# INDEX OF NEW SERIES OF DATA ADDED IN THE SURVEY OF CURRENT BUSINESS SINCE THE PUBLICATION OF THE 1932 ANNUAL SUPPLEMENT

[NOTE.—Where data are available for period earlier than shown, the date in parentheses indicates when series started]

Series	Period for which series were published	Issue and page
<b>Business indexes:</b>		
Indexes of production of leather and shoes.....	January 1919–November 1933.....	January 1933, p. 19.
Agricultural products, cash income received from marketings of.....	January 1919–December 1933.....	May 1934, p. 16.
<b>Commodity prices:</b>		
World prices, foodstuffs, and raw materials.....	January 1927–July 1932 (January 1920).....	September 1932, p. 20.
Fairchild's index of retail prices.....	November 1929–October 1932 (November 1929).....	December 1932, p. 19.
Purchasing power of the dollar:		
Wholesale prices.....	January 1913–December 1932.....	August 1933, p. 18.
Retail prices.....	January 1913–December 1932.....	August 1933, p. 18.
Farm prices.....	January 1913–December 1932.....	August 1933, p. 18.
Cost of living.....	July 1914–December 1932.....	August 1933, p. 18.
<b>Real estate and construction:</b>		
Highway construction (N. I. R. A.).....	September and October 1933.....	December 1933, p. 25.
(1) Approved for construction.		
(2) Under construction.		
Building costs (all types, American Appraisal Co.).....	March 1915–June 1933.....	August 1933, p. 20.
Construction costs, electric light and power industry (Richey).....	January 1914–December 1933.....	January 1933, p. 19.
Foreclosures.....	October 1933–October 1934 (August 1933).....	December 1934, p. 25.
Home loan bank.....	December 1932–October 1933.....	December 1933, p. 25.
<b>Domestic trade:</b>		
Air mail.....	May 1934–September 1934.....	December 1934, p. 26.
New passenger car sales.....	January 1929–February 1934.....	April 1934, p. 16.
Chain Store Age, indexes of chain-store sales.....	January 1932–October 1932.....	December 1932, p. 26.
Five-and-ten variety store sales.....	January 1929–February 1934.....	March 1934, p. 17.
H. L. Green Co., Inc.....	July 1933–October 1933.....	December 1933, p. 25.
Department store collections.....	October 1933–September 1934 (January 1933).....	December 1934, p. 25.
Department store sales, <sup>1</sup> Philadelphia Federal Reserve district.....	January 1919–October 1932.....	December 1932, p. 20.
Indexes of department store sales:		
Atlanta.....	January 1930–December 1934 (January 1919).....	February 1935, p. 20.
Chicago.....	January 1930–December 1934 (January 1923).....	February 1935, p. 20.
Cleveland.....	January 1930–December 1934 (January 1919).....	February 1935, p. 20.
Dallas.....	January 1930–December 1934 (January 1919).....	February 1935, p. 20.
Minneapolis.....	January 1930–December 1934 (January 1929).....	February 1935, p. 20.
New York.....	January 1930–December 1934 (January 1919).....	February 1935, p. 20.
Philadelphia.....	January 1930–December 1934 (January 1923).....	February 1935, p. 20.
San Francisco.....	January 1930–December 1934 (January 1919).....	February 1935, p. 20.
Rural sales.....	January 1929–October 1934.....	December 1934, p. 20.
<b>Employment conditions and wages:</b>		
Factory (Department of Labor), all groups.....	Annually 1919–1929; monthly January 1930–December 1933 (January 1919).....	June 1934, p. 16.
Factory (Department of Labor), combined index.....	January 1919–May 1934.....	July 1934, p. 19.
Factory (Federal Reserve Board), adjusted, combined index.....	January 1919–May 1934.....	July 1934, p. 16.
Factory (Federal Reserve Board), all groups.....	January 1929–December 1933 (January 1923).....	July 1934, p. 16.
Baltimore.....	January 1929–December 1931.....	December 1932, p. 18.
Chicago.....	January 1923–December 1932.....	June 1933, p. 20.
Cleveland.....	January 1921–April 1934.....	July 1934, p. 19.
Milwaukee.....	January 1926–December 1931 (January 1925).....	December 1932, p. 18.
Pittsburgh.....	January 1923–November 1933.....	January 1934, p. 18.
Massachusetts.....	January 1926–December 1931 (January 1925).....	December 1932, p. 18.
Maryland.....	January 1926–December 1931 (January 1924).....	December 1932, p. 18.
Laundries.....	January 1931–December 1932.....	June 1933, p. 19.
Dyeing and cleaning establishments.....	January 1931–December 1932.....	June 1933, p. 19.
Banks, brokerage houses, etc.....	January 1932–December 1932.....	June 1933, p. 19.
Federal and State highways.....	January 1931–December 1932.....	June 1933, p. 19.
Federal civilian employment.....	January 1926–December 1931 (February 1925).....	December 1932, p. 18.
Trade-union members employed, building trades, metal trades, printing trades, all other trades.....	January 1928–December 1931.....	December 1932, p. 18.
Hours of work per week per wage earner (actual).....	January 1927–August 1932 (June 1920).....	October 1932, p. 20.
Hours of work per week, nominal.....	January 1927–April 1932 (June 1920).....	October 1932, p. 20.
Labor turn-over rate, <sup>1</sup> quarterly.....	September 1929–July 1932.....	October 1932, p. 20.
<b>Pay rolls:</b>		
Factory (Department of Labor), combined index.....	January 1919–April 1934.....	July 1934, p. 19.
Factory (Department of Labor), all groups.....	Annual 1919–1929, monthly January 1930–December 1933 (January 1919).....	July 1934, p. 18.
Baltimore.....	January 1929–December 1931.....	December 1932, p. 18.
Chicago.....	May 1925–December 1925.....	June 1933, p. 20.
Milwaukee.....	August 1929–December 1931.....	December 1932, p. 20.
New York City.....	June 1914–January 1932.....	June 1933, p. 20.
Philadelphia.....	January 1926–December 1932 (January 1923).....	December 1932, p. 18.
Pittsburgh.....	January 1923–November 1933.....	January 1934, p. 18.
Maryland.....	January 1926–December 1931 (January 1924).....	December 1932, p. 18.
Massachusetts.....	January 1926–December 1931 (January 1925).....	December 1932, p. 18.
Banks, brokerage houses, etc.....	January 1932–December 1932.....	June 1933, p. 19.
Laundries.....	January 1931–December 1932.....	June 1933, p. 19.
Dyeing and cleaning.....	January 1931–December 1932.....	June 1933, p. 19.
Average weekly earnings (National Industrial Conference Board).....	January 1927–August 1932 (January 1920).....	October 1932, p. 20.
Average hourly earnings (National Industrial Conference Board).....	January 1926–December 1931 (January 1920).....	December 1932, p. 18.
Average weekly earnings, Massachusetts.....	January 1926–December 1931 (January 1925).....	December 1932, p. 18.
Construction wage rates.....	January 1922–June 1933.....	September 1933, p. 19.
<b>Finance:</b>		
Federal intermediate credit bank, loans to and discounts for:		
Regional agricultural credit corporations and production:		
Credit associations.....	October 1933–October 1934 (February 1933).....	December 1934, p. 30.
Other institutions.....	October 1933–October 1934 (May 1923).....	December 1934, p. 30.
Agricultural loans outstanding, land bank commissioner.....	April 1933–April 1934 (May 1933).....	June 1934, p. 30.
Agricultural marketing act.....	April 1933–April 1934 (August 1929).....	June 1934, p. 30.
Banks for cooperatives including central bank.....	April 1933–April 1934 (September 1933).....	June 1934, p. 30.
Emergency crop loan.....	April 1933–April 1934 (January 1934).....	June 1934, p. 30.
Production credit associations.....	April 1933–April 1934 (October 1933).....	June 1934, p. 30.
Regional agricultural credit corporations.....	April 1933–April 1934 (October 1932).....	June 1934, p. 30.
Brokers' loans by Federal Reserve reporting member banks.....	October 1933 and October 1934.....	December 1934, p. 31.
Condition of Federal Reserve reporting member banks (90 cities).....	January 1932–December 1933.....	January 1934, p. 18.
Investments of Federal Reserve reporting member banks.....	October 1934.....	December 1934, p. 31.
Loans of Federal Reserve reporting member banks (breakdown of total loan figure).....	October 1934.....	December 1934, p. 31.

# Business Indicators

1923-25 = 100

\* ADJUSTED FOR SEASONAL VARIATION

\* REPORTING MEMBER BANKS

D. D. 8332

# Business Situation Summarized

**I**NDUSTRIAL production expanded during January by more than the usual seasonal amount, the adjusted index rising to 90 percent of the 1923-25 average, the highest point reached since August 1933 when the precode rush of activity terminated. Available data for February suggest that the increase in industrial output for that month approximated the usual seasonal change. Production in the first 2 months of the year has been the highest for this period since 1930.

The steel industry again led the advance during January, the adjusted index of steel production increasing 23 percent. Since the early part of February there has been a decline in the rate of steel production, but output for the month is expected to exceed the January total. Further advances in January, after allowance for seasonal influences, occurred in the textile, leather boot and shoe, and lumber industries. While a sharp increase occurred in the production of automobiles, the adjusted index for this industry declined 1 point to 104 percent of the 1923-25 average.

The number employed by factories in mid-January showed a contraseasonal increase as compared with December, the adjusted index advancing to 80.4 percent of the 1923-25 average, a rise of 1.9 percent. A further increase is indicated for the succeeding reporting period by the available data. The increase in factory pay rolls in January amounted to 1.4 per-

cent, the index advancing to the highest figure reported since last June; pay rolls were 19 percent higher than a year ago. Seasonal recessions in retail trade and in the construction industries were important influences in the decline in employment and pay rolls in nonmanufacturing industries in January.

Distribution series did not follow the trend of the production index. The increase in freight-car loadings during January equaled the usual seasonal rise for the month, while sales through retail stores apparently declined by more than the estimated seasonal amount, following the December gains. Sales of automobiles, on the other hand, were sharply higher in January.

A substantial gain in the volume of residential building featured the construction reports for January. Total construction contracts awarded, however, have been in relatively small volume and the seasonally adjusted index for January, which is based on a 3-month moving average, dropped 4 points to 27 percent of the 1923-25 average.

A further advance in prices of farm products and foods has occurred since the first of the year, but the average of other wholesale prices has declined. The decision of the Supreme Court in the gold cases apparently had only a temporarily stimulating effect on stock market quotations. No change is evident in the new capital markets; issues brought out since the first of the year have made a relatively small total.

