Editor: Kristina L. Maze • *Technical Advisor:* Delores Barber

This issue went to the printer on January 12, 2001.

It incorporates data from the following monthly BEA news releases:

U.S. International Trade in Goods and Services (December 19, 2000),

Gross Domestic Product (December 21), and

Personal Income and Outlays (December 22).

The SURVEY OF CURRENT BUSINESS (ISSN 0039-6222) is published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Subscriptions to the SURVEY OF CURRENT BUSINESS are maintained, and the prices are set, by the U.S. Government Printing Office, an agency of the U.S. Congress.

Subscription and single-copy prices

Second-class mail: \$49.00 domestic, \$61.25 foreign; first-class mail: \$120.00

Single copy: \$25.00 domestic, \$31.25 foreign

To subscribe, call 202-512-1800, or go to <bookstore.gpo.gov>.

To inquire about your subscription, call 202-512-1806. Send changes of address to Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

Postage paid at Washington, DC and at additional mailing offices (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

TABLE OF CONTENTS

Regular features

1 Business Situation

Real GDP increased 2.2 percent in the third quarter of 2000, according to the “final” NIPA estimates; the downward revision of 0.2 percentage point from the “preliminary” estimates primarily reflected a downward revision to exports of goods and services. The prices of gross domestic purchases increased 2.0 percent; the downward revision of 0.3 percentage point primarily reflected a downward revision to the prices of personal consumption expenditures for services. Corporate profits increased \$6.7 billion (0.7 percent at a quarterly rate), to \$970.3 billion, in the third quarter.

9 Annual Input-Output Accounts of the U.S. Economy, 1997

The 1997 input-output (I-O) accounts, the second annual update of the 1992 benchmark I-O accounts, present a detailed picture of how industries interact to provide input to, and take output from, each other. The accounts show that in terms of use, the fastest growing commodities in 1992–97 were computers, electronics, and data-processing services and that in general, this growth can be traced to growth in demand by both intermediate and final users.

47 U.S. International Transactions, Third Quarter 2000

The U.S. current-account deficit increased \$8.8 billion, to \$113.8 billion, in the third quarter of 2000; the increase was mostly accounted for by an increase in the deficit on goods and a decrease in the surplus on services. In the financial account, net recorded inflows decreased \$29.7 billion, to \$123.0 billion; financial inflows decreased more than financial outflows decreased.

Back cover: Schedule of Upcoming BEA News Releases

LOOKING AHEAD

Trends in Personal Consumption Expenditures. An article discussing trends and cyclical developments in personal consumption expenditures for 1959–2000 is scheduled to be published in a forthcoming issue of the SURVEY.

BUSINESS SITUATION

Ralph W. Morris prepared the first section of this article, and Daniel Larkins prepared the section on corporate profits.

REAL gross domestic product (GDP) increased 2.2 percent in the third quarter of 2000, according to the "final" estimates of the national income and product accounts (NIPAs), after increasing 5.6 percent in the second quarter (table 1 and chart 1).¹ The 2.2-percent increase in the third quarter was the smallest increase in 4 years and was well below the 3.7-percent average annual growth rate over the current expansion, which began in the second quarter of 1991.

The growth in real GDP reflected growth in both domestic and foreign demand. Domestic demand (gross domestic purchases) increased 3.0 percent, and foreign demand (exports of goods

and services) increased 13.9 percent (table 2).² The increase in domestic demand reflected increases in consumer spending and business fixed investment

2. Gross domestic purchases—a measure of purchases by U.S. residents regardless of where the purchased goods and services were produced—is calculated as the sum of personal consumption expenditures, gross private domestic investment, and government consumption expenditures and gross investment.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates usually are not additive. Chained (1996) dollar levels and residuals, which measure the extent of nonadditivity in each table, are shown in NIPA tables 1.2, 1.4, and 1.6. Percent changes are calculated from unrounded data. Percent changes in major aggregates are shown in NIPA table S.1. (See "Selected NIPA Tables," which begins on page D-2 in this issue.)

NOTE.—More detailed contributions to percent change in real gross domestic product are shown in NIPA table B.2. Contributions to percent change in major components of real gross domestic product are shown in tables B.3 through B.6.

that were partly offset by decreases in private residential investment, Federal Government spending, and private inventory investment.³ The increase in domestic demand also reflected a 17.0-percent increase in imports of goods and services.

The deceleration in real GDP growth in the third quarter reflected downturns in private inventory investment, in Federal Government spending, and in private residential investment and a sharp deceleration in business investment in equipment

3. In the NIPA's, consumer spending is shown as personal consumption expenditures and government spending is shown as government consumption expenditures and gross investment.

Table 3.—Revisions to Change in Real Gross Domestic Product and Prices, Third Quarter 2000

Gross domestic purchases price index	2.3	2.0	-.3	
GDP price index	1.9	1.6	-.3	

NOTE.—The final estimates for the third quarter of 2000 incorporate the following revised or additional major source data that were not available when the preliminary estimates were prepared.

Personal consumption expenditures: Revised retail sales for September and newly available brokerage services data for the third quarter.

Nonresidential fixed investment: Revised construction put-in-place for August and September, revised manufacturers' shipments of machinery and equipment for September, and newly available unemployment insurance data for the second quarter.

Residential fixed investment: Revised construction put-in-place for August and September and revised sales of new houses for July through September.

Change in private inventories: Revised manufacturing and trade inventories for September.

Exports and imports of goods and services: Revised data on exports and imports of goods for September and revised international transactions data on exports and imports of services for the second and third quarters.

Government consumption expenditures and gross investment: Revised State and local construction put-in-place for August and September.

Wages and salaries: Revised employment, average hourly earnings, and average weekly hours for August and September.

GDP prices: Revised export and import prices for June through September, revised unit-value index for petroleum imports for September, and revised prices of single-family houses under construction for the quarter.

and software. These changes were partly offset by an acceleration in consumer spending and an upturn in State and local government spending.

The final estimate of the change in real GDP is 0.2 percentage point less than the 2.4-percent increase indicated by the "preliminary" estimate reported in the December "Business Situation" (table 3). For 1978–99, the average revision (without regard to sign) from the preliminary estimate to the final estimate was 0.3 percentage point. The downward revision to third-quarter real GDP primarily reflected a downward revision to exports of goods and services, as a downward revision to services more than offset an upward revision to goods. The downward revision to exports of services reflected the incorporation of newly available quarterly data from BEA's international transactions accounts; the upward revision to exports of goods reflected the incorporation of revised Census Bureau data for September.

Real gross domestic purchases increased 3.0 percent, 0.1 percentage point less than the preliminary estimate; in the second quarter, this measure increased 6.5 percent. Real final sales of domestic product increased 2.4 percent, 0.2 percentage point less than the preliminary estimate; in the second quarter, this measure increased 3.9 percent.⁴

The prices of gross domestic purchases increased 2.0 percent, 0.3 percentage point less than the preliminary estimate; in the second quarter, these prices increased 2.1 percent. The downward revision primarily reflected downward revisions to the prices of "other" personal consumption expenditures (PCE) for services, specifically, revisions to the implicit prices of imputed financial charges that resulted from the incorporation of newly available data from the Federal Deposit Insurance Corporation. GDP prices increased 1.6 percent in the third quarter, also 0.3 percentage point less than the preliminary estimate; in the second quarter, GDP prices increased 2.4 percent.

Real disposable personal income (DPI) increased 2.6 percent in the third quarter, 0.2 percentage point more than the preliminary estimate; in the second quarter, real DPI increased 3.7 percent. Current-dollar DPI increased 4.4 percent in the third quarter, 0.2 percentage point less than the preliminary estimate; the downward revision was

4. Final sales of domestic product is calculated as GDP less change in private inventories.

more than accounted for by a downward revision to personal interest income, reflecting the incorporation of newly available data from the Federal Deposit Insurance Corporation. The upward revision to real DPI reflected the downward revision to the implicit price deflator for PCE, which is used to deflate current-dollar DPI.

The personal saving rate—personal saving as a percentage of current-dollar DPI—was -0.2 percent, the same as the preliminary estimate; in the second quarter, the rate was 0.3 percent.

Gross national product (GNP).—In the third quarter, real GNP—goods and services produced by labor and property supplied by U.S. residents—increased 2.1 percent, 0.1 percentage point less than real GDP (table 4).⁵ Income receipts from the rest of the world decreased more than income payments to the rest of the world; both decreases reflected corporate profits.

Real GNP on a command basis, which measures the purchasing power of goods and services produced by the U.S. economy, increased less than real GNP—1.8 percent, compared with 2.1 percent—reflecting a deterioration in the terms of trade.⁶ In the second quarter, real GNP on a command basis increased more than real GNP—5.9 percent, compared with 5.6 percent—reflecting an improvement in the terms of trade. The terms of trade had deteriorated in each of the preceding four quarters.

5. GNP equals GDP plus income receipts from the rest of the world less income payments to the rest of the world.

The national saving rate—gross saving as a percentage of GNP—was 18.5 percent in the third quarter, down slightly from 18.6 percent in the second quarter. The national saving rate has ranged from 18.2 to 18.6 percent in the last six quarters after ranging from 18.7 to 19.0 percent in the preceding five quarters.

Corporate Profits

According to revised estimates, profits from current production increased \$6.7 billion (or 0.7 percent at a quarterly rate) in the third quarter after increasing \$27.3 billion (2.9 percent) in the second quarter (table 5).⁷

Profits from the rest of the world increased \$7.8 billion (5.8 percent) in the third quarter, as pay-

6. In the estimates of command-basis GNP, the current-dollar value of the sum of exports of goods and services and income receipts is deflated by the implicit price deflator (IPD) for the sum of imports of goods and services and income payments.

The terms of trade is a measure of the relationship between the prices that are received by U.S. producers for exports of goods and services and the prices that are paid by U.S. purchasers for imports of goods and services. It is measured by the following ratio, with the decimal point shifted two places to the right: In the numerator, the IPD for the sum of exports of goods and services and of income receipts; in the denominator, the IPD for the sum of imports of goods and services and of income payments.

Changes in the terms of trade reflect the interaction of several factors, including movements in exchange rates, changes in the composition of the traded goods and services, and changes in producers' profit margins. For example, if the U.S. dollar depreciates against a foreign currency, a foreign manufacturer may choose to absorb this cost by reducing the profit margin on the product it sells to the United States, or it may choose to raise the price of the product and risk a loss in market share.

7. Profits from current production is estimated as the sum of profits before tax, the inventory valuation adjustment, and the capital consumption adjustment; it is shown in NIPA tables 1.9, 1.14, 1.16, and 6.16C (see "Selected NIPA Tables," which begins on page D-2 of this issue) as corporate profits with inventory valuation and capital consumption adjustments.

Percent changes in profits are shown at quarterly, not annual, rates.

Table 4.—Relation of Real Gross Domestic Product, Real Gross National Product, and Real Command-Basis Gross National Product

[Seasonally adjusted at annual rates]

1. Exports of goods and services and income receipts deflated by the implicit price deflator for imports of goods and services and income payments.

2. Ratio of the implicit price deflator for exports of goods and services and income receipts

to the corresponding implicit price deflator for imports divided by 100.

NOTE. See note to table 1 for an explanation of chained (1996) dollar series. Levels of these series are shown in NIPA tables 1.10 and 1.11.

ments by U.S. affiliates of foreign corporations decreased more than receipts of earnings from foreign affiliates of U.S. corporations.⁸ Profits of domestic financial corporations increased \$6.1 billion (3.6 percent). Profits of domestic nonfinancial corporations decreased \$7.1 billion (1.1 percent). Unit profits of domestic nonfinancial corporations decreased, as unit costs increased more than unit prices; the real product of these corporations increased 1.1 percent (or 4.4 percent at an annual rate).

The revised estimate of profits from current production is \$0.9 billion lower than the preliminary estimate. Profits of domestic nonfinancial corporations were revised down \$5.3 billion; this revision was largely offset by upward revisions to

profits of domestic financial corporations (\$1.7 billion) and to profits from the rest of the world (\$2.7 billion).

Cash flow from current production, a profits-related measure of internally generated funds available for investment, increased \$20.1 billion after increasing \$35.3 billion.⁹ The ratio of cash flow to nonresidential fixed investment—an indicator of the share of the current level of investment that could be financed by internally generated funds—decreased from 74.3 percent to 74.0 percent, its lowest level since 1986.

Domestic industry profits and related measures.—Domestic industry profits increased \$3.9 billion after increasing \$27.7 billion.¹⁰ Profits of domestic

8. Profits from the rest of the world is calculated as (1) receipts by U.S. residents of earnings from their foreign affiliates plus dividends received by U.S. residents from unaffiliated foreign corporations minus (2) payments by U.S. affiliates of earnings to their foreign parents plus dividends paid by U.S. corporations to unaffiliated foreign residents.

These estimates include capital consumption adjustments (but not inventory valuation adjustments) and are derived from BEA's international transactions accounts.

9. Cash flow from current production is undistributed profits with inventory valuation and capital consumption adjustments plus the consumption of fixed capital.

10. Domestic industry profits are estimated as the sum of corporate profits before tax with the inventory valuation adjustment; they are shown in NIPA table 6.16C (on page D-17 of this issue).

Estimates of the capital consumption adjustment do not exist at a detailed industry level; they are available only for the total financial and total nonfinancial industries.

IVA Inventory valuation adjustment

CCAdj Capital consumption adjustment

nonfinancial corporations decreased \$3.6 billion after increasing \$31.6 billion. Profits of manufacturing, retail trade, and the transportation and utilities group turned down, and profits of wholesale trade and "other nonmanufacturing" increased less than in the second quarter.¹¹ The downturn in manufacturing was largely accounted for by chemicals, petroleum, and electronic equipment. Profits of domestic financial corporations increased \$7.4 billion after decreasing \$3.8 billion.

Profits before tax (PBT) increased \$2.6 billion after increasing \$21.8 billion. For the third quarter, the difference between the increase in PBT and the

increase in profits from current production reflected an increase in the inventory valuation adjustment that was partly offset by a decrease in the capital consumption adjustment.¹² 

12. As prices change, companies that value inventory withdrawals at original acquisition (historical) costs may realize inventory profits or losses. Inventory profits—a capital-gains-like element in profits—result from an increase in inventory prices, and inventory losses—a capital-loss-like element in profits—result from a decrease in inventory prices. In the NIPA's, inventory profits or losses are removed from business incomes by the inventory valuation adjustment (IVA); a negative IVA removes inventory profits, and a positive IVA removes inventory losses.

The capital consumption adjustment converts depreciation of fixed assets valued at historical cost and based on service lives and depreciation patterns specified in the tax code to depreciation valued at replacement cost and based on empirical evidence on the prices of used equipment and structures in resale markets. For more information on depreciation in the NIPA's, see Shelby W. Herman, "Fixed Assets and Consumer Durable Goods: Estimates for 1925–98," *SURVEY OF CURRENT BUSINESS* 80 (April 2000): 17–30.

11. "Other nonmanufacturing" industries include agriculture, mining, construction, and services.

