THE BUSINESS SITUATION

This article was prepared by Daniel Larkins, Larry R. Moran, and Ralph W. Morris.

ACCORDING TO advance estimates of the national income and product accounts (NIPA's), real gross domestic product (GDP) increased 3.8 percent in the fourth quarter of 1992 after increasing 3.4 percent in the third quarter (chart 1).¹ The step-up in growth reflected upswings in the production of structures and motor vehicles; the production of services and of goods other than motor vehicles increased less in the fourth quarter than in the third (table 1).

The effect on fourth-quarter GDP of rebuilding in the aftermath of Hurricanes Andrew and Iniki cannot be determined with any degree of preci-

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1987 dollars.

sion because the effects are largely embedded in the source data. However, the effects are likely to be very small (see the "Business Situation" in the October and November 1992 SURVEYS).

Real gross domestic purchases increased 3.9 percent in the fourth quarter, about the same rate as in the third (table 2). Unlike GDP, gross domestic purchases excludes exports of goods and services and includes imports of goods and services.

Although gross domestic purchases increased at about the same rate in the fourth quarter as in the third, the composition of the increase was different in the two quarters. Inventory investment (that is, change in business inventories) decreased in the fourth quarter; in the third quarter it had increased. Real final sales to domestic purchasers increased 4.6 percent in the fourth quarter after increasing 3.5 percent in the third. All major components except government purchases contributed to the fourth-quarter acceleration in final sales.

The fixed-weighted price index for gross domestic purchases increased 2.8 percent in the fourth quarter after increasing 2.5 percent in the third. The fixed-weighted price index for GDP increased 3.2 percent after increasing 2.1 percent.

Motor vehicles.—Output of motor vehicles increased 14.6 percent in the fourth quarter after decreasing 7.7 percent in the third, and sales of motor vehicles jumped 24.8 percent after decreasing 10.6 percent. Trucks more than accounted for the increase in output and accounted for three-fourths of the increase in sales. (Auto and truck output, sales, and inventories are shown in tables 8.3–8.6 of the "Selected NIPA Tables.")

In units, domestic car production increased to 5.8 million (seasonally adjusted annual rate) in the fourth quarter after falling to 5.6 million in the third. Domestic car sales increased to 6.4 million in the fourth quarter after slipping to 6.2 million in the third. Sales of imported cars, at 2.0 million, were unchanged in the fourth quarter. Domestic car inventories, at 1.4 million at the end of the fourth quarter, were little changed from the end of the third. The inventory-sales ratio edged down to 2.6 in the fourth quarter from 2.7 in the third.

The fourth-quarter increase in sales of domestic cars was more than accounted for by sales to consumers and reflected improvements in many of the factors that underlie changes in total consumer spending. Real disposable personal income increased 3.8 percent, the largest increase in three quarters. The unemployment rate declined—for the first time in three quarters—to 7.3 percent. The Index of Consumer Sentiment (prepared by the University of Michigan's Survey Research Center) jumped to its highest level in 2½ years.

Factors specific to the motor vehicle industry were also favorable to consumer purchases of cars. Sales-incentive programs remained as attractive in the fourth quarter as they had been in the third; interest rates remained low; and new car prices (as measured by the Consumer Price Index) increased at an annual rate of only 0.9 percent in the fourth quarter after increasing 3.2 percent in the third.

Sales of new trucks jumped to 5.1 million units in the fourth quarter after decreasing to 4.7 million in the third. Sales of domestic light trucks, which are influenced by many of the same fac-

tors that influence consumer purchases of cars, increased to 4.6 million from 4.2 million. Sales of imported light trucks and sales of other trucks were unchanged at 0.2 million and 0.3 million, respectively.

The NIPA's in 1992.—From 1991 to 1992, real GDP increased 2.1 percent; from 1990 to 1991, in contrast, it decreased 1.2 percent. The 1992 increase was the largest annual increase since 1989, but it was relatively modest for the early stages of an economic recovery. Since the business cycle trough in the first quarter of 1991, GDP has increased at an average annual rate of 2.2 percent; over comparable periods in the five preceding recoveries, GDP grew, on average, at about twice that rate.

The turnaround in GDP in 1992 reflected upturns in the production of goods and of struc-

tures; the production of services increased about the same amount in 1992 as in 1991. In goods production, both the 1992 increase and the 1991 decrease mainly reflected the production of durables. In structures, the 1992 increase was more than accounted for by residential construction; the 1991 decrease had been split about evenly between residential and nonresidential construction.

Gross domestic purchases increased 2.5 percent in 1992 after decreasing 1.8 percent in 1991. All of the major components of gross domestic purchases except government purchases contributed to the turnaround.

Personal consumption expenditures responded to an upswing in income; real disposable personal income increased 2.1 percent in 1992 after decreasing 0.2 percent in 1991.

Fourth Quarter 1992 Advance GDP Estimate: Source Data and Assumptions

The advance GDP estimate for the fourth quarter is based on the following major source data, some of which are subject to revision. (The number of months for which data were available is shown in parentheses.)

Personal consumption expenditures: Sales of retail stores (3) and unit auto and truck sales (3);

Nonresidential fixed investment: Unit auto and truck sales (3), construction put in place (2), manufacturers' shipments of machinery and equipment (2), and exports and imports of machinery and equipment (2);

Residential investment: Construction put in place (2) and housing starts (3);

Change in business inventories: Manufacturing and trade inventories (2) and unit auto and truck inventories (3);

Net exports of goods and services: Merchandise exports and merchandise imports (2);

Government purchases: Military outlays (3), other Federal outlays (2), State and local construction put in place (2), and State and local employment (3);

GDP prices: Consumer Price Index (3), Producer Price Index (3), price indexes for nonpetroleum merchandise exports and imports (3), and values and quantities of petroleum imports (2).

In addition to incorporating the above source data, BEA makes assumptions for the source data that are not yet available.¹ The following paragraphs, based on a table made available shortly after release of each advance estimate, highlight the source data incorporated and the assumptions made in preparing the estimates of the components that contributed the most to the 3.8-percent increase in real GDP in the fourth quarter.

For personal consumption expenditures, the estimate of goods was based on 3 months of Census Bureau sales of retail stores and trade-source unit auto and truck sales. The estimates of service components that increased were based partly on BEA projections based on past trends and partly on 3 months of source data—primarily trade-source shares traded on securities markets, and Bureau of Labor Statistics (BLS) employment and earnings in service industries. The price data used to prepare the constant-dollar estimates of both goods and services were based primarily on 3 months of BLS consumer price indexes.

For nonresidential investment, the estimate of structures was largely based on 2 months of Census Bureau construction put in place. For December, BEA assumed a slight increase. For producers' durable equipment (PDE), the estimate was based largely on 3 months of trade-source unit auto and truck sales and 2 months of Census Bureau manufacturer's shipments and exports and imports of machinery and equipment. For December, BEA assumed that equipment purchases were about equal to the November estimate. The price data used to prepare the constant-dollar estimates of structures were based largely on a trade source cost index and on 2 months of Census Bureau housing prices. For December, BEA assumed a slight increase over November. The price data used to prepare the constant-dollar estimates of PDE were based largely on 3 months of BLS Producer Price Indexes.

For residential investment, the estimate was based largely on 2 months of Census Bureau construction put in place. For December, BEA assumed an increase about equal to the October to November change; this assumption was based largely on 3 months of Census Bureau housing starts. The price data used to prepare the constant-dollar estimates of residential investment were based largely on 2 months of Census Bureau housing prices. For December, BEA assumed a slight increase over November.

1. A table of assumptions is available shortly after the release of each advance estimate on the Department of Commerce's Economic Bulletin Board or by request from BEA. For additional information, see "Key Source Data and Assumptions for the Advance Estimates of GNP: Easier Access and Redesignated Format" in the July 1988 SURVEY OF CURRENT BUSINESS.

Similarly, nonresidential fixed investment responded to upswings in sales and in corporate profits. Real final sales to domestic purchasers increased 2.2 percent in 1992 after decreasing 1.4 percent in 1991. Corporate profits are not yet available for the fourth quarter of 1992; however, for the first three quarters of the year, profits averaged 10.4 percent more than in 1991.

Residential investment responded to the upswing in consumer income and to a continued downtrend in interest rates; the mortgage commitment rate dropped 85 basis points in 1992, to 8.4 percent, after dropping about the same amount as in 1991.

Inventory investment probably reflected, at least in part, an anticipated upswing in sales.

Prices

As noted earlier, the fixed-weighted price index for gross domestic purchases increased 2.8 percent in the fourth quarter after increasing 2.5 percent in the third (table 3). Prices of gross domestic purchases less food and energy, which may be viewed as a measure of the underlying inflation rate in the U.S. economy, increased 3.0 percent in the fourth quarter after increasing 2.3 percent in the third (chart 2).

Prices of personal consumption expenditures increased 3.1 percent in the fourth quarter after increasing 2.6 percent in the third. The step-up was more than accounted for by prices of "other" personal consumption expenditures, which in-

creased 3.3 percent after increasing 2.5 percent. Prices of furniture and household equipment and of clothing and shoes turned up, and prices of most services accelerated. In services, transportation posted the largest price increase, which mainly reflected higher air fares. Prices of food increased at about the same rate in the fourth quarter as in the third. Energy prices decelerated. The deceleration reflected downswings in the prices of fuel oil and coal and of gasoline and oil; prices of electricity and natural gas, in contrast, increased more in the fourth quarter than in the third.

Prices of nonresidential fixed investment increased 1.1 percent in the fourth quarter after increasing 1.4 percent in the third. Prices of nonresidential structures increased more in the fourth quarter than in the third. Prices of producers' durable equipment decreased slightly after a small increase. Most of the downward pressure on equipment prices came from computers; in addition, prices of transportation equipment dipped slightly, and prices of industrial and "other" equipment increased less than in the third quarter.

Prices of residential investment increased 4.6 percent in the fourth quarter after increasing 3.8 percent in the third.

Prices of government purchases increased 2.3 percent in the fourth quarter, about the same as in the third. Prices paid by the Federal Government increased 2.5 percent after increasing 3.6 percent; the deceleration was more than accounted for by prices of national defense pur-

chases of petroleum, ammunition, and services. Prices paid by State and local governments increased 2.1 percent after increasing 1.4 percent; the step-up was accounted for by employee compensation and prices of structures.

The price index for GDP, which measures prices paid for goods and services produced in the United States, increased 3.2 percent in the fourth quarter after increasing 2.1 percent in the third. This index differs from the price index for gross domestic purchases because it includes prices of exports and excludes prices of imports. Prices of exports increased 0.6 percent in the fourth quarter after increasing 1.7 percent in the third; prices of imports decreased 0.4 percent after increasing 5.6 percent.

