# Survey of Current Business 

The Survey of Current Business (ISSN 0039-6222) is published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, Survey of Current BusiNess, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Subscriptions to the Survey or Current Business are maintained, and their prices set, by the Government Printing Office, an agency of the U.S. Congress.

Send address changes to Superintendent of Documents U.S. Government Printing Office Washington, DC 20402

To subscribe, call 202-512-1800. To inquire about your subscription, call 202-512-1806.
Subscription and single-copy prices: Periodicals: $\quad \$ 48.00$ domestic $\$ 60.00$ foreign
First-class mail: $\$ 120.00$
Single copy: $\quad \$ 17.25$ domestic $\$ 21.56$ foreign
Make checks payable to the Superintendent of Documents.

Periodicals postage paid at Washington, DC and at additional mailing offices (USPS 337-790).
The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

this issue of the Survey went to the printer on October 17, 2000. It incorporates data from the following monthly BEA news releases:
U.S. International Trade in Goods and Services (September 20), Gross Domestic Product (September 28), and
Personal Income and Outlays (September 29).

# TABLE OF CONTENTS 

$\mathcal{S}_{\text {pecial in this issue }}$
69 Gross State Product by Industry, 1977-98
BEA's estimates of gross state product (GSP) by industry have been revised to incorporate the most recent comprehensive revisions of the NIPA's, of the national estimates of gross product by industry, and of the estimates of State personal income. In 1997-98, the State with the fastest growth in real GSP was Arizona (7.5 percent annual rate), followed by Oregon ( 7.2 percent) and Nevada ( 6.9 percent); the States with negative growth were Hawaii ( -0.5 percent) and Alaska ( -0.4 percent). The State with the largest share of nominal GSP in 1998 was California ( 12.8 percent), followed by New York ( 8.1 percent) and Texas ( 7.4 percent).

## $R_{\text {egular features }}$

1 Business Situation
Real GDP increased 5.6 percent in the second quarter of 2000, according to the "final" NIPA estimates; the upward revision of 0.3 percentage point from the "preliminary" estimate primarily reflected a downward revision to imports of services and an upward revision to exports of services. The price index for gross domestic purchases increased 2.1 percent; the downward revision of 0.2 percentage point primarily reflected downward revisions to the prices of personal consumption expenditures for services. Corporate profits increased $\$ 27.3$ billion ( 2.9 percent at a quarterly rate) in the second quarter.

## 91 U.S. International Transactions, Second Quarter 2000

The U.S. current-account deficit increased $\$ 4.6$ billion, to $\$ 106.1$ billion, in the second quarter of 2000; nearly all of the increase was accounted for by an increase in the deficit on goods. In the financial account, net recorded inflows increased $\$ 91.5$ billion, to $\$ 149.1$ billion; financial outflows slowed substantially, while financial inflows remained strong.

## 119 U.S. International Services: Cross-Border Trade in 1999 and Sales Through Affiliates in 1998

In 1999, U.S. cross-border exports of private services increased 4 percent to $\$ 254.7$ billion, and U.S. cross-border imports of these services increased 4 percent to $\$ 174.8$ billion; as a result, the U.S. surplus on cross-border trade in services increased $\$ 3.3$ billion, to $\$ 79.8$ billion. In 1998, sales of private services abroad by foreign affiliates of U.S. companies increased 21 percent to $\$ 309.0$ billion, and sales of services in the United States by U.S. affiliates of foreign companies increased 14 percent to $\$ 255.1$ billion.

## RECRUITMENT

Chief Statistician. BEA is recruiting for the position of Chief Statistician. The Chief Statistician oversees the development and application of mathematical and statistical techniques used by BEA to produce the U.S. national economic accounts, including the national income and product accounts (NIPA's), and the international and regional accounts. The Chief Statistician also oversees the selection and use of the economic data on which the accounts depend and serves as an advisor to the BEA Director and as a representative of BEA to government and private organizations on those subjects.

This is a career position in the Senior Executive Service, salary range: $\$ 115,811-\$ 130,200$. The application deadline is January 5,2001 . For more information, go to BEA's Web site at www.bea.doc.gov/bea/jobs/ bea0001p.htm or contact the Executive Resources Staff of the Bureau of the Census on 301-457-3727. The Department of Commerce does not condone or tolerate discrimination based on race, color, religion, sex, national origin, age, physical or mental disability, or sexual orientation.

Nore-More detailed contributions to percent change in real gross domestic procuct are shown in NIPA table 8.2. Contributions to percent change in major components of reat gross domestic product are shown in tables 83 through 8.6

The largest contributors to the second-quarter increase in real GDP were consumer spending for services, business investment in equipment and software, private inventory investment, and exports of goods (table 2). ${ }^{2}$ The increase in real GDP was moderated by an increase in imports (which are subtracted in the calculation of GDP).

The acceleration in real GDP growth in the second quarter reflected upturns in private inventory investment and in Federal Government spending and a step-up in exports of goods. These changes

[^0]Table 3.-Revisions to Change in Real Gross Domestic Product and Prices, Second Quarter 2000
[Seasonally adiusted at annual rates]

|  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |

were partly offset by decelerations in consumer spending for goods and in nonresidential fixed investment and an acceleration in imports of goods.

The final estimate of the change in real GDP is 0.3 percentage point more than the 5.3 -percent increase indicated by the preliminary estimate reported in the September "Business Situation" (table 3). For 1978-99, the average revision (without regard to sign) from the preliminary estimate to the final estimate was 0.3 percentage point. The upward revision to second-quarter real GDP primarily reflected a downward revision to imports of services and an upward revision to exports of services. These revisions reflected the incorporation of revised data from BEA's international transactions accounts.

Real gross domestic purchases increased 6.5 percent, 0.2 percentage point more than the preliminary estimate; in the first quarter, this measure increased 5.6 percent. ${ }^{3}$ Real final sales of domestic product increased 3.9 percent, 0.4 percentage point more than the preliminary estimate; in the first quarter, this measure increased 6.7 percent. ${ }^{4}$

The price index for gross domestic purchases increased 2.1 percent, 0.2 percentage point less than the preliminary estimate; in the first quarter, the index increased 3.8 percent. The downward revision to second-quarter prices primarily reflected revisions to the prices of personal consumption expenditures (PCE) for services-specifically, revisions to the implicit prices of brokerage and investment counseling that resulted from the incorporation of newly available data from the Securities and Exchange Commission. The GDP price index increased 2.4 percent in the second quarter, also 0.2 percentage point less than the preliminary estimate; in the first quarter, the index increased 3.3 percent.

Real disposable personal income (DPI) increased 3.7 percent in the second quarter, 0.4 percentage point more than the preliminary estimate; in the first quarter, real DPI increased 1.9 percent. The upward revision to real DPI reflected an upward revision to current-dollar DPI and the downward revision to PCE prices. Current-dollar DPI increased 5.9 percent, 0.2 percentage point more than the preliminary estimate; the upward revision reflected upward revisions to wages and salaries and to personal interest income. For wages and salaries, the extrapolation adjustment for

[^1]undercoverage of earnings was revised up on the basis of newly available Bureau of Labor Statistics (BLS) tabulations of unemployment insurance (UI) data for the first quarter. ${ }^{5}$ The upward revision to personal interest income was primarily due to the incorporation of revised and newly available data from the Federal Reserve Board flow-of-funds and from the Federal Deposit Insurance Corporation.

The personal saving rate-personal saving as a percentage of current-dollar DPI-was 0.3 percent, 0.1 percentage point higher than the preliminary estimate; in the first quarter, the rate was 0.2 percent.

Gross national product (GNP).—In the second quarter, real GNP-goods and services produced by labor and property supplied by U.S. residentsincreased 5.6 percent, the same increase as that in real GDP (table 4). ${ }^{6}$ Income receipts from the rest of the world increased slightly less than income payments to the rest of the world; about half of the increase in receipts was accounted for by corporate profits, and most of the increase in payments was accounted for by interest income.

Real GNP on a command basis, which measures the purchasing power of goods and services pro-

[^2]duced by the U.S. economy, increased more than real GNP- 5.9 percent, compared with 5.6 per-cent-reflecting an improvement in the terms of trade; the terms of trade deteriorated in each of the preceding four quarters. ${ }^{7}$

The national saving rate-gross saving as a percentage of GNP-was 18.6 percent in the second quarter after ranging from 18.2 percent to 18.4 percent in the preceding four quarters.

## Corporate Profits

According to revised estimates, profits from current production increased $\$ 27.3$ billion (or 2.9 percent at a quarterly rate) in the second quarter after increasing $\$ 43.1$ billion ( 4.8 percent) in the first (table 5). ${ }^{8}$

Profits of domestic nonfinancial corporations increased $\$ 27.3$ billion ( 4.3 percent), reflecting increases in unit profits and in real product. The increase in unit profits, which accounted for about

[^3]Table 4.-Relation of Real Gross Domestic Product, Real Gross National Product, and Real Command-Basis Gross National Product

| [Seasonally adjusted at annual rates] |
| :--- |

[^4]two-thirds of the increase in profits of nonfinancial corporations, resulted from a bigger increase in unit prices than in unit costs. Profits of domestic financial corporations decreased $\$ 5.5$ billion ( 3.2 percent). Profits from the rest of the world increased $\$ 5.4$ billion ( 4.2 percent), as receipts of earnings from foreign affiliates of U.S. corporations increased more than payments by U.S. affiliates of foreign corporations. ${ }^{9}$

The revised estimate of profits from current production is $\$ 0.4$ billion lower than the preliminary estimate. Profits of domestic nonfinancial corporations were revised down $\$ 2.5$ billion, and profits of domestic financial corporations were revised down $\$ 0.8$ billion; these revisions were largely offset by an upward revision of $\$ 2.7$ billion to profits from the rest of the world.

Cash flow from current production, a profitsrelated measure of internally generated funds available for investment, increased $\$ 35.3$ billion after increasing $\$ 37.7$ billion. ${ }^{10}$ The ratio of cash

[^5]flow to nonresidential fixed investment-an indicator of the share of the current level of investment that could be financed by internally generated funds-decreased slightly, from 74.5 percent to 74.3 percent. Over the last 10 quarters, the ratio has fluctuated between 74.1 percent and 78.1 percent.

Domestic industry profits and related measures.Domestic industry profits increased $\$ 27.7$ billion after increasing $\$ 35.8$ billion. ${ }^{11}$ Profits of domestic nonfinancial corporations increased $\$ 31.6$ billion after increasing $\$ 31.1$ billion. Profits of manufacturing and of retail trade increased less than in the first quarter. In contrast, profits of wholesale trade and of the transportation and public utilities group increased more than in the first quarter, and profits of "other" nonfinancial corporations increased after a small decrease. Profits of domes-

[^7]VA invenlory valun adju
tic financial corporations decreased $\$ 3.8$ billion after increasing $\$ 4.6$ billion.

Profits before tax (PBT) increased $\$ 21.8$ billion after increasing $\$ 50.0$ billion. The difference between the second-quarter increase in profits from current production and the increase in PBT reflected an increase in the inventory valuation adjustment that was partly offset by a decrease in the capital consumption adjustment. ${ }^{12}$

## Rates of return

New estimates of the rate of return and related series for domestic nonfinancial corporations in 1999 and revised estimates for 1997 and 1998 reflect the revised estimates of fixed assets that were published in the September Survey of Current

Source: Table 7.
NOTE.-Columns 1-3 are percentages of the net stock of produced assets (averages of end-of-year values for adjacent years) valued at current cost columns $4-6$ are percentages of domestic income. Estimates for earlier years are available in "Note on Rates of Return For Domes tic Nonfinancial Corporations: Revised Estimates for 1960-98," SURVEY 80 (June 2000): 15-17.

Business (tables 6 and 7). ${ }^{13}$ The rate of return was revised down 0.1 percentage point for 1997 and 0.2 percentage point for 1998; the revised rates remain the highest in more than 25 years.

#### Abstract

12. As prices change, companies that value inventory withdrawals at original acquisition (historical) costs may realize inventory profits or losses. Inventory profits-a capital-gains-like element in profits-result from an increase in inventory prices, and inventory losses-a capital-loss-like element in profitsresult from a decrease in inventory prices. In the NIPA's, inventory profits or losses are removed from business incomes by the inventory valuation adjustment (IVA); a negative IVA removes inventory profits, and a positive IVA removes inventory losses.

The capital consumption adjustment converts depreciation valued at historical cost and based on service lives and depreciation patterns specified in the tax code to depreciation valued at current cost and based on empirical evidence on the prices of used equipment and structures in resale markets. For more information on depreciation in the NIPA's, see Shelby W. Herman, "Fixed Assets and Consumer Durable Goods: Estimates for 1925-98," Survey of Current Business 80 (April 2000): 17-30. 13. Shelby W. Herman, "Fixed Assets and Consumer Durable Goods for 1925-99," SURVEY 80 (September 2000): 19-30. Rate-of-return estimates for 1960-98 were presented in "Note on Rates of Return For Domestic Nonfinancial Corporations: Revised Estimates for 1960-98," Survey 80 (June 2000): 15-17.

revised

1. Produced assets consist of structures, equipment and software, and imventories; they are valued at curtent cost at end of year. The estimates for structures and equipment and software are available on the BEA Web site; go to <bea.doc.gov/bea/dn2.htm> and click on "Data files
for the 15 tables in the above article." The estimates for domestic nonfinancial corporations are
in files "7kcutr" and "gkcutyt". Imventories are from legal-form and industry detail underving in ffiles "7kcu.txt" and "Okcu.btt". Inventories are from legal-form and industry detall underlying NIPA table 5.12 .
NOTE.-Property income is profits from current production plus net interest. Profits from current production is corporate profits with inventory valuation adjustment and capital consumption adjustment. Profits after tax is also shown with inventory valuation adjustment and capital consumption adjustment.

# Real Inventories, Sales, and Inventory-Sales Ratios for Manufacturing and Trade, 1996:IV-2000:II 

The real inventories, sales, and inventory-sales ratios have been revised, beginning with 1997, to incorporate new source data. The real inventories through the first quarter of 2000 are consistent with the revised inventory estimates that were published in the August 2000 Survey of Current Business. Real sales have been revised to be consistent with the inventories.

The accompanying tables present estimates of real inventories, sales, and inventory-sales ratios-quarterly, beginning with the fourth quarter of 1996, and monthly , beginning with January 2000.

## Data availability

The quarterly estimates of real manufacturing and trade inventories, sales, and inventory-sales ratios and real
manufacturing inventories by stage of fabrication for 1977:I-1996:III were published in the January 2000 Survey.

The quarterly estimates for 1967:I-2000:II are available as downloadable files on BEA's Web site at <www.bea.doc.gov>; click on "GDP and related data" and look under "Supplementary estimates."

The most recent estimates are available by subscription from BEA: On diskette as part of NIPA monthly update (product number NDS-0171, price \$204.00) and as separate monthly printouts (product number NLS-0166, price \$108.00). To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666).

${ }^{p}$ Preliminary.

1. Includes lumber and wood products; furniture and fixures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries.
2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather 3 and leaber producis.
3. Prior to 1981 , inventories and sales of auto and home supply stores are included in motor vehicle dealers.

Beginning with 1981, these inventories are included in "other durable goods."
NOTE.-Manufacturing inventories are classified by the type of product produced by the establishment holding
the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory. Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inven-
tories for 1996 equals the current-doliar change in inventories for 1996 and that the average of the t 1995 and 1996 tories for 1996 equals the current-doliar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-doliar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the cor responding chained-doilar estimates are ussally not additive. The residual line is the difference between the first
line and the sum of the most detailed lines for inventories.

| $p$ Preliminary. <br> 1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and related products; and miscellaneous manufacturing industries. <br> 2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products. |  |  |  |  |  |  |  |  | 3. Prior to 1981, inventories and sales of auto and home supply stores are included in motor vehicle dealers. Beginning with 1981, these inventories are included in "other durable goods." |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  | NOTE-Chained (1996) dollar sales are calculated as the product of the chaintype quantity index and the 1996 current-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. |  |  |  |  |  |  |  |  |  |  |  |  |  |

## ${ }^{p}$ Preiliminary.

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and
related products; and miscellaneous manuiacturing industries.
2. Includes tobacco manufacturess; textile mill products; apparet products; printing and pubishing; and leather and leather products.
3. Prior to 1981, inventories and sales of auto and home supply stores are included in motor vehicle dealers. Beginning with 1981, these inventories are included in "other durable goods."
NoTE.-Manufacturing inventories are classified by the type of product produced by the estabishment holding the inventory. Trade inventories are classified by the type of product sold by the establishment holding the inventory.

${ }^{p}$ Preliminary.

1. Includes lumber and wood products; furniture and fixtures; stone, clay, and glass products; instruments and
related products; and miscellaneous manufacturing industries.
2. Includes tobacco manufacturers; textile mill products; apparel products; printing and publishing; and leather and leather products.
NOTE.-Manufacturing inventories are classified by the type of product produced by the establishment holding
the inventory.
Chained (1996) doilar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the curtent-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the producd of the chain-type quantity index and tue 100 . Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

## Annual NIPA Revision

Newly Available Tables

the publication of national income and product accounts (NIPA) tables 3.15-3.20 and 9.1-9.6 below and of the "Updated Summary NIPA Methodologies" and the "Index to the NIPA Tables" elsewhere in this issue marks the completion of this year's annual NIPA revision. The article "Annual Revision of the NIPA's, 1997:I-2000:I" and most of the NIPA tables were published in the August Survey of Current Business. NIPA tables 5.16 and 8.28 and the report "Fixed Assets and

Consumer Durable Goods for 1925-99" were published in the September Survey.

The estimates for the full set of NIPA tables (for most tables, beginning with 1929 for annual estimates and with 1946 for quarterly estimates) are available on BEA's Web site at <www.bea.doc.gov>; click on "GDP and related data," and look under "time series estimates." Later this year, the NIPA estimates will be available on a CD-ROM.

| 1. Equals consumption expenditures, transter payments, net interest paid, less dividends received by government, subsidies less current surphus of governinent enterprises, less "wage accruals less disbursements"; for Federal Government, also includes grants-in-aid to State and local governments. Government, Federal Government, and State and local government current expenditures are shown separately in tables 3.1, 3.2, and 3.3. <br> 2. Federal grants-in-aid to State and local govemments are inctuded in Federai current expenditures; because the grants are transactions between levels of government, they are eliminated in the consolidation of the government sector. |  |  |  |  |  | 3. Consists of publicly owned liquor store systems, government-administered lotteries and parimutuels, and other commercial activities. <br> 4. No State and local government capital transfers have been identified. <br> 5. Consists of forgiveness of debts owed by foreign governments to the U.S. Government. <br> 6. Consists of Federal Government investment grants to State and local governments. <br> 7. Consists of maritime construction subsidies paid to business by the Federal Government. |  |  |  |  |  |

1. Consists largely of contributions for social insurance by residents of U.S. teritories and Puerto Rico.
2. These transactions are included in the NIPA personal sector.
3. Consists of estate and gift taxes.
4. Consists largely of U.S. Treasury receipts from sales of foreign currencies to Government agencies.
5. Taxes received from the rest of the world are included in receipts in the budget and netted against expenditures (transier payments) in the NIPA's.
6. Incluces proprietary receipts that are netted against outtiays in the bucget and classified as receipts in the NIPA's. Also includes some transactions that are not refiected in the budget data but are added to both receipts and expenditures in the NIPA's.
7. Consists largely of transfer payments, subsidies, and grants-in-aid to residents of U.S. territories and Puerto Rico.
8. Consists of transactions (not included in the budget totals) that record all cash flows arising from post-1991 direct loan obligations and loan guarantee commitments. Many of these flows are for new bans or loan repayments; consequently, related entries are included in line 32.
 were not induded in the budget in some time periods.
9. Net investment is gross investment less consumpion of fixed capital for government enterprises and general government.
10. Consists of investment granis to State and local governments and mantime construction subsidies. Does not include the forgiveness of debis owed by foreign governments to the U.S. Government; this forgiveness is classified as a capital transfer paid by the United States and is exciuded from both budget outlays and NIPA current expenditures.
11. Consists of net sales of land other than the Outer Continentai Shelf and, beginning with 1995, includes the auction of the radio spectrum
12. Consists largely of net expenditures of foreign currencies.

NoTE.-Through 1976, fiscal year estimates reflect a July 1-June 30 Federal fiscal year. Beginning with 1977, fiscal year estimates reflect an october 1.September 30 Federal fiscal year. NIPA quarterly and fiscal year estimates
in this table are consistent with the not seasonally adusted estimates in table 9.3 .

1. Contributions received, interest received, and dividends received are included in the NIPA personal sector. Capital gains net of losses are excluded from the NIPA's.
2. Consists of employer and employee contributions, except employer contributions to their own employee retirement plans.
3. Prior to 1968, dividends received is included in interest received (line 5).
4. Prior to 1985, capital gains (net of losses) of State and local employee retirement plans is included in line 11. 5.
5. Unemployment insurance is recorded as a Federal program in the NIPA's.
. Consists of estate and gift taxes and Federal investment grants.
6. In the NPA's, final expenditure components of GDP are recorded net of sales or receipts; all current-account sales by general government are therefore deducted in the calculation of NIPA current expenditures. However, most sales by general government are included in Census total revenue; a reconciliation item for these sales is therefore in table 3.9 because Census total revenue does not include medical vendor payments made by State and local governments to public institutions (classified as an intracovernmental transaction by Census) or the administrative governments to pubic instidu emsloyee retirement plans (treated in the NIPA's as sales by government to the per expenses of
7. Differences that arise from restating the Census Bureau data to a year ending June 30 are included in timing. Census Bureau measures of State and local government revenue and expenditures (lines 1 and 23 ) primarily repin this table are for the fiscal year ending June 30, and are consistent with the not seasonally adjusted estimates in table 9.4 .
8. These transactions are included in the NIPA personal sector
9. Net investment is gross investment less consumption of fixed capital for government enterprises and general government.

## Updated Summary NIPA Methodologies

THIS REPORT PRESENTS summary descriptions of the principal source data and methods used to prepare the cur-rent-dollar estimates of gross domestic product (GDP) and the estimates of real GDP. ${ }^{1}$ These descriptions have been updated to reflect the methodological improvements that were introduced in the comprehensive revision of the national income and product accounts (NIPA's) that was released in October 1999 and the annual revision of the NIPA's that was released in July $2000 .{ }^{2}$

## Current-dollar estimates

Table 1 lists the components of current-dollar GDP starting with the components on the product side and proceeding to those on the income side. The subcomponents, with their dollar values for 1999 , are grouped according to the methodology used to prepare them.

The column for the annual estimates covers the revision cycle for those estimates and notes the major differences in methodology as the estimates move through the three annual revisions to a benchmark revision. ${ }^{3}$ For example, for "most goods" in personal consumption expenditures (PCE) (the first item on the product side), the table indicates one methodology for benchmark years and another for all other years.

The column for the quarterly estimates covers only the advance estimate for the current quarter-that is, the estimate prepared about a month after the end of the quarter. That estimate, rather than the preliminary or final quarterly estimate, is described because more attention focuses on the "first look" at the quarter. In addition, the column lists only the source data and methods; it does not indicate how many months of source data are available or whether the data are subject to revision by the source agency. Information on the key monthly source data appears each month in the "Business Situation" in the Survey of Current Business. Additional information on the monthly source data used for the advance estimate is available online from the Department of Commerce's STAT-USA. ${ }^{4}$

The source data listed consist of a variety of economic measures, such as sales or receipts, wages and salaries, unit sales, housing stock, insurance premiums, expenses, interest rates, mortgage debt, and tax collec-

[^8]tions. For most components, the source data are "value data"; that is, they encompass both the quantity and price dimensions that are required for current-dollar estimates. In these cases, the methodology indicated in table 1 covers only the adjustment of the value data to derive estimates consistent with NIPA definitions and coverage.

For those estimates not derived from value data, the table indicates the combination of data with separate quantity and price dimensions that is used to derive the required value estimate and the major adjustments needed to derive estimates consistent with NIPA definitions and coverage. On the product side, a "physical quantity times price" method is used for several components. For example, the estimate for new autos is calculated as unit sales times expenditure per auto (the average list price with options, adjusted for transportation charges, sales tax, dealer discounts, and rebates). On the income side, an "employment times earnings times hours" method and variations of a "stock of assets/liabilities times an effective interest rate" method are used for several components.

Some of the source data shown in table 1 for the annual estimates are used as indicators to interpolate and extrapolate the levels established by source data that are more comprehensive, and all of the source data shown for the advance quarterly estimates are used to extrapolate the level of the preceding quarter. In addition, extrapolation and interpolation may be based on trends, as is the case when "judgmental trend" is listed in the table. ${ }^{5}$

Estimating methods.-Table 1 refers to four methodscommodity flow, retail control, perpetual inventory, and fiscal year analysis-used by BEA for estimating specific components.

The commodity-flow method is used to obtain the value of final users' purchases of goods and services (that is, commodities) for BEA's benchmark input-output accounts. These values serve as the benchmark for the NIPA estimates of PCE, of equipment and software, and of the commodity detail for State and local government consumption expenditures and gross investment. ${ }^{6}$ This method is also used for equipment and software in nonbenchmark years, but it is implemented in an abbreviated form. An even more abbreviated commod-ity-flow method is used for current quarterly estimates of equipment and software.

