SURVEY OF CURRENT BUSINESS

UNITED STATES DEPARTMENT OF COMMERCE / BUREAU OF ECONOMIC ANALYSIS

SURVEY OF CURRENT BUSINESS

U.S. Department of Commerce

Robert A. Mosbacher / *Secretary*
 Michael R. Darby / *Under Secretary
 for Economic Affairs*

Bureau of Economic Analysis

Allan H. Young / *Director*
 Carol S. Carson / *Deputy Director*

Editor-in-Chief: Carol S. Carson
Managing Editor: Leland L. Scott

Publication Staff: W. Ronnie Foster,
 M. Gretchen Gibson, Donald J. Parschalk

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Annual subscription: *Second-class mail*—\$23.00 domestic, \$28.75 foreign; *first-class mail*—\$52.00. Single copy—\$6.50 domestic, \$8.13 foreign.

Mail subscription orders and address changes to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

(See page C-1 for contents)

S-pages: Current Business Statistics

(See page S-36 for contents and subject index)

Inside back cover: BEA Information

NOTE.—This issue of the SURVEY went to the printer on October 4, 1990.

It incorporates data from the following monthly BEA news releases:

Gross National Product (Sept. 25),
 Personal Income and Outlays (Sept. 26), and
 Composite Indexes of Leading, Coincident, and Lagging
 Indicators (Sept. 28).

the BUSINESS SITUATION

FINAL estimates show that real GNP—a measure of U.S. production—increased at an annual rate of 0.4 percent in the second quarter of 1990, a downward revision from the 1.2-percent rate of increase reported in the preliminary estimates issued a month ago.¹ The largest downward revisions were in net exports (\$4½ billion) and the change in business inventories (\$2 billion) (see table 1 on page 19).

The increase in real gross domestic purchases—a measure of U.S. demand—was revised down to 1.3 percent from 1.6 percent. The difference in the size of the revisions in the two estimates is traceable to the downward revision in net exports; net exports is included in GNP but not in gross domestic purchases.

The second-quarter increase in the GNP price index (fixed weights) was unrevised at 3.9 percent, and the increase in the gross domestic purchases price index (fixed weights) was revised down 0.1 percentage point to 2.9 percent.

NOTE.—Daniel Larkins prepared the section on corporate profits.

1. Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes are differences between these rates. Quarter-to-quarter percent changes are annualized. (Dollar figures shown in the text are rounded to the nearest \$½ billion.) Real, or constant-dollar, estimates are expressed in 1982 dollars and are based on 1982 weights.

Corporate Profits

Profits from current production—profits before tax with inventory valuation adjustment and capital consumption adjustment—increased \$10 billion, to \$306½ billion, in the second quarter of 1990 after increasing \$6 billion in the first (table 1).

Profits of domestic nonfinancial corporations increased \$11½ billion, reflecting increases in both real gross product and profits per unit. The increase in unit profits reflected a larger increase in unit prices than in unit costs. Profits of domestic financial corporations increased \$2½ billion. Profits from the rest of the world declined \$4 billion.

Cash flow from current production, a measure of internally generated funds, increased \$7 billion after declining \$3 billion.

Profits by industry.—Profits from current production is not available by industry; profits before tax (PBT) with inventory valuation adjustment (IVA) is the best available measure of industry profits. This measure increased \$13½ billion after increasing \$10 billion.

For domestic nonfinancial corporations, PBT with IVA increased \$15 billion after increasing \$5 billion. Manufacturing accounted for two-thirds of the second-quarter increase. Food and

petroleum manufacturing posted sizable increases, and losses in motor vehicle manufacturing declined substantially. Retail trade profits accounted for most of the rest of the increase in profits of domestic nonfinancial corporations; within retail trade, the increase was concentrated in food stores.

For domestic financial corporations, PBT with IVA increased \$2 billion after increasing \$9 billion. In both quarters, the increases reflected improving conditions in the savings and loan industry.

Profits from the rest of the world declined \$4 billion, the same as in the first quarter. This component of profits measures inflows of profits

IVA Inventory valuation adjustment

Looking Ahead...

• *BEA Regional Projections to 2040. Metropolitan Statistical Areas and BEA Economic Areas*—the second and third volumes of a three-volume set of regional projections for selected economic and population variables for 1995, 2000, 2005, 2010, 2020, and 2040—will be available from the U.S. Government Printing Office in late November. The first volume, for States, was published in July 1990. For order information for volume 1, see the inside back cover of this issue of the SURVEY.

from foreign affiliates of U.S. corporations less outflows of profits from U.S. affiliates of foreign corporations. Inflows declined \$1½ billion, and outflows increased \$2½ billion. Most of the drop in inflows and all of the increase in outflows was accounted for by nonpetroleum affiliates.

PBT and related measures.—PBT increased \$2½ billion, but profits after tax declined \$1 billion. A decline in profits from the rest of the world, such as occurred in the second quarter, lowers PBT and profits after tax by equal

amounts.² For domestic corporations, PBT increased \$6½ billion, and profits after tax increased \$3 billion.

The difference between the \$10 billion increase in profits from current production and the \$2½ billion increase in PBT reflected an increase in the IVA that was only partly offset by a decline in the capital consumption adjustment. (Both adjust-

ments are added to PBT to obtain the current-production measure.)

The IVA is an estimate of inventory profits with sign reversed. Inventory profits declined \$11 billion, reflecting second-quarter declines in the prices of some inventoried goods, especially food and petroleum. The capital consumption adjustment, which declined \$3½ billion, is the difference between the predominantly tax-based depreciation measure that underlies PBT, on the one hand, and BEA's approximation of economic depreciation, on the other.

2. For the rest of the world, PBT and profits after tax are identical and are derived from after-tax estimates in the balance of payments accounts.

ERRATA

National Income and Product Accounts

The "National Income and Product Accounts Tables" in the July 1990 SURVEY OF CURRENT BUSINESS contained errors and omissions in two tables. In table 4.5, "Relation of Foreign Transactions in the National Income and Product Accounts to the Corresponding Items in the Balance of Payments Accounts," references to three footnotes were omitted from the body of the table: The 1989 estimate on line 4 should have had a reference to footnote 4; the 1989 estimate on line 13, to footnote 9; and the 1989 estimate on line 22, to footnote 11.

In table 8.9, "Imputations in the National Income and Product Accounts," lines 68 and 83 were incorrect. These lines also were incorrect in earlier July issues, affecting estimates back to 1983. The previously published and corrected estimates are shown below.

[Billions of dollars]

Line		1983	1984	1985	1986	1987	1988	1989
68	Personal taxes, outlays, and saving, excluding imputations:

NATIONAL INCOME AND PRODUCT ACCOUNTS

Selected NIPA Tables

New estimates in this issue: Second quarter 1990, final.

The selected set of 54 national income and product accounts (NIPA) tables shown in this section presents quarterly estimates, which are updated monthly. (In most of these tables, annual estimates are also shown.) The full set of 132 tables usually shown in July presents annual NIPA revisions. For more information on the presentation of the estimates, see "National Income and Product Accounts Estimates: When They Are Released, Where They Are Available, and How They Are Presented" in the July 1988 SURVEY.

The tables shown are available the day of the GNP news release on printouts and diskettes on a subscription basis or from the Commerce Department's Economic Bulletin Board. Estimates for 1986-89 are in the July 1990 issue of the SURVEY; estimates for 1985 are in the July 1988 issue; estimates for 1984 are in the July 1987 issue; estimates for 1983 are in the July 1986 issue. Estimates for 1929-82 are in *National Income and Product Accounts, 1929-82: Statistical Tables*. For more information, write to National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the National Income and Wealth Division and the Government Division.

Addenda:								
Exports of agricultural products ⁴	38.2	41.5	42.6	42.7	39.7	40.9	43.8	41.3
Exports of nonagricultural products.....	285.9	328.5	318.0	330.5	327.6	337.8	350.4	353.7
Imports of nonpetroleum products.....	410.5	430.0	426.8	428.0	430.5	434.7	435.4	435.5

1. Estimates beginning with the first quarter of 1986 exclude repairs and alterations of equipment, which was reclassified to services other than factor income.

2. Beginning with 1987, reexports—that is, exports of foreign merchandise—are assigned to end-use categories in the same manner as exports of domestic merchandise. For earlier periods, all reexports are included in the "other" categories.

3. Because no data are available to distribute exports and imports of "other" merchandise between durable and nondurable goods prior to 1986, or to distribute imports of "other" merchandise for all time periods, estimates were distributed equally.

4. Includes parts of line 2 and line 5.

NOTE.—Beginning with 1985, the definitions of the end-use categories have been changed. For a description of the new definitions, see the technical notes in "U.S. International Transactions, First Quarter 1988," SURVEY OF CURRENT BUSINESS 68 (June 1988): 34-39 and 57.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

1. Percent changes for 1986 and the first quarter of 1986 reflect discontinuities in the series. NOTE.—The fixed-weighted price index and the chain price index, both of which are weighted averages of the detailed prices used in the deflation of GNP, are measures of price change. In calculating changes in these indexes, the composition of GNP is held constant. Consequently these changes reflect only changes in prices. The fixed-weighted price index measures price change over any period, using as weights the composition of GNP in 1982. The chain price index measures price change between two consecutive periods,

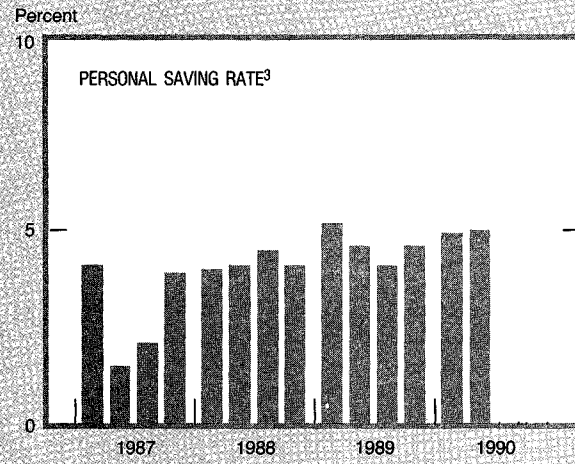

using as weights the composition of GNP in the first period. The implicit price deflator is a byproduct of the deflation of GNP. It is derived as the ratio of current- to constant-dollar GNP (multiplied by 100). It is the average of the detailed prices used in the deflation of GNP, but the prices are weighted by the composition of GNP in each period. Consequently, the implicit price deflator reflects not only changes in prices but also changes in the composition of GNP, and its use as a measure of price change should be avoided.

NIPA Charts

REAL GNP AND ITS COMPONENTS: TRENDS AND CYCLES

SELECTED SERIES: RECENT QUARTERS

¹Percent change at annual rate from preceding quarter; based on seasonally adjusted estimates.
²Seasonally adjusted annual rate; IVA is inventory valuation adjustment, and CCAdj is capital consumption adjustment.
³Personal saving as percentage of disposable personal income; based on seasonally adjusted estimates.

Federal Personal Income Tax Liabilities and Payments: Revised and Updated Estimates, 1987-88

THIS article compares Federal personal income tax liabilities and payments for 1987-88. The liability series reflects final 1987 and preliminary 1988 data from *Statistics of Income, Individual Income Tax Returns*. The payment series, which appears in table 3.2 of the "Selected NIPA Tables," reflects estimates presented in the national income and production accounts (NIPA) revisions released in July 1990. The estimates for 1987 and 1988, along with those for 1981-86, are shown in table 1. Estimates for 1949-80 appeared in the May 1986 SURVEY OF CURRENT BUSINESS.

Differences between liabilities and payments

In the NIPA's, personal income taxes are recorded on a payment basis—that is, at the time tax payments are made by individuals. For many types of analysis, personal income taxes recorded on a liability basis—that is, at the time taxpayers earn their income and incur their tax liability—may be more appropriate.

The payment series consists of three parts: Withheld taxes; declarations and final settlements, referred to as "nonwithheld taxes"; and refunds. Withheld taxes are those withheld at the income source. Declarations are estimated taxes paid on incomes not subject to withholding, and final settlements are additional taxes paid either at the time of filing tax returns (when liabilities exceed payments) or as the result of audits. Refunds occur at the time of filing tax returns (when payments exceed liabilities).

For taxes withheld from wages and salaries, differences between liabilities and payments arise for several reasons. First, the withholding tables used by employers are constructed under the assumption that taxpayers use the standard deduction in calculating their income tax liabilities.

Overwithholding results when taxpayers who itemize their deductions do not request enough exemptions for withholding purposes; underwithholding results when taxpayers claim too many exemptions. Second, withholding is based on the assumption that wages remain unchanged during the year. Overwithholding results when wages change from one pay period to

another and are subject to different withholding rates. Third, changes in withholding rates may not always coincide with changes in liabilities; tax law provisions usually are effective on January 1, but corresponding changes in withholding rates sometimes occur later. Fourth, at the option of the employer, taxes withheld on income from bonuses, commissions, overtime pay, sick pay, and taxable fringe benefits may be based on a flat 20 percent rate.

For some types of taxable incomes, differences arise because taxes withheld have no direct relationship to the corresponding liabilities. For interest, dividends, and certain other types of income, an arbitrary 20 percent is withheld if the recipient fails to furnish an accurate taxpayer identification number (this withholding was initiated in 1984 as a compliance measure). For pensions and annuities, withholding is at the option of the taxpayer.

For incomes not subject to withholding (primarily income from proprietorships, partnerships, and S corporations, capital gains, and taxable social security benefits), differences between liabilities and payments arise for two reasons. First, the proportion of the current year's liabilities that must be paid to avoid a penalty is less than 100 percent.¹ Second, the last installment of quarterly estimated taxes and the final settlements are made in the year following the liability year. As a result, payments of nonwithheld taxes during a tax year tend to be unrelated to changes in income in that year. Thus, when income growth accelerates, liabilities tend to increase faster than payments.

Refunds arise from overpayment of taxes during the liability year. Actual refunds are recorded in the payment

Table 1.—Federal Personal Income Tax Liabilities and Payments, 1981-88

1. This series is derived by the Bureau of Economic Analysis based on data from *Statistics of Income, Individual Income Tax Returns* for 1981-87 and from *Statistics of Income Bulletin* (Vol. 9, No. 4) for 1988.

2. This series appears in table 3.2. of the "Selected NIPA Tables."

3. This series appears in table 2.1. of the "Selected NIPA Tables."

4. Annual totals appear in *Statistics of Income, Individual Income Tax Returns* for 1981-87 and in *Statistics of Income Bulletin* (Vol. 9, No. 4) for 1988. Quarterly estimates are derived by the Bureau of Economic Analysis.

series as negative payments in the year they are made by the Treasury. Thus, refunds are unrelated to the current year's liabilities.

Differences for 1987-88

In 1987, payments exceeded liabilities by \$17.8 billion. The excess

reflects the final settlements of large 1986 capital gains tax liabilities. Because the Tax Reform Act of 1986 (TRA) repealed the preferential tax treatment of capital gains, many taxpayers accelerated their realizations of capital gains into 1986, thereby sharply increasing capital gains tax liabilities in 1986 and payments of capital gains taxes in 1987. (Most of these

payments were made in the second quarter of 1987.)

In 1988, liabilities exceeded payments by \$15.7 billion. The excess reflects, in part, a large increase in incomes for which taxes are not withheld, largely incomes of partnerships and S corporations; these incomes were affected by the TRA's phasing out of passive losses beginning in 1987.

Capital Expenditures by Majority-Owned Foreign Affiliates of U.S. Companies, 1991

MAJORITY-OWNED foreign affiliates of U.S. companies plan to increase capital expenditures 1 percent in 1991, to \$56.6 billion, after a 17-percent increase in 1990 (table 1, chart 1).¹ The levels of spending in these years, if realized, will be significantly higher than in any year of the 1980's. During the 1980's, spending peaked at \$44.8 billion in 1982, fell sharply in 1983, and then showed little change until 1988 when it began to increase rapidly. By 1991, spending will exceed the 1982 level by 26 percent.

The high level of capital expenditures projected for 1991 indicates that U.S. parent companies plan to maintain their recent emphasis on overseas operations. Petroleum firms— attracted by host government incentives and potentially larger exploitable oil and gas reserves than those in the United States—have been increasing their overseas spending, relative to their domestic spending, for exploration and development. Manufacturers have been attracted by favorable conditions abroad, such as increasing economic integration in the European Communities, movement toward

market-oriented economic systems in Eastern Europe, an improved investment climate in Latin America, and rapid economic growth in East Asia. In addition, the prospect for slower economic growth in the United States may be spurring parent companies' spending overseas.

These estimates of planned expenditures are the first in a series of five

estimates for 1991, and experience has shown that subsequent estimates may differ substantially.² Firms' changing perceptions of business conditions are a principal source of revisions. For example, subsequent estimates for 1991

2. These revisions are not the result of low survey response rates; BEA's first estimates of total affiliate spending are derived from reported data that usually account for 80 percent or more of the universe estimate.

NOTE.—Estimates are for majority-owned nonbank foreign affiliates of nonbank U.S. parents.

OPEC Organization of Petroleum Exporting Countries

NOTE.—Laura A. March prepared the estimates of expenditures using computer programs designed by Jane M. Fry.

1. Capital expenditures estimates are for majority-owned nonbank foreign affiliates of nonbank U.S. parents. (An affiliate is majority-owned when the combined ownership of all U.S. parents exceeds 50 percent.) For affiliates other than those engaged in natural resource exploration and development, capital expenditures include all expenditures that are charged to capital accounts and that are made to acquire, add to, or improve property, plant, and equipment. For affiliates engaged in natural resource exploration and development, capital expenditures also include the full amount of exploration and development expenditures, whether capitalized or expensed. Capital expenditures are on a gross basis; sales and other dispositions of fixed assets are not netted against them. Capital expenditures are reported to BEA in current dollars; they are not adjusted for price changes in host countries or for changes in the value of foreign currencies, because the necessary data are unavailable.

may be substantially revised because the most recent survey was conducted in June of this year, before the recent Iraqi invasion of Kuwait. Developments in the Middle East following the invasion may influence worldwide economic conditions, investment opportunities, and oil prices—each of which may change firms' capital spending plans.

In addition, to the extent that they do not offset one another, changes in the value of the U.S. dollar in relation to foreign currencies and changes in

foreign inflation rates can cause revisions in successive estimates of spending for a given year. Rising foreign inflation and dollar depreciation both tend to raise the level of affiliate spending in U.S. dollars, and falling foreign inflation and dollar appreciation tend to lower it.

Later estimates may also differ because, at the time of the first survey, some reporters may not have completed their detailed capital spending budgets for the following year. Lacking better information, these reporters may submit estimates that are based largely on current-year spending, or they may derive their estimates from multiyear spending plans that have been adjusted to take account of work completed or postponed.

