# SURVEY OF CURRENT BUSINESS

## U.S. Department of Commerce

C. William Verity / *Secretary*  
Robert Ortner / *Under Secretary*  
for Economic Affairs

## Bureau of Economic Analysis

Allan H. Young / *Director*  
Carol S. Carson / *Deputy Director*

*Editor-in-Chief:* Carol S. Carson  
*Managing Editor:* Leland L. Scott

*Staff Contributors to This Issue:* Robert L. Brown, Frank de Leeuw, Rudolph E. DePass, Douglas R. Fox, Howard L. Friedenberg, Government Division, Linnea Hazen, Daniel J. Larkins, Ralph W. Morris, National Income and Wealth Division, Robert P. Parker, Charles S. Robinson, Tracy R. Tapscott, Isabelle B. Whiston.

*SURVEY OF CURRENT BUSINESS.* Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, *SURVEY OF CURRENT BUSINESS*, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Annual subscription: *Second-class mail*—\$18.00 domestic, \$22.50 foreign, *first-class mail*—\$46.00. Single copy—\$6.50 domestic, \$8.13 foreign.

Mail subscription orders and address changes to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

### 1 Business Situation

- 2 Components of Real GNP
- 5 Prices
- 6 Personal Income

### 8 The U.S. National Income and Product Accounts: Revised Estimates

- 8 Impact of the Revisions
- 10 Summary of the Revisions
- 18 Methodology

### 38 National Income and Product Accounts Tables

### 108 Index to the National Income and Product Accounts Tables

### 125 National Income and Product Accounts Estimates: When They Are Released, Where They Are Available, and How They Are Presented

### 127 Errata and Revisions in NIPA Tables

### 128 Key Source Data and Assumptions for the Advance Estimates of GNP: Easier Access and Redesigned Format

### 131 Composite Indexes of Leading, Coincident, and Lagging Indicators

### 132 Gross Product by Industry: Comments on Recent Criticisms

### 134 State Personal Income, First Quarter 1988

### 135 State Quarterly Personal Income, 1986:I-1988:I

### *Blue pages: Current Business Statistics*

(See page S-36 for subject index to Current Business Statistics)

### *Inside back cover: BEA Publications*

**NOTE.—**This issue of the *SURVEY* went to the printer on Aug. 12, 1988. It incorporates data from the following monthly BEA news releases:

- Gross National Product (July 27),
- Personal Income and Outlays (July 28), and
- Composite Indexes of Leading, Coincident, and Lagging Indicators (Aug. 2).

# the BUSINESS SITUATION

**BOTH** U.S. production and U.S. demand slowed somewhat in the second quarter of 1988; inflation increased (chart 1).

- Real GNP, a measure of U.S. production, increased at an annual rate of 3 percent, following an increase of 3½ percent in the first quarter.
- Real gross domestic purchases, a measure of U.S. demand, increased at an annual rate of 1 percent, following a 1½-percent increase.
- Both the GNP price index (fixed weights) and the price index for gross domestic purchases (fixed weights) increased at an annual rate of 4½ percent, following increases of 3½ percent (GNP prices) and 3 percent (prices of gross domestic purchases).

First-quarter estimates of these and other components of the national income and product accounts (NIPA's) have been revised as part of the regular annual revision presented in this issue.

The gap between U.S. demand and U.S. production narrowed for the third consecutive quarter, as real gross domestic purchases increased less than real GNP (table 1). The difference between these two measures, net exports, declined from \$130½ billion (3½ percent of GNP) in the third

**Table 1.—Recent Patterns in Real GNP and Real Gross Domestic Purchases**

[Billions of 1982 dollars; seasonally adjusted at annual rates]

	Level			Change from preceding quarter

1. Consists of personal consumption expenditures (PCE) less PCE for motor vehicles, nonresidential and residential structures, producers' durable equipment (PDE) less PDE for motor vehicles, and government purchases less government purchases of motor vehicles and less Commodity Credit Corporation inventory change.

NOTE.—Motor vehicle estimates are found in tables 1.18 and 1.20—for auto and trucks, respectively—of the "National Income and Product Accounts Tables." The other estimates are found in tables 1.2, 1.6, and 3.8B.

quarter of 1987 to \$90 billion (2½ percent of GNP) in the second quarter of this year. In the fourth quarter of 1987 and the first quarter of 1988, this improvement had reflected larger increases in exports than in imports; in the second quarter, exports increased again, while imports declined

**CHART 1**

## Selected Measures: Change From Preceding Quarter

Note.—Percent change at annual rate from preceding quarter; based on seasonally adjusted estimates.

U.S. Department of Commerce, Bureau of Economic Analysis

88-7-1

### Looking Ahead . . .

• **Plant and Equipment Expenditures.** Revised estimates of plant and equipment expenditures in current and constant (1982) dollars from the first quarter of 1985 to date will be included in the quarterly plant and equipment article in the September SURVEY. The revised estimates will incorporate implicit price deflators from the revised national income and product accounts and new seasonal factors.

• **Revised State Personal Income.** State personal income estimates for 1929-68 from the recently completed comprehensive revision will be available August 18. For more information, see page 134.

(for the first time in over a year and by the largest amount in over 3 years).

**Drought.**—BEA estimates that \$5½ billion (annual rate) of farm output was lost to the drought in the second quarter; the increase in real GNP was reduced ½ percentage point as a result. Lost farm output was estimated on the basis of Department of Agriculture forecasts of the physical quantity of farm output in 1988. BEA assumed that the drought was responsible for the difference between the Department's June forecast and its July forecast and converted this difference to constant (1982) dollars, yielding annual losses of \$9½ billion in crops and \$1½ billion in livestock. About one-half of the crop loss was corn. Annual crop losses were allocated by a statistical procedure that spread the losses to all of the months in the growing season but with the months of the harvest receiving higher allocations. Some of the livestock loss was allocated to the second quarter based on information about earlier than usual sales. These estimates will probably be revised as information from more comprehensive Department of Agriculture surveys becomes available.

The drought's effect on farm income cannot be estimated. Although the quantity of crop output fell because of the drought, the effect of this decline on farm income has been complicated by changes in prices of these crops and changes in subsidy payments to farmers. Moreover, expenses, which are subtracted from output in calculating income, have probably been affected by the drought, but BEA has no basis on which to estimate the size of this effect. (Similarly, BEA has no basis for estimating the effect of the drought on the nonfarm sector of the economy.)

**Motor vehicles.**—Motor vehicle output increased sharply in the second quarter and accounted for more than 1 percentage point of the 3-percent increase in GNP. Virtually all of the increase was in autos; truck output—as well as its allocation between sales and inventories—changed little.

The increase in auto output allowed an almost unchanged level of sales to be maintained without further depleting inventories. After a substantial first-quarter decline, new car invento-

Effective July 1988, the three current quarterly estimates of GNP will be referred to as the "advance," "preliminary," and "final" estimates. Previously they had been referred to as the "preliminary estimate," "first revision," and "second revision."

The advance estimate, released during the first month after the end of a quarter, is based on source data for major GNP components covering 2 or 3 months of the quarter. Source data used in preparing the advance estimate for the second quarter are described elsewhere in this issue; see "Key Source Data and Assumptions for the Advance Estimates of GNP: Easier Access and Redesignated Format."

The preliminary and final estimates incorporate revised and additional source data that become available within 1 and 2 months, respectively, after the advance estimate.

Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes in them are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1982 dollars.

ries increased moderately. Sales of new cars slipped to 10.6 million units (seasonally adjusted at an annual rate) in the second quarter from 10.8 million units in the first, as sales of both domestic and foreign cars edged down.

### Components of Real GNP

The similarity between the first- and second-quarter changes in GNP reflects the fact that three of the more volatile components of GNP—net exports, nonfarm inventory investment, and Federal national defense purchases—registered second-quarter changes very similar to those in the first quarter: Net exports increased \$19 billion after a \$17 billion increase; an \$18 billion decline in nonfarm inventory investment followed a decline of \$16½ billion; and national defense purchases declined \$3½ billion, the same as in the first quarter.

### Personal consumption expenditures

Real personal consumption expenditures (PCE) increased 2½ percent in the second quarter after increasing 4½ percent in the first (table 2). The deceleration was attributable to widespread slowdowns or declines in both durable and nondurable goods.

Expenditures for durable goods increased 7 percent after a 14½-percent increase. All the major durables categories contributed to the deceleration. Both the motor vehicles and parts and the furniture and household equipment categories slowed considerably but still registered strong increases. In motor vehicles and parts, most of the increase reflected increased net purchases of used cars from the business sector; purchases of new motor vehicles changed little. Other durables decreased moderately, following a sharp increase in the first quarter.

Table 2.—Real Personal Consumption Expenditures

[Seasonally adjusted at annual rates]

Other.....	77.2	-1.9	-1	-2	2.0	-9.5	-5	-1.1	11.1

NOTE.—Percent changes in major aggregates are found in table 8.1 of the "National Income and Product Accounts Tables." Dollar levels are found in table 5.13.

Expenditures for nondurable goods decreased 2 percent in the second quarter after a small increase in the first. Food decreased slightly, following an increase of similar magnitude. Clothing and shoes dropped sharply after a smaller decrease. Energy registered a moderate increase similar to that in the first quarter. For the third consecutive quarter, other nondurables changed little.

Expenditures for services increased 4 percent in the second quarter, following a similar increase in the first. As in the first quarter, all the major services categories registered increases. Transportation accelerated,

while, in household operation services, both energy and other household services decelerated. The remaining categories of services—housing, medical care, and other—registered increases similar to those in the first quarter.

**Nonresidential fixed investment**

Real nonresidential fixed investment increased 14 percent in the second quarter, following a 7½-percent increase in the first (table 3). Both structures and producers' durable equipment (PDE) contributed to the increase.

In structures, the construction of nonresidential buildings rebounded from a first-quarter drop; the increase was largely attributable to industrial and commercial buildings, although religious, hospital and institutional, and miscellaneous buildings also registered gains. Public utilities construction increased, but not by as much as it had fallen in the first quarter; the first-quarter decline had followed unusually large increases in the last half of 1987. Oil well drilling declined only slightly less than in the first quarter.

From its high in the fourth quarter of 1985 to the first quarter of 1987, construction of nonresidential buildings had declined \$11½ billion; since then, it increased \$4½ billion. Together, industrial and commercial buildings more than accounted for the decline and accounted for three-fourths of the rebound.

Three-fourths of the second-quarter increase in PDE was accounted for by purchases of information processing equipment. Computers dominated the increase in this category, although the other three components (communications equipment, photocopy equipment, and scientific and engineering instruments) also increased.

Purchases of PDE had declined (erratically) by \$14 billion from a high in the fourth quarter of 1985 to the first quarter of 1987; since then, purchases increased \$64½ billion. Over the course of the decline, purchases of computers had increased \$1½ billion; over the more recent five quarters, purchases of computers accounted for one-half of the increase. Increases in other PDE components over the recent period were widespread.

**Residential fixed investment**

Real residential investment increased 3 percent in the second quarter, following a 6½-percent decline in the first. A decline in multifamily construction was more than offset by increases in single-family construction and in the other component (which includes mobile homes, additions and alterations, major replacements, and brokers' commissions on house sales).

The increase in single-family construction partly reflected a small increase—7,000 units at a seasonally adjusted annual rate—in single-family housing starts in the first quarter (chart 2). Starts declined 35,000 units in the second quarter. The increase in

**CHART 2**

**Housing Starts**

Data: Census  
U.S. Department of Commerce, Bureau of Economic Analysis

88-7-2

single-family construction also reflected increases in the average value of units put in place.

In the second quarter, multifamily construction continued along its 2-year-long downward path. This path reflects continued high rental vacancy rates and the curtailment of tax incentives for multifamily investment. The second-quarter level of multifamily construction was 43 percent below its high in the second quarter of 1986.

The increase in the other component of residential investment partly reflected an increase in brokers' commissions. Sales of new and existing residences increased 327,500 units (seasonally adjusted at an annual rate) from the first quarter to April-May, despite an increase in mortgage rates of almost one-half percentage point from the middle of the first quarter to the middle of the second (chart 3).

### Inventory investment

Real inventory investment declined \$21 billion in the second quarter, as inventory accumulation slowed to \$45 billion from its \$66-\$67 billion pace in the two preceding quarters (table 4).

Nonfarm inventories accounted for most of the decline in inventory investment. Most subcategories in this sector contributed to the decline, with the notable exception of retail auto dealers; retail auto inventories swung from substantial decumulation in the first quarter to substantial accumulation in the second.<sup>1</sup> Nonfarm inventories excluding those of auto dealers increased \$26½ billion after increases of more than twice that size in the two preceding quarters.

Manufacturing inventories increased less than one-half as much in the second quarter as in each of the two preceding quarters. Most of the slowdown was in nondurables, largely as a result of a much slower accumulation in petroleum and a sharp swing

1. Auto inventories were discussed earlier in terms of new domestic units. Those estimates of inventories cannot be fully reconciled with the estimates for auto dealers shown in table 4 because the two estimates differ in terms of sources and coverage. The estimates in table 4 are derived from Census Bureau inventory data and cover inventories of new and used autos (both domestic and foreign), parts, and some trucks and other motor vehicles. They do not cover inventories held by manufacturers or, more importantly, those held by wholesalers, which registered an unusually large swing from accumulation to decumulation. (A substantial portion of foreign car inventories is held by wholesalers.)

Table 4.—Change in Real Business Inventories

[Billions of 1982 dollars; seasonally adjusted at annual rates]

	Level					Change from preceding quarter			
	1987			1988		1987		1988	
	II	III	IV	I	II	III	IV	I	II
Change in business inventories.....	27.8	13.0	67.1	66.0	45.0	-14.8	54.1	-1.1	-21.0
Farm .....	2.7	-5.3	-1.1	14.1	11.1	-8.0	4.2	15.2	-3.0
Nonfarm .....	25.0	18.3	68.2	51.9	33.9	-6.7	49.9	-16.3	-18.0
Manufacturing .....	-4.0	10.8	14.4	15.8	6.5	14.8	3.6	1.4	-9.3
Wholesale trade .....	1.1	-3.5	19.4	24.9	6.4	-4.6	22.9	5.5	-18.5
Retail trade .....	23.4	2.9	25.1	1.5	8.6	-20.5	22.2	-23.6	7.1
Auto dealers.....	9.3	-2.0	13.2	-10.1	7.2	-12.3	16.2	-23.3	17.3
Other retail trade.....	14.1	5.9	11.9	11.6	1.4	-8.1	5.9	-.3	-10.2
Other .....	4.6	6.0	9.3	9.7	12.4	3.4	1.3	.4	2.7
Addendum:									
Nonfarm less auto dealers.....	15.8	21.3	55.0	62.0	26.7	5.5	33.7	7.0	-35.3

NOTE.—Dollar levels for inventories are found in table 5.11 of the "National Income and Product Accounts Tables."

to decumulation in chemicals. Most of the accumulation in manufacturing inventories in the preceding quarters had been in durables and was traceable to nonelectric machinery and transportation other than motor vehicles; these industries added to inventories again in the second quarter, but somewhat less than previously.

Wholesale trade inventories increased less than one-third as much in the second quarter as in each of the two preceding quarters. Most of the accumulation in the two preceding quarters, and most of the second-quarter slowdown, was in durables.

Retail trade inventories excluding autos increased much less than in the two preceding quarters. Food and department stores, which had registered unusually large inventory buildups in the preceding quarter, were responsible for most of the slowdown.

Farm inventories increased \$11 billion in the second quarter, following a \$14 billion increase in the first. Change in farm inventories is estimated as the difference between farm output, on the one hand, and the sum of open market sales and net transactions of farmers with the Commodity Credit Corporation (CCC), on the other. BEA assumed that the drought had no effect on sales and CCC transactions in the second quarter. (When estimates are prepared for the third and fourth quarters, BEA will not necessarily make this assumption.) Thus, the entire drought-related drop in second-quarter farm output is reflected in the change in farm inventories; in other words, BEA assumed that farm inventories would have increased by \$16½ billion in the second quarter, instead of \$11 billion, if no drought had occurred.

CHART 3

### Selected Interest Rates

Data: FRB, FLHLMC.

U.S. Department of Commerce, Bureau of Economic Analysis

88-7-3

Table 5.—Real Net Exports of Goods and Services

[Seasonally adjusted at annual rates]

	Billions of 1982 dollars					Percent change from preceding quarter			
	Level	Change from preceding quarter				1987		1988	
		1987		1988		III	IV	I	II
	1988:II	III	IV	I	II				
Net exports of goods and services.....	-90.1	-4.7	4.7	17.0	18.9				
Exports.....	495.6	24.5	18.3	27.0	9.4	25.7	17.7	25.7	8.0
Merchandise.....	341.1	22.2	13.0	24.4	12.1	37.3	19.1	36.1	15.5
Agriculture.....	40.7	5.8	-4.5	4.1	1.4	88.1	-38.2	55.4	15.0
Nonagriculture.....	300.4	16.4	17.4	20.3	10.7	30.9	30.6	33.7	15.6
Services.....	154.5	2.3	5.4	2.5	-2.6	6.4	15.3	6.6	-6.5
Imports.....	585.7	29.3	18.6	9.9	-9.4	23.4	9.9	6.9	-6.2
Merchandise.....	455.0	24.2	11.5	2.1	-8.1	24.8	10.6	1.8	-6.8
Petroleum.....	86.2	15.8	-6.6	.8	4.0	120.7	-26.8	4.0	20.9
Nonpetroleum.....	368.8	8.4	18.1	1.3	-12.1	9.9	21.6	1.4	-12.1
Services.....	130.7	5.2	2.0	7.8	-1.3	19.0	6.7	27.6	-3.9

NOTE.—Percent changes in major aggregates are found in table 8.1 of the "National Income and Product Accounts Tables." Dollar levels are found in tables 4.2 and 4.4.

Because of the slowing of inventory investment and the pickup in final sales, the constant-dollar ratio of total business inventories to total business final sales edged down to 3.20 from 3.21.

### Net exports

Real net exports increased \$19 billion in the second quarter after an increase of similar size in the first, as exports increased and imports declined (table 5). The increase in exports was the smallest quarterly gain since the first quarter of 1987, and the decline in imports was the first drop since that same quarter.

Merchandise exports increased \$12 billion (or 15½ percent), following an increase of twice that amount. Nonagricultural exports accounted for most of the increase in both quarters as well as for most of the slowdown from the first quarter to the second. The slowdown in nonagricultural exports was widespread across end-use categories.

Exports of services declined \$2½ billion, following an increase of that

amount in the first quarter. The decline was concentrated largely in income on investment abroad.

Merchandise imports declined \$8 billion (or 7 percent), following a small increase in the first quarter. Nonpetroleum imports more than accounted for the second-quarter decline; except for capital goods, all of the principal end-use categories showed declines.

Imports of services declined \$1½ billion, following an increase of \$8 billion; income on investment in the United States more than accounted for the decline. As explained in the May "Business Situation," a sharp first-quarter increase in the reported income of some foreign-owned U.S. affiliates had reflected a change in financial accounting standards.

### Government purchases

Real government purchases edged up \$1 billion (or ½ percent) in the second quarter, following a decrease of \$16 billion (or 8 percent) in the first (table 6). The sharp turnaround reflected the pattern of changes in in-

ventories of farm products held by the CCC. Other Federal Government purchases decreased more than in the first quarter, and State and local government purchases increased less.

Inventories held by the CCC fell sharply in both quarters of 1988, following smaller decumulations in the second half of 1987. (Changes in the rate of decumulation led to the pattern of change shown in the table—down \$18 billion in the first quarter and up \$1½ billion in the second.) In both quarters of 1988, the sharp decumulations reflected continued withdrawals of crops through the use of certificates that had been initially issued to farmers in lieu of cash subsidy payments and to increased direct sales.

Federal nondefense purchases excluding CCC inventory transactions decreased \$½ billion after increasing \$2 billion in the first quarter. Federal defense purchases decreased \$3½ billion in both quarters. The first-quarter decrease was concentrated in purchases of military equipment, particularly aircraft and missiles; the second-quarter decrease was concentrated in nondurable goods and in services other than compensation of employees.

State and local government purchases increased \$3 billion in the second quarter, following a \$4 billion increase in the first. The slowdown was traceable to purchases of structures, which were unchanged after increasing \$1 billion in the first quarter.

### Prices

GNP prices and gross domestic purchases prices both increased 4½ percent in the second quarter, following increases of 3½ percent and 3 percent, respectively, in the first (table 7). (Legislated increases in Federal employee compensation, discussed below under prices paid by government, had boosted the first-quarter increases in these price measures by 0.3 percentage point.) The higher rate of inflation was accounted for by PCE prices, which were up more than twice as much in the second quarter as in the first; food, energy, and other PCE prices all contributed.

PCE food prices increased 6 percent, considerably more than in the first quarter. The step-up largely reflected a surge in meat, poultry, and egg prices and a sharp turnaround in

the prices of fresh fruits. Neither of these changes appears to have been related to the drought: In the short run, one might expect drought conditions to place downward pressure on red meat prices due to increased slaughter of livestock; the second-quarter increase in fruits prices represented a partial rebound from a sharp drop in the first quarter.

PCE energy prices increased 5½ percent after a somewhat larger decline in the first quarter. The turnaround was evident in all of the energy components, particularly in prices of gasoline and oil.

Other PCE prices increased 5 percent, about 1½ percentage points more than in the first quarter. Continuing a pattern of sharp changes, prices of clothing and shoes jumped 15 percent after little change. Among prices of services, transportation increased after a sharp decline.

Prices of fixed investment increased 1½ percent, about one-half the first-quarter increase. Among the investment components, prices paid for structures—both nonresidential and residential—were up less than in the first quarter; PDE prices again increased moderately.

Prices paid by government increased 4½ percent, about 1½ percentage points less than in the first

quarter. The difference was entirely accounted for by prices of Federal Government purchases, which had been boosted in the first quarter by the combined effects of a 2-percent pay raise for Federal civilian and military personnel and of increases in the Federal Government's contributions—as an employer—for social insurance programs. Such increases in employee compensation are treated in the NIPA's as an increase in the price of employee services purchased by the Federal Government.

Prices of exports were up 5 percent, somewhat less than they had been in the first quarter; prices of imports were also up 5 percent, somewhat more than they had been in the first quarter. The pickup in import prices was largely traceable to prices of petroleum and products, which were down much less than in the first quarter.

### Personal Income

Personal income increased \$66 billion in the second quarter, following a \$44½ billion increase in the first; personal saving declined \$19½ billion, following a \$6 billion increase (chart 4 and table 8).

Wage and salary disbursements increased \$50 billion in the second quarter, \$16½ billion more than in the first. Services accounted for most of the pickup, largely reflecting the impact of accelerated bonus payments made by personal service corporations to their employee-owners (usually doctors, lawyers, etc.) in the fourth quarter of 1987. These payments, which had been prompted by recent changes in Federal tax provisions, added \$10½ billion to the fourth-quarter change and reduced the changes in the first and second quarters of 1988 by \$13½ billion and \$½ billion, respectively.

Farm proprietors' income decreased \$6½ billion in the second quarter, following a decrease of \$2½ billion in the first. Farm income excluding subsidies dropped \$8 billion; Federal agricultural subsidy payments increased slightly, following a first-quarter decline. Nonfarm proprietors' income increased more in the second quarter than in the first; the pickups reflected increases in the services and real estate industries.

Transfer payments increased \$6½ billion, \$13 billion less than in the first quarter. Cost-of-living increases in social security and several other Federal retirement and income support programs had added that amount to first-quarter transfers.

Personal contributions for social insurance, which are subtracted in deriving the personal income total, increased considerably less than in the first quarter, when increases in the social security tax rate, the taxable earnings base, and the supplemental medical insurance premiums had boosted contributions by \$10½ billion.

**CHART 4**  
**Selected Personal Income and Saving Measures**

Note.—Changes are from preceding quarter.

U.S. Department of Commerce, Bureau of Economic Analysis

88-74

Personal tax and nontax payments increased \$25 billion in the second quarter, following a \$15 billion decline in the first. The increase reflected the effects of the Tax Reform Act of 1986 and an increase in the earnings base. In the second quarter, a large increase in nonwithheld taxes (mainly declarations and net settlements) resulted from payments on income that had been shifted from 1986 to 1987 to take advantage of tax law changes. In the first quarter, the drop in personal tax and nontax payments was due to lower withholding—reflecting decreases in tax rates and increases in the size of the personal exemption and the standard deduction amounts.

Disposable personal income (DPI) increased \$41 billion (or 5 percent) in the second quarter, following a \$60 billion (or 7½ percent) increase in the first. Reflecting the deceleration in DPI and the acceleration in PCE prices, real DPI declined ½ percent in the second quarter after a 5-percent increase in the first.

Personal outlays—largely PCE—increased \$60 billion in the second quarter, \$6 billion more than in the first. The larger increase in outlays than in current-dollar DPI led to a \$19½ billion decline in personal saving in the second quarter; the personal saving rate dropped 0.6 percentage point to 3.8 percent.

NOTE.—Most dollar levels are found in table 2.1 of the "National Income and Product Accounts Tables."

