SURVEY OF CURRENT BUSINESS

August 2008

Volume 88 • Number 8

1 GDP and the Economy: Advance Estimates for the Second Quarter of 2008

Real GDP increased 1.9 percent after increasing 0.9 percent in the first quarter. Prices of goods and services purchased by U.S. residents rose 4.2 percent after rising 3.5 percent, reflecting accelerating energy and food prices.

6 Annual Revision of the National Income and Product Accounts: Annual Estimates for 2005–2007 and Quarterly Estimates for the First Quarter of 2005 to the First Quarter of 2008

Annual revisions update the accounts by incorporating new data and various methodological improvements. From 2004 to 2007, real GDP growth was revised to 2.6 percent from 2.7 percent. This annual revision did not change the general picture of the economy over the past few years.

24 National Income and Product Accounts Tables

The revised annual, quarterly, and monthly statistics from the annual NIPA revision, including advance estimates for the second quarter of 2008 and June 2008.

161 GDP and Other Major NIPA Series for 1929—the Second Quarter of 2008

Historical statistics of GDP and its components in current dollars, chained dollars, and chain-type quantity and price indexes, including statistics on national income and personal income.

186 U.S. Affiliates of Foreign Companies: Operations in 2006

Growth in current-dollar value added of U.S. affiliates picked up in 2006, as existing affiliate operations expanded. Employment by affiliates also picked up.

Schedule of Upcoming News Releases (back cover)

Looking Ahead . . .

Fixed Assets and Consumer Durable Goods. Updated statistics that incorporate the results of the NIPA annual revision.

Metropolitan Area Personal Income. Advance estimates for 2007, including per capita personal income.

Director's Message

Every August, the SURVEY OF CURRENT BUSINESS provides an article discussing the annual revision of the gross domestic product (GDP) accounts, which is released in July. We're pleased to publish this year's article in a new, easier-to-read format.

Annual revisions allow for a wide range of more complete, previously unavailable information to be incorporated into the accounts. Several methodological improvements were also adopted this year, including new methods to value sales and inventory change of new autos, the use of new price indexes to deflate airline services and manufacturing structures, the use of scanner data to help estimate spending on goods at grocery stores, and a new method of estimating quarterly depreciation.

This year's annual revision resulted in a number of significant revisions but didn't meaningfully change the overall picture of the economy. From 2004 to 2007, real GDP growth was revised to 2.6 percent from 2.7 percent.

A reminder: in 2009, we'll be publishing a comprehensive revision of the GDP accounts, which will incorporate source data from the every-5-year Economic Census. In 2010, we'll begin "flexible annual revisions," a new approach that will expand the current 3-year period of annual revisions, making it easier to roll out major improvements. Previously, major improvements were reserved for comprehensive revisions, which occurred every 5 years. More information about the benefits of this approach is available in a *BEA Briefing* accessible at <www.bea.gov/scb/pdf/2008/06%20June/0608_flexible.pdf>.

Also in this issue, recent statistics detailing the domestic operations of U.S. affiliates of foreign companies are presented. The value added of majority-owned nonbank U.S. affiliates of foreign companies grew 12 percent in 2006—the fastest rate of increase since 2000.

J. Steven Landefeld
Director, Bureau of Economic Analysis

Taking Account...

Metro Area Disposable Personal Income, 2001–2004

While the Bureau of Economic Analysis (BEA) provides annual statistics on disposable personal income (DPI) for states, it does not provide DPI statistics for metropolitan areas on a regular basis because of the absence of regular estimates of personal taxes for metropolitan areas. (DPI is calculated as personal income less personal current taxes.)

Over the years, users of BEA regional data have voiced a need for metropolitan area DPI statistics. To that end, the BEA regional program developed a methodology to calculate DPI for metropolitan areas. In a recent working paper, BEA economist Ann E. Dunbar used this methodology to revise DPI statistics for the 363 metropolitan statistical areas for 2001–2004.

The basic methodology is as follows: because the basic units of metro areas are counties, county-level taxes by type of tax are estimated, allocated to state personal tax totals, and then summed to derive estimates for specific metro areas. Federal individual income taxes account for the majority of personal taxes (76 percent). Other personal tax types include state and local personal income taxes, motor vehicle taxes paid by persons, motor vehicle operator licenses, and other miscellaneous taxes. Personal current taxes do not include the real property taxes paid on owner-occupied homes.

According to the study, per capita personal taxes in the

United States were \$3,559 in 2004. (Per capita disposable personal income was \$29,530.)

Per capita taxes in 2004 ranged from a high of \$13,104 in Bridgeport, Stamford, and Norwalk, CT (Fairfield County) to a low of \$897 in McAllen, Edinburg, and Mission, TX (Hidalgo County).

BEA plans to update these statistics as critical source data, notably estimates on taxes by zip code, become available. Also, BEA plans to explore techniques to produce current estimates of metro area taxes. The lag on the Internal Revenue Service data is 2 years.

The working paper is available on the BEA Web site at <www.bea.gov/papers/working_papers.htm>.

BEA NIPA Handbook Now Available on Web site

BEA has released a new handbook, *Concepts and Methods of the U.S. National Income and Product Accounts*, on its Web site. The initial release includes the first four introductory chapters. Subsequent chapters will be released in the near future.

The introductory chapters describe the main concepts, definitions, classifications, and accounting issues that underlie the national income and product accounts (NIPAs). These chapters also describe the general sources and methods that are used to prepare the NIPA estimates.

Subsequent chapters will describe the sources and methods that are used to prepare the expenditure and income compo-

ponents of the accounts.

This handbook is intended to be a living document that will be updated to reflect changes as they are introduced into the NIPAs. It is available on the BEA Web site at <www.bea.gov/national/pdf/NIPAhandbookch1-4.pdf>.

The NIPA handbook is one of several BEA methodological references that explain key concepts and methods of BEA's national, regional, industry, and international accounts.

These references can be accessed at <www.bea.gov/methodologies/index.htm>.