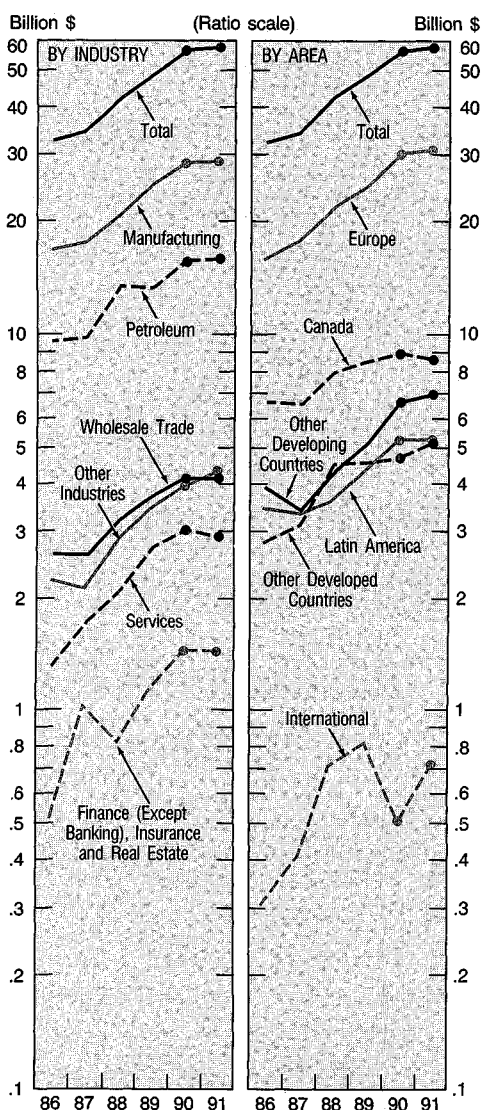

BEA is evaluating its capital expenditures survey and the estimates derived from it, including the usefulness of the first estimates.

U.S. Department of Commerce, Bureau of Economic Analysis 90-9-1

Revisions for 1989 and 1990

The estimates of spending for 1989 have been revised downward by 1 percent from the level reported 6 months ago (table 2). The small overall revision resulted from offsetting changes among industries. A decrease in petroleum was largely offset by increases in "other manufacturing" and nonelectrical machinery.³

Planned spending for 1990 was revised upward by 2 percent. Roughly one-half of the revision is in nonelectrical machinery and mostly reflects the first reporting of substantial investments to produce an innovative type of semiconductor. The introduction of new affiliates into the survey sample also contributed to the upward revision. Some of the larger affiliates included a Canadian paper producer, a Hungarian glass manufacturer, and a Brazilian plastics producer.

The most recent estimates for 1989 and 1990 are based on a survey conducted in June 1990; the previous estimates were based on a survey conducted in December 1988.

Area Highlights

In the past 3 years, spending by affiliates has grown faster than the worldwide average in the European

Communities (EC(12)), "other Asia and Pacific," and "Latin America and other Western Hemisphere." Although affiliate spending in these regions is projected to decelerate, it will remain at historically high levels.

Affiliates in the EC(12) plan to hold their spending constant, at \$27.5 billion, after an average annual increase of 20 percent in 1988–90. Major factors attracting capital spending to this region are the EC(12)'s increasing economic integration, its new industrial policies, and U.S. parent companies' desire to serve Eastern Europe's recently opened markets through their EC(12) affiliates.

The EC(12)'s 1992 single-market initiative seeks to eliminate remaining trade barriers and to otherwise increase the economic integration of member countries. Two provisions of the initiative are the establishment of uniform product standards and the reduction of documentation and inspection requirements for shipments between member countries. By widening markets, expediting shipments, and lowering transportation costs, such measures may be encouraging EC(12) affiliates to expand capacity.

Industrial policies issued by the European Commission, which are separate from the 1992 initiative, also appear to be affecting affiliate spending.

3. "Other manufacturing" consists of tobacco products; textile products and apparel; lumber, wood, and furniture and fixtures; paper and allied products; print-

ing and publishing; rubber products; miscellaneous plastics products; glass products; stone, clay, and other nonmetallic mineral products; instruments and related products; and manufactures not elsewhere classified.

For example, a newly adopted rules-of-origin policy, which imposes customs duties on "non-European" computer chips, may be accelerating the investments of semiconductor manufacturing affiliates in the EC(12).⁴ Additional concerns about rules-of-origin policies may be spurring Japanese direct investment in European automobile manufacturing; as a result of this rising competition, U.S.-owned automotive affiliates in the EC(12) have spent large sums to reduce production costs and introduce product improvements.

In addition, Eastern Europe's market-oriented economic reforms are encouraging some parent companies to serve those markets by increasing the production and distribution capabilities of their EC(12) affiliates, rather than by investing directly in Eastern Europe. The apparent reluctance to invest in Eastern Europe at this time may reflect that region's less-developed infrastructure, financial markets, and commercial legal systems.

In "other Asia and Pacific," affiliates plan to increase spending 3 percent, to \$5.0 billion, after an average annual increase of 30 percent in 1988-90. Rapid economic development in host countries has generated favorable markets for affiliates in all industries. Petroleum, mining, and geothermal energy affiliates have been attracted to this region by its reserves of natural resources and by the growing demand for energy and raw materials. Spending by affiliates in other industries has been encouraged by rising consumer incomes and the availability of low-cost, semiskilled labor.

In "Latin American and other Western Hemisphere," affiliates plan to hold spending constant, at \$5.2 billion, after an average annual increase of 17 percent in 1988-90. Capital spending has been encouraged by liberalization of regulations governing foreign direct investment and by a generally more favorable economic climate.

Industry Detail

The small change in total planned spending in 1991 reflects offsetting year-to-year changes among industries; for example, affiliates plan to increase spending 12 percent in nonelectrical machinery manufacturing but

to decrease spending 21 percent in primary and fabricated metals manufacturing. Tables 3-5 provide detailed country-by-industry estimates of capital expenditures for 1989-91.

Petroleum

Petroleum affiliates plan to increase spending 2 percent in 1991, to \$15.9 billion, after an 18-percent increase in 1990. Although most U.S. multinational oil companies are maintaining their emphasis on overseas exploration and development, several factors tended to dampen the growth in planned spending abroad. First, affiliates may have been conservative in projecting spending for oil and gas fields whose potential yields were highly uncertain at the time of this survey. Second, a decline in crude oil prices during the first half of this year, when the survey was taken, may have lowered firms' expected return on investment. Finally, planned spending for 1991 was dampened by the projected completion of several large projects during 1990.

Significant increases in spending are planned in Canada, Norway, Nigeria, "other Asia and Pacific," Ecuador, Peru, and "international."⁵ Two Canadian affiliates plan large increases; one affiliate plans to develop oil reserves off the coast of Newfoundland, and the other plans to extract natural gas in response to rising North American demand. In Norway, the increase reflects the planned construction of oil-drilling platforms. The sizable increase planned by Nigerian affiliates is partly in response to an affiliate's recent joint venture with the State-owned petroleum company to develop offshore oil reserves. In "other Asia and Pacific," petroleum activity continues to be encouraged by the region's rapid economic development and its growing demand for oil. The construction of oil refineries in Singapore, the exploration and development of inland oil reserves in Papua New Guinea, and the extraction of natural gas in Malaysia have all contributed to the region's spending growth. In Ecuador, affiliate spending is projected to double following the host Government's recent renewal of affiliates' oil development contracts. The increases in Peru follow

the resolution of a financial dispute between an affiliate and the State-owned oil company. Affiliates in "international" plan to increase spending 28 percent; the increase reflects the construction of oil tankers in response to rising worldwide oil imports.

Significant decreases in spending are planned in the United Kingdom, the Caribbean, Indonesia, Australia, and the United Arab Emirates. A British affiliate plans to cut its spending substantially following reconstruction of the North Sea facilities that were destroyed in an explosion in 1988. Other British affiliates plan lower spending upon completion of oilfield development projects. In the Caribbean, a large decline is projected following the refurbishing of oil-refining facilities. In Indonesia, where several large oilfield development projects are nearing completion, affiliates plan to decrease spending after 3 years of rapid growth. Australian affiliates plan lower spending following the completion of exploration and development projects. In the United Arab Emirates, spending is projected to decline following a U.S. parent company's acquisition of oil extraction facilities in 1990.

Manufacturing

Manufacturing affiliates plan to increase spending 1 percent in 1991, to \$28.2 billion, after an 18-percent increase. By area, significant increases are planned in the EC(12), South America, Japan, and Australia. These increases are offset by declines planned in Canada, Mexico, "other Asia and Pacific," and "other Europe."⁶ By industry, planned increases in nonelectrical machinery, transportation equipment, and chemicals are largely offset by planned decreases in primary and fabricated metals, "other manufacturing" (mainly rubber and paper products), electrical machinery, and food products.

In nonelectrical machinery, spending is projected to increase 12 percent, to \$5.1 billion, after an 18-percent increase. Spending by affiliates in the EC(12) accounts for approximately two-thirds of the planned increase. In Ireland, a producer of personal computers is expanding capacity to meet rapidly growing product demand. Elsewhere in the EC(12) and in Japan, the increases are largely attributable to

4. Under this policy, for a computer chip to be considered "European," its circuit must be etched within Europe.

5. "International" affiliates are those that have operations in more than one country and that are engaged in petroleum shipping, other water transportation, or operating movable oil- and gas-drilling equipment.

6. "Other Europe" consists of all European countries that are not members of the EC(12).

the construction of facilities to produce a new generation of computer chips made of advanced ceramic materials.

Transportation equipment affiliates plan to increase spending 5 percent, to \$5.9 billion, after a 25-percent increase. Parent companies are focusing their efforts on overseas markets, where competition is rising and where demand is projected to increase faster than in the United States. In West Germany, the large spending increases reflect a number of investments to introduce new passenger car models and to expand capacity; Belgian affiliates plan a related increase to produce components for these new models. Significant increases are also slated for Australia and Brazil. The increases in these countries are partly offset by reduced spending in the United Kingdom, Canada, Spain, and Mexico. British and Mexican affiliates plan to reduce spending at certain plants at which there have been recent labor disputes. In Canada and Spain, major projects were completed.

Chemical affiliates plan to increase spending 3 percent, to \$6.6 billion, after a 21-percent increase. Over one-half of the overall increase will occur in Japan, where a manufacturer of personal-care products is building a product development center. In Europe, increases in Ireland and the United Kingdom are widespread among affiliates. Affiliates in Taiwan, Jamaica, and Chile also plan to raise spending. These increases are partly offset by decreases related to the completion of projects in Canada, Belgium, and Malaysia.

Decreases in capital spending are planned in the remaining manufacturing industries. In primary and fabricated metals, affiliates plan a 21-percent decrease, to \$1.3 billion, after a 27-percent increase. This sharp downturn largely reflects the expected completion of a Canadian aluminum smelter. In addition, an affiliate engaged in copper processing and mining in Thailand plans to reduce mine expansions.

In "other manufacturing," affiliates plan to decrease spending 6 percent, to \$4.9 billion, after a 4-percent increase. The decline mainly reflects the expected completion of projects, which include tire plants in Canada and Brazil, a reinforced plastics factory in the United Kingdom, and a household paper goods plant in France.

Affiliates in electrical machinery plan to decrease spending 6 percent,

to \$2.3 billion, after a 17-percent increase. Nearly one-half of the decline is accounted for by affiliates in the United Kingdom, whose expenditures were unusually large in 1990; these expenditures included the purchase of new production machinery by manufacturers of household appliances and electric generators. Significant declines are also planned in Canada, Spain, Thailand, and Norway.

Affiliates in food products plan to decrease spending 1 percent, to \$2.1 billion, after a 21-percent increase. There are sizable offsetting changes among countries. In Canada and Japan, the purchase of new production equipment in 1990, but not in 1991, accounts for the decline. Spending is also projected to decline in the Netherlands and in "other Central America."⁷ These declines are partly offset by new projects planned mainly in Europe, chiefly by West German and British breakfast cereal producers and by various British snack food producers who plan to distribute their products throughout the EC(12). Some of these projects may have been encouraged by the prospect of declining intra-EC(12) trade barriers.

Other industries

In all other industries combined, affiliates plan to increase spending 1 percent, to \$12.5 billion, after a 14-percent increase. Wholesale trade affiliates plan to hold spending constant, at \$4.1 billion, after a 12-percent increase. The stability in their worldwide spending reflects offsetting changes among geographic areas. The largest increase is planned in West Germany, where a soft-drink affiliate is expanding its stock of bottling machinery, trucks, and vending machines to serve the newly opened East German market. In Japan, two marketing affiliates of computer manufacturing companies plan large increases: A commercial computer distributor with ancillary production facilities is constructing a new manufacturing plant and upgrading an existing warehouse, and a personal computer distributor is expanding capacity to meet rising demand for its products. These increases are offset by declines in Italy and Brazil. An Italian wholesale trade affiliate that is also engaged in manufacturing electronic goods has nearly completed a

7. "Other Central America" consists of Belize, Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua.

major expansion of its production facilities. A Brazilian wholesale trade affiliate with ancillary production facilities plans to finish the construction of an automotive parts factory in 1991.

In finance (except banking), insurance, and real estate, affiliates plan to decrease spending 4 percent, to \$1.4 billion, after a 25-percent increase. The decline is more than accounted for by affiliates in the United Kingdom, where reduced planned spending reflects the completion of new office buildings. The decline is partly offset by a rise in planned expenditures in Canada and West Germany. In Canada, a U.S. insurance company is expanding its operations. In West Germany, a lessor of manufacturing equipment will increase its stock to allow a client to expand its production of farm machinery.

Services affiliates plan to decrease spending 2 percent, to \$2.9 billion, after a 10-percent increase. The decline is largely centered in the United Kingdom, Australia, and Brazil. The decline in the United Kingdom results mainly from the completion of new office buildings. In Australia, the decline is widespread among affiliates. In Brazil, the services affiliate of an office machine manufacturer plans to reduce spending. Partly offsetting these decreases are increases reflecting plans by a French affiliate to renovate a hotel and by a German computer services affiliate to expand operations.

Affiliates in "other industries" plan to increase spending 7 percent, to \$4.2 billion, after a 14-percent increase.⁸ Spending by mining affiliates accounts for one-third of the overall increase; significant mine development projects are planned in Chile, Indonesia, and "other Sub-Saharan Africa."⁹ In the remaining industries, a cruise line affiliate is increasing its spending after acquiring a foreign travel and tourism business. In Indonesia, an affiliate is expanding its development of the country's rich geothermal resources. Offsetting these increases is a substantial decline in Italy, where a public sanitation affiliate plans to lower its spending after acquiring the assets of several small competitors in 1990.

Tables 3-5 follow.

8. "Other industries" consists of agriculture, forestry, and fishing; mining; construction; transportation, communication, and public utilities; and retail trade.

9. "Other Sub-Saharan Africa" consists of all African countries except Algeria, Egypt, Liberia, Libya, Morocco, Nigeria, South Africa, and Tunisia.

U.S. International Sales and Purchases of Services

IN recent years, to improve the coverage and accuracy of its estimates of U.S. international sales and purchases of services, BEA has taken several steps:

- Instituted benchmark and annual surveys of selected business, professional, and technical services;
- Improved the surveys covering royalties and license fees; architectural, engineering, construction, and mining services; and insurance;
- Developed or improved estimates of international travel transactions and of transactions in educational, financial, and medical services; and
- Added questions on sales of services by affiliates to its surveys of direct investment.¹

This article builds upon these earlier efforts by presenting information on services in a more detailed and unified format than has been available previously. BEA plans to continue to improve its information on international services; areas that have been targeted for further development include financial services and transportation.

Services may be delivered to foreign markets through alternative channels. A business in one country can sell services to persons in another country either directly, through cross-border transactions, or indirectly, through affiliates in other countries. This article

1. Some of the improvements are outlined in "U.S. Sales of Services to Foreigners" in the January 1987 issue of the *SURVEY OF CURRENT BUSINESS*. That article also describes the sources of information used to construct estimates of services transactions. More recent improvements are described in technical notes to the articles on U.S. international transactions in the June issues of the *SURVEY*, particularly the June 1989 issue. Information on the sources and methods used for estimating services recorded in the U.S. international transactions accounts may also be found in *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (Washington, DC: U.S. Government Printing Office, May 1990).

presents information on both channels of delivery. The information on private cross-border transactions in services, which are included in the U.S. international transactions (balance of payments) accounts, covers both U.S. sales and U.S. purchases of services. The information on transactions of affiliates, which is obtained from BEA's direct investment surveys, covers sales of services abroad by majority-owned foreign affiliates of U.S. companies and sales in the United States by majority-owned U.S. affiliates of foreign companies.² Although it would be interesting, for some purposes, to examine affiliates' purchases of services in their countries of location, no information on such purchases is collected in BEA's surveys.

The data on U.S. cross-border transactions in services are for 1986-89; the

data for 1986 are the earliest available for several types of services transactions. The data on sales by foreign affiliates of U.S. companies are for 1986-88, and those on sales by U.S. affiliates of foreign companies are for 1987-88. Data on sales by U.S. and foreign affiliates in 1989 are not yet available, and the series on sales by U.S. affiliates did not begin until 1987. The data on both types of transactions will be updated annually and will be made available by BEA. The data will also be included in the new National Trade Data Bank.³

Separate data on the two channels of delivery permit analysis of their differing economic effects. To a large extent, the two channels differ in their impact on an economy because of differences in the location of factors of production that generate value added. U.S. cross-border sales mainly reflect value added by U.S. factors of production, whereas sales of services abroad by foreign affiliates of U.S. companies mainly reflect value added by foreign

2. In a recent series of studies of patterns of merchandise trade, Robert E. Lipsey and Irving B. Kravis have made similar distinctions between U.S.-owned and U.S.-located companies. See "The Competitive Position of U.S. Manufacturing Firms," *Banca Nazionale del Lavoro Quarterly Review*, No. 153 (June 1985): 127-54; "The Competitiveness and Comparative Advantage of U.S. Multinationals, 1957-84," *Banca Nazionale del Lavoro Quarterly Review*, No. 161 (June 1987): 147-65; and "Technological Characteristics of Industries and the Competitiveness of the U.S. and Its Multinational Firms," National Bureau of Economic Research, Working Paper No. 2933 (April 1989).

3. The National Trade Data Bank is a database that brings together, in one location, trade and export promotion data collected by 14 Federal Government agencies. For further information, write National Trade Data Bank, Office of Business Analysis, U.S. Department of Commerce, Room 4878, HCH Building, Washington, DC 20230.

