SUMMARY OF CHANGES IN STATISTICAL SERIES SINCE PUBLICATION OF THE 1932 ANNUAL SUPPLEMENT

For convenience there is listed below a tabulation of the changes which have been made in the past 2 years. If back data have been presented for the new series, a reference to the monthly issues in which such statistics appeared may be found in the footnotes which are included on pages 22 to 56, inclusive.

NEW SERIES ADDED

DECEMBER 1932

Auto accessories and parts, composite index of shipments.
Canadian statistics, electric-power production index.
Chain-store sales index (Chain Store Age).
Civil service employment, United States.
Convection type radiators, new orders.
Department-store sales, Philadelphia.
Factory employment, Baltimore, Milwaukee, Maryland, and Massachusetts.
Factory pay rolls, Baltimore, Milwaukee, Philadelphia, Maryland, and Massachusetts.
Fairchild retail price index.
Gas oil and distillates, production and stocks.
Gypsum, imports, production and shipments.
Hourly earnings, factory (*National Industrial Conference Board*).
Illuminating glassware, new orders, production, shipments and stocks.
Mechanical stokers, new orders.
Net gold imports, including gold released from earmark.
Pyroxylin rods, sheets and tubes, production and shipments.
Plumbers' brass, shipments.
Plumbing fixtures, wholesale price.
Residual fuel oil, production and stocks.
Rubber heels and soles, total shipments.
Tin consumption in the manufacture of tin andterneplate.
Tin and terneplate production.
Trade union members employed, by groups.
Weekly earnings, factory, Massachusetts.
World prices, foodstuffs and raw materials.

JUNE 1933

Airplane travel, passengers carried, passenger miles flown.
Bond prices, United States Government (*Standard Statistics*).
Building costs, all types (*American Appraisal Co.*).
Employment, miscellaneous—Federal and State highways, construction and maintenance.
Face brick, machine production.
Factory employment, Chicago.
Factory pay rolls, New York and Chicago.
Farm products, price indexes of dairy and poultry products.
Household furniture, plant operations, all districts.
Lard compound, wholesale price, tierces, Chicago.
Lard, refined, wholesale price, tierces, Chicago.
Leather production (*Tanners' Council*).
Nonmanufacturing employment—banks, brokerage houses, etc.; dyeing and cleaning; and laundries.
Nonmanufacturing pay rolls—banks, brokerage houses, etc.; dyeing and cleaning; and laundries.
Rope paper sacks, shipments.

DECEMBER 1933

Cellulose plastic products, production and shipments of nitrocellulose and cellulose acetate sheets, rods, and tubes.
Construction wage rates (E.N.R.).
Highway construction under the National Industrial Recovery Act.
Home Loan Bank, loans outstanding.
H. L. Green Co., Inc., stores and sales.
Paper board, production and shipments.
Pittsburgh employment index.
Pittsburgh pay-roll index.
Purchasing power of the dollar.
Reconstruction Finance Corporation, loans outstanding.
United States Steel Corporation, shipments of finished products.

JUNE 1934

Agricultural loans outstanding (six series).
Agricultural products, cash income received from marketings of.
Beverages:
 Fermented malt liquors:
 Production, consumption, and stocks.
 Distilled spirits:
 Production, consumption, and stocks in bonded warehouses.
Cotton cloth (bleached, dyed, and printed), production and stocks.
Factory employment (*Bureau of Labor Statistics*).
Factory pay rolls (*Bureau of Labor Statistics*).
Imports for consumption.
Index of new-passenger-car sales.
Indexes of variety-store sales (new index).
Milk, receipts, Greater New York.
Registrations, commercial truck.
Silk machinery activity (*Silk Code Authority*).
Sugar, refined, imports and receipts from Hawaii and Puerto Rico.
Vacuum cleaners (hand type), shipments.

JULY 1934

Hosiery (*Hosiery Code Authority*).
Restaurant, total sales and stores (three chains).
Silk spindles (machine activity), *Code Administration Committee for the Throwing Industry*.

AUGUST 1934

Silk cloth, production, shipments, stocks.

SERIES DROPPED

DECEMBER 1932

Applicants at employment agencies, Western States.
Binders' board, production.
Construction volume (A.G.C.).
Copper:
 Production, all series.
 Shipments, domestic, refined.
 Stocks (North and South America), blister and refined.
ENAMELED sanitary ware, baths, lavatories, sinks, miscellaneous, all series.
ENAMELED sheet-metal ware, shipments.
Factory operations, proportion full time worked, miscellaneous group.
Galvanized sheet-metal ware, all series.
Gas and fuel oil, production and stocks (combined series).
Glass containers, unfilled orders.
Hides and skins, stocks, all series.
Illuminating glassware, orders, production, shipments, and stocks.
Industrial production indexes: Copper (mined), metals, nonferrous.
Iron and steel, boilers (round and square) and radiators, new orders.
Leather, sole and belting, production, stocks, all series.
Leather, upper, production, stocks, all series.
Lumber, walnut, orders, production, shipments, and stocks.
Methanol, stocks:
 At crude plants.
 At refineries and in transit.
Milk, condensed and evaporated, total exports, production, and stocks.
Newsprint, production, percent of capacity.
Paints, varnish and lacquer products, unclassified sales, 315 establishments.
Pine, North Carolina, production and shipments.
Pine-oil stocks.
Plumbing fixtures, wholesale price (six pieces).
Porcelain, nail knobs, tubes, shipments.
Stock indexes, world copper stocks.
Stokers, mechanical, large (see new series), new orders.

JUNE 1933

Bond prices, domestic, United States Liberty (*New York Trust Co.*).
Brick, face, production (brick drawn from kilns).
Building costs, by types of construction (*American Appraisal Co.*).
Cotton textiles, production, shipments, stocks, etc.
Farm products—price index of dairy and poultry products (combined index).
Glass containers, net new orders.
Gold, held under earmark for foreign account.
Hours of work per week in factories, nominal or full-time week (*National Industrial Conference Board*).
McLellan 5- and 10-cent stores (sales and stores).
Rope paper sacks, shipments.
Rubber, scrap, stocks at reclaimers.
Unemployment, applicants, at employment agencies.
Wool-machinery activity, sets of cards.

DECEMBER 1933

Animal glues, production and stocks.
Building cost index of electric light and power construction (*Richy*).
Building material costs, frame and brick house.
Castings, gray iron, orders, production, receipts, and stocks.
Explosives, production, shipments and stocks.
Fabricated structural steel, orders and shipments with percent of capacity.
Federal-aid highway, work approved for construction and balance of Federal-aid funds available for new construction (new work now paid for by funds appropriated under N.R.A.).
F. W. Grand, stores and sales (merged with H. L. Green Co., Inc.).
Hoists, electric, orders and shipments.
Index, new orders.
Index, unfilled orders.
Illuminating glassware, percent of full operation of orders, production, and shipments.
Isaac Silver & Bros., stores and sales (merged with H. L. Green Co., Inc.).
Paper board, production and shipments.
Plumbers' woodwork, orders, shipments, and stocks.
Pyroxylin products, production and shipments of sheets, rods, and tubes.
United States Steel Corporation, unfilled orders.
Yarn, carded sales, all series.

JUNE 1934

Bank suspensions.
Cotton cloth finishing.
Delinquent accounts, electrical trade.
Factory employment (adjusted and unadjusted) (*Federal Reserve Board*).
Factory operations, proportion of full time worked.
Factory pay-roll indexes (*Federal Reserve Board*).
Highway construction under the Federal Highway Act.
Indexes of five-and-ten (variety) stores sales (old index).
Marketings, forest products.
Milk, receipts, Greater New York.
Nonmanufacturing employment, canning and preserving.
Nonmanufacturing pay rolls, canning and preserving.
Paper, stocks, all grades, book paper, writing paper, wrapping paper, and all other grades of paper.
Restaurant sales and stores operated:
 Childs Co.
 J. R. Thompson Co.
 Waldorf System, Inc.
Rope paper sacks.
Sugar, Cuban, raw, receipts at ports and exports.
Silk machinery activity (*Silk Association of America*).
Wood-pulp stocks.

JULY 1934

Hosiery, Census Bureau series.

Business Situation Summarized

CONTRACTION in business activity during July was in excess of the usual seasonal decline, and weekly data available for August indicate a continuation of the sagging tendency.

The major influence in the large drop in the Federal Reserve Board's adjusted production index for July was the precipitous decline in steel mill operations which was in part the result of the maintenance of a rate of production in the second quarter beyond consumption requirements. Other industries in which greater-than-seasonal declines occurred in July include lumber, automobile, rubber, and tobacco manufacturing. Activity in the textile industries declined slightly in accordance with the usual trend, following the general curtailment enforced during the preceding month. Production in the leather and leather products industries expanded by the usual seasonal amount, while there was an extraseasonal gain for the food products industry, due mainly to the large increase in meat packing resulting from the drought. The output of the mineral industries declined.

