (monthly issues), including postage, 14 cents; semiannual issues, 36 cents. Subscription price of COMMERCE REPORTS is \$4 a year; with the SURVEY, \$5.50 a year. Make remittances only to Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency at sender's risk. Postage stamps or foreign money not accepted

		Banking, finance, and insurance-----	14	44-46
		Foreign exchange and trade-----	14	46-48

## PRELIMINARY SUMMARY FOR OCTOBER

The volume of commercial transactions during the early weeks of October, as reflected by check payments, was considerably larger than in the corresponding period of 1928. Reports from Detroit indicate lower factory employment in the automotive industry than at this time a year ago. Operations in steel plants during October were lower than in either the preceding month or October of last year. The production of petroleum showed a rather marked decline from the preceding month but was still above the level which prevailed a year ago. The output of bituminous coal was greater than in either the preceding month or October of last year.

New building contracts awarded during the early weeks of the month showed a lower daily average than in either the previous month or the same month of 1928. Wholesale prices, as reflected by the general index, averaged lower than in either the preceding month or the corresponding period of last year, reaching the lowest level so far recorded during 1929.

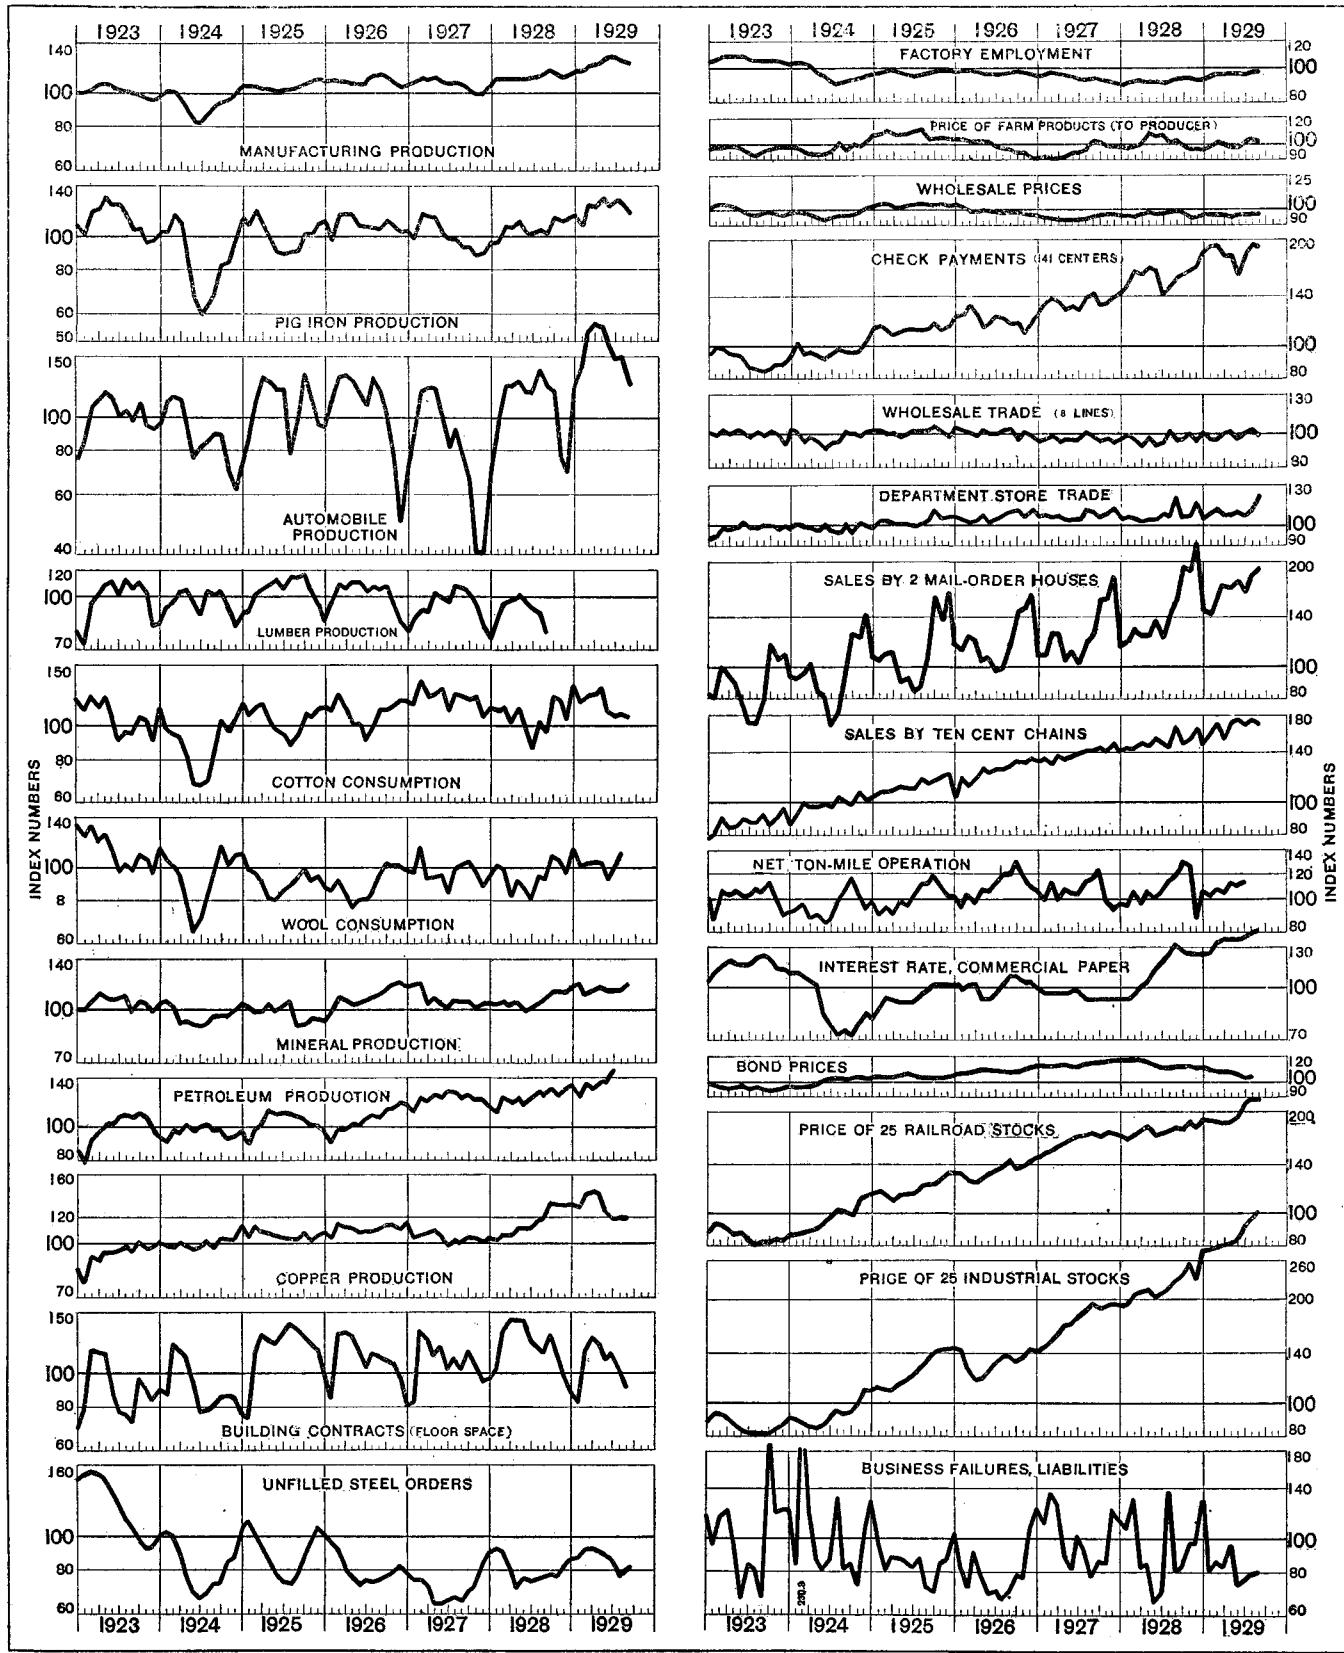

Loans and discounts of Federal reserve member banks continued to show expansion during October, both as compared with the previous months and the corresponding month of 1928. The Federal reserve ratio showed only slight change from the previous month but was higher than at this time last year.

Brokers' loans reached a new high point during October but receded rather sharply toward the close of the month. Stock prices averaged lower than in September but were still well above the level of last year. Interest rates on time funds averaged lower than in September but were higher than a year ago. Call money rates averaged lower than in either period. Bond prices during October showed the first upward movement of the year but were still below the levels of last year.

Business failures reported during the early weeks of the month were fewer in number than in the corresponding period of 1928.

## MONTHLY BUSINESS INDICATORS, 1923-1929

[Ratio charts—see explanations on inside front cover. The curves on check payments, wholesale trade, sales of mail-order houses and 10-cent chains, and department stores have been adjusted for normal seasonal variations, and manufacturing production for the varying number of working days in the month as well]

## MONTHLY BUSINESS INDICATORS

The principal business indicators are shown below, all calculated on a comparable basis, the average for the years 1923 to 1925 inclusive. Thus the table gives a bird's-eye view of the business situation in a concise form, so that trends of the principal indicators may be seen at a glance.

Certain indicators, in which there is a marked seasonal movement, are shown with the average seasonal variations eliminated, as noted below. In this manner a more understanding month-to-month comparison may be made.

\* Seasonal adjustments.

## BUSINESS CONDITIONS IN SEPTEMBER

### PRODUCTION

Industrial output in September as reflected by the general index of the Federal reserve board, after adjustments for seasonal conditions, showed a decline of almost 2 per cent from the previous month but was 6 per cent higher than in September, 1928. The decrease from the previous month in the index was entirely due to lower production of manufactured goods, since minerals, which are included in the index, showed a gain in output after seasonal adjustment over both the previous month and the corresponding period of last year.