# Comparison of Principal Data, 1931-35

# Commodity Prices

**W**HOLESALE commodity prices continued to advance during the 4 weeks ended February 16, the Department of Labor index reaching a recovery high at 79.4 percent of the 1926 level. The recent rise, as was true of the rise during the year 1934, is attributable to the increase in the prices of farm products and foods. Six of the eight groups other than farm products and foods declined fractionally during this 4-week period, 2 were unchanged, and 1, chemicals and drugs, increased.

Since the beginning of the calendar year, prices of farm products and foods have advanced beyond the average prices of all other commodities, as compared with 1926 levels. In the week ended February 16, the index of the prices of farm products stood at 79.2 percent of the 1926 base, that of foods at 83.1, and that of "other commodities" at 77.7.

The increase in the prices of farm products and of foods during the first 7 weeks of 1935 has been 4.8 percent and 5.9 percent, respectively, while the index of "other commodities" has declined. The index of the prices of farm products in the week ended February 16 was above the indexes of 3 of the 10 groups, and the index of food prices was above the indexes of 6 of these groups.

The retail prices of merchandise, other than foods, as measured by the Fairchild index as of February 1, showed a continuation of the gradual downward trend which has been underway since the report for April 1 last (March in the accompanying table). During this period the decline has amounted to 3.1 percent.

Retail prices of foods at the end of January were at the highest point reached since May 15, 1931. This index has advanced during each of the latest three 2-week reporting periods, the rise of 5.5 points bringing the index to 119.8 percent of the 1913 average. The index for each of the 6 groups of foods advanced during this period, but the largest gains were in meats and dairy products.

The cost of living index of the National Industrial Conference Board increased 1 percent in January as a result of a rise of 3.4 percent in food prices and 0.1 percent in housing.

Prices received by farmers in January, as reported by the Department of Agriculture, were 107 percent of the 1910-14 average, or the highest since November 1930; prices paid were 126 percent of the pre-war average. The ratio of prices received to prices paid is estimated at 85 in January compared with 80 in December and 66 in January 1934.

# Domestic Trade

**S**ALES through retail stores have declined since December by more than the estimated seasonal amount, according to the available monthly data. This reaction follows the general gains registered in December. The trend of retail sales of automobiles has been strongly upward since deliveries of 1935 models started toward the close of the year.

The adjusted index of department-store sales receded to 72 percent of the 1923-25 average in January, thus more than canceling the gain which was reported for December. Particularly wide declines occurred in the seasonally adjusted indexes of sales in the southern districts. Total sales were 4 percent higher than a year ago, but the regional change ranged from a drop of 4 percent in the Boston district to a gain of 14 percent in the Cleveland area.

Sales of general merchandise in rural areas underwent a sharp contraction during January, the seasonally adjusted index dropping from 94.5 percent of the 1929-31 average in December to 87.5 in January. Sales were 10 percent larger than in 1934. The drop in variety-store sales was in accord with the usual seasonal movement, the adjusted index continuing at the level which has prevailed since the second quarter of 1934.

Deliveries of automobiles at retail during January increased rapidly as cars came off the assembly lines at an accelerated rate. Efforts to deliver cars as rapidly as possible at retail was reflected in the increase in the seasonally adjusted index of passenger car sales from

49 in December to 79 in January. This erratic movement (the index dropped from 63 in November) is caused partly by changing seasonal factors incident to the production of new models which are not allowed for in the index. Nevertheless, January sales were the largest for this period since 1930; a further large gain is indicated for February as dealers still have large accumulated orders which are being depleted as cars are supplied in more adequate volume.

The Bureau has recently issued estimates of total retail sales for the year 1934. The gain in the aggregate dollar volume was approximately 3½ billion dollars, a modest increase when consideration is given to the rise in prices in comparison with the preceding year. Total sales were estimated at \$28,548,000,000, or 58 percent of the 1929 figure. The increases in 1934, by kinds of business, varied from a low of 7 percent for the food group to more than a fifth for the mail order and automotive groups. Copies of the report, together with similar estimates for wholesale trade, are available from the Bureau upon request.

One of the major statistical indicators which continues to reflect a uniformly favorable trend is the series on commercial failures. While the January statistics show a seasonal increase in the number of insolvencies, the total is the lowest for the month since 1920. An unusual feature of the monthly report was the decline in the amount of liabilities involved in such failures, since a substantial rise is usual from December to January.

# Employment

**E**MPLOYMENT in manufacturing industries was eight-tenths of 1 percent higher in mid-January than a month earlier, while pay rolls were up 1.4 percent. After allowance for the usual seasonal decline, the adjusted index of factory employment increased 1.9 percent. Employment and pay rolls in nonmanufacturing industries declined in January, due largely to the seasonal recessions in the retail trade and building construction groups.

Among manufacturing industries, a larger number of workers were employed in 38 of the 90 industries surveyed; the remaining 52 industries reported a decline. Employment in the 46 durable goods industries increased 2.6 percent from December to January and pay rolls for this same group increased 4 percent.

As in December, the increases in the durable goods industries were due mostly to the intensification of activity in the automobile industry, which reported an increase of 22 percent in the number of workers employed and a gain of 21 percent in pay rolls. Nineteen other industries in the durable goods group reported increases. The more important declines among these industries were locomotives, 17 percent; due primarily to the completion of orders placed through P. W. A.; brick, tile and terra-cotta cement, 11 percent; jewelry and radios, 8 percent each; stoves, 6 percent; and typewriters, 3 percent.

For the combined nondurable goods industries, employment and pay rolls both showed small declines. Of the 44 industries included in this group, 18 re-

ported increases and 26 declines. The textile industry employed more workers in all of its branches, with the exception of men's furnishings and knit goods. Other increases reported for the nondurable goods group were boots and shoes, 4.9 percent; fertilizers, 12 percent; and rubber products, 3.5 percent.

Large declines in a few of the 18 nonmanufacturing industries were responsible for the net decline in total manufacturing and nonmanufacturing employment for January. The major recessions were in building construction, 12 percent, and retail trade, 11 percent. The quarrying and nonmetallic mining industry reported a decline of 12 percent, also seasonal in character. Some of the gains among these industries were in anthracite mining, 2.1 percent; in bituminous coal mining, four-tenths of 1 percent; and the telephone and telegraph industry, 1.1 percent.

The number of families receiving Federal relief increased 3 percent in January. Some reduction in the number receiving relief occurred in such cities as Detroit and Youngstown, Ohio, where improving industrial conditions has lightened the public burden. Relief expenditures for the country increased about 11 percent over December, as a result of both the increase in the number of cases and the increase in the budgetary allowances.

Changes in employment on public projects (including the Emergency Works Program) during the month were not important, a net increase of about 20,000 workers being reported.

## STATISTICS OF EMPLOYMENT, PAY ROLLS, AND WAGES

# Finance

FROM the middle of January to the middle of February activity in the security markets was influenced by the shifting speculative reactions to the anticipated decision of the Supreme Court in the so-called gold cases. There was comparatively little net change during this period in stock prices, although occasionally the daily changes were impressive. Bond prices improved during this period, the gold decision apparently influencing the trend but little.

On February 18, the Supreme Court's long-awaited decisions in the four gold cases upheld, in effect, the validity of the congressional resolution of June 5, 1933, which declared that the gold clause in private and public contracts was contrary to public policy, and that all gold obligations may be paid in present-day devalued dollars. While the Court divided 5 to 4 and a majority held that Congress exceeded its constitutional powers in canceling the gold clause in United States Government bonds, the holders of such obligations were denied the right to bring suit in the Court of Claims. The noon-day decision became the signal for the most active security trading since July 1934 during the remainder of the day, but the gains in the more speculative markets proved to be temporary.

Money rates continue at extremely low levels, a condition to be expected in the face of the largest gold inflow since March 1934 and excess member bank reserves which have recently approximated \$2,200,000,000.

During February, President Roosevelt issued a proclamation extending until March 3, 1937, the time in

which Government bonds may be used as collateral behind Federal Reserve notes. At virtually the same time the Federal Reserve Bank of New York indicated that provisions had been made for retirement of the Federal Reserve bank notes, aggregating \$24,824,000, which it had issued in accordance with the emergency banking legislation of 1933.

The turn-over of member bank deposits declined during January, due largely to the inability of debits against accounts to keep pace proportionately with the rapidly mounting deposits. From January 9 to February 13 the demand deposits of reporting member banks increased \$435,000,000, a reflection in large part of inward gold movements and Treasury disbursements. Monetary gold stocks rose to \$8,452,000,000, on February 16, a new high.

Coincident with the dullness in the security markets for several weeks prior to the gold-clause decision, dollar exchange rates showed marked fluctuations. Toward the middle of February the buying of dollars increased, presumably as the result of the market's momentary tendency to speculate on a decision adverse to the Government. On February 11 the Secretary of the Treasury reported that since the middle of January the Treasury had made use of its stabilization fund in managing the external value of the dollar and would continue to do so as long as necessary. Two days later the French franc rose above its gold export point for the first time in approximately a month.

<sup>1</sup> 91 cities.<sup>2</sup> Net exports indicated by (-).<sup>3</sup> Gold coin reported in circulation prior to Jan. 31, 1934, was eliminated from the total as of that date.

# Foreign Trade

**E**XPORTS in January were 3 percent higher than in December, the first time since 1929 that an increase has been reported for this period. The seasonally adjusted index of the value of exports increased from 42.5 percent of the 1923-25 average in December to 45.5 in January.

The expansion in exports during January resulted largely from an increase in the value of shipments of automobiles and leaf tobacco, although increased exports of lubricating oil, gasoline, automobile tires, fur skins, and lard were also contributing factors. Exports of automobiles, including parts and accessories, valued at \$17,208,000, were 39 percent above December. A marked increase in the unit value of leaf tobacco exports resulted in an expansion of 37 percent in the value of that commodity, although the quantity exported was only 11 percent larger than in December.

A number of leading commodity exports declined in value during January. Outstanding among this group was unmanufactured cotton, which fell off 8 percent in both quantity and value. While the percentage reduction was not unusually large for this period, unmanufactured cotton exports in January dropped to the low figure of 250,698,000 pounds, with a value of \$32,158,000. Lumber, iron and steel-mill products, electrical machinery and appliances, industrial machinery, pigments, fertilizers, wheat flour, and fruits were other leading exports which declined in value in January.