Employment and pay rolls in July followed the downward trend of production and distribution. Factory employment was lower by 3 percent, while pay rolls dropped 6.8 percent. The recession in employment extended to 70 of the 90 industries surveyed. There was a decline also in nonmanufacturing industries.

Retail trade showed little net change after allowing for the usual trend. The adjusted index of department store sales declined 1 point to 73 percent of the 1923-25 average. The decline in freight-car loadings

was contrary to the usual seasonal movement, the adjusted index dropping to the lowest point since last November. The adjusted index of exports and imports also declined, the latter falling below the figure for July 1933.

Construction contracts awarded have receded by about the usual seasonal amount as a result of the drop in publicly financed contracts. During July there was an increase in privately financed construction which amounted to about 25 percent.

Despite the losses caused by the drought, the Department of Agriculture estimates that cash income from farm marketings (including rental and benefit payments) in the calendar year 1934 will be approximately one-fifth higher than the \$5,051,000,000 realized in 1933. It is estimated that income for the last 5 months of the year will be from 3 to 5 percent above a year ago, on account of higher prices. Obviously, however, the income will not be as evenly distributed throughout the country as last year.

Wholesale prices have risen steadily in recent weeks as the effects of the drought were reflected in the prices of farm products and foods. The price index of all other commodities has moved slightly lower.

Financial markets have undergone no marked change during August. Of particular interest, however, was the export of gold following the decline in dollar exchange, the first outward movement since early 1933. Outstanding loans of the member banks have declined further, although there has been a moderate improvement in "all other" loans.

Comparison of Principal Data, 1930-34

Commodity Prices

RECENT price data are featured by the rise of the prices of agricultural products and foods as a result of the drought. The farm products component of the wholesale price index of the Department of Labor for the week ended August 18 stood at 68.9 percent of the 1926 level, having advanced from 60.7 in the week of June 9, and the foods component during this period advanced from 67.6 percent to 74.1 percent of the 1926 prices. The percentage gains in the indexes of these two groups were 14 and 9.6, respectively, for this 10-week period.

The average of the other eight components of the combined index has remained practically unchanged during these 10 weeks, the only significant changes being a decline of 3 points in the index for hides and leather and a decline of 1.9 in the index of metals and metal products. The fuel and lighting index rose 1.4 points during this interval.

Moody's spot price index of 15 commodities dealt in on organized markets reached a new high on August 23, at 154.6 on the basis of 100 for December 31, 1931. This was 11.4 points above that for July 31, 28.6 points above the level for the 1st of January, and 5.7 and 50.7 points above the highs for 1933 and 1932, respectively. The recent increase in this index is attributable to the increase in the prices of domestic agricultural products—wheat, corn, cotton, and hogs.

The prices of the other 11 commodities have changed but little since the beginning of May, with the exception of the price of hides which has declined sharply, due to the heavy slaughter of animals. Hogs sold in Chicago on August 23 for \$7.40 per hundred pounds, the highest price recorded since August 1931.

Retail prices, excluding foods, as measured by the Fairchild index, declined during July for the fourth consecutive month, the index falling from 89.6 percent of the January 1931 level in March to 87.9 in July, the declines varying from 0.8 of a point in May to 0.2 in April. The current index is 27 percent above the depression low of April 1933.

Retail prices of foods, as reported by the Department of Labor for the period ended July 31, were 10.4 percent above the 1913 level. The increase in these prices since April 24, when the current rise began, has been about 3 percent. As compared with the low since pre-war days, which was reached on April 15, 1933, current prices are up by more than 22 percent.

The cost of living of wage earners, according to the index of the National Industrial Conference Board, increased 0.4 percent during July to 79.1 percent of the 1923 level. Prices paid for food increased 0.9 percent during the month, and those paid for housing and coal showed slight increases. The other items, clothing, gas, and electricity, declined, while sundries remained unchanged.

Domestic Trade

SALES through retail stores during July, measured by dollar volume, declined by slightly more than the estimated seasonal amount, and percentage increases in sales over a year ago were generally lower than in earlier months of the year. Among the adverse factors tending to retard sales during July was the decline in productive activity with its accompanying drop in pay rolls, the severe drought experienced over a large section of the country, together with the high temperatures recorded, and disturbed labor conditions.

Passenger automobile sales were an exception to the general trend of retail business. While the unadjusted index of sales was lower than in each of the 3 preceding months, the adjusted index advanced to a high for the year. Sales of cars during August have declined, but the retail demand is reported to have held up very well when allowance is made for the usual seasonal trend.

A sharp decrease in the dollar volume of department store sales is usual for July, but the decrease last month was slightly larger than the estimated seasonal change. The adjusted index dropped 1 point, bringing the total recession since May to 4 points. July sales were only 4 percent higher in value than in 1933 and were less in physical volume. As it does not appear probable that August sales duplicated the marked rise which occurred in August 1933 (the adjusted index for that month advancing 10 percent), the index of dollar sales for the current month may fall below the level of the corresponding month of the previous

year for the first time since August 1932. By Federal Reserve districts, the change from a year ago varied from an increase of 21 percent for the Atlanta district to a drop of 9 percent in San Francisco. The only district reporting a larger gain over 1933 in July than in June was Chicago, which showed an increase of 10 percent against 8 percent in the preceding month.

Sales through variety stores declined 8 percent, compared with the average seasonal decline of 6 percent. The dollar volume of sales through chain grocery stores fell off 4 percent, which was also slightly larger than usual. General merchandise sales in small towns and rural areas were off by 15.5 percent, compared with a drop of 11 percent in 1933 and 23 percent in 1932 for the same period.

The favorable trend of commercial failures has continued during July and August. Failures so far during 1934 have been about half the total of a year ago, both in number and in liabilities involved. In connection with the high mortality of the years prior to 1934, it is interesting to note that preliminary data for the 1933 census of both wholesale and retail trade reveal a tendency for the number of establishments to decline only very slightly during the depression despite the shrinkage in total sales, which reduced the average sales per establishment by about one-half. See the article on pages 16 to 19, inclusive, of this issue for a discussion of the results of the 1933 census of wholesale distribution which was taken by the Bureau of the Census.

Employment

DECLINES in business activity during July were accompanied by a drop in employment and a larger relative decrease in pay rolls, according to the data compiled by the Bureau of Labor Statistics. There was a net decline in employment and pay rolls in both manufacturing and in the 18 nonmanufacturing industries currently surveyed.

The number employed in factories in July was 3 percent less than in June. This exceeded the usual seasonal decline and the adjusted index receded to the lowest figure reported since February. July employment was 9.9 percent higher than in the same month of 1933, despite the fact that factory output was less than a year ago. The July decrease in factory pay rolls, amounting to 6.8 percent, brought the pay-roll index to the lowest figure reported since January. Pay rolls were, however, 19 percent higher than in July 1933. As a result of the larger shrinkage in pay rolls than in the number employed, there was a further extension of the recent down trend of average weekly earnings.

Reductions in industrial employment were widespread during July, with decreases reported for 70 of the 90 industries surveyed by the Bureau of Labor Statistics. Of the 14 major groups of industries only one, chemical and allied products, showed an increase in employment, after adjustment for seasonal variation. A major factor in the rise in this group was the increase of 8.4 percent in the rayon industry where about half of the number laid off in the spring months have been returned to work. The largest decline for

the month was in the iron and steel industry where the abrupt drop in production was reflected in the employment figures. The next largest drop was in the transportation equipment group, partly in reflection of the slackening rate of production in the automobile industry. In the 20 industries in which increased employment was reported, seasonal variations and the termination of strikes were the major influences.

Pay-roll increases were reported for 3 of the 14 manufacturing groups, namely, leather and manufactures, food and kindred products, and chemical and allied products. These gains ranged from 0.6 percent for chemicals to 5.9 percent for the leather group. The largest declines were in the iron and steel industry (24 percent) and in the transportation equipment industry (16 percent).

Among the nonmanufacturing industries, employment increases in July as compared with June were reported in 10 and pay-roll increases in 8. The group employing the largest number of persons, retail trade, reported a decline of 5.6 percent in employment and of 2.9 percent in pay rolls.

Employment afforded by the Public Works Administration reached a peak of 665,000 in the final week of July, according to data compiled by that organization. This represented a gain of 365,000 in a period of about 4 months. The Emergency Works Program of the F.E.R.A. gave employment to 1,200,000 persons in July, an increase of 200,000 over June. An increase in the number of C.C.C. workers was reported.

Finance

A WEAKENING tendency in stock prices which set in about the middle of July, after steady gains during the first half of the month, developed into a series of sharp breaks during the final week of the month. Following these reactions the market tended to smooth off during the first half of August while the volume of trading stood persistently at unusually low levels. Certain issues—particularly rails—experienced occasional weakness early in August. The announcement on August 9 of plans for the “nationalization” of silver, caused a temporary flurry in prices but by the middle of the month dullness and low turn-over again featured market activity.

