SURVEY OF
CURRENT BUSINESS

DECEMBER, 1930

No. 112

ISSUED BY
BUREAU OF FOREIGN AND DOMESTIC COMMERCE

IMPORTANT NOTICE

In addition to figures given from Government sources, there are also incorporated for completeness of service figures from other sources generally accepted by the trades, the authority and responsibility for which are noted in the "Sources of Data" on pages 140-143 of the August, 1930, semiannual issue

INTRODUCTION

The SURVEY OF CURRENT BUSINESS is designed to present each month a picture of the business situation by setting forth the principal facts regarding the various lines of trade and industry. The figures reported are very largely those already in existence. The chief function of the department is to bring together these data which, if available at all, are scattered in hundreds of different publications. A portion of these data are collected by Government departments, other figures are compiled by technical journals, and still others are reported by trade associations.

At semiannual intervals detailed tables are published giving, for each item, monthly figures for the past two years and yearly comparisons, where available, back to 1913; also blank lines sufficient for six months have been left at the bottom of each table, enabling those who care to do so to enter new figures as soon as they appear (see August, 1930, issue). In the intervening months the more important comparisons only are given in the table entitled "Trend of business movements."

WEEKLY SUPPLEMENT

Realizing that current statistics are highly perishable and that to be of use they must reach the business man at the earliest possible moment, the department has arranged to distribute supplements every week to subscribers in the United States. The supplements are usually mailed on Saturdays and give such information as has been received during the week ending on the preceding Tuesday. The monthly information contained in these bulletins is republished in the SURVEY and the supplements also contain charts and tables of weekly data.

RELATIVE AND INDEX NUMBERS

To facilitate comparison between different important items and to chart series expressed in different units, relative numbers (often called "index numbers," a term referring more particularly to a special kind of number described below) have been calculated. The monthly average for 1923-1925 has usually been used as a base equal to 100.

The relative numbers are computed by allowing the monthly average for the base year or period to equal 100. If the movement for a current month is greater than the base, the relative number will be greater than 100, and vice versa. The difference between 100 and the relative number will give at once the per cent increase of decrease compared with the base period. Thus a relative number of 115 means an increase of 15 per cent over the base period, while a relative number of 80 means a decrease of 20 per cent from the base.

Relative numbers may also be used to calculate the approximate percentage increase or decrease in a movement from one period to the next. Thus, if a relative number at one month is 120 and for a later month it is 144 there has been an increase of 20 per cent.

When two or more series of relative numbers are combined by a system of weightings, the resulting series is denominated an index number. The index number, by combining many relative numbers is designed to show the trend of an entire group of

industries or for the country as a whole, instead of for the single commodity or industry which the relative number covers. Comparisons with the base year or with other periods are made in the same manner as in the case of relative numbers.

RATIO CHARTS

In most instances the charts used in the SURVEY OF CURRENT BUSINESS are of the type termed "Ratio Charts" (logarithmic scale), notably the Business Indicator charts on page 2. These charts show the percentage increase and allow direct comparisons between the slope of one curve and that of any other curve regardless of its location on the diagram; that is, a 10 per cent increase in an item is given the same vertical movement whether its curve is near the bottom or near the top of the chart. The difference between this and the ordinary arithmetic form of chart can be made clear by an example. If a certain item having a relative number of 400 in one month increases 10 per cent in the following month, its relative number will be 440, and on an ordinary chart would be plotted 40 equivalent scale points higher than the preceding months. Another movement with a relative number of, say, 50 also increases 10 per cent, making its relative number 55. On the ordinary (arithmetic) scale this item would rise only 5 equidistant points, whereas the previous item rose 40 points, yet each showed the same percentage increase. The ratio charts avoid difficulty and give to each of the two movements exactly the same vertical rise, and hence the slopes of the two lines are directly comparable. The ratio charts compare percentage changes while the arithmetic charts compare absolute changes.

RECORD BOOK

As an aid to readers in comparing present data with monthly statistics in previous years, the department is compiling a RECORD BOOK OF BUSINESS STATISTICS, in which data now carried in the SURVEY OF CURRENT BUSINESS are shown by months as far back as 1909, if available. Full descriptions of the figures and reports of how the data are used in actual practice by business firms are contained in the RECORD Book. The sections covering textiles, metals, and fuels, automobiles, and rubber have already been issued and may be obtained for 10 cents per copy from the Superintendent of Documents, Government Printing Office, Washington, D. C. (Do not send stamps.) Notices of other sections will be given in the SURVEY as they are issued.

METHOD OF USE

Methods of using and interpreting current business statistics have been collected by the department from many business concerns and are described in a booklet entitled "How to Use Current Business Statistics," together with methods of collecting statistics. This booklet may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 15 cents per copy. (Do not send stamps.)

This issue presents practically complete data for the month of October and contains text covering the early weeks of November (page 1), for which the basic figures in table and chart form are represented regularly in the weekly supplements. As most data covering a particular month's business are not available until from 15 to 30 days after the close of the month, a complete picture of that month's operations can not be presented at an early date, but the weekly supplements give every week the latest data available.

SURVEY OF CURRENT BUSINESS

PUBLISHED BY

UNITED STATES DEPARTMENT OF COMMERCE

Subscription price of the SURVEY OF CURRENT BUSINESS is \$1.50 a year; single copies (monthly), 10 cents; semiannual issues, 25 cents. Foreign subscriptions, \$2.25; single copies (monthly issues), including postage, 14 cents; semiannual issues, 36 cents. Subscription price of COMMERCE REPORTS is \$4 a year; with the SURVEY, \$5.50 a year. Make remittances only to Superintendent of Documents, Washington, D. C., by postal money order, express order, or New York draft. Currency at sender's risk. Postage stamps or foreign money not accepted

PRELIMINARY SUMMARY FOR NOVEMBER

Early reports on industrial conditions in November show, in the main, little change from a month ago, when allowance is made for the fewer number of working days in the month. Distribution of goods through primary channels, however, was running smaller than last year, as indicated by the returns on carloadings. The value of new building contracts awarded for the month of November showed a falling off from both the preceding month and a year ago. The production of bituminous coal and anthracite declined from the previous month and was also lower than a year ago. The output of steel ingots and pig iron receded from October and November, 1929. Tin deliveries showed declines from comparative periods.

Wholesale prices in general showed but slight change, while prices for copper, although lower than a year ago, averaged higher than in October. Prices for iron and steel averaged lower than prior periods.