Further evidence of the trend toward expansion in exports of manufactured articles and a shrinkage in

exports of agricultural products is seen in the comparison of the statistics for January 1935 with those for the same month of 1934. Total finished manufactured exports, valued at \$74,297,000 in January 1935 were 43 percent of the total export trade this year, whereas a year ago the corresponding percentage was 36. The proportion of semimanufactures, which were valued at \$27,196,000 in January 1935, increased from 14.8 percent in 1934 to 15.7 percent.

Foreign sales of motor vehicles have expanded to a greater extent (59 percent in value) in comparison with a year ago than most of the other leading semimanufactured and manufactured articles. Machinery exports, including electrical appliances and agricultural implements, and manufactures of iron and steel, increased 27 percent and 12 percent in value, respectively, in this period, while the value of copper exports increased 41 percent. Refined mineral oil exports were 24 percent larger in quantity in January 1935 than in January 1934, but showed an increase of only 1 percent in value. Cigarettes, rubber manufactures, wood pulp, rayon manufactures, miscellaneous textile products, glass and glass products, photographic goods, scientific and professional instruments, books and other printed matter, and explosives and firearms were other leading articles which recorded considerable improvement. Leading semimanufactured and finished articles showing declines included cotton, wool, and silk manufactures, lumber, and advanced manufactures of wood.

# Real Estate and Construction

**E**NLARGEMENT of the volume of residential construction was responsible for the gain in construction contracts awarded during January. The total value of awards for the 37 States covered by the F. W. Dodge Corporation data was about \$100,000,000, substantially below the corresponding total a year ago and moderately higher than in the like months of 1933 and 1932. Publicly financed work made up \$55,000,000 of this total, compared with \$157,000,000 in 1934. Partially offsetting this decline was the gain in private work from \$29,000,000 to \$45,000,000. In January 1934 awards under the public works program reached a peak, the volume being in excess of the total for all contracts in the opening month of 1935. During the first half of February there was a decline in the daily average value of contracts awarded.

Residential contracts for the first month of 1935 represented the largest volume of January work since 1932. Increases as compared with January last were shown in 7 of 13 regional areas, the gain for the country amounting to about 50 percent. Nonresidential building contracts were also higher than in December but were in much smaller volume than a year ago.

Public utility construction made a relatively small contribution to the January total. Work in this field during the past year has been confined largely to water-works and railroad projects. Electric light, power, and gas plant extensions and improvements which, under more favorable conditions, have accounted for a sub-

stantial volume of work, contributed only about a fourth of the small volume of contracts in the public utility field during the past year.

Building permit figures for January also reflect gains over a year ago, in both new residential building and in the volume of repairs, alterations, and additions. The number of permits issued for new residential construction in 776 cities from which the Bureau of Labor Statistics collects data was 67 percent above January 1934, while the estimated cost of the work was double that of a year ago. Compared with December, there was an increase of 17 percent in the estimated cost of the work covered by all permits.

Conditions in the real-estate market are decidedly better than a year ago, according to a recent survey of the National Association of Real Estate Boards. A general rise in selling prices of real property, accompanying an improving tendency in rents, has recently been reflected in a more active market for real property after nearly 5 years of severe deflation. A shortage of single-family dwellings has developed in more than half of the 268 cities covered, while the greater demand for apartments has caused a reversal of the downward trend of rent for such accommodations. An oversupply of office-building space exists, with rents for such properties still tending downward. Money supplies for financing real estate operations are reported to be deficient, but conditions in the mortgage market are better than in 1932 and 1933.

<sup>1</sup> Based on 3-month moving average and adjusted for seasonal variations.

<sup>2</sup> Index is as of first of month, Feb. 1, 1935, 196.0.

# Transportation

**F**REIGHT cars loaded during the first 2 weeks of February exceeded the corresponding total for 1934 by 5 percent, but for the week ended February 16 they were 3 percent below the loadings of a year earlier. For the first 7 weeks of the year loadings were approximately the same as in the corresponding period of 1934. During each of the first 3 weeks in February loadings were more than 70 percent of the average for the like weeks of the past 15 years. From the week ended June 30, 1934, until the close of January this year, there were only 2 weeks (in December) when this percentage exceeded 70.

Freight-car loadings increased in January by the usual seasonal amount, the adjusted index of the Federal Reserve Board remaining at 64 percent of the average loadings for 1923-25. Of the 8 classes of freight, 5 declined during the month, on an adjusted basis, and 3 increased. The month's changes varied from an increase of 11 points in coke to a decline of 9 points in livestock. Each of the three major freight classifications—coal, l. c. l. merchandise, and miscellaneous—showed but little change during the month.

Although operating revenues of class I railroads in December were only slightly higher than in November, the decline in expenditures permitted a sharp increase in net operating income. The latter was about 3 percent above the total reported for December 1934. The traffic data for January indicate a moderate gain in the gross operating revenues of the carriers for that month.

For the calendar year 1934, total operating revenues increased 5.7 percent and total operating expenses 8.5 percent. Taxes decreased 4.1 percent. The rate of return on property investment declined slightly for the year to 1.77 percent from 1.80 percent in 1933. Freight revenue increased 5.6 percent during the year and passenger revenue 5.1 percent. Thirty class I railroads operated at a loss in 1934, of which 8 were in the eastern, 8 in the southern, and 14 in the western district.

The foregoing financial results explain the failure of the railroads to place large orders in recent months for either rolling stock or rails. Orders for 24 freight cars were the only commitments made by the railroads in January according to the reports in the *Railway Age*. A slackening in activity in the railway equipment building industry occurred during January, due to the completion of some large locomotive orders. Very little change was evident in the car building branch, or in the work carried out in railroad repair shops. January pay rolls in the car building industry were about a third of the 1923-25 average; in the locomotive industry they were about one-eighth of that average, while in railroad repair shops pay rolls were considerably less than one-half of the total in the base period.

Railway employment in January declined for the seventh consecutive month, but after adjustment for the usual seasonal change the index of employment increased in January, as it did in December. The index is currently at 56.7 percent of the 1923-25 average.

# Automobiles and Rubber

**P**RODUCTION schedules in the automobile industry have been steadily advanced throughout February, with the result that the production goal of 1,000,000 cars and trucks set for the first quarter may be easily achieved. With domestic production in the first month of the year exceeding 290,000 units, the year's output by the first of March is expected to be close to 650,000. This represents the highest production for this period of the year since 1929 when production amounted to 867,000 units.

Gains of the magnitude witnessed recently have resulted in a quickening of activity in allied industries. Pressure for immediate delivery of parts and materials has continued, but shortages have not interrupted production schedules except in unimportant instances. Employment throughout the industry has expanded rapidly; in January there was an increase of 22 percent in the number employed and approximately the same relative increase in pay rolls. The rising trend has continued during February, with Detroit employment up 9 percent over the mid-January figure. The number employed in Detroit factories is back to the level of the spring of 1930.

With large accumulated retail orders on hand, cars have been delivered as rapidly as permitted by the production schedules and the need for taking care of dealers' display requirements and the export demand. An unusually high percentage of the cars produced so far this year have been delivered to consumers, or exported, relatively few being retained for display and demonstration purposes.

The value of domestic sales of new passenger cars was sharply higher in January than in December, after allowance for the usual seasonal increase. Compared with a year ago, the value of cars sold more than doubled. A further substantial gain in the adjusted index of sales is anticipated for February. Exports of cars and trucks during January were the largest for this month since 1930.

Production of trucks so far during 1935 has been at a higher rate than in 1929. In the opening month of the year the number of trucks produced was 63,566, compared with 53,428 in 1929. February production in the earlier year was only 60,247, so that the final January-February production figure will exceed the comparable 1929 figure by a considerable margin. It may be noted that the number of light vehicles currently produced probably represents a considerably higher proportion of the total than in 1929.

An improved trend of production during January was evident in the major rubber industries, with the exception of rubber footwear. With the exception of 1 month in 1929, 2 months in 1933, and 1 month in 1934, consumption of crude rubber was the largest on record.

World stocks of crude rubber were slightly higher at the end of January than in December; they were about 5 percent higher than a year ago. Crude prices have been erratic, reflecting to an exaggerated degree the fluctuations in foreign exchange rates. The price dropped below 13 cents a pound in the week ended February 16, but improved slightly in the following week to close above that figure.

## Forest Products

**P**RODUCTION of lumber has continued on a low level during January and February. Output so far in 1935 has been only slightly in excess of the comparable period of 1934. Shipments and new orders, however, have been substantially above a year ago. The former have been 19 percent above production and has exceeded last year's shipments by 34 percent. New orders have also exceeded production by a substantial margin, although the ratio of orders to production has been receding as the rapid increase following the suspension of the minimum price provisions of the code gradually gave way to more normal purchasing.

According to a report of the Timber Conservation Board, the anticipated lumber consumption for the first quarter of 1935 will be 3,756,000,000 feet. This represents an annual rate of 16,000,000,000 feet which, if realized, would be more than the consumption in any one of the three preceding years. This estimated increase in consumption is based on the anticipated increase in public and private activity in housing, repairs, modernizing, and general construction. The report also pointed out that aggregate gross stocks have been reduced since August 1, 1934, by approximately 680,000,000 feet; stocks are still high with relation to current consumption.

Wholesale prices of lumber for the month of January declined to 79.9 percent of the 1926 average from 81.2 in December; the moderate downward tendency persisted during the early weeks of February. It is

impossible to judge whether the suspension of the code minimum prices in December 1934 has been an important factor in this movement. Reports from the various lumber regions do not indicate any uniformity of change, although the tendency seemed to be to hold prices at or close to the previous minimum quotations.

Employment and pay rolls in the lumber and allied products industry declined during January, but by less than usual for the period. As compared with the same month in 1934, employment was 3 percent higher while pay rolls were up 16 percent. Increases in pay rolls as compared with a year ago were reported for all groups; the gains varied from 23 percent for the furniture industry to 4.6 percent for the naval stores industry.

Production of paper in January showed little change from the December total when the industry (exclusive of the paperboard group) operated at approximately 62 percent of capacity, according to code authority data. The trend of production during the year 1934 was less erratic than in 1933. Two peak periods of production occurred during the year, the first in April when operations reached 61.5 percent of capacity, and the second in October when the rate increased to 64.7 percent, following a recession to about 54 percent in the summer.

Domestic production of newsprint in January was the highest since June 1933. Canadian output, however, was slightly less than in December but was the highest January output since 1930. Shipments of newsprint from mills in both countries declined in December.

# Iron and Steel

**T**HE rapid rise in the output of steel ingots culminated in the week ended February 2 when the rate of operations reached 54 percent of capacity. The recession in production in the succeeding weeks carried the rate of output to about 48 percent of capacity in the week ended March 2. Production for the month of February was in excess of 50 percent of capacity, according to the weekly estimates, compared with 47.67 percent in January.