In general, bond prices moved with share prices. During July bond prices receded somewhat, while during the first half of August trading steadily diminished and prices showed comparatively few important changes. After reaching new high levels during the first half of July, United States Government bond prices subsequently tended to decline.

While capital issues in July reached the largest dollar volume for any month in approximately 3 years, the increased total does not indicate a revival in the new capital market. Out of a total of \$373,362,000 for all issues, \$135,000,000 represented Farm Loan issues; flotations of States, municipalities, and other political subdivisions amounted to \$92,583,000; and two railroad issues made up \$100,000,000 of the balance. The amount of new capital raised by corporations was \$20,279,000, less than half of the total of a year ago and only 5 percent of the comparable 1930 total.

Dividend payments in July showed a continuation of the slow upward movement. Reports published by

250 industrial corporations revealed net earnings substantially above those of the corresponding period of 1933, although in some instances the rise in profits was modest considering the rise in the volume of the corporation's business.

Money rates during August showed no important changes from the extremely low levels of recent months. The decline in bankers' acceptances outstanding has apparently been influenced in part by the tendency of low rates on commercial loans to make the latter a desirable borrowing medium.

Owing to the fact that the combined total of investments and nonsecurity loans increased slightly more than security loans decreased, the net effect on outstanding member bank credit was a slight increase in July. During the first 2 weeks of August this tendency continued only in part inasmuch as investments reversed their previous trend. Net demand deposits of the reporting member banks recovered, in July, the loss which they had sustained around the middle of June through Treasury transactions. Excess member bank reserves increased to a new peak of \$1,900,000,000 late in July and have remained around that figure. Federal Reserve bank credit outstanding showed no important changes during the period under review.

As a result principally of net imports and net releases from earmark the monetary gold stock of the United States rose about \$75,000,000 during July to a new high total of \$7,930,000,000. The first gold to be exported since the revaluation of the dollar was a shipment of \$1,000,000 about the middle of August. Subsequent shipments brought the total exports for the month through the 25th to about \$7,000,000.

Foreign Trade

UNITED STATES foreign trade declined more than seasonally in July. Total exports, valued at \$161,787,000, were 5 percent smaller and general imports, valued at \$127,342,000, were 6 percent less than in the previous month. Ordinarily exports decline approximately 1 percent and imports 3 percent from June to July. The adjusted index of both exports and imports declined, the former receding from 50 to 48 and the latter from 44 to 43.

In July, for the first time in over a year, the value of imports was lower than in the corresponding month of the previous year, the decline amounting to 11 percent. The value of exports was 12 percent larger than in July 1933. Adjusting for the advances in average unit values (price) of export and import commodities, which in each instance were approximately 15 percent higher than a year ago, it appears that the quantity of goods exported in July was about the same as in July a year ago, while the quantity of goods imported was over one-fifth percent smaller.

The decline in the value of exports is almost entirely attributable to a reaction from the unseasonal increase of 11 million dollars in cotton shipments during June. The decrease during July totaled 9 million dollars. Exclusive of cotton shipments, the value of exports has remained about the same during the last 3 months.

Exports of passenger automobiles have been maintained at approximately the same level for 4 consecutive months. Individual classes of export commodities shipped in somewhat greater volume in July than in

June included industrial machinery, meat products, fish, apples, canned fruits, wheat and flour, paper base stocks, crude sulphur, petroleum and products, iron and steel semimanufactures, lumber, radio apparatus, and aircraft.

As in the case of exports, one commodity, sugar, was largely responsible for the lower value of imports. The imports of sugar from the Philippines, which had declined sharply in June, practically ceased in July as a result of the exhaustion of the sugar quota for that area.

Crude material imports declined from a value of \$42,578,000 in June to \$39,086,000 in July. Contributing to this lower value were declines of \$1,113,000 and \$1,108,000, respectively, in the value of imports of rubber and of crude petroleum. Imports of semimanufactures and finished manufactures, on the other hand, increased during July. Among the commodities showing gains both in quantity and value were leather manufactures, undressed furs, coffee, meat products, burlaps, manufactures of wool, tung oil, wood pulp, coal tar products, and tin.

Imports for consumption, which include goods entered immediately upon arrival plus withdrawals from bonded warehouses, dropped from \$135,120,000 in June to \$124,123,000 in July. Goods entered into bonded warehouses declined slightly from \$19,650,000 in June to \$19,156,000 in July, while withdrawals from bonded warehouses decreased from \$18,293,000 in June to \$15,937,000 in July.

¹Adjusted for seasonal variation.²General imports through December 1933; imports for consumption in 1934.³Monthly average.

Real Estate and Construction

CONSTRUCTION contracts awarded during July were lower than in June, the movement conforming to the usual seasonal trend. According to data compiled by the F. W. Dodge Corporation, contracts let for nonresidential building were substantially higher than in the preceding month, offsetting part of the declines in the other three groups. A major portion of the increase in the nonresidential building group fell in the factory classification and was due to plant expansions in the chemical and textile industries. The slackening in residential building was reflected in a slowing down in all the major classes of dwellings, as well as in the contracts classed under Home Owners' Loan Corporation improvements. The decline in public utilities is of only limited significance, as construction in this field has been on a very restricted scale for an extended period. Public-works contracts let during the month were about 30 percent lower than in June, the decline in highway contracts being the principal cause of the drop.

Contracts financed by private, as distinguished from public funds, constituted a larger percentage of the total than in other recent months. Publicly financed projects in July amounted to \$52,507,600, or 44 percent of the total compared with the corresponding percentage of 58 in June. This trend was influenced by the increase in industrial building noted above.

By geographical areas, lower contract totals were reported in 9 of the 13 divisions. A substantial increase occurred in nonresidential building in the Middle Atlantic States, and in the New Orleans terri-

tory. The increases reported for the Kansas City and St. Louis areas were slight.

The F. W. Dodge Corporation's total of contemplated construction reported during July, amounting to \$244,000,000, was \$70,000,000 less than in June. The reduction from the July 1933 total of \$448,000,000 was much larger, and was pronounced in each of the four major construction groups. The drop in contemplated construction was especially severe in the residential group.

Real-estate foreclosures during the first 6 months of 1934 were about 12 percent fewer in number than in the corresponding period of 1933, according to statistics collected by the Federal Home Loan Bank Board from 1,034 identical communities having 53 percent of the total population of the country. There were, however, three times as many foreclosures as in the first half of 1926. An increase was reported for seven States—New Hampshire, Vermont, New York, Michigan, Minnesota, Arkansas, and Idaho—but all of the others showed improvement. In recent months, the number of foreclosures has averaged about 16,000 and no one month has deviated to any marked extent from the average.

The index of construction costs of the Engineering News Record declined slightly during July. The recession in the wholesale prices of building materials from the peak of the year up to August 18 amounted to 1.6 percent. This index is the highest with reference to the 1926 average of any of the groups included in the Bureau of Labor Statistics composite index.

¹ Based on 3-month moving average and adjusted for seasonal variation.

² First of month, Aug. 1, 1934, index, 198.4.

Transportation

FREIGHT-CAR loadings declined 1,966 units during the week ended August 18, following a decline of 8,768 units in the preceding week. Loadings for the week indicated were 6.7 percent below those for the corresponding week last year and were 63.9 percent of the average for that week during the preceding 15 years. This represents a lower percentage of the preceding 15-year average than for any week this year. The high for the year on this basis was reached in the week ended February 17, when loadings were 73.8 percent of the 15-year average for that week, but the corresponding percentages were approximately the same for the weeks of March 17 and June 30. Loadings for the first 33 weeks of the year were 10.3 percent above those for the corresponding period last year and 11.3 percent above the like period in 1932.

For the month of July the index of car loadings, adjusted for seasonal variation, fell to 61 percent of the average monthly loadings for 1923-25. This is the lowest point reached by this index since last November, when it was 59. In March it stood at 66 and in June at 64. The decline since March amounts to 7.6 percent.

Of the 8 classes of freight, as listed in the table below, only 2 showed gains in cars loaded in July as compared with June, namely, grains and livestock. The increase in grain and grain-products shipments, however, was less than seasonal, and the adjusted index for this class of freight fell from 90 to 79. The increased shipments of livestock were occasioned by the movement of animals from the drought area for feeding or

for slaughter. The adjusted index for less-than-carlot shipments was unchanged for the month.

Total operating revenues of class I railroads for the 6 months ended June 30 were 15.2 percent above the figure for last year, slightly above that for 1932, but 25 percent below the amount reported for 1931. Preliminary data for July indicate a recession in gross revenues as compared with June. Net operating income also declined in July and was considerably below the total for July 1933.

The number of employees of class I steam railways, excluding switching and terminal companies, decreased slightly in July from the recent peak in June. In each of the 4 months, April to July, the number of employees reported was above 1,000,000, while in the preceding year this figure was exceeded only in the 3 months, August to October. The new index of railway employment, adjusted for seasonal variation, as reported by the Interstate Commerce Commission, is 57.1 (preliminary) for July, as compared with the average for 1923-25 as 100. The index for each of the past 5 months is above the index for any previous month since June 1932.