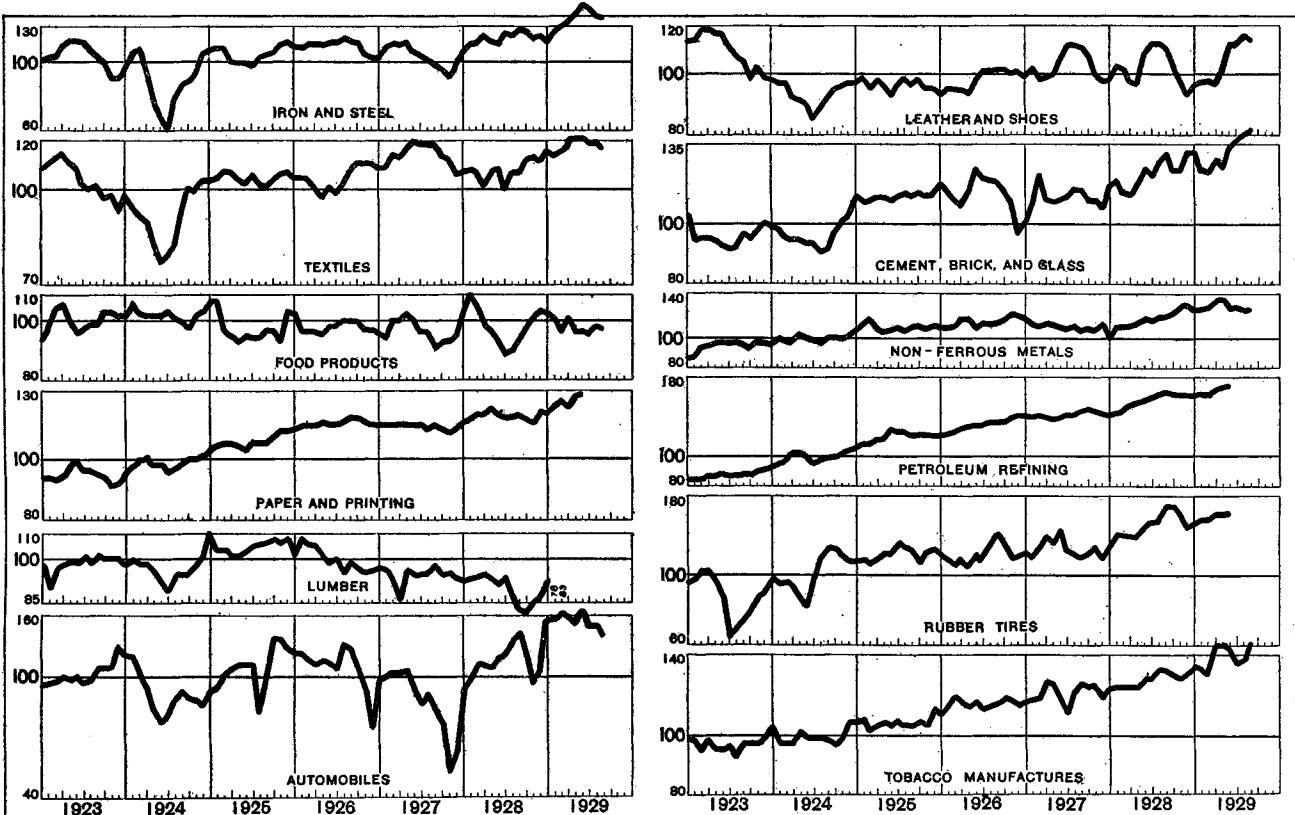

with last year all groups comprised within the general index showed larger forward business, except textiles and lumber, which declined.

Wholesale trade in September, after adjustments for seasonal conditions, showed a larger sales volume than in the same month of last year. Declines from the previous month, however, were general in most lines except meats, which increased over August, and furniture, which showed no change.

Sales by department stores showed a considerable change over the preceding month and were greater than a year ago. The value of merchandise stocks

### MANUFACTURING PRODUCTION BY MAJOR GROUPS

[Relative numbers, monthly average 1923-1925 taken as 100, adjusted for seasonal variations]

### COMMODITY STOCKS

Stocks of commodities held at the end of September showed a gain over a year ago, the principal increase over last year occurring in the holdings of raw materials. Stocks of manufactured goods, though increasing over last year, showed declines in certain important commodities, such as stone, clay and glass products, paper and leather.

### SALES

The general index of unfilled orders for manufactured goods showed no change from the previous month but was higher than a year ago. As compared

held by department stores at the end of September showed a decline from a year ago. Sales by 10-cent chain store systems were lower than a year ago. Other chain stores, including groceries, drugs, and shoes, showed large gains in volume over September, 1928.

Sales of manufactured goods by manufacturers were generally smaller than in the preceding month. New orders for machine tools, structural steel, steel castings, and malleable castings were smaller than in August. New orders received for electric hoists and electric overhead cranes were likewise smaller than in the previous month. New orders for fabricated steel plate and steel boilers, on the other hand, were larger than in August.

### PRICES

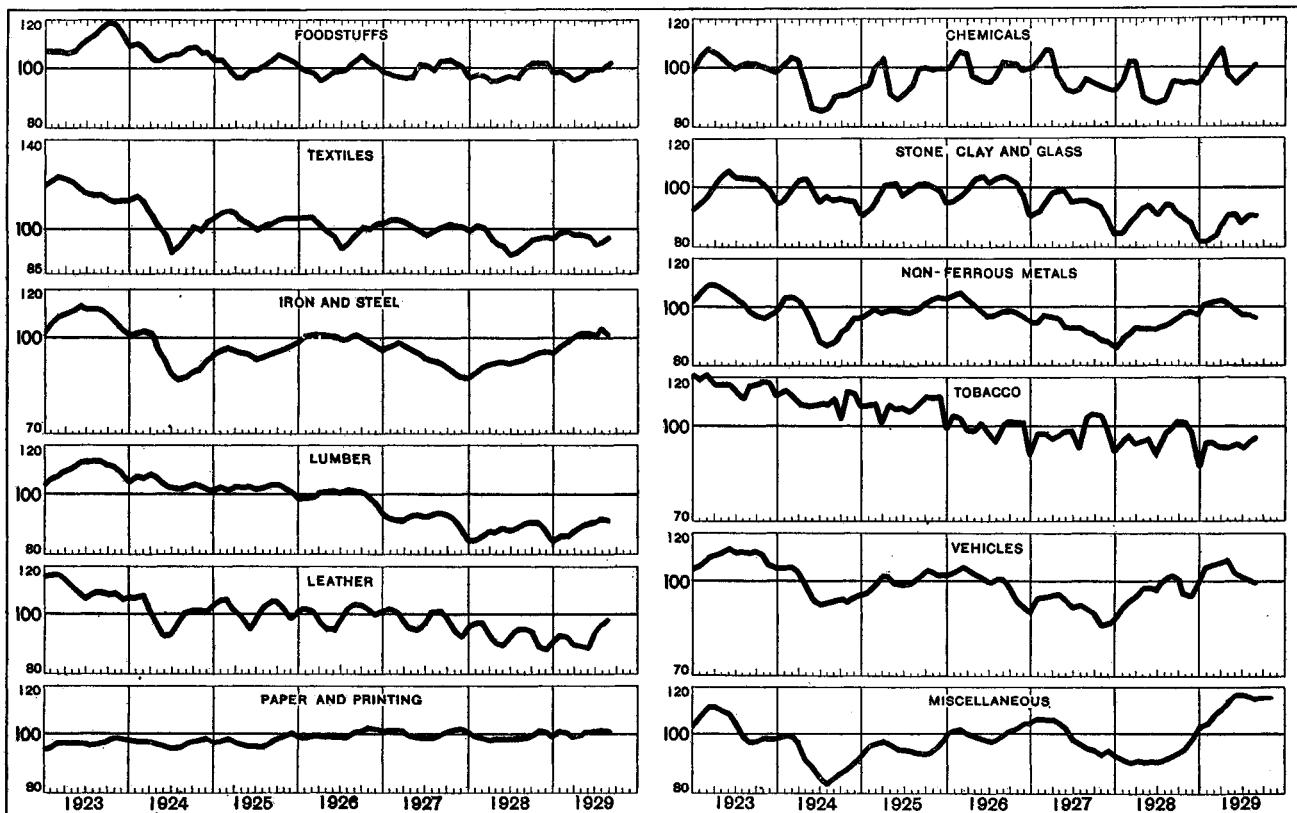

Wholesale prices were generally unchanged from the preceding month, but were 2 per cent lower than in the corresponding period of last year. Higher prices for hides and leather products, building materials, and certain miscellaneous items as compared with the preceding month were just sufficient to offset certain minor declines in other commodities. As compared with last year gains in the prices of metals and metal products, building materials, and certain miscellaneous goods were insufficient to offset declines in foods, farm products, hides and leather products, textiles and fuels. The principal decline from a year ago was registered in the price of hides and leather products, where the decrease amounted to more than 8 per cent.

with the preceding month increases in employment were recorded in factories producing food products, textiles, iron and steel, leather, paper and printing, chemicals, and tobacco products, but increased employment in these groups were balanced by declines in factories producing lumber, nonferrous metals and vehicles, principally automobiles. The greatest gain over the preceding month in employment was registered in chemical factories, where the increase was 4 per cent, while the declines in the enumerated groups were limited to 1 per cent.

As compared with a year ago all industrial groups showed larger employment except stone, clay and glass, tobacco products and vehicles, where declines were registered. The principal gain in employment over

### FACTORY EMPLOYMENT, BY GROUPS

[1926 monthly average=100. September, 1929, is latest month plotted]

Classified by state of manufacture an increase over the preceding month was registered in the price index of semimanufactures amounting to 2 per cent, while nonagricultural commodities showed an advance of 1 per cent. Prices for raw materials and finished manufactured goods were unchanged from the previous month. As compared with last year semimanufactures were higher in price while the remaining groups showed a decline.