Acknowledgments

Estimates of cross-border (balance of payments) services transactions were prepared by the following staff members of the Balance of Payments and International Investment Divisions:

Travel and passenger fares—Joan Bolyard and Laura Brokenbaugh.

Other transportation—Patricia G. Watts and Edward Dozier.

Royalties and license fees and other private services—affiliated, Gregory G. Fouch (for transactions of U.S. affiliates) and Mark W. New (for transactions of U.S. parents); unaffiliated, Ralph Kozlow, Faith M. Brannam, Shirley J. Davis, Christopher J. Emond, Raphael I. Font, Jane T. Cahill (financial services), and John Sondheimer.

Estimates of sales of services by affiliates were prepared by staff members of the International Investment Division. Estimates of sales by foreign affiliates were prepared under the direction of David H. Galler, project leader for the annual survey of U.S. direct investment abroad. Estimates of sales by U.S. affiliates were prepared under the direction of Beverly A. Feeser, project leader for the annual survey of foreign direct investment in the United States.

Smith W. Allnutt, Jane M. Fry, Arnold Gilbert, and D. Richard Mauery established data retrieval systems and were responsible for the computer generation of most of the tables for this article.

factors (primarily labor). Similarly, services that U.S. persons purchase directly from abroad mainly reflect value added by foreign factors of production, whereas services they purchase from U.S. affiliates of foreign companies mainly reflect value added by U.S. workers and other domestic factors of production.

The data included in this article are useful in analyzing the impact of international services business from alternative perspectives. The data on cross-border services transactions are useful in analyzing international services business from the perspective of the United States as a geographic location. Used together with the data on sales by affiliates, they are useful in analyzing the worldwide operations of multinational companies, in investigating the channels used to deliver services internationally, and in assessing access to, and penetration of, foreign markets.

Overview

For cross-border transactions, U.S. sales of private services were larger than purchases in 1986 (\$76.0 billion, compared with \$65.3 billion) (table 1). Sales also grew faster in 1986-89—at an average annual rate of 14 percent, compared with 9 percent for purchases. By 1989, U.S. sales of services were \$113.9 billion, and U.S. purchases of services were \$85.7 billion; the surplus of sales over purchases, at \$28.2 billion, was more than double the surplus of \$10.7 billion recorded in 1986.

During the periods for which data are available, sales of services by both U.S. and foreign affiliates grew rapidly. Sales of services to foreign persons by majority-owned foreign affiliates of U.S. companies increased at an average annual rate of 18 percent in 1986-88, rising from \$72.8 billion in 1986 to \$100.7 billion in 1988. Sales of services to U.S. persons by majority-owned U.S. affiliates of foreign companies were smaller and grew more slowly; they increased from \$62.6 billion in 1987 to \$68.7 billion in 1988, an increase of 10 percent.⁴

4. As explained later, comparisons of sales by U.S. affiliates with those by foreign affiliates are complicated by a difference in the treatment of investment income. It is likely, however, that if this difference could be eliminated, foreign affiliates' sales of services still would exceed those by U.S. affiliates, although by a smaller amount than these figures indicate.

n.a. Not available.

The remainder of this article is in three parts. The first part describes the data and some of its limitations. The second discusses the composition of cross-border transactions by geographic area and by type of service or intangible asset, and the third discusses the composition of affiliate sales by geographic area and by industry of affiliate.

Description of the Data

Cross-border transactions

As mentioned earlier, cross-border services transactions are included in the U.S. international transactions, or balance of payments, accounts, which record all economic transactions between U.S. residents and nonresidents. The cross-border transactions covered by this article are those recorded in the five major line items for private services in these accounts—travel, passenger fares, other transportation, royalties and license fees, and other private services.

Recording methods.—With one exception, the data on cross-border transactions are presented as they are recorded in the international transactions accounts; “sales” of services corresponds to “exports” of services and “purchases” of services corresponds to “imports” of services. The exception is in transactions between affiliated parties in royalties and license fees and other private services, which are presented on a net basis in the international transactions accounts and on a gross basis in this article. In the international transactions accounts, net transactions of U.S. parent companies—U.S. parents' receipts from their foreign affiliates

less payments to them—are recorded as exports, and net transactions of U.S. affiliates—U.S. affiliates' payments to their foreign parents less receipts from them—are recorded as imports. In this article, to provide the most detailed picture possible of the two-way flow of services transactions between the United States and foreign countries, these transactions are shown on a gross basis. Receipts of U.S. parents from their foreign affiliates and of U.S. affiliates from their foreign parents are shown as U.S. exports (sales) of services, and payments by U.S. parents to their foreign affiliates and by U.S. affiliates to their foreign parents are shown as U.S. imports (purchases). As a result, the U.S. cross-border sales and purchases of services shown on this basis exceed the exports and imports of services recorded in the U.S. international transactions accounts. However, because sales and purchases are larger by an equal amount (\$7.7 billion in 1989), the balance between them is identical to the balance between exports and imports in the international accounts (table 2).

Classification.—The cross-border transactions are classified by type of service except for (1) royalty and license fee and other private services transactions between affiliated parties, (2) royalty and license fee transactions between unaffiliated parties, and (3) travel transactions. The first are classified by industry of the affiliate involved in the transaction and the second by type of intangible asset; the third—travel—is not a type of service, but a category for recording travelers' expenditures—both for goods (such as souvenirs and gifts) and for services (such as lodging, entertainment, and local transportation).

Sales by affiliates

The information on sales of services by affiliates is obtained from BEA's surveys of U.S. direct investment abroad and foreign direct investment in the United States. The information of particular interest for this article is that on sales of services abroad by U.S. companies through their majority-owned foreign affiliates and sales of services in the United States by foreign companies through their majority-owned U.S. affiliates. These sales represent delivery of services by a company in one country to customers in other countries through

direct investment. For many services, such sales may constitute the only practical channel of delivery to foreign markets. Delivery through cross-border transactions may be difficult or impossible because the service needs to be produced and consumed at the same time and in the same place or because the producer and the consumer of the service need close and continuing contact.

Coverage and definition.—The data on sales of services by affiliates cover majority-owned nonbank affiliates of nonbank parents. Because they report extensive data to other Government agencies, banks are required to report only limited data on BEA's direct investment surveys, and they are exempted from the surveys that collect information on sales of services by affiliates.

In these data, sales of services are defined as sales characteristic of a particular group of industries: The industries that constitute the "services" division of the Standard Industrial Classification; petroleum services; finance (except banking), insurance, and real estate; agricultural services; mining services; and transportation, communication, and public utilities. Affiliates that are not classified in one of these industries often have sales of services. In fact, sales by affiliates that are classified in manufacturing and other goods-producing industries but that sell services as a secondary activity account for a significant portion of the sales of services by affiliates presented in this article. As discussed later, these sales are not available by type of service but are shown in the accompanying tables opposite the industry of the affiliate making the sale.

In BEA's direct investment surveys, an "affiliate" includes any business enterprise that is owned 10 percent or more by an investor of a different country, but the data on sales of services by affiliates presented in this article are restricted to affiliates that are majority-owned (50 percent or more owned) by direct investors. For foreign affiliates, data on sales of services are available only for majority-owned affiliates.

Classification.—Data on sales of services by affiliates are not reported to BEA by type of service; instead, sales are classified according to the primary industry of the affiliate making the

sale, even though, in particular cases, secondary industries of the affiliate account for some of the sales. The primary industry of the affiliate often provides a good guide to the type of service being sold. This may be true even when the affiliate's primary industry is not a services industry, but

the affiliate provides services in support of the goods it sells (such as computer and data-processing services sold by computer manufacturers). Because the degree of consolidation permitted for reporting foreign affiliates is less than that permitted for U.S. affiliates, the industry of the affiliate probably

n.a. Not available.

1. See Note.

2. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States. Payments (imports) include mainly wages of foreign residents temporarily employed in the United States and of Canadian and Mexican commuters in the U.S. border areas.

3. The primary insurance components of premiums received and losses recovered for 1986 were estimated by BEA. Data for those components were collected beginning in 1987.

NOTE.—The difference between services on a balance of payments basis and on a gross basis is the treatment of affiliated transactions. On a balance of payments basis, net transactions of U.S. parents with their foreign affiliates (receipts less payments) are shown as exports, and net transactions of U.S. affiliates with their foreign parents (payments less receipts) are shown as imports. On a gross basis, all affiliated receipts (those of U.S. parents from their foreign affiliates plus those of U.S. affiliates from their foreign parents) are shown as exports, and all affiliated payments (those of U.S. affiliates to their foreign parents plus those of U.S. parents to their foreign affiliates) are shown as imports.

provides a better guide to the types of services sold by a foreign affiliate than it does to those sold by a U.S. affiliate.⁵

Comparability issues

The data on cross-border transactions are not completely comparable with the data on sales by affiliates because of differences in definition, concepts, classification, and data availability. For cross-border transactions, the data on sales are not completely comparable with those on purchases, because information for some purchases is not available. In addition, the data on sales by foreign affiliates are not completely comparable with those on sales by U.S. affiliates. Differences in methods of classification have been noted earlier. Comparability issues concerning individual services or types of transactions are noted below. The first four are differences between the data on cross-border transactions and those on affiliate sales.

One difference is in the treatment of construction. In the data on cross-border transactions, construction is considered a service, partly because of convention and partly because most of the transactions involve service-type activities such as construction management, engineering, and architecture. In contrast, in the data on sales by affiliates, construction is treated as goods producing because of the tangible and visible nature of the end product.

A second difference is in the treatment of investment income. In the data on cross-border transactions, "services" is defined to exclude such income. In contrast, in the data on sales by foreign affiliates, investment income of finance (except banking) and insurance companies is generally included in sales of services. This difference in treatment reflects the type of information on sales of services by affiliates that was initially requested in BEA's surveys of U.S. direct investment abroad and is to be eliminated beginning with data for 1989.⁶

5. Reports for foreign affiliates may be consolidated only if the affiliates are in the same country and only if they are integral parts of the same business operation. U.S. affiliates, in contrast, generally report to BEA on a fully consolidated domestic (U.S.) basis and include in the consolidation each affiliate owned more than 50 percent by the company above it. However, information for U.S. affiliates on the distribution of each affiliate's sales by industry of sales is reported for industry-coding purposes. This information is used in this article in analyzing the composition of sales of services by U.S. affiliates.

6. The initial survey questions requested that sales or gross operating revenues be disaggregated into only

A third difference is in the treatment of insurance. In the U.S. international transactions accounts, insurance exports are recorded as premiums received net of losses paid, and insurance imports are recorded as premiums paid net of losses recovered. (However, cross-border transactions are disaggregated in tables 5 and 7 to show premiums and losses separately.) In contrast, the data on sales by affiliates are not net of losses, because they are obtained from a breakdown of operating revenues, a measure that includes only premiums (and other receipts); thus, they should not be compared with the net amounts shown for cross-border insurance transactions.

A fourth difference concerns banks. As mentioned earlier, the data on sales by affiliates do not cover banks. In contrast, for cross-border transactions, some information on U.S. sales of banking services is available; none is available on U.S. purchases of these services.

An additional difference exists between sales and purchases in the data on cross-border transactions. Specifically, the data on cross-border transactions for medical services, like those for banks, are available for U.S. sales but not for purchases.

U.S. Balance of Payments (Cross-Border) Transactions

U.S. receipts for exports (cross-border sales) of private services were \$113.9 billion in 1989 (table 2). Travel and other private services, each at about 30 percent of total receipts, accounted for the majority of receipts. Passenger fares and other transportation accounted for 27 percent, and royalties and license fees for 11 percent.

U.S. payments for imports (cross-border purchases) of private services were \$85.7 billion. Travel, at 41 percent of payments, was the largest single category. Passenger fares and other transportation accounted for 34

two categories, goods and services. When investment income was received from the primary activities of a company, it was included in the company's operating revenues. Because almost all of these cases involved companies in the finance (except banking) and insurance industries, both of which are services industries, the income was almost invariably included in sales of services. Beginning with the 1989 benchmark survey of U.S. direct investment abroad, investment income is being reported separately and will be excluded from sales of services by foreign affiliates. In the data on sales by U.S. affiliates, like those on cross-border transactions, "services" excludes investment income.

percent of payments, other private services for 22 percent, and royalties and license fees for 3 percent.

Travel, passenger fares, and other transportation

Travel.—Travel includes aggregate estimates of transactions in a variety of services and related goods by persons traveling abroad for less than 1 year for business or personal reasons. The types of services and related goods most likely to be purchased by travelers are lodging, meals, entertainment, transportation within the country or area visited, gifts, and articles (except automobiles) for personal use. (Automobiles are included in merchandise trade in the international transactions accounts.)

U.S. receipts from foreign visitors to the United States were \$34.4 billion in 1989 (table 3.4). About 25 percent, or \$8.2 billion, of receipts were from Canada and Mexico. Transactions in the U.S. border areas with these countries accounted for 12 percent of receipts from Canada and 80 percent of receipts from Mexico. These transactions include expenditures for shopping, commuting to jobs in the U.S. border areas, and other similar activities. Border transactions differ from other travel transactions because they involve numerous visits and small average expenditures.

Visitors to the United States from overseas (other than Canada and Mexico) accounted for 76 percent, or \$26.2 billion, of U.S. travel receipts in 1989. Japanese visitors accounted for 25 percent of overseas receipts, and Western European visitors for 40 percent. More than one-half of receipts from Western Europe were from the United Kingdom, West Germany, and France. "Latin America and other Western Hemisphere" (excluding Mexico) accounted for 16 percent of the overseas total, and all other countries for 17 percent.

Travel receipts increased at an average annual rate of 19 percent in 1986–89. Most of the growth was in receipts from Japan and Western Europe. Rising incomes and appreciation of those countries' currencies against the U.S. dollar increased the attractiveness of the United States as a travel destination. Travel receipts from Canada also increased strongly; most of the increases occurred during the winter, when Canadians traveled to warm areas of the United States.

U.S. travel payments to foreigners were \$35.0 billion in 1989. About 26 percent, or \$9.1 billion, of payments were to Canada and Mexico. About 11 percent of payments to Canada and 55 percent of payments to Mexico were in the border areas. U.S. payments for travel overseas were \$25.9 billion. The major destinations for U.S. overseas travelers were Western Europe (particularly the United Kingdom, West Germany, France, and Italy), which accounted for 44 percent of overseas travel payments, and the Caribbean area, which accounted for about 20 percent. Payments to Japan were 7 percent of the overseas total, and

payments to all other areas (particularly Australia, South Korea, and Hong Kong) were 28 percent.

Travel payments increased more slowly—at an average annual rate of 9 percent—than receipts in 1986–89. The depreciation of the dollar during this period, particularly against the Japanese and major Western European currencies, was partly responsible. A slowdown in travel to the major Western European destinations was partially offset by an acceleration in travel to other Western European countries, mainly in the southern and eastern areas where prices were lower, and to Mexico. Increases in travel to Mexico

partly resulted from the depreciation of the peso against the U.S. dollar and from strong promotional efforts.

Passenger fares.—Passenger fares consist of the earnings of vessel and airline operators for transporting persons. Exports consist of receipts of U.S. operators for transporting foreign residents (1) between the United States and foreign countries and (2) between foreign countries.⁷ Imports consist of payments to foreign operators for transporting U.S. residents to and from the United States. Passenger fare receipts, which were \$10.1 billion in 1989, were entirely from U.S. airline operations. Ninety percent of receipts were from traffic to and from the United States, and the remainder were from air transportation of foreign persons between foreign countries. Over 90 percent of payments, which were \$8.5 billion, were from foreign airline operations, and the remainder were from vessel operations.

The rapid increase in passenger fare receipts in 1986–89—at an average annual rate of 23 percent—reflected the strong growth in travel by foreign visitors to the United States. Passenger fare payments increased much more slowly—at an average annual rate of 8 percent.

Other transportation.—Other transportation consists primarily of international transactions, other than passenger fares, of ship and airline operators. Exports include freight receipts of U.S. vessel and airline operators for transporting U.S. merchandise exports from U.S. ports to foreign destinations and for transporting freight between foreign countries; imports include freight payments to foreign operators for transporting U.S. merchandise imports.⁸ Other transportation

7. Because the U.S. international accounts measure only transactions between U.S. and foreign residents, receipts of U.S. operators for transporting U.S. residents overseas (which are transactions between U.S. residents) are not included in passenger fares. Similarly, earnings of foreign airlines for transporting foreign residents between the United States and foreign countries (which are transactions between foreign residents) are not included.

8. In estimating freight receipts and payments for the international transactions accounts, the convention used is that the importer owns the goods being transported and bears the cost of transportation. Thus, receipts of U.S. operators for transporting U.S. merchandise imports are excluded from U.S. transportation receipts because they represent transactions between U.S. residents—U.S. importers and U.S. vessel and airline operators. Similarly, revenues of foreign operators for transporting U.S. merchandise exports are excluded from U.S. payments because they represent transactions between foreign importers and foreign operators.

also includes port services. Exports include the value of goods and services provided to U.S. vessel and airline operators in connection with their operations outside the United States. Imports include the value of port services provided to foreign operators in the United States. Port services include fees for the following: Services such as piloting, towing, and berthing for ships and landing rights for airlines; cargo handling services, such as stevedoring and warehousing; fuel; and other goods and services, such as supplies, brokers' and port agents' fees, cleaning and catering services, and administrative and office services.

Other transportation receipts were \$20.4 billion in 1989. Payments were \$20.8 billion. For both receipts and payments, foreign carriers, which play a dominant role in transporting both U.S. imports and U.S. exports, accounted for a major share of the transactions. Port services provided to foreign operators accounted for two-thirds of receipts. Freight payments to foreign operators accounted for more than one-half of payments.

Freight.—Freight receipts were \$5.8 billion in 1989. Two-thirds were receipts of U.S. ocean vessel operators, and one-third were receipts of U.S. airline operators. Ocean freight receipts

were largely for liner, or scheduled, service and for transportation of agricultural exports, particularly grain, to countries in Asia. Air freight receipts were primarily for service to countries in Western Europe and to Japan. Other freight receipts, mainly for transporting Canadian-owned oil and gas by pipeline in transit through the United States, were small.

Freight payments were \$11.8 billion in 1989. Ocean freight payments were 80 percent of the total, and air freight payments were 19 percent. Twenty percent of ocean freight payments were for transporting crude petroleum and petroleum products. About one-half of these payments were to vessel operators based

in flag-of-convenience countries, such as Panama and Liberia (recorded under "international organizations and unallocated" in table 3), for transporting crude petroleum from South America and the Middle East, and about one-fourth of these payments were to Western European operators, mainly in the United Kingdom and Norway, for transporting crude petroleum from the North Sea to the United States. Ocean freight payments for transporting other goods were mainly to Japan, Western Europe, the flag-of-convenience countries, South Korea, and countries in southeast Asia.