[^9]The retail-control method is used to estimate over one-third of the value of PCE for periods other than benchmark years. This method provides the indicator series used in extrapolating and interpolating the total of "most goods" and the "control" total to which the PCE categories and residential equipment included in this group must sum. These PCE categories consist of all goods except autos and trucks, food furnished to employees, food and fuel produced and consumed on farms, standard clothing issued to military personnel, school lunches, and net foreign remittances. ${ }^{7}$

The perpetual-inventory method is used to derive estimates of fixed capital stock, which in turn form the basis for the estimates of consumption of fixed capital. This method is based on investment flows and a geometric depreciation formula; it is used instead of direct measurement of the capital stock because direct measurement is seldom statistically feasible on a comprehensive basis. ${ }^{8}$

The fiscal year-analysis method provides the framework for the annual and quarterly estimates of Federal Government consumption expenditures and gross investment. The estimates of expenditures are prepared by program-that is, by activity for a group of line items or for an individual line item in the Budget of the U.S. Government. For most programs, the fiscal year analysis begins by adjusting budget outlays for coverage and for netting and grossing differences between these outlays and NIPA expenditures. The expenditures total (as adjusted) for a program is then classified by type of NIPA expenditure-for example, transfer payments and interest paid-with nondefense consumption expenditures and gross investment determined residually. When a fiscal year analysis is completed, the detailed array of NIPA expenditures by program and by type of expenditure serves as a set of control totals for the quarterly estimates. ${ }^{9}$

International transactions accounts (ITA's).-The source data for the foreign transactions reflected in most NIPA components-such as net exports of goods and services and rest-of-the-world corporate profits-are the ITA's, which are also prepared by BEA. ${ }^{10}$ As noted in table 1,
7. For additional information, see Personal Consumption Expenditures, 41-54; and GNP: An Overview, 17.
8. For additional information on the perpetual-inventory method, see U.S. Department of Commerce, Bureau of Economic Analysis, Fixed Reproducible Tangible Wealth in the United States, 1925-94 (Washington, DC: U.S. Government Printing Office, August 1999): M-3-M-36; and GNP: An Overview, 17-18.
9. For additional information and an example of the fiscal year-analysis method, see U.S. Department of Commerce, Bureau of Economic Analysis, Government Transactions, Methodology Paper No. 5 (Washington, DC: U.S. Government Printing Office, 1988): 19-20.
10. See U.S. Department of Commerce, Bureau of Economic Analysis, The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures, (Washington, DC: U.S. Government Printing Office, 1990). The methodologies described in this publication are subject to periodic improvements, which are typically introduced as part of the annual revision of the ITA's; these improvements are described in the Surver articles that cover the annual ITA revisions, most recently in "U.S. International Transactions, Revised Estimates for 1982-99," Survey 80 (July 2000): 70-77.
for some NIPA components, the ITA estimates are adjusted to conform to NIPA concepts and definitions. ${ }^{11}$ Annual estimates of these adjustments and their definitions are shown in NIPA table 4.5, which was last published in the August 2000 Survey on page 68; summary quarterly estimates are shown in "Reconciliation Tables" in appendix A of the Survey.

Other information.-In preparing the annual estimates of several of the income-side components, BEA adjusts the source data for various coverage and conceptual differences. For each subcomponent listed below, an annual NIPA table reconciles the value published by the source agency with the NIPA value published by BEA and identifies the BEA adjustments. The following is a list of the subcomponents and their corresponding reconciliation tables, which were last published in the August 2000 Surver beginning on page 118: Wages and salaries, table 8.27; farm proprietors' income, table 8.24; nonfarm proprietors' income, table 8.23; corporate profits, table 8.25; net interest, table 8.26; and consumption of fixed capital, table 8.22.

## Real estimates

Table 2 shows which one of three methods-deflation, quantity extrapolation, and direct base-year valua-tion-is used to prepare the quantity index for each detailed product-side component of real GDP and identifies the source data with which the method is implemented. ${ }^{12}$ Deflation is used for most of the detailed components. In deflation, the quantity index is obtained by dividing the current-dollar index by an appropriate price index that has the base year-currently 1996-equal to 100 and then by multiplying the result by 100 .

The quantity-extrapolation and direct-base-yearvaluation methods are similar in that they both use explicit quantity data. In quantity extrapolation, quantity indexes are obtained by using a quantity indicator to extrapolate from the base-year value of 100 in both directions. In direct-base-year valuation, quantity indexes are obtained by multiplying the base-year price by actual quantity data for the index period and then expressing the result as an index with the base year equal to 100 .

The subcomponents in table 2 are the same as those shown in table 1, but the detail differs to highlight the alternative methodologies used for calculating the real estimates. ${ }^{13}$

Tables 1 and 2 follow.
11. These adjustments are described in U.S. Department of Commerce, Bureau of Economic Analysis, Foreign Transactions, Methodology Paper No. 3 (Washington, DC: U.S. Government Printing Office, 1987): 15-25.
12. For additional information on the calculation of real GDP, see "A Guide to the NIPA's," 36-40.
13. For the real estimates, the distinction between annual and quarterly methodologies is far less important than it is for the current-dollar estimates. For the relatively few cases in which the annual and quarterly source data differ, the major differences are noted in the entry.

Table 1.-Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP

| Component <br> (billions of dollars) | Subcomponent <br> (billions of dollars) | Annual estimates: Source data and methods used to deter- <br> mine level for benchmark and other years or used to prepare <br> an extrapolator or interpolator | Advance quarterly estimates: <br> Source data and methods used to <br> prepare an extrapolator |
| :---: | :---: | :---: | :---: |

Product side (GDP of $\$ 9,299.2$ billion for 1999)

$(\$ 2,203.5)$

New autos
(\$97.3)

Net purchases of used autos
(\$58.7)

New trucks
(\$98.1)

Benchmark years-Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data.
Other years-Retail-control method, using retail sales from Census Bureau annual survey of retail trade or, for most recent year, monthly survey of retail trade.
Benchmark years-Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data.
Other years--Physical quantity purchased times average retail price: Unit sales, information to allocate sales among consumers and other purchasers, and average list price with options, all from trade sources. Transportation charges, dealer discounts, and rebates from the BLS monthly survey of auto sales prices. Sales tax rate from Census Bureau annual survey of retail trade.
Benchmark years--For net transactions, residual based on net sales by other sectors. For dealers' margin, retail sales from Census Bureau quinquennial census and margin rate from Census Bureau annual survey of retail trade.
Other years except most recent-For net transactions, change in consumer stock of autos from trade sources. For dealers' margin, for franchised dealers, unit sales and sales price from trade sources, times margin rate for independent dealers from Census Bureau annual survey of retail trade; for independent dealers, margin from Census Bureau annual survey of retail trade.
Most recent year-For net transactions, same as other years except most recent. For dealers' margin, for franchised dealers, unit sales and sales price from trade sources; for independent dealers, sales from Census Bureau monthly survey of retail trade.
Benchmark years-Commodity-flow method, starting with manufacturers' shipments from Census Bureau quinquennial census and including an adjustment for exports and imports from Census Bureau foreign trade data.
Other years except most recent-Abbreviated commodity-flow method, starting with manufacturers' shipments from Census Bureau annual survey and including an adjustment for exports and imports from Census Bureau foreign trade data.
Most recent year-Physical quantity purchased times average retail price: Unit sales, information to allocate sales among consumers and other purchasers, and average list price, all from trade sources.

Same as annual for other years.

Same as annual for other years.

For net transactions, residual based on net sales by other sectors. For dealers' margin, judgmental trend.

Same as annual for most recent year.

| Government consumption expenditures and gross investmentContinued | State and local brokerage charges and financial services furnished without payment (\$13.7) <br> State and local consumption of general government fixed capital (\$83.0) <br> State and local consumption expenditures and gross investment, except compensation, structures, software, brokerage charges and financial services furnished without payment, and consumption of fixed capital (\$170.5) | See entries for "brokerage charges" and "financial services furnished without payment" under personal consumption expenditures for services. <br> Perpetual-inventory calculations at current cost, based on gross investment and on investment prices. <br> Years except 3 most recent-Total expenditures from Census Bureau quinquennial census and annual surveys of State and local governments, selectively replaced with source data that are more appropriate for the NIPA's and adjusted as follows: For coverage; for netting and grossing differences; to a calendar year basis from a fiscal year basis; for other timing differences; to exclude interest, subsidies, net expenditures of government enterprises, and transfer payments; and to exclude compensation and structures. Three most recent years-Judgmental trend. | See entries for "brokerage charges" and "financial services furnished without payment" under personal consumption expenditures for services. <br> Same as annual. <br> Judgmental trend. |

Income side (Gross national income of $\$ 9,360.1$ billion for 1999)

## Compensation of employees $(\$ 5,299.8)^{6}$

Wage and salary accruals: Private industries (\$3,750.8)

Wage and salary accruals: Federal Government (\$184.9)

Wage and salary accruals: State and local governments (\$539.5)
Employer contributions for social insurance (\$323.6)

Other labor income: Group health insurance (\$280.2)

For most industries, BLS annual tabulations of wages and salaries of employees covered by State unemployment insurance; for others, wages from a variety of sources (such as the Department of Agriculture for farms and the Railroad Retirement Board for railroad transportation), adjusted for understatement of income on tax returns and for coverage differences.
For civilians, wages from the Office of Personnel Management; for military personnel, wages from the Budget of the United States prepared by the Office of Management and Budget.

BLS annual tabulations of wages and salaries of employees covered by State unemployment insurance.

Tabulations from the Social Security Administration and other agencies administering social insurance programs.

Years except 3 most recent-Total contributions from the Health Care Financing Administration less employee contributions from the BLS consumer expenditure survey.
Third most recent year-Employer costs for health insurance from Department of Health and Human Services survey.
Two most recent years-BLS employer costs for employee health insurance and wages and salaries from annual tabulations of employees covered by State unemployment insurance.

For most industries, wages and salaries derived from BLS monthly employment times earnings times hours; for others, judgmental trend.

For civilians, employment from the BLS and judgmental trend; for milltary personnel, employment from the Department of Defense and judgmental trend.
Derived from BLS monthly employment times earnings from BLS employment cost index.

For Federal programs, BEA-derived wages and salaries of employees covered by the programs; for State and local government programs, judgmental trend.
Judgmental trend.

Table 1.-Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP-Continued

| Component <br> (billions of dollars) | Subcomponent <br> (billions of dollars) | Annual estimates: Source data and methods used to deter- <br> mine level for benchmark and other years or used to prepare <br> an extrapolator or interpolator | Advance quarterly estimates: <br> Source data and methods used to <br> prepare an extrapolator |
| :---: | :---: | :---: | :---: |

Income side (Gross national income of $\$ 9,360.1$ billion for 1999)-Continued
Compensation of
employees-
Continued

Proprietors' income with IVA and CCAdj
(\$663.5)

Other labor income: Government employee retirement plans (\$109.2)

Other labor income: Private pension and profit-sharing
(\$60.4)
Other labor income: Workers' compensation (\$34.5)

Other labor income: Group life insurance (\$11.8)

Farm income with IVA (\$33.6)

Farm CCAdj
(-\$8.3)
Nonfarm income
(\$586.9)

Nonfarm IVA
(-\$1.4)
Nonfarm CCAdj
(\$52.7)

Years except most recent-For Federal plans, outlays from the Monthly Treasury Statement, for State and local government plans, Census Bureau annual surveys of State and local government retirement funds, adjusted to a calendar year basis from a fiscal year basis.
Most recent year-For Federal plans, same as years except most recent; for State and local government plans, Census Bureau annual surveys of State retirement funds, adjusted to a calendar year basis from a fiscal year basis.
Years except 2 most recent-Tabulations from the Department of Labor.
Two most recent years-Employer costs for employee compensation from the BLS or Internal Revenue Service tabulations of business tax returns.
Years except most recent-Employer contributions from trade sources and contributions for self-insured plans from the Social Security Administration.
Most recent year-Judgmental trend.
Years except most recent-Group premiums and estimates of employer share from trade sources.
Most recent year-Judgmental trend.
Department of Agriculture data on net income, obtained by deriving gross income (cash receipts from marketing, inventory change, government payments, other cash income, and nonmoney income) and subtracting production expenses, adjusted to exclude corporate income based on Department of Agriculture quinquennial census and annual survey data.

See entry for "CCAdj" under consumption of fixed capital.
Years except most recent-Income from Internal Revenue Service tabulations of business tax returns, adjusted for understatement of income on tax returns and for conceptual differences.
Most recent year-For construction, trade, and services, indicators of activity (such as value of housing put in place); for most others, judgmental trend.
See entry for "IVA" under corporate profits with IVA and CCAdj.
See entry for "CCAdj" under consumption of fixed capital.

For Federal plans, same as annual for most recent year; for State and local government plans, judgmental trend.

Judgmental trend.

Judgmental trend.

Judgmental trend.

For crops, BEA quarterly allocation of Department of Agriculture annual projections of crop output; for livestock, Department of Agriculture quarterly projections of cash receipts and inventories; for both crops and livestock, quarterly allocation of Department of Agriculture annual projections of government subsidy payments and production expenses.

Same as annual for most recent year.

Table 1.-Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP-Continued

| Component <br> (billions of dollars) | Subcomponent <br> (billions of dollars) | Annual estimates: Source data and methods used to deter- <br> mine level for benchmark and other years or used to prepare <br> an extrapolator or interpolator | Advance quarterly estimates: <br> Source data and methods used to <br> prepare an extrapolator |
| :---: | :---: | :---: | :---: |

Income side (Gross national income of $\$ 9,360.1$ billion for 1999)-Continued

| Rental income of <br> persons with <br> CCAdj <br> $(\$ 143.4)$ | Owner-occupied nonfarm <br> housing <br> $(\$ 132.8)$ |
| :---: | :---: |
|  |  |
|  |  |
|  | Tenant-occupied nonfarm <br> housing <br> (\$49.2) |
|  |  |

Farms owned by nonoperator landlords (\$6.5)
Nonfarm nonresidential properties
(\$2.6)

Royalties
(\$8.4)
CCAdj
( $\$ \mathbf{\$ 5 6 . 0}$ )

Corporate protits with IVA and CCAdj
(\$856.0)

Benchmark years-Derived as space rent (see entry for "nonfarm dwellings" under personal consumption expenditures) less related expenses, including property insurance from trade source; mortgage interest and property taxes from Census Bureau decennial survey of residential finance.
Other years-Same as benchmark years, except mortgage interest, based on mortgage debt from the Federal Reserve Board times a BEA interest rate, and property taxes from Census Bureau annual surveys of State and local tax collections.
Same as owner-occupied nonfarm housing, adjusted to cover only rental income accruing to persons not primarily engaged in the real estate business from Census Bureau decennial survey of residential finance.
Prepared in conjunction with farm proprietors' income; see entry for "farm income with IVA" under proprietors' income with IVA and CCAdj.
Benchmark years-Nonfarm nonresidential fixed assets from BEA capital stock series times a rate of return on capital based on Internal Revenue Service tabulations of business tax returns.
Other years-BEA capital stock series and judgmental trend.
Years except most recent-Internal Revenue Service tabulations of royalties reported on individual income tax returns. Most recent year-Judgmental trend.
See entry for "CCAdj" under consumption of fixed capital.

Years except most recent-Receipts less deductions from Internal Revenue Service tabulations of business tax returns, adjusted for understatement of income on tax returns and for conceptual differences.
Most recent year-Profits from Census Bureau quarterly survey of corporate profits, regulatory agency reports, and compilations of publicly available corporate financial statements.
Estimated as part of the international transactions accounts: For direct investment income, BEA surveys; for portfolio income, Treasury Department surveys. Adjusted for NIPA coverage of U.S. territories and Puerto Rico-see entry for "exports and imports of goods, net," under net exports of goods and services.
The IVA on the income side (for corporations and for nonfarm sole proprietorships and partnerships) and the IVA on the product side (described under the entry for "change in private inventories") differ because the source data reflect different proportions of inventories reported using different accounting methods (last-in, first-out (LIFO), etc.). The in-come-side IVA is based on the product-side IVA, adjusted by the relationship between non-LIFO inventories from Internal Revenue Service tabulations of business tax returns and non-LIFO inventories from the Census Bureau.
See entry for "CCAdj" under consumption of fixed capital.

For owner-occupied space rent, same as annual; for depreciation, interest, closing costs, real estate dealers' commissions, and taxes, based on NIPA estimates of those components; for other expenses, judgmental trend.

Same as annual.

Judgmental trend.

Judgmental trend.

Judgmental trend.

For some industries in transportation and in finance, judgmental trend; for others, same as annual for most recent year. (Released at time of preliminary estimate of GDP for the first, second, and third quarters and of final estimate for the fourth quarter.)
Same as annual. (Released on same schedule as domestic profits before tax.)

Same as annual.

Table 1.-Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP—Continued

| Component <br> (billions of dollars) | Subcomponent <br> (billions of dollars) | Annual estimates: Source data and methods used to deter- <br> mine level for benchmark and other years or used to prepare <br> an extrapolator or interpolator | Advance quarterly estimates: <br> Source data and methods used to <br> prepare an extrapolator |
| :---: | :---: | :---: | :---: |

| Income side (Gross national income of \$9,360.1 billion for 1999)-Continued |  |  |  |
| :---: | :---: | :---: | :---: |
| Net interest (\$507.1) | Domestic monetary, net (\$176.1) | Years except most recent-For farm interest paid, Department of Agriculture surveys; for residential mortgage interest paid, Census Bureau decennial survey of residential fi nance and mortgage debt from the Federal Reserve Board times a BEA interest rate; for most other interest paid and received by business, Internal Revenue Service tabulations of business tax returns, adjusted for misreporting on tax returns and for conceptual differences. <br> Most recent year-For farm and mortgage interest paid, same as other years; for other interest, interest receipts and payments from regulatory agencies (such as the Federal Deposit Insurance Corporation), from trade sources, or obtained by applying BEA interest rates to interest-bearing assets/liabilities from Federal Reserve Board flow-of-funds accounts. | Derived by combining estimates of (1) interest received by persons, (2) government interest paid and received, and (3) interest paid by persons. For (1), judgmental trend; for (2), Monthly Treasury Statement for Federal and judgmental trend for State and local; for (3), consumer debt from the Federal Reserve Board times BEA estimates of interest rates. (Released on same schedule as domestic profits before tax.) |
|  | Rest-of-the-world monetary, net (-\$100.6) | Estimated as part of the international transactions accounts: For direct investment income, BEA surveys; for portfolio income, Treasury Department surveys. Adjusted for NIPA coverage of U.S. territories and Puerto Rico-see entry for "exports and imports of goods, net," under net exports of goods and services. | Same as annual. (Released on same schedule as domestic profits before tax.) |
|  | Imputed-banks, credit agencies, and investment companies (\$254.4) | Property income earned on investment of deposits less monetary interest paid to depositors (and for mutual depositories, profits from Internal Revenue Service tabulations of business tax returns) from annual reports of regulatory agencies and the Federal Reserve Board. Imputed interest (financial services furnished without payment) is allocated to persons, government, and the rest of the world on the basis of deposit liabilities from the same sources. | Judgmental trend. |
|  | Imputed-life insurance carriers (\$177.3) | Property income earned and profits from Internal Revenue Service tabulations of business tax returns, trade sources, and the Federal Reserve Board. | Judgmental trend. (Released on same schedule as domestic profits before tax.) |
| Business transfer payments (\$39.7) |  | Payments to persons: For charitable contributions, for years except most recent, Internal Revenue Service tabulations of business tax returns or, for most recent year, judgmental trend; for other components (such as liability payments for personal injury), for years except most recent, information from government agency reports and trade sources or, for most recent year, judgmental trend. Payments to the rest of the world: Estimated as part of the international transactions accounts. | Judgmental trend. |
| Indirect business tax and nontax liability (\$718.1) | Federal Government (\$100.5) | For excise taxes, collections from the Bureau of Alcohol, Tobacco, and Firearms and the Internal Revenue Service; for customs duties, receipts from the Monthly Treasury Statement, and for nontaxes (such as fines), receipts from the Budget of the United States prepared by the Office of Management and Budget. | For customs duties, Monthly Treasury Statement, for most excise taxes, derived from indicators of activity (such as gasoline production for gasoline tax); for others in this group, judgmental trend. |
|  | State and local governments (\$617.5) | Receipts from Census Bureau quinquennial census and annual surveys, adjusted to a calendar year basis from a fiscal year basis. |  |

See footnotes at end of table.

Table 1.-Principal Source Data and Estimating Methods Used in Preparing Estimates of Current-Dollar GDP-Continued

| Component <br> (billions of dollars) | Subcomponent <br> (billions of dollars) | Annual estimates: Source data and methods used to deter- <br> mine level for benchmark and other years or used to prepare <br> an extrapolator or interpolator | Advance quarterly estimates: <br> Source data and methods used to <br> prepare an extrapolator |
| :---: | :---: | :---: | :---: |

| Income side (Gross national income of \$9,360.1 billion for 1999)-Continued |  |  |  |
| :---: | :---: | :---: | :---: |
| Subsidies less current surplus of government enterprises (\$21.5) | Federal Government (\$39.3) | For subsidies, payments by the Commodity Credit Corporation from agency reports and, for most other agencies, outlays from the Monthly Treasury Statement, for current surplus, mainly reports of various agencies, such as the Postal Service, and consumption of fixed capital estimates derived with perpetual-inventory calculations at current cost, based on gross investment and on investment prices. | For subsidies, Commodity Credit Corporation reports and judgmental trend; for current surplus, judgmental trend and consumption of fixed capital estimates derived with perpetual-inventory calculations at current cost, based on gross investment and on investment prices. |
|  | State and local governments (-\$11.0) | For subsidies, limited to railroad, Census Bureau annual surveys of expenditures, adjusted to a calendar year basis from a fiscal year basis. For current surplus: For current operating receipts, mainly revenue data from Census Bureau annual surveys of State and local governments, adjusted to a calendar year basis from a fiscal year basis; for current operating expenditures, see entries for "State and local consumption of general government fixed capital" and "State and local consumption expenditures and gross investment, except compensation, structures, software, brokerage charges and financial services furnished without payment, and consumption of fixed capital" under Government consumption expenditures and gross investment. | Judgmental trend. |
| Consumption of fixed capital $(\$ 1,161.0)$ | Government: (\$199.6) |  |  |
|  | General government (\$170.3) | Perpetual-inventory calculations at current cost, based on gross investment and on investment prices. | Same as annual. |
|  | Government enterprise (\$29.3) | Perpetual-inventory calculations at current cost, based on gross investment and on investment prices. | Same as annual. |
|  | Private: (\$961.4) | Perpetual-inventory calculations at current cost, based on gross investment and on investment prices. | Same as annual. |
|  | Capital consumption allowances (\$984.9) | Years except most recent-For depreciation of corporations and of nonfarm sole proprietorships and partnerships, Internal Revenue Service tabulations of business tax returns, adjusted for conceptual differences; for other depreciation (including noncorporate farms, nonprofit institutions, and owner-occupied houses), perpetual-inventory calculations; for accidental damage to fixed capital, losses reported to insurance companies and government agencies. <br> Most recent year-For depreciation of corporations and nonfarm sole proprietorships and partnerships, BEA estimates of tax-return-based depreciation; for other depreciation and accidental damage to fixed capital, same as other years. | Judgmental trend. |
|  | $\begin{aligned} & \text { Less: CCAdj } \\ & \text { (\$23.5) } \end{aligned}$ | For corporations and nonfarm sole proprietorships and partnerships, the difference between tax-return-based calculations and perpetual-inventory calculations; for others (including noncorporate farms, nonprofit institutions, and owner-occupied houses), the difference between perpetualinventory calculations at historical cost and current cost. | Judgmental trend. |

[^13]
## Index to the NIPA Tables

the entries in this index refer to the table numbers in the full 147-table set of the national income and product accounts (NIPA's). The 60 "Selected NIPA Tables" that are published each month in the Survey of Current Business are identified by bold italic type.

The first character of the NIPA table number (the number preceding the decimal point) identifies the table as belonging to one of the following subject areas:
S. Summary Tables

1. National Product and Income
2. Personal Income and Outlays
3. Government Current Receipts and Expenditures
4. Foreign Transactions
5. Saving and Investment
6. Income and Employment by Industry
7. Quantity and Price Indexes
8. Supplemental Tables
9. Seasonally Unadjusted Estimates

For most of the NIPA tables showing the industry distributions of gross domestic product, national income, and their components, a suffix is used to represent the year of the Standard Industrial Classification (SIC) underlying the estimates. Estimates for 1929-48, based on the 1942 SIC, are shown in tables designated with an "A" suffix; estimates for 1948-87, based on the 1972 SIC, are shown in tables with a " $B$ " suffix; and estimates for 1987 forward, based on the 1987 SIC, are shown in tables with a "C" suffix.

## A

Accidental damage 8.22
Accounting machinery 5.8, 5.9, 7.8
Accruals See corporate profits tax accruals; indirect business tax and nontax accruals; wage accruals less disbursements.
Accumulation of produced assets 5.16
Adjusted gross income 8.28
Administrative expenses of government employee retirement plans 3.18A, 3.18B, 3.19

Administrative expenses of social insurance funds 3.14, 3.15
After-tax income See corporate profits after tax; disposable personal income.
Agricultural services, forestry, and fishing (industry tables) 6.2 A , $6.2 \mathrm{~B}, 6.2 \mathrm{C}, 6.3 \mathrm{~A}, 6.3 \mathrm{~B}, 6.3 \mathrm{C}, 6.4 \mathrm{~A}, 6.4 \mathrm{~B}, 6.4 \mathrm{C}, 6.5 \mathrm{~A}, 6.5 \mathrm{~B}, 6.5 \mathrm{C}, 6.6 \mathrm{~A}$, $6.6 \mathrm{~B}, 6.6 \mathrm{C}, 6.7 \mathrm{~A}, 6.7 \mathrm{~B}, 6.7 \mathrm{C}, 6.8 \mathrm{~A}, 6.8 \mathrm{~B}, 6.8 \mathrm{C}, 6.9 \mathrm{~B}, 6.9 \mathrm{C}, 6.12 \mathrm{~A}$, $6.12 \mathrm{~B}, 6.12 \mathrm{C}, 6.13 \mathrm{~A}, 6.13 \mathrm{~B}, 6.13 \mathrm{C}, 6.17 \mathrm{~A}, 6.17 \mathrm{~B}, 6.17 \mathrm{C}, 6.18 \mathrm{~A}, 6.18 \mathrm{~B}$, $6.18 \mathrm{C}, 6.19 \mathrm{~A}, 6.19 \mathrm{~B}, 6.19 \mathrm{C}, 6.20 \mathrm{~A}, 6.20 \mathrm{~B}, 6.20 \mathrm{C}, 6.21 \mathrm{~A}, 6.21 \mathrm{~B}, 6.21 \mathrm{C}$, 6.22A, 6.22B, 6.22C

Agriculture:
Forestry and fishing (industry tables) $6.1 \mathrm{~A}, 6.1 \mathrm{~B}, 6.1 \mathrm{C}, 6.2 \mathrm{~A}, 6.2 \mathrm{~B}$, $6.2 \mathrm{C}, 6.3 \mathrm{~A}, 6.3 \mathrm{~B}, 6.3 \mathrm{C}, 6.4 \mathrm{~A}, 6.4 \mathrm{~B}, 6.4 \mathrm{C}, 6.5 \mathrm{~A}, 6.5 \mathrm{~B}, 6.5 \mathrm{C}, 6.6 \mathrm{~A}$, $6.6 \mathrm{~B}, 6.6 \mathrm{C}, 6.7 \mathrm{~A}, 6.7 \mathrm{~B}, 6.7 \mathrm{C}, 6.8 \mathrm{~A}, 6.8 \mathrm{~B}, 6.8 \mathrm{C}, 6.9 \mathrm{~B}, 6.9 \mathrm{C}, 6.10 \mathrm{~B}$, $6.10 \mathrm{C}, 6.11 \mathrm{~A}, 6.11 \mathrm{~B}, 6.11 \mathrm{C}, 6.13 \mathrm{~A}, 6.13 \mathrm{~B}, 6.13 \mathrm{C}, 6.15 \mathrm{~A}, 6.15 \mathrm{~B}$, $6.15 \mathrm{C}, 6.17 \mathrm{~A}, 6.17 \mathrm{~B}, 6.17 \mathrm{C}, 6.18 \mathrm{~A}, 6.18 \mathrm{~B}, 6.18 \mathrm{C}, 6.19 \mathrm{~A}, 6.19 \mathrm{~B}$, $6.19 \mathrm{C}, 6.20 \mathrm{~A}, 6.20 \mathrm{~B}, 6.20 \mathrm{C}, 6.21 \mathrm{~A}, 6.21 \mathrm{~B}, 6.21 \mathrm{C}, 6.22 \mathrm{~A}, 6.22 \mathrm{~B}$, 6.22 C

Goods, exports 4.3, 4.4, 7.10
Government expenditures by function 3.15, 3.16, 3.17
Machinery 5.8, 5.9, 7.8
Subsidies 3.13
See also farm.
Aid to families with dependent children See family assistance.
Air transportation:
Current surplus of government enterprises 3.13

Excise taxes, Federal 3.5
Government expenditures by function $3.15,3.16,3.17$
Industry tables $6.2 \mathrm{~A}, 6.2 \mathrm{~B}, 6.2 \mathrm{C}, 6.3 \mathrm{~A}, 6.3 \mathrm{~B}, 6.3 \mathrm{C}, 6.4 \mathrm{~A}, 6.4 \mathrm{~B}, 6.4 \mathrm{C}$, $6.5 \mathrm{~A}, 6.5 \mathrm{~B}, 6.5 \mathrm{C}, 6.6 \mathrm{~A}, 6.6 \mathrm{~B}, 6.6 \mathrm{C}, 6.8 \mathrm{~A}, 6.8 \mathrm{~B}, 6.8 \mathrm{C}, 6.17 \mathrm{~A}, 6.17 \mathrm{~B}$, $6.17 \mathrm{C}, 6.18 \mathrm{~A}, 6.18 \mathrm{~B}, 6.18 \mathrm{C}, 6.19 \mathrm{~A}, 6.19 \mathrm{~B}, 6.19 \mathrm{C}, 6.20 \mathrm{~A}, 6.20 \mathrm{~B}$, $6.20 \mathrm{C}, 6.21 \mathrm{~A}, 6.21 \mathrm{~B}, 6.21 \mathrm{C}, 6.22 \mathrm{~A}, 6.22 \mathrm{~B}, 6.22 \mathrm{C}$
Personal consumption expenditures $2.4,2.5,2.6,2.7,7.5,7.20$
Subsidies 3.13
Aircraft:
Equipment 5.8, 5.9, 7.8
Exports and imports, civilian 4.3, 4.4, 7.10
National defense consumption expenditures 3.10, 3.11, 7.12
National defense gross investment 3.10, 3.11, 5.14, 5.15, 7.12, 7.13
Personal consumption expenditures $2.4,2.5,2.6,2.7,7.5,7.20$
Alcoholic beverages:
Excise taxes, Federal 3.5
Personal consumption expenditures $2.4,2.5,2.6,2.7,7.5,7.20$
Sales taxes, State 3.5
See also liquor.
Ammunition, national defense consumption expenditures 3.10, 3.11, 7.12

Amortization 8.22
See also capital consumption adjustment; capital consumption allowances; depreciation.

