Donald J. Parschalk

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Annual subscription: *Second-class mail*—\$29.00 domestic, \$36.25 foreign, *first-class mail*—\$76.00. Single copy—\$8.00 domestic, \$10.00 foreign.

Mail subscription orders and address changes to New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954. Make checks payable to Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

NOTE.—This issue of the Survey went to the printer on December 10, 1991.

It incorporates data from the following monthly BEA news releases:

- Personal Income and Outlays (Nov. 27),
- Composite Indexes of Leading, Coincident, and Lagging Indicators (Dec. 3), and
- Gross Domestic Product (Dec. 4).

ADMINISTRATION

Bureau of
Economic Analysis

As this issue of the *SURVEY OF CURRENT BUSINESS* went to press, BEA released results of a comprehensive revision of the national income and product accounts (NIPA's). The text from the December 4, 1991, news release that presented the revised NIPA estimates for the third quarter of 1991 and introduced the comprehensive revision is reproduced below. The "Selected NIPA Tables" beginning on page 6 presents the revised annual estimates for 1987-90 and the revised

quarterly estimates for 1988:I-1991:III in the redesigned table format described in the October 1991 *SURVEY*. Another set of tables, the "Summary National Income and Product Series," presents revised annual and quarterly estimates back to 1959 beginning on page 35. The revised estimates have not been incorporated elsewhere in this issue; in particular, the NIPA series that appear in the "Business Cycle Indicators" section have not been updated from last month's issue.

Gross Domestic Product

Real gross domestic product—the nation's output of goods and services—increased at an annual rate of 1.7 percent, or \$20.3 billion, in the third quarter of 1991, according to the preliminary estimate released by the Commerce Department's Bureau of Economic Analysis. In the second quarter, real GDP increased 1.4 percent, or \$16.7 billion.

Real personal consumption expenditures increased \$18.2 billion in the third quarter, compared with an increase of \$11.3 billion in the second. Durable goods purchases increased \$9.3 billion, in contrast to a decrease of \$1.9 billion. Nondurable goods purchases increased \$1.9 billion, compared with an increase of \$2.3 billion. Services expenditures increased \$7.1 billion, compared with an increase of \$10.9 billion.

NOTE.—Quarterly estimates are expressed, unless otherwise specified, at seasonally adjusted annual rates. Quarter-to-quarter dollar changes are differences between these rates; quarter-to-quarter percent changes are annualized. "Real," or constant-dollar, estimates are in 1987 dollars.

Revision of the National Income and Product Accounts

This release introduces a comprehensive revision of the national income and product accounts. The revision is summarized beginning on page 2. The availability of revised estimates and of additional information about the revision is described in a box on page 3.

Two of the major changes incorporated in the revision are a shift to use of gross domestic product (GDP), rather than gross national product (GNP), as the primary measure of production and a shift in the base period from 1982 to 1987. In the third quarter of 1991, the effects of these changes are shown by the following comparisons: Revised GDP increased 1.7 percent (annual rate) in 1987 dollars, and a calculation of GDP in 1982 dollars but incorporating all other changes increased 1.9 percent; revised GNP increased 2.0 percent in 1987 dollars, and a calculation of GNP in 1982 dollars but incorporating all other changes increased 2.2 percent.

Real nonresidential fixed investment decreased \$4.6 billion in the third quarter, compared with a decrease of \$4.3 billion in the second. Nonresidential structures decreased \$10.2 billion, compared with a decrease of \$4.4 billion. Producers' durable equipment purchases increased \$5.7 billion, compared with no change. *Real residential fixed investment* increased \$4.9 billion, compared with an increase of \$1.3 billion.

Real net exports of goods and services decreased \$20.0 billion in the third quarter, in contrast to an increase of \$6.3 billion in the second. Exports increased \$8.4 billion, compared with an increase of \$23.2 billion. Imports increased \$28.4 billion, compared with an increase of \$16.9 billion.

Real Federal Government purchases decreased \$8.6 billion in the third quarter, in contrast to an increase of \$1.0 billion in the second. National defense purchases decreased \$7.0 billion, compared with a decrease of \$2.4 billion. Non-defense purchases decreased \$1.5 billion, in contrast to an increase of \$3.4 billion. *Real State and local government purchases* decreased \$0.7 billion in the third quarter, compared with a decrease of \$1.0 billion in the second.

Real final sales of domestic product, the sum of the above expenditure components, decreased 0.9 percent, or \$10.6 billion, in the third quarter, in contrast to a increase of 1.2 percent, or \$14.4 billion, in the second.

The *real change in business inventories* added \$30.8 billion to the third-quarter change in real GDP, after adding \$2.4 billion to the second-quarter change. Businesses increased inventories \$0.4 billion in the third quarter, following decreases of \$30.4 billion in the second, and \$32.8 billion in the first. Nonfarm businesses reduced inventories \$2.5 billion in the third quarter, \$30.7 billion in the second, and \$32.4 billion in the first. Farm businesses increased inventories \$2.9 billion in the third quarter, following an increase of \$0.4 billion in the second and a decrease of \$1.7 billion in the first.

Gross domestic purchases

Real gross domestic purchases—the nation's purchases of goods and services—increased 3.4 percent, or \$44.4 billion, in the third quarter, compared with an increase of 0.9 percent, or \$14.5 billion, in the second.

Current-dollar GDP

Current-dollar GDP—the market value of the nation's output of goods and services—increased 3.9 percent, or \$54.8 billion, in the third quarter. In the second quarter, current-dollar GDP increased 4.6 percent, or \$63.6 billion.

Price indexes

Price indexes with fixed 1987 weights will not be available until the release of the final estimate of the third quarter GDP on December 20.

Corporate Profits

Profits from current production (profits before tax with inventory valuation and capital consumption adjustments) increased \$0.4 billion in the third quarter, according to preliminary estimates. In the second quarter, profits increased \$1.4 billion. Current-production cash flow (net cash flow with inventory valuation and capital consumption adjustments)—the internal funds available to corporations for investment—decreased \$2.7 billion in the third quarter, in contrast to an increase of \$1.4 billion in the second.

	Percent change from preceding quarter at quarterly rate)			
	1990	1991		
	IV	I	II	III
Corporate profits from current production ..	-1.2	2.0	0.5	0.1
Profits before tax	-2.7	-5.2	-9	3.7
Profits after tax	1.4	-4.7	-3.7	3.9
Current-production cash flow	2.7	4.9	.3	-6

Domestic profits of nonfinancial corporations decreased \$3.6 billion in the third quarter, in contrast to an increase of \$12.0 billion in the second. Domestic profits of financial corporations increased \$1.4 billion in the third quarter, compared with an increase of \$2.2 billion in the second.

The foreign component of profits increased \$2.6 billion in the third quarter, in contrast to a decrease of \$12.9 billion in the second. This component measures receipts by U.S. residents of dividends and reinvested earnings of foreign affiliates of U.S. corporations, less corresponding payments to foreign residents. The third-quarter increase was in receipts. In the second quarter, the decrease was also accounted for by receipts.

Profits before tax with inventory valuation adjustment is the best available measure of industry profits because estimates of the capital consumption adjustment by industry do not exist. According to this measure, profits decreased in manufacturing, in trade, and in the transportation and public utilities group. Profits in other nonmanufacturing industries increased.

Profits before tax increased \$11.4 billion in the third quarter, in contrast to a decrease of \$2.9 billion in the

second. The before-tax measure of profits does not reflect, as does profits from current production, the capital consumption and inventory valuation adjustments; these adjustments convert depreciation and inventories reported by business to those used in the national income and product accounts. The capital consumption adjustment increased \$4.0 billion in the third quarter (from -\$12.6 billion to -\$8.6 billion), compared with an increase of \$1.0 billion in the second. The inventory valuation adjustment decreased \$15.1 billion (from \$9.9 billion to -\$5.2 billion), in contrast to an increase of \$3.2 billion.

Profits tax liability increased \$4.2 billion in the third quarter, compared with an increase of \$4.1 billion in the second. Profits after tax increased \$7.2 billion, in contrast to a decrease of \$7.0 billion. Dividends increased \$1.4 billion, in contrast to a decrease of \$1.1 billion; undistributed profits increased \$5.7 billion, in contrast to a decrease of \$5.8 billion.

Comprehensive Revision of the National Income and Product Accounts

The national income and product account (NIPA) estimates released today reflect the results of the ninth comprehensive, or benchmark, revision of the accounts; the last revision of this type was completed in December 1985. Comprehensive revisions differ from annual NIPA revisions because of the scope of the changes incorporated and because of the number of years subject to revision.

Comprehensive revisions incorporate three kinds of changes: Definitional and classificational changes, statistical changes, and new and redesigned tables. Definitional and classificational changes update the accounts to reflect the evolving U.S. economy. Statistical changes update the accounts to reflect shifts in the base period, the incorporation of newly available and revised source data, and the introduction of new and improved estimating procedures. The new and redesigned tables update the presentation of the NIPA's to reflect definitional, classificational, and statistical changes and to make the tables more informative.

In this revision, most current-dollar series are revised from the present back to 1978, and many are revised back to earlier years. All constant-dollar series will be revised back to 1929 to reflect a shift in the base period from 1982 to 1987. The tables in this release provide revised annual estimates beginning with 1977 and quarterly estimates beginning with 1988 for major series. For information about the availability of additional estimates, see the box on page 3.