# The U.S. National Income and Product Accounts: Revised Estimates

- Annual 1985-87
- Quarterly 1985:I-1988:I

**I**N this issue of the SURVEY OF CURRENT BUSINESS, the Bureau of Economic Analysis presents the revised estimates of the national income and product accounts (NIPA's) for the years 1985-87 and the quarters from the first quarter of 1985 through the first quarter of 1988. As is usual in July, source data that are more complete, more detailed, or otherwise more appropriate than data previously available have been incorporated, and seasonal factors have been updated.

As well, several methodological changes have been made.

The first section of this article discusses the impact of the revisions on several aspects of economic activity, the second section provides a summary of the revisions and the major source data underlying them, and the third section describes the changes in methodology made this July and summarizes the source data and methods used to prepare the NIPA estimates. An appendix to this article contains the current-dollar annual previously published estimates, revised estimates, and revisions for the five summary accounts of the NIPA's.

The complete set of NIPA tables follows this article. An index to the NIPA tables begins on page 108. A guide to when the estimates are released, where they are available, and how they are presented begins on page 125.

## Impact of the Revisions

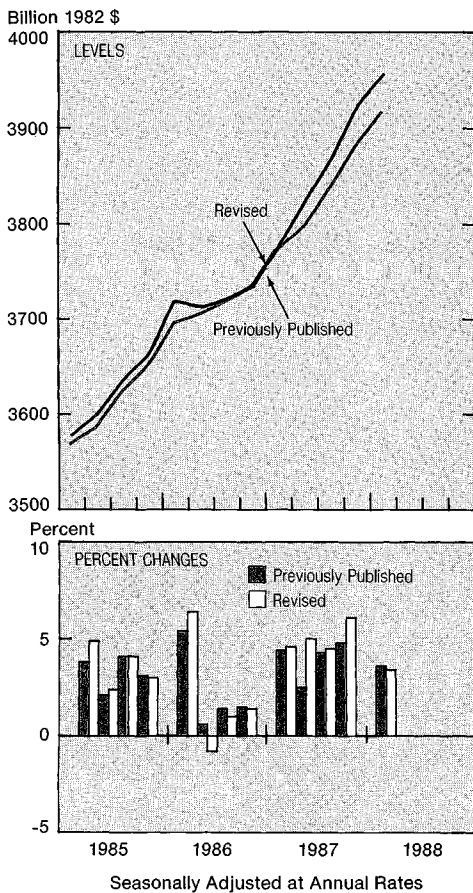

On the whole, the July 1988 NIPA revisions did not significantly alter the picture of the U.S. economy. By either the previously published or the revised estimates, the economy continued to grow at a moderate pace over the 3-year period covered by the revisions. However, the economy was stronger in 1987 than had been indicated previously. By either set of esti-

mates, inflation was moderate during the past 3 years. On the revised basis, personal income and outlays were both stronger in recent quarters.

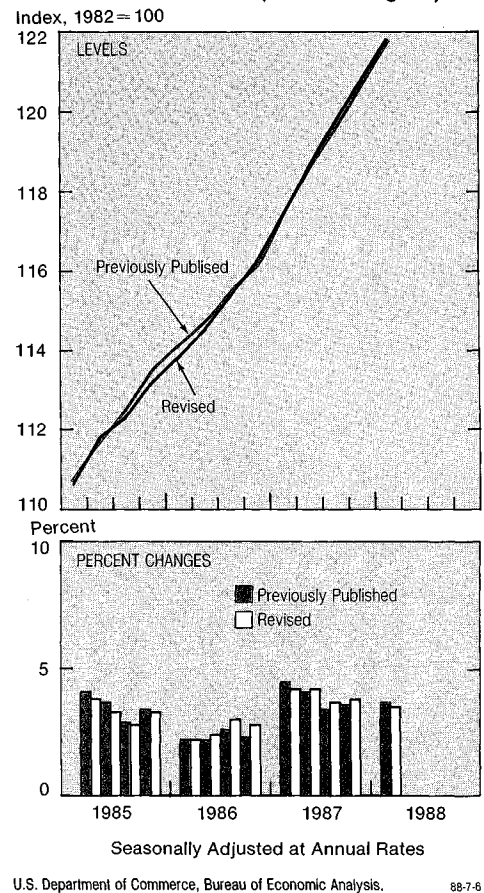

## Economic growth and inflation

Growth in production and in demand was somewhat stronger in the revised estimates than in the previously published estimates. Over the period from the fourth quarter of 1984 to the first quarter of 1988, the growth rate (average annual rate of

**CHART 5**

### Data Availability

The revised estimates, along with the estimates for 1984 and earlier years, are available on magnetic tape and on diskette. To obtain an order form indicating the technical specifications of the tapes and diskettes and their cost, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington DC 20230 or call (202) 523-0669.

increase) for real GNP was revised up 0.3 percentage point—from 3.2 percent to 3.5 percent. Similarly, the growth rate for real gross domestic purchases was revised up 0.2 percentage point—from 3.3 to 3.5 percent.

As shown in table 1, average annual rates of change from the fourth quarter of 1984 to the first quarter of 1988 for most major components were not much different than previously estimated. Consumer spending was stronger, increasing 3.6 percent instead of 3.2 percent; investment was weaker, increasing 3.3 percent instead of 3.9 percent. Exports and government purchases were both somewhat stronger on the revised basis.

On the revised basis, the string of consecutive quarterly increases in real GNP during the current expansion was interrupted by a small decline in the second quarter of 1986. Revised estimates show a 0.8-percent decline in that quarter; previous estimates had shown a 0.6-percent increase.<sup>1</sup>

Real GNP increased 4.8 percent from the first quarter of 1987 to the first quarter of 1988; previously, the increase had been 3.8 percent. With a large upward revision in the second quarter, the increases in real GNP were 4.5 percent or more in each quarter of 1987. During the past four quarters, personal consumption expenditures (PCE) was not as weak as previously estimated; nonresidential fixed investment was only slightly less robust; nonfarm inventory accumulation was substantially higher; and exports surged even more.

**Inflation.**—The rate of inflation was essentially unrevised from previous estimates. Over the period from the fourth quarter of 1984 to the first quarter of 1988, the average annual rate of increase in the GNP price index (fixed weights) was unrevised at 3.3 percent; the rate for the gross domestic purchases price index (fixed weights) was revised up 0.1 percentage point to 3.4 percent. As shown in table 2, price increases for most major components were not much different than previously estimated. In general, fixed investment prices increased

somewhat more than previously estimated, and prices paid by government increased somewhat less.

### Personal income, outlays, and saving

In recent quarters, personal income, disposable personal income (DPI), and personal outlays all were stronger in

the revised estimates than in the previously published estimates. From the first quarter of 1987 to the first quarter of 1988, personal income increased 7.5 percent and DPI increased 7.4 percent, both about 1.0 percentage point more than previously estimated. Changes in both income measures were revised up in each quarter of

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes in them are differences between these rates. Quarter-to-quarter percent changes are annualized.

1987 and in the first quarter of 1988. During the past four quarters, wages and salaries, in particular, was stronger on the revised basis; non-farm proprietors' income was weaker.

Because personal outlays—largely PCE—was revised up about the same as DPI in recent quarters, the path of personal saving was about the same as previously indicated. By either set of estimates, the personal saving rate was quite low: The revised rate, which reached a 40-year low of 2.2 percent in the second quarter of 1987, was back up to 4.4 percent by the first quarter of 1988.

Real DPI was not as weak as previously indicated. The revised estimates showed an increase of 3.1 percent from the first quarter of 1987 to the first quarter of 1988; previously, the increase had been 2.3 percent.

### Summary of the Revisions

The incorporation of newly available source data and changes in methodology causes revisions in the current-dollar estimates. In general, revisions in these estimates, as well as revisions in estimates of prices, lead to revisions in the constant-dollar estimates. This section describes the revisions in the current-dollar, price, and

constant-dollar NIPA estimates for the years 1985, 1986, and 1987 and for the quarters through the first quarter of 1988.

#### *Annual revisions in current dollars*

The level of current-dollar GNP was revised up \$4.6 billion, or 0.1 percent, in 1985; \$5.3 billion, or 0.1 percent, in 1986; and \$38.2 billion, or 0.9 percent, in 1987. The revisions in the first 2 years were small by the standard of recent July NIPA revisions; the revision in 1987, however, marked the second consecutive July with a large upward revision in current-dollar GNP in the most recent year. In July 1987, current-dollar GNP had been revised up 1.0 percent in the most recent year (1986); in the four preceding July revisions, the revisions in the most recent year had ranged from -0.2 percent to 0.4 percent. As in July 1987, the upward revision in GNP this July was largely traceable to revisions in PCE for both goods and services.

The level of charges against GNP—that is, gross national income—was revised up \$3.7 billion, or 0.1 percent, in 1985; \$14.0 billion, or 0.4 percent, in 1986; and \$41.7 billion, or 0.9 percent, in 1987. The upward revisions

were largely traceable to wages and salaries and to net interest; downward revisions in proprietors' income—both farm and nonfarm—were partial offsets.

Largely reflecting revisions in several of the components of charges against GNP, personal income was revised down \$1.7 billion in 1985, down \$3.2 billion in 1986, and up \$33.5 billion in 1987. Most of the difference between the revisions in national income and in personal income was traceable to corporate profits. (Personal income includes only the portion of corporate profits that is paid to persons as dividends.)

The following is a list of the principal source data underlying the current-dollar NIPA revisions and the years into which these data were directly incorporated: Annual data from four Census Bureau surveys—Annual Retail Trade Survey for 1986, Service Annual Survey for 1985-87, Annual Survey of Manufactures for 1985-86, and surveys of State and local government finances for 1985-86; Internal Revenue Service (IRS) tabulations of tax return data for corporations for 1985 and for sole proprietors and partnerships for 1986; Bureau of Labor Statistics (BLS) tabulations of wages and salaries for 1985-87; and

### Acknowledgments

Gerald F. Donahoe, Chief of the National Income and Wealth Division, supervised the preparation of the revision of the national income and product accounts of the United States. Joseph C. Wakefield, Chief of the Government Division, directed major parts of the revision; Robert P. Parker, Associate Director for National Economic Accounts, provided overall supervision. Norman E. Bakka developed the major computer systems used in the revision. Shelby W. Herman assisted in the review of the estimates. Other BEA staff who made significant contributions to the revision are listed below. The article describing the revisions was written by Douglas R. Fox and Tracy R. Tapscott.

*Personal consumption expenditures*—Clinton P. McCully, M. Greg Key, Raymond J. Mataloni, Everette P. Johnson, Moses J. Branch, Ellen B. Arroyo.

*Investment*—David W. Cartwright, Scott D. Smith. *Structures*—Brooks B. Robinson. *Producers' durable equipment*—Jeffrey W. Crawford. *Inventories*—Stephen P. Baldwin, Karen P. Spencer, Mary K. Osinalde.

*Net exports*—Leo M. Bernstein, Phyllistine M. Barnes.

*Federal Government transactions*—David T. Dobbs. *Receipts and expenditures*—Hermione A. Anglin, Gary W. Davis, Kiran Duwadi, Jane S. Reeb, Deloris T. Tolson, Charles D. Uthus, Richard C. Ziemer. *Constant-dollar estimates*—Karl D. Galbraith, James E. Boucher, Pamela A. Kelly, Raymen G. La Bella, Robert T. Mangan, Tamara M. Mast, Abner Sachs, Gregory Y. Won.

*State and local government transactions*—David J. Levin. *Constant-dollar estimates and computer services*—Donald L. Peters. *Transfers and contributions*—Richard D. Melchionno. *Measures of price change*—Shelby W. Herman. *Farm output and income*—George M. Smith. *Personal income*—Arthur L. Sensenig. *Wages and salaries*—Pauline M. Cypert, Kathryn A. Comins. *Other labor income*—Arthur L. Sensenig. Other contributors to the personal income estimates include: Thae S. Park, James E. Rankin, and Mary V. Pitts.

*Business income*—Kenneth A. Petrick. *Corporate profits*—Sharon P. Montgomery, Dorothy G. Collins, Jerry L. Stone. *Nonfarm proprietors' income*—Willie J. Abney. *Property income*—Mary W. Hook. *Interest*—Teresa L. Weadock. *Rental income of persons*—Denise A. McBride. *Capital consumption allowances and adjustments*—John A. Gorman, John C. Musgrave, Mary E. Gray. *Industry product*—Milo O. Peterson, Sherlene K. S. Lum, Vesta C. Jones, Jeffrey A. Ekas, Marilyn E. Baker, Virginia H. Mannering.

*Computer services*—Norman E. Bakka, Phyllistine M. Barnes. *Table preparation and review*—Jeanette M. Honsa, Norman E. Bakka, Phyllistine M. Barnes. *Secretarial*—Eunice V. Blue, Gail P. Jones, Justine La Roche, and Dorothy A. Wilson.

U.S. Department of Agriculture (USDA) farm statistics for 1985-87. Other newly available source data that were principal contributors to the revisions in 1987 were the following: Revised Census Bureau monthly retail sales; revised Census Bureau monthly shipments of office, computing, and accounting machinery; revised Census Bureau monthly retail inventories; and Federal agency reports on assets and liabilities of financial institutions.

Table 3 provides a guide to the annual NIPA revisions by identifying the subcomponent series in which revisions were concentrated and by listing the major source data and methodological changes that underlie the revised estimates. Referring to the information in table 3, the following sections discuss the major revisions in NIPA components.

*PCE goods.*—The upward revision in PCE goods in 1986 largely reflected the incorporation of data from the 1986 Annual Retail Trade Survey. This revision carried through to 1987; the substantial upward revision in that year also reflected large revisions in the Census Bureau monthly retail trade data. Revised BEA estimates of retail sales taxes in all 3 years also contributed to upward revisions in PCE goods. In addition, the revisions reflected a change in the treatment of sales of nonfuel items by gasoline service stations, which raised PCE goods in all 3 years. (See the methodological section of this article for a description of this change.) Revisions from these sources raised the spending estimates for nearly all categories of durable and nondurable goods; in 1987, the upward revision in PCE for food was notably large. Reflecting the incorporation of newly available source data, PCE for gasoline and oil was revised down in all 3 years.

*PCE services.*—PCE services was revised up substantially in 1987. The upward revision, which continued the pattern of recent July revisions, largely reflected the substitution of newly available data from a number of regular sources, particularly preliminary data from the 1987 Service Annual Survey, for current quarterly estimates based on limited data or on judgmental trends. The largest revisions were in medical care, recreation, household operation, and person-

al business. About two-thirds of the revision in medical care was accounted for by physician services. Within personal business, an upward revision in services furnished without payment by banks, credit agencies, and investment companies was partly offset by a downward revision in brokerage charges and investment counseling.

Downward revisions in housing services in 1986 and 1987 largely stemmed from the incorporation of data on housing units based on the Current Population Survey. Data on housing units from the 1985 American Housing Survey were also incorporated; however, data on average rental value consistent with earlier estimates were not yet available.

*Nonresidential structures.*—The upward revision in nonresidential structures in 1987 largely reflected the incorporation of revised Census Bureau data on construction put in place into the estimates of nonfarm structures other than public utilities and mining exploration, shafts, and wells. About one-half of the revision was in commercial buildings. The downward revision in the other nonfarm structures component in 1985 reflected the incorporation of information about the sale of a coal gasification plant to the Federal Government (offset in Federal Government purchases).

*Nonresidential PDE.*—On balance, the incorporation of shipments data from the 1986 Annual Survey of Manufactures led to downward revisions in nonresidential PDE. In particular, the survey data lowered the estimates for trucks, special industry machinery, and electrical equipment.

*Residential investment.*—The downward revision in residential investment in 1986 largely reflected the incorporation of newly available data on the value of properties held by the Federal Housing Administration into estimates of government purchases of used structures and the incorporation of revised USDA data into estimates of farm structures. The downward revision in 1987 largely reflected revised Census Bureau data on multifamily construction put in place.

*Change in business inventories.*—The sharp downward revision in the change in farm inventories in 1987 partly reflected the incorporation of revised data from the USDA. A modi-

fication in BEA's quarterly estimating procedure to more closely match open market prices with crop CBI also contributed to the downward revision.

The upward revision in the change in nonfarm business inventories in 1987, which was concentrated in retail trade, reflected revisions in monthly inventory data from the Census Bureau. The largest revision was in inventories held by retail auto dealers. In 1986, a downward revision in retail trade was largely offset by upward revisions in manufacturing and merchant wholesale trade.

*Net exports.*—In general, the revisions in net exports of goods and services reflected the revisions to the BEA balance of payments accounts released in June 1988. (See the technical notes in "U.S. International Transactions, First Quarter 1988" in the June 1988 SURVEY for detail on the balance of payments accounts revisions.) In addition, the "geographic adjustment"—that is, the adjustment that excludes U.S. territories and the Commonwealth of Puerto Rico from NIPA estimates of net exports—was revised to reflect the incorporation of new data for 1987 from Puerto Rico's balance of payments accounts.

The downward revision in merchandise exports in 1987 was largely in capital goods except autos; the upward revision in merchandise imports was largely in consumer goods. The upward revisions in exports of services were in both factor income and other services; the upward revisions in imports of services were in other services.

*Government purchases.*—The upward revision in Federal Government purchases in 1985 largely reflected the purchase of the coal gasification plant (offset in nonresidential structures); the upward revision in 1987 reflected the incorporation of newly available data from the USDA on the Commodity Credit Corporation (CCC).

The revisions in State and local government purchases stemmed from the incorporation of data from a variety of regular sources. Purchases of structures was revised down in 1986 and 1987; employee compensation was revised down in 1987; and other State and local government purchases was revised up in all 3 years.

*Compensation of employees.*—The large upward revision in wages and

Table 3.—NIPA Revisions: Selected Component Detail and Major Source Data

NIPA component	Billions of dollars				Major source data incorporated
	Revision in level			Revised 1987 level	
	1985	1986	1987		
Gross national product.....	4.6	5.3	38.2	4,526.7	
Personal consumption expenditures .....	-4	7.7	44.3	3,012.1	
Goods .....	1.6	8.3	23.2	1,419.8	
<i>Of which:</i>					
Gasoline and oil .....	-2.0	-2.0	-3.3	77.0	Revised Federal Highway Administration data on gasoline consumption for 1985-87; Energy Information Administration data on motor gasoline supplied for 1987.
Goods other than motor vehicles and gasoline and oil .....	2.4	10.3	27.0	1,175.3	Revised retail sales taxes and merchandise line distributions for 1985-87; 1986 Annual Retail Trade Survey sales data; and revised Census Bureau monthly retail sales data for 1987.
<i>Of which:</i>					
Food .....	-1.2	3.2	10.6	526.4	
Services .....	-1.9	-7	21.1	1,592.3	
<i>Of which:</i>					
Housing .....	.6	-2.6	-1.6	467.7	1985 American Housing Survey data for owner- and tenant-occupied housing units; Census Bureau data on owner- and tenant-occupied units based on the Current Population Survey for 1986-87.
Household operation .....	.6	1.3	4.2	186.3	
Medical care .....	0	.3	9.3	360.3	
<i>Of which:</i>					
Physicians .....	.2	.4	6.0	93.9	Revised Service Annual Survey (SAS) receipts data for 1985-86; new SAS data for 1987.
Personal business .....	-4.1	-2.4	3.2	215.5	
<i>Of which:</i>					
Services furnished without payment by banks, credit agencies, and investment companies .....	-3.8	-1.4	7.8	82.3	IRS tabulations of corporate tax return data on profits of mutual financial institutions for 1985; Federal Deposit Insurance Corporation data and Federal Reserve Board flow-of-funds data on private pension plans for 1985-87; National Credit Union Administration data and Federal Home Loan Bank Board data for 1987.
Brokerage charges and investment counseling .....	0	0	-4.0	20.1	New York Stock Exchange income statements of member firms for 1987.
Recreation .....	-1	1.9	4.4	39.7	Revised SAS receipts data for 1985-86; new SAS data for 1987; trade data for video cassette rentals for 1987.
Fixed investment .....	.2	-4.8	2.2	673.7	
Nonresidential structures .....	.7	1.1	5.3	139.5	
<i>Of which:</i>					
Nonfarm structures other than public utilities and mining exploration, shafts, and wells .....	-7	.7	5.5	95.3	Information on the sale of a coal gasification plant to the Department of Energy for 1985; revised Census Bureau data on the value of new construction put in place for 1985-87.
Nonresidential producers' durable equipment .....	-4	-4.1	-1.9	307.3	1986 Annual Survey of Manufactures; revised Census Bureau monthly shipments data for 1987.
Residential .....	-2	-1.7	-1.2	226.9	Revised USDA data for 1985-87; revised Federal Housing Administration data for 1986-87; revised Census Bureau data on the value of new construction put in place for 1985-87.
Change in business inventories .....	1.3	-2	-6.9	39.2	
Farm .....	.3	-8	-114	-1.5	Revised USDA data for 1985-87.
Nonfarm .....	1.0	.6	4.5	40.7	
<i>Of which:</i>					
Manufacturing .....	-1.5	1.3	-1	6.1	Census Bureau Annual Survey of Manufactures (ASM) last-in first-out (LIFO) reserve for 1985; ASM data on inventories and LIFO reserve for 1986; revised Census Bureau monthly inventory data for 1987.
Merchant wholesale trade .....	1.0	2.7	-9	7.2	Census Bureau Annual Trade Survey (ATS) LIFO reserve for 1985; ATS data on inventories and LIFO reserve for 1986; revised Census Bureau monthly inventory data for 1987.
Retail trade .....	.8	-3.6	6.7	21.3	Census Bureau Annual Retail Trade Survey (ARTS) inventory data and LIFO reserve for 1985-86; revised Census Bureau monthly inventory data for 1987.
Net exports .....	1.2	1.1	-3.4	-123.0	
Exports .....	1.0	2.2	.2	428.0	Revised BEA balance of payments accounts estimates for 1985-87 (June 1988 SURVEY OF CURRENT BUSINESS).
Merchandise .....	0	.1	-2.8	254.8	Revised geographic adjustment for 1987.
Services .....	1.0	2.1	3.2	173.3	
Imports .....	-3	1.1	3.7	551.1	Revised BEA balance of payments accounts estimates for 1985-87 (June 1988 SURVEY OF CURRENT BUSINESS).
Merchandise .....	-1	.2	1.7	413.0	Revised geographic adjustment for 1987.
Services .....	-2	.9	2.0	138.1	
Government purchases .....	2.2	1.5	1.9	924.7	
Federal Government purchases .....	1.3	0	2.6	382.0	
<i>Of which:</i>					
Nondefense .....	1.4	.3	2.5	86.7	Revised used structures data (coal gasification plant purchased by the Department of Energy) for 1985; FY 1987 Federal budget data for 1986-87; USDA data on the Commodity Credit Corporation for 1987.
State and local government purchases .....	.9	1.5	-6	542.8	
<i>Of which:</i>					
Purchases other than employee compensation and structures .....	.4	2.6	1.6	158.9	Census Bureau surveys of expenditures for 1985-86.