Budget Impact on Regional Statistical Programs

The recently passed Consolidated Appropriations Act did not provide full funding for BEA's base programs for fiscal year 2008. In order to align base programs with the budget, BEA will reduce various statistical programs.

Some regional programs will be affected. While BEA does not foresee any impact on its GDP-by-state or state personal income programs, other programs will be affected, including BEA's local area personal income, GDP-by-metropolitan-area, and RIMS economic multiplier statistics.

For more information, please see <www.bea.gov/regional/pdf/08_budget_impact_web.pdf>.

For more about BEA programs in general, please visit <www.bea.gov/agency/availability_and_quality_of_data.htm>.

GDP and the Economy

Advance Estimates for the Second Quarter of 2008

ECONOMIC growth accelerated in the second quarter of 2008, according to the “advance” estimates of the national income and product accounts (NIPAs).¹ Real gross domestic product (GDP) increased 1.9 percent after increasing 0.9 percent in the first quarter (chart 1 and table 1).²

The acceleration primarily reflected a larger decrease in imports, an acceleration in exports, a smaller decrease in residential fixed investment, and an acceleration in consumer spending. In contrast, inventory investment decreased more than in the first quarter.³

- Prices of goods and services purchased by U.S. residents increased 4.2 percent in the second quarter after increasing 3.5 percent in the first quarter (page 3). Energy and food prices accelerated in the second quarter. Excluding food and energy, gross domestic purchases prices increased 2.2 percent in the second quarter, the same as in the first quarter.
- Real disposable personal income (DPI) increased 11.3 percent in the second quarter, following a decrease of 0.1 percent in the first quarter. A sharp acceleration in current-dollar DPI reflected a sharp acceleration in personal income and a sharp downturn in personal current taxes; both primarily reflected the rebates to individuals provided by the Economic Stimulus Act of 2008.⁴
- The personal saving rate was 2.6 percent in the second quarter; in the first quarter, it was 0.3 percent.

The NIPA estimates for the second quarter of 2008 and for 2005–2007 have been revised as part of the regular annual NIPA revision. See “Annual Revision of the National Income and Product Accounts” in this issue.

1. Each GDP estimate for a quarter (advance, preliminary, and final) incorporates increasingly comprehensive and improved source data. More information can be found at <www.bea.gov/bea/about/infoqual.htm> and <www.bea.gov/bea/faq/national/gdp_accuracy.htm>. Quarterly estimates are expressed at seasonally adjusted annual rates, which assumes that a rate of activity for a quarter is maintained for a year.

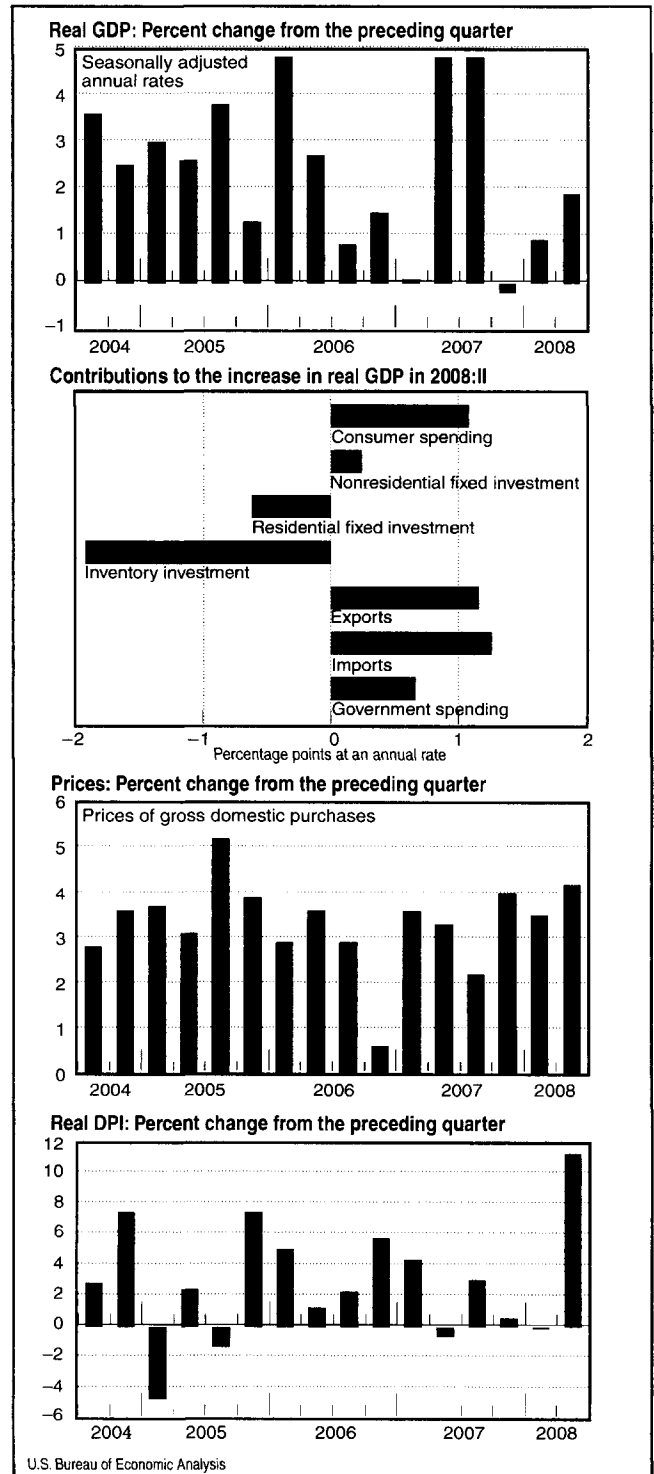

2. “Real” estimates are in chained (2000) dollars, and price indexes are chain-type measures.

3. In this article, “consumer spending” refers to the NIPA series “personal consumption expenditures,” “inventory investment” refers to “change in private inventories,” and “government spending” refers to “government consumption expenditures and gross investment.”