The tables in this release reflect two major changes in presentation. First, gross domestic product (GDP) replaces gross national product (GNP) as the featured measure of production. GDP is the appropriate measure for most short-term monitoring and analysis of the U.S. economy; it is consistent with indicators such as employment. This change also affects other series shown in this release. Net exports of goods and services is redefined to exclude net receipts of factor income from the rest of the world. (Exports of goods and services is redefined to exclude receipts of these incomes by U.S. residents, and imports of goods and services is redefined to exclude payments of these incomes to nonresidents.) Consistent with the redefinition of net exports of goods and services, final sales, which is now titled

"final sales of domestic product," is redefined to exclude net receipts of factor income. (Estimates of GNP will continue to be shown in the release. For the most recent quarter, they will be available at the same time as estimates of corporate profits.) In the second change in presentation, the gross domestic purchases price index replaces the GNP price index as the featured measure of price change. The purchases index measures prices paid by U.S. residents. (Price indexes will not be available until the release of the final estimate of third quarter 1991 on December 20.)

The revisions

Real GDP.—For 1977–90, the average annual growth rate of real GDP, now measured using 1987 as the base period, is 2.5 percent, 0.2 percentage point lower than in the previously published estimates, which were measured using 1982 as the base period (table 1). (For real GNP, the average annual growth rate was also revised down 0.2 percentage point to 2.5 percent.)

Among the major components of GDP, the revised estimates show smaller growth rates of personal consumption expenditures, nonresidential producers' durable equipment (PDE), residential fixed investment, exports, and Federal Government purchases. The growth rates of nonresidential PDE and exports are reduced the most. Residential fixed investment, which increased from 1977 to 1990 in the previously published estimates, declines slightly in the revised estimates. Among the major components that show higher growth rates, nonresidential structures has the largest upward revision.

For the GDP and most of its major components, the shift in the base period from 1982 to 1987 more than accounts for the lower growth rates. Base period shifts generally reduce growth rates. Purchasers tend to shift to goods and services that register the smallest increases in prices. Thus, when real GDP is estimated using more recent prices, the goods

and services with strong output growth receive less weight and growth in GDP is reduced.

Current-dollar GDP and personal income.—For current-dollar GDP, the average annual growth rate for 1977–90, at 8.2 percent, is 0.1 percentage point higher than in the previously published estimates. (The revision in GNP is the same.) The growth rate of personal income, at 8.6 percent, is 0.1 percentage point higher than previously published; the growth rate for disposable personal income, also at 8.6 percent, is 0.2 percentage point higher than previously published.

Personal saving rate.—For 1977–90, the personal saving rate is revised up in all years except 1977, 1978, and 1989. The largest upward revisions were from 1980 to 1987, when the personal saving rate is about 1½ percentage points higher in each year. The revised estimates continue to show a sharp drop in the saving rate in the 1980's, from a high of 8.8 percent in 1981 to a low of 4.4 percent in 1987. The previously published estimates had shown a high of 7.5 percent in 1981 and a low of 2.9 percent in 1987. Since 1987, the revised rate increases to 5.1 percent in 1990; in the previously published estimates, the rate increased to 4.6 percent in 1990.

Business cycles.—For the most recent expansion, which began in the third quarter of 1982 and ended in the third quarter of 1990, real GDP shows an average annual increase of 3.4 percent, 0.3 percentage point lower than in the previously published estimates. Among the major components, the revised estimates show lower growth rates of nonresidential PDE, residential fixed investment, exports, and Federal Government purchases. From the third quarter of 1990 to the third quarter of 1991, real GDP is down 0.9 percent, 0.3 percentage point more than in the previously published estimates.

Availability of Revised Estimates and Related Information

Revised estimates for most series, except fixed-weighted price indexes, beginning with 1959 are now available from BEA. Revised estimates for all series for 1929–58 will be available in early 1992.

The complete set of tables with estimates for 1987–90, including fixed-weighted price indexes and monthly personal income, will be in the December SURVEY OF CURRENT BUSINESS. Alternative measures, supplementing the traditional fixed-market-basket approach to measuring changes in production and prices, will be available beginning in February 1992. A two-volume publication containing the complete set of tables for 1929–87 will be available in early 1992.

The revised estimates are available in hard copy, on magnetic tape, and on diskettes. To obtain an order form indicating the cost of obtaining the estimates in these various forms and the schedule and cost of other materials, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, D.C. 20230, or call (202) 523-0669.

The following recent or upcoming issues of the SURVEY OF CURRENT BUSINESS contain or will contain information about the comprehensive revision:

August 1991 Emphasis on gross domestic product
 September 1991 Definitional and classification changes
 October 1991 New and redesigned tables
 December 1991 ... General description, including statistical revisions
 Early 1992 Alternative measures of production and prices

Major sources of the revision

The revisions in the NIPA estimates released today reflect the incorporation of definitional and classificational as well as statistical changes. The revisions to current-dollar GDP and to personal income and its disposition are shown in table 2.

Definitional and classificational changes update the accounts to reflect the evolving U.S. economy. In this comprehensive revision, these changes can be grouped into the following four types: (1) Treatment of government receipts; (2) treatment of business incomes and expenses; (3) treatment of international transactions; and (4) classification of government agencies.

Statistical changes update the accounts by incorporating five types of changes: (1) A shift of the base period (from 1982 to 1987); (2) the incorporation of new estimating procedures; (3) the use of new and revised data from regularly

used sources that become available less often than annually; (4) the use of new and revised data from regularly used sources that are usually incorporated at the time of the annual July NIPA revisions, and (5) the introduction of updated seasonal factors for quarterly estimates. The first change, the base-period shift, affects the constant-dollar estimates for all years, as noted earlier in this release. The second and third changes affect the current- and constant-dollar estimates for all years. The fourth change affects the current- and constant-dollar estimates for the 3 most recent years.

GDP is revised up in all years, with the largest revision, 1.7 percent, in 1990. The definitional and classificational changes account for a small share of these revisions. Their largest contribution, about one-fifth of the total revision, is in 1986. The changes with the largest impact on GDP (and the components affected) are the reclassification of government agencies from government enterprises to gen-

eral government agencies (Federal Government nondefense purchases), the capitalization of monetary interest on own-account construction (nonresidential structures), and the change in imputed brokerage charges (personal consumption expenditures (PCE) and State and local government purchases).

Three definitional and classificational changes have very little effect on GDP because their impacts on components are largely offsetting. (1) The change that redefines government sales and personal nontaxes reduces government purchases, mainly for State and local government, by receipts by government (primarily university tuition payments and charges for medical care) and raises PCE services by the amounts paid by persons. (2) The change that reclassifies farm commodity loans by the Commodity Credit Corporation reduces Federal Government nondefense purchases and increases the change in farm inventories in periods when the loans are disbursed (and has the opposite effects if the loans are defaulted). (3) The change that introduces recording of payments for services provided by direct investors to their foreign affiliates on a gross basis increases exports and imports by equal amounts.

The impact of the definitional and classificational changes on GNP is substantially different than on GDP. The main reason is that the change that reclassifies interest paid by the Federal Government to foreigners as an import of factor income reduces GNP but has no impact on GDP.

Statistical changes account for most of the revisions in current-dollar GDP and GNP. The changes that had the largest impact are as follows:

1. A new procedure for estimating nonresidential structures—both privately owned and owned by State and local government—accounts for virtually all of the revision in GDP in 1977, more than accounts for the revision in 1982, accounts for about five-sixths of the revision in 1987, and accounts for about three-fifths of the revision in 1990. The new procedure introduces information from the 1977 and 1982 Censuses of Construction and Service Industries to adjust the results of the monthly construction put-in-place survey. This procedure was introduced into the 1982 benchmark input-output (I-O) accounts published by BEA in July 1991.
2. The remaining upward revisions for 1983–90 are largely accounted for by PCE services, producers' durable equipment (PDE), and PCE nondurable goods. Revisions to all three components reflect the incorporation of the results of the 1982 I-O accounts and of the 1987 economic censuses. In addition, the revisions to PDE reflect the incorporation of the 1988 and 1989 Annual Survey of Manufactures, and the revisions to PCE nondurable goods reflect the incorporation of the 1988 and 1989 Annual Retail Trade Survey.

Personal income is revised up in all years except for small downward revisions in 1977, 1978, and 1989; the largest upward revision, 1.8 percent, is in 1986. For personal income, the definitional and classificational changes and the statistical changes work in the opposite direction in most years. The former lower personal income in most years; the latter raise personal income in all years except 1977 and 1978.

The definitional and classificational changes have their greatest impact in 1986, when they account for about one-

fifth of the 1.8 percent upward revision in personal income. The change that classifies capital gains distributions of regulated investment companies as dividends more than accounts for the impact. For every year after 1986, the definitional and classificational changes lower personal income. This reversal reflects a substantial reduction in the capital gains distributions and the impact of the change that reclassifies bad debt losses as financial transactions. This reclassification eliminates the adjustment previously made to recognize a transfer of income from the lender to the defaulter; it reduces nonfarm proprietors' income, rental income of persons, and transfer payments to persons. Loan defaults increased substantially in 1987.