Table 3.—NIPA Revisions: Selected Component Detail and Major Source Data—Continued

NIPA component	Billions of dollars				Major source data incorporated
	Revision in level			Revised 1987 level	
	1985	1986	1987		
Charges against gross national product.....	3.7	14.0	41.7	4,534.8	
Compensation of employees.....	-3.3	2.2	35.8	2,688.4	
Wages and salaries.....	.5	4.9	35.7	2,248.4	
<i>Of which:</i>					
Private wages and salaries.....	.8	6.0	37.0	1,828.3	BLS tabulations of unemployment insurance wage and salary data for 1985-87; USDA data for 1985-87.
Supplements to wages and salaries.....	-3.7	-2.7	.2	435.0	
Employer contributions for social insurance.....	1.0	2.3	2.5	227.1	Census Bureau Survey of Public Employee Retirement Systems data on contributions for 1985-86; Social Security Administration data for 1985-87.
Other labor income.....	-4.7	-5.0	-2.3	207.9	IRS tabulations of corporate tax return data on pension plan contributions for 1985; Health Care Financing Administration data on health insurance premiums and U.S. Chamber of Commerce data on employer contribution rates for group insurance for 1986.
Proprietors' income with IVA and CCAAdj.....	-1.4	-3.1	-14.5	312.9	
Farm.....	.5	-.8	-5.4	43.0	Revised USDA data for 1985-87.
Nonfarm.....	-2.0	-2.3	-9.0	270.0	IRS tabulations of corporate tax return data on bad debt used to estimate defaulters' gain adjustment for 1985; IRS tabulations of noncorporate business tax return data on total receipts less total deductions, with an adjustment for interest expenses passed through to partners, for 1986.
Rental income of persons with CCAAdj.....	.2	-4.3	-.9	18.4	1985 American Housing Survey data on owner- and tenant-occupied housing units; Census Bureau data on owner- and tenant-occupied units based on the Current Population Survey for 1986-87; revised USDA data for 1985-87; IRS tabulations of individual income tax return data on royalty income for 1986; new Federal Reserve Board data on mortgage refinancing used to estimate interest expense for 1986-87.
Corporate profits with IVA and CCAAdj.....	4.7	14.5	5.7	310.4	
<i>Of which:</i>					
Profits before tax.....	-.5	4.5	2.6	276.7	IRS tabulations of corporate tax return data on total receipts less total deductions for 1985; offsetting revisions in manufacturing and trade reflecting changes in tax laws relating to Domestic International Sales Corporations for 1985; regulatory agency and public financial reports data on profits for 1986-87; Census Bureau's <i>Quarterly Financial Report</i> for retail trade for 1987.
<i>Of which:</i>					
Manufacturing.....	8.4	8.4	8.3	102.9	
Trade.....	-7.0	-6.4	-8.1	50.8	
Public utilities.....	-2.2	-4.4	-6.0	12.8	
Communication.....	1.5	4.1	3.6	17.5	
Financial.....	4.4	5.7	3.1	30.1	
CCAAdj.....	6.2	8.2	3.5	51.7	IRS tabulations of corporate tax return data on depreciation for 1985; revised BEA estimates of economic depreciation, reflecting revised fixed investment estimates for 1985-87.
Net interest.....	3.7	5.8	16.5	353.6	
Net monetary interest.....	.9	-1.2	-4.3	134.2	
Interest paid.....	26.3	24.8	.....	1,305.5	
<i>Of which:</i>					
Business.....	26.6	25.5	.....	949.3	IRS tabulations of corporate tax return data on interest for 1985 and of noncorporate business tax return data, with an adjustment for interest expenses passed through to partners, for 1986; Federal Reserve Board flow-of-funds accounts liability data, Investment Company Institute data, Federal Deposit Insurance Corporation data, Federal Home Loan Bank Board data, and Federal Reserve Board mortgage loan data, with new adjustment for refinancing, for 1986-87.
Interest received.....	26.3	24.8	.....	1,305.5	
<i>Of which:</i>					
Business.....	25.8	27.1	.....	814.5	IRS tabulations of corporate tax return data on interest for 1985 and of noncorporate business tax return data for 1986; Federal Reserve Board flow-of-funds accounts asset data, Investment Company Institute data, Federal Deposit Insurance Corporation data, and Federal Home Loan Bank Board data for 1986-87.
Net imputed interest.....	2.7	7.1	20.7	219.3	Life insurance and investment companies: IRS tabulations of corporate tax return data on property income for 1985; American Council of Life Insurance data for 1986. Commercial banks: Federal Deposit Insurance Corporation data for 1985-87; Other: IRS tabulations of corporate tax return data on profits of mutual financial institutions for 1985; National Credit Union Administration data, Federal Home Loan Bank Board data for 1987; Federal Reserve Board flow-of-funds data on private pension plans for 1985-87.

See footnotes at end of table.

salaries in 1987 was due to the incorporation of BLS tabulations of unemployment insurance wage and salary data. About one-half of the revision was in wages and salaries in the services industries. Part of this revision reflected accelerated bonus payments made by personal service corporations to their employee-owners (usually doctors, lawyers, etc.); these payments, which normally would have been made in 1988, were made earlier in response to changes in Federal tax laws. Wages and salaries in manufacturing and the distributive industries were also revised up considerably in 1987.

In supplements to wages and salaries, other labor income—primarily employer contributions to pension and profit-sharing plans and to group health and life insurance—was re-

vised down in all 3 years; employer contributions for social insurance was revised up in all 3 years.

*Proprietors' income with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj).*—The downward revision in farm proprietors' income in 1987 reflected the incorporation of revised data from the USDA and the modification in the quarterly estimating procedure that was noted under change in farm inventories.

Largely reflecting the incorporation of regular source data, nonfarm proprietors' income was revised down in all 3 years. In addition, the downward revision in 1986 reflected an adjustment for interest expenses passed through to partners. (See the methodological section of this article for a description of this change, which was

offset in both net interest and personal interest income.) The CCAdj for nonfarm proprietors' income was revised up in 1986 and down in 1987. (See capital consumption allowances with CCAdj for a list of the major source data incorporated into this estimate.)

*Rental income of persons with CCAdj.*—The downward revisions in rental income of persons in 1986 and 1987 largely stemmed from the incorporation of data on housing units based on the Current Population Survey. Data on housing units from the 1985 American Housing Survey were also incorporated; however, data on the average rental value consistent with earlier estimates were not yet available. In addition, data from the Federal Reserve Board on the proportion of outstanding loans refinanced

IRS Internal Revenue Service.  
USDA U.S. Department of Agriculture.

was introduced; this information raised BEA's estimates of effective mortgage interest rates, which, in turn, raised estimated expenses and lowered rental income (offset in both net interest and personal interest income).

*Corporate profits with IVA and CCAdj.*—The revisions in corporate profits reflected upward revisions in profits before tax in 1986 and 1987 and upward revisions in the CCAdj in all 3 years. Upward revisions in profits before tax were concentrated in the manufacturing, communication, and financial industries; downward revisions were concentrated in trade and public utilities. To a large extent, the revisions in manufacturing and trade profits were offsets that reflected the impact of Federal tax law changes in 1985 on the way many manufacturing corporations handled export sales operations. As a result of these tax law changes, Domestic International Sales Corporations (DISC's), which many corporations had set up as wholesale subsidiaries, were to be replaced by Foreign Sales Corporations (FSC's); IRS corporate tax return data show that most manufacturers folded their DISC's back into the parent corporation rather than continuing to operate them as FSC's. The CCAdj was revised up in all 3 years. (See capital consumption allowances with CCAdj for a list of the major source data incorporated into this estimate.)

*Net interest.*—As has been the case in recent July revisions, net interest was revised up in all 3 years, substantially in the most recent year. Because of the timing with which source data become available, these estimates are particularly subject to revision. For instance, direct information on interest paid and received by business is available only on an annual basis—for nonfinancial business with a 2-year lag; estimates for the 2 most recent years for these businesses are based on assets/liabilities and effective interest rates. The current quarterly estimates depend upon sketchy information on interest received by persons, government interest paid and received, and interest paid by consumers to business.

The estimates of net interest were also raised by two previously mentioned methodological changes: The interest expense item in nonfarm pro-

prietors' income (see the methodological section of this article for a description of this change); and the introduction of data from the Federal Reserve Board on the proportion of outstanding loans refinanced, which raised BEA's estimates of effective interest rates (offset in rental income of persons).

*National income.*—National income was revised up in 1985, up somewhat more in 1986, and up even more in 1987. These revisions reflected the aforementioned revisions in compensation of employees, proprietors' income, rental income of persons, corporate profits, and net interest.

*Capital consumption allowances with CCAdj.*—Revisions in these estimates reflected the incorporation of IRS tax return information and of BEA estimates of fixed investment. Capital consumption allowances (tax-return-based depreciation) was revised up considerably in 1985 and 1986 and up only a small amount in 1987; capital consumption allowances with CCAdj (economic depreciation) was revised by small amounts in all 3 years. Thus, the CCAdj (the difference between the two measures of depreciation) was revised up considerably in 1985 and 1986 and was revised only a small amount in 1987. The corporate CCAdj was revised up in all 3 years; the noncorporate CCAdj was revised up in 1986 and down in 1987.

*Nonfactor charges.*—Revisions in nonfactor charges—indirect business tax and nontax liability, business transfer payments, and current surplus of government enterprises less subsidies—were largely traceable to the last two components. The upward

revisions in business transfer payments were largely due to higher estimates of consumer bad debt and of the business part of auto liability for personal injury. The downward revisions in current surplus of government enterprises less subsidies were partly attributable to higher estimates of the deficit of the CCC.

*Personal income.*—Reflecting the revisions in other labor income and nonfarm proprietors' income, personal income was revised down in 1985 and 1986. A substantial upward revision in 1987 largely reflected the revision in wages and salaries. In addition, the revisions in the interest estimates led to an upward revision in personal interest income in 1987. Transfer payments were also revised up, reflecting the upward revision in business transfer payments to persons. The downward revision in farm proprietors' income in 1987 was a partial offset in personal income.

Personal tax and nontax payments were revised up in 1987; about two-thirds of the revision was in State and local taxes. The revisions in personal taxes were much smaller than those in personal income; consequently, the pattern of the revisions in DPI mirrored that of personal income.

Reflecting the revisions in PCE, personal outlays was revised up somewhat in 1986 and up sharply in 1987. Personal saving—DPI less personal outlays—was revised down in all 3 years.

#### *Annual revisions in prices*

In general, revisions in prices tend to be small, mainly because much of the source data used to derive GNP

#### NIPA Table Changes

- Two new lines have been added to the tables presenting change in business inventories and inventory levels (tables 5.8 through 5.11). The new lines show retail trade inventories of durable goods separately for automotive and other durable goods. The automotive estimates cover most motor vehicle inventories—including inventories of new and used autos (domestic and foreign), parts, some trucks, and other motorized vehicles—held by retailers. The change in business inventories for retail auto dealers differs in coverage from the change in inventories of autos and trucks in the motor vehicle output estimates shown in tables 1.17 through 1.20.

- Two new tables—5.12 and 5.13—have been added. They show fixed investment by major subcomponent in current and constant dollars.

The current estimates for the new lines and tables have been shown in the "Reconciliation and Other Special Tables" section of the SURVEY for the past few months. Estimates are available annually back to 1929 and quarterly back to 1946 (1947 for constant-dollar estimates); please write to the address listed in the "Data Availability" box on page 8.

- Footnotes have been added to tables 3.18, 4.3, and 4.4 noting changes in coverage and definitions beginning in 1985.

- See also "Errata and Revisions in NIPA Tables" on page 127.

price indexes is not routinely revised. Specifically, the BLS Consumer Price Index does not undergo routine revisions after its initial release, and the Producer Price Index is revised only slightly; these indexes are used for components that account for over three-fourths of GNP.

The revisions that were made this July reflected the incorporation of newly available data and several methodological changes. The newly available data consisted not only of price information but also current-dollar estimates or quantity data that resulted in price revisions when used for components for which the constant-dollar estimates were prepared

by quantity extrapolation (see the updated summary methodology in the last section of this article). Newly available price information for 1985-87 included the following: Revised BEA computer price index, revised BLS export and import price indexes, and newly available price data for national defense goods and services. Newly available current-dollar estimates or quantity data for 1985-87 that resulted in revised prices included the following: Current-dollar services furnished without payment by banks, credit agencies, and investment companies (in PCE), quantity data for petroleum and natural gas exploration (in nonresidential struc-

tures), and quantity data for State and local government compensation (in government purchases).

Revisions in the GNP price index (fixed weights) were small in all 3 years. The level of the index was revised down by 0.2 percent and 0.1 percent in 1985 and 1986, respectively, and was unrevised in 1987. The size of the revisions was about in line with those in the two most recent July revisions. As a result of these revisions, the annual percent change in the GNP price index was revised only slightly in all 3 years—down by 0.2 percentage point to a 3.4-percent increase in 1985, and up by 0.1 point to a 2.8-percent increase and by 0.2 point

to a 3.6-percent increase in 1986 and 1987, respectively (table 4).

Revisions in annual percent changes in PCE prices were small—down in 1985 and up in 1986 and 1987. Most of these revisions were attributable to prices of services furnished without payment by banks, credit agencies, and investment companies.

Upward revisions in nonresidential fixed investment prices in 1986 and 1987 were traceable to both structures and PDE. In structures, revised data on petroleum drilling footage became available for 1986 and 1987. In PDE, the upward revisions reflected the substitution of import price indexes for domestic price indexes in the deflation of most categories of imported equipment. (See the methodological section of this article for a description of this change.) Upward revisions in 1985 and 1986 in the BEA computer price index also contributed to the upward revisions in PDE prices; a downward revision in 1987 partly offset the other revision in that year.

The revisions in export and import prices were small, except for an upward revision in import prices in 1986. The revisions in 1985–87 reflected the incorporation of revised BLS export and import price indexes, for which weights had been updated to 1985 from 1980, and the use of new BEA end-use commodity detail. Import prices were especially affected in 1986 by the introduction of more detailed categories for what had been grouped together as “business and office machines, computers, etc.”; the new categories made it possible to use more appropriate price indexes for components other than computers. (See the methodological section of this article for a description of these changes.)

Prices of government purchases were revised down in all 3 years. Downward revisions in Federal national defense purchases reflected newly available price data from Department of Defense reports. Downward revisions in State and local compensation reflected revised information on full-time equivalent employment.

#### Annual revisions in constant dollars

In general, revisions in constant-dollar, or real, GNP and its components reflect (1) current-dollar revisions, (2) price revisions, and (3) other

revisions, caused by shifts in composition, which result either from redistributions of current-dollar levels within components or from deflation at a finer level of detail. The following tabulation provides a breakdown of the percent revisions in the level and of the revisions in the annual percent change of real GNP into these three types:

	Percent revision in level			Revision in annual percent change		
	1985	1986	1987	1985	1986	1987
Current-dollar revisions .....	0.1	0.1	0.9	0.1	0	0.8
Less: Price revisions .....	-2	-1	0	-2	.1	.2
Plus: Other revisions .....	0	0	-2	.1	0	-1
Equals: Constant-dollar revisions .....	.3	.2	.7	.4	-.1	.5

The level of real GNP was revised up in all 3 years—0.3 percent in 1985, 0.2 percent in 1986, and 0.7 percent in 1987. The size of the revisions was similar to those in recent July revisions, and, as is typical, the largest revision was in the most recent year. The upward revision in 1987 was more than accounted for by revisions in current-dollar GNP. Downward revisions in prices contributed to the upward revisions in 1985 and 1986. Shifts in the composition of current-dollar GNP reduced the revision in 1987. As a result of these revisions, the annual percent change for constant-dollar GNP was revised up 0.4 percentage point to a 3.4-percent increase in 1985, down 0.1 point to a 2.8-percent increase in 1986, and up 0.5 point to a 3.4-percent increase in 1987.

For the major components of GNP, the direction of revisions in annual percent changes varied in 1985, was generally downward in 1986, and was upward in 1987. The largest revisions

were in PCE in 1987, in nonresidential fixed investment in 1986 and 1987, in imports in 1986, and in government purchases of nondefense goods and services in all 3 years.

The annual percent change for PCE was revised up in 1987, reflecting current-dollar revisions in both goods and services.

Among nonresidential investment components, structures was revised up in 1987, due to revisions in current dollars. PDE was revised down in 1986 and up in 1987, attributable to a combination of current-dollar revisions and price revisions, mainly the substitution of import prices for domestic prices in the deflation of imported equipment and, in 1986, the revision in the BEA computer price index.

Imports was revised down in 1986. The use of more appropriate price indexes made possible by the more detailed end-use categories, revised BLS export and import prices, and the revised BEA computer price index accounted for most of the revision.

In government purchases, Federal nondefense purchases was revised up in 1985, down in 1986, and up in 1987. In all 3 years, the revisions were primarily attributable to current-dollar revisions.

#### Quarterly revisions

July revisions in quarterly NIPA estimates come about in two major ways: The adjustment of the estimates to reflect the annual revisions, and the incorporation of new and revised source data (including the updating of seasonal factors) that are used to indicate quarterly patterns. Also, July revisions provide an occasion when changes may be made in

Table 5.—GNP, Real GNP, and GNP Prices: Change From Preceding Quarter

[Percent change at annual rates; based on seasonally adjusted annual rates]

	GNP			Real GNP			GNP price index (fixed weights)		
	Previously published	Revised	Revision	Previously published	Revised	Revision	Previously published	Revised	Revision
1984:IV .....	4.7			1.7			3.2

IV .....	7.6	8.6	1.0	4.8	6.1	1.3	3.6	3.8	.2
1988:I .....	5.1	5.4	.3	3.6	3.4	-.2	3.7	3.5	-.2

the methodology used to prepare quarterly estimates.

The quarterly NIPA revisions this July largely reflected the revisions in the annual estimates that were previously described. In general, the quarter-to-quarter pattern of changes in GNP, real GNP, and GNP prices were not sharply different on the revised basis (table 5).

For real GNP, the revisions in the 13 quarterly percent changes (annual rates) averaged 0.7 percentage point (without regard to sign), about in line with the two preceding July revisions. Changes in five quarters were revised by 1.0 percentage point or more—four up and one down. Two of the upward revisions were in 1987: In the second quarter, the revision was concentrated in PCE and in nonfarm inventory investment; the fourth-quarter revision was concentrated in farm and nonfarm inventory investment. The downward revision in real GNP was in the second quarter of 1986; almost all of the revision was in farm and nonfarm inventory investment.

For GNP prices, the revisions in the 13 quarterly percent changes (annual rates) averaged 0.2 percentage point (without regard to sign), also about in line with recent July revisions. None of the quarterly changes were revised by more than 0.5 percentage point; the revisions were downward in the quarters of 1985 and tended to be upward thereafter.

## Methodology

The revised NIPA estimates incorporate several changes either in the source data or in the methods used to prepare the estimates. This section of the article describes the major changes and updates previously published tables showing summary methodologies for current-dollar and constant-dollar estimates of GNP.<sup>2</sup>

### *Changes in methodology*

Changes in methodology are made for several reasons. First, source data emerge and disappear, and BEA adapts the estimating methods accordingly. Second, often independently of circumstances that lead to these adaptations, BEA improves the esti-

imating methods. Finally, the economy changes, and BEA updates the methodology to ensure that the estimates continue to provide a reliable picture of the transactions and transactors in the economy.

The changes made this July represent a typical mix of reasons. The following are the major methodological changes that affected the current-dollar estimates of GNP: In PCE, introduction of an adjustment for non-fuel sales by gasoline service stations, introduction of receipts data from the service annual survey into the estimates of clubs and fraternal organizations and of employment agency fees, introduction of estimates of hotel and motel receipts to replace a judgmental trend in the preparation of current estimates and to provide a quarterly interpolator, and use of a judgmental trend to prepare current estimates of the portion of the "brokerage charges and investment counseling" category that is not stock brokerage charges instead of extrapolating the entire category by stock brokerage charges; in CBI, use of the Census Bureau current cost inventory series for manufacturing and trade; and in net exports, introduction of BEA's new end-use commodity classification system for merchandise.

The following are the major changes that affected the current-dollar estimates of charges against GNP: In private wages and salaries, introduction of a trend adjustment to the extrapolator used to prepare the current estimates; in proprietors' income, accounting for an interest expense that is not treated as such in the source data; in rental income of persons, introduction of data on expenses relating to dealers' commissions and condominium fees instead of extrapolating them as part of total miscellaneous expenses, and introduction of Federal Reserve Board data on the portion of outstanding mortgages that are refinanced as part of the mortgage interest expense calculation; and in net interest, introduction of the Federal Reserve Board data just mentioned, the change corresponding to the interest expense mentioned for proprietors' income, and explicit exclusion of net realized capital gains from interest received by State and local government retirement funds.

In addition, several changes were made in deflation procedures: In PCE,

expansion of the coverage of personal computers (PC's) in the sample underlying the PC price index, and introduction of an average of foreign consumer price indexes (adjusted by exchange rates) to replace a unit-value index for finished manufactured imports in the deflation of nondurable goods purchased abroad; in PDE, introduction of producer price indexes for boats and for civilian aircraft to replace weighted averages of prices of materials and related equipment, and introduction of import prices for most imported equipment to replace domestic prices; and in net exports, deflation at the more detailed level made possible by the new end-use classification system, and introduction of the same price indexes for exports and imports of boats and civilian aircraft as mentioned for PDE.

A number of these methodological changes were mentioned in the first part of this article in conjunction with revisions in the NIPA components. Several of them are described more fully in the following paragraphs.

*PCE for goods.*—The revised estimates reflect a change in procedure for the sales of goods other than automotive fuels by gasoline service stations. Under the new procedure, these sales—mainly snacks, groceries, and cigarettes—are (1) estimated as total sales of gasoline service stations less automotive repair receipts and sales of automotive fuels and (2) added to what is referred to as the "retail control"—total sales of the group of establishments mainly selling consumer-type products. (For a step-by-step explanation of the retail-control method, see pages 116–117 of the July 1987 SURVEY.) By being added to the retail control, these sales are distributed to the PCE type-of-good categories as part of the retail control. Previously, the retail control had not been supplemented in this way on the assumption that sales of nonfuel goods by gasoline service stations, one of the kinds of establishments not included in the retail control group, were a constant proportion of the sales of those goods by establishments that are. It appears this assumption has not held in recent years; instead, sales of these goods by service stations increased faster. The new procedure raised PCE for goods \$3.2 billion in 1985, \$7.9 billion in 1986, and \$6.7 billion in 1987.

2. See "GNP: An Overview of Source Data and Estimating Methods," in the July 1987 SURVEY. This article was reprinted as the fourth in a series of NIPA methodology papers. These papers are listed on the inside back cover.

*Change in business inventories (CBI).*—BEA now uses the series referred to by the Census Bureau as “current cost inventories” to prepare the CBI for manufacturing, merchant wholesale, and retail trade and has modified its methods accordingly. Since early 1987, when the Census Bureau introduced this series, BEA had been using an unpublished series consistent with what the Census Bureau had previously referred to as “book value inventories.” The two Census Bureau series differ in the treatment of inventories reported on a last-in, first-out (LIFO) basis: The old series had included them as reported and thus was a mix of LIFO and non-LIFO inventories; the new series is entirely on a non-LIFO basis. For the new series, firms that report on a LIFO basis also report both non-LIFO inventories and the LIFO reserve.

The method for estimating the IVA was modified. For annual estimates, the total IVA is estimated in two parts: The reported change in LIFO reserve, and the IVA as previously defined. For current monthly and quarterly estimates, for which the reported LIFO reserve data are unreliable, the total IVA is estimated by BEA.

The revised CBI for manufacturing and trade includes this change as well as newly available data, as indicated in table 3, and updated seasonal factors. These sources of revision interacted, and it is not possible to quantify the parts of the revision attributable to them separately.

In NIPA table 5.8, the change in source data affects the coverage of the lines labeled “change in book value” and “inventory valuation adjustment” for manufacturing, merchant wholesale, and retail trade inventories. The change in book value now reflects the change in the new Census Bureau inventory series. The IVA now reflects the difference between the change in the new Census Bureau inventory series and the CBI’s current replacement cost basis. Because such a difference may arise for all non-LIFO inventories, the IVA is now applicable to all manufacturing and trade inventories; previously it had not been applicable to the LIFO portion of these inventories (except when LIFO inventories decumulated).

*Net exports of goods.*—The revised estimates of net exports incorporate

the June 1988 revisions to the U.S. balance of payments accounts, notably the introduction of BEA’s new end-use commodity classification system for merchandise trade. The new system provides more detail than the old and reclassifies a few commodities. A detailed explanation of the new system was presented in the technical notes in “U.S. International Transactions, First Quarter 1988” in the June 1988 SURVEY.

For the current-dollar estimates, the introduction of the new classification system led only to reclassification among commodity categories; total merchandise exports and imports were not affected. For the constant-dollar estimates, the system’s introduction also led to revisions in total merchandise exports and imports. These revisions occurred because deflation is now carried out in more detail and is based on more appropriate prices. These changes in deflation had a substantial effect on capital goods exports and imports, especially on the old category “business and office machines, computers, etc.” In the previously published estimates, exports and imports of all commodities in this category were deflated with the PDE implicit price deflator for office, computing, and accounting machinery. In the revised estimates, a new computer category (“computers, peripherals, and parts”) was deflated with BEA’s computer price index (a part of the previously used deflator), and the other commodities from the old category were deflated with corresponding BLS export and import price indexes. The latter change had a substantial effect because (1) the old deflator decreased and the new deflators increased in all 3 years, and (2) the level of the old deflator was substantially lower than the new deflators.

Until the new classification system is introduced for years prior to 1985, the exports and imports series shown in NIPA tables 4.3 and 4.4 will have small discontinuities. For the constant-dollar estimates, 1984 exports would have been about \$0.5 billion higher and 1984 imports about \$1.0 billion lower if the reclassification and new deflation procedures had been incorporated. Consequently, the incorporation of these changes into the NIPA’s in the next comprehensive revision would lower the change in real GNP for 1985 about 0.1 percentage point.

*Wages and salaries.*—The revised estimates of wages and salaries beginning in January 1988 reflect an upward adjustment to the extrapolator used to prepare the current monthly and quarterly estimates. As described in table 6, the extrapolator for most private industries is a measure derived as employment times average hourly earnings times average weekly hours from BLS data. At the time of the first July revision, these estimates are replaced by estimates of wages and salaries based on tabulations of employees covered by State unemployment insurance (UI), also from BLS. In recent years, the incorporation of the UI data led to a substantial upward revision in wages and salaries. Preliminary work indicated that the shortfalls are related to the average hourly earnings part, because the coverage of earnings is limited to production of nonsupervisory workers and to regular earnings. Consequently, the average hourly earnings part of the extrapolator was adjusted to raise the annual total of these wages and salaries by 1 percent above what it otherwise would have been. In the first quarter of 1988, the upward adjustment was \$6.0 billion.