4. See the FAQ “How Will the Rebates for Individuals in the 2008 Economic Stimulus Act Be Recorded in the NIPAs?” at <www.bea.gov> by clicking on “FAQs.”

Christopher Swann prepared this article.

1. The estimates of GDP under the contribution columns are also percent changes.

NOTE: Percent changes are from NIPA table 1.2.1, contributions are from NIPA table 1.2.2, and shares are calculated from NIPA table 1.2.5.

Consumer spending in the second quarter picked up and contributed 1.08 percentage points to real GDP growth; the pickup was primarily due to an upturn in spending for nondurable goods. Spending for durable goods decreased less than in the first quarter, and spending for services slowed.

Growth in nonresidential fixed investment increased about the same as in the first quarter. A larger decrease in equipment and software was offset by an acceleration in structures.

Residential fixed investment decreased 15.6 percent after decreasing 25.1 percent; it subtracted 0.62 percentage point from real GDP growth after subtracting 1.12 percentage points.

Inventory investment decreased much more than in the first quarter, subtracting 1.92 percentage points from real GDP growth after subtracting 0.02 percentage point.

Exports accelerated, reflecting a sharp pickup in exports of goods. An upturn in nonautomotive capital goods was the largest contributor to the acceleration. Exports of services slowed.

Imports decreased much more in the second quarter than in the first quarter. The second-quarter decrease was the largest decrease since the third quarter of 2001 and mainly reflected a sharp downturn in imports of petroleum and products. Imports of services turned down.

Government spending stepped up, primarily reflecting an upturn in state and local investment in structures.

Real final sales of domestic product, real GDP less inventory investment, increased 3.9 percent after increasing 0.9 percent.

Motor vehicle output decreased 35.2 percent after decreasing 14.2 percent.

Final sales of computers accelerated, increasing 19.3 percent after increasing 8.2 percent.

Prices

Table 3. Prices for Gross Domestic Purchases

[Percent change at annual rates; based on seasonally adjusted index numbers (2000=100)]

State and local	4.9	6.8	6.6	8.1	0.56	0.79	0.77	0.96
Addenda:								
Gross domestic purchases:								
Food	4.8	4.3	4.7	6.5	0.44	0.41	0.44	0.61
Energy goods and services	2.6	35.1	24.2	34.8	0.13	1.58	1.21	1.75
Excluding food and energy	1.9	2.4	2.2	2.2	1.66	2.03	1.85	1.86
Personal consumption expenditures (PCE):								
Food	4.8	3.7	4.9	6.4
Energy goods and services	2.4	32.2	19.0	27.6
Excluding food and energy	2.1	2.5	2.3	2.1
"Market-based" PCE	2.0	4.4	3.7	4.4
Excluding food and energy	1.4	2.2	2.1	1.8
Gross domestic product	1.5	2.8	2.6	1.1

1. The estimates under the contribution columns are also percent changes.

NOTE: Most percent changes are from NIPA table 1.6.7; percent changes for PCE for food and energy goods and services and for PCE excluding food and energy are calculated from index numbers in NIPA table 2.3.4. Contributions are from NIPA table 1.6.8.

Prices paid by domestic purchasers accelerated in the second quarter, increasing 4.2 percent after increasing 3.5 percent. Excluding food and energy, prices increased 2.2 percent in the second quarter, the same increase as in the first quarter. About 0.2 percentage point of the first-quarter increase in the gross domestic purchases price index was accounted for by a pay raise for federal civilian and military personnel, which is treated as an increase in the price of employee services purchased by the federal government.

Consumer prices accelerated, mainly reflecting a pickup in prices paid for services. An acceleration in prices paid for electricity and gas was the largest contributor to the acceleration in consumer prices.

Prices of private fixed investment turned up, primarily reflecting an upturn in prices paid for nonresidential investment in equipment and software.

Prices paid by government accelerated, mainly reflecting an acceleration in prices paid by state and local governments for spending for goods and services.

Consumer prices excluding food and energy, the "core" rate of inflation, decelerated slightly. Consumer prices for both food and energy accelerated.

The "market-based" PCE price index accelerated.

The GDP price index, which includes export prices, increased 1.1 percent, 3.1 percentage points less than the increase in the price index for gross domestic purchases, which includes import prices and excludes export prices. This divergence between the two measures was the largest since 1947, and it primarily reflected the much larger increase in import prices (28.6 percent) than the increase in export prices (10.3 percent).

Note on Prices

BEA's gross domestic purchases price index is the most comprehensive index of prices paid by U.S. residents for all goods and services. It is derived from the prices of personal consumption expenditures (PCE), private investment, and government consumption and investment.

BEA also produces price indexes for all components of GDP. The PCE price index is a measure of the total cost of consumer goods and services, including durable goods, nondurable goods, and services. PCE prices for food, energy goods and services, and for all items except food and energy are also estimated and reported. However, because prices for food and energy can be volatile, the price measure that excludes food and energy is often used as a measure of underlying, or "core," inflation.

BEA also prepares a supplemental PCE price index, the "market-based" PCE price index, which is based on market transactions for which there are corresponding price measures. This index excludes many imputed expenditures, such as services furnished without charge by financial intermediaries, that are included in PCE and the PCE price index. BEA also prepares a market-based measure that excludes food and energy.

More information on these market-based measures is available on BEA's Web site at <www.bea.gov/bea/faq/national/markbsdPCE.htm>. See also "Comparing the Consumer Price Index and the Personal Consumption Expenditures Price Index" in the November 2007 SURVEY OF CURRENT BUSINESS.

Personal Income

CCAj Capital consumption adjustment

Personal income, which is only measured in current dollars, increased \$214.5 billion in the second quarter after increasing \$109.1 billion in the first quarter. The sharp acceleration primarily reflected accelerations in personal current transfer receipts and in rental income of persons. In contrast, wages and salaries decelerated.

Wages and salaries increased \$54.0 billion after increasing \$72.7 billion. The deceleration reflected changes in employment, hours, and earnings.