Statistical changes increase personal income in all years beginning in 1979, more than accounting for the revisions in personal income. From 1979 to 1989, the changes that had the greatest impact were improved adjustments for misreporting on tax returns that are used in estimating nonfarm proprietors' income and wages and salaries. The revised adjustments reflect the complete incorporation of audit studies that are conducted less often than annually. In 1990, the upward revision in personal income also reflects the incorporation of newly available tabulations of wages and salaries covered by State unemployment insurance. Other statistical changes substantially affected the following components:

1. Other labor income is revised up beginning in 1988 primarily reflecting new source data on employer contributions to group health insurance from several government agencies.
2. Farm proprietors' income is revised down in all years primarily reflecting a new estimating methodology for imputed rental income of owner-occupants of farm dwellings.
3. Rental income of persons is revised up from 1977 to 1985 and revised down beginning in 1986. The upward revisions primarily reflect lower estimates of expenses from the 1982 I-O accounts; the downward revisions primarily reflect lower rental receipts and higher interest expenses. The lower receipts are based on data from the 1990 Census of Housing; the higher interest expenses are based on an improved procedure for refinanced mortgages.
4. Personal interest income is revised up substantially beginning in 1984. Changes that account for most of these revisions are related to improved procedures for using data reported on business income tax returns and to the incorporation of regularly used sources that are usually incorporated at the time of the annual NIPA revision.

The revisions to the other entries in the personal income and outlay account—personal tax and nontax payments, disposable personal income, personal outlays, and personal saving—primarily reflect previously discussed revisions. Revisions to the first three entries largely reflect the impact of the definitional change that redefines certain nontaxes as government sales. Because the impact of the redefinition is offsetting in personal saving (that is, disposable personal income less personal outlays), revisions to this entry primarily reflect the impact of the revisions to personal income.

NATIONAL INCOME AND PRODUCT ACCOUNTS

Selected NIPA Tables

New estimates in this issue: Comprehensive revision of the national income and product accounts (NIPA's). See page 1 for a brief description of the comprehensive revision, and page 3 for availability of the revised estimates.

This selected set of 53 NIPA tables, which contains new and redesigned tables as described in the October 1991 SURVEY OF CURRENT BUSINESS, presents the revised annual estimates for 1987-90 and revised quarterly estimates for 1988:I-1991:III that were available when this issue went to press. Leaders are shown in tables for which the revised estimates were not available: Tables 1.16, 6.1C, 7.4, 7.5, 7.6, 7.9, 7.10, 7.11, 7.12, and 7.15; and parts of tables 1.10, 7.1, 7.2, 7.3, 7.13, and 8.1.

NOTE.—This section of the SURVEY is prepared by the National Income and Wealth Division and the Government Division.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in business inventories (CBI) component of GDP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farm.

1. Inventories are as of the end of the quarter. Quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the constant-dollar change in business inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and general government and includes a small amount of final sales by farm.

Current-dollar cost and profit per unit of constant-dollar gross domestic product ¹	1																			
Consumption of fixed capital	2																			
Net domestic product	3																			
Indirect business tax and nontax liability plus business transfer payments less subsidies	4																			
Domestic income	5																			
Compensation of employees	6																			
Corporate profits with inventory valuation and capital consumption adjustments	7																			
Profits tax liability	8																			
Profits after tax with inventory valuation and capital consumption adjustments	9																			
Net interest	10																			

1. Equals the deflator for gross domestic product of nonfinancial corporate business with the decimal point shifted two places to the left.

NOTE.—Except for disposable personal income, the quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed weighted measures use as weights the composition of output in 1987. The chain-type indexes with annual weights use weights for the preceding and current years. The indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, and 1987 and the most recent year.

Motor Vehicles, Model Year 1991

SALES of new motor vehicles in the United States fell 10 percent in model year 1991 to 12.8 million units, the lowest level since 1983. The 1991 decline—the largest since the recession year of 1982—was the third consecutive decline and the fourth since sales peaked at 16.1 million in 1986 (table 1).¹ Motor vehicle sales had decreased 4 percent in 1987, edged up 1½ percent

in 1988, slipped 1½ percent in 1989, and dropped 8½ percent in 1990.

Sales of all categories of motor vehicles declined in 1991. The rate of decline in sales of imported vehicles was greater than that of domestic vehi-

cles, and the rate of decline in sales of trucks was greater than that of cars.²

Factors affecting 1991 sales.—The 1991 decline in motor vehicle sales reflected a number of factors—both those related to general economic conditions and those that were industry specific—that have affected vehicle sales in recent years. General economic activity slowed beginning in 1989, and the economy entered a recession in

1. For this article, the model year is defined as beginning on October 1 and ending on the following September 30. Thus, model year 1991 covers the fourth calendar quarter of 1990 and the first, second, and third calendar quarters of 1991.

NOTE.—This article focuses on data for unit sales, inventories, and production mainly from *Ward's Automotive Reports* and the Motor Vehicle Manufacturers Association and on data for prices mainly from the Automobile Invoice Service and the Bureau of Labor Statistics, U.S. Department of Labor. These data underlie BEA's estimates of auto and truck output in the national income and product accounts.

2. Sales of domestic cars and trucks consist of vehicles manufactured in North America and sold in the United States. Sales of imported cars and trucks consist of vehicles manufactured outside North America and sold in the United States.

CHART 1

New Motor Vehicle Sales

Note.—Peak (P) indicates the end of business cycle expansion and the beginning of recession (shaded area). Trough (T) indicates the end of business cycle recession and the beginning of expansion. Business cycle peaks and troughs are designed by the National Bureau of Economic Research, Inc.

Data: Motor Vehicle Manufacturers Association of the United States, Inc. and *Ward's Automotive Reports*, seasonally adjusted by BEA.

U.S. Department of Commerce, Bureau of Economic Analysis

the third quarter of 1990; as indicated in chart 1, downturns in vehicle sales usually precede recessions. Many of the general factors usually associated with consumer expenditures for durable goods weakened throughout 1989-91. Growth in real disposable personal income (DPI) slowed to 3 percent in 1989 and to 1 1/2 percent in 1990, and real DPI declined 1/2 percent in 1991. The unemployment rate, which had declined in each year from 1984 to 1989, increased slightly in 1990 and sharply in 1991. The Index of Consumer Sentiment (prepared by the University of Michigan's Survey Research Center) fell 5 percent in 1990 and 14 percent in 1991, to its lowest level since 1982.

Several factors specific to the motor vehicle market continued to dampen motor vehicle sales in 1991. First, owners are keeping their vehicles longer; the average age of cars on the road (estimated by the Motor Vehicle Manufacturers Association) climbed to 7.8 years—the highest level since 1950—in 1990, the most recent year for which data are available. Second, interest rates on new-car loans were generally higher in 1989-91 (chart 2). For example, interest rates on loans made by auto finance companies averaged 12 percent in 1988, 12 1/2 percent in 1989 and in 1990, and 13 percent in 1991. Third, larger downpayments for new-car loans have been required in recent years. For new-car loans made by auto finance companies, the ratio of the average value of loans to the value of cars

purchased fell to 87 percent in 1991 from 94 percent in 1988.

In addition, the 1991 decline in sales may have reflected another substantial increase in the cost of car ownership and a step-up in the increases in new-car prices. The cost of car ownership increased 11 percent in 1991 after a similar increase in 1990, according to a study by the American Automobile Association. The consumer price index (CPI) for new cars increased 3 percent in 1991 after increasing 1 1/2 percent in 1990.

Although new-car prices increased more in 1991 than in 1990, the average expenditure per new car increased less in 1991 than in 1990: Up 3 percent, to \$16,316, in 1991 after increasing 5 percent in 1990.³ The 1991 deceleration in average expenditure per new cars reflected a shift by consumers to purchases of smaller cars (see the discussion on purchases by size-class); this shift was partly offset by record purchases by consumers of options (such as driver-side air bags, antilock brakes, automatic transmissions, and power windows), as reported by a study by the Motor Vehicle Manufacturers Association.

3. BEA derives the average expenditure per new car by using each model's suggested retail price (adjusted for options, discounts or premiums, and sales taxes) weighted by each model's share of sales. Movements in the BEA measure differ from movements in the new-car component of the CPI primarily because the CPI, unlike the BEA measure, is adjusted to remove the influence of quality change on prices and because the BEA measure, unlike the CPI, reflects changes in the mix of models sold and includes cars sold to businesses.

One factor that may have restrained the 1991 sales decline was manufacturers' aggressive marketing programs. Manufacturers offered attractive consumer sales-incentive programs throughout most of the model year. These programs consisted of discount packages on options, rebates, below-market financing, and dealer incentives; rebates remained the most frequently selected of the incentive

program choices. In addition, manufacturers offered favorable marketing programs for fleet sales to businesses.⁴ Under these programs, manufacturers agreed to repurchase fleet cars that meet certain age and mileage requirements. Fleet-sales programs offered in model year 1991 had low age and mileage repurchase requirements. These low requirements probably encouraged companies with fleets to purchase new cars earlier than they otherwise would have.

Industry developments.—The recent declines in motor vehicle sales led to cutbacks in production, which affected both profits and employment within the motor vehicle and equipment manufacturing industry. The industry, after recording profits for 7 years, recorded losses in model years 1990 and 1991. The number of workers employed in the industry fell to 772,500 in 1991 from 823,600 in 1990 and 867,800 in 1989; average weekly hours of production workers in the industry declined to 42.0 in 1991 from 42.6 in 1990 and 43.4 in 1989.

4. Fleet sales are sales to businesses that purchase 10 or more vehicles for rental, leasing, or commercial use.

CHART 3
Share of New Car Sales

1. Domestic nameplates are cars manufactured in the United States at factories owned by domestic companies.
 2. Transplants are cars manufactured in the United States at factories owned by foreign companies.
 Note.—Based on October through September sales for each model year.
 Data: Motor Vehicle Manufacturers Association of the United States, Inc. and *Ward's Automotive Reports*.