*Nonfarm proprietors’ income.*—The revised proprietors’ income estimates reflect a deduction for an interest expense that is not counted as such in the source data. The interest is on debt incurred after December 1969 on property held for investment. Under Federal tax law, this interest can be passed through to the partners, who treat it as an expense on their own tax returns; it is not treated as an expense of the partnership and accordingly is not deducted in deriving the net income shown in IRS tabulations of business tax returns, which are the source data for estimates of proprietors’ income. Newly available IRS tabulations indicated that the change in nonfarm proprietors’ income should be revised down \$2.9 billion in 1986 to take this interest into account. The adjustment appears as an additional element of line 2 of NIPA table 8.11, which shows the relation of nonfarm proprietors’ income in the NIPA’s to corresponding totals as published by IRS. (Because the estimates of proprietors’ income for 1987 are not based on IRS tabulations, they were not affected.) A corresponding upward revision was made in

monetary interest paid by partnerships; the proprietors' income and net interest revisions are offsetting in personal income and in national income. The adjustment will be carried back to 1969 in the next comprehensive revision of the NIPA's.

*Net interest.*—In addition to the change described for nonfarm proprietors' income, the revised estimates reflect explicit exclusion of net realized capital gains from interest received by State and local government retirement systems. Previously, this interest received had been estimated as the difference between total investment earnings of the retirement systems and dividends received. Thus, to the extent that capital gains existed, they had been treated as interest. A breakdown of investment earnings was first available for fiscal year 1984–85 in the reports underlying the Census Bureau *Finances of Employee Retirement Systems of State and Local Governments*. The reports indicated net capital gains of \$5.5 billion in 1985 and \$9.0 billion in 1986; BEA estimated gains of \$12.0 billion in 1987. The exclusions will be carried back in the next comprehensive revision of the NIPA's.

The explicit exclusion of these gains is recognized as an additional element of "financial transactions" (line 4) in NIPA table 3.18, which shows the relation of State and local government receipts and expenditures in the NIPA's to Census Bureau *Governmental Finances* data on a fiscal year basis.

*Deflation of PDE.*—Several changes were made in price indexes used to prepare constant-dollar PDE and associated measures of price change. First, BLS producer price indexes (PPI's) for boats and for civilian aircraft were introduced. Previously, a weighted average of PPI's for boat-building materials and internal combustion engines was used for boats. A similar weighted average of PPI's was used for civilian aircraft following the discontinuation after 1985 of the annual price index for aircraft compiled by the Department of Transportation.

Second, imported equipment in PDE is now deflated using the same price indexes—mainly BLS import price indexes—as used to deflate imported equipment in net exports. Pre-

viously, domestic PPI's were used. The introduction of the import price indexes is the second stage in a reworking of the PDE quarterly and annual methodology; the first stage, the separation of domestic and imported equipment in current dollars at a detailed level, was introduced last July. The improved methodology will capture more adequately short-term differences in the movement of the volume and prices of domestic and imported equipment.

#### *Updated summary methodologies*

Table 6 identifies the principal source data and estimating methods used to prepare the current-dollar estimates of the income- and product-side components of GNP, and table 7 identifies the principal source data and estimating methods used to prepare constant-dollar estimates of the product-side components. In addition to reflecting the changes made in this July revision, the tables provide more detail than presented last year for a few components, especially for Federal Government transactions. The additional detail for the Federal transactions will make it easier to relate these summaries to the full information that will be available in the forthcoming methodology paper on government transactions.

The change to the entries for current-dollar Federal Government purchases of goods and services requires some further explanation. The table presented last year described the estimates of Federal purchases in terms of their derivation from outlays as presented in the *Budget of the United States*, the *United States Government Annual Report: Appendix*, and selected agencies' annual reports. The derivation, part of what BEA calls a fiscal year analysis, has two major steps. (1) To derive NIPA expenditures from budget outlays, outlays are adjusted for coverage (for example, to exclude financial transactions and transactions in kind and to include imputations), for netting and grossing differences (for example, to treat certain items as expenditures rather than as offsets to receipts), and for timing (to move from a payments basis to a delivery basis). (2) To derive purchases from expenditures, expenditures are adjusted to exclude interest, subsidies, net expenditures of government en-

terprises, transfer payments, and grants-in-aid to State and local governments. The fiscal year analysis is carried out in substantial detail for the July revision. It provides control totals for national defense and nondefense purchases separately and provides relationships between total outlays and types of expenditures that are used to prepare estimates from the more aggregative data available for time periods other than the fiscal year. Table 6 now refers to fiscal year analysis as providing the control total and then describes the source data and methods used to prepare type-of-purchase detail and the estimates that are summed to obtain calendar year estimates. Table 7 on methodology for the constant-dollar estimates has been modified to correspond to the current-dollar presentation.

*Current-dollar estimates of GNP.*—The components in table 6 are as shown in the national income and product account, starting on the income side and proceeding to the product side. The subcomponents in table 6, with their 1987 dollar values, are grouped according to the methodology used to prepare them.

The column in table 6 for annual estimates covers the several annual estimates in the estimating cycle; major differences in methodology as the estimates move through the annual revisions to a comprehensive revision are few enough to condense into the table. For example, for most goods in PCE (the first item on the product side), the table indicates one methodology for benchmark years and another for all other years.

The column for the quarterly estimates is a condensation in several respects. First, it refers to the advance estimates for the current quarter—that is, the estimate prepared in the first month following the end of the quarter. That one estimate, rather than all of the current quarterly estimates, is described because more attention focuses on the "first look" at the quarter. Second, even for the advance estimate, the column does not detail how many months of data are available nor whether the data are subject to revision by the source agency. Thus, the benefit of condensation is at the cost of not detailing the tradeoff between the timeliness of the advance estimate and the improved

quantity and quality of source data available in the 2 following months and incorporated in the final current estimates.<sup>3</sup>

The information in the column for the quarterly estimates is generic; it fits any advance estimate for the current quarter. For users who want to track the actual data and resulting estimates, BEA prepares "Key Source Data and Assumptions for the Advance Estimates of GNP." This table shows the monthly figure for key source data that are available for the advance estimates (and indicates whether the data are subject to revision by the source agency) and BEA's assumptions for data that are not available. BEA has redesigned this table and it is shown with information about the advance estimates for the second quarter of 1988 on page 129 of this issue of the SURVEY.

Table 6 lists source data referring to a variety of different economic measures—wages and salaries, premiums, expenses, interest rates, mortgage debt, tax collections, unit sales, housing stock, employment, and average price, to name a few. For most components, the source data are "value data"; that is, they embody both the quantity and price dimensions that are required for current-dollar estimates. In these cases, the

methodology indicated in table 6 is the adjustment of the value data to derive estimates consistent with NIPA definitions and coverage. The brief descriptions of the adjustments to derive domestic corporate profits and change in business inventories are examples. Three other methods—commodity flow, retail control, and perpetual inventory—were described in the July 1987 SURVEY.

When value data are not used in preparing an estimate, the table indicates the combination of data with separate quantity and price dimensions that is used to derive the required value estimate (as well as indicating any major adjustments needed to derive estimates consistent with NIPA definitions and coverage). On the product side, a "physical quantity times price" method is used for several components. For example, the estimate for new autos is prepared as unit sales times average list price. An "employment times earnings times hours" method and forms of a "stock of assets/liabilities times an interest rate" method also are used for several components.

Some of the source data shown in table 6 for the annual estimate are used to interpolate and extrapolate the levels established by source data that are viewed as final, and all of the source data shown for the advance quarterly estimates are used to extrapolate the level of the preceding quarter.<sup>4</sup> In addition to using indicator series, as is the case when source data are listed in the table, extrapolation and interpolation may be based

on trends, as is the case when "judgmental trend" is listed in the table.

*Constant-dollar estimates of GNP.*—Table 7 shows which of three methods is used to prepare constant-dollar estimates and indicates the source data with which it is implemented.<sup>5</sup> The method used for by far the largest part of GNP is deflation. In fact, deflation is so widely used that the term is often used to describe the preparation of all constant-dollar estimates. In deflation, constant-dollar estimates are obtained by dividing the most detailed current-dollar components by appropriate price indexes with the base period—at present, the year 1982—equal to 100.

The other methods, quantity extrapolation and direct base-year valuation, are similar in that they both use quantity data. For quantity extrapolation, constant-dollar estimates are obtained by extrapolating the current-dollar estimates from the base year by quantity data. For direct valuation, constant-dollar estimates are obtained by multiplying base-year prices by quantity data for each period.

The subcomponents are as shown in table 6, except where more detail is needed to highlight differences in methodology for constant-dollar estimates. For this table, the distinction between annual and quarterly methodology is far less important than it was for the current-dollar methodology, and major differences between the annual and quarterly source data are noted within the individual entries.

3. The methodology for PCE illustrates the sequential introduction of source data in the current estimates. For the advance estimates, the key data available are the following: 3 months of retail sales (of which 2 months are subject to revision by the source agency); 3 months of unit sales of new motor vehicles, 1 month of information with which to allocate the unit sales among consumers and other purchasers, and 2 or 3 months of average list prices (which are subject to modification as more detailed information on models of cars sold, and thus actual retail prices, becomes available); and 1 to 3 months of data for services amounting to three-fifths of total services. The estimates for most of the remainder of PCE are extrapolations based either on related indicator series or on judgmental trends. For the preliminary estimates, revised retail sales for 2 months become available. For the final estimates, information on sales of used cars and more data on several services—hospitals, electricity, natural gas, hotels and motels, airline transportation, foreign travel, and insurance other than life insurance—become available.

4. Extrapolation is a method of extending estimates from one period forward (or backward) in time to other periods. In simple terms, extrapolation applies a percent change—either the percent change in the indicator series or the percent change in the trend—to the level of the preceding period. Interpolation is a method of filling in estimates between two periods. Interpolation applies a more complex mathematical formula—there are several in use—to preserve the pattern of the indicator series consistent with the level of the source data viewed as final.

5. With few exceptions, BEA does not prepare constant-dollar estimates of income measures because price indexes cannot be associated with them, as they can with product measures. Three exceptions are disposable personal income and, as presented in BEA's *Business Conditions Digest*, personal income and profits. In these cases, the estimates are adjusted for price change by reference to prices of the goods and services on which the income is spent. BEA prepares constant-dollar net national product and national income by preparing constant-dollar estimates of capital consumption allowances with capital consumption adjustment and of the nonfactor charges and then subtracting them from constant-dollar GNP.

Tables 6 and 7 follow.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
<b>Income side (Charges against GNP of \$4,534.8 billion in 1987)</b>			
<b>Compensation of employees</b> (\$2,683.4)	Wages and salaries: Private industries, State and local government, and rest of the world (\$2,110.0)	For most, annual tabulations of wages and salaries of employees covered by State unemployment insurance from the Bureau of Labor Statistics; for remainder, wages from a variety of sources (such as Dept. of Agriculture for farms and Railroad Retirement Board for railroad transportation) and indirect estimation for only a few cases (such as a percentage of revenues for tips not reported as wages).	For most private, wages and salaries derived, by industry, from Bureau of Labor Statistics monthly employment times earnings times hours; for State and local government and other private, judgmental trend.
	Wages and salaries: Federal (\$138.4)	For civilians, wages from the Office of Personnel Management; for military personnel, wages from the Office of Management and Budget, <i>Budget of the United States</i> .	For civilians, judgmental trend; for military personnel, employment from Dept. of Defense and judgmental extrapolation.
	Employer contributions for social insurance (\$227.1)	Contributions from the Social Security Admin., other agencies administering social insurance programs, and Census Bureau surveys of State and local government retirement funds.	For Federal programs, BEA-derived wages and salaries of employees covered by the programs; for State and local government programs, judgmental trend.
	Other labor income (\$207.9)	Years except most recent—For private pension and profit-sharing funds, employer contributions from Internal Revenue Service tabulations of business tax returns when available and judgmental trend in other years; for group health and life insurance, mainly total premiums paid from trade sources and Health Care Financing Admin. and data on employer share from trade source; for workers' compensation, contributions from trade sources. Most recent year—For group health insurance, total premiums paid from Health Care Financing Admin.; for others in the category, judgmental trend.	Judgmental trend.
<b>Proprietors' income with IVA and CCAdj</b> (\$312.9)	Nonfarm income (\$233.0)	Years except most recent—Income from Internal Revenue Service tabulations of business tax returns, adjusted for understatement of income on tax returns and for several conceptual differences. Most recent year—For construction, trade, and services, indicators of activity (such as value of housing put in place); for most others, judgmental trends.	Same as annual for most recent year.
	Nonfarm IVA (-\$1.0)	The IVA is described under the entry for corporate profits with IVA and CCAdj.	
	Nonfarm CCAdj (\$38.0)	The CCAdj is described under the entry for capital consumption allowances with CCAdj.	
	Farm income with IVA (\$50.6)	Based on Dept. of Agriculture data on net income, obtained by deriving gross earnings (cash receipts from marketing, inventory change, government payments, other cash income, and nonmoney income) and subtracting production expenses, adjusted to exclude corporate income from Internal Revenue Service tabulations of business tax returns.	Dept. of Agriculture projection adjusted for consistency with NIPA's.
	Farm CCAdj (-\$7.6)	The CCAdj is described under the entry for capital consumption allowances with CCAdj.	

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
<b>Income side (Charges against GNP of \$4,534.8 billion in 1987)—Continued</b>			
<b>Rental income of persons with CCAAdj</b> (\$18.4)	Rent from nonfarm nonresidential properties (\$7.6)	Years except the 2 most recent—Rents paid and received by business and government, adjusted for expenses associated with property (mainly depreciation, taxes, interest, and repairs), from Internal Revenue Service tabulations of business tax returns, Census Bureau surveys, and the <i>Budget of the United States</i> prepared by the Office of Management and Budget. Two most recent years—Judgmental trend.	Same as annual for 2 most recent years.
	Rent from owner-occupied nonfarm housing (\$22.8)	Derived as space rent—see the entry for nonfarm housing in personal consumption expenditures—less related expenses, including maintenance and repair from Bureau of Labor Statistics quarterly consumer expenditure survey, mortgage debt from Federal Reserve Board times an interest rate, and property taxes from Census Bureau quarterly surveys of State and local tax collections.	For owner-occupied space rent, same as annual; for depreciation, interest, and taxes, based on NIPA estimates of those components; for other expenses, based on judgmental trend.
	Rent from tenant-occupied nonfarm housing (\$19.1)	Same as described under owner-occupied housing and adjusted to cover only rental income accruing to persons not primarily engaged in the real estate business.	Same as annual.
	Royalties (\$11.5)	Years except most recent—Internal Revenue Service tabulations of royalties reported on individual tax returns. Most recent year—Judgmental trend.	Same as annual for most recent year.
	Rent from farms owned by nonoperator landlords (\$5.3)	Prepared in conjunction with farm proprietors' income; see that entry.	Judgmental trend.
	CCAAdj (-\$47.8)	The CCAAdj is described under the entry for capital consumption allowances with CCAAdj.	
	<b>Corporate profits with IVA and CCAAdj</b> (\$310.4)	Profits: Domestic, before tax (\$240.3)	Years except the 2 most recent—Receipts less deductions from Internal Revenue Service tabulations of business tax returns, adjusted to include in profits the depletion allowances on domestic minerals, income of the Federal Reserve and federally sponsored credit agencies, the excess of additions to bad debt reserves over losses actually incurred, and an estimate of the amount by which income on tax returns is understated and to exclude capital gains and losses on the sale of property and dividends received from domestic corporations. Two most recent years—Separately for about 70 industries, profits from Census Bureau quarterly survey of corporate profits, regulatory agency reports, and compilations of public company reports.
Profits: Rest of the world, before and after tax (\$36.4)		Estimated as part of the balance of payments; see the entry for receipts and payments of factor income, net, under net exports of goods and services.	Judgmental trend. <sup>1</sup> (Released at time of preliminary estimate of GNP for the first, second, and third quarters and of final estimate for the fourth quarter.)
IVA <sup>2</sup> (-\$18.0)		Obtained as the difference between the NIPA change in business inventories (that is, physical volume of inventories valued in prices of the current period) and the change in inventories reported by business. See also the entry for change in business inventories.	Same as annual.
CCAAdj (\$51.7)		The CCAAdj is described under the entry for capital consumption allowances with CCAAdj.	

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
<b>Income side (Charges against GNP of \$4,534.8 billion in 1987)—Continued</b>			
<b>Net interest</b> (\$353.6)	Net interest: Domestic monetary (\$134.8)	For farm interest paid and received, Dept. of Agriculture surveys; for residential mortgage interest, mortgage debt from Federal Reserve Board times an interest rate; for all other interest paid and received by business, Internal Revenue Service tabulations of business tax returns or, when these tabulations are not available, interest receipts and payments from regulatory agencies (such as the Federal Deposit Insurance Corporation), from trade sources, or obtained by applying an interest rate to a stock of assets/liabilities from Federal Reserve Board flow of funds accounts.	Derived by combining estimates of (1) interest received by persons, (2) government interest paid and received, and (3) interest paid by consumers to business. For (1), judgmental trend; for (2), <i>Monthly Treasury Statement</i> for Federal and judgmental trend for State and local; for (3), consumer debt from the Federal Reserve Board times BEA estimates of interest rates. <sup>1</sup>
	Net interest: Rest-of-the world monetary (-\$0.7)	Estimated as part of the balance of payments; see the entry for receipts and payments of factor income, net, under net exports of goods and services.	Judgmental trend. <sup>1</sup>
	Net interest: Imputed—life insurance carriers and private noninsured pension plans (\$131.3)	Property income earned (and for life insurance carriers, profits) from Internal Revenue Service tabulations of business tax returns or, for the 2 most recent years, from trade sources.	Judgmental trend.
	Net interest: Imputed—banks, credit agencies, and investment companies (\$88.1)	Property income earned on investment of deposits and monetary interest paid (and for mutual depositories, profits from Internal Revenue Service tabulations of business tax returns when available) from annual reports of regulatory agencies and the Federal Reserve Board. The counterentry to the interest, financial services furnished without payment, is allocated to persons, government, and rest of the world on the basis of deposit liabilities from the same sources.	Judgmental trend.
<b>Business transfer payments</b> (\$28.1)		For charitable contributions and bad debts incurred by consumers, for years except the 2 most recent, Internal Revenue Service tabulations of business tax returns or, for 2 most recent years, judgmental trend; for other components (such as liability payments for personal injury), for years except the most recent, information from government agency reports and trade sources or, for most recent year, judgmental trend.	Judgmental trend.
<b>Indirect business tax and nontax liability</b> (\$366.3)	Federal (\$54.0)	For excise taxes, collections from the Internal Revenue Service; for customs duties, receipts from <i>Monthly Treasury Statement</i> ; and for nontaxes (such as fines), receipts from the Office of Management and Budget, <i>Budget of the United States</i> .	For customs duties, the <i>Monthly Treasury Statement</i> ; for most excise taxes, indicators of activity (such as gasoline production for gasoline tax); for others in this group, judgmental trend.
	State and local (\$312.3)	Receipts from Census Bureau quinquennial censuses and annual and quarterly surveys.	Judgmental trend.
<b>Subsidies less current surplus of government enterprises</b> (\$18.3)	Federal (\$32.4)	For subsidies, payments by the Commodity Credit Corporation from agency reports and outlays from <i>Monthly Treasury Statement</i> for most others; for current surplus, mainly reports of various agencies such as the Commodity Credit Corporation and Postal Service.	For subsidies, reports of various agencies and outlays from <i>Monthly Treasury Statement</i> ; for current surplus, agency report for the Commodity Credit Corporation and judgmental trend for others in this group.
	State and local (-\$14.0)	For subsidies, limited to railroad, judgmental trend; for current surplus, see entry for State and local purchases other than compensation and structures.	Judgmental trend.
<b>Capital consumption allowances with CCAdj</b> (\$480.0)	Capital consumption allowances (\$507.6)	For depreciation of nonfarm sole proprietorships, partnerships, and corporations, Internal Revenue Service tabulations of business tax returns; for other depreciation (including farms, nonprofit institutions, and owner-occupied houses), perpetual-inventory calculations; for accidental damage to fixed capital, losses reported to insurance companies and government agencies.	Judgmental trend.
	CCAdj (\$27.6)	Obtained in two parts: First, the part that places a historical-cost series for capital consumed on a consistent basis with regard to service lives and on a straight-line depreciation pattern is the difference between tax-return-based calculations at historical cost and the perpetual-inventory calculations; second, the part that places the historical-cost series on a current-cost basis is the difference between two perpetual-inventory calculations, one at historical cost and one at current cost.	For capital consumption allowances, judgmental trend as mentioned in preceding item; for current-cost series, perpetual-inventory calculation based on investment and on investment prices.

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
<b>Product side (GNP of \$4,526.7 billion in 1987)</b>			
<b>Personal consumption expenditures</b> (\$3,012.1) <sup>3</sup>	<b>Durable and nondurable goods:</b> (\$1,419.8)	Benchmark years—Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau merchandise trade. Other years—Retail-control method, using retail trade sales from Census Bureau annual survey or, for the most recent year, monthly survey of retail trade.	Same as annual for the most recent year.
	Most goods (goods except subcomponents listed separately) (\$1,170.3)		
	New trucks (\$27.7)	Benchmark years—Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau merchandise trade. Other years except most recent—Abbreviated commodity-flow method, starting with manufacturers' shipments from Census Bureau annual survey and including an adjustment for exports and imports from Census Bureau merchandise trade.	Same as annual for the most recent year.
	New and used autos (\$130.0)	Most recent year—Physical quantity purchased times average retail price: Unit sales and information with which to allocate sales among consumers and other purchasers from trade sources and average price based on a Bureau of Labor Statistics consumer price index. For new autos, physical quantity purchased times average retail price: Unit sales, information with which to allocate sales among consumers and other purchasers, and average list prices, all from trade sources. For used autos, change in the consumer stock of autos at least 1 year old plus dealers' margins based on unit sales times auction price, all from trade sources.	For new autos, same as annual; for used autos, same as annual except that change in consumer stock is based on judgmental trend.
	Gasoline and oil (\$77.0)	Years except most recent—Physical quantity purchased times average retail price: Gallons consumed from the Dept. of Transportation, information with which to allocate that total among consumers and other purchasers from Federal agencies and trade sources, and monthly average retail price by grade from the Bureau of Labor Statistics. Most recent year—Physical quantity purchased times average retail price: Domestic supply from Energy Information Admin. monthly surveys and price as above.	Same as annual for most recent year.
	Food furnished employees (including military) (\$9.1)	For commercial employees, number of employees of appropriate industries from Bureau of Labor Statistics tabulations times a Bureau of Labor Statistics consumer price index for food; for military personnel, outlays from the <i>Budget of the United States</i> prepared by the Office of Management and Budget.	For commercial employees, same as annual; for military personnel, number of persons in Armed Forces from the Dept. of Defense times a Bureau of Labor Statistics consumer price index for food.
	Expenditures abroad by U.S. residents (\$4.2) less personal remittances in kind to foreigners (\$0.5)	Estimated as part of the balance of payments; see the entry for receipts and payments for other services, net, under net exports of goods and services.	Judgmental trend.