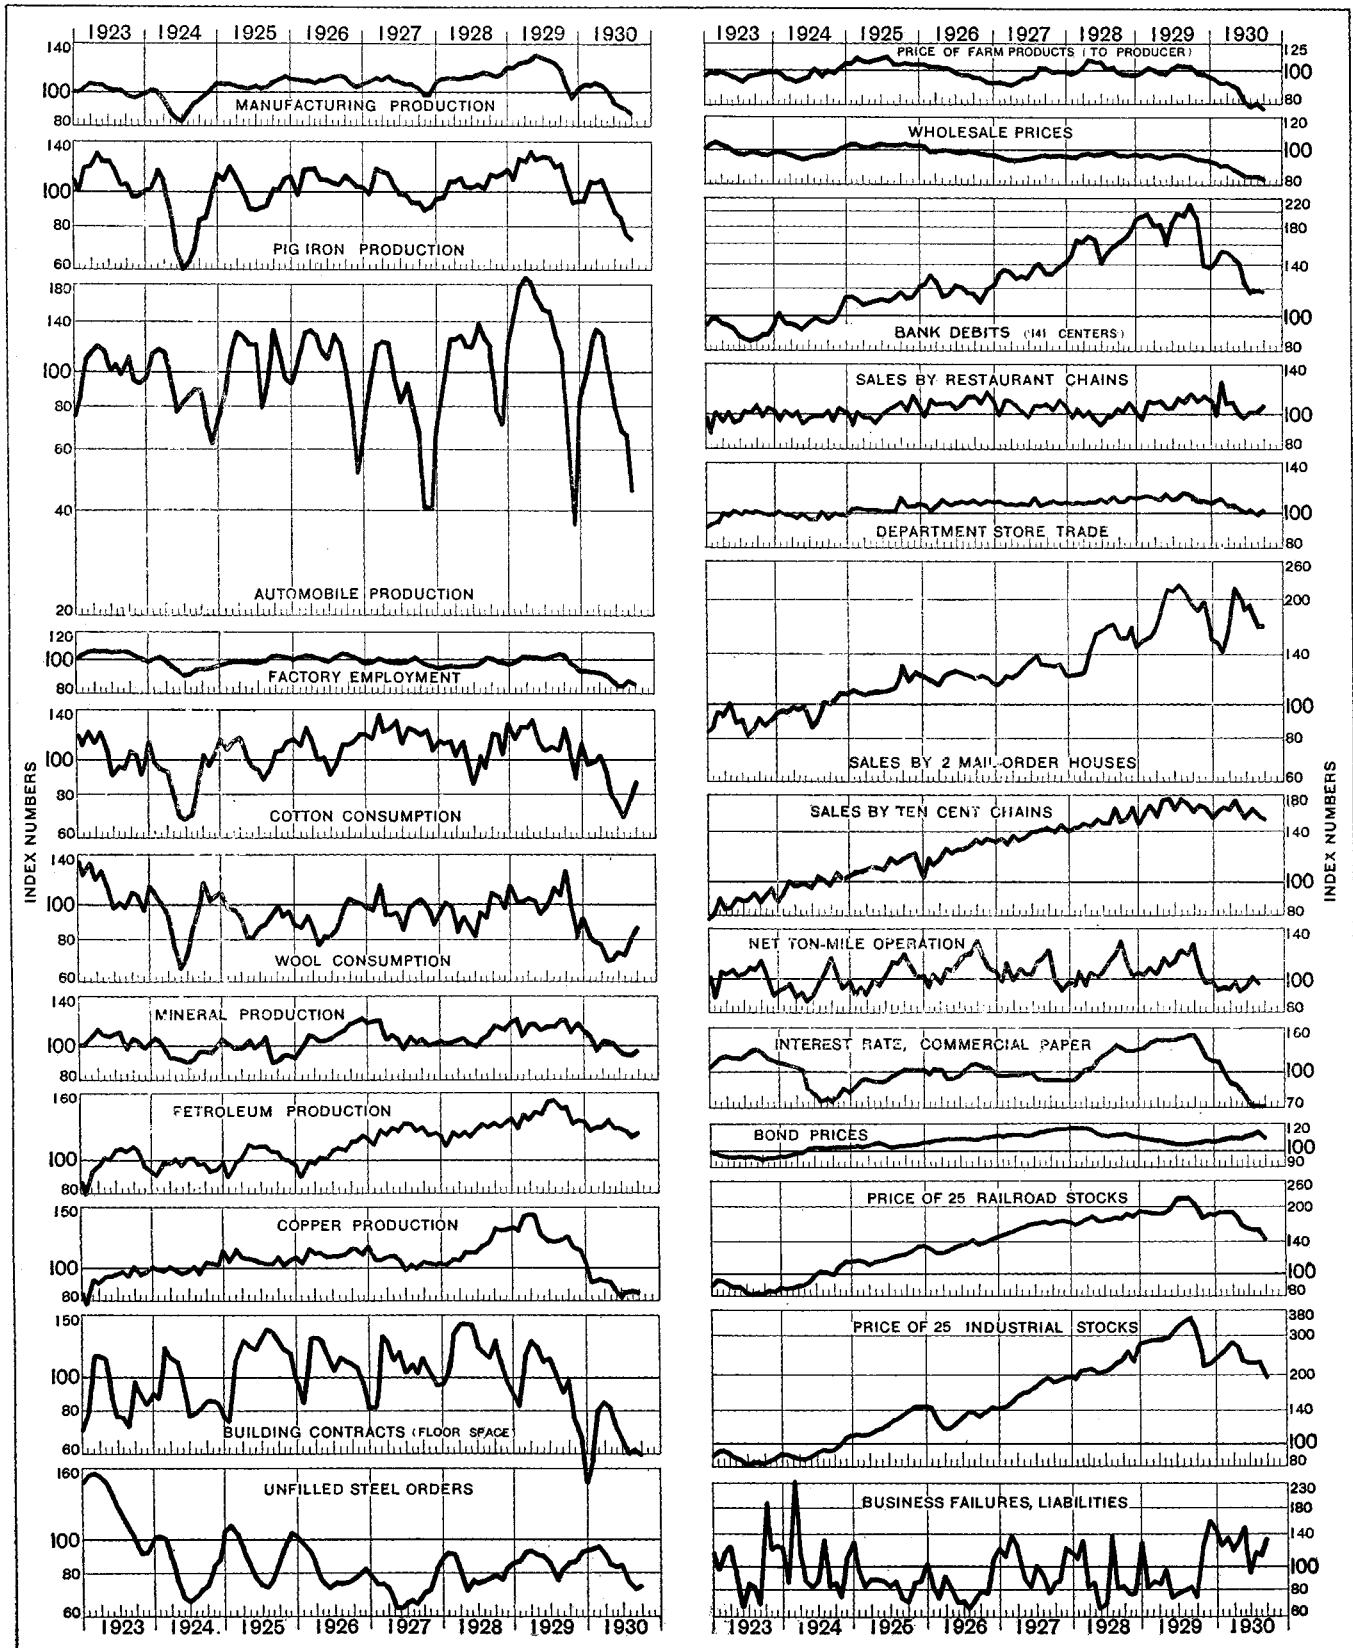

Loans and discounts of Federal reserve member

banks at the end of November showed a falling off from the end of October and were less than those of a year ago. The Federal reserve ratio was higher than at the end of November, 1929. Bank debits outside New York for the early weeks of November indicate a decline from October and from a corresponding period a year ago. Prices for stocks listed on the New York Exchange averaged lower than both preceding periods; bond prices, on the other hand, were higher than in November, 1929. Loans to brokers secured by stocks and bonds continued to decline during the month.

Interest rates on call loans, although lower than a year ago, showed no change from the previous month. Rates on prime commercial paper declined slightly from the rates of October and, like all money rates, were lower than last year. Business failures during November were less numerous than during the preceding month.

MONTHLY BUSINESS INDICATORS, 1923-1930

[Ratio charts—see explanations on inside front cover. The curves on check payments, wholesale trade, 10-cent chains, and department stores have been adjusted for normal seasonal variations, and manufacturing production for the varying number of working days in the month as well. 1923-1925 monthly average=100]

MONTHLY BUSINESS INDICATORS

The principal business indicators are shown below, all calculated on a comparable basis, the average for the years 1923 to 1925, inclusive. Thus the table gives a bird's-eye view of the business situation in a concise form, so that trends of the principal indicators may be seen at a glance.

Certain indicators, in which there is a marked seasonal movement, are shown with the average seasonal variations eliminated, as noted below. In this manner a more understanding month-to-month comparison may be made.

*Seasonal adjustments.

BUSINESS CONDITIONS IN OCTOBER

PRODUCTION

According to the weighted orders of the Federal Reserve Board, industrial production in October, after adjustments for seasonal variations, showed a decline from the preceding month and was lower than in October, 1929. Manufacturing output showed a decrease from September amounting to 5 per cent and was considerably lower than a year ago. The production of minerals, also adjusted for seasonal variations, registered a seasonal increase over the previous month, mainly because of increased production of bituminous coal and anthracite.

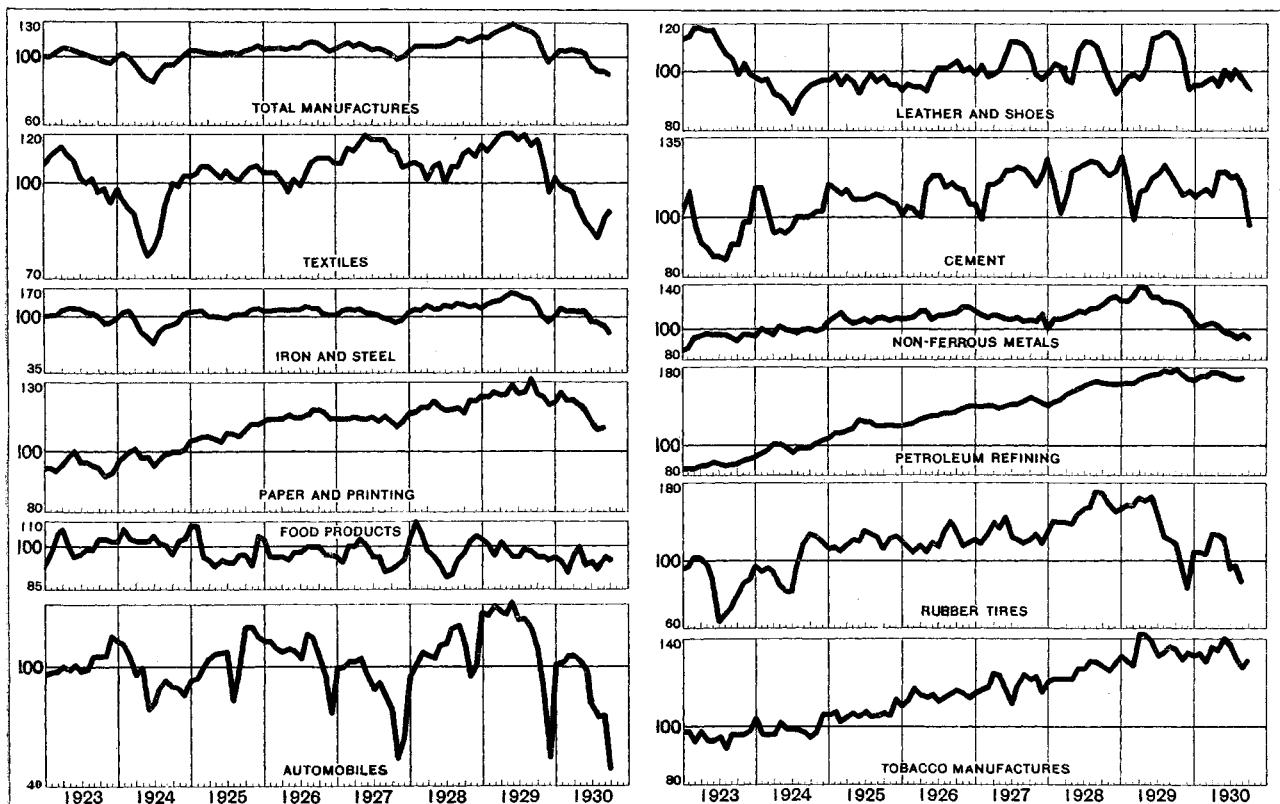

DISTRIBUTION

Wholesale trade of groceries, dry goods, hardware, and drugs was lower than the month of October, 1929. For the year to date declines were noted in all lines when compared with a similar period of last year.

The volume of sales transacted by department stores during October increased by 9 per cent over the preceding month, when allowance is made for the number of trading days. As compared with October of last year the total sales were 8 per cent smaller. The value of merchandise stocks held by department stores, as represented by the adjusted

MANUFACTURING PRODUCTION BY MAJOR GROUPS

[Relative numbers, monthly average 1923-1925, taken as 100, adjusted for seasonal variations]

COMMODITY STOCKS

Stocks of commodities held at the end of October were greater than at the end of the preceding month or a year ago. Inventories of raw materials showed an increase at the end of the month over both comparative periods, while stocks of finished goods, although remaining unchanged from the preceding month, were greater than a year ago.

SALES

The general index of unfilled orders showed a slight decline from the month of September and was lower than a year ago. In comparison with September, unfilled orders for all groups showed declines with the exception of iron and steel which group showed no change.

index, relative to the 1923-1925 average, showed a slight increase over the stocks held at the end of September, but were considerably lower than a year ago. The sales of leading mail-order systems showed a marked gain over the previous month, but a decrease from the same month in 1929. Sales by principal chain stores were, without exception, larger than the month of September, and, like mail-order sales, were smaller than last year. The decline in the value of sales of these retail units from a year ago was due to a great extent to lower prices paid for sales articles.

Restaurant sales during October, although advancing over the sales of September, were lower than a year ago.

PRICES

The composite index of wholesale prices as computed by the Bureau of Labor Statistics relative to the year 1926 taken as 100, stood at 82.6 for October. This compares with 84.2 for September and 96.3 for October, 1929. Prices for all major groups were fractionally lower than September, with the exception of prices paid for hides and leather products, which advanced. Prices for all groups showed decreases when compared with prices that ruled in October of last year.

Classified according to condition of manufacture prices for raw materials, semimanufactured goods and finished products were slightly lower than the preceding month, and like prices in general were lower than in October a year ago.