New Cars

Sales of new cars declined 9 percent to 8.6 million units in model year 1991 from 9.4 million in 1990. Car sales had declined 6 percent in 1987, 1/2 percent in 1988, 1 1/2 percent in 1989, and 8 1/2 percent in 1990.

Sales of all size-classes of cars declined in 1991. The market shares (percent of total new-car sales) of luxury cars and of small cars increased; the market share of large cars decreased and of middle-sized cars changed little. Sales of luxury cars declined to 1.1 million, but their market share increased to 13 percent in 1991 from 12 1/2 percent in 1990. Sales of small cars declined to 3.0 million, but their market share increased to 36 percent from 35 1/2 percent. Sales of large cars declined to 0.7 million, and their market share declined to 8 percent from 9 1/2 percent. Sales of middle-sized cars declined to 3.6 million, and their market share changed little at 42 1/2 percent.

Domestic car production dropped to 5.5 million units in 1991—the lowest level in 9 years—from 6.2 million in 1990. The drop in production resulted from slumping sales and attempts by the industry to keep leaner inventories.

Domestic and imported car sales

Sales of domestic cars declined 7 1/2 percent to 6.3 million units in model year 1991 from 6.8 million in 1990. Domestic car sales had declined 8 percent in 1990 after increasing 1/2 percent in 1989, changing little in 1988, and declining 9 percent in 1987. Domestic car sales consist of both domestic nameplate cars and transplant cars.⁵ Sales of domestic nameplate cars declined in 1991, and sales of transplant cars increased.

Sales of domestic nameplate cars fell 11 percent to 5.1 million in 1991 after dropping 13 1/2 percent in 1990. The market share of domestic nameplate cars declined to 60 percent in 1991 from 61 percent in 1990; their market share had been 69 1/2 percent in 1986 (chart 3).

Sales of transplant cars increased 10 1/2 percent to 1.1 million in 1991. Sales of these cars had leaped 38 1/2 percent in 1990 and 24 1/2 percent in 1989.

5. Domestic nameplate cars are cars manufactured in North America at factories owned by domestic companies. Transplant cars are cars manufactured in the United States in foreign-owned factories (known as transplants).

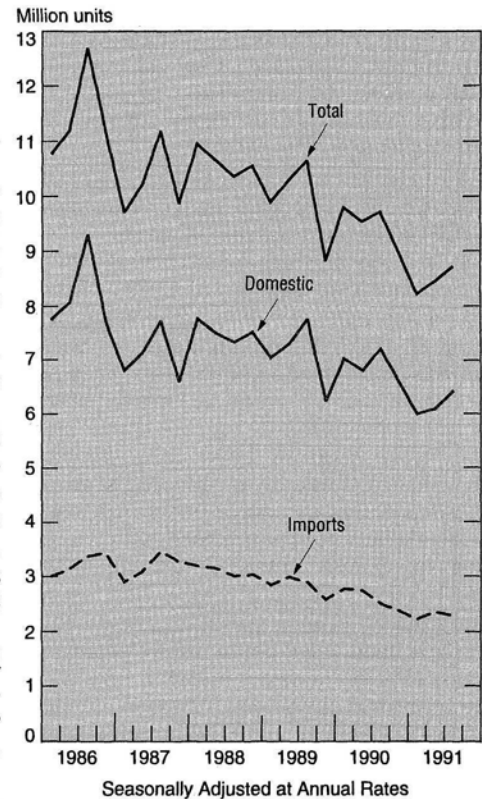

Most of the car models manufactured at transplants are the same as those previously manufactured overseas and then imported. The market share of transplant cars increased to 13 1/2 percent in 1991 from 11 percent in 1990; their share had been only 2 1/2 percent in 1986.

Sales of imported cars fell 12 1/2 percent to 2.3 million in 1991—the lowest level since 1982—from 2.6 million in 1990. Sales of these cars had declined 10 percent in 1990 and 7 percent in 1989. The recent declines partly reflected foreign manufacturers' shift in production from overseas plants to transplants. The market share of imported cars declined to 27 percent in 1991 from 28 percent in 1990; their share had peaked at 30 1/2 percent in 1987.

Quarterly patterns

Sales of new cars fell sharply in the fourth quarter of 1990 and in the first quarter of 1991, and then they increased in the second and third quarters (chart 4). Sales in the second

CHART 4
Retail Sales of New Cars

Data: Motor Vehicle Manufacturers Association of the United States, Inc. and *Ward's Automotive Reports*, seasonally adjusted by BEA.

and third quarters were boosted by exceptionally attractive sales-incentive programs.

Domestic cars.—In the fourth quarter of 1990, domestic car sales dropped to 6.6 million (seasonally adjusted annual rate) from 7.2 million in the third quarter. Several factors contributed to the decline. First, the sales-incentive programs offered to consumers by manufacturers were modest in comparison with those offered in the third quarter. Second, new-car prices increased sharply after declining in the preceding two quarters. Third, gasoline prices jumped sharply, and uncertainty about future gasoline prices was exceptionally high, reflecting the Middle East situation. Fourth, the most aggressive fleet-marketing programs ever offered by manufacturers, which began in the preceding quarter, added less to sales in the fourth quarter than in the third. The only strength in the fourth quarter was in sales of luxury cars, which increased as consumers purchased these cars before a Federal tax on luxury goods became effective on January 1, 1991.

Manufacturers cut production to 5.6 million in the fourth quarter from 6.9 million in the third. This cut partly reflected manufacturers' anticipation of weak fourth-quarter sales. Inventories edged down to 1.3 million at the end of the fourth quarter from 1.4 million in the third; the inventory-sales ratio remained at 2.3, near the 2.4 ratio traditionally targeted by the industry.

In the first quarter of 1991, sales fell to 6.0 million—the lowest level since the first quarter of 1983. Sales to both businesses and consumers declined. The decline in sales to businesses partly reflected fleet-marketing programs that were less attractive than those offered in the third and fourth quarters of 1990. The decline in sales to consumers reflected several factors: Sales-incentive programs were less attractive than those offered in the third and fourth quarters; new-car prices jumped sharply; and some consumers shifted purchases from new cars to used cars, particularly program cars. (Program cars are originally sold by manufacturers to businesses as part of fleets and are later repurchased by the manufacturers and sold to consumers as used cars; these cars are attractive to consumers because they have lower mileage and more options than most used cars and because they

are less expensive than most new cars.) The supply of program cars increased in the first quarter as a result of the earlier aggressive fleet-marketing programs.

Manufacturers slashed production in the first quarter to 5.1 million, the lowest level since the fourth quarter of 1982. The cut in production kept inventories low; inventories declined to 1.1 million at the end of the first quarter, and the inventory-sales ratio declined to 2.1.

In the second quarter, sales edged up to 6.1 million. This small increase was more than accounted for by sales to consumers; sales to businesses declined slightly. The increase in sales to consumers reflected two factors. First, new-car prices increased modestly after jumping sharply in the first quarter; the deceleration partly reflected the effect on prices of sales-incentive programs that were more attractive than those offered in the first quarter. Second, the shift in purchases from new cars to used cars slowed. Used-car sales declined for the first time in five quarters, partly reflecting a decline in the availability of program cars following changes in fleet-marketing programs.

Production increased to 5.3 million in the second quarter. Inventories slipped to 1.0 million at the end of

the second quarter, and the inventory-sales ratio fell to 1.9—the lowest level in nearly 5 years.

In the third quarter, sales increased to 6.4 million. The increase reflected sales-incentive programs that manufacturers again enhanced to stimulate sales. Domestic car production jumped to 6.0 million. Inventories remained at 1.0 million, and the inventory-sales ratio declined to 1.8.

Imported cars.—Sales of imported cars declined in three of the four quarters of model year 1991. Sales declined to 2.4 million in the fourth quarter of 1990 and fell to 2.2 million in the first quarter of 1991—the lowest level in 9 years; sales then increased to 2.4 million in the second quarter before declining to 2.3 million in the third. Inventories of imported cars jumped sharply in the fourth quarter of 1990 and the first quarter of 1991, and then they declined in the second and third quarters.

New Trucks

Sales of new trucks fell 12 percent—the largest drop since the recession year of 1981—to 4.2 million units in model year 1991 after declining 6½ percent in 1990 and 1 percent in 1989. Sales of all categories of trucks declined in 1990 and 1991. The share of total vehicle sales accounted for by trucks declined to 32½ percent in 1991, the first decline since 1982.

Sales of light trucks declined for the third consecutive year after seven increases.⁶ These trucks, about two-thirds of which are purchased for personal use, accounted for 94 percent of total truck sales in 1991. Many of the same developments that affected car sales, such as changes in sales-incentive programs, also affected light truck sales. Within light truck sales, sales of domestic trucks fell 10½ percent to 3.6 million in 1991 after dropping 5 percent in 1990. Even so, their share of all light truck sales increased to 91½ percent in 1991, the highest since 1978. Sales of imported light trucks plummeted 22½ percent to 0.3 million in 1991 after tumbling 16½ percent in 1990, 19½ percent in 1989, and 28 percent in 1988. These large declines, like those of imported car sales,

CHART 5
Retail Sales of New Trucks

Note.—Retail sales of domestic trucks are classified by gross vehicle weight as light (up to 10,000 pounds) and "other" (over 10,000 pounds). Imported trucks include imports by U.S. manufacturers.

Data: Motor Vehicle Manufacturers Association of the United States, Inc. and *Ward's Automotive Reports*, seasonally adjusted by BEA.