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (GNP of \$4,526.7 billion in 1987)—Continued			
Personal consumption expenditures—Continued	Services: (\$1,592.3)	Benchmark years—Based on data on housing stock and average annual rental from Census Bureau decennial census of housing and survey of residential finance. Other years—Based on data on housing stock from the Census Bureau biennial housing survey or on the number of households from Census Bureau monthly current population survey and updated average annual rental.	Same method as annual, with housing stock based on annual estimates adjusted for completions from Census Bureau survey and average rent based on annual estimates adjusted using a Bureau of Labor Statistics consumer price index for rent.
	Nonfarm housing—space rent for owner-occupied and rent for tenant-occupied (\$440.6)	Dept. of Agriculture survey.	Judgmental trend.
	Farm housing—rent (\$9.2)	Benchmark years—Receipts from Census Bureau quinquennial census of service industries adjusted for receipts from business and governments. Other years—Receipts, for spectator sports from private organizations, for legitimate theaters and commercial education from tabulations of wages and salaries of employees covered by State unemployment insurance from the Bureau of Labor Statistics, for others in this group from Census Bureau service annual survey.	For nursing homes, commercial education, employment agency fees, and clubs and fraternal organizations, wages and salaries derived from Bureau of Labor Statistics monthly employment times earnings times hours; for legitimate theaters and motion pictures, receipts from trade sources; for others in this group, judgmental trend. <sup>1</sup>
	Auto and other repair, legal and funeral services, barbershops and beauty parlors, nursing homes, laundries, employment agency fees, accountant and tax return preparation services, recreation (except video cassette rentals, cable TV, parimutuel net receipts, and lotteries), hotels and motels, and commercial education (\$261.7)	Benchmark years—For nonprofit professional services, expenses; for others in this group, receipts, adjusted for government payments and prepayment plans, from Census Bureau quinquennial census of service industries. Other years—Receipts, adjusted for government payments and prepayment plans, from Census Bureau service annual survey.	For nonprofit professional services, wages and salaries derived from Bureau of Labor Statistics monthly employment times earnings times hours; for others in this group, judgmental trend.
	Physicians, dentists, and other medical professional services (\$166.0)	Benchmark years—For schools of religious organizations, enrollment from Dept. of Education times BEA estimate of average expenditures per pupil; for others in this group, receipts and expenses from Census Bureau quinquennial census of service industries. Other years—Tabulations of wages and salaries of employees covered by State unemployment insurance from the Bureau of Labor Statistics.	Wages and salaries derived from Bureau of Labor Statistics monthly employment times earnings times hours.
	Private elementary and secondary schools, welfare activities, and labor union and professional association fees (\$67.9)	See entry for net interest: imputed—banks, credit agencies, and investment companies.	Judgmental trend.
	Financial services furnished without payment by banks, credit agencies, and investment companies <sup>4</sup> (\$82.3)	Years except most recent—For private higher education, expenses, and for others in this group, receipts, all from annual reports of government administrative agencies. Most recent year—For brokerage, charges from trade source; for intercity transportation, receipts from reports of government administrative agencies; for private higher education, enrollment from Dept. of Education.	For stock brokerage charges, stock exchange transactions from trade sources; for other brokerage charges and investment counseling and for bank service charges, judgmental trend; for intercity transportation, receipts from trade sources; for private higher education, wages and salaries for the industry derived from Bureau of Labor Statistics monthly employment times earnings times hours.
	Brokerage charges and investment counseling, bank service charges, intercity transportation, and private higher education (\$77.0)	Number of workers times weekly hours times earnings from Census Bureau monthly current population survey.	Judgmental trend.
Domestic services (\$9.6)			

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator	
<b>Product side (GNP of \$4,526.7 billion in 1987)—Continued</b>				
<b>Personal consumption expenditures—Continued</b>	<b>Services—Continued</b>			
	Insurance, hospitals except nursing homes, religious activities, cable TV, utilities, and local transport (\$400.5)	For life insurance, expenses from reports of private organizations or, for the most recent year, tabulations of wages and salaries of employees covered by State unemployment insurance from Bureau of Labor Statistics; for insurance other than life insurance, premiums and benefits from reports of private organizations; for hospitals except nursing homes, expenses from reports of private organizations; for religious activities, expenses based on contributions and membership from private organizations or, for the most recent year, judgmental trend; for cable TV and utilities, receipts from government agencies and trade sources; for local transport, receipts from reports of private organizations.	For life insurance and religious activities, wages and salaries derived from Bureau of Labor Statistics monthly employment times earnings times hours; for hospitals, electricity, and gas, reports from private organizations; for others in this group, judgmental trend. <sup>1</sup>	
	Water and other sanitary services, and lotteries (\$27.3)	Years except 2 most recent—For water and other sanitary services, expenditures from Census Bureau quinquennial censuses and annual surveys of State and local governments, adjusted to a calendar year basis from a fiscal year basis; for lotteries, net receipts from the same source.	Same as 2 most recent years.	
	Foreign travel by U.S. residents (\$27.4) less expenditures in the United States by foreigners (\$17.5)	Two most recent years—Judgmental trend. Estimated as part of the balance of payments; see the entry for receipts and payments for other services, net, under net exports of goods and services.	Same as annual.	
	Other services: Video cassette rentals and parimutuel net receipts; other housing except hotels and motels; other education and research except commercial education; bridge, etc. tolls; other household operation except repairs and insurance; travel and entertainment card fees; stenographic and reproduction services; and money orders and classified advertising (\$40.3)	Various source data.	Judgmental trend.	
	<b>Nonresidential structures (\$139.5)<sup>5</sup></b>	Nonfarm buildings (\$92.6)	Value put in place from Census Bureau monthly construction survey.	Same as annual.
		Public utilities: Telephone and telegraph (\$8.4)	Value put in place from Census Bureau monthly construction survey.	Same as annual.
Public utilities: Other (\$20.0)		Expenditures from Federal regulatory agencies and trade sources.	Anticipated expenditures from BEA plant and equipment survey.	
Mining exploration, shafts, and wells (\$13.9)		Benchmark years—Expenditures from Census Bureau quinquennial census of mineral industries. Other years—For petroleum and natural gas, physical quantity times average price: Footage drilled and cost per foot from trade sources; for other mining, expenditures from BEA plant and equipment survey.	Same as annual for years other than benchmark years.	
Other nonfarm structures (\$2.6)		Value put in place from Census Bureau monthly construction survey.	Same as annual.	
	Farm buildings (\$1.9)	Expenditures for new construction from Dept. of Agriculture surveys.	Judgmental trend of value put in place from Census Bureau.	

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
<b>Product side (GNP of \$4,526.7 billion in 1987)—Continued</b>			
<b>Nonresidential producers' durable equipment</b> (\$307.3)	Equipment except autos (\$288.1)	Benchmark years—Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau merchandise trade. Other years—Abbreviated commodity-flow method starting with manufacturers' shipments from the Census Bureau annual survey or, for the most recent year (except trucks), monthly survey of manufactures and including an adjustment for exports and imports from Census Bureau merchandise trade. For trucks, for the most recent year, physical quantity purchased times average retail price: Unit sales and information with which to allocate sales among business and other purchasers from trade sources and average price based on Bureau of Labor Statistics producer price indexes.	For trucks, see entry for personal consumption expenditures; for others in this group, same as annual for years other than benchmark years except with less detail.
	New and used autos (\$19.2)	For new autos, see entry in personal consumption expenditures; for used autos, change in business stock of autos at least 1 year old from trade source.	For new autos, same as annual; for used autos, judgmental trend.
<b>Residential investment</b> (\$226.9) <sup>a</sup>	Permanent-site single-family housing units (\$114.5)	Value put in place based on phased housing starts and average construction cost from Census Bureau monthly construction surveys.	Same as annual.
	Permanent-site multifamily housing units (\$25.5)	Value put in place from Census Bureau monthly construction survey.	Same as annual.
	Mobile homes (\$5.3)	Benchmark years—See entry for equipment except autos in nonresidential producers' durable equipment. Other years—Physical quantity shipped times price: Shipments from trade sources and average retail price from Census Bureau monthly survey.	Same as annual for years other than benchmark years.
	Additions and alterations, and major replacements (\$56.3)	Expenditures by owner-occupants from Bureau of Labor Statistics quarterly consumer expenditure survey and by landlords from Census Bureau quarterly survey of landlords.	Judgmental trend.
	Brokers' commissions (\$20.6)	Physical quantity times price times average commission rate: Number of one-family houses sold, mean sales price, and commission rates, from Census Bureau monthly construction survey and trade sources.	Same as annual.
	Producers' durable equipment (\$5.8)	See entry for most goods under personal consumption expenditures.	Same as annual.
<b>Change in business inventories</b> (\$39.2)	Manufacturing and trade (\$34.8)	Benchmark years—Inventories from Census Bureau quinquennial censuses revalued (in effect, by the calculation of the IVA <sup>2</sup> ) to current replacement cost using information on the commodity composition of goods held in inventory and the turnover period, both from the Census Bureau censuses/surveys of manufacturing and trade, combined with cost of goods held in inventory, largely from Bureau of Labor Statistics producer price indexes. Other years—For petroleum bulk stations, physical quantities times price: Monthly quantities from the Energy Information Admin. times a Bureau of Labor Statistics producer price index; for all other, inventories from Census Bureau annual surveys or, for the most recent year, monthly surveys, revalued as described above.	Same as annual for most recent year.
	Other nonfarm industries (\$5.9)	Inventories revalued to current replacement cost (except when noted as physical quantity times price) using information on the proportion of inventories reported with different accounting methods (for example, first-in, first-out) and other information as described for manufacturing and trade: For years except 2 most recent, Internal Revenue Service tabulations of business tax returns; in 2 most recent years, Census Bureau quarterly survey of corporations for mining, monthly quantities from the Energy Information Admin. times Bureau of Labor Statistics producer price indexes for electric utilities, and judgmental trend for all others.	For electric utilities, same as annual for most recent year; for all others, judgmental trend.
	Farm (-\$1.5)	Physical quantities times current prices, from Dept. of Agriculture surveys.	Judgmental projection by BEA and Dept. of Agriculture.

See footnotes at end of table.

Table 6.—Principal Source Data and Estimating Methods Used in Preparing Current-Dollar Estimates of GNP—Continued

Component (billions of dollars)	Subcomponent (billions of dollars)	Annual estimates: Source data and methods used to determine level for benchmark and other final years or, for other years, used to prepare an extrapolator or interpolator	Advance quarterly estimates: Source data and methods used to prepare an extrapolator
Product side (GNP of \$4,526.7 billion in 1987)—Continued			
Net exports of goods and services (-\$123.0)	Merchandise exports and imports, net (-\$158.2)	Estimated as part of the balance of payments: Import and export documents compiled monthly by the Census Bureau with adjustments by BEA for coverage and valuation to put them on a balance-of-payments basis and then on a NIPA basis.	Same as annual.
	Receipts and payments of factor income, net (\$29.5)	Estimated as part of the balance of payments: For direct investment income, BEA surveys of U.S. companies with affiliates abroad and of U.S. affiliates of foreign companies; for other income, holdings or transactions from Treasury Dept. surveys times appropriate yields or interest rates and reports by U.S. Government agencies of interest receipts—all adjusted to NIPA basis.	Judgmental trend. <sup>1</sup>
	Receipts and payments for other services, net (\$5.7)	Estimated as part of the balance of payments: For government transactions, reports by Federal agencies on their purchases and sales abroad; for most others in this group (including travel, passenger fares, other transportation, royalties and license fees, and private remittances), BEA quarterly or annual surveys (supplemented with data from other sources)—all adjusted to NIPA basis. Also includes financial services furnished without payment; see entry for net interest: imputed—banks, credit agencies, and investment companies.	Same as annual.
Government purchases of goods and services (\$924.7)	Federal national defense (\$295.3)	Within a control total established by the fiscal year analysis: For compensation, military wages from the <i>Budget of the United States</i> prepared by Office of Management and Budget and employer contributions for social insurance mainly from outlays from <i>Monthly Treasury Statement</i> ; for purchases by type, one of three methods, based mainly on data from Dept. of Defense reports: (1) Physical quantity delivered times price paid; (2) by category, the ratio of funds for purchases not estimated by method (1) to total funds times disbursements; and (3) mainly disbursements.	For components of compensation, employment from Dept. of Defense, outlays from <i>Monthly Treasury Statement</i> , and judgmental trend; for other, same methods as annual, with partial data for (1) and outlays from <i>Monthly Treasury Statement</i> and judgmental trend for (2) and (3).
	Federal nondefense (\$86.7)	Within a control total established by the fiscal year analysis: For Commodity Credit Corporation inventory change, physical quantity of acquisitions and dispositions from agency reports times average market price from Dept. of Agriculture; for financial services furnished without payment, see entry for net interest: imputed—banks, credit agencies, and investment companies; for compensation, civilian wages and benefits from Office of Personnel Management and employer contributions for social insurance mainly from outlays from <i>Monthly Treasury Statement</i> ; for all other, outlays from <i>Monthly Treasury Statement</i> .	For components of compensation, judgmental trend; for other, same as annual.
	State and local compensation (\$321.7)	Mainly tabulations of wages and salaries of employees covered by State unemployment insurance from Bureau of Labor Statistics and contributions from the Social Security Admin., other agencies administering social insurance programs, and Census Bureau surveys of State and local government retirement funds.	Judgmental trend.
	State and local structures (\$62.2)	For highways, for years except the most recent, expenditures from the Dept. of Transportation or, for the most recent year, construction put in place from Census Bureau surveys; for other categories, value of construction put in place from Census Bureau monthly construction surveys.	Value put in place from Census Bureau monthly construction surveys.
	State and local other than compensation and structures (\$158.9)	Years except most recent for State and the 2 most recent for local—Total expenditures from Census Bureau quinquennial censuses and annual surveys of these governments, selectively replaced with source data that are more appropriate for the NIPA's and adjusted as follows: For coverage, for netting and grossing differences; and to a calendar year basis from a fiscal year basis and for other timing differences; to exclude interest, subsidies, net expenditures of government enterprises, and transfer payments; and to exclude compensation and structures as estimated above. Most recent year for State and 2 most recent years for local—judgmental trend.	Same as for most recent year for State and 2 most recent years for local.

1. For profits and interest from the rest of the world, for parts of domestic net interest, and for insurance other than life insurance and for hotels and motels in PCE, data become available to replace the judgmental trend by the time of the final estimate in the current quarterly sequence.

2. The IVA on the income side and the IVA mentioned with the change in business inventories on the product side differ because the source data on the two sides reflect different mixes of methods (last-in, first-out, etc.) underlying reported inventories.

3. Includes \$1.9 billion for food produced and consumed on farms, standard clothing issued to military personnel, and used trucks.

4. Also referred to as services furnished without payment by financial intermediaries except life insurance carriers and private noninsured pension plans.

5. Includes brokers' commissions on sale of structures and net purchases of used structures, which summed to \$0.1 billion.

6. Includes -\$1.5 billion for other structures (dormitories, fraternity and sorority houses, nurses' homes, etc.) and net purchases of used structures.

Table 7.—Methodology Used in Preparing Constant-Dollar Estimates of GNP

Component	Subcomponent	Deflation, using price based on—		Using quantity for—	
		Components of the Consumer Price Index (CPI) or the Producer Price Index (PPI)	Other	Extrapolation	Direct valuation
Personal consumption expenditures	Most goods (goods except subcomponents listed separately).	Except as noted, CPI; military clothing, PPI.	Computers, BEA price index		Used autos, in two parts: (1) Margin, unit sales from trade sources with dealer margins from Census Bureau and trade sources; (2) change in stock, based on unit sales and BEA constant-dollar value, with depreciated original value in base-year dollars.
	New trucks.....	CPI			
	New and used autos.....	New autos, CPI			
	Gasoline and oil.....	CPI			
	Food furnished employees (including military).	CPI			
	Expenditures abroad by U.S. residents less personal remittances in kind to foreigners.		Foreign consumer price indexes (exchange-rate adjusted).		
	Nonfarm housing—space rent and rent.	CPI			
	Farm housing—rent.....			BEA net stock of farm dwellings based on Dept. of Agriculture data.	
	Auto and other repair, legal and funeral services, barbershops and beauty parlors, nursing homes, laundries, other recreation (except video cassette rentals, cable TV, and lotteries), hotels and motels, and commercial education.	CPI			
	Physicians, dentists, and other medical professional services.	CPI			
	Private elementary and secondary schools, welfare activities, and other personal business.	Personal business, CPI.	Schools and welfare activities, BEA earnings and expense index.		
	Financial services furnished without payment by banks, credit agencies, and investment companies <sup>1</sup> .			Paid employee hours of relevant financial institutions.	
Brokerage charges and investment counseling, bank service charges, intercity transportation, and private higher education.	Except as noted, CPI.	Other brokerage charges and investment counseling, BEA stock brokerage index; airline transportation, BEA index based on revenue passenger miles from Dept. of Transportation averaged with consumer price index component; higher education, BEA earnings and expense index.	Stock brokerage charges, BEA orders derived from volume data from Securities and Exchange Commission or trade source.		
Domestic services.....	CPI				

See footnotes at end of table.

Table 7.—Methodology Used in Preparing Constant-Dollar Estimates of GNP—Continued

Component	Subcomponent	Deflation, using price based on—		Using quantity for—	
		Components of the Consumer Price Index (CPI) or the Producer Price Index (PPI)	Other	Extrapolation	Direct valuation
Nonresidential structures	Insurance, hospitals except nursing homes, religious activities, cable TV, utilities, and local transport.	Except as noted, CPI.	Life insurance and religious activities, BEA earnings and expense index; nonprofit hospitals, input price index from Health Care Financing Admin.	Auto insurance, deflated premiums; health insurance, deflated benefits.	
	Water and other sanitary services, and lotteries.	CPI			
	Foreign travel by U.S. residents less expenditures in the United States by foreigners.	Expenditures in the United States, CPI.	Foreign travel, foreign consumer price indexes (exchange-rate adjusted).		
	Other services: Video cassette rentals and parimutuel net receipts; other housing except hotels and motels; other education and research except commercial education; bridge, etc. tolls; other household operation except repairs and insurance; and clubs and fraternal organizations.	Except as noted, CPI.	Other education and research, and clubs and fraternal organizations, BEA earnings and expense index; bridge, etc. tolls, BEA index based on trade source data.	Parimutuel net receipts, deflated winnings.	
	Nonfarm buildings.....		Cost index from trade source and price of new houses from Census Bureau.		
	Public utilities.....	Gas and petroleum pipelines, PPI.	Telephone and telegraph, cost index from trade source; other, cost indexes from government agencies and trade sources.		
	Mining exploration, shafts, and wells.	Casing, PPI.....	Exploration, cost index from trade source; mines, implicit price deflator for nonfarm nonresidential buildings.	Footage by type from trade source.	
	Other nonfarm structures.		Cost indexes from government agencies.		
	Farm buildings.....		Cost index from trade source and price of new houses from Census Bureau.		
	Nonresidential producers' durable equipment	Equipment except autos and telephone and telegraph installation.	Domestic components, except as noted, PPI.	Imported components, except computers and transportation equipment, Bureau of Labor Statistics import price indexes; ships, annually, index from Maritime Admin.; computers, BEA price index.	

See footnotes at end of table.

Table 7.—Methodology Used in Preparing Constant-Dollar Estimates of GNP—Continued

Component	Subcomponent	Deflation, using price based on—		Using quantity for—	
		Components of the Consumer Price Index (CPI) or the Producer Price Index (PPI)	Other	Extrapolation	Direct valuation
Residential investment	New and used autos.....	New autos, CPI.....			Used autos, in two parts: (1) Margin, unit sales from trade sources with dealer margins from Census Bureau and trade sources; (2) change in stock, based on unit sales and BEA constant-dollar value, with depreciated original value in base-year dollars.
	Telephone and telegraph installation.....		Cost index from trade source		
	Permanent-site housing units.....		Price of new houses from Census Bureau.		
	Additions and alterations, and major replacements.....	CPI			
	Brokers' commissions.....		Price of new houses from Census Bureau.		
Change in business inventories	Producers' durable equipment.....	PPI			
	Mobile homes.....	PPI			
	Nonfarm: Purchased goods, all industries.....	Except as noted, PPI.	Crude petroleum, index from Energy Information Admin..		
Net exports of goods and services <sup>2</sup>	Nonfarm: Work in-process and finished goods, manufacturing.....	Except as noted, PPI; some overhead cost items, CPI.	BEA unit labor cost		
	Farm.....				
	Merchandise exports and imports, net <sup>3</sup> .....		Bureau of Labor Statistics export and import price indexes <sup>4</sup> ; Census Bureau monthly unit-value indexes; implicit price deflators (including, for computers, BEA price index); and gold price from trade source.		
	Receipts and payments of factor income, net <sup>3</sup> .....		Except as noted, implicit price deflator for net domestic product.	Imputed interest paid to foreigners, paid employee hours of relevant institutions.	
	Receipts and payments for other services, net <sup>3</sup> .....	Travel receipts, CPI; railroad freight, PPI.	Military transfers and direct defense expenditures abroad, selected implicit price deflators for national defense purchases (see below); travel payments and U.S. Government payments for miscellaneous services, foreign consumer price indexes (exchange-rate adjusted); royalties and fees, and other private services, implicit price deflator for gross domestic product.	Financial services furnished without payment <sup>1</sup> , paid employee hours of relevant financial institutions; several parts of freight and port expenditures, relevant tonnage.	

See footnotes at end of table.

Table 7.—Methodology Used in Preparing Constant-Dollar Estimates of GNP—Continued

Component	Subcomponent	Deflation, using price based on—		Using quantity for—	
		Components of the Consumer Price Index (CPI) or the Producer Price Index (PPI)	Other	Extrapolation	Direct valuation
Government purchases of goods and services	Federal national defense..	Selected goods, PPI; utilities and communications, CPI and PPI.	Some goods, some services, and most military structures, BEA indexes based on Dept. of Defense prices paid; some services, BEA earnings index; computers, BEA price index; nonmilitary structures, cost indexes from trade sources and government agencies.	Compensation, full-time equivalent employment by rank and length of service.	Many goods, some services, and a few military structures, quantities with prices, both from Dept. of Defense reports.
	Federal nondefense.....	Most goods, PPI; rent, utilities, and communications, CPI.	Structures, cost indexes from trade sources and government agencies; computers, BEA price index; most services, BEA earnings indexes.	Compensation, full-time equivalent employment by grade adjusted for change from base year in hours worked; financial services furnished without payment <sup>1</sup> , paid employee hours of relevant financial institutions.	Commodity Credit Corporation inventory change, quantities by crop from agency reports with Dept. of Agriculture prices; selected petroleum transactions, quantities with prices, both from Dept. of Energy.
	State and local compensation.			For employees in education, full-time equivalent employment by education and experience times change from base year in hours worked; for other employees, full-time equivalent employment times change from base year in hours worked.	
	State and local structures.		Cost indexes from trade sources and government agencies.		
	State and local other than compensation and structures.	Services except as noted and goods used in maintenance and repair, CPI; goods except as noted and electricity, PPI.	Transportation, books, and postal services, BEA indexes based on Dept. of Defense prices paid; computers, BEA price index.	Financial services furnished without payment <sup>1</sup> , paid hours of relevant financial institutions.	

1. Also referred to as services furnished without payment by financial intermediaries except life insurance carriers and private noninsured pension plans.

2. Entries are representative; for full detail, see table 9, SURVEY OF CURRENT BUSINESS, November 1986, pp. 35-36.

3. Constant-dollar estimates of exports and imports (or receipts and payments) are prepared separately.

4. For the preliminary and final quarterly estimates, the export and import price indexes, which are for the third month of the quarter, are interpolated to obtain quarterly averages. For the advance estimate, 1 month of the Census Bureau unit-value indexes is used.

# National Income and Product Accounts Tables

Revised estimates for 1985 through the first quarter of 1988 and advance estimates for the second quarter of 1988 are shown in the tables that follow. Estimates shown for 1984 are not revised. Estimates for 1983 and 1984 appeared in the July 1986 and 1987 issues, respectively, of the SURVEY OF CURRENT BUSINESS. Estimates for 1929-82 appeared in *The National Income and Product Accounts of the United States, 1929-82: Statistical Tables* (available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402: Stock No. 003-010-00174-7, price \$23.00).

The tables contain annual, quarterly, and monthly estimates, indicated as follows:

A	Only annual estimates
Q	Only quarterly estimates
QA	Quarterly and annual estimates
MA	Monthly and annual estimates

A detailed index begins on page 108. A guide to when the estimates are released, where they are available, and how they are presented begins on page 125.

1. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms.

2. Includes luggage.

3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services related to clothing.

4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances, furniture, fuel, and electricity.

5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.

6. Consists of transient hotels, motels, clubs, schools, and other group housing.

7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, air conditioners, sewing machines, vacuum cleaners, and other appliances.

8. Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.

9. Consists largely of textile house furnishings including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.

10. Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and express charges, premiums for fire and theft insurance on personal property less claims paid, and miscellaneous household operation services.

11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.

12. Consists of osteopathic physicians, chiropractors, private duty nurses, chiroprudists, podiatrists, and others providing health and allied services, not elsewhere classified.

13. Consists of (1) current expenditures (including capital consumption allowances with capital consumption adjustment) of nonprofit hospitals, sanitariums, and nursing homes, and (2) payments by patients to proprietary hospitals, sanitariums, and nursing homes.

14. Consists of (1) premiums, less benefits and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including capital consumption allowances with capital consumption adjustment) of Blue Cross and Blue Shield plans and of other independent prepaid and self-insured health plans.

15. Consists of premiums, less benefits and dividends, for income loss insurance.

16. Consists of premiums, less benefits and dividends, for privately administered workers' compensation.

17. Consists of (1) operating expenses of life insurance carriers and private noninsured pension plans, and (2) premiums, less benefits and dividends, of fraternal benefit societies. Excludes expenses allocated by commercial carriers to accident and health insurance.

18. Consists of current expenditures (including capital consumption allowances with capital consumption adjustment) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, and other personal business services.

19. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares.

20. Consists of admissions to professional and amateur athletic events and to racetracks including horse, dog, and auto.

21. Consists of dues and fees excluding insurance premiums.

22. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; sightseeing buses and guides; private flying operations; and other commercial participant amusements.

23. Consists of net receipts of lotteries and expenditures for purchases of pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, and recreational services, not elsewhere classified.

24. Equals current expenditures (including capital consumption allowances with capital consumption adjustment) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants.

25. Consists of (1) fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2) current expenditures (including capital consumption allowances with capital consumption adjustment) by research organizations and foundations for education and research.

26. Equals current expenditures (including capital consumption allowances with capital consumption adjustment) of religious, social welfare, foreign relief, and political organizations, museums, libraries, and foundations. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and excludes relief payments within the United States and expenditures by foundations for education and research.

NOTE—Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

1. Equals personal income less the following farm components: wages and salaries, other labor income, proprietors' income with inventory valuation and capital consumption adjustments, and net interest. These farm components plus employer contributions for social insurance and farm corporate profits with inventory valuation and capital consumption adjustments equal farm national income shown annually in table 1.21.