### EMPLOYMENT

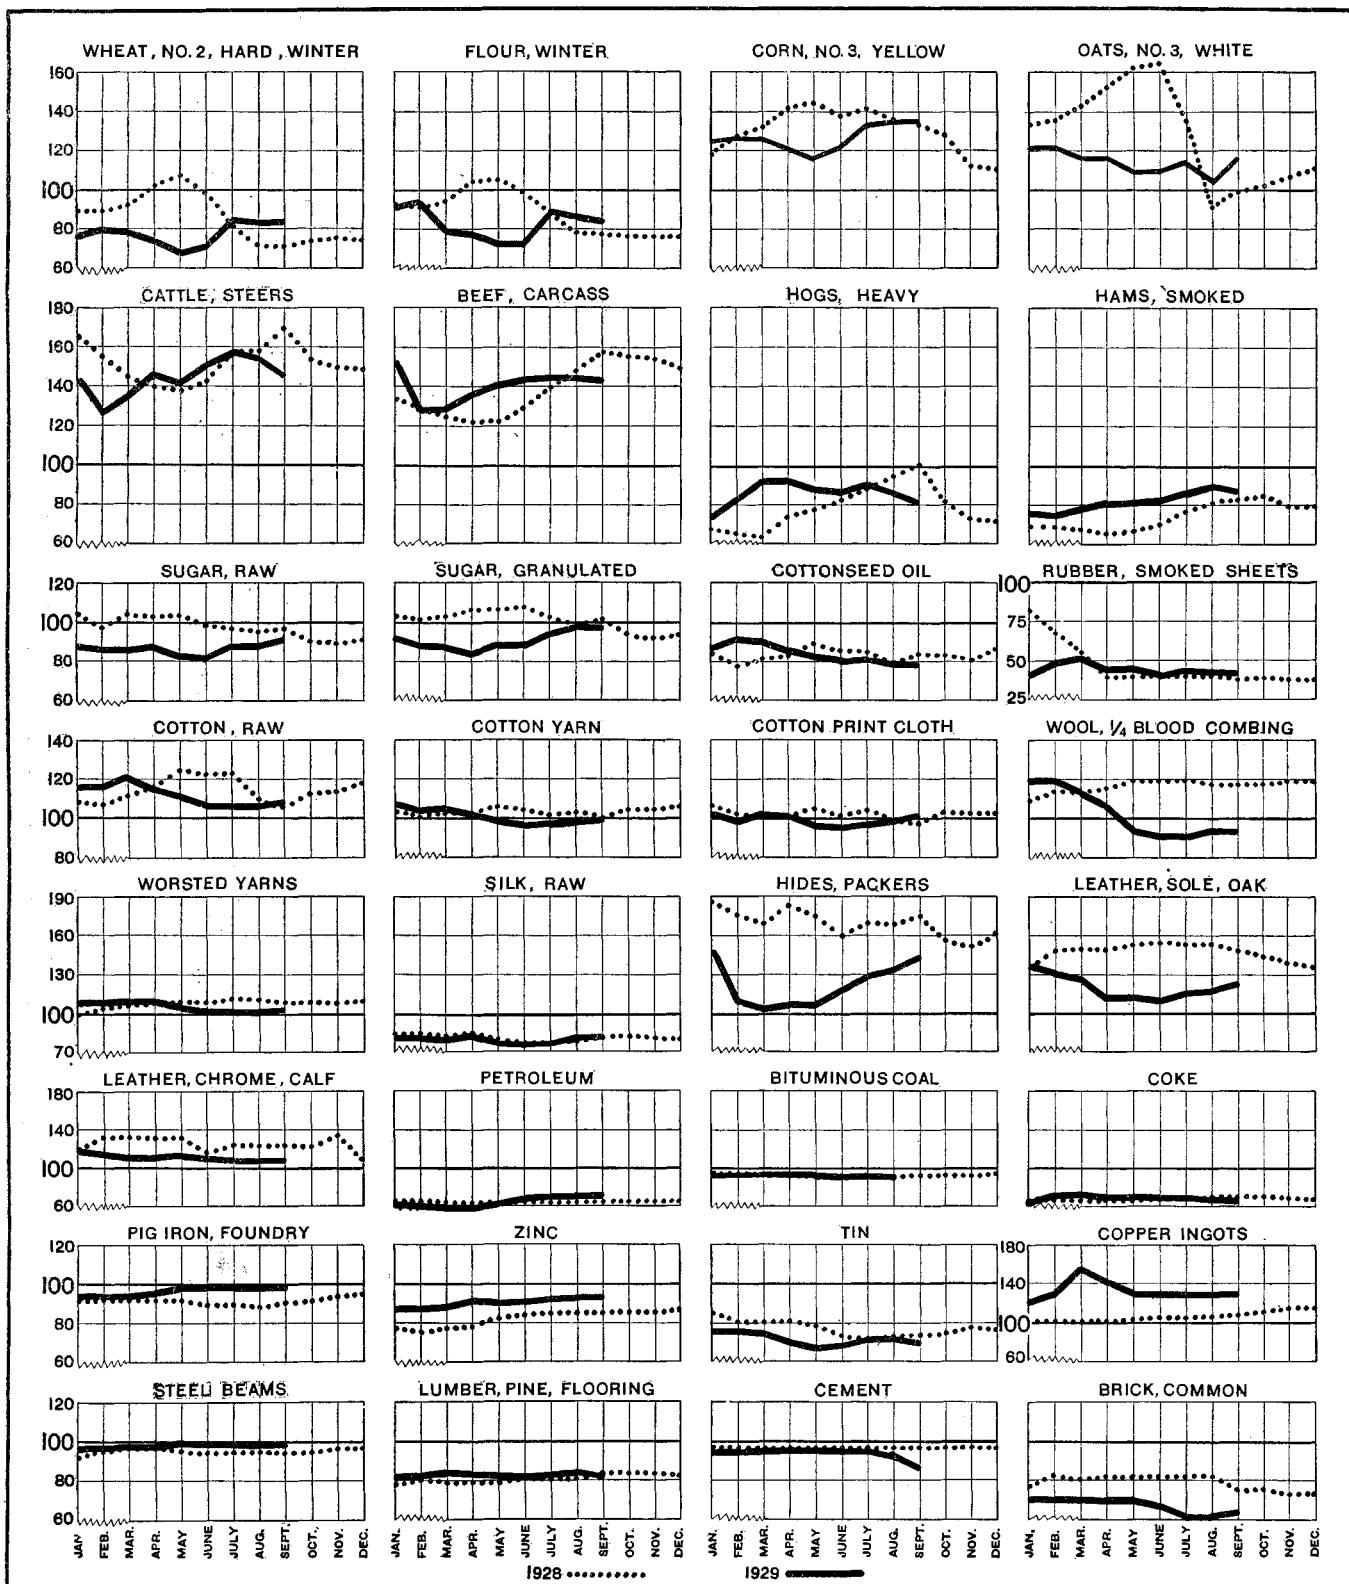

The general index of factory employment showed no change in September from the previous month but was 3 per cent higher than a year ago. As compared

last year was recorded in iron and steel factories, where the increase was almost 8 per cent.

Factory pay-roll payments in September were 1 per cent greater than in the previous month and 8 per cent larger than in September, 1928. Gains in pay-roll payments as compared with the preceding month were registered in factories producing foods, textiles, lumber, paper and printing, chemicals, stone, clay and glass, tobacco products, and certain miscellaneous items, while declines were reported in iron and steel, nonferrous metals and vehicles. As compared with last year all groups showed larger pay-roll payments except stone, clay and glass, which declined 2 per cent.

## WHOLESALE PRICES FOR SPECIFIED COMMODITIES

[Relative numbers, 1926 monthly average taken as 100. September, 1929, is latest month plotted. Data from which these charts are drawn are given on the opposite page]