The increase in steel-ingot production in January of 35 percent, on a daily average basis, represented a greater-than-seasonal gain. The relative increase over a year ago was about the same as that reported for December, or about 44 percent. The spurt in production during January reflected the heavy demands for steel from the automobile industry, which has been operating at the highest rate since June 1934, as well as large purchases from miscellaneous sources. While the railroads released some rail tonnage and bought a small amount of materials for repairs, the total volume of orders from this source has been small.

Shipments of steel sheets, which have been required in large quantities by the automobile producers, were 45 percent larger in January than in December. Sheet mills have been operated in excess of two-thirds of capacity, and some units producing automotive sheets are booked to capacity for the entire first quarter. No definite indications are available of an excessive accumulation of steel inventories by the automobile industry as a whole, although certain producers are understood to have protected their

present high schedules by anticipating a part of their requirements ahead.

Shipments of finished steel by the leading producer in January were about 28 percent above December, and were much heavier than in January 1934 when stocking in the preceding quarter cut shipments to about half of the preceding month's total. The volume of machine tool orders in January was slightly less than in the preceding month, due to the drop in foreign orders which were unusually high in December. Domestic sales were the same as in December; in that month such orders were the best since 1930.

While prices for finished steel for the second quarter have not been announced by the code authority, trade sources indicate that no major changes from existing quotations have been included in the prices filed to date.

Finished steel statistics for 1934, issued by the code authority, indicate the varying degree of improvement in the output of individual products. Outstanding changes in production were in heavy structural shapes, the production of which increased 30 percent to 1,140,000 tons; in standard rails which were up 163 percent to 906,000 tons; and in sheared and universal plates which showed a gain of 38 percent to 1,261,000 tons. The statistics of light rolled products were featured by a drop of 11 percent in tin plate and a rise of 17 percent to 3,715,000 tons in sheet production. Production for export was reported as 900,000 tons in 1934, compared with 573,000 in 1933.

# Textile Industries

**T**EXTILE manufacturing activity increased in January, the seasonally adjusted index of production advancing to 102 percent of the 1923-25 average, a gain of 5 percent over December. Most of this gain in the index can be attributed to the cotton manufacturing industry which reported an increase of 7 percent in cotton consumption, on a seasonally adjusted basis, and to a further increase in activity in the manufacture of woolen goods. While some improvement was also noted in the silk industry, the seasonally adjusted index of silk deliveries declined 15 percent below the December figure. This decline probably was in the nature of an adjustment of mill supplies since the December increase was exceptionally large. In that month the adjusted index of silk deliveries increased 26 percent over November.

The increase of production in the woolen industry in recent months has been particularly noteworthy. Consumption of wool and wool machine activity increased sharply during the final quarter of 1934. Although there was not much change in wool consumption in January of this year, machinery activity continued to expand, approaching the levels reached in the summer of 1933.

January consumption of cotton, which was the largest since August 1933, exceeded consumption in the preceding month and in January 1934 by 32 and 8 percent, respectively. Spindle activity in January

increased about 25 percent over December. About one-half of the increases in both consumption and machine activity as compared with December can be accounted for by seasonal factors. Weaving operations also expanded during January, the increase in gray goods produced amounting to about 7 percent. New orders were less than production and were also considerably less than a year ago. Finishing operations increased only slightly during January. Stocks of printed, dyed, and bleached goods remained about the same as at the end of the year.

The less-than-seasonal increase in silk deliveries, already referred to, was accompanied by small increases in silk throwing activity and silk cloth output.

In January, deliveries of nonacetate rayon reached an all time high. The steady increase in the production of rayon during recent years is due mainly to shifts in the relationships existing between the prices of textile products and the improvement in rayon fabrics.

Wholesale prices of textile products have changed very little on the average so far during 1935. For the week ended February 16, the index stood at 69.7 percent of the 1926 average, the same as the figure for the final week of December. Prices of both woolen and cotton goods have declined, while the average price of silk goods has been unchanged. Raw silk prices have been steady, following the marked increase in the final quarter of 1934.

## TEXTILE STATISTICS

Year and month	Production index, ad-justed 1	Cotton, raw	Cotton and manufactures			Wool	Wool manufactures				Wholesale price, woolen and worsted goods	Silk

# Shifts in Manufacturing Industries

By M. Joseph Meehan, Editor, Survey of Current Business

**S**TATISTICS recently issued by the Bureau of the Census, in addition to affording comprehensive data as to the extent of the decline in the total value of manufacturing production and in aggregate employment and pay rolls, provide some interesting facts concerning the varying extent to which individual industries have been affected by prevailing conditions. The census report<sup>1</sup> also disclosed that while the statistics on industry as a whole in 1933 reveal a sharp reduction from the 1931 results, some industries were able to report considerable gains between these 2 years and some few industries reported improvement over 1929.

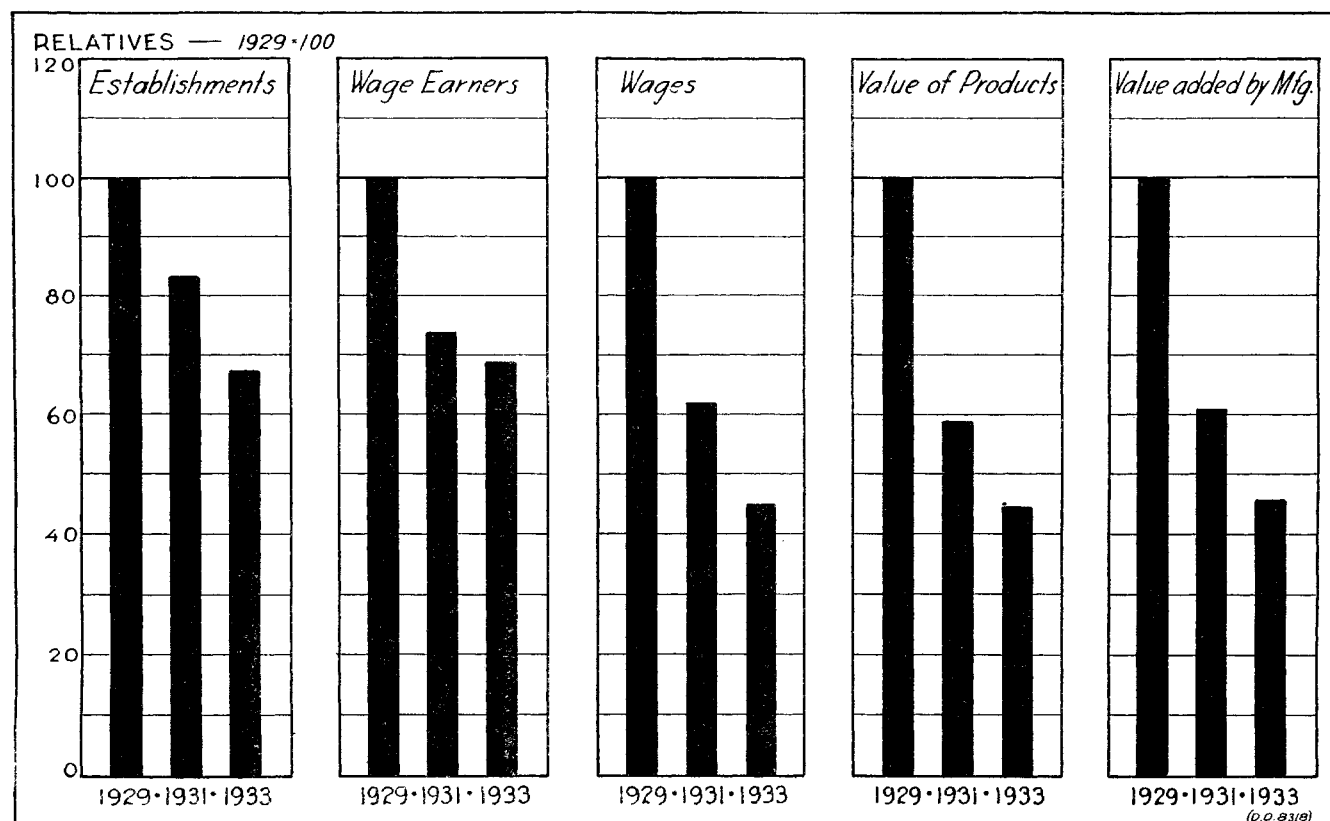

According to the census figures, the shrinkage in manufacturing production between the last 2 census years was not exaggerated by the available monthly data on production and the price trend of manufactured goods; rather the actual decline in the value of manufacturing output between 1931 and 1933 was somewhat greater than is indicated by estimates based on these data. The major trends over the period 1929 to 1933 may be readily grasped by reference to the accompanying charts.

As a result of a variety of causes, over which the Bureau of the Census had no control, the coverage for 1933 was not quite complete for some industries; this did not affect the figures to any considerable degree. In comparing the 1933 figures on the value of product with those for 1929 and 1931, it should also be borne

in mind that in 1929 the figure represents the value of product shipped or sold during the year whereas in the other years it represents the value of production at current prices.

It should be noted that the actual decline in the number of manufacturing establishments has not been as great as that indicated by the chart. The census enumerations for the periods covered do not include those establishments producing goods to the value of less than \$5,000. A considerable number of establishments with a value of product of \$5,000 or more in 1929 dropped below that figure in subsequent years, and hence were not included in the census enumerations. Also, the number of idle plants increased as production of those companies with multiple plants was concentrated in the more efficient units. The fact that such establishments, which were actually operating, were omitted has no particular bearing on the employment or value-of-product data since, if available, they would constitute only inconsequential fractions of these totals.

The "value of product" figures, as reported by the Bureau of the Census, include a large amount of duplication. The Bureau of the Census has estimated that the net value (at f. o. b. factory prices, not retail prices) of finished manufactured goods in the form in which they reach the consumer, was about two-thirds of the gross value of product reported by the census, or approximately \$21,000,000,000 in 1933.

NOTE.—Figures cover establishments with a value of product of \$5,000 or more.

Comparison of Summary Data from Census of Manufactures

## Changes by Industries

In order to bring out some of the more significant changes by industries, two special tabulations were prepared. One of these, showing the percentage change in the value of products, by industries for the period 1929 to 1933, permitted the preparation of the frequency distribution table (table 1). The other was a tabulation of those industries which reported a larger value of product in 1933 than in the preceding census year, 1931 (table 2).