Table 2.7.—Personal Income and Its Disposition

Year and month	Billions of dollars								Disposable personal income			Population (mid-period, millions)	Personal saving as a percentage of disposable personal income <sup>1</sup>
	Personal income	Less: Personal tax and nontax payments	Equals: Disposable personal income	Less: Personal outlays				Equals: Personal saving	Per capita				
				Total	Personal consumption expenditures	Interest paid by consumers to business	Personal transfer payments to foreigners (net)		Total, billions of 1982 dollars	Current dollars	1982 dollars

Other and unallocable.....	22	25.8	27.2	29.2	

1. Equals Federal Government expenditures less grants-in-aid to State and local governments plus State and local government expenditures. Total expenditures include employee compensation on a disbursement basis. The estimates by function include employee compensation on an accrual basis. Wage accruals less disbursements (in millions of dollars) is as follows: 1984, 220; 1985, -230; 1986, 0; and 1987, 0.

2. Excludes interest received by State and local social insurance funds, which is netted against expenditures for the appropriate functions.

1. Total expenditures include employee compensation on a disbursement basis. Expenditures by type and function include employee compensation on an accrual basis. Wage accruals less disbursements in 1984, 1985, and 1986 is zero.

2. Excludes interest received by social insurance funds, which is netted against expenditures for the appropriate functions.

1. Consists largely of contributions for social insurance by residents of U.S. territories and Puerto Rico.

2. Consists largely of proprietary receipts that are netted against outlays in the unified budget, and classified as receipts in the national income and product accounts.

3. Consists largely of Treasury receipts from sales of foreign currencies to Government agencies.

4. Consists largely of transfer payments, subsidies, and grants-in-aid to residents of U.S. territories and Puerto Rico.

5. Consists of agencies not included in the unified budget, such as the Postal Service and the Federal Financing Bank, and net purchases of silver and minor coin metal.

6. Consists largely of net expenditures of foreign currencies.

1. The Bureau of the Census measures of State and local government receipts and expenditures (lines 1 and 17) represent a combination of fiscal years. Virtually all States and many localities use July 1-June 30 fiscal years; the rest use varying fiscal years. The national income and product account measures shown in this table are for the fiscal year ending June 30. The differences that arise from restating the Census data to a year ending June 30 are included in lines 12, 13, and 14 (receipts) and line 26 (expenditures).

2. Beginning in 1985, includes capital gains, net of losses, of State and local government retirement systems of \$7 billion in 1985 and \$7.2 billion in 1986.

1. Because no data are available to distribute exports and imports of "other" merchandise between durable and nondurable goods, they are distributed equally.  
 2. Includes parts of line 2 and line 5.

NOTE.—Beginning with 1985, the definitions of the end-use categories have been changed. For a description of the new definitions, see the technical notes in U.S. International Transactions, First Quarter 1988, SURVEY OF CURRENT BUSINESS 68 (June 1988): 34-39 and 57.

Equals: Net foreign investment, NIPA's (26+29-34-36).....	44	-90.9	-114.4	-142.4	-160.6

1. The treatment of net exports of gold in the NIPA's differs from that in the BPA's. BPA gold exports (line 2) and imports (line 11) are removed from the NIPA's. Imports of gold in the NIPA's (line 15) is the excess of the value of gold in domestic final sales plus the change in business inventories over the value of U.S. production of gold.

2. BPA capital gains and losses included in U.S. direct investment income abroad (line 3) and in foreign direct investment income in the U.S. (line 12) are removed from the NIPA's.

3. Consists of statistical revisions in the BPA's that have not yet been incorporated in the NIPA's.

4. Consists of transactions between the United States and its territories and Puerto Rico. The treatment of U.S. territories and Puerto Rico in the NIPA's differs from that in the BPA's. In the NIPA's they are included in the rest of the world; in the BPA's, they are treated as part of the United States. The adjustments to exports and imports of goods and services are shown in lines 6 and 16 respectively; however, because data are not available to adjust service exports and imports separately, line 6 includes the net of exports and imports of services by U.S. territories and Puerto Rico. The adjustment to unilateral transfers, net (line 33) consists only of transfer payments from persons because transfer payments, subsidies, and grants-in-aid from the Federal Government to residents of U.S. territories and Puerto Rico are excluded from NIPA transfer payments to foreigners.

5. Represents interest paid by government to foreigners. This item is treated as an import of services in the BPA's. In the NIPA's, it is excluded from government purchases and, thus, also from imports.

NOTE.—U.S. Government contributions to international organizations (lines 14, 23, and 32) are classified as imports in the BPA's and as transfer payments to foreigners in the NIPA's. Beginning with the June 1986 BPA revision, the BPA's will reflect the classification of these contributions as transfers.

<sup>\*</sup> Revised.

1. In this table, purchases of structures includes compensation of government employees engaged in new force-account construction. In tables 1.3, 3.1, and 3.7, this compensation is classified as a service and is included as part of government compensation of employees.

2. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

3. Consists of streets, dams and reservoirs, sewer and water facilities, parks, airfields, etc.

4. Consists of dormitories, fraternity and sorority houses, nurses' homes, etc.

5. Consists of general office buildings, police and fire stations, courthouses, auditoriums, garages, passenger terminals, etc.

6. Consists of electric and gas facilities, transit systems, airfields, etc.

NOTE.—Quarterly estimates for selected items are shown in table 5.12.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

1. Inventories are as of the end of the quarter. Quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the constant-dollar change in business inventories component of GNP is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

NOTE.—The fixed-weighted price index and the chain price index, both of which are weighted averages of the detailed prices used in the deflation of GNP, are measures of price change. In calculating changes in these indexes, the composition of GNP is held constant. Consequently these changes reflect only changes in prices. The fixed-weighted price index measures price change over any period, using as weights the composition of GNP in 1982. The chain price index measures price change between two consecutive periods, using as weights the composition of GNP in the first period. The implicit price deflator is a byproduct of the deflation of GNP. It is derived as the ratio of current- to constant-dollar GNP (multiplied by 100). It is the average of the detailed prices used in the deflation of GNP, but the prices are weighted by the composition of GNP in each period. Consequently, the implicit price deflator reflects not only changes in prices but also changes in the composition of GNP, and its use as a measure of price change should be avoided.

<b>Addendum:</b>					
Capital consumption adjustment for national income (4+13+19+20).....	22	2.2	37.3	38.9	34.3

1. Except for farm proprietorships and partnerships (line 14) and other private business (line 18), the capital consumption adjustment is calculated in two parts. The adjustment for consistent accounting at historical cost converts depreciation based on the service lives and depreciation schedules employed by firms when filing their income tax returns to consistent service lives and straight-line depreciation schedules. The adjustment for current replacement cost converts the historical cost series with consistent accounting to a current replacement cost series. For farm proprietorships and partnerships and other private business, the historical cost series is based on consistent service lives and straight-line depreciation schedules so that the adjustment reflects only a conversion to current replacement cost.

2. Fixed capital assets owned and used by these entities are considered to be business activities selling their current services to their owners. The value of these services is included in personal consumption expenditures and is equal to their current-account purchases including capital consumption allowances with capital consumption adjustment.

1. The numbers in parentheses indicate the tables and line numbers from which the entries in this table are derived.

2. Employer contributions to publicly administered programs are classified as employer contributions for social insurance. Employer contributions to privately administered programs are classified as other labor income. Consequently, government contributions to privately administered health and life insurance and worker's compensation plans for government employees are classified as other labor income.

3. Consists largely of directors' fees.

Personal interest income (55+58-59+60) or (28+48).....	61	444.7	478.0	499.1	527.0

1. Consists of interest paid on the deposit liabilities of commercial and mutual saving banks, savings and loan associations, and credit unions.

2. Interest received by nonfinancial sole proprietorships and partnerships is considered interest received by persons and is included in line 28.

NOTE.—In table 8.8, imputed interest paid (line 35) is the difference between the property income received by financial intermediaries from the investment of depositors or beneficiaries' funds and the interest paid by them to business, persons, governments, and foreigners. In table 8.9, imputed interest (line 52)—the interest component of imputations that affect GNP—consists of the imputed interest paid by financial intermediaries other than life insurance carriers and private noninsured pension plans to persons and government, and the interest paid on owner-occupied housing and on buildings and equipment owned and used by nonprofit institutions serving individuals.

1. Contributions for these programs, for which a social insurance fund is imputed, are set equal to benefits paid. These payments are funded directly out of current budget.  
 2. Consists largely of retirement programs for Public Health Service officers and employees of the judiciary.  
 3. Consists of payments for medical services for dependents of active duty military personnel at nonmilitary facilities.

Notes.—(1)Only national income and product items for which there are imputations are shown in this table. (2)In table 8.8, imputed interest paid (line 35) is the difference between the property income received by financial intermediaries from the investment of depositors' or beneficiaries' funds and the interest paid by them to business, persons, governments, and foreigners. In table 8.9, imputed interest (line 52)—the interest component of imputations that affect GNP—consists of the imputed interest paid by financial intermediaries other than life insurance carriers and private noninsured pension plans to persons and government, and the interest paid on owner-occupied housing and on buildings and equipment owned and used by nonprofit institutions serving individuals.

<b>Dividends paid in cash or assets, IRS</b> .....	28	144.9	161.5		
<b>Plus:</b> Posttabulation amendments and revisions.....	29	-8	-2.6		
Dividends paid by Federal Reserve banks and certain federally sponsored credit agencies <sup>2</sup> .....	30	7	9		
U.S. receipts of dividends from abroad, net of payments to abroad.....	31	11.7	12.2		
Earnings remitted to foreign residents from their unincorporated U.S. affiliates.....	32	1.0	1.1		
Adjustment for interest payments of regulated investment companies.....	33	-21.7	-24.4		
<b>Less:</b> Dividends received by U.S. corporations.....	34	48.3	50.4		
Earnings of U.S. residents remitted by their unincorporated foreign affiliates.....	35	4.7	6.0		
Capital gains distributions of regulated investment companies.....	36	4.0	8.9		
<b>Equals: Net dividend payments, NIPA's</b> .....	37	79.0	83.3	88.2	95.5
<b>Undistributed profits, NIPA's (27-37)</b> .....	38	67.0	44.6	41.6	47.4

1. Consists largely of audit profits, oil well bonus payments written off, adjustments for insurance carriers and savings and loan association and tax-exempt interest income.

2. Consists of the following agencies: Federal land banks; Federal home loan banks and Federal Home Loan Mortgage Corporation.

3. Consists of private noninsured pension plans, nonprofit organizations serving business, and credit unions.

**Table 8.14.—Comparison of Personal Income in the National Income and Product Accounts (NIPA's) with Adjusted Gross Income as Published by the Internal Revenue Service (IRS)**

[Billions of dollars]

	Line	1984	1985	1986	1987

Small business corporation income.....	14	6.2	6.2	10.9	
Other types of income.....	15	-8	1.2	5.8	
<b>Equals: BEA-derived adjusted gross income</b> .....	16	2,407.3	2,603.4	2,830.8	
<b>Adjusted gross income, IRS</b> .....	17	2,139.9	2,306.0	2,522.5	
<b>Adjusted gross income (AGI) gap <sup>2</sup></b> .....	18	267.4	297.4	308.3	
AGI gap (line 18) as a percentage of BEA-derived AGI (line 16).....	19	11.1	11.4	10.9	
AGI of IRS (line 17) as a percentage of BEA-derived AGI (line 16).....	20	88.9	88.6	89.1	

1. Equals imputed interest received by persons from life insurance carriers and private noninsured pension plans as shown in table 8.8 (line 50).

2. Consists of income earned by low-income individuals who are not required to file income tax returns, unreported income that is included in the NIPA measure, and gross errors and omissions in lines 2 through 15. Also includes the net effect of errors in the IRS adjusted gross income (line 17) and NIPA personal income (line 1) measures. Such errors can arise from the sample used by IRS to estimate line 17 and from the data sources used by BEA to estimate line 1.

<sup>3</sup> Revised.

## Index to the National Income and Product Accounts Tables

THIS index is designed to make it easier to locate time series in the national income and product accounts (NIPA) tables. The entries in the index refer to NIPA table numbers.

Beginning in July 1988, two new tables, 5.12 and 5.13, and two new lines in tables 5.8–5.11 have been added (see page 15 of this issue). These new items have been incorporated in the index. Aside from these changes, the current system has been used for all NIPA presentations since the comprehensive revision released in December 1985—for the tables containing seasonally adjusted quarterly estimates that appear each month in the SURVEY OF CURRENT BUSINESS, for the full set of tables that usually appears each year in the July SURVEY, and for the full set that appeared in *The National Income and Product Accounts of the United States, 1929–82: Statistical Tables*, which presented the historical estimates. The 54 quarterly tables are identified by bold italic type in the index.

The first character of the NIPA table number (the number preceding the decimal point) identifies the table as belonging to one of the following subject areas:

1. National Product and Income
2. Personal Income and Outlays
3. Government Receipts and Expenditures
4. Foreign Transactions
5. Saving and Investment
6. Product, Income, and Employment by Industry
7. Fixed-Weighted Price Indexes and Implicit Price Deflators
8. Supplementary Tables
9. Seasonally Unadjusted Estimates

Table 1.25, which contains estimates for 1909–28, and tables with an “A” suffix on the number (for example, table 6.4A) appear only in the 1929–82 volume. The “A” suffix denotes early time periods when the classifications are slightly different than those used currently; a “B” suffix denotes more recent time periods.

### A

- Accidental damage** 8.10
- Accounting machinery** 5.6, 5.7, 7.13
- Accruals** See corporate profits tax accruals; indirect business tax and nontax accruals; wage accruals less disbursements.
- Additions and alterations, structures** 5.4, 5.5, 7.12
- Adjusted gross income** 8.14
- Adjustment** See capital consumption adjustment; inventory valuation adjustment; not seasonally adjusted tables; seasonally adjusted
- Administrative expenses of social insurance funds** 3.13
- Administrative, legislative, and judicial activities** 3.16
- After-tax income** See corporate profits after tax; disposable personal income.
- Agricultural services, forestry, and fisheries** (industry tables) 6.1, 6.2, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.9A, 6.9B, 6.10A, 6.10B, 6.11, 6.14A, 6.14B, 6.15A, 6.15B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B
- Agriculture:**
- Forestry, and fisheries (industry tables) 6.1, 6.2, 6.3A, **6.3B**, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.9A, 6.9B, 6.10A, 6.10B, 6.11, 6.12, 6.13, 6.15A, 6.15B, 6.17A, 6.17B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B
- Government expenditures 3.14, 3.15, 3.16
- Machinery 5.6, 5.7, 7.13
- Products, exports **4.3**, **4.4**
- Subsidies 3.12
- See also farm.
- Aid to families with dependent children** 2.1, 3.11
- Air transportation:**
- Current surplus of government enterprises 3.12
- Government expenditures 3.15, 3.16
- Industry tables 6.1, 6.2, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.10A, 6.10B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B
- Personal consumption expenditures 2.4, 2.5, 7.10
- Subsidies 3.12
- Aircraft:**
- National defense purchases **3.9**, **3.10**, **7.17**
- Personal consumption expenditures 2.4, 2.5, 7.10
- Producers' durable equipment 5.6, 5.7, 7.13

**Alcoholic beverages** 2.4, 2.5, 7.10

*See also* liquor.

**Ammunition, national defense purchases** 3.9, 3.10, 7.17

**Amortization** 8.10

*See also* capital consumption adjustment; capital consumption allowances; depreciation.

**Amusements:**

And recreation services (industry tables) 6.1, 6.2, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.10A, 6.10B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B

Personal consumption expenditures 2.4, 2.5, 7.10

**Anthracite mining** (industry tables) 6.4A, 6.5A, 6.6A, 6.7A, 6.8A, 6.10A, 6.19A, 6.20A, 6.21A, 6.22A, 6.23A, 6.24A

*See also* coal mining.

**Apparel and other textile products** (industry tables) 6.1, 6.2, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.10A, 6.10B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B

*See also* clothing.

**Appliances** *See* household appliances; kitchen appliances; orthopedic appliances.

**Assistance programs, government** 3.11, 3.15

**Audit** 8.13

**Automobile(s):**

Change in business inventories 1.17, 1.18

Depreciation 8.10

Exports and imports 1.17, 1.18, 4.3, 4.4, 7.15

Government purchases 1.17, 1.18

Insurance 2.4

New 1.17, 1.18, 2.4, 2.5, 7.10

Output 1.17, 1.18

Personal consumption expenditures 1.17, 1.18, 2.4, 2.5, 7.10

Producers' durable equipment 1.17, 1.18, 5.6, 5.7, 7.13

Repair, services, and garages (industry tables) 6.1, 6.2, 6.4B, 6.5B, 6.6B, 6.7B, 6.8B, 6.10B, 6.19B, 6.21B, 6.22B, 6.23B, 6.24B

Personal consumption expenditures 2.4

Services (industry tables) 6.3A, 6.4A, 6.5A, 6.6A, 6.7A, 6.8A, 6.9A, 6.10A, 6.14A, 6.15A, 6.16A, 6.17A, 6.18A, 6.19A, 6.20A, 6.21A, 6.22A, 6.23A, 6.24A

Use tax 3.2

Used 1.17, 1.18, 2.4, 2.5, 7.10

*See also* motor vehicles.

**Automotive, retail trade inventories** 5.8, 5.9, 5.10, 5.11

## B

**Bad debt reserve** 8.13

**Balance of payments accounts** 4.5

**Banking** (industry tables) 6.1, 6.2, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.10A, 6.10B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B

**Bank(s):**

Commercial and mutual (industry tables) 6.19B, 6.20B, 6.21B, 6.22B, 6.23B, 6.24B

Imputed interest paid by 8.8

Service charges, personal consumption expenditures 2.4, 2.5, 7.10

*See also* credit agencies; Federal Financing Bank; Federal home loan banks; Federal land banks; Federal Reserve banks.

**Barbershops** 2.4, 2.5, 7.10

**Base year:** Valuation period (currently 1982) used in constant-dollar estimates. In base year, price indexes equal 100.0.

**Baths** 2.4, 2.5, 7.10

**Beauty parlors** 2.4, 2.5, 7.10

**Benefits paid by private pension and welfare funds** 6.13

**Beverages** *See* alcoholic beverages; foods, feeds and beverages.

**Bicycles:** Included in wheel goods.

**Bituminous and other soft coal mining** (industry tables) 6.4A, 6.5A, 6.6A, 6.7A, 6.8A, 6.10A, 6.19A, 6.20A, 6.21A, 6.22A, 6.23A, 6.24A

*See also* coal mining.

**Black lung benefits** 3.11

**Boats** *See* ships and boats.

**Bonneville Power Administration** 3.12

**Book value of inventories** 5.8

**Books and maps** 2.4, 2.5, 7.10

**BPA's** Balance of payments accounts.

**Broadcasting** *See* radio and television broadcasting.

**Brokerage charges** 2.4, 2.5, 7.10

**Brokers** *See* insurance agents and brokers, and services; security and commodity brokers and services.

**Brokers' commissions on sale of structures** 5.4, 5.5, 7.12

**Budget** *See* unified budget.

**Buildings** *See* structures.

**Buildings owned and used by nonprofit institutions serving individuals** 8.3, 8.4, 8.9

**Burial expenses** 2.4

**Bus(es):**

Producers' durable equipment 5.6, 5.7, 7.13

Transportation, personal consumption expenditures 2.4, 2.5, 7.10

**Business:**

Fixed investment 1.1, 1.2, 5.2, 5.3, 5.12, 5.13, 7.1, 7.4, 8.1, 9.1

Income 1.12, 1.13, 1.15

Interest paid, received, and net 2.1, 2.7, 3.1, 3.2, 8.8, 8.9, 9.3, 9.4

Product 1.7, 1.8, 1.12, 1.13, 7.6, 8.1

Services (industry tables) 6.1, 6.2, 6.4A, 6.4B, 6.5A, 6.5B, 6.6A, 6.6B, 6.7A, 6.7B, 6.8A, 6.8B, 6.10A, 6.10B, 6.19A, 6.19B, 6.20A, 6.20B, 6.21A, 6.21B, 6.22A, 6.22B, 6.23A, 6.23B, 6.24A, 6.24B

Subsidies 1.9, 1.10

Transfer payments 1.9, 1.10, 1.16, 1.23, 1.24, 7.7, 7.18

*See also* change in business inventories; corporate business; farm; government enterprises; gross private domestic investment; indirect business tax and nontax accruals/liability; noncorporate business; nonfarm business; other private business; partnerships; proprietorships.

## C

**Capital consumption adjustment** 1.9, 1.14, 1.15, 1.16, 1.23, 5.1, 8.4, 8.10

By legal form of organization and type of adjustment 8.4

Corporate profits (and undistributed corporate profits) with 1.9, 1.14, 1.15, 1.16, 1.21, 1.23, 5.1, 6.18A, 6.18B, 7.18, 8.12

Net (corporate) cash flow with 1.14

Proprietors' income with 1.14, 1.15, 1.21, 1.23, 2.1, 2.6, 8.9, 8.12

Rental income of persons with 1.14, 1.15, 1.23, 2.1, 2.6, 8.9

# National Income and Product Accounts Estimates:

- When They Are Released,
- Where They Are Available,
- How They Are Presented

**T**HIS guide is designed to assist users in locating national income and product accounts (NIPA) estimates and to explain some of the conventions used in their presentation. The system of presentation has evolved over a number of years and has been shaped by many factors—for example, the frequency of the series (annual, quarterly, or monthly) and the extent of historical coverage. The system is best explained by beginning with a brief description of BEA's release schedule for the estimates.

## *Release schedule*

Quarterly estimates of gross national product (GNP) are released on the following schedule: "Advance" estimates are released in the first month after the end of the quarter; as more detailed and comprehensive data become available, "preliminary" and "final" estimates are released in the second and third months, respectively. Quarterly estimates of corporate profits lag GNP by one quarter: The first estimates of profits are released with the preliminary GNP estimates, and revised estimates are released with the final GNP estimates. (The fourth-quarter estimates of profits lag by an additional month.) Monthly estimates of personal income and outlays are released each month.

Ordinarily, additional revisions are carried out each July and cover the months and quarters of the most recent calendar year and the 2 preceding years. (For example, the July 1988 revision covered periods in 1987, 1986, and 1985.) These revisions are timed to incorporate newly available major annual source data. Comprehensive revisions—often called benchmark revisions—are carried out every 5 years, timed to incorporate BEA's input-output tables, for which the quinquennial economic censuses are the major data sources. Definitional

or classificational changes made to improve the NIPA's as a tool of economic analysis are usually introduced at the time of comprehensive revisions, the most recent of which was completed in December 1985.

## *Standard presentation of the NIPA's*

*Organization of the NIPA tables.*—For the standard presentation, the NIPA tables are grouped into nine categories:

1. National Product and Income
2. Personal Income and Outlays
3. Government Receipts and Expenditures
4. Foreign Transactions
5. Saving and Investment
6. Product, Income, and Employment by Industry
7. Fixed-Weighted Price Indexes and Implicit Price Deflators
8. Supplementary Tables
9. Seasonally Unadjusted Estimates

The "Supplementary Tables," the only category for which the title is not self-explanatory, include tables showing percentage changes in the major NIPA aggregates; selected per capita series; detail on rental income, dividends, and interest; imputations; and several reconciliations of NIPA measures to the source data (for example, tax return tabulations) from which they are derived.

Tables are individually numbered, both by category and within categories. The first digit indicates the category, and subsequent digits indicate the table number within that category. Changes to the numbering system are made only at the time of a comprehensive revision, although occasionally—as in this July revision—tables may be added.

The full set of NIPA tables, which consists of 132 tables and about 4,200 line items, contains annual, quarterly, and monthly estimates. The complete

list of NIPA tables on pages 38–39 indicates the frequency of the estimates shown in each table. Annual estimates are based on source data that are typically not available on a quarterly or monthly basis. Many of the tables with only annual estimates show detailed breakdowns of components; for example, tables 5.4 and 5.5 show purchases of structures by type (in current and constant dollars, respectively).

An index is available to help users locate series. For each series, the index identifies the NIPA table (or tables) containing that line item. Commonly used terms that differ from the NIPA wording are included, with a reference to the appropriate NIPA item. This index first appeared in the July 1987 SURVEY and was later printed as a separate publication; an updated version is on pages 108–124 of this issue.

*Publication of the NIPA tables.*—"The National Income and Product Accounts Tables" section in the SURVEY OF CURRENT BUSINESS is the primary vehicle for the standard presentation of the NIPA's. In July issues, a full set of NIPA tables presents the results of annual revisions. In months other than July, a selected set of tables presents the quarterly estimates that are released each month. The selected set comprises 54 tables from the first eight categories. (Seasonally unadjusted estimates are compiled only once a year and thus are not included in the selected set of tables.) For the users' convenience in tracking specific estimates, the numbering system established for the full set is retained in the selected set; as a result, gaps occur in the presentation of the selected tables.

The SURVEY issue for a particular month presents the estimates released during that month; for example, advance first-quarter estimates

are released during the month of April and appear in the April SURVEY. A note preceding the NIPA tables indicates whether estimates are advance, preliminary, or final.