Real Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade, 2000:III

TABLES 1, 2, AND 3 SHOW quarterly and monthly estimates of real inventories, sales, and inventory-sales ratios, respectively. Table 4 shows real manufacturing inventories by stage of fabrication. Real estimates are in chained (1996) dollars.

Data availability

Quarterly estimates for 1996:IV–2000:I of real manufacturing and trade inventories, sales, and inventory-sales ratios and of real manufacturing inventories by stage of fabrication were published in the October 2000 SURVEY OF CURRENT BUSINESS.

The estimates for 1967–99 are available as downloadable files on BEA's Web site at <www.bea.doc.gov>; click on "GDP and related data" and look under "Supplementary estimates," underlying detail estimates for change in private inventories, historical file.

The most recent estimates are also available by subscription from BEA: On diskette as part of the NIPA monthly update (product number NDS-0171, price \$204.00) and as separate monthly printouts (product number NLS-0166, price \$108.00). To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666).

^r Preliminary.

^r Revised.

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.

3. Prior to 1981, inventories and sales of auto and home supply stores are included in motor vehicle dealers. Beginning with 1981, these inventories are included in "other durable goods."

NOTE.—Manufacturing inventories are classified by the type of product produced by the establishment holding the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory.

Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

^a Preliminary.

¹ Revised.

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.

2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.

NOTE.—Manufacturing inventories are classified by the type of product produced by the establishment holding the inventory.

Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Annual Input-Output Accounts of the U.S. Economy, 1997

By Peter D. Kuhbach and Mark A. Planting

ON DECEMBER 18, 2000, the Bureau of Economic Analysis (BEA) released the 1997 annual input-output (I-O) accounts for the U.S. economy. These accounts, which present estimates for 94 industries, are based on the 1992 benchmark I-O accounts and are prepared using 1997 estimates of industry and commodity output and the 1997 estimates of gross domestic product (GDP) from last summer's annual revision of the national income and product accounts.¹ The 1997 I-O accounts are the second annual update of the 1992 benchmark I-O accounts.²

1. For an overview of the I-O accounts, see Ann M. Lawson, "Benchmark Input-Output Accounts for the U.S. Economy, 1992: Make, Use, and Supplementary Tables," Survey of Current Business 77 (November 1997): 36-82; and "Benchmark Input-Output Accounts for the U.S. Economy, 1992: Requirements Tables," Survey 77 (December 1997): 22-47. For information on last summer's annual revision, see Eugene P. Seskin and David F. Sullivan, "Annual Revision of the National Income and Product Accounts," Survey 80 (August 2000): 6-139.

2. Sumiye Okubo, Ann M. Lawson, and Mark A. Planting, "Annual Input-Output Accounts of the U.S. Economy, 1996," Survey 80 (January 2000): 37-86.

Highlights from the release of these accounts include the following:

- In terms of use, the fastest growing commodities in 1992-97 were among those that are frequently associated with high technology—computers, electronics, and data-processing services.
- The use of commodities that are often associated with outsourcing—data-processing services and other business and professional services—also grew rapidly in 1992-97.
- The I-O accounts now include a new table that provides total requirements multipliers on an industry-by-industry basis; this information is useful for analyzing industry-to-industry linkages.

The I-O accounts provide estimates of domestic production by commodity and industry, the export and import of commodities (goods and services), the use of commodities by each industry,

Table A.—The Use of Commodities by Industries, 1997
[Millions of dollars]

	Industries ¹										Final uses (GDP)							Total commodity output ⁴

¹ The input-output (I-O) accounts use two classification systems, one for industries and another for commodities, but both systems generally use the same I-O numbers and titles.

² "Other" consists of government enterprises, general government industry, household industry, and the inventory valuation adjustment.

³ Value added includes: compensation of employees, indirect business tax and nontax liability, and other value added. "Other value added" consists of the following national income and product accounts components of gross domestic income: Consumption of fixed capital, net interest, proprietors' income, corporate profits, rental income of persons, business transfer payments, and subsidies less current surplus of government enterprises.

⁴ Detail may not sum to totals due to rounding.

85	Inventory valuation adjustment	-7,982	690	10,751						

NOTE.—Total consumption of commodities is equal to commodity output plus imports less the change in private inventories. The change in private inventories is not shown separately in this table.

the commodity composition of GDP (final demand), and the industry distribution of value added. The annual I-O accounts are used in a variety of analytical and statistical contexts, including studies of interindustry relationships within the economy and as the basis for developing satellite accounts on particular aspects of economic activity.

The 1997 annual I-O tables

The full 1997 annual I-O accounts are presented in eight tables.³ Two make tables, one that is based on I-O definitions of industry inputs (table 1) and an alternative that is based on the Standard Industrial Classification (SIC), show the commodities produced by each industry; two use tables, one on the I-O basis (table 2) and one on the SIC basis, show the commodities that are consumed by each industry.⁴ (Table A provides a summary version of the use table.)

3. Tables 1, 2, and 8 are at the end of this article. All eight tables are available electronically; see the box "Data Availability" on page 15.

4. The alternative tables conform more closely to the current SIC establishment-based data collection system by showing the primary and secondary products in the industries that produce them. As a result, the industry definitions, which are used to determine the columns of the use table and the rows of the make table, may differ from those used in the traditional I-O tables.

Four requirements tables are derived from the make and use tables. The direct requirements table shows the amount of a commodity that is required by an industry to produce a dollar of that industry's output. The three total requirements tables show the production that is required, directly and indirectly, to meet purchases from final demand. The new table "Industry-by-Industry Total Requirements" (table 8) presents these total requirements with final-demand purchases classified by industry. This presentation is frequently used in I-O analysis when data on purchases are available only as purchases from industries rather than as purchases of commodities; it is also used to analyze industry-to-industry interdependencies or "linkages"—for example, the purchases of one industry's output by all other industries or the purchases of all other industries' output by one industry.

The presentation of the annual I-O tables is generally the same as that of the benchmark I-O tables, but the information is less detailed. The annual I-O tables present summary estimates for 94 industries, while the benchmark I-O tables present more detailed estimates for 498 industries.⁵ The

Table C.—Commodity Consumption by Major Sector 1992, 1996, and 1997

NOTE.—Total consumption is defined as total domestic commodity output plus imports less change in private inventories, and it is equal to the sum of total intermediate use, personal consumption expenditures, gross private fixed investment, exports, and government purchases.

annual use table presents 11 categories of final uses, while the benchmark use table presents 203 categories.⁶ The annual use and total direct requirements tables present estimates of total value added by industry, while the corresponding benchmark tables also decompose the total value into detailed estimates of value added for compensation of employees, indirect business tax and other nontax liability, and other value added.

The estimates of commodity output and industry output in the make and use tables and the estimates of final uses in the use table are based on annual source data. Most of the other estimates are based on updated relationships from the 1992 benchmark I-O accounts.⁷

Uses of the I-O accounts

The I-O accounts are an important tool for economic analysis because they show the interdependence among producers and consumers in the U.S. economy. The accounts show the commodity composition of GDP (final demand), and the

commodities used by the business sector to produce GDP (intermediate demand). Changes in the use of commodities provide information about changes in the structure of the economy and about the effect of these changes on production and economic growth. For example, a recent study of the contribution of computer and data-processing services to economic growth used I-O tables for 1972–96.⁸ Another study used the same set of tables to evaluate changes in the level of interindustry linkages and the effect of international trade on those linkages; the study shows that U.S. domestic industry interdependencies decreased over the period, partly as the result of declining manufacturing production and increased import penetration.⁹

Changes in the composition of total consumption, 1992–97

The series of I-O accounts can be used for comparisons of the structure of the U.S. economy over time. Changes in the use of commodities by the

5. Detailed 1997 I-O estimates for 498 industries have been prepared for use in research (see the box "Data Availability").

6. The benchmark I-O tables include 136 categories for personal consumption expenditures, 26 categories for structures, and 30 categories for private fixed investment and software.

7. "Final uses" in the I-O accounts are the same as the "product-side" components of GDP in the NIPAs.

8. Laurence R. Klein postulates that I-O measures of deliveries of computer and data-processing services to other intermediate sectors and to final-demand sectors indicate the diffusion of information technology; Laurence R. Klein, "Sustainability and Global Reach of IT" (paper presented at the WEFA Annual Symposium on International Issues, New York, October 2000).

9. Jiemen Guo and Mark A. Planting, "Using Input-Output Analysis to Measure U.S. Economic Structural Change Over 25 Years" (paper presented at the 13th International Conference on Input-Output Techniques, Macerata, Italy, August 21–26, 2000).

economy, both domestically and for export, are measured by changes in the composition of total consumption (table B).¹⁰ Comparisons over time of the consumption of commodities by sector provide indications of where structural changes are occurring (table C).

Over 1992–97, total commodity consumption grew at an average annual rate of 6.4 percent (table D). The consumption of services commodities (6.6 percent) grew faster than that of goods commodities (6.1 percent). Among the major commodity groups, the fastest rates of change were in “services” (7.3 percent) and finance, insurance and real estate (7.1 percent). Over the last year of the period, 1996–97, the fastest growth was in finance, insurance, and real estate (9.3 percent), transportation, communication, and utilities (8.8 percent), construction (8.8 percent), and “services” (8.2 percent).

10. Total consumption is defined as total domestic commodity output plus imports less change in private inventories, and it is equal to the sum of total intermediate use and the four final-use sectors—personal consumption expenditures, gross private fixed investment, exports, and government purchases.

Table D.—Commodity Consumption Growth Rates by Major Commodity Group, 1992–97

Commodity	Consumption average annual rate of growth (percent)	
	1992–97	1996–97
All commodities	6.4	6.6
Goods commodities	6.1	6.3
Agriculture, forestry, fisheries	5.1	3.7
Mining	3.6	0.8
Construction	6.8	8.8
Manufacturing	6.1	6.2
Services commodities	6.6	6.8
Transportation, communication, and utilities	6.8	8.8
Wholesale and retail trade	6.5	2.6
Finance, insurance, and real estate	7.1	9.3
Services	7.3	8.2
Special industries	4.4	4.8

The 15 commodities that accounted for at least 1 percent of total supply in 1997 and that grew faster than the overall commodity average in 1992–97 are shown in table E. These commodities included the following “high technology” commodities—computer and office equipment, electronic components and accessories, “communications, except radio and TV,” and “computer and data-processing services, including own-account software.” Consumption of these four commodities grew 12.0 percent, almost twice the rate of growth of all commodities, and the group’s share of total consumption grew from 5 percent in 1992 to 6 percent, or \$969.3 billion, in 1997.¹¹

Among these commodities were at least two services that are often associated with “outsourcing”—other business and professional services and, again, “computer and data-processing services including own-account software.” Consumption of these two commodities grew at an average annual rate of 11.6 percent in 1992–97 and 14.4 percent in 1996–97. These commodities accounted for 5 percent, or \$841.2 billion, of total consumption in 1997, up from 4 percent in 1992.

These commodities also include finance, which grew at an average annual rate of growth of 10.4 percent over 1992–97 and accounted for 4.1 percent of total consumption in 1997. This commodity includes banking, credit agencies other than banking, and security and commodity brokers. Most of the above-average growth in finance was accounted for by rapid growth in the use of security and commodity brokers services—particularly

11. In real terms, the growth rates of these commodities is much faster because of the declining prices of computers, electronic components, telecommunications services, and software.

Table E.—Commodities with Fastest Growing Consumption, 1992–97

Commodity number	Description	Consumption average annual rate of growth (percent)		1997	
		1992–97	1996–97	Consumption (millions of dollars)	Percent of total commodity consumption
11	New construction, including own-account construction	7.0	8.8	640,725	4.1
12	Maintenance and repair construction, including own-account construction	6.4	8.8	303,583	1.9
32	Rubber and miscellaneous plastics products	7.2	6.4	175,471	1.1
51	Computer and office equipment	11.3	5.4	164,058	1.0
57	Electronic components and accessories	14.6	8.6	185,465	1.2
59A	Motor vehicles—passenger cars and trucks	8.2	9.2	306,946	2.0
59B	Truck and bus bodies, trailers, and motor vehicle parts	9.2	6.0	160,380	1.0
66	Communications, except radio and TV	8.8	9.3	314,228	2.0
69A	Wholesale trade	7.3	4.0	778,600	5.0
70A	Finance	10.4	15.2	640,239	4.1
70B	Insurance	8.1	11.4	343,012	2.2
73A	Computer and data processing services, including own-account software	14.8	20.1	305,568	1.9
73C	Other business and professional services, except medical	9.9	11.4	535,663	3.4
75	Automotive repair and services	8.9	6.6	251,974	1.6
76	Amusements	9.2	8.7	191,252	1.2

securities commissions, underwriting fees, and other services.

For the six aforementioned commodities, the rapid growth in consumption can be traced to growth in demand by both intermediate and final users (table F). The growth in the consumption of electronic components and accessories and "other business and professional services, except medical" was due to growth in intermediate demand. Final users were primarily responsible for the increased consumption of computer and office equipment. Growth in the consumption of the other three commodities was the result of growth in demand from both sources.

Computer and office equipment.—Nearly 90 percent of computer and office equipment was consumed by the intermediate, gross private fixed investment (GPFI), and export sectors, and both the GPFI and export sectors grew at rates of at least 12 percent. In addition, personal consumption expenditures (PCE), which accounted for only 6.9 percent of total consumption, grew 16.2 percent.

Electronic components and accessories.—Nearly four-fifths of all electronic components and accessories flowed to intermediate uses, and virtually all of the remainder was exported. Intermediate use grew 13.9 percent, and exports grew 19.3 percent.

Communications, except radio and TV.—Ninety percent of "communications, except radio and TV" was consumed by the intermediate and PCE sectors, and another 5.7 percent was consumed by the government sector. Consumption by all three sectors grew between 8 and 10 percent.

Data Availability

The estimates for 94 industries at the input-output (I-O) two-digit level, including alternative estimates of the make and use tables on an approximate 1987 Standard Industrial Classification (SIC) basis and a discussion of the matrix algebra underlying the derivation of the tables, are available on BEA's Web site. (Estimates for 498 industries at the I-O six-digit level are also available; these estimates are less reliable, but they are made available for research that requires a high level of detail.) Go to <www.bea.doc.gov>, click on "Industry and wealth data," and look under "Input-Output data."

The two-digit I-O estimates are also available for \$20 on diskette—product number NDN-0271. To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

Computer and data-processing services, including own-account software.—Nearly 95 percent of "computer and data-processing services, including own-account software" was used by the intermediate, GPFI, and government sectors; the intermediate and GPFI sectors had a combined growth rate of more than 16 percent. In addition, PCE (primarily for prepackaged software), which accounted for only 2.8 percent of total consumption, grew 28.2 percent.

Other business and professional services, except medical.—Over four-fifths of "other business and professional services, except medical" was consumed in intermediate uses, and consumption by this sector grew 10.8 percent.