Port services.—Receipts for port services provided to foreign operators in

the United States were \$13.8 billion in 1989. Ship operators received 55 percent of port services, and airline operators received 44 percent. Payments by U.S. ship and airline operators for port services abroad were \$8.2 billion, of which airlines paid 72 percent and ship operators 27 percent.

Port services provided to ship operators were related mainly to freight transportation activities, and port services provided to airline operators were related mainly to passenger transportation activities. For both ship and airline operators, the largest single component of port services was fuel.

Royalties and license fees

Royalties and license fees consist of receipts and payments for the use of patented techniques, processes, formulas, and other intangible property rights used in goods production, as well as copyrights, trademarks, franchises, rights to broadcast live events, and other intangible rights. Licensing and other agreements for the use of intangible property rights provide an important means for transferring technology and for marketing goods; thus, they provide an important alternative or complement to direct exporting. Licensing and other agreements

* Less than \$500,000.

† Suppressed to avoid disclosure of data of individual companies.

1. The detail by type of intangible asset shown for transactions with unaffiliated foreigners for 1987-89 in tables 4.2-4.4 was not collected for 1986.

with foreign companies that have extensive production facilities and marketing networks may be used by companies to sell their technology or to promote products bearing their brand names in foreign markets. Such agreements may be entered into either with unaffiliated foreign companies or with foreign affiliates. Companies may prefer to enter into licensing agreements with their foreign affiliates to obtain a return on their intangible assets in foreign countries while exercising additional control over their technology and products.

Total royalty and license fee receipts—including transactions between both affiliated and unaffiliated parties—were \$12.3 billion in 1989, and payments were \$2.7 billion (table 4.4). Although payments doubled between 1986 and 1989, they were only 22 percent as large as receipts in 1989. Thus, the United States remained a strong net exporter of rights to technology and other intangible assets.

Affiliated transactions.—Affiliated cross-border transactions are those between parents and affiliates—that is, between U.S. parent companies and their foreign affiliates and between U.S. affiliates and their foreign parent groups.⁹

Affiliated receipts consist of U.S. parents' receipts from their foreign affiliates and U.S. affiliates' receipts from their foreign parent groups. Affiliated receipts, which increased at an average annual rate of 19 percent in 1986-89, accounted for almost 80 percent of total royalty and license fee receipts in 1989. Almost all of the affiliated receipts were received by U.S. parent companies from their foreign affiliates. Although U.S. parent companies have agreements with affiliates in many countries, over 60 percent of U.S. parents' receipts were from only five countries: Japan accounted for 16 percent; the United Kingdom, 14 percent; West Germany, 12 percent; France, 10 percent; and Canada, 9 percent. By industry, the majority of receipts were from affiliates engaged in manufacturing machinery, passenger cars

9. A U.S. affiliate's foreign parent is the first person outside the United States in its ownership chain that has a direct investment interest in the affiliate. Its foreign parent group consists of (1) the foreign parent, (2) any foreign person, proceeding up the foreign parent's ownership chain, that owns more than 50 percent of the person below it, up to and including the ultimate beneficial owner, and (3) any foreign person, proceeding down the ownership chain(s) of each of these members, that is owned more than 50 percent by the person above it.

and other transportation equipment, and chemicals.

Affiliated transactions also accounted for a majority—68 percent—of payments of royalties and license fees. Affiliated payments, which include U.S. parents' payments to their foreign affiliates and U.S. affiliates' payments to their foreign parents, were almost entirely accounted for by U.S. affiliates' payments to parent companies, largely in the United Kingdom, Japan, Switzerland, and West Germany. Payments to the United Kingdom, which accounted for 24 percent of the total in 1989, almost tripled in 1986-89 as a result of large investments in the United States by British companies.

Unaffiliated transactions.—Receipts from unaffiliated foreign companies were \$2.6 billion in 1989, or 21 percent of total receipts of royalties and license fees. Thirty-nine percent of these receipts were from Japan and 5-6 percent each were from the United Kingdom, West Germany, Canada, and South Korea. Fees for industrial processes, largely those used in machinery and chemical manufacturing, accounted for about 70 percent of unaffiliated receipts.

Payments of royalties and fees by U.S. companies to unaffiliated foreign companies were mostly for industrial

Text continues from page 44.

processes, largely those used in machinery and automotive manufacturing. These payments were mainly to the United Kingdom, West Germany, and Japan. Payments of fees for rights to broadcast live events were unusually strong—42 percent of total unaffiliated payments—in 1988, mainly because of the purchase of rights to broadcast the Olympic games from South Korea.

Other private services

Other private services consist of a number of diverse activities. Detail by type of service for transactions be-

tween unaffiliated persons is presented in tables 5 and 7–10. Estimates are shown for education; financial services; insurance; telecommunications; business, professional, and technical services; and miscellaneous services not included elsewhere. Similar detail, by type of service, for transactions between affiliated persons is not available because the data are reported only in the aggregate (table 6).

Affiliated transactions.—Affiliated services transactions—that is, transactions between parents and affiliates—include both reimbursements for allocated expenses (such as research and development assessments or allocated overhead expenses for management

and accounting services performed by the parent company for the entire multinational company) and charges for specific services affiliates purchase from, or sell to, their parent companies.

Affiliated receipts for other private services were \$11.6 billion in 1989 (tables 5.4 and 6.2). Receipts by U.S. parents accounted for 70 percent of the affiliated total. The majority of the receipts were from foreign affiliates in manufacturing, insurance, and service industries. Receipts by U.S. affiliates were largely by affiliates in manufacturing industries and wholesale trade.

Affiliated payments for other private services were \$6.6 billion. In

* Less than \$500,000.

† Suppressed to avoid disclosure of data of individual companies.

contrast to receipts, payments were more evenly divided between U.S. parents and U.S. affiliates. U.S. parents in manufacturing (mainly machinery), insurance, and services industries accounted for the majority of payments to foreign affiliates. Affiliates in manufacturing industries accounted for two-fifths of U.S. affiliates' payments to foreign parents.

Unaffiliated transactions.—In transactions between unaffiliated persons, receipts were \$25.0 billion in 1989, or 68 percent of total receipts for other private services, and payments were \$12.1 billion, or 65 percent of total payments for these services. In 1986–89, the average annual rate of increase for

receipts was 9 percent, compared with 7 percent for payments.

Education.—Education receipts consist of expenditures for tuition and living expenses by foreign residents enrolled in U.S. colleges and universities. Payments consist of tuition and living expenses of U.S. residents receiving credit from accredited U.S. institutions for study abroad.

Education receipts were \$4.6 billion in 1989, or 18 percent of total unaffiliated receipts for other private services; education payments were \$0.6 billion, or 5 percent of total unaffiliated payments for other private services. More than one-half of receipts were from developing countries, and almost 70

percent of payments were to countries in Western Europe.

Financial services.—The coverage of estimates of financial services is limited, largely because of the lack of source data that can be adapted to developing estimates appropriate for the international transactions accounts. Financial services receipts include commissions and fees for transactions in U.S. securities paid to U.S. securities brokers by foreign residents. Payments include commissions and fees for transactions in foreign securities paid by U.S. residents to foreign brokers. In addition, receipts include noninterest income of U.S. banks and commissions received by

* Less than \$500,000 (±).

P Suppressed to avoid disclosure of data of individual companies.

1. Covers reinsurance only. Collection of data on primary insurance did not begin until 1987.

U.S. commodities brokers from foreign residents. Available estimates of non-interest income of U.S. banks are limited to fees for bankers acceptances, commercial letters of credit, standby letters of credit, undrawn funds under commitment, and items for collection.

Financial services receipts were \$5.0 billion in 1989, or 20 percent of total unaffiliated receipts for other private services. These receipts, which increased at an average annual rate of 16 percent in 1986-89, were among the fastest growing components of the total. Even though the data on bank fees are limited, they accounted for 56 percent of financial services receipts in 1989, while securities and commodities brokers' fees and commissions accounted for 44 percent.

Payments for financial services were \$2.0 billion in 1989, or 17 percent of unaffiliated payments for other private services. The average annual rate of increase for payments was 6 percent in 1986-89. These estimates consist of U.S. payments of commissions to foreign securities brokers only.

Insurance.—Insurance includes premiums received and paid for primary insurance and for reinsurance. Losses paid by U.S. insurers and losses recovered from foreign insurers are netted against the premiums. Examples of primary insurance are life insurance; accident and health insurance; and fire, marine, and casualty insurance. Each of these types of insurance may be reinsured by the primary insurer; reinsurance is the ceding of a portion of a premium to another insurer, who then assumes a corresponding portion of the risk. This form of insurance is one way of providing coverage for events with so high a degree of risk or liability that a single insurer would be unwilling or unable to underwrite insurance against their occurrence. Some examples of reinsurance are insurance for product liability, medical malpractice, and various types of hazards.

Net insurance receipts (premiums received less losses paid) were \$1.3 billion in 1989, or 5 percent of unaffiliated receipts for other private services.¹⁰ Net receipts of primary insurance were \$1.4 billion, and net losses for reinsurance were \$0.2 billion (table 7.4). In 1986-89, losses averaged 50 percent of

premiums for primary insurance, compared with 84 percent of premiums for reinsurance.

Net insurance payments (premiums paid less losses recovered) were \$0.7 billion in 1989, or 6 percent of unaffiliated payments for other private services.¹¹ Net payments of primary insurance were \$0.6 billion, and net payments of reinsurance were \$0.2 billion.¹² In 1986-89, losses were 51

percent of premiums for primary insurance, compared with 78 percent of premiums for reinsurance. Reinsurance losses recovered were higher in 1989 than in 1986-88 because of unusually large losses associated with Hurricane Hugo.

Primary insurance was concentrated in transactions with only a few countries. In 1989, most of the premiums received were from Canada and Japan, and most of the premiums paid were to the United Kingdom and Bermuda. Reinsurance transactions also tended to be concentrated, mainly among countries with large reinsurance markets, but they were less concentrated than primary insurance transactions.

10. As an alternative indicator of the importance of insurance, premiums alone accounted for 18 percent of unaffiliated receipts for other private services and 46 percent of payments.

11. See footnote 10.

12. Payments of primary insurance are probably underestimated because it is difficult to identify all U.S. persons that purchase insurance from nonresident companies. Data on reinsurance and receipts of primary insurance are obtained from U.S. insurers, a homogeneous group that is more easily identified. Additionally, data on recovery of losses associated with payments of primary insurance are not collected. Estimates are prepared by BEA based on the experience of U.S. primary insurers.

^b Suppressed to avoid disclosure of data of individual companies.

1. Receipts for engineering, architectural, construction, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. Payments for engineering, architectural, construction, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise and wages and other expenses, and no estimates are made because they are believed to be small.

† Suppressed to avoid disclosure of data of individual companies.

1. Receipts for engineering, architectural, construction, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. Payments for engineering, architectural, construction, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise and wages and other expenses, and no estimates are made because they are believed to be small.

* Less than \$500,000 (±).

° Suppressed to avoid disclosure of data of individual companies.

1. Receipts for engineering, architectural, construction, and mining services are published net of merchandise exports, which are included in merchandise trade in the U.S. international transactions accounts, and net of outlays abroad for wages, services, materials, and other expenses. Payments for engineering, architectural, construction, and mining services are not published net of merchandise imports and outlays for wages and other expenses. Data are not collected for merchandise and wages and other expenses, and no estimates are made because they are believed to be small.

Text continues from page 54.

Canada and the United Kingdom together accounted for over 40 percent of the reinsurance premiums received in 1989. Premiums were also received from numerous other countries, the most important of which were Bermuda, West Germany, and Japan. Over one-half of U.S. reinsurance premium payments were to the United Kingdom and Bermuda; other countries in Western Europe, Caribbean countries, and Japan received most of the remainder.

Telecommunications.—Telecommunications transactions include settlements between U.S. and foreign communications companies for the transmission of messages between the United States and other countries, channel leasing, electronic mail, video conferencing, and support services. In addition, payments include fees for the leasing of satellite channels from the International Telecommunications Satellite Organization.

Telecommunications receipts by U.S. companies were \$2.7 billion in 1989, or 11 percent of unaffiliated receipts for other private services (table 8). Payments to foreign companies were \$5.4 billion, or 45 percent of unaffiliated payments. Information from a benchmark survey for 1986 indicated that over three-fourths of receipts and nearly 90 percent of payments were for settlements for the transmission of messages between the United States and other countries.¹³ The large excess of payments over receipts was due to more calls being initiated in the United States than abroad, partly reflecting relatively low rates and high average incomes in the United States.

Business, professional, and technical services.—This category covers a number of different types of services, such as advertising; computer and data-processing services; database and other information services; research, development, and testing; management, consulting, and public relations; legal services; construction, engineering, architectural, and mining services; industrial engineering; and in-

stallation, maintenance, and repair of equipment (table 9, starting on p. 58).

Receipts for business, professional, and technical services were \$6.1 billion in 1989, or about one-fourth of unaffiliated receipts for other private services (table 9.4). Installation, maintenance, and repair of equipment; computer and data-processing services; construction, engineering, architectural, and mining services; and "other" business, professional, and technical services accounted for most of these receipts. A substantial share of services to equipment consisted of servicing aircraft engines, steam-generating turbines, and reciprocating engines. Receipts for computer and data-processing services included services such as systems analysis, design, engineering, custom programming, equipment leasing (except financial leasing), and maintenance and repair of computer equip-

ment; a large share of these receipts in 1989 were for rights for the use of programs for mainframe computers. Engineering and architectural services were larger than construction and mining services in the group that includes these services; construction services were limited mainly to supervisory and managerial activities. Medical services was the major component of receipts for "other" business, professional, and technical services (table 10).¹⁴ Most foreigners who came to the United States for medical treatment were from "Latin America and other Western Hemisphere."

14. Estimates of receipts for medical services are based on information about the operations of selected major medical centers, university hospitals, and hospitals in major foreign visitor destinations. Payments for medical services were not estimated because of the difficulty in identifying individuals who purchase these services abroad.

13. When calls are made from one country to another, the carriers in the two countries jointly provide the service and share the revenue collected. The corresponding international transactions represent the share of the revenue transmitted by the carrier in the country of origin (which is the carrier that collects the fee from the caller) to the carrier in the country of destination.

* Less than \$500,000.

^b Suppressed to avoid disclosure of data of individual companies.

Payments for business, professional, and technical services were \$2.0 billion, or 16 percent of unaffiliated payments for other private services. Most of these payments were accounted for by services to equipment; construction, engineering, architectural, and mining services; and advertising services. Services to equipment involved primarily industrial machinery. Drilling and other petroleum-related activities performed abroad for U.S. companies accounted for a large share of payments for construction, engineering, architectural, and mining services. Advertising included fees for preparing and placing advertising copy.

Other unaffiliated services.—U.S. receipts for other unaffiliated services were \$5.3 billion in 1989. Expenditures of foreign governments and international organizations accounted for 70 percent of the total. These expenditures cover the cost of maintaining embassies and consulates in the United States, the cost of maintaining missions to the United Nations, and outlays of international organizations headquartered in the United States, such as the United Nations, the International Monetary Fund, and the World Bank; they also include outlays by agents of foreign governments and quasi-government agencies providing legal, public relations, news dissemination, and travel and trade promotion services. Film rentals accounted for 20 percent of other unaffiliated services receipts, and wages of U.S. residents temporarily working abroad and receipts from Canadian locals of U.S. trade unions accounted for the remainder.

U.S. payments for other unaffiliated services were \$1.3 billion in 1989. Wages of commuters from Mexico and Canada, of foreign students, and of other nonresidents temporarily em-

ployed in the United States accounted for 80 percent of the total. Film rentals, payments to Canadian locals of U.S. trade unions, and consular fees made up most of the remainder.

Sales by Affiliates

Table 11 shows the complete matrix of available data on sales of services by nonbank majority-owned U.S. affiliates of foreign companies and foreign affiliates of U.S. companies for all countries and industries combined. Data for foreign affiliates are available for 1986–88; data for U.S. affiliates are available

n.a. Not available.

NOTE.—Sales of services in this table are those characteristic of the following: Industries in the “services” division of the Standard Industrial Classification; finance (except banking), insurance, and real estate; agricultural, mining, and petroleum services; and transportation, communication, and public utilities. The exclusion of banking reflects the limitation of the data to nonbanks, not a judgment that banking is not a service. Data for foreign affiliates include, and data for U.S. affiliates exclude, investment income included in operating revenues of finance and insurance companies.

for 1987 and 1988. Highlights of the data for the two groups of affiliates in 1988—the most recent year for which data are available—are discussed in the two sections that follow.

Sales by foreign affiliates

Worldwide sales of services by nonbank majority-owned foreign affiliates (MOFA’s) were \$111.1 billion in 1988. Nearly 80 percent, or \$87.1 billion, of these sales were to unaffiliated persons, mainly foreign persons. Of the \$24.0 billion in sales of services to affiliated persons, one-third of the sales were to U.S. parents, and two-thirds were to other foreign affiliates of the same U.S. parent as that of the affiliate making the sale.

^a Suppressed to avoid disclosure of data of individual companies.

By location of customer, nearly 10 percent of sales of services by MOFA's were to U.S. persons, mainly U.S. parents. The remainder were to foreign—mainly unaffiliated—persons. This section focuses on these sales to foreign persons, which represent sales delivered by U.S. companies to foreign markets through the channel of direct investment. These sales are shown by country in table 12 and by industry of affiliate by country in table 13.

Sales to foreign persons.—Of the \$100.7 billion in sales of services by MOFA's to foreign persons, sales in the country of the affiliate (local sales) accounted for 85 percent and sales to other foreign (non-U.S.) countries for 15 percent. The preponderance of local sales reflects the need for many services businesses to serve their customers from a nearby location. Over 90 percent of the sales to other foreign countries were by affiliates located in either Europe (and thus possibly "local" in the sense that they may have been mainly to neighboring European countries) or "other Western Hemi-

sphere." The sales by "other Western Hemisphere" affiliates were accounted for largely by offshore finance and insurance affiliates engaged in activities that do not require a local presence. For example, these affiliates may serve as a location for booking transactions with other parts of the multinational firms to which they belong; in addition, their revenues probably include a substantial amount of income on investments made in other countries. (As explained earlier, sales of services by foreign affiliates include investment income of affiliates in finance and insurance.)