The SURVEY presents estimates only for the most recent 2-4 years. A separate volume containing historical estimates is published after comprehensive revisions. The most recent of these volumes, *The National Income and Product Accounts of the United States, 1929-82: Statistical Tables*, presents estimates beginning in 1929 for annual series, in 1946 or 1947 for quarterly series, and in 1959 for most monthly series. (Some detailed tables in the volume cover shorter time spans, and one table shows GNP in current and constant dollars for 1909-28.) In addition, tables with an "A" suffix (for example, 6.4A) appear only in the comprehensive volume. The "A" suffix in these tables, most of which show industrial distributions for NIPA aggregates, denotes early time periods when the classifications were slightly different than those used currently. A "B" suffix denotes more recent time periods.

As of July 1988, the historical volume contains the most up-to-date estimates for the years 1929-82. The most up-to-date estimates for 1983 are in the July 1986 SURVEY, those for 1984 are in the July 1987 SURVEY, and those for 1985-87 are in the July 1988 SURVEY. Major aggregates will be shown in "Summary National Income and Product Series: Annually, 1929-87 and Quarterly, 1960-87," in the September 1988 SURVEY.

*Alternative media.*—NIPA estimates are also available in forms more convenient for computer users. Many of the estimates are available on computer tape and on diskettes. To give the general public access to the estimates within minutes of their official release, BEA makes them available electronically through the Economic Bulletin Board maintained by the Department of Commerce. BEA also provides recorded telephone messages giving summaries of current estimates—for GNP, call (202) 898-2451; for personal income and outlays, call (202) 898-2452.

*A User's Guide to BEA Information* describes these alternative ways of obtaining NIPA estimates and includes a selected listing of information services; to receive a copy, write to Current Business Analysis Division, BE-

53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0777. A complete listing of NIPA information services is available from the National Income and Wealth Division, BE-54, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0669.

#### *Additional presentations of NIPA estimates*

Certain NIPA estimates also appear in other parts of the SURVEY and in other BEA publications. These presentations show estimates or analyses that do not fit neatly into the system or publication schedule for the standard presentation.

*Survey of Current Business.*—The "Reconciliation and Other Special Tables" section regularly shows tables that reconcile NIPA estimates to related series and tables that present analytically useful extensions of NIPA estimates. At present, tables in this section show the reconciliation of NIPA net exports and the balance of payments accounts balance on goods and services; the reconciliation of BEA compensation and Bureau of Labor Statistics earnings; and cyclically adjusted Federal receipts, expenditures, and surplus or deficit (and debt).

The "Constant-Dollar Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade" section (in March, June, September, and December) shows quarterly and monthly estimates for the series indicated. Also shown are quarterly fixed-weighted inventory-sales ratios (using sales as weights) and quarterly and monthly inventories for manufacturing by stage of fabrication. The current-dollar sales figures are from the Census Bureau and are deflated by BEA; the inventory estimates are from the NIPA's.

The "Current Business Statistics" section (the "blue" or "S" pages) shows monthly estimates for personal income by source and for the disposition of personal income, including personal consumption expenditures (PCE). (These monthly estimates are also shown in the full set of NIPA tables.) The section also shows monthly aggregates for the manufacturing and trade series described in the preceding paragraph.

*Other BEA publications.*—For the monthly series shown regularly in the "blue" pages of the SURVEY (described earlier), historical estimates are published in *Business Statistics*, a biennial supplement to the SURVEY. A group of quarterly NIPA series—GNP and its major components—are shown in an appendix of *Business Statistics* and in *Business Conditions Digest (BCD)*, BEA's monthly periodical that focuses primarily on business cycle indicators. *Business Statistics* shows historical estimates for 25-30 years, but because its publication does not always immediately follow a comprehensive revision of the NIPA's, this reference may at times be outdated. *BCD* has estimates for the most recent 2-4 years and charts spanning 25 years; an appendix shows, on a rotating basis, historical estimates covering about 30 years.

#### *Statistical conventions used for NIPA estimates*

Most of the estimates are presented in billions of dollars. The major exceptions are certain current-dollar annual estimates, which are presented in millions of dollars, and estimates presented as index numbers. Current-dollar estimates are valued in the prices of the period in which the transaction takes place. Constant-dollar estimates are valued in the prices of a period designated the base period (at present, 1982), thus removing price change from any period-to-period movement in the series. The designation of 1982 as the base period also means that price levels in 1982 are set equal to 100 in calculating price indexes and implicit price deflators.

For quarters and months, the estimates (except price indexes) are presented at annual rates. Annual rates show values for a quarter or a month at their annual equivalent (that is, the value that would be registered if the rate of activity measured for a month or a quarter were maintained for a full year). Annual rates make it easier to compare values for time periods of different lengths—for example, quarters and years.

The percent changes shown in table 8.1 are also at annual rates and are calculated from the published quarterly estimates, which are rounded to the nearest one-tenth of a billion dollars. The annual rates for quarterly

percent changes are calculated with the formula:

$$r = \left[ \left( \frac{Q_t}{Q_{t-1}} \right)^4 - 1 \right] \times 100,$$

where  $r$  = the percent change at an annual rate, and  $Q_t$  and  $Q_{t-1}$  = the quarterly estimates for a quarter and the preceding quarter, respectively.

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. The statistical procedures used are based on histori-

cal experience; the Census Bureau's X-11 program is widely used. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

**Methodology used for NIPA estimates**

The conceptual framework of the NIPA's and up-to-date methodologies used to prepare the estimates are being described in a series of papers. To date, four papers are available. The most recent, *GNP: An Overview of Source Data and Estimating Methods*, provides an overview of the estimation of GNP, the most widely used measure of the Nation's production. (Tables 2 and 3 of this overview, which describe the methodology used

in preparing current-dollar and constant-dollar estimates of GNP, have been updated to reflect the methodological changes made in July 1988; see pages 22 - 33 of this issue.) *An Introduction to National Economic Accounting* describes the conceptual framework of the NIPA's by showing how the major branches of economic accounting in the United States are derived from conventional accounting statements. *Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends and Foreign Transactions* are representative of the papers that will cover the principal NIPA components. A fifth paper, *Government Transactions*, is forthcoming. See the inside back cover of the SURVEY for information on how to order these papers.

**Errata and Revisions in NIPA Tables**

Table A shows corrections to fixed-weighted price indexes published in *The National Income and Product Accounts of the United States, 1929-82: Statistical Tables* (table 7.2) and the July 1987 SURVEY OF CURRENT BUSINESS (table 7.13). Table B shows revisions to certain balance of payments accounts estimates for 1984 (table 4.5), U.S. Department of Agriculture estimates of farm income for 1982 (table 8.12), and certain lines

in the table relating personal income in the NIPA's with adjusted gross income as published by the Internal Revenue Service for 1984 (table 8.14). The first two revisions have not yet been incorporated into the NIPA estimates and are included in the "Statistical differences" lines of table 4.5 and the "Other" line of table 8.12. The revisions in table 8.14 have no effect on the NIPA estimates.

**Table A.—Errata**  
[Index numbers, 1982=100]

Table	Title	Line	Previously published	Corrected
First quarter of 1961				
7.2	Goods.....	4	0	44.8

8.14	AGI gap (line 18) as a percentage of BEA-derived AGI (line 16).....	19			11.1
8.14	AGI of IRS (line 17) as a percentage of BEA-derived AGI (line 16).....	20			88.9

# Key Source Data and Assumptions for the Advance Estimates of GNP: Easier Access and Redesigned Format

**T**HE advance quarterly estimates of GNP, which are released during the first month following the end of the quarter, are based on preliminary and incomplete source data and on BEA assumptions about the missing source data.<sup>1</sup> Since 1978, a hard-copy summary of these assumptions has been available on a subscription basis shortly after the release of each advance GNP estimate.<sup>2</sup> This information can be used to evaluate BEA's assumptions on missing source data and the impact of newly available and revised source data on the advance GNP estimate. This note reports on changes that have been made in the availability and contents of the summary and shows the assumptions for the advance GNP estimate for the second quarter of 1988.

The summary information is now available about noon the day after the

GNP news release through the Commerce Department's Economic Bulletin Board at a nominal charge to users. The Bulletin Board may be called by personal computer, computer terminal, or word processor equipped with modem; the information on it may either be viewed on the user's screen or downloaded. For more information about both the hard-copy subscription and the Bulletin Board, see "A User's Guide to BEA Information" in the March 1988 *SURVEY OF CURRENT BUSINESS*. For more information about the assumptions, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0669.

The contents of the summary have been changed in several ways.

- More detail is shown for personal consumption expenditures and for fixed investment.
- The change in business inventories and merchandise exports and imports series shown have been changed to parallel more closely

the Census Bureau published series from which they are derived.

- Several footnotes identify major differences between the GNP components and the underlying source data.

Information on the source data and assumptions for price indexes used to prepare constant-dollar estimates of GNP has been dropped because price indexes cannot be conveniently summarized for many components and because it appeared that little use was being made of this information.

In using information in the table, users should note that quarter-to-quarter changes in key source data series do not always correspond exactly with changes in corresponding GNP components. First, the source data selected for the table are those likely to be most important in determining the change and accordingly not all source data are shown. Second, the detailed components of some source data are reweighted in BEA's estimating methodologies. Third, BEA occasionally makes adjustments to source data on the basis of additional information or judgment.

1. For a description of the source data and estimating methods used for the quarterly GNP estimates, see "GNP: An Overview of Source Data and Estimating Methods," *SURVEY OF CURRENT BUSINESS* 67 (July 1987): 106-121.

2. The summary initially appeared in "Key Source Data and Projections for National Income and Product Estimates: Third Quarter 1978," in the October 1978 *SURVEY* 58 (October 1978): 20-23.

Table 1.—Key Source Data and Assumptions for the Quarterly Current-Dollar Estimates of Gross National Product

[Billions of dollars, seasonally adjusted, except where noted]

† Indicates assumptions of missing source data.

\* Indicates estimates that are subject to revision by a source agency.

1. NIPA purchases of producers' durable equipment and the Census shipments series differ primarily because the NIPA series covers only business purchases on capital account, including purchases of imported equipment. The Census series includes some current-account purchases, mainly parts; includes purchases by government, foreigners, and persons; and excludes imported equipment.

2. The value of 1-unit structures put in place is estimated by Census using data on the number of 1-unit structures started in the current and earlier months; the value of 2-or-more-unit structures put in place is directly measured.

NOTE.—GNP and components, including the series shown on each numbered line, are at annual rates. For other series, the units in which the source data are shown generally correspond to those used by the source agency.

<sup>r</sup> Revised.  
<sup>p</sup> Preliminary.

NOTE.—Quarterly data are averages of monthly figures. Quarterly percent changes are computed from quarterly data.

Long-Term Perspective: January 1968 to June 1988

Note.—Peak (P) indicates the end of business cycle expansion and the beginning of recession (shaded area). Trough (T) indicates the end of business cycle recession and the beginning of expansion. Business cycle peaks and troughs are designated by the National Bureau of Economic

Research, Inc. The numbers entered on the chart indicate the length of leads (-) and lags (+) in months from the business cycle turning dates.  
1. Beginning with data for January 1984, the net business formation component has been suspended from this index.

U.S. Department of Commerce, Bureau of Economic Analysis

# Gross Product By Industry: Comments on Recent Criticisms

ONE way of constructing estimates of gross national product is by industry of origin. The contribution each industry makes to the total—its *gross product originating*—equals its sales plus inventory change (its *gross output*) minus its consumption of materials and services purchased from other industries or imported. In concept—though not in statistical practice—the sum of gross product originating in agriculture, mining, manufacturing, retail trade, banking, and all other industries is the same as the more familiar sum of expenditures on consumption, investment (including inventory investment), net exports, and government purchases. The industry estimates, like the expenditure estimates, can be expressed in current dollars or in constant dollars.<sup>1</sup>

## Four criticisms

Recently, a number of users of gross product originating have criticized the constant-dollar estimates, contending that the estimates for manufacturing have grown too rapidly relative to other industries. Some of their arguments follow:

- Adjustments BEA made to the industry estimates for certain years increase manufacturing growth disproportionately. These adjustments were made so that total constant-dollar gross product originating would be more consistent with GNP estimated as the sum of expenditures.
- The price index for computers that BEA now uses, showing rapid price declines throughout

NOTE.—Frank de Leeuw prepared these comments. Much of the statistical analysis on which they are based was carried out by Robert P. Parker.

1. For a summary of sources and methods for the industry estimates, see "Gross Product by Industry, 1986," SURVEY OF CURRENT BUSINESS 67 (April 1987): 25-28. Revised industry estimates through 1987 appear in tables 6.1 and 6.2 of the national income and product accounts tables in this issue of the SURVEY. The estimates on which this article is based extend through 1985; incorporating the revised estimates probably would not change the results of the analysis much.

the last two decades, is inappropriate. In the industry estimates, this price index contributes to the rapid growth of the computer industry and, therefore, of manufacturing.

- The price indexes BEA uses to deflate manufacturers' purchases of materials and services are inadequate. The price indexes for materials, except for crude petroleum, do not reflect prices of imports, which rose relatively slowly in the first half of the 1980's. The price indexes for services, critics believe, rise too rapidly. Overstatement of these price increases causes understatement of the growth of consumption of services and—because this consumption is subtracted to arrive at gross product originating—overstatement of the growth of manufacturing.
- The paucity of information about current-dollar purchases of materials and services creates additional uncertainty about the estimates. Detailed data are available only for every fifth year, in a comprehensive input-output table.

## Quantitative importance

These issues are quantitatively important. Eliminating the adjustments BEA made to the industry estimates would reduce the average annual growth rate of manufacturing gross product from 1972 to 1985 (in 1982 dollars) from 2.7 percent to 2.0 percent. Almost all of the reduction would occur during the 1970's, however. From 1979 to 1985 the rate of growth would be reduced from 2.1 percent to 2.0 percent.

Replacing the computer price index BEA now uses, which declines an average of 14.8 percent per year, with a more traditional "matched-model" index, which declines an average of 6.9 percent per year, would reduce manufacturing growth during 1972-85 by 0.4 percentage point per year.

Taking account of import prices would have little effect on manufac-

turing growth from 1972 to 1985, because prices of imported materials grew at about the same rate as prices of domestically produced materials. From 1979 to 1985, however, taking account of import prices would increase real consumption of materials and decrease manufacturing growth, perhaps by half a percentage point or more per year, because prices of imported materials grew much less than prices of domestically produced materials.

If prices of purchased services actually rose 1 percent per year less than the indexes BEA used, then manufacturing growth during 1972-85 is overstated on this account by about 0.3 percentage point per year.

Inadequate current-dollar information on purchases may be an important source of error, but it is not possible to quantify its effect. BEA assumes, in the absence of current-dollar detail, that manufacturers continue to purchase inputs—both materials and services—in the same proportions as they did in the most recent comprehensive input-output table. There are several plausible ways in which this assumption might be in error, and they lead to different directions of error in manufacturing growth.

## Appraisal of the criticisms

The criticisms warrant careful attention. At a minimum, they highlight the fact that real gross product by industry cannot be measured precisely.

*Adjustments.*—Without the present adjustments to the industry estimates, there would be sizable unexplained gaps between total gross product originating and gross national product estimated as the sum of expenditures. BEA believes that the latter sum is more accurate, because the underlying source data are more accurate. In addition, the expenditure approach does not require annual estimates of interindustry flows of goods and services. Eliminating the adjustments altogether would therefore be a poor decision.

BEA will, however, review the way in which it apportions the adjustments among industries. An improved method of apportionment could change the estimated growth of manufacturing relative to other industries.

*Computer prices.*—The steep decline of computer prices reflects a dramatic change in the cost of computing that has undoubtedly taken place over the last few decades. Reluctance to allow this decline to affect measures of manufacturing product (and of real GNP) stems from two main sources.

The first source is that incorporating the decline means that manufacturing growth (and, to a lesser extent, real GNP growth) becomes much more sensitive than it used to be to the choice of base year. Recent manufacturing growth expressed in 1982 prices substantially exceeds what it would be in 1987 prices, because the relative price of computers was much higher in 1982 than in 1987. One way to deal with this sensitivity to the base year—a better way than modifying computer price indexes—would be to calculate growth estimates with alternative base years.

The second source of reluctance to accept BEA's treatment of computer prices is the view that measures of real investment should not attempt to adjust fully for quality changes. Changes over time in real investment, according to this view, should reflect only changes in the resources required to produce investment goods, even if a given amount of resources contributes more to production because of advances in technology. Arguments for and against this position are too complex to summarize in a brief presentation.

The implication of BEA's treatment of computer prices—and, to a lesser degree, the implication of the use of a "matched-model" price index—is that the computer revolution is a major explanation of why constant-dollar gross product in manufacturing has grown so rapidly, both relative to non-manufacturing and relative to employment in manufacturing.

*Purchased materials and services.*—Deflators for purchases of materials should reflect import prices. Without detailed current-dollar data separating imports from purchases of domestic materials, there are difficulties in taking account of import prices in a statistically correct way. BEA will try to devise a serviceable method.

Prices of some services may rise too rapidly and therefore contribute to overstatement of manufacturing growth relative to growth in service industries. Handling this probable bias, however, is a complex matter that has baffled economists for decades. Experts have yet to develop entirely suitable ways of measuring prices of services such as banking or advertising.

#### *Other evidence*

Two additional comparisons bear on the accuracy of BEA's estimates of manufacturing gross product: Comparison of current-dollar gross product originating with Census Bureau estimates of value added, and comparison of real gross product originating with the Federal Reserve Board index of industrial production. Neither comparison supports the proposition that BEA's estimates of real gross product in manufacturing have been growing too rapidly, at least during the entire 1972–85 period.

*Value added.*—The Census Bureau's annual surveys of manufacturing and its economic censuses provide estimates of value added by manufacturing industries, in current dollars. Value added, like gross product originating, measures the difference between sales and inventory change on the one side and purchased inputs on the other. The two concepts differ in that value added includes purchased services (they are not deducted from output), while gross product originating excludes purchased services.

Comparing movements in the two current-dollar manufacturing totals is of interest because their statistical sources are independent. Over the entire 1972–85 period, Census value added increased at an average annual rate of 4.7 percent, compared with 4.3 percent for current-dollar gross product originating. Rapid growth of purchased services appears to account for some of the difference. From 1979 to 1985, however, the difference goes in the other direction—an annual growth rate of 5.3 percent for Census value added and 6.0 percent for gross product originating. If similar prices were used to deflate these two current-dollar series, then these comparisons suggest that BEA's estimates of manufacturing may have grown too slowly over the entire 1972–85 period, but may have grown too rapidly since 1979.

*Industrial production.*—The Federal Reserve Board index of industrial pro-

duction measures real economic activity in a somewhat different way from real gross product originating in the industrial sectors. First, industrial production is derived as gross output weighted with Census value added, while gross product originating is derived as gross output minus consumption of materials and services. These approaches lead to different results when consumption of materials and services is not proportional to output. Second, industrial production uses weights based on 1972 prices for 1972–76 and weights based on 1977 prices starting in 1977, while real gross product originating uses 1982 prices for the entire period since 1972. For these and other reasons, the two sets of estimates show sizable differences by industry.

For manufacturing in total, industrial production rises faster than real gross product originating during 1972–85. The manufacturing component of the production index rises at an average rate of 3.0 percent per year, compared with 2.7 percent per year for real gross product. The difference in weight years may contribute to this result. For 1979–85 both measures rise at 2.1 percent per year.

#### *To sum up*

In the light of all the evidence, it is not possible to draw firm conclusions about biases in BEA's present estimates of real gross product originating. Only steps to improve the estimates will reveal the extent of present biases.

BEA will take two steps. The first is reexamining the adjustments to the industry estimates that make total real gross product originating more consistent with real GNP estimated as the sum of expenditures. The second is considering ways of incorporating import prices in the deflators for purchased materials.

In addition, BEA is exploring ways of constructing real expenditure estimates with alternative weight years and formulas. Less information is available to construct such alternative estimates for real gross product originating, but BEA will consider what useful calculations are possible.

Two other steps that would improve the estimates are (1) obtaining up-to-date data on purchases of materials and services, and (2) developing better measures of service prices. These steps would require extensions to the programs of other statistical agencies.

## State Personal Income, First Quarter 1988

**P**ERSONAL income growth slowed in the first quarter of 1988, and the slowing was widespread by State and industry. Forty-seven States shared in the slowdown; only Montana, Idaho, and Oklahoma had larger income growth in the first quarter of 1988 than in the fourth quarter of 1987. Slowdowns occurred in all major industries except trade and government.

Two special factors had State-specific—rather than general—impacts on personal income but did not alter the picture of widespread slowing. The factors were Federal subsidies in farming, which are part of farm proprietors' income, and profit sharing in the motor vehicles industry, which is part of wage and salary disbursements. In addition, payments from the Alaska Permanent Fund, which are part of transfer payments, affected personal income in Alaska.

Agricultural subsidy payments have substantial effects on State personal income patterns because crop production is usually concentrated in a few States, each crop is under a different subsidy program, and the subsidies are not paid out evenly over the year. Three States—Nebraska, Iowa, and Minnesota—had slower growth in the first quarter partly because subsidy payments on the 1986 corn crop had boosted personal income in the fourth quarter. In contrast, subsidy payments boosted first-quarter personal income in the three States—Montana, Idaho, and Oklahoma—that had faster personal income growth in the first quarter than in the fourth. These payments included advance 1988 subsidy payments on the wheat crop (all three States), barley crop (Montana and Idaho), and cotton crop (Oklahoma).

Profit sharing payments in the motor vehicles industry—amounting

to \$2.7 billion (at an annual rate) in the first quarter—were concentrated in Michigan and Ohio. The payments, which were the largest since 1985, boosted durables manufacturing payrolls in these States; as a result, first-quarter slowdowns in personal income growth were less pronounced than for the Nation. The payments were distributed mainly by one major manufacturer and were based on profit performance in 1987.

The Alaska Permanent Fund, which is derived from oil revenues, pays a portion of its net investment income to every Alaska resident. Payments from the Fund declined in the first quarter, reflecting the completion of 1987 payments. The decline in payments contributed to a first-quarter decline in personal income in Alaska.

### *Regional developments since first quarter 1987*

From the first quarter of 1987 to the first quarter of 1988, personal income in regions along the Atlantic and Pacific coasts increased more rapidly than the national average; personal income in interior regions increased less rapidly.

[Percent change in personal income, 1987:I-1988:I]

United States.....	6.3
Coastal regions.....	7.1
New England.....	8.2
Southeast.....	7.2
Midwest.....	6.9
Far West.....	6.7
Interior regions.....	5.1
Great Lakes.....	5.9
Plains.....	4.9
Southwest.....	4.1
Rocky Mountain.....	3.6

This pattern of relatively fast growth in coastal regions and slow growth in

interior regions has prevailed throughout the current economic expansion.

Since the first quarter of 1987, payrolls in private service-type industries showed strength in each coastal region; construction payrolls also were strong. Both durables and non-durables manufacturing payrolls were strong in the Southeast and Far West regions, in part reflecting the pickup in exports due to the cumulative effect of dollar depreciation against major foreign currencies.

Among interior regions, weak oil prices adversely affected mining and related construction and private service-type industries in the Southwest and Rocky Mountain regions. In addition, weak prices for crops and livestock adversely affected farming and related industries in the Plains region. Despite strength in exports, durables manufacturing payrolls in the Great Lakes region increased more slowly than in the Nation.

Estimates of State quarterly personal income follow. The quarterly estimates do not reflect the July 1988 revisions to the national income and product accounts that are presented earlier in this issue; those revisions will be incorporated in the estimates of State quarterly personal income that will be published in the October 1988 SURVEY OF CURRENT BUSINESS.

#### **Data Availability**

On August 18, revised estimates of annual State personal income for 1929-68 will be released. These estimates will not be published in the August 1988 SURVEY OF CURRENT BUSINESS but will be available in summary and detailed tabulations from the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

<sup>a</sup> Revised.

<sup>b</sup> Preliminary.

1. The personal income level shown for the United States differs from that in the national income and product accounts primarily because it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents who are employed abroad temporarily by private U.S. firms.

**NOTES:**

—The estimates for 1985 through the first quarter of 1988 do not reflect the July 1988 revisions to the national income and product accounts; those revisions will be incorporated in the quarterly estimates of State personal income that will be published in the October 1988 SURVEY OF CURRENT BUSINESS.

—The quarterly estimates of State personal income were prepared by Isabelle B. Whiston, under the supervision of Robert L. Brown.

**Data Availability**  
 Quarterly estimates for the years 1969-85 are available from the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

<sup>r</sup> Revised.<sup>p</sup> Preliminary.

NOTE.—Nonfarm personal income is total personal income less farm earnings.

# CURRENT BUSINESS STATISTICS

The statistics here update series published in BUSINESS STATISTICS: 1986, a statistical supplement to the SURVEY OF CURRENT BUSINESS. That volume (available from the Superintendent of Documents for \$16.00, stock no. 003-010-00181-0) provides a description of each series, references to sources of earlier figures, and historical data as follows: For all series, monthly or quarterly, 1983 through 1986, annually, 1961-86; for selected series, monthly or quarterly, 1961-86 (where available).

The sources of the series are given in BUSINESS STATISTICS: 1986; they appear in the main methodological note for each series, and are also listed alphabetically on pages 145-146. Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers, and are subject to their copyrights.