Personal income

Real disposable personal income (DPI) increased 3.8 percent in the fourth quarter after increasing 0.5 percent in the third (chart 3). The acceleration was accounted for by a step-up in current-dollar DPI, which increased 7.3 percent in

the fourth quarter after increasing 2.0 percent in the third.

Personal income increased \$93.7 billion in the fourth quarter after increasing \$33.1 billion in the third (table 4). The acceleration was largely due to an upswing in farm proprietors' income and

IVA Inventory valuation adjustment

CCAAdj Capital consumption adjustment

1. This adjustment is necessary because the acceleration of bonus payments in the securities industry is not captured by BEA's normal estimating procedures. Based on publicly available sources, BEA has estimated that about one-half of the bonuses earned in the first three quarters of 1992 were paid in the fourth quarter. Normally a much smaller portion of the bonuses is paid in the year in which they are earned.

This payment for earnings in earlier quarters is not reflected in wages and salaries accrued or earned (i.e., in national income wages). Thus, private wages and salaries in national income (table 1.14 of the "Selected NIPA Tables") are \$6.0 billion less than wages and salaries in personal income (table 2.1), and a -\$6.0 billion "wage accrual less disbursement" appears in table 1.9

step-ups in wage and salary disbursements and in nonfarm proprietors' income.

Wage and salary disbursements increased \$43.8 billion in the fourth quarter after increasing \$22.2 billion in the third. Wages and salaries in both private industry and government increased more in the fourth quarter than in the third. The step-up in private industry was concentrated in the manufacturing and services industries, but the other major private industries also contributed. In manufacturing, wages and salaries were boosted \$3.9 billion in the fourth quarter by bonus payments to employees in the motor vehicle industry. In services, accelerated bonus payments in the securities industry added \$6.0 billion to the fourth-quarter increase; typically, most bonuses in this industry are paid in January and are based on profits earned in the preceding year. In government, most of the step-up was accounted for by retirement incentive payments to U.S. Postal Service employees.

Farm proprietors' income increased \$16.6 billion in the fourth quarter after decreasing \$7.0 billion in the third; the changes reflected the pattern of Federal farm subsidies and the effects of Hurricanes Andrew and Iniki. Federal farm subsidies increased \$8.7 billion in the fourth quarter after decreasing \$6.4 billion in the third; the upswing reflected increases in Conservation Reserve Program payments and in deficiency pay-

ments. The hurricanes reduced farm proprietors' income \$3.0 billion in the third quarter; this estimate includes crop losses and uninsured losses to residential and business property. Excluding subsidies and the effects of the hurricanes, farm proprietors' income increased \$5.5 billion in the fourth quarter after increasing \$2.4 billion in the third; the acceleration reflected increases in market prices and farm production.

Nonfarm proprietors' income increased \$13.2 billion in the fourth quarter after increasing \$6.0 billion in the third. The step-up primarily reflected increases in residential construction and retail sales.

Rental income of persons increased \$7.1 billion in the fourth quarter after increasing \$3.1 billion in the third. In the third quarter, uninsured losses resulting from the hurricanes reduced rental income \$4.1 billion (such losses are treated as expenses in calculating rental income).

Personal interest income declined for the fourth consecutive quarter. The declines reflected recent decreases in interest rates.

Personal outlays—largely personal consumption expenditures—increased about the same amount as disposable personal income in the fourth quarter; thus, personal saving changed little. The personal saving rate dipped 0.1 percentage point to 4.5 percent in the fourth quarter. 

NATIONAL INCOME AND PRODUCT ACCOUNTS

Selected NIPA Tables

New estimates in this issue: Fourth quarter 1992, advance.

The selected set of national income and product accounts (NIPA) tables shown in this section presents quarterly estimates, which are updated monthly. (In most tables, the annual estimates are also shown.) Alternative quantity and price measures are not yet available; leaders are shown for these parts.

The tables shown are available on the day of the gross domestic product (GDP) news release on printouts and diskettes on a subscription basis or from the Commerce Department's Economic Bulletin Board. Most shown in this section are available, beginning with 1959, on diskette or magnetic tape. For order information, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, Washington, DC 20230, or call (202) 523-0669.

NOTE.—This section of the SURVEY is prepared by the National Income and Wealth Division and the Government Division.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GDP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farm.

NOTE.—The quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed weighted measures use as weights the composition of output in 1987. For the alternative indexes, the chain-type indexes with annual weights use weights for the preceding and current years, and the indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, and 1987 and the most recent year. Percent changes from preceding period for selected items in this table are shown in table 8.1.

NOTE.—Except for disposable personal income, the quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed-weighted measures use as weights the composition of output in 1987. For the alternative indexes, the chain-type indexes with annual weights use weights for the preceding and current years, and the indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, and 1987 and the most recent year.

Revised Constant-Dollar Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade

TABLES 1-5 PRESENT estimates of constant-dollar inventories, sales, and inventory-sales (i-s) ratios for manufacturing and trade, quarterly beginning with 1977 and monthly beginning with July 1991.¹ Estimates of constant-dollar inventories, sales, and i-s ratios are shown in tables 1-3, respectively. Fixed-weighted constant-dollar i-s ratios—ratios obtained by weighting detailed industry ratios by 1987 sales—are shown in table 4. Manufacturing inventories by stage of fabrication are shown in table 5.

For inventories, these ratios incorporate the national income and product accounts (NIPA) series for manufacturing, merchant

1. This set of tables was last published in the September 1991 SURVEY OF CURRENT BUSINESS. Since then, estimates of the ratio of total manufacturing and trade inventories to sales in constant (1982) dollars, which is a component of the composite index of lagging indicators, have been included monthly in the "Business Cycle Indicators" section of the SURVEY; these estimates were prepared by extrapolating the data from the September 1991 SURVEY by a preliminary 1987-dollar series.

wholesalers, and retailers released in the comprehensive revision of December 1991 (1977-88), in the annual revision of July 1992 (1989-91), and in the subsequent months for 1992. For sales, they incorporate recently completed BEA estimates beginning with 1977.

The revised ratios for manufacturing and trade show a significantly different trend over the last decade than the previously published estimates (chart 1). On the revised basis, the ratios for 1991 are nearly as high as during 1981-82. In contrast, the previously published ratios had been declining. Much of the revision in trend from 1982 to 1991 is accounted for by revisions to manufacturing inventories for 1988-90. These revisions primarily reflect the incorporation of inventories from the Census Bureau's *Annual Survey of Manufactures* at the time of the comprehensive and 1992 annual NIPA revisions.² The box on the next page compares the course of this ratio over the period since 1981-82 with some of the other i-s ratios available.

Data availability

Quarterly and monthly constant-dollar manufacturing and trade inventories, sales, and inventory-sales ratios, as well as constant-dollar manufacturing inventories by stage of fabrication for 1977-92, are available on printouts, diskette, and computer tape. Data for 1967-76 will be available soon. To order, write to the National Income and Wealth Division, BE-54, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Specify Constant-Dollar Manufacturing and Trade Inventories, Sales, and Ratios (Accession No. BEA 54-90-21-205 for printouts, BEA 54-91-40-409 for diskette, or BEA 54-85-01-004 for computer tape), and include a check or money order for \$55.00 for printout, \$20.00 for diskette, or \$100.00 for computer tape, payable to the Bureau of Economic Analysis. To order by telephone, call (202) 523-0669; MasterCard and VISA are accepted.

Tables 1 through 5 begin on page 30. 

2. Revisions for periods prior to 1988 primarily reflect the incorporation at the time of the comprehensive revision of (1) revised prices (including prices for computers and peripheral equipment), (2) the shift in base period from 1982 to 1987 of the prices used in calculating constant-dollar estimates, and (3) updated commodity weights and turnover periods used in the calculating inventory prices. Approximately three-fifths of the revision in manufacturing inventories in 1990 is the cumulative result of introducing new source data; the remainder reflects changes in deflation.

CHART 1

Constant-Dollar Inventory-Sales Ratio for Manufacturing and Trade

U.S. Department of Commerce, Bureau of Economic Analysis

Alternative Inventory-Sales Ratios

Inventory-sales (i-s) ratios are used to assess the need for business to add to or reduce inventories in response to changes in demand. Variations and trends in i-s ratios are closely watched by business cycle analysts.

The inventories used in computing i-s ratios are available on a current-dollar book-value basis, on a current-dollar replacement-cost basis, and on a constant-dollar basis. The Census Bureau's book-value estimates are based on the inventories reported by companies using a variety of accounting methods. BEA's current-dollar estimates are based on the Census Bureau's book-value inventories revalued to a consistent replacement-cost basis, and BEA's constant-dollar estimates are based on inventories that are valued in 1987 prices.

The revised constant-dollar i-s ratios presented in this report supplement the quarterly current- and constant-dollar inventories-final

sales ratios for domestic business, nonfarm business, and goods and structures presented in tables 5.12 and 5.13 of the "Selected NIPA Tables," as well as the Census Bureau's book-value series (table A).

All of the current-dollar i-s ratios in table A exhibit a declining trend from their 1981-82 recession peaks, and their 1990-91 levels are well below previous peaks. These current-dollar series tend to support analysts' perceptions that just-in-time delivery systems and competitive pressures have kept inventories low.

The constant-dollar ratios present a mixed picture. The constant-dollar ratios for domestic business and nonfarm business also show a declining trend, albeit a more moderate one than the current-dollar ratios. In contrast, the constant-dollar ratios both for nonfarm inventories to final sales of goods and structures and for manufacturing and trade inventories to sales exhibit no clear trend. They appear to follow a cyclical pattern in which their 1990-91 peaks are roughly equal to their previous cyclical peaks.

1. The fourth-quarter ratios are calculated as end-of-quarter inventories divided by quarterly sales at monthly rates, with the exception of the current-dollar ratios for manufacturing and trade, which are calculated as averages of the monthly ratios published by the Census Bureau.

2. Inventory book values published by the Census Bureau for periods prior to 1982 do not include LIFO reserve and are therefore less comparable to replacement cost inventories. Because of this discontinuity, the ratios for periods prior to 1982 are not shown.

^p Preliminary.

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.

NOTE.—Manufacturing inventories are classified by the type of product produced by the establishment holding

the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory.

Estimates for 1986 and earlier periods are based on the 1972 Standard Industrial Classification (SIC). Beginning with 1987, estimates are based on the 1987 SIC. This discontinuity is small and affects only manufacturing industries (primarily electronic and other electric equipment and other durable goods).

Table 4: The I-S ratios shown in this table were obtained by weighting detailed industry I-S ratios by 1987 sales. For manufacturing, 21 industries were used; for merchant wholesalers, 20 kinds of business; and for retail trade, 8 kinds of business.

Comprehensive Information on the U.S. Economy

Over 2,000 Data Series — Updated Monthly

The SURVEY OF CURRENT BUSINESS provides the broad scope and the statistical detail to keep you informed, month by month, about U.S. economic conditions. It is the journal of record for many of the headline-making economic statistics that influence decisionmakers in business and government, including:

- Gross domestic product (GDP),
- Personal income (both national and regional),
- Leading economic indicators, and
- U.S. balance of payments.