Affiliates in Europe accounted for \$52.1 billion, or over 50 percent, of MOFA's sales of services to foreign persons in 1988 (table 12). Sales by affiliates in the United Kingdom, at \$19.4 billion, were by far the largest; sales by affiliates in West Germany, the Netherlands, and France also were large—\$6 billion to \$7 billion each. Among other countries, sales to foreign persons were largest for MOFA's in Japan (\$8.4 billion), "international"

(\$4.9 billion), Australia (\$3.8 billion), and Bermuda (\$3.5 billion).¹⁵

By industry, the largest portion of sales of services by MOFA's to foreign persons was accounted for by affiliates classified in the "services" division of the Standard Industrial Classification (table 13.3). These sales were \$27.7 billion in 1988; affiliates in Europe accounted for 70 percent of them. Within "services," sales to foreign persons were largest for affiliates in computer and data-processing services and in "other services." It should be noted that affiliates in computer and data-processing services accounted for only part of the total sales of these services; affiliates in machinery manufacturing (which includes computer manufacturers) and wholesale trade (which includes distributors of computers) also had substantial sales of such services.

After "services," sales by MOFA's to foreign persons were largest in insur-

15. The "international" category is used for affiliates that have operations in more than one country and that are engaged in petroleum shipping, other water transportation, or oil and gas drilling.

* Less than \$500,000.

^a Suppressed to avoid disclosure of data of individual companies.

ance, at \$20.7 billion, and in finance (except banking), at \$15.1 billion. Both figures contain an unknown amount of investment income, in addition to revenues for the performance of services, and thus are not completely comparable with the figures for other industries. In insurance, affiliates in three countries—Canada, Japan, and the United Kingdom—accounted for over two-thirds of the sales to foreign persons, which were mainly to unaffiliated customers in the country of the affiliate. Sales by affiliates in “Latin America and other Western Hemisphere” also were significant; captive offshore insurance affiliates, many in Bermuda, that provided casualty insurance to other foreign affiliates of their U.S. parents accounted for a substantial portion of these sales. In finance, about one-third of the sales to foreign persons were by affiliates in the United Kingdom, where deregulation has enabled foreign-owned firms to engage in a wider variety of activities in recent years.

Affiliates in manufacturing accounted for \$11.4 billion of sales of services to foreign persons, and those in wholesale trade for \$11.3 billion. In both cases, a large share of the sales were by affiliates of U.S. computer manufacturers and were presumably accounted for mainly by computer and data-processing services. European affiliates accounted for about two-thirds of the sales in each industry.

Affiliates in petroleum had \$7.2 billion in sales of services to foreign persons. The services sold by these affiliates probably consisted mainly of oil and gas field services and of petroleum transportation. Of the \$7.2 billion, \$3.2 billion was by affiliates in “international.” Other industries with \$1 billion or more in sales of services to foreign persons were transportation (\$4.3 billion), real estate (\$1.2 billion), and public utilities (\$1.3 billion).

Sales by U.S. affiliates

Worldwide sales of services by nonbank majority-owned U.S. affiliates (MOUSA's) in 1988 were \$72.7 billion, considerably below the \$111.1 billion of sales by MOFA's. The two figures are not completely comparable because of the difference in the treatment of investment income; however, it appears that if this income could be excluded from both data sets,

MOFA's would still have larger sales than MOUSA's.¹⁶

Of the \$72.7 billion in sales of services by MOUSA's, 95 percent, or \$68.7 billion, were to U.S. persons, and 5 percent, or \$4.0 billion, were to foreign persons. The sales to foreign persons were about evenly divided between sales to members of foreign parent groups and sales to unaffiliated foreigners. Because it is relatively uncommon for U.S. affiliates of foreign companies to have foreign affiliates of their own, sales of services to such affiliates were very small.

The remainder of this section discusses MOUSA sales to U.S. persons by country of ultimate beneficial owner (UBO) and by industry of affiliate.¹⁷ These sales represent deliveries of services by foreign companies to the United States through the channel of direct investment.

Sales to U.S. persons.—Affiliates with European UBO's accounted for \$40.0 billion, or nearly 60 percent, of MOUSA sales to U.S. persons (table 14). Among these affiliates, sales by affiliates with British UBO's, at \$19.5 billion, were by far the largest. Sales by affiliates with Netherlands and Swiss UBO's (\$6 billion each) and with West German UBO's (\$3.5 billion) also were large. Outside Europe, sales by affiliates with UBO's in Canada (\$16.3 billion), Japan (\$4.3 billion), and Australia (\$3.2 billion) were largest.

In interpreting the information in table 15 on the industry distribution of sales of services to U.S. persons, it should be kept in mind that the data are classified by industry of affiliate, not by type of service. As noted earlier, this classification probably provides a better guide to the types of services sold by foreign affiliates than it does to those sold by U.S. affiliates. U.S. affiliates in goods-producing industries accounted for a majority of sales of services outside the primary

16. This statement is based on available information showing that if the \$18.5 billion in investment income included in total sales by MOUSA's were added to sales of services by MOUSA's, the resulting sum—\$91.1 billion—falls short of the \$111.1 billion in sales of services by MOFA's. In addition, for industries other than finance and insurance for which no significant comparability problem exists, sales of services by MOUSA's—at \$40.1 billion—are considerably lower than sales of services by MOFA's—at \$68.9 billion.

17. An ultimate beneficial owner of a U.S. affiliate is that person, proceeding up the affiliate's ownership chain beginning with and including the foreign parent, that is not owned more than 50 percent by another person.

industries of the affiliates making the sales. Although these sales to U.S. persons cannot be classified by type of service, it appears, judging from information on the composition of total sales that affiliates report for industry coding purposes, that if they could be, the sales would be redistributed to several other industries, especially insurance, computer and data-processing services, petroleum (which contains oil and gas field services and other petroleum services), equipment rental, and real estate.

By industry, sales of services to U.S. persons by affiliates in insurance, at \$28.2 billion, were far larger than

UBO Ultimate beneficial owner

those by affiliates in any other industry and accounted for over 40 percent of the total for all industries combined in 1988 (table 15.2). Premium income accounted for most of these sales, nearly 60 percent of which were by affiliates with UBO's in Canada and the United Kingdom. By type of insurance, life insurers—most of them with Canadian UBO's—accounted for the majority of the sales. Property and casualty insurers accounted for most of the remainder. Foreign investment in property and casualty insurance has expanded in recent years, as the industry has become more internationally oriented and as some foreign insurance companies have established or acquired affiliates in the United States in order to service the U.S. affiliates of clients in their home countries. Sales by affiliates in accident and health insurance were very small, perhaps reflecting differences between the United States and the major potential investing countries in methods of financing the delivery of health care.

After insurance, sales by MOUSA's were largest in "services" (\$13.3 billion) and real estate (\$8.4 billion). Over 30 percent of the sales in "serv-

ices" were by affiliates with British UBO's. By industry within "services," sales to U.S. persons were largest for affiliates in "other services" (\$3.8 billion), hotels and other lodging places (\$2.4 billion), and advertising (\$1.9 billion). In "other services," affiliates that provide building cleaning and maintenance services accounted for almost one-third of the sales; sales by affiliates that provide temporary employment services, amusement and recreation services, auto rental, and security services also were substantial. For both "other services" and advertising, sales by affiliates with British UBO's were largest. For hotels and lodging places, sales by affiliates with Japanese UBO's were largest.

A large share of the sales by real estate affiliates represents rental income of developers of commercial property, particularly office buildings in major urban areas. Sales by affiliates with Canadian UBO's were considerably larger than those by affiliates with UBO's in any other country, possibly reflecting the value that proximity to the property owned or managed offers to investors in real estate. Sales by affiliates with British UBO's were next largest.

In both manufacturing and transportation, affiliates' sales of services to U.S. persons were about \$5 billion. In manufacturing, over 40 percent of the sales were accounted for by affiliates with British UBO's. These sales include insurance, oil and gas field services, computer and data-processing services (sold by computer manufacturers), research and development, and equipment rental.

In transportation, most of the sales were by small regional railroads, trucking companies, and companies providing warehousing or related services, such as freight forwarding and containerization. Sales by affiliates providing air or water transportation were small, probably because of U.S. restrictions on foreign participation in these industries.¹⁸ UBO's in Canada and the United Kingdom accounted for about one-half of the \$4.8 billion in sales.

18. In the United States, coastal and inland shipping by water is restricted to domestic carriers, and the foreign ownership share of a U.S. airline is limited to 25 percent. (Foreign airlines have facilities in the United States, such as ticket offices and terminal facilities, that provide services only to their foreign owners, but such facilities are not considered U.S. affiliates for the purposes of BEA surveys.)

U.S International Transactions, Second Quarter 1990

THE U.S. current-account deficit was \$21.8 billion in the second quarter of 1990, little changed from the \$21.7 billion (revised) in the first quarter.¹ A further decrease in the merchandise trade deficit was more than offset by a shift to a deficit on investment income and an increase in net unilateral transfers. The surplus on services increased slightly.

1. Quarterly estimates of U.S. current- and capital-account components are seasonally adjusted when significant seasonal patterns are present.

In the capital account, net private capital flows were an outflow of \$10.5 billion in the second quarter, in contrast to an inflow of \$11.9 billion in the first quarter and an inflow of \$30.8 billion in the fourth quarter of 1989 (chart 2). This was the first net capital outflow since the fourth quarter of 1982. Several factors explain the swing to outflows from large inflows; among these are a slowing in economic growth in the United States relative to that abroad, a shift in key interest rate

differentials against the United States, a significant depreciation of the dollar since mid-1989, and greater global competition for investment funds.

In the second quarter, U.S. private assets abroad increased \$26.2 billion, following a decrease of \$36.7 billion in the first. Most of the change was due to a shift in U.S. claims reported by U.S. banks to an outflow of \$12.1 billion from an inflow of \$52.4 billion. Foreign private assets in the United States increased \$15.7 billion following

* Preliminary.

1. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

2. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.

3. Consists of transactions of the Federal Reserve System and the U.S. Treasury Department's Exchange Stabilization Fund.

a decrease of \$24.8 billion. Nearly all of the change was in U.S. liabilities reported by U.S. banks, which shifted to an inflow of \$2.9 billion from an outflow of \$32.3 billion.

U.S. direct investment abroad was a net outflow of \$3.1 billion in the second quarter, compared with a net outflow of \$9.3 billion in the first. Foreign direct investment in the United States was a net inflow of \$5.0 billion, compared with an inflow of \$5.5 billion. In securities transactions, net U.S. purchases of foreign securities were a record \$10.9 billion, compared with \$7.5 billion. Net foreign purchases of U.S. securities other than U.S. Treasury securities were \$4.9 billion, compared with \$2.5 billion. A surge in new bond issues sold abroad by U.S. corporations more

than offset the third consecutive quarterly decline in purchases of stocks by foreigners.

The statistical discrepancy (errors and omissions in recorded transactions) was an inflow of \$26.3 billion in the second quarter, compared with an inflow of \$21.9 billion in the first. The size and volatility of the discrepancy in recent quarters suggest difficulties mostly in tracking capital transactions rather than in measuring the current account. If some or most of the unrecorded capital transactions had been more fully recorded (either as larger in-

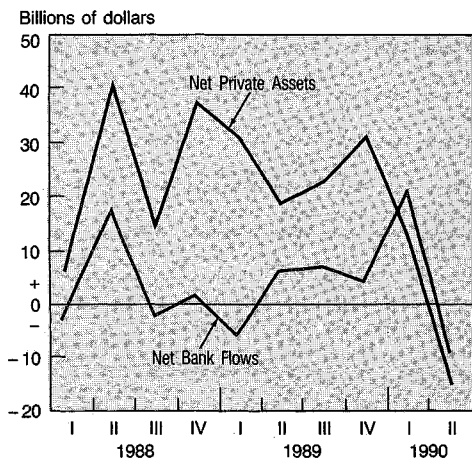

flows or reduced outflows), the drop in recorded net capital inflows in the first half of 1990 from the levels in 1988 and 1989 would not have been as large.

U.S. dollar in exchange markets

On a trade-weighted quarterly average basis, the dollar was unchanged against the currencies of 10 industrial countries and against the currencies of 22 OECD countries and 4 newly industrialized countries in the Far East (table C, chart 3). Currencies of most major industrial countries depreciated

slightly in April and May, and some appreciated slightly in June. Although the dollar was little changed on average over the first and second quarters, it was significantly below its recent highs of mid-1989.

In the second quarter of 1990, the dollar appreciated 5 percent against the Japanese yen. Sharp dollar appreciation in April was only partly offset by depreciation in May following large sales by Japanese institutional investors of some of their dollar-denominated assets. A more rapid decline in U.S. short-term interest rates than in Japanese interest rates in May and perceptions that Japanese outflows for portfolio investments in the United States might weaken further contributed to the dollar weakness (chart 4).

The dollar depreciated 1 percent against the German mark in the second quarter. It reached its lowest level in more than 2 years briefly in mid-May and recovered in June. The

perception existed early in the quarter that German growth might strengthen relative to growth in the United States as a result of West German unification with East Germany, leading to a weakening of the dollar. The dollar recovered somewhat when market participants shifted their focus to fears about future inflation in Germany, but those fears eased when the terms of unification were announced. The relationship between U.S. and German short-term interest rates was virtually unchanged over the period.

The dollar depreciated 1 percent against the Canadian dollar in the second quarter; a rise in Canadian short-term interest rates relative to U.S. rates contributed to continued strength of the Canadian currency. Temporary weakness of the Canadian dollar occurred in the middle of the period as a result of uncertainty about plans to modify the Canadian constitution.

The dollar depreciated 1 percent against the British pound in the second quarter. Depreciation was strong in May and June, when market participants focused on large interest differentials favoring the pound and anticipated that the United Kingdom might soon join the European Monetary System; participants ignored lackluster economic growth and continued high inflation.

Against the currencies of the newly industrialized countries in the Far East, the dollar depreciated 3 percent each against the Taiwan dollar and the South Korean won in the second quarter. In contrast, the dollar appreciated 3 percent against the Singapore dollar and less than 1 percent against the Hong Kong dollar.

Merchandise trade

The merchandise trade deficit decreased to \$22.6 billion in the second quarter from \$26.3 billion in the first. The decrease was mainly due to a reduction in petroleum imports reflecting sharply lower petroleum prices. (Petroleum prices have increased significantly in the third quarter of 1990 in response to the crisis in the Persian Gulf.) In the first half of 1990, the merchandise trade deficit was \$9.7 billion lower than in the second half of 1989. The decrease was more than accounted for by a decline in the deficit with the industrial countries, mainly Japan and Western Europe; the deficit with members of OPEC increased, and that with

other developing countries was nearly unchanged.

The merchandise trade deficit peaked in 1987 and has been decreasing steadily since then mainly as a result of much stronger growth in exports than in imports. The deficit with most geographic areas peaked during the third or fourth quarters of 1987.

Exports.—Exports increased \$0.5 billion, or less than 1 percent, to a record \$96.7 billion in the second quarter of 1990; volume, measured in constant (1982) dollars, decreased 1 percent. Export expansion began to accelerate in 1987, partly in response to the delayed effects of the devaluation of the dollar that began in the first quarter of 1985.

Nonagricultural exports increased \$1.1 billion, or 1 percent, to a record \$86.4 billion; volume increased less than 1 percent. Exports of automotive products, primarily engines and other parts to U.S. assembly plants in Canada and Mexico, increased to \$9.6 billion from \$8.7 billion in the first. Although sales of domestically produced passenger cars, including those produced in Canada and Mexico, decreased 3 percent, they remained well above their level at the end of 1989. Consumer goods increased to \$10.5 billion from \$10.2 billion. They have shown the fastest growth of all the end-use categories, increasing 130 percent since the first quarter of 1987. Nearly all of the growth has been to Western Europe, Canada, and Japan. Capital goods increased to \$38.5 billion from \$38.2 billion; a large increase in completed civilian aircraft was partly offset by a decrease in computers, peripherals, and parts. Nonagricultural industrial supplies and materials decreased to \$23.3 billion from \$23.6 billion as a result of a decrease in energy products.

Exports in constant (1982) dollars have risen much more rapidly than U.S. goods production since the first quarter of 1987 (chart 5). All of the growth has come from nonagricultural exports, which have been a primary contributor to the U.S. economic expansion.

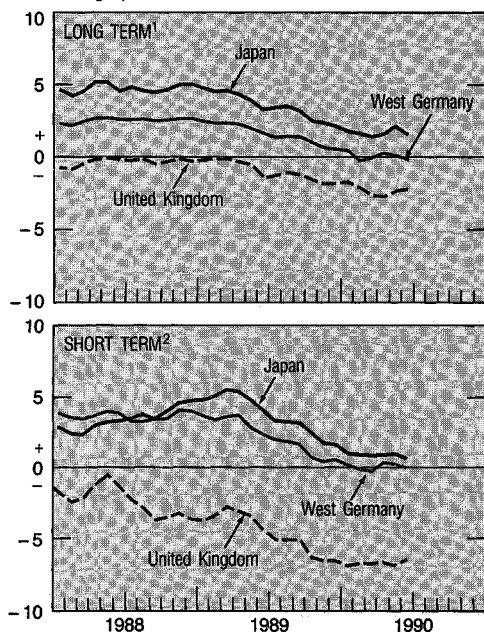

Agricultural exports decreased \$0.6 billion, or 6 percent, to \$10.3 billion in the second quarter; volume decreased 8 percent. The largest decreases were in exports of wheat, down \$0.2 billion, mostly to the Soviet Union; soybeans, down \$0.2 billion, mostly to Western Europe and Japan; and cotton, down \$0.1 billion. The fixed-weighted

CHART 4

Interest Rate Differentials

(Plus (+) Indicates Differentials in Favor of U.S. Dollar Assets)

Percentage points

1. Interest rate on U.S. Government bonds (composite over 10 years) less interest rate on Japanese Central Government bonds. Interest rate on U.S. Government bonds (composite over 10 years) less interest rate on U.S. Government bonds (composite over 10 years) less interest rate on West German 7-15 year public sector bonds. Interest rate on U.S. Government bonds (composite over 10 years) less interest rate on United Kingdom 20-year Government bonds. Data OECD.

2. Interest rate on 90-day Eurodollar deposits less Japanese CD rate. Interest rate on 90-day Eurodollar deposits less German interbank rate. Interest rate on 90-day Eurodollar deposits less United Kingdom interbank rate. Data: Federal Reserve Board.

U.S. Department of Commerce, Bureau of Economic Analysis

90-9-4

price index for agricultural products increased 2 percent, reflecting an 8-percent increase in the average price of corn and a 5-percent increase in soybeans. Despite these movements, grain and soybean prices have moderated in recent quarters because of excess world supplies and weak demand from the Soviet Union. Insufficient foreign exchange may also have limited recent Soviet purchases. The average price of cotton has remained strong since the fourth quarter of 1987 as a result of tight supplies and strong demand.