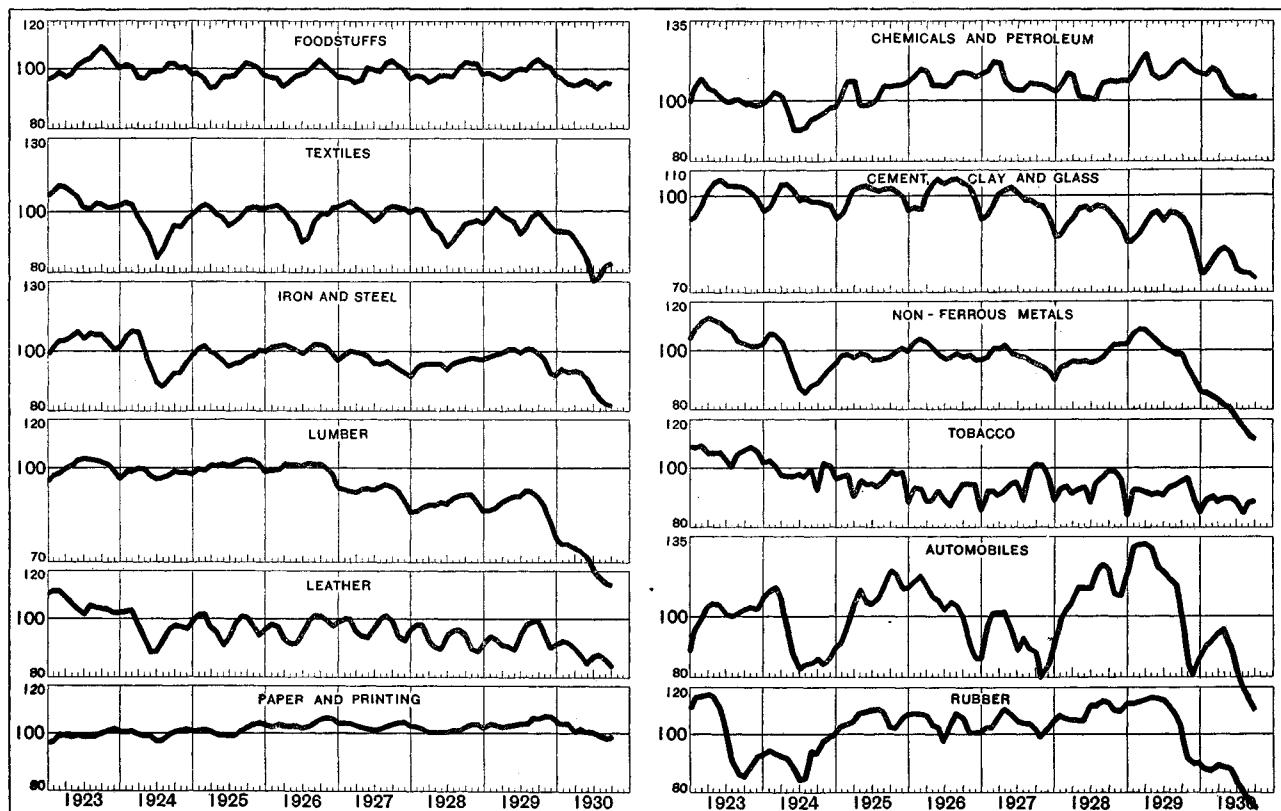

Prices received by farmers for their products were, in the main, lower than the preceding month or a year

products, but the gains were insufficient to offset decreased employment in establishments producing iron and steel, machinery, food products, lumber, automobiles, leather, cement, nonferrous metals, chemicals, and rubber products. Compared with October, 1929, all groups showed smaller numbers employed.

Factory pay rolls in October were likewise somewhat lower than in September, and like employment was smaller than a year ago. In comparison with the month of September increased pay-roll payments were made by factories producing iron and steel and textiles, while smaller payments than September occurred in establishments producing machinery, food products, paper, transportation equipment, leather, nonferrous metals, chemicals, rubber, and tobacco products. Pay rolls in the cement, clay, and glass industries remained unchanged from the month of September. The

FACTORY EMPLOYMENT, BY GROUPS

[1926 monthly average = 100. October, 1930, is latest month plotted]

ago. Although prices received by producers of dairy and poultry products were higher than the previous month, this increase was insufficient to offset declines occurring in the other groups. Retail prices for food were lower than in both comparative periods.

EMPLOYMENT

Employment in factories in October, as shown by the general index, unadjusted for seasonal conditions, stood at 84.3. This compares with 86.4 for September and 103.3 for October, 1929. Increased employment occurred, as compared with September in factories producing textiles, paper and books, and tobacco

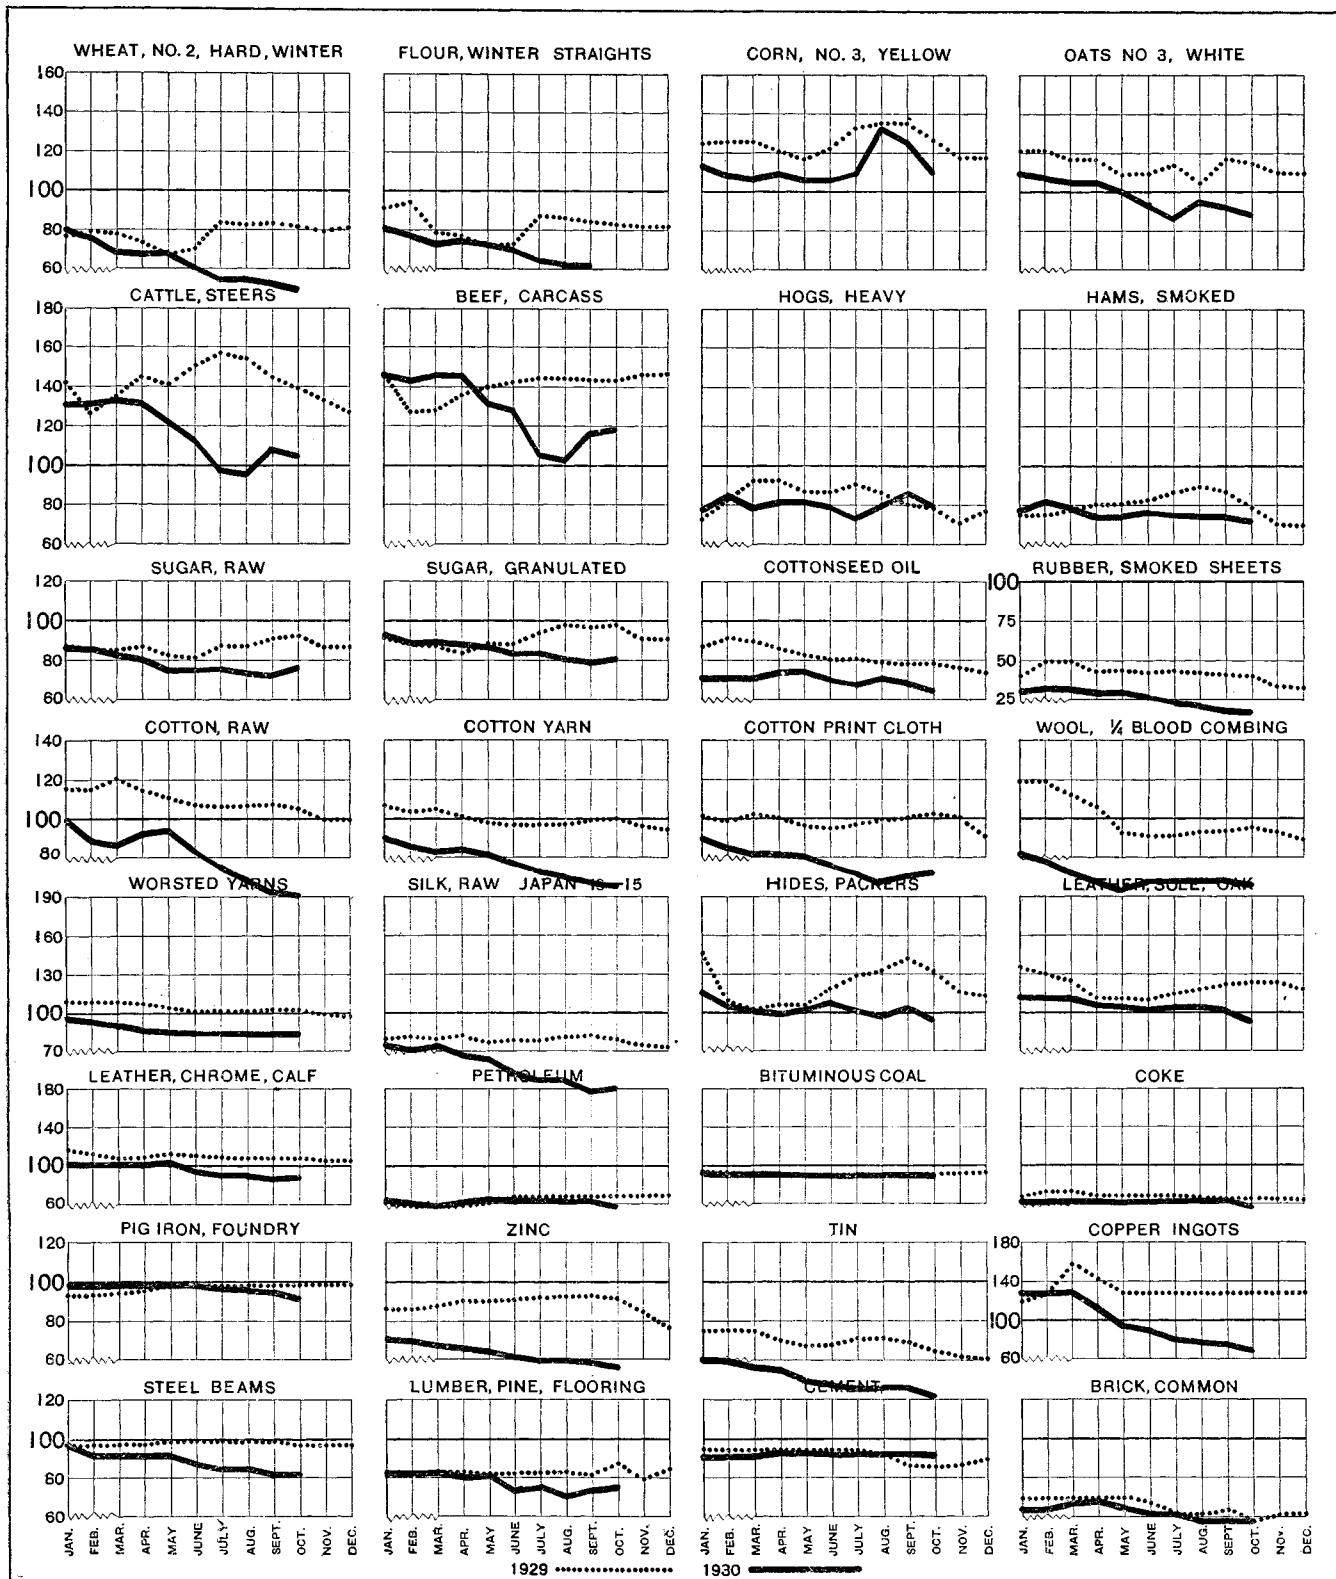

decrease in the amount of pay rolls from a month ago was due in no small degree to the smaller number of workers employed. In comparison with October a year ago smaller payments were made to workers in all groups included in the general index.

COST OF LIVING

The cost of living index for October relative to July, 1914, as compiled by the National Industrial Conference Board, stood at 152, as compared with 153 for September and 163 for October, 1929. As compared with September, decreases occurred in all groups except fuel, which increased, and sundries, which showed no change.

WHOLESALE PRICES FOR SPECIFIED COMMODITIES

[Relative numbers, 1926 monthly average taken as 100. October, 1930, is latest month plotted. Data from which these charts are drawn are given on the opposite page.]