U.S. Department of Commerce, Bureau of Economic Analysis 91-11-5

6. Light trucks are those with up to 10,000 pounds gross vehicle weight. These trucks include light conventional pickups, compact pickups, sport utility vehicles, and passenger vans.

partly reflected an increase in sales from transplants.

Sales of "other" trucks fell 17 $\frac{1}{2}$ percent to 0.3 million.⁷ Nearly all of these trucks are purchased by businesses. The domestic models' share of all "other" truck sales has declined in recent years to roughly 90 percent in 1991.

7. "Other" trucks are those with over 10,000 pounds gross vehicle weight. These trucks range from medium-duty general delivery trucks to heavy-duty diesel tractor-trailers.

The quarterly pattern of truck sales in model year 1991 roughly mirrored that of cars sales. However, the decreases in truck sales in the fourth quarter of 1990 and in the first quarter of 1991 were steeper than the decreases in car sales, and the increases in truck sales in the second and third quarters were larger than the increases in car sales.

In the fourth quarter of 1990, truck sales fell to 4.2 million from 4.8 million in the third; sales of both do-

mestic light trucks and "other" trucks declined, and sales of imported light trucks increased (chart 5). In the first quarter of 1991, truck sales dropped to 3.8 million; sales of all categories of trucks declined. In the second quarter, truck sales increased to 4.1 million; sales of both domestic and imported light trucks increased, and sales of "other" trucks declined. In the third quarter, truck sales jumped to 4.5 million; sales of all categories of trucks increased.

Pollution Abatement and Control Expenditures, 1987-89

REAL spending for pollution abatement and control (PAC) increased 1.0 percent to \$74.4 billion in 1989, following a 3.0-percent increase in 1988 (chart 6). Prices of PAC goods and services, as measured by the PAC fixed-weighted price index, increased 4.1 percent, following a 2.7-percent increase.

Real pollution abatement (PA) expenditures also increased 1.0 percent in 1989, following a 3.0-percent increase in 1988. PA expenditures account for over nine-tenths of all PAC spending. The two components accounting for the remainder of total PAC spending are regulation and monitoring expenditures and research and development expenditures. Real spending for regulation and monitoring increased 0.7 percent, following an 8.3-percent increase. Real spending for research and development increased 2.6 percent, following a 0.4-percent increase.¹

NOTE.—Gary L. Rutledge, Chief of the Environmental Economics Division, supervised the preparation of the estimates. Mary L. Leonard planned and coordinated the compilation and analysis of the estimates, with the assistance of Mohamad F. Moabi and Christine R. Vogan. The preparation of estimates involved the following staff: Personal consumption—Frederick G. Kappler; business—David M. Bratton, Frederick G. Kappler, Mary L. Leonard, Nikolaos A. Stergioulas, and Howard J. White; and government—David M. Bratton, Mary L. Leonard, and Howard J. White. Shirley D. Tisdale and Sonia R. Bundy provided statistical and secretarial services, respectively.

1. The expenditures discussed in this article are for goods and services that U.S. residents use to produce cleaner air and water and to dispose of solid waste. PA directly reduces pollutant emissions by preventing the generation of pollutants, by recycling the pollutants, or by treating the pollutants prior to discharge. Regulation and monitoring is a government activity that stimulates and guides action to reduce pollutant emissions. Research and development by business and government not only supports abatement but also helps increase the efficiency of regulation and monitoring.

PAC spending covers most, but not all, PAC activities, which are defined as those resulting from rules, policies and conventions, and formal regulations restricting the release of pollutants into common-property media such as the air and water. PAC spending excludes (1) PAC activities that do not use productive

resources (for example, plant closings due to PAC, delays in plant construction, or curtailments in the use of chemicals in manufacturing and agriculture) and (2) PAC activities that do use productive resources but that are nonmarket activities (for example, volunteer litter removal).

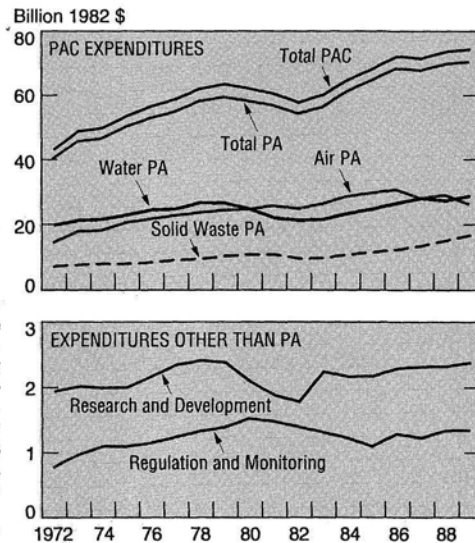

resources (for example, plant closings due to PAC, delays in plant construction, or curtailments in the use of chemicals in manufacturing and agriculture) and (2) PAC activities that do use productive resources but that are nonmarket activities (for example, volunteer litter removal).

The first section of this article examines real PAC spending in 1989, prices of PAC goods and services in 1989, and likely real PAC spending in 1990. The second section examines changes in the composition of PAC spending in 1989.

Recent estimates

Real PAC spending in 1989.—Real PAC spending increased \$0.8 billion in 1989 to \$74.4 billion (table 1, with detail in tables 7 and 8). The largest increase in PAC spending, \$1.5 billion, was in business spending to operate plant and equipment for air PA, water PA, and solid waste disposal. Business spending to purchase such new plant and equipment also increased substantially, \$1.1 billion. Government PA spending rose \$0.7 billion.

CHART 6
Real Expenditures for Pollution Abatement and Control, 1972-89

Note.—Pollution Abatement and Control (PAC) expenditures consist of expenditures for the direct abatement of pollution (PA), for regulation and monitoring, and for research and development.

U.S. Department of Commerce, Bureau of Economic Analysis 91-11-6

^a Preliminary.

NOTE.—Based on tables 7 and 8.

Personal consumption PA expenditures, all of which is for the purchase and operation of motor vehicle emission abatement devices, decreased \$1.9 billion in 1989. Purchases of these devices (for example, catalytic converters) decreased \$0.5 billion; the decrease was mainly due to a fall in unit sales of vehicles. The cost of operating emission abatement devices decreased \$1.3 billion. This cost consists largely of the additional cost of using unleaded, rather than leaded, gasoline in vehicles with catalytic converters. In 1989, the price gap between unleaded and leaded gasoline narrowed for the fourth consecutive year, sharply cutting the cost of operating the devices.

Business PA expenditures increased \$1.9 billion, to \$47.1 billion. Most of

the increase was in spending on current account, which increased \$1.3 billion, to \$31.5 billion. Among current-account items, the largest increase was in PA spending on the operation of plant and equipment (particularly for water PA and solid waste disposal). PA spending on capital account increased \$0.6 billion, to \$15.5 billion.

Government PA expenditures increased \$0.7 billion, to \$14.4 billion. The increase was primarily for State and local spending for solid waste disposal, although spending for the construction of public sewer systems also increased.

Prices in 1989.—The fixed-weighted price index for total PAC spending increased 4.1 percent in 1989, following a 2.7-percent increase in 1988 (table 2). Price increases were higher in 1989 than in 1988 for each type of expenditure. Air PAC prices increased 4.2 percent, following a 2.2-percent increase. Water PAC prices increased 3.5 percent, following a 2.4-percent increase. Prices for solid waste disposal, which continued to increase faster than prices of air and water PAC, increased 5.3 percent, following a 4.0-percent increase.

Real PAC spending in 1990.—According to the information available in November 1991, real PAC spending in 1990 remained close to the 1989 level. Large increases in spending to operate PA plant and equipment and in spending for public sewer system construction are expected to have offset large decreases in spending to oper-

ate motor vehicle emission abatement devices.

The changing composition of real PAC spending in 1989

To highlight the changes in real spending that resulted in significant compositional shifts of PAC purchases, real spending is organized by sector (for example, business) in tables 3 and 4 and by type (for example, air PA mobile sources) in tables 5 and 6. The sectors identified in tables 3 and 4 are in accordance with national economic accounting conventions. The types identified in tables 5 and 6 are in accordance with definitions in Federal environmental legislation.²

Spending by sector.—In 1989, the share of total PAC spending accounted for by persons declined, and the shares accounted for by business and by government increased. Personal consumption spending accounted for 12.3 percent of total PAC spending in 1989, down from 15.0 percent in 1988. The drop in share reflected the declines in purchases of motor vehicle emission abatement devices and in expenditures for the operation of these devices. Within the personal sector, the share of spending accounted for by purchases of motor vehicle emission abatement devices increased, and the share accounted for by spending to operate these devices decreased. Business spending as a share of total PAC spending increased from 63.7 percent

^r Revised.
^p Preliminary.
^{*} Less than 0.1 percent.
1. Spending to operate public sewer systems is classified in the national income and product accounts (NIPA's) as business spending. Construction of public sewer systems is classified in the NIPA's as government spending.
2. For this table, includes private spending for research and development.
3. For this table, includes government spending for research and development and for regulation and monitoring.
NOTE.—Based on tables 7 and 8.

2. For air PA, the Clean Air Act classifies sources of pollutants as mobile (for example, automobiles) or stationary (for example, factories). For water PA, the Federal Water Pollution Control Act classifies sources of pollutants as point (for example, factories) or nonpoint (for example, highway construction projects).

