The SURVEY OF CURRENT BUSINESS (ISSN 0039-6222) is published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Subscriptions to the SURVEY OF CURRENT BUSINESS are maintained, and the prices are set, by the U.S. Government Printing Office, an agency of the U.S. Congress. To subscribe, call 202-512-1800, or go to <bookstore.gpo.gov>. To inquire about your subscription, call 202-512-1806. Send changes of address to Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Postage paid at Washington, DC and at additional mailing offices (USPS 337-790).

Subscription and single-copy prices

Second-class mail: \$63.00 domestic, \$88.20 foreign

First-class mail: \$105.00

Single copy: \$25.00 domestic, \$35.00 foreign

Unless stated otherwise, the information in this journal is in the public domain and may be reprinted without the permission of the Bureau of Economic Analysis. Citation of the SURVEY OF CURRENT BUSINESS as the source is appreciated.

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

Editor-in-Chief: Douglas R. Fox

Graphic Designer: W. Ronnie Foster

Manuscript Editor: M. Gretchen Gibson

Production Editor: Ernestine T. Gladden

Editor: Kristina L. Maze

Technical Advisor: Brian V. Moran

This issue went to the printer on February 12, 2003.

It incorporates data from the following monthly BEA news releases:

U.S. International Trade in Goods and Services (January 17),

Gross Domestic Product (January 30), and
Personal Income and Outlays (January 31).

SURVEY OF CURRENT BUSINESS

February 2003

Volume 83 • Number 2

1 Business Situation: Advance Estimates for the Fourth Quarter of 2002

The irregular pattern of U.S. economic growth continued in the fourth quarter of 2002: Real GDP increased 0.7 percent after increases of 4.0 percent in the third quarter, 1.3 percent in the second quarter, and 5.0 percent in the first quarter. The fourth-quarter deceleration reflected a slowdown in consumer spending and downturns in inventory investment and exports. U.S. inflation stepped up but remained in the moderate range: The price index for gross domestic purchases increased 1.8 percent after increasing 1.2 percent in the third quarter.

7 BEA's International Accounts

BEA's international accounts present estimates of the transactions between U.S. and foreign residents and estimates of the value of accumulated stocks of U.S.-owned assets abroad and of foreign-owned assets in the United States. BEA also collects, processes, and provides comprehensive data on international services and on U.S. direct investment abroad and foreign direct investment in the United States. In addition, BEA conducts a variety of research and analytical activities in support of the international accounts.

29 Personal Income by State, Third Quarter 2002

The growth in personal income for the Nation slowed to 0.9 percent in the third quarter of 2002 from 1.2 percent in the second quarter. In half of the States, personal income grew at least as fast in the third quarter as in the second, but several large States—including California, New York, Texas, and Illinois—were among the States whose growth slowed in the third quarter. Growth ranged from 1.5 percent in Montana to 0.5 percent in Michigan.

Business Situation

Advance Estimates for the Fourth Quarter of 2002

THE U.S. economy grew slowly in the fourth quarter of 2002, according to the “advance” estimates of the national income and product accounts (NIPAs). Production, purchases, and income increased less than in the third quarter. Prices increased somewhat more.

- Real gross domestic product (GDP) increased 0.7 percent after increasing 4.0 percent (table 1 and chart 1).¹
- Gross domestic purchases slowed to a 1.4-percent increase after increasing 3.9 percent.
- Real disposable personal income increased 2.6 percent after increasing 3.1 percent.
- The price index for gross domestic purchases rose 1.8 percent after rising 1.2 percent.

1. Quarterly estimates in the NIPAs are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between these published estimates. Percent changes are calculated from unrounded data and annualized. “Real” estimates are in chained (1996) dollars, and price indexes are chain-type measures.

This article was prepared by Daniel Larkins.

The deceleration in real GDP reflected a slowdown in consumer spending and downturns in inventory investment and exports.

- Consumer spending increased only 1.0 percent, its smallest increase since early 1993.² It contributed only 0.67 percentage point to the growth of real GDP in the fourth quarter after contributing 2.93 percentage points in the third (table 2). Purchases of autos and trucks decreased sharply after surging in the third quarter in response to aggressive sales-incentive programs that included zero-rate financing and generous rebates.
- Inventory accumulation slowed, subtracting 0.56 percentage point from fourth-quarter GDP growth. In the third quarter, a step-up in accumulation had added 0.58 percentage point.

2. In this article, “consumer spending” is shorthand for the NIPA series “personal consumption expenditures,” “government spending” is shorthand for “government consumption expenditures and gross investment,” and “inventory investment” is shorthand for “change in private inventories.”

Note. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates usually are not additive. Chained (1996) dollar levels and residuals, which measure the extent of nonadditivity in each

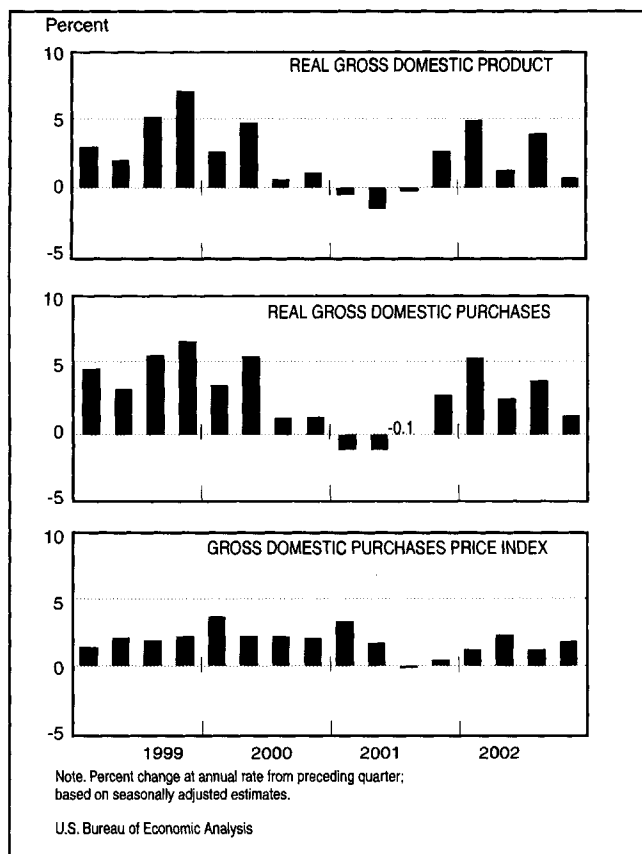

table, are shown in NIPA tables 1.2, 1.4, and 1.6. Percent changes are calculated from unrounded data. Percent changes in major aggregates are shown in NIPA table S.1 (See “Selected NIPA Tables,” which begins on page D-2 in this issue.)

- Exports decreased after increasing. Imports (which are subtracted in the calculation of GDP) increased about as much in the fourth quarter as in the third.³

The dampening effects of consumer spending, inventory investment, and exports on GDP growth were partly offset by step-ups in Federal Government spending and residential investment and by an upturn

3. Imports of goods and services are included in gross domestic purchases but not in GDP. Exports of goods and services are included in GDP but not in gross domestic purchases.

Chart 1. Selected Measures: Change from Preceding Quarter

in nonresidential fixed investment.

- Federal Government spending increased more than twice as much as in the third quarter; it added 0.65 percentage point to fourth-quarter growth after adding 0.29 percentage point to third-quarter growth. Defense spending accelerated, and nondefense spending turned up.
- Residential investment increased substantially more than in the third quarter. The increase was the fourth in a row.
- Nonresidential fixed investment registered a small increase after eight consecutive quarterly declines—declines that became progressively smaller in the first three quarters of 2002. In the fourth quarter, structures decreased much less than in the third. The advance estimates for the fourth quarter also

Gross domestic product less motor vehicle output.....	41.8	184.7	106.9	23.3	67.9	29.0	0.5	2.1	4.9	1.0	3.0	1.3
Final sales of computers.....							9.1	13.0	-7.8	13.1	78.5	26.6
Gross domestic product less final sales of computers.....							0.2	2.3	5.1	1.2	3.6	0.6

Note. See note to table 1 for an explanation of chained (1996) dollar series. Chained (1996) dollar levels and residuals for most items are shown in NIPA table 1.4. Detail on motor vehicle output is shown in NIPA table 8.9B.

show the following:

- The deceleration in GDP growth can be attributed to a downturn in the production of goods (table 3). In contrast, the construction of structures turned up, and the production of services increased about as much as in the third quarter.
- Real motor vehicle output decreased 13.3 percent after jumping 37.1 percent. GDP less motor vehicle output increased 1.3 percent after increasing 3.0 percent.
- Real final sales of computers increased 26.6 percent after surging 78.5 percent. Computer prices

decreased a little less than in the third quarter.

- Final sales of domestic product—GDP less inventory investment—increased 1.3 percent after increasing 3.4 percent.
- The personal saving rate increased to 4.3 percent from 3.8 percent.⁴

4. The personal saving rate is measured as personal saving as a percentage of current-dollar disposable personal income. The fourth-quarter estimate of the *national* saving rate (which is measured as gross saving as a percentage of gross national product) will be available at the end of March along with the "final" estimates of fourth-quarter GDP.

Fourth-Quarter 2002 Advance NIPA Estimates: Source Data and Assumptions

The "advance" estimate for the fourth quarter is based on the following major source data; as more and better data become available, the estimates will be revised. (The number of months for which data were available is shown in parentheses.)

Personal consumption expenditures: Sales of retail stores (3), unit auto and truck sales (3), and consumers' shares of auto and truck sales (2);

Nonresidential fixed investment: Unit auto and truck sales (3), construction put in place (2), manufacturers' shipments of machinery and equipment other than aircraft (3), shipments of civilian aircraft (2), and exports and imports of machinery and equipment (2);

Residential investment: Construction put in place (2), single-family housing starts (3), sales of new houses (3), and sales of existing houses (3);

Change in private inventories: Trade and nondurable

manufacturing inventories (2), durable manufacturing inventories other than semiconductors (3), and unit auto and truck inventories (3);

Net exports of goods and services: Exports and imports of goods and services (2);

Government consumption expenditures and gross investment: Some Federal outlays were available for 2 months, others for 3, State and local construction put in place (2), and State and local employment (3);

GDP prices: Consumer price indexes (3), producer price indexes (3), U.S. import and export price indexes (3), and values and quantities of petroleum imports (2).

BEA made assumptions for source data that were not available. Table A shows the assumptions for key series; a more comprehensive list is available on BEA's Web site at <www.bea.gov>.

Table A. Summary of Major Data Assumptions for Advance Estimates, 2002:IV

(Billions of dollars, seasonally adjusted at annual rates)

	2002

Change in inventories for merchant wholesale and retail industries other than motor vehicles and equipment	31.0	12.4	26.3	-34.4	14.7	-5.1
Net exports: ²						
Exports of goods:						
U.S. exports of goods, international-transactions-accounts basis	709.3	699.3	699.2	688.4	695.6	691.8
Excluding gold	705.3	696.0	695.7	684.9	691.3	688.2
Imports of goods:						
U.S. imports of goods, international-transactions-accounts basis	1,177.7	1,207.4	1,194.8	1,163.1	1,227.5	1,224.0
Excluding gold	1,174.6	1,204.3	1,191.9	1,159.4	1,224.6	1,220.4
Net exports of goods	-468.4	-508.0	-495.6	-474.7	-531.9	-532.2
Excluding gold	-469.3	-508.3	-496.3	-474.5	-533.3	-532.2
Government:						
State and local:						
Structures:						
Value of new construction put in place	185.8	186.4	190.5	187.9	191.9	189.9

1. Assumption.

2. Nonmonetary gold is included in balance-of-payments-basis exports and imports but is not used directly in the estimation of NIPA exports and imports.

Prices

Inflation stepped up somewhat in the fourth quarter. The price index for gross domestic purchases, which measures the prices of goods and services purchased by U.S. residents, increased 1.8 percent after increasing 1.2 percent (table 4). The acceleration partly reflected step-ups in food and energy prices; excluding these items, the price index increased 1.4 percent after increasing 1.2 percent (chart 2).

Prices of goods and services purchased by consumers increased 1.9 percent after increasing 1.7 percent. The small step-up was more than accounted for by accelerations in food and energy prices; prices of other consumer purchases increased less than in the third quarter (1.5 percent versus 1.8 percent). The acceleration in energy prices mainly reflected a step-up in the price of gasoline and oil, but prices of other energy products ("electricity and gas" and "fuel oil and coal") also contributed.

Prices paid by government increased 1.7 percent, a little more than in the third quarter. A step-up in prices paid by State and local governments was partly offset by a slowdown in prices paid by the Federal Government.