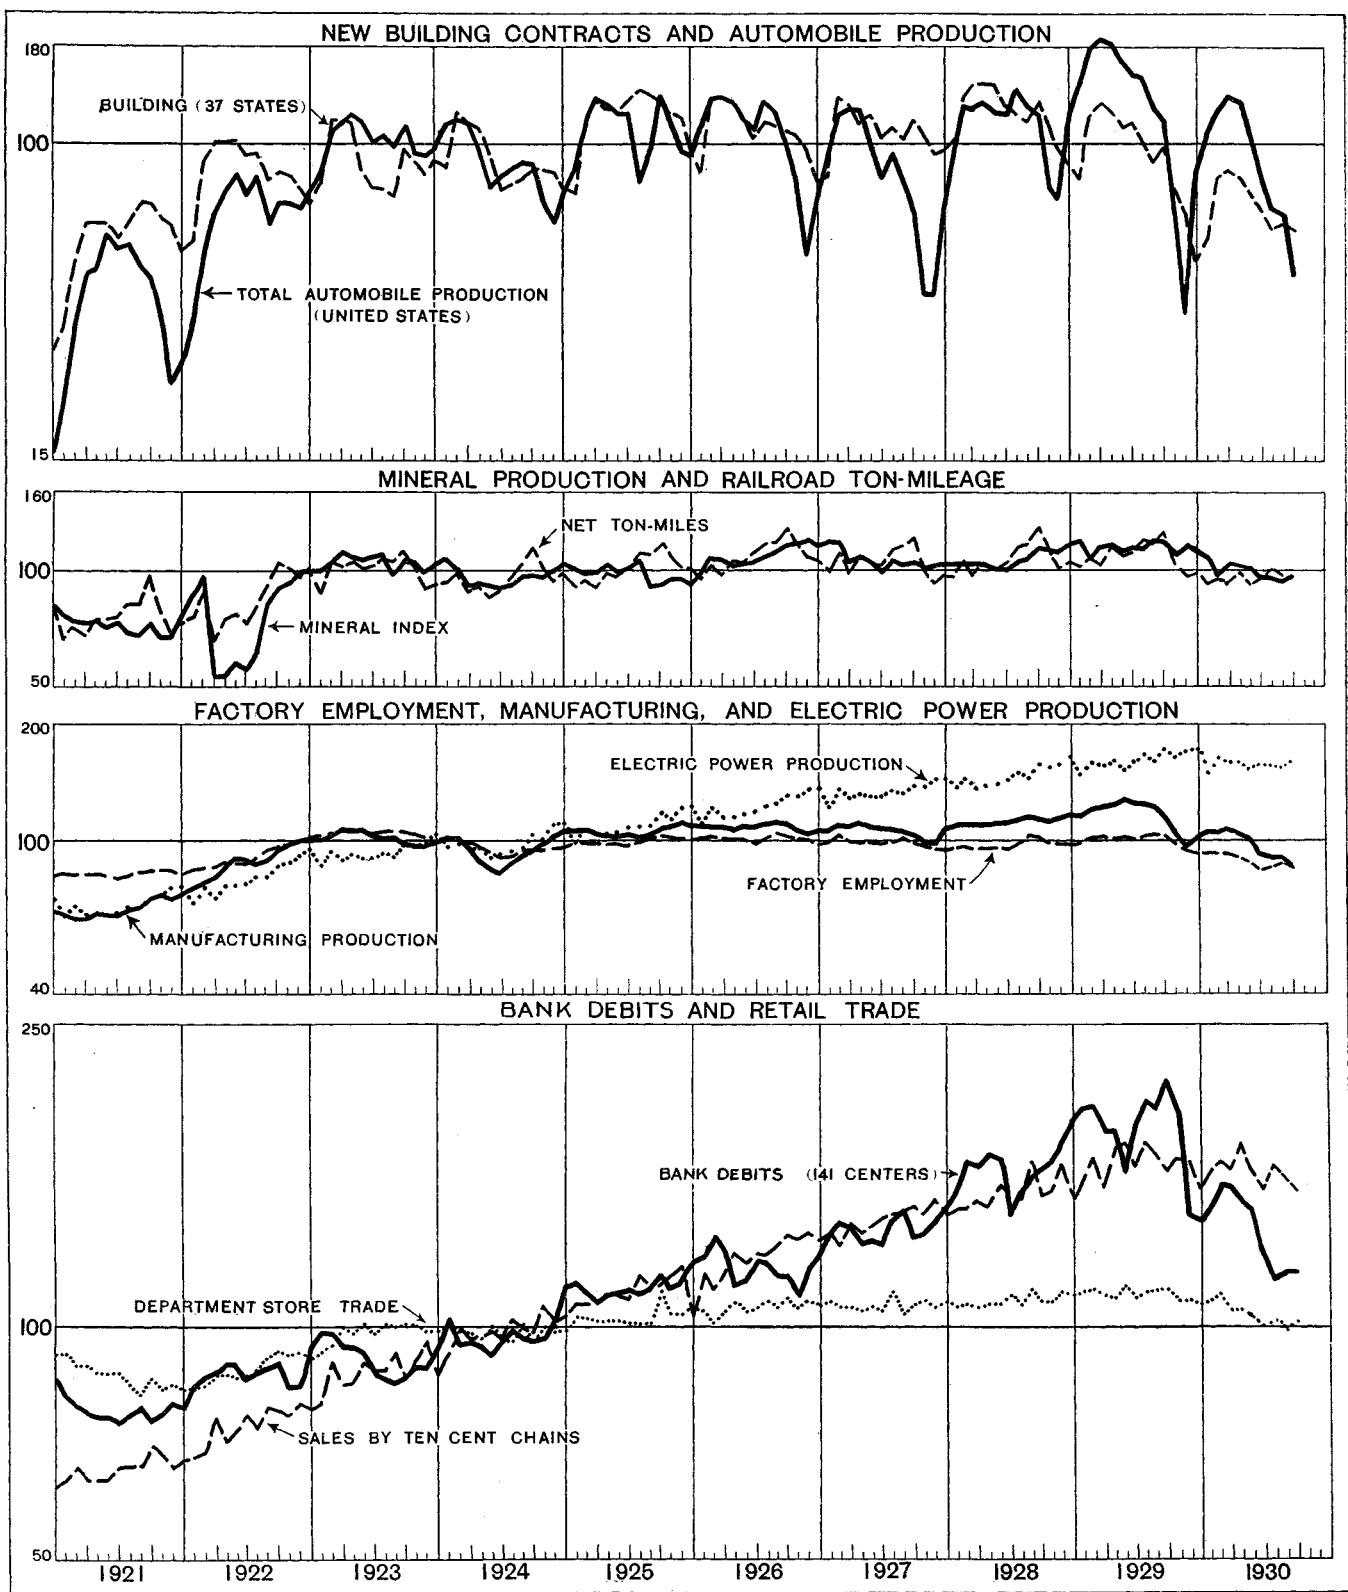

WHOLESALE PRICES FOR SPECIFIED COMMODITIES

NOTE.—Prices to producer on farm products and market price of wool and grain prices are from U. S. Department of Agriculture, Bureau of Agriculture Economics; nonferrous metals from the *Engineering and Mining Journal-Press*, except tin, which is from the *American Metal Market*. All other prices are from U. S. Department of Labor, Bureau of Labor Statistics. So far as possible all quotations represent prices to producer or at mill.

COMMODITIES	Unit	ACTUAL PRICE (dollars)			RELATIVE PRICE

MEASURES OF INDUSTRIAL AND COMMERCIAL ACTIVITY

[Relative numbers, monthly average 1923-1925, taken as 100]

REVIEW OF PRINCIPAL BRANCHES OF COMMERCIAL AND INDUSTRY TEXTILES

TEXTILES

The consumption of wool by textile mills in October amounted to 40,975,000 pounds, as compared with 38,083,000 pounds in September and 59,352,000 pounds in October, 1929. For the year to date there were consumed 368,860,000 pounds, as contrasted with 442,387,000 pounds for a similar period in 1928.

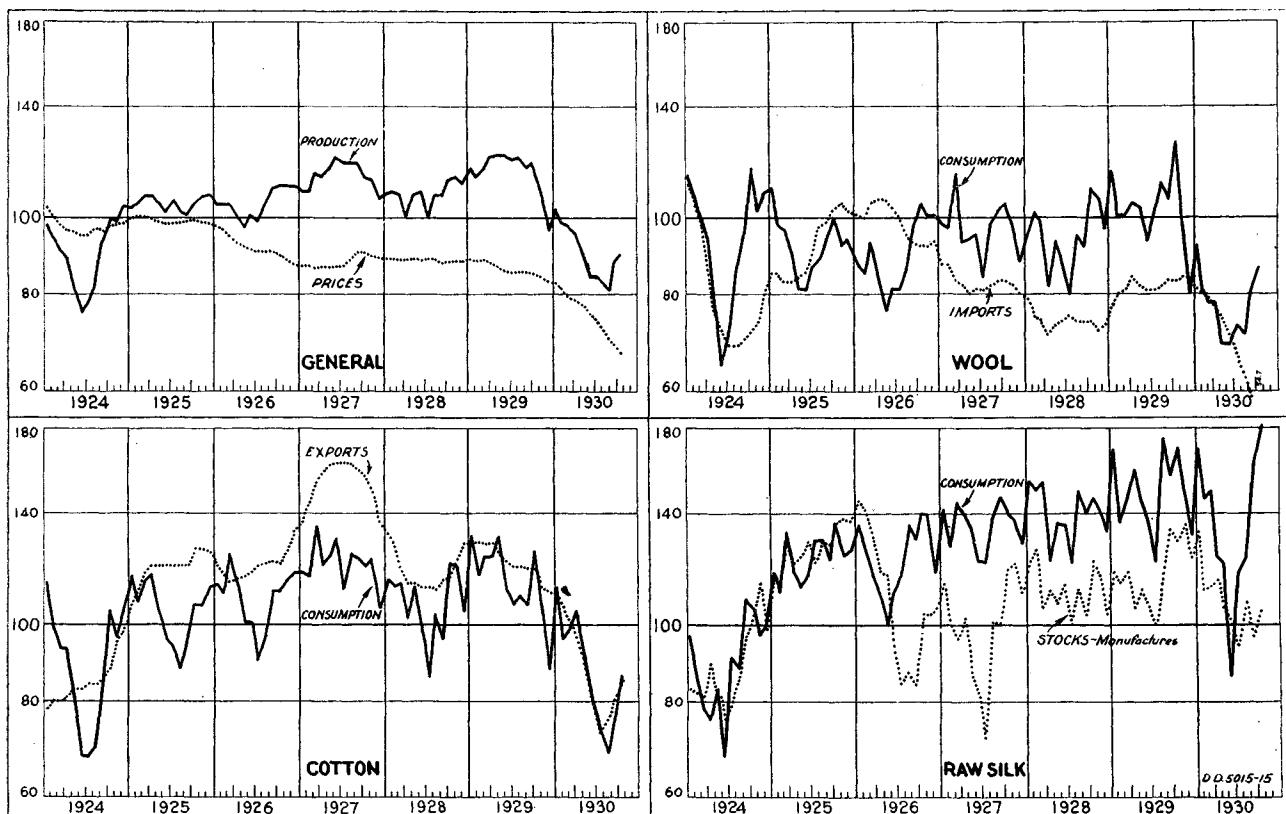

Cotton receipts in sight for the first 10 months of 1930 were 12 per cent smaller than during a like period in 1929. Exports of raw cotton in October registered a gain over the exports of September but were smaller than in October, 1929 and 1928. Consumption of cotton by textile mills showed an increase over the preceding month

comparative periods. Prices for raw Japanese silk of the grade 13-15 at New York, while higher than September, were considerably below the price level of the month of October of last year. Rayon imports in October declined from the preceding month and a year ago. Prices for rayon showing no change from the previous month were lower than a year ago.