Rental income of persons increased \$15.2 billion after increasing \$0.5 billion. The acceleration primarily reflected a downturn in expenses, which were subtracted in the calculation of rental income, that was associated with a downturn in mortgage originations.

Personal current transfer receipts increased \$145.3 billion after increasing \$40.3 billion. The acceleration reflected the payments to individuals who pay no income taxes or to individuals whose tax liabilities were less than the amount of the payments provided by the Economic Stimulus Act of 2008.

Personal current taxes decreased \$178.9 billion after increasing \$20.7 billion. The sharp downturn primarily reflected the payments to individuals with tax liabilities that exceeded the amounts of the rebates; these payments are treated as an offset to personal current taxes.

Personal saving increased \$249.8 billion after decreasing \$7.3 billion. Disposable personal income accelerated much more than personal outlays.

Saving

In the NIPAs, personal saving is defined as a current measure: the difference between disposable personal income and personal outlays. Personal saving was \$284.9 billion in the second quarter; in the first quarter, it was \$35.1 billion. Second-quarter saving reflected the larger increase in disposable personal income relative to personal outlays. For other approaches to measuring saving, see "Alternative Measures of Personal Saving" in the February 2007 SURVEY OF CURRENT BUSINESS.

1. Assumption.

2. Nonmonetary gold is included in balance-of-payments exports and im-

ports, but it is not used directly in estimating exports and imports in the national income and product accounts.

Summary of the Source Data for the Advance Estimates of GDP

The advance estimates of many components of GDP are based on 3 months of source data, but the estimates of some components are based on only 2 months of data. For the following items, the number of months for which data are available is shown in parentheses.

Personal consumption expenditures: Sales of retail stores (3), unit auto and truck sales (3), and consumers' shares of auto and truck sales (2);

Nonresidential fixed investment: Unit auto and truck sales (3), construction put in place (2), manufacturers' shipments of machinery and equipment other than aircraft (3), shipments of civilian aircraft (2), and exports and imports of machinery and equipment (2);

Residential investment: Construction put in place (2), single-family housing starts (3), sales of new homes (3), and sales of existing houses (3);

Change in private inventories: Trade and nondurable-goods manufacturing inventories (2), durable-goods manufacturing inventories (3), and unit auto and truck inventories (3);

Net exports of goods and services: Exports and imports of goods and services (2);

Government consumption expenditures and gross invest-

ment: Federal outlays (3), state and local government construction put in place (2), and state and local government employment (3);

Compensation: Employment, average hourly earnings, and average weekly hours (3);

GDP prices: Consumer price indexes (3), producer price indexes (3), and values and quantities of petroleum imports (2).

Unavailable source data

When source data were unavailable, BEA made various assumptions for June, including the following:

- Decreases in nonresidential structures, in aircraft shipments, and in single-family residential structures and no change in multifamily residential structures,
- Increases in nondurable-goods manufacturing inventories and in nonmotor vehicle merchant wholesale and retail inventories, and
- A smaller increase in exports of goods excluding gold than in imports of goods excluding gold.

Table 5 shows the assumptions for key series; a more comprehensive list is available on BEA's Web site at <www.bea.gov/national/index.htm#supp>.

Annual Revision of the National Income and Product Accounts

Annual Estimates for 2005–2007

Quarterly Estimates for 2005:I–2008:I

By Eugene P. Seskin and Shelly Smith

REVISED estimates of the national income and product accounts (NIPAs) for 2005–2007 and for the first quarter of 2008 have been released.¹ As is usual in annual NIPA revisions, the Bureau of Economic Analysis (BEA) incorporated newly available source data that are more complete, more detailed, and more reliable than previously incorporated data (see pages 12 and 19).

The estimates also reflect methodological improvements, including new methods used to value sales and inventory change of new autos, incorporation of new price indexes for deflating airline services and manufacturing structures, use of scanner data to estimate the composition of goods purchased at grocery stores, and a new procedure to estimate quarterly depreciation at a more detailed level (see page 18).

This annual revision has not changed the general picture of the economy for the past several years. The revised estimates of the growth in real gross domestic product (GDP) show a slightly slower rate of increase than the previously published estimates. By historical standards, the revisions to year-to-year growth rates of real GDP are small. In the annual NIPA revisions since 1982, the revisions (without regard to sign) to the annual estimates have averaged 0.3 percentage point. The revised estimates of prices are little changed from previously published estimates.

GDP growth highlights

- From 2004 to 2007, real GDP grew at an average annual rate of 2.6 percent, 0.1 percentage point less than in the previously published estimates.² From the fourth quarter of 2004 to the first quarter of 2008, real GDP grew at an average annual rate of 2.4 percent, 0.1 percentage point less than in the previously published estimates (table 1).

1. Information about the NIPA methodologies is available at www.bea.gov by clicking on “Methodology Papers.”

2. The annual revisions to real GDP reflect revised current-dollar estimates, revised prices used for deflation, and revised quantities used to estimate components of real GDP by extrapolation or direct valuation. For estimates prepared by extrapolation or direct valuation, the current-dollar and chained-dollar estimates are based on independent source data; consequently, the corresponding revisions are unrelated. For a list of these components, see table 2 in “Updated Summary NIPA Methodologies,” SURVEY OF CURRENT BUSINESS 87 (November 2007): 21–25.

- From the fourth quarter of 2004 to the first quarter of 2008, the revised estimates of residential fixed investment, state and local government spending, and personal consumption expenditures (PCE) for services were weaker than previously published estimates; nonresidential structures, exports of goods and services, PCE for durable goods, equipment and software, and private inventory investment were stronger; and federal government spending and PCE for nondurable goods were little revised.³ Imports of goods and services (subtracted in the calculation of GDP) were little revised.
- For 2005, 2006, and 2007, the percent change in real GDP from the preceding year was revised down: from 3.1 percent to 2.9 percent for 2005, from 2.9

3. In this article, “government spending” is shorthand for “government consumption expenditures and gross investment,” and “inventory investment” is shorthand for “change in private inventories.”