Credit unions 8.22, 8.25, 8.26
Crops 8.10, 8.11
Crude oil windfall profits tax 3.5
Crude petroleum and natural gas (industry tables) $6.2 \mathrm{~A}, 6.3 \mathrm{~A}, 6.4 \mathrm{~A}$, $6.5 \mathrm{~A}, 6.6 \mathrm{~A}, 6.8 \mathrm{~A}, 6.17 \mathrm{~A}, 6.18 \mathrm{~A}, 6.19 \mathrm{~A}, 6.20 \mathrm{~A}, 6.21 \mathrm{~A}, 6.22 \mathrm{~A}$
See also oil and gas extraction; petroleum and natural gas.
Cultural activities See recreational and cultural activities.
Currency translation adjustment 4.5A
Current account, balance on (international transactions accounts) 4.5A, 4.5B

Current-cost inventories 5.10
Current-dollar indexes 7.1, 7.2, 7.3, 8.1
Current expenditures and gross investment See government current expenditures; government gross investment.
Current replacement cost See capital consumption adjustment.
Current surplus or deficit, NIPA's, government 3.1, 8.21
Federal 3.2, 5.1, 3.18A, 3.18B, 9.3
Social insurance funds $3.1,3.2,3.3,3.14$
State and local 3.3, 5.1, 3.19, 9.4

Current surplus of government enterprises $1.9,3.1,3.13,8.12,8.21$
Federal 3.2, 3.13, 3.17, 3.18A, 3.18B, 3.20, 9.3
State and local 3.3, 3.13, 3.17, 3.19, 9.4
Customs duties 3.2, 3.5

## D

Day care 2.4, 2.5, 7.20
Dealers' margin on used equipment 5.8
See also used autos.
Declarations and settlements, income taxes 3.4
Defaulters' gain See bad debt expense; transfer payments by business.
Defense See military; national defense consumption expenditures and gross investment.
Deficit, government, current, NIPA's 3.1, 3.2, 3.3, 3.14, 5.1, 9.3, 9.4
Deflator See implicit price deflator.
Dentists 2.4, 2.5, 2.6, 2.7, 7.5, 7.20
Depletion on domestic minerals 8.23, 8.25
Deposit insurance 3.5, 3.18B
Depository institutions (industry tables) $6.2 \mathrm{C}, 6.3 \mathrm{C}, 6.4 \mathrm{C}, 6.5 \mathrm{C}, 6.6 \mathrm{C}$, 6.8C, 6.17C, 6.18C, 6.19C, 6.20C, 6.21C, 6.22C

Commercial and mutual (industry tables) $6.17 \mathrm{C}, 6.18 \mathrm{C}, 6.19 \mathrm{C}$, $6.20 \mathrm{C}, 6.21 \mathrm{C}, 6.22 \mathrm{C}$
See also banking; banks; credit agencies other than banks.
Deposits, interest on 8.20
Depreciation 8.22, 8.23, 8.24, 8.25
Of interest paid by public utilities on own-account investment 8.22
See also consumption of fixed capital; capital consumption adjustment; capital consumption allowances.
Diesel fuel excise taxes 3.5
Direct investment income 4.5A
See also income.
Direct relief 3.12
Disability, government current expenditures by function 3.15, 3.16, 3.17

Disability insurance See social insurance; old-age, survivors, and disability insurance; social insurance, temporary disability.
Disaster losses See other changes in volume of assets.
Disbursements See wage and salary disbursements.
Discrepancy See statistical discrepancy.
Disposable personal income S.1, 2.1, 2.9, 8.1, 8.7, 8.21
Distributive industries, wage and salary disbursements 2.1, 2.8
District of Columbia 3.18A
Dividends 1.14, 3.1, 3.3, 3.17, 3.19, 8.19, 8.25, 9.4
By industry $6.20 \mathrm{~A}, 6.20 \mathrm{~B}, 6.20 \mathrm{C}$
Insurance "dividends" 2.4, 2.5, 7.20
Patronage "dividends" 8.24
Received by government employee retirement plans 3.19, 8.19
Tax 3.2, 3.4
To and from the rest of the world $1.9,1.10,8.19$
See also personal dividend income.
Doctors See physicians.
Domestic business See business.
Domestic corporate business $1.16,8.14,8.15,8.19,8.25$
Domestic income 1.9, 1.10, 1.15

Domestic industries (industry tables) $6.1 \mathrm{~A}, 6.1 \mathrm{~B}, 6.1 \mathrm{C}, 6.2 \mathrm{~A}, 6.2 \mathrm{~B}, 6.2 \mathrm{C}$, $6.3 \mathrm{~A}, 6.3 \mathrm{~B}, 6.3 \mathrm{C}, 6.4 \mathrm{~A}, 6.4 \mathrm{~B}, 6.4 \mathrm{C}, 6.5 \mathrm{~A}, 6.5 \mathrm{~B}, 6.5 \mathrm{C}, 6.6 \mathrm{~A}, 6.6 \mathrm{~B}, 6.6 \mathrm{C}$, $6.8 \mathrm{~A}, 6.8 \mathrm{~B}, 6.8 \mathrm{C}, 6.9 \mathrm{~B}, 6.9 \mathrm{C}, 6.10 \mathrm{~B}, 6.10 \mathrm{C}, 6.11 \mathrm{~A}, 6.11 \mathrm{~B}, 6.11 \mathrm{C}, 6.15 \mathrm{~A}$, 6.15B, 6.15C, 6.16A, 6.16B, 6.16C, 6.17A, 6.17B, 6.17C, 6.18A, 6.18B, $6.18 \mathrm{C}, 6.19 \mathrm{~A}, 6.19 \mathrm{~B}, 6.19 \mathrm{C}, 6.20 \mathrm{~A}, 6.20 \mathrm{~B}, 6.20 \mathrm{C}, 6.21 \mathrm{~A}, 6.21 \mathrm{~B}, 6.21 \mathrm{C}$, 6.22A, 6.22B, 6.22C

Domestic investment See gross private domestic investment.
Domestic output of new autos $7.18 \mathrm{~A}, 7.18 \mathrm{~B}, 8.8 \mathrm{~A}, 8.8 \mathrm{~B}, 8.9 \mathrm{~B}$
Domestic product See gross domestic product; net domestic product; final sales of domestic product.
Domestic purchasers, final sales to $1.5,1.6,7.2,8.1$
Domestic purchases, gross 1.5, 1.6, 7.2, 8.1
Domestic service 2.4, 2.5, 2.6, 2.7, 7.5, 7.20, 8.21 See also private households.
Donations to nonprofit institutions by corporate business 8.16
Donations to State and local government 3.4, 3.5
Drug preparations and sundries 2.4, 2.5, 2.6, 2.7, 7.5, 7.20
Durable equipment See equipment and software.
Durable goods 1.3, 1.4, 7.17
Change in private inventories $1.3,1.4,5.10,5.11$
Exports and imports 4.1, 4.2, 4.3, 4.4, 7.9, 7.10
Final sales 1.3, 1.4, 7.17
Government consumption expenditures 3.7, 3.8, 3.9, 3.10, 3.11, 7.11, 7.12, 8.6

Industry tables $6.1 \mathrm{~A}, 6.1 \mathrm{~B}, 6.1 \mathrm{C}, 6.2 \mathrm{~A}, 6.2 \mathrm{~B}, 6.2 \mathrm{C}, 6.3 \mathrm{~A}, 6.3 \mathrm{~B}, 6.3 \mathrm{C}$, $6.4 \mathrm{~A}, 6.4 \mathrm{~B}, 6.4 \mathrm{C}, 6.5 \mathrm{~A}, 6.5 \mathrm{~B}, 6.5 \mathrm{C}, 6.6 \mathrm{~A}, 6.6 \mathrm{~B}, 6.6 \mathrm{C}, 6.7 \mathrm{~A}, 6.7 \mathrm{~B}$, $6.7 \mathrm{C}, 6.8 \mathrm{~A}, 6.8 \mathrm{~B}, 6.8 \mathrm{C}, 6.9 \mathrm{~B}, 6.9 \mathrm{C}, 6.10 \mathrm{~B}, 6.10 \mathrm{C}, 6.11 \mathrm{~A}, 6.11 \mathrm{~B}$, $6.11 \mathrm{C}, 6.12 \mathrm{~A}, 6.12 \mathrm{~B}, 6.12 \mathrm{C}, 6.13 \mathrm{~A}, 6.13 \mathrm{~B}, 6.13 \mathrm{C}, 6.14 \mathrm{~A}, 6.14 \mathrm{~B}$, $6.14 \mathrm{C}, 6.15 \mathrm{~A}, 6.15 \mathrm{~B}, 6.15 \mathrm{C}, 6.16 \mathrm{~A}, 6.16 \mathrm{~B}, 6.16 \mathrm{C}, 6.17 \mathrm{~A}, 6.17 \mathrm{~B}$, $6.17 \mathrm{C}, 6.18 \mathrm{~A}, 6.18 \mathrm{~B}, 6.18 \mathrm{C}, 6.19 \mathrm{~A}, 6.19 \mathrm{~B}, 6.19 \mathrm{C}, 6.20 \mathrm{~A}, 6.20 \mathrm{~B}$, $6.20 \mathrm{C}, 6.21 \mathrm{~A}, 6.21 \mathrm{~B}, 6.21 \mathrm{C}, 6.22 \mathrm{~A}, 6.22 \mathrm{~B}, 6.22 \mathrm{C}$
Inventories 5.12, 5.13, 7.16
National defense consumption expenditures 3.7, 3.8, 3.9, 3.10, 3.11, 7.11, 7.12, 8.6

Nondefense consumption expenditures 3.7, 3.8, 3.9, $7.11,8.6$

# State Personal Income, Revised Estimates for 1997-99 

REVISED ESTIMATES of State personal income for 1997-99 were released by the Bureau of Economic Analysis (BEA) on September 12, 2000. These estimates incorporate the annual revision of the national income and product accounts (NIPA's) that was released on August 1,2000, and newly available State source data that are more complete, more detailed, and otherwise more appropriate than those that were previously available. ${ }^{1}$ In addition, revised estimates for 1929-68 were released, marking the completion of the comprehensive revision of State personal income. The release of these estimates represents a significant acceleration in the availability of State estimates of personal income that are consistent with the comprehensive revision of the NIPA estimates for 1929-99: The comprehensive revision of the State estimates for the entire time series is available just 5 months after the completion of the NIPA comprehensive revision-over a year sooner than previous comprehensive revisions.

[^15]This report summarizes the sources of the revisions and the effects of the revisions on the estimates. For the availability of the revised estimates for 1997-99 that are more detailed than those in tables 1 and 2 at the end of this article and of the revised estimates for 1929-68, see the box "Data Availability."

## Sources of the revisions

Many of the revisions to the national estimates of personal income involve detailed estimation that cannot be replicated at the State level, because the underlying source data are not available for States; these revisions are implicitly incorporated into the State estimates through the use of the national estimates as control totals. In addition, the revisions to the State estimates reflect the incorporation of newly available State-level source data.

For wage and salary disbursements, other labor income, and personal contributions for social insurance, the estimates for 1999 incorporate newly available Bureau of Labor Statistics (BLS) tabulations of wages and salaries of employees covered by State unemployment insurance (UI) for the fourth quarter of 1999 and revised tabulations for the first three quarters. Previously, the estimates for 1999 were based on preliminary UI data for the first three quarters and extrapolations for the fourth quarter that were based on data from BLS's monthly current employment survey.

For farm proprietors' income, the estimates for

## Acknowledgments

The revised estimates of State personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. Hugh W. Knox, Associate Director for Regional Economics, provided general guidance. The preparation of the revised estimates was a divisionwide effort.
The estimates of nonfarm wages and salaries and other labor income were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Lisa C. Ninomiya, Michael G. Pilot, John A. Rusinko, and James M. Scott. Contributing staff members were Susan P. Den Herder, Lisa B. Emerson, John D. Laffman, Lela S. Lester, Russell C. Lusher, Richard A. Lutyk, Paul K. Medzerian, Mauricio Ortiz, Michael Phillips, Adrienne T. Pilot, Curtis Roberson, Victor A. Sahadachny, Elizabeth F. Stell, and Jaime Zenzano.
The estimates of farm wages and salaries and other labor income and of proprietors' income, property income, transfer payments, personal contributions for social insur-
ance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Jeffrey L. Newman, and James P. Stehle. Contributing staff members were Elaine M. Briccetti, Carrie L. Case, Daniel R. Corrin, Toan A. Ly, W. Tim McKeel, Suet M. Ng, Ellen M. Wright, and Marianne A. Ziver.
The estimates of personal tax and nontax payments were prepared by Ann E. Dunbar under the supervision of Robert L. Brown.
The public use tabulations and data files were assembled, and the tables and text for this publication were prepared, by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Gary V. Kennedy guided the preparation of the materials for the publication. Contributing staff members were H Steven Dolan, Michael J. Paris, Albert Silverman, Nancy E. Smith, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

1997-98 incorporate revised national and State estimates of farm income from the U.S. Department of Agriculture (USDA). The estimates for 1999 incorporate new USDA estimates of farm expenses and revised estimates of production income.

For dividends, interest, and rent, the estimates for 1998 incorporate newly available Internal Revenue Service (IRS) tabulations of individual tax returns for 1998, and the estimates for 1999 are based on extrapolations of these tabulations. Previously, the 1998 and 1999 estimates were based on extrapolations of tabulations for 1997.

For transfer payments, the estimates for 1999 incor-
porate newly available data from agencies that administer benefit programs, such as data from the Social Security Administration on the benefits disbursed under the social security retirement and supplemental security income programs and data from the Health Care Financing Administration on the benefits disbursed under the medicare and medicaid programs. Previously, the estimates of these benefits and of most other subcomponents of transfer payments for 1999 were based on extrapolations of 1998 data; data for 1999 were only available for unemployment compensation.

1. Revision as a percentage of the previously published estimate; calculated from unrounded

## Revisions

The effects of the revisions to the national totals of the components of personal income differ for the individual State estimates because the structure of each State's economy differs.

Personal income for the Nation was revised down 0.2 percent for 1997 and was revised up 0.4 percent for 1998 and 0.1 percent for 1999 (table A). The downward revision to personal income for 1997 was accounted for by a downward revision to other labor income. The upward revisions for 1998 and 1999 were attributable to upward revisions to dividends, interest, and rent that more than offset downward revisions to other labor income.

By State, 41 States have downward revisions to personal income for 1997, 38 States and the District of Columbia have upward revisions for 1998, and 26 States and the District of Columbia have upward revisions for 1999.

For 1999, the revisions for the District of Columbia, Nevada, and Idaho differed by more than 2.0 percentage points from the revision for the Nation. For the District of Columbia, an upward revision to dividends, interest, and rent contributed to an upward revision to personal income of 4.3 percent. For Nevada, upward revisions to dividends, interest, and rent and to nonfarm proprietors' income contributed to an upward
revision of 2.2 percent. For Idaho, downward revisions to dividends, interest, and rent and to farm proprietors' income contributed to a downward revision of 2.6 percent.

Tables 1 and 2 follow.

## Data Availability

This report presents a summary of the estimates of personal income, per capita personal income, disposable personal income, and per capita disposable personal income for 1997-99.
The detailed State estimates will be available in November on the CD-ROM State Personal Income, 1929-99 (price $\$ 35$, product number RCN-0268). Availability will be announced on the inside back cover of the Surver.
The revised estimates of detailed earnings by industry for 1997-98 are available on BEA's Web site; go to <www.bea.doc.gov/bea/regional/spi>. Summary statistics and other selected tables for 1999 are also available. The earnings detail for 1999 will be provided later this fall when the source data become available.
For more information about these estimates, call the Regional Economic Information System (REIS) at 202-606-5360, E-mail reis.remd@bea.doc.gov, or fax 202-606-5322.

$r$ Revised.

1. Percent change was calculated from unrounded data.

Nore.-The personal income level shown for the United States is derived as the sum of the State estimates.

[^16]
# Gross State Product by Industry, 1977-98 

By Richard M. Beemiller and Clifford H. Woodruff III

$N$Tew estimates of gross state product (GSP) for 1998 and revised estimates for 1977-97 were released by the Bureau of Economic Analysis (BEA) on September 5, 2000. ${ }^{1}$ These estimates incorporate the results of the most recent comprehensive revisions of the national income and product accounts and of State personal income, and they are consistent with the estimates of gross product originating by industry for the Nation that were published in the June 2000 SURVEY of Current Business. ${ }^{2}$

[^17]The major highlights of the GSP estimates for 1992-98 are the following:

- Eight of the ten States with the fastest growth in real GSP are west of the Mississippi River; strong growth in high-tech manufacturing and business services contributed to the fast growth.
- Although the composition of the U.S. economy continued to shift from manufacturing to services, in the fast-growing States of Arizona, Oregon, Nevada, Utah, New Hampshire, New Mexico, Idaho, and Texas, the

2. See Sherlene K.S. Lum, Brian C. Moyer, and Robert E. Yuskavage, "Improved Estimates of Gross Product by Industry for 1947-98," Survey 80 (June 2000): 24-54.

## Gross State Product Estimates

The estimate of gross state product (GSP) for each State is derived as the sum of the gross state product originating in all industries in the State. In concept, an industry's GSP, or its value added, is equal to its gross output (sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (consumption of goods and services purchased from other U.S. industries or imported). Thus, GSP is often considered the State counterpart of the Nation's gross domestic product (GDP).
However, GSP for the Nation differs from GDP for three reasons. First, like the national estimates of gross product originating (GPO) by industry, GSP is measured as the sum of the distributions by industry of the components of gross domestic income, which differs from GDP by the statistical discrepancy.' Second, GSP excludes, and GDP and GPO include, compensation of Federal civilian and military personnel stationed abroad and "government consumption of fixed capital for military structures located abroad and for military equipment, except domestically located office equipment." Third, GSP and GDP often have different revision schedules. For an accounting of the differences between GSP for the Nation and GPO in 1998, see appendix B. ${ }^{2}$
The GSP estimates are prepared for 63 industries (see appendix A). For each industry, GSP is presented in three components: Compensation of employees, indirect business tax and nontax liability, and property-type income. Compensation of employees is the sum of wage and salary

[^18]accruals, employer contributions for social insurance, and other labor income. Property-type income is the sum of corporate profits, proprietors' income, rental income of persons, net interest, capital consumption allowances, business transfer payments, and the current surplus of government enterprises less subsidies.
The estimates of GSP are prepared in current dollars (see table 7) and in chained (1996) dollars (see table 8). The State estimates of GSP and its components for all industries are "controlled" to national totals of GPO and its components for all industries. ${ }^{3}$
Real GSP is an inflation-adjusted measure of each State's gross product that is based on national prices for the goods and services produced within that State. The estimates of real GSP are derived by applying national implicit price deflators to the current-dollar GSP estimates for the 63 industries. Then, the chain-type index formula that is used in the national accounts is used to calculate the estimates of total real GSP and of real GSP at a more aggregated industry level. ${ }^{4}$ Real GSP may reflect a substantial volume of output that is sold to other States and countries. To the extent that a State's output is produced and sold in national markets at relatively uniform prices (or sold locally at national prices), GSP captures the differences across States that reflect the relative differences in the mix of goods and services that the States produce. However, real GSP does not capture geographic differences in the prices of goods and services that are produced and sold locally.

[^19]growth in high-tech manufacturing increased the manufacturing share of their economies.

- Six of the ten slowest growing States are in the northeast; the slow growth in most States was partly attributable to slow growth in lumber and wood products, printing and publishing, paper and allied products, instruments and related products, and chemicals and allied products.
The first part of this article discusses the relative performance for selected States in terms of growth rates, industry shares of State totals, State shares of total GSP for the Nation, and the composition of GSP for BEA regions. The second part discusses the revisions to the GSP estimates and the major sources of the revisions.

## Growth Rates, Shares, and Composition

The growth rates of real GSP and the current-dollar shares of GSP can be used to compare relative performance of a State's economy or of a particular industry in a State. ${ }^{3}$ Comparing growth rates of
3. Real GSP is measured in chained (1996) dollars.

## Acknowledgments

The estimates of gross state product were prepared by staff in the Regional Economic Analysis Division under the direction of John R. Kort, Chief, and George K. Downey, Chief of the Gross State Product by Industry Branch. Hugh W. Knox, Associate Director for Regional Economics, provided general guidance.
Contributing staff members were Richard M. Beemiller, Gerard P. Aman, Clifford H. Woodruff III, John S. Barrett, Gloria I. Paniagua, and Sharon Panek.
real GSP provides an indication of the relative growth of a State and of the State's various industries; it also indicates the contributions of the industries to the State's overall growth. Comparing the shares of an industry in total GSP in current dollars provides an indication of whether that industry's relative claim on the State's resources has changed over time.

## Real growth rates in 1992-98

Real GSP in the Nation grew at an average annual rate of 3.9 percent from 1992 (the first year of the current economic expansion) to 1998 (the latest year for which GSP estimates are available) (table 1). ${ }^{4}$

Real GSP increased in all States except Alaska and Hawaii. The average annual growth rates ranged from an increase of 7.5 percent in Arizona to a decline of 0.5 percent in Hawaii.

Of the 10 fastest growing States, 8 are west of the Mississippi River (chart 1). In all 10 States, population growth was above the national average of 1.0 percent in 1992-98. In all of these States except Colorado and Nevada, the major contributor to the fast GSP growth was durable-goods manufacturing, mainly electronic and other electric equipment and industrial machinery and equipment. In Colorado, the major contributors were communications, retail trade, and business services; in Nevada, the major contributors were re-
4. In addition, 1992 is the latest benchmark year for which the GSP estimates incorporated the Bureau of Census' economic census data that are still based on the Standard Industrial Classification; see the section "Revisions to the Estimates."
In 1992-98, real gross domestic product (GDP)-BEA's featured measure of the Nation's output-grew at an annual rate of 3.6 percent. See the box "Gross State Product Estimates" for a discussion of the differences between total GSP and GDP.

## Data Availability

This article presents summary estimates of gross state product (GSP) by major industry group. For the first time, the GSP estimates for 63 industries for States, BEA regions, and the United States can be accessed interactively on BEA's Web site at <www.bea.doc.gov>; click on "State and local area data," and look under "Gross state product." Users of the GSP estimates can specify which GSP components, States, regions, industries, and years to display or download. The GSP estimates are also available online to subscribers to STAT-USA's Internet services (call 202-4821986, or go to <www.stat-usa.gov>).
This winter, BEA will release the CD-ROM Gross Product by Industry for the United States and States (product number RCN-0265, price $\$ 35.00$ ), which will contain currentdollar estimates of GSP and its three components-compensation of employees, indirect business tax and nontax
liability, and property-type income-and real GSP estimates in chain-type quantity indexes for 1977-98 and in chained (1996) dollars for 1986-98. ${ }^{1}$ The CD-ROM includes a data-retrieval program that allows users to view or print selected records from the database and selected analytical tables and charts; users may also export selected data to a file for importation into computer spreadsheets. To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).
For further information, E-mail gspread@bea.doc.gov or call 202-606-5340.

1. The CD-ROM will also include the following estimates for the United States: Gross product by industry for 1947-99, detailed gross output for 1977-99, value of manufacturing product shipments for 1977-96, value of manufacturing industry shipments for 1977-99, and detailed indirect business taxes for 1978-99.
tail trade, construction, and real estate (table 2).
Despite the concentration of high-tech industries, real GSP for California grew only 3.2 percent, far less than its neighboring fast-growing States. California took several years longer than most States to recover from the 1990-91 recession, and the slow growth reflected declines in "other" dura-ble-goods manufacturing, mainly instruments and related products and other transportation equipment.