Table F.—Consumption Growth Rates by Sector for Selected Commodities 1992–97

GPFI: Gross private fixed investment

Acknowledgments

Mark A. Planting supervised the preparation of the 1997 annual input-output (I-O) estimates. Sumiye Okubo, Associate Director for Industry Accounts, and Ann M. Lawson, Chief of the Industry Economics Division, provided overall guidance. Felicia V. Candela, Peter D. Kuhbach, Tameka R. Lee, Greg R. Linder, Sherlene K. S. Lum, Demian J. McGarry, Kimberly A. Mourey, Brian C. Moyer, William H. Nicolls IV, Robert S. Robinowitz, and Regina K. Villasmil prepared the estimates. Karen J. Horowitz provided valuable assistance. Jiemin Guo of the Bureau of Transportation Statistics, U.S. Department of Transportation, also contributed to the preparation of the estimates.

Finance.—The intermediate and PCE sectors accounted for more than 90 percent of total consumption, and these two sectors averaged over 10-percent growth.

Methodology for the 1997 annual I-O accounts

The methodology used to prepare the 1997 annual I-O accounts is similar to that used for the 1996

annual I-O accounts. These accounts are based on the 1992 benchmark I-O accounts and on the most recently revised and updated estimates from the NIPA's. The annual estimates are based on less comprehensive and less detailed source data; for the annual estimates for which data were unavailable, the relationships from the 1992 benchmark accounts were extrapolated to 1997.

The annual I-O estimates are prepared in five steps: (1) The output total for each industry and commodity is calculated; (2) the commodity composition of intermediate inputs for each industry is estimated; (3) the domestic supply of each commodity is estimated; (4) the commodity compositions of the GDP expenditure components for PCE, gross private fixed investment, and government consumption and investment expenditures are derived; and (5) the table is balanced.¹²

An appendix and tables 1, 2 and 8 follow. 

12. For a more complete description of the methodology see Okubo, Lawson, and Planting, 42–46.

Appendix.—Classification of Industries in the Annual Input-Output Accounts

[An asterisk preceding a Standard Industrial Classification (SIC) code indicates that the SIC industry is included in more than one I-O industry.]

53	Electrical industrial equipment and apparatus	361, 362	84	Household industry	(6)
54	Household appliances	363	85	Inventory valuation adjustment	(7)

1. The SIC assigns codes to activities regardless of whether the establishment is owned by private firms or government agency. In the I-O accounts, SIC codes are used only to classify private activities.

2. Noncomparable imports include imported services that are not commercially produced in the United States, and goods and services that are produced abroad and used abroad by U.S. residents for example, U.S. Federal Government defense spending abroad.

3. Scrap is a secondary product of many industries, and used goods are sales and purchases typically between final uses. Industry output is zero because there is no primary producing industry. The sales are shown as negative values in the use table.

4. Industry output is defined as the compensation of employees and consumption of fixed capital of general government agencies. The compensation of employees engaged in construction work is included in construction. The compensation of employees engaged in the production of own-account software is included in computer and data processing services.

5. The commodity entries include adjustments among PCE and government expenditures to eliminate counting the expenditures by foreign residents in both exports and PCE or government expenditures.

6. Industry output is defined as the compensation of domestic household workers.

7. The inventory valuation adjustment removes inventory profits and losses from business income.

Table 1.—The Make of Commodities

Table 8.—Industry-by-industry
 [Total requirements, direct and indirect, per dollar]

Industry number	Each entry represents the output required, directly and indirectly, of the industry named at the beginning of the row for each dollar of delivery to final demand of the industry named at the head of the column.	Livestock and livestock products	Other agricultural products	Forestry and fishery products	Agricultural, forestry, and fishery services	Metallic ores mining	Coal mining	Crude petroleum and natural gas	Nonmetallic minerals mining	New construction, including own-account construction

Table 8.—Industry-by-industry
[Total requirements, direct and indirect, per dollar]

Industry number	Each entry represents the output required, directly and indirectly, of the industry named at the beginning of the row for each dollar of delivery to final demand of the industry named at the head of the column.	Plastics and synthetic materials	Drugs	Cleaning and toilet preparations	Paints and allied products	Petroleum refining and related products	Rubber and miscellaneous plastics products	Footwear, leather, and leather products	Glass and glass products	Stone and clay products	Primary iron and steel manufacturing

Table 8.—Industry-by-Industry
[Total requirements, direct and indirect, per dollar]

Industry number	Each entry represents the output required, directly and indirectly, of the industry named at the beginning of the row for each dollar of delivery to final demand of the industry named at the head of the column.	Electrical industrial equipment and apparatus	Household appliances	Electric lighting and wiring equipment	Audio, video, and communication equipment	Electronic components and accessories	Miscellaneous electrical machinery and supplies	Motor vehicles (passenger cars and trucks)	Truck and bus bodies, trailers, and motor vehicles parts	Aircraft and parts	Other transportation equipment
Industry number		53	54	55	56	57	58	59A	59B	60	61

Table 8.—Industry-by-Industry
[Total requirements, direct and indirect, per dollar]

Industry number	Each entry represents the output required, directly and indirectly, of the industry named at the beginning of the row for each dollar of delivery to final demand of the industry named at the head of the column.	Retail trade	Finance	Insurance	Owner-occupied dwellings	Real estate and royalties	Hotels and lodging places	Personal and repair services (except auto)	Computer and data processing services	Legal, engineering, accounting, and related services
	Industry number	69B	70A	70B	71A	71B	72A	72B	73A	73B

An Ownership-Based Framework of the U.S. Current Account, 1982–98

IN THIS REPORT, the Bureau of Economic Analysis (BEA) updates its supplemental, ownership-based framework of the current-account portion of the U.S. international transactions (balance of payments) accounts.¹ This presentation was developed in the first half of the 1990's in response to interest in a supplement to the existing international transactions presentation that would provide additional information about ownership.² This interest arose from the increased interdependence of world economies that occurred as multinational companies (MNC's) have assumed a more prominent role in international markets by integrating production processes on a global scale and as commercial agreements have increasingly covered not only cross-border sales but also sales through locally established affiliates.

The globalization of economic activity can be viewed in a number of ways. From the perspective of MNC's, worldwide sales are aggregated irrespective of the location of the point of sale—for example, irrespective of whether the sale originated from the plant of a company in California or from a plant of that company in Ireland. In terms of the impact on the U.S. economy—that is, from the traditional balance-of-payments perspective—the location of the seller is significant; moreover, for sales by affiliates, factor costs—such as labor and capital—and other costs must be subtracted from sales. Like the traditional international transactions accounts, the ownership-based framework presented in this report is organized by residency, but it broadens the definition of the balance on trade in goods and services to include net receipts of income by MNC's from the sales and purchases by their affiliates. The ownership-based account is fully consistent conceptually with the

current account of the traditional international transactions accounts and can be viewed as a “satellite” of those accounts.³

Highlights of this presentation for 1998 follow:

- Worldwide sales by U.S. companies to foreign persons exceeded sales by foreign companies to U.S. residents by \$363 billion. Sales by the U.S. companies to foreign persons were \$3,173 billion; \$933 billion were from cross-border sales (exports of goods and services), and \$2,240 billion were sales by foreign affiliates. Sales by the foreign companies to U.S. residents were \$2,810 billion; \$1,100 billion were from cross-border sales (imports of goods and services), and \$1,710 billion were sales by U.S. affiliates.
- After deducting costs, such as those for labor, capital, and purchased goods and services, the income to U.S. companies from the sales by their foreign affiliates was \$106 billion; this income combined with the value of U.S. goods and services exports yields a total value of trade accruing to the U.S. economy of \$1,039 billion. After deducting costs, the income to foreign companies from the sales by their U.S. affiliates was \$39 billion; this income combined with the value of U.S. goods and services imports yields a total value of U.S. trade accruing to foreign economies of \$1,139 billion. The resulting balance of this ownership-based measure is –\$99 billion, compared with the –\$167 billion balance on trade of goods and services using the traditional balance-of-payments framework based on location of production.

The ownership-based estimates for 1982–97 have been revised to incorporate the results of last summer's annual revision of the U.S. international transactions accounts, and the estimates for 1997 have been revised to incorporate the latest financial and operating data of

1. For a review of the sources and methods used to prepare the supplemental estimates, see Obie G. Whichard and Jeffrey H. Lowe, “An Ownership-Based Disaggregation of the U.S. Current Account, 1982–93,” *SURVEY OF CURRENT BUSINESS* 75 (October 1995): 52–61. For a general review of the issues relating to ownership relationships in international transactions, see J. Steven Landefeld, Obie G. Whichard, and Jeffrey H. Lowe, “Alternative Frameworks for U.S. International Transactions,” *SURVEY* 73 (December 1993): 50–61.

2. Among those calling for more information on ownership was a National Academy of Sciences study panel. See Anne Y. Kester, ed., *Behind the Numbers: U.S. Trade in the World Economy*, National Research Council, Panel on Foreign Trade Statistics (Washington, DC: National Academy Press, 1992).

3. According to the international *System of National Accounts*, satellite accounts are accounts that augment the central national accounts by “expanding the analytical capacity of national accounting for selected areas...in a flexible manner, without overburdening or disrupting the central system”; they may introduce additional information, alternative accounting frameworks, or “complementary or alternative concepts,” while maintaining linkages to the central accounts. See Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations, and World Bank, *System of National Accounts, 1993* (Brussels/Luxembourg, New York, Paris, and Washington, DC, 1993): 489.

Note.— Jeffrey H. Lowe prepared this report.

foreign-owned affiliates in the United States and of U.S.-owned affiliates abroad; new estimates are presented for 1998. Among the improvements that were incorporated last summer into the annual revision of the U.S. international transactions accounts were the following: Revised estimates of direct investment income receipts and payments for 1982 forward that reflect revised estimates of the current-cost adjustment, which incorporated revised estimates of prices for equipment and structures; revised estimates of "other private services" receipts for 1986 forward that reflect the use of improved estimates of international expenditures of international organizations in the United States and newly developed estimates of expenditures of temporary nonagricultural workers in the United States; and revised estimates of "other private services" receipts and payments for 1997 forward that reflect revisions to financial services receipts and payments.⁴

In the standard presentation of the current-account estimates, U.S. sales (exports) to foreigners (line 3 of table 1) consist only of the sales of goods and services that are delivered to foreign markets directly from the United States. In the ownership-based presentation, U.S. international "sales" (line 2) also includes the income that is received by U.S. companies from their affiliates abroad (line 8). Similarly, in the ownership-based presentation, U.S. international "purchases" (line 22) includes the income that is paid by foreign-owned firms in the United States to their foreign owners as well as the payments for the goods and services that are directly delivered to the U.S. market from abroad. These additions, which raise the value of total U.S. "sales" and "purchases," provide a more comprehensive basis for assessing the effect of net "cross-border" sales on the U.S. economy.

In the table, the balance on goods, services, and net

receipts from sales by affiliates (line 43) shows the net result of the active participation of U.S. companies, including U.S. affiliates of foreign owners, in international markets. Each year, this balance has been in smaller deficit (or in surplus) than either the balance on goods and services or the balance on current account; in 1998, this balance was -\$99.2 billion, compared with the balance on goods and services of -\$166.9 billion. The balance was smaller because U.S. parents' receipts of income from their foreign affiliates has been greater than U.S. affiliates' payments of income to their foreign parents.

Additional information on ownership relationships is provided by the disaggregation of trade in goods and in services into trade between affiliated parties (that is, trade within MNC's) and trade between unaffiliated parties. Trade within MNC's is disaggregated into trade between U.S. parent companies and their foreign affiliates and trade between U.S. affiliates of foreign companies and their foreign parent groups. For receipts and payments of direct investment income, the table shows how the income is derived from the production and sales by affiliates.⁵ To highlight the links between the income and the activities that produce it, the income is designated "net receipts" or "net payments" of direct investment income resulting from sales by affiliates.

The addenda to table 1 provide supplemental information on the U.S. content and the foreign content of affiliates' output; this information can be used to describe affiliate operations and analyze the role of direct investment in supplying international markets. For both foreign and U.S. affiliates, output sold (or added to inventory) is broken down between U.S. content and foreign content; the source of the content is then broken down between the affiliates' own value added and other content.

4. See Christopher L. Bach, "U.S. International Transactions, Revised Estimates for 1982-99," *SURVEY 80* (July 2000): 70-77.

5. These detailed estimates can only be provided for nonbank affiliates.

U.S. International Transactions, Third Quarter 2000

By Douglas B. Weinberg

THE U.S. current-account deficit—the combined balances on trade in goods and services, income, and net unilateral current transfers—increased to \$113.8 billion in the third quarter of 2000 from \$105.0 billion (revised) in the second quarter (table A, chart 1).¹ The increase was mostly accounted for by an increase in the deficit on goods, as imports increased more than exports, and by a decrease in the surplus on services, as services payments increased more than services receipts.

In the financial account, net recorded financial inflows—the difference between changes in U.S.-

owned assets abroad and changes in foreign-owned assets in the United States—were \$123.0 billion in the third quarter, down from \$152.7 billion (revised) in the second. Financial inflows for foreign-owned assets in the United States decreased more than financial outflows for U.S.-owned assets abroad.

The statistical discrepancy—errors and omissions in recorded transactions—was a negative \$9.4 billion in the third quarter and a negative \$47.9 billion in the second.

The following are highlights for the third quarter of 2000:

- Exports of goods increased strongly for the second consecutive quarter.
- Petroleum imports increased in value for the

^r Revised.

^p Preliminary.

sixth consecutive quarter; the third-quarter increase was attributable to a continued rise in petroleum prices.

- Both receipts and payments of income decreased after increasing strongly for five consecutive quarters.
- Net foreign purchases of U.S. corporate bonds increased to a record level, and net foreign purchases of U.S. stocks rose sharply.
- Net financial inflows for foreign direct investment in the United States fell sharply, but nonetheless remained very strong.

U.S. dollar in exchange markets

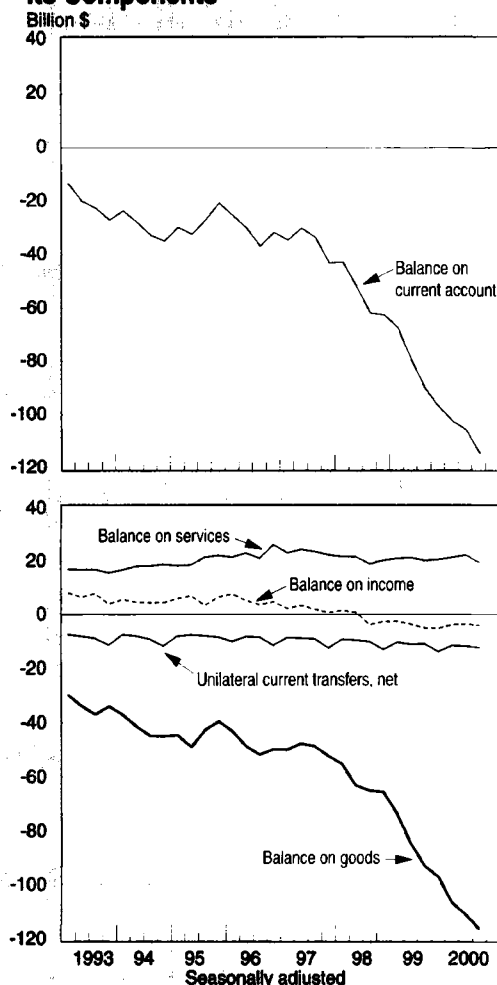

In the third quarter, the U.S. dollar appreciated 2 percent on a nominal, trade-weighted quarterly average basis against the group of seven major cur-

rencies that are widely traded in international markets (table B, chart 2).