Table 1. Real GDP and Its Major Components
Change From 2004:IV to 2008:I
[Percent change at annual rates]

	Previously published	Revised	Revision in change (percentage points)
Gross domestic product	2.5	2.4	-0.1

Nondurable goods	2.6	2.6	0.0
Services	2.7	2.4	-0.3
Gross private domestic investment	-1.2	-1.3	-0.1
Fixed investment	0.1	-0.1	-0.2
Nonresidential	5.4	5.7	0.3
Structures	8.2	8.7	0.5
Equipment and software	4.1	4.2	0.1
Residential	-10.3	-11.6	-1.3
Change in private inventories			
Net exports of goods and services			
Exports	8.0	8.4	0.4
Goods	8.6	8.5	-0.1
Services	6.6	8.1	1.5
Imports	2.9	2.9	0.0
Goods	2.9	2.8	-0.1
Services	3.3	3.4	0.1
Government consumption expenditures and gross investment	1.9	1.7	-0.2
Federal	2.4	2.4	0.0
National defense	3.0	2.9	-0.1
Nondefense	1.2	1.3	0.1
State and local	1.7	1.3	-0.4
Addenda:			
Final sales of domestic product	2.7	2.6	-0.1
Gross domestic purchases	2.0	1.8	-0.2
Gross national product	2.6	2.5	-0.1
Gross domestic income	2.2	2.2	0.0

percent to 2.8 percent for 2006, and from 2.2 percent to 2.0 percent for 2007 (chart 1 and pages 8 and 9).

- From fourth quarter to fourth quarter, the percent change in real GDP was revised down for all 3 years: from 2.9 percent to 2.7 percent for 2005, from 2.6 percent to 2.4 percent for 2006, and from 2.5 percent to 2.3 percent for 2007.
- The relatively small revisions to the annual estimates of real GDP growth reflect partly offsetting revisions to the quarters within a year. For example, for 2007, the annual rate of growth of real GDP for the second quarter was revised up 1.0 percentage point, from 3.8 percent to 4.8 percent, while the growth rate for the fourth quarter was revised down 0.8 percentage point, from a small increase (0.6 percent) to a small decrease (0.2 percent) (see page 10).

Price highlights

- The percent change from the preceding year in the price index for gross domestic purchases was unrevised at 3.7 percent for 2005, was revised up 0.1 percentage point to 3.4 percent for 2006, and was revised up 0.1 percentage point to 2.8 percent for 2007 (chart 1 and table 6 on page 11).
- From the fourth quarter of 2004 to the first quarter of 2008, the average annual rate of increase in the price index for gross domestic purchases was revised up 0.1 percentage point to 3.3 percent, and

the average annual rate of increase in the GDP price index was unrevised at 2.9 percent. The average annual rates of increase in the price indexes for PCE and for the “core” PCE price index (which excludes food and energy) were also unrevised at 2.9 percent and 2.2 percent, respectively (table 2).

Income highlights

- From 2004–2007, real disposable personal income grew at an average annual rate of 2.6 percent, the same as in the previously published estimates.
- For 2005–2007, national income was revised up for all 3 years: \$86.4 billion, or 0.8 percent, for 2005; \$140.1 billion, or 1.2 percent, for 2006; and \$42.9 billion, or 0.4 percent, for 2007 (see table 8 on page 17).
- For 2005–2007, corporate profits was revised up for all 3 years: \$75.1 billion, or 5.5 percent, for 2005; \$114.8 billion, or 7.4 percent, for 2006; and \$47.2 billion, or 3.0 percent, for 2007 (table 8).

This article discusses the impact of the revisions on key NIPA measures, summarizes the revisions to the major aggregates, lists the major source data incorporated, and describes the changes in methodology. Appendix A presents the revised annual estimates and the revisions for the seven summary accounts of the NIPAs in current dollars (see page 21). In addition, tables presenting revised monthly, quarterly, and annual NIPA estimates and the “advance” estimates for the second quarter of 2008 are available on page 24.

Real GDP growth was revised down for 2005, 2006, and 2007. (See table 4 for detail about revisions to GDP components for all 3 years).

For 2005, the largest contributors to the downward revision to real GDP growth were PCE for services and state and local government spending; the contributions of these components were partly offset by an upward revision to private inventory investment.

For 2006, the largest contributors to the downward revision to real GDP growth were residential fixed investment and PCE for services; the contributions of these components were partly offset by upward revisions to fixed investment in equipment and software, to exports, and to PCE for durable goods.

For 2007, the largest contributors to the downward revision to real GDP growth were PCE for services, private inventory investment, and an upward revision to imports; the contributions of these components were partly offset by upward revisions to exports and to fixed investment in equipment and software.

For 2005, PCE for services accounted for most of the downward revision to PCE; "other" services was revised down.

The upward revision to nonresidential structures (mainly mining, exploration, shafts, and wells) was partly offset by a downward revision to equipment and software (mainly computers and peripheral equipment).

Single-family structures more than accounted for the revision to residential investment.

Nonfarm inventories accounted for the upward revision to private inventory investment (see page 8).

The revision to state and local government spending primarily reflected a downward revision to consumption expenditures.

For 2006, PCE for services more than accounted for the downward revision to PCE; the largest contributors were "other" services and medical care services.

The revision to nonresidential fixed investment was more than accounted for by an upward revision to equipment and software (mainly information processing equipment).

The revision to residential investment primarily reflected downward revisions to "other" structures and to single-family structures.

Exports of services was revised up.

The revision to state and local government spending reflected a downward revision to gross investment.

For 2007, PCE for services more than accounted for the downward revision to PCE; the largest contributor was housing services.

The upward revision to equipment and software (mainly software) was offset slightly by a downward revision to nonresidential structures (mainly mining, exploration, shafts, and wells).

Nonfarm inventories accounted for the downward revision to private inventory investment (see page 8).