Prices of private nonresidential fixed investment increased after five consecutive quarterly decreases. An

Chart 2. Gross Domestic Purchases Prices: Change From Preceding Quarter

increase in the price of structures more than offset a small decrease in the price of equipment and software. Prices of information processing equipment and software decreased at about the average rate of the past 3 years. However, prices of transportation equipment swung up sharply, mainly because of an upturn in motor vehicle prices. The increase in prices of transportation equipment was the largest since 1986; the third-quarter drop had been the largest since 1972. Prices of residential investment increased after no change.

The GDP price index, which measures the prices paid for goods and services produced in the United States, increased 1.8 percent in the fourth quarter, the same as the price index for gross domestic purchases.

Table 4. Price Indexes

Less food and energy	1.8	1.5	1.4	1.9	1.8	1.5

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NOTE. Percent changes in major aggregates are shown in NIPA table 8.1. Index numbers are shown in tables 7.1, 7.2, and 7.4.

Personal Income

The growth of personal income stepped up in the fourth quarter, but the growth of disposable personal income slowed. In the third quarter, tax payments had fallen, boosting disposable income; in the fourth quarter, tax payments changed little.

Personal income, which is measured only in current dollars, increased \$88.3 billion (or 4.0 percent) after increasing \$79.3 billion (3.6 percent) (table 5). The larger fourth-quarter increase reflected step-ups in nonfarm proprietors' income and in wage and salary disbursements of service and distributive industries. In addition, transfer payments increased a little more than in the third quarter; the fourth-quarter increase included \$2.0 billion in retroactive social security payments.⁵

These accelerations were partly offset by changes in

5. These payments result when the Social Security Administration recalculates benefits of recent retirees on the basis of updated information on the earnings base.

farm proprietors' income, which increased less in the fourth quarter than in the third, and in personal interest income, which decreased more in the fourth quarter than in the third. The deceleration in farm proprietors' income reflected, at least in part, a downturn in crop prices. The weakness in interest income reflected a slowdown in the accumulation of interest-bearing assets.

Personal tax and nontax payments decreased slightly in the fourth quarter after a bigger drop in the third quarter. The smaller fourth-quarter decrease was more than accounted for by Federal taxes and primarily reflected the pattern of nonwithheld tax collections.

Current-dollar disposable personal income (DPI) slowed to a 4.6-percent increase in the fourth quarter after increasing 4.9 percent in the third. Real DPI slowed to a 2.6-percent increase after increasing 3.1 percent (chart 3).

The Year 2002

In 2002, production and purchases increased considerably more than in 2001, but they increased less than was typical during the expansion of the 1990s. Real DPI also increased more than in 2001—and more than during the 1990s. Inflation slowed.

Real GDP increased 2.4 percent in 2002 after increasing 0.3 percent in 2001 (table 1).⁶ Real gross domestic purchases accelerated more, increasing 2.9 percent after increasing 0.4 percent. The 2002 increases were about a percentage point lower than the average growth rates of these measures during the expansion of

6. The 2002 increase is calculated from annual levels for 2001 and 2002. From the fourth quarter of 2001 to the fourth quarter of 2002, real GDP increased 2.8 percent, real DPI increased 5.9 percent, and the price index for gross domestic purchases increased 1.6 percent.

Chart 3. Selected Personal Income and Saving Measures

the 1990s.⁷

Inventory investment was the largest contributor to the step-up in GDP; it added 0.60 percentage point to GDP growth in 2002 after subtracting 1.24 percentage points in 2001 (table 2). The negative contribution in 2001 had reflected a swing from inventory accumulation to inventory liquidation; the positive contribution in 2002 reflected a virtual cessation of the liquidation.

Consumer spending increased 3.1 percent in 2002 year after increasing 2.5 percent in 2001. Spending on durable goods, nondurable goods, and services all increased more than in 2001. Consumer spending contributed 2.12 percentage points to growth in 2002, 0.45 percentage point more than in 2001.

Government spending also increased more than in 2001. Federal Government spending on national defense more than accounted for the step-up.

Nonresidential fixed investment was weak again in 2002, falling 5.8 percent and subtracting 0.68 percentage point from GDP growth. It had fallen a comparable amount in 2001. In 2002, investment in structures was mainly responsible for the decrease; in 2001, investment in equipment and software had mainly been responsible.

Exports decreased less than in 2001, and imports turned up. The net effect was to subtract more from GDP growth in 2002 than in 2001.

The price index for gross domestic purchases increased 1.2 percent after increasing 1.9 percent (table 4). The slowdown partly reflected a downturn in energy prices and a deceleration in food prices. In addition, prices of investment in nonresidential structures turned down, and prices of residential investment and prices paid by State and local governments decelerated.

Real DPI increased 4.5 percent in 2002, more than twice as much as in 2001 and more than its 3.1-percent average rate of growth in the 1990s. The acceleration reflected a step-up in current-dollar DPI and a deceleration in the prices of goods and services purchased by consumers (tables 4 and 5). The step-up in current-dollar DPI, in turn, mirrored a downturn in personal tax and nontax payments that partly resulted from the Economic Growth and Tax Relief Reconciliation Act of 2001. The personal saving rate increased to 3.9 percent from 2.3 percent.

7. From the trough of the recession in the first quarter of 1991 to the peak in the fourth quarter of 2000, real GDP increased at an average annual rate of 3.5 percent, and real gross domestic purchases increased 3.9 percent.

The following is a reprint of a set of fliers that present an overview of the principal statistics prepared by BEA's international economics program.

U.S. Department of Commerce

Bureau of Economic Analysis

BEA's International Accounts

The Bureau of Economic Analysis prepares and publishes estimates of transactions between U.S. and foreign residents and of the value of accumulated stocks of U.S.-owned assets abroad and of foreign-owned assets in the United States. These estimates are presented in the international transactions accounts and the international investment position accounts. In addition, the Bureau has work programs devoted to international services, to direct investment, and to research and analysis.

International transactions accounts

The international transactions accounts are a quarterly statistical summary of transactions between U.S. and foreign residents organized into three major categories: The current account, the capital account, and the financial account. The current account includes exports and imports of goods, services, income, and current transfers. The capital account includes capital transfers, such as debt forgiveness. The financial account includes transactions for official assets, for U.S. Government assets other than official reserve assets, for direct investment, for portfolio investment, and for other investment.

International investment position accounts

The international investment position is an annual statistical summary of the value of accumulated stocks of U.S.-owned assets abroad and of foreign-owned assets in the United States, as well as the value of the net international investment position of the United States. Two alternative official measures of the international investment position are presented, one with direct investment recorded at current cost, and the other with direct investment recorded at market value. Separate estimates are available for the value of accumulated stocks of official assets, of U.S. Government assets other than official reserve assets, of direct investment, of portfolio investment, and of other investment.

International services

The Bureau provides annual statistical detail on U.S. cross-border exports and imports of private services and on sales of services by nonbank majority-owned U.S. and foreign affiliates of multinational companies. U.S. cross-border exports and imports are transactions between U.S. and foreign residents; they represent international trade in the conventional sense and are recorded, in summary form, in the international transactions accounts. Sales of services to foreign residents by foreign affiliates of U.S. companies and purchases by U.S. residents from U.S. affiliates of foreign companies are not recorded in the U.S. international transactions accounts, because these transactions are not between U.S. and foreign residents. (However, they are reflected in an ownership-based framework of the U.S. current account, which the Bureau publishes periodically.)

Direct investment

The Bureau produces comprehensive data on U.S. direct investment abroad and foreign direct investment in the United States that are essential to the compilation of the U.S. economic accounts and for the analysis of multinational companies. For both types of investment, data are provided on transactions between parent companies and their affiliates, on direct investment positions (stocks), and on the financial and operating characteristics of the firms involved. For foreign direct investment in the United States, an additional data set relating to newly acquired or established U.S. affiliates of foreign companies also is provided. In addition, establishment-level data on foreign-owned firms are provided for selected years for which BEA links its enterprise-level (or company-level) data to the Census Bureau's establishment-level (or plant-level) data.

Research and analysis

The Bureau conducts a variety of research and

analytical activities in support of the international accounts. The topics covered include all the areas in which it produces international statistics. The results of the research may be published in the SURVEY OF CURRENT BUSINESS, presented in outside publications, or used in-house to improve the accounts. Among the topics covered by recent research projects have been the intra-firm trade of U.S. and foreign multinational companies, the structure of production and origin of content of production by foreign affiliates of U.S.

companies and U.S. affiliates of foreign companies, and the expansion strategies of U.S. multinational firms.

For more information

Call the Balance of Payments Division at 202-606-9545 or the International Investment Division at 202-606-9800, or e-mail internationalaccounts@bea.gov. For additional information about the international accounts, go to our Web site at www.bea.gov.

International Transactions Accounts

The Bureau of Economic Analysis prepares and publishes estimates of transactions between U.S. and foreign residents. These estimates are presented in the international transactions accounts (table 1).

Transactions are defined as the transfer of ownership of something that has an economic value measurable in monetary terms from residents of one country to residents of another. Transactions in goods, services, income, and current transfers constitute the current account. Capital transfers, such as debt forgiveness, largely constitute the capital account. Transactions in financial assets constitute the financial account.

Current-account transactions in goods, services, and income involve real resources, which are intrinsically capable of satisfying an economic want or need. Exports of goods and services accounted for 10 percent of the current-dollar value of U.S. gross domestic product in 2001. Imports of goods and services accounted for 13 percent of the current-dollar value of U.S. gross domestic purchases in 2001.

Exports and imports of goods are much larger than other current-account transactions, and the deficit on goods has been the largest component of the current-account balance for many years. Exports and imports of services are much smaller, and the surplus on services partly offsets the deficit on goods. Receipts and payments of income have grown fastest in recent years, mainly as a result of the rapid expansion of cross-border holdings of financial

assets.

Financial-account transactions may involve exchanges of financial assets for other financial assets or for real resources, or they may involve the gift or grant of financial assets where nothing of economic value is received in return. Financial-account transactions have grown very rapidly since the early 1990s as a result of the easing of governmental restrictions on financial institutions and markets, rapid innovation in financial techniques and instruments, and economic growth.

Financial-account transactions are organized into two major categories. The first major category is U.S.-owned assets abroad, which includes—among other transactions—U.S. purchases and sales of foreign securities, U.S. bank lending to foreigners, and U.S. direct investment abroad. The second major category is foreign-owned assets in the United States, which includes—among other transactions—foreign purchases and sales of U.S. securities, U.S. bank borrowing from foreigners, and foreign direct investment in the United States.

For more information

Call Christopher L. Bach, Chief of the Balance of Payments Division, at 202-606-9545, or e-mail chris.bach@bea.gov. For additional information about the international accounts, go to our Web site at www.bea.gov.

1. Credits, +: Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

Debits, -: Imports of goods and services and income payments; unilateral current transfers to foreigners; capital account transactions payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis.

3. Includes some goods: Mainly military equipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. At the present time, all U.S. Treasury-owned gold is held in the United States.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

13. Conceptually, line 76 is equal to "net foreign investment" in the national income and product accounts (NIPAs). However, the foreign transactions account in the NIPAs (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 of appendix A in the January 2003 issue of the SURVEY OF CURRENT BUSINESS. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.5 of the full set of NIPA tables in the August 2002 issue of the SURVEY.

International Investment Position Accounts

The Bureau of Economic Analysis prepares and publishes estimates of the value of accumulated stocks of U.S.-owned assets abroad and of foreign-owned assets in the United States, as well as the value of the net international investment position of the United States (table 1). These estimates are produced annually and reflect values as of yearend. The estimates for transactions, which are presented in the international transactions accounts, and several types of valuation adjustments explain the year-to-year change in investment positions.

Assets are recorded in the international investment position accounts at current cost or at market value. Direct investment is recorded at current cost and at market value, and supplemental information is available at historical cost (or book value). Equity, long-term marketable debt securities, and gold are recorded at market value. For other types of assets, face value is generally presumed to represent market value.

Changes in the value of stocks of assets in the international investment position consist of two elements. The first is the change attributable to international financial transactions, which are recorded in the international transactions accounts. The second is the change attributable to valuation adjustments, including price changes, exchange rate changes, and other factors.

The international investment position accounts provide information on the composition of U.S.-owned assets abroad and of foreign-owned assets in the United States. This information facilitates analyses

of the economic effects of international lending and investment. For example, the economic effects of direct investment can be much different from the economic effects of portfolio investment. Within portfolio investment, the relative importance of foreign ownership of domestic stocks, bonds, bank loans, and deposits is often of interest to government policymakers, private individuals, and companies.

The value of U.S.-owned assets abroad includes the value of U.S. official reserve assets, of U.S. Government assets other than official reserve assets, and of U.S. private assets. U.S. private assets consist of the value of U.S. direct investment abroad, of U.S. holdings of foreign securities, and of U.S. claims on unaffiliated foreigners reported by U.S. banks and nonbanking concerns.