The SURVEY's articles analyze these numbers and present the statistical detail and methodologies that underlie them.

The SURVEY also contains two statistical sections that present an array of economic data from public and private sources.

- The "Business Cycle Indicators" section consists of tables and charts for over 250 series that are widely used in business cycle analysis.
- The "Current Business Statistics" section consists of tables for over 1,900 series covering general business activities and specific industries.

To keep up with the rapidly changing U.S. economy, subscribe to the SURVEY OF CURRENT BUSINESS today.

Personal Income by State and Region, Third Quarter 1992

This article was written by Howard L. Friedenberg and Duke D. Tran. The quarterly estimates of State personal income were prepared by the Regional Economic Measurement Division.

PERSONAL INCOME in the Nation increased 0.7 percent in the third quarter of 1992; it had increased 1.0 percent in the second quarter and 1.5 percent in the first.¹

In the third quarter, personal income growth slowed in 38 States and picked up in 12 States. The States with the sharpest slowdowns were Hawaii, Florida, Louisiana, North Dakota, South Dakota, Wyoming, Montana, Michigan, Idaho, and Vermont. In Hawaii, the slowdown reflected the impact of Hurricane Iniki, and in Florida and Louisiana, the slowdowns reflected the impact of Hurricane Andrew. In North Dakota, South Dakota, Wyoming, and Montana, the slowdowns were largely in farm income. In Michigan and Vermont, the slowdowns were largely in manufacturing and construction payrolls. The States with the sharpest pickups in income were Iowa and Alaska; the pickups were spread across most

industries. (See tables 1 and 2 at the end of this article.)

Income Growth During the Recovery and the Recession

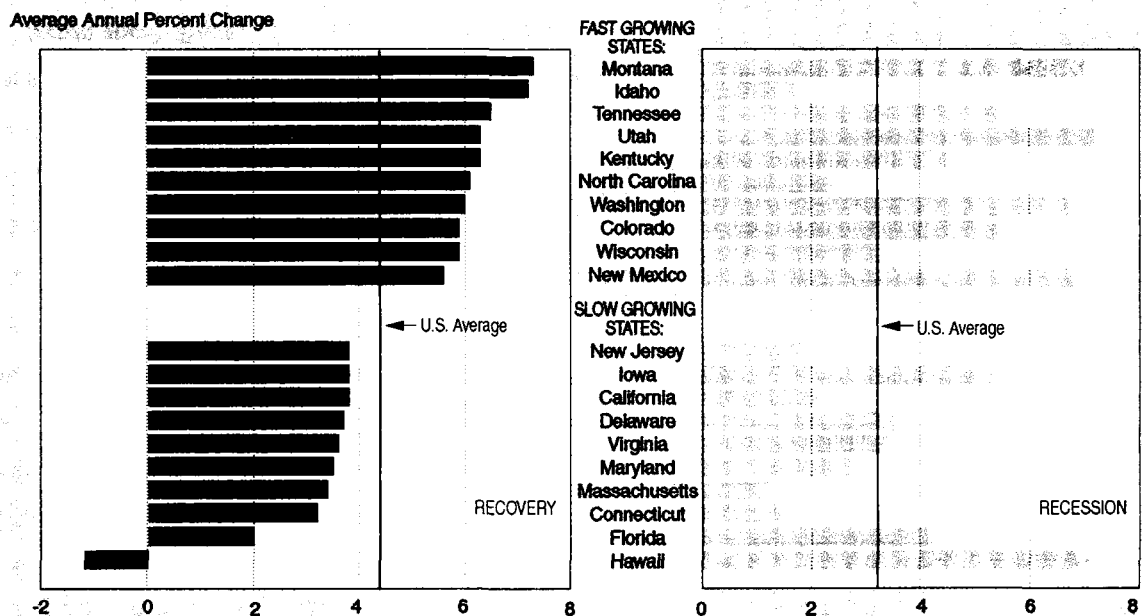

In the six quarters of recovery following the business cycle trough in the first quarter of 1991, personal income in the Nation increased at an annual rate of 4.4 percent. U.S. prices measured by the fixed-weighted price index for personal consumption expenditures increased at an annual rate of 3.2 percent. By comparison, in the three quarters of recession following the business cycle peak in the second quarter of 1990, personal income in the Nation increased at an annual rate of 3.2 percent, and U.S. prices increased at an annual rate of 5.6 percent.

During the recovery, increases in personal income equaled or exceeded the increase in U.S. prices in all States except Hawaii and Florida,

1. These percent changes are not at annual rates.

which were struck by hurricanes in the third quarter of 1992. During the recession, increases in personal income equaled or exceeded the increase in U.S. prices in only 11 States.

Fastest growing States

During the recovery, the annual rate of increase in personal income in the 10 fastest growing States ranged from 7.3 percent in Montana to 5.6 percent in New Mexico (table A).

In 8 of the 10 States—Montana, Tennessee, Utah, Kentucky, Washington, Colorado, Wisconsin, and New Mexico—personal income also had grown fast during the recession (chart 1). During the recovery, each of these States had above-average changes in farm income and above-average increases in payrolls in construction, in the transportation-public utilities group, in retail trade, and in services. In addition, most of these States had above-average increases in payrolls in wholesale trade, in the finance-insurance-real estate group, and in government. During the recession, all eight States had above-average changes in payrolls in construction and above-

average increases in payrolls in wholesale and retail trade and in services.

In Idaho and North Carolina, personal income grew fast during the recovery after growing slowly during the recession. In Idaho, farm income and payrolls in durables manufacturing increased faster than average after declining. In North Carolina, payrolls in nondurables manufacturing, in retail trade, and in government increased faster than average after declining.

In North Carolina and Kentucky, military payrolls rebounded from low levels in the first quarter of 1991, primarily as a result of Operation Desert Storm (the compensation of military personnel assigned abroad is excluded from State personal income).

Slowest growing States

During the recovery, the annual rate of change in personal income in the 10 slowest growing States ranged from a decline of 1.2 percent in Hawaii to increases of 3.8 percent in New Jersey, Iowa, and California (table B). In 5 of the 10 States—New Jersey, California, Maryland, Massachusetts, and Connecticut—personal income also had grown

slowly during the recession. During the recovery, each of these States had declines in payrolls in durables manufacturing and in construction and below-average increases in payrolls in retail trade and in services. The declines in manufacturing payrolls partly reflected a cutback in U.S. defense spending, and the declines in construction payrolls partly reflected oversupply of commercial and residential structures. In addition, most of these States had below-average changes in payrolls in nondurables manufacturing and in the transportation-public utilities group. During the recession, all five States had declines in payrolls in durables manufacturing, in construction, and in retail trade, and they had below-average changes in payrolls in services.

In Iowa, Delaware, Virginia, and Florida, personal income grew slowly during the recovery after growing at above-average rates during the

recession. In Iowa, farm income declined after increasing; the decline was due to the timing of Federal corn subsidy payments to farmers, which are generally made in the first or second quarter of the year. In Delaware and Virginia, changes in payrolls in wholesale trade and in services were below average after having been above average. In Delaware, payrolls in nondurables manufacturing declined after increasing faster than average; the decline mainly reflected weakness in the chemicals industry. In Florida, the slowdown in income growth reflected the impact of Hurricane Andrew on payrolls, proprietors' income, and rental income of persons.

In Hawaii, personal income declined during the recovery after growing fast during the recession. The turnaround reflected the impact of Hurricane Iniki.

User's Guide to BEA Information

The Bureau of Economic Analysis (BEA) provides basic information on such key issues as economic growth, inflation, regional development, and the Nation's role in the world economy. This guide, which lists the most recent and most frequently requested BEA products, helps users locate and obtain that information.

The guide contains program descriptions and entries for specific products. The first section, entitled "General," describes the products that cut across the range of BEA's work. The following sections describe the products related to BEA's four program areas: National economics, regional economics, international economics, and other tools for economic analysis.

General

BEA's current national, regional, and international estimates usually appear first in news releases. (For upcoming release dates, see the outside back cover.) The information in news releases is available to the general public in four forms: On recorded telephone messages, online through the Economic Bulletin Board (EBB), by fax through EBB/FAX, and in printed *BEA Reports*. This section describes these products, as well as the SURVEY OF CURRENT BUSINESS—BEA's monthly journal of record. General information products produced by BEA are discussed first. This is followed by descriptions of electronic products and services available through the Department of Commerce's Office of Business Analysis, which also disseminates BEA's economic data. For more information on any of these programs and products, write to the Public Information Office, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0777; for Telecommunications Device for the Deaf (TDD), call (202) 523-3506.

BEA Products

1.1 SURVEY OF CURRENT BUSINESS (publication). A monthly journal containing estimates and analyses of U.S. economic activity. Most of BEA's work is presented in the SURVEY, either in full or in summary form. Includes the "Business Situation"—a review of current economic developments—and regular and special articles pertaining to the national, regional, and international economic accounts and related topics. Among the special articles that appeared in 1992 were "Alternative Measures of Change in Real Output and Prices," "Pollution Abatement and Control Expenditures: Estimates for 1990 and Revised Estimates for 1972-89," "Reconciliation of the U.S.-Canadian Current Account," and "The Comprehensive Revision of State Personal

How To Use This Guide

Entries in this guide are arranged by program area. Each program area includes descriptions and schedules of current estimates, a list of products available, and telephone numbers for users who have questions or need assistance.

Each BEA product is available from one of three sales agents, abbreviated as follows:

BEA—Bureau of Economic Analysis

GPO—U.S. Government Printing Office, Superintendent of Documents

NTIS—National Technical Information Service

Each product's listing identifies the sales agent and includes a stock or accession number to be used when ordering. An order form from each sales agent, including specific ordering information, is provided at the end of this guide. Each sales agent accepts credit cards.

BEA data are also available in several electronic products from the Office of Business Analysis (see entries 1.4–1.7).

Income.” Current quarterly estimates of the national income and product accounts (see program description 2.0) appear every month.

The SURVEY also contains two statistical sections that present an array of economic data from public and private sources. The Business Cycle Indicators section consists of tables for about 270 series and charts for about 130 series that are widely used in analyzing current cyclical developments. The Current Business Statistics section consists of tables for over 1,900 series covering general business activities and specific industries. The SURVEY is available from GPO: List ID SCUB, price \$29.00 per year (domestic second-class mail), \$36.25 (foreign second-class mail), or \$76.00 (domestic first-class mail); single copy price, \$8.00 (domestic) and \$10.00 (foreign). Foreign airmail delivery rates are available upon request from GPO.