The U.S. dollar appreciated 3 percent against the euro; since the euro's inception in January 1999, the dollar has appreciated 24 percent on a quarterly average basis. In the third quarter, the dollar appreciated steadily for most of the quarter, boosted by indications that the U.S. economy was growing moderately and that core U.S. inflation was not accelerating despite a continued increase in oil prices. U.S. monetary authorities left the Federal funds rate unchanged in the quarter after raising the rate 175 basis points to 6.5 percent from June 1999 to May 2000. The dollar was also boosted by indications that euro-area inflation might be accelerating, which prompted the European Central Bank to increase the interest rate on short-term refinancing operations to 4.5 percent. The euro depreciated sharply in the first 2 weeks of September; in response, monetary authorities in the euro area, the United States, Japan, the United Kingdom, and Canada intervened in currency markets on September 22 by purchasing euros,

and as a result, the euro regained some of its lost value by the end of quarter.

The U.S. dollar appreciated 1 percent against the yen amid uncertainty about Japanese economic conditions. In response to some indications that the Japanese economy was gaining strength, Japanese monetary authorities increased the overnight call rate to 0.25 percent in mid-August from the near-zero rate that had prevailed for more than a year. Thereafter, concerns arose that the tightening of monetary policy might hinder the recovery of the Japanese economy.

Against other currencies, the U.S. dollar appreciated 4 percent against the British pound and 2 percent against the Swiss franc; since the beginning of the year, the dollar has appreciated 10 percent against the pound and 11 percent against the Swiss franc. The U.S. dollar was unchanged against the Canadian dollar, and it depreciated 2 percent against the Mexican peso.

Current Account

Goods and services

The deficit on goods and services increased to \$96.5 billion in the third quarter from \$88.6 billion in the second. The increase was accounted for by an increase in the deficit on goods and a decrease in the surplus on services.

Goods.—The deficit on goods increased \$5.2 billion, to \$115.4 billion, in the third quarter. Im-

ports increased more than exports.

Exports.—Exports increased \$8.6 billion, or 4 percent, to \$200.4 billion in the third quarter. Quantities increased 4 percent, and prices were unchanged (table C).² The value of both agricultural products and nonagricultural products increased.

The value of exports has increased 22 percent since the first quarter of 1999 (chart 3). The increase, which was almost entirely accounted for by rising quantities, was propelled mostly by capital

2. Quantity (real) estimates are calculated using a chain-type Fisher formula with annual weights for all years and quarterly weights for all quarters. Real estimates are expressed as chained (1996) dollars. Price indexes (1996=100) are also calculated using a chain-type Fisher formula.

Revisions to the Second-Quarter 2000 Estimates

As a result of incorporating newly available, more complete source data, the international transactions accounts estimates for the second quarter of 2000 are revised from the preliminary estimates that were published in the October 2000 SURVEY OF CURRENT BUSINESS.

The current-account deficit for the second quarter was revised to \$105.0 billion from \$106.1 billion. The goods deficit was unrevised at \$110.2 billion, the services surplus was revised to \$21.6 billion from \$21.0 billion, the deficit on income was revised to \$4.1 billion from \$4.5 billion, and net unilateral current transfers were unrevised at a negative \$12.3 billion. Net recorded financial inflows were revised to \$152.7 billion from \$149.1 billion.

1. For more information on the nominal and real indexes of the foreign exchange value of the U.S. dollar, see *Federal Reserve Bulletin*, vol. 84 (October 1998): 811-18.

2. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of U.S. trading partners, including the currencies of the euro-area countries, Australia, Canada, Japan, Sweden, Switzerland, United Kingdom, Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

3. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that circulate widely outside the country of issue, including the currencies of euro-area countries, Australia, Canada, Japan, Sweden, Switzerland, and the United Kingdom. The weight for each currency is its broad-index weight divided by the sum of the broad-index weights for all of the currencies included in the major currency index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

4. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that do

not circulate widely outside the country of issue, including the currencies of Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. The weight for each currency is its broad-index weight divided by the sum of the broad-index weights for all of the currencies included in the other important trading partners index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.

5. Data: Federal Reserve Board. Monthly and quarterly average rates. Indexes prepared by BEA.

6. The euro area includes Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain. Exchange rates (but not index values with January 1999=100) for the individual euro-area currencies can be derived from the euro exchange rate by using the fixed conversion rates (in currencies per euro) as shown below: 13.7603 Austrian schillings; 40.3399 Belgian francs; 5.94573 Finnish markkas; 6.55957 French francs; 1.95583 German marks; 787564 Irish pounds; 1936.27 Italian liras; 40.3399 Luxembourg francs; 2.20371 Netherlands guilders; 200.482 Portuguese escudos; 166.386 Spanish pesetas.

goods, which contributed 11 percentage points to the rise, and by industrial supplies and materials, which contributed 6 percentage points. Through the first quarter of 1999, exports had decreased in five out of six quarters, partly because of financial crises and sharply falling demand in some foreign countries.

In the third quarter of 2000, nonagricultural exports increased \$7.8 billion, or 4 percent, to \$186.4 billion; quantities increased 4 percent, and prices were unchanged. Most of the increase in value was attributable to a rise in capital goods, reflecting strong increases in most capital goods commodities; the largest increases were in semiconductors, in other industrial, agricultural, and service industry machinery, and in computers, peripherals, and parts. Nonagricultural industrial supplies and materials rebounded, mostly as a result of increases in chemicals and in energy products. Consumer goods accelerated as a result of a rebound in durable goods, and automotive products edged higher.

Agricultural exports increased \$0.8 billion, or 6 percent, to \$14.0 billion; quantities increased 9 percent, and prices decreased 3 percent. In value, most of the increase was accounted for by increases in soybeans, in meat products and poultry, and in vegetables, fruits, nuts, and preparations.

Imports.—Imports increased \$13.8 billion, or 5 percent, to \$315.8 billion in the third quarter. Quantities increased 3 percent, and prices increased 2 percent (table C). The value of both

petroleum products and nonpetroleum products increased.

Since the first quarter of 1999, the value of imports has increased 33 percent, the largest increase over six quarters since the mid-1980's. Largely as a result of rapidly rising petroleum prices, imports of petroleum products tripled, and they contributed 9 percentage points to the increase in total imports. Nonpetroleum products also rose strongly, and in contrast to petroleum products, the increase resulted almost entirely from rising quantities. Capital goods contributed 9 percentage points to the increase in total imports, consumer goods contributed 6 percentage points, nonpetroleum industrial supplies and materials contributed 4 percentage points, and automotive products contributed 4 percentage points.

In the third quarter of 2000, nonpetroleum imports increased \$11.4 billion, or 4 percent, to \$284.1 billion; quantities increased 4 percent, and prices were unchanged. In value, most major commodity categories increased strongly. The increase in capital goods was largely attributable to a surge in semiconductors, to a strong rise in computers, peripherals, and parts, and to a sizable increase in civilian aircraft, engines, and parts. Nonpetroleum industrial supplies and materials rebounded, partly as a result of a step-up in chemicals and of increases in nonferrous metals and in paper and paper base stocks. Automotive products accelerated as a result of a strong increase in passenger cars, and consumer goods slowed sharply.

^p Preliminary.

^r Revised.

1. Because chain indexes use weights of more than one period, the corresponding chained dollar estimates are usually not additive.

Petroleum imports increased \$2.4 billion, or 8 percent, to \$31.7 billion. The increase was attributable to a rise in prices, to an average of \$28.76 per barrel from \$26.12 per barrel. Average petroleum prices have increased 177 percent since the first quarter of 1999, reaching the highest level since the fourth quarter of 1990. In the third quarter of 2000, the average number of barrels imported daily decreased to 12.08 million from 12.26 million in the second.

CHART 3

U.S. Goods Exports and Imports

U.S. Department of Commerce, Bureau of Economic Analysis

Balances by area.—The deficit on goods with China increased \$5.1 billion, to \$24.6 billion, the largest deficit with any single country.³ The deficit with Asia excluding China and Japan increased \$3.0 billion, to \$27.7 billion. In contrast, the deficits with several other areas and countries decreased. The deficit with “Latin America and Other Western Hemisphere” decreased \$1.9 billion, to \$8.7 billion, largely as a result of a decline in the deficit with Mexico and a rise in the surplus with Brazil. The deficit with Japan decreased \$1.3 billion, to \$19.8 billion.

Services.—The surplus on services decreased \$2.7 billion, to \$18.9 billion, in the third quarter. Receipts edged up to \$74.3 billion from \$74.2 billion, and payments increased to \$55.4 billion from \$52.6 billion.

Travel receipts increased to \$21.6 billion from \$21.4 billion. The increase was more than accounted for by an increase in receipts from overseas visitors to the United States. Travel payments increased to \$16.7 billion from \$16.0 billion. The increase was largely attributable to an increase in payments by U.S. travelers to countries overseas.

“Other” transportation receipts increased to \$7.6 billion from \$7.4 billion, mostly as a result of an increase in freight receipts. “Other” transportation payments increased to \$10.5 billion from \$9.9 billion as a result of an increase in freight payments. The sizable increases in “other” transportation payments over the past six quarters have partly reflected the strong increases in the volume of U.S. goods imports. In addition, freight payments have been boosted in the last three quarters by increases in ocean freight rates.

Receipts for “other” private services decreased to \$26.3 billion from \$26.5 billion as a result of a decline in affiliated services receipts. In unaffiliated services, increases in receipts for most types of services more than offset a drop in receipts for financial services. Payments for “other” private services increased to \$13.3 billion from \$12.9 billion, mostly as a result of a rise in net insurance payments, which are premiums paid less losses recovered.

3. Seasonally adjusted estimates for exports for areas and countries are derived by applying seasonal factors for total U.S. agricultural and nonagricultural exports to the unadjusted agricultural and nonagricultural exports for areas and countries and then summing the seasonally adjusted estimates. Seasonally adjusted estimates for imports for areas and countries are derived by applying seasonal factors for total U.S. petroleum and nonpetroleum imports to the unadjusted petroleum and nonpetroleum imports for areas and countries and then summing the seasonally adjusted estimates. (The seasonal factors are derived from the seasonal adjustment of U.S. exports and U.S. imports by five-digit end-use commodity category.)

Income

The deficit on income increased to \$4.5 billion in the third quarter from \$4.1 billion in the second. Income receipts decreased to \$86.8 billion from \$87.7 billion, and income payments decreased to \$91.3 billion from \$91.8 billion.

Investment income.—Receipts of investment income on U.S.-owned assets abroad decreased to \$86.2 billion from \$87.1 billion, and payments of investment income on foreign-owned assets in the United States decreased to \$89.4 billion from \$89.8 billion.

Receipts of income on U.S. direct investment abroad decreased to \$37.3 billion from \$37.9 billion. The decrease was attributable to declines in earnings of foreign affiliates in manufacturing and in "other" industries. The largest declines were in earnings of Canadian affiliates in transportation equipment manufacturing and in earnings of Western European affiliates in transportation equipment manufacturing and in finance, where lower earnings may have partly reflected the depreciation of the euro and of the British pound against the U.S. dollar. In contrast, earnings of petroleum affiliates continued to increase strongly as a result of rising petroleum prices. Interest receipts edged up.

Payments of income on foreign direct investment in the United States decreased to \$15.8 billion from \$18.9 billion. The large decrease, which followed two quarters of large increases, was mostly attributable to a decline in earnings of manufacturing affiliates. Earnings of continental Western European-owned manufacturing affiliates dropped the most as a result of shifts to losses and of increased losses for some large affiliates. Earnings of affiliates in "other" industries also decreased, largely as a result of a decline in earnings of depository institutions.

"Other" private income receipts increased to \$48.1 billion from \$47.9 billion. Increases in receipts on bank and on nonbank claims, mostly as a result of a rise in average yields, more than offset a decrease in receipts on foreign securities.

"Other" private income payments increased to \$46.2 billion from \$44.0 billion. Increases in payments on bank and on nonbank liabilities reflected rises in average holdings and in average yields. An increase in payments on U.S. securities reflected a rise in average holdings.

U.S. Government income receipts decreased to

\$0.8 billion from \$1.2 billion. U.S. Government income payments increased to \$27.4 billion from \$26.9 billion.

Unilateral current transfers

Unilateral current transfers were net outflows of \$12.8 billion in the third quarter, up from net outflows of \$12.3 billion in the second. The increase was almost entirely accounted for by increases in U.S. Government grants and in private remittances and other transfers.

Capital Account

Capital account transactions were unchanged at net inflows of \$0.2 billion in the third quarter.

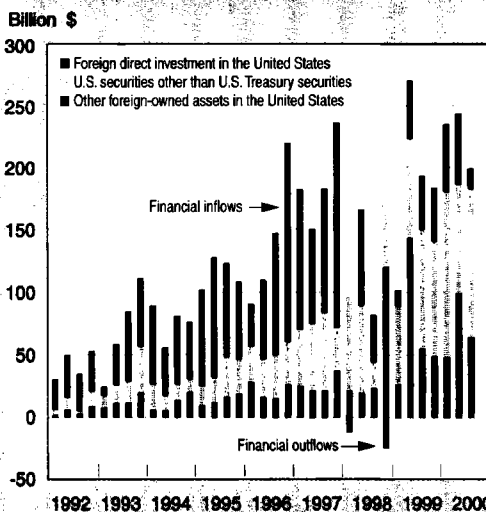

Financial Account

Net recorded financial inflows—the difference between changes in U.S.-owned assets abroad and changes in foreign-owned assets in the United States—were \$123.0 billion in the third quarter, down from \$152.7 billion (revised) in the second. Financial inflows for foreign-owned assets in the United States decreased more than financial outflows for U.S.-owned assets abroad.

Net inflows for foreign direct investment in the United States and net foreign purchases of U.S. securities other than U.S. Treasury securities remained very strong (chart 4). These inflows

CHART 4

Financial Flows for Foreign-Owned Assets in the United States

U.S. Department of Commerce, Bureau of Economic Analysis

accounted for 92 percent of total financial inflows for foreign-owned assets in the United States, and since the fourth quarter of 1998, they have accounted for more than 75 percent of total inflows. Net inflows for foreign direct investment in the United States have been boosted by numerous large-sized acquisitions of U.S. companies by foreign companies, partly reflecting the high profitability of U.S. companies, global consolidation in some industries, and the rapidly changing technology environment. Net foreign purchases of U.S. securities other than U.S. Treasury securities have been supported by the favorable economic environment in the United States over most of the period—including strong economic growth, low inflation, and higher U.S. interest rates relative to foreign interest rates.