The value of foreign-owned assets in the United States includes the value of foreign official assets in the United States and of other foreign assets in the United States. Other foreign assets consist of the value of foreign direct investment in the United States, of foreign holdings of U.S. securities, of foreign holdings of U.S. currency, and of U.S. liabilities to unaffiliated foreigners reported by U.S. banks and nonbanking concerns.

For more information

Call Christopher A. Gohrband, Chief of the Private Capital Branch, at 202-606-9564, or e-mail christopher.gohrband@bea.gov. For additional information about the international accounts, go to our Web site at www.bea.gov.

^P Preliminary.

¹ Revised.

1. Represents gains or losses on foreign-currency-denominated assets due to their revaluation at current exchange rates.

2. Includes changes in coverage, statistical discrepancies, and other adjustments to the value of assets.

3. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

4. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are

not included in international transactions financial flows.

5. Also includes paid-in capital subscriptions to international financial institutions and outstanding amounts of miscellaneous claims that have been settled through international agreements to be payable to the U.S. Government over periods in excess of 1 year. Excludes World War I debts that are not being serviced.

6. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

7. Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

International Services

The Bureau of Economic Analysis prepares and publishes estimates of U.S. cross-border trade in private services and of sales of services by nonbank majority-owned U.S. and foreign affiliates of multinational companies (tables 1, 2, and 3). The two data sets correspond to the two distinct channels through which services are delivered to international markets.

U.S. cross-border trade in private services consists of transactions between U.S. and foreign residents. Cross-border exports and imports of private services represent international trade in the conventional sense and are recorded, in summary form, in the international transactions accounts. These services transactions consist of both trade within multinational companies (intrafirm trade) and trade between unaffiliated parties.

Cross-border services transactions are classified into five broad "standard components." The components are (1) travel; (2) passenger fares; (3) other transportation, such as freight and port services; (4) royalties and license fees; and (5) other private services, such as financial services, insurance services, and business, professional, and technical services.

Sales of services by nonbank majority-owned U.S. and foreign affiliates of multinational companies are usually transactions between residents of the same country. Sales of services to foreign residents by foreign affiliates of U.S. companies are con-

sidered transactions between foreign residents. Purchases of services by U.S. residents from U.S. affiliates of foreign companies are considered transactions between U.S. residents. These sales and purchases are not recorded in the U.S. international transactions accounts, but they *are* reflected in an ownership-based framework of the U.S. current account, which the Bureau publishes periodically. The estimates are drawn from larger data sets on the operations of U.S. multinational companies and of U.S. affiliates of foreign companies.

Services delivered through nonbank majority-owned affiliates have exceeded those delivered through cross-border trade in recent years. However, for specific types of services, the relative importance of the two channels is often determined by the nature of the service being delivered.

For more information

Call Michael A. Mann, Chief of the Current Account Services Branch, at 202-606-9573, or e-mail michael.mann@bea.gov. For more information on sales of services by affiliates of multinational companies, call Maria Borga of the International Investment Division at 202-606-9853, or e-mail maria.borga@bea.gov. For additional information about the international accounts, go to our Web site at www.bea.gov.

n.a. Not available

* Less than \$500,000.

D Suppressed to avoid disclosure of data of individual companies.

1. For exports, other business, professional, and technical services consists of agricultural services; language translation services; security services; collection services; salvage services; satellite photography and remote sensing/satellite imagery services; merchanting services; transcription services; waste treatment and depollution services; mailing, reproduction, and commercial art services; personnel supply services;

management of health care facilities services; auction services, and other trade-related services. For imports, other business, professional, and technical services consists of all of the components above with the exception of merchanting services.

2. Exports include mainly film and tape rentals and expenditures of foreign governments and international organizations in the United States. Imports include mainly expenditures of U.S. residents temporarily working abroad and film and tape rentals.

U.S. Direct Investment Abroad

The Bureau of Economic Analysis produces comprehensive data on U.S. direct investment abroad that are essential to the compilation of the U.S. economic accounts and for the analysis of multinational companies. The data, which are widely recognized to be the world's most complete and accurate, are obtained from mandatory surveys.

U.S. direct investment abroad is defined as ownership by a U.S. investor of at least 10 percent of a foreign business. The direct investor is known as a U.S. parent, and the U.S.-owned foreign business is known as a foreign affiliate. The combined global operations of a U.S. parent company and its foreign affiliates constitute a U.S. multinational company.

The Bureau collects and publishes two broad sets of data on U.S. direct investment abroad: (1) International transactions and direct investment position data, and (2) financial and operating data of U.S. multinational companies. Both sets are available in considerable detail by industry and by country.

International transactions and direct investment position data

The international transactions data cover the foreign affiliates' transactions with their U.S. parent, so these data focus on the U.S. parent's share, or interest, in its affiliates rather than on the affiliates' overall size or level of operations. These data are essential to the compilation of the U.S. international transactions accounts, the international investment position, and the national income and product accounts. The major data items include capital flows, which measure the funds that U.S. parents provide to their foreign affiliates, and income, which measures the return on those funds. The data also cover royalties and license fees and other service charges that parents receive from or pay

to their affiliates. All of these items are flow data and provide measurement for a particular time frame, such as for a quarter or a year.

Direct investment position data are stock data and are cumulative; they measure the total outstanding level of U.S. direct investment abroad at yearend. Estimates are provided both at historical cost and in terms of current-period prices. Two alternative official measures of the position are presented in current-period prices—one with direct investment recorded at current cost, and the other with direct investment recorded at market value. For the historical-cost estimates, tables are published by country and by industry.

Financial and operating data

The financial and operating data provide a picture of the overall activities of foreign affiliates and U.S. parent companies using a wide variety of indicators of their financial structure and operations. The data on foreign affiliates cover the entire operations of the affiliate, irrespective of the percentage of U.S. ownership. These data cover items that are needed in analyzing the characteristics, performance, and economic impact of multinational companies, such as sales, gross product (value added), employment and compensation of employees, capital expenditures, exports and imports, and research and development expenditures. Separate tabulations are available for affiliates that are majority owned by their U.S. parent because the concept of majority control is often important in the analysis of multinational companies.

Uses of the data

The data can be used to measure the scale of the global business activity of U.S. multinational companies and its impact on the U.S. economy and on foreign-host

economies. For example, the data can be used to measure:

- The current-dollar value of, and returns on, U.S. direct investment abroad
- The shares of U.S. and foreign gross domestic product, employment, exports and imports of goods, capital stock, and research and development accounted for by U.S. multinational companies
- Researchers have used the data to analyze:
- The characteristics of firms, industries, and countries that influence the decision to undertake direct investment abroad
- The impact of U.S. direct investment abroad on employment, wages, productivity, and tax revenues

Availability

For more information on these data, see the following articles that appear annually in the SURVEY OF CURRENT BUSINESS, the monthly journal of the Bureau:

- “U.S. Direct Investment Abroad: Detail for Histori-

cal-Cost Position and Related Capital and Income Flows,” usually in the September issue of the SURVEY

- “Direct Investment Positions: Country and Industry Detail,” usually in the July issue of the SURVEY
- “U.S. Multinational Companies: Operations”

The SURVEY articles referenced above are available on our Web site at <www.bea.gov>.

Detailed tables on the operations of U.S. multinational companies are available in annual data publications and in compressed files that can be downloaded free of charge from our Web site. For information on these and other data products, see the International Investment Division Product Guide under the “International” section of our Web site.

For more information

Call Patricia C. Walker, Chief of the Direct Investment Abroad Branch of the International Investment Division, at 202-606-9889 or e-mail patricia.walker@bea.gov.

NOTE: In this table, unlike in the international transactions accounts, income and capital outflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "U.S. Direct Investment Abroad: Detail for Historical-Cost Position and Related Capital and Income Flows, 2001" in the September 2002 issue of the SURVEY OF CURRENT BUSINESS.

D Suppressed to avoid disclosure of data of individual companies.

NOTE: The data in this table are from "U.S. Multinational Companies: Operations in 2000" in the December 2002 issue of the SURVEY OF CURRENT BUSINESS.

Foreign Direct Investment in the United States

The Bureau of Economic Analysis produces comprehensive data on foreign direct investment in the United States that are essential to the compilation of the U.S. economic accounts and for the analysis of multinational companies. The data, which are widely recognized to be the world's most comprehensive and accurate, are obtained from mandatory surveys.

Foreign direct investment in the United States is defined as the ownership by a foreign investor of 10 percent or more of a U.S. business. The direct investor is known as a foreign parent, and the foreign-owned U.S. business is known as a U.S. affiliate.

The Bureau collects and publishes three broad sets of data on foreign direct investment in the United States: (1) International transactions and direct investment position data, (2) financial and operating data of U.S. affiliates of foreign companies, and (3) new investment data.

International transactions and direct investment position data

International transactions data cover the U.S. affiliates' transactions with their foreign parents, so these data focus on the foreign parents' share, or interest, in their U.S. affiliates rather than on the affiliates' overall size or level of operations. These data are essential to the compilation of the U.S. international transactions accounts, the international investment position, and the national income and product accounts. The major data items include capital flows, which measure the funds that foreign parents provide to their U.S. affiliates, and income, which measures the return on those funds. The data also cover royalties and license fees and other service charges that affiliates pay to or receive from their parents. All of these items are flow data and provide measurement for a particular time frame, such as for a quarter or for a year.

Direct investment position data are stock data and are cumulative; they measure the total outstanding

level of foreign direct investment in the United States at yearend. Estimates are provided both at historical cost and in terms of current-period prices. Two alternative official measures of the position are presented in current-period prices—one with direct investment recorded at current cost, and the other with direct investment recorded at market value. For the historical-cost estimates, tables are published by country and by industry.

Financial and operating data of U.S. affiliates

Financial and operating data provide a picture of the overall activities of U.S. affiliates and contain a wide variety of indicators of their financial structure and operations. The data cover the entire operations of the U.S. affiliate, irrespective of the percentage of foreign ownership. These data cover items that are needed in analyzing the characteristics, performance, and economic impact of multinational companies, such as sales, gross product (value added), employment and compensation of employees, capital expenditures, exports and imports, and research and development expenditures. Tables are published by country, by industry, and (for selected items) by State. More detailed tables by industry and State on affiliate operations at the establishment level are available for selected years as a result of a special project that linked the Bureau's enterprise data for U.S. affiliates with the establishment data for all U.S. companies from the Bureau of the Census.

New investment data

These data cover the outlays by foreign direct investors to acquire or establish new U.S. affiliates. In addition, the new investment data contain selected data on the operations of the newly acquired or established affiliates, such as total assets, net income, and employment. These data cover the entire operations of the affiliate, regardless of the percentage of foreign ownership.

Uses of the data

The data on foreign direct investment in the United States and the operations of U.S. affiliates can be used to measure the scale of foreign-controlled business activity in the United States and its impact on the U.S. economy. For example, the data can be used to measure:

- The current dollar value of, and returns on, foreign direct investment in the United States
- The shares of U.S. gross domestic product, employment, exports and imports of goods, and research and development accounted for by U.S. affiliates of foreign companies

Researchers have used the data to analyze:

- The effects of tax policies on foreign direct investment in the United States;
- Differences between foreign- and domestically owned firms in terms of domestic content, profitability, and productivity;
- The impact of foreign direct investment on U.S. wages;
- Differences between foreign- and domestically owned establishments in terms of such characteristics as wage rates, plant size, capital intensity, and productivity; and
- The extent of foreign direct investment by individual State and industry, expressed both in absolute terms (such as in dollars or numbers of employees) and as percentages of the values for all U.S. establishments.

Availability

For more information on these data, see the following articles that were published in the SURVEY OF CURRENT BUSINESS, the monthly journal of the Bureau:

- “Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows,” usually in the September issue of the SURVEY
- “Direct Investment Positions: Country and Industry Detail,” usually in the July issue of the SURVEY
- “U.S. Affiliates of Foreign Companies: Operations,” usually in the August issue of the SURVEY
- “Foreign Direct Investment in the United States: New Investment,” usually in the June issue of the SURVEY.

The SURVEY articles referenced above are available on our Web site at <www.bea.gov>.

Detailed tables on the operations of U.S. affiliates are available in annual data publications and in compressed files that can be downloaded free of charge from our Web site. For information on these and other data products, see the International Investment Division Product Guide under the “International” section of our Web site.

For more information

Call David H. Galler, Chief of the Direct Investment in U.S. Branch, International Investment Division, at 202-606-9835 or e-mail david.galler@bea.gov.

Note: In this table, unlike in the international transactions accounts, income and capital inflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 2001" in the September 2002 issue of the SURVEY OF CURRENT BUSINESS.

D Suppressed to avoid disclosure of data of individual companies.

* Less than \$500,000.

1. The industry classification system used to classify the data for U.S. affiliates is based on the North American Industry Classification System. Prior to 1997, the affiliate data were classified using an industry classification system based on the Standard Industrial Classification system.