Imports of burlaps and unmanufactured fibres were smaller in October than in the previous month or the same period in 1929. For the first 10 months of the year burlap imports amounted to 516,911,000 pounds, as compared with 555,952,000 pounds for the corresponding period in 1929. Fiber imports for the year

THE TEXTILE INDUSTRIES

[Relative numbers, monthly average 1923-1925, taken as 100. October, 1930, is latest month plotted. Curves covering imports of wools and exports of cotton are plotted from 12 months' moving monthly average plotted on the end month]

but was smaller than a year ago. Stocks of this commodity were higher than both comparative periods.

Imports and deliveries of raw silk to mills were substantially larger in October than in either the previous month or the corresponding period of last year. For the year to date, however, both movements were smaller than for a similar period in 1929. Stocks of silk at warehouses and manufacturing plants at the end of October, although greater than at the end of the previous month, were smaller than a year ago.

Silk machinery in the case of broad looms showed greater activity than in September. As compared with the activity of a year ago, October, 1929, the activity of broad and narrow looms was less. The activity of spinning spindles was greater than in both

to date were smaller when compared with a similar period of last year.

Production of pyroxylin-coated textiles was smaller than in September and lower than a year ago. Shipments billed during October increased over the preceding month, while unfilled orders declined. In comparison with a year ago both items were smaller.

Imports of buttons and button material in general showed but slight change from the month of September, but were lower than in 1929. Stocks of fresh-water pearl buttons were smaller than at the end of both comparative periods. The imports of vegetable ivory, or tagua nuts, for the year to date amounted to 11,389,000 pounds, as compared with 22,953,000 pounds for a similar period in 1929.

METALS

Shipments of iron ore from mines were considerably less than during either the previous month or the corresponding month of last year. The consumption of iron ore and the production of pig iron also declined from both prior periods, and the number of furnaces in blast declined proportionately. Stocks of iron ore both at furnaces and at Lake Erie docks exceeded those of the month of September but were smaller than at the end of October, 1929.

The October output of steel ingots was less than for either the previous month or the corresponding month of last year. Total production and new orders of steel and malleable castings also declined from both prior periods. Production and shipments of blue, black, and galvanized steel sheets recorded a gain over

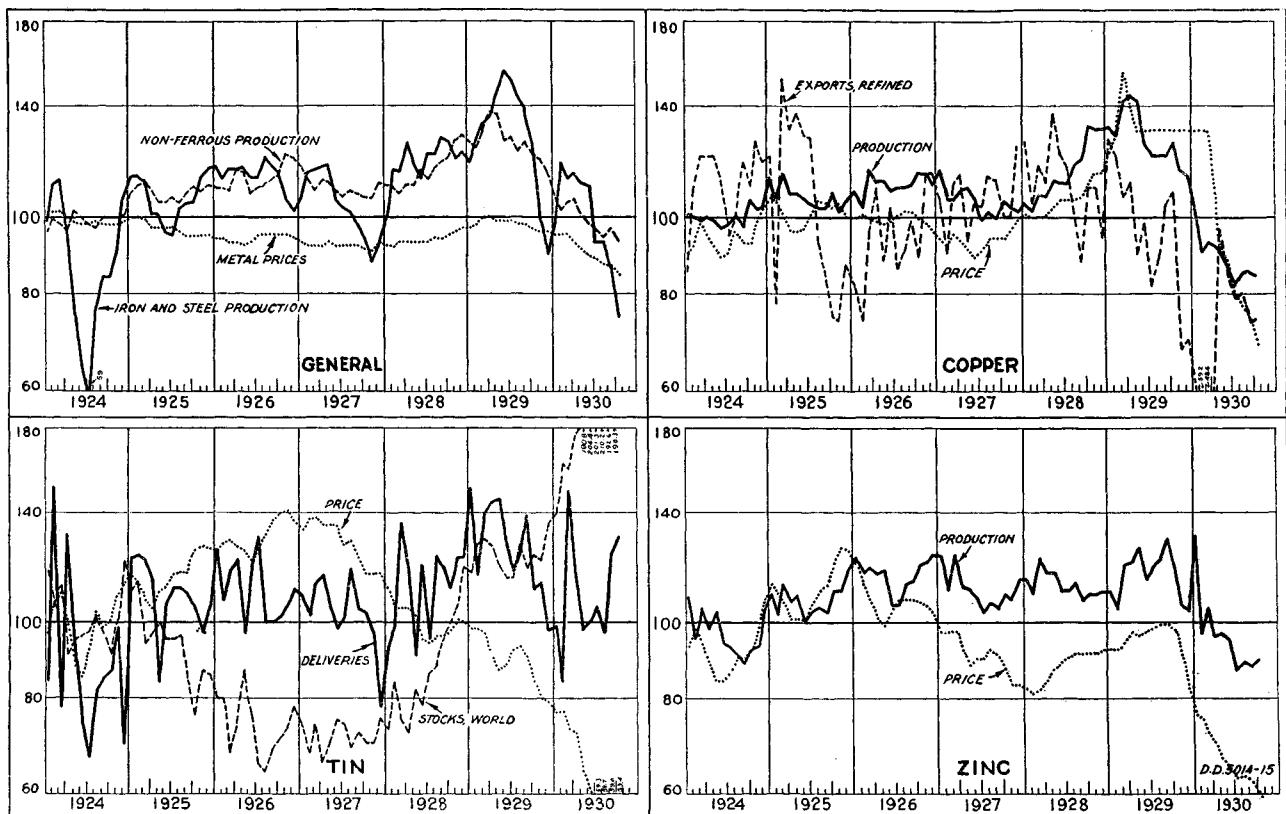

The October output of zinc, while showing a gain over the preceding month, was smaller than a year ago. The number of zinc retorts in operation was smaller than in either prior period. Zinc stocks at the end of October were greater than at the end of the previous month and greater than a year ago.

Babbitt metal consumption by manufacturers, although showing a gain over September, was about half what it was a year ago. Production and shipments of copper wire cloth were greater than the preceding month but were smaller in each case than a year ago. Stocks of this product, while declining from the end of the preceding period, were larger than at the end of October, 1929.

The October production of copper at the mines showed a fractional decline from September but was

THE METAL INDUSTRIES

[Relative numbers, monthly average 1923-1925, taken as 100. October, 1930, is latest month plotted]

the previous month, but were lower in each case than a year ago. Production and shipments of steel barrels were greater than the preceding month, while stocks were less. Barrel stocks on hand, although declining from a month ago, were larger than last year.

Unfilled orders of the United States Steel Corporation were less than either for the previous month or for the corresponding month of last year. Production of track work declined from both comparative periods. New orders for fabricated steel plate were smaller at the end of October when compared with the previous month and with October of last year, chiefly because of the decline in orders placed for oil storage tanks.

considerably lower than a year ago. Smelter copper output, on the other hand, was greater than in the preceding month. Stocks of blister copper, while greater than at the end of September, were smaller than a year ago.

Imports of tin were greater than during September and were almost as large as a year ago. Deliveries of tin, indicative of consumption, showed gains over comparative periods. The world visible supply, while fractionally off from a month ago, was larger than at the end of October of last year. Tin prices were uniformly lower than in September and lower than those of a year ago.

FUELS

The production of bituminous and of anthracite coal was greater than during the previous month, but less than a year ago. Coal prices in general were lower than in either prior period. Beehive and by-product coke output was greater than in September, but was considerably smaller as compared with a year ago.

AUTOMOBILES AND RUBBER

There were 150,044 passenger cars, trucks, and taxicabs produced in the United States during the month of October. This compares with 216,877 in September and 380,017 in October, 1929. Canadian output

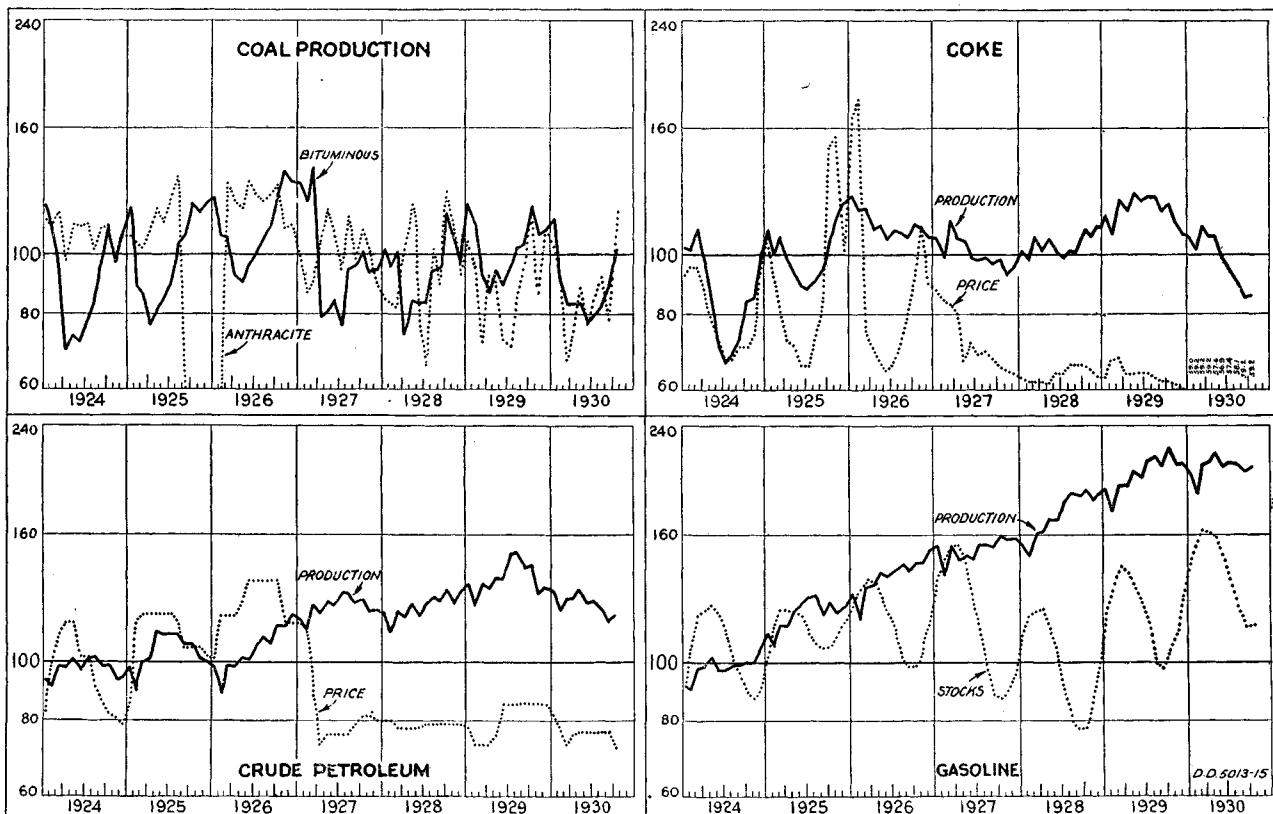

while stocks of tubes increased over the previous periods.