1.2 Recorded Telephone Messages. Brief (3–5 minutes) recorded telephone messages summarizing key estimates immediately after their release. The messages are available 24 hours a day for several days following release. The usual time of release (eastern standard or eastern daylight time) and the telephone numbers to call are as follows:

Leading Indicators (8:30 a.m.)	(202) 898-2450
<i>The message is updated weekly, usually on Monday, to include recently available component data that will be incorporated into the next release.</i>	
Gross Domestic Product (8:30 a.m.)	-2451
Personal Income and Outlays (10:00 a.m.)	-2452
Merchandise Trade, Balance of Payments Basis or U.S. International Transactions (10:00 a.m.)	-2453
<i>The message summarizes the more recently released of these two series.</i>	

1.3 BEA Reports (EBB, EBB/FAX, news release). Five sets of reports that present the information contained in the BEA news releases for the following areas: Gross domestic product; personal income and outlays; regional reports; international reports; and composite indexes of leading, coincident, and lagging indicators. The reports contain summary estimates. All reports are available online through the EBB (see entry no. 1.4) and by fax through EBB/FAX (see entry no. 1.5). The printed reports are mailed the day after estimates are released. Annual subscriptions to the printed reports may be ordered for individual sets or for all five sets. Order information for the

five printed sets is given below. For information on individual sets, see the following corresponding entries: Gross domestic product, entry no. 2.1; personal income and outlays, entry no. 2.2; regional reports, entry no. 6.1; international reports, entry no. 9.1; and composite indexes of leading, coincident, and lagging indicators, entry no. 12.1.

All Five Sets. Usually a total of 55 printed reports. Available from BEA: Accession No. 53-91-11-019, price \$110.00 per year.

BEA's economic statistics are also made available in a number of electronic formats through the Commerce Department's Office of Business Analysis (OBA).

1.4 Economic Bulletin Board. Online computer access to news releases and other information. BEA places an increasing range of its information on the Economic Bulletin Board (EBB). BEA news releases are available on the EBB shortly after their release. Selected estimates and articles such as the "Business Situation" and other SURVEY OF CURRENT BUSINESS articles are also available. (Other items in this guide that are available through the EBB are marked "EBB" after the title.) The EBB may be accessed by personal computer, computer terminal, or word processor equipped with a modem; the information available on it—which includes information from several Federal agencies—may be either viewed on the user's screen or downloaded. The EBB is available by subscription from OBA. A \$35.00 registration fee covers 2 hours of connect time on the system; additional time is charged by the minute. Instant hookup is available; high-speed service is available at additional cost. For more information, call OBA at (202) 482-1986.

1.5 EBB/FAX. Facsimile-based service that provides access to BEA news releases, usually within 1 hour of the time of the release. Dial 1-900-786-2329 from a fax machine's touch-tone telephone and follow the simple voice instructions. The EBB/FAX handles the transmission of the selected file. The cost of EBB/FAX calls is \$0.65 per minute. Charges for this service will appear on your regular telephone bill. No registration charge or other fees apply. This service is available 24 hours a day, 7 days a week. For more information, call OBA at (202) 482-1986.

1.6 The National Trade Data Bank (CD-ROM). BEA places a significant number of its information programs in the National Trade Data Bank (NTDB). These include international transactions, foreign direct investment, balance of payments, annual and quarterly national income and product accounts, and others. The NTDB contains over 80 information programs from 15 Government agencies, including export and import statistics, foreign marketing reports, "how-to" guides for exporters, and names of companies overseas that want to do business with U.S. exporters. The NTDB is produced monthly and may be ordered from OBA by calling (202) 482-1986; individual discs cost \$35.00 and an annual subscription (12 monthly discs) is \$360.00. The NTDB is also available for public use at nearly 800 Federal Depository Libraries located throughout the Nation.

1.7 The National Economic, Social, and Environmental Data Bank (CD-ROM). The National Economic, Social, and Environmental Data Bank (NESE-DB), the domestic counterpart to the National Trade Data Bank, contains many of the Federal Government's most popular publications relating to the U.S. economy, its society, and the environment and supports the business community by providing information on Government resources available to businesses and rules and regulations that may affect them. BEA statistics included on the CD-ROM include the national income and product accounts, business statistics, and business cycle indicators. The NESE-DB is produced quarterly in February, May, August, and November. Single discs may be purchased for \$95.00 and an annual subscription (four quarterly discs) is \$360.00. The NESE-DB is also available for public use at 860 Federal Depository Libraries. Call OBA at (202) 482-1986 for more information or to place an order.

National Economics

BEA's national economics program encompasses the national income and product accounts, government transactions on a national income and product accounting basis, and the input-output accounts.

National income and product accounts

2.0 The national income and product accounts (NIPA's) show the value and composition of the Nation's output and the distribution of incomes generated in its production. The accounts include estimates of gross domestic product (GDP)—the market value of the Nation's output of goods and services—in current and constant dollars, GDP price measures, the goods and services that make up GDP in current and constant dollars, national income, personal income, and corporate profits. In addition, BEA produces specialized measures such as estimates of auto and truck output, gross domestic product of corporate business, housing output, and business inventories and sales. Measures of the inventory and fixed capital stocks consistent with the NIPA output measures are also provided. Further, the accounts provide a consistent framework within which estimates of special interest—such as expenditures to protect the environment—are prepared. (Information about the environmental estimates is provided in program description 5.0.)

The estimates of GDP are prepared each quarter in the following sequence: *Advance* estimates are released near the end of the first month after the end of the quarter; as more detailed and comprehensive data become available, *preliminary* and *final* estimates are released near the end of the second and third months, respectively. Monthly estimates of personal income and outlays are released near the end of the month following the reference month; estimates for the two to four most recent months are revised at that time. Ordinarily, annual NIPA revisions are carried out each July and cover the months and quarters of the most recent calendar year and the preceding 2 years. (For example, the July 1992 revision covered 1989, 1990, and 1991.) These revisions are timed to incorporate newly available major annual source data. Comprehensive (benchmark) revisions are carried out at about 5-year intervals (most recently in 1991). Current quarterly and monthly estimates are reported in the SURVEY OF CURRENT BUSINESS; quarterly NIPA estimates appear in a set of 53 "selected" tables, and monthly personal income and outlays estimates are reported in the Current Business Statistics (or S-pages). The full set of annual revisions (132 tables) usually is reported in the July issue. Annual estimates of the fixed capital stock are reported in the August issue.

In addition to the current and historical estimates described in the entries that follow, a considerable amount of component detail (for example, purchases of private structures by type) and industry detail (for example, change in business inventories by industry) is available. For further information about this detail or about the listed computer tapes, printouts, and diskettes, write to the National Income and Wealth Division, BE-54, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0669. For specific questions, the following telephone numbers may be used:

GDP	(202) 523-0824
Personal income and outlays	-0832
Corporate profits	-0888
Personal consumption expenditures	-0819
Gross private domestic investment	-0791
GDP by industry	-0517

A recorded telephone message summarizing the latest GDP estimates is available by calling (202) 898-2451 (see entry no. 1.2). A recorded message summarizing the latest personal income and outlays estimates is available at (202) 898-2452.

Current estimates

2.1 **BEA Reports: Gross Domestic Product** (EBB, EBB/FAX, news release). Monthly reports with summary NIPA estimates that feature GDP and corporate profits.

Reports are available online through the EBB (see entry no. 1.4) and by fax through EBB/FAX (see entry no. 1.5). Printed reports are mailed the day after estimates are released. (This set of reports is included in the five sets of *BEA Reports*; see entry no. 1.3.) The gross domestic product printed reports are available from BEA on a subscription basis: Accession No. 53-91-11-015, price \$24.00 per year.

2.2 BEA Reports: Personal Income and Outlays (EBB, EBB/FAX, news release). Monthly reports with summary NIPA estimates that feature personal income and outlays. Reports are available online through the EBB (see entry no. 1.4) and by fax through EBB/FAX (see entry no. 1.5). Printed reports are mailed the day after estimates are released. (This set of reports is included in the five sets of *BEA Reports*; see entry no. 1.3.) The personal income and outlays printed reports are available from BEA on a subscription basis: Accession No. 53-91-11-014, price \$24.00 per year.

2.3 Monthly Advance National Income and Product Accounts Tables (EBB, diskette, or printout). NIPA estimates as they appear in the current issue of the SURVEY OF CURRENT BUSINESS. Updated monthly. Available online through the EBB (see entry no. 1.4). Diskettes and printouts are available 1 day after the release of GDP and are available from BEA on a subscription basis:

Diskette (5¼")—Accession No. 54-85-41-401, price \$200.00 per year.

Printout—Accession No. 54-83-21-201, price \$100.00 per year.

2.4 Key Source Data and Assumptions (EBB, printed table). Available source data and assumptions for missing source data that are used to prepare the advance estimates of GDP. Available in January, April, July, and October. Available online through the EBB (see entry no. 1.4). Annual subscriptions for the printed table begin in January and are available from BEA: Accession No. 54-84-21-209, price \$25.00 per year.

2.5 National Income and Product Accounts (diskette). The full set of NIPA tables, most with estimates from 1929 to the present. Diskettes (3½" HD) available from BEA: Accession No. 54-89-41-401, price \$40.00 (two diskettes). [Other types of diskettes are available; for information, call (202) 523-0804.]

Historical estimates

2.6 National Income and Product Accounts (computer tape). The full set of NIPA tables, most with estimates from 1929 to the present. Available from BEA: Accession No. 54-83-01-001, price \$100.00.

2.7 National Income and Product Accounts of the United States: Volume 1, 1929–58; Volume 2, 1959–88 (publication). The full set of NIPA tables. Includes statistical conventions and the definitions and classifications underlying the NIPA's. (1992) Vol. 2 is available from GPO: Stock No. 003-010-00231-0, price \$25.00. Vol. 1 should be available from GPO in the spring of 1993.

Summary tables listing the principal source data and estimating methods used to prepare the NIPA estimates are included in the articles in the SURVEY OF CURRENT BUSINESS that describe annual revisions to the NIPA's. These tables were last published in the July 1992 issue. A number of papers that provide detailed descriptions of NIPA concepts and methodologies have been published (see next entry).

NIPA methodology

NOTE.—The methodologies used to prepare the NIPA's are periodically refined to incorporate definitional changes, new source data, and/or new estimating procedures. In most cases, changes in methodology are introduced as part of the annual revisions that usually occur each July or as part of the comprehensive revisions that occur about every 5 years. The major methodological changes introduced in recent annual revisions are described in articles about the revised estimates in the July 1986, 1987, 1988, 1989, 1990, and 1992 issues of the SURVEY OF CURRENT BUSINESS. The major

National Economics— Continued

methodological changes introduced in the most recent comprehensive revision are listed on pages 38-39 of the December 1991 SURVEY.

Methodology Papers (publications). A series of papers that documents the conceptual framework of the NIPA's and the methodology used to prepare the estimates. To date, six papers are available.