Imports.—Imports decreased \$3.2 billion, or 3 percent, to \$119.3 billion in

the second quarter; volume, measured in constant (1982) dollars, decreased less than 1 percent. The decrease was more than accounted for by petroleum imports; nonpetroleum imports increased.

Nonpetroleum imports increased \$0.3 billion, or less than 1 percent, to \$107.2 billion; volume increased 1 percent. Nonpetroleum industrial supplies and materials, up \$0.5 billion, and automotive products, mostly from Canada, up \$0.2 billion, more than accounted for the increase.

Import growth in constant (1982) dollars has leveled in recent quarters, mostly in response to slower economic growth in the United States. Nevertheless, merchandise imports have grown faster than gross domestic purchases less services (goods) (chart 6).

Petroleum imports decreased \$3.5 billion, or 22 percent, to \$12.1 billion in the second quarter. Nearly all of the decrease was due to sharply lower prices. The average price per barrel decreased to \$15.81 from \$19.47. (Petroleum prices have increased significantly in the third quarter of 1990 in response to the crisis in the Persian Gulf.) The average number of barrels imported daily decreased to 8.41 million from 8.90 million.

The trend of declining domestic production in the United States since 1986 has contributed to increased dependence on imported petroleum (chart 7). Production has been affected by dwindling reserves and low market prices. Partly as a result, the annual volume of petroleum imports has increased more than 50 percent since 1984. Much of that increase has come from members of OPEC in Asia and Africa (chart 8). These countries accounted for 43 percent of total U.S. petroleum imports in the first half of 1990, compared with 28 percent in 1984.

Balances by area.—The merchandise trade deficit with members of OPEC decreased to \$4.3 billion in the second quarter of 1990 from \$6.6 billion in the first. Nearly all of the decrease was due to lower petroleum prices. The deficit with the industrial countries decreased to \$10.1 billion from \$10.6 billion. Since the peak deficit of \$25.0 billion in the fourth quarter of 1987, the deficit with the industrial countries has decreased steadily. Most of the change was with Western Eu-

rope, which shifted to a surplus of \$1.5 billion from a deficit of \$7.9 billion. Sharply higher exports were aided by strong growth in Western Europe and greater competitiveness of U.S. products. At \$10.4 billion, the deficit with Japan was nearly unchanged in the second quarter, but it has decreased from \$14.7 billion in the fourth quarter of 1987; the deficit has decreased from a peak of \$15.2 billion in the fourth quarter of 1988. The deficit with the developing countries other than members of OPEC decreased to \$8.5 billion in the second quarter from \$9.4 billion in the first; the deficit has decreased from a peak of \$13.9 billion in the third quarter of 1987.

CHART 5
Merchandise Exports and U.S. Goods Production

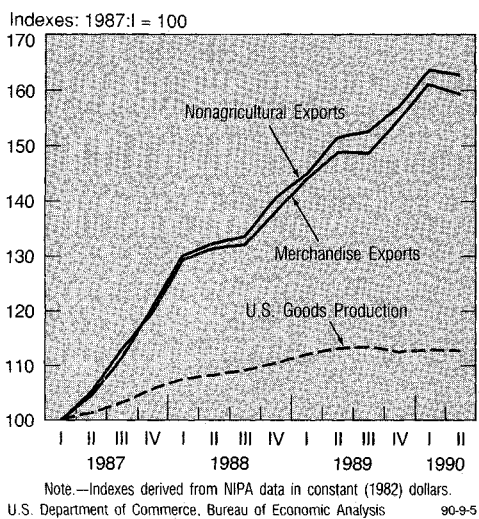

CHART 6
Merchandise Imports and Gross Domestic Purchases Less Services

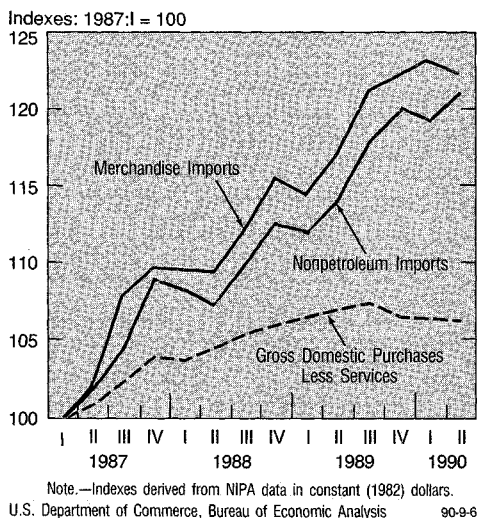

CHART 7
U.S. Petroleum Consumption, Production, and Imports

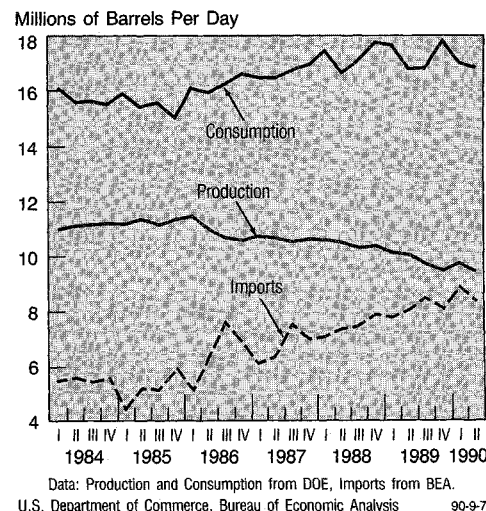

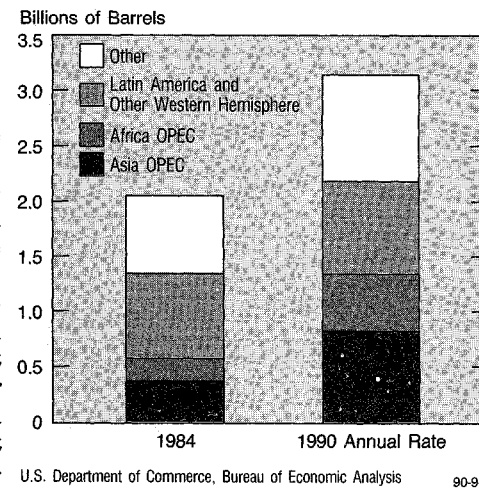

CHART 8
U.S. Petroleum Imports From Selected Areas

Service transactions

The surplus on services increased to \$6.1 billion in the second quarter from \$6.0 billion in the first. Receipts increased \$0.4 billion to \$31.7 billion, reflecting increases in travel receipts and in royalties and license fee receipts. Payments increased \$0.2 billion to \$25.6 billion, reflecting an increase in travel payments. In the first half of 1990, the surplus on services was \$0.2 billion above that in the second half of 1989.

Travel receipts increased to \$9.6 billion in the second quarter of 1990 from \$9.4 billion, as a result of an increase in visitors from overseas and Canada. Travel payments increased to \$9.2 billion from \$8.9 billion, as the number of U.S. travelers overseas increased. Passenger fare receipts decreased slightly to \$2.9 billion, and passenger fare payments increased slightly to \$2.3 billion.

Other transportation receipts were unchanged at \$5.4 billion. A decrease in ocean freight receipts, due in part to a drop in tonnage, was offset by an increase in air freight receipts. Air freight receipts have increased 75 percent since the second quarter of 1988, primarily as a result of a marked expansion in U.S. airlines' operations overseas. Other transportation payments were unchanged at \$5.7 billion. An increase in port expenditures offset a decrease in air freight payments; ocean freight payments were unchanged.

Receipts from other private services were unchanged at \$7.7 billion. Payments for other private services decreased to \$3.7 billion from \$3.8 billion.

Transfers under U.S. military agency sales contracts were nearly unchanged at \$2.4 billion; increases in aircraft and parts deliveries were partly offset by a decrease in technical support services. U.S. direct defense expenditures abroad increased to \$3.7 billion from \$3.6 billion.

Investment income

Net investment income shifted to a deficit of \$0.6 billion in the second quarter from a surplus of \$2.0 billion in the first quarter. In the first half of 1990, net investment income was a surplus of \$1.4 billion, compared with a surplus of \$0.6 billion in the second half of 1989.

* Preliminary.

* Revised.

NOTE.—Table shows only transactions with affiliates established primarily to borrow funds abroad and relend them to their U.S. parents.

Direct investment income.—Receipts of income on U.S. direct investment abroad increased to \$13.4 billion in the second quarter of 1990 from \$13.2 billion in the first. Capital gains increased \$0.5 billion, primarily from the sale of petroleum assets by a holding company in the United Kingdom and a shift to small gains from large losses in Central and South America (mostly Brazil). Operating earnings decreased \$0.3 billion. Earnings of manufacturing and banking affiliates in Western Europe remained moderately strong. The increase in Western Europe was more than offset by a drop in earnings in South America. The drop was mostly accounted for by a decrease in earnings of manufacturing and banking affiliates in Brazil, which reflected the harsh, anti-inflationary economic policies implemented by the Brazilian Government. Earnings of petroleum affiliates in Asia also decreased, partly as the result of lower crude petroleum prices.

Payments of income on foreign direct investment in the United States increased to \$2.3 billion from \$1.2 billion, reflecting increases in operating earnings for financial, trade, and manufacturing affiliates. Operating earnings shifted \$1.0 billion to a profit of \$0.4 billion. More than one-half of the change was in earnings of Japanese banking affiliates, which shifted from losses to profits.

Portfolio income.—Receipts of income on other private investment abroad decreased to \$15.9 billion in the second quarter from \$16.2 billion in the first. U.S. Government income receipts decreased to \$1.7 billion from \$2.0 billion; they had been boosted by debt rescheduling in the previous quarter.

Payments of income on other private investment in the United States increased to \$19.8 billion from \$19.2 billion as a result of higher payments on foreign-held U.S. bonds; payments

on U.S. bank-reported liabilities were unchanged. U.S. Government income payments increased to \$9.4 billion from \$9.2 billion.

Unilateral transfers

Net unilateral transfers increased to \$4.7 billion in the second quarter from \$3.4 billion in the first. Most of the increase was in U.S. Government grants, as Egypt drew substantially all the funds remaining from a prior fiscal year appropriation. Private remittances and other transfers decreased as receipts by individuals from Germany increased and as payments by U.S. corporations dropped from exceptionally high levels.

U.S. assets abroad

U.S. assets abroad increased \$26.4 billion in the second quarter, in contrast to a decrease of \$32.8 billion in the first, reflecting a large shift in bank claims. In the first half of 1990, U.S. assets abroad decreased \$6.4 billion, in contrast to an increase of \$92.8 billion in the second half of 1989. Most of the swing from the second half to the first half resulted from a shift in bank claims and from a slower accumulation of U.S. official reserve assets.

U.S. official reserve assets.—U.S. official reserve assets decreased \$0.4 billion in the second quarter, compared with an increase of \$3.2 billion in the first.

Claims reported by banks.—U.S. claims on foreigners reported by U.S. banks increased \$12.1 billion in the second quarter, in contrast to a decrease of \$52.4 billion in the first. Banks' own claims payable in dollars increased \$1.0 billion, following a decrease of \$43.0 billion, as foreign demand for dollar credits from U.S. banks remained extremely limited and as several major U.S.-owned banks reduced further their interna-

* Revised.

* Preliminary.

tional claims; in contrast, foreign-owned banks in the United States increased their claims. Over the past year, U.S.-owned banks have reduced their dollar claims \$11.9 billion, while foreign-owned banks have increased their claims \$14.5 billion.

U.S. banks' own claims on own foreign offices payable in dollars increased \$4.5 billion. Increases in claims on own foreign offices were limited to Asian banking centers early in the quarter and, after large repayments, to Caribbean offices late in the quarter. Claims on unaffiliated banks, primarily in Western Europe, increased moderately. Claims on foreign public borrowers, largely in Latin America, decreased for the fourth consecutive quarter.

Banks' own claims payable in foreign currencies increased \$5.6 billion, in contrast to a decrease of \$4.1 billion, as foreign-owned banks increased their claims on Japan and the United Kingdom by \$3.2 billion and \$1.7 billion, respectively.

Banks' domestic customers' claims, payable largely in dollars, increased \$5.5 billion, in contrast to a decrease of \$5.2 billion. There were large swings to net purchases of Eurodollar certificates of deposit from banks in the United Kingdom and of other negotiable instruments of continental European countries, Canada, and Japan.

Foreign securities.—Net U.S. purchases of foreign securities were a record \$10.9 billion in the second quarter, compared with \$7.5 billion in the first. Net U.S. purchases of foreign stocks increased to \$5.5 billion from small net sales. Nearly all of the step-up was in purchases of stocks from Western Europe, especially the United Kingdom, and Japan.

Net U.S. purchases of foreign bonds were \$5.4 billion, compared with \$7.6 billion. New issues of foreign bonds

in the United States were \$4.6 billion, compared with \$8.6 billion. The first-quarter figure had included a special \$5.2 billion new issue associated with Mexico's debt restructuring. New issues were from the Netherlands and Canada, partly reflecting declines in U.S. long-term interest rates relative to the interest rates in those countries. Net purchases of outstanding bonds were \$2.4 billion, compared with \$0.3 billion. The increase was concentrated in purchases from the United Kingdom, Canada, and Japan. Redemptions were \$1.5 billion, compared with \$1.3 billion.

Direct investment.—Net outflows for U.S. direct investment abroad were \$3.1 billion in the second quarter, compared with \$9.3 billion in the first. Most of the decrease was in equity capital, which shifted to inflows of \$2.8 billion from outflows of \$1.9 billion. The shift occurred in every major geographic area but was largest in the United Kingdom, where outflows had been particularly large in the first quarter. Intercompany debt outflows were \$1.9 billion, compared with \$1.6 billion. A shift to outflows to Other Western Hemisphere and the United Kingdom reflected a combination of new loans to and of repayments of earlier borrowing from finance and insurance affiliates of U.S. petroleum companies. Reinvested earnings decreased to \$4.0 billion from \$5.8 billion.

Foreign assets in the United States

Foreign assets in the United States increased \$22.0 billion in the second quarter, in contrast to a decrease of \$33.0 billion in the first. Large swings in bank liabilities and in foreign official assets in the United States accounted for much of the shift. In the first half of 1990, foreign assets in the United States decreased \$11.0 billion, in contrast to an increase of \$143.5 billion in

the second half of 1989. Nearly all of the change from the second half to the first half was in foreign private assets in the United States, reflecting substantially slower inflows for foreign direct investment, larger negative bank inflows, and a slower accumulation of foreign holdings of U.S. securities.

Foreign official assets.—Foreign official assets in the United States increased \$6.3 billion in the second quarter of 1990, in contrast to a decrease of \$8.2 billion in the first (table B). Assets of industrial countries increased \$7.1 billion, in contrast to a decrease of \$7.5 billion. Assets of OPEC members increased \$0.2 billion, compared with a \$3.0 billion increase. Assets of other countries decreased \$1.1 billion, compared with a \$3.7 billion decrease.

Liabilities reported by banks.—U.S. liabilities reported by U.S. banks, excluding U.S. Treasury securities, increased \$2.9 billion in the second quarter, in contrast to a decrease of \$32.3 billion in the first. Much lower demand for U.S. bank credit at home and abroad and adverse interest differentials have greatly slowed deposit inflows over the past half year. Banks' own liabilities payable in dollars decreased \$0.6 billion in the second quarter, compared with a \$35.3 billion decrease. Banks borrowed in April and May from overseas offices, where deposit growth accelerated. This borrowing was repaid in June when U.S. credit demand subsided further and deposits at foreign offices slowed. U.S.-owned banks accounted for the bulk of this foreign borrowing, relying early in the quarter on own foreign offices in Western Europe and later on those in the Caribbean. Repayments to these offices were heavy in June.

Banks' liabilities payable in foreign currencies increased \$5.0 billion, in contrast to a decrease of \$4.7 billion. Foreign-owned banks borrowed heavily

from the United Kingdom and Japan to fund their foreign currency lending operations in the same countries.

U.S. Treasury securities.—Net foreign purchases of U.S. Treasury securities were \$2.9 billion in the second quarter, compared with sales of \$0.8 billion in the first. Most of the increase was in purchases of bills and certificates by Italy, Mexico, and the United Kingdom. Investors in Japan continued to reduce their net holdings. Although net purchases decreased in the first half of 1990, gross Japanese purchases of long-term instruments remained close to the record gross purchases of 1989.

Other U.S. securities.—Net foreign purchases of U.S. securities other than U.S. Treasury securities were \$4.9 billion in the second quarter, compared with \$2.5 billion in the first.

Net foreign sales of U.S. stocks were \$3.5 billion in the second quarter—the third consecutive quarter of net sales. Net sales were especially large for Switzerland, the United Kingdom, Canada, and Japan.

New issues of bonds sold abroad by U.S. corporations surged, mostly toward quarterend, to \$6.4 billion from \$3.1 billion. Borrowing demands had remained moderate for the past 3 quarters but were spurred in the second quarter in part by the marked decline in interest rates abroad that began in late May. Net purchases of agency and other outstanding bonds were \$2.0 billion, compared with \$2.7 billion. Most of the decrease was in the United Kingdom.

Direct investment.—Net inflows for foreign direct investment in the United States were \$5.0 billion in the second

quarter, compared with \$5.5 billion in the first. Equity capital inflows were \$6.8 billion, compared with \$9.9 billion. Equity inflows in the first half of 1990 were the lowest since the first half of 1987. Moderate and small-size transactions from many foreign companies continued unabated, but the large multibillion dollar transactions that have characterized the past 2 years appear to have slowed.

Intercompany debt outflows were \$1.1 billion, compared with \$2.3 billion. Repayment of a large loan made for a 1989 acquisition of a food manufacturer had raised debt outflows in the first quarter.

Reinvested earnings increased \$1.4 billion to a negative \$0.8 billion from a negative \$1.7 billion. The improvement in earnings resulted mostly from decreases in capital losses of insurance affiliates of Canadian and British parents.

Footnotes to U.S. International Transactions Tables 1-10

General notes for all tables:

P Preliminary. *Less than \$500,000 (±) n.a. Not available.

Table 1:

1. Credits, +; Exports of goods and services; unilateral transfers to United States; capital inflows (increase in foreign assets (U.S. liabilities) or decrease in U.S. assets); decrease in U.S. official reserve assets; increase in foreign official assets in the United States.

Debits, -; Imports of goods and services; unilateral transfers to foreigners; capital outflows (decrease in foreign assets (U.S. liabilities) or increase in U.S. assets); increase in U.S. official reserve assets; decrease in foreign official assets in the United States.