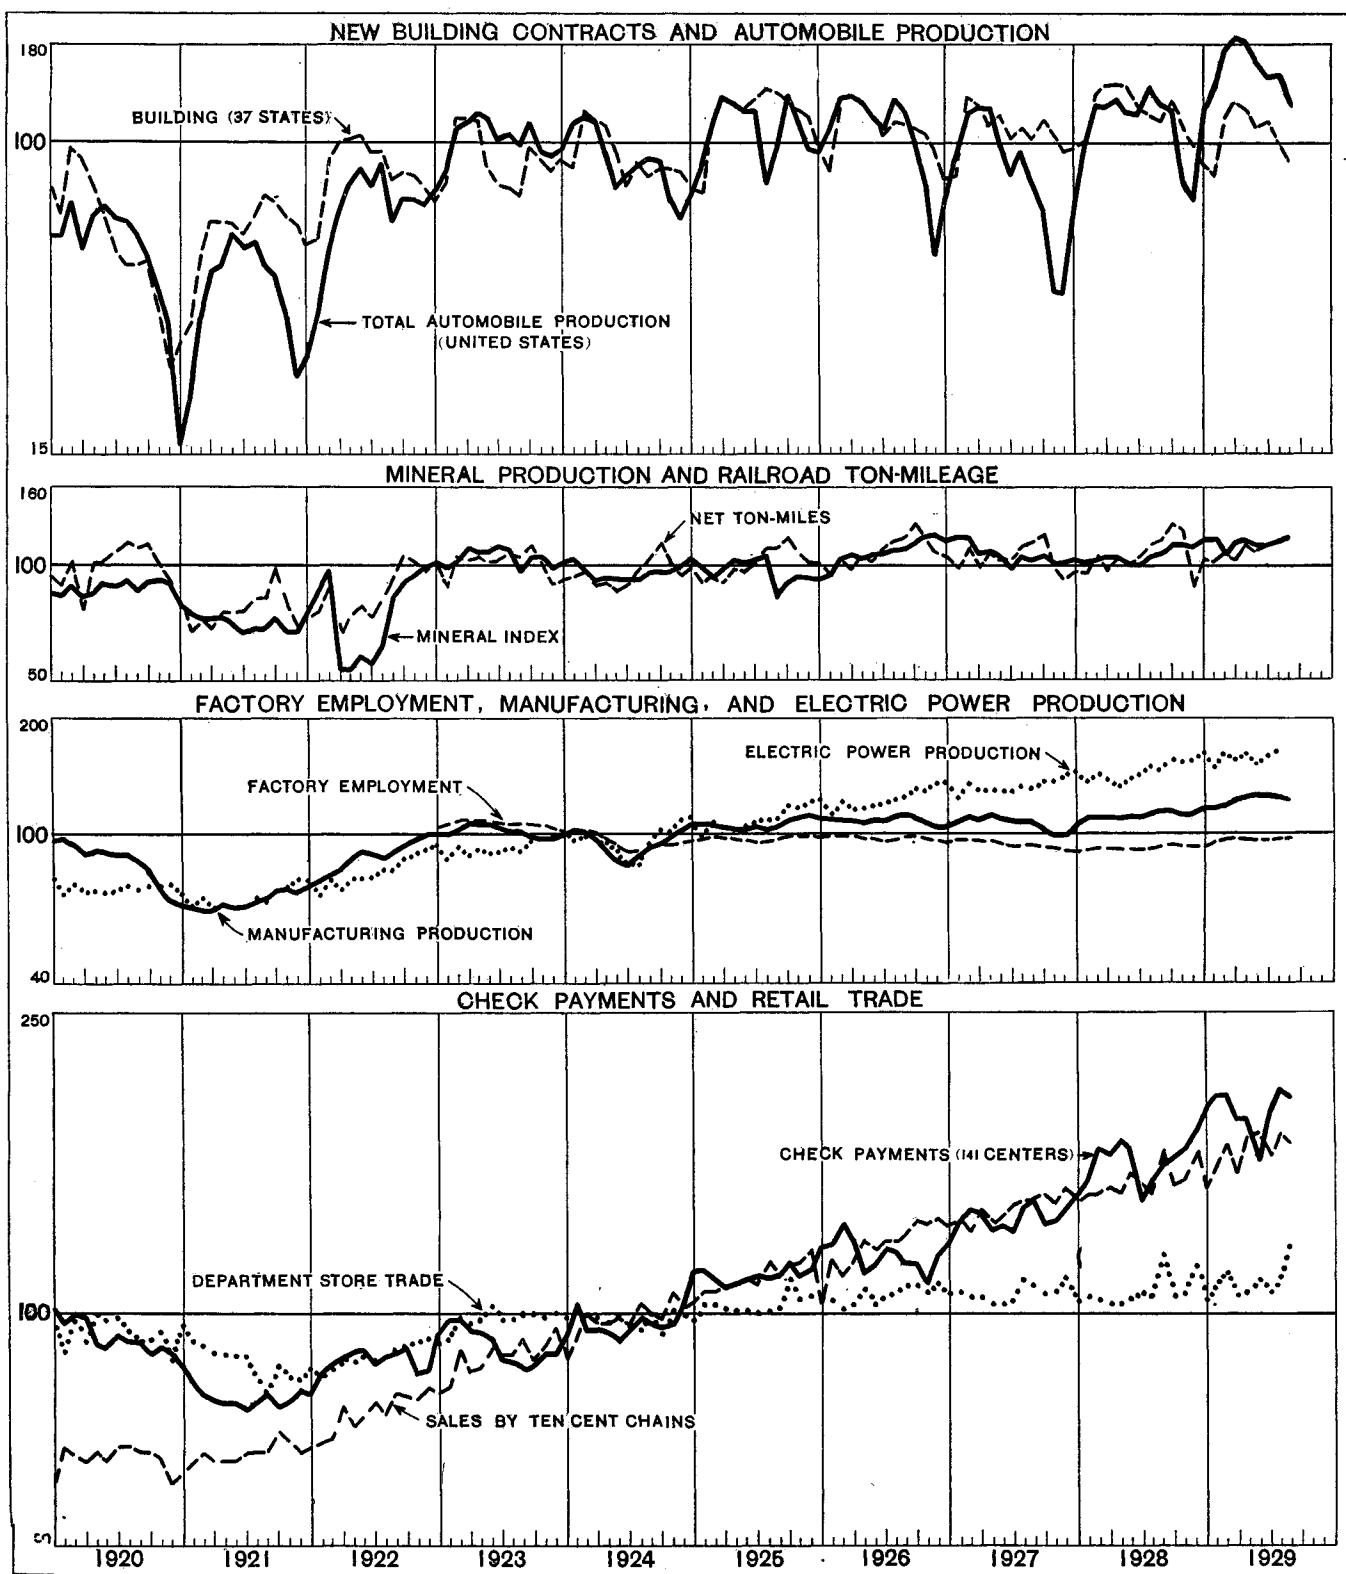

## WHOLESALE PRICES FOR SPECIFIED COMMODITIES

NOTE.—Prices to producer on farm products and market price of wool are from U. S. Department of Agriculture, Bureau of Agriculture Economics, nonferrous metals from the Engineering and Mining Journal-Press, except tin, which is from the American Metal Market. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics. So far as possible all quotations represent prices to producer or at mill.

## MEASURES OF INDUSTRIAL AND COMMERCIAL ACTIVITY

[Relative numbers, monthly average 1923-1925, taken as 100]

## REVIEW OF PRINCIPAL BRANCHES OF INDUSTRY AND COMMERCE

### TEXTILES

Wool imports in September showed gains over both the previous month and the same month of last year. The consumption of wool showed a decline from the previous month but was more than 14 per cent greater than a year ago. For the first nine months of the year wool consumption showed a gain of 13 per cent over the corresponding period of 1928.

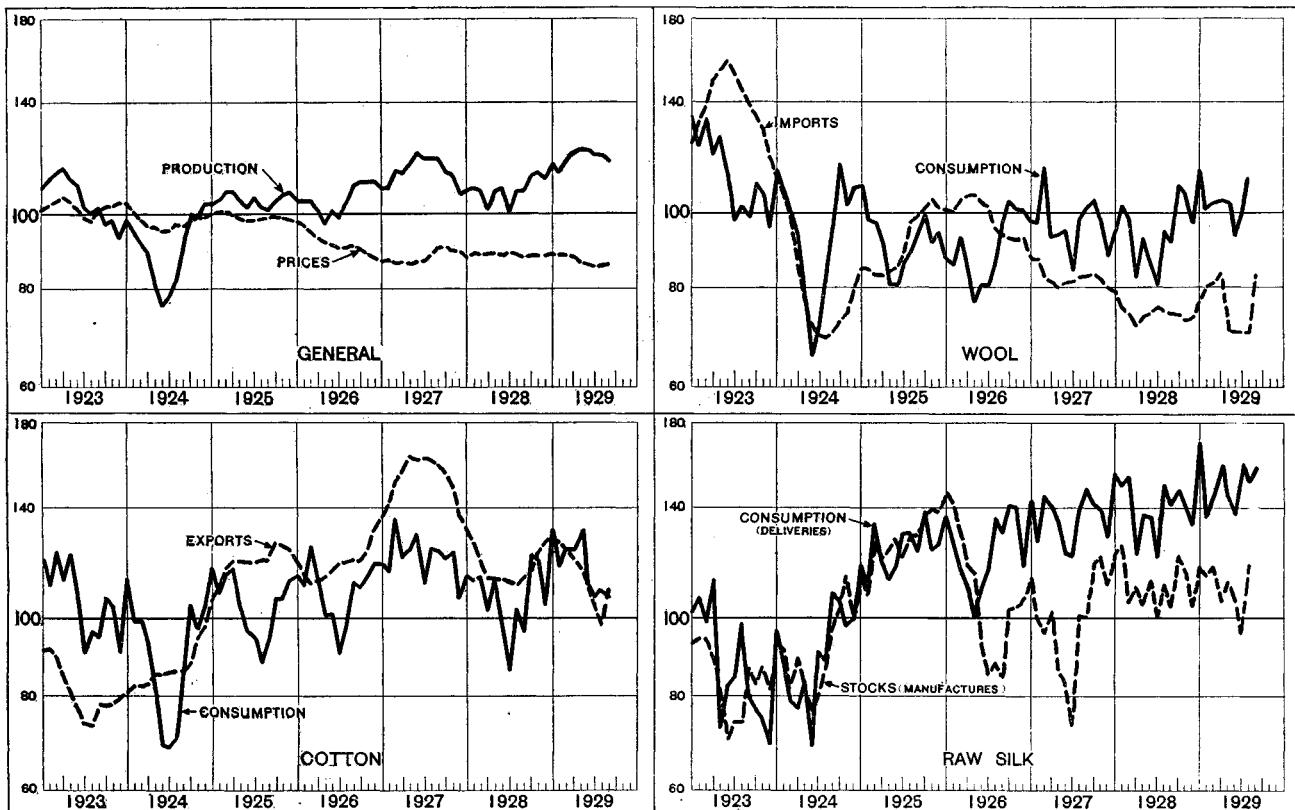

Receipts of cotton into sight for the year to date were 12 per cent larger than in the same period of last year. Cotton exports in September showed a decline of 10 per cent from last year. Cotton consumption by domestic mills showed a gain of 11 per cent over

Silk machinery was generally much more active in September than in the corresponding month of last year. Silk prices averaged higher than in either the preceding month or the same month of 1928. Imports of rayon were greater than in either the preceding month or September a year ago, while for the first nine months of the year, rayon imports showed a gain of 40 per cent over the same period of last year. Rayon prices showed no change from the previous month but were substantially lower than a year ago.

The output of pyroxylin-spread textiles showed a decline in September from both the preceding month

### THE TEXTILE INDUSTRIES

[Relative numbers, monthly average 1923-1925, taken as 100. September, 1929, is latest month plotted. Curves covering imports of wools and exports of cotton are plotted from 12 months' moving monthly average plotted on the end month]

last year, while for the year to date an increase was registered amounting to 13 per cent over the past year. Stocks of cotton held by mills and in public storage at the end of the month were 20 per cent larger than a year ago.

Imports of silk were considerably larger than a year ago. For the year to date silk imports showed an increase of 11 per cent over the corresponding nine months of 1928. Indicated consumption of silk, based upon deliveries to manufacturing establishments, were 12 per cent larger than in September of last year, while for the first nine months the gain amounted to almost 10 per cent over the same period of last year. Silk stocks in warehouses at the end of September were 9 per cent larger than a year ago.

and the same month of last year. For the first nine months of the year, textiles spread with pyroxylin showed a gain of about 1½ per cent over the same period of last year. Unfilled orders for pyroxylin-coated textiles at the end of September were considerably lower than a year ago.

Imports of burlap were lower than in either the preceding month or September a year ago, but for the year to date showed a gain of 11 per cent over the corresponding nine months of last year. Imports of unmanufactured fibers were lower than in August but greater than a year ago, while for the first nine months of the year showed a gain of about 2 per cent over the same period of last year.

### METALS

The output of pig iron in September showed a decline from the previous month but was 13 per cent greater than a year ago. For the first nine months of the year pig-iron production showed a gain of almost 18 per cent over the same period of 1928. Wholesale prices for pig iron showed only slight change from the previous month but were about 5 per cent higher than a year ago.

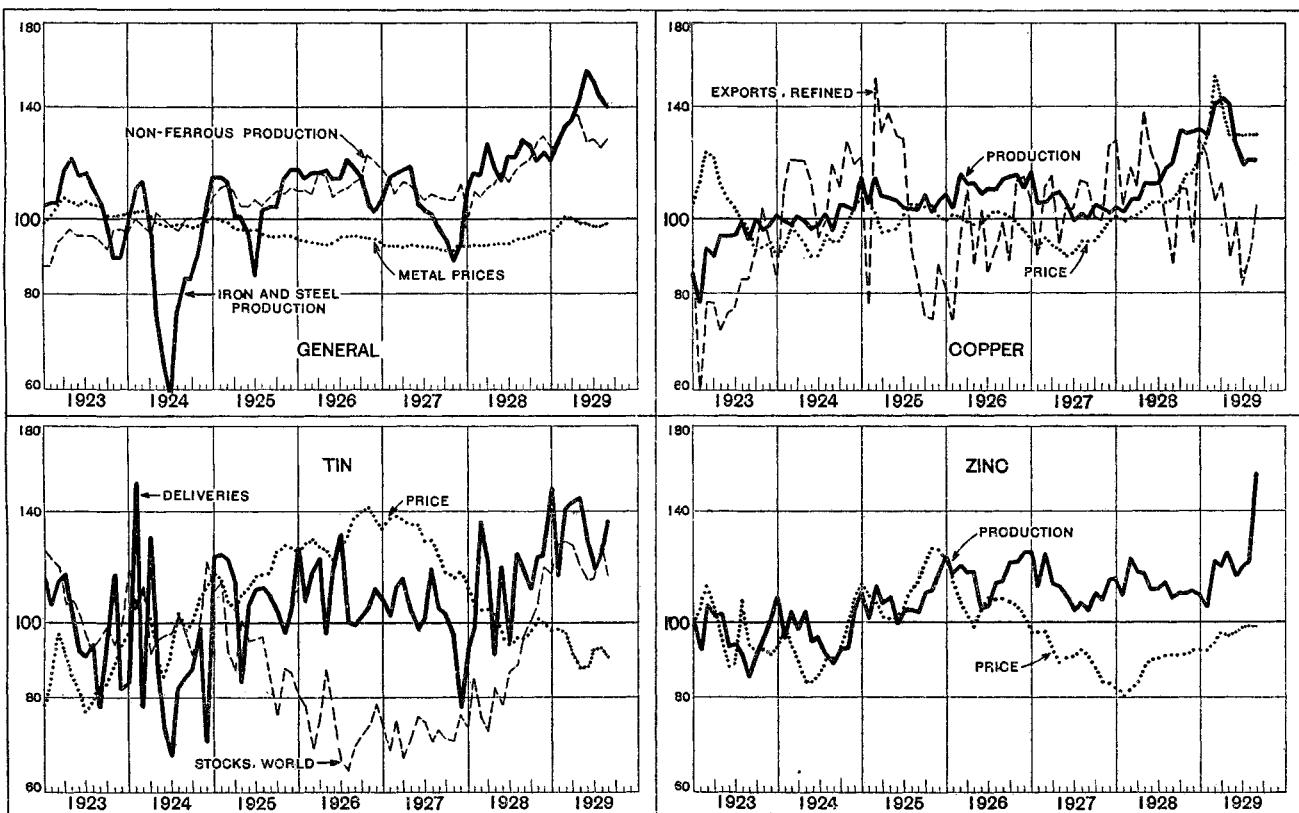

The output of steel ingots also declined from the previous month but was 9 per cent greater than in September, 1928. For the first nine months of the year steel-ingot production showed a gain of 17 per

of the year new orders for structural steel showed a gain of 16 per cent over the same period of last year.