Bureau of Economic Analysis  
U.S. Department of Commerce  
Washington, D.C. 20230

## Page S-1

- † Revised series. See Tables 2.6 - 2.9 in the July 1988 SURVEY for revised estimates for 1985-87.
- ‡ Includes inventory valuation and capital consumption adjustments.
- § Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.
- ◇ See note "◇" for p. S-2.

## Page S-2

- 1. Based on data not seasonally adjusted.
- ◇ Effective Oct. 1987 SURVEY, the industrial production index has been revised back to Jan. 1985. These revisions are available upon request.
- # Includes data not shown separately.
- † See note "†" for p. S-8.
- ‡ See note "‡" for p. S-8.

## Page S-3

- # Includes data for items not shown separately.
- † See note "†" for p. S-8.
- ‡ See note "‡" for p. S-8.

## Page S-4

- 1. Based on data not seasonally adjusted.
- # Includes data for items not shown separately.
- ‡ Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.
- ◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

## Page S-5

- @ Compiled by Dun & Bradstreet, Inc.
- # Includes data for items not shown separately.
- § Ratio of prices received to prices paid (parity index).
- ‡ See note "‡" for p. S-4.
- † Effective with the Feb. 1988 SURVEY, data (back to 1984, for some commodities) have been revised. Effective with July 1988 SURVEY, data (back to 1982, for some commodities) have been revised. These revisions are available upon request.
- ◇ See note "◇" for p. S-6.

## Page S-6

- § Effective with the release of the January 1988 index, all producer price indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982=100. Only indexes with a base later than December 1981 remain unchanged. Selection of the 1982 period was made to coincide with the reference year of the shipment weights, which have been taken primarily from the 1982 Census of Manufactures. The last rebasing of these indexes occurred in February 1971, when the 1967 base was substituted for the 1957-59 base. Historical data on the new base are available upon request. For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.
- # Includes data for items not shown separately.
- † Effective with the release of the January 1988 index, all consumer price indexes previously expressed on a base of 1967=100, or any other base through December 1981, have been rebased to 1982-84=100. Only indexes with a base later than December 1981 remain unchanged. Selection of the 1982-84 period was made to coincide with the updated expenditure weights, which are based upon data tabulated from the Consumer Expenditure Surveys for 1982, 1983, and 1984. The last rebasing of these indexes occurred in February 1971, when the 1967 base was substituted for the 1957-59 base. Historical data on the new base are available upon request. Beginning with January 1987, data are calculated using 1982-84 expenditure patterns and updated population weights. Additional information regarding these changes is available from the Bureau of Labor Statistics, Washington, DC 20212.

## Page S-7

- 1. Computed from cumulative valuation total.
- 2. Index as of July 1, 1988: building, 384.6; construction, 421.9.
- # Includes data for items not shown separately.
- § Data for July, Oct., and Dec. 1987, and Mar. 1988 are for five weeks; other months four weeks.

- ◇ Effective Feb. 1988 SURVEY, data for seasonally adjusted housing starts have been revised back to 1985. These revisions are available upon request.
- † Effective May 1988 SURVEY, data for seasonally adjusted building permits have been revised back to Jan. 1986. These revisions are available upon request.
- @ Effective July 1988 SURVEY, data have been revised back to Jan. 1985. In addition to the normal revisions to the unadjusted and seasonally adjusted data, the "Improvements" component of private residential buildings has been revised back to 1982 to adjust for a change in estimation of the monthly data. Revised data are available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233.
- ‡ Effective July 1988 SURVEY, data have been revised back to 1985 and are available upon request.

## Page S-8

- 1. Advance estimate.
- ◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.
- § Data include guaranteed direct loans sold.
- # Includes data for items not shown separately.
- @ Effective Oct. 1987 SURVEY, data are for mortgage loans closed as FSLIC-insured institutions. Historical data back to 1976 are available upon request.
- † Effective April 1988 SURVEY, wholesale trade data have been revised back to Jan. 1983. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade Sales and Inventories BW-13-87S*, available from the Bureau of the Census, Washington, DC 20233.
- ‡ Effective April 1988 SURVEY, retail trade data have been revised. Estimates of retail sales and inventories have been revised back to January 1983. Some series have been revised back to 1978. Revised data and a summary of changes appear in the report *Revised Monthly Retail Sales and Inventories BR-13-87S*, available from the Bureau of the Census, Washington, DC 20233.

## Page S-9

- 1. Advance estimate.
- # Includes data for items not shown separately.
- ◇ Effective with the January 1988 SURVEY, the seasonally adjusted labor force series have been revised back to January 1983. The January 1988 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1983-87 revision period are in the February 1988 issue of *Employment and Earnings*.
- † The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.
- @ Data include resident armed forces.
- ‡ See note "‡" for p. S-8.

## Page S-10

- ◇ See note "◇" for p. S-9.
- § Effective June 1988 SURVEY, data have been revised back to April 1986 (not seasonally adjusted) and January 1983 (seasonally adjusted) to reflect new benchmarks and seasonal adjustment factors. The June 1988 issue of *Employment and Earnings* will contain a detailed discussion of the effects of the revisions.

## Page S-11

- ‡ This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.
- ◇ Production and nonsupervisory workers.
- § See note "§" for p. S-10.

## Page S-12

- 1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.
- § See note "§" for p. S-10.
- ◇ Production and nonsupervisory workers.
- ‡ Earnings in 1977 dollars reflect changes in purchasing power since 1977 by dividing by Consumer Price Index. Effective Feb. 1988 SURVEY, this series has been revised back to 1983 to reflect new seasonal factors for the CPI-W. Revised data are available upon request.
- §§ Wages as of July 1, 1988: Common, \$17.40; Skilled, \$22.61.
- † Excludes farm, household, and Federal workers.
- ‡‡ See note "‡" for p. S-11.

**Page S-13**

1. Average for Dec.
2. Effective December 31, 1987, eight brokers and dealers in commercial paper were added to the reporting panel resulting in a series break. End of month figures on the old basis are as follows: All issuers, 352,915; financial companies, 275,907; dealer placed, 103,667; directly placed, 172,240; and nonfinancial companies, 77,008.
- ‡ Effective Jan. 1988, series revised due to changes in the panel of reporting banks. The new reporting panel of 168 banks accounts for about 52 percent of total assets in U.S. offices of domestically-chartered banks. Back data have been estimated for the years 1984-87.
- # Includes data for items not shown separately.
- \* "Transaction balances other than demand deposits" consists of ATS, NOW, super NOW, and telephone transfer accounts.
- § Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).
- @ Insured unemployment (all programs) data include claims filed under extended duration provisions of regular State laws; amounts paid under these programs are excluded from state benefits paid data.
- @@ Insured unemployment as a percent of average covered employment in a 12-month period.
- \*\* Effective Aug. 1987 SURVEY, data are provided by the Farm Credit Corporation of America on a quarterly basis. Quarterly data are available back to first quarter 1985, with annual data available back to 1961.

**Page S-14**

1. Data are for fiscal years ending Sept. 30 and include revisions not distributed to the months.
2. Weighted by number of loans.
3. Beginning Feb. 1988, data temporarily suspended by the Farm Credit Administration, which is revising the information it collects and amending the reports it distributes.
- § Effective Mar. 1988 SURVEY, data have been revised to reflect new benchmark and seasonal adjustments. These revisions are available upon request.
- † Effective Apr. 1988 SURVEY, the consumer installment credit series have been revised back to Jan. 1980 to reflect newly available historical information and to incorporate new seasonal factors. These revisions are available upon request.
- # Includes data for items not shown separately.
- ◇ Adjusted to exclude domestic commercial interbank loans and federal funds sold to domestic commercial banks.
- ‡ Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.
- §§ Effective Apr. 1988 SURVEY, a total adjustment of \$920 million for fiscal year (FY) 1987 and \$1,565 million thru Feb. 1988 has been distributed by month for notes issued by the Federal Savings and Loan Insurance Corporation (FSLIC) in lieu of cash and not reported as outlays. The previous adjustment, in the Feb. 1988 SURVEY, has been reversed prior to these corrections. Effective Sept. 1987 SURVEY, the outlays for the Federal Deposit Insurance Corporation (FDIC) have been adjusted by \$442 million for 1986 and \$158 million for 1987 to reflect FDIC debentures issued in lieu of cash and not reported previously as outlays.
- ‡‡ Courtesy of *Metals Week*.
- @@ Average effective rate
- @ Revised for periods between October 1986 and February 1987. During this interval, outstanding gold certificates were inadvertently in excess of the gold stock.

**Page S-15**

1. Beginning in the first quarter 1987, the universe of manufacturing corporations was redefined to exclude corporations with less than \$250,000 in assets at the time of sample selection.
- † Effective Feb. 1988 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.
- ‡ Composition of the money stock measures is as follows:  
M1.—This measure is currency plus demand deposits at commercial banks and interest-earning checkable deposits at all depository institutions—namely NOW accounts, automatic transfer from savings (ATS) accounts, and credit union share draft balances—as well as a small amount of demand deposits at thrift institutions that cannot, using present data sources, be separated from interest-earning checkable deposits.  
M2.—This measure adds to M1 overnight repurchase agreements (RP's) issued by commercial banks and certain overnight Eurodollars (those issued by Caribbean branches of member banks) held by U.S. nonbank residents, money market mutual fund shares, and savings and small-denomination time deposits (those issued in denominations of less than \$100,000) at all depository institutions. Depository institutions are commercial banks (including U.S. agencies and branches of foreign banks, Edge Act corporations, and foreign investment companies), mutual savings banks, savings and loan associations, and credit unions.  
M3.—This measure equals M2 plus large-denomination time deposits (those issued in denominations of \$100,000 or more) at all depository institutions (including negotiable CD's) plus term RP's issued by commercial banks and savings and loan associations.  
L.—This broad measure of liquid assets equals M3 plus other liquid assets consisting of other Eurodollar holdings of U.S. nonbank residents, bankers acceptances, commercial paper, savings bonds, and marketable liquid Treasury obligations.
- ‡‡ Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.
- ◇ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.
- @ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

- # Includes data for items not shown separately.  
§ Effective Apr. 1988 SURVEY, 1987 data have been revised. Revisions for Jan. 1987: long-term, 7,486; short-term, 372.

**Page S-16**

- @ Effective with the June 1988 SURVEY, total exports and imports have been revised back to Jan. 1986. These revisions are available upon request. Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because the revisions to the totals are not reflected in the component items.
- † Effective with the June 1988 SURVEY, seasonal adjustment of exports and imports was reintroduced. The monthly data were last adjusted for December 1985. Historical data from Jan. 1986 forward are available upon request.
- § Number of issues represents number currently used; the change in number does not affect the continuity of the series.
- ‡ For bonds due or callable in 10 years or more.
- # Includes data for items not shown separately.

**Page S-17**

- @ See note for p. S-16.  
† See note for p. S-16.  
# Includes data not shown separately.

**Page S-18**

1. Annual total; quarterly or monthly revisions are not available.
2. Restaurant sales index data represent hotels and motor hotels only.
3. For month shown.
- # Includes data for items not shown separately.
- § Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.
- \* Data have been revised back to 1981. They now include commuter railroads and small transit systems. Revised data are available upon request.
- ‡ The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.
- ◇ Average daily rent per room occupied, not scheduled rates.
- ## Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.
- † Before extraordinary and prior period items.
- @ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

**Page S-19**

1. Reported annual total; monthly revisions are not available.
2. Less than 500 short tons.
- # Includes data for items not shown separately.
- § Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.
- ‡ Data for 1985-86 (and 1984, for inorganic chemical production items) have been revised and are available upon request.
- ◇ Beginning January, 1986, data are not directly comparable to earlier periods because the data represent only companies that have annual revenues over \$100 million.

**Page S-20**

1. Reported annual total; monthly or quarterly revisions are not available.
2. Data are no longer available.
- § Data are not wholly comparable from year to year because of changes from one classification to another.
- ◇ Data for 1985-86 have been revised and are available upon request.
- @ Includes less than 500 electric generation customers not shown separately.
- † Effective with the May 1988 SURVEY, data have been revised back to 1985 and are available upon request.

**Page S-21**

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1-Aug. 31).
2. Crop estimate for the year.
3. Stocks as of June 1.
4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year).
5. Less than 50,000 bushels.
6. Stock estimates for barley and oats are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column.
7. Stocks as of Dec. 1.
8. See note "§" for p. S-6 regarding a change to a new reference base in 1988.
9. Prices are no longer available.
10. Based on quotations for fewer than 12 months.
11. July 1 estimate of the 1988 crop.
- § Excludes pearl barley.
- # Bags of 100 lbs.
- @ Quarterly data represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. Annual data represent Dec.-Nov.
- † Coverage for 21 selected States, representing approximately 85 percent of U.S. production.

**Page S-22**

1. Monthly quotation not available.
2. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.
3. See note "+" for this page.
- § Cases of 30 dozen.
- ◇ Bags of 60 kilograms.
- † Effective with the release of 1st Qtr. 1988 data, the import price index for coffee has been discontinued by BLS and replaced in the SURVEY with the import price index for coffee and coffee substitutes. The weighting structure used for the import price index reflects U.S. foreign trade flows based on 1985 data. Indexes, beginning with 2nd Qtr. 1975, are available upon request.

**Page S-23**

1. Crop estimate for the year.
2. Reported annual total; revisions not distributed to the months.
3. Data suppressed because they did not meet publication standards of the Bureau of the Census.
4. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.

**Page S-24**

1. Annual data; monthly revisions not available.
2. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.
- \* New series from the American Metal Market. The composite scrap price represents the average of consumers' buying prices, delivered, at the following markets: Chicago, Pittsburgh, and Philadelphia. Annual and monthly composite price data are available back to January 1982.

**Page S-25**

1. Annual data; monthly revisions are not available.
2. For month shown.
- @ Beginning 1987, includes foreign ores.
- † Beginning January 1982, data represent metallic (mostly aluminum) content. Data for 1981 and prior years represent aluminum content only.
- ◇ The source for these series is now the Bureau of Mines.
- § Source: *Metals Week*.

**Page S-26**

1. Annual data; monthly revisions are not available.
2. Less than 50 tons.
3. Total for 5 months; data for May, June, Sept., Nov., and Dec.
4. Total for 10 months; no data for Jan. and Feb.
- ◇ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
- @ All data (except annual production figures) reflect GSA remelted zinc and zinc purchased for direct shipment.
- ‡ Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
- # Includes data not shown separately.
- § Beginning with the Aug. 1985 SURVEY, unadjusted fluid power shipments indexes are shown. Seasonally adjusted indexes are no longer available.
- † For an explanation of material handling equipment shipments and historical data, see p. S-35 of the Dec. 1985 SURVEY.
- @@ Beginning Oct. 1986, the Lead price represents North American Mean.

**Page S-27**

1. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.
2. Beginning January 1986, data have been restated because a new methodology has been adopted.
- # Includes data for items not shown separately.
- § Includes nonmarketable catalyst coke. See also note "++" for this page.
- ◇ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
- † Effective with the Oct. 1987 SURVEY, coal production data for 1986 have been revised. Effective with the May 1988 SURVEY, coal consumption and stocks back through 1986 have been revised. These revisions are available upon request.
- @ Includes U.S. produced and imported microwave ovens and combination microwave oven/ranges.
- ‡ "Tractor shovel loaders" includes some front engine mount wheel tractors that had previously been included in "Tractors, wheel, farm, and nonfarm."

†† Effective with the June 1988 SURVEY, data for 1987 have been revised and are available upon request.

‡‡ March, June, September and December are five-week months. All others consist of four weeks.

**Page S-28**

1. Reported annual totals; revisions not allocated to the months.
2. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.
- # Includes data for items not shown separately.
- † Except for price data, see note "††" for p. S-27.

**Page S-29**

1. Reported annual totals; revisions not allocated to the months.
2. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.
- ◇ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users.
- # Compiled by the American Newspaper Publishers Association.
- † Effective with the April 1988 SURVEY, the import price index for natural rubber has been revised. The index is now expressed on a base of 1985=100. Also new weights based on 1985 trade flows have been applied to all data from 1985 onward. Revised data are available back to 4th qtr. 1983.

**Page S-30**

1. Reported annual total; revisions not allocated to the months.
2. Monthly data are being withheld to avoid disclosing data from individual firms. Annual total covers 9 months.
3. Data cover five weeks; other months, four weeks.
- # Includes data for items not shown separately.
- ◇ Cumulative ginnings to the end of month indicated.
- § Bales of 480 lbs.
- † Data for 1987 have been revised and are available upon request.

**Page S-31**

1. Less than 500 bales.
2. Annual total includes revisions not distributed to the months.
3. Average for crop year; Aug. 1-Jul. 31.
4. For five weeks; other months four weeks.
5. See note "\$" for p. S-6 regarding a change to a new reference base in 1988.
- ◇ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- # Beginning 1st Qtr. 1986; quarterly data are estimated by the American Textile Manufacturers Institute based on annual data collected by the Bureau of Census.
- § Bales of 480 lbs..
- † Beginning 1st Qtr. 1987, data are not comparable with earlier periods. Girls apparel are now included with women's, misses' and juniors' and boys' apparel are now included with men's. Also, some classification changes were made.

**Page S-32**

1. Annual total includes revisions not distributed to the months.
2. Production of new vehicles (thous. of units) for June 1988: *passenger cars*, 731; *trucks and buses*, 371.
3. Data are reported on an annual basis only.
4. Effective with the Feb. 1988 SURVEY, data have been revised back to 1985 and are available upon request.
5. Beginning with January 1987, data include Honda, Nissan, and Toyota passenger cars produced in U.S. plants.
6. Beginning with January 1987, data include Nissan trucks produced in U.S. plants.
7. Beginning with 1st qtr. 1987, jeans, jean-cut casual and dungarees are included with trousers.
8. See note "+" for this page.
9. Effective with July 1988 SURVEY, data have been revised back to 1985 and are available upon request.
- # Total includes backlog for nonrelated products and services and basic research.
- § Domestic comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
- ◇ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some states are not available, month-to-month comparisons are not strictly valid.
- ‡ Excludes railroad-owned private refrigerator cars and private line cars.
- † Effective with the Mar. 1988 SURVEY, retail inventories for trucks and buses have been restated to exclude captive imports (vehicles manufactured overseas by U.S. affiliates). These data are available back through 1966.
- ‡‡ See note "†" for page S-31.

## BEA Publications

### Available From GPO

**SURVEY OF CURRENT BUSINESS.** Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; and 36 pages of tables that present over 1,900 major economic series obtained from other public and private sources. Monthly. \$6.50 single copy; \$18.00 per year.

**Business Statistics: 1986.** (1987) Provides monthly or quarterly data for 1983-86 and annual data for 1961-86 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 325 pages. \$16.00 (GPO Stock No. 003-010-00181-0).

**Business Conditions Digest.** Contains tables and charts for 300 series, including business cycle indicators and other series that help evaluate business conditions. Features the composite indexes of leading, coincident, and lagging indicators. Also included are cyclical comparison charts and data sources. Monthly. \$4.00 single copy; \$44.00 per year.

**Handbook of Cyclical Indicators.** (1984) Contains series descriptions and data for 1947-82 for all series that appear in Business Conditions Digest. Features the composite indexes of cyclical indicators. 195 pages. \$5.50 (GPO Stock No. 003-010-00127-5).

**The National Income and Product Accounts of the United States, 1929-82: Statistical Tables.** (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pages. \$23.00 (GPO Stock No. 003-010-00174-7).

**BEA Methodology Paper No. 1: Introduction to National Economic Accounting.** (1985) Introduces the concepts of the national income and product accounts by placing these accounts within the framework of national economic accounting. Shows how the national income and product accounts, capital finance accounts, and input-output accounts—the major branches of national economic accounting in the United States—are derived from the conventional accounting statements. 19 pages. \$1.00 (GPO Stock No. 003-010-00158-5).

**BEA Methodology Paper No. 2: Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends.** (1985) Describes the concepts, sources, and methods of the corporate profits components of the national income and product accounts. 61 pages \$2.50 (GPO Stock No. 003-010-00143-7).

**BEA Methodology Paper No. 3: Foreign Transactions.** (1987) Describes the preparation of estimates in the national income and product accounts (NIPA's) of net exports (both current- and constant-dollar), transfer payments to foreigners, capital grants received by the United States, interest paid by Government to foreigners, and net foreign investment. Also describes the relationship between foreign transactions estimates in the NIPA's and those in the balance of payments accounts. 52 pages. \$2.75 (GPO Stock No. 003-010-00178-0).

**BEA Methodology Paper No. 4: GNP: An Overview of Source Data and Estimating Methods.** (1987) Provides basic information about GNP, including the conceptual basis for the account that presents GNP, definitions of each of the components on the income and product side of that account, and a summary, presented in tabular form, of the source data and methods used in preparing estimates of current- and constant-dollar GNP. Also provides an annotated bibliography, with a directory, of the more than 50 items over the last decade that provided methodological information about GNP. 36 pages. \$2.00 (GPO Stock No. 003-010-00179-8).

**Index of Items Appearing in the National Income and Product Accounts Tables.** (1987) Indexes general subject areas as well as detailed line items in the national income and product accounts tables. 18 pages. \$1.25 (GPO Stock No. 003-010-00180-1).

**Fixed Reproducible Tangible Wealth in the United States, 1925-85.** (1987) Contains annual estimates of the stock of privately owned and government-owned durable equipment and structures and of durable goods owned by consumers in the United States for 1925-85. Estimates are for fixed nonresidential private capital by major industry group (farm, manufacturing, and nonfarm nonmanufacturing), for residential capital by tenure group (owner-occupied and tenant-occupied), for government-owned fixed capital by type of government (Federal and State and local), and

for 11 types of durable goods owned by consumers. 400 pages. \$18.00 (GPO Stock No. 003-010-00177-1).

**U.S. Direct Investment Abroad: Balance of Payments and Direct Investment Position Estimates, 1977-81.** (1987) Contains revised estimates of U.S. direct investment abroad and balance of payments transactions between U.S. parent companies and their foreign affiliates for 1977-81. Includes estimates by country and industry of foreign affiliate. 51 pages. \$2.75 (GPO Stock No. 003-010-00175-5).

**U.S. Direct Investment Abroad: 1982 Benchmark Survey Data.** (1985) Contains estimates by country and industry of foreign affiliate and by industry of U.S. parent on the financing and operations of foreign affiliates and U.S. parent companies, on the U.S. direct investment position abroad, and on balance of payments transactions between U.S. parents and their foreign affiliates. 462 pages. \$18.00 (GPO Stock No. 003-010-00161-5).

**1985 OBERS BEA Regional Projections.** (1985) Two volumes. Contains estimates for 1969, 1973, 1978, and 1983, and projections for 1990, 1995, 2000, 2005, 2015, and 2035 for total personal income, population, per capita personal income, and employment and earnings by industry for the United States and States.

**Vol. 1. State Projections to 2035.** 131 pages. \$4.75 (GPO Stock No. 003-010-00157-7).

**Vol. 2. Metropolitan Statistical Area Projections to 2035.** 356 pages. \$12.00 (GPO Stock No. 003-010-159-3).

**Regional Multipliers: A User Handbook for the Regional Input-Output Modeling System (RIMS II).** (1986) Contains an explanation of how to use regional input-output multipliers, by industry, for output, earnings, and employment. Includes information on how to perform systematic analyses of regional economic impacts of projects and programs. Also contains multipliers from the RIMS II, sample tables of input-output multipliers, and hypothetical case studies. 131 pages. \$6.50 (GPO Stock No. 003-010-00163-1).

**BEA Staff Paper No. 43: The Use of National Income and Product Accounts for Public Policy: Our Successes and Failures.** (1985) Uses two indirect approaches to evaluate the national income and product accounts' successes and failures as tools for public policy. 26 pages. \$1.25 (GPO Stock No. 003-010-00162-3).

**BEA Staff Paper No. 44: The BEA Quarterly Econometric Model of the U.S. Economy: 1985 Version.** (1986) Contains a detailed description of the component sectors and individual equations contained in the BEA quarterly econometric model as of fall of 1985. 87 pages. \$4.50 (GPO Stock No. 003-010-00164-0).

**TO ORDER:** The GPO publications listed above must be ordered from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. To order by phone: (202) 783-3238.

### Available From BEA

**BEA Reports.** Provides subscribers with BEA's estimates on a prompt basis. *Gross National Product*, monthly, \$18.00 per year (Accession No. BEA-15-S). *Personal Income and Outlays*, monthly, \$18.00 per year (Accession No. BEA-14-S). *Composite Indexes of Leading, Coincident, and Lagging Indicators*, monthly, \$18.00 per year (Accession No. BEA-16-S). *Plant and Equipment Expenditures*, \$7.50 per year (Accession No. BEA-13-S). *Regional Economic Reports*, \$9.00 per year (Accession No. BEA-17-S). *International Economic Reports*, \$19.50 per year (Accession No. BEA-18-S). *All six sets*, \$90.00 per year (Accession No. BEA-19-S).

**TO ORDER:** BEA Reports must be ordered from: Economic and Statistical Analysis/BEA, U.S. Department of Commerce, Citizens and Southern National Bank, 222 Mitchell St., P. O. Box 100606, Atlanta, GA 30384. Orders must include a check, payable to Economic and Statistical Analysis/BEA. For information about BEA Reports, call (202) 523-0777.

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.