NOTES. The data in this table are from BEA's annual survey of the operations of U.S. affiliates of foreign companies; see "U.S. Affiliates of Foreign Companies: Operations in 2000," in the August 2002 issue of the SURVEY OF CURRENT BUSINESS. Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; B—500 to 999; C—1,000 to 2,499; D—2,500 to 4,999; E—5,000 to 9,999; F—10,000 to 24,999; G—25,000 to 49,999; H—50,000 to 99,999; I—100,000 or more.

Research and Analysis

The Bureau of Economic Analysis conducts a variety of research and analytical activities in support of the international accounts. The topics covered include all the major areas in which the Bureau produces international statistics—the international transactions accounts, the international investment position, and the operations of U.S. parent companies, their foreign affiliates, and U.S. affiliates of foreign companies. The results of the research may be published in the SURVEY OF CURRENT BUSINESS, presented in outside publications or meetings, or used in-house to improve the accounts.

To interpret the accounts and place them in context, the Bureau's economists relate developments in the international accounts to developments in the U.S. and foreign economies, such as macroeconomic developments, changes in exchange rates, and events in markets for particular types of goods, services, and financial assets. The results of this work are included in regular and special analytical SURVEY OF CURRENT BUSINESS articles and in news releases presenting the accounts.

Some of the research conducted by the Bureau's international accounts staff has resulted in the development of new methodologies that have improved the usefulness of the accounts or expanded their scope and application. An example is the development of techniques for valuing direct investment in terms of current-period prices in the international transactions accounts and the international investment position. Valuation on this basis gives a more meaningful picture of U.S. international investment, and of the income earned on that investment, than can be obtained from statistics based on historical-cost accounting.

Another research project resulted in the construction of a breakdown of the U.S. current account along ownership lines, to supplement the conventional breakdown based primarily on the types of goods and services traded. Presentation on this basis gives a more detailed picture of the role and importance of multinational companies in U.S. international trade and

investment than is available from the conventional breakdown. It also provides an alternative measure of U.S. economic performance that reflects the net effect on the U.S. economy, not only of cross-border exports and imports but also of the participation of U.S. firms in international markets through locally established affiliates.

In the area of operations of affiliates, the Bureau's researchers have developed techniques for deriving estimates of gross product (value added) of multinational companies from accounting data reported for these companies in the Bureau's surveys. Recently, a methodology was introduced for valuing the gross product of majority-owned foreign affiliates of U.S. companies in real terms, thus isolating movements in production in real terms from movements attributable to changes in prices and exchange rates.

As the collector of primary source data on U.S. direct investment abroad and foreign direct investment in the United States, the Bureau conducts significant research to analyze and interpret these data. This work may be done at the level of statistical aggregates for countries and industries, or it may involve the analysis of microdata for individual companies. In some cases, the research has been done in collaboration with outside researchers. In all cases, the research is done under strict guidelines and procedures that protect the confidentiality of company-specific data, as required by law. Among the topics covered by recent research projects have been intrafirm trade of U.S. and foreign multinational companies, rates of return on foreign direct investment in the United States, the structure of production and origin of content of production by foreign affiliates of U.S. companies and U.S. affiliates of foreign companies, and expansion strategies of U.S. multinational firms. The results of some of these and several other projects were published in a compendium, *International Direct Investment: Studies by the Bureau of Economic Analysis* (Washington, DC: U.S. Government Printing Office, 1999).

The Bureau's international accounts staff have participated in numerous outside activities. Staff have been involved in the development of international statistical guidelines. For example, they have participated in exercises, coordinated by international organizations, to prepare international manuals for balance-of-payments compilation, for statistics on trade in services, and in an ongoing exercise to prepare a manual on indicators of globalization. Staff have also given papers and presentations at a number of outside meetings and conferences, both academic and business-related. Recently, papers have been presented on trade-in-services statistics, on intrafirm trade, and on multinational-company expansion strategies. Some of the papers have subsequently been included in outside publications.

Some research projects are undertaken with a view to improving the quality of the data. One recent project examined services related to e-commerce and the Internet, to ensure that these and other new types

of services were adequately covered and properly described in BEA's surveys of international trade in services. Another recent project compared U.S. data on trade in goods with similar data for selected partner countries to see if they suggested undercounting in the U.S. data.

The Bureau's international accounts staff also prepare methodologies and users' guides explaining the accounts, documenting their methodologies and procedures, and describing implementation strategies for new and evolving international standards. Much of this research material is available on the Bureau's Web site at <www.bea.gov>.

from the Regional Economic Information System!***

Presenting economic data for all States, counties, and metro areas

This edition of the REIS CD-ROM updates the estimates for more than 3,100 counties, for 335 metropolitan areas, and for 172 BEA economic areas.

- Personal income by major source
- Per capita personal income
- Earnings by industry
- Employment by major industry
- Farm income and expenses
- Transfer payments by major program
- Regional economic profiles
- BEARFACTS (BEA Regional Fact Sheets)
- Commuter income flows

Including

- Quarterly State personal income for 1969–2001
- Data on intercounty commuting flows for 1960, 1970, 1980, and 1990 from the Census Bureau
- Data for commuting flows and wages and salaries for counties for 1980 and 1990 from the Census Bureau

Featuring

- Windows 95 retrieval software you can use to display, print, or export tables
- Easy-to-use help menus
- A list of telephone contacts
- A list of the areas and their constituent counties

Personal Income by State, Third Quarter 2002

By G. Andrew Bernat, Jr. and John R. Kort

PERSONAL income for the Nation grew 0.9 percent in the third quarter of 2002, down from increases of 1.2 percent in the prior two quarters of 2002.¹ This third-quarter growth is 0.5 percentage point less than

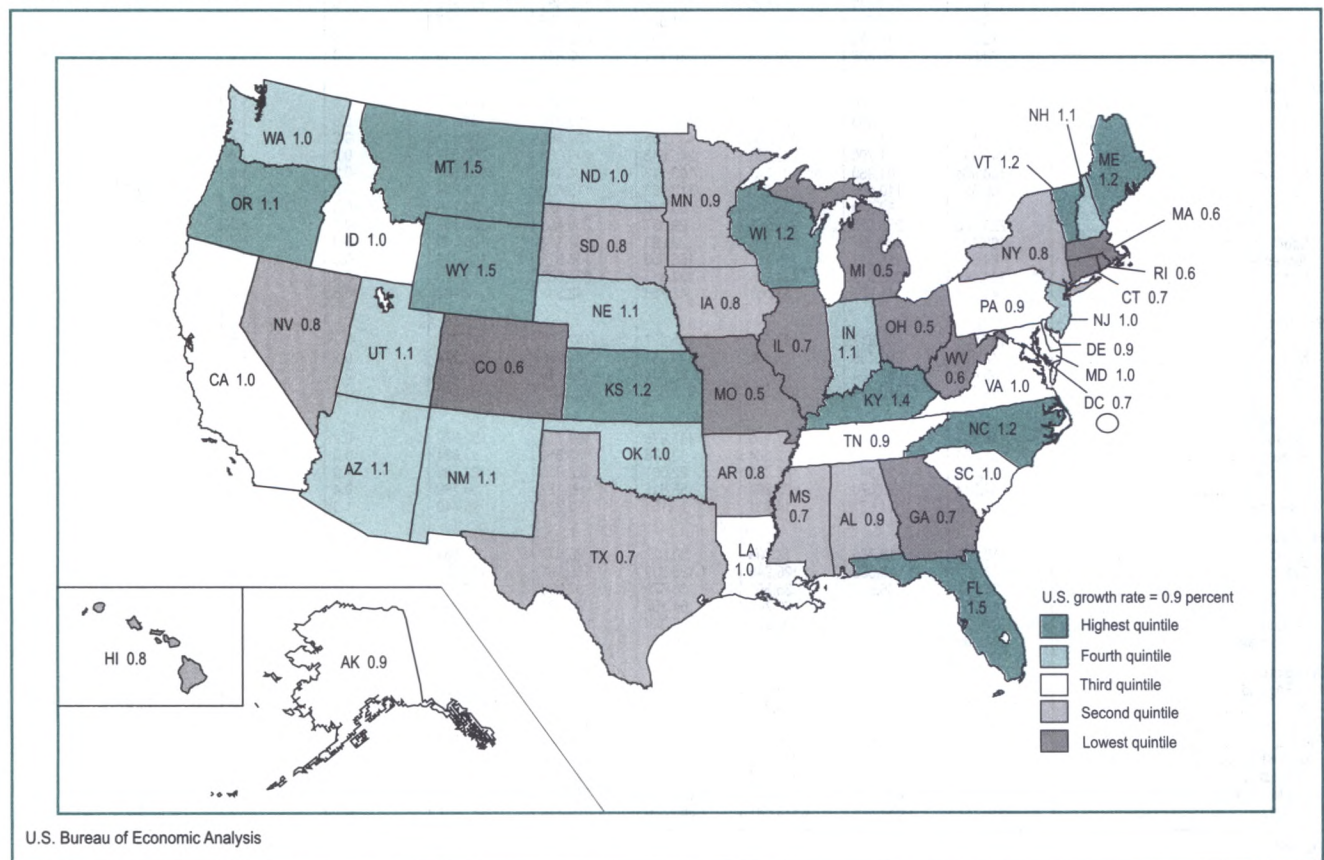

the average increase of 1.4 percent during the 1990s expansion. In the midst of the national slowdown in growth, one-half of the States grew at least as fast in the third quarter as in the second. Several large States—including California, New York, Texas, and Illinois—grew more slowly in the third quarter (table A). Growth ranged from 1.5 percent in Montana to 0.5 percent in Michigan (chart 1).

1. Estimates of personal income are only available in current dollars. Percent changes from the preceding quarter are expressed at quarterly rates.

NOTE. The quarterly estimates of State personal income are prepared by the Regional Economic Measurement Division.

Table 1 at the end of this article presents the quarterly estimates of personal income for each State and

Chart 1. Personal Income: Percent Change 2002:II–2002:III

region, beginning with the fourth quarter of 1998. Table 2 presents the quarterly estimates of personal income by major source and of earnings by industry, beginning with the first quarter of 2001.

The slowdown in personal income reflected a down-

turn in rental income and decelerations in transfer payments and interest income. These changes were partly offset by an upturn in farm proprietors' income and a small step-up in wage and salary disbursements.

¹ Revised.

² Preliminary.

1. Percent changes are expressed at quarterly rates.
2. Ranks based on unrounded growth rates.

Personal income growth by component

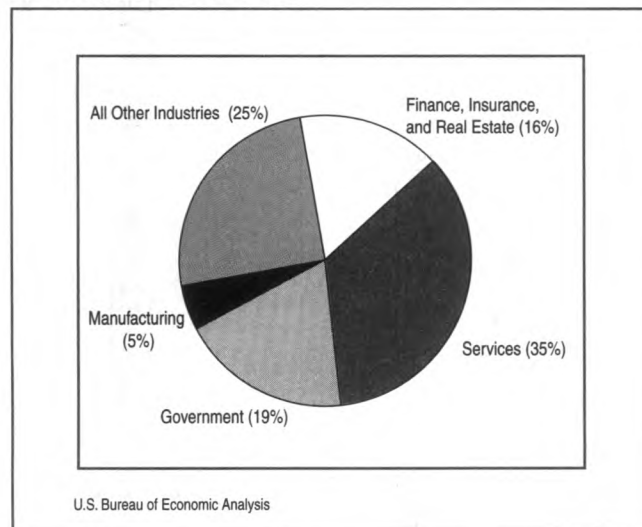

Net earnings for the Nation grew 1.1 percent in the third quarter, compared with 0.8 percent in the second (table B).² Net earnings increased in all States in the third quarter, and 37 States recorded faster growth in the third quarter than in the second. In contrast, net earnings had declined in 14 States in the second quarter.

Transfer payments grew more slowly in the third quarter than at any time since the third quarter of 2000. Growth in transfer payments picked up in only three States—California, Vermont, and Alaska. The widespread slowdown in transfer payments was partly attributable to a substantial deceleration in State unemployment insurance benefits, as the unemployment rate dipped to 5.7 percent in the third quarter from 5.9 percent in the second. State unemployment insurance benefits declined in 37 States. However, unemployment benefits increases in California, Oregon, Washington, Vermont, and New Jersey had relatively large effects on total personal income in these States. Except

2. Net earnings is calculated as earnings by place of work less personal contributions for social insurance plus an adjustment that converts these earnings to a place-of-residence basis. Earnings by place of work is the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income.

Net earnings is used to analyze changes in the composition of personal income; earnings by place of work is used to analyze changes in the industrial structure of earnings. Net earnings by industry is not available, because the source data used to adjust earnings to a place-of-residence basis are not available by industry and because personal contributions for social insurance are not estimated by industry. For the definitions of the components of earnings, see U.S. Bureau of Economic Analysis, *State Personal Income, 1929–97* (Washington, DC: U.S. Government Printing Office, 1999), or go to BEA's Web site at <www.bea.gov/bea/mp.htm>, and look under "Regional programs" for "State Personal Income, 1929–97."