New orders for fabricated steel plate were larger than in either prior comparative periods, while the total for the first nine months also showed a gain over the corresponding period of 1928. The output of track work was smaller than in the previous month but greater than a year ago. New orders for steel boilers in September were larger than in either the previous month or the corresponding period of last year. The production of malleable castings was smaller than in either prior comparative period, with new orders making similar comparisons.

### THE METAL INDUSTRIES

[Relative numbers, monthly average 1923-1925, taken as 100. September, 1929, is latest month plotted]

cent over the same period of last year. Unfilled steel orders at the end of September were greater than at the end of either the previous month or September of last year.

Steel-sheet production by independent steel manufacturers declined from both the previous month and the same month of last year. Steel-sheet output for the first nine months of the year was 9 per cent larger than in the same period of 1928. Steel prices showed a fractional decline from the preceding month but were higher than a year ago.

New orders and production of steel castings were lower than in August but greater than a year ago. Bookings for fabricated structural steel showed declines from both periods. For the first nine months

New orders for machine tools showed a decline from the previous month and from September of last year. New orders for electric hoists and electric overhead cranes also declined from both periods. Domestic shipments of electric industrial trucks and tractors showed gains over both periods, while shipments of motorized fire-extinguishing equipment showed a gain over the previous month and a loss from a year ago.

The output of copper by domestic smelters was greater than in the previous month or September of last year. For the first nine months of the year smelter output was 19 per cent greater than in the same period of last year. Wholesale prices for copper showed no change from the previous month but were higher than a year ago.

## FUELS

Bituminous-coal output was greater than in either the preceding month or September of last year. Prices for bituminous also averaged higher than in either period.

The output of anthracite was greater than in either the preceding month or September, 1928. Anthracite prices were somewhat lower than a year ago. The production of coke was lower than in the preceding month but considerably larger than a year ago.

The output of crude petroleum showed only slight change from the previous month but was greater than a year ago, while the price for petroleum showed no

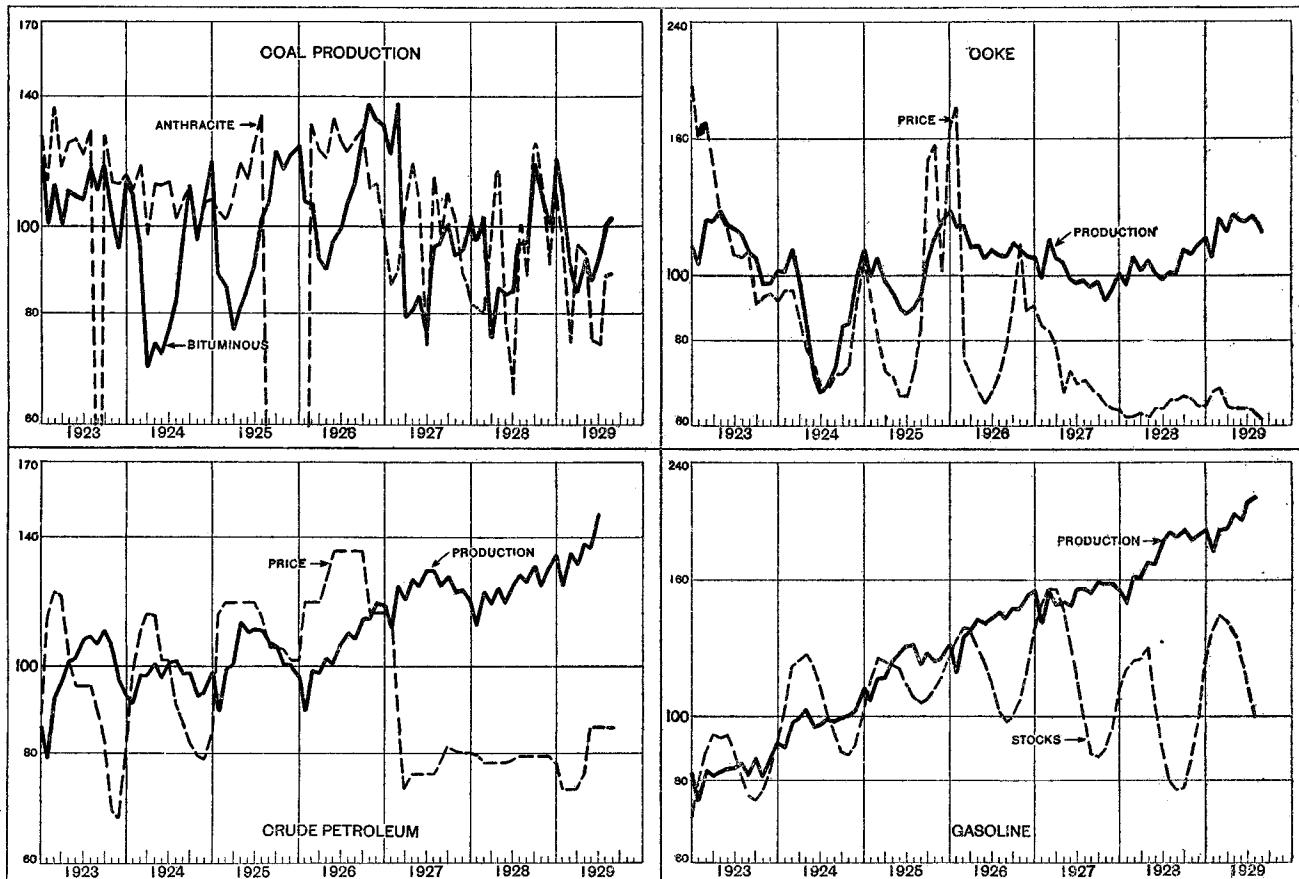

## HIDES AND LEATHER

Imports of hides were larger than in either the previous month or September of last year, but the total movement for the first nine months of the year showed a decline of about 10 per cent from the same period of last year. More animals were slaughtered under Federal inspection than a year ago, but for the first nine months of the year a decline was registered in the slaughtering of animals, except for sheep, which showed a gain over the same period of last year.

The production of sole leather was smaller than in either the previous month or September a year ago, and for the first nine months of the year showed a

## THE FUEL INDUSTRIES

[Relative numbers, monthly average 1923-1925 taken as 100. September, 1929, is latest month plotted where data were available]

change from the previous month and a gain over last year.

## AUTOMOBILES AND RUBBER

The domestic output of automobiles was smaller than in the previous month and showed practically no change from a year ago. For the first nine months of the year, automobile production showed a gain of 34 per cent over the same period of 1928.

Imports of rubber were lower than in August and showed a decline from a year ago also. For the first nine months of the year rubber imports showed an increase of 40 per cent over the same period last year. The output of pneumatic tires in September was

greater than a year ago.

decline of about 12 per cent from the same period of last year. Stocks of sole and belting leather at the end of August were smaller than a year ago. Exports in September showed decline from both the previous month and the same month of last year. Sole leather prices averaged higher than in August but declined from a year ago.

The production of shoes showed a decline from the previous month but was considerably higher than a year ago. For the first nine months of the year shoe production was about 4 per cent greater than in the corresponding period of 1928. Prices for shoes showed practically no change from either the preceding month or the same month of 1928.

### BUILDING AND CONSTRUCTION

The volume of new building contracts awarded during September, measured both in floor space and in value, showed a decline from both the previous month and from September of last year. For the calendar year to date building contracts showed a decrease of almost 12 per cent in value from the same period of last year. The decrease from a year ago was almost entirely due to lower awards for residential construction, where the decline amounted to almost \$600,000,000.

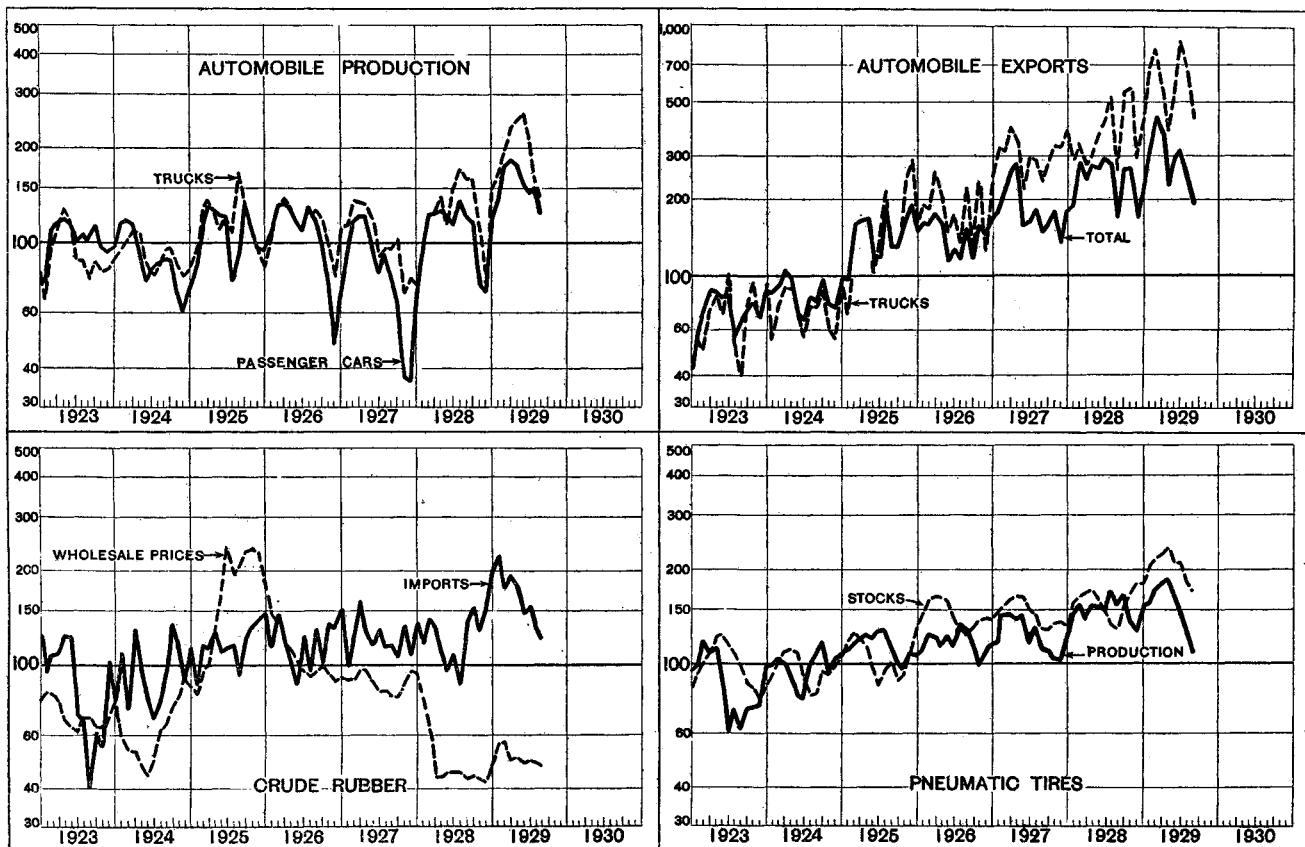

from the same period of last year. Portland cement stocks at the end of the month were 3 per cent larger than a year ago. Wholesale prices for cement averaged lower in September than in either the preceding month or the corresponding month of last year.