Table 4.—Composition of Pollution Abatement and Control Spending, by Sector

	1987	1988	1989
	Percent of total PAC spending

NOTE.—Expenditure categories above are the same as those shown in table 3.

in 1988 to 65.6 percent in 1989; compositional shifts within the sector were negligible. Government spending as a share of total PAC spending edged up from 21.3 percent in 1988 to 22.1 percent in 1989. Within the government sector, the share of spending accounted for by public sewer system construction decreased, and the share of the "other" government category increased, reflecting growth in solid waste disposal.

Spending by type.—In 1989, the share of total PAC spending accounted for by air PA declined, and the shares accounted for by water PA and by solid waste disposal increased. Air PA spending as a share of total PAC spending fell from 39.5 percent in 1988 to 35.4 percent in 1989. Mobile sources as a share of total air PA decreased, and the share accounted for by stationary sources increased. Water PA spending as a share of total PAC spending in-

creased about 2 percentage points to 38.7 percent; compositional shifts were negligible. Solid waste disposal spending as a share of total PAC spending increased about 2 percentage points to 22.5 percent; compositional shifts were negligible.

Technical notes

The estimates of PAC components are based directly on surveys or censuses or are estimated by indirect methods. Typically, PAC estimates derived from direct sources account for about three-fifths of total PAC spending. The most important direct sources are the Pollution Abatement Costs and Expenditures (PACE) Survey (for capital and operating spending by manufacturing industries), the Pollution Abatement Plant and Equipment Expenditures Survey (for capital spend-

ing totals by nonfarm business), and surveys of government finances (for government spending for sewer systems and for solid waste collection and disposal). All of these surveys are conducted by the Bureau of the Census.³

Because of a cutback in the number of industries covered by the Pollution Abatement Plant and Equipment Expenditures (P&E) Survey, BEA is experimenting with new methods for estimating nonfarm business PA capital spending. For the present article, 1987 estimates from the PA P&E survey have been brought forward using growth rates for 1988 and 1989 from a new estimation method. This method builds on manufacturing estimates of PA capital spending reported by the PACE survey. Added to the PACE survey estimates are estimates for electric utilities from the PA P&E survey and estimates for mining and other non-manufacturing. The latter estimates are based on indirect estimation procedures utilizing a variety of source data, including the PA P&E survey, an environmental protection expenditures survey by the American Petroleum Institute, and data from the *Census of Mineral Industries*.

3. For a more detailed discussion of the sources of PAC component estimates, see Kit D. Farber and Gary L. Rutledge, "Pollution Abatement and Control Expenditures, 1984-87," SURVEY OF CURRENT BUSINESS 69 (June 1989): 22-23.

^r Revised.

^p Preliminary.

1. The Clean Air Act classifies sources of pollutants as either mobile, such as passenger cars, or stationary, such as factories.
2. Cars and trucks only.
3. Consists of new plant and equipment expenditures for pollution abatement according to results from the plant and equipment expenditures survey by BEA through 1987. See technical note for information on 1988-89.
4. Consists of spending for fixed capital of government enterprises such as the Tennessee Valley Authority.
5. Consists of spending to operate government enterprises and all spending by government; separate data on spending to acquire and operate government pollution abatement facilities are not available.
6. The Federal Water Pollution Control Act defines point sources as facilities that discharge to a body of water through a pipe or ditch.
7. Consists of spending for private connectors to public sewer systems, capital spending by owners of feedlots, and spending for fixed capital of government enterprises such as the Tennessee Valley Authority.
8. Consists of spending by Federal, State, and local governments for the collection and disposal of solid waste and of spending by households for collection and disposal of solid waste by business.
9. Consists of "other and unallocated" spending.

NOTE.—Based on tables 7 and 8.

Table 6.—Composition of Pollution Abatement and Control Spending, by Type

	1987	1988	1989
	Percent of total PAC spending		
Air	39.3	39.5	35.4

^r Revised.

^p Preliminary.

1. Includes expenditures for air and water pollution abatement and control. Includes expenditures for solid waste collection and disposal by means acceptable to Federal, State, and local authorities. Excludes agricultural production except feedlot operations.

2. "Other" includes expenditures for abatement and control of noise, radiation, and pesticide pollution; "unallocated" includes business expenditures not assigned to media.

3. Expenditures are attributed to the sector that performs the air or water pollution abatement or the solid waste collection and disposal.

4. To facilitate conversion of expenditures to a cost basis.

^r Revised.^p Preliminary.

1. Consists of air and water pollution abatement expenditures only.
 2. Consists of manufacturing companies and of privately and cooperatively owned electric utilities and other nonmanufacturing companies.

3. Consists of private septic systems and sewer connections linking household plumbing to street sewers.

4. Feedlot operations only; see footnote 1 to table 7.

5. Consists of treatment plants, collection sewers, interceptor sewers, pumping stations, and dry-waste disposal plants.

NOTE.—Line numbers correspond to those in table 7.

L,C,Lg,U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values.

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Composite Indexes of Leading, Coincident, and Lagging Indicators" in the November 1987 SURVEY OF CURRENT BUSINESS and "Business Cycle Indicators: Revised Composite Indexes" in the January 1989 SURVEY.

References to series in this section use the prefix "BCI-" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged. Diffusion index data are centered within the spans: 1-month indexes are placed in the ending month and 6-month indexes are placed in the 4th month.

High values reached by cyclical indicators since the last reference cycle trough (November 1982) are shown in boldface type; high values reached prior to the period shown in the table are listed at the bottom of each page. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-47 and C-48 in the October 1991 SURVEY.

Page C-1

1. A component's contribution measures its impact, in percentage points, on the percent change in the index. Each month, the sum of the contributions plus the trend adjustment factor equals (except for rounding differences) the index's percent change from the previous month. The trend adjustment factors are 0.142 for the leading index, -0.186 for the coincident index, and 0.030 for the lagging index.

2. Excludes BCI-57, for which data are not available.
3. Excludes BCI-77, for which data are not available.
4. Excludes BCI-77 and BCI-95, for which data are not available.

Page C-2

* Preliminary November values: BCI-122 = 50.6 and BCI-123 = 66.9.

1. Data exclude Puerto Rico, which is included in figures published by the source agency.
2. Copyrighted. This series may not be reproduced without written permission from the University of Michigan, Survey Research Center, P.O. Box 1248, Ann Arbor, MI 48106-1248.
3. Copyrighted. This series may not be reproduced without written permission from McGraw-Hill Information Systems Company, F.W. Dodge Division, 1221 Avenue of the Americas, New York, NY 10020.

Page C-3

* Preliminary November values: BCI-23 = 270.9, BCI-19 = 387.32; anticipated 4th quarter values: BCI-61 = 540.91 and BCI-100 = 541.15.

1. Copyrighted. This series may not be reproduced without written permission from Commodity Research Bureau, Inc., 75 Wall Street, 22d Floor, New York, NY 10005.

Page C-4

* Preliminary November values: BCI-85 = 1.03, BCI-119 = 4.89, BCI-114 = 4.65, BCI-116 = 8.73, BCI-115 = 7.83, BCI-117 = 6.72, and BCI-109 = 7.60.

1. This index is compiled by the Center for International Business Cycle Research (CIBCR), Graduate School of Business, Columbia University, New York, NY 10027.

Page C-5

* Preliminary November values: BCI-19 = 421.3, BCI-748 = 1,669.9, BCI-745 = 323.6, BCI-746 = 841.9, BCI-742 = 1,150.0, BCI-747 = 297.5, BCI-743 = 408.4, BCI-750 = 88.16, BCI-758 = 129.79, BCI-755 = 1.6260, BCI-756 = 5.5568, BCI-752 = 0.5621, BCI-757 = 1,224.05, and BCI-753 = 1.1284.

1. Balance of payments basis: Excludes transfers under military grants and Department of Defense sales contracts (exports) and Department of Defense purchases (imports).

2. Organisation for Economic Co-operation and Development.

3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Each country is weighted by its 1972-76 global trade. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).

Revised monthly estimates of personal income consistent with the just released comprehensive revision of the national income and product accounts will be released in late December and will appear in this section next month. The personal income estimates in this month's "Current Business Statistics" section are on an unrevised basis.

CURRENT BUSINESS STATISTICS

Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

Current data for the series shown in the S-pages are available on diskette on a subscription basis or from the Commerce Department's Economic Bulletin Board. Historical data, data sources, and methodological notes for each series are published in BUSINESS STATISTICS, 1961-88. For more information, write to Business Statistics Branch, Current Business Analysis Division (BE-53), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the Business Statistics Branch.

Unless otherwise stated in footnotes below, data through 1988 and methodological notes are as shown in BUSINESS STATISTICS, 1961-88	Annual		1990				1991

Page S-1

† The monthly income estimates shown in this section are on an unrevised basis. Revised monthly estimates will be available in late December. Note, however, that National Income and Product Account Table 2.1 presents quarterly estimates of personal income that have been revised as part of the comprehensive revision of the national income and product accounts.

‡ Includes inventory valuation and capital consumption adjustments.

§ Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three-month moving average of disposable personal income.

◇ See note "◇" for p. S-2.

Page S-2

1. Based on data not seasonally adjusted.

◇ Effective April 1990 SURVEY, the industrial production index has been revised back to 1977 and has a new base year of 1987. A more detailed explanation of this revision is in the April 1990 *Federal Reserve Bulletin*. Historical data are available from the Industrial Output Section, Mail Stop 82, Division of Research and Statistics, Federal Reserve Board, Washington, DC 20551.

Includes data not shown separately.

Page S-3

Includes data for items not shown separately.