- 2.8 **An Introduction to National Economic Accounting** (NIPA Methodology Paper No. 1). An introduction to the concepts of the U.S. NIPA's that places these accounts within the larger framework of national economic accounting. Shows the step-by-step derivation of a general national economic accounting system from the conventional accounting statements used by business and government and inferred for other transactors. Also shows how the income and product accounts, the capital finance accounts, and the input-output accounts—the major branches of national economic accounting in the United States today—are derived from this general system. Also appeared in the March 1985 SURVEY OF CURRENT BUSINESS. (1985) Available from NTIS: Accession No. PB 85-247567, price \$12.50 (paper copy), \$9.00 (microfiche).
- 2.9 **Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends** (NIPA Methodology Paper No. 2). A description of the concepts, sources, and methods of the corporate profits components of the NIPA's. (1985) Available from NTIS: Accession No. PB 85-245397, price \$19.50 (paper copy), \$9.00 (microfiche).
- 2.10 **Foreign Transactions** (NIPA Methodology Paper No. 3). A description of the preparation of estimates in the NIPA's of net exports (both current- and constant-dollar), transfer payments to foreigners, capital grants received by the United States, interest paid by Government to foreigners, and net foreign investment. Also describes the relationship between foreign transactions estimates in the NIPA's and those in the balance of payments accounts. (1987) Available from NTIS: Accession No. PB 88-100649, price \$19.50 (paper copy), \$9.00 (microfiche).
- 2.11 **GNP: An Overview of Source Data and Estimating Methods** (NIPA Methodology Paper No. 4). Basic information about GNP, including the conceptual basis for the account that presents GNP, definitions of each of the components on the income and product sides of that account, and a summary, presented in tabular form, of the source data and methods used in preparing estimates of current- and constant-dollar GNP. Also provides an annotated bibliography, with a directory, of the more than 50 items over the last decade that provided methodological information about GNP. Appeared in the July 1987 SURVEY OF CURRENT BUSINESS. (1987) Available from NTIS: Accession No. PB 88-134838, price \$17.50 (paper copy), \$9.00 (microfiche). The summary of source data and methods was updated in the July 1992 issue of the SURVEY (tables 7 and 8, pages 25 through 41).
- 2.12 **Government Transactions** (NIPA Methodology Paper No. 5). Presents the conceptual basis and framework of government transactions in the national income and product accounts, describes the presentation of the estimates, and details the sources and methods used to prepare estimates of Federal transactions and of State and local transactions. (1988) Available from NTIS: Accession No. PB 90-118480, price \$27.00 (paper copy), \$9.00 (microfiche).
- 2.13 **Personal Consumption Expenditures** (NIPA Methodology Paper No. 6). Presents the conceptual basis and framework for personal consumption expenditures (PCE) in the NIPA's, describes the presentation of the estimates, and details the sources and methods used to prepare annual, quarterly, and monthly estimates of PCE. Includes a bibliography, definitions, and conve-

nient tabular summaries of estimating procedures. (1990) Available from GPO: Stock No. 003-010-00200-0, price \$4.50.

2.14 The Underground Economy: An Introduction (reprint). A discussion of the coverage, measurement methods, and implications of the underground economy. Part of the discussion features the relation between the NIPA's and the underground economy: Illegal activities in the context of the NIPA's, three sets of NIPA estimates sometimes misunderstood as being measures of the underground economy, and the effect on NIPA estimates of possible misreporting in source data due to the underground economy. Articles appeared in the May 1984 and July 1984 issues of the SURVEY OF CURRENT BUSINESS. (1984) Available from BEA: Accession No. 53-84-10-001, price \$5.00.

2.15 Evaluation of the GNP Estimates (reprint). An evaluation of the GNP estimates, covering the reliability of estimates, sources of error and types of statistical improvement, status of source data, documentation of methodology, release schedules, and security before release. This article appeared in the August 1987 SURVEY OF CURRENT BUSINESS. (1987) Available from BEA: Accession No. 53-88-10-001, price \$5.00.

2.16 The Use of National Income and Product Accounts for Public Policy: Our Successes and Failures (BEA Staff Paper No. 43). An evaluation using two indirect approaches. The first reviews the "accuracy" of the estimates, using the size of revisions to GNP estimates as an indicator. The second reviews users' recommendations drawn from publications issued over the last 30 years. (1985) Available from NTIS: Accession No. PB 86-191541, price \$17.50 (paper copy), \$9.00 (microfiche).

2.17 The United Nations System of National Accounts: An Introduction (reprint). Describes the United Nations System of National Accounts (SNA), which is followed by most other countries, and contrasts it with the U.S. economic accounts. The article also presents estimates prepared by BEA to approximate some of the major SNA aggregates and describes the revision of the SNA that is underway. This article appeared in the June 1990 SURVEY OF CURRENT BUSINESS. (1990) Available upon request from BEA's Public Information Office.

2.18 Fixed Reproducible Tangible Wealth in the United States, 1925-89 (publication). Includes annual estimates of gross and net stocks, depreciation, discards, and average ages of gross and net stocks in historical-cost, constant-cost, and current-cost valuations, as follows: Fixed nonresidential private capital owned by each two-digit Standard Industrial Classification (SIC) establishment-based industry for 1947-89, based on the 1987 SIC; Fixed nonresidential private capital, by type of equipment and structures and by legal form of organization, for 1925-89; Residential capital, by type of equipment and structures, by legal form of organization, by industry, and by tenure group, for 1925-89; Durable goods owned by consumers, by type of goods, for 1925-89; Government-owned fixed capital, by type of equipment and structures, separately for the Federal Government and for State and local governments, for 1925-89. Also includes the investment series and service lives used to derive the wealth estimates and a detailed statement of methodology. (1993) Available from GPO: Stock No. 003-010-00235-2; call (202) 783-3238 for price and/or to order by telephone.

two-digit SIC establishment-based industry for 1947 to the present, based on the 1987 SIC. For durable goods owned by consumers, contains estimates by each NIPA type of goods for 1925 to the present. For fixed capital owned by governments, contains estimates by each NIPA type of equipment and structures, separately for the Federal Government and for State and local governments, for 1925 to the present. The estimates are in historical-cost, constant-cost (1987 dollars), and current-cost valuations. Also includes stock series similar to those used by the Bureau of Labor Statistics to derive measures of capital input for multifactor productivity studies. The investment series used to derive all of these estimates are also included, in the same detail as the stock estimates, in historical-cost and constant-cost (1987 dollars) valuations. Updated annually. Available from BEA:

Diskette (3½" HD)—Accession No. 54-89-40-004, price \$100.00 (five diskettes). [Diskettes can be ordered individually and for other types of diskettes; for information, call (202) 523-0822.]

Computer tape—Accession No. 54-89-00-001, price \$100.00.

2.20 Detailed Investment by Industry (diskette, computer tape). Annual estimates for 1947 to the present of investment purchased by each two-digit SIC establishment-based industry, separately for each detailed NIPA type of equipment and structures, based on the 1987 SIC. (The Wealth tape and diskettes in item 2.19 also include investment series for each industry, but only for total equipment, total structures, and the total of equipment and structures.) The estimates are in historical-cost and constant-cost (1987 dollars) valuations. Updated annually. Available from BEA:

Diskette (3½" HD)—Accession No. 54-89-40-005, price \$20.00. [Other types of diskettes may be ordered; for information, call (202) 523-0822.]

Computer tape—Accession No. 54-89-00-002, price \$100.00.

2.21 Detailed Wealth by Industry (diskette, computer tape). Annual estimates for 1947 to the present of gross and net stocks, depreciation, and discards for fixed nonresidential private capital owned by each two-digit SIC establishment-based industry, separately for each detailed NIPA type of equipment and structures, based on the 1987 SIC. (The Wealth tape and diskettes in item 2.19 also include estimates of gross and net stocks, depreciation, and discards for each industry, but only for total equipment, total structures, and the total of equipment and structures.) Also includes stock series similar to those used by the Bureau of Labor Statistics to derive measures of capital input for multifactor productivity studies. The estimates are in constant-cost (1987 dollars) and current-cost valuations. Updated annually. Available from BEA:

Diskette (3½" HD)—Accession No. 54-89-40-006, price \$60.00 (three diskettes). [Diskettes can be ordered individually and for other types of diskettes; for information, call (202) 523-0822.]

Computer tape—Accession No. 54-89-00-003, price \$100.00.

Government transactions

3.0 BEA's estimates of government receipts, expenditures, and surplus or deficit are on a national income and product accounting basis. The estimates are prepared separately for Federal and for State and local governments on the same schedule as that described for the NIPA's. Reconciliations of the Federal sector on a NIPA basis and the unified budget prepared by the Office of Management and Budget are the basis for an article in the SURVEY OF CURRENT BUSINESS, usually in February, about Federal fiscal programs for the next fiscal year, and for detailed tables in the July issue. These reconciliations, and more specialized work such as described in the papers that follow, facilitate analysis of the effects of government fiscal policies on the economy. An article on the fiscal position of State and local governments is usually published in the February SURVEY. 3.1 Government Transactions (NIPA Methodology Paper No. 5). Presents the conceptual basis and framework of government transactions in the national income and product accounts, describes the presentation of the estimates, and details the sources and methods used to prepare estimates of Federal transactions and of State and local transactions. (1988) Available from NTIS: Accession No. PB 90-118480, price \$27.00 (paper copy), \$9.00 (microfiche).

3.2 Cyclical Adjustment of the Federal Budget and Federal Debt: Updated Detailed Methodology and Estimates (BEA Staff Paper No. 45). Description of the models that BEA used, prior to the latest comprehensive revision of the NIPA's, to estimate the cyclically adjusted Federal budget and inflation-induced changes in the cyclically adjusted budget. The quarterly data for the variables in the models and the regression equations underlying the coefficients are presented. The paper also discusses the cyclical adjustment of Federal debt and shows some results. NOTE.—The procedures described in this staff paper have not been updated to reflect the latest comprehensive revision of the NIPA's; publication of the estimates in the SURVEY OF CURRENT BUSINESS has been suspended pending this update. (1986) Available from NTIS: Accession No. PB 87-157376, price \$27.00 (paper copy), \$9.00 (microfiche).

4.0 Input-output accounts for the United States show how industries interact— providing input to, and taking output from, each other—to produce GNP. Benchmark tables, based largely on the economic censuses, are prepared every 5 years; the latest benchmark table is for 1982, and the next will be for 1987. Annual tables are prepared using basically the same procedures as used for the benchmark tables, but with less comprehensive and less reliable source data. Associated tables showing capital flows from producing to using industries and employment and employee compensation by industry are also prepared. The computer tapes, diskettes, and printouts listed below are for the tables at the 85-industry level; more detailed tables are also available. For further information about this detail or about the listed computer tapes, diskettes, and printouts, write to the Interindustry Economics Division, BE-51, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0792. 5.0 BEA maintains a set of annual current- and constant-dollar estimates of capital expenditures and operating costs for pollution abatement and control. These estimates, which are prepared within the framework of the national income and product accounts, are classified by sector (consumers, business, and government) and by element of the environment affected (air, land, and water). The most recent SURVEY OF CURRENT BUSINESS article reporting the capital expenditures appeared in November 1988, and the most recent article reporting the total expenditures (including operating costs) appeared in June 1992. For further information, write to the Environmental Economics Division, BE-62, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0687. 5.1 BEA Reports: Pollution Abatement and Control Expenditures (EBB, news release). News release on annual pollution abatement and control expenditures. Available online through the EBB (see entry no. 1.4). Printed release available by calling or writing the Environmental Economics Division.