New contracts let for concrete pavements showed declines from both the previous month and September of 1928. For the calendar year to date new concrete paving contracts were about 9 per cent smaller than in the same period of the preceding year. At the end of September Federal-aid highways under construction meas-

### THE AUTOMOBILE AND RUBBER INDUSTRIES

[Relative numbers, monthly average 1923-1925 taken as 100.

Where available, September, 1929, is latest month plotted]

### LUMBER AND LUMBER PRODUCTS

The output of the principal types of lumber showed declines from both the preceding month and the corresponding month of last year. The production of maple flooring showed a gain over the previous month but declined from a year ago. Oak flooring output showed a decline from both the preceding month and from September of last year. For the year to date the output of lumber and flooring showed sizeable declines from the corresponding period of last year.

### STONE, CLAY, AND GLASS

The production of Portland cement showed a decline from both the preceding month and September of last year. For the first nine months of the year cement output showed a decline of about 2 per cent

ured in mileage, showed a decline from both the previous month and the corresponding month of last year.

The shipments of porcelain plumbing fixtures during September were lower than in either the previous month or the same month of last year. For the calendar year to date porcelain plumbing fixtures showed a decline of 34 per cent in shipments from the corresponding period of 1928. Shipments of vitreous china plumbing fixtures also declined from August but were larger than a year ago, while for the first nine months of the year a decline was registered from the same period of last year amounting to more than 4 per cent. New orders for terra cotta showed declines from both the preceding month and the same month of last year. Illuminating glassware was produced in larger volume than in either the previous month or the same month of last year.

### FOODSTUFFS AND TOBACCO

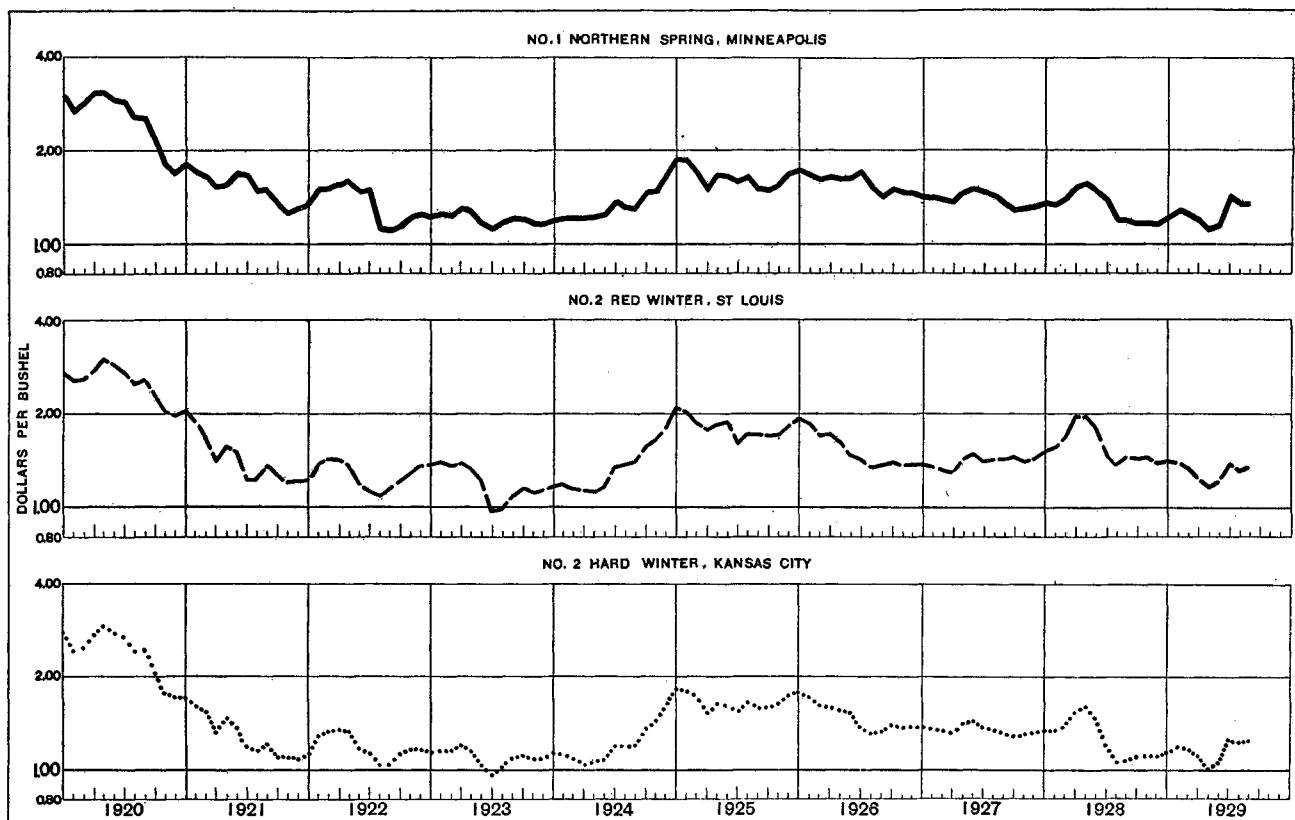

The visible supply of wheat in the United States and Canada at the end of September was considerably greater than a year ago. Receipts and shipments of wheat at the principal domestic markets were lower than a year ago. Wheat exports also declined from last year but for the first nine months of the year showed a gain of 15 per cent over the same period of last year.

The visible supply of corn at the end of September was 35 per cent smaller than a year ago. Receipts and shipments of corn at principal primary markets were

Receipts and shipments of hogs at primary markets were larger in September than a year ago. The output of pork products under Federal inspection showed a decline from the previous month but was substantially greater than a year ago. Exports of pork products, though declining from the preceding month, were 29 per cent greater than a year ago, while the total for the first nine months showed a gain of 8 per cent over the same period of last year. Cold-storage holdings of pork products at the end of the month were smaller than than a year ago. Prices for hogs were generally lower in either the previous month or September of last year.

### MOVEMENT OF WHEAT PRICES

[Weighted price per bushel. September, 1929, is latest month plotted]

likewise smaller than a year ago. Prices for corn averaged higher than in either the previous month or September of last year.

Receipts and shipments of cattle at primary markets were lower than a year ago. The output of beef products under Federal inspection showed smaller gains in September as compared with the previous month and September of last year. Beef exports, though declining from the previous month, were almost twice as large as a year ago. Cold-storage holdings of beef at the end of the month were 52 per cent larger than a year ago. Prices for cattle and beef averaged lower than in either the preceding month or September of last year.

The receipts of butter at primary markets were lower than in either the preceding month or September of last year, but for the first nine months of the year butter receipts showed a gain of about 4 per cent over the same period of last year. Storage holdings of butter at the end of the month were substantially larger than a year ago. Butter prices averaged higher than in the previous month but were lower than last year. The receipts of cheese were lower than in either the previous month or September a year ago. For the first nine months of the year cheese receipts showed a decline of 7 per cent from the same period of last year. The wholesale price of cheese averaged higher than in August but was lower than a year ago.

### TRANSPORTATION

The movement of goods by rail, as reflected by data on car loadings, showed a decline from the preceding month and an increase over September of last year. For the year to date freight-car loadings were 4 per cent larger than in the corresponding period of 1928. Shipments of locomotives by manufacturers were almost twice as large as in September of last year.

### DISTRIBUTION MOVEMENT

Sales by mail-order houses were larger than in either the previous month or the corresponding month of last year. For the first nine months of the year mail-order systems showed a gain of 30 per cent and