Table 1 brings out the fact that while the decline from 1929 to 1933 for the 295 industries for which comparable data are available was 56 percent, the changes for individual industries ranged from large increases in the alcoholic beverage industries<sup>2</sup> to declines exceeding 90 percent for the locomotive (other than electric), not made in railroad repair shops, sand-lime brick, and lapidary industries.

Table 1.—Manufacturing Industries grouped according to Percentage Change in Value of Product, 1929 to 1933

Percentage group	Number of industries	Value of products (thous. of dollars)		Percentage change
		1929	1933	
<b>Increases:</b>				
Over 30.....	1	2, 448	24, 084	+883.8
20-30.....	1	20, 351	26, 373	+29.6
10-20.....	3	186, 441	215, 906	+15.8

40-50.....	67	18, 480, 167	10, 150, 308	-45.1
50-60.....	65	12, 086, 619	5, 467, 100	-54.8
60-70.....	55	11, 312, 300	4, 024, 265	-64.4
70-80.....	32	15, 063, 609	4, 056, 174	-73.1
80-90.....	12	2, 490, 835	398, 439	-84.0
90 and over.....	3	98, 771	7, 955	-91.9
Total of above industries.....	295	67, 826, 431	29, 815, 522	-56.0
Total of other industries <sup>1</sup> .....	12	.....	1, 543, 321	.....
Total of all industries.....	307	69, 960, 910	31, 358, 840	-55.2

<sup>1</sup> No comparable data are available for these industries for 1929 because of shifts in classifications.

Aside from 3 liquor and allied industries, 4 industries are included in the groups with an increased value of product as compared with 1929 as follows: Matches; beet sugar; rayon and allied products; and needles, pins, hook and eyes, and snap fasteners. These 4 industries all reported a larger number of wage earners and a larger value of product in 1933 than in 1929, although only the beet sugar industry reported a larger pay roll. The gain in the beet sugar industry for wages (8.6 percent) was about half as large as the relative increase in the value of product. The match industry, with an increase of 29.6 percent in value of product, had a pay-roll decrease of 2 percent, while the other two reported increases in the value of product of 5 and 3 percent, respectively, and decreases of 14 and 12 percent in the amount of wages paid. The progress of the rayon industry during the depression has been particularly impressive.

Industries reporting a decline of 30 percent or less in value of product between 1929 and 1933 numbered 24, and the combined value of product of these industries was equal to 7 percent of the total value of product in 1933 for the 295 industries for which comparable statistics are available. The modal group,

<sup>2</sup> The malt-liquor industry, with a value of product of \$342,947,000, accounted for an important part of the value of product reported for the 12 industries shown in table 3, for which comparable 1929 data are not available.

which includes one-third of the 1933 total value, reflects a drop of 45 percent. The industries in the highest three groups—those with a decline of over 70 percent—are mainly the durable-goods industries and those producing luxury or semiluxury articles.

## Industries Reporting Increases in 1933

Since industries able to report improvement during a period in which the general trend of production and distribution is downward are of particular interest, comparative figures for those industries which reported a higher value of product in 1933 than in 1931 are detailed in table 2. Of the industries for which comparable data are available, 28 were included in this category.

While a rather diversified group of industries will be found in this tabulation, those of the consumer-goods type predominate. Several of the textile and allied products industries are included, a condition resulting from the improvement in output in 1933 as well as the promptness with which prices for such products rose after the depression low was reached in the first quarter of that year.

Table 2.—Industries Showing an Increase in Value of Products, 1933 over 1931

Industry	Value of products (thous. of dollars)		Percentage change
	1931	1933	
Asphalted felt-base floor covering.....	19, 993	22, 714	13.6
Belting and packing leather.....	14, 522	14, 880	2.5
Boxes, paper, n. e. c.....	217, 872	223, 004	2.4
Buttons.....	21, 525	22, 412	4.1

Liquors, vinous.....	949	24, 084	2, 437.8
Malt.....	19, 242	27, 923	45.1
Matches.....	18, 473	26, 373	42.8
Minerals and earths, ground or otherwise treated.....	7, 295	9, 684	32.7
Nails, spikes, etc., not made in wire mills or in plants operated in connection with rolling mills.....	6, 828	6, 973	2.1
Needles, pins, hooks and eyes, and snap fasteners.....	20, 342	22, 758	11.9
Rayon and allied products.....	132, 632	156, 932	18.3
Saddlery, harness, and whips.....	9, 339	10, 364	11.0
Sausage, meat puddings, headcheese, etc., and sausage casings, not made in meat packing establishments.....	84, 333	86, 438	2.5
Smelting and refining, nonferrous metals other than gold, silver, and platinum, not from the ore.....	34, 695	41, 123	18.5
Steel barrels, kegs, and drums.....	21, 644	30, 399	40.5
Sugar, beet.....	85, 073	127, 133	48.4
Sugar, cane, not including products of refineries.....	13, 981	18, 233	30.4
Surgical and orthopedic appliances and related products.....	51, 012	51, 442	.8
Wool pulling.....	7, 378	10, 226	38.6
Wool shoddy.....	5, 952	10, 477	76.0
Total of specified industries (28).....	1, 835, 593	2, 090, 776	13.9
Total of all industries.....	41, 038, 402	31, 358, 840	-23.6

## Ratio of Wages Paid to Value Added by Manufacture

Although the summary totals indicated that the ratio of "wages paid" to "value added by manufacture" for all industries did not alter appreciably for the census periods subsequent to 1929, it was decided to examine the individual industries to determine whether this over-all average was representative. Two sample groups of industries were selected—those in which the value added by manufacture in 1933 was in excess of \$100,000,000 and a second group of the smallest industries; that is, those in which the value added by manufacture was less than \$5,000,000 in

1933. In the former group were 32 industries for which comparable data were available for 1929 and 1933, and in the latter, 75 industries. The industries examined thus constituted more than a third of the total.

These data fail to indicate a definite shift in either direction in the ratio of wages to the value added by manufacture between 1929 and 1933; and, further, do not indicate any marked difference in the trend between these two census periods when comparing the larger and the smaller industries. In the former group, 19 industries showed a higher ratio of wages paid in 1933 than in 1929, while for 13 industries the ratio was lower. For the 75 industries in the small-industry group, the ratio was higher for 40, lower for 34, and unchanged in 1 instance.

The industries in the group with value added by manufacture of \$100,000,000 and more (table 3) contributed about four-fifths of the value added by manu-

facture by all industries. In this group there were only 9 industries in which the change in the ratio from 1929 to 1933 was more than 4 points. The widest change was in the steel-works and rolling-mill products industry, in which the ratio increased from 47.1 percent in 1929 to 57.3 percent in 1933. Substantial increases were also reported in the ratio for bread and other bakery products, petroleum refining, and silk and rayon goods. For the other five industries in the group to which reference has been made—cotton goods, glass, manufactured ice, motor-vehicle bodies and parts, and rayon and allied products—the ratio of wages to value added declined.

The cigarette industry, in which the ratio of wages to value added was the lowest for the industries tabulated for the purpose of this article, increased from 7.2 in 1931 to 10.3 in 1933. Comparable data for value added by manufacture for 1929 are not available for this industry.

**Table 3.—Comparable Industry Statistics for Three Census Years, for Two Selected Groups of Industries, Showing the Ratio of Wages to the Value Added by Manufacture**

(In thousands of dollars)

Group	Value added by manufacture			Wages			Ratio		
	1929	1931	1933	1929	1931	1933	1929	1931	1933
Total all industries.....	31,783,010	19,357,643	14,610,401	11,607,287	7,173,232	5,261,576	36.5	37.1	36.0
Industries having a value added by manufacture of over \$100,000,000 in 1933 (32 industries).....	18,666,889	11,392,799	8,584,308	7,125,140	4,386,633	3,268,896	38.2	38.5	38.1
Percent of all industries.....	58.9	58.9	58.8	61.4	61.2	62.1			
Industries showing a larger ratio in 1933 than in 1929 (19).....	13,547,756	7,944,087	5,851,288	5,282,324	3,281,530	2,389,197	39.0	41.3	40.8
Industries showing a smaller ratio in 1933 than in 1929 (13).....	5,119,133	3,448,712	2,733,020	1,842,816	1,105,103	879,699	36.0	32.0	32.2
Industries having a value added by manufacture of less than \$5,000,000 in 1933 (75 industries).....	468,269	255,952	170,066	182,050	101,898	64,708	38.9	39.8	38.0
Percent of all industries.....	1.5	1.3	1.2	1.6	1.4	1.2			
Industries showing a larger ratio in 1933 than in 1929 (40).....	252,149	131,924	88,276	91,124	51,362	34,241	36.1	38.9	38.8
Industries showing a smaller ratio in 1933 than in 1929 (34).....	202,100	114,658	78,404	87,004	48,346	29,519	43.0	42.2	37.6
Industries showing no change between 1929 and 1933 (1).....	14,020	9,370	3,386	3,922	2,190	948	28.0	23.4	28.0

The value added by manufacture in the second group of small industries was between 1 and 2 percent of the total for all industries in each of the 3 census years, varying from 1.6 percent in 1929 to 1.2 percent in 1933. The ratio of wages to value added for these industries combined was 38.9 percent in 1929 and 38.0 percent in 1933. Considerably wider changes in the ratio occurred for these small industries than for the more important industries. A variety of causes undoubtedly contributed to these individual variations.

#### Labor Income from Manufacturing

The wage data, which have been used in computing the foregoing ratios, do not cover the total labor income from manufacturing industries. In 1933, salary payments, exclusive of those made to principal officers and employees of central administrative offices, amounted to \$1,357,000,000. The salary payments to the latter two groups probably amounted to an additional 50 percent of the reported item, this estimate being based on the more complete salary data assembled in the 1929 Census of Manufactures. Therefore, the total salary and wage payments in manufacturing in 1933 represented about one-half of the total value added by manufacture and about 23 percent of the total value of product. Of the total value of manufactured product, 53 percent was represented by the cost of materials, containers, fuel and purchased electric energy, which figures also include a large but indeterminate labor cost. Furthermore, the remaining 24 percent over and above the cost of the above-mentioned materials and direct salary and wage payments includes important direct or indirect labor payments

for such items as advertising, insurance, and taxes. Thus, while the total labor income from manufacturing cannot be directly computed from the census data, it is considerably higher than the direct wage costs reported.

#### Number Employed Rose Rapidly in 1933—5 Percent Gain in 1934

Employment statistics collected in the census reveal an increase in the number of wage earners employed by manufacturing industries from 5,147,190 in March 1933 to just under 7,000,000 in September. The December 1933 total was some half million less than the figure at the end of the third quarter.