An upward revision to exports of services was partly offset by a downward revision to exports of goods.

Imports of goods and services were revised up.

Quarterly Estimates

Revisions to quarterly (and monthly) NIPA estimates reflect (1) revisions to annual estimates that in turn reflect newly available annual data, (2) new and revised monthly and quarterly source data (including updated seasonal factors that are used to indicate quarterly patterns), and (3) methodology improvements (see page 18).

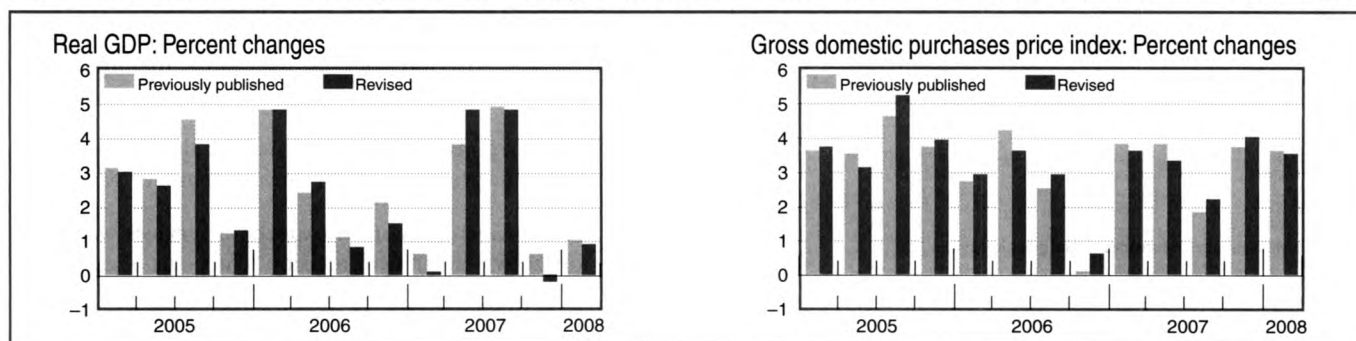

For real GDP, the revisions to the 13 quarterly percent changes (at annual rates) averaged 0.4 percentage point (without regard to sign). (Since 1979, annual revisions to quarterly estimates have averaged 0.7 percentage point.)

The quarterly real GDP growth rate was revised down for 9 of the 13 quarters and revised up for 3 of the 13 quarters. It was unrevised for one quarter. The largest downward revision to the percent change in real GDP was 0.8 percentage point (to -0.2 percent) for the fourth quarter of 2007. The largest contributors to that revision were downward revisions to PCE (mainly services) and to exports of services; the contributions of these components were partly offset by an upward revision to private inventory investment. The largest upward revision was 1.0 percentage point, to 4.8 percent, for the second quarter of

2007, reflecting upward revisions to PCE (durable and nondurable goods), to net exports (mainly an upward revision to services exports and a downward revision to goods imports), and to private inventory investment; these were partly offset by downward revisions to PCE for services and to nonresidential structures.

In general, the percent changes for the gross domestic purchases price index were similar to previously published estimates; the revisions to the 13 quarterly percent changes (at annual rates) averaged 0.3 percentage point (without regard to sign). The price index was revised up for eight quarters and revised down for five quarters. The largest upward revision was 0.6 percentage point, to 5.2 percent, for the third quarter of 2005; the largest contributor to the revision was prices of PCE for nondurable goods (mainly gasoline, fuel oil, and other energy goods). The largest downward revision was 0.6 percentage point, to 3.6 percent, for the second quarter of 2006; prices of PCE for nondurable goods (mainly gasoline, fuel oil, and other energy goods) more than accounted for the revision.

1. Percent change from the preceding period at annual rates.

Annual Price Estimates

Revisions to the chain-type price indexes reflect the incorporation of newly available and revised source data and the regularly scheduled incorporation of annual weights for the most recent year (2007). In this annual revision, the source data for price indexes used for deflation and the source data that affect implicit prices were revised.¹ The prices used for deflation also reflect updated seasonal factors. Also, new BLS producer price indexes were used to deflate consumer purchases of domestic airline services and international airline services, and a newly available BLS price index for new industrial building construction was incorporated (see "Methodology Changes" on page 18).

The change from the preceding year in the price index for gross domestic purchases was unrevised at 3.7 percent for 2005, was revised up 0.1 percentage point to 3.4 percent for 2006, and was revised up 0.1 percentage point to 2.8 percent for 2007 (chart 1 and table 6). The annual percent change in the GDP price index was revised up 0.1 percentage point to 3.3 percent for 2005, was unrevised at 3.2 percent for 2006, and was unrevised at 2.7 percent for 2007.

For 2005, the price index for gross domestic purchases was unrevised. Small revisions among the components of the price index were offsetting.

For 2006, the revision to the price index for gross domestic purchases primarily reflects an upward revision to the price index for residential fixed investment that was partly

offset by a downward revision to the price index for state and local government spending. The revision to the price index for residential fixed investment reflects an upward revision to the Census Bureau's price index for single-family structures. The revision to the price index for state and local government spending reflects a downward revision to the implicit price for compensation—specifically, a downward revision to current-dollar compensation.

For 2007, the revision to the gross domestic purchases index primarily reflects upward revisions to the price indexes for PCE for services and for federal national defense spending that were partly offset by a downward revision to the price index for state and local government spending. The largest contributor to the upward revision to the price index for PCE for services was the price of transportation services, primarily reflecting a revision to the price associated with motor vehicle insurance. The revision to the price index, which is implicitly derived, reflects a larger downward revision to the annual estimates of current-dollar benefits than to the annual estimates of current-dollar premiums. By convention, the estimates for chained-dollar premiums and for chained-dollar benefits grow at the same rate. The revision to the price index for national defense spending primarily reflects an upward revision to the implicit price for military compensation. Current-dollar compensation was revised up because of upward revisions to wages and salaries and to supplements to wages and salaries, while chained-dollar estimates, which are based on employment, were essentially unrevised. The revision to the price index for state and local government spending was also attributable to a downward revision to the implicit price for compensation.