Of the 10 slowest growing States, 6 are in the northeast. In all these States except Montana, population growth was below the national average of 1.0 percent. In general, GSP growth in these States reflected weakness or declines in most industry groups, particularly in manufacturing, in finance, insurance, and real estate, and in Federal Government. Contributions from high-tech manufacturing and business services were also weak in most of these States. In Hawaii, the decline in real GSP re-

flected the effects of the 1998 Asian financial crisis on growth in construction, real estate, and tour-ism-related industries. In Alaska, the decline in real GSP mainly reflected a decline in oil and gas extraction due to falling crude oil prices; in 1998, these prices were at their lowest levels of the 1990's. In Maine, the slow growth reflected a decline in Federal Government. In Montana, the slow growth reflected a decline in agriculture, forestry, and fish-ing-mainly farms-and in lumber and wood products. In New York, Maryland, and Rhode Island, the slow growth reflected declines in dura-ble-goods manufacturing, mainly instruments and related products. In Pennsylvania, Vermont, and West Virginia, the slow growth largely reflected declines in nondurable-goods manufacturing, mainly printing and publishing, paper and allied products, apparel and other textile products, and petroleum and coal products.

## Shares of current-dollar GSP

Industry shares.-In 1992-98, the share of U.S. current-dollar GSP accounted for by private ser-
vices-producing industries increased 2.6 percentage points, from 62.2 percent to 64.8 percent (table 3). ${ }^{5}$ The share accounted for by private goods-producing industries declined 1.1 percentage points, from 24.4 percent to 23.3 percent. The share accounted for by government declined 1.4 percentage points, from 13.3 percent to 11.9 percent.

By State, the changes in the shares of the private goods-producing industries ranged from an increase of 6.9 percentage points in Oregon to a decline of 7.9 percentage points in Alaska. In Oregon, the largest increase was in durable-goods manufacturing, mainly electronic and other electric equipment. In Alaska, the largest decline was in mining, mainly oil and gas extraction.

The changes in the shares of the private ser-vices-producing industries ranged from an increase of 8.7 percentage points in Alaska to a decline of 4.7 percentage points in Oregon. In
5. Private services-producing industries consist of transportation and public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and "services." Private goods-producing industries consist of agriculture, forestry, and fishing; mining; construction; and manufacturing. Government consists of Federal civilian, Federal military, and State and local governments.

## CHART 1

Real Gross State Product: Average Annual Growth Rate, 1992-98

[^20]Alaska, the largest increase in share was in transportation and public utilities, mainly transportation by air. In Oregon, the largest decline was in finance, insurance, and real estate, mainly real estate.

The changes in the shares of government ranged from an increase of 0.6 percentage point in West Virginia to a decline of 3.5 percentage points in Utah. The changes in shares in these two States
were mainly in Federal civilian government.
State shares.-In 1998, the current-dollar GSP of the Nation was $\$ 8.7$ trillion. California's GSP, which exceeded $\$ 1$ trillion, accounted for the largest share ( 12.8 percent) of the U.S. total (chart 2). The four States with the next largest shares were New York ( 8.1 percent), Texas ( 7.4 percent), Illinois ( 4.9 percent), and Florida ( 4.8 percent). These

five States also have the largest shares of the U.S. population.

The five States with the smallest shares of U.S. GSP were Vermont, North Dakota, Wyoming, Montana, and South Dakota; each State accounted for about 0.2 percent of the U.S. total. The relative
shares of the five largest States and the five smallest States did not change.

## Composition of GSP

The changes over time in an industry's share of labor and capital reflect differences in the growth

Table 3.-Gross State Product By Broad Industry Group in Current Dollars and As a Percentage of Total Gross State Product, 1992 and 1998

rates of the components of current-dollar GSP. ${ }^{6}$ In 1992-98, the labor share of U.S. GSP declined 1.3 percentage points, the property-type income share increased 1.8 percentage points, and the indirect business tax and nontax liability (IBT) share declined 0.5 percentage point (table 4). ${ }^{7}$

For the BEA regions, the component shares generally mirrored the trend in the U.S. shares. The declines in labor's share of total GSP ranged from 1.7 percentage points in New England to 0.1 percentage point in the Plains region; the increases in property-type income's share ranged from 2.8 percentage points in the Rocky Mountain region to 0.3 percentage point in the Plains region; the declines in the IBT share of GSP ranged from 1.1 percentage points in the Rocky Mountain region

[^21]to 0.1 percentage point in the Great Lakes and the Southeast.

Durable-goods manufacturing largely accounted for the decline in the New England labor-share and for the increase in the Rocky Mountain prop-erty-type income share.

## Revisions to the Estimates

This comprehensive revision of the GSP estimates for 1977-97 is the third comprehensive revision since the estimates were introduced in 1988. Comprehensive revisions differ from annual revisions because of the scope of the changes and because of the number of years subject to revision. Comprehensive revisions incorporate definitional and statistical improvements that are designed to better measure the evolving U.S. and State economies.

In this comprehensive revision, the GSP estimates incorporate the results of the most recent comprehensive revisions of the national income and product accounts (NIPA's), of the national estimates of gross product originating (GPO) by industry, and of the estimates of State personal

## CHART 2

Gross State Product in Current Dollars: Percentage of U.S. Total 1998

U.S. Department of Commerce, Bureau of Economic Analysis
income. The major definitional changes reflect the recognition of business and government expenditures for software as investment and the treatment of government employee retirement plans similarly to that of private pension plans. The major statistical change reflects the improvement to the national estimates of the real value of unpriced bank services in the banking industries. In order to

## Implementation

 of theNorth American Industry Classification System In 1997, the Federal Government statistical agencies adopted the North American Industry Classification System (NAICS)-an economic classification system that groups establishments into industries on the basis of the similarity of their production processes. NAICS provides a new framework for collecting, analyzing, and disseminating economic data on an industry basis. However, much of the source data for BEA's estimates remain on a Standard Industrial Classification (SIC) basis, so BEA's plan for implementing NAICS depends on the implementation schedule of its source data agencies. BEA tentatively plans to incorporate NAICS into its estimates of gross state product in 2003-04.
be consistent with the NIPA and GPO by industry estimates, this GSP revision does not incorporate the State data from the 1997 Economic Census.

In addition, this GSP comprehensive revision incorporates revised State source data for farms, mining, and depository institutions.

## Impact of the revisions

In general, the revisions to GSP as a percentage of the previously published estimates for all years are small. The largest revisions are to the estimates for the most recent years.

Current-dollar estimates.-For 1997, the currentdollar estimates of GSP for all but four States were revised up; the estimates for Delaware, South Dakota, Montana, and Idaho were revised down (table 5).

The States with the largest upward percentage revisions were Rhode Island, Alaska, New Jersey, Colorado, and Michigan. The revisions mainly reflected the definitional and statistical changes that were incorporated into the current-dollar estimates for these industries: Depository institutions

in Rhode Island; oil and gas extraction and "pipelines, except natural gas transportation" in Alaska; business services in New Jersey and Colorado; communications in Rhode Island and Colorado; and motor vehicle and equipment manufacturing and chemicals and allied products manufacturing in Michigan.

For the States with downward revisions, the revisions mainly reflected the definitional and statis-
tical changes that were incorporated into the current-dollar estimates for these industries: Chemicals and allied products manufacturing in Delaware; nondepository institutions in South Dakota; depository institutions in Delaware and South Dakota; coal mining and "nonmetallic minerals, except fuels mining" in Montana; real estate and other services in Idaho; farms in Montana and Idaho; and industrial machinery and equipment

1. Revision is a percentage of the previously published estimate.
manufacturing in South Dakota and Idaho.
Real growth rates.-For 1996-97, the States with the largest upward revisions to the growth rates of real GSP were Rhode Island, Delaware, Colorado, Minnesota, Florida, and Washington (table 6). The States with downward revisions to growth rates were Wyoming, Idaho, Oregon, and New Mexico. For all these States except Delaware, the revisions
mainly reflected the incorporation of statistical changes into the current-dollar estimates. For Delaware, the revision was mainly due to the incorporation of the revised national GPO price index for the holding and other investment offices industry.

## Major sources of the revisions

For the States with large revisions to current-dollar GSP, the major sources of the revisions were either

revisions to the national estimates of GPO by industry or revisions to the State source data.

For agriculture, forestry, and fishing, the revisions mainly reflected the incorporation of revised expense data for farms by State from the U.S. Department of Agriculture.

For mining, the revisions mainly reflected the incorporation of the revised national estimates of GPO by industry and revised source data on value-of-production by State from the U.S. Department of Interior and the U.S. Department of Energy.

For manufacturing and for transportation and public utilities, the revisions mainly reflected the incorporation of the revised national estimates of

GPO by industry and the revised State estimates of proprietors' income for these industries.

For services and for finance (except depository institutions), insurance, and real estate, the revisions mainly reflected the incorporation of the revised national estimates of GPO by industry for these industries. For depository institutions, the revisions mainly reflected the incorporation of data from Federal Deposit Insurance Corporation balance sheets and income statements on individual commercial banks and mutual savings banks; these data are used to account for the operations of branch banks in States other than the State in which the main office is located.

Appendixes $A$ and $B$ and tables 7 and 8 follow.

Table 8.-Real Gross State Product by Major Industry, Selected Years-Continued
[Millions of chained (1996) dollars]

1. Equals total gross state product less the sum of gross state product of the industries NOTE.-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

# U.S. International Transactions, Second Quarter 2000 

By Harlan W. King

$T$HE U.S. current-account deficit-the combined balances on trade in goods and services, income, and net unilateral current transfers-increased to $\$ 106.1$ billion in the second quarter of 2000 from $\$ 101.5$ billion (revised) in the first quarter (table A, chart 1). ${ }^{1}$ Nearly all of the increase was accounted for by an increase in the deficit on goods.

In the financial account, net recorded financial inflows-the difference between changes in U.S.owned assets abroad and changes in foreignowned assets in the United States-were $\$ 149.1$ billion in the second quarter, up from $\$ 57.6$ billion (revised) in the first. Financial outflows for U.S.owned assets abroad slowed substantially more

[^24]than financial inflows for foreign-owned assets in the United States.

The statistical discrepancy-errors and omissions in recorded transactions-was a negative \$43.1 billion in the second quarter, compared with a positive $\$ 43.8$ billion in the first.

The following are highlights for the second quarter:

- Imports of goods increased strongly; exports of goods were also up strongly, but less than imports.
- Financial inflows for foreign direct investment in the United States were sharply higher as a result of increased acquisitions of U.S. companies by foreign companies.
- Net foreign purchases of U.S. securities other than U.S. Treasury securities slowed substan-

[^25]tially from the first-quarter record, but remained very strong.

- Sizable net financial inflows occurred through U.S. banks, in marked contrast to sizable financial outflows through U.S. banks in each of the three previous quarters.

## U.S. dollar in exchange markets

In the second quarter, the U.S. dollar appreciated 2 percent on a nominal, trade-weighted quarterly average basis against the group of 26 currencies of important U.S. trading partners (table B, chart 2). Within the broad group, the dollar appreciated 3 percent against the group of seven major currencies that trade widely in international markets, and it was up 1 percent against the group of remaining currencies.

The U.S. dollar appreciated 6 percent against the euro on a quarterly average basis. Although

dollar inflows for net foreign purchases of U.S. stocks fell from an unusually high level, other dollar inflows continued in response to strengthened U.S. economic growth relative to Western European growth and to higher U.S. interest rates relative to foreign rates. Concurrently, there were concerns that the higher interest rates reflected greater expectations of future inflation, based both on reported price increases and on widespread projections of continued strong real economic growth. In this environment, U.S. monetary authorities raised the Federal Funds target rate by 50 basis points to 6.5 percent in mid-May-the fifth increase in the target rate in the past year. In May, the euro rebounded following comments by monetary authorities in Europe on the prospects for exchange market intervention, and in early June, the European Central Bank raised interest rates to match the U.S. increase.

The U.S. dollar was unchanged against the Japanese yen on a quarterly average basis, but it fluctuated considerably during the quarter. In the first half of the quarter, the dollar appreciated, largely as a result of strong U.S. growth. In response, Japa-

## CHART 2

Nominal Indexes of Foreign Currency Price of the U.S. Dollar

nese authorities intervened in the exchange markets to slow the decline of the yen. In the second half of the quarter, the yen strengthened against the dollar following comments by Japanese authorities about possible increases in interest rates, and the dollar depreciated.

Against other currencies, the U.S. dollar appreciated 5 percent against the British pound and 3 percent against the Swiss franc. The U.S. dollar appreciated 2 percent against the Canadian dollar, as Canadian interest rates failed to match the increase in U.S. interest rates. The U.S. dollar appreciated 2 percent against the Brazilian real and 2 percent against the Mexican peso.

## Current Account

## Goods and services

The deficit on goods and services increased to $\$ 89.3$ billion in the second quarter from $\$ 85.1$ billion in the first. The increase was more than accounted for by an increase in the deficit on goods to $\$ 110.2$ billion from $\$ 105.8$ billion.

Goods.-The deficit on goods increased $\$ 4.4$ billion, to $\$ 110.2$ billion, in the second quarter. Imports increased much more than exports.

Exports.-Exports increased $\$ 8.1$ billion, or 4 percent, to $\$ 191.8$ billion in the second quarter (table
C). Quantities increased 4 percent, and prices were unchanged. ${ }^{2}$ Nearly all the increase in value was attributable to increased exports of nonagricultural products, especially of capital goods.

Total exports have increased for five consecutive quarters, and average quarterly export growth accelerated in response to continued economic growth abroad (chart 3).

[^26]
## Revisions to the Estimates <br> for the <br> First Quarter of 2000

As a result of incorporating newly available, more complete source data, the international transactions accounts estimates for the first quarter of 2000 are revised from the preliminary estimates that were published in the July 2000 Survey of Current Business. The current-account deficit for the first quarter was revised to $\$ 101.5$ billion from $\$ 102.3$ billion. The goods deficit was unrevised at $\$ 105.8$ billion; the services surplus was revised to $\$ 20.7$ billion from $\$ 19.7$ billion; the deficit on income was revised to $\$ 4.4$ billion from $\$ 4.2$ billion; and net unilateral current transfers were revised to a negative $\$ 12.0$ billion from a negative $\$ 11.9$ billion. Net recorded financial inflows were revised to $\$ 57.6$ billion from $\$ 71.7$ billion.

[^28]goods accounted for most of the increase. Capital goods increased $\$ 6.1$ billion; high-technology products were particularly strong, as computers, peripherals, and parts increased $\$ 1.5$ billion, and telecommunications equipment increased $\$ 1.4$ billion. Consumer goods increased $\$ 4.0$ billion. Manufactured nondurable goods-primarily apparel, footwear, and household goods-increased $\$ 2.3$ billion, and durable goods, primarily household and kitchen appliances, increased $\$ 1.5$ billion. Imports of automotive vehicles, engines, and parts increased $\$ 0.5$ billion.

Petroleum imports increased $\$ 2.3$ billion, or 9 percent, to $\$ 29.3$ billion, following an increase of $\$ 5.6$ billion, or 26 percent. Petroleum prices rose only slightly to $\$ 26.09$ per barrel from $\$ 25.99$ per barrel, following substantial increases in recent quarters, but they still reached the highest level since the fourth quarter of 1990 . The average number of barrels imported daily increased to 12.30 million from 11.36 million (chart 4).

Balances by area.-The deficit on goods with "Other Countries in Asia and Africa" increased $\$ 3.5$ billion, to $\$ 48.8$ billion; in particular, the deficit with China increased $\$ 2.2$ billion, to $\$ 19.5$ billion. ${ }^{3}$ The deficit with Japan increased $\$ 0.9$ billion, to $\$ 21.0$ billion; the deficit with Canada increased $\$ 0.4$ billion, to $\$ 13.2$ billion; and the deficit with Western Europe increased $\$ 0.3$ billion, to $\$ 16.1$ billion. In contrast, the deficit with "Latin America and Other Western Hemisphere" decreased $\$ 0.7$ billion, to $\$ 10.3$ billion.

## CHART 4

U.S. Petroleum Imports and Prices

Services.-The surplus on services increased $\$ 0.3$ billion, to $\$ 21.0$ billion, in the second quarter. Service receipts increased to $\$ 73.3$ billion from $\$ 72.2$ billion, and service payments increased to $\$ 52.4$ billion from $\$ 51.5$ billion.
Travel receipts increased to $\$ 20.7$ billion from $\$ 20.4$ billion. The increase was attributable to an increase in receipts from overseas visitors that was only partly offset by decreases in receipts from visitors from Canada and Mexico. Travel payments increased to $\$ 16.1$ billion from $\$ 15.8$ billion. Increases in payments by U.S. travelers to overseas countries and to Mexico were partly offset by a decrease in payments by U.S. travelers to Canada.
Passenger fare receipts were unchanged at $\$ 5.1$ billion, and passenger fare payments increased to $\$ 6.0$ billion from $\$ 5.8$ billion.
"Other" transportation receipts increased to $\$ 7.4$ billion from $\$ 7.3$ billion, mostly as a result of an increase in port expenditure receipts. "Other" transportation payments increased to $\$ 9.8$ billion from $\$ 9.6$ billion; the increase was attributable to an increase in freight payments, largely reflecting an increase in ocean freight, and to an increase in port expenditure payments.

Receipts for "other" private services increased slightly to $\$ 26.5$ billion; the increase was mostly accounted for by increases in unaffiliated service receipts. Payments for "other" private services were unchanged at $\$ 12.7$ billion, as small increases in unaffiliated service payments were offset by decreases in U.S. affiliates' service payments.

## Income

The deficit on income increased to $\$ 4.5$ billion in the second quarter from $\$ 4.4$ billion in the first. Income receipts increased to $\$ 87.0$ billion from $\$ 80.9$ billion, and income payments increased to $\$ 91.5$ billion from $\$ 85.2$ billion.

Investment income.-Receipts of investment income on U.S.-owned assets abroad increased to $\$ 86.4$ billion from $\$ 80.3$ billion, and payments of investment income on foreign-owned assets in the United States increased to $\$ 89.5$ billion from $\$ 83.3$ billion.
3. Seasonally adjusted estimates for exports for areas and countries are derived by applying seasonal factors for total U.S. agricultural and nonagricultural exports to the unadjusted agricultural and nonagricultural exports for areas and countries and then summing the seasonally adjusted estimates. Seasonally adjusted estimates for imports for areas and countries are derived by applying seasonal factors for total U.S. petroleum and nonpetroleum imports to the unadjusted petroleum and nonpetroleum imports for areas and countries and then summing seasonally adjusted estimates. (The seasonal factors are derived from the seasonal adjustment of U.S. exports and U.S. imports by fivedigit end-use commodity category.)

Receipts of income on U.S direct investment abroad increased to $\$ 37.2$ billion from $\$ 34.1$ billion. The increase was attributable to the continued, widespread rise in earnings: In the United Kingdom, the rise in earnings was mainly by affiliates in finance, in manufacturing, and in services; in Japan, mainly by affiliates in petroleum, in finance, and in services; in other Asian countries, mainly by affiliates in Malaysia and in the Philippines; and in a few Latin American countries, particularly by affiliates in Mexico. The increase in earnings partly reflected the continued economic growth in most host countries.

Payments of income on foreign direct investment in the United States increased to $\$ 18.8$ billion from $\$ 17.0$ billion. The increase reflected continued strong growth of the U.S. economy and an increased amount of total foreign direct investment in the United States. The increase in earnings was strongest in petroleum, but earnings in "other" industries and in manufacturing also rose. By area, the largest increases were by Brit-ish-owned affiliates and by Canadian-owned affiliates. Earnings of other Western European-owned affiliates also increased.
"Other" private income receipts increased to $\$ 47.9$ billion from $\$ 45.1$ billion. The increase was largely attributable to increases in average yields on most instruments, augmented by higher U.S. bank and nonbank financial claims. Income receipts on holdings of foreign securities declined slightly.
"Other" private income payments increased to $\$ 43.8$ billion from $\$ 40.2$ billion. The increase was mostly due to the continued rise in average yields, to higher foreign holdings of U.S. corporate stocks and bonds, and to higher U.S. nonbank liabilities.
U.S. Government income receipts increased to $\$ 1.2$ billion from $\$ 1.1$ billion. U.S. Government income payments increased to $\$ 26.9$ billion from $\$ 26.1$ billion as a result of an increase in average holdings and a slight increase in average yields.

Compensation of employees.-Receipts for compensation of U.S. workers abroad were unchanged at $\$ 0.6$ billion, and payments for compensation of foreign workers in the United States were unchanged at $\$ 2.0$ billion.

## Unilateral current transfers

Net unilateral current transfers were a negative $\$ 12.3$ billion in the second quarter, following a negative $\$ 12.0$ billion in the first; the increase was mostly the result of an increase in U.S. Government grants.

## Capital Account

Net capital account transactions-which consist mainly of debt forgiveness and transfers of goods and financial assets by migrants when they enter the United States-were unchanged at $\$ 0.2$ billion in the second quarter.

## Financial Account

Net recorded financial inflows-the difference between changes in U.S.-owned assets abroad and changes in foreign-owned assets in the United States-were $\$ 149.1$ billion in the second quarter, up from $\$ 57.6$ billion (revised) in the first. Financial outflows slowed substantially, while financial inflows remained strong.

In recent quarters, most of the net financial inflows were from securities transactions and from direct investment. In the second quarter, there were also net inflows through the U.S. banking system. The strong financial inflows mainly reflected the strength of the U.S. dollar, rising U.S. shortterm interest rates, and rising U.S. credit demand to finance continued strong U.S. economic growth. The strength of the U.S. economy also stimulated foreign direct investment.

## U.S.-owned assets abroad

Net U.S.-owned assets abroad increased $\$ 73.6$ billion in the second quarter, following an increase of $\$ 179.0$ billion in the first. The slowdown was largely accounted for by a substantial shift to a reduction in claims on foreigners reported by U.S. banks and by a sizable slowing in claims on foreigners reported by U.S. nonbanks.
U.S. official reserve assets.-U.S. official reserve assets decreased $\$ 2.0$ billion in the second quarter, following an increase of $\$ 0.6$ billion in the first (table D). The second-quarter decrease was more than accounted for by a decrease in the U.S. reserve position in the International Monetary Fund.

Claims reported by banks and by nonbanks.-U.S. claims on foreigners reported by U.S. banks decreased $\$ 14.9$ billion in the second quarter, in contrast to an increase of $\$ 55.5$ billion in the first. The shift was mostly accounted for by reduced lending to banks abroad and by a large decrease in banks' domestic customers' claims, both of which were in response to lower credit demand and to unsettled conditions in world financial markets.

Banks' own claims payable in dollars increased $\$ 11.9$ billion, following an increase of $\$ 18.5$ billion. Sizable lending by U.S. securities dealers accounted for most of the second-quarter increase; the lending was mainly to private foreigners, primarily in the Caribbean, and to foreign public borrowers, mostly in emerging countries in Asia, where economic growth strengthened. Interbank claims decreased $\$ 2.0$ billion, following an increase of $\$ 18.6$ billion. The reduction in lending to foreign banks reflected a reversal of strong first-quarter lending, when foreign demand for U.S. corporate stocks and bonds was strong; in Western Europe, U.S. lending decreased sharply despite strong merger and acquisition activity.

Banks' domestic customers' claims payable in dollars decreased $\$ 23.8$ billion, in contrast to an increase of $\$ 38.5$ billion. The decrease was more than accounted for by the withdrawal of dollar deposits by domestic customers of U.S. banks, mostly from banks in Western Europe and in the Caribbean, and by reduced issuance of foreign commercial paper in the U.S. market in the second quarter after heavy issuance in the first.

Claims reported by U.S. nonbanking concerns increased $\$ 26.1$ billion, following an increase of $\$ 52.6$ billion. The smaller increase in the second quarter reflected lower credit demand abroad and a reduced need to channel funds abroad through financial intermediaries located primarily in the Caribbean.

Foreign securities.-Net U.S. purchases of foreign securities were $\$ 26.4$ billion in the second quarter, down from $\$ 27.2$ billion in the first (chart 5). Net U.S. purchases of foreign stocks doubled to $\$ 33.7$ billion, primarily as a result of exchanges of stock related to acquisitions of U.S. companies by foreign companies. Transactions in foreign bonds shifted to net U.S. sales of $\$ 7.4$ billion from net U.S. purchases of $\$ 11.4$ billion.

Net U.S. purchases of foreign stocks were more than accounted for by exchanges of stock related to several foreign direct investment acquisitions of U.S. companies, primarily by Western European companies. In nonmerger-related transactions, net sales, predominantly to Western Europe, may have been prompted by depreciation of the euro in exchange markets and by volatility in most European stock prices, which declined early in the quarter in tandem with the decline in U.S. stock prices but

2. Based on data for Ecuador, Venezuela, Indonesia, and other Asian and African oilexporting countries. Excludes Ecuador beginning January 1993 and Gabon beginning January 1995.
then rebounded late in the quarter; for the quarter, they were down 2 percent. In addition, foreign stock markets were unsettled about inflation prospects and possible interest-rate increases. Transactions with Japan shifted to large net sales following six consecutive quarters of net purchases. Japanese stock prices declined 3 percent, partly reflecting concerns about prospects for sustainable economic growth and possible increases in interest rates.

Net U.S. sales of foreign bonds were mostly attributable to sales of foreign-currency-denominated bonds, primarily to Latin America and the Caribbean, following three quarters of net U.S. purchases. Weakness in bond markets abroad and depreciation of most currencies against the U.S. dollar discouraged U.S. purchases of foreign-cur-rency-denominated bonds. Foreign new issues in the United States also slowed, as long-term yields in the United States rose sharply through the first half of the quarter. Investor confidence in emerg-ing-market debt deteriorated, and anticipated in-terest-rate hikes in the United States dampened U.S. investors' demand for foreign new issues.

Direct investment.-Net financial outflows for U.S. direct investment abroad were $\$ 37.5$ billion in the second quarter, down from $\$ 43.0$ billion in the first. Net intercompany debt shifted to inflows of $\$ 4.4$ billion from outflows of $\$ 10.6$ billion; most of the shift was accounted for by a sharp decrease in outflows on U.S. parents' receivables that resulted from a shift to inflows from Western Europe. Net equity capital outflows increased to $\$ 17.8$ billion from $\$ 9.4$ billion, mainly reflecting acquisitions of several large companies, particularly in the United Kingdom and to a lesser extent, in Canada. Reinvested earnings increased slightly; the increase was more than accounted for by an increase in the reinvested earning of affiliates in Western Europe.