† Effective with the April 1991 SURVEY, M3 data have been revised to benchmark the data to the 1987 Census of Manufactures and 1988 Annual Survey of Manufactures, and to convert the series to the 1987 SIC codes. Revisions related to benchmarking affect all categories back to 1982. Revisions resulting from the SIC conversion affect about half the categories back to 1958. The coverage for some of the series in the market category has been changed.

Page S-4

1. Based on data not seasonally adjusted.

Includes data for items not shown separately.

‡ Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries; unfilled orders for other nondurable goods industries are zero.

◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

† See note "†" for p. S-3.

Page S-5

1. Based on data not seasonally adjusted.

@ Compiled by Dun & Bradstreet, Inc.

Includes data for items not shown separately.

§ Ratio of prices received to prices paid (parity index).

† See note "†" for p. S-4.

‡ In the Feb. and July issues of the SURVEY each year, data for the most recent six to eight years are subject to revise and are available upon request.

†† See note "†" for p. S-3.

Page S-6

§ For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

Includes data for items not shown separately.

† Effective with the Feb. 1991 SURVEY, data have been revised back to 1986 and are available upon request.

Page S-7

1. Computed from cumulative valuation total.

2. Index as of Nov. 1, 1991: building, 413.2; construction, 455.8.

3. Beginning Dec. 1988, series has been discontinued by the Bureau of the Census.

† Effective July 1991 SURVEY, data have been revised back to 1986. Effective July 1990 SURVEY, data were revised back to 1985. Revised data are available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233.

Includes data for items not shown separately.

§ Data for Mar., May, Aug., and Nov. 1990, and Jan., May, Aug., and Oct. 1991 are for five weeks; other months four weeks.

◇ Effective Feb. 1990 SURVEY, data for seasonally adjusted housing starts have been revised back to 1987. These revisions are available upon request.

@ Effective Feb. 1990 SURVEY, data for seasonally adjusted manufacturers' shipments of mobile homes have been revised back to 1987.

† Effective May 1990 SURVEY, data for seasonally adjusted building permits have been revised back to 1988 and are available upon request.

* Series first shown in the July 1990 SURVEY. The fixed-weighted price index is a weighted average of the individual price index series used to deflate the Value of New Construction Put in Place (VIP) series. In calculating the index, the weights (the composition of current dollar VIP in 1987 by category of construction) are held constant. Consequently, the index reflects only changes in prices. The implicit price deflator is a derived ratio of total current to constant dollar VIP (multiplied by 100). It is the average of the individual price indexes used in the deflation of VIP, but the prices are weighted by the composition of VIP each period. As a result, the implicit price deflator reflects not only changes in prices, but also changes in the composition of VIP, and its use as a measure of price change is discouraged. Effective July 1991 SURVEY, data have been revised back to 1986.

†† Effective May 1991 SURVEY, the Boeckh indexes have a new base year of 1987.

†† Effective Sept. 1990 SURVEY, the construction cost index for the Federal Highway Administration has been revised back to 1986 and has a new base year of 1987=100.

Page S-8

1. Advance estimate.

2. Beginning with Feb. 1989 data, associations in conservatorship are excluded.

◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.

§ Data include guaranteed direct loans sold.

Includes data for items not shown separately.

@ Data are for closed mortgage loans of thrift institutions insured by the Savings Association Insurance Fund (SAIF)—FSLIC-insured institutions prior to Sept. 1989.

† Effective April 1991 SURVEY, estimates of wholesale sales have been revised back to January 1988 and wholesale inventories have been revised back to January 1989. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade, Sales and Inventories January 1984–December 1990, BW90–R*, available from the Bureau of the Census, Washington, DC 20233.

‡ Effective March 1991 SURVEY, retail trade data have been revised. Estimates of retail sales have been revised back to January 1988 and inventories have been revised back to January 1989. (In 1990 data were revised back to 1982.) Revised data and a summary of changes will appear in the report *Revised Monthly Retail Sales and Inventories, January 1981–December 1990, BR90–R*, available from the Bureau of the Census, Washington, DC 20233.

Page S-9

1. Advance estimate.

Includes data for items not shown separately.

◇ Effective with the January 1991 SURVEY, the seasonally adjusted labor force series have been revised back to January 1986. The January 1991 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1986–90 revision period appear in the February 1991 issue of *Employment and Earnings*.

† The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.

@ Data include resident armed forces.

† See note "†" for p. S-8.

Page S-10

◇ See note "◇" for p. S-9.

§ Effective with the Sept. 1990 and June 1991 issues of the SURVEY, data have been revised, respectively back to April 1988 and April 1989, unadjusted, and back to Jan. 1985 and Jan. 1986, seasonally adjusted, to reflect new benchmarks and seasonal adjustment factors. In addition the Sept. 1990 revision included the conversion of the industry series to 1987 SIC codes. Industry series affected by revisions in the SIC have been revised back to the inception of the series, to the extent possible. In addition, all constant-dollar and indexed series were recomputed on a 1982 base. The Sept. 1990 and June 1991 issues of *Employment and Earnings* contain detailed descriptions of the effects of these revisions. All of the revised historical series will be published in a special supplement to *Employment and Earnings*. This supplement, when combined with the historical bulletin, *Employment, Hours, and Earnings, United States, 1909–90* will comprise the full historical series on national data obtained from the establishment survey.

Page S-11

§ See note "§" for p. S-10.

† This series is not seasonally adjusted because the seasonal component is small relative to the trend-cycle and/or irregular components and consequently cannot be separated with sufficient precision.

◇ Production and nonsupervisory workers.

Page S-12

§ See note "§" for p. S-10.

◇ Production and nonsupervisory workers.

† Earnings in 1982 dollars reflect changes in purchasing power since 1982 by dividing by Consumer Price Index. Effective Feb. 1990 and 1991 issues of the SURVEY, this series has been revised, respectively, back to 1985 and 1986 to reflect new seasonal factors for the CPI-W. Revised data are available upon request.

§§ Effective with the June 1991 SURVEY, data have been revised back to 1989 and are available upon request. Wages as of Nov. 1, 1991: Common, \$19.14; Skilled, \$25.19.

† Excludes farm, household, and Federal workers.

@ Effective with the April 1990 SURVEY, the employment cost index is based on June 1989=100, rather than June 1981=100. Historical data for both June 1989 and June 1981 bases are available from the Bureau of Labor Statistics, Division of Employment Cost Trends, 441 G Street, N.W., Washington, DC 20212.

†† These series were affected by an error in the Sept. 1990 SURVEY. The stub for "Transportation equipment" was omitted. Hourly earnings for "Transportation equipment" were shown following the stub for "Electronic and other electrical equipment". Hourly earnings for "Electronic and other electrical equipment" were shown following the stub for "Industrial machinery and equipment". Hourly earnings for "Industrial machinery and equipment" were shown following the stub for "Machinery, except electrical", which was the former name for that industry (SIC 35).

* Series first shown in the July 1991 SURVEY. Wages and salaries are defined as the hourly straight-time wage rate or, for workers not paid on an hourly basis, straight-time earnings divided by the corresponding hours. Straight-time wage and salary rates are total earnings before payroll deductions, excluding premium or supplemental pay for overtime and for work on weekends and holidays, shift differentials, and nonproduction bonuses such as lump-sum payments provided in lieu of wage increases. Production bonuses, incentive earnings, commission payments, and cost-of-living adjustments are included in straight-time wage and salary rates.

Page S-13

1. Effective Feb. 28, 1989, there was a break in the series due to the enlargement of the panel of reporting dealers to 17 and of reporting direct issuers to 36. End of month figures on the old basis are as follows: All issuers, 481,734; financial companies, 373,717; dealer placed, 172,330; directly placed, 201,387; and nonfinancial companies, 108,017.

2. Average for Dec.

Includes data for items not shown separately.

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross; i.e., before deduction of valuation reserves).

† Covers 50 States and the District of Columbia. Only regular benefits are included.

@ Average weekly insured unemployment for 12-month period divided by average monthly covered employment (lagging 4 full quarters for annual figure and 2 full quarters for monthly figure).

† Effective Oct. 1989 SURVEY, loans by loan type are provided by the Federal Farm Credit Banks Funding Corporation.

◇ Effective with the April 1990 SURVEY, the reserves of depository institutions have been revised back to 1984 and are available upon request.

Page S-14

1. Data are for fiscal years ending Sept. 30 and may include revisions not distributed to the months.

2. Weighted by number of loans.

3. Beginning Feb. 1988, data suspended by the Farm Credit Administration, which is revising the information it collects and amending the reports it distributes.

§ Effective Mar. 1990 SURVEY, data have been revised to reflect new benchmark and seasonal adjustments and are available from the Banking and Money Market Statistics Section of the Division of Monetary Affairs at the Federal Reserve Board, Washington, DC 20551.

Includes data for items not shown separately.

◇ Excludes loans to commercial banks in the U.S.

† Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent.

†† Courtesy of *Metals Week*.

@ Average effective rate

† Effective May 1990 SURVEY, the consumer installment credit series have been revised back to 1980 to incorporate new information and updated seasonal adjustment factors. These revisions are available upon request.

* Series first shown in the June 1990 SURVEY.

†† This series, first shown in the June 1990 SURVEY, represents the outstanding balances of loans that the loan originator has sold and are no longer carried on the loan originator's books. The loans are pooled and securities are issued on the pools.

Page S-15

1. Beginning Jan. 1989, the primary public offering statistics have been discontinued by the Securities and Exchange Commission.