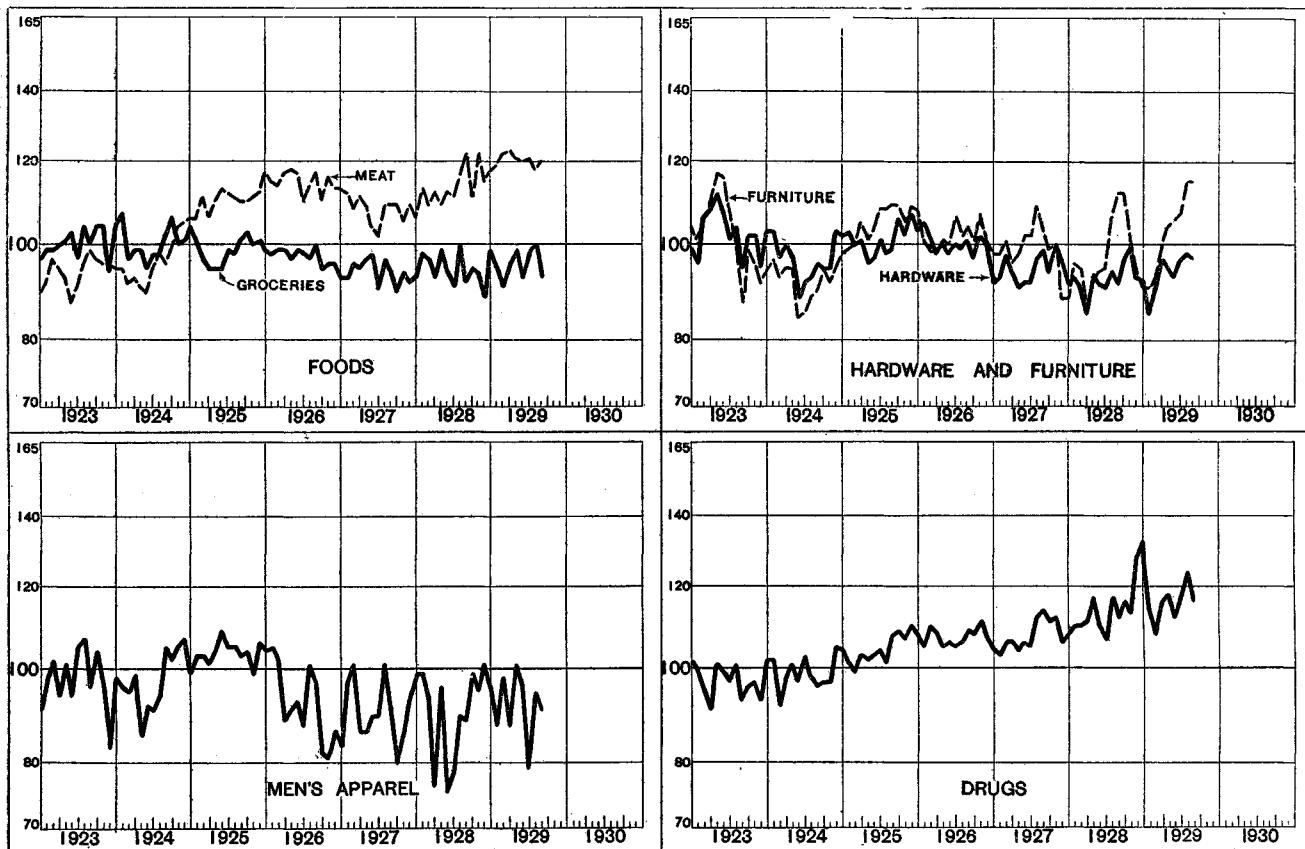

New sales of ordinary life insurance showed a substantial gain over last year. Prices for stocks averaged higher than in either the preceding month or September a year ago. Bond prices averaged lower than in either period. Business failures were fewer in number than in either the preceding month or the same period of last year. Defaulted liabilities of failing business firms during the first nine months of the year showed a decline of 11 per cent from the same period of last year.

### GOLD, SILVER, AND FOREIGN EXCHANGE

The receipts of gold at the mint were lower than in either the previous month or September a year ago.

### WHOLESALE TRADE

[Relative numbers, monthly average 1923-1925 taken as 100. September, 1929, is latest month plotted. Curves are adjusted for seasonal variation]

chain 10-cent stores 8 per cent over the corresponding period of 1928.

### BANKING AND FINANCE

Bills discounted by Federal reserve banks showed a further decline from the preceding month and were lower also than a year ago. Loans and discounts of Federal reserve member banks showed gains over both periods. Check payments showed substantial gains over last year. Brokers' loans reached another new high level during the month. Interest rates on time funds showed practically no change from the previous month but were higher than a year ago.

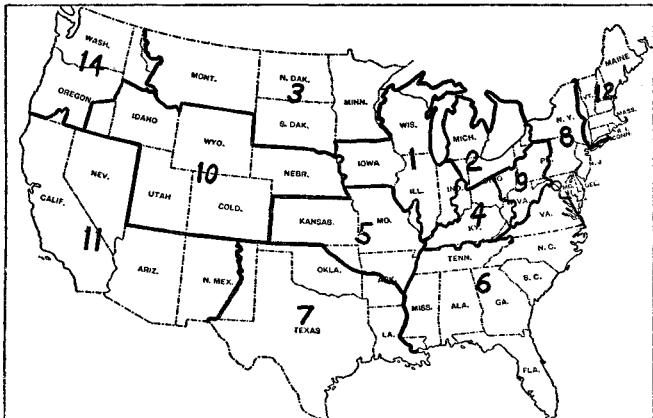

Gold imports continued to exceed the export movement. The output of silver was larger than a year ago but showed a decline from the previous month. Silver prices were lower than in either period.

Exchange upon the principal foreign currencies showed only slight changes from either the preceding month or September a year ago. As compared with August, increases were registered in the Swiss franc and Japanese yen, while declines were registered in the Canadian dollar and the Argentine peso. Contrasted with a year ago, an increase was registered in September in the Japanese yen, while declines were reported in the Indian rupee, the Canadian dollar, and the Argentine peso.

## PROSPECTIVE CARLOADINGS FOR THE FOURTH QUARTER OF 1929

The regional advisory boards set up by the American Railway Association estimate freight-car loadings for

### REGIONAL ADVISORY BOARD DISTRICTS

the last quarter of 1929 at somewhat more than 2 per cent larger than actual loadings reported for the corresponding period of 1928.

Estimated loadings of all commodities will be greater than a year ago except grains, hay, citrus fruits, other fresh fruits, potatoes, fresh vegetables, livestock, poultry and dairy products, stone, sand and gravel, salt, lumber and fertilizers, which, it is estimated, will show declines.

The anticipated loadings in all districts are expected to be higher than a year ago except in the Great Lakes, Northwestern, and the Pacific northwest districts, where declines are expected. Of the anticipated increases, the largest gains are estimated for the New England and Allegheny and Ohio Valley districts, where increases of 5 per cent or more are expected.

The expected increases in the New England district are general in all types of commodities, while for the Allegheny district all important commodity classes showed gains except citrus and other fresh fruits, which declined. For the Ohio Valley district, expected gains are general, except for livestock, lumber and forest products, where declines are anticipated.

### PROSPECTIVE CAR LOADINGS, FOURTH QUARTER OF 1929

#### COMPARED WITH ACTUAL LOADINGS, SAME QUARTER OF 1928

[As reported by commodity committees, of the regional shippers' advisory boards, and compiled by The American Railway Association]

## INDEXES OF BUSINESS

The index numbers presented in this table are designed to show the trend in production, prices, trade, etc., by commodities or groups. They consist in general of weighted combinations of series of individual relative numbers; often the individual relative numbers are also given. The function of index and relative numbers is explained on the inside front cover. All of the index numbers, except where noted, are based on the average of the years 1923 to 1925, while maxima and minima are given only since 1923, thus eliminating the abnormal period prior to 1923. Complete descriptions and figures for earlier years may be found in the following issues of the Survey (later data being available in the latest semiannual issues): Production in the July, 1928, issue (No. 83), pages 18 to 22; stocks in the August, 1928, issue (No. 84), pages 20 to 22; new orders in the September, 1928, issue (No. 85), page 19; unfilled orders in the January, 1928, issue (No. 77), pages 22 and 23; wholesale trade in the January, 1928, issue (No. 77), page 21; mail-order and chain stores in the May, 1928, issue (No. 81), pages 20 and 21; department stores in the April, 1928, issue (No. 80), pages 20 and 21; employment, based on 1923 as 100, in the August, 1928, issue (No. 84), page 108; farm prices in the August, 1928, issue (No. 84), page 27; wholesale prices (Department of Labor) in the November, 1927, issue (No. 75), page 24, and the June, 1928, issue (No. 82), page 23; wholesale prices, commercial, in the August, 1928, issue (No. 84), page 26; cost of living in the August, 1928, issue (No. 84), page 27, and the June, 1926, issue (No. 58), page 24.

Relative to 1923-1925 monthly average as 100	Maximum since Jan. 1, 1923	Minimum since Jan. 1, 1923	1928			1929			Per cent increase (+) or decrease (-)											
			July	August	September	July	August	September	September, 1929, from August, 1929	September, 1929, from September, 1928										
<b>PRODUCTION</b>

## TREND OF BUSINESS MOVEMENTS

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. These data represent continuations of the figures presented in the latest semiannual number (August, 1929), in which monthly figures for 1928 and 1929 may be found, together with explanations as to the sources and exact extent of the figures quoted. The figures given below should always be read in connection with those explanations. Data on stocks, unfilled orders, etc., are given as of the end of the month referred to. For explanations of relative numbers, including base periods, see introduction on inside front cover.

	1929					1928		PER CENT INCREASE (+) OR DECREASE (-)		CUMULATIVE TOTAL FROM JAN. 1 THROUGH SEPT. 30		Per cent increase (+) or decrease (-) cumulative 1929 from 1928

# PUBLICATIONS OF THE DEPARTMENT OF COMMERCE

Recent publications of the Department of Commerce having the most direct interest to readers of the *Survey of Current Business* are listed below. A complete list may be obtained by addressing the Division of Publications, Department of Commerce, at Washington. Copies of the publications may be purchased from the Superintendent of Documents, Government Printing Office, Washington, at the prices stated. If no price is mentioned, the publication is distributed free.

## OFFICE OF THE SECRETARY

**Air Commerce Bulletin.** September 15, 1929.—15 pages, 2 illus. Issued semimonthly by the Aeronautics Branch of the Department of Commerce and contains short articles on aviation developments; also contains a list of air transport routes.

Same, October 1, 1929. 27 pages.

Same, October 15, 1929. 32 pages.

**Air Marking.**—Aeronautics Bulletin No. 4; ii+13 pages, 10 illus. Description of the system recommended by the Department of Commerce for marking aviation landing fields, airports, and direction indicators on roofs of buildings.

**Airports and Landing Fields.**—Aeronautics Bulletin No. 5 (formerly Information Bulletin No. 5), 12 pages. Shows all airports and landing fields in the United States, the lists being arranged alphabetically by place and State. The classification of the fields is also indicated.

**Air Commerce Regulations.**—Aeronautics Bulletin No. 7, ii+30 pages, 1 illus. Gives the regulations governing licensing, inspection, and operation of aircraft, licensing of pilots and mechanics, and rules for air traffic.

**Airport Management.**—Aeronautics Bulletin No. 17, ii+19 pages, 1 illus. Outlines fundamentals necessary in management of airports. An appendix contains rates charged for hangar service at various municipal airports.

**Suggested City or County Aeronautics Ordinance and Uniform Field Rules for Airports.**—Aeronautics Bulletin No. 20, ii+10 pages.

**Radio Service Bulletin.** August, 1929.—20 pages. Issued monthly by Radio Division of Department of Commerce. Contains list of radio stations and references to current radio literature. Single copy, 5¢; annual subscription, 25¢.

Same, September, 1929. 15 pages.

## BUREAU OF THE CENSUS

[For information concerning the plan of publication and distribution of Census reports, address the Director of the Census.]

**Birth, Stillbirth, and Infant Mortality Statistics, 1926: Part II, Text and Text Tables.**—Gives an analysis of statistics regarding births and infant mortality in United States during 1926. Paper, 78 pages, 6 illus, price 15¢.

**Forest Products, 1927: Crossties and Poles Purchased and Preserved.**—Compiled in cooperation with Department of Agriculture, Forest Service. Contains tables showing purchases of crossties and poles by railroads and purchases of poles by light, power, telephone, and telegraph companies. Paper, 10 pages, price 5¢.

**Manufacture and Sale of Farm Equipment, 1928.**—Contains tables showing kinds and amount of farm equipment manufactured and sold in United States during 1928. Paper, 16 pages, price 5¢.