Chart 2. Industry Composition of Net Earnings Growth, 2002:II–2002:III

for Vermont, these States had increases in extended benefits, which are available to workers who have exhausted regular unemployment insurance benefits during periods of high unemployment.

Property income (dividends, interest, and rent) declined 0.2 percent in the third quarter, in contrast to an increase of 1.9 percent in the second. In all States, rental income and interest income declined, but dividend income increased. The downturn in rental income reflected an upturn in expenses, specifically closing costs associated with mortgage originations, spurred by record refinancing in the quarter. Lower interest income reflected lower short-term and long-term interest rates.

Earnings growth by industry

For the Nation, services, government, and finance, insurance, and real estate contributed 0.8 percentage point to the 1.1-percent growth in earnings in the third quarter (table C). Earnings growth in services contributed the most to total earnings growth in 34 States, and in most of the other States, earnings growth in government was the major contributor. In Idaho, New Mexico, Wyoming, and North Dakota, farming was the major contributor, and in Nebraska, earnings in nondurable-goods manufacturing was the major contributor. Manufacturing earnings registered a small increase for the Nation, but earnings in durable goods declined in 19 States—particularly in Michigan, Mississippi, and Connecticut—and earnings in nondurable goods declined in 14 States. The remaining five industries accounted for about a fourth of total net earnings growth among the States (chart 2).

Manufacturing earnings. Manufacturing earnings increased in the second and third quarters of 2002 after declining for six consecutive quarters, the longest series of declines in more than 30 years. In the recession in the early 1990s, manufacturing earnings declined for only two consecutive quarters, and in the recession in the early 1980s, manufacturing earnings declined for five consecutive quarters, but only one of these declines was as large as the declines in 2001 and 2002 (chart 3).

A consequence of the recent declines in manufacturing earnings was a further reduction in manufacturing's share of net earnings. In the third quarter of 2002, manufacturing accounted for 15.1 percent of total net earnings, down from 17.3 percent in the first quarter of 2000 and down from 25.1 percent in 1981. The decline in the importance of manufacturing as a source of earnings is evident in almost all States. For example, in the third quarter of 2002, manufacturing

accounted for 20 percent or more of net earnings in 10 States; Michigan had the highest share at 29 percent (table D). These shares are substantially lower than 10

years earlier, when manufacturing's share of net earnings exceeded 20 percent in nearly half the States and when the shares in Michigan, Indiana, Delaware, and

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income—less personal contributions for social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

2. Dollar changes are expressed at annual rates.
Note. Estimates may not add to totals because of rounding.

Ohio were 30 percent or more. Over this 10-year period, North Dakota, South Dakota, and Nevada were the only States in which manufacturing's share of net earnings increased; in each of these States, manufacturing accounted for a relatively small share of net earnings.

In general, the States with the highest manufacturing shares of net earnings had slower than average growth in overall net earnings in recent years (chart 4). Except for the last four quarters, the States with the highest manufacturing share of net earnings in the third quarter of 2002 had below-average growth in every quarter since the second half of 1995. The above-average growth in these States in the most recent quarters is partly due to a relative improvement in the manufacturing job market in these States. Preliminary evidence indicates that job losses may have slowed more for the States with the highest manufacturing shares in the past three quarters than for other States.

Recent trends in State personal income growth

Because quarter-to-quarter changes in State personal income are subject to large swings, it is useful to look at the change in State personal income in the current quarter relative to the same quarter a year earlier. Table E and chart 5 show the growth in quarterly State personal income from the fourth quarter of 1999 through the third quarter of 2002.

U.S. personal income increased 3.3 percent from the third quarter of 2001 to the third quarter of 2002, up from an increase of 2.7 percent from the second quarter of 2001 to the second quarter of 2002. After peaking at an 8.7-percent annual increase in the third quarter of 2000, the annual change in U.S. personal income slowed through the fourth quarter of 2001 and picked up thereafter. Similar growth trends are evident for the top-growth and bottom-growth quintile States, where

Chart 4. Change in Total Net Earnings: Four-Quarter Moving Average

the quintiles are based on income growth in third quarter of 2002 (chart 1). However, these top-quintile States have not always out-performed the other quintiles. Growth in personal income has been higher in

the top-quintile States than in the bottom-quintile States since the fourth quarter of 2000; previously, the growth in the top-quintile States was slower than average (chart 4).

NOTE: Percent changes are calculated as growth from the previous year's quarter to the current quarter. States are shown ranked according to 2001:III–2002:III growth rates.

In 38 States, personal income grew faster from the third quarter of 2001 to the third quarter of 2002 than it did from the second quarter of 2001 to the second quarter of 2002. Third-quarter to third-quarter growth ranged from 5.2 percent in Nebraska to 1.9 percent in New York, Connecticut, and Colorado. Annual U.S. personal income growth was the strongest since the second quarter of 2001.

Tables 1 and 2 follow.

Chart 5. Growth in Personal Income from the Same Quarter a Year Earlier

Upcoming Comprehensive Revisions of State and Local Area Personal Income

In the spring of 2004, BEA plans to release the results of comprehensive revisions of State personal income and of local area personal income.¹ These revisions will incorporate the results of the upcoming comprehensive revision of the national income and product accounts (NIPA's), which is scheduled for release in late 2003.²

As in the past, the annual revision of State personal income that would normally be scheduled for this September will instead be combined with the upcoming comprehensive revision. The regular release of the preliminary annual State estimates for 2002 will be on April 23, 2003; in July, there will be a limited revision to those estimates that will incorporate the fourth-quarter 2002 tabulations by the Bureau of Labor Statistics of data on employment and wages for workers covered by State unemployment insurance.

The next regular release of the local area estimates, which will cover 1999–2001, will be on May 6, 2003.

1. Comprehensive revisions, which are usually prepared about every 5 years, provide the opportunity for BEA to introduce major improvements into its economic accounts.

2. For information on the comprehensive revision of the NIPA's, including a list of several major improvements that are being considered, see "Note on the Upcoming Comprehensive Revision of the National Income and Product Accounts," *SURVEY OF CURRENT BUSINESS* 82 (November 2002): 6; and Stephanie H. McCulla and Carol E. Moylan, "Preview of Revised NIPA Estimates for 1997," *SURVEY* 83 (January 2003): 10–16.

^p Preliminary.
^r Revised.
¹ Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.
² The estimates of earnings for 2001 and 2002 are based on the 1987 Standard Industrial Classification.
³ Personal contributions for social insurance are included in earnings by type and by industry, but they are excluded from personal income.
⁴ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers; Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.
⁵ Rental income of persons includes the capital consumption adjustment.
⁶ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
⁷ "Other" consists of the wage and salary disbursements of U.S. residents employed by international organizations and foreign embassies and consulates in the United States.

and Earnings by Industry, 2001-I-2002:III—Continued
adjusted at annual rates

Table with columns for regions (New England, Midwest, Great Lakes, Southwest, Rocky Mountain, Far West) and years (2001, 2002). Each region has sub-columns for quarters I, II, III, IV and annual totals I, II, III. Includes a 'Line' column for industry identification.

NOTE: The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of the U.S. residents employed abroad temporarily by private U.S. firms.

BEA Current and Historical Data

National, International, and Regional Data

This section presents an extensive selection of economic statistics prepared by the Bureau of Economic Analysis (BEA) and a brief selection of collateral statistics prepared by other Government agencies and private organizations. Series that originate in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

BEA's economic statistics are available on BEA's Web site at <www.bea.gov>. The site contains data, articles, news releases, and other information from BEA's national, industry, international, and regional programs.

National Data

A. Selected NIPA Tables

The tables in this section include the most recent estimates of gross domestic product and its components; these estimates were released on January 30, 2003, and include the "advance" estimates for the fourth quarter of 2002.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly. In most of these tables, annual estimates are also shown.

The news release on gross domestic product is available within minutes of the time of release, and the "Selected NIPA Tables" are available later that day, on BEA's Web site <www.bea.gov>.

The "Selected NIPA Tables" are also available on printouts or diskettes from BEA. To order NIPA subscription products, call the BEA Order Desk at 1-800-704-0415 (outside the United States, 202-606-9666).

S. Summary Tables

Table S.1. Summary of Percent Change From Preceding Period in Real Gross Domestic Product and Related Measures
(Percent)

	2001	2002	Seasonally adjusted at annual rates				
			2001	2002			
				IV	I	II	III
Gross domestic product..	.3	2.4	2.7	5.0	1.3	4.0	.7
Personal consumption expenditures.....	2.5	3.1	6.0	3.1	1.8	4.2	1.0
Durable goods.....	6.0	7.4	33.6	-6.3	2.0	22.8	-7.3
Nondurable goods.....	2.0	3.1	3.6	7.9	-1	1.0	3.9
Services.....	2.0	2.2	2.1	2.9	2.7	2.3	1.3
Gross private domestic investment.....	-10.7	.5	-17.3	18.2	7.9	3.6	-.7
Fixed investment.....	-3.8	-3.2	-8.9	-5	-1.0	-.3	3.1
Nonresidential.....	-5.2	-5.8	-10.9	-5.8	-2.4	-.8	1.5
Structures.....	-1.7	-16.4	-30.1	-14.2	-17.6	-21.4	-9.3
Equipment and software.....	-6.4	-1.8	-2.5	-2.7	3.3	6.7	5.0
Residential.....	.3	3.8	-3.5	14.2	2.7	1.1	6.8
Change in private inventories.....							
Net exports of goods and services.....	-5.4	-1.3	-9.6	3.5	14.3	4.6	-1.7
Exports.....	-5.9	-3.3	-7.9	-3.4	15.9	4.1	-6.7
Goods.....	-4.0	3.4	-13.8	21.7	10.7	5.9	10.3
Services.....	-2.9	3.5	-5.3	8.5	22.2	3.3	3.7
Imports.....	-3.3	3.7	-3.3	3.7	27.9	3.4	2.7
Goods.....	-5	1.9	-16.5	35.7	-2.1	3.1	8.6
Services.....							
Government consumption expenditures and gross investment.....	3.7	4.4	10.5	5.6	1.4	2.9	4.6
Federal.....	4.8	7.4	13.5	7.4	7.5	4.3	10.1
National defense.....	5.0	9.3	14.3	11.6	7.8	6.9	11.2
Nondefense.....	4.5	4.2	12.1	.4	6.9	-.3	8.3
State and local.....	3.1	2.9	8.9	4.6	-1.7	2.2	1.7
Addenda:							
Final sales of domestic product.....	1.5	1.8	4.2	2.4	-.1	3.4	1.3
Gross domestic purchases..	.4	2.9	2.9	5.6	2.6	3.9	1.4
Final sales to domestic purchasers.....	1.6	2.3	4.3	3.0	1.3	3.3	1.9
Gross national product.....	.2		3.7	3.7	.4	4.4	
Disposable personal income	1.8	4.5	-7.6	14.5	3.9	3.1	2.6

NOTE: Percent changes from preceding period in the current-dollar and price measures for these series are shown in table 8.1.

Table S.2. Summary of Contributions to Percent Change in Real Gross Domestic Product

	2001	2002	Seasonally adjusted at annual rates				
			2001	2002			
				IV	I	II	III
Percent change at annual rate:							
Gross domestic product.....	.3	2.4	2.7	5.0	1.3	4.0	.7
Percentage points at annual rates:							
Personal consumption expenditures.....	1.67	2.12	4.05	2.22	1.22	2.93	.67
Durable goods.....	.48	.60	2.45	-.55	.16	1.74	-.64

Change in private inventories.....	-61.4	-5	-98.4	-28.9	4.9	18.8	3.3
Net exports of goods and services	-415.9	-482.2	-425.3	-446.6	-487.4	-488.0	-506.9
Exports.....	1,076.1	1,061.7	1,021.8	1,030.6	1,065.5	1,077.7	1,073.0
Goods.....	785.2	759.4	744.6	738.1	765.8	773.5	760.3
Services.....	292.0	301.9	278.2	292.2	299.7	304.0	311.6
Imports.....	1,492.0	1,543.9	1,447.2	1,477.1	1,552.9	1,565.7	1,579.9
Goods.....	1,270.5	1,317.2	1,238.7	1,250.0	1,329.2	1,340.3	1,349.2
Services.....	222.4	226.6	208.9	225.5	224.3	226.0	230.7
Government consumption expenditures and gross investment	1,640.4	1,712.8	1,674.5	1,697.3	1,703.3	1,715.6	1,735.1
Federal.....	570.6	612.9	587.2	597.8	608.7	615.1	630.2
National defense.....	366.0	400.0	378.0	388.5	395.8	402.5	413.3
Nondefense.....	204.4	213.0	209.1	209.3	212.9	212.7	217.0
State and local.....	1,069.4	1,100.0	1,087.1	1,099.3	1,094.7	1,100.6	1,105.3
Residual.....	22.6	19.5	20.2	20.2	25.1	12.1	20.3

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Percent changes from preceding period for selected items in this table are shown in table 8.1; contributions to the percent change in real gross domestic product are shown in table 8.2.