2. Effective April 1991 SURVEY, the Security Markets series have been discontinued.

3. Money market deposit accounts are included with savings deposits.

† Effective Feb. 1991 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

†† Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◇ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately.

Page S-16

1. The railroad average was discontinued by Moody's on July 13, 1989. Therefore, the July average reflects only eight working days.

2. Effective Oct. 3, 1990, the German Democratic Republic (GDR; East Germany) ceased to exist as a sovereign state and became a part of the Federal Republic of Germany. Accordingly, effective with the statistics for Oct. 1990, all merchandise imported from or exported to the former GDR will be included as trade with the Federal Republic of Germany.

3. Beginning Jan. 1991 data, Roadway Services, Inc. will be included in the Dow Jones Transportation Average replacing Pan Am Corp. Roadway Services is listed on the NASDAQ National Market System. Comparability with earlier averages is not affected by this change.

@ See note "4" for p. S-19 regarding the new commodity classification systems introduced Jan. 1989. Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because the revisions to the totals are not reflected in the component items.

§ Number of issues represents number currently used; the change in number does not affect the continuity of the series.

† For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

◇ The March through August 1991 issues of the SURVEY showed month-end yields for 1991 rather than monthly averages.

† Effective with the Mar. 1990 SURVEY, seas. adj. exports and imports have been revised back to Jan. 1988, and are available upon request.

Page S-17

1. Beginning with Jan. 1989 data, undocumented exports to Canada are now included, resulting in a break with Dec. 1988 data.

2. Beginning Jan. 1989, buses are excluded from "Motor vehicles and parts" and included in "Other manufactured goods," resulting in a break with Dec. 1988 data.

3. See note "2" for p. S-16.

@ See note "@" for p. S-16.

† See note "†" for p. S-16.

Includes data not shown separately.

◇ Data include undocumented exports to Canada, which are based on official Canadian import totals.

* Series first shown in the October 1991 SURVEY. The deflators for the constant dollar series are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the Bureau of Economic Analysis.

Page S-18

1. Reported annual total; quarterly or monthly revisions are not available.

2. For month shown.

3. Beginning Aug. 1989, the export and import indexes have been discontinued by the Census Bureau.

* Series first shown in the October 1991 SURVEY. Source: Bureau of Labor Statistics.

Includes data for items not shown separately.

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◇ Average daily rent per room occupied, not scheduled rates.

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities.

† Before extraordinary and prior period items.

@ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

†† Effective with the Dec. 1989 SURVEY, data for 1981-88 have been revised and are available upon request.

††† Effective with the Mar. 1990 SURVEY, data for 1985-89 have been revised and are available upon request.

Page S-19

1. Reported annual total; monthly or quarterly revisions are not available.

2. Less than 500 metric tons.

3. Figure suppressed because it did not meet Census publication standards.

4. Beginning with 1989 data, merchandise trade data are based upon two new commodity classification systems; the International Harmonized System and, Revision 3 of the Standard International Trade Classification and, as a result, data may not be directly comparable to 1988 and earlier years.

5. Data are partially estimated for this quarter and are not available.

6. Beginning in 1991, data are available only on a quarterly basis.

Includes data for items not shown separately.

§ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated.

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.
 2. Quarterly data are no longer available.
 3. See note 4 for p. S-19.
 4. Beginning in 1991, data are available only on a quarterly basis.
- § Data are not wholly comparable from year to year because of changes from one classification to another.
- @ Includes less than 500 electric generation customers not shown separately.
- † Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.
- ◇ Effective with the Dec. 1989 SURVEY, revisions for 1987-88 are available upon request.

Page S-21

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1-Aug. 31).
 2. Crop estimate for the year.
 3. Stocks as of June 1.
 4. Stocks as of June 1 and represents previous year's crop; new crop not reported until June beginning of new crop year.
 5. Series has been discontinued.
 6. Stock estimates are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column.
 7. Stocks as of Dec. 1.
 8. See note 4 for p. S-19.
- § Excludes pearl barley.
- @ Quarterly data represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. Annual data represent Dec.-Nov.
- † Coverage for 21 selected States, representing approximately 85 percent of U.S. production.

Page S-22

1. See note 4 for p. S-19.
- § Cases of 30 dozen.
- * Series first shown in the Jan. 1991 SURVEY.

Page S-23

1. Crop estimate for the year.
 2. Reported annual total; revisions not distributed to the months.
 3. Data suppressed because they did not meet Census publication standards.
 4. See note 4 for p. S-19.
 5. Data withheld to avoid disclosing figures for individual companies.
 6. Beginning in 1991, data are available only on a quarterly basis.
- # Totals include data for items not shown separately.

Page S-24

1. Reported annual total; monthly revisions are not available.
2. See note 4 for p. S-19.
3. Less than 500 tons.
4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.

Page S-25

1. Reported annual total; monthly revisions are not available.
 2. For month shown.
 3. Effective with Jan. 1989, import data are for consumption; earlier periods of data are general imports. See also note 4 for p. S-19 regarding the introduction of new classification systems.
 4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.
- @ Includes foreign ores.
- § Source: *Metals Week*.

Page S-26

1. Reported annual total; monthly revisions are not available.
 2. Less than 50 tons.
 3. See note 3 for p. S-25.
 4. Break in comparability beginning Jan. 1, 1991, because of a change in the *Metals Week* pricing series for zinc.
- ◇ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap.
- † Source for monthly data: American Bureau of Metal Statistics. Source for annual data: Bureau of Mines.
- # Includes data not shown separately.
- † Effective April 1991 SURVEY, the materials handling index has been revised back to 1982 and now includes lift trucks. The index also includes new orders for automatic guided vehicles, automated storage and retrieval systems, below hook lifters, cranes, hoists, monorails, racks, shelving, casters and floor trucks, and conveyors. Revised data are available upon request.
- @@ Price represents North American Mean.
- @ Effective with the Sept. 1990 SURVEY, the new orders index numbers have been converted to a new base year of 1987=100. Data back to 1988 are available upon request.

Page S-27

1. Annual total includes revisions not distributed to the months or quarters.
 2. See note 4 for p. S-19.
 3. Beginning in 1990, quarterly data have been discontinued. Annual data will continue to be available.
 4. Beginning with May 1991 data, monochrome production numbers are no longer included.
- # Includes data for items not shown separately.
- § Includes nonmarketable catalyst coke.
- ◇ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
- ‡‡ March, June, September and December are five-week months. All others consist of four weeks.

Page S-28

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
 3. Beginning May 1991, the leaded gasoline price is not statistically valid for publication.
- # Includes data for items not shown separately.

Page S-29

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
- ◇ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users. See also note "†" for this page.
- § Effective with the October 1990 SURVEY, data have been revised back to 1989 to reflect adjustments made by the Rubber Manufacturers Association's Rubber Statistical Committee.
- † Effective with the October 1990 SURVEY, synthetic data consisting of Butyl, polyisoprene, polychloroprene, silicone, and other elastomers have been revised in keeping with data provided by the Census Bureau's MA30A report beginning in 1990. Also see note "§" on this page.
- # Compiled by the American Newspaper Publishers Association.
- † Effective with the March 1990 SURVEY, Canadian newsprint statistics have been revised back to Jan. 1982 to exclude supercalendered and some soft-nip calendered paper that was originally classified as newsprint and is now classified as uncoated groundwood papers. This revision also affects estimated consumption. Revised data are available upon request.

Page S-30

1. Reported annual total; revisions not allocated to the months.
 2. Data are being withheld to avoid disclosing data from individual firms.
 3. Data cover five weeks; other months, four weeks.
 4. Beginning Jan. 1989, sales of industrial plasters are included with building plasters.
 5. Nov. 1 estimate of the 1991 crop.
 6. Total for crop year, Aug. 1-Jul. 31.
 7. Beginning in 1991, data are available only on a quarterly basis.
- # Includes data for items not shown separately.
- ◇ Cumulative ginnings to the end of month indicated.
- § Bales of 480 lbs.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year; Aug. 1-Jul. 31.
 4. For five weeks; other months four weeks.
 5. See note 4 for p. S-19.
 6. Beginning in 1990, data are available only on a quarterly basis.
 7. Beginning in 1991, data are available only on a quarterly basis.
- ◇ Based on 480-lb. bales, preliminary price reflects sales as of the 15th; revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- § Bales of 480 lbs.
- † The total may include some miscellaneous wool imports.
- * Series first shown in the July 1990 SURVEY.

Page S-32

1. Annual total includes revisions not distributed to the months.
 2. Production of new vehicles (thous. of units) for Oct. 1991: *passenger cars, 585; trucks and buses, 385.*
 3. Data are reported on an annual basis only.
 4. See note 4 for p. S-19.
 5. Beginning Jan. 1989, shipments of trailer bodies are included with trailer chassis to avoid disclosure of data from individual firms.
 6. Effective with the August 1990 SURVEY, data have been revised back to 1987 and are available upon request.
 7. Data withheld to avoid disclosing figures for individual companies.
- # Total includes backlog for nonrelated products and services and basic research.
- § Domestic comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
- ◇ Courtesy of R.L. Polk & Co.; republication prohibited. Because data for some States are not available, month-to-month comparisons are not strictly valid.
- * Series first shown in the August 1990 SURVEY.
- † Includes some imported trucks over 10,000 lbs. GVW.
- ‡ Excludes railroad-owned private refrigerator cars and private line cars.
- @ Effective with the Mar. 1991 SURVEY, seasonally adjusted retail inventories for trucks and buses have been revised back to 1989, and are available upon request.