The average number of miles of road operated by class I railroads continues to decline. For each of the last 6 months of 1929 and the 12 months of 1930, miles operated exceeded 242,500. Since that time the decline has been almost continuous, miles operated falling to 239,059 in May of this year, followed by a slight increase in June.

Automobiles and Rubber

CONTINUATION of a favorable retail demand for cars has given a firm tone to the automotive industry. While production during August has followed the downward trend of sales, the industry has shown a degree of resistance to the general decline in business activity which has occurred during the summer months. Sales of new passenger cars in July, adjusted for seasonal variations, reached a high for the year, exceeding the June sales by about 5 percent. Despite the decline which is indicated for August, the retail movement has been sufficiently large to maintain August production at a rate approximately equal to that for August 1933. In view of the sales results on current models, preparations for next year's cars have not been pushed.

Official figures covering July production reveal an output in excess of the preliminary estimates, although the decline from the June total was larger than the usual seasonal recession. The adjusted index of the Federal Reserve Board declined from 82 percent of the 1923-25 average in June to 77 percent in July. The July index was 12 percent above a year ago, and the highest July figure since 1929.

The number of units produced, including foreign assemblies from parts made in the United States and reported as complete units or vehicles, was 266,575, compared with 308,065 in June and 229,357 in July of last year. Production in the first 7 months of the year, amounting to 1,980,914 units, exceeded the total for the entire year 1933 and was 45 percent larger than the output of the year 1932.

The export demand for automobiles has been well sustained, with July shipments of 23,959 vehicles only slightly less than in the preceding month. July exports were the largest for that month since 1929, when 55,142 vehicles were exported. Export markets took more automobiles during the first 7 months of the year than for any similar period since 1930.

Activity in the rubber industry declined during July, the decreased activity being only partly the result of seasonal conditions. Domestic consumption of crude rubber was 18 percent less than in June and 31 percent less than in July 1933. The use of reclaimed rubber, which is steadily but only gradually increasing in the industry, amounted to one-sixth of the total consumption in the first 7 months of 1934. Reclaimed consumption in this period, amounting to 50,649 tons, was 53 percent higher than a year ago. Crude consumption of 262,164 tons was up 28 percent in this period.

Production of tires and tubes declined sharply in July, conforming to the trend of shipments. The latter figures were affected by the heavy movement of June, which was caused by the stocking up by automobile manufacturers before price increases became effective. Original equipment shipments for the month were not sufficient to equip the cars produced. Total shipments of casings were 24 percent larger than production and manufacturers' stocks were reduced by 745,000 to 9,168,000. The latter figure was, however, 68 percent higher than the stocks carried at the end of July 1933.

Forest Products

LUMBER production has continued to reflect the current low level of consumer demand. Output has been irregular, declining sharply in the early part of July but moving steadily higher to a peak for the year in the middle of August. During June, July, and August, production has been less than in 1933, although for the year through August 18 the cut was 12 percent larger than a year ago.

Shipments of lumber, due mainly to the settlement of the longshoremen's strike on the Pacific coast, improved during recent weeks, and shipments for the week ended August 11 were the largest since July 1933. Orders received during July were below production for that month and were also below the total for July 1933. During the last week in July and the first 3 weeks in August, orders increased sharply and were considerably larger than in the corresponding weeks last year.

As production since the end of June has been in excess of shipments, the already high stocks have been augmented. On August 11, gross stocks of 591 mills totaled 3,754 million feet which was equivalent to 163 days average production. This compares with stocks equivalent to 139 days production on a similar date in 1933.

The Timber Conservation Board, in its review of operations for the quarter ended June 30, stated that on account of strikes, particularly on the Pacific coast, and consumer hesitancy in buying because of price uncertainties, the lumber industry experienced a less favorable second quarter than usual. With the strike situation cleared up in most sections, increased housing

demand, and the new minimum prices (now in effect), the report indicated that the industry should be able to approach a balance between supply and demand and reduce its heavy stocks. The board repeated its recommendations, made in previous reports, that if the lumber industry hopes to secure reasonable stabilization it needs to adjust its production and stocks to current consumption and to the expectancy of recovery in demand. Trade promotion and research to extend the uses of lumber were also recommended.

Employment in the lumber and allied products industry declined by 2.4 percent in July. Pay rolls were off by 6.8 percent. As compared with July 1933, employment was higher by 4.7 percent and pay rolls by 14.5 percent. Employment in sawmills, although lower than in June, was considerably higher than last year.

Exports of all types of lumber during July were 16 percent greater than in June. This represents an exceptional June-July gain, but the trend was influenced to some extent by shipping conditions. For the year to date foreign shipments of lumber were 0.9 percent lower than in 1933 but 6.4 percent higher than in 1932.

Activity in the paper industry declined during July with slight decreases occurring in both employment and pay rolls. Shipments of newsprint from mills (both Canadian and United States) declined seasonally and were smaller than a year ago. Mill stocks rose perceptibly, Canadian accumulations reaching the highest level since March 1932 while United States stocks were the largest since July 1933.

Iron and Steel Industry

PRODUCTION in the iron and steel industry has declined further during August, following the sharp drop in July. According to the weekly estimates of the American Iron and Steel Institute, steel mill activity declined from 27.7 percent of capacity in the week of July 28 to 21.3 percent in the week of August 25. Thus, a contraseasonal decline in output is indicated for the current month. The rate of incoming business has been slow, as major consumers have been drawing down stocks accumulated at second quarter prices.

The high rate of production in the second quarter, when output was determined by price considerations and fears of labor difficulties rather than consumer demands, is the primary cause of the low operating rate and the trend of the industry should be gaged on the performance of both the second and third quarters.

July iron and steel production, adjusted for seasonal variations, dropped to 47 percent of the 1923-25 average, compared with 85 percent in June, 99 in July last year, and 25 percent in July 1932. Considering the extent of the recession in output, the decline in employment (7 percent) was relatively small, but the drop in pay rolls amounted to 24 percent.

Steel-ingot output during July was at the rate of 27 percent of capacity and production was the lowest for any month since April 1933. The indicated August output, according to the weekly estimates, was below 25 percent of capacity for the first time since March 1933, in which month the industry operated at 15 percent of capacity.

Shipments of finished products dropped abruptly during July. The effects of the abnormal production trend in recent months is well illustrated by the shipments of the leading corporation which in June were 65 percent higher than in 1933, whereas July shipments were 50 percent below a year ago. Shipments of steel sheets were less than one-third of the June total and were the smallest for any month since March 1933. New orders for sheets were less than either production or shipments.

Pig-iron output also dropped sharply during July, although the decline was less severe than in the case of steel. The daily average volume of production, adjusted for seasonal variation, was 36 percent less than in June and about one-third less than in July 1933. The blowing out or banking of 14 additional furnaces, making a total of 42 in the past 3 months, reduced the number of active stacks to 75, or the same number as were working last December. Pig-iron production, as well as steel production, is currently running below the total for the corresponding period of 1933, but output for the first 7 months of the year was 77 percent above 1933. The increase for steel ingot production in this same period, which resulted in the highest output for this period since 1930, amounted to 47 percent.

Reflecting the current state of demand, prices of steel scrap have receded to new lows for the year. The composite price of scrap, compiled by the Iron Age, receded to \$10.17 a ton in the middle of August. A month earlier the figure was \$10.58.

Textile Industries

ASIDE from the improvement in the rayon industry, operations in the various textile industries have continued on a restricted basis. The limitation of machine activity in the cotton-textile industry, effective for the 12-week period ended August 25, tended to hold production in that branch to a fairly steady pace.

According to the Federal Reserve Board's index, the output of the textile industries as a group declined slightly during July, but the adjusted production index stood at 77 in both June and July. While the output of the industry has recently dropped considerably below the level of a year ago, production in the first 7 months of 1934 was only 14 percent below 1933 and was 18 percent in excess of 1932.

Cotton spindles were operated on the basis of 74.3 percent of single-shift capacity during July, compared with 72.7 in June and 117.5 in July, 1933, according to the long-term series of the Bureau of the Census. Average spindle hours per spindle in place were 167 in July and 169 in June. Output of cotton print cloth was slightly higher in the four weeks ended August 11 than in the preceding 4-week period, while printed yardage in storage dropped from 111,154,000 yards to 108,358,000 yards in this interval.

Activity in the woolen industry was only slightly changed during July. Spindle activity was at a somewhat higher rate than in June, and the consumption of raw wool was about the same. The decline in

weaving was pronounced in the carpet and rug branch. Narrow looms were also operated at a lower rate, but wide loom activity increased.