## Foreign-owned assets in the United States

Net foreign-owned assets in the United States increased $\$ 222.7$ billion in the second quarter, following an increase of $\$ 236.5$ billion in the first. U.S. liabilities reported by U.S. banks increased sharply after a decrease, and net inflows for foreign direct investment in the United States surged. In contrast, net foreign purchases of U.S. securities other than U.S. Treasury securities slowed from their record pace, but they remained very strong. Net foreign sales of U.S. Treasury securities continued at a stepped-up pace.

Foreign official assets.-Foreign official assets in the United States increased $\$ 5.9$ billion in the second quarter, following an increase of $\$ 22.0$ billion in the first (table D). Intervention purchases of U.S. dollars by Asian countries early in the second quarter accounted for much of the increase. Assets of industrial countries and members of OPEC increased, while assets of other countries decreased.

Liabilities reported by banks and by nonbanks.U.S. liabilities to foreigners reported by U.S. banks, excluding U.S. Treasury securities, increased $\$ 48.7$ billion in the second quarter, following a decrease of $\$ 8.8$ billion in the first. Most of the secondquarter increase was attributable to a sharp rise in banks' own liabilities, mostly to own foreign offices, as U.S. banks borrowed heavily from abroad to meet the higher demand for short-term funds in U.S. banking and securities markets.

Banks' own liabilities payable in dollars increased $\$ 56.0$ billion, following a $\$ 4.3$ billion increase. The second-quarter increase largely reflected an acceleration in domestic credit demand, higher U.S. short-term interest rates relative to foreign rates, which prompted increased deposits in the United States, and a resumption of borrowing from unaffiliated banks abroad. U.S.owned banks more than accounted for the secondquarter increase, as they drew funds from their offices in the Caribbean and Western Europe to accommodate increased domestic demand for credit. Deposit inflows were also attracted to the higher U.S. interest rates relative to foreign rates. These inflows were partly offset by large decreases in liabilities of foreign-owned banks as they paid down loans to their affiliated offices abroad, primarily in Western Europe and the Caribbean.

Banks' custody liabilities payable in dollars decreased $\$ 2.0$ billion, following a decrease of $\$ 11.8$ billion. The second-quarter decrease was mostly accounted for by repayments to Western Europe early in the quarter.
U.S. liabilities reported by U.S. nonbanking concerns increased $\$ 21.6$ billion, following an increase of $\$ 58.1$ billion. Most of the second-quarter increase was accounted for by corporate borrowing from financial institutions in the Caribbean and by borrowing abroad through overseas financial intermediaries.
U.S. Treasury securities.-Net foreign sales of U.S. Treasury securities were $\$ 20.7$ billion in the second
quarter, up from net foreign sales of $\$ 9.2$ billion in the first. Large net sales occurred in the last half of the second quarter after U.S. long-term yields fell below those of short-term instruments and declined against the yields of several major countries. Net sales by Western Europe stepped up, particularly in June, while net sales by the Caribbean and by Japan slowed. Foreigners have been net sellers of U.S. Treasury securities in five of the last six quarters as they shifted funds into higher yielding U.S. corporate stocks and corporate and agency bonds.

Other U.S. securities.-Net foreign purchases of U.S. securities other than U.S. Treasury securities were $\$ 86.5$ billion in the second quarter, down from record net purchases of $\$ 132.4$ billion in the first (chart 5). Net foreign purchases of U.S. stocks were $\$ 26.1$ billion, down from $\$ 61.2$ billion, and net foreign purchases of U.S. corporate and other bonds were $\$ 60.5$ billion, down from $\$ 71.2$ billion.

Net foreign purchases of U.S. corporate stocks declined sharply from their record first-quarter level in reaction to the drop in U.S. stock prices. The broadly based S\&P 500 Stock Index ended the quarter down just 3 percent, but the more volatile Nasdaq index, which is concentrated in the information technology and telecommunications sectors, dropped 37 percent from early March to midMay. The drop was largely attributable to the high valuation of technology and telecommunications shares, to concerns over potential inflationary pressures, and to anticipation of interest-rate hikes as the U.S. economy continued to grow strongly. Most of the slowdown in net foreign purchases was accounted for by a shift to large net sales by Caribbean offshore hedge funds and by a slowdown in strong net purchases by Western Europe.

Net foreign purchases of U.S. corporate and other bonds slowed to $\$ 60.5$ billion from a record $\$ 71.2$ billion. Nearly all the slowdown was accounted for by reduced net purchases of U.S. agency bonds, as investors reacted to possible legislation that would alter the financial backing of agency bonds by the U.S. Government. This concern was manifested by increased credit-risk premiums and by higher borrowing costs on agency bonds and resulted in reduced new issues placed abroad by these agencies. Net purchases of U.S. corporate bonds declined slightly, but new issu-
ances of corporate bonds in the eurobond market increased.
U.S. currency flows.-Net shipments of U.S. currency from the United States were $\$ 1.0$ billion in the second quarter, in contrast to net shipments of $\$ 6.8$ billion from foreign countries to the United States in the first.

Direct investment.-Net financial inflows for foreign direct investment in the United States were $\$ 79.7$ billion in the second quarter, up sharply from $\$ 49.0$ billion in the first. The increase was more than accounted for by a substantial rise in net equity capital inflows, which were attributable primarily to several large acquisitions of U.S. companies by foreign companies and, to a lesser extent, to equity capital contributions to existing U.S. affiliates. Western Europe accounted for nearly all of the increase, but there were also increases from the Caribbean and from Japan. By industry, nearly all of the equity capital inflows were in petroleum. Reinvested earnings increased slightly, and net intercompany debt inflows decreased.

## Data Availability

The current and historical estimates that are presented in tables 1-10 of the U.S. international transactions accounts are available as compressed files on BEA's Web site at <www.bea.doc.gov>; click on "Catalog of Products," and look under "International Accounts Products," "Balance of Payments."
The estimates are also available from BEA on the following diskettes:
U.S. International Transactions. The most recently released annual and quarterly estimates are available as a 1 -year subscription (four installments)-product number IDS-0001, price $\$ 80.00$. The subscription also includes the diskette of the historical estimates (see below).
U.S. International Transactions, Second Quarter 2000. Annual estimates for 1999 and quarterly estimates for 1999:I-2000:II on a single diskette-product number IDN-0260, price $\$ 20.00$.
U.S. International Transactions, Historical Series. All the available historical annual and quarterly estimates on a single diskette-product number IDN-0261, price $\$ 20.00$.
To order, call the BEA Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

$$

Table 1:

1. Credits, : Exports of goods and services and income receipts; unilateral current transiers to the United States; capital account transactions receipts; financial inflows-increase in foreign-owned assets (U.S. liabilities) or decrease in

Debits, -: Imports of goods and services and income payments; unilateral current transfers to foreigners; capital accounts transactions payments; financial outtiows-decrease in foreign-owned assets (U.S. liabilities) or increase in U.S. Owned assets (U.S. claims).
2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2 .
3. Includes some gcods: Mainly militaryequipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25 .
4. Includes transfers of goods and services under U.S. military grant programs.
5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to inciude U.S. parents' payments to toreign affiliates and to exclude U.S. affiliates' receipts from foreign parents
6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.
7. At the present time, all U.S. Treasury-owned gold is held in the United States.
8. Includes sales of foreign odigations to foreigners.
8. Includes sales of foreign obligations to foreigners.
9. Consists of bills, certificates, marketable bonds and notes, and ronmarketable convertible and noncomvertible bonds and notes.
10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.
11. Includes, primarily, U.S. Governnent liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4.
12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.
13. Conceptually, line 76 is equal to "net foreign investment" in the national income and product accounts (NIPA's) However, the foreign transactions account in the NIPA's (a) includes adjustments to the international transactions account for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territorie and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except lite insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the internationa accounts and the NiPA net exports appears in reconciliation tabee 2 in appendix A in this issue of the SURVEY OF CURREN BusNess. A reconciliaion of the other foreign transactions in the wo sets of accounts appears in table 4.5 of the full set 0 Adcitional footnotes for historical data in July issues of the Sun.
Additional footnotes for historical data in July issues of the Surver:
14. For 1974 , includes extraordinary U.S. Government transactions with India. See "Special U.S. Government 14. For 1974 , includes extraorcina
Transactions," June 1974 Sufver, p. 27.
15. For 1978-83, includes foreign currency-denominated notes sold to private residents abroad.
16. Break in series. See Technical Notes and articles on revisions to the international accounts in the June 1989, June 1990, June 1992, June 1993, June 1995, and July 1996-2000 issues of the Sufver. Table 2:

1. Exports, Census basis, represent transactions values, f.a.s. U.S. port of exportation, for all years; imports, Census basis, represent Customs values (see Technical Notes in the June 1982 SuFvev), except for 1974-81, when they represent transactions values, f.a.s. foreign port of exportation (see June issues of the SUNVEY for historical data).

From 1983 forward, both unadjusted and seasonally adjusted data have been prepared by BEA from "actual" an "revised statistical" month data supplied by the Census Bureau (see Technical Notes in the December 1985 SURvEV).

Seasonally adjusted data reflect the application of seasonal factors developed jointly by Census and BEA. The sea sonally adjusted data are the sum of seasonally adjusted five-digit end-use categories (see Technical Notes in the June 1980 SURVEY, in the June 1988 Surver, and in the June 1991 SURVEY). Prior to 1983 , annual data are as published by the Census Bureau, except that tor 1975-80 published Census data are adjusted to include trade between the U.S. Virgin islands and foreign countries.
2. Adjustments in lines A5 and A13, B12, B48, and B84 reflect the Census Bureau's reconciliation of discrepancies between the goods statistics published by the United States and the counterpart statistics published in Canada. These acjustments are distributed to the affected end-use categories in section C. Beginning in 1986, estimates for undocumented exports to Canada, the largest iterm in the U.S.Canadian reconciliation, are included in Census basis data shown in line
A1.
3. Exports of military equipment under U.S. military agency sales contracts with foreign governments (line A6), and direct imports by the Department of Defense and the Coast Guard (line A14), to the extent such trade is identifiable from
Customs declarations. The exports are included in tables 1 and 10 , line 5 (transters under U.S. military agency sales Customs declarations. The exports are included in tables 1 and 10, line 5 (transters under U.S. military agency sales contracts); the imports are included in tables 1 and 10 , line 22 (direct defense expenditures).
4. Additionol electrical energy; deduction of exposed motion picture film for rental rather than sale; net change in stock of U.S. owned grains in storage in Canada; coverage adjustments for special situations in which shipments were omitted from Census data; deduction of the value of repairs and alterations to foreign-owned equipment shipped to the United States for repair; and the inclusion of fish exported outside of U.S. customs area. Also includes deduction of exports to the Panama Canal Zone before October 1, 1979, and for 1975-82, net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the Suiver for historical data).
5. Coverage adjustments for special situations in which shipments were on itted from Census data; the deduction of the value of repairs and alterations to U.S.-owned equipment shipped abroad for repair; and the adjustment of software imports to market value. Also includes addition of understatement of inland freight in t.a.s values of U.S. imports of goods from Canada in 1974-8, deduclion of imports irom the Panama Canal Zone beto tor net timing adjustments for goods recorded in Census data in one period but found to have been shipped in another (see June issues of the Sunver for historical data).
6. For 1988-89, correction for the understatement of crude petroleum imports from Canada.
7. Annual and unadjusted quarterly data shown in this table correspond to country and area data in table 10 , lines 3 and 20 . Trade with international organizations includes purchases of nonmonetary gold from the international Monetary
Fund, transfers of tin to the International Tin Council (ITC), and sales of satellites to Intelsat. The memoranda are defined Fund, transfers of tin to the international Tin Council (ITC), and sales of satelites to intelsat. The memoranda are define as follows: Incustrial countnes: Western Europe, Canada, Japan, Australia, New Zealand, and South Africa; Member of OPEC: Venezuela, Ecuador, Iraq, Iran, Kuwait, Saudi Arabia, Qatar, United Arab Emirates, Indonesia, Algeria, Lloya, Nigeria, and Gabon (Excludes Ecuador Deginning in January 1993 and Gabon beginning in January 1995.); Othercountries:
Eastern Europe, Latin America and Other Western Hemisohere, and other countries in Asia and Africa, less OPEC. Before 1894, complete, 1984, complete geographic area detail was not available tor some balance of payments adjustments. Therefore, the detal
shown does not always sum to the values shown for the area aggregates. For all years, "Asia" and "Africa" exclude certain shown does not always sum to the values shown for the area aggregaies. For all years, "A"
8. Includes the former German Democratic Republic (East Germany) beginning in fourth quarter of 1990. In earlier periods, the German Democratic Repubic was included in Eastern Europe.
9. Beginning in 1986, New Zealand and South Africa are included in "Other countries in Asia and Africa," with New Zealand included as part of "Asia" and South Africa as part of "Africa."
10. The "Euro area," which tormed in January 1999, includes Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain. Table 3:

1. Patented techniques, processes, and formulas and other intangible property rights that are used in goods production. 2. Copyrights, trademarks, franchises, rights to broadcast live events, and other intangible property rights.
2. Other unamimated services receips (exports) include mainiy expenditures of foreign governments and internationa organizations in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film rentals.

Table 4:

1. Expenditures to release foreign governments from their contractual liabilities to pay for military goods and services purchased through military sales contracts-first authorized (for Israet) under Public Law 93-199, section 4, and subsequently authorized (for many recipients) under similar legislation-are included in line A4. Deliveries against these military quently authorized (for many recipients) under similar legislaiion-are included in line A4. Deliveries aganst hese mine mare in lines A43 and A46 to reduce short-term assers previously recorded in fines A41 and C8; this application of funds is excluded from lines C3 and C4. A second part of line A4 expenditures finances future deliveries under mifitary sales contracts tor the recipient countries and is applied directly to lines A42 and C9. A third part of line A4, disbursed directly to finance purchases by recipient countries from commercial suppliers in the United States, is included in line A37. A fourth part of line A4, representing dollars paid to the recipient countries to finance purchases from countries other than the United States, is included in line A48.
2. Transactions under military sales contracts are those in which the Department of Defense sells and transfers military goods and services to a foreign purchaser, on a cash or credit basis. Purchases by foreigners directly from commercial suppliers are not included as transactions under military sales contracts. The entries for the several cat egories of transactions related to military sales contracts in this and other tables are partly estimated from incomplete data.
3. The identification of transactions involving direct dollar outifows from the United States is made in reports by each operating agency.
4. Line A38 includes foreign currency collected as interest and line A43 includes foreign currency collected as principal,
as recorded in lines A16 and A17 respectively. as recorded in lines A16 and A17, respectively.
5. Includes (a) advance payments to the Department of Defense (on military sales contracts) financed by loans extended to foreigners by U.S. Government agencies and (b) the contraentry tor the part of line C10 that was detivered without prepayment by the foreign purchaser. Also includes expenditures of appropriations available to release foreign purchasers from liability to make repayment.
6. Includes purchases of loans from U.S. banks and exporters and payments by the U.S. Government under commercial export credit and investment guarantee programs.
7. Excludes liabilities associated with military sales contracts financed by U.S. Government grants and credits and nciuded in line C 2 .
Table 5:
8. Beginning with 1991, payments and receipts of interest related to interest rate and foreign currency swaps between affiliates and parents are netted and are shown as either net payments or net receipts. Receipts and payments of other types of interest are shown on a gross basis.
9. Petroleum includes, and manufacturing and "other" industries exclude, the exploration, development, and productior. of crude oil and gas, and the transportation, refining, and marketing of petroleum products, exciusive of petrochemicals. "Other" industries includes wholesale trade; banking; finance (except banking), insurance, and reat estate; services; ank and retail trade.
10. Acquisition of equity holdings in existing and newly established companies, capital contributions, capitalization of intercompany debt, and other equity contributions.
11. Sales (total and partial), liquidations, returns of capital contributions, and other dispositions of equity holdings. Table 6:
12. Primarily provincial, regional, and municipal.
13. Largely transactions by International Bank for Reconstruction and Development (IBRD), international Development Association (IDA), Internationai Finance Corporation (IFC), Asian Development Bank (ADB), and inter-America: evelopment Bank (IDB).
14. Estimate tor scheduled redemptions and identifiable early retirements. Includes estimates based on Canadia statistics for
in line A30.
Table 7:
15. Estimates of transactions other than those with U.S. banks' Caribbean branches and with financial intermediarie: (FI.s) are not available. Preliminary estimates of transactions with F.I.s, by area, are commingled in "other" to avoic: disclosure of individual companies' area data.
16. Deposits (line A5) indude other financial claims (line A7) tor some countries due to the commingling of thes categories in foreign source data.
17. Primarily mortgages, loans, and bills and notes drawn on foreigners.
18. Western Eurpe Canad
19. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa
20. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
21. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginnir in January 1993.
Table 8:
22. Includes central governments and their agencies and corporations; state, provinciai, and local governments at their agencies and corporations; and international and regional organizations.
23. U.S.-owned banks are mainly U.S.chartered banks, Edge Act subsidiaries, and U.S. bank holding companis Foreign-owned banks include U.S. branches and agencies of foreign banks and majority-owned bank subsidiaries in United States. U.S. brokers and dealers are identified separately beginning with the first quarter of 1997; prior to 198 they are commingled with U.S.-owned banks' accounts.
24. Commercial paper issued in the U.S. market by foreign incorporated entities; excludes commercial paper issu
through foreign direct investment affiliates in the United States. through foreign direct irvestment affiliates in the United States.
25. Negotiable and readily transferable instruments other than commercial paper, payable in dollars; consists largely negotiable certificates of deposit,
26. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa.
27. Bahamas, British West Indies (Cayman Islands), Netheriands Antilles, and Panama.
28. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Excludes Ecuador beginnit in January 1993.
29. Includes Eastern Europe and international and regional organizations

Table 9:

1. Negotiable certificates of deposit issued by banks in the United States are included in banks' custody liabilities: re separately identified in memorandum line 8. Nonnegotiable certificates of deposit are included in time deposits.
2. Includes borrowing under Federal funds or repurchase arrangements, deferred credits, and liabilities other $\ddagger$ i
eposits.
3. Mainly negotiable and readily transserable instruments, excluding U.S. Treasury securities.
4. Mainly International Bank for Reconstruction and Development ( 1 BRD ), International Development Associal (IDA), International Finance Corporation (IFC), Asian Development Bank (ADB), Inter-American Development Bank (ID and the Irust Fund of the international Monetary Fund.
5. U.S.-OWned banks are mainly U.S.-chartered banks, Edge Act subsidiaries, and U.S. bank holding companik Foreign-owned banks include U.S. branches and agencies of foreign barks and majority-owned bank subsidiaries in United States. U.S. brokers and dealers are identified separately beginning with the first quarter of 1997; prior to 19 : they are commingled with U.S. owned banks' accounts.
6. Western Europe, Canada, Japan, Australia, New Zealand, and South Africa
7. Western Europe, Canada, Japan, Austraia, New Zealand, and South Africa
8. Bahamas, British West Indies (Cayman Islands), Netherlands Antilles, and Panama.
9. Ecuador, Venezuela, Indonesia, and other Asian and African oil-exporting countries. Exciudes Ecuador beginr in January 1993 .
10. Includes Eastern Europe and international and regional organizations.

Table 10: For footnotes 1-13, see table 1.
14. The "European Union" includes the "European Union (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European' Union" also includes Austria, Finland, and Sweden. 15. The "European Union (6)" includes Belgium, France, Germany (includes. the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Commurity, European Coai and Steel Community, and European Investment Bank.
16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; before 1996, small transactions in business se
17. Details are not shown separately; see totals in lines 56 and 63 .
18. Details not shown separately are included in line 69.

## U.S. International Services

## Cross-Border Trade in 1999 and Sales Through Affiliates in 1998

Michael A. Mann and Laura L. Brokenbaugh prepared the section on crossborder trade. Sylvia E. Bargas prepared the section on sales hrough affiliates.

IN 1999, exports and imports of U.S. private services both grew 4 percent (table A). For exports, the growth rate was faster than the 1998 rate of 2 percent. The pickup reflected a turnaround in exports to the Asia and Pacific area, primarily in travel and passenger fares and in "other transportation," that was attributable to improving economic conditions in several Asian countries. For imports, the growth rate was slower than the 1998 rate of 10 percent. The slowdown was largely due to a sharp falloff in net payments for insurance services. Excluding insurance, imports grew 8 percent, slightly lower than the 9-percent rate in 1998,

> Table A.-Sales of Services to Foreign and U.S. Markets Through Cross-Border Trade and Through Affiliates

## n.a. Not avaliable.

1. The estimates for 1986-98 are revised from those published in last year's articie in this series. See Cnristopher L. Bach, U.S. International Transacions, Revised Esimates for 1982 99," SURVEY OF CURRENT Business 80 (July 2000): 70-77.
2. The figures shown in this column for 1986-88 have been adjusted, for the purposes of this article, to be consistent with those for 1989 fonward, which reflect definitional and meth odological improvements made in the 1989 Benchmark Survey of U.S. Direct Investment Abroad The primary improvement was that investment income of afifilates in finance and insurance was excluded from sales of services. The adjustment was made by assuming that investment income of finance and insurance affiliates in 1986-88 accounted for the same share of sales of services pius investment income as in 1989.
of services by US. affilites. See the 996 and 1997 due to a change in the definition of sales of services by U.S. affiliates. See the box "Definition of Sales of Services by Affiliates."
reflecting the continuing strength of the U.S. economy.
U.S. services exports continue to exceed imports: In 1999, the U.S. surplus on services was $\$ 79.8$ billion, $\$ 3.3$ billion larger than in 1998. The surpluson services contrasts sharply with the U.S. deficit on goods, which expanded $\$ 98.7$ billion to a record $\$ 345.6$ billion.

For services sold through majority-owned affiliates of multinational companies, U.S. sales exceeded U.S. purchases in 1998-the most recent year for which data are available. Sales of services abroad by foreign affiliates of U.S. companies were $\$ 309.0$ billion, while sales of services in the United States by U.S. affiliates of foreign companies were $\$ 255.1$ billion. ${ }^{1}$

In 1998, sales of services by foreign affiliates grew 21 percent, and sales of services by U.S. affiliates grew 14 percent. The strong growth in both series largely reflected a global boom in merger and acquisition activity, as both U.S. and foreign multinational companies stepped up their acquisitions of firms outside their home countries. The stronger growth in sales by foreign affiliates reflects a greater concentration of acquisitions of foreign companies in services-producing industries by U.S. investors than by foreign investors of services-producing companies in the United States.

This article presents detailed estimates of U.S. cross-border exports and imports of private services and of U.S. sales of services through, and purchases of services from, nonbank majorityowned affiliates of multinational companies. Cross-border exports and imports are transactions between U.S. residents and foreign residents; they represent international trade in the conventional sense and are recorded, in summary form, in the U.S. international transactions accounts. ${ }^{2}$ Sales of services through nonbank majority-owned affiliates of multinational companies represent services

[^35]sold in international markets through the channel of direct investment (see the box "Channels of Delivery of Services Sold in International Markets" on page 122). ${ }^{3}$ The estimates are drawn from larger data sets on affiliate operations that are presented in annual articles on the operations of U.S. multinational companies and of U.S. affiliates of foreign companies. ${ }^{4}$

In 1998, services delivered through nonbank majority-owned affiliates again exceeded those de-
3. These data cover all sales of services by nonbank majority-owned affiliates, irrespective of the percentage of foreign ownership. The data are limited to nonbank affiliates because in most years, the surveys used to collect the data do not cover banking affiliates. The data exclude minority-owned affiliates because data on sales of services by foreign affiliates are collected only for affiliates that are majority-owned by U.S. direct investors. Excluding minority-owned affiliates may be preferable because the direct investor may own as little as 10 percent of a minority-owned affiliate and thus have less interest than local investors in the affiliate's sales.
4. See Raymond J. Mataloni, Jr., "U.S. Multinational Companies: Operations in 1998," Survey of Current Business 80 (July 2000): 26-45, and William J. Zeile, "U.S. Affiliates of Foreign Companies: Operations in 1998," Survey 80 (August 2000): 141-158.

livered through cross-border trade. Sales by foreign affiliates have exceeded exports since 1996, and sales by U.S. affiliates have exceeded imports since 1989 (chart 1). The relative importance of these channels of delivery in 1998 is shown for major geographic areas in chart 2 and for selected countries in chart 3. For specific types of services, however, the relative importance of the two channels is difficult to gauge because the available data on U.S. cross-border trade are generally classified by type of service, whereas the data on sales of services through affiliates are classified by primary industry of the affiliate.

The remainder of this article is presented in two parts. The first part discusses cross-border trade, and it presents preliminary estimates for 1999 and revised estimates for 1986-98. The second part discusses sales through majority-owned affiliates, and it presents preliminary estimates for 1998 and revised estimates for 1997.

## U.S. Cross-Border Trade in 1999

In 1999, U.S. exports of private services (receipts) increased 4 percent, to $\$ 254.7$ billion, following a 2 -percent increase in 1998. U.S. imports of private services (payments) increased 4 percent, to $\$ 174.8$ billion, following a 10 -percent increase in 1998.

|  | Percent change from prior year |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Exports |  | Imports |  |
|  | 1998 | 1999 | 1998 | 1999 |
| Private services ... | 2 | 4 | 10 | 4 |
| Travel .................................. | -3 | 5 | 9 | 5 |
| Passenger fares .................... | $-4$ | -2 | 10 | 7 |
| Other transportation ............... | -5 | 6 | 5 | 12 |
| Royalties and license fees ...... | 8 | 1 | 22 | 13 |
| Other private services ............. | 8 | 6 | 13 | -5 |

The pickup in exports of private services was primarily attributable to improving economic conditions in several Asian countries. In 1998, recessionary conditions in these countries-which reflected sharp reductions in real income, asset values, and access to capital-had adversely affected many of the services accounts. In 1999, improving conditions led to a sharp turnaround.

Despite the sharp turnaround in Asia, the 4percent growth rate in exports in 1999 was less than half the average growth rate for 1994-97. The growth rate in 1999 reflected a falloff in passenger fare receipts, as more foreigners traveled on foreign airlines rather than U.S. airlines, a falloff in receipts of U.S. parents from their foreign affiliates in Europe, and a slowdown in travel receipts from overseas visitors that reflected the appreciation of the U.S. dollar against the currencies of many of tha lrav tradina mentmare of tha linitad Ctatar
sold in international markets through the channel of direct investment (see the box "Channels of Delivery of Services Sold in International Markets" on page 122). ${ }^{3}$ The estimates are drawn from larger data sets on affiliate operations that are presented in annual articles on the operations of U.S. multinational companies and of U.S. affiliates of foreign companies. ${ }^{4}$

In 1998, services delivered through nonbank majority-owned affiliates again exceeded those de-

The second part discusses sales through majority-owned affiliates, and it presents preliminary estimates for 1998 and revised estimates for 1997.