Chain-type quantity indexes for the series in this table are shown in table 7.1.

Table 1.9. Relation of Gross Domestic Product, Gross National Product, Net National Product, National Income, and Personal Income
[Billions of dollars]

	2001	2002	Seasonally adjusted at annual rates				
			2001	2002			
			IV	I	II	III	IV

Plus: Income receipts from the rest of the world	292.0		247.4	242.8	251.8	261.3	
Less: Income payments to the rest of the world	269.2		213.1	239.2	268.2	269.5	
Equals: Gross national product	9,237.3		9,283.5	9,367.5	9,376.7	9,477.9	
Less: Consumption of fixed capital	1,320.8	1,399.9	1,333.5	1,357.9	1,390.9	1,417.0	1,433.8
Private	1,110.7	1,184.5	1,122.2	1,144.8	1,176.2	1,200.9	1,216.1
Government	210.9	216.6	212.1	214.0	215.8	217.5	219.1
General government	179.2	185.4	181.5	183.2	184.7	186.1	187.5
Government enterprises	31.7	31.2	30.6	30.9	31.1	31.3	31.6
Equals: Net national product	7,928.1		7,961.1	8,022.0	8,001.6	8,078.2	
Addenda:							
Gross domestic income ¹	9,321.7		9,369.5	9,463.1	9,541.7	9,594.2	
Gross national income ²	9,344.5		9,404.2	9,467.4	9,526.0	9,586.6	
Net domestic product	7,905.4	8,052.1	7,926.7	8,017.7	8,017.0	8,085.5	8,088.2

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.

2. Gross national income deflated by the implicit price deflator for gross national product.

NOTE: Except as noted in footnotes 1 and 2, chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

The chain-type quantity index for gross national product is shown in table 7.3.

Table 1.11. Command-Basis Real Gross National Product
[Billions of chained (1996) dollars]

Gross national product	9,237.3		9,283.5	9,367.5	9,376.7	9,477.9	
Less: Exports of goods and services and income receipts from the rest of the world	1,366.5		1,264.7	1,268.0	1,311.9	1,334.2	
Plus: Command-basis exports of goods and services and income receipts from the rest of the world ¹	1,410.0		1,314.9	1,321.2	1,345.6	1,365.6	
Equals: Command-basis gross national product	9,280.9		9,333.7	9,420.6	9,410.3	9,509.3	
Addendum:							
Terms of trade ²	103.2		104.0	104.2	102.6	102.4	

1. Exports of goods and services and income receipts deflated by the implicit price deflator for imports of goods and services and income payments.

2. Ratio of the implicit price deflator for exports of goods and services and income receipts to the corresponding implicit price deflator for imports divided by 100.

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Percent changes from preceding period for gross national product are shown in table 8.1.

Chain-type quantity indexes for the series in this table are shown in table 7.3.

Table 1.14. National Income by Type of Income
[Billions of dollars]

	2001	2002	Seasonally adjusted at annual rates				
			2001		2002		
			IV	I	II	III	IV
National income	8,122.0	8,196.8	8,268.5	8,328.0	8,388.1		
Compensation of employees	5,874.9	5,998.8	5,860.9	5,908.4	5,963.9	6,026.6	6,096.4

Capital consumption adjustment.....	73.6	136.7	187.4	161.3	140.6	126.4	118.7
Net interest.....	196.8		199.5	191.4	194.6	194.3	
Billions of chained (1996) dollars							
Gross product of nonfinancial corporate business	5,141.8	5,189.3	5,231.3	5,298.7	5,348.0		
Consumption of fixed capital ²	671.9	720.8	681.0	695.2	715.4	731.4	741.2
Net product ³	4,469.9	4,508.4	4,536.0	4,583.3	4,616.6		

1. Effective November 26, 2002, the estimates of chained-dollar gross product of nonfinancial corporate business beginning with 1999 have been revised to reflect the 2002 annual revision to the gross product price index for nonfinancial industries.
 2. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100.
 3. Chained-dollar net product of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

3. Government Current Receipts and Expenditures

Addendum:							
Compensation of general government employees ³	144.3	155.3	144.6	153.6	155.9	156.8	154.9

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all general government employees is shown in the addendum.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the line in the addendum.

Chain-type indexes for the series in this table are shown in table 7.12. See footnotes to table 3.10.

4. Foreign Transactions

Other structures	146.9	151.5	145.1	149.6	151.0	151.3	154.2
Equipment	9.5	9.7	9.6	9.7	9.7	9.7	9.8
Residual	-62.2	-99.5	-68.0	-81.1	-90.0	-111.6	-116.4

1. Includes new computers and peripheral equipment only. Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component; accurate estimates of these contributions are shown in table 8.4.

2. Excludes software "embedded," or bundled, in computers and other equipment.

Note. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Chain-type quantity indexes for the series in this table are shown in table 7.6.

Contributions to the percent change in real private fixed investment are shown in table 8.4.

Table 5.10B. Change in Private Inventories by Industry

[Billions of dollars]

	2001	2002	Seasonally adjusted at annual rates				
			2001		2002

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS). Chained (1996) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. This series is derived from the Census Bureau series "current cost inventories."
 2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS).

Nonfarm inventories to final sales of goods and structures.....	3.44	3.42	3.49	3.48	3.48

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in the private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS).

Table 5.13B. Real Private Inventories and Real Domestic Final Sales by Industry

Nonfarm inventories to final sales of goods and structures.....	3.64	3.60	3.64	3.61	3.62

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross product of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE: Estimates in this table are based on the North American Industry Classification System (NAICS). Chained (1996) dollar inventory series are calculated to ensure that the chained (1996) dollar change in inventories for 1996 equals the current-dollar change in inventories for 1996 and that the average of the 1995 and 1996 end-of-year chain-weighted and fixed-weighted inventories are equal. Chained (1996) dollar final sales are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines for inventories.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.

1. Includes new computers and peripheral equipment only.
2. Excludes software "embedded," or bundled, in computers and other equipment.

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.

3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software. The compensation of all

general government employees is shown in the addenda.

4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.

5. Beginning with 2001, in accordance with the Consolidated Appropriations Act of 2001, includes compensation of employees of Indian tribal governments reclassified from the private sector.

Personal consumption expenditures less food and energy.....	2.35	2.76	5.81	1.78	1.94	4.07	.54

1. Consists of gasoline, fuel oil, and other energy goods, and of electricity and gas.
 Note: The quantity indexes on which the estimates in this table are based are shown in table 7.4. The estimates in this table differ from those in table 8.2 because this table shows contributions to real personal consumption expenditures, whereas table 8.2 shows contributions to real gross domestic product.

1. Excludes software "embedded," or bundled, in computers and other equipment.

2. For some components of final sales of computers, includes computer parts.

Note: The quantity indexes on which the estimates in this table are based are shown in tables 7.1, 7.2, 7.4, 7.6, 7.9, 7.11, and 7.17.

Table 8.4. Contributions to Percent Change in Real Private Fixed Investment by Type

Other.....	.07	.24	.86	-2.16	2.32	.69	-.04
Imports of services¹	-.08	.48	-2.54	5.31	-1.10	.52	1.44

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment were reclassified from goods to services.
 NOTE: The quantity indexes on which the estimates in this table are based are shown in table 7.10. The estimates in this table differ from those in table 8.2 because this table shows contributions to real exports and to real imports, whereas table 8.2 shows contributions to real gross domestic product. Because imports are subtracted in the calculation of gross domestic product, the contributions of components of real imports have opposite signs in this table and in table 8.2.

Equipment and software.....	.16	-.05	-.06	-.25	-.07	.02	-.06

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.
 2. Consumption expenditures for durable goods excludes expenditures classified as investment, except for goods transferred to foreign countries by the Federal Government.
 3. Compensation of government employees engaged in new own-account investment and related expenditures for goods and services are classified as investment in structures and in software.
 4. Consumption of fixed capital, or depreciation, is included in government consumption expenditures as a partial measure of the value of the services of general government fixed assets; use of depreciation assumes a zero net return on these assets.
 NOTE: The quantity indexes on which the estimates in this table are based are shown in table 7.11. The estimates in this table differ from those in table 8.2 because this table shows contributions to real government consumption expenditures and gross investment, whereas table 8.2 shows contributions to real gross domestic product.

Addenda:							
Final sales of motor vehicles to domestic purchasers	432.5	445.2	465.4	425.2	430.0	471.8	453.7
Private fixed investment in new autos and new light trucks	143.8	140.2	140.5	130.4	137.6	143.7	149.0
Domestic output of new autos ²	108.4	114.7	107.5	112.7	118.1	121.9	106.1
Sales of imported new autos ³	84.6	87.7	88.0	83.7	85.1	92.3	89.5

1. Except for exports and imports, consists of new trucks only.
 2. Consists of final sales and change in private inventories of new autos assembled in the United States.
 3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

Note. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Chain-type quantity indexes for the series in this table are shown in table 7.18B.

^rPreliminary.

^pRevised.

1. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.

2. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized

population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates.

Source: U.S. Bureau of Economic Analysis.

Annual Estimates

Except as noted for table B.3 below, these tables are derived from the NIPA tables that were published in the August and September 2002 issues of the SURVEY OF CURRENT BUSINESS, and the estimates reflect the most recent comprehensive and annual NIPA revisions.

1. The current-dollar statistical discrepancy equals gross domestic product (GDP) measured as the sum of expenditures less gross domestic income—that is, GDP measured as the costs incurred and profits earned in domestic production. The chained (1996) dollar statistical discrepancy equals the current-dollar statistical discrepancy deflated by the implicit price deflator for gross domestic business product.

2. Equals GDP in chained (1996) dollars less the statistical discrepancy and the sum of GDP by industry of the

detailed industries. The value of not allocated by industry reflects the nonadditivity of chained-dollar estimates and the differences in source data used to estimate real GDP by industry and the expenditures measure of real GDP.

NOTE: Estimates are based on the 1987 Standard Industrial Classification. The table is derived from tables 1 and 6 in "Gross Domestic Product by Industry for 1999–2001" in the November 2002 SURVEY.

* Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component.

- Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.
- Includes luggage.
- Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.
- Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
- Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
- Consists of transient hotels, motels, clubs, schools, and other group housing.
- Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.
- Includes such house furnishings as floor coverings, comforters, quilts, blankets, pillows, picture frames, mirrors, art products, portable lamps, and clocks. Also includes writing equipment and hand, power, and garden tools.
- Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.
- Consists of maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and express charges, premiums for fire and theft insurance on personal property less benefits and dividends, and miscellaneous household operation services.
- Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
- Consists of osteopathic physicians, chiropractors, private duty nurses, chiropodists, podiatrists, and others providing health and allied services, not elsewhere classified.
- Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.
- Consists of (1) premiums, less benefits and dividends, for health, hospitalization, and accidental death and dismemberment insurance provided by commercial insurance carriers, and (2) administrative expenses (including consumption of fixed capital) of nonprofit and self-insured health plans.
- Consists of premiums, less benefits and dividends, for income loss insurance.
- Consists of premiums, less benefits and dividends, for privately administered workers' compensation.
- Consists of (1) operating expenses of commercial life insurance carriers, (2) administrative expenses of private noninsured pension plans and publicly administered government employee retirement plans, and (3) premiums, less benefits and dividends, of fraternal benefit societies. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies. For pension and retirement plans, excludes services furnished without payment by banks, credit agencies, and investment companies.

18. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.

- Consists of premiums, less benefits and dividends, for motor vehicle insurance.
 - Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, and airport bus fares.
 - Consists of admissions to professional and amateur athletic events and to racetracks.
 - Consists of dues and fees excluding insurance premiums.
 - Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; sightseeing buses and guides; private flying operations; casino gambling; and other commercial participant amusements.
 - Consists of net receipts of lotteries and expenditures for purchases of pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video cassette rentals, and recreational services, not elsewhere classified.
 - For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.
 - For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.
 - Consists of (1) fees paid to commercial, business, trade, and correspondence schools and for educational services, not elsewhere classified, and (2) current expenditures (including consumption of fixed capital) by research organizations and foundations for education and research.
 - For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious, social welfare, foreign relief, and political organizations, museums, libraries, and foundations. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and excludes relief payments within the United States and expenditures by foundations for education and research. For proprietary and government institutions, equals receipts from users.
 - Beginning with 1981, includes U.S. students' expenditures abroad; these expenditures were \$0.3 billion in 1981.
 - Beginning with 1981, includes nonresidents' student and medical care expenditures in the United States; student expenditures were \$2.2 billion and medical expenditures were \$0.4 billion in 1981.
- Note. Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.)
 Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Residual.....				-9	-9	-1.0

1. Consists of office buildings, except those constructed at industrial sites and those constructed by utilities for their own use.
 2. Consists of stores, restaurants, garages, service stations, warehouses, mobile structures, and other buildings used for commercial purposes.
 3. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.
 4. Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.
 5. Consists primarily of dormitories and of fraternity and sorority houses.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Equals: Private fixed investment in new equipment and software	932.6	992.7	912.4			

1. Includes new computers and peripheral equipment only. Because of rapid changes in relative prices, the chained-dollar estimates for computers are especially misleading as a measure of the contribution or relative importance of this component.
 2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

n.e.c. Not elsewhere classified.