Conditions in the silk industry have not undergone any marked variation in recent weeks, with production continuing at a low level and silk prices displaying further weakness. Daily average consumption of raw silk during July was the same as in June, but there was a decline in weaving operation following the temporary gains in June which resulted from the almost complete suspension of operations for one week in May. Production of stock carrying mills dropped from 291 yards per loom in June to 266 yards in July, while the output of commission weavers dropped from 459 to 392 yards. Stocks of cloth increased by 2.8 percent to the highest total reported since March 1933.

In the hosiery industry, the growth of stocks led the code authority to call upon the industry for a voluntary curtailment of production. Current data are not available to indicate whether the members have followed out the suggestion of voluntary individual restriction.

Data on the production of members of the synthetic yarn code authority are not available to measure the extent of the improvement in rayon production. However, the plants operating under the silk-throwing code produced 54 percent more rayon for weaving in the 4 weeks ended August 4 than in the preceding 4-week period.

Highlights on the Wholesale Census, 1933

Theodore N. Beckman, Ohio State University, in Charge of Wholesale Distribution, Bureau of the Census¹

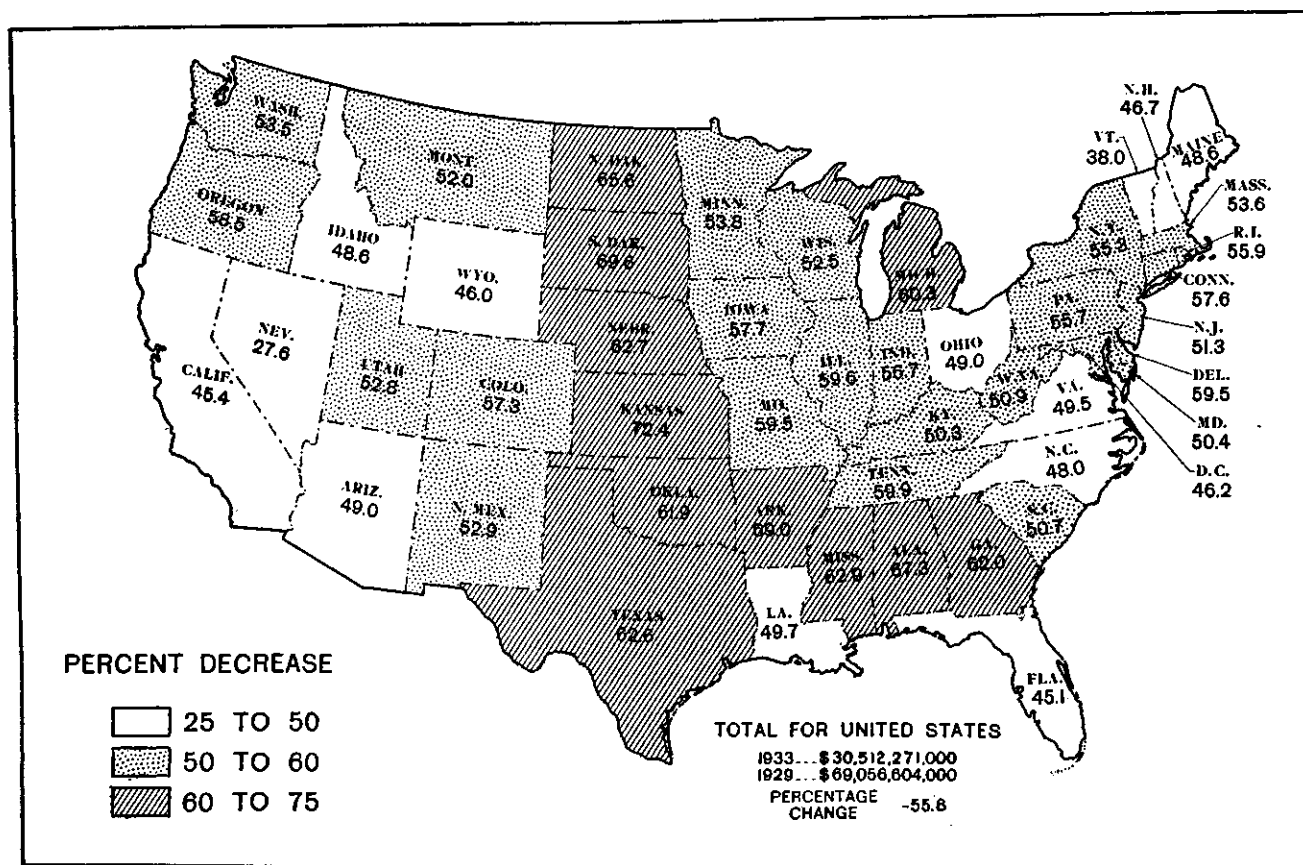

WHOLESALE trade constitutes one of the most significant barometers of general business conditions. Changes in its volume usually precede similar changes in consumption and the variability in wholesale prices normally presages at least the direction of fluctuations in retail prices. Central wholesale markets are sensitive, well organized, and respond more quickly and accurately to changing conditions in supply and demand than is true of other types of markets. For these reasons, many indexes of wholesale trade and of wholesale commodity prices have been developed.

Current indexes of various phases of business activity may be compared with certain methods of inventory control used by merchandising establishments. There is the book inventory, the real perpetual inventory, the tickler method of control, the physical inspection plan, the purchase record method, etc. All of these aim to indicate the approximate position of the merchandise in stock in order that purchases may be correlated to sales and to stocks already on hand. However, none of these methods of

control is deemed accurate and the degree of accuracy of each must be checked at least once or twice a year through an "actual physical inventory" which is the most complete and comprehensive of all devices now in use. In this manner the most accurate inventory method may be chosen for control purposes in the interim, and adjustments made from time to time on the basis of the results shown by the actual physical inventory. Similarly, current business indexes must be checked periodically in order to ascertain their accuracy or degree of error. The best way of accomplishing this is through a complete census covering similar items of information.

The first comprehensive inventory of wholesaling was taken in 1930 as part of the Census of Distribution covering operations for the year 1929. Through funds supplied by the Civil Works Administration another such inventory was taken during the present year as part of the Census of American Business covering the year 1933. In this way, it is possible to see wholesaling in the fourth year of a severe depression in comparison with the previous snapshot of wholesaling covering a year of prosperity, and to note the changes effected in this 4-year period.

¹Assisted by John Albright of the Wholesale Census in the preparation of some of the tabular material.

WHOLESALE TRADE OFF SHARPLY—DECLINE IN ESTABLISHMENTS SLIGHT

During the year 1933, there were in the United States, according to preliminary figures, 159,724 wholesale establishments or places of business where all or a major part of the goods are sold or distributed on a wholesale basis (table 1). This compares with 169,655 such establishments in 1929, or a decrease of 5.9 percent. However, when the final results are published, the number of establishments will probably total around 164,000. This means that the reduction in the number of wholesale business establishments is rather small and probably not in excess of 4 percent. The dollar volume of wholesale business, however, registered a severe decline. In 1933, the net sales of all wholesale establishments amounted to \$30,512,271,000 as compared with \$69,056,604,000 for 1929, marking a decrease of 55.8 percent. It is probable that the final figures on wholesale trade volume will be in the neighborhood of \$32,000,000,000. This means that the average sales per wholesale establishment were considerably lower in 1933 and that the smaller enterprises exhibited unusual tenacity during this depression which is probably the most severe in many respects in our history. Such a result augurs well for the "small business" man and should tend to

dispel fears entertained by some about the disappearance of the small wholesale business unit.

FOUR STATES HANDLE HALF OF BUSINESS

Approximately one-half of the total volume of business in 1933 was reported by wholesale establishments located in the four States of New York, Illinois, California, and Pennsylvania. The States of Ohio, Massachusetts, Missouri, and Texas accounted for an additional one-third of the business. Thus, the eight States named in the order of their importance, each reporting more than a billion dollars worth of wholesale business during 1933, made up about two-thirds of the total volume. The same eight States accounted for almost two-thirds of the wholesale business in 1929, although the order of their importance has changed in 1933 from that of 1929 except for New York, Illinois, and Texas, which still retain first, second, and eighth places, respectively. California changed places with Pennsylvania, moving up from fourth place to third. Ohio and Massachusetts advanced from sixth to fifth and from seventh to sixth positions, respectively, while Missouri descended from fifth to seventh place. Most of the remaining States also changed rank during 1933, may be seen by reference to table 1.

Table 1.—Summary of Wholesale Trade by States, 1933

While the average decrease in the business of wholesale establishments in 1933 as compared with 1929 for the entire United States was 55.8 percent, 11 States showed a decline of over 60 percent and 24 States had a decrease of from 50 to 60 percent. Thirteen States and the District of Columbia showed a decline of less than 50 percent, but none of the States (including the District of Columbia) had a decrease of less than 25 percent. The States most seriously affected, as shown on the map, are located in the wheat-producing area and in the Cotton Belt. To this there is but one exception, namely, Michigan, which apparently suffered from the unusual decline in the automotive business, at least during the first part of 1933.