## U.S. Cross-Border Trade in 1999

In 1999, U.S. exports of private services (receipts) increased 4 percent, to $\$ 254.7$ billion, following a 2 -percent increase in 1998. U.S. imports of private services (payments) increased 4 percent, to $\$ 174.8$ billion, following a 10 -percent increase in 1998.

|  | Percent change from prior year |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Exports |  | Imports |  |
|  | 1998 | 1999 | 1998 | 1999 |
| Private services ... | 2 | 4 | 10 | 4 |
| Travel .................................. | -3 | 5 | 9 | 5 |
| Passenger fares .................... | $-4$ | -2 | 10 | 7 |
| Other transportation ............... | -5 | 6 | 5 | 12 |
| Royalties and license fees ...... | 8 | 1 | 22 | 13 |
| Other private services ............. | 8 | 6 | 13 | -5 |

The pickup in exports of private services was primarily attributable to improving economic conditions in several Asian countries. In 1998, recessionary conditions in these countries-which reflected sharp reductions in real income, asset values, and access to capital-had adversely affected many of the services accounts. In 1999, improving conditions led to a sharp turnaround.

Despite the sharp turnaround in Asia, the 4percent growth rate in exports in 1999 was less than half the average growth rate for 1994-97. The growth rate in 1999 reflected a falloff in passenger fare receipts, as more foreigners traveled on foreign airlines rather than U.S. airlines, a falloff in receipts of U.S. parents from their foreign affiliates in Europe, and a slowdown in travel receipts from overseas visitors that reflected the appreciation of the U.S. dollar against the currencies of many of tha lrav tradina mentmare of tha linitad Ctatar
paid on primary insurance and on reinsurance in 1999 were little changed from 1998, but losses recovered on reinsurance increased more than 50 percent, thereby lowering net payments. The increase was attributable to a large number of weather-related events and other events in the property and casualty market both in the United States and abroad.

Despite the strong dampening effect of the developments in insurance services, imports of services continued to increase in 1999, reflecting the continued strong growth of the U.S. economy; real GDP grew 4.2 percent in 1999 and 4.4 percent in 1998. Excluding insurance, imports increased 8 percent in 1999, following a 9 -percent increase in 1998. Imports from Europe slowed substantially, reflecting slowdowns in "other private services" and in travel and passenger fares, while imports from the Asia and Pacific area, largely "other transportation," increased much more rapidly in 1999 than in 1998.

Europe and Asia and Pacific together accounted for two-thirds of total U.S. cross-border exports and for two-thirds of total U.S. cross-border imports of private services in 1999 (chart 4). Seven countries-the United Kingdom, Japan, Canada, Germany, Mexico, France, and the Netherlands-

[^36]accounted for nearly half of both total U.S. exports and total U.S. imports of services; they also accounted for half of the increase in exports of private services and for two-fifths of the increase in imports of private services (table B).

Additional highlights follow for each of the five broad categories of cross-border trade in private services in the U.S. international transactions ac-counts-travel, passenger fares, other transportation, royalties and license fees, and other private services (for detailed estimates see the tables at the end of the article). ${ }^{6}$

## Travel

Travel receipts increased 5 percent in 1999, to $\$ 74.9$ billion, following a 3-percent decrease in 1998. The turnaround was primarily attributable to improving economic conditions in Asia, but developments in Canada also contributed. Purchases by Canadian travelers in the United States increased in 1999, following a sharp decrease in 1998. This turnaround reflected a pickup in real economic growth in Canada to 4.2 percent from 3.1 percent and the relative stability of the Cana-

[^37]Channels of Delivery of Services Sold in International Markets: Cross-Border Trade and Sales Through Affiliates
Services are sold in international markets through two distinct channels. In the first channel, residents of one country sell services to residents of another country. These transactions-cross-border tradeconsist of both trade within multinational companies (intrafirm trade) and trade between unaffiliated parties. ${ }^{1}$ They are recorded in the international transactions accounts of both countries-as exports of services by the seller's country and as imports by the buyer's country.
The second channel of delivery is sales through foreign affiliates of multinational companies, which from the U.S. viewpoint, are sales to foreigners by foreign affiliates of U.S. companies or U.S. purchases from other countries' U.S. affiliates. These sales are not considered U.S. international transactions, because under the residency principle of balance-of-payments accounting, affiliates of multinational companies are regarded as residents of the countries where they are located rather than of the countries of their owners. Thus, sales abroad by foreign affiliates are transactions between foreign residents, and sales in the United States by U.S. affiliates are transactions between U.S. residents. (However, the direct investors' shares of the profits earned on these sales are recorded as U.S. international transactions.)

[^38]The two channels of delivery typically differ in their effect on an economy. For example, U.S. cross-border exports usually have a greater effect on the U.S. economy than the otherwise equivalent sales through foreign affiliates, because, in the former case, most or all of the income generated by the production of the services generally accrues to U.S.-supplied labor and capital. In contrast, for sales through foreign affiliates, only the U.S. parent company's share in profits may accrue to the United States (and be recorded as a U.S. international transaction); the other income generated by produc-tion-including compensation of employees-typically accrues to foreigners.
Some services can be delivered equally well through either channel, but the channel of delivery is often largely predetermined by the nature of the service. For example, travel services are inherently delivered through the cross-border channel; in contrast, many business, professional, and technical services are delivered mainly through the affiliate channel because of the need for close, continuing contact between the service providers and their customers.
To obtain a complete picture of the services transactions of affiliates, it would be necessary to examine not only their sales of services, as is done in this article, but also their purchases of services, both in their countries of location and elsewhere. However, the only data on their purchases of services that are available are those for transactions between parents and affiliates, which are discussed in the section on cross-border trade.

## CHART 4

## U.S. Cross-Border Services Transactions: Share by Area in 1999

dian dollar against the U.S. dollar. In 1998, the Canadian dollar had depreciated sharply against the U.S. dollar, which increased the cost of U.S. travel to Canadian residents and reduced Canadian travelers' expenditures.

Travel payments increased 5 percent in 1999, to $\$ 59.4$ billion, following a 9 -percent increase in 1998. The growth in payments for overseas travel (travel for destinations other than Canada and Mexico) slowed as average expenditures by U.S. travelers abroad were virtually unchanged after increasing 2 percent; the number of U.S. travelers overseas increased by roughly the same amount in both years. In 1999, half the increase in the number of travelers was to Western Europe. Payments to Mexico decreased 5 percent, to $\$ 6.1$ billion, following a 1 -percent decrease. The decrease in 1999 was primarily attributable to a falloff in payments in the Mexican border area.

## Passenger fares

Passenger fare receipts decreased 2 percent in 1999, to $\$ 19.8$ billion, following a 4 -percent decrease in 1998. Receipts continued to fall as more foreigners traveled on foreign airlines rather than on U.S. airlines.

Passenger fare payments increased 7 percent in 1999 , to $\$ 21.4$ billion, following a 10 -percent increase in 1998.

## Other transportation

Receipts for "other transportation" increased 6

Table B.-Cross-Border Service Exports and Imports by Type and Country, 1999
[Millons of dollars]

percent in 1999 , to $\$ 27.0$ billion, following a 5 -percent decrease in 1998 that was only the second sizable annual decrease in the past 30 years. The increase reflected a substantial increase in ocean port services receipts that was primarily attribut-
able to an increase in the volume of goods transported to and from the United States by foreignoperated liner vessels. The decrease in 1998 was largely attributable to depressed export volumes to Asia as a result of recessionary conditions there.

## Types of Cross-Border Services: Coverage and Definitions

The estimates of cross-border transactions cover both affiliated and unaffiliated transactions between U.S. residents and foreign residents. Affiliated transactions consist of intrafirm trade within multinational companies-specifically, the trade between U.S. parent companies and their foreign affiliates and between U.S. affiliates and their foreign parent groups. Unaffiliated transactions are with foreigners that neither own, nor are owned by, the U.S. party to the transaction.

Cross-border trade in private services is classified into the same five, broad categories that are used in the U.S. international transactions accounts-travel, passenger fares, "other transportation," royalties and license fees, and "other private services."

Travel.-The travel accounts cover purchases of goods and services by U.S. persons traveling abroad and by foreign travelers in the United States for business or personal reasons. These goods and services include food, lodging, recreation, gifts, entertainment, and other items incidental to a foreign visit. Expenditures for local transportation in the country of travel are also covered. U.S. travel transactions with both Canada and Mexico include border transactions, such as day trips for shopping and sightseeing.

A "traveler" is a person who stays less than a year in a country and is not a resident of that country. Diplomats and military and civilian government personnel are not classified as travelers regardless of their length of stay; their expenditures are included in other international transactions accounts. Educational expenditures by students and expenditures by medical patients are included in "other private services."

Passenger fares.-The passenger fare accounts cover fares paid by residents of one country to airline and vessel operators (carriers) that reside in another country. Receipts consist of fares received by U.S. air carriers from foreign residents for travel between the United States and foreign countries and between two foreign points and for travel on U.S. cruise vessels. Payments consist of fares paid by U.S. residents to foreign air carriers for travel between the United States and foreign countries and for travel on foreign cruise vessels.
"Other transportation."-The "other transportation" accounts cover U.S. international transactions arising from the transportation of goods by ocean, air, land (truck and rail), pipeline, and inland waterway carriers to and from the United States. The accounts cover freight charges for transporting exports and imports and operating expenses that transportation companies incur in foreign ports. Specifically, the accounts cover the freight receipts of U.S. carriers for transporting U.S. goods exports and for transporting goods between two foreign points and the freight payments to foreign carriers for transporting U.S. goods imports (freight insurance on exports and imports is covered in the "other private services" accounts).

Port services receipts consist of the value of the goods and services purchased by foreign carriers in U.S. ports. Port services payments consist of the value of goods and services purchased by U.S. carriers in foreign ports.

Royalties and license fees.-The royalties and license fees accounts cover transactions with nonresidents that involve pat-
ented and unpatented techniques, processes, formulas, and other intangible proprietary rights used in the production of goods; transactions involving trademarks, copyrights, franchises, broadcast rights and other intangible rights; and the rights to distribute, use, and reproduce general-use computer software.
"Other private services."-This account consists of other affiliated and unaffiliated services. The unaffiliated services are disaggregated into six categories: Education; financial services; insurance; telecommunications; business, professional, and technical services; and "other unaffiliated services."

Education receipts consist of expenditures for tuition and living expenses by foreign students enrolled in U.S. colleges and universities. Payments consist of tuition and living expenses of U.S. students for study abroad.

Financial services cover a variety of services that include funds management, credit card services, explicit fees and commissions on transactions in securities, fees on credit-related activities, and other miscellaneous financial services. Implicit fees paid and received on bond trading are also covered.
Insurance consists of premiums earned and paid for primary insurance and for reinsurance; losses paid by U.S. insurers and losses recovered from foreign insurers are netted against the premiums. Primary insurance consists of life insurance, accident and health insurance, and property and casualty insurance. Each type of primary insurance may be reinsured; reinsurance is the ceding of a portion of a premium to another insurer, who then assumes a corresponding portion of the risk. Reinsurance is one way of providing coverage for events with so high a degree of risk or liability that a single insurer is by itself, unwilling or unable to underwrite insurance against their occurrence.

Telecommunications consists of receipts and payments between U.S. and foreign communications companies for the transmission of messages between the United States and other countries; channel leasing; telex, telegram, and other jointly provided (basic) services; value-added services, such as electronic mail, video conferencing, and online access services (including Internet backbone services, router services, and broadband access services); and telecommunications support services.

Business, professional, and technical services cover a wide variety of services, such as legal services, accounting services, and advertising services (see list in table 1).
"Other unaffiliated services" receipts consist mainly of expenditures of foreign governments for services for maintaining embassies and consulates in the United States; expenditures of international organizations--such as the United Nations, the International Monetary Fund, and the World Bank-that are headquartered in the United States; expenditures of foreign residents employed temporarily in the United States; and receipts from unaffiliated foreigners for the rights to display, reproduce, or distribute U.S. motion picture and television films and tapes. Payments consist primarily of payments by U.S. film distributors to unaffiliated foreign residents for the rights to display, reproduce, or distribute motion picture and television films and tapes.

Payments for "other transportation" increased 12 percent in 1999 , to $\$ 34.1$ billion, following a 5 percent increase in 1998. The sharp pickup resulted from a strong increase in goods imports from all major geographic areas. Ocean freight payments surged as a result of the higher import volumes and higher freight rates, particularly on imports from Asia. Port services payments abroad also increased, largely reflecting an increase in airport services payments that resulted from increases in both export and import volumes and from higher prices for jet fuel.

## Royalties and license fees

Receipts from royalties and license fees increased 1 percent in 1999, to $\$ 36.5$ billion, following an 8percent increase in 1998. The smaller increase in 1999 was partly attributable to a falloff in receipts by U.S. parents from their European affiliates in the industrial machinery and wholesale trade industries. Affiliated royalties and license fees receipts decreased 2 percent in 1999, following an 8percent increase in 1998. The increase in 1998 was largely generated by strong sales of new products by foreign affiliates of U.S.-parent companies, particularly in the pharmaceutical industry. Unaffiliated royalties and license fees receipts continued to increase steadily.

Payments of royalties and license fees increased 13 percent in 1999, to $\$ 13.3$ billion, following a 22percent increase in 1998. Payments to unaffiliated foreigners increased 4 percent, following a 23 -percent increase. The increase in 1999 represented a return to a more normal rate of growth after the substantial increase in 1998 that was largely due to payments to the International Olympic Committee (IOC) for broadcast rights to the Winter Olympic Games. Excluding the payments to the IOC, unaffiliated royalties and license fees payments increased about 10 percent in 1998 and 16 percent in 1999.

## Other private services

"Other private services" receipts increased 6 percent in 1999 , to $\$ 96.5$ billion, following an 8 -percent increase in 1998. The slowdown was primarily attributable to unaffiliated services receipts, mainly receipts in telecommunications and "other unaffiliated services"; affiliated receipts changed little. Telecommunications receipts decreased 19 percent after a 41-percent increase. The large increase in 1998 reflected the installation of new satellite capacity and the subsequent provision of new satellite services to parts of the Middle East and

Europe; the decrease in 1999 largely reflected a reduction in calling rates that more than exceeded the increase in the volume of incoming calls. "Other unaffiliated services" receipts increased 5 percent after a 14 -percent increase. The sharp increase in receipts in 1998 was attributable to unusually strong receipts from the showing of major U.S. films abroad.

Financial services receipts increased 24 percent in 1999, following a 10 -percent increase in 1998 and a 24 -percent increase in 1997. The acceleration in 1999 reflected renewed vigor in foreign ac-

## Detail on Intrafirm Trade in Services

Updated estimates of cross-border trade in services between U.S. parents and their foreign affiliates by type of service are provided below. Similar detail on services trade between foreign parents and their U.S. affiliates was first collected in the 1997 benchmark survey of foreign direct investment in the United States; those data will be published later this year in Foreign Direct Investment in the United States: Final Results From the 1997 Benchmark Survey and will be updated in the next article on U.S. international services.

- Less than $\$ 50$ million.

1. The estimates for 1997 and 1998 are revised; those for 1999 are preliminary. 2. Included under "other transportation" in table 1.
2. Included in U.S. parents' transactions under "other private services," affiliated, in table 1. (That item also includes receipts and payments and rentais for the use of tangible property and of film and television tape rentals.)
3. The transactions reported for insurance services are limited to those not arready collected on other surveys-specifically, to purchases of primary insurance (and the related recovery of losses) by U.S. parent companies from foreign affiliates in insurance.

For both receipts and payments, most of the intrafirm trade in services is accounted for by the "other" category. A significant portion of the transactions in this category may be accounted for by expenses, such as management services and research and development assessments, that are widely allocated among the various divisions or parts of an enterprise and that are not billed separately.
tivity in U.S. financial markets, as financial markets worldwide stabilized and as expected rates of return on U.S. assets exceeded the expected rates of return on assets abroad. In 1998, activity in U.S. financial markets-and in world financial markets in general-slowed sharply from a strong uptrend in recent years, as instability in financial markets caused foreign companies to reduce or postpone financial transactions, such as issuing new foreign stocks and bonds in the United States and trading in U.S. equity and bond markets.
"Other private services" payments decreased 5 percent in 1999, to $\$ 46.7$ billion, following a 13 percent increase in 1998. The downturn was accounted for by unaffiliated payments; affiliated payments accelerated slightly. For the unaffiliated component, the downturn was almost entirely accounted for by developments in insurance, mainly the sharp falloff in net payments for reinsurance; telecommunications payments also contributed to the decrease in 1999, as the reduction in calling rates exceeded the increase in the volume of outgoing calls. Excluding these components, unaffiliated payments increased 7 percent in 1999 after increasing 11 percent in 1998.

## Acknowledgments

The estimates of cross-border trade were prepared by the following staff members of the Balance of Payments Division and the International Investment Division.
Travel and passenger fares-Joan E. Bolyard and Laura L. Brokenbaugh.
Other transportation-Patricia G. Watts and Edward F. Dozier.
Royalties and license fees and other private ser-vices-affiliated, Gregory G. Fouch (for transactions of U.S. affiliates) and Mark W. New (for transactions of U.S. parents); unaffiliated, Christopher J. Emond, Christina D. Briseno, Shirley J. Davis, Rafael I. Font, Pamela Aiken, Damon C. Battaglia, Annette Boyd, Faith M. Brannam, Hope R. Jones, Eddie L. Key, Christine M. Locke-Paddon, Steven J. Muno, John A. Sondheimer, Robert A. Becker, Jane C. Newstedt, and Vicki L. Schepker.
The estimates of sales of services through major-ity-owned affiliates were prepared by staff members of the International Investment Division.
The information in tables $1,2,3$, and 5 was consolidated by John A. Sondheimer, assisted by Robert A. Becker. Computer programming for data estimation and the generation of the other tables was provided by Marie Colosimo, Carole J. Henry, Fritz H. Mayhew, and Diane I. Young.

## Sales Through Affiliates in 1998

In 1998, the latest year for which data are available, worldwide sales of private services by U.S. multinational companies through their nonbank, ma-jority-owned foreign affiliates were $\$ 323.9$ billion, up 20 percent from 1997 (table C). ${ }^{7}$ Worldwide sales of services by foreign multinational companies through their nonbank, majority-owned U.S. affiliates were $\$ 272.5$ billion, up 15 percent. However, the comparison of the two series is affected by the redefinitions that have raised the measure of services sold in the United States by U.S. affiliates of foreign companies (see the box "Definition of Sales of Services by Affiliates").

Sales of both goods and services by affiliates are predominantly local transactions. In 1998, 82 percent of worldwide sales of services by foreign affiliates of U.S. companies were transactions with parties in the same country as the affiliate (local sales); the corresponding share for goods was 62

MOTE.-In this table, sales of services through MOFA's are those typical of establishments in the following SIC-based industries: "Services", finance (except depository institutions), insurance, and real estate; agricultural, mining, and petroleum services;' and transportation, communication and public utilities.
Sales of services through MOUSA's are those typical of establishments in the following NAICS-based industries: Support activities for agriculture and forestry; support activilies for oil and gas operations; support activities for mining; transportation and warehousing; information; finance and insurance; real estate and rental and leasing; professional, scientific, and technical services; management of companies and enterprises; administrative and support, waste management, and remediation services; educational sevices; health care and social assistance; arts, entertainment, and recreation; accommodation and food services; and other services.

Depository institutions are excluded from both listings because data are not available
MNC Mulitinational company
MOUSA Maiority-owned U.S. affiliate
percent. The larger share for services reflects the importance of proximity to the customer in the delivery of services. Sales to parties in other foreign countries accounted for 13 percent of worldwide sales of services by foreign affiliates; sales to parties in the United States (U.S. persons) accounted for only 5 percent of worldwide sales, and over three-fourths of these sales were to the affiliate's U.S. parent. Partly reflecting the large U.S. market, local sales accounted for 94 percent of sales of services by U.S. affiliates of foreign companies and for an estimated 89 percent of sales of goods. ${ }^{8}$

Sales of services to foreign persons by nonbank foreign affiliates and sales of services to U.S. persons by nonbank U.S. affiliates both represent services delivered to international markets through the channel of direct investment. These sales are shown by country of affiliate or by country of the

[^40]affiliates' ultimate beneficial owner (UBO) for 1991-98 in table 8.9 Sales by primary industry of affiliate cross-classified by country in 1997 and 1998 are shown in table 9 (for foreign affiliates) and tables 10.1 and 10.2 (for U.S. affiliates). In table 9, petroleum-related activities are consolidated in the major industry "petroleum;" in tables 10.1 and 10.2, they are distributed among the NAICSbased industries to which they belong. ${ }^{10}$

## Foreign affiliates' sales to foreign persons

In 1998, sales of private services to foreign persons by majority-owned foreign affiliates of U.S. companies were $\$ 309.0$ billion. By area, affiliates in Europe accounted for 60 percent of the total; half of the sales by affiliates in Europe were accounted for

[^41]
## Definition of Sales of Services by Affiliates

In this article, sales of services by affiliates are defined as sales that are typical of establishments classified in particular industries. Currently, the industry groups used for this purpose differ for the two types of investment because BEA is making the transition from the 1987 Standard Industrial Classification (SIC) system to the 1997 North American Industry Classification System (NAICS). ${ }^{1}$ For sales of services by U.S. affiliates of foreign companies, the NAICS-based classifications were first used in the 1997 benchmark survey of foreign direct investment in the United States (FDIUS). For sales of services by foreign affiliates of U.S. companies, the NAICS-based classifications are first used in the 1999 benchmark survey of U.S. direct investment abroad, which is currently being processed. The transition to a NAICS-based classification system requires a redefinition of sales of services by affiliates.
Both the sales of services abroad by foreign affiliates of U.S. companies through 1998 and the sales of services in the United States by U.S. affiliates of foreign companies through 1996 are defined on the basis of industry classifications that are derived from the SIC. Specifically, these sales are defined as sales typical of establishments in the following SIC-based industries: "Services"; finance (except depository institutions), insurance, and real estate; agricultural, mining, and petroleum services; and transportation, communication and public utilities. (Sales typical of establishments in other SIC-based industries are included in sales of goods.)
Beginning with 1997 for U.S. affiliates and with 1999 for foreign affiliates, sales of services are defined on the basis of industry classifications that are derived from the NAICS. Specifically, these sales are defined as sales typical of establishments in the following NAICSbased industries: Support activities for agriculture and forestry; support activities for oil and gas operations; support activities for mining;

[^42]transportation and warehousing; information; finance and insurance; real estate and rental and leasing; professional, scientific, and technical services; management of companies and enterprises; administrative and support, waste management, and remediation services; educational services; health care and social assistance; arts, entertainment, and recreation; accommodation and food services; and other services. (Sales typical of establishments in other NAICS-based industries are included in sales of goods.)
For the most part, the sales of services that are included under the NAICS-based definition are the same as those that are included under the SIC-based definition. However, some sales that are included in services under the NAICS-based definition-particularly those typical of publishers of newspapers, periodicals, books, and records and those typical of restaurants-are included in sales of goods under the SICbased definition. The NAICS-based definition also excludes some sales that the SIC-based definition includes, particularly those typical of land subdividers, of reproducers of software and video, and of dental laboratories. The sales that are newly included in sales of services and those that have been reclassified to sales of goods cannot be precisely measured. However, rough estimates based on the data reported on the 1997 benchmark survey of FDIUS indicate that for U.S. affiliates of foreign companies, the redefinition resulted in a net movement of sales from goods to services; thus, there is a discontinuity between the 1997 estimates of sales of services by U.S. affiliates and the estimates for earlier years. The redefinitions also reduced the comparability between this series and the series on sales of services by foreign affiliates for 1997 and 1998.
For more information, see the box "Changes in the Definition and Classification of Sales of Services by U.S. Affiliates," in Michael A. Mann, Laura L. Brokenbaugh, and Sylvia E. Bargas, "U.S. International Services: Cross-Border Trade in 1998 and Sales Through Affiliates in 1999," Survey of Current Business 79 (October 1999): 61.
by affiliates in the United Kingdom. Affiliates in Canada and Japan accounted for 9 percent and 7 percent, respectively, of total sales to foreign persons. By primary industry of the affiliate, more than a third of the total was accounted for by affiliates classified in the "services" division of the Standard Industrial Classification (SIC) system. ${ }^{11}$ Within "services," affiliates in computer and data processing services had the most sales. However, computer-related services are also likely to have been sold by affiliates in industries that are not classified in "services," particularly in "computer and office equipment manufacturing" (part of "machinery" in table 9) and in "professional and commercial equipment and supplies" (part of wholesale trade). The combined sales of services to foreigners by affiliates in these three industries exceeded $\$ 70$ billion in 1998. ${ }^{12}$ Sales were also large by affiliates in "other industries" (particularly electric, gas, and sanitary services), in "finance, except

[^43]depository institutions," and in insurance.
Foreign affiliates' sales increased 21 percent in 1998, following a 14 -percent increase in 1997. Sales grew strongly despite the weak or negative economic growth in much of Asia and Latin America and despite the appreciation of the U.S. dollar against the currencies of many host countries, which reduced the dollar value of foreign-currency-denominated sales by foreign affiliates. ${ }^{13}$ The 1998 increase primarily reflected the sales of newly acquired affiliates. U.S. investors continued to acquire or establish new foreign affiliates at a rapid pace, partly because of favorable economic conditions in Europe, Canada, and Australia. Additionally, several large acquisitions resulted from opportunities created by the privatizations of electric utilities and communications companies abroad. ${ }^{14}$

Affiliates in Europe accounted for nearly threefourths of the increase in sales of services by foreign affiliates of U.S. companies, and more than half of the increase for Europe was accounted for

[^44]
## Data Sources

The estimates in this article are primarily based on data from the surveys conducted by the Bureau of Economic Analysis (BEA). However, the estimates for some services are based on a variety of other sources, including data from surveys conducted by other Federal Government agencies, data provided by private sources, customs data, and data from partner countries.
BEA conducts 11 surveys of cross-border trade with unaffiliated foreigners, that is, with foreigners that neither own nor are owned by the U.S. party to the transaction. These surveys cover six categories of services: (1) Selected services (mainly miscellaneous business, professional, and technical services), (2) construction, engineering, architectural, and mining services, (3) insurance, (4) financial services, (5) royalties and license fees, and (6) transportation. Each of these categories is covered by a separate survey or by a group of surveys.
More detailed information on these surveys is available in U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis. The Guide presents general information about the classification, definition, and release schedules of all the surveys, and it provides details for each survey on the items covered, the frequency of the surveys, the numbers of respondents, and the methods that were used to prepare the estimates.
The Guide is available on BEA's Web site at <www.bea.doc.gov> or by writing to the International Investment Division, BE-50, Bureau of Economic Analysis,

Washington, DC 20230. For further information, call 202-606-9853.
The data on cross-border trade with affiliated foreigners and on sales by majority-owned affiliates are collected in BEA's surveys of U.S. direct investment abroad (USDIA) and of foreign direct investment in the United States (FDIUS). The methodology for the USDIA surveys is described in U.S. Direct Investment Abroad: 1994 Benchmark Survey, Final Results (Washington, DC: U.S. Government Printing Office, 1998); the methodology for the FDIUS surveys will be available later this year in Foreign Direct Investment in the United States: Final Results From the 1997 Benchmark Survey.
For additional information on the methodology used to prepare the estimates of cross-border trade-both affiliated and unaffiliated, see The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures (Washington DC: U.S. Government Printing Office, 1990). For changes in the methodology that have been made since 1990, see the section "Technical Notes" in the quarterly articles on the U.S. international transactions in the June 1990 and 1991 issues of the Survey of Current Business, the section "Revised Estimates for 1976-91" in the June 1992 issue, and the annual articles on the revised estimates of U.S. international transactions in the June 1993-95 issues and in the July 1996-2000 issues.
These methodologies and the Survey articles for July 1996-2000 are available on BEA's Web site at <www.bea.doc.gov>.
by affiliates in the United Kingdom. The increase for the United Kingdom ( $\$ 20.4$ billion) primarily reflected the sales of financial firms. Sales by affiliates in Latin America and Other Western Hemisphere rose $\$ 9.5$ billion; most of this increase was accounted for by affiliates in Brazil, primarily reflecting sales by newly acquired communications companies. Sales by affiliates in Canada, primarily those in public utilities, increased $\$ 2.6$ billion. Sales by affiliates in Japan, mainly those in finance, increased $\$ 1.2$ billion.