1. The implicit prices are computed by dividing the current-dollar estimates by the chained-dollar estimates that are derived from the quantity data used in quantity extrapolation and direct valuation. Thus, differences between the current-dollar revisions and the chained-dollar revisions to these components are reflected as revisions to their implicit prices.

Current-Dollar NIPA Measures

This table shows NIPA components with revisions of \$5.0 billion or more (in absolute value) for 2005–2007. The table also notes the major source data that were incorporated as part of the 2008 annual revision.

1. In these descriptions, "new" indicates this is the first time that data from the specific source are being incorporated into the component estimate for the given year, and "revised" indicates that data from the specific source were incorporated previously and now revised data from that source are being incorporated.

2. The statistical discrepancy is gross domestic product (GDP) less gross domestic income (GDI); it is also the difference between gross national product (GNP) and gross national income (GNI), which is GDI plus net income receipts from the rest of the world. The statistical discrepancy arises because the product-side measures of GDP and GNP are estimated independently from the income-side measures of GDI and GNI.

3. Net interest is the sum of monetary interest paid by domestic business and by the rest of the world and imputed interest paid by domestic financial corporate business, less monetary interest received by domestic business and by the rest of the world and imputed interest received by domestic business and by the rest of the world.

Addendum:				
Gross domestic income.....	13,341.4	13,818.9	13,889.0	70.1

For 2005–2007, two broad income measures, gross domestic income (GDI) and national income, were revised up.

For 2005, the revision to national income reflects a large upward revision to corporate profits with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAAdj) and a smaller upward revision to net interest and miscellaneous payments (that is, net interest paid by domestic private enterprises and rents and royalties paid by private enterprises to government) that were partly offset by a downward revision to nonfarm proprietors' income.

The statistical discrepancy, the difference between GDI and GDP, was revised down from less than 0.1 percent of GDP to -0.6 percent of GDP.

For 2006, the revision to national income reflects large upward revisions to corporate profits with IVA and CCAAdj and to net interest and miscellaneous payments that were partly offset by downward revisions to supplements to wages and salaries and to rental income of persons with CCAAdj.

The statistical discrepancy was revised down from -0.1 percent of GDP to -1.2 percent of GDP.

For 2007, the revision to national income reflects large upward revisions to net interest and miscellaneous payments and to corporate profits with IVA and CCAAdj that were partly offset by large downward revisions to compensation of employees and to rental income of persons with CCAAdj.

The statistical discrepancy was revised down from 0.2 percent of GDP to -0.6 percent of GDP.

1. See the box "The Statistical Discrepancy" in Robert P. Parker and Eugene P. Seskin, "Annual Revision of the National Income and Product Accounts," SURVEY 77 (August 1997): 19.
CCAAdj Capital consumption adjustment
IVA Inventory valuation adjustment

Methodology Changes

Changes in methodology this year include the following.¹

Motor vehicle valuation. Beginning with estimates for the first quarter of 2005, the values of unit sales and inventory change for new domestic and foreign autos now incorporates more detailed and comprehensive model-year data on transactions prices from J.D. Power. During a calendar year, the new autos and trucks sold usually include vehicles for the preceding, current, and next model year. The improved estimates now incorporate average price data for all three model years. Previously, the price data for valuing new domestic autos were based on a two-model-year split from a large auto manufacturer that was then applied to other manufacturers.² The price data for valuing new foreign autos were based only on the one-model year corresponding to the calendar year. The improved procedure is now consistent with the methodology used to value new domestic and foreign light trucks.

Airline prices. The price index used for deflating consumer purchases of domestic airline services has been changed to an improved BLS producer price index (PPI) for domestic scheduled passenger air transportation. Similarly, the price index used for deflating international airline services purchased by U.S. residents from U.S. carriers is now an improved PPI for international scheduled passenger air transportation. Previously, domestic airline services expenditures were deflated using data on cents per revenue passenger mile for domestic carriers from the Air Transport Association of America, and the expenditures for international airline services on U.S. carriers were deflated using the BLS import air passenger fares index. The improved PPIs reflect a methodology that captures average revenue per passenger for all passengers and fare codes from an origin to a destination; previously, the price indexes reflected only a single fare code from an origin to a destination. The improved PPIs also capture all Internet pricing, include frequent flyer mile tickets, and include pricing from all distribution channels, making them more consistent with the current-dollar expenditures series that are being deflated.

Scanner data. Within personal consumption expenditures (PCE) for goods, estimates of the composition of goods bought at grocery stores are now based on point-of-sale retail scanner data from trade sources. This method captures the variation in the composition of goods sold by grocery stores (mainly food and beverage items) and alters the composition of commodities in PCE goods. Previously, the composition of PCE for food and beverage items was

adjusted annually using BLS consumer expenditure survey (CES) data. However, the CES data are not available by industry (only by commodity) and are only available during annual revisions with a 1-year lag. The value of total sales of grocery stores continues to be based on the Census Bureau's monthly and annual surveys of retail trade by industry.

Quarterly consumption of fixed capital. The estimates of quarterly private consumption of fixed capital (CFC) are now calculated using the perpetual inventory method (PIM) at a much more detailed level than previously calculated.³ Detailed quarterly real private fixed investment by type of asset is now apportioned to detailed industries and legal form of ownership (LFO) using implied ratios from the most recent year's fixed assets accounts. After applying the PIM at the detailed level by industry, by LFO, and by type of asset, the resulting real depreciation estimates are reflated to current-cost CFC estimates using detailed NIPA price indexes for private fixed investment by type of asset. These detailed private CFC estimates are then aggregated to total private CFC by LFO. Previously, private CFC was calculated by apportioning real private fixed investment for all asset types combined to LFO using implied ratios from the most recent year's fixed assets accounts, and the PIM was applied at the LFO level using implied depreciation rates also calculated from the most recent year's fixed assets accounts. The resulting estimates were then reflated to current-cost estimates using an aggregate price index for total private fixed investment. Because the new method makes full use of detailed NIPA quarterly private fixed investment by type of asset, the current quarterly estimates of CFC will more accurately reflect each LFO's asset-type composition. For example, CFC for "households and institutions" will more accurately reflect the composition of assets owned by households and institutions (that is, primarily residential structures) as opposed to reflecting investment in not only residential structures, but also in nonresidential structures and in equipment and software. This will reduce the size of revisions for the most recent year and for the quarterly estimates of private CFC during annual revisions.