HIDES AND LEATHER

October imports of hides and skins from foreign countries were less than those during the previous month and less than a year ago. Increased imports of calf and goat skins over September were insufficient to offset declines occurring in imports of cattle hides and sheepskins. As compared with the imports in October, 1929, imports of calfskins were greater and those of goatskins, sheepskins, and cattle hides were less. The production of boots and shoes during October numbered 27,353,200 pairs, as compared with 29,334,000 pairs in September and 37,919,000 in October, 1929.

THE FUEL INDUSTRIES

[Relative numbers, monthly average 1923-1925 taken as 100. October, 1930, is latest month plotted where data were available]

totaled 4,541 cars and trucks, as compared with 7,957 for September and 14,523 for October a year ago. For the first 10 months of 1930 the output of automobiles was 3,071,869, as compared with 5,020,840 in 1929 and 3,867,503 in 1928.

A larger quantity of rubber was imported during October than during September or a year ago. For the year to date imports of crude rubber, including latex, amounted to 419,419 long tons, as compared with 356,513 long tons during a similar period in 1928. The consumption of crude rubber by tire manufacturers during October, while increasing by approximately 2,750,000 pounds over September, was lower than a year ago. The output of pneumatic casings and inner tubes showed a gain over the preceding month but was lower than last year. Stocks of casings declined,

Production of gloves and mittens showed a gain over the month of September but was lower than a year ago. Exports of both sole and upper leather to foreign lands registered increases over both comparative periods.

PAPER

The imports of newsprint paper during October, while greater than during September, were lower than a year ago. Newsprint output by mills in both the United States and Canada was greater than during September, although there was a decline as compared with a year ago. Consumption of newsprint by publishers showed gains over comparative periods. For the year to date more newsprint was used in this country than during a similar period in 1929 and 1928. Imports of wood pulp were greater than in either prior period.

BUILDING AND CONSTRUCTION

Building costs were generally lower in October than in either the month of September or a year ago.

New building in 37 States, as measured by contracts awarded (as compiled by the F. W. Dodge Corporation), showed increases both in total valuation of contracts and in floor space over the month of September. As compared with a year ago, both were lower. In comparison with September, increased valuation of contracts was noted in contracts awarded for commercial, educational, public, social and recreational, and residential buildings, and for public works and utilities, while declines occurred in the

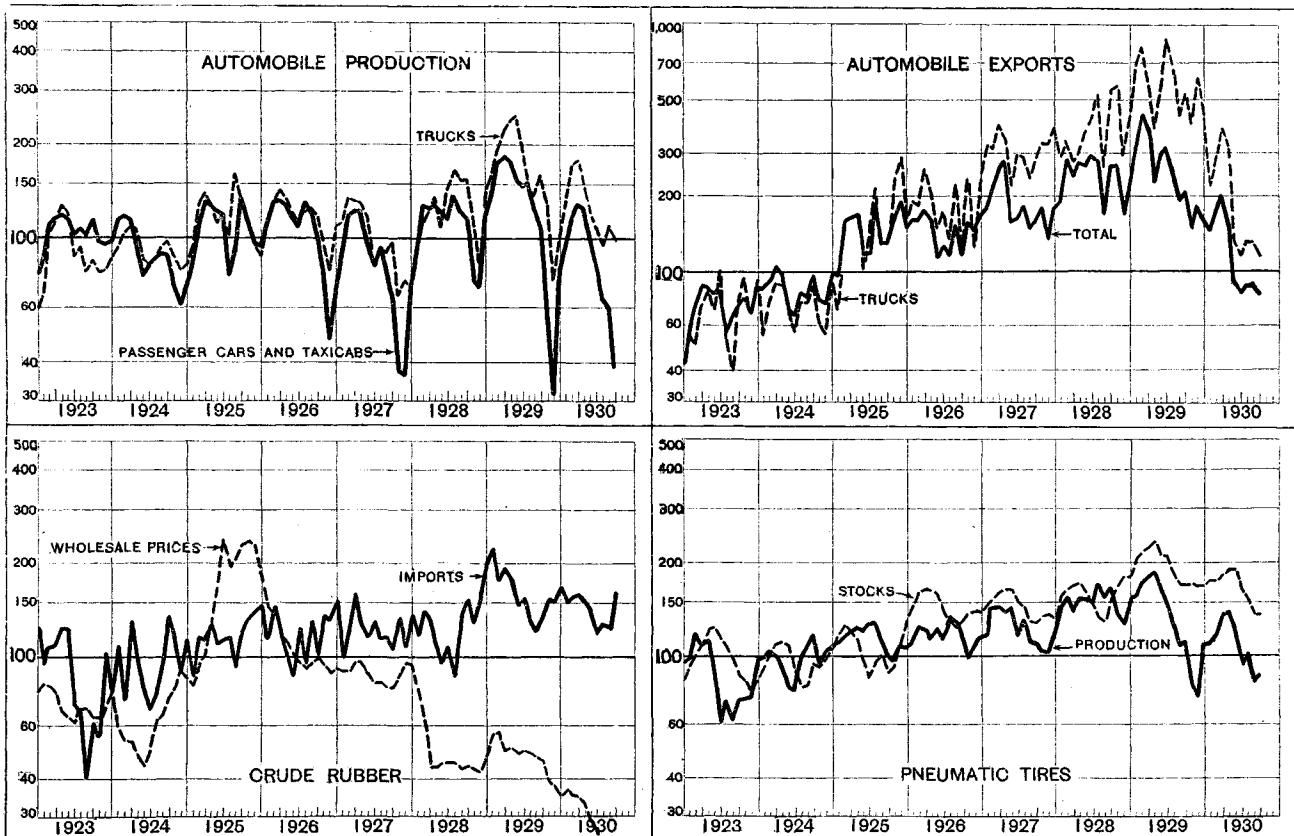

October than during the previous month, the production being somewhat smaller. Shipments of northern hardwoods were greater than in the previous period, but were less than a year ago. The production, shipments, and stocks of maple flooring were all lower than in both prior periods.

BUILDING MATERIALS

Portland cement output in the United States during October was smaller than during the preceding month and was below production of a year ago. For the year to date the output was 141,329,000 barrels; this compares with 144,930,000 barrels for a similar

THE AUTOMOBILE AND RUBBER INDUSTRIES

[Relative numbers, monthly average 1923-1925 taken as 100. Where available, October, 1930, is latest month plotted]

industrial, hospital and institutional, and religious building groups. In contrast with a year ago contracts let for all types of buildings, with the exception of public works and utilities, were smaller.

LUMBER

The production of Douglas fir lumber during October was greater than during September but was less than a year ago. Shipments and unfilled orders, however, were smaller. Production, shipments, and orders were all lower as compared with a year ago. California redwood returns indicated greater production, shipments, and new orders, than in September. As with Douglas fir, all items were lower than in 1929. There was more northern pine lumber shipped in

period in 1929 and 148,711,000 barrels in 1928. Shipments and stocks were also smaller than in both prior periods.

The production of sand-lime and face brick were all greater than during September. In comparison with October of last year the stocks of common brick were greater, while those of face and sand-lime were less. Shipments of all types of brick showed declines from prior periods. Output of polished plate glass during October amounted to 8,583,000 square feet, as compared with 7,979,000 square feet in September and 14,621,000 square feet a year ago. Production of all types of prepared roofing and the output and stocks of roofing felt in October showed declines from the preceding month and from a year ago.

FOODSTUFFS AND TOBACCO

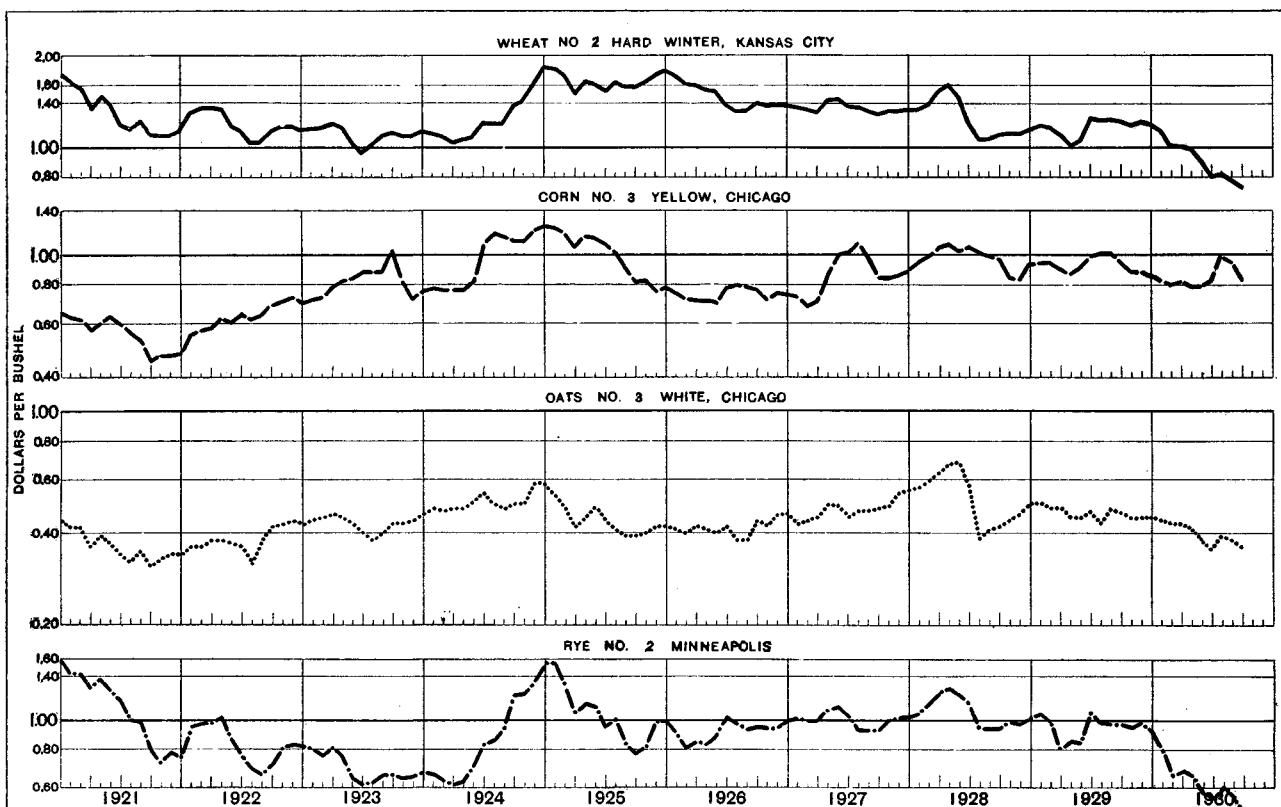

The visible supply of wheat in the United States, while smaller than at the end of September, was larger than a year ago. Wheat receipts, shipments, and exports were smaller than those of the preceding month and those of a year ago. Flour was exported in smaller quantities than during September and a year ago. Exports of flour from Canada, on the other hand, were greater than either prior period. Receipts and shipments of corn were less than during the preceding month or in October of last year. The visible supply of corn, although declining slightly from September, was greater than in 1929. The exports of barley and rye were smaller than during the month of October a

were greater and local slaughter less. The production of pork products, while increasing over September, was lower than a year ago. Holdings in cold storage showed declines from comparative periods, while exports, after advancing over September, were lower than last year.