By SIC-based industry group, almost all of the increase in sales of services by foreign affiliates was accounted for by "services," by "finance (except depository institutions)," and by "other industries." For each of these industries, the increase partly reflected acquisitions. The increase in "services" primarily reflected the sales of affiliates that provide computer and data processing services. Most of the increase in finance was accounted for by affiliates in the United Kingdom. The increase in "other industries" was primarily in communications, reflecting sales by newly acquired companies.

## U.S. affiliates' sales in the United States

In 1998, sales of private services to U.S. customers by majority-owned U.S. affiliates of foreign companies were $\$ 255.1$ billion. By area of the affiliates' UBO, Europe accounted for the largest share of the total ( 62 percent), followed by Canada ( 17 percent), Asia and Pacific ( 16 percent), and Latin America ( 3 percent). By country of the affiliates' UBO, the United Kingdom accounted for the largest share of sales, followed by Canada and Germany.

By NAICS-based industry group, sales were largest in "finance (except depository institutions) and insurance," followed by "other industries" and information. Most of the sales in finance and insurance were accounted for by affiliates in insur-ance-particularly those with UBO's in the United Kingdom, Switzerland, and Canada. Sales in "other industries" were largest by affiliates in transportation and warehousing, in utilities, and in administration, support, and waste management (primarily in employment services). In information, sales were largest in publishing, followed by broadcasting and telecommunications.
U.S. affiliates' sales of services in the United

States increased 14 percent in 1998. The increase primarily reflected net additions to the affiliate universe as a result of a record amount of new direct investments by foreign multinational companies. ${ }^{15}$ Acquisition activity by foreign investors was spurred by favorable economic conditions in the United States, Europe, and Canada. ${ }^{16}$

Nearly three-fourths of the increase in affiliates' sales of services was accounted for by affiliates with UBO's in Europe. Affiliates with UBO's in Canada accounted for the rest. Within Europe, the Netherlands and Germany had the largest increases; both increases primarily reflected the sales of services by firms that are classified in goods-producing industries. For the Netherlands, the increase reflected sales by newly acquired firms in petroleum and coal products manufacturing; for Germany, it reflected sales by newly acquired firms in transportation equipment. The increase for Canada was primarily in finance and insurance and in broadcasting and telecommunications, partly reflecting acquisitions.

By industry of affiliate, the largest increases were by affiliates classified in manufacturing and by affiliates in information. In manufacturing, the increase was concentrated in petroleum and coal products and in transportation equipment-reflecting the previously mentioned acquisitions. In information, increases that resulted from acquisitions in broadcasting and telecommunications and in publishing were partly offset by a decrease in motion picture and sound recording that was partly related to selloffs.

Tables 1 through 10 follow.
15. According to data from BEA's survey of new foreign direct investments, outlays to acquire or establish U.S. businesses were $\$ 215.3$ billion in 1998 (a record that was surpassed in 1999). See Ned G. Howenstine and Rosaria Troia, "Foreign Direct Investment in the United States: New Investment in 1999," Survex 80 (June 2000): 55-63.
16. For additional information about foreign direct investment in the United States in 1998, see Bargas and Troia, "Direct Investment Positions in 1998," and Zeile, "Operations in 1998."

## Data Availability

The estimates of cross-border trade for 1986-99 and of sales through majority-owned affiliates for 1989-98 are available as HTML files and as compressed files that can be downloaded from BEA's Web site at <www.bea.doc.gov>. To access the file, click on "BOP and related data," and look under "Exports and Imports."

1. Prior to 1990, this line includes data only for the Federal Republic of Germany. Beginning in 1990, this line also includes the former German Democratic Republic.
2. The European Union comprises Belgium, Denmark, France, Germany, Greace, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, United Kingdom, Austria, Finland, and Sweden. The last three countries joined the Union on January 1,1995. The estimates prior to 1995 do not reflect the addition of these three countries.
3. Eastern Europe comprises Albania, Armenia, Azeibajian, Belarus, Buigaria, Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Poland, Romania, Russia, Slovakia, Tajikstan,
Turkmenistan, Ukraine, and Uzbekistan. Turkmenistan, Ukraine, and Uzbekistan.
NOTE.-The full country and area detail shown in the stub is available only since 1992.

*Less than $\$ 500,000$.

1. For MOFA's, "country" is the country of the affiliate; for MOUSA's, it is the country of the affiliate's ultimate beneficial owner.
2. See table A, footnote 3.

Foreign affiliates classified in "International" are those that have operations in more than one country and that are engaged in petroleum shipping, other water transportation, or operating movable oil- and gas-driling equipment.
4. Contains data for U.S. affiliates that have a foreign parent but whose ultimate beneficial owner is a U.S. person. 5. See table 2, footnote 2 . 6. See table 2, footnote 3 . MNC Mútinational company MOFA Majority-owned foreign affiliate MOUSA Majority-owned U.S. affiliate

*Joint release by Bureau of the Census and the Bureau of Economic Analysis.

## BEA CURRENT AND HISTORICAL DATA

## National, International, and Regional Estimates

This section presents an extensive selection of economic statistics prepared by the Bureau of Economic Analysis (BEA) and a brief selection of collateral statistics prepared by other Government agencies and private organizations. Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

BEA's economic statistics are available on three Web
sites. BEA's Web site at <www.bea.doc.gov> contains data, articles, and news releases from the national, international, and regional programs. The Federal Statistical Briefing Room (FSBR) on the White House Web site at <www.whitehouse.gov/fsbr> provides key economic statistics, including gross domestic product. The Commerce Department's STAT-USA Web site at <www.stat-usa.gov> provides detailed databases and news releases from BEA and from other Federal Government agencies by subscription.

The tables present annual [A], quarterly [Q], and monthly [M] estimates.

## National Data

## A. Selected NIPA Tables

The tables in this section include the most recent estimates of gross domestic product and its components; these estimates were released on September 28, 2000 and include the "final" estimates for the second quarter of 2000.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly; in most of these tables, annual estimates are also shown.

The news release on gross domestic product (GDP) is available within minutes of the time of release, and the "Selected NIPA Tables" are available later that day, on STAT-USA's Web site <www.stat-usa.gov>; for information, call STAT-USA on 202-482-1986. The GDP news release is also available within minutes of the time of release, and the "Selected NIPA Tables" a day or two later, on BEA's Web site <www.bea.doc.gov>.

The "Selected NIPA Tables" are also available on printouts or diskettes from BEA. To order NIPA subscription products, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666).

| Residual ................................... |  |  |  |  |  |  |  | -10.6 |

NOTE.-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 Nurrent-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity current-dollar value of the corresponding series, divided by 100 . Because the tormula for the chain-type quantity
indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.
Percent changes from preceding period for selected items in this table are shown in table 8.1; contributions to
the percent change in real gross domestic product are shown in table 8.2
Chain-type quantity indexes for the series in this table are shown in table 7.1.

NoTE.-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.
herm in changes from preceding period for gross domestic product and for final sales of comestic product are shown in table 8.1 Chain-type quantity indexes for the series in this table are shown in table 7.17.

Table 1.6.-Relation of Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers
[Billions of chained (1996) dollars]

| Gross domestic product | 8,515.7 | 8,875.8 | 8,730.0 | 8,783.2 | 8,905.8 | 9,084.1 | 9,191.8 | 9,318.9 |

Gross product of nontinancial corporate business ${ }^{1}$
Consumption of fixed capital ${ }^{2}$ Net product ${ }^{3}$

1. Effective with the estimates scheduled for release on November 29, 2000, chained-dollar gross product of nontinancial corporate business for 1997 to 2000 will be revised to reflect revisions to the gross product price in dexes for nonfinancial industries.
2. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the produc of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. 3. Chained-doliar net product of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital

SURVEY OF CURRENT BUSINESS
National Data • D-7

## 2. Personal Income and Outlays

Table 2.1--Personal Income and Its Disposition [Billions of dollars]

1. Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 .
2. Equals disposable personal income deflated by the implicit price defiator for personal consumption expendi-

Ures.
NOTE.-Percent changes from preceding period for disposable personal income are shown in table 8.1.

Table 2.2.-Personal Consumption Expenditures by Major Type of Product
[Billions of dollars]

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

Table 2.3.-Real Personal Consumption Expenditures by Major Type of Product

| Addenda: <br> Energy goods and services ${ }^{1}$ <br> Personal consumption | 275.1 | 280.4 | 277.7 | 280.0 | 284.9 | 279.2 | 275.4 | 283.0 |
| expenditures less food and energy $\qquad$ | 4,590.4 | 4,851.4 | 4,748.8 | 4,821.2 | 4,881.3 | 4,954.3 | 5,064.4 | 5,099.5 |

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NotE-Chained (1996) dollar series are calculated as the product of the chain-lype quantity index and the 1996 current-कollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.
The residual line is the difference between the first line and the sum of the most detailed lines.
Chain-type quantity indexes for the series in this table are shown in table 7.4
Contributions to the percent change in real personal consumption expenditures are shown in table 8.3.

Table 3.7.-Government Consumption Expenditures and Gross Investment by Type
[Billions of dollars]

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.
2. consumption expenditures for durable goods exciudes expenditures classified as investment, except for goods
3. Compensation of government employees engaged in
for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addenda.
4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

Table 3.8.-Real Government Consumption Expenditures and Gross Investment by Type
[Billions of chained (t996) dollars]

NOTE-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 curfent-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-lype quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additve. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Chain-type quantity indexes for the series in this table are shown in table 7.11.
Contributions to percent change in real government consumption expenditures and gross investment are shown in table 8.6.

NOTE-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-doliar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-doliar estimates are usually not additive. The residual line is
line in the addendum.
Chain-type indexes for the series in this table are shown in table 7.12.
See tootnotes to table 3.10.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Govemment, are included in services. Beginning with 1986, repairs and atterations of equipment are reclassitied from goods to services.
2. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

Table 4.4.-Real Exports and Imports of Goods and Services by Type of Product
[Billions of chained (1996) dollars]

NOTE.-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-doilar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following the detail for exports is the difference between the aggregate "exports of goods and
services" and the sum of the detailed lines for exports of goods and exports of services. The residual line following services" and the sum of the detailed lines for exports of goods and exports of services. The residual line following the detail for imports is the difference between the aggregat
the detailed lines for imports of goods and imports of senvices.
the detailed lines for imports of goods and imports of services.
Chain-type quantity indexes for the series in this table are shown in table 7.10 .
Chain-type quantity indexes for the series in this table are showr in table 7.10 .
Contributions to the percent change in real exports and in real imports of goods and services are shown in table 8.5.

| Residual ... |  |  |  |  |  |  |  |  |

[^48]2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.
The residual line is the difference between the first line and the sum of the most detailed lines.
Contributions to the percent change in real private fixed investment are shown in

1. This series is derived from the Census Bureau series "current cost inventories."
2. The inventiory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.
3. Inventories of auto and home supply stores are included in "other durable goods."

1. Inventories of auto and home supply stores are included in "other durable goods."

NOTE.-Chained (1996) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-doliar estimates are usualiy not additive. The residual line is the difference between the first
line and the sum of the most detailed lines.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories caiculated from cur-rent-dollar itrventories in this table is not the current-dollar change in the private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-or-quarter prices. The changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.
2. Inventories of auto and home supply stores are included in "other durable goods."
3. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of comestic product less gross product of households and institutions and of general govemment, and it includes a small amount of final sales by farm and by government enterprises.

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas, the change in private inventories component of GDP is stated at annual rates.
2. Inventories of auto and home supply stores are included in "other durable goods."
3. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includies a small amount of final
sales by farm and by government enterprises.
NoTE--Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-doilar change in inventories for 1996 and that the average of the 1995 and 1996 end-0f-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by t00. Because the formula for the chain-type quantity indexes uses weights of more than one
period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines for inventories.

## 6. Income and Employment by Industry

Table 6.1C.-National Income Without Capital Consumption Adjustment by Industry Group
[Bilions of dollars]

NOTE.-Estimates in this table are based on the 1987 Standard Industrial Classitication (SIC).

NOTE--See footnotes to table 4.3.

Table 7.11.-Chain-Type Quantity and Price Indexes for Government Consumption Expenditures and Gross Investment by Type [Index numbers, 1996=100]

1. Gross government investment consists of general govemment and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.
2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods
transferred to foreign countries by the Federal Government.
3. Compensation of government employees engaged in new own-account investment and related expenditures
for goods and services are classified as investment in structures and in sotware. The compensation of all general government employees is shown in the addenda.
4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net
return on these assets.

1. For some components of final sales of computers, includes computer parts.

NOTE,-Contributions to the percent change in real gross domestic product are shown in table 8.2.

Table 8.2.-Contributions to Percent Change in Real Gross Domestic Product

1. Excludes software "embedded," or bundied, in computers and other equipment.
2. For some components of final sales of computers, includes computer parts.

Nore.-The quantity indexes on which the estimates in this table are based are shown in tables 7.1, 7.2, 7.4 7.6, 7.9. 7.11, and 7.17.

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.
2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to toreign countries by the Federal Government.
3. Compensation of government employees engaged in new own-account investment and related expenditures
for goods and services are classified as investment in structures and in sotware. for goods and senvices are classified as investment in structures and in software.
4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.
NoTE.-The quantity indexes on which the estimates in this table are based are shown in table 7.11. The estimates in this table differ from those in table 8.2 because this table shows contributions to real government consump-
tion expenditures and gross investment, whereas table 8.2 shows contributions to real gross domestic product.

1. Except for exports and imports, consists of new trucks only.
2. Consists of final sales and change in private inventories of new autos assembled in the United States.
. Consists or personal consumplion expenditures, private fixed investment, and gross government investment
NOTE.-Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-type quantity The residual wing is of more than one period, the corresponding chained-dollar estimates are usually not additive The residual line is the difference betwe the first line and the sum of the most detailed lines, excluding the Chain-ype quantity

## B. Other NIPA and NIPA-Related Tables

## Monthly Estimates

Tables B. 1 and B. 2 include the most recent estimates of personal income and its components; these estimates were released on September 29, 2000 and include "preliminary" estimates for August 2000 and "revised" estimates for April-July 2000.

${ }^{p}$ Preliminary.

1. Disposable personal income in chained (1996) dollars equals the current-dollar figure divided by the implicit
price deffator for personal consumption expenoitures.

## Annual Estimates

Except as noted for table B. 3 below, these tables are derived from the NIPA tables that were published in the August 2000 SURVEY OF CURRENT BUSINESS; they are consistent with the most recent comprehensive and annual revisions.

Table B.3.-Gross Domestic Product by Industry, Current-Dollar and Real Estimates for 1996-98

1. The current-doliar staisicical discrepancy equals gross domestic product (GDP) measured as the sum of exproduction. The chained (1996) dollar statistical discrepancy equals the current-dollar discrepancy defiated by the molicit price deflator for gross domestic business product.
2. Equals GDP in chained (1996) dollars less the statistical discrepancy and the sum of GPO of the detailed
industries.
NOTE.-Estimates are based on the 1987 Standard Industrial Classification. The table is derived from tables 1 incorporate the med Estimates of Gross Product by Industry for 1947-98" in the Juthe 2000 SunveY; the estimate incorporate the most recent comprehensive NIPA revision but not the most recent annual NIPA revision.

1. Consists of purchases fincluding tipss) of meals and beverages from retail, service, and amusement establishments, hotets, dining and bufiet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.
2. Includest iuggage. consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.
nets, linoleum, sterm windows and dor heaing and plumbing facilities, water heaters, lighting fixtures, kitchen cabrfurniture and purchases of fuel and electricty.
3. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furriture.
4. Consists of transient hotelis, motels, clubs, schoods, and other group housing.
5. Consists of reffigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cieaners, and other appliances.
6. Includes such house furnishings as illoor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors,
art products, portable lamps, and docks. Also includes writing equipment and hand, art products, portable lamps, and clocks. Aiso includes writing equipment and hand, power, and garden toois.
includes lamp shades, brooms, and brushes. 10 . Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses,
10sos postage and express charges, dends, and miscelaneous household operation sevvices. dispensed by physicians, hospiazs, and other medical sen11. Excludes drug preparations and related productis ices.
7. Consists of osteopathic physicians, chiropractors, private duty nurses, chiropodists, podiatrists, and others providing health and allied services, not elsewhere classified.
8. Consists of (1) current expenditiures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.
di4. Consists of (1) premiums, less beneritts and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including consumption of fixed capital) of nonprofit and seif-insured health plans.
9. Consists of premiums, less benefits and dividends, for income
10. Consists of premiums, less benefits and dividends, for income loss insurance.
11. Consiststs of premiums, less benefits and dividends, for privately administered workers' compensation. noninsured pension plans and pubbicily acmininitered govemment emplovee retirement plans, and $/ 3$ ) premiums , less benefits and dividends, of fraternal benefit socieieies. For commercial fife insurance carriers, excuces expenses for accident and health insurance and indudes profits of stock comparies and senvices turrisished without payment by
banks, credit agencies, and investment companies. For pension and retirement plans, excludes services funnished banks, credit agencies, and investment companies. For pension and re
without payment oy banks, credit agencies, and itvestment companies. ciations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation
services, and other personal business senvices.
12. Consists of premiums, less benefits and dividends, for motor vehide insurance
13. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares. 21. Consists of admissions to professionai and amateur athletic events and to racetracks.
14. Consists of dues and fees excluding insurance premiums.
15. Consists of bililiard paaliors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement
devices and parks; golf courses; sightseeing buses and guides; private liying operations; casino pambing and other commercial participant amusements 24. Consists of net receipts of loteries and expenditures tor purchases of pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video cassette rentals, and recreational sevvices, not elsewhere classified.
16. For private institutions, equals current expenditures (including consumption of fixed capital) less receiptssuch as those from meals, rooms, and entertainments-accounted for separately in consumer expenditures, and less expendifures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.
17. For private institutions, equals current expenditures (inclucing consumption of fixed capital) less receipts-such as those from meals, rooms, and entertainments-accounted for separately in consumer expenditures. For govermment insitutions, equals student payments of tuition. Exciudes child day care services, which are included in religious and welfare accivities.
18. Consists of (1) fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2) current expenditures (including consumption of fixed capital) by research organizains and loundaations for education and research.
cial welfare, toreign relief, and political organizations, museums net of receipts-such as those from meals, rooms, and entertainments-accounted for separately in consumer expenditures, and excluces relef payments within the United States and expencitiures by loundaions for education and research. For proprietary and govemment institutions, equals receipts from users.
19. Beginning with 1981 , indudes U.S. students' expenditures abroad; these expenditures were $\$ 0.3$ bilion in 1981.
20. Beginning with 1981 includes nonresidents' studdent and medical care expenditures in the United States; str-
dent expenditures were $\$ 2.2$ billion and medical expenditures were $\$ 0.4$ bilion in 1981 . dent expenditures were $\$ 2.2$ bilion and medical expenditures were $\$ 0.4$ billion in 1981
NOTE.-Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).
Chained (1996) dollar series are calculated as the product of the chair-type quantity index and the 1996 currentdoliar value of the corresponding series, divided by 100 . Because the formula tor the chain-ype quantity incexes
uses weights of more than one period, the corresponding chained-doliar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Consists of office buildings, except those constructed at industrial sites and those constructed by utilities for their own use.
2. Consists of stores, restaurants, garages, service stations, warehouses, mobile structures, and other buildings used for commercial purposes.
used 3. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not
3. elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.
4. Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.
5. Consists primarily of dormitories and of fraternity and sorority houses.

NOTE--Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100 . Because the formula for the chain-ype quantity indexes uses weights of more than one period, the corresponding chained-doilar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

| 1. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air. <br> 2. Consists of museums, botanical and zoological gardens; engineering and management services; and services, not elsewhere classified. <br> 3. Includes Coast Guard. <br> 4. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed |  |  |  |  |  |  | temporarily in the United States. |  |  |  |  |  |  |
|  |  |  |  |  |  |  | NOTE.-Estimates in this table are based on the 1987 Standard Industrial Classification (SIC). <br> Compensation equals wage and salary accruals plus supplements to wages and salaries. "Supplements" are listed in table 8.17 of the August 2000 Survey of Curnent Business. |  |  |  |  |  |  |

[^50]Consists of museums, botanical and zoological gardens; engineering and management services; and services,
not elsewhere classified.
4. Includes coast $G$.
5. Includes estimates of toreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.
NOTE.-Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

NOTE.-Chained (1996) collar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chaintlype quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

## 1. Excludes software "embedded" or buncled in computers and other equipment.

2. Consists of office buildings, except those occupied by electric and gas utity companies.
3. Consists primarily of stores, restaurants, garages, sevice stations, warehouses, and other buildings used for
commercial purposes.
4. Consists of buildings not elsewhere classified, such as passenger terminals, greerhouses, and animal hospitals.
5. Consists primarily of streets, dams, reservoirs, sewer and water facilities, parks, and airfields.

## C. Historical Measures

This table is derived from the "GDP and Other Major NIPA Series" tables that were published in the August 2000 issue of the Survey of Current Business and from the "Selected NIPA Tables" that are published in this issue. (Changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1.-Historical Measures of Real Gross Domestic Product, Real Gross National Product, and Real Gross Domestic Purchases
[Quarterly estimates are seasonally adjusted at annual rates]

| Year and quarter | Billions of chained (1996) dollars |  |  | Percent change from preceding period |  | Chain-type price indexes |  | Implicit price deflators |  | Percent change from preceding period |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Gross domesticproduct | Final sales of domestic product | Gross national product |  |  | Gross domestic product | Gross domestic purchases | Gross domestic product | Gross national product | Chain-type price index |  | Impicicit price deflators |  |
|  |  |  |  | Gross domestic product | Final sales of domestic product |  |  |  |  | Gross domestic product product | Gross domestic purchases | Gross domestic product product | Gross national product |

## Additional Information About the NIPA Estimates

## Statistical Conventions

Changes in current-dollar GDP measure changes in the market value of goods and services produced in the economy in a particular period. For many purposes, it is necessary to decompose these changes into quantity and price components. To compute the quantity indexes, changes in the quantities of individual goods and services are weighted by their prices. (Quantity changes for GDP are often referred to as changes in "real GDP.") For the price indexes, changes in the prices for individual goods and services are weighted by quantities produced. (In practice, the current-dollar value and price indexes for most GDP components are determined largely using data from Federal Government surveys, and the real values of these components are calculated by deflation at the most detailed level for which all the required data are available.)

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP in 1997-98 uses prices for 1997 and 1998 as weights, and the 1997-98 annual percent change in the GDP price index uses quantities for 1997 and 1998 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula. ${ }^{1}$ These annual changes are "chained" (multiplied) together to form time series of quantity and price; the percent changes that are calculated from these time series are not affected by the choice of reference period.

The quarterly changes in quantities and prices are calculated with weights from two adjacent quarters. As part of an annual or comprehensive revision, the quarterly indexes through the most recent complete year are adjusted to ensure that the average of the quarterly indexes conforms to the corresponding annual index.

In addition, BEA prepares measures of real GDP and its components in a dollar-denominated form, designated "chained (1996) dollar estimates." These estimates are computed by multiplying the 1996 current-dollar value of GDP, or of a GDP component, by the corresponding quantity index number. For example, if a current-dollar GDP component equaled $\$ 100$ in 1996 and if real output for this component

[^53]increased by 10 percent in 1997, then the "chained (1996) dollar" value of this component in 1997 would be $\$ 110(\$ 100 \times 1.10)$. Note that percentage changes in the chained (1996) dollar estimates and the percentage changes calculated from the quantity indexes are identical, except for small differences due to rounding.

Because of the formula used for calculating real GDP, the chained (1996) dollar estimates for detailed GDP components do not add to the chained-dollar value of GDP or to any intermediate aggregates. A "residual" line is shown as the difference between GDP and the sum of the most detailed components shown in each table. The residual generally is small close to the base period but tends to become larger as one moves further from it. Accurate measures of component contributions to the percentage changes in real GDP and its major components are shown in NIPA tables 8.2-8.6.

BEA also publishes the "implicit price deflator" (IPD), which is calculated as the ratio of current-dollar value to the corresponding chained-dollar value, multiplied by 100 ; the values of the IPD and of the corresponding "chain-type" price index are very close.

For quarters and months, the estimates are presented at annual rates, which show the value that would be registered if the rate of activity measured for a quarter or a month were maintained for a full year. Annual rates are used so that time periods of different lengths-for example, quarters and years-may be compared easily. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

Percent changes in the estimates are also expressed at annual rates. Calculating these changes requires a variant of the compound interest formula:

$$
r=\left[\left(\frac{x_{t}}{x_{o}}\right)^{m / n}-1\right] \times 100
$$

where $r$ is the percent change at an annual rate; $x_{t}$ is the level of activity in the later period; $x_{0}$ is the level of activity in the earlier period; $m$ is the yearly periodicity of the data (for example, 1 for annual data, 4 for quarterly, or 12 for monthly); and $n$ is the number of periods between the earlier and later periods (that is, $t-o$ ).