1. Beginning with 2001, reflects the reclassification of employees of Indian tribal governments from the private sector in accordance with the Consolidated Appropriations Act of 2001.

2. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.

3. Consists of museums, botanical and zoological gardens; engineering and management services; and services, not elsewhere classified.

4. Includes Coast Guard.

5. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

Note. Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

1. Equals the number of full-time equivalent employees plus the number of self-employed persons. Unpaid family workers are not included.

2. Beginning with 2001, reflects the reclassification of employees of Indian tribal governments from the private sector in accordance with the Consolidated Appropriations Act of 2001.

3. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.

4. Consists of museums, botanical and zoological gardens; engineering and management services; and

services, not elsewhere classified.

5. Includes Coast Guard.

6. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE: Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to average weekly hours per employee on full-time schedules.

2. Beginning with 2001, reflects the reclassification of employees of Indian tribal governments from the private sector in accordance with the Consolidated Appropriations Act of 2001.

3. Reflects the reclassification of air couriers from trucking and warehousing to transportation by air.

4. Consists of museums, botanical and zoological gardens; engineering and management services; and services, not elsewhere classified.

5. Includes Coast Guard.

6. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

NOTE: Estimates in this table are based on the 1987 Standard Industrial Classification (SIC).

Table B.10. Farm Sector Output, Gross Product, and National Income

	Billions of dollars			Billions of chained (1996) dollars		
	1999	2000	2001	1999	2000	2001
Farm output	207.5	214.3	221.3	244.1	249.2	246.1
Cash receipts from farm marketings	191.4	199.4	200.9	226.2	233.4	224.4

Farm housing	7.2	7.6	8.0	6.1	6.0	5.9
Farm products consumed on farms5	.6	.6	.5	.5	.5
Other farm income	9.9	8.9	10.3	11.8	10.6	12.2
Change in farm inventories	-1.5	-2.2	1.6	-2.0	-2.5	2.0
Crops	-9	-1.6	2.1	-1.4	-2.2	3.6
Livestock	-6	-6	-5	-6	-6	-4
Less: Intermediate goods and services purchased	132.3	136.5	140.7	137.2	133.3	134.6
Intermediate goods and services, other than rent	118.6	122.2	126.1	123.1	119.5	120.8
Rent paid to nonoperator landlords	13.8	14.2	14.7	14.1	13.8	13.8
Equals: Gross farm product	75.2	77.8	80.6	108.1	120.5	114.3
Less: Consumption of fixed capital	28.9	28.7	29.4	27.7	27.0	27.3
Equals: Net farm product	46.3	49.2	51.2	80.9	97.9	89.5
Less: Indirect business tax and nontax liability	5.3	5.4	5.6
Plus: Subsidies to operators	18.4	19.5	17.7
Equals: Farm national income	59.3	63.3	63.2
Compensation of employees	19.3	19.3	21.5
Wage and salary accruals	16.5	16.6	18.4
Supplements to wages and salaries	2.9	2.7	3.1
Proprietors' income and corporate profits with inventory valuation and capital consumption adjustments	29.6	33.2	30.9
Proprietors' income	27.7	22.6	19.0
Corporate profits	1.9	10.6	11.8
Net interest	10.3	10.9	10.8

NOTE: Chained (1996) dollar series are calculated as the product of the chain-type quantity index and the 1996 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Table B.11. Housing Sector Output, Gross Product, and National Income

	Billions of dollars			Billions of chained (1996) dollars		
	1999	2000	2001	1999	2000	2001

C. Historical Measures

This table is derived from the "GDP and Other Major NIPA Series" tables that were published in the August 2002 issue of the SURVEY OF CURRENT BUSINESS and from the "Selected NIPA Tables" that are published in this issue. (Changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1. GDP and Other Major NIPA Aggregates

[Quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	Billions of chained (1996) dollars			Percent change from preceding period		Chain-type price indexes		Implicit price deflators		Percent change from preceding period			
	Gross domestic product	Final sales of domestic product	Gross national product	Gross domestic product	Final sales of domestic product	Gross domestic product	Gross domestic purchases	Gross domestic product	Gross national product	Chain-type price indexes		Implicit price deflators	
										Gross domestic product	Gross domestic purchases	Gross domestic product	Gross national product

Table F.4. Private Services Transactions

[Millions of dollars]

Main data table with columns for Line, 2001, and Not/Seasonally adjusted 2001/2002.

3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States and film and television tape rentals. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.

Source: Table 3 in "U.S. International Transactions, Third Quarter 2002" in the January 2003 issue of the Survey of Current Business.

Footnotes to Tables F.2. and F.3.

Footnotes to Tables F.2 and F.3:

1. Credits, +; Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

other transactions arranged with or through foreign official agencies; see table 4.
12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

Additional footnotes to Table F.3:

14. The "European Union" includes the "European Union (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

^a Preliminary.

^r Revised.

¹ Represents gains or losses on foreign-currency-denominated assets due to their revaluation at current exchange rates.

² Includes changes in coverage, statistical discrepancies, and other adjustments to the value of assets.

³ Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

⁴ Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.

⁵ Also includes paid-in capital subscriptions to international financial institutions and resources provided to foreigners under foreign assistance programs requiring repayment over several years. Excludes World War I debts that are not being serviced.

⁶ Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

⁷ Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

NOTE: In this table, unlike in the international transactions accounts, income and capital inflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 2001" in the September 2002 issue of the SURVEY OF CURRENT BUSINESS.

Table G.5. Selected Financial and Operating Data of Nonbank U.S. Affiliates and Majority-Owned Nonbank U.S. Affiliates of Foreign Companies by Country of Ultimate Beneficial Owner and by Industry of Affiliate, 2000

* Less than \$500,000.

1. The industry classification system used to classify the data for U.S. affiliates is based on the North American Industry Classification System. Prior to 1997, the affiliate data were classified using an industry classification system based on the Standard Industrial Classification system.

Notes. The data in this table are from BEA's annual survey of the operations of U.S. affiliates of foreign companies; see "U.S. Affiliates of Foreign Companies: Operations in 2000," in the August 2002 issue of the Survey of Current Business.
Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

H. International Perspectives

The quarterly data in this table are shown in the middle month of the quarter.

1. All exchange rates are from the Board of Governors of the Federal Reserve System.

2. Rates for selected euro-area currencies can be derived by using the following conversion rates: 1 euro = 6.55957 French francs, 1.93626 German marks, and 1936.27 Italian lire.

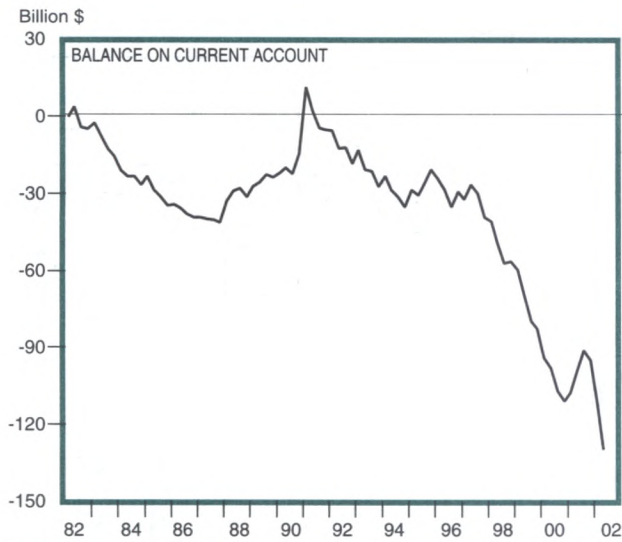

3. The rate shown for the United States is an index of the weighted average of the foreign exchange value of the U.S. dollar against the currencies of a broad group of major U.S. trading partners, January 1997=100. For more information on the exchange rate indexes, see "New Summary Measures of the Foreign Exchange Value of the Dollar," *Federal Reserve*

Bulletin, vol. 84 (October 1998), pp. 811-18.

Note: U.S. interest rates, unemployment rates, and GDP growth rates are from the Federal Reserve, the Bureau of Labor Statistics, and BEA, respectively. GDP growth rates for other countries are calculated from levels published by those countries. Most other data (including U.S. consumer prices and U.S. share prices, both of which have been rebased to 1995 to facilitate comparison) are © OECD and are reproduced with permission.

Regional Data

J. State and Regional Tables

The tables in this section include the most recent estimates of State personal income and gross state product. The sources of these estimates are noted.

The quarterly and annual estimates of State personal income and the estimates of gross state product are available on CD-ROM. For information on State personal income, e-mail reis.remd@bea.gov; write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5360. For information on gross state product, e-mail gspread@bea.gov; write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5340.

1. Per capita personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

Note: The personal income level shown for the United States is derived as the sum of the State estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the

estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Source: Table 1 "State Personal Income, Revised Estimates for 1999-2001" in the October 2002 issue of the SURVEY OF CURRENT BUSINESS.

Note: Totals shown for the United States differ from the national income and product account estimates of gross domestic product (GDP) because GSP is derived from gross domestic income, which differs from GDP by the statistical discrepancy. In addition, GSP excludes and GDP includes the compensation of Federal civilian and military personnel

stationed abroad and government consumption of fixed capital for military structures located abroad and for military equipment, except office equipment. Also, GSP and GDP have different revision schedules.
 Source: This table reflects the GSP estimates for 2000 that were released on June 10, 2002. Detailed estimates are available on BEA's Web site at <www.bea.gov> under "State and local area data."

K. Local Area Table

Table K.1. Personal Income and Per Capita Personal Income by Metropolitan Area, 1998-2000

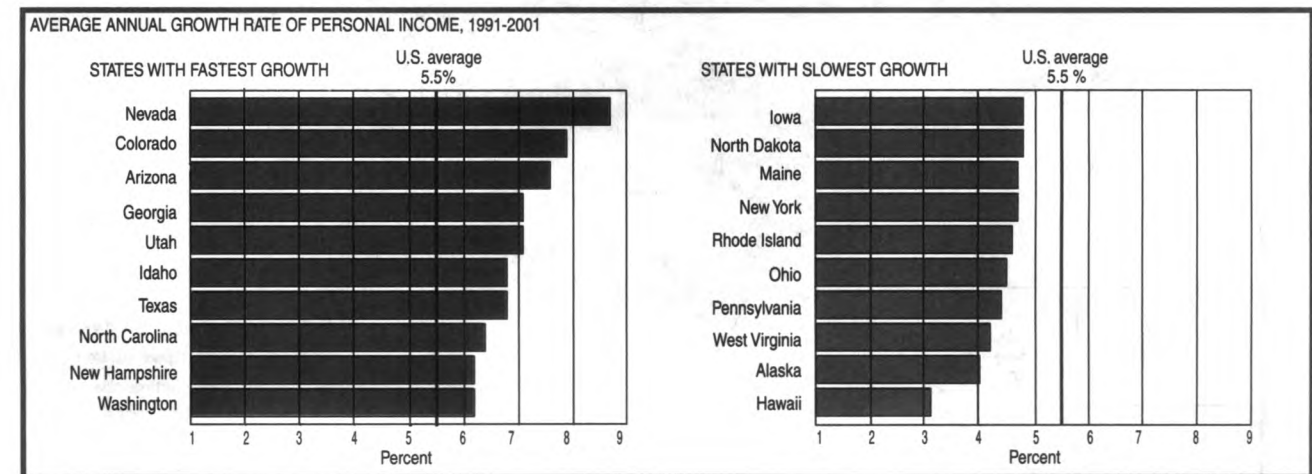

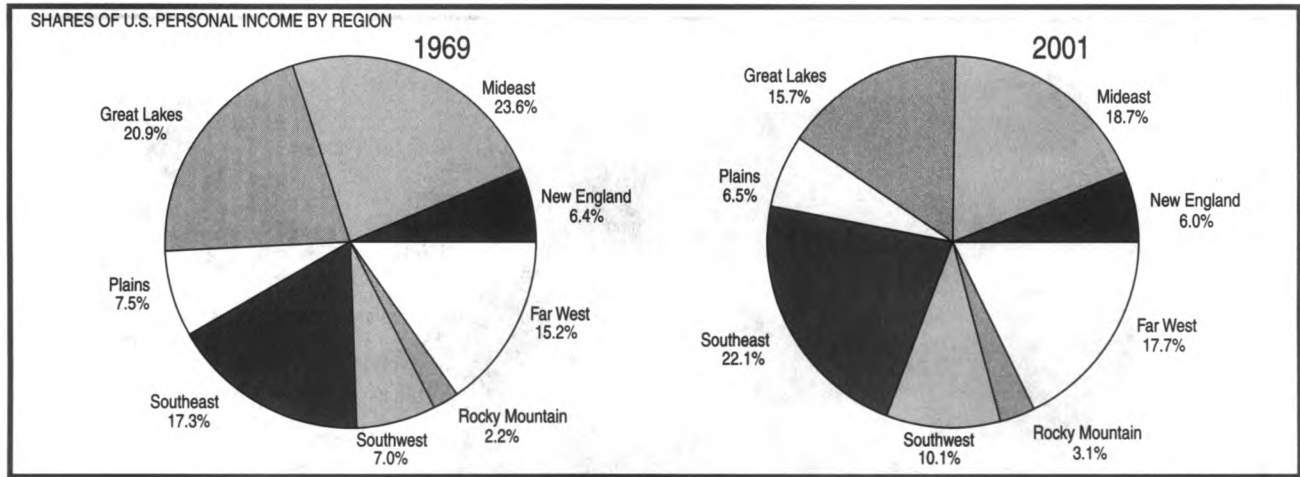

Area name	Personal income				Per capita personal income ¹				Rank in U.S.	Area name	Personal income				Per capita personal income ¹			
	Millions of dollars			Percent change ²	Dollars			Rank in U.S.			Millions of dollars			Percent change ²	Dollars			Rank in U.S.