U.S.-owned assets abroad

Net U.S.-owned assets abroad increased \$77.2 billion in the third quarter, following an increase of \$92.4 billion in the second. The slowdown was accounted for by a decrease in U.S. claims on foreigners reported by U.S. nonbanks after a large second-quarter increase and by slowdowns in net U.S. purchases of foreign securities and in net outflows for U.S. direct investment abroad. In contrast, claims on foreigners reported by U.S. banks increased after a second-quarter decrease.

U.S. official reserve assets.—Net U.S. official reserve assets increased \$0.3 billion in the third quarter, in contrast to a decrease of \$2.0 billion in the second (table D). The third-quarter increase was more than accounted for by an increase in U.S. holdings of foreign currencies, reflecting U.S. intervention purchases of euros, and by an increase in U.S. holdings of special drawing rights. The U.S.

reserve position in the International Monetary Fund (IMF) decreased, reflecting net foreign repayments of U.S. dollars to the IMF.

Claims reported by banks and by nonbanks.—U.S. claims on foreigners reported by U.S. banks increased \$11.4 billion in the third quarter, in contrast to a decrease of \$18.3 billion in the second. Banks' own claims increased for the sixth consecutive quarter.

In the third quarter, banks' own claims payable in dollars increased \$22.5 billion, following an increase of \$12.0 billion. The third-quarter increase was more than accounted for by bank lending to offices abroad, partly reflecting strong foreign demand for U.S. dollar funds to finance mergers and acquisitions and nonmerger-related purchases of U.S. corporate stocks and bonds. Foreign-owned banks in the United States were the largest lenders, providing substantial funds to their own offices in the Caribbean and, to a lesser extent, in Western Europe. U.S.-owned bank lending was small. Banks' claims on other private foreigners decreased after a large increase; the third-quarter decrease was mostly attributable to repayments from investment funds in the Caribbean to U.S. securities brokers and dealers.

Banks' domestic customers' claims payable in dollars decreased \$11.0 billion, following a decrease of \$27.4 billion. In the third quarter, a second consecutive large decrease in deposits abroad more than offset a surge in foreign commercial paper outstanding in the United States.

Claims reported by U.S. nonbanking concerns decreased \$0.9 billion after increasing \$36.5 billion. The decrease, which followed six strong quarterly increases, was attributable to a decline in deposits abroad.

^a Preliminary.

^b Revised.

1. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

2. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning January 1993 and Gabon beginning January 1995.

Foreign securities.—Net U.S. purchases of foreign securities were \$30.4 billion in the third quarter, down from \$38.2 billion in the second. Net U.S. purchases of foreign stocks were \$12.5 billion, down from \$45.0 billion, and transactions in foreign bonds shifted to net U.S. purchases of \$17.9 billion from net U.S. sales of \$6.8 billion.

The decrease in net U.S. purchases of foreign stocks was attributable to a sharp slowdown in merger-related exchanges of stock. Nonmerger-related transactions in foreign stocks shifted to net U.S. purchases from net U.S. sales. U.S. investors have made minimal net purchases or have made net sales of non-Japanese foreign stocks since the fourth quarter of 1997, but in recent quarters, net purchases of some of these stocks have increased. In the third quarter of 2000, transactions in Western European stocks shifted to net U.S. purchases, largely as a result of strong net purchases early in the quarter when most Western European stock markets rose. Net U.S. sales to Japan were less than half of large second-quarter net sales, and net U.S. purchases from Canada picked up.

The shift to net U.S. purchases of foreign bonds was supported by a decline in volatility in international bond markets, which were unsettled in the second quarter. In the third quarter, new foreign issues in the United States surged, partly as a result of increased placements by borrowers from Western Europe, particularly those in the telecommunications industry. New issues by Latin American borrowers also increased sharply, despite a slowdown in emerging market placements in September when U.S. investors became more concerned about creditworthiness. Transactions in outstanding foreign bonds shifted to net U.S. purchases from net U.S. sales, largely as a result of substantial net U.S. purchases from the United Kingdom.

Direct investment.—Net financial outflows for U.S. direct investment abroad were \$36.1 billion in the third quarter, down from \$37.5 billion in the second. The decrease was more than accounted for by a decline in net equity capital outflows that resulted from a greater pickup in divestitures of existing foreign affiliates than in acquisitions of new foreign affiliates. The acquisitions included U.S. purchases of financial companies in Western Europe and technology companies in several geographic areas. In contrast, reinvested earnings increased, and net inflows for intercompany debt slowed.

Foreign-owned assets in the United States

Net foreign-owned assets in the United States increased \$200.2 billion in the third quarter, following an increase of \$245.1 billion in the second. The slowdown was attributable to a sharp drop in net inflows for foreign direct investment in the United States and to much smaller increases in U.S. liabilities reported by U.S. banks and by U.S. nonbanking concerns in the third quarter than in the second. In contrast, net foreign purchases of U.S. securities other than U.S. Treasury securities stepped up, and net foreign sales of U.S. Treasury securities slowed.

Foreign official assets.—Net foreign official assets in the United States increased \$11.6 billion in the third quarter, following an increase of \$6.3 billion in the second (table D). The third-quarter increase was largely accounted for by increases in the assets of several large developing countries. Assets of industrial countries decreased, perhaps partly reflecting intervention sales of dollars for euros by some foreign official agencies.

Liabilities reported by banks and by nonbanks.—U.S. liabilities to foreigners reported by U.S. banks, excluding U.S. Treasury securities, increased \$14.0 billion in the third quarter, following an increase of \$46.9 billion in the second. Banks' own liabilities increased for the sixth consecutive quarter.

Banks' own liabilities payable in dollars increased \$16.0 billion in the third quarter, following an increase of \$54.5 billion in the second. The slowdown was more than accounted for by a decrease in U.S.-owned banks' liabilities to their own offices abroad after a very large second-quarter increase. The decrease partly reflected a slowdown in bank lending in the United States that reduced the demand for funds from abroad. In contrast, liabilities of foreign-owned banks in the United States increased, partly as a result of borrowing to support foreign-owned bank lending to offices abroad. Liabilities to other private foreigners increased, mostly as a result of an increase in liabilities to international bond funds in Western Europe.

Banks' custody liabilities payable in dollars decreased \$4.3 billion, following a decrease of \$1.9 billion. The third-quarter decrease was largely accounted for by a decrease in custody liabilities to investors in the Caribbean.

Liabilities reported by U.S. nonbanking con-

cerns increased \$2.6 billion, following an increase of \$24.0 billion. The third-quarter increase was attributable to borrowing by nonbank financial intermediaries.

U.S. Treasury securities.—Net foreign sales of U.S. Treasury securities decreased to \$12.6 billion in the third quarter from \$20.6 billion in the second. Yields on long-term U.S. Treasury securities declined for most of the third quarter amid growing expectations that the U.S. economy was slowing and that U.S. monetary policy would not be further tightened. The decrease in net foreign sales was largely accounted for by a decline in net sales by Western European investors. In contrast, net sales by Asian investors and by investment funds in the Caribbean increased. Foreigners have been net sellers of U.S. Treasury securities in six of the last seven quarters, as they shifted some funds into higher yielding U.S. corporate debt securities and U.S. stocks.

Other U.S. securities.—Net foreign purchases of U.S. securities other than U.S. Treasury securities increased to \$118.9 billion in the third quarter from \$87.1 billion in the second. Net foreign purchases of U.S. stocks rose sharply, and net foreign purchases of U.S. bonds increased to a record level.

Net foreign purchases of U.S. stocks were \$46.8 billion, up from \$26.3 billion. Net foreign purchases over the first three quarters of 2000 have been exceptionally strong, surpassing the record annual total for 1999 by 36 percent. In the third quarter, net foreign purchases were largest in August, when U.S. stock prices rose considerably as a result of indications that the U.S. economy was growing moderately and that inflation was not accelerating. By area, the increase in net foreign purchases was largely accounted for by a shift to net purchases from large net sales by investment funds

in the Caribbean. Transactions by Japanese investors also shifted to net purchases from net sales, and net purchases by Western European investors increased.

Net foreign purchases of U.S. corporate and other bonds increased to a record \$72.1 billion from \$60.8 billion. Net foreign purchases of U.S. federally sponsored agency bonds increased to a record level. U.S. agencies boosted their debt issuance in international markets, partly as a result of a decline in the risk premium on their debt after a sharp second-quarter rise. New issues sold abroad by U.S. corporations stepped up, partly in response to a decline in long-term interest rates for highly rated borrowers. New issues in euros nearly doubled, surpassing new issues in U.S. dollars for the first time.

U.S. currency flows.—Net U.S. currency shipments from the United States to foreign countries decreased to \$0.8 billion in the third quarter from \$1.0 billion in the second. Net U.S. currency shipments were restrained by the absence of new or worsening political and economic crises abroad that often boost such shipments.

Direct investment.—Net financial inflows for foreign direct investment in the United States were \$64.9 billion in the third quarter, down from \$100.3 billion in the second. Net equity capital inflows fell sharply in the absence of the exceptionally large acquisitions of U.S. companies that had occurred in the second quarter, but these inflows remained strong as a result of numerous, large third-quarter acquisitions in manufacturing and in “other” industries, such as telecommunications and insurance. Net intercompany debt inflows slowed, and reinvested earnings decreased, largely as a result of a decline in earnings.

Data Availability

The current and historical estimates that are presented in tables 1–10a of the U.S. international transactions accounts are available as compressed files on BEA's Web site at <www.bea.doc.gov>; click on “Catalog of Products,” and look under “International Accounts Products,” “Balance of Payments.”

The estimates are also available from BEA on the following diskettes:

- **U.S. International Transactions.** The most recently released annual and quarterly estimates are available as a 1-year subscription (four installments)—product num-

ber IDS-0001, price \$80. The subscription also includes the diskette of the historical series estimates (see below).

- **U.S. International Transactions, Third Quarter 2000.** Annual estimates for 1999 and quarterly estimates for 1999:I–2000:III on a single diskette—product number IDN-0276, price \$20.

- **U.S. International Transactions, Historical Series.** All the available historical annual and quarterly estimates on a single diskette—product number IDN-0261, price \$20.

To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

Tables 1 through 10 follow.

FOOTNOTES TO U.S. INTERNATIONAL TRANSACTIONS TABLES 1-10

General notes for all tables: *P* Preliminary. *R* Revised. * Less than \$500,000 (\pm)

D Suppressed to avoid disclosure of data of individual companies. n.a. Not available.

Table 1:

1. Credits, +: Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

Debits, —: Imports of goods and services and income payments; unilateral current transfers to foreigners; capital account transactions payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2.

3. Includes some goods: Mainly military equipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1992, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1992, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. At the present time, all U.S. Treasury-owned gold is held in the United States.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

13. Conceptually, line 76 is equal to "net foreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 in appendix A in this issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPA tables (published annually in the August issue of the SURVEY).

Additional footnotes for historical data in July issues of the SURVEY:

14. For 1974, includes extraordinary U.S. Government transactions with India. See "Special U.S. Government Transactions," June 1974 SURVEY, p. 27.

15. For 1978-83, includes foreign currency-denominated notes sold to private residents abroad.

16. Break in series. See Technical Notes and articles on revisions to the international accounts in the June 1989, June 1990, June 1992, June 1993, June 1995, and July 1996-2000 issues of the SURVEY.

Table 2:

1. Exports, Census basis, represent transactions values, i.e., U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 SURVEY), except for 1974-81, when they represent transactions values, i.e., foreign port of exportation (see June issues of the SURVEY for historical data).

From 1983 forward, both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" and "revised statistical" month data supplied by the Census Bureau (see Technical Notes in the December 1985 SURVEY).

Seasonally adjusted data reflect the application of seasonal factors developed jointly by Census and BEA. The seasonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see Technical Notes in the June 1980 SURVEY, in the June 1988 SURVEY, and in the June 1991 SURVEY). Prior to 1983, annual data are as published by the Census Bureau, except that for 1975-80 published Census data are adjusted to include trade between the U.S. Virgin Islands and foreign countries.

2. Adjustments in lines A5 and A13, B12, B48, and B84 reflect the Census Bureau's reconciliation of discrepancies between the goods statistics published by the United States and the counterpart statistics published in Canada. These adjustments are distributed to the affected end-use categories in section C. Beginning in 1988, estimates for undocumented exports to Canada, the largest item in the U.S.-Canadian reconciliation, are included in Census basis data shown in line A1.

3. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from Customs declarations. The exports are included in tables 1 and 10, line 5 (transfers under U.S. military agency sales contracts); the imports are included in tables 1 and 10, line 22 (direct defense expenditures).

4. Addition of electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S.-owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and alterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area. Also includes deduction of exports to the Panama Canal Zone before October 1, 1979, and for 1975-82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the SURVEY for historical data).

5. Coverage adjustments for special situations in which shipments were omitted from Census data; the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair; and the adjustment of software imports to market value. Also includes addition of understatement of inland freight in U.S. values of U.S. imports of goods from Canada in 1974-81; deduction of imports from the Panama Canal Zone before October 1, 1979; and for 1975-82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the SURVEY for historical data).

6. For 1988-89, correction for the understatement of crude petroleum imports from Canada.

7. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10, lines 3 and 20. Trade with international organizations includes purchases of nonmonetary gold from the International Monetary Fund, transfers of tin to the International Tin Council (ITC), and sales of satellites to Intelsat. The memoranda are defined as follows: *Industrial countries*: Western Europe, Canada, Japan, Australia, New Zealand, and South Africa. *Members of OPEC*: Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Libya, Nigeria, and Gabon (Excludes Ecuador beginning in January 1993 and Gabon beginning in January 1995.); *Other countries*: Eastern Europe, Latin America and Other Western Hemisphere, and other countries in Asia and Africa, less OPEC. Before 1984, complete geographic area detail was not available for some balance of payments adjustments. Therefore, the detail shown does not always sum to the values shown for the area aggregates. For all years, "Asia" and "Africa" exclude certain Pacific Islands and unidentified countries included in "Other countries in Asia and Africa."

8. Includes the former German Democratic Republic (East Germany) beginning in fourth quarter of 1990. In earlier periods, the German Democratic Republic was included in Eastern Europe.

9. Beginning in 1986, New Zealand and South Africa are included in "Other countries in Asia and Africa," with New Zealand included as part of "Asia" and South Africa as part of "Africa."

10. The "Euro area," which formed in January 1999, includes Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain.

Table 3:

1. Patented techniques, processes, and formulas and other intangible property rights that are used in goods production.

2. Copyrights, trademarks, franchises, rights to broadcast live events, and other intangible property rights.

3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film rentals.

Table 4:

1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts—first authorized (for Israel) under Public Law 93-199, section 4, and subsequently authorized (for many recipients) under similar legislation—are included in line A4. Deliveries against these military sales contracts are included in line C10; see footnote 2. Of the line A4 items, part of these military expenditures is applied in lines A43 and A46 to reduce short-term assets previously recorded in lines A41 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A4 expenditures finances future deliveries under military sales contracts for the recipient countries and is applied directly to lines A42 and C9. A third part of line A4, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A37. A fourth part of line A4, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A48.

2. Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are not included as transactions under military sales contracts. The entries for the several categories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.

3. The identification of transactions involving direct dollar outflows from the United States is made in reports by each operating agency.

4. Line A38 includes foreign currency collected as interest and line A43 includes foreign currency collected as principal, as recorded in lines A16 and A17, respectively.

5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry for the part of line C10 that was delivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.

6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.

7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and included in line C2.

Table 5:

1. Beginning with 1991, payments and receipts of interest related to interest rate and foreign currency swaps between affiliates and parents are netted and are shown as either net payments or net receipts. Receipts and payments of other types of interest are shown on a gross basis.

2. Petroleum includes, and manufacturing and "other" industries exclude, the exploration, development, and production of crude oil and gas, and the transportation, refining, and marketing of petroleum products, exclusive of petrochemicals. "Other" industries include wholesale trade; banking; finance (except banking), insurance, and real estate; services; and other industries—agriculture, forestry, and fishing; mining; construction; transportation, communication, and public utilities; and retail trade.

3. Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany debt, and other equity contributions.

4. Sales (total and partial), liquidations, returns of capital contributions, and other dispositions of equity holdings.

Table 6:

1. Primarily provincial, regional, and municipal.

2. Largely transactions by International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), and Inter-American Development Bank (IDB).

3. Estimate for scheduled redemptions and identifiable early retirements. Includes estimates based on Canadian statistics for redemptions of Canadian issues held in the United States. Unidentified and nonscheduled retirements appear in line A30.

Table 7:

1. Estimates of transactions other than those with U.S. banks' Caribbean branches and with financial intermediaries (FIs) are not available. Preliminary estimates of transactions with F.I.s, by area, are commingled in "other" to avoid disclosure of individual companies' area data.

2. Deposits (line A5) include other financial claims (line A7) for some countries due to the commingling of these categories in foreign source data.

3. Primarily mortgages, loans, and bills and notes drawn on foreigners.

4. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

5. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

6. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning in January 1993.

Table 8:

1. Includes central governments and their agencies and corporations; state, provincial, and local governments and their agencies and corporations; and international and regional organizations.

2. U.S.-owned banks are mainly U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companies. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States. U.S. brokers and dealers are identified separately beginning with the first quarter of 1997; prior to 1997, they are commingled with U.S.-owned banks' accounts.

3. Commercial paper issued in the U.S. market by foreign incorporated entities; excludes commercial paper issued through foreign direct investment affiliates in the United States.

4. Negotiable and readily transferable instruments other than commercial paper, payable in dollars; consists largely of negotiable certificates of deposit.

5. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

6. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

7. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning in January 1993.

8. Includes Eastern Europe and international and regional organizations.

Table 9:

1. Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities and are separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.

2. Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other than deposits.

3. Mainly negotiable and readily transferable instruments, excluding U.S. Treasury securities.

4. Mainly International Bank for Reconstruction and Development (IBRD), International Development Association (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (IDB), and the Trust Fund of the International Monetary Fund.

5. U.S.-owned banks are mainly U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companies. Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in the United States. U.S. brokers and dealers are identified separately beginning with the first quarter of 1997; prior to 1997, they are commingled with U.S.-owned banks' accounts.

6. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.

7. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.

8. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginning in January 1993.

9. Includes Eastern Europe and international and regional organizations.

Table 10: For footnotes 1-13, see table 1.

14. The "European Union" includes the "European Union (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

15. The "European Union (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; before 1996, small transactions in business services that are not reported by country; and net U.S. currency flows, for which geographic source data are not available.

17. Details are not shown separately; see totals in lines 56 and 63.

18. Details not shown separately are included in line 69.

BEA CURRENT AND HISTORICAL DATA

National, International, and Regional Estimates

This section presents an extensive selection of economic statistics prepared by the Bureau of Economic Analysis (BEA) and a brief selection of collateral statistics prepared by other Government agencies and private organizations. Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

BEA's economic statistics are available on three Web

sites. BEA's Web site at <www.bea.doc.gov> contains data, articles, and news releases from the national, international, and regional programs. The Federal Statistical Briefing Room (FSBR) on the White House Web site at <www.whitehouse.gov/fsbr> provides key economic statistics, including gross domestic product. The Commerce Department's STAT-USA Web site at <www.stat-usa.gov> provides detailed databases and news releases from BEA and from other Federal Government agencies by subscription.

The tables present annual [A], quarterly [Q], and monthly [M] estimates.

National Data

A. Selected NIPA Tables

The tables in this section include the most recent estimates of gross domestic product and its components; these estimates were released on December 21, 2000, and include the "final" estimates for the third quarter of 2000.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly; in most of these tables, annual estimates are also shown.

The news release on gross domestic product is available within minutes of the time of release, and the "Selected NIPA Tables" are available later that day, on BEA's Web site <www.bea.doc.gov> and on STAT-USA's Web site <www.stat-usa.gov>.

The "Selected NIPA Tables" are also available on printouts or diskettes from BEA. To order NIPA subscription products, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666).

S. Summary Tables

Table S.1.—Summary of Percent Change From Preceding Period in Real Gross Domestic Product and Related Measures

(Percent)

	1998	1999	Seasonally adjusted at annual rates					
			1999			2000		
			II	III	IV	I	II	III
Gross domestic product	4.4	4.2	2.5	5.7	8.3	4.8	5.6	2.2

Residual	.5	-6	2.8	.1	-5.2	-8.0	-10.6	-11.2

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Percent changes from preceding period for selected items in this table are shown in table 8.1; contributions to the percent change in real gross domestic product are shown in table 8.2.

Chain-type quantity indexes for the series in this table are shown in table 7.1.

Final sales	1,670.2	1,749.3	1,734.6	1,752.7	1,788.9	1,811.5	1,813.1	1,836.2
Change in private inventories	33.3	17.1	7.9	10.5	32.1	15.5	29.5	32.5
Services	4,427.1	4,563.3	4,537.8	4,581.1	4,631.0	4,659.3	4,718.8	4,733.6
Structures	751.8	776.5	774.7	768.1	781.9	804.9	798.8	797.6
Residual	-4.8	-11.1	-7.9	-12.1	-16.9	-19.6	-24.7	-25.8
Addenda:								
Motor vehicle output	317.9	348.2	341.6	352.0	359.0	359.3	355.2	339.1
Gross domestic product less motor vehicle output	8,198.2	8,528.8	8,442.6	8,555.1	8,726.5	8,833.7	8,964.3	9,029.8

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

Percent changes from preceding period for gross domestic product and for final sales of domestic product are shown in table 8.1. Chain-type quantity indexes for the series in this table are shown in table 7.17.

Table 1.5.—Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers

[Billions of dollars]

Gross domestic product	8,790.2	9,299.2	9,191.5	9,340.9	9,559.7	9,752.7	9,945.7	10,039.4
Less: Exports of goods and services	966.0	990.2	973.0	999.5	1,031.0	1,051.9	1,092.9	1,130.8
Plus: Imports of goods and services	1,117.5	1,244.2	1,213.4	1,280.0	1,330.1	1,387.1	1,448.3	1,520.3
Equals: Gross domestic purchases	8,941.7	9,553.2	9,432.0	9,621.4	9,858.8	10,087.9	10,301.1	10,429.0
Less: Change in private inventories	77.0	43.3	14.5	36.7	72.7	29.9	72.0	66.4
Equals: Final sales to domestic purchasers	8,864.7	9,509.9	9,417.4	9,584.7	9,786.1	10,058.0	10,229.1	10,362.6

NOTE.—Percent changes from preceding period for selected items in this table are shown in table 8.1.

Table 1.6.—Relation of Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers

[Billions of chained (1996) dollars]

Gross domestic product	8,515.7	8,875.8	8,783.2	8,905.8	9,084.1	9,191.8	9,318.9	9,369.5
Less: Exports of goods and services	1,003.6	1,033.0	1,017.6	1,042.6	1,068.4	1,084.8	1,121.8	1,158.8
Plus: Imports of goods and services	1,224.6	1,355.3	1,332.2	1,385.2	1,420.9	1,461.7	1,525.2	1,586.4
Equals: Gross domestic purchases	8,727.9	9,179.1	9,079.6	9,226.7	9,414.1	9,543.6	9,694.3	9,766.0
Less: Change in private inventories	80.2	45.3	13.1	39.1	80.9	36.6	78.6	72.5
Equals: Final sales to domestic purchasers	8,647.2	9,130.3	9,061.5	9,182.8	9,330.4	9,499.9	9,610.5	9,687.3

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. Percent changes from preceding period for selected series in this table are shown in table 8.1.

Chain-type quantity indexes for selected series in this table are shown in table 7.2.

State and local	680.7	715.5	710.3	720.0	729.8	739.8	749.0	758.8

1. Equals gross domestic product less gross product of households and institutions and of general government.
2. Equals gross domestic business product less gross farm product.
3. Equals compensation of general government employees plus general government consumption of fixed capital as shown in table 3.7.

Table 1.8.—Real Gross Domestic Product by Sector

[Billions of chained (1996) dollars]

Gross domestic product	8,515.7	8,875.8	8,783.2	8,905.8	9,084.1	9,191.8	9,318.9	9,369.5

Nonfarm less housing	6,452.5	6,767.8	6,678.6	6,794.1	6,961.6	7,050.6	7,165.4	7,206.7
Housing	662.6	683.1	679.3	685.9	692.3	700.6	704.7	707.9
Farm	100.2	106.3	111.4	104.5	103.1	107.3	104.1	106.2
Households and institutions	371.7	378.3	377.7	378.7	380.9	382.3	384.5	386.5
Private households	13.3	10.6	11.3	10.1	8.6	8.2	8.2	8.3
Nonprofit institutions	358.4	367.8	366.4	368.7	372.3	374.2	376.4	378.3
General government³	928.7	942.1	939.7	943.6	947.4	953.5	962.0	964.6
Federal	286.4	286.5	286.0	286.3	287.0	289.1	294.5	292.9
State and local	642.2	655.4	653.5	657.1	660.2	664.2	667.4	671.6
Residual	.1	-1.7	-3.3	-9	-1.0	-2.4	-1.8	-2.4

1. Equals gross domestic product less gross product of households and institutions and of general government.
2. Equals gross domestic business product less gross farm product.
3. Equals compensation of general government employees plus general government consumption of fixed capital as shown in table 3.8.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines. Chain-type quantity indexes for the series in this table are shown in table 7.14.

Net domestic product	7,435.4	7,709.0	7,632.0	7,719.3	7,884.1	7,966.4	8,067.4	8,092.7

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.

2. Gross national income deflated by the implicit price deflator for gross national product.

NOTE.—Except as noted in footnotes 1 and 2, chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

The chain-type quantity index for gross national product is shown in table 7.3.

Table 1.11.—Command-Basis Real Gross National Product

[Billions of chained (1996) dollars]

Gross national product	8,515.1	8,868.3	8,776.7	8,895.4	9,075.0	9,187.7	9,313.7	9,362.8
Less: Exports of goods and services and income receipts from the rest of the world	1,282.2	1,327.4	1,303.0	1,345.0	1,385.6	1,418.6	1,477.5	1,508.9
Plus: Command-basis exports of goods and services and income receipts from the rest of the world ¹	1,336.8	1,374.0	1,354.3	1,385.3	1,418.9	1,443.4	1,508.9	1,532.8
Equals: Command-basis gross national product	8,569.7	8,915.0	8,828.1	8,935.7	9,108.3	9,212.5	9,345.1	9,386.7
Addendum:								
Terms of trade ²	104.3	103.5	103.9	103.0	102.4	101.7	102.1	101.6

1. Exports of goods and services and income receipts deflated by the implicit price deflator for imports of goods and services and income payments.

2. Ratio of the implicit price deflator for exports of goods and services and income receipts to the corresponding implicit price deflator for imports divided by 100.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. Percent changes from preceding period for gross national product are shown in table 8.1.

Chain-type quantity indexes for the series in this table are shown in table 7.3.

Billions of chained (1996) dollars								
Gross product of nonfinancial corporate business	4,679.9	4,957.1	4,904.4	4,987.0	5,093.6	5,171.0	5,251.2	5,308.1
Consumption of fixed capital ¹	533.9	586.7	577.9	597.2	607.3	623.1	639.2	655.4
Net product ²	4,146.0	4,370.4	4,326.6	4,389.8	4,486.3	4,547.9	4,612.0	4,652.7

1. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100.

2. Chained-dollar net product of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

2. Personal Income and Outlays

Table 2.1.—Personal Income and Its Disposition

[Billions of dollars]

Personal saving as a percentage of disposable personal income	4.2	2.2	2.5	1.8	1.5	.2	.3	-2

1. Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

2. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.

NOTE.—Percent changes from preceding period for disposable personal income are shown in table 8.1.

Addenda:								
Energy goods and services ¹	275.1	280.4	280.0	284.9	279.2	275.4	283.0	282.9
Personal consumption expenditures less food and energy	4,590.4	4,851.4	4,821.2	4,881.3	4,954.3	5,064.4	5,099.5	5,166.5

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Chain-type quantity indexes for the series in this table are shown in table 7.4.

Contributions to the percent change in real personal consumption expenditures are shown in table 8.3.

3. Government Current Receipts and Expenditures

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addenda.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

See footnotes to table 3.7.

Chain-type quantity indexes for the series in this table are shown in table 7.11.

Contributions to percent change in real government consumption expenditures and gross investment are shown in table 8.6.

Compensation of general government employees ³	131.7	133.7	133.6	134.1	133.4	137.8	138.0	139.8

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addendum.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the line in the addendum.

Chain-type indexes for the series in this table are shown in table 7.12.

See footnotes to table 3.10.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following the detail for exports is the difference between the aggregate "exports of goods and services" and the sum of the detailed lines for exports of goods and exports of services. The residual line following the detail for imports is the difference between the aggregate "imports of goods and services" and the sum of the detailed lines for imports of goods and imports of services.

Chain-type quantity indexes for the series in this table are shown in table 7.10.

Contributions to the percent change in real exports and in real imports of goods and services are shown in table 8.5.

See footnotes to table 4.3.

Nondurable goods	12.3	5.0	5.3	1.2	2.1	4.8	2.6	2.9

1. This series is derived from the Census Bureau series "current cost inventories."

2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

3. Inventories of auto and home supply stores are included in "other durable goods."

1. Inventories of auto and home supply stores are included in "other durable goods."

NOTE.—Chained (1996) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Nonfarm inventories to final sales of goods and structures	3.54	3.57	3.56	3.50	3.53	3.55

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in the private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Inventories of auto and home supply stores are included in "other durable goods."

3. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

Final sales of goods and structures of domestic business ³	352.8	357.3	364.8	375.1	377.3	380.8
Ratio of private inventories to final sales of domestic business						
Private inventories to final sales	2.27	2.26	2.25	2.23	2.23	2.25
Nonfarm inventories to final sales	2.10	2.09	2.08	2.06	2.07	2.08
Nonfarm inventories to final sales of goods and structures	3.69	3.68	3.65	3.57	3.60	3.61

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas, the change in private inventories component of GDP is stated at annual rates.

2. Inventories of auto and home supply stores are included in "other durable goods."

3. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE.—Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines for inventories.

NOTE.—Chain-type quantity and price indexes are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. Implicit price deflators are weighted averages of the detailed price indexes used to prepare each aggregate and component and are calculated as the ratio of current- to chained-

dollar output multiplied by 100.

Percent changes from preceding period for items in this table are shown in table 8.1. Contributions to the percent change in real gross domestic product are shown in table 8.2.

Table 7.2.—Quantity and Price Indexes for Gross Domestic Product, Final Sales, and Purchases

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures

for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addenda.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

1. Includes new computers and peripheral equipment only.

2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE.—The quantity indexes on which the estimates in this table are based are shown in table 7.6. The estimates in this table differ from those in table 8.2 because this table shows contributions to real private fixed investment, whereas table 8.2 shows contributions to real gross domestic product.

Table 8.5.—Contributions to Percent Change in Real Exports and in Real Imports of Goods and Services by Type of Product

Imports of services ¹	2.00	.29	.55	1.13	1.30	2.45	1.71	3.19

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment were reclassified from goods to services.

NOTE.—The quantity indexes on which the estimates in this table are based are shown in table 7.10. The estimates in this table differ from those in table 8.2 because this table shows contributions to real exports and to real imports, whereas table 8.2 shows contributions to real gross domestic product. Because imports are subtracted in the calculation of gross domestic product, the contributions of components of real imports have opposite signs in this table and in table 8.2.

Equipment and software39	.43	.43	.51	.47	.40	.48	.44

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

NOTE.—The quantity indexes on which the estimates in this table are based are shown in table 7.11. The estimates in this table differ from those in table 8.2 because this table shows contributions to real government consumption expenditures and gross investment, whereas table 8.2 shows contributions to real gross domestic product.

Addenda:								
Final sales of motor vehicles to domestic purchasers	384.5	427.7	425.9	436.8	438.0	458.5	436.6	437.3
Private fixed investment in new autos and new light trucks	145.1	158.8	157.0	167.0	159.8	168.4	158.9	159.1
Domestic output of new autos ²	114.4	117.5	116.2	118.9	117.7	122.6	118.4	119.0
Sales of imported new autos ³	68.3	79.9	79.7	80.8	84.5	84.3	83.4	82.6

1. Except for exports and imports, consists of new trucks only.

2. Consists of final sales and change in private inventories of new autos assembled in the United States.

3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Chain-type quantity indexes for the series in this table are shown in table 7.18B.

B. Other NIPA and NIPA-Related Tables

Monthly Estimates

Tables B.1 and B.2 include the most recent estimates of personal income and its components; these estimates were released on December 22, 2000 and include "preliminary" estimates for November 2000 and "revised" estimates for July–October 2000.

Table B.1.—Personal Income

[Billions of dollars; monthly estimates seasonally adjusted at annual rates]

^r Preliminary.^r Revised.

1. Disposable personal income in chained (1996) dollars equals the current-dollar figure divided by the implicit price deflator for personal consumption expenditures.

2. Monthly estimates equal personal saving for the month as a percentage of disposable personal income for that month.

1. The current-dollar statistical discrepancy equals gross domestic product (GDP) measured as the sum of expenditures less gross domestic income—that is, GDP measured as the costs incurred and profits earned in domestic production. The chained (1996) dollar statistical discrepancy equals the current-dollar statistical discrepancy deflated by the implicit price deflator for gross domestic business product.

2. Equals GDP in chained (1996) dollars less the statistical discrepancy and the sum of GDP by industry of

the detailed industries. The value of not allocated by industry reflects the nonadditivity of chained-dollar estimates and the differences in source data used to estimate real GDP by industry and the expenditures measure of real GDP.

NOTE.—Estimates are based on the 1987 Standard Industrial Classification. The table is derived from tables 1 and 6 in "Gross Domestic Product by Industry for 1997–99" in the December 2000 SURVEY.

1. Consists of office buildings, except those constructed at industrial sites and those constructed by utilities for their own use.

2. Consists of stores, restaurants, garages, service stations, warehouses, mobile structures, and other buildings used for commercial purposes.

3. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

4. Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.

5. Consists primarily of dormitories and of fraternity and sorority houses.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.
2. Consists of museums, botanical and zoological gardens; engineering and management services; and services, not elsewhere classified.
3. Includes Coast Guard.
4. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE.—Estimates in this table are based on the 1987 Standard Industrial Classification (SIC). Compensation equals wage and salary accruals plus supplements to wages and salaries. "Supplements" are listed in table 8.17 of the August 2000 SURVEY OF CURRENT BUSINESS.

Rest of the world ⁵				-447	-455	-473							

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to average weekly hours per employee on full-time schedules.

2. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.

3. Consists of museums, botanical and zoological gardens; engineering and management services; and services,

not elsewhere classified.

4. Includes Coast Guard.

5. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE.—Estimates in this table are based on the 1967 Standard Industrial Classification (SIC).

Table B.10.—Farm Sector Output, Gross Product, and National Income

	Billions of dollars			Billions of chained (1996) dollars		
	1997	1998	1999	1997	1998	1999
Farm output	226.3	214.6	208.4	237.5	238.4	243.9
Cash receipts from farm marketings	208.6	198.2	190.7	218.7	220.5	224.3
Crops	112.0	104.0	95.3	121.2	122.2	123.7
Livestock	96.6	94.2	95.4	97.6	98.3	100.6
Farm housing	6.4	6.7	7.0	6.0	5.9	5.7
Farm products consumed on farms5	.5	.5	.5	.5	.5
Other farm income	7.8	8.6	10.4	8.2	9.6	12.4
Change in farm inventories	2.9	.6	-0.2	3.2	1.2	0
Crops	3.3	.9	.5	3.5	1.5	.9
Livestock	-4	-3	-7	-4	-3	-7
Less: Intermediate goods and services purchased	138.1	133.9	134.2	134.4	138.0	138.4
Intermediate goods and services, other than rent	122.1	118.8	120.1	119.0	122.4	124.0
Rent paid to nonoperator landlords	16.0	15.1	14.1	15.5	15.7	14.4
Equals: Gross farm product	88.3	80.8	74.2	103.6	100.2	106.3
Less: Consumption of fixed capital	26.3	27.4	29.2	25.9	26.6	28.1
Equals: Net farm product	61.9	53.4	45.0	78.1	73.5	78.2
Less: Indirect business tax and nontax liability	5.2	5.2	5.6
Plus: Subsidies to operators	6.3	10.3	17.6
Equals: Farm national income	63.1	58.5	56.9
Compensation of employees	17.6	18.7	19.4
Wage and salary accruals	15.1	16.2	16.6
Supplements to wages and salaries	2.4	2.5	2.9
Proprietors' income and corporate profits with inventory valuation and capital consumption adjustments	35.8	29.8	27.2
Proprietors' income	29.7	25.4	25.3
Corporate profits	6.1	4.4	1.9
Net interest	9.7	10.0	10.3

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Table B.11.—Housing Sector Output, Gross Product, and National Income

	Billions of dollars			Billions of chained (1996) dollars		
	1997	1998	1999	1997	1998	1999
Housing output ¹	778.0	823.2	868.7	756.1	775.5	795.0
Nonfarm housing	771.6	818.6	861.7	750.1	769.6	789.4
Owner-occupied	585.5	622.7	661.1	569.0	586.7	605.7
Tenant-occupied	186.1	193.8	200.6	181.0	182.9	183.7
Farm housing	6.4	6.7	7.0	6.0	5.9	5.7
Less: Intermediate goods and services consumed	106.0	115.4	118.6	102.0	107.9	107.1
Equals: Gross housing product	672.0	707.9	750.2	654.0	667.6	687.9
Nonfarm housing	666.7	702.3	744.3	649.0	662.6	683.1
Owner-occupied	504.0	534.0	570.8	490.3	503.3	523.6
Tenant-occupied	162.6	168.3	173.5	158.7	159.4	159.5
Farm housing	5.3	5.6	5.9	5.0	5.0	4.8
Less: Consumption of fixed capital	126.5	133.7	143.7	122.7	125.8	130.1
Capital consumption allowances	67.6	72.0	77.5
Less: Capital consumption adjustment	-58.8	-61.7	-66.2
Equals: Net housing product	545.5	574.2	606.5	531.3	541.7	557.8
Less: Indirect business tax and nontax liability plus business transfer payments	124.2	129.9	135.6
Plus: Subsidies less current surplus of government enterprises	23.7	23.7	24.2
Equals: Housing national income	445.0	468.0	495.2
Compensation of employees	8.8	9.5	10.1
Proprietors' income with inventory valuation adjustment and capital consumption adjustment	21.3	20.7	20.2
Rental income of persons with capital consumption adjustment	109.0	119.0	126.4
Corporate profits with inventory valuation adjustment and capital consumption adjustment	4.7	4.5	4.4
Net interest	301.2	314.4	334.1

1. Equals personal consumption expenditures for housing less expenditures for other housing as shown in table B.4.

NOTE.—Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Table B.12.—Net Stock of Private Fixed Assets; Equipment, Software, and Structures; by Type

[Year-end estimates]

1. Excludes software "embedded" or bundled in computers and other equipment.

2. Consists of office buildings, except those occupied by electric and gas utility companies.

3. Consists primarily of stores, restaurants, garages, service stations, warehouses, and other buildings used for commercial purposes.

4. Consists of buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.

5. Consists primarily of streets, dams, reservoirs, sewer and water facilities, parks, and airfields.

6. Consists primarily of dormitories and of fraternity and sorority houses.

NOTE.—The data in this table are from "Fixed Assets and Consumer Durable Goods for 1925-99" in the September 2000 SURVEY OF CURRENT BUSINESS.
n.e.c. Not elsewhere classified.

C. Historical Measures

This table is derived from the "GDP and Other Major NIPA Series" tables that were published in the August 2000 issue of the SURVEY OF CURRENT BUSINESS and from the "Selected NIPA Tables" that are published in this issue. (Changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1.—Historical Measures of Real Gross Domestic Product, Real Gross National Product, and Real Gross Domestic Purchases
[Quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	Billions of chained (1996) dollars			Percent change from preceding period		Chain-type price indexes		Implicit price deflators		Percent change from preceding period			
	Gross domestic product	Final sales of domestic product	Gross national product	Gross domestic product	Final sales of domestic product	Gross domestic product	Gross domestic purchases	Gross domestic product	Gross national product	Chain-type price index		Implicit price deflators	
										Gross domestic product	Gross domestic purchases	Gross domestic product	Gross national product

1. All exchange rates are from the Board of Governors of the Federal Reserve System.

2. Rates for selected euro-area currencies can be derived by using the following conversion rates: 1 euro = 6.55957 French francs, 1.95583 German marks, and 1936.27 Italian lire.

3. The rate shown for the United States is an index of the weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of major U.S. trading partners, January 1997=100 and reflects revised trade weights. For more information on the exchange rate indexes, see "New Summary Measures

of the Foreign Exchange Value of the Dollar," *Federal Reserve Bulletin*, vol. 84 (October 1998), pp. 811-18.

NOTE.—U.S. interest rates, unemployment rates, and GDP growth rates are from the Federal Reserve, the Bureau of Labor Statistics, and BEA, respectively. GDP growth rates for other countries are calculated from levels published by those countries. Most other data (including U.S. consumer prices and U.S. share prices, both of which have been rebased to 1995 to facilitate comparison) are © OECD and are reproduced with permission.

International Data

F. Transactions Tables

Table F.1 includes the most recent estimates of U.S. international trade in goods and services; the estimates were released on December 19, 2000 and include "preliminary" estimates for October 2000 and "revised" estimates for April–September 2000. The sources for the other tables in this section are as noted.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. At the present time, all U.S. Treasury-owned gold is held in the United States.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities

of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4 in "U.S. International Transactions, Third Quarter 2000" in this issue of SURVEY OF CURRENT BUSINESS.

13. Conceptually, line 76 is equal to "net foreign investment" in the national income and product accounts (NIPA's). However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 in appendix A in this issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions

in the two sets of accounts appears in table 4.5 of the full set of NIPA tables published annually in the August issue of the SURVEY.

14. The "European Union" includes the "European Union (EU)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

15. The "European Union (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld, current-cost adjustments associated with U.S. and foreign direct investment; small transactions in business services that are not reported by country; and net U.S. currency flows, for which geographic

source data are not available.

17. Details not shown separately; see totals in lines 56 and 63.

18. Details not shown separately are included in line 69.

NOTE.—The data in tables F.2 and F.3 are from tables 1 and 10 in "U.S. International Transactions, Third Quarter 2000" in this issue of the SURVEY OF CURRENT BUSINESS, which presents the most recent estimates from the U.S. international transactions accounts.

^p Preliminary.^r Revised.

1. Patented techniques, processes, and formulas and other intangible property rights that are used in goods production.

2. Copyrights, trademarks, franchises, rights to broadcast live events, and other intangible property rights.

3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film rentals.

NOTE.—The data in this table are from table 3 in "U.S. International Transactions, Third Quarter 2000" in this issue of the SURVEY OF CURRENT BUSINESS, which presents the most recent estimates from the U.S. international transactions accounts.

^r Preliminary.^r Revised.

1. Represents gains or losses on foreign-currency-denominated assets due to their revaluation at current exchange rates.

2. Includes changes in coverage, statistical discrepancies, and other adjustments to the value of assets.

3. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

4. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/demonetizations are not included in international transactions financial flows.

5. Also includes paid-in capital subscriptions to international financial institutions and outstanding amounts of miscellaneous claims that have been settled through international agreements to be payable to the U.S. Government over periods in excess of 1 year. Excludes World War I debts that are not being serviced.

6. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

7. Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

NOTE.—The data in this table are from table 1 in "International Investment Position of the United States at Yearend 1999" in the July 2000 issue of the SURVEY OF CURRENT BUSINESS.

NOTE.—In this table, unlike in the international transactions accounts, income and capital outflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "U.S. Direct Investment Abroad: Detail for Historical-Cost Position and Related Capital and Income Flows, 1999" in the September 2000 issue of the SURVEY OF CURRENT BUSINESS.

NOTE.—In this table, unlike in the international transactions accounts, income and capital inflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 1999" in the September 2000 issue of the SURVEY OF CURRENT BUSINESS.

Table G.5.—Selected Financial and Operating Data of Nonbank U.S. Affiliates and Majority-Owned Nonbank U.S. Affiliates of Foreign Companies by Country of Ultimate Beneficial Owner and by Industry of Affiliate, 1998

	All nonbank affiliates							Majority-owned nonbank affiliates						
	Millions of dollars				Thousands of employees	Millions of dollars		Millions of dollars				Thousands of employees	Millions of dollars	
	Total assets	Sales	Net income	Gross product		U.S. exports of goods shipped by affiliates	U.S. imports of goods shipped to affiliates	Total assets	Sales	Net income	Gross product		U.S. exports of goods shipped by affiliates	U.S. imports of goods shipped to affiliates

D Suppressed to avoid disclosure of data of individual companies.