These figures emphasize a fact that is often lost sight of, that is, that the number of persons engaged in manufacturing industries constitutes less than one-fourth of the total number employed in all industries and occupations. The importance of the figures on factory employment, which are widely used as a current business indicator, lies in the barometric nature of the manufacturing industries.

Estimates based on these census statistics, and the monthly data collected by the Bureau of Labor Statistics, indicate that there was an increase of 5 percent in the number of wage earners engaged in manufacturing between December 1933 and December 1934, the number increasing from 6,456,105 in 1933 to 6,779,000 in 1934. Sample data collected by the Bureau of Labor Statistics indicate that wage payments by manufacturing industries in 1934 were probably one-fourth larger than the \$5,262,000,000 wage payments of 1933.

<sup>1</sup> Computed by the Federal Reserve Bank of Philadelphia and represent revisions of data that appeared in previous issues. The revisions consist mainly of the usual adjustment of the current indexes to the changes shown by the biennial Census of Manufactures for 1931 in order to reflect more fully such factors as the establishment of new plants and the permanent closing of old plants. Indexes for the years 1923 to 1930 had previously been adjusted to agree with the trend disclosed by the more complete Census figures. For data prior to 1930, refer to page 19 of the September 1933 issue of the Survey for the States of Pennsylvania, New Jersey, and Delaware and the city of Philadelphia, and page 18 of the January 1934 issue for the city of Pittsburgh.

<sup>2</sup> Computed by the U. S. Department of Labor, Bureau of Labor Statistics, and represent a revision of statistics that were formerly published in the Survey. The revision was made to adjust the trend to the annual Census data collected by the Bureau of the Census for the years 1929 and 1933. For a complete description of the coverage of these industries and the method used in computing these indexes, see pages 20 to 23, inclusive, of the November 1934 issue of the "Trend of Employment", published by the U. S. Department of Labor. Data for 1929 are as follows: Employment, wholesale trade, Jan. 97.7, Feb. 96.9, Mar. 97.3, Apr. 97.9, May 99, June 99.2, July 100.4, Aug. 101.3, Sept. 101.9, Oct. 102.9, Nov. 102.9, and Dec. 102.6; retail trade, Jan. 97.2, Feb. 95.4, Mar. 97.4, Apr. 97.6, May 98.6, June 99.3, July 97.3, Aug. 98.7, Sept. 100.6, Oct. 102, Nov. 104.2, and Dec. 111.9. Pay rolls, wholesale trade, Jan. 96.7, Feb. 96.4, Mar. 98.5, Apr. 97.8, May 99, June 98.6, July 100.5, Aug. 100, Sept. 103.3, Oct. 102.7, Nov. 101.9, and Dec. 104.7; retail trade, Jan. 95.9, Feb. 95.1, Mar. 97.3, Apr. 97.2, May 98.2, June 99.8, July 98.8, Aug. 99.2, Sept. 101.7, Oct. 103.2, Nov. 103.3, and Dec. 109.7.

# Monthly Business Statistics

The following summary shows the trend of industrial, commercial, and financial statistics for the past 13 months. Statistics through December 1931 for all series **except those marked with an asterisk (\*)** will be found in the 1932 Annual Supplement to the Survey of Current Business, together with an explanation of the sources and basis of the figures quoted. Series so marked represent additions since the Annual was issued and similar information, if published, will be found in the places noted at the bottom of each page. Later data will be found in the Weekly Supplement to the Survey.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* New series. See p. 18 of the March 1933 issue, marketings (quantities).

† Revised series. For earlier data see p. 19 of the October 1933 issue.

‡ For 1933 revisions of the combined index and automobile and steel ingot production indexes see p. 22 of the August 1934 issue.

§ Revised. Preliminary.

¶ Series revised. For earlier data see p. 19 of the January 1934 issue. Revisions did not change the combined indexes except for a few months and in these instances by slight amount.

• Index of automobile and iron and steel production revised for 1933. See p. 22 of the September 1934 issue for a complete record of the revisions.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934

\* Revised.

† Preliminary.

\* New series. See pp. 16-19 of the May 1934 issue, cash income for marketings of agricultural products and p. 19 of the December 1932 issue, Fairchild price index.

‡ Data for Feb. 15, 1935: Total 111, chickens and eggs 119, cotton and cottonseed 108, dairy products 121, fruits 90, grains 114, meat animals 105, truck crops 188, miscellaneous 101.

† Index of farm prices has been completely revised. For earlier data see p. 20 of the November 1934 issue. Revised total, rubber adjusted and sugar adjusted indexes for January 1927-June 1932, appeared on p. 20 of the September 1932 issue. Cash income for marketings of agricultural products revised from July 1933-June 1934. See p. 23 of the September 1934 issue.

\* The data on retail prices of food until Aug. 15, 1933, were reported as of the 15th of each month. From then on the prices have been reported every 2 weeks. The monthly figures for months subsequent to August 1933 represent the figure nearest to the 15th of the month.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* New series. For earlier data on building costs, American Appraisal Co., refer to p. 20 of the August 1933 issue. N. I. R. A. highway work started in September 1933; see November 1934 issue for beginning of series. First Home Loan Bank loan data were issued for December 1932. See special note below on foreclosures.

† Revised series. See p. 20 of the October 1933 issue, Magazine lineage. Data on Public Works funds allotted revised from August–December 1934 to include funds allotted from the 1935 Public Works funds.

§ Index as of Feb. 1, 1935, 196.0.

• Compiled by the Federal Home Loan Bank Board and represent the number of foreclosures on all types of properties in 1,013 identical communities in 48 States having 53 percent of the population of the United States. Data prior to October 1933 not published. Comparable annual totals for 1926, 65,857; 1932, 210,821; and 1933, 209,003. Data were not compiled for other years. Months subsequent to September 1934 were computed by means of a link relative to keep series comparable since the figures for these months are from a slightly different number of communities.

• Revised.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised. † Preliminary.

\* New series. For description of Chain Store Age indexes see p. 19 of the December 1932 issue. Comparable data of H. L. Green Co., Inc., sales prior to July 1933 not available. For earlier data on automobiles see p. 19 of the April 1934 issue and variety store sales p. 18 of the March 1934 issue. Data prior to October 1933 on collections not published. Data are currently being received from about 400 stores on open accounts and about 250 on installment accounts. New series on air mail not available prior to May 1934. Series on basis of weight carried was published in the Survey for the period February 1926 to December 1933. For earlier data on department store sales by Federal Reserve districts, see p. 26 of the February 1935 issue. Note that the combined index of department store sales is computed by the Federal Reserve Board and the district indexes are computed by the Federal Reserve banks. For districts not marked by an asterisk the series are as previously published.

† Revised series. For revisions refer to the indicated pages of the monthly issues as follows: Apparel sales index of Chain Store Age, p. 26, October 1933. Combined index and grocery index of Chain Store Age have been revised for period January 1932 through August 1934. See footnote on p. 26 of the November 1934 issue.

\* New York Evening Post series on newspaper advertising in 22 cities is available for the period 1916 through January 1933. See the 1932 annual supplement and monthly issues prior to December 1934.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey

$\dagger$  Less than 1 million. Data shown in thousands appeared in the Oct. 1934 issue. Joint-stock land banks in liquidation. These figures will no longer be reported.

\* Not available.  $\Delta$  Revised.

\* New series. For earlier data on the following subjects refer to the indicated pages of the monthly issues, as follows: Pay rolls, banks, brokerage houses, etc., p. 19, June 1933; pay rolls in dyeing and cleaning establishments and laundries, p. 19, June 1933; factory weekly earnings, p. 20, October 1932; factory hourly earnings, p. 18, December 1932; weekly earnings, Massachusetts, p. 18, December 1932; construction wage rates, p. 19, September 1933. Earlier data on additional series of agricultural loans outstanding will be shown in a subsequent issue.

$\dagger$  Revised series. For revisions on the following subjects refer to the indicated pages of the monthly issues, as follows: Pay rolls of banks, brokerage houses, etc., for 1932, p. 29, January 1934; Massachusetts weekly earnings for 1931, 1932, and 1933, p. 19, August 1933 issue; pay rolls in laundries and dyeing and cleaning establishments, p. 20, August 1934; factory weekly and hourly earnings revised for 1933. See p. 20 of the July 1934 issue. Certain classes of loans included in figures shown through May 1934 have been reclassified by FCA and removed from the agricultural loan category. For revised data on pay rolls in wholesale and retail trade for 1929-34, inclusive, see p. 20 of this issue.

$\Delta$  Beginning with March 1932 method of computing rates was changed.

$\Delta$  Increase in wage rates during March 1934 was due to provisions of title I, sec. 204, par. 2, item C of the National Recovery Act, which required State highway departments to fix minimum wage scales.

$\Delta$  Construction wage rates as of Feb. 1, 1935, common labor, \$0.524; skilled labor, \$1.10.

$\Delta$  Breakdown of figure shown in issues up to November 1934.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised. \* Rate changed Oct. 20, 1933, and Feb. 2, 1934.

\* New series. Earlier data for Federal Reserve member banks shown on p. 18 of the January 1934 issue except as noted below. These data cover 90 cities and supersede the previous data for 101 cities. They are available only from January 1932 to date. One additional city has been added in 1934 to offset the dropping of 1 bank which discontinued reporting. New series on brokers' loans not available for periods not shown. For brokers' loans by reporting New York City member banks see November 1934 and previous issues. See special notes below on Federal Reserve member bank loans and investments.

† Figures subsequent to December 1933 represent gold certificates on hand and due from U. S. Treasury, plus redemption fund—Federal Reserve notes, \$35,138,000 on Feb. 28, \$32,748,000 on Mar. 31, \$31,400,000 on Apr. 30, \$30,000,000 on May 31, \$25,724,000 on June 30, \$24,056,000 on July 31, \$24,000,000 on Aug. 31, \$21,798,000 on Sept

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

▲ Or exports (—).

‡ Deficit.

‡ Preliminary.

‡ Quotation based on paper peso instead of gold peso as formerly. Former equivalent to 44 percent of latter. See note on p. 56 of the March 1934 issue.

‡ Decision of Treasury and Federal Reserve to omit gold coin from circulation figures as of Jan. 31, at which time it was carried as \$287,000,000, is not reflected in the January total, which is the daily average figure for the month. Large increase in February 1934 resulted from revaluation of the dollar to 59.06 percent of former gold content.

‡ New series superseding old series which covered the physical movement only. For earlier data see p. 20 of December 1932 issue, net gold imports.