**Mortality Statistics, 1926: Part II, Text and Text Tables.**—Contains tables with explanatory text regarding deaths and their causes in United States during 1926. Paper, 158 pages, 2 illus, 13 diagrams, price 25¢.

**Financial Statistics of Cities Having a Population of Over 30,000, 1927.**—Presents data showing financial transactions during fiscal year 1927 of 250 cities in continental United States and city and county of Honolulu, Hawaii. Cloth, 503 pages, price \$1.25.

**Census of Manufactures, 1927.**—Reports giving detailed information for various industries, by States:

Brooms and Brushes. Paper, 7 pages, price 5¢.

Canning and Preserving. Paper, 23 pages, price 5¢.

Embroideries, Trimmings and Lace-Trimmed Articles. Paper, 10 pages, price 5¢.

Fertilizers. Paper, 10 pages, price 5¢.

Glass and Mirrors. Paper, 10 pages, price 5¢.

Lime and Marble, Granite, Slate, and Other Stone Products. Paper, 12 pages, price 5¢.

Paper: Pulp; Pulpwood Consumption and Wood-Pulp Production. Paper, 24 pages, price 5¢.

Principal Lumber Industries. Paper, 57 pages, 3 illus. Price 10¢.

Sewing Machines, Cases, and Attachments; Washing Machines, Wringers, Driers, and Ironing Machines for Domestic Use. Paper, 9 pages, price 5¢.

Slaughtering and Meat Packing. Paper, 29 pages, price 5¢.

Soap. Paper, 6 pages, price 5¢.

Sugar Industries and Corn Syrup, Corn Oil, and Starch. Paper, 19 pages, price 5¢.

Textile Machinery and Parts. Paper, 7 pages, price 5¢.  
Tin Cans and Other Tinware. Paper, 6 pages, price 5¢.  
Wall Plaster, Wall Board, and Floor Composition. Paper, 7 pages, price 5¢.  
Wood Manufactures and Allied Industries. Paper, 53 pages, price 10¢.

## BUREAU OF FOREIGN AND DOMESTIC COMMERCE

[The publications of this bureau may also be purchased from the bureau or its district offices]

**Monthly Summary of Foreign Commerce of United States, August, 1929.**—Parts I and II. Part I contains statistics of exports of domestic merchandise, and imports by articles for August, 1928 and 1929, and for eight months ended August, 1928 and 1929. Part II contains summaries of export and import trade, monthly average import and export prices, and statistics of trade with Alaska, Hawaii, and Porto Rico. Single copies, Part I, 10¢; Part II 5¢. Annual subscription, \$1.25.

**Latin American Financial Developments in 1928.**—Trade Information Bulletin No. 657; ii+23 pages. Price, 10¢.

**Automotive Market in Argentina.** by Howard H. Tewksbury, American trade commissioner.—Trade Promotion Series No. 84; iv+106 pages, 11 illus. Discussion of commercial and industrial characteristics of Argentina, the road system, number of motor vehicles in use, and method of financing sales of these products. Price, 20¢.

## BUREAU OF STANDARDS

**Chocks for Ships: Plain Chocks, Open and Closed Roller Chocks, Open and Closed Open Chocks with Center Pillar.** compiled and promulgated by American Marine Standards Committee. American Marine Standards H No. 42-1929 to H No. 50-1929, inclusive, ii+14 pages, 11 illus. Price, 10¢.

**Bureau of Standards Journal of Research, October, 1929.**—Pages 507-618, illus., plates, charts. Contains papers formerly issued as Scientific and Technologic Papers series, which have been discontinued. Articles in journal are known as Research Papers series and are issued separately after publication in journal. Single copies, 40¢; annual subscription, \$2.75.

**Course-shift Indicator for Double-modulation Type Radio-beacon.** by H. Diamond and F. W. Dunmore.—Research Paper No. 77. Reprint from Bureau of Standards Journal of Research, vol. 3, July, 1929, pp. 1-10, 5 illus., 1 plate. Description of instrument used to indicate to a radio operator course as laid out in space during time of operation of station and as check on beacon calibration. Price, 5¢.

## BUREAU OF MINES

**Coal-washing Investigations: Methods and Tests.** by H. F. Yancey and Thomas Fraser.—Bulletin 300; viii+259 pages, 11 illus., 3 plates, 35 charts. Report on an investigation into factors affecting washability of coal and processes used, with a classification of coals by forms of impurities. Price, 50¢.

## BUREAU OF FISHERIES

**Salmon-tagging Experiments in Alaska, 1927 and 1928.** by Willis H. Rich and Frederick G. Morton.—Document No. 1057. (From Bulletin of Bureau of Fisheries, vol. XLV, 1929, pp. 1-23, 2 illus.) Price, 10¢.

**Fishing grounds of Gulf of Maine.** by Walter H. Rich.—Document No. 1059. (Appendix III to Report of U. S. Commissioner of Fisheries for 1929, pp. 51-117, 5 maps.) Description of fishing grounds off coast of Maine and kinds of fish found there. Price, 25¢.

## COAST AND GEODETIC SURVEY

**Tide Tables, United States and Foreign Ports for Year 1930.**—Serial No. 439; 479 pages. Contains tables showing rise and fall of tide for every day of year at important ports of world. It also gives time of rising and setting of sun and moon in various parts of world. Price, 75¢.

# CHIEF FUNCTIONS OF THE DEPARTMENT OF COMMERCE

R. P. LAMONT, Secretary of Commerce

JULIUS KLEIN, Assistant Secretary of Commerce.

EPHRAIM F. MORGAN, Solicitor

## AERONAUTICS BRANCH

WILLIAM P. MACCRACKEN, Jr., Assistant Secretary of Commerce  
for Aeronautics

Establishment of civil airways and maintenance of aids to air navigation; inspection and registration of aircraft and licensing of pilots; enforcement of air traffic rules; investigation of accidents; encouragement of municipal air ports; fostering of air commerce; scientific research in aeronautics; and dissemination of information relating to commercial aeronautics. (Some of these functions are performed by special divisions of the Lighthouse Service, the Bureau of Standards, and the Coast and Geodetic Survey.)

## BUREAU OF THE CENSUS

WILLIAM M. STEUART, Director

Taking censuses of population, mines and quarries, water transportation, and religious bodies every 10 years; censuses of agriculture and electrical public utilities every 5 years; and a census of manufactures every 2 years.

Compilation of statistics of wealth, public debt and taxation, including financial statistics of local governments, every 10 years; annual compilation of financial statistics of State and municipal governments.

Compilation of statistics of marriage, divorce, births, deaths, and penal and other institutions annually, and of death rates in cities and automobile accidents weekly.

Compilation quarterly or monthly, of statistics on cotton, wool, leather, and other industries; annually of forest products; and publication monthly of Survey of Current Business.

## BUREAU OF FOREIGN AND DOMESTIC COMMERCE

WILLIAM L. COOPER, Director

The collection of timely information concerning world market conditions and openings for American products in foreign countries, through commercial attachés, trade commissioners, and consular officers, and its distribution through weekly Commerce Reports, bulletins, confidential circulars, the news and trade press, and district and cooperative officers in 65 cities.

The maintenance of commodity, technical, and regional divisions to afford special service to American exporters and manufacturers.

The compilation and distribution of lists of possible buyers and agents for American products in all parts of the world and publication of weekly lists of specific sales opportunities abroad.

The publicity of statistics on imports and exports.

The study of the processes of domestic trade and commerce

## BUREAU OF STANDARDS

GEORGE K. BURGESS, Director

Custody, development, and construction of standards of measurement, quality, performance, or practice; comparison of standards used by scientific or other institutions; determination of physical constants and properties of materials; researches and tests on materials and processes; and publication of scientific and technical bulletins reporting results of researches and fundamental technical data.

Preparation of specifications for Government purchases, through the Federal Specifications Board.

Collection and dissemination of information concerning building codes and the planning and construction of houses.

Establishment of simplified commercial practices through cooperation with business organizations in order to reduce the wastes resulting from excessive variety in commodities.

## BUREAU OF MINES

SCOTT TURNER, Director

Technical investigations in the mining, preparation, and utilization of minerals, including the study of mine hazards and safety methods and of improved methods in the production and use of minerals.

Testing of Government fuels and management of the Government Fuel Yard at Washington.

Research on helium and operation of plants producing it. Studies in the economics and marketing of minerals and collection of statistics on mineral resources and mine accidents.

The dissemination of results of technical and economic researches in bulletins, technical papers, mineral resources series, miners' circulars, and miscellaneous publications.

## BUREAU OF FISHERIES

HENRY O'MALLEY, Commissioner

The propagation and distribution of food fish and shellfish, in order to prevent the depletion of the fisheries; investigations to promote conservation of fishery resources; the development of commercial fisheries and agriculture; study of fishery methods; improvements in merchandising and collection of fishery statistics; administration of Alaska fisheries and fur seals; and the protection of sponges off the coast of Florida.

## BUREAU OF LIGHTHOUSES

GEORGE R. PUTNAM, Commissioner

Maintenance of lighthouses and other aids to water navigation. Establishment and maintenance of aids to navigation along civil airways.

Publication of Light Lists, Buoy Lists, and Notices to Mariners, giving information regarding these aids to navigation.

## COAST AND GEODETIC SURVEY

RAYMOND S. PATTON, Director

Survey of the coasts of the United States and publication of charts for the navigation of the adjacent waters, including Alaska, the Philippine Islands, Hawaii, Porto Rico, the Virgin Islands, and the Canal Zone; interior control surveys; magnetic surveys; tide and current observations; and seismological investigations.

Publication of results through charts, coast pilots, tide tables, current tables, and special publications.

## BUREAU OF NAVIGATION

ARTHUR J. TYRER, Commissioner

Superintendence of commercial marine and merchant seamen. Supervision of registering, enrolling, licensing, numbering, etc., of vessels under the United States flag, and the annual publication of a list of such vessels.

Enforcement of the navigation and steamboat inspection laws, including imposition of fees, fines, tonnage taxes, etc.

## STEAMBOAT INSPECTION SERVICE

DICKERSON N. HOOVER, Supervising Inspector General

The inspection of merchant vessels, including boilers, hulls, and life-saving equipment; licensing of officers of vessels; certification of able seamen and lifeboat men, and the investigation of violations of steamboat inspection laws.

## UNITED STATES PATENT OFFICE

THOMAS E. ROBBETSON, Commissioner

The granting of patents and the registration of trade-marks, prints, and labels after technical examination and judicial proceedings.

Maintenance of library with public search room, containing copies of foreign and United States patents and trade-marks; recording bills of sale, assignments, etc., relating to patents and trade-marks. Furnishing copies of records pertaining to patents.

Publication of the weekly Official Gazette, showing the patents and trade-marks issued.

## RADIO DIVISION

W. D. TERRELL, Chief

Inspection of radio stations on ships; inspection of radio stations on shore, including broadcasting stations; licensing radio operators; assigning station call letters; enforcing the terms of the International Radiotelegraphic Convention; and examining and settling international radio accounts.