1. The industry classification system used to classify the data for U.S. affiliates is based on the North American Industry Classification System. Prior to 1997, the affiliate data were classified using an industry classification system based on the Standard Industrial Classification system.

NOTE.—The data in this table are from BEA's annual survey of the operations of U.S. affiliates of foreign companies.

See "U.S. Affiliates of Foreign Companies: Operations in 1998," in the August 2000 issue of the SURVEY OF CURRENT BUSINESS.

Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

H. International Perspectives

Quarterly data in this table are shown in the middle month of the quarter.

1. All exchange rates are from the Board of Governors of the Federal Reserve System.

2. Rates for selected euro-area currencies can be derived by using the following conversion rates: 1 euro = 6.55957 French francs, 1.95583 German marks, and 1366.27 Italian lire.

3. The rate shown for the United States is an index of the weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of major U.S. trading partners, January 1997=100 and reflects revised trade weights. For more information on the exchange rate indexes, see "New Summary Measures

of the Foreign Exchange Value of the Dollar," *Federal Reserve Bulletin*, vol. 84 (October 1998), pp. 811-18.

NOTE.—U.S. interest rates, unemployment rates, and GDP growth rates are from the Federal Reserve, the Bureau of Labor Statistics, and BEA, respectively. GDP growth rates for other countries are calculated from levels published by those countries. Most other data (including U.S. consumer prices and U.S. share prices, both of which have been rebased to 1995 to facilitate comparison) are © OECD and are reproduced with permission.

I. Charts

THE U.S. IN THE INTERNATIONAL ECONOMY

Regional Data

J. State and Regional Tables

The tables in this section include the most recent estimates of State personal income and gross state product. The sources of these estimates are noted.

The quarterly and annual State personal income estimates and the gross state product estimates are available on CD-ROM. For information on State personal income, E-mail reis.remd@bea.doc.gov; write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5360. For information on gross state product, E-mail gspread@bea.doc.gov; write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5340.

1. Percent change was calculated from unrounded data.

NOTE.—The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the estimate of personal income in the national income and product accounts (NIPA's) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the

NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

1. Per capita personal income and per capita disposable personal income were computed using midyear population estimates from the Bureau of the Census.

NOTE.—The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the estimate of personal income in the national income and product accounts (NIPA's) because of differences in coverage, in the methodologies used to prepare the

estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

NOTE.—Totals shown for the United States differ from the national income and product account estimates of gross domestic product (GDP) because GSP is derived from gross domestic income, which differs from GDP by the statistical discrepancy. In addition, GSP excludes and GDP includes the compensation of Federal civilian and military personnel stationed abroad and government consumption of fixed capital for military structures located abroad and

for military equipment, except office equipment. Also, GSP and GDP have different revision schedules.

1. Per capita personal income was computed using Census Bureau midyear population estimates. Estimates for 1996-98 reflect county population estimates available as of March 2000.

2. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts (NIPA's) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

3. Includes Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas (PMSA's designated by *), and New England County Metropolitan Areas (NECMA's). The New Haven-Bridgeport-Stamford-Danbury-Waterbury, CT NECMA is presented as a PMSA (part of the New York CMSA).

Additional Information About the NIPA Estimates

Statistical Conventions

Changes in current-dollar GDP measure changes in the market value of goods and services produced in the economy in a particular period. For many purposes, it is necessary to decompose these changes into quantity and price components. To compute the quantity indexes, changes in the quantities of individual goods and services are weighted by their prices. (Quantity changes for GDP are often referred to as changes in "real GDP.") For the price indexes, changes in the prices for individual goods and services are weighted by quantities produced. (In practice, the current-dollar value and price indexes for most GDP components are determined largely using data from Federal Government surveys, and the real values of these components are calculated by deflation at the most detailed level for which all the required data are available.)

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP in 1997–98 uses prices for 1997 and 1998 as weights, and the 1997–98 annual percent change in the GDP price index uses quantities for 1997 and 1998 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula.¹ These annual changes are "chained" (multiplied) together to form time series of quantity and price; the percent changes that are calculated from these time series are not affected by the choice of reference period.

The quarterly changes in quantities and prices are calculated with weights from two adjacent quarters. As part of an annual or comprehensive revision, the quarterly indexes through the most recent complete year are adjusted to ensure that the average of the quarterly indexes conforms to the corresponding annual index.

In addition, BEA prepares measures of real GDP and its components in a dollar-denominated form, designated "chained (1996) dollar estimates." These estimates are computed by multiplying the 1996 current-dollar value of GDP, or of a GDP component, by the corresponding quantity index number. For example, if a current-dollar GDP component equaled \$100 in 1996 and if real output for this component

increased by 10 percent in 1997, then the "chained (1996) dollar" value of this component in 1997 would be \$110 ($\100×1.10). Note that percentage changes in the chained (1996) dollar estimates and the percentage changes calculated from the quantity indexes are identical, except for small differences due to rounding.

Because of the formula used for calculating real GDP, the chained (1996) dollar estimates for detailed GDP components do not add to the chained-dollar value of GDP or to any intermediate aggregates. A "residual" line is shown as the difference between GDP and the sum of the most detailed components shown in each table. The residual generally is small close to the base period but tends to become larger as one moves further from it. Accurate measures of component contributions to the percentage changes in real GDP and its major components are shown in NIPA tables 8.2–8.6.

BEA also publishes the "implicit price deflator" (IPD), which is calculated as the ratio of current-dollar value to the corresponding chained-dollar value, multiplied by 100; the values of the IPD and of the corresponding "chain-type" price index are very close.

For quarters and months, the estimates are presented at annual rates, which show the value that would be registered if the rate of activity measured for a quarter or a month were maintained for a full year. Annual rates are used so that time periods of different lengths—for example, quarters and years—may be compared easily. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

Percent changes in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_o} \right)^{m/n} - 1 \right] \times 100,$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_o is the level of activity in the earlier period; m is the yearly periodicity of the data (for example, 1 for annual data, 4 for quarterly, or 12 for monthly); and n is the number of periods between the earlier and later periods (that is, $t - o$).

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

1. In addition, because the changes in quantities and prices calculated using these weights are symmetric, the product of a quantity index and the corresponding price index is generally equal to the current-dollar index.

Reconciliation Tables

Table 1.—Reconciliation of Changes in BEA-Derived Compensation Per Hour with BLS Average Hourly Earnings

[Percent change from preceding period]

	1998	1999	Seasonally adjusted at annual rates					
			1999				2000	
			I	II	III	IV	I	II
BEA-derived compensation per hour of all persons in the nonfarm business sector (less housing) ¹	5.1	4.8	5.0	5.5	4.2	3.9	5.9	6.3
Less: Contribution of supplements to wages and salaries per hour	-5	-3	-4	-5	-4	.1	.2	-.1
Plus: Contribution of wages and salaries per hour of persons in housing and in nonprofit institutions	-3	-1	-3	-5	-3	-1	-1	-5
Less: Contribution of wages and salaries per hour of persons in government enterprises, unpaid family workers, and self-employed	-1	0	-1	-1	-1	-1	-3	-.1
Equals: BEA-derived wages and salaries per hour of all employees in the private nonfarm sector	5.5	5.0	5.1	5.5	4.4	3.7	5.9	6.0
Less: Contribution of wages and salaries per hour of nonproduction workers in manufacturing	-1	-1	.4	.4	0	.2	.4	.4
Less: Other differences ²	1.5	1.4	1.0	1.4	1.3	-.3	1.6	1.9
Equals: BLS average hourly earnings of production or nonsupervisory workers on private nonfarm payrolls	4.1	3.6	3.7	3.7	3.1	3.8	3.9	3.8
Addendum: BLS estimates of compensation per hour in the nonfarm business sector ³	5.3	5.0	5.0	5.5	4.2	3.9	5.9	6.3

¹ Preliminary.

1. Includes BLS data on compensation and hours of nonfarm proprietors and hours worked of unpaid family workers.

2. Includes BEA use of non-BLS data and differences in detailed weighting. Annual estimates also include differences in BEA and BLS benchmark procedures; quarterly estimates also include

differences in seasonal adjustment procedures.

3. These estimates differ from the BEA-derived estimates (first line) because the BLS estimates include compensation and hours of tenant-occupied housing.

BLS Bureau of Labor Statistics

1. Consists of statistical revisions in the NIPA's that have not yet been incorporated into the ITA's (2000:III) and statistical revisions in the ITA's that have not yet been incorporated into the NIPA's (2000:I-2000:II).

ITA's International transactions accounts
NIPA's National income and product accounts

Appendix B

Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, regional, and international accounts.

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product), the estimates of wealth and related estimates, gross product by industry, the input-output accounts, and the satellite accounts.

National income and product accounts (NIPAs). This series of papers documents the conceptual framework of the NIPAs and the methodologies that have been used to prepare the estimates.

An Introduction to National Economic Accounting (1985) [also in the March 1985 SURVEY]

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (1985)

Foreign Transactions (1987) [A revised version is forthcoming.]

GNP: An Overview of Source Data and Estimating Methods (1987) [Most of the information in this paper has been superseded by "A Guide to the NIPAs" (March 1998 SURVEY).]

Government Transactions (1988)

Personal Consumption Expenditures (1990)

These methodologies have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPAs. The most recent revisions are described in the following SURVEY articles.

"A Preview of the 1999 Comprehensive Revision of the National Income and Product Accounts" Definitional and Classificational Changes (August 1999)

New and Redesigned Tables (September 1999)

Statistical Changes (October 1999)

"Improved Estimates of the National Income and Product Accounts: Results of the Comprehensive Revision"

For 1959-98 (December 1999)

For 1929-99 (April 2000)

"Annual Revision of the U.S. National Income and Product Accounts" (August 2000)

"A Guide to the NIPAs" (March 1998) provides the definitions of the major NIPA aggregates and components, discusses the measures of real output and prices, explains how production is classified and how the NIPAs are presented, describes the statistical conventions that are used, and lists the principal source data and methods that are used to prepare the estimates of gross domestic product (GDP).

Information about the sources and methods that are used to prepare the national estimates of personal income, which are the basis for the State estimates, is in *State Personal Income, 1929-97* (1999).

"BEA's Chain Indexes, Time Series, and Measures of Long-Term Economic Growth" (May 1997) is the most recent in a series of articles that describe the conceptual basis for the chain-type measures of real output and prices that are used in the NIPAs.

"Reliability of the Quarterly and Annual Estimates of GDP and Gross Domestic Income" (December 1998) evaluates these estimates by examining the record of revisions to them.

Wealth and related estimates. *Fixed Reproducible Tangible Wealth in the United States, 1925-94* (1999) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1925-98" (April 2000) describes the definitional and statistical improvements that were incorporated in the comprehensive revision of the estimates.

Gross product by industry. "Improved Estimates of

Mission and Strategic Plan

The mission statement of the Bureau of Economic Analysis and the latest update to its strategic plan for improving the accuracy, reliability, and relevance of the national, regional, and international accounts are available on BEA's Web site at <www.bea.doc.gov>. For information about the development and the implementation of the plan, see these SURVEY articles.

"Mid-Decade Strategic Review of BEA's Economic Accounts: Maintaining and Improving Their Performance" (February 1995)

"Mid-Decade Strategic Review of BEA's Economic Accounts: An Update" (April 1995)

"BEA's Mid-Decade Strategic Plan: A Progress Report" (June 1996)

"Gross Product by Industry for 1947-98" (June 2000) describes the most recent comprehensive revision of these estimates.

"Gross Domestic Product by Industry for 1997-99" (December 2000) describes the most recent annual revision of these estimates.

Input-output accounts. "Benchmark Input-Output Accounts for the U.S. Economy, 1992" (November 1997) describes the preparation of the 1992 accounts and the concepts and methods that underlie the accounts.

"Annual Input-Output Accounts of the U.S. Economy" presents annual tables that update the 1992 benchmark accounts

For 1996 (January 2000)

For 1997 (January 2001)

Satellite accounts. These accounts extend the analytical capacity of the national accounts by focusing on one aspect of economic activity.

"Integrated Economic and Environmental Satellite Accounts" and "Accounting for Mineral Resources: Issues and BEA's Initial Estimates" (April 1994)

"A Satellite Account for Research and Development" (November 1994)

"U.S. Transportation Satellite Accounts"

For 1992 (April 1998)

For 1996 (May 2000)

"U.S. Travel and Tourism Satellite Accounts"

For 1992 (July 1998)

For 1996 and 1997 (July 2000)

International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts (ITA's). *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (1990) describes the methodologies used to prepare the estimates in the ITA's and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the ITA's.

"U.S. International Transactions, Revised Estimates" is a series of articles about the annual ITA revisions and the improvements in methodology; the latest article is published in the July 2000 issue.

Direct investment. *International Direct Investment: Studies by the Bureau of Economic Analysis* (1999) is a collection of previously published articles on U.S. direct investment abroad and foreign direct investment in the United States. It also includes the following information.

"Methodology for U.S. Direct Investment Abroad," which is also available in *U.S. Direct*

Investment Abroad: 1994 Benchmark Survey, Final Results (1998)

"A Guide to BEA Statistics on U.S. Multinational Companies," which is also available in the March 1995 SURVEY

"Methodology for Foreign Direct Investment in the United States," which is also available in *Foreign Direct Investment in the United States: 1992 Benchmark Survey, Final Results* (1995)

"A Guide to BEA Statistics on Foreign Direct Investment in the United States," which is also available in the February 1990 SURVEY

International services. *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis* (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

Regional accounts

The regional accounts include estimates of personal income and gross state product.

Personal income. Estimates of personal income are prepared for States and for local areas.

"Comprehensive Revision of State Personal Income for 1969-99" (June 2000) summarizes the changes in the methodology that is used to prepare the estimates. The detailed methodology is available on the CD-ROM *State Personal Income, 1969-98*.

"Comprehensive Revision of Local Area Personal Income for 1969-98" (July 2000) summarizes the changes in the methodology that is used to prepare the estimates for counties and metropolitan areas. The detailed methodology is available on the CD-ROM *Regional Economic Information System, 1969-98*.

Gross state product. "Comprehensive Revision of Gross State Product by Industry, 1977-94" (June 1997 SURVEY) summarizes the sources and the methods that are used to prepare the estimates. "Gross State Product by Industry, 1977-98" (October 2000) describes the most recent comprehensive revision of these estimates.

Availability

Most of the items listed here are available on our Web site at <www.bea.doc.gov>; in particular, look under "Methodologies." Our online *Catalog of Products* provides descriptions of both our printed and electronic publications. The *Catalog* also includes links to compressed files of our diskette products that can be downloaded for free.

For specific information about the availability of our most recently released estimates and products, see "Getting BEA's Estimates" on the inside back cover.