5.2 Stocks and Underlying Data for Air and Water Pollution Abatement Plant and Equipment (printout). Estimates of the gross and net capital stocks at historical, constant, and current cost; estimates of capital expenditures in constant and current dollars; price indexes by media (air and water) and for selected industry groups (manufacturing, electric utilities, and other nonmanufacturing); and estimates of lifetimes by media for pollution abatement plant and equipment. Available from BEA: Accession No. 62-82-20-001, price \$35.00.

Environmental estimates

Regional Economics

BEA's regional economics program provides estimates, analyses, and projections by region, State, metropolitan area, and county.

6.1 BEA Reports: Regional Reports (EBB, EBB/FAX, news release). Reports (usually six a year) with summary estimates of State personal income (quarterly and annual) and of county and metropolitan area personal income (annual). Reports are available online through the EBB (see entry no. 1.4). (The EBB carries, in addition to the news release, estimates of personal income by State and by county and earnings and wages by industry and by State; see entry 7.2.) The news releases are also available by fax through EBB/FAX (see entry no. 1.5). The printed reports are mailed the day after estimates are released. (This set of reports is included in the five sets of *BEA Reports*; see entry no. 1.3.) These printed regional reports are available from BEA on a subscription basis: Accession No. 53-91-11-017, price \$12.00 per year.

Regional estimates

7.0 Current quarterly State personal income estimates are reported in the January, April, July, and October issues of the SURVEY OF CURRENT BUSINESS. The annual estimates of State and local area personal income for a given year are subject to successive refinement. Preliminary annual State estimates, based on the current quarterly series, are released 4 months after the close of the reference year and published in the April SURVEY OF CURRENT BUSINESS. Revised annual estimates based on more reliable source data are published in the August SURVEY. These estimates are subsequently revised to incorporate newly available information used to prepare the current local area estimates. The revised State estimates, together with the current local area estimates, are published in the following April SURVEY. The annual estimates emerging from this process are subject to further revision for several succeeding years (the State estimates in April and August and the local area estimates in April), as additional data become available. The routine revisions of the State estimates for a given year are normally completed with the fourth April release. After that, the estimates will be changed only to incorporate a comprehensive revision in the national income and product accounts, which takes place approximately every 5 years, or to make important improvements to the estimates through the use of additional or more current State and local area data.

Estimates of personal income and employment by State, metropolitan area, and county are available through the Regional Economic Information System (REIS). The system includes an information retrieval service that provides a variety of analytical tabulations for counties and combinations of counties. All of the tabulations are available in several media.

BEA also makes its regional estimates available through the BEA User Group, members of which include State agencies, universities, and Census Bureau Primary State Data Centers. BEA provides its estimates of income and employment for all States and counties to these organizations with the understanding that they will make the estimates readily available.

For further information, write to the Regional Economic Measurement Division, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 254-6630. For specific questions, the following telephone numbers may be used:

7.1 Regional Economic Information System (REIS) CD-ROM, 1969-91 (CD-ROM). Estimates of annual personal income by major source, per capita personal income, earnings by two-digit SIC industry, full- and part-time employment by one-digit SIC industry, regional economic profiles, transfer payments by major program, and farm income and expenses for States, metropolitan areas, and counties. The CD-ROM con-

tains over 450 megabytes of data and documentation. All the estimates are stored as ASCII files that can be accessed in either sequential or random mode. The CD-ROM includes a REIS program that allows the user to display, print, or copy one or more of the standard tables from the historical personal income series.

In addition, the CD-ROM includes BEA estimates of quarterly personal income by State (1969:I-1992:IV); Census Bureau data on intercounty flows for 1960, 1970, and 1980; BEA's latest gross state product estimates for 1977-89; its projections to 2040 of income and employment for States and metropolitan areas; and total commuters' income flows, 1969-91. Updated annually. (May 1993) Available from BEA: Accession No. 55-91-30-599, price \$35.00.

7.2 Regional Income and Employment. The products listed in section 7.2 must be special-ordered from BEA for the specific area(s) needed. Items 7.2.1 through 7.2.12 are for the United States, regions, and States. Items 7.2.13 through 7.2.24 are for the United States, States, metropolitan areas, and counties and will be available in May 1993. All items are available on several media and can be purchased for a single area (a county, a metropolitan area, a State), for groups of areas (several counties, several metropolitan areas, all counties in a State, several States), or for all counties or all States in the United States. Some items are available online through the EBB (see entry no. 1.4). Before placing an order, write to the Regional Economic Measurement Division, REIS, BE-55, Bureau of Economic Analysis, Washington DC 20230, or call (202) 254-6630 for accession numbers, prices, and availability. Call the same number to place charge orders using MasterCard or VISA.

7.2.2 Quarterly Personal Income by Major Source and Earnings by Industry, 1969-92 (EBB, computer tape, printout, diskette). Major sources of personal income and earnings by one-digit SIC industry by quarter for the United States, regions, and States. (1993)

7.2.3 Quarterly Wages and Salaries by Major Source and Major Industry, 1969-92 (EBB, computer tape, printout, diskette). Wage and salary disbursements by one-digit SIC industry by quarter for the United States, regions, and States. (1993)

7.2.4 Personal Income, Per Capita Personal Income, and Total Population, 1929-92 (EBB, computer tape, printout, diskette). Total and per capita personal income and population annually for the United States, regions, and States. (April 1993)

7.2.5 Personal Income by Major Source and Earnings by Industry, 1958-91 (EBB, computer tape, printout, diskette). Major sources of personal income and earnings by two-digit SIC industry annually for the United States, regions, and States. (1992)

7.2.6 Wage and Salary Disbursements by Industry, 1958-91 (EBB, computer tape, printout, diskette). Wages and salaries by two-digit SIC industry annually for the United States, regions, and States. (1992)

7.2.7 Full-Time and Part-Time Employment by Industry, 1969-91 (computer tape, printout, diskette). Total employment by place of work by two-digit SIC industry annually for the United States, regions, and States. (1992)

7.2.8 Full-Time and Part-Time Wage and Salary Employment by Industry, 1969-91 (computer tape, printout, diskette). Wage and salary employment by place of work by two-digit SIC industry annually for the United States, regions, and States. (1992)

7.2.9 Transfer Payments, 1958-91 (computer tape, printout, diskette). Transfer payments by type annually for the United States, regions, and States. (1992)

7.2.22 BEARFACTS, 1990–91 or 1981–91 (printout, diskette). One-page computer-generated narrative. Describes an area's personal income using current estimates, growth rates, and a breakdown of the sources of personal income for that area for States, metropolitan areas, and counties. (May 1993)

7.2.23 Journey-To-Work, 1960, 1970, 1980 (computer tape, printout, diskette). Data on commuting flows to and from counties from decennial census: By place of work or by place of residence. (1980)

7.2.24 **Total Commuters' Income Flows, 1969-91** (computer tape, printout, diskette). Total gross commuters' income flows (inflows and outflows) annually for all counties. (May 1993)

8.0 BEA prepares analyses to identify and measure factors that determine area differences in total and per capita income and in industry employment and output. Long-term projections of personal income, employment, and earnings by industry are prepared for all States and metropolitan areas every 5 years and for selected States and areas in other years. BEA maintains midterm regional econometric models to forecast annual changes in economic activity and to analyze the impacts of projects and programs. In conjunction with the projections work, BEA has developed estimates of gross state product. These estimates, prepared by industry, supplement the estimates of personal income described in program description 7.0. For further information, write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0946. 8.1 **Revised Gross State Product, Annual Estimates, 1977-89** (EBB, computer tape, diskette, CD-ROM). These estimates are the State equivalent of GDP and provide the most comprehensive measure of State production now available. Gross state product is measured in current dollars as the sum of four components for each industry: Compensation of employees; proprietors' income with inventory valuation adjustment and capital consumption allowances; indirect business tax and nontax liability; and other, mainly capital-related, charges. The estimates are for the 50 States, eight BEA regions, and the United States, and for 61 industries. Estimates are in current and constant (1982) dollars. Summary estimates were published in the December 1991 SURVEY OF CURRENT BUSINESS. (1991) Available online through the EBB (see entry no. 1.4) and on CD-ROM (see entry no. 7.1). Computer tape and diskettes available from BEA:

Computer tape—Accession No. 61-91-00-420, price \$100.00.

Diskette (3½" HD)—Accession No. 61-91-40-421, price \$20.00. [Data also available to users who require estimates for specific States at \$20.00 per diskette. Other types of diskettes are also available. For information, call (202) 523-9180.]

8.2 **Experimental Estimates of Gross State Product by Industry** (BEA Staff Paper No. 42). A description of the issues and methodology for preparing estimates of gross state product—the State equivalent of GDP. The estimates are consistent with BEA's State personal income and with GNP by industry. (The estimates published in this paper have been superseded; see entry no. 8.1.) (1985) Available from NTIS: Accession No. PB 85-240885, price \$27.00 (paper copy), \$9.00 (microfiche).

Other types of diskettes also available. For information, call (202) 523-0959.]

International Economics

BEA's international economics program encompasses the international transactions accounts (balance of payments) and the direct investment estimates. The international transactions accounts, which measure U.S. transactions with foreign countries, include merchandise trade, trade in services, the current-account balance, and capital transactions. The direct investment estimates cover estimates of U.S. direct investment abroad and foreign direct investment in the United States, income and other flows associated with these investments, and other aspects of the operations of multinational enterprises.

9.1 BEA Reports: International Reports (EBB, EBB/FAX, news release). Reports (usually 13 a year) with summary estimates of merchandise trade, balance of payments basis (quarterly); summary of international transactions (quarterly); international investment position (annual); capital spending by majority-owned foreign affiliates (semiannual); direct investment (annual); and related topics. Reports are available online through the EBB (see entry no. 1.4) and by fax through EBB/FAX (see entry no. 1.5). Printed reports are mailed the day after estimates are released. (This set of reports is included in the five sets of *BEA Reports*; see entry no. 1.3.) The printed international reports are available from BEA on a subscription basis: Accession No. 53-91-11-018, price \$26.00 per year.