Shipments and local slaughter of sheep and lambs during October showed a gain over the preceding month but declined from the corresponding month of 1929. Production and consumption of mutton and lamb were greater than during both comparative periods. Prices for ewes and lambs declined as compared with those of the month of September and a year ago.

MOVEMENT OF GRAIN PRICES

[Weighted price per bushel. October is latest month plotted]

year ago. Prices of wheat, corn, oats, barley, and rye showed but slight change from September, but were, without exception, lower than a year ago.

Receipts of livestock of all types were seasonally greater than in September. As compared with October 1929, receipts in each case were smaller. The production of beef and veal under Federal inspection during October was greater than during either prior period. Cold-storage holdings of beef products at the end of October also showed gains over prior periods. Wholesale prices of beef products averaged about the same as in September but were lower than in October, 1929.

Shipments and slaughter of hogs showed gains over September. As compared with a year ago shipments

Receipts at important markets for live poultry were seasonally greater than during the month of September; holdings in storage also showed a similar change. In comparison with October, 1929, both receipts and holdings were smaller. Receipts and cold storage holdings of butter, cheese, and eggs were all smaller than in the previous month and a year ago.

The consumption of large cigars and small cigarettes during October indicates an increase over the preceding period. However, in comparison with the corresponding month of last year a decline occurred in each case. Exports of unmanufactured tobacco and cigarettes during October were greater than the previous month but less than in October, 1929.

TRANSPORTATION

The movement of commodities by rail, as reflected by freight-car loadings, showed a gain over the previous month but was lower than a year ago. For the year to date 38,976,434 freight cars were loaded with all types of commodities. This compares with 44,599,437 cars for a similar period in 1929 and 42,928,633 in 1928. Surplus freight cars, both box and hopper, were more plentiful than in the previous month and a year ago. Clearances of American and foreign vessels for foreign trade in October were fewer than during the previous month or a year ago.

BANKING AND FINANCE

Bank debits, both in and outside New York City, exceeded those of the preceding month but were smaller than in October, 1929. Bank clearings in Canada also showed a similar comparison. Loans and discounts of Federal reserve member banks showed declines from both the preceding month and a year ago. Brokers' loans at the end of the month were smaller than at the end of both the month of September and a year ago. Interest rates on call-loan renewals showed a slight increase over September, while rates on 60 to 90 day commercial paper remained unchanged. Both rates were considerably lower than a year ago.

More business firms failed during October than during the previous month, and the liabilities of such

firms were also greater than in September. The number of business failures was greater and the liabilities were more than a year ago. Prices of representative stocks were lower than in the preceding month and a year ago. Bond prices, on the other hand, showed substantial gains over comparative periods.

GOLD AND SILVER AND FOREIGN EXCHANGE

Domestic receipts of gold at the mint were larger than during the previous month and a year ago. Imports showed a similar tendency, while exports, although smaller than during September, were greater than the exports of October, 1929. The production of silver in the United States was more than for the previous month but less than a year ago. Imports of silver were smaller and exports were larger than during September. Both movements were below the level of October, 1929. Silver stocks declined from the previous month and were also less than at the end of October, 1929.

Exchanges on the principal countries showed little change from September, there being a slight advance in the rates on Japan and declines in the rates on Belgium and Argentina. Compared with a year ago, rates of exchange on Sweden, Switzerland, Japan, Canada increased, while rates on England, Belgium, India, and Argentina declined.

INDEXES OF BUSINESS

The index numbers presented in this table are designed to show the trend in production, prices, trade, etc., by commodities or groups. They consist in general of weighted combinations of series of individual relative numbers; often the individual relative numbers are also given. The function of index and relative numbers is explained on the inside front cover. All of the index numbers, except where noted, are based on the average of the years 1923 to 1925, while maxima and minima are given only since 1923, thus eliminating the abnormal period prior to 1923. Complete descriptions and figures for earlier years may be found in the following issues of the Survey (later data being available in the latest semiannual issues): Production in the July, 1928, issue (No. 83), pages 18 to 22; stocks in the August, 1928, issue (No. 84), pages 20 to 22; new orders in the September, 1928, issue (No. 85), page 19; unfilled orders in the January, 1928, issue (No. 77), pages 22 and 23; wholesale trade in the January, 1928, issue (No. 77), page 21; mail-order and chain stores in the May, 1928, issue (No. 81), pages 20 and 21; department stores in the April, 1928, issue (No. 80), pages 20 and 21; employment, based on 1923 as 100, in the August, 1928, issue (No. 84), page 108; farm prices in the August, 1928, issue (No. 84), page 27; wholesale prices (Department of Labor) in the November, 1927, issue (No. 75), page 24, and the June, 1928, issue (No. 82), page 23; wholesale prices, commercial, in the August, 1928, issue (No. 84), page 26; cost of living in the August, 1928, issue (No. 84), page 27, and the June, 1926, issue (No. 58), page 24.

¹ Compiled by the Department of Commerce, Bureau of the Census, and represents all the land which is directly farmed by one person, either by his own labor alone or with the assistance of members of his household or hired persons. When a landowner has more than one or more tenants, renters, croppers, or managers the land operated by each is considered a farm. Any tract of land less than 3 acres used for agricultural purposes, which produced products to the value of \$250 in the preceding calendar year, is classed as a "farm." The figures for 1930 are preliminary and subject to correction.

² A minus sign (-) denotes a decrease.

³ Less than one-half of 1 per cent.

TREND OF BUSINESS MOVEMENTS

The following table contains a summary of the monthly figures, designed to show the trend in important industrial and commercial movements. These data represent continuations of the figures presented in the latest semiannual number (August, 1930), in which monthly figures for 1929 and 1930 may be found, together with explanations as to the sources and exact extent of the figures quoted. The figures given below should always be read in connection with those explanations. Data on stocks, unfilled orders, etc., are given as of the end of the month referred to. For explanations of relative numbers, including base periods, see introduction on inside front cover.

<i>The cumulatives shown are through August, except where otherwise noted. Earlier data for items shown here may be found on pages 27 to 139 of the August, 1930 "Survey"</i>	1930			1929			1928			CUMULATIVE TOTAL FROM JANUARY 1 THROUGH OCTOBER 31

* Cumulative through September 30.

PUBLICATIONS OF THE DEPARTMENT OF COMMERCE

Recent publications of the Department of Commerce having the most direct interest to readers of the SURVEY OF CURRENT BUSINESS are listed below. A complete list may be obtained by addressing the Division of Publications, Department of Commerce, at Washington. Copies of the publications may be purchased from the Superintendent of Documents, Government Printing Office, Washington, at the prices stated. If no price is mentioned, the publication is distributed free.

Agriculture. Fifteenth Census of United States, 1930. Agriculture, Delaware, Number of Farms, Farm Acreage, and Values of Farm Land and Buildings, Farm Buildings, Farmers' Dwellings, and Farm Implements and Machinery, by Minor Civil Divisions. 4 pages, 1 illustration. (Bureau of the Census.) Price, 5 cents.

Aviation. Air Commerce Bulletin is issued semimonthly by the Aeronautics Branch of the Department of Commerce and contains short articles on aviation developments and a list of air transport routes.

Aviation Training. ii+13 pages. (Aeronautics Branch. Aeronautics Bulletin No. 19.) Discussion of the opportunities in different phases of aviation, methods of obtaining training, and objects of flying clubs.

Building materials. Seams for Copper Roofing, by K. Hilding Beij. (Bureau of Standards. Research Paper No. 216.) Reprint from Bureau of Standards Journal of Research, vol. 5, September, 1930, pp. 585-608, 14 illustrations, 5 pages of plates. Report on experiments to discover the strength of different types of seams for copper roofing. Price, 15 cents.

Bureau of Foreign and Domestic Commerce. Annual Report of Director of Bureau of Foreign and Domestic Commerce to Secretary of Commerce for Fiscal Year Ended June 30, 1930. iv+56 pages, 1 chart. Price, 10 cents.

Bureau of Mines. Twentieth Annual Report of Director of Bureau of Mines to Secretary of Commerce for Fiscal Year Ended June 30, 1930. vi+54 pages, 1 plate. Price, 10 cents.

Bureau of Navigation. Annual Report of Commissioner of Navigation to Secretary of Commerce for Fiscal Year Ended June 30, 1930. ii+12 pages. Price, 5 cents.

Bureau of Standards. Annual Report of Director of Bureau of Standards to Secretary of Commerce for Fiscal Year Ended June 30, 1930. ii+53 pages, 1 chart. (Miscellaneous Publication No. 115.) Price, 10 cents.

Bureau of Standards Journal of Research is published monthly and contains the papers formerly issued as Scientific and Technologic Papers series, which have been discontinued. The articles in the journal are known as the Research Papers series and are issued separately after publication in the journal. Single copies, 40 cents; annual subscription, \$2.75.

Chemicals and drugs. New Crystalline Calcium Chloride Compound of Glucose and its Rotation and Mutarotation in Aqueous Solution, by Horace S. Isbell. (Bureau of Standards. Research Paper No. 226.) Reprint from Bureau of Standards Journal of Research, vol. 5, September, 1930, pp. 741-755, 1 plate, 2 charts. Price, 10 cents.

Commercial Standards Monthly, Review of Progress in Commercial Standardization and Simplification. Published monthly by the Bureau of Standards. Annual subscription, \$1.