These data are shown in detail in table 2 wherein the States are listed according to the percentage decrease in their volume of wholesale business in 1933 as compared with 1929. The exact percentage decrease for each State is shown in the second column. The third column shows what percentage of the total wholesale business reported for 1929, for the United States and for each of the States, consisted of farm products of the raw material type, such as cotton, grain, livestock, leaf tobacco, etc. In the fourth column is shown, for the United States and for each of the States, the percentage of the total volume of wholesale business reported for 1929, which consisted of the type of farm products referred to above, plus certain types of "heavy" goods used primarily for industrial purposes, including machinery, equipment and supplies, metals and minerals, and lumber and building materials.

DECLINES MOST SEVERE IN STATES HANDLING LARGE VOLUME OF FARM AND "HEAVY" INDUSTRIAL PRODUCTS

It is a matter of common knowledge that a good share of the brunt of the depression has been borne by farming and by the heavy goods industries. An attempt has been made to express this relationship statistically. The percentage decrease in wholesale sales volume by States has been correlated first, with the sales of farm products (raw materials) percent of total 1929 sales, and second, with the percentage of 1929 sales accounted for by farm products (raw materials) and certain "heavy" goods combined. The correlations were calculated by the Pearsonian formula.

When the percentage reduction in sales by States is correlated with farm products (raw materials) percent of the total sales during 1929, r (the coefficient of correlation) is found to be 0.56 ± 0.07 . This represents some degree of association and indicates that the decline in the sales value of farm products has been a contributing factor in the decline in wholesale sales volume and that in general the States which in 1929 reported large proportions of their sales totals in raw materials coming from the farm showed the severest losses in business in 1933 from the 1929 level.

Table 2.—Percentage Decline in Wholesale Business Compared with Specified Kinds of Goods, Expressed as Percent of 1929 Total

When the percentage reduction of sales by States is correlated with farm products (raw materials) and specified "heavy" goods percentage of the total sales during 1929, $r=0.68 \pm 0.05$. This is significant and represents a fairly high degree of association. It means that the States which in 1929 reported a large proportion of their business consisting of either raw materials from the farm or of industrial goods such as metals, lumber, machinery, and equipment, were the greatest losers in wholesale trade volume during the depression. To put the matter somewhat differently, much of the decrease in wholesale business is accounted for by the precipitous decline in the business of those establishments that deal in industrial rather than consumer goods. This decline can be more accurately measured when the data are available by kinds of business.

EMPLOYMENT ONE-FOURTH BELOW 1929

The 159,724 wholesale establishments employed during the year 1933, 1,179,358 persons, 1,058,767

on a full-time basis and 120,591 as part-timers. These employees were paid \$1,645,539,000 in salaries, wages, and commissions, of which \$58,875,000 went to part-time employees. While part-time employees constituted 10.2 percent of the total number of employees, they received but 3.6 percent of the pay roll. On the other hand, the full-time employees made up 89.8 percent of the total and received 96.4 percent of the pay roll. The employment and wage figures herein presented do not include proprietors and firm members or their compensation and drawing accounts.

When compared with 1929 the number of employees engaged in wholesale trade registered a decline of 26.5 percent. It is likely that when the final figures are compiled the decline in employment will be found to have been not more than 25 percent. This compares with a decline in employment for wholesale trade for the year 1933 of 22.1 percent, as shown by the index of the Department of Labor which is published monthly in the "Survey of Current Business." It would seem, therefore, that the current index of wholesale trade employment for the year 1933 overestimated the number employed by approximately 3 points. According to the census, salaries and wages in wholesale trade decreased 45.3 percent from the 1929 level. This percentage will probably be reduced when final figures are compiled to approximately 44. The monthly index of the Department of Labor shows a reduction of 39.6 percent in wholesale trade pay rolls in this same period.

Since pay rolls decreased much more than the number of employees, it would appear that the average earnings of employees engaged in wholesale trade in 1933 were about 25 percent less than in 1929. Inasmuch as the N.I.C.B. cost of living index stood at 74.8 in 1933 as against 100 in 1929, the decrease in average earnings per employee in wholesale trade was about equal to the decline in the cost of living.

EMPLOYMENT IMPROVED IN LATTER HALF OF 1933

Despite the unfavorable picture portrayed in the preceding paragraphs, some definite bright spots may be discerned in the results of the wholesale census. These lie in the substantial gains in wholesale trade employment during the latter half of 1933 as shown in table 3. If the average number of full-time employees for the year be regarded as 100, December 1933 showed an improvement over the beginning of the year of 10 points, and October registered an improvement of 11 points over the first quarter of the year. Similarly, the peak in part-time employment reached in November 1933 was 23 points higher than the low recorded in March. When the fourth quarter of 1933 is compared with the first quarter, full-time employment shows an improvement of 10.9 percent and part-time employment an improvement of 21.7 percent.

¹ Employment data for 1929 were shown for 4 months only.

According to the 1929 Census of Distribution, the seasonal variation in such employment for the United States is about 8 points for full-time and part-time employment combined. If it is assumed that 1929 was fairly typical in this respect, it would appear that the last few months of 1933 showed more than seasonal betterment. It is also significant that the increase in employment which began in April continued gradually to the end of the year.

Table 4.—Wholesale Trade of the United States—1933 Percentage Increase in Employment, By States, October-December Over January-March

States	Full time	Part time	States	Full time	Part time
	Percent	Percent		Percent	Percent

Missouri.....	8.3	11.3	Wyoming.....	13.5	35.6

A comparison in full-time and part-time employment during the fourth quarter with the first quarter of the year (table 4) discloses the fact that with but one exception all of the States in the wheat area and in the cotton belt, particularly the latter, showed an advance in employment much higher than the average for the United States. Michigan, too, followed in the same direction. Obviously, had it not been for the improvement in business as reflected by increases in employment during the latter part of 1933, the decline in the volume of wholesale trade for 1933 as compared with 1929 would have been even more severe.

Monthly Business Statistics

The following summary shows the trend of industrial, commercial, and financial statistics for the past 13 months. Statistics through December 1931 for all series except those marked with an asterisk (*) will be found in the 1932 Annual Supplement to the Survey of Current Business, together with an explanation of the sources and basis of the figures quoted. Series so marked represent additions since the Annual was issued and similar information, if published, will be found in the places noted at the bottom of each page. Later data will be found in the Weekly Supplement to the Survey.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

† Revised series. For earlier data see p. 19 of the October 1933 issue. Business activity, Annalist. For 1933 revisions of the combined index and automobile and steel ingot production indexes see p. 22 of the August 1934 issue.

* Revised. Preliminary.

1 Discontinued by Electrical World.

§ Series revised. For earlier data see p. 19 of the January 1934 issue. Revisions did not change the combined indexes except for a few months and in these instances by a slight amount.

Index of automobile and iron and steel revised for 1933. Automobiles, March unadjusted 33, April unadjusted 56, adjusted 43, May unadjusted 63, adjusted 50, and June unadjusted 74, adjusted 65; iron and steel, January unadjusted 29, adjusted 30, February unadjusted 33, March unadjusted 25, adjusted 22, April unadjusted 39, and June unadjusted 71, adjusted 71.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† New series. For earlier data on building costs, American Appraisal Co., refer to p. 20 of the August 1933 issue. N.I.R.A. highway work started in September 1933. First Home Loan Bank data were issued for December 1932.

‡ Revised series. For revisions of construction contracts awarded on nonresidential buildings for years 1930, 1931, and 1932, refer to p. 20 of the September 1933 issue.

§ These series represent a break-down of the combined total shown in the Survey previous to September 1933. For earlier data see p. 20 of the September 1933 issue.

¶ Months of August and November 1933, March and May 1934 include 5 weeks; other months include 4 weeks.

* Index as of August 1, 1934, 198.4.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† Discontinued.

* New series. For description of Chain Store Age indexes see p. 19 of the December 1932 issue. Comparable data of H. L. Green Co., Inc., sales prior to July 1933 not available. For earlier data on automobiles see p. 19 of the April 1934 issue and variety store sales p. 18 of the March 1934 issue.

† Revised series. For revisions refer to the indicated pages of the monthly issues as follows: Magazine advertising, p. 20, October 1933; combined sales index and apparel sales index of Chain Store Age, p. 26, October 1933.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† Not available.

* New series. For earlier data on the following subjects refer to the indicated pages of the monthly issues, as follows: Pay rolls, banks, brokerage houses, etc., June 19, 1933; factory weekly earnings, p. 20, October 1932; factory hourly earnings, p. 18, December 1932; weekly earnings, Massachusetts, p. 18, December 1932; construction wage rates, p. 19, September 1933. Data on additional series of agricultural loans outstanding will be shown in a subsequent issue.