10.0 The international transactions accounts provide a detailed and comprehensive view of economic transactions between the United States and foreign countries. The accounts include estimates of merchandise exports and imports; travel, transportation, and other services; foreign aid; and private and official capital flows, including direct investment. (Information about direct investment and international services is provided in program description 11.0.) Current estimates, including estimates of merchandise trade on a balance of payments basis, are reported in the March, June, September, and December issues of the SURVEY OF CURRENT BUSINESS. Estimates include detail for the current and capital accounts, classified by type of transaction and by area. Each June, estimates for the last 4 years are revised.

Estimates of the international investment position of the United States appear in June. For further information, write to the Balance of Payments Division, BE-58, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0620. Computer tape—Accession No. 58-86-01-006, price \$100.00

Printout—Accession No. 58-86-21-104, price \$55.00

10.5 Status Report on Statistical and Methodological Improvements in the U.S. Balance of Payments Statistics (BEA Working Paper No. 6). Reviews major problems, such as timing and coverage, in the balance of payments accounts; describes statistical and methodological improvements BEA has undertaken to resolve some of the problems; and discusses projects for future improvements. (1988) Available from BEA: Accession No. 53-88-10-002, price \$5.00.

10.6 The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures (publication). Describes in detail the methodology used in constructing the balance of payments estimates for the United States. Explains underlying principles and describes the presentation of the estimates. Includes a comprehensive list of data sources. (1990) Available from GPO: Stock No. 003-010-00204-2, price \$8.50.

NOTE.—For a discussion of the relationship between foreign transactions estimates in the balance of payments accounts and those in the national income and product accounts, see entry no. 2.10.

Direct investment and international services

11.0 BEA conducts quarterly, annual, and benchmark surveys of U.S. direct investment abroad and of foreign direct investment in the United States. The information collected relates to the direct investment position and flows of capital, income, royalties and license fees, and other service charges between parent companies and affiliates; capital expenditures by majority-owned foreign affiliates of U.S. companies; the financial structure and operations of U.S. parent companies and their foreign affiliates; the financial structure and operations of U.S. affiliates of foreign companies; and U.S. business enterprises acquired or established by foreign direct investors. Summary

information on the quarterly and annual surveys usually appears in the SURVEY OF CURRENT BUSINESS on the following schedule:

Foreign direct investment in the United States:

- The position and balance of payments flows, in June, with additional detail in August.
- Operations of U.S. affiliates of foreign companies, in May (or subsequent months).
- U.S. business enterprises acquired or established by foreign direct investors, in May.

U.S. direct investment abroad:

- The position and balance of payments flows, in June, with additional detail in August.
- Operations of U.S. parent companies and their foreign affiliates, in June (or subsequent months).
- Capital expenditures by majority-owned foreign affiliates of U.S. companies, in March and September.

BEA's data on direct investment are collected and published at the enterprise (company) level. In 1992, highly detailed establishment (plant) level data on foreign direct investment in the United States, which complement BEA's enterprise data, became available for the first time as a result of a joint project between BEA and the Bureau of the Census. A volume containing data on the number, employment, payroll, and shipments or sales of foreign-owned U.S. establishments was published in June 1992 (see entry no. 11.3), and an article analyzing the data appeared in the October 1992 SURVEY OF CURRENT BUSINESS. Expanded information for 1989-90 for manufacturing establishments, including most of the items covered by the Census Bureau's Annual Survey of Manufactures, is scheduled for publication in September 1993, followed by an article in the October 1993 SURVEY analyzing the results.

The information BEA provides on U.S. international sales and purchases of services covers cross-border (balance of payments) services transactions, sales of services abroad by nonbank majority-owned foreign affiliates of U.S. companies, and sales of services in the United States by nonbank majority-owned U.S. affiliates of foreign companies. The information on cross-border services transactions is derived from a variety of sources, including BEA surveys, surveys of other Government agencies, and non-Government sources. The information on sales of services by affiliates is obtained from BEA's benchmark and annual direct investment surveys. Since 1990, the data on international services have been published in a detailed and unified format in the September issue of the SURVEY.

For further information on direct investment and international services, write to the International Investment Division, BE-50, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0659. 11.2 Foreign Direct Investment in the United States, 1987 Benchmark Survey, Final Results (publication, diskette). The final results of BEA's 1987 benchmark survey of foreign direct investment in the United States. Benchmark surveys are BEA's most comprehensive surveys, both in terms of companies covered and information gathered. Contains information on the financial structure and operations of the U.S. affiliates of foreign direct investors in 1987. Data are classified by industry of U.S. affiliate, by country and industry of foreign parent or ultimate beneficial owner, and, for selected data, by industry of sales and by State. (1990) Available as follows:

Publication—Available from GPO: Stock No. 003-010-00210-7, price \$14.00.

Diskette (3½" HD)—Available from BEA: Accession No. 50-90-40-401, price \$20.00. [Other types of diskettes available; for information, call (202) 523-0652.]

11.3 Foreign Direct Investment in the United States: Establishment Data for 1987 (publication, diskette). This is the first publication in a new annual series that presents detailed results from linking BEA's data for foreign-owned U.S. business enterprises to the Census Bureau's data for the establishments (or plants) of those enterprises. Detailed estimates of the number, employment, payroll, and shipments or sales of foreign-owned U.S. establishments and, for comparative purposes, of all

U.S. establishments, are presented. Data are classified by detailed industry (4-digit SIC), by country of the ultimate beneficial owner of the investment, and by State. The BEA-Census data link project was mandated by the Foreign Direct Investment and International Financial Data Improvements Act of 1990, which authorized BEA to access confidential Census Bureau data for purposes of the link. Available as follows:

Publication—Available from GPO: Stock No. 003-010-00228-0, price \$36.00.

Diskette (3½" HD)—Available from BEA: Accession No. 50-92-10-777, price \$20.00. [Other types of diskettes available; for information, call (202) 523-8052.]

11.4 Foreign Direct Investment in the United States: Balance of Payments and Direct Investment Position Estimates, 1980–86 (publication). Contains estimates of the foreign direct investment position in the United States and balance of payments transactions between foreign parent groups and their U.S. affiliates for 1980–86. Includes estimates by country of foreign parent and industry of U.S. affiliate. Note that the data in this publication do not incorporate methodological changes made in June 1992 to the data for 1982 forward. (1990) Available from GPO: Stock No. 003-010-00215-8, price \$3.00.

11.5 Foreign Direct Investment in the United States: Direct Investment Position and Related Capital and Income Flows (diskette). Annual estimates of the foreign direct investment position in the United States and selected capital and income flows between U.S. affiliates and their foreign parent companies. In June 1992, a number of methodological changes were made to the data on capital and income flows for 1982 forward. To the extent they could be carried to the detailed country and industry level presented, these changes have been incorporated in this item. Diskettes (3½" HD) available from BEA [Other types of diskettes available; for information, call (202) 523-0652]:

11.11 U.S. Direct Investment Abroad: Balance of Payments and Direct Investment Position Estimates, 1977–81 (publication). Contains final estimates of the U.S. direct investment position abroad and balance of payments transactions between U.S. parent companies and their foreign affiliates for 1977–81. Includes estimates by country and industry of foreign affiliate. (1987) Available from NTIS: Accession No. PB 87-178265, price \$19.50 (paper copy), \$9.00 (microfiche).

11.12 U.S. Direct Investment Abroad, Country by Industry Estimates, 1950–91 (computer tape). Annual estimates of the U.S. direct investment position abroad and of selected capital and income flows between U.S. parent companies and their foreign affiliates. Estimates are for 56 countries by 7 industries for 1950–65, 56 countries by 14 industries for 1966–76, 76 countries by 15 industries for 1977–81, and 80 countries by 15 industries for 1982–90. In June 1992, a number of methodological changes were made to the data on capital and income flows for 1982 forward. To the extent they could be carried to the detailed country and industry level presented, these changes have been incorporated in this item. (1992) Available from BEA: Accession No. 50-91-00-667, price \$100.00.

11.13 U.S. International Sales and Purchases of Services (reprint). Presents information on services in a more detailed and unified format than has been available previously. Includes data on cross-border transactions in services (for 1986–91) and on sales of services by majority-owned foreign affiliates of U.S. companies and by majority-owned U.S. affiliates of foreign companies (for 1989–90). This article appeared in the September 1992 SURVEY OF CURRENT BUSINESS; data are updated annually. (1992) Available upon request from the International Investment Division.

International services

BEA also prepares compilations of public and private data for use in measuring, analyzing, and forecasting economic developments. These include a system of business cycle indicators and a set of business statistics covering general economic activities and specific industries.

Other Tools for Economic Analysis

12.0 BEA maintains a system of indicators to track business cycles. The system features the composite indexes of leading, coincident, and lagging indicators. The data base includes series classified as cyclical indicators (because they conform well to broad fluctuations in economic activity), as well as other series useful in interpreting the economic situation and outlook. Each month preliminary values of the three composite indexes for the latest month and revised values for the 5 preceding months are released. Once a year, in the fall, the composite indexes are recalculated for recent years to incorporate historical revisions in component data. Information on composite indexes appears each month in the Business Cycle Indicators section (C-pages) of the SURVEY OF CURRENT BUSINESS. For further information, write to the Business Outlook Division, BE-52, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0800. A recorded telephone message at (202) 898-2450 provides current data for the composite indexes (and the leading index components) immediately upon their release. The message is updated weekly, usually on Monday, to include recently available component data that will be incorporated into the next release (see entry no. 1.2).

Business cycle indicators

Other Tools— Continued

12.1 BEA Reports: Composite Indexes of Leading, Coincident, and Lagging Indicators (EBB, EBB/FAX, news release). Monthly reports with summary estimates of the composite indexes. Reports are available online through the EBB (see entry no. 1.4) and by fax through EBB/FAX (see entry no. 1.5). Printed reports are mailed the day after estimates are released. (This set of reports is included in the five sets of *BEA Reports*; see entry no. 1.3.) The printed composite index reports are available from BEA on a subscription basis: Accession No. 53-91-11-016, price \$24.00 per year.

12.2 Cyclical Indicators Methodology (reprint). Reprints of three articles that appeared in the SURVEY OF CURRENT BUSINESS. "Composite Indexes of Leading, Coincident, and Lagging Indicators" from the November 1987 issue summarizes the selection and classification of the composite index components and the method of construction of the indexes. "Business Cycle Indicators: Revised Composite Indexes" from the January 1989 issue describes the changes in components, the changes in methodology for computing the indexes, the updating of seasonal factors, and the historical revisions in component data that were incorporated in the most recent revision of the composite indexes. "The Composite Index of Coincident Indicators and Alternative Coincident Indexes" in the June 1992 issue reviews recent cyclical patterns in the Index of Coincident Indicators (ICI), describes a characteristic of the method for calculating the ICI that has distorted its recent movements, discusses a modification to correct the distortion, and presents alternative coincident indexes. The package also includes historical data for the composite indexes and their components (as shown in the latest October issue of the SURVEY OF CURRENT BUSINESS) plus the historical chronology of business cycle expansions and contractions, the cyclical leads and lags for selected indicators, and the titles and sources of all business cycle indicators. (1992) Available from BEA: Accession No. 52-90-10-301, price \$10.00.