Explosives. Production of Explosives in United States During Calendar Year 1929, by W. W. Adams and L. S. Gerry. ii+51 pages, 2 charts. (Bureau of Mines. Technical Paper 478.) This paper shows the materials used in the manufacture of explosives, the production in the United States from 1920 to 1929, the kinds and amounts used by different industries, and the monthly sales in 1929. Price, 10 cents.

Fish. Commercial Snappers (Lutjanidae) of Gulf of Mexico, by Isaac Ginsburg. (Bureau of Fisheries. Document No. 1089.) From Bulletin of the Bureau of Fisheries, vol. XLVI, 1930, pp. 265-276, 2 illustrations. Discussion of the characteristics of this species of fish, their habitat and geographical distribution, and their importance as a food. Price, 10 cents.

Foodstuffs. Apparent per Capita Consumption of Principal Foodstuffs in United States, by E. G. Montgomery and C. H. Kardell. iv+51 pages. (Bureau of Foreign and Domestic Commerce. Domestic Commerce Series No. 38.) Data on the amount of different foodstuffs consumed in the United States, showing changes during the last 30 years. Price, 10 cents.

Metals and minerals. Abrasive Materials in 1929, by Oliver Bowles. (Bureau of Mines. Mineral Resources of United States, 1929, Pt. II, pp. 65-81.) This publication discusses the properties of the different materials used for abrasive purposes. Price, 5 cents.

Antimony in 1929, by Paul M. Tyler. (Bureau of Mines. Mineral Resources of United States, 1929, Pt. I, pp. 45-56.) This pamphlet shows the antimony resources of the different countries of the world and the import trade of the United States in this metal. Price, 5 cents.

Carbon Black in 1929, by G. R. Hopkins and H. Backus. (Bureau of Mines. Mineral Resources of United States, 1929, Pt. II, pp. 51-59, 2 charts.) Account of the carbon black industry, showing the uses of carbon black, production in the United States by States and districts, and the United States export trade in this product. Price, 5 cents.

Economic Relations of Silver to Other Metals in Argentiferous Ores, by Charles White Merrill. ii+29 pages. (Bureau of Mines. Economic Paper 10.) Study of sources of silver, its relation to other ores, production in the leading countries of the world, and classification of silver ores. Price, 10 cents.

Feldspar in 1929, by Oliver Bowles and Jefferson Middleton. (Bureau of Mines. Mineral Resources of United States, 1929, Pt. II, pp. 83-93.) This publication shows the location of feldspar deposits in the United States, the uses of this mineral, and the amount of production in the United States and other countries. Price, 5 cents.

Monthly Summary of Foreign Commerce of United States, September 1930. Parts I and II. (Bureau of Foreign and Domestic Commerce.) Part I contains statistics of exports of domestic merchandise, and imports by articles for September, 1929 and 1930, and for nine months ending September, 1929 and 1930. Part II contains summaries of export and import trade; monthly average import and export prices; and statistics of trade with Alaska, Hawaii, and Porto Rico. Single copies, Part I, 10 cents; Part II, 5 cents. Annual subscription, \$1.25.

Petroleum. Resistivity Measurements of Oil-Bearing Beds, by F. W. Lee and J. H. Swartz. ii+12 pages, 11 illustrations. (Bureau of Mines. Technical Paper 483.) This paper shows the results of experiments in locating oil by use of electricity. A short bibliography is included. Price, 5 cents.

Power and power plants. Census of Electrical Industries, 1927; Central Electric Light and Power Stations. viii+92 pages, 1 chart. (Bureau of the Census.) This publication contains statistics showing the growth of the electric light and power industry from 1902 to 1927, the geographical distribution of plants, the amount of current sold and the number of users, and the revenue received, with a chapter on technical developments in the industry. Price, 20 cents.

Radio. Accurate Method of Measuring Transmitted Wave Frequencies at 5,000 and 20,000 Kilocycles per Second, by E. L. Hall. (Bureau of Standards. Research Paper No. 220.) Reprint from Bureau of Standards Journal of Research, vol. 5, September, 1930, pp. 647-652, 1 illustration. This paper describes method of measuring radio station frequencies. Price, 5 cents.

Scientific instruments. Apparatus for Determination Aboard Ship of Salinity of Sea Water by Electrical Conductivity Method, by Frank Wenner, Edward H. Smith, and Floyd M. Soule. (Bureau of Standards. Research Paper No. 223.) Reprint from Bureau of Standards Journal of Research, vol. 5, September, 1930, pp. 711-732, 4 illustrations, 4 pages of plates, 1 chart. Price, 10 cents.

Shipping. Seagoing Vessels of United States, 1930. 150 pages, 5 pages of illustrations, 23 plates. (Bureau of Navigation.) This volume is a part of the 62d Annual List of Merchant Vessels of United States for year ended June, 1930. It contains the names of all merchant ships, yachts, and government vessels, giving official number and signal letters, tonnage, size, home port, name of owner, and place and time of construction. Price, 75 cents.

Statistical Abstract of United States, 1930. xiv+876 pages. (Bureau of Foreign and Domestic Commerce.) This volume contains tables showing the area and population of the United States, vital statistics, immigration and emigration, educational facilities, public lands and national parks, national, State, and municipal finance, currency and banking, labor and wages, communication services, power resources, roads and motor vehicles, waterways and shipping, foreign commerce, irrigation and drainage, agriculture, forest and mineral resources, fisheries, and manufactures. Price, \$1.

CHIEF FUNCTIONS OF THE DEPARTMENT OF COMMERCE

R. P. LAMONT, Secretary of Commerce

JULIUS KLEIN, Assistant Secretary of Commerce

EPHRAIM F. MORGAN, Solicitor

AERONAUTICS BRANCH

CLARENCE M. YOUNG, Assistant Secretary of Commerce for Aeronautics

Establishment of civil airways and maintenance of aids to air navigation; inspection and registration of aircraft and licensing of pilots; enforcement of air traffic rules; investigation of accidents; encouragement of municipal air ports; fostering of air commerce; scientific research in aeronautics; and dissemination of information relating to commercial aeronautics. (Some of these functions are performed by special divisions of the Lighthouse Service, the Bureau of Standards, and the Coast and Geodetic Survey.)

BUREAU OF THE CENSUS

WILLIAM M. STEUART, Director

Taking censuses of population, mines and quarries, water transportation, and religious bodies every 10 years; censuses of agriculture and electrical public utilities every 5 years; and a census of manufactures every 2 years.

Compilation of statistics of wealth, public debt and taxation, including financial statistics of local governments, every 10 years; annual compilation of financial statistics of State and municipal governments.

Compilation of statistics of marriage, divorce, births, deaths, and penal and other institutions annually, and of death rates in cities and automobile accidents weekly.

Compilation quarterly or monthly of statistics on cotton, wool, leather, and other industries; annually of forest products.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

WILLIAM L. COOPER, Director

The collection of timely information concerning world market conditions and openings for American products in foreign countries, through commercial attachés, trade commissioners, and consular officers, and its distribution through weekly Commerce Reports, bulletins, confidential circulars, the news and trade press, and district and cooperative officers in 65 cities.

The maintenance of commodity, technical, and regional divisions to afford special service to American exporters and manufacturers.

The compilation and distribution of lists of possible buyers and agents for American products in all parts of the world and publication of weekly lists of specific sales opportunities abroad.

The publication of statistics on imports and exports.

The study of the processes of domestic trade and commerce. The Survey of Current Business.

BUREAU OF STANDARDS

GEORGE K. BURGESS, Director

Custody, development, and construction of standards of measurement, quality, performance, or practice; comparison of standards used by scientific or other institutions; determination of physical constants and properties of materials; researches and tests on materials and processes; and publication of scientific and technical bulletins reporting results of researches and fundamental technical data.

Preparation of specifications for Government purchases, through the Federal Specifications Board.

Collection and dissemination of information concerning building codes and the planning and construction of houses.

Establishment of simplified commercial practices through cooperation with business organizations in order to reduce the wastes resulting from excessive variety in commodities.

BUREAU OF MINES

SCOTT TURNER, Director

Technical investigations in the mining, preparation, and utilization of minerals, including the study of mine hazards and safety methods and of improved methods in the production and use of minerals.

Testing of Government fuels and management of the Government Fuel Yard at Washington.

Research on helium and operation of plants producing it.

Studies in the economics and marketing of minerals and collection of statistics on mineral resources and mine accidents.

The dissemination of results of technical and economic researches in bulletins, technical papers, mineral resources series, miners' circulars, and miscellaneous publications.

BUREAU OF FISHERIES

HENRY O'MALLEY, Commissioner

The propagation and distribution of food fish and shellfish, in order to prevent the depletion of the fisheries; investigations to promote conservation of fishery resources; the development of commercial fisheries and agriculture; study of fishery methods, improvements in merchandising and collection of fishery statistics; administration of Alaska fisheries and fur seals; and the protection of sponges off the coast of Florida.

BUREAU OF LIGHTHOUSES

GEORGE R. PUTNAM, Commissioner

Maintenance of lighthouses and other aids to water navigation. Establishment and maintenance of aids to navigation along civil airways.

Publication of Light Lists, Buoy Lists, and Notices to Mariners, giving information regarding these aids to navigation.

COAST AND GEODETIC SURVEY

RAYMOND S. PATTON, Director

Survey of the coasts of the United States and publications of charts for the navigation of the adjacent waters, including Alaska, the Philippine Islands, Hawaii, Porto Rico, the Virgin Islands, and the Canal Zone; interior control surveys; magnetic surveys; tide and current observations; and seismological investigations.

Publication of results through charts, coast pilots, tide tables, current tables, and special publications.

BUREAU OF NAVIGATION

ARTHUR J. TYREE, Commissioner

Superintendence of commercial marine and merchant seamen. Supervision of registering, enrolling, licensing, numbering, etc., of vessels under the United States flag, and the annual publication of a list of such vessels.

Enforcement of the navigation and steamboat inspection laws, including imposition of fees, fines, tonnage, taxes, etc.

STEAMBOAT INSPECTION SERVICE

DICKERSON N. HOOVER, Supervising Inspector General

The inspection of merchant vessels, including boilers, hulls, and life-saving equipment, licensing of officers of vessels, certification of able seamen and lifeboat men, and the investigation of violations of steamboat-inspection laws.

UNITED STATES PATENT OFFICE

THOMAS E. ROBERTSON, Commissioner

The granting of patents and the registration of trade-marks, prints, and labels after technical examination and judicial proceedings.

Maintenance of library with public search room, containing copies of foreign and United States patents and trade-marks. Recording bills of sale, assignments, etc., relating to patents and trade-marks. Furnishing copies of records pertaining to patents.

Publication of the weekly Official Gazette, showing the patents and trade-marks issued.

RADIO DIVISION

W. D. TERRELL, Chief

Inspection of radio stations on ships; inspection of radio stations on shore, including broadcasting stations; licensing radio operators; assigning station call letters; enforcing the terms of the International Radiotelegraphic Convention; and examining and settling international radio accounts.