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2.

3. Includes some goods: Mainly military equipment in line 4; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 18; and fuels purchased by airline and steamship operators in lines 7 and 21.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, line 8 and line 22 are redefined to include only net receipts and payments for the use or sale of intangible property rights. Other services are reclassified to lines 9 and 23.

6. Affiliated and unaffiliated transactions, previously shown separately, have been combined.

7. For all areas, amounts outstanding June 30, 1990, were as follows in millions of dollars: Line 34, 77,300; line 35, 11,065; line 36, 10,490; line 37, 8,449; line 38, 47,294. Data are preliminary.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

13. Conceptually, the sum of lines 69 and 62 is equal to "net foreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) excludes capital gains and losses of foreign affiliates of U.S. parent companies from the NIPA's measure of income receipts from direct investment abroad, and from the corresponding income payments on direct investment in the United States, (c) includes an adjustment for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (d) includes services furnished without payment by financial intermediaries, except life insurance carriers and private noninsured pension plans. In addition, for NIPA purposes, U.S. Government interest payments to foreigners are excluded from "net exports of goods and services" but included with transfers in "net foreign investment." A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in the "Reconciliation and Other Special Tables" section in this issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPA tables (published annually in the July issue of the SURVEY).

Table 2:

1. Exports, Census basis, represent transactions values, f.a.s. U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 SURVEY). Both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" and "revised statistical" month data supplied by the Census Bureau (see Technical Notes in the December 1985 SURVEY). The seasonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see Technical Notes in the June 1980 SURVEY and in the June 1988 SURVEY).

2. Beginning in 1990, the Census Bureau replaced its compiled export statistics with counterpart Canadian import statistics. Similarly, Statistics Canada replaced its compiled export statistics with counterpart U.S. import statistics. This exchange of data has eliminated the need for the inland freight adjustment on U.S. exports, but not on U.S. imports.

3. Adjustments in lines A5 and A13, B12, B47, and B82 reflect the Census Bureau's reconciliation of discrepancies between the merchandise trade statistics published by the United States and the counterpart statistics published in Canada. These adjustments are distributed to the affected end-use categories in section C. From 1986-89, estimates for undocumented exports to Canada, the largest item in the U.S.-Canadian reconciliation, are included in Census basis data shown in line A1. Beginning in 1990, these adjustments are no longer required.

4. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from Customs declarations. The exports are included in tables 1 and 10, line 4 (transfers under U.S. military agency sales contracts); the imports are included in tables 1 and 10, line 18 (direct defense expenditures).

5. Addition of electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and alterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area.

6. Deduction of foreign charges for repair of U.S. vessels abroad, which are included in tables 1 and 10, line 21 (other transportation); coverage adjustments for special situations in which shipments were omitted from Census data; and the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair.

7. Correction for the understatement of crude petroleum imports from Canada in 1989.

8. Beginning in 1986, New Zealand and South Africa are included in "Other countries in Asia and Africa," with New Zealand included as part of "Asia" and South Africa as part of "Africa."

9. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 2 and 16. Trade with international organizations includes purchases of nonmonetary gold from the International Monetary Fund, transfers of tin to the International Tin Council (ITC), and sales of satellites to IntelSat. The memoranda are defined as follows: *Industrial countries*: Western Europe, Canada, Japan, Australia, New Zealand, and South Africa; *Members of OPEC*: Venezuela, Ecuador, Iraq, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, and Gabon; *Other countries*: Eastern Europe, Latin America and Other Western Hemisphere, and other countries in Asia and Africa, less OPEC. For all years, "Asia" and "Africa" exclude certain Pacific Islands and unidentified countries included in "Other countries in Asia and Africa."

10. Includes nuclear fuel materials and fuels.

Table 3:

1. Patented techniques, processes, and formulas and other intangible property rights that are used in goods production.

2. Copyrights, trademarks, franchises, rights to broadcast live events, and other intangible property rights.

3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States. Payments (imports) include mainly wages of foreign residents temporarily employed in the United States and Canadian and Mexican commuters in U.S. border areas.

Table 4:

1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93-199, section 4, and subsequently authorized (for many recipients) under

similar legislation—are included in line A3. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A3 items, part of these military expenditures is applied in lines A40 and A43 to reduce short-term assets previously recorded in lines A38 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A3 expenditures finances future deliveries under military sales contracts for the recipient countries and is applied directly to lines A39 and C9. A third part of line A3, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A34. A fourth part of line A3, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A45.

2. Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are *not* included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.

3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency.

4. Line A35 includes foreign currency collected as interest and line A40 includes foreign currency collected as principal, as recorded in lines A13 and A14, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry for the part of line C10 that was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

8. Excludes return export from the United States, at a contractual replacement value of \$52 million in 1989-IV, of leased aircraft originally reported in table 1, line 18. Transactions recording the offsets for this leased property are included in line C15.

Table 5:

1. Also included in line 4. Excludes currency translation adjustments. See Technical Notes in the June 1990 SURVEY.

2. Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany debt, and other equity contributions.

3. Sales, liquidations, and other dispositions of equity holdings, total and partial.

4. Petroleum includes, and manufacturing and "other" industries exclude, the exploration, development, and production of crude oil and gas, and the transportation, refining, and marketing of petroleum products, exclusive of petrochemicals. "Other" industries includes wholesale trade; banking; finance (except banking), insurance, and real estate; services; and other industries—agriculture, forestry, and fishing; mining; construction; transportation, communication, and public utilities; and retail trade.

5. Also included in line 47.

Table 6:

1. Primarily provincial, regional, and municipal.

2. Largely transactions by International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).

3. Estimate for scheduled redemptions and identifiable early retirements. Includes estimates based on Canadian statistics for redemptions of Canadian issues held in the United States. Unidentified and nonscheduled retirements appear in line 28.

Table 7:

1. Primarily mortgages, loans, and bills and notes drawn on foreigners.

2. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

3. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

4. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.

Table 8:

1. Includes central governments and their agencies and corporations; state, provincial, and local governments and their agencies and corporations; and international and regional organizations.

2. U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' accounts may be commingled in some categories. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.

3. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

4. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

5. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.

6. Includes Eastern Europe and international and regional organizations.

Table 9:

1. Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities and are separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.

2. Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other than deposits.

3. Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.

4. Mainly International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (IDB), and the Trust Fund of the International Monetary Fund.

5. U.S.-owned banks are mainly U.S.-chartered banks and Edge Act subsidiaries. U.S. brokers' and dealers' liabilities may be commingled in some categories. Foreign-owned banks are U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States.

6. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

7. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

8. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries.

9. Includes Eastern Europe and international and regional organizations.

Table 10:

For footnotes 1-13, see table 1.

14. The "European Communities (12)" includes the "European Communities (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal.

15. The "European Communities (6)" includes Belgium, France, Federal Republic of Germany, Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment that is moved from country to country during the year, and in petroleum trading.

17. Details not shown separately; see totals in lines 49 and 56.

18. Details not shown separately are included in line 61.

Fixed Reproducible Tangible Wealth in the United States, 1982-89

ESTIMATES of fixed reproducible tangible wealth in the United States for 1982-89 are shown in tables 1-20. Estimates of fixed private capital are shown in tables 1-4; fixed nonresidential private capital, in tables 5-8; residential capital, in tables 9-12; government-owned fixed capital, in tables 13-16; and durable goods owned by consumers, in tables 17-20. Estimates of the wealth series for 1986-89 also appeared in the August 1990 SURVEY OF CURRENT BUSINESS; estimates for 1925-82 appeared in the January 1986 SURVEY.

A detailed statement of the methodology underlying the wealth estimates is available in *Fixed Reproducible Tangible Wealth in the United States, 1925-85* (see inside back cover). In addition to the estimates of gross and net stocks in constant-cost and current-cost valuations for the types of wealth shown in tables 1-20, this report includes corresponding estimates in historical-cost valuation and estimates of depreciation, dis-cards, and average ages of gross and net stocks in all three valuations, together with the investment data used to derive the wealth estimates.

Table 1.—Current-Cost Gross Stock of Fixed Private Capital, Nonresidential and Residential, by Industry, 1982-89¹

(Billions of dollars)

1. Includes tires, tubes, accessories, and other parts.

2. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, air conditioners, sewing machines, vacuum cleaners, and other appliances.

3. Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.

Constant-Dollar Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade: 1982:I-1990:II

The constant-dollar inventories, sales, and inventory-sales ratios have been revised beginning with 1987 to incorporate new source data. The constant-dollar inventories through the first quarter of 1990 are consistent with the revised inventory estimates in the July 1990 issue of the SURVEY OF CURRENT BUSINESS. The constant-dollar sales have been revised to be consistent with the inventories.

Tables 1, 2, and 3 present quarterly and monthly constant-dollar inventories, sales, and inventory-sales ratios, respectively. Table 4 presents

quarterly fixed-weighted constant-dollar inventory-sales ratios, i.e., ratios obtained by weighting detailed industry ratios by 1982 sales. Table 5 presents quarterly and monthly inventories for manufacturing by stage of fabrication.

Quarterly constant-dollar manufacturing and trade inventories, sales, and inventory-sales ratios were published for 1976-81 in the February 1986 SURVEY.

^r Revised.^p Preliminary.

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.

NOTE.—Manufacturing inventories are classified by the type of product produced by the establishment holding the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory.

Table 4: The I-S ratios shown in this table were obtained by weighting detailed industry I-S ratios by 1982 sales. For manufacturing, 21 industries were used; for merchant wholesalers, 20 kinds of business; and for retail trade, 8 kinds of business.

BUSINESS CYCLE INDICATORS

L,C,Lg,U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Composite Indexes of Leading, Coincident, and Lagging Indicators" in the November 1987 issue of the SURVEY OF CURRENT BUSINESS (pages 24–27) and "Business Cycle Indicators: Revised Composite Indexes" in the January 1989 issue of the SURVEY (pages 23–28).

References to series in this section use the prefix "BCI-" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged.

High values reached by cyclical indicators since the last reference cycle trough (November 1982) are shown in boldface type; high values reached prior to the period shown in the table are listed in the notes. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-27 and C-28 in the April 1990 SURVEY.

Page C-1

NOTE.—The following series reached current high values before July 1989: BCI-930 (120.5) in June 1989 and BCI-940 (116.1) in January 1984.

1. Excludes BCI-57, for which data are not available.
2. Excludes BCI-77 and BCI-95, for which data are not available.

Page C-2

NOTE 1.—The following series reached current high values before July 1989: BCI-1 (41.2) in November 1988; BCI-21 (4.0) and BCI-122 (120.7) in February 1989; BCI-5 (290) and BCI-53 (568.0) in October 1988; BCI-46 (162) in November 1987; BCI-60 (0.736), BCI-7 (113.53), and BCI-8 (92.64) in December 1988; BCI-40 (25,399) and BCI-82 (85.1) in January 1989; BCI-37 (6,198), BCI-43 (5.0), and BCI-12 (128.0) in March 1989; BCI-45 (2.0) in May 1989; BCI-91 (11.2) and BCI-44 (1.0) in June 1989; BCI-49 (1,838.5) and BCI-97 (117.90) in 2d Q 1989; BCI-124 (85.0) in April 1989; BCI-92 change (8.31), BCI-92 smoothed (4.40), BCI-58 (101.0), and BCI-83 (97.7) in March 1984; BCI-32 (67.5) in November 1983; BCI-123 (124.3) in May 1983; BCI-13 (65,318) in December 1986; BCI-9 (93.19) in September 1985; and BCI-11 (50.01) in 1st Q 1989.

NOTE 2.—Major data revisions:

Series on establishment employment (BCI-1, -21, -40, -41, -570, and -963) have been revised by the source agency to reflect the adoption of a new benchmark, the conversion of the industry series to 1987 Standard Industrial Classification (SIC) codes, and the application of new seasonal adjustment factors. Periods covered by these revisions are as follows: BCI-570 from 1972 forward; BCI-1 from 1980 forward; BCI-21, -40, and -41 from 1985 forward; and BCI-963 from 1989 forward. Further information concerning these revisions may be obtained from the U.S. Department of Labor, Bureau of Labor Statistics, Office of Employment Structure and Trends, Division of Monthly Industry Employment Statistics, Washington, DC 20212.

The series on capacity utilization, total industry (BCI-124), compiled by the Board of Governors of the Federal Reserve System, is shown for the first time in this issue.

Manufacturing and trade sales in 1982 dollars (BCI-57) and the ratio of manufacturing and trade inventories to sales in 1982 dollars (BCI-77) have been revised from 1987 forward to incorporate recent revisions in the national income and product accounts (see note 2 for page C-2 of the July 1990 SURVEY) and recent revisions in manufacturing and trade sales in current dollars. Further information concerning these revisions may be obtained from the U.S. Department of Commerce, Bureau of Economic Analysis, Business Outlook Division, Washington, DC 20230.

1. Data exclude Puerto Rico, which is included in figures published by the source agency.
2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan's Survey Research Center, Institute for Social Research, P.O. Box 1248, Ann Arbor, MI 48106-1248.

Page C-3

NOTE 1.—The following series reached current high values before July 1989: BCI-87 (151.4) in 2d Q 1985; BCI-28 (2,260) and BCI-29 (158.5) in February 1984; BCI-89 (200.3) in 4th Q 1986; BCI-30 (83.4) and BCI-22 (6.9) in 1st Q 1984; BCI-31 (93.7) in October 1987; BCI-77 (1.58), BCI-62 index (104.4), and BCI-62 change (29.1) in March 1986; BCI-99 index (135.64) in March 1989; BCI-99 change (3.21) in August 1983; BCI-99 smoothed (2.09) in November 1983; BCI-23 (335.0) in April 1989; BCI-16 (189.1) and BCI-18 (163.8) in 4th Q 1988; BCI-81

(8.6) in 3d Q 1985; BCI-35 (433.1) in 3d Q 1988; BCI-62 smoothed (6.3) in January 1985; BCI-85 (2.66) in December 1986; BCI-102 (2.67) in January 1983; BCI-105 (637.4) in July 1988; and BCI-106 (2,472.5) in June 1988.

NOTE 2.—Major data revisions:

New plant and equipment expenditures by business (BCI-61 and BCI-100) have been revised by the source agency from 1978 forward. These revisions reflect the introduction of a new benchmark and incorporation of information not available when the previously published estimates were prepared. Further information concerning these revisions may be obtained from the U.S. Department of Commerce, Bureau of the Census, Industry Division, Washington, DC 20230.

Ratio, manufacturing and trade inventories to sales in 1982 dollars (BCI-77)—see note 2 on page C-2.

* Preliminary September values: BCI-23 = 319.9, BCI-19 = 321.18, BCI-85 = 0.76; anticipated 4th quarter values: BCI-61 = 538.61, BCI-100 = 530.65.

1. Copyrighted. This series may not be reproduced without written permission from Commodity Research Bureau, Inc., 75 Wall Street, 22d Floor, New York, NY 10005.

Page C-4

NOTE 1.—The following series reached current high values before July 1989: BCI-107 (7.034) in 4th Q 1984; BCI-113 (132.08) in September 1985; BCI-111 (23.2), BCI-116 (14.49), BCI-115 (13.00), and BCI-117 (10.67) in June 1984; BCI-110 (869,764) in 4th Q 1985; BCI-14 (829.2) in July 1983; BCI-39 (1.78) in February 1984; BCI-93 (-2,380), BCI-94 (8,017), BCI-119 (11.64), BCI-114 (10.49), and BCI-109 (13.00) in August 1984; BCI-118 (15.01) in May 1984; and BCI-95 (16.02) in January 1989.

NOTE 2.—Major data revision: The series on funds raised by private nonfinancial borrowers in credit markets (BCI-110) has been revised by the source agency from 1980 forward. This revision reflects the annual updating of the basic statistics and the application of new seasonal adjustment factors. Further information concerning this revision may be obtained from the Board of Governors of the Federal Reserve System, Division of Research and Statistics, Flow of Funds Section, Washington, DC 20551.

* Preliminary September values: BCI-119 = 8.18, BCI-114 = 7.40, BCI-116 = 10.17, BCI-115 = 9.09, BCI-117 = 7.39, and BCI-109 = 10.00.

1. These indexes are compiled by the Center for International Business Cycle Research (CIBCR), Graduate School of Business, Columbia University, New York, NY 10027.

Page C-5

NOTE.—Major data revision: Employment, defense products industries (BCI-570)—see note 2 on page C-2.

* Preliminary September values: BCI-19 = 349.4, BCI-748 = 1,609.7, BCI-745 = 317.5, BCI-746 = 739.8, BCI-747 = 384.3, BCI-743 = 358.9, BCI-750 = 86.17, BCI-758 = 138.78, BCI-755 = 1.5716, BCI-756 = 5.2632, BCI-752 = 0.5315, BCI-757 = 1,173.06, and BCI-753 = 1.1602.

1. Balance of payments basis: Excludes transfers under military grants and Department of Defense sales contracts (exports) and Department of Defense purchases (imports).
2. Organisation for Economic Co-operation and Development.
3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Weights are the 1972–76 global trade of each of the 10 countries. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).

Page S-1

† Revised series. See Tables 2.6-2.9 in the July 1990 SURVEY for revised estimates for 1987-89.

‡ Includes inventory valuation and capital consumption adjustments.

§ Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.

◇ See note "◇" for p. S-2.

Page S-2

1. Based on data not seasonally adjusted.

◇ Effective April 1990 SURVEY, the industrial production index has been revised back to 1977 and has a new base year of 1987. A more detailed explanation of this revision is in the April 1990 *Federal Reserve Bulletin*. Historical data are available from the Industrial Output Section, Mail Stop 82, Division of Research and Statistics, Federal Reserve Board, Washington, DC 20511.

Includes data not shown separately.

Page S-3

Includes data for items not shown separately.

Page S-4

1. Based on data not seasonally adjusted.

Includes data for items not shown separately.

‡ Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.

◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

Page S-5

@ Compiled by Dun & Bradstreet, Inc.

Includes data for items not shown separately.

§ Ratio of prices received to prices paid (parity index).

‡ See note "‡" for p. S-4.

† In the Feb. and July issues of the SURVEY each year, data for the most recent six to eight years are subject to revise and are available upon request.

Page S-6

§ For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

Includes data for items not shown separately.

‡ Effective with the Feb. 1990 SURVEY, data have been revised back to 1985 and are available upon request.

Page S-7

1. Computed from cumulative valuation total.

2. Index as of Sept. 1, 1990: building, 404.0; construction, 442.7.

3. Beginning Dec. 1988, series has been discontinued by the Bureau of the Census.

‡ Effective July 1990 SURVEY, data have been revised back to 1985. Revised data are available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233.