† Revised series. For revisions on the following subjects refer to the indicated pages of the monthly issues, as follows: Pay rolls of banks, brokerage houses, etc., for 1932, p. 29, January 1934; Massachusetts weekly earnings for 1931, 1932, and 1933, p. 19, August 1933 issue; pay rolls in laundries and dyeing and cleaning establishments, p. 20, August 1934; factory weekly and hourly earnings revised for 1933; for data not shown above see p. 20 of the July 1934 issue.

* Beginning with March 1932 method of computing rates was changed.

† Increase in wage rates during March was due to provisions of title I, sec. 204, par. 2, item C of the National Recovery Act, which required State highway departments to fix minimum wage scales.

‡ Construction wage rates as of August 1, 1934, common labor \$0.530, skilled labor \$1.11.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

* Rate changed Mar. 3, Apr. 7, Oct. 20, 1933, and Feb. 2, 1934.

* New series. Earlier data for Federal Reserve member banks shown on p. 18 of the January 1934 issue. These data cover 90 cities and supersede the previous data for 101 cities. They are available only from January 1932 to date. One additional city has been added in 1934 to offset the dropping of 1 bank which discontinued reporting.

* Figures subsequent to December 1933 represent gold certificates on hand and due from U.S. Treasury, plus redemption fund—Federal Reserve notes. (\$35,138,000 on Feb. 28, \$32,748,000 on Mar. 31, \$31,400,000 on Apr. 30, \$30,000,000 on May 31, \$25,724,000 on June 30, and \$24,056,000 on July 31, 1934.)

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† Quotation based on paper peso instead of gold peso as formerly. Former equivalent to 44 percent of latter. See note on p. 56 of the Mar. 1934 issue.

‡ New series superseding old series which covered the physical movement only. For earlier data see p. 20 of December 1932 issues, net gold imports.

† Revised series. For earlier data see pp. 18 and 20 of the July 1933 issue, insurance written and admitted assets; p. 18 of the June 1933 issue, premium collections, and p. 19 of the July 1934 issue, corporation profits.

§ Par values of foreign currencies as given on pp. 86 and 87 of 1932 annual supplement were changed with the reduction in gold content of the United States dollar.

|| Or exports (-).

¶ Deficit.

** Decision of Treasury and Federal Reserve to omit gold coin from circulation figures as of Jan. 31, at which time it was carried as \$287,000,000, is not reflected in the January total, which is the daily average figure for the month. Large increase in February total resulted from revaluation of the dollar to 89.06 percent of its former gold content.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1933

* Revised.

* New series. For earlier data see p. 20 of the August 1933 issue, Reconstruction Finance Corporation and p. 29 of the June 1933 issue, U.S. Government bond prices.

\$ This excludes the amount outstanding of \$435,914,726 on Jan. 31, \$478,243,891 on Feb. 28, \$486,636,553 on Mar. 31, \$486,717,731 on Apr. 30, \$487,635,731 on May 31, 1934, \$493,112,904 on June 30, 1934, and \$499,251,915 on July 31, 1934, representing payments made to States by the R.F.C. under the Emergency Relief Act of 1933 upon certification of grants by the Federal Emergency Relief Administrator.

/ Includes \$2,808,221,138 for February, \$2,233,252 for March, \$409,051 for April, \$298,898 for May, \$213,447 for June, and \$272,163 for July, representing the increment resulting from reduction in weight of gold dollar.

* The figure for expenditures includes \$2,000,000,000 exchange stabilization chargeable against increment in gold.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

* Preliminary.

* New series. Covers scheduled airlines operating in United States. See p. 20 of the February 1934 issue for earlier data and p. 20 of the April 1933 issue for methanol.

* Revised series. For earlier data see p. 20 of the April 1934 issue for operating revenues, operating expenses, and net railway operating income of class I railways; and

p. 36 of the May 1934 issue for methanol.

* Data for 1933 revised. Total, Jan. 4,227, Apr. 4,401, May 5,208, June 5,615; foreign vessels, Apr. 2,848, May 3,321, June 3,624; United States vessels, Mar. 1,866

Apr. 1,553, 1,887, June, 2,021.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey

* Revised.

† New series. For earlier data see p. 20 of the April 1933 issue (methanol) and p. 19 of January 1934 issue (explosives).

‡ Figures revised due to dropping of Missouri from Southern States classification. See p. 19 of the January 1934 issue for earlier data.

§ See footnote on p. 35 of this issue. Monthly revisions for 1933 not shown above will appear in a subsequent issue.

† Revised for 1933. See p. 36 of the May 1934 issue, methanol; see p. 36 of the June 1933 issue, for 1932 revisions, exports and imports of fertilizer and imports of vegetable oils; for 1933 revisions for months not shown on exports see p. 20 of this issue.

* Texas only. Louisiana produced 23 percent of U.S. production in 1933.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1933

* Revised.

† For earlier data on lard compound price see p. 18 of the January 1933 issue. Data not available for cellulose products prior to January 1933.

‡ Revised series. For year ended July 1932 see p. 20 of the February 1933 issue, cottonseed, and for the year of 1932 see p. 37 of the June 1933 issue, exports of cottonseed cake and meal. Data revised for 1933 for months not shown above, see p. 19 of this issue.

§ Since March 1932, detailed figures are not strictly comparable owing to changes in firms reporting.

Dec. 1 estimate.

/ See footnote on p. 35 of this issue. Data revised for 1933 revisions for months not shown above will appear in a subsequent issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† Preliminary.

* New series. For earlier data see p. 19 of the May 1933 issue, manufactured gas, and p. 19 of the June 1933 issue, butter consumption. Monthly data on distilled spirits available beginning July 1933 and on fermented malt liquors, April 1933.

† For revised data for electric-power production for 1932, see pp. 38 and 56 of the May 1933 issue; for 1933 see p. 38 of the May 1934 issue; for manufactured gas for 1932 and 1933 and natural gas for 1931, 1932, and 1933, see p. 20 of the May 1934 issue; for butter production for 1931 see p. 20 of the January 1933 issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933							1934

* Revised.

* Dec. 1 estimate.

/ Aug. 1 estimate.

* New series. For earlier data see p. 20 of the November 1932 issue, barley, receipts of milk in Greater New York, p. 20 of the August 1934 issue.

† Revised series. For revisions refer to the indicated pages of the monthly issues, as follows: For 1931 on apparent consumption of cheese, production of total and American whole-milk cheese, and production of condensed and evaporated milk, p. 20, January 1933. For earlier data on stocks (cold-storage holdings) of total and American whole-milk cheese, p. 19, April 1933. For 1932 data on production of factory and American whole-milk cheese, production of condensed and evaporated milk, p. 39, September 1933. For subsequent revisions for 1932 on production of evaporated milk, p. 39, November 1933. For 1933, car-lot shipments of apples, citrus fruits, onions, and potatoes, p. 39, April 1934. For 1933 exports of rice, p. 39, June 1933. Revised figures on 1933 exports of grains (total), barley, corn and rice for months not shown above are on p. 20 of this issue.

* See footnote on p. 35 of this issue. Data for 1933 also revised, revisions for months not shown above will appear in a subsequent issue.

† Bulk evaporated milk not included since December 1931.

‡ Quotation not available.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† New series. For earlier data, see p. 20 of this issue, for receipts of refined sugar from Hawaii and Puerto Rico and imports from Cuba. Earlier data not available for Philippine Islands.

‡ For revised data for 1932 on sugar meltings and stocks, see p. 41 of the May 1933 issue. For 1932 revisions of sugar imports and exports, see p. 41 of the June 1933 issue. For revisions of exports in 1933 for months not shown above, see p. 20 of this issue.

§ See footnote on p. 35 of this issue. Data revised for 1933. Revision for months not shown above will appear in a subsequent issue.

¶ Data not available.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey

* Revised.

† Revised series. For revisions refer to the indicated pages of the monthly issues, as follows: Exports of tobacco for 1932, p. 42, June 1933. Data revised for 1933, for revisions of such months not shown above see p. 20 of this issue; 1932 final revision of anthracite and bituminous coal production, p. 42, January 1934; anthracite shipments for 1932, p. 42, December 1933; consumption of bituminous coal by electric power plants, p. 42, May 1933; beehive and byproduct coke for 1932, p. 43, December 1933. Data revised for 1933. Beehive and byproduct coke see p. 43, July 1934. Crude petroleum production, stocks, east of California (total), at refineries and at tank farms and pipe lines, and wells completed, for 1932, p. 56, November 1933.

* Statistics here given as of August 31 and subsequent months are not comparable with the figures for earlier months because of revisions and transfers from one kind of storage to another as a result of the new form of report to the Petroleum Administrative Board. The Bureau of Mines has not found it possible to reconcile these figures and will report them henceforth to compare with the August data. The Aug. 31 figures on the old basis are on p. 42 of the November 1933 issue.

* New basis, as of Dec. 31, caused by 1,089,000 barrels being classified as fuel oil.

† See footnote on p. 35 of this issue. Data revised for 1933. Revision of months not shown above will appear in a subsequent issue.

‡ Price converted to short-ton basis.