† Revised series. For earlier data see pp. 18 and 20 of the July 1933 issue, insurance written and admitted assets; p. 18 of the June 1933 issue, premium

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934

\* Revised.

† New series. For earlier data see p. 20 of the August 1933 issue, Reconstruction Finance Corporation excepting the item "other loans" which appears first in December 1934 issue and p. 20 of the June 1933 issue, U. S. Government bond prices.

‡ Reconstruction Finance Corporation data have been revised for the year ended June 1934. Revised figures for period October 1933-June 1934 was shown on p. 33 of the Dec. 1934 issue shown; July-September 1933 revised figures have not been published. Figures subsequent to June 1934 are preliminary. Revised series for July 1931-February 1933 appeared on pp. 19 and 33 of the April 1933 issue (domestic bond prices).

§ This excludes relief grants to States by the R. F. C. under the Emergency Relief Act of 1933 upon certification of grants by the Federal Emergency Relief Administrator. These amounted to \$499,650,000 on Jan. 31, 1935, and \$500,000,000 disbursed for relief purposes under Emergency Appropriation Act of 1935.

¶ Includes \$2,808,221.138 for February, \$2,233,252 for March, \$409,051 for April, \$298,868 for May, \$213,447 for June, \$272,163 for July, \$268,204 for August, \$134,843 for September, \$173,702 for October, \$116,555 for November, \$132,296 for December, and \$123,639 for January representing the increment resulting from reduction in weight of gold dollar.

• The figure for expenditures includes \$2,000,000,000 exchange stabilization chargeable against increment in gold.

• Series revised to include emergency expenditures. Figures as shown in Survey

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* New series. For earlier data see p. 20 of the August 1934 issue, yield on United States domestic long term bonds (all issues except those due or callable within 8 years). See special note below on yield on U. S. Treasury bills.

† Revised series. For earlier data see pp. 19 and 33, of the April 1933 issue, yield on domestic and municipal bonds.

‡ Data revised for 1932. See p. 34 of the March 1933 issue. Other revisions for the year 1932 were shown on p. 34 of the April, May, December 1933, and January 1934 issues. For revised data for months of 1933 see p. 20 of the September 1934 issue.

• Monthly data on yields from 91-day bills for period December 1929 to May 1934 are shown on p. 20 of January 1935 issue. Data on yields from 182-day bills not available prior to February 1934.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey

° Revised. ° Preliminary.

\* New series. Data on airplane travel covers scheduled airlines operating in United States. For data on passengers carried for period of 1926 to 1933 and passenger-miles flown from 1930 to 1933, see p. 20 of the February 1934 issue. For data on miles flown and express carried from 1926 through 1933, see p. 19 of the January 1935 issue.

† Revised series. For earlier data see p. 20 of the April 1934 issue for operating revenues, operating expenses, and net railway operating income of class I railways. For revisions of data for clearances of vessels in foreign trade, see p. 36 of the September 1934 issue.

# Preparation of report turned over to Federal Communications Commission which has not yet compiled its initial report.

† New series. Data for the years 1925-33 will be shown in a subsequent issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* New series. For earlier data see p. 20 of the April 1933 issue (crude methanol) and p. 19 of January 1934 issue (explosives).

† Figures revised due to dropping of Missouri from Southern States classification. See p. 19 of the January 1934 issue for earlier data.

‡ See footnote on p. 35 of this issue. Monthly revisions for 1933 are shown on p. 20 of the October 1934 issue.

§ Revised series, see p. 36 of the June 1933 issue, for 1932 revisions, exports and imports of fertilizer and imports of vegetable oils; for 1933 revisions on exports see p. 20 of the September 1934 issue; for revised data for crude methanol production for 1933, see p. 36 of the May 1934 issue; quarterly data for the years 1932 and 1933 also revised. See p. 19 of this issue.

• Texas only. Louisiana produced 23 percent of United States production in 1933.

▲ The refined equivalent of crude production is approximately 82 percent.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934

\* Dec. 1 estimate.

\* For earlier data on lard compound price see p. 18 of the January 1934 issue. Data not available for cellulose products prior to January 1933.

† Revised series. For year ended July 1932 see p. 20 of the February 1933 issue, and year ended July 1934 see p. 38 of the November 1934 issue, revisions for each month of 1933 were shown when monthly data for 1934 became available, cottonseed, and for the year of 1932 see p. 37 of the June 1933 issue, exports of cottonseed cake and meal. Data revised for 1933; see p. 19 of the September 1934 issue; quarterly data shown on this page for the years 1932 and 1933 also revised. See p. 19 of this issue.

§ Since March 1932, detailed figures are not strictly comparable owing to changes in firms reporting.

# See footnote on p. 35 of the October 1934 issue. Data revised for 1933; see p. 20 of the October 1934 issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised. \* Preliminary.

\* New series. For earlier data see p. 19 of the May 1933 issue, manufactured and natural gas, and p. 19 of the June 1933 issue, butter consumption. Beverage figures are from the U. S. Bureau of Internal Revenue monthly data on distilled spirits available beginning July 1933 and on fermented malt liquors, April 1933. New series. Data on consumption of rectified spirits, as indicated by the sale of stamps. Earlier data not published.

† For revised data for electric-power production for 1932 see p. 38 and 56 of the May 1933 issue; for 1933 see p. 38 of the May 1934 issue; for manufactured gas for 1932 and 1933 and natural gas for 1931, 1932, and 1933 see p. 20 of the May 1934 issue; for butter production for 1931 see p. 20 of the January 1933 issue; for 1932 and 1933 butter consumption and 1933 butter production see p. 19 of this issue. Data consumption of distilled spirits revised to include brandy tax paid direct from fruit distilleries, revision for December 1933, 4359.

Consumption of rectified spirits figures plus ethyl alcohol withdrawn tax paid (see p. 36) equals Bureau of Internal Revenue total of distilled spirits withdrawn tax paid. Federal Reserve Bank of St. Louis

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

\* Dec. 1 estimate.

† Prices not available.

\* New series. For earlier data see p. 20 of the November 1932 issue, barley, receipts of milk in Greater New York, p. 20 of the August 1934 issue. Since the division of no. 2 barley by the Department of Agriculture into straight and malting grades as of July 1, 1934, prices for each grade have been reported separately.

† Revised series. For revisions refer to the indicated pages of the monthly issues, as follows: For 1931 on apparent consumption of cheese, production of total and American whole-milk cheese, and production of condensed and evaporated milk, p. 20, January 1933. For earlier data on stocks (cold-storage holdings) of total and American whole-milk cheese, p. 19, April 1933. For 1932 revised data on production of factory and American whole-milk cheese, production of condensed and evaporated milk, p. 39, September 1933. For subsequent revisions for 1932 on production of evaporated milk, p. 39, November 1933. For 1932 and 1933 revisions on cheese consumption and 1933 revisions on production of cheese, condensed and evaporated milk see p. 19 of this issue. For final revision for 1933, car-lot shipments of apples, citrus fruits, onions, and potatoes, see p. 20, January 1935 issue. For 1932 exports of rice, p. 39, June 1933. For revised figures on 1933 exports of grains (total barley, corn, and rice by months, see p. 2 of September 1934 issue.

# See footnote on p. 35 of this issue. Data for 1933 also revised, see p. 20 of the October 1934 issue.

§ Bulk evaporated milk not included since December 1931.

\* Represents the visible supply east of the Rocky Mountains as reported by Dun & Bradstreet.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised. Note major correction in data on imports of sugar from Cuba June-November 1934.

† New series. For earlier data, see p. 20 of the August 1934 issue, for receipts of refined sugar from Hawaii and Puerto Rico and imports from Cuba. Data prior to May 1934 not available on imports of refined sugar from the Philippine Islands.

‡ For revised data for 1932 on sugar meltings and stocks, see p. 41 of the May 1933 issue. For 1932 revisions of sugar imports and exports, see p. 41 of the June 1933 issue.

§ For revisions of exports in 1933, see p. 20 of the September 1934 issue.

# See footnote on p. 35 of this issue. Data revised for 1933. See p. 20 of the October 1934 issue.

! Data not available.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

† Preliminary.

‡ Revised series. For revisions refer to the indicated pages of the monthly issues, as follows: Exports of tobacco for 1932, p. 42, June 1933—data revised for 1933. See p. 20 of the September 1934 issue; 1932 final revision of anthracite and bituminous coal production, p. 42, January 1934; anthracite shipments for 1932, p. 42, December 1933; consumption of bituminous coal by electric power plants, p. 42, May 1933; beehive and byproduct coke for 1932, p. 43 of December 1933 issue and for 1933 revisions see p. 43, July 1934. Crude petroleum production, stocks, east of California (total), at refineries and at tank farms and pipe lines, and wells completed, for 1932. See footnote on p. 56, November 1933.

# See footnote on p. 35 of this issue. Data revised for 1933. See p. 20 of the October 1934 issue.

§ Price converted to short-ton basis. Data prior to November 1931 not published.

• Dec. 1 estimate.

§ Data revised for 1933. See p. 20 of the January 1935 issue.

• Beginning with August 1934 certain anthracite stocks were included which had not been covered in previous reports. The original figure for the end of August was 2,023,120 tons; revised for the month was, as shown, 2,197,411 tons.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Preliminary.

§ New series. For data on lumber exports for period of January 1919 to September 1932, see p. 20 of the November 1932 issue. For earlier data on leather stocks, see p. 19 of the January 1935 issue. New series on leather gloves and mittens cover 234 identical manufactures as reported to the U. S. Department of Commerce, Bureau of the Census. Data prior to July 1934 are not available. These data are not comparable with figures through January 1934 previously shown in the Survey.

§ Data revised for 1932, see p. 44 of the June 1933 issue, exports of Douglas fir lumber and timber.

§ Data for March, June, August, and November 1934 and January 1935 are for 5 weeks; other months, 4 weeks.

§ Data revised for 1933. See p. 20 of the September 1934 issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Temporarily discontinued.

\* New series. Earlier data on furniture activity, all districts, prior to April 1933 not published. For imports of iron and steel, see p. 20 of the November 1932 issue; for castings, p. 20 of the April 1933 issue. New series on iron and steel composite price are shown on p. 19 of the January 1935 issue.

† Data revised for 1932. For revisions, see p. 45, exports of southern pine lumber and timber, and p. 45, iron and steel, of the June 1933 issue. Data revised for 1933; see p. 20 of the September 1934 issue.

‡ Revised. Data prior to April 1933 not published.

§ Beginning with January 1934 the report includes all known operators. Prior to this time approximately 89 percent of the listed capacity was included.