Includes data for items not shown separately.

§ Data for June, Aug., and Nov. 1989, and Mar. 1990 are for five weeks; other months four weeks.

◇ Effective Feb. 1990 SURVEY, data for seasonally adjusted housing starts have been revised back to 1987. These revisions are available upon request.

@ Effective Feb. 1990 SURVEY, data for seasonally adjusted manufacturers' shipments of mobile homes have been revised back to 1987.

† Effective May 1990 SURVEY, data for seasonally adjusted building permits have been revised back to 1988 and are available upon request.

* Series first shown in the July 1990 SURVEY. The fixed-weighted price index is a weighted average of the individual price index series used to deflate the Value of New Construction Put in Place (VIP) series. In calculating the index, the weights (the composition of current dollar VIP in 1987 by category of construction) are held constant. Consequently, the index reflects only changes in prices. The implicit price deflator is a derived ratio of total current to constant dollar

VIP (multiplied by 100). It is the average of the individual price indexes used in the deflation of VIP, but the prices are weighted by the composition of VIP each period. As a result, the implicit price deflator reflects not only changes in prices, but also changes in the composition of VIP, and its use as a measure of price change is discouraged.

‡‡ Effective Sept. 1990 SURVEY, the construction cost index for the Federal Highway Administration has been revised back to 1986 and has a new base year of 1987=100.

Page S-8

1. Advance estimate.

2. Beginning with Feb. 1989 data, associations in conservatorship are excluded.

◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.

§ Data include guaranteed direct loans sold.

Includes data for items not shown separately.

@ Data are for closed mortgage loans of thrift institutions insured by the Savings Association Insurance Fund (SAIF)—FSLIC-insured institutions prior to Sept. 1989.

† Effective April 1990 SURVEY, wholesale trade data have been revised back to Dec. 1980. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade Sales and Inventories BW89-R*, available from the Bureau of the Census, Washington, DC 20233.

‡ Effective April 1990 SURVEY, retail trade data have been revised. Estimates of retail sales and inventories have been revised back to January 1982. Revised data and a summary of changes appear in the report *Revised Monthly Retail Sales and Inventories BR89-R*, available from the Bureau of the Census, Washington, DC 20233.

Page S-9

1. Advance estimate.

Includes data for items not shown separately.

◇ Effective with the January 1990 SURVEY, the seasonally adjusted labor force series have been revised back to January 1985. The January 1990 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1985-89 revision period appear in the February 1990 issue of *Employment and Earnings*.

† The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.

@ Data include resident armed forces.

‡ See note "‡" for p. S-8.

Page S-10

◇ See note "◇" for p. S-9.

§ Effective Sept. 1990 SURVEY, data have been revised to reflect annual benchmark revisions, the conversion of the industry series to 1987 SIC codes, and updated seasonal adjustment factors. All series have been revised back to April 1988, unadjusted, and Jan. 1985, seasonally adjusted. Industry series affected by revisions in the SIC have been revised back to the inception of the series, to the extent possible. In addition, all constant-dollar and indexed series have been recomputed on a 1982 base. The Sept. 1990 issue of *Employment and Earnings* contains a detailed description of the effects of these revisions and revised data for all regularly published tables. All historical data will be published in a historical bulletin, *Employment, Hours, and Earnings, United States, 1909-1990*.

Page S-11

§ See note "§" for p. S-10.

† This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

◇ Production and nonsupervisory workers.

Page S-12

1. This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision. Use the corresponding unadjusted series.

2. The hourly earnings index has been discontinued.

§ See note "§" for p. S-10.

◇ Production and nonsupervisory workers.

‡ Earnings in 1982 dollars reflect changes in purchasing power since 1982 by dividing by Consumer Price Index. Revised data are available upon request.

§§ Wages as of Sept. 1, 1990: Common, \$18.42; Skilled, \$25.25.

† Excludes farm, household, and Federal workers.

@ Effective with the April 1990 SURVEY, the employment cost index is based on June 1989=100, rather than June 1981=100. Historical data for both June 1989 and June 1981 bases are available from the Bureau of Labor Statistics, Division of Employment Cost Trends, 441 G Street, N.W., Washington, DC 20212.

Page S-13

1. Effective Feb. 28, 1989, there was a break in the series due to the enlargement of the panel of reporting dealers to 17 and of reporting direct issuers to 36. End of month figures on the old basis are as follows: All issuers, 481,734; financial companies, 373,717; dealer placed, 172,330; directly placed, 201,387; and nonfinancial companies, 108,017.

2. Average for Dec.

Includes data for items not shown separately.

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

† Covers 50 States and the District of Columbia. Only regular benefits are included.

@ Average weekly insured unemployment for 12-month period divided by average monthly covered employment (lagging 4 full quarters for annual figure and 2 full quarters for monthly figure).

† Effective Oct. 1989 SURVEY, loans by loan type are provided by the Federal Farm Credit Banks Funding Corporation.

◇ Effective with the April 1990 SURVEY, the reserves of depository institutions have been revised back to 1984 and are available upon request.

Page S-14

1. Data are for fiscal years ending Sept. 30 and include revisions not distributed to the months.

2. Weighted by number of loans.

3. Beginning Feb. 1988, data suspended by the Farm Credit Administration, which is revising the information it collects and amending the reports it distributes.

§ Effective Mar. 1990 SURVEY, data have been revised to reflect new benchmark and seasonal adjustments and are available from the Banking and Money Market Statistics Section of the Division of Monetary Affairs at the Federal Reserve Board, Washington, DC 20551.

Includes data for items not shown separately.

◇ Excludes loans to commercial banks in the U.S.

† Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

†† Courtesy of *Metals Week*.

@ Average effective rate.

† Effective May 1990 SURVEY, the consumer installment credit series have been revised back to 1980 to incorporate new information and updated seasonal adjustment factors. These revisions are available upon request.

* Series first shown in the June 1990 SURVEY.

†† This series, first shown in the June 1990 SURVEY, represents the outstanding balances of loans that the loan originator has sold and are no longer carried on the loan originator's books. The loans are pooled and securities are issued on the pools.

Page S-15

1. Beginning Jan. 1989, the primary public offering statistics have been discontinued by the Securities and Exchange Commission.

† Effective Feb. 1990 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

†† Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◇ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

Page S-16

1. The railroad average was discontinued by Moody's on July 13, 1989. Therefore, the July average reflects only eight working days.

@ See note "4" for p. S-19 regarding the new commodity classification systems introduced Jan. 1989. Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because the revisions to the totals are not reflected in the component items.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

† For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

† Effective with the Mar. 1990 SURVEY, seas. adj. exports and imports have been revised back to Jan. 1988, and are available upon request.

Page S-17

1. Beginning with Jan. 1989 data, undocumented exports to Canada are now included, resulting in a break with Dec. 1988 data.

2. Beginning Jan. 1989, buses are excluded from "Motor vehicles and parts" and included in "Other manufactured goods," resulting in a break with Dec. 1988 data.

@ See note "@" for p. S-16.

† See note "†" for p. S-16.

Includes data not shown separately.

◇ Data include undocumented exports to Canada, which are based on official Canadian import totals.

Page S-18

1. Reported annual total; quarterly or monthly revisions are not available.

2. For month shown.

3. Beginning Aug. 1989, the export and import indexes have been discontinued by the Census Bureau.

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◇ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

† Before extraordinary and prior period items.

@ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

†† Effective with the Dec. 1989 SURVEY, data for 1981-88 have been revised and are available upon request.

††† Effective with the Mar. 1990 SURVEY, data for 1985-89 have been revised and are available upon request.

Page S-19

1. Reported annual total; monthly or quarterly revisions are not available.

2. Less than 500 metric tons.

3. Figure suppressed because it did not meet Census publication standards.

4. Beginning with 1989 data, merchandise trade data are based upon two new commodity classification systems; the International Harmonized System and, Revision 3 of the Standard International Trade Classification and, as a result, data may not be directly comparable to 1988 and earlier years.

Includes data for items not shown separately.

§ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.

2. Quarterly data are no longer available.

3. See note 4 for p. S-19.

§ Data are not wholly comparable from year to year because of changes from one classification to another.

@ Includes less than 500 electric generation customers not shown separately.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

◇ Effective with the Dec. 1989 SURVEY, revisions for 1987-88 are available upon request.

Page S-21

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1-Aug. 31).

2. Crop estimate for the year.

3. Stocks as of June 1.

4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June (beginning of new crop year).

5. Series has been discontinued.

6. Stock estimates are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column.

7. Stocks as of Dec. 1.

8. See note 4 for p. S-19.

§ Excludes pearl barley.

@ Quarterly data represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. Annual data represent Dec.-Nov.

† Coverage for 21 selected States, representing approximately 85 percent of U.S. production.

Page S-22

1. Series has been discontinued.

2. See note 4 for p. S-19.

§ Cases of 30 dozen.

Page S-23

 2. Reported annual total; revisions not distributed to the months.
 3. Data suppressed because they did not meet Census publication standards.
 4. See note 4 for p. S-19.
- # Totals include data for items not shown separately.

Page S-24

1. Reported annual total; monthly revisions are not available.
2. See note 4 for p. S-19.
3. Less than 500 tons.
4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.

Page S-25

1. Reported annual total; monthly revisions are not available.
 2. For month shown.
 3. Effective with Jan. 1989, import data are for consumption; earlier periods of data are general imports. See also note 4 for p. S-19 regarding the introduction of new classification systems.
 4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.
- @ Includes foreign ores.
§ Source: *Metals Week*.

Page S-26

1. Reported annual total; monthly revisions are not available.
 2. Less than 50 tons.
 3. See note 3 for p. S-25.
- ◇ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
† Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
Includes data not shown separately.
† Includes bookings (new orders) for automatic guided vehicles, automated storage and retrieval systems, below hook lifters, cranes, hoists, monorails, racks, shelving, casters and floor trucks, and conveyors.
@@ Price represents North American Mean.
@ Effective with the Sept. 1990 SURVEY, the new orders index numbers have been converted to a new base year of 1987=100. Data back to 1988 are available upon request.

Page S-27

1. Annual total includes revisions not distributed to the months.
 2. See note 4 for p. S-19.
 3. Beginning in 1990, quarterly data have been discontinued. Annual data will continue to be available.
- # Includes data for items not shown separately.
§ Includes nonmarketable catalyst coke.
◇ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
†† March, June, September and December are five-week months. All others consist of four weeks.

Page S-28

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
- # Includes data for items not shown separately.

Page S-29

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
- ◇ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users. See also note "†" for this page.
Compiled by the American Newspaper Publishers Association.
† Effective with the March 1990 SURVEY, Canadian newsprint statistics have been revised back to Jan. 1982 to exclude supercalendered and some soft-nip calendered paper that was originally classified as newsprint and is now classified as uncoated groundwood papers. This revision also affects estimated consumption. Revised data are available upon request.

Page S-30

1. Reported annual total; revisions not allocated to the months.
 2. Data are being withheld to avoid disclosing data from individual firms.
 3. Data cover five weeks; other months, four weeks.
 4. Beginning Jan. 1989, sales of industrial plasters are included with building plasters.
 5. August 1990 estimate of the 1990 crop.
- # Includes data for items not shown separately.
◇ Cumulative ginnings to the end of month indicated.
§ Bales of 480 lbs.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year; Aug. 1-Jul. 31.
 4. For five weeks; other months four weeks.
 5. See note 4 for p. S-19.
 6. Beginning in 1990, data are available only on a quarterly basis.
- ◇ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
§ Bales of 480 lbs.
† The total may include some miscellaneous wool imports.
* Series first shown in the July 1990 SURVEY.

Page S-32

1. Annual total includes revisions not distributed to the months.
 2. Production of new vehicles (thous. of units) for Aug. 1990: *passenger cars*, 535; *trucks and buses*, 314.
 3. Data are reported on an annual basis only.
 4. See note 4 for p. S-19.
 5. Beginning Jan. 1989, shipments of trailer bodies are included with trailer chassis to avoid disclosure of data from individual firms.
 6. Effective with the August 1990 SURVEY, data have been revised back to 1987 and are available upon request.
- # Total includes backlog for nonrelated products and services and basic research.
§ Domestic cars comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
◇ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some States are not available, month-to-month comparisons are not strictly valid.
* Series first shown in the August 1990 SURVEY.
† Includes some imported trucks over 10,000 lbs. GVW.
‡ Excludes railroad-owned private refrigerator cars and private line cars.

BEA Information

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Available From GPO

TO ORDER: The GPO publications listed below must be ordered from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. To order by phone: (202) 783-3238; by fax (202) 275-0019.

SURVEY OF CURRENT BUSINESS. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments; articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics; quarterly national income and product accounts tables; a 28-page section of business cycle indicators containing tables for over 250 series and charts for about 130 series; and a 36-page section of current business statistics presenting over 1,900 major economic series obtained from public and private sources. Monthly. Annual subscription: \$23.00 second class mail, \$52.00 first class mail. Single copy: \$6.50.

Business Statistics, 1961-88. (1989) Provides monthly or quarterly data for 1985-88 and annual data for 1961-88 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 328 pages. \$16.00 (GPO Stock No. 003-010-00198-4).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pages. \$23.00 (GPO Stock No. 003-010-00174-7).

NIPA Methodology Paper No. 1: Introduction to National Economic Accounting. (1985) Introduces the concepts of the national income and product accounts by placing these accounts within the framework of national economic accounting. Shows how the national income and product accounts, capital finance accounts, and input-output accounts—the major branches of national economic accounting in the United States—are derived from the conventional accounting statements. 19 pages. \$1.25 (GPO Stock No. 003-010-00158-5).

NIPA Methodology Paper No. 2: Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends. (1985) Describes the concepts, sources, and methods of the corporate profits components of the national income and product accounts. 67 pages. \$2.50 (GPO Stock No. 003-010-00143-7).

NIPA Methodology Paper No. 4: GNP: An Overview of Source Data and Estimating Methods. (1987) Provides basic information about GNP, including the conceptual basis for the account that presents GNP, definitions of each of the components on the income and product side of that account, and a summary, in tabular form, of the source data and methods used in preparing estimates of current- and constant-dollar GNP. Also provides an annotated bibliography, with a directory, of the more than 50 items over the last decade that provided methodological information about GNP. 36 pages. \$2.00 (GPO Stock No. 003-010-00179-8).

NIPA Methodology Paper No. 5: Government Transactions. (1988) Presents the conceptual basis and framework of government transactions in the national income and product accounts; describes the presentations of the estimates; and delineates the sources and methods used to prepare estimates of Federal transactions and of State and local transactions. 120 pages. \$5.50 (GPO Stock No. 003-010-00187-9).

NIPA Methodology Paper No. 6: Personal Consumption Expenditures. (1990) Presents the conceptual basis and framework of personal consumption expenditures in the national income and product accounts. Describes the presentation of the estimates and the sources and methods used to prepare them. 92 pages. \$4.50 (GPO Stock No. 003-010-00200-0).

Fixed Reproducible Tangible Wealth in the United States, 1925-85. (1987) Contains annual estimates of the stock of privately owned and government-owned durable equipment and structures and of

durable goods owned by consumers in the United States for 1925-85. Estimates are for fixed nonresidential private capital by major industry group, for residential capital by tenure group, for government-owned fixed capital by type of government, and for 11 types of durable goods owned by consumers. 400 pp. \$18.00 (GPO Stock No. 003-010-00177-1).

BEA Regional Projections to 2040, Volume 1: States. (1990) Presents regional projections for selected economic and population variables for the Nation and States for 1995, 2000, 2005, 2010, 2020, and 2040. Includes projections for employment and earnings by industry and for personal income, as well as a statement of methodology. 144 pp. \$7.50 (GPO Stock No. 003-010-00199-2).

State Personal Income: 1929-87. (1989) Contains annual estimates for 1929-87 of total personal income, annual estimates for 1948-87 of disposable personal income, and quarterly estimates for 1969-88 of total personal income. Also contains a statement of methodology. 320 pages. \$16.00 (GPO Stock No. 003-010-00197-6).

Local Area Personal Income, 1983-88. (1990) Contains estimates of personal income by major type of payment and earnings by major industry, population, and total and per capita personal income for regions, States, counties, and metropolitan areas.

Vol. 1. Summary: Regions, States, and Metropolitan Areas. Estimates for the United States, regions, States, and metropolitan areas. Also contains county definitions of metropolitan areas, a detailed description of sources and methods, and samples of tables available. 300 pages. \$15.00 (GPO Stock No. 003-010-00205-1).

Vol. 2. New England, Mideast, and Great Lakes Regions. (CT, DE, DC, IL, IN, ME, MD, MA, MI, NH, NJ, NY, OH, PA, RI, VT, WI) 324 pages. \$16.00 (GPO Stock No. 003-010-00206-9).

Vol. 3. Plains Region. (IA, KS, MN, MO, NE, ND, SD) 236 pages. \$12.00 (GPO Stock No. 003-010-00207-7).

Vol. 4. Southeast Region. (AL, AR, FL, GA, KY, LA, MS, NC, SC, TN, VA, WV) 372 pages. \$18.00 (GPO Stock No. 003-010-00208-5).

Vol. 5. Southwest, Rocky Mountain, and Far West Regions and Alaska and Hawaii. (AK, AZ, CA, CO, HI, ID, MT, NV, NM, OK, OR, TX, UT, WA, WY) 328 pages. \$16.00 (GPO Stock No. 003-010-00209-3).

The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures. (1990) Describes in detail the methodology used in constructing the balance of payments estimates for the United States. Explains underlying principles, and describes the presentation of the estimates. Includes a comprehensive list of data sources. 160 pages. \$8.50 (GPO Stock No. 003-010-00204-2).

Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies, Preliminary 1988 Estimates. (1990) Contains information on the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 92 pages. \$4.75 (GPO Stock No. 003-010-00203-4).

Foreign Direct Investment in the United States: 1987 Benchmark Survey, Final Results. (1990) Contains information for 1987 on the financial structure and operations of U.S. affiliates of foreign direct investors, on the foreign direct investment position in the United States, and on balance of payments transactions between U.S. affiliates and their foreign parents. Data are classified by industry of affiliate, by country and industry of ultimate beneficial owner or foreign parent, and, for selected data, by State. Also contains a complete methodology and copies of survey forms and instructions. 284 pages. Price to be determined. (GPO Stock No. 003-010-00210-7).

U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates. (1990) Presents results of BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of both U.S. parent companies and their foreign affiliates. Data are classified by country and industry of foreign affiliate and by industry of U.S. parent. 80 pages, \$4.25 each. **Preliminary 1988 Estimates:** GPO Stock No. 003-010-00202-6; **Revised 1987 Estimates:** GPO Stock No. 003-010-00201-8.