§ December 1 estimate.

* New series. For earlier data see p. 20 of the February 1933 issue, production of residual fuel oil and gas oil and distillate fuels, and p. 19 of the June 1933 issue, leather.
† Revised series. For revisions refer to the indicated pages of the monthly issues, as follows: Consumption of gas and fuel oils in electric-power plants for 1932, p. 43, May 1933, for 1933 revisions, p. 43 May 1934; production of residual fuel oils and gas oil and distillate fuels, stocks of residual fuel oil east of California, consumption of gasoline, production of gasoline at natural gas plants and refineries, stocks of gasoline at refineries, consumption of kerosene and lubricating oil, and production of asphalt for 1932, p. 56, November 1933; retail distribution gasoline in 41 States for 1932, p. 43, May 1933, for 1933, p. 43, May 1934; production of cattle and sheep and lamb hides, p. 44, April 1934; imports of total hides and skins and upper leather for 1932, p. 43, June 1933.
* Beginning Aug. 31, figures reported on the new basis, caused by transfer of 414,000 barrels from gas-oil and fuel-oil stocks.
* New basis caused by transfer of 243,000 barrels from bulk terminal stocks and approximately 93,000 barrels transferred from refinery stocks.
* New basis resulting from transfer of finished stocks to unfinished stocks and addition of stocks not previously reported.
See footnote on p. 35 of this issue. Imports also revised for 1933. Revisions for such months not shown above will appear in a subsequent issue.
* Data revised for 1933. For revisions for months not shown above, see p. 20 of this issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* New series. Earlier data on furniture activity, all districts, not published. For imports of iron and steel, see p. 20 of the November 1932 issue, for castings, p. 20 of the April 1933 issue.

† Data revised for 1932. For revisions, see pp. 44 and 45, lumber and p. 45, iron and steel, of the June 1933 issue. Data revised for 1933. For revisions of months not shown above, see p. 20 of this issue.

‡ Revised. Earlier data not published.

§ Beginning with January 1934 the report includes all known operators. Prior to this time approximately 89 percent of the listed capacity was included.

¶ Imports from Cuba not included.

‡ See footnote on p. 35 of this issue. Data revised for 1933. Revision of months not shown above will appear in a subsequent issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

*New series. For earlier data see p. 20 of the December 1932 issue, tin andterne plate, p. 19 of the January 1933 issue, stokers, p. 20 of the July 1934 issue for new orders machine tools (including forging equipment). Current oil-burner series available only back to January 1933 are based on reports from 149 concerns. See p. 48 of the May 1934 issue for January, February, and March 1933 data.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* New series. For earlier data, see p. 20 of the December 1932 issue.
† Revised.

§ Revised series. For earlier data see p. 19 of the August 1933 issue.

¶ Data on exports revised for 1933. For revisions of months not shown above see p. 20 of this issue.

§ Data for 1932 revised. For revisions see p. 45 of the June 1933 issue, exports of refined and total imports of copper; for revisions of 1933 on zinc, see p. 49 of the February 1934 issue.

See footnote on p. 35 of this issue. Data for 1933 revised. Revisions for such months not shown above will appear in a subsequent issue.

Monthly statistics through December 1931, together with explanatory footnotes and references to the sources of the data, may be found in the 1932 Annual Supplement to the Survey

* New series. For earlier data on hand vacuum cleaners see p. 20 of the August 1934 issue. Data prior to July 1931 not published on brass plumbing fixtures.

† Revised series. For earlier data see pp. 18, 19, and 20 of the November 1933 issue for chemical, mechanical wood pulp, and total paper; p. 49 of the June 1933 issue for 1932 for chemical wood pulp imports; and p. 19 of the December 1933 issue for book paper.

See footnote on p. 35 of this issue. Data for 1933 revised. Revisions of such months not shown above will appear in a subsequent issue.

* Revised.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† Revised series. For earlier data see p. 19 and 20 of the December 1933 issue for writing, wrapping, and other grades of paper; for 1932 revisions, p. 50 of the June 1933 issue for crude rubber imports; and for 1932 revision, p. 50 of the May 1933 issue for world and United States stocks. Data on consumption of rubber for tires revised for 1932, 1933, and 1934. For revisions see p. 51 of the Aug. 1934 issue.

‡ Earlier data on box board not available, prior to January 1933.

§ Data for 1934 are estimated to represent approximately 97 percent of the industry; data are estimated to cover 79 percent of the industry for 1929-33, inclusive, and 75 to 80 percent prior to 1929.

¶ See footnote on p. 35 of this issue. Data for 1933 revised. Revisions for months not shown above will appear in a subsequent issue.

* New series. See p. 19 of the December 1933 issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

f New series. Earlier data not published, rubber heels and soles and illuminating glassware; for earlier data see p. 20 of the June 1933 issue, face brick, machine production.

* Census Bureau has comparative summaries for 2 months only on structural clay products. Series not comparable over 13-month period.

† Adjusted for degrading and year-end physical inventories.

‡ Revised data for 1933 represent total production for the United States.

* Series on glass containers are not comparable for 1934 and earlier years due to increase of number of firms reporting to 44. Shipments of the 44 firms for the first 7 months of 1933 amounted to 19,637,513 compared with 12,667,118 for the 30 firms reporting a year ago. Comparable statistics on shipments for the companies now reporting by years, from 1928 to date were as follows (in gross): 1928, 31,943,016; 1929, 33,765,896; 1930, 31,905,933; 1931, 31,413,506; 1932, 26,947,949; and 1933, 33,048,747. Data are not available for this period on production and stocks, nor are monthly figures on production available. It may be noted from the trend of these data that the monthly figures prior to 1934 had a downward bias.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* New series. For earlier data on gypsum, see p. 20 of the January 1933 issue; the new series on hosiery compiled by the Hosiery Code Authority and are estimated to represent 95 percent of the industry. Data on cotton cloth finishing are from the National Association of Finishers of Textile Fabrics and cover practically all the industry; figures are not available for earlier periods; the production statistics are prorated from data for 4-week periods; stocks are as reported at end of each 4-week period.

† Dec 1 estimate.

‡ As of August 1.

§ For revisions for crop years 1932 and 1933 see p. 52 of the October 1933 issue and p. 52 of the September 1933 issue, respectively.

¶ For revisions of cotton consumption domestic stocks and spindle activity for the year ended July 1932 see p. 20 of the February 1933 issue, and for cotton consumption domestic stocks and spindle activity for the year ended July 1933 see pp. 52 and 53 of the November 1933 issue.

‡ Data revised for 1932. For revisions see p. 53 of the June 1933 issue. Data revised for 1933 for revisions of months not shown above see p. 20 of this issue.

§ See footnote on p. 35 of this issue. Data revised for 1933. Revision for months not shown above will appear in a subsequent issue.

¶ Stocks at end of 4-week periods.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† Preliminary.

§ Data revised for 1932. For revisions see pp. 53 and 54 of the June 1933 issue.

¶ See footnote on p. 35 of this issue.

† Compiled by the Silk Code Authority (The National Federation of Textiles, Inc.) and represent the percentage of operations based on an 80-hour week (2 shifts of 40 hours each). Data are not comparable with the series previously shown in the Survey which were based on a smaller sample and which were computed on the basis of a 48-hour week. The code authority expects to adjust the old series to a comparable basis, when opportunity affords.

* New series. Silk spindle activity, compiled by Silk Throwing Code Authority; not comparable with spinning data previously shown. For earlier data on silk piece goods (stock-carrying mills only) see p. 20 of August 1934 issue.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1934

* Revised.

† New series. For earlier data see p. 20 of the February 1934 issue for shipments, accessories, and parts, and new commercial cars.

* Revised series. For earlier data see p. 19 of the August 1933 issue for fire extinguishers and passenger-car registrations; and p. 53 of the June 1933 issue for 1932 exports of locomotives. Data on automobiles revised for 1933. See p. 55 of the August 1934 issue.

† Data revised for 1932. See p. 54 of the June 1933 issue.

† Data revised for 1932. See p. 54 of the June 1933 issue. Data revised for 1933. For revisions of such months not shown above see p. 20 of this issue.

* Preliminary.

Monthly statistics through December 1931, together with explanatory footnotes and refer- ences to the sources of the data, may be found in the 1932 Annual Supplement to the Survey	1934	1933						1932

^a Revised.
^b New series. For earlier data see p. 18 of the February 1933 issue, business indexes, p. 20 of the October 1933 issue, commercial failures, and p. 20 of the February 1934 issue, life-insurance sales.
^c Revised series. See p. 55 of the April 1934 issue, construction, and mining production, for 1933. Series on common-stock prices revised back to December 1932 as a result of additional stocks, for revision see p. 56 of the April 1934 issue.
^d Number of commodities changed from 502 to 567 beginning with month of January 1934.
^e Data revised for 1932 to 1933. Revision for 1932 see p. 55 of the November 1933 issue.