Additional Information About the NIPA Estimates

Statistical Conventions

Changes in current-dollar GDP measure changes in the market value of goods and services produced in the economy in a particular period. For many purposes, it is necessary to decompose these changes into quantity and price components. To compute the quantity indexes, changes in the quantities of individual goods and services are weighted by their prices. (Quantity changes for GDP are often referred to as changes in “real GDP.”) For the price indexes, changes in the prices for individual goods and services are weighted by quantities produced. (In practice, the current-dollar value and price indexes for most GDP components are determined largely using data from Federal Government surveys, and the real values of these components are calculated by deflation at the most detailed level for which all the required data are available.)

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP in 1997–98 uses prices for 1997 and 1998 as weights, and the 1997–98 annual percent change in the GDP price index uses quantities for 1997 and 1998 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula.¹ These annual changes are “chained” (multiplied) together to form time series of quantity and price; the percent changes that are calculated from these time series are not affected by the choice of reference period.

The quarterly changes in quantities and prices are calculated with weights from two adjacent quarters. As part of an annual or comprehensive revision, the quarterly indexes through the most recent complete year are adjusted to ensure that the average of the quarterly indexes conforms to the corresponding annual index.

In addition, BEA prepares measures of real GDP and its components in a dollar-denominated form, designated “chained (1996) dollar estimates.” These estimates are computed by multiplying the 1996 current-dollar value of GDP, or of a GDP component, by the corresponding quantity index number. For example, if a current-dollar GDP component equaled \$100 in 1996 and if real output for this component increased by 10 percent in 1997, then the “chained (1996) dollar” value of this com-

ponent in 1997 would be \$110 ($\100×1.10). Note that percentage changes in the chained (1996) dollar estimates and the percentage changes calculated from the quantity indexes are identical, except for small differences due to rounding.

Because of the formula used for calculating real GDP, the chained (1996) dollar estimates for detailed GDP components do not add to the chained-dollar value of GDP or to any intermediate aggregates. A “residual” line is shown as the difference between GDP and the sum of the most detailed components shown in each table. The residual generally is small close to the base period but tends to become larger as one moves further from it. Accurate measures of component contributions to the percentage changes in real GDP and its major components are shown in NIPA tables 8.2–8.6.

BEA also publishes the “implicit price deflator” (IPD), which is calculated as the ratio of current-dollar value to the corresponding chained-dollar value, multiplied by 100; the values of the IPD and of the corresponding “chain-type” price index are very close.

For quarters and months, the estimates are presented at annual rates, which show the value that would be registered if the rate of activity measured for a quarter or a month were maintained for a full year. Annual rates are used so that time periods of different lengths—for example, quarters and years—may be compared easily. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

Percent changes in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_o} \right)^{m/n} - 1 \right] \times 100,$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_o is the level of activity in the earlier period; m is the periodicity of the data (for example, 1 for annual data, 4 for quarterly, or 12 for monthly); and n is the number of periods between the earlier and later periods (that is, $t - o$).

Quarterly and monthly NIPA estimates are seasonally adjusted, if necessary. Seasonal adjustment removes from the time series the average impact of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

1. In addition, because the changes in quantities and prices calculated using these weights are symmetric, the product of a quantity index and the corresponding price index is generally equal to the current-dollar index.

Reconciliation Tables

Table 1. Reconciliation of Changes in BEA-Derived Compensation Per Hour with BLS Average Hourly Earnings
[Percent change from preceding period]

	2001	2002	Seasonally adjusted at annual rates					
			2001		2002			
			III	IV	I	II	III	IV ^p
BEA-derived compensation per hour of all persons in the nonfarm business sector (less housing)¹	2.7	2.8	1.0	1.5	2.9	3.9	5.0	4.9
<i>Less:</i> Contribution of supplements to wages and salaries per hour	0.3	0.6	0.1	0.1	1.4	0.9	0.5	0.6
<i>Plus:</i> Contribution of wages and salaries per hour of persons in housing and in nonprofit institutions	0.0	0.0	0.0	-0.5	0.2	0.1	0.1	-0.1
<i>Less:</i> Contribution of wages and salaries per hour of persons in government enterprises, unpaid family workers, and self-employed	0.0	0.0	-0.4	0.2	0.0	0.0	0.1	-0.1
Equals: BEA-derived wages and salaries per hour of all employees in the private nonfarm sector	2.5	2.1	1.3	0.7	1.8	3.1	4.5	4.3
<i>Less:</i> Contribution of wages and salaries per hour of nonproduction workers in manufacturing	-0.1	0.0	0.0	0.2	-0.2	0.0	0.2	0.0
<i>Less:</i> Other differences ²	-1.5	-1.1	-2.5	-3.2	-1.0	0.7	1.1	0.9
Equals: BLS average hourly earnings of production or nonsupervisory workers on private nonfarm payrolls	4.1	3.2	3.8	3.8	3.0	2.4	3.2	3.4
Addendum:								
BLS estimates of compensation per hour in the nonfarm business sector ³	2.7	1.0	1.5	2.9	3.9	4.9

^p Preliminary.

1. Includes BLS data on compensation and hours of nonfarm proprietors and hours worked of unpaid family workers.

2. Includes BEA use of non-BLS data and differences in detailed weighting. Annual estimates also include differences in BEA and BLS benchmark procedures; quarterly estimates also include differences in seasonal

adjustment procedures.

3. These estimates differ from the BEA-derived estimates (first line) because the BLS estimates include compensation and hours of tenant-occupied housing.

BLS Bureau of Labor Statistics

Table 2. Relation of Net Exports of Goods and Services and Net Receipts of Income in the NIPA's to Balance on Goods and Services and Income in the ITA's

[Billions of dollars]

1. Consists of statistical revisions in the NIPA's that have not yet been incorporated into the ITA's (2002:III) and statistical revisions in the ITA's that have not yet been incorporated into the NIPA's (2002:I-2002:III).

ITA's: International transactions accounts
NIPA's: National income and product accounts

Appendix B

Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. In addition, most of this information is available on BEA's Web site at <www.bea.gov>. Look under "Methodologies"; for articles from the SURVEY OF CURRENT BUSINESS, look under "Publications."

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of wealth and related estimates.

National income and product accounts (NIPA's). This series of papers documents the conceptual framework of the NIPA's and the methodologies that have been used to prepare the estimates.

An Introduction to National Economic Accounting (1985) [also in the March 1985 SURVEY]

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (1985) [An updated version (March 2002) is available on BEA's Web site.]

Foreign Transactions (1987)

GNP: An Overview of Source Data and Estimating Methods (1987)

Government Transactions (1988)

Personal Consumption Expenditures (1990)

The methodologies described in these papers have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPA's. For more information, see the following.

National Income and Product Accounts of the United States, 1929-97 (2001) provides the definitions of the major NIPA aggregates and components, discusses the measures of real output and prices, explains how production is classified and how the NIPA's are presented, describes the statistical conventions that are used, and lists the principal source data and methods that are used to prepare the estimates of gross domestic product (GDP). [Go to <www.bea.gov/bea/an/nipaguid.htm>.]

Information about the sources and methods that are used to prepare the national estimates of personal income, which are the basis for the State estimates, is in *State Personal Income, 1929-97* (1999).

In addition, see the following articles in the SURVEY.

"Updated Summary NIPA Methodologies" (October 2002) briefly describes the principal source data and methods used to prepare the current-dollar and real estimates of GDP.

"Annual Revision of the National Income and Product Accounts" (August 2002).

"BEA's Chain Indexes, Time Series, and Measures of Long-Term Economic Growth" (May 1997) is the most recent in a series of articles that describe the conceptual basis for the chain-type measures of real output and prices that are used in the NIPA's.

"Reliability of GDP and Related NIPA Estimates" (January 2002) evaluates the principal NIPA estimates by examining the record of revisions to them.

Wealth and related estimates. *Fixed Reproducible Tangible Wealth in the United States, 1925-94* (1999) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1925-98" (April 2000) describes the definitional and statistical improvements that were incorporated in the comprehensive revision of the estimates.

Industry accounts

The industry accounts consist of the estimates of gross domestic product by industry, the input-output accounts, and two satellite accounts.

Gross product by industry. "Improved Estimates of Gross Product by Industry for 1947-98" (June 2000) describes the most recent comprehensive revision of these estimates.

Mission Statement and Strategic Plan

The mission statement of the Bureau of Economic Analysis and the latest update to its strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at <www.bea.gov>. See also "BEA's Strategic Plan for 2001-2005" in the May 2002 issue of the SURVEY OF CURRENT BUSINESS.

“Gross Domestic Product by Industry for 1998–2000” (November 2001) describes the most recent annual revision of these estimates.

Input-output accounts. “Benchmark Input-Output Accounts for the U.S. Economy, 1997” (December 2002) presents the 1997 accounts and describes the improvements that were incorporated.

“Annual Input-Output Accounts of the U.S. Economy” presents annual tables that update the 1992 benchmark accounts

For 1996 (January 2000)

For 1997 (January 2001)

For 1998 (December 2001)

Satellite accounts. These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

“U.S. Transportation Satellite Accounts”

For 1992 (April 1998)

For 1996 (May 2000)

“U.S. Travel and Tourism Satellite Accounts”

For 1992 (July 1998)

For 1996 and 1997 (July 2000)

International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts (ITA's). *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (1990) describes the methodologies used to prepare the estimates in the ITA's and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the ITA's.

The annual revisions of the ITA's are described in a series of articles, the latest of which is published in the July 2002 SURVEY.

Direct investment. *International Direct Investment: Studies by the Bureau of Economic Analysis* (1999) is a collection of previously published articles on U.S. direct investment abroad and foreign direct investment in the United States. It also includes the following information.

The “Methodology for U.S. Direct Investment Abroad,” which is also available in *U.S. Direct Investment Abroad: 1994 Benchmark Survey, Final*

Results (1998)

“A Guide to BEA Statistics on U.S. Multinational Companies,” which is also available in the March 1995 SURVEY

“A Guide to BEA Statistics on Foreign Direct Investment in the United States,” which is also available in the February 1990 SURVEY

In addition, the updated methodology for foreign direct investment in the United States is available in *Foreign Direct Investment in the United States: Final Results From the 1997 Benchmark Survey* (2001)

International services. *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis* (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

“Selected Issues in the Measurement of U.S. International Services” (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services and explores possible actions to address these issues.

Regional accounts

The regional accounts include estimates of personal income and gross state product.

Personal income. Estimates of personal income are prepared for States and for local areas.

“Comprehensive Revision of State Personal Income for 1969–99” (June 2000) summarizes the changes in the methodology that is used to prepare the estimates. The detailed methodology is available on the CD-ROM *State Personal Income, 1929–2000*.

“Comprehensive Revision of Local Area Personal Income for 1969–98” (July 2000) summarizes the changes in the methodology that is used to prepare the estimates for counties and metropolitan areas. The detailed methodology is available on the CD-ROM *Regional Economic Information System, 1969–2000*.

Gross state product. “Comprehensive Revision of Gross State Product by Industry, 1977–94” (June 1997) summarizes the sources and the methods that are used to prepare the estimates. “Gross State Product by Industry, 1977–98” (October 2000) describes the most recent comprehensive revision of these estimates.