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year-for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

## Reconciliation Tables

Table 1.-Reconciliation of Changes in BEA-Derived Compensation Per Hour with BLS Average Hourly Earnings [Percent change from prececing period]

|  | 1998 | 1999 | Seasonally adjusted at annual rates |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Plus: Contribution of wages and salaries per hour of persons in housing and in nonprofit institutions $\qquad$ | -. 3 | - 1 | . 1 | -. 3 | -. 5 | -. 3 | -. 1 | -. 1 |
| Less: Contribution of wages and salaries per hour of persons in government enterprises, unpaid family workers, and self-employed | -. 1 | 0 | -. 1 | -. 1 | -. 1 | -. 1 | -. 1 | -. 3 |
| Equals: BEA-derived wages and salaries per hour of all employees in the private nonfarm sector $\qquad$ | 5.5 | 5.0 | 4.6 | 5.1 | 5.5 | 4.4 | 3.7 | 5.9 |
| Less: Contribution of wages and salaries per hour of nonproduction workers in manufacturing $\qquad$ | -. 1 | -. 1 | . 2 | . 4 | . 4 | 0 | . 2 | . 4 |
| Less: Other differences ${ }^{2}$........ | 1.5 | 1.4 | . 7 | 1.0 | 1.4 | 1.3 | -. 3 | 1.6 |
| Equals: BLS average hourly earnings of production or nonsupervisory workers on private nonfarm payrolls $\qquad$ | 4.1 | 3.6 | 3.7 | 3.7 | 3.7 | 3.1 | 3.8 | 3.9 |
| Addendum: <br> BLS estimates of compensation per hour in the nonfarm business sector ${ }^{3}$ | 5.1 | 4.8 | 4.5 | 5.0 | 5.5 | 4.2 | 3.9 | 5.3 |

1. Includes BLS data on compensation and hours of nonfarm proprietors and hours worked
of unpaid tamily workers.
2. Includes BEA use of non-BLS data and differences in detailed weighting. Annual estimates also include differences in BEA and BLS benchmark procedures; quarterty estimates also include
differences in seasonal adjustment procedures.
3. These estimates differ from the BEA-derived estimates (first line) because the BLS estimates include compensation and hours of tenant-occupied housing.
BLS Bureau of Labor Statistics

## Appendix $B$

## Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, regional, and international accounts.

## National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product), the estimates of wealth and related estimates, gross product by industry, the inputout accounts, and the satellite accounts.

National income and product accounts (NIPA's). This series of papers documents the conceptual framework of the NIPA's and the methodologies that have been used to prepare the estimates.

An Introduction to National Economic Accounting (1985) [also in the March 1985 Survey]

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (1985)
Foreign Transactions (1987) [A revised version is forthcoming.]
GNP: An Overview of Source Data and Estimating Methods (1987) [Most of the information in this paper has been superseded by " A Guide to the NIPA's" (March 1998 SURVEY).]
Government Transactions (1988)
Personal Consumption Expenditures (1990)
These methodologies have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPA's. The most recent revisions are described in the following Survey articles.
"A Preview of the 1999 Comprehensive Revision of the National Income and Product Accounts" Definitional and Classificational Changes (August 1999)
New and Redesigned Tables (September 1999)
Statistical Changes (October 1999)
"Improved Estimates of the National Income and Product Accounts: Results of the Comprehensive Revision"
For 1959-98 (December 1999)
For 1929-99 (April 2000)
"Annual Revision of the U.S. National Income and Product Accounts" (August 2000)
"A Guide to the NIPA's" (March 1998) provides the definitions of the major NIPA aggregates and components, discusses the measures of real output and prices, explains how production is classified and how the NIPA's are presented, describes the statistical conventions that are used, and lists the principal source data and methods that are used to prepare the estimates of gross domestic product (GDP).

Information about the sources and methods that are used to prepare the national estimates of personal income, which are the basis for the State estimates, is in State Personal Income, 1929-97 (1999).
"BEA's Chain Indexes, Time Series, and Measures of Long-Term Economic Growth" (May 1997) is the most recent in a series of articles that describe the conceptual basis for the chain-type measures of real output and prices that are used in the NIPA's.
"Reliability of the Quarterly and Annual Estimates of GDP and Gross Domestic Income" (December 1998) evaluates these estimates by examining the record of revisions to them.

Wealth and related estimates. Fixed Reproducible Tangible Wealth in the United States, 1925-94 (1999) discusses the concepts and statistical considerations that underlie the estimates and their derivation.
"Fixed Assets and Consumer Durable Goods for 1925-98" (April 2000) describes the definitional and statistical improvements that were incorporated in the comprehensive revision of the estimates.

Gross product by industry. "Improved Estimates of

## Mission and Strategic Plan

The mission statement of the Bureau of Economic Analysis and the latest update to its strategic plan for improving the accuracy, reliability, and relevance of the national, regional, and international accounts are available on BEA's Web site at <www.bea.doc.gov>. For information about the development and the implementation of the plan, see these Survey articles.
"Mid-Decade Strategic Review of BEA's Economic Accounts: Maintaining and Improving Their Performance" (February 1995)
"Mid-Decade Strategic Review of BEA's Economic Accounts: An Update" (April 1995)
"BEA's Mid-Decade Strategic Plan: A Progress Report" (June 1996)

Gross Product by Industry for 1947-98" (June 2000) describes the most recent comprehensive revision of these estimates.

Input-output accounts. "Benchmark Input-Output Accounts for the U.S. Economy, 1992" (November 1997) describes the preparation of the 1992 accounts and the concepts and methods that underlie the accounts.
"Annual Input-Output Accounts of the U.S. Economy, 1996" (January 2000) presents annual tables for 1996 that update the 1992 benchmark accounts.

Satellite accounts. These accounts extend the analytical capacity of the national accounts by focusing on one aspect of economic activity.
"Integrated Economic and Environmental Satellite Accounts" and "Accounting for Mineral Resources: Issues and BEA's Initial Estimates" (April 1994)
"A Satellite Account for Research and Development" (November 1994)
"U.S. Transportation Satellite Accounts"
For 1992 (April 1998)
For 1996 (May 2000)
"U.S. Travel and Tourism Satellite Accounts" For 1992 (July 1998)
For 1996 and 1997 (July 2000)

## International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts (ITA's). The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures (1990) describes the methodologies used to prepare the estimates in the ITA's and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the ITA's.
"U.S. International Transactions, Revised Estimates" is a series of articles about the annual ITA revisions and the improvements in methodology; the latest article is published in the July 2000 issue.

Direct investment. International Direct Investment: Studies by the Bureau of Economic Analysis (1999) is a collection of previously published articles on U.S. direct investment abroad and foreign direct investment in the United States. It also includes the following information.
"Methodology for U.S. Direct Investment Abroad," which is also available in U.S. Direct Investment Abroad: 1994 Benchmark Survey, Final Results (1998)
"A Guide to BEA Statistics on U.S. Multinational Companies," which is also available in the March 1995 SURVEY
"Methodology for Foreign Direct Investment in the United States," which is also available in Foreign Direct Investment in the United States: 1992 Benchmark Survey, Final Results (1995)
"A Guide to BEA Statistics on Foreign Direct Investment in the United States," which is also available in the February 1990 Survey
International services. U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

## Regional accounts

The regional accounts include estimates of personal income and gross state product.

Personal income. Estimates of personal income are prepared for States and for local areas.
"Comprehensive Revision of State Personal Income for 1969-99" (June 2000) summarizes the changes in the methodology that is used to prepare the estimates. The detailed methodology is available on the CD-ROM State Personal Income, 1969-98.
"Comprehensive Revision of Local Area Personal Income for 1969-98" (July 2000) summarizes the changes in the methodology that is used to prepare the estimates for counties and metropolitan areas. The detailed methodology is available on the CD-ROM Regional Economic Information System, 1969-98.

Gross state product. "Comprehensive Revision of Gross State Product by Industry, 1977-94" (June 1997 Survey) summarizes the sources and the methods that are used to prepare the estimates. "Gross State Product by Industry, 1977-98" (October 2000) describes the most recent comprehensive revision of these estimates.

[^54]Estimates and related information are available in news releases and publications and on diskettes, CD-ROM's, and the BEA Web site. The news releases are now posted on the Web site within minutes of the official time of release. Our online Catalog of Products provides product descriptions and includes links to compressed files of our diskette products that can be downloaded for free.

Our most recent Web site postings and statistical products are listed below.

| :--- | 9 8:30 a.m.

[^55]
[^0]:    2. In the NIPA's, consumer spending is shown as personal consumption expenditures; business investment in equipment and software and in structures is shown as private nonresidential fixed investment; private inventory investment is shown as change in private inventories; and government spending is shown as government consumption expenditures and gross investment.
[^1]:    3. Gross domestic purchases-a measure of purchases by U.S. residents regardless of where the purchased goods and services were produced-is calculated as the sum of personal consumption expenditures, gross private domestic investment, and government consumption expenditures and gross investment.
    4. Final sales of domestic product is calculated as GDP less change in private inventories.
[^2]:    5. BLS tabulations of wages and salaries of employees covered by State UI are the key source data for BEA's annual estimates of wages and salaries; the UI system collects data on wages and salaries and bonuses and other nonregular payments for virtually all workers. BEA's current quarterly and monthly estimates are derived using an extrapolation that is based on data from the BLS monthly establishment survey, which includes the average hourly earnings of only production and nonsupervisory workers and which excludes bonuses and other nonregular payments. In order to more accurately estimate the wages and salaries of all workers, BEA adjusts the extrapolation to reflect the generally higher growth rate of the more comprehensive, but less timely, UI data.
    6. GNP equals GDP plus income receipts from the rest of the world less income payments to the rest of the world.
[^3]:    7. In the estimates of command-basis GNP, the current-dollar value of the sum of exports of goods and services and income receipts is deflated by the implicit price deflator (IPD) for the sum of imports of goods and services and implicit price defla

    The terms of trade is a measure of the relationship between the prices that are received by U.S. producers for exports of goods and services and the prices that are paid by U.S. purchasers for imports of goods and services. It is measured by the following ratio, with the decimal point shifted two places to the right: In the numerator, the IPD for the sum of exports of goods and services and of income receipts; in the denominator, the IPD for the sum of imports of goods and services and of income payments.

    Changes in the terms of trade reflect the interaction of several factors, including movements in exchange rates, changes in the composition of the traded goods and services, and changes in producers' profit margins. For example, if the U.S. dollar depreciates against a foreign currency, a foreign manufacple, if the U.S. dosiar depreciates against a foreign currency, a orereign manuacturer may choose to absort this cost by reducing the profit margin on the
    product it sells to the United States, or it may choose to raise the price of the product it sells to the United States, or
    product and risk a loss in market share.
    8. Profits from current production is estimated as the sum of profits before tax, the inventory valuation adjustment, and the capital consumption adjustment; it is shown in NIPA tables $1.9,1.14,1.16$, and 6.16 C (see "Selected NIPA Tables," which begins on page D-2 of this issue) as corporate profits with inventory valuation and capital consumption adjustments.

    Percent changes in profits are shown at quarterly, not annual, rates.

[^4]:    1. Exports of goods and services and income receipts deflated by the implicit price defiato
    or imports of goods and services and income payments.
    2. Ratio of the implicit price deflator for exports of goods and services and income receipts
    to the corresponding implicit price deflator for imports divided by 100.
    NOTE.-See note to table 1 for an explanation of chained (1996) dollar series. Leveis of these series are shown in NIPA tables 1.10 and 1.11 .
[^5]:    9. Profits from the rest of the world is calculated as (1) receipts by U.S. residents of earnings from their foreign affiliates plus dividends received by U.S. residents from unaffiliated foreign corporations minus (2) payments by U.S. affiliates of earnings to their foreign parents plus dividends paid by U.S. corporations to unaffiliated foreign residents. These estimates include capital consumption adjustments (but not inventory valuation adjustments) and are derived from BEA's international transactions accounts.
[^6]:    10. Cash flow from current production is undistributed profits with inventory valuation and capital consumption adjustments plus the consumption of fixed capital.
    11. Domestic industry profits are estimated as the sum of corporate profits before tax and the inventory valuation adjustment; they are shown in NIPA table 6.16 C (on page $\mathrm{D}-16$ of this issue). Estimates of the capital consumption adjustment do not exist at a detailed industry level; they are available only for total financial and total nonfinancial industries.
[^7]:    NOTE--Levels of these and other profits series are in NIPA tables 1.14, 1.16, 6.16C, and 7.15.

[^8]:    1. BEA has prepared a series of papers that provide detailed descriptions of NIPA concepts and methodologies. The methodologies described in these papers are subject to periodic improvements, which are typically introduced as part of annual and comprehensive revisions; these improvements are described in the articles in the Survey of Current Business that cover these revisions. For more information, see appendix B at the back of this issue.
    2. See Eugene P. Seskin, "Improved Estimates of the National Income and Product Accounts for 1959-98: Results of the Comprehensive Revision," Survey 79 (December 1999): 15-43; and Eugene P. Seskin "Annual Revision of the National Income and Product Accounts," Survey 80 (August 2000): 6-33.
    3. For additional details on the release schedule for the NIPA estimates, see Eugene P. Seskin and Robert P. Parker, "A Guide to the NIPA's," Survey 78 (March 1998): 43.
    4. For additional information about STAT-USA, call 202-482-1986.
[^9]:    5. For a few components, the final quarterly estimates are based on newly available source data that replace judgmental trends.
    6. For additional information on the commodity-flow method, see U.S. Department of Commerce, Bureau of Economic Analysis, Personal Consumption Expenditures, Methodology Paper No. 6 (Washington, DC: U.S. Government Printing Office, 1990): 31-34; and U.S. Department of Commerce, Bureau of Economic Analysis, GNP: An Overview of Source Data and Estimating Methods, Methodology Paper No. 4 (Washington, DC: U.S. Government Printing Office, 1987): 16-17.
[^10]:    1. Includes $\$ 10.0$ billion for food produced and consumed on farms, standard clothing issued to military personnel, and used trucks.
    2. The retail-control method cited under "personal consumption expenditures (PCE) for most goods" is based on retail trade sales data that include sales of gasoline service stations. Estimates of PCE for gasoline and oil are derived separately and are deducted from the retail-control totals (that include goods sold by gasoline service stations) to derive the estimates for "PCE for most goods."
    3. Also referred to as "services furnished without payment by financial intermediaries, except life insurance carriers."
    4. Includes $\$ 0.9$ billion for brokers' commissions on sale of structures and net purchases of used structures.
[^11]:    5. Includes $-\$ 1.0$ billion for other structures (dormitories, fraternity and sorority houses, nurses' homes, etc.) and net purchases of used structures.
    6. Includes $-\$ 5.4$ bililion for wage and salary accruals: Rest of the world, net, and $\$ 4.9$ billion for other labor income: Supplemental unemployment, directors' fees, and judicial fees.

    Government expenditures by function $3.15,3.16,3.17$
    Gross investment $3.17,5.14,5.15,7.13$
    See also military.
    National income 1.9, 1.14, 1.15, 8.15

[^15]:    1. See Eugene P. Seskin and David F. Sullivan, "Annual Revision of the National Income and Product Accounts: Annual Estimates, 1997-99 and Quarterly Estimates, 1997:I-2000:I," Survey of Current Business 80 (August 2000): 6-33.

    For a detailed description of the sources and methods used to prepare the estimates of State personal income, see U.S. Department of Commerce, Bureau of Economic Analysis, State Personal Income, 1929-97 (Washington, DC: U.S. Government Printing Office, May 1999), or go to BEA's Web site at <www.bea.doc.gov>, select methodologies, regional programs, and then State Personal Income, 1929-97.

[^16]:    differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. in particular, it difrers from the NIPA esimate because, by detinition, it omits the earnings of rederal
    civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

[^17]:    1. For the previously published estimates of GSP, see Richard M. Beemiller and Michael T. Wells, "Gross State Product by Industry, 1995-97," Survey of Current Business 79 (June 1999): 24-45; and Richard M. Beemiller and George K. Downey, "Gross State Product by Industry, 1977-96," Survey 78 (June 1998): 15-37.
[^18]:    1. In the national estimates of GPO by industry, the statistical discrepancy is not allocated by industry. In the GSP estimates, insufficient information is available for allocating the statistical discrepancy to States. For more information, see the box "The Statistical Discrepancy" in Robert P. Parker and Eugene P. Seskin, "Annual Revision of the National Income and Product Accounts," Survey 77 (August 1997): 19.
    2. See also the box "Gross Product Originating: Definition and Relationship to Gross Domestic Product" in Lum, Moyer, and Yuskavage, "Improved Estimates," 24.
[^19]:    3. If the initial sum of the State estimates differs from the national total for an industry, the difference between the national total and the sum-of-State total is allocated to the States according to the State distribution of the initial estimates.
    4. For additional information, see J. Steven Landefeld and Robert P. Parker, "BEA's Chain Indexes, Time Series, and Measures of Long-Term Economic Growth," Survey 77 (May 1997): 58-68; and Howard L. Friedenberg and Richard M. Beemiller, "Comprehensive Revision of Gross State Product by Industry, 1977-94," SURVEY 77 (June 1997): 28-29.
[^20]:    U.S. Deparment of Commerce, Bureau of Economic Analysis

[^21]:    6. The labor share of production is approximated using compensation of employees. The capital share of production is approximated using propertytype income; within property-type income, an unknown portion of proprietors' income represents a labor share of production (see the box "Gross State Product Estimates"). Indirect business tax and nontax liability (primarily sales, property, and excise taxes) is not included in property-type income, because it is the part of the pretax return to capital that accrues to government rather than to business.
    7. Component shares of the U.S. totals were calculated by using current-dollar GSP estimates.
[^22]:    NOTE.-The tables of gross product originating (GPO) by industry for the Nation that were pubshown in this table excent Federal civilian and Federal military. In addition the GPO tables present estimates for the following industries: Telephone and telegraph; radio and television; nonfarm housing services; other real estate; Federal general government; Federal government enter-
    prises; State and local general government; and State and local government enterprises SIC Standard Industrial Classification. See Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual 1987 (Washington, DC: U.S. Govemment Printing Office, 1987).

[^23]:    1. Equals gross domestic income (GDI) from the national income and product accounts. GDI differs from gross domestic product (GDP) because it exciudes the sataisicical oiscrepancy. 2. GSP excludes the wages and salaries of Federal civilian and military personnel stationed
    abroad.
    2. GSP excludes employer contributions for social insurance of Federal civilian and military per-
    sonnel stationed abroad.
    3. GSP excludes other labor income of Federal civilian personnel stationed abroad.
[^24]:    1. Quarterly estimates of U.S. current- and financial-account components are seasonally adjusted when statistically significant seasonal patterns are present. The accompanying tables present both adjusted and unadjusted estimates.
[^25]:    $r$ Revised.
    $p$ Preliminary.

[^26]:    2. Quantity (real) estimates are calculated using a chain-type Fisher formula with annual weights for all years and quarterly weights for all quarters. Real estimates are expressed as chained (1996) dollars. Price indexes (1996=100) are also calculated using a chain-type Fisher formula.
[^27]:    1. For more information on the nominal and real indexes of the foreign exchange value of the U.S. dollar see Federal Reserve Bulletin vol. 84 (October 1998): 811-18.
    2. Weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group
    of U.S. trading partners inclucing the currencies of the euro-area countries, Australia, Canada, Japan, Sweden, Switzerland, United Kingdom, Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philippines, Singapore, Taiwan, Thailand, Israel, Saudi Arabia, and Russia. Data: Federal Re serve Board. Monthly and quarterly average rates. index rebased by BEA.
    3. Weighted average of the foreign exchange value of the U.S. collar against broad-index currencies that circulate widely outside the country of issue including the currencies of euro-area countries, Australia, Canada, Japan, Swe den, Switzerland, and the United Kingdom. The weight for each currency is its broad-index weight divided by the sum of the broad-index weights for all of the currencies included in the major currency index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.
    4. Weighted average of the foreign exchange value of the U.S. dollar against broad-index currencies that do
    not circulate widely outside the country of issue including the currencies of Argentina, Brazil, Chile, Colombia, Mexico, Venezuela, China, Hong Kong, India, Indonesia, Korea, Malaysia, the Philppines, Singapore, Tawan, Thailand, the broad-index weights for all of the currencies included in the other important trading partners index. Data: Federal Reserve Board. Monthly and quarterly average rates. Index rebased by BEA.
    5. Data: Federal Resevve Board. Monthly and quarterly average rates. Indexes prepared by 8EA.
    6. The euro area includes Austria, Belgium, Finland, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain. Exchange rates (but not index values with January 1999=100) for the individual euro-area currencies can be derived from the euro exchange rate by using the fixed conversion rates (in currencies pet euro) as shown below: 13.7603 Austrian schillings; 40.3399 Belgian francs; 5.94573 Fimish markkas; 6.55957 French francs; 1.95583 German marks; 787564 Irish pounds; 1936.27 Italian lira; 40.3399 Luxembourg francs; 2.20371 Netheriands guilders; 200.482 Portuguese escudos; 166.386 Spanish pesetas.
[^28]:    ${ }^{P}$ Preliminary

    - Revised.

    1. Because chain indexes use weights of more than one period, the corresponding chained dollar estimates are
    usually not additive
[^29]:    See footnotes on page 118

[^30]:    See footnotes on page 118.

[^31]:    See footnotes on page 118.

[^32]:    See footnotes on page 118.

[^33]:    See footnotes on page 118.

[^34]:    See footnotes on page 118.

[^35]:    1. The difference between the two series would have been larger if they had been defined consistently; the redefinitions that resulted from the use of a new industry classification system have raised the measure of services sold in the United States by U.S. affiliates of foreign companies, beginning with the estimates for 1997 (see the box "Definition of Sales of Services by Affiliates" on page 127).
    2. In the quarterly article on the U.S. international transactions in this issue, table 1 presents cross-border exports of private services in lines 6-10 and crossborder imports in lines 23-27; table 3 provides additional detail.
[^36]:    5. Net insurance payments are calculated as premiums paid to foreign companies for primary insurance and reinsurance less losses recovered from foreign insurers.
[^37]:    6. The estimates of cross-border transactions incorporate recent improvements in source data and estimation methods. Improvements were made to the estimates of financial services and to two components of "other unaffiliated services" (in "other private services")-expenditures of foreign embassies and consulates and international organizations in the United States and expenditures of temporary nonagricultural workers in the United States. For a discussion of these changes, see Christopher L. Bach, "U.S. International Transactions, Revised Estimates for 1982-99," Survey 80 (July 2000): 72-74.
[^38]:    1. The term "cross-border trade" that is used here should not be confused with "crossborder mode of supply," a term used in connection with the General Agreement on Trade in Services. The latter term refers to the provision of a service by a resident of one country to a resident of another country in which neither the producer nor the consumer goes to the country of the other (for example, a consultant sending a report electronically or by mail).
[^39]:    7. In this section, sales of services are defined as sales that are typical of establishments classified in particular industries. The industry groups used for this purpose are listed in the note to table C .
[^40]:    8. Because the data on sales of goods by U.S. affiliates are not disaggregated by destination, the local and foreign shares have been estimated from data on exports of goods shipped by affiliates. Exports by U.S. affiliates in 1998 represented 11 percent of sales of goods by these affiliates.
[^41]:    9. The UBO of a U.S. affiliate is that person (in the broad legal sense, including a company), proceeding up the affiliate's ownership chain beginning with the foreign parent, that is not owned more than 50 percent by another person. The UBO ultimately owns or controls the affiliate and derives the benefits associated with ownership or control. Unlike the foreign parent, the UBO of a U.S. affiliate may be located in the United States.
    10. For more information, see the box "Changes in the Definition and Classification of Sales of Services by U.S. Affiliates" in last year's article.
[^42]:    1. NAICS is the new industry classification system of the United States, Canada, and Mexico; in the United States, it supplants the SIC.
[^43]:    11. In the SIC, the "services" division includes a variety of business and personal services (see the group "services" in table 9), but it excludes several indus-tries-such as finance, insurance, transportation, and communication-that are classified as services-producing industries in BEA's direct investment surveys in order to disaggregate total sales into sales of goods and sales of services.
    12. Not all services sold by affiliates in these industries are computer-related services, but most of them probably are. In addition, some computer-related services may be sold by affiliates classified in other industries.
[^44]:    13. In 1998, the U.S. dollar appreciated 8 percent against an index of the currencies of 23 major host countries. The index was weighted by the gross product (value added) of nonbank majority-owned foreign affiliates.
    14. For additional information, see Sylvia E. Bargas and Rosaria Troia, "Direct Investment Positions for 1998: Country and Industry Detail," Survey 79 (July 1999): 48-59, and Mataloni, "Operations in 1998."
[^45]:    n.a. Not available

    Less than $\$ 500,000$

    - Suppressed to avoid disclosure of data of individual companies.

    1. Other business, professional, and technical services consists of language translation services, security services, collection services, actuarial services, salvage services, oil spill and toxic waste cleanup services, and merchanting
    services.
[^46]:    - Less than $\$ 500,000$.
    - Suppressed to avoid disclosure of data of individual companies.

[^47]:    *The tables in the section on international estimates are not included in this issue; see the estimates that are presented in the article "U.S. International Transactions, Second Quarter $2000^{\prime \prime}$ in this issue and the tables in section $G$ in the September issue.
    **The tables in the section on regional estimates are not included in this issue; see "State Personal Income: Revised Estimates for 1997-99" and "Gross State Product for 1977-98" in this issue and table K. 1 in the September issue.

[^48]:    1. Includes new computers and peripheral equipment only.
[^49]:    4. Includes Coast Guard. temporarily in the United Slates.

    NOTE.-Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

[^50]:    1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weeky hours per employee for all employees to average weekiy hours per employee on full.time schedules.
    the reclassification of air couriers from trucking and warehousing to transportation by air
[^51]:    See footnoles at the end of the table.

[^52]:    U.S. Departnent of Commerce, Bureau of Economic Anatyils

[^53]:    1. In addition, because the changes in quantities and prices calculated using these weights are symmetric, the product of a quantity index and the corresponding price index is generally equal to the current-dollar index.
[^54]:    Availability
    Most of the items listed here are available on our Web site at <www.bea.doc.gov>; in particular, look under "Methodologies." Our online Catalog of Products provides descriptions of both our printed and electronic publications. The Catalog also includes links to compressed files of our diskette products that can be downloaded for free.
    For specific information about the availability of our most recently released estimates and products, see "Getting BEA's Estimates" on the inside back cover.

[^55]:    * Joint release by the Bureau of the Census and the Bureau of Economic Analysis (BEA) For more information, call BEA at 202-606-9900, or go to our Web site at www.bea.doc.gov