• Imports from Cuba not included.

# See footnote on p. 35 of this issue. Data revised for 1933; see p. 20 of the October 1934 issue.

1 Data for March, June, August, and November 1934 and January 1935, are for 5 weeks; other months, 4 weeks.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

† New series; for earlier data, see p. 20 of the December 1932 issue for tin and terne plate; p. 20 of the July 1934 issue for machine tools (including forging equipment).

‡ Revised series; for earlier data on new orders for electrical goods see p. 19 of the August 1933 issue.

§ Data on water systems now cover 49 companies. Data revised beginning January 1933. See p. 49 of the December 1934 issue.

¶ Data on exports revised for 1933; see p. 20 of the September 1934 issue.

\* Series covering shipments and unfilled orders temporarily discontinued.

† Data for 1932 revised; for revisions see p. 48 of the June 1933 issue, exports of refined and total imports of copper. For 1933 revisions on zinc, see p. 49 of the January 1934 issue; for 1934 revisions see p. 49 of the February 1935 issue.

‡ See footnote on p. 35 of this issue. Data for 1933 revised; see p. 20 of the October 1934 issue.

§ Discontinued.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

† New series. For earlier data on hand-type vacuum cleaners see p. 20 of the August 1934 issue. Data prior to October 1931 not published on brass plumbing fixtures.  
 ‡ Revised series. For earlier data see pp. 18, 19, and 20 of the November 1933 issue for chemical, mechanical wood pulp, and total paper; p. 49 of the June 1933 issue for 1932 for chemical wood pulp imports; and p. 19 of the December 1933 issue for book paper.

# See footnote on p. 35 of this issue. Data for 1933 revised. See p. 20 of the October 1934 issue.

§ Beginning with January 1934 figures have been compiled by the Code Authority of the Ingot Brass and Bronze Industry. The figures are more complete than those on deliveries previously shown. Shipments of the concerns formerly reporting contribute about 80-85 percent of the total for the present series.

|| The Code Authority for the Paper Industry is expected to shortly resume publication of some of these paper figures.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

† Revised series. For earlier data see pp. 19 and 20 of the December 1933 issue for writing, wrapping, and other grades of paper; for 1932 revisions, p. 50 of the June 1933 issue for crude rubber imports; and for 1932 revisions, p. 50 of the May 1933 issue for world and United States stocks. Data on consumption of rubber for tires revised for 1932, 1933, and 1934. For revisions see p. 51 of the August 1934 issue.

‡ The Bureau of the Census has changed the title of the "Boxboard" report to "Paper board" since data actually cover all board of an inch or more in thickness reported by the cooperating manufacturers. The difference between this series and the paper board data on production and shipments given at the top of the page (marked with a "+") is that the latter are based on sample data supplied by the American Paper and Pulp Association which have been ratioed up to a total for the industry, using the annual complete census data of the Bureau of the Census. Figures given on production, operations and new and unfilled orders are for 94 identical manufacturers; shipments and finished stocks are for 78 manufacturers and consumption and stocks of waste paper for 82 manufacturers.

§ Data for 1934 are estimated to represent approximately 97 percent of the industry; data are estimated to cover 79 percent of the industry for 1929-33, inclusive, and 75 to 80 percent prior to 1929.

¶ See footnote on p. 35 of this issue. Data for 1933 revised. See p. 20 of the October 1934 issue.

\* New series. See p. 19 of the December 1933 issue for the complete paper-board series. New series on paper board shipping boxes compiled by the Container Code Authority, Chicago, Ill., from reports from all members of the industry of record beginning in January 1934. The volume of companies not reporting each month is estimated by the Code Authority, so as to keep the series comparable. The solid fiber figures are complete as reported. Prior to January 1934 data covering this industry were compiled by the Paper Board Industries Association.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

\* New series. Earlier data not published on rubber heels and soles prior to December 1932, and on illuminating glassware prior to July 1932 (except production and percent of capacity); for earlier data see p. 20 of the June 1933 issue, face brick, machine production.

§ Census Bureau has comparative summaries for 2 months only on structural clay products. Series not comparable over 13-month period.

† Adjusted for degrading and year-end physical inventories.

‡ Revised data for 1933 represent total production for the United States.

\* Series on glass containers are not comparable for 1934 and earlier years due to increase of number of firms reporting to 44. Shipments of the 44 firms for the year of 1933 amounted to 33,056,706 compared with 23,511,963 for the 30 firms reporting a year ago. Comparable statistics on shipments for the companies, now reporting by years, from 1925 to date were as follows (in gross): 1928, 31,943,016; 1929, 33,765,896; 1930, 31,905,933; 1931, 31,413,503; 1932, 26,947,949; and 1933, 33,048,747. Data are not available for this period on production and stocks, nor are monthly figures on shipments available. It may be noted from the trend of these data that the monthly figures prior to 1934 had a downward bias. Basis of estimating capacity was changed in computing the new series.

\* In October 1933 4 new companies were included in the report and 1 additional company in January 1934. Since that month, the coverage of the industry is 100 percent. For preceding periods the coverage varied but was about 80 percent. Overlapping figures are available for October 1933. See the October 1934 issue for October 1933 data; for the smaller number of firms

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934

\* Revised. † As of Dec. 13. ‡ As of Jan. 16. / Final estimate. \* Preliminary.

\* New series. For earlier data on gypsum, see p. 20 of the January 1933 issue; the new series on hosiery compiled by the Hosiery Code Authority and are estimated to represent 95 percent of the industry. The revised data on hosiery presented in the October 1934 issue are based on a check of the data previously reported, made by the Code Authority. Data on cotton cloth finishing are from the National Association of Finishers of Textile Fabrics and cover practically all the industry; comparable figures are not available prior to December 1933; the production statistics are prorated from data for 4-week periods; stocks are as reported at end of each 4-week period.

† For revisions for crop years 1931-32, 1932-33, and 1933-34, see p. 52 of the October 1933 issue, p. 52 of the September 1933 issue, and p. 53 of the October 1934 issue, respectively.

‡ For revisions of cotton consumption domestic stocks and spindle activity for the year ended July 1932, see p. 20 of the February 1933 issue, and for cotton consumption domestic stocks and spindle activity for the year ended July 1933, see pp. 52 and 53 of the November 1933 issue. For revision of cotton stocks and spindle activity for year ended July 1934 see p. 52 of the October 1934 issue. Data on hosiery revised by the Code Authority. Revised data for the months of 1933 previously shown in the Survey, and comparable data on shipments back to 1929 will be shown in a subsequent issue.

§ Data revised for 1932; for revisions, see p. 53 of the June 1933 issue. Data revised for 1933; see p. 20 of the September 1934 issue.

¶ See footnote on p. 35 of this issue. Data revised for 1933; see p. 20 of the October 1934 issue.

• Stocks at end of 4-week periods through June 16. July figures are averages for July 14 and Aug. 11. August figure as of Sept. 8. Subsequent data for succeeding 4-week periods.

† No quotation

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of data, may be found in the 1932 Annual Supplement to the Survey	1933	1934

<sup>a</sup> Revised. <sup>†</sup> Preliminary. <sup>‡</sup> See footnote on p. 35 of this issue.

<sup>b</sup> Since July 1934 report has been on a weekly basis. Data for September and December, are for 5 weeks; other months, 4 weeks. Figures for July and succeeding months are computed from Census Bureau figures so as to represent 100 percent of the wool industry.

<sup>c</sup> Data revised for 1932. For revisions see pp. 53 and 54 of the June 1933 issue. Data also revised for 1933; see p. 20 of the October 1934 issue.

<sup>d</sup> Compiled by the Silk Code Authority (The National Federation of Textiles, Inc.) and represent the percentage of operations based on an 80-hour week (2 shifts of 40 hours each). Data are not comparable with the series previously shown in the Survey which were based on a smaller sample and computed on the basis of a 48-hour week.

<sup>e</sup> New series. Silk spindle activity, compiled by Silk Throwing Code Authority; not comparable with spinning data previously shown. For earlier data on silk piece goods (stock-carrying mills only) see p. 20 of August 1934 issue.

<sup>f</sup> Beginning with the July 1934 report the statistics are reported on the basis of 4 and 5 weeks, the weekly distribution being determined by the Saturdays. The statistics presented herewith are still based on the pre-code computed normal (currently based on the single-shift performance over the 5-year period 1928-32). The current data represent practically complete coverage of the industry. No allowance for holidays in Jan. 1934; Jan. 1935, and Dec. 1934. Conversion will be made for earlier months (since effective date of code) at a later date.

<sup>g</sup> Foreign receipts for year 1934 are compiled by U. S. Department of Agriculture and are not comparable with data carried through December 1933. This results in a total figure which also is not comparable with earlier data.

<sup>h</sup> Compiled by Bureau of the Census and represent stocks of raw wool held by all dealers, topmakers and manufacturers who usually hold significant stocks of wool.

<sup>i</sup> Grease equivalent of shorn wool, plus actual weight of pulled wool. Conversions are based on totals; second wool is multiplied by 2 and pulled wool by 1½. Includes clothing and carpet wools.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935		1934

° Revised. † Preliminary.

\* New series. For earlier data see p. 20 of the February 1934 issue for total shipments, accessories and parts, and registrations of new commercial cars.

† Revised series. For earlier data see p. 19 of the August 1933 issue for fire extinguishers and passenger-car registrations; and p. 55 of the June 1933 issue for 1932 exports locomotives. Data on automobiles revised for 1933. See p. 55 of the August 1934 issue.

Index of sales of new passenger cars is shown on p. 26 of this issue.

† Data revised for 1932. See p. 54 of the June 1933 issue. Data revised for 1933. See p. 20 of the September 1934 issue.

\* Taxicabs are included in figures for passenger cars, beginning January 1935 in order

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1935	1934

\* Revised.

° Deficit.

† New series. For earlier data see p. 18 of the February 1933 issue, business indexes, and p. 20 of the October 1933 issue, commercial failures.  
 ‡ Revised series. See p. 55 of the April 1934 issue, construction, and mining, for 1933. Series on common-stock prices revised back to December 1932 as a result of additional stocks being added; for revision see p. 56 of the April 1934 issue.

# Number of commodities changed from 502 to 567 beginning with month of January 1934.

§ Data revised from January 1932 through July 1933. Revision for 1932 see p. 55 of the November 1933 issue. For final revisions for 1933 see p. 56 of the October 1934 issue.

# INDEX TO MONTHLY BUSINESS STATISTICS

	Page		Page		Page
Abrasive paper and cloth	51	Fairchild retail price index	23	Oils and fats	37, 38