12.3 Business Cycle Indicators Current Data (EBB, diskette, printout). Data for the last 4 calendar years (plus data for earlier years if revised) for all series in the Business Cycle Indicators (C-pages) section of the SURVEY OF CURRENT BUSINESS. Includes data for about 270 series; most are monthly series. Updated monthly. Available online through the EBB (see entry no. 1.4). Diskettes and printouts are available from BEA on a subscription basis:

Diskette (3½" HD), 12-month subscription—Accession No. 52-86-41-401, price \$200.00 per year. [Other types of diskettes available; for information, call (202) 523-0800.]

Printout—Accession No. 52-88-21-201, price \$200.00 per year.

12.4 Business Cycle Indicators Historical Data (EBB, diskette). Historical data (from 1945, when available, to the present) for all series in the Business Cycle Indicators (C-pages) section of the SURVEY OF CURRENT BUSINESS (about 270 series). Updated monthly. Available online through the EBB (see entry no. 1.4). Diskette (3½" HD) is available from BEA: Accession No. 52-86-40-402, price \$20.00. [Other types of diskettes available; for information, call (202) 523-0800.]

12.5 Business Cycle Indicators Historical Data for User-Selected Series (EBB, fax, diskette, printout). Provides monthly or quarterly data for many series shown in the Business Cycle Indicators section (or C-pages) of the SURVEY OF CURRENT BUSINESS. Data are from 1947, if available, through the most recent period available as of the date the order is processed. User selects up to 50 series and the media by which the data are to be delivered. Available by special order from BEA; for more information, call (202) 523-0800.

Business statistics

13.0 BEA compiles data from both public and private sources for approximately 1,900 economic time series and publishes the data each month in the Current Business Statistics section (S-pages) of the SURVEY OF CURRENT BUSINESS. The series cover general business activities, such as construction and real estate; consumer, producer and farm prices; finance; foreign trade; industrial production; labor force, employment, and earnings; and personal income and outlays. Series include specific industries, such as chemicals, electric power and gas, food and tobacco, lumber, metals and machinery, petroleum and coal, pulp and paper, and transportation equipment. Inquiries about Current Business Statistics should be addressed to: Business Outlook Division, BE-52, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0500.

13.1 **Business Statistics, 1963–91** (publication). Handy, one-volume reference source on the U.S. economy containing historical data for over 2,000 data series. Monthly or quarterly data for 1988–91 and annual data for 1963–91 for series that appear in the Current Business Statistics section (or S-pages) of the SURVEY OF CURRENT BUSINESS. These series include business sales, inventories, and orders; prices; employment and unemployment; construction; banking and finance; transportation; and many other industries and commodities. An appendix provides data for principal BEA series of the national income and product accounts and of U.S. international transactions. Also contains definitions of terms, sources of data, and methods of compilation. Biennial. (1992) Available from GPO: Stock No. 003-010-00229-8, price \$20.00.

13.2 **Current Business Statistics** (EBB, diskette). Series shown in the Current Business Statistics section (or S-pages) of the current issue of the SURVEY OF CURRENT BUSINESS. Provides data for the last 4 calendar years. Updated monthly. Data are available as a one-time order or on a 12-month subscription basis. Available online through the EBB (see entry no. 1.4). Available from BEA.

Diskette (3½" HD), 12-month subscription—Accession No. 52-92-41-411, price \$200.00 per year. [Other types of diskettes available; for information, call (202) 523-0500.]

Diskette (3½" HD), single copy—Accession No. 52-92-40-412, price \$20.00. [Other types of diskettes available; for information, call (202) 523-0500.]

13.3 **Business Statistics Historical Data for User-Selected Series** (EBB, fax, diskette, printout). Provides monthly or quarterly data for series shown in the Current Business Statistics section (or S-pages) of the SURVEY OF CURRENT BUSINESS. Data are from 1977 (for some series from 1947, if available) through the most recent period available as of the date the order is processed. User selects up to 50 series and the media by which the data are to be delivered. Available by special order from BEA; for more information, call (202) 523-0500.

L,C,Lg,U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Composite Indexes of Leading, Coincident, and Lagging Indicators" in the November 1987 SURVEY OF CURRENT BUSINESS and "Business Cycle Indicators: Revised Composite Indexes" in the January 1989 Survey.

References to series in this section use the prefix "BCI-" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged. Diffusion index data are centered within the spans: 1-month indexes are placed in the ending month and 6-month indexes are placed in the 4th month.

High values reached by cyclical indicators since the last reference cycle trough (March 1991) are shown in boldface type; high values reached prior to the period shown in the table are listed at the bottom of each page. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-47 and C-48 in the October 1992 Survey.

NOTE.—Major data revisions:

Vendor performance (BCI-32) has been revised by the source for 1991 forward to incorporate updated seasonal adjustment factors. For further information, contact the National Association of Purchasing Management, 2055 East Centennial Circle, Tempe, AZ 85285-2160.

Average duration of unemployment (BCI-91)—see note for page C-2.

* Preliminary January 1993 values: BCI-32 = 53.2, BCI-19 = 435.23, and BCI-109 = 6.00.

1. Data include initial claims made under the July 1992 Emergency Unemployment Compensation amendments. Data exclude Puerto Rico, which is included in figures published by the source agency.

2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Survey Research Center, P.O. Box 1248, Ann Arbor, MI 48106-1248.

3. Excludes BCI-57, for which data are not available.

4. Excludes BCI-77 and BCI-95, for which data are not available.

NOTE.—Major data revisions:

Series on employment and unemployment in the civilian labor force (BCI-37, -42, -43, -44, -90, -91, -441, -442, -451, -452, and -453) have been revised by the source to incorporate updated seasonal adjustment factors. Periods covered by these revisions are as follows: BCI-37, -42, -90, -91, -441, -442, -452, and -453 from 1988 forward; BCI-43 and BCI-451 from 1989 forward; and BCI-44 from 1990 forward. For further information, contact the U.S. Department of Labor, Bureau of Labor Statistics, Division of Employment and Unemployment Analysis, Washington, DC 20210.

The ratio of help-wanted advertising in newspapers to number of persons unemployed (BCI-60) has been revised from 1988 forward to incorporate revised unemployment data. For further information, contact the U.S. Department of Commerce, Bureau of Economic Analysis, Business Outlook Division, Washington, DC 20230.

Series based on the national income and product accounts (BCI-16, -18, -22, -30, -35, -49, -50, -55, -81, -86, -87, -88, -89, -107, -290, -292, -293, -295, and -298) have been revised for the period prior to 1959 to complete the comprehensive revision. (See the December 1991 Survey.) For further information, contact the U.S. Department of Commerce, Bureau of Economic Analysis, National Income and Wealth Division, Washington, DC 20230.

Vendor performance (BCI-32)—see note for page C-1.

* Preliminary January 1993 value: BCI-32 = 53.2; anticipated 1st quarter 1993 values: BCI-61 = 576.07 and BCI-100 = 549.35; anticipated 2d quarter 1993 values: BCI-61 = 591.20 and BCI-100 = 566.54.

1. Data include initial claims made under the July 1992 Emergency Unemployment Compensation amendments. Data exclude Puerto Rico, which is included in figures published by the source agency.

2. Data exclude Puerto Rico, which is included in figures published by the source agency.

1. Computed from cumulative valuation total.

2. Index as Jan. 1, 1993: building, 427.2; construction, 472.1.

‡ Effective July 1992 Survey, data have been revised back to 1987. Effective July 1991 Survey, data were revised back to 1986. Effective July 1990 Survey, data were revised back to 1985. Revised data are available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233.

Includes data for items not shown separately.

§ Data for Mar., May, Aug., and Nov. 1990, and Jan., May, Aug., and Oct. 1991 are for five weeks; other months four weeks.

* The fixed-weighted price index is a weighted average of the individual price index series used to deflate the Value of New Construction Put in Place (VIP) series. In calculating the index, the weights (the composition of current dollar VIP in 1987 by category of construction) are held constant. Consequently, the index reflects only changes in prices. The implicit price deflator is a derived ratio of total current to constant dollar VIP (multiplied by 100). It is the average of the individual price indexes used in the deflation of VIP, but the prices are weighted by the composition of VIP each period. As a result, the implicit price deflator reflects not only changes in prices, but also changes in the composition of VIP, and its use as a measure of price change is discouraged. Effective July 1992 Survey, data have been revised back to 1989.

§§ Effective March 1992 Survey, the Construction Contracts Valuation Index has a new base year of 1987. Data have been revised back to 1983 and are available upon request.

Page S-8

2. Beginning with Feb. 1989 data, associations in conservatorship are excluded.

◇ Home mortgage rates are under money and interest rates on p. S-14.

§ Data include guaranteed direct loans sold.

Includes data for items not shown separately.

@ Data are for closed mortgage loans of thrift institutions insured by the Savings Association Insurance Fund (SAIF)—FSLIC-insured institutions prior to Sept. 1989.

† Effective June 1992 Survey, estimates of wholesale sales have been revised back to January 1989 and wholesale inventories have been revised back to December 1990. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade, Sales and Inventories January 1988-March 1992, BW/91-RV*, available from the Bureau of the Census, Washington, DC 20233.

‡ Effective June 1992 Survey, retail trade data have been revised. Estimates of retail sales have been revised back to December 1991 and inventories have been revised back to January 1982. Revised data and a summary of changes will appear in the report *Revised Monthly Retail Sales and Inventories, January 1982-December 1991, BR92-R*, available from the Bureau of the Census, Washington, DC 20233.

1. Advance estimate.

Includes data for items not shown separately.

◇ Effective with the Jan. 1993 Survey, the seasonally adjusted labor force series have been revised back to Jan. 1988. The Jan. 1993 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the 1988-92 revision period will appear in the Feb. 1993 issue of *Employment and Earnings*.

‡ The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.

@ Data include resident armed forces.

† See note "†" for p. S-8.

Page S-10

◇ See note "◇" for p. S-9.

‡ The unemployment rates are the number of unemployed in each group as a percent of the civilian labor force in that group.

§ Effective with June 1992 Survey, data have been revised, back to April 1990, unadjusted, and back to Jan. 1987, seasonally adjusted, to reflect new benchmarks and seasonal adjustment factors. The June 1992 issue of *Employment and Earnings* contains a detailed description of the effects of these revisions. All of the revised historical series are published in a special supplement to *Employment and Earnings, United States, 1909-90* comprises the full historical series on national data obtained from the establishment survey.

Page S-11

§ See note "§" for p. S-10.

‡ This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

◇ Production and nonsupervisory workers.