New nonresidential building prices. As part of the 2006 annual revision, BEA began incorporating price data from BLS's nonresidential building construction initiative into its estimates of nonresidential structures. With the estimates for the first quarter of 2008, BEA is now incorporating the newly available price index for new industrial building construction into its estimates of manufacturing structures.

1. These changes update the information that was published in "Updated Summary NIPA Methodologies" in the November 2007 SURVEY and that will be updated in the November 2008 SURVEY.

2. Specifically, for January–July, the current and preceding model years were used; for August–December, the current and next model years were used.

3. For information on the perpetual inventory method, see Bureau of Economic Analysis, *Fixed Assets and Consumer Durable Goods in the United States, 1925–99* (Washington, DC: U.S. Government Printing Office, September 2003) at <www.bea.gov/national/pdf/Fixed_Assets_1925_97.pdf>.

Source Data

Source Data Incorporated in the 2008 Annual Revision

The annual revision incorporated data from a variety of sources: Census Bureau annual surveys of manufactures, of merchant wholesale trade, and of retail trade for 2005 (revised) and 2006 (preliminary) and revised monthly indicators of manufactures, of merchant wholesale trade, and of retail trade for 2005–2007; Census Bureau annual survey of services for 2005 and 2006 (revised) and 2007 (preliminary); Census Bureau annual surveys of state and local government finances for 2004 and 2005 (revised) and 2006 (preliminary); Census Bureau monthly survey of construction spending (value put in place) for 2006 and 2007

(revised); Census Bureau quarterly survey of services for 2005–2007 (revised); Census Bureau current population survey/housing vacancy survey for 2007; federal government budget data for fiscal years 2007 and 2008; Internal Revenue Service tabulations of tax returns for corporations for 2005 (revised) and 2006 (preliminary) and for sole proprietorships and partnerships for 2006; Bureau of Labor Statistics quarterly census of employment and wages for 2005–2007 (revised); Department of Agriculture farm statistics for 2005–2007 (revised); and BEA's international transactions accounts for 2005–2007 (revised).

Discontinuities in NIPA Foreign Transactions

The revisions to net exports of goods and services reflect the annual revision to Bureau of Economic Analysis international transactions accounts, which incorporated new and updated source data.¹

The revisions to the international transactions accounts for 2005–2007 were incorporated into the accounts at their

“best level.” As a result, there are small discontinuities between the estimates for 2004 and those for 2005 in the national income and product accounts (NIPAs) (table A). For current-dollar net exports of goods and services (and for current-dollar gross domestic product), the change from 2004–2005 was overstated by \$4.4 billion. (The revisions to the international transactions accounts for years before 2005 will be incorporated in the next comprehensive NIPA revision.)

1. See Christopher L. Bach, “Annual Revision of the U.S. International Accounts, 1974–2007,” SURVEY 88 (July 2008): 36–52.

1. Equals the revisions to the U.S. international transactions accounts that have not been carried back in the NIPAs at this time.

Data Availability and Acknowledgments

Data Availability

An extensive set of estimates is presented in “National Income and Product Accounts” in this issue. These estimates and annual estimates for 1929 forward and quarterly estimates for 1947 forward are available at <www.bea.gov>.

Selected revised NIPA estimates and related estimates will be published in upcoming issues of the SURVEY. The September SURVEY will present the following NIPA tables: tables 3.15–3.17 (government spending by function), table 5.9 (which shows the changes in the net stock of produced assets), table 7.15 (which shows the relationship between net farm income in the NIPAs and net farm income from the USDA). It will also present new estimates of fixed assets and consumer durable goods for 2007 and revised estimates for 2005 and 2006.

The October SURVEY will present NIPA tables 3.18 and 3.19 (government-sector reconciliation tables), tables 3.20 and 3.21 (state government and local government current receipts and expenditures), and tables 8.3 and 8.4 (seasonally unadjusted estimates of federal and state and local cur-

rent receipts and expenditures). It will also present revised real inventories, sales, and inventory-sales ratios for manufacturing and trade for the first quarter of 2005 to the first quarter of 2008. Also, revised estimates of state personal income that incorporate this annual revision will be presented.

The November SURVEY will feature the “Updated Summary NIPA Methodologies,” which lists the principal source data and estimating methods that are used in preparing the current-dollar and real estimates of GDP. In addition, NIPA table 2.9 (personal income by households and by nonprofit institutions serving households) and table 7.20 (nonprofits reconciliation table) will be presented.

The December SURVEY will include updated estimates from the annual industry accounts. As previously announced, due to the fiscal year 2008 federal budget, BEA will not provide updated estimates for seasonally unadjusted tables 8.1, 8.2, 8.5, and 8.6 or for the comparison of personal income with adjusted gross income in table 7.19.

Acknowledgments

Carol E. Moylan, Chief of the National Income and Wealth Division, supervised the preparation of this year’s annual revision of the national income and product accounts. Brian C. Moyer, former Chief of the Government Division, directed major parts of the revision. Brent R. Moulton, Associate Director for National Economic Accounts, provided overall supervision. David F. Sullivan—together with Charles Ian Mead, Robert J. Kornfeld, and Virginia H. Mannering—coordinated and conducted the estimation and review process.

Eugene P. Seskin and Shelly Smith wrote the article. Robert D. Carlson, Duane G. Hackmann, Aya Hamano, Alyssa E. Holdren, and Erin M. Ludlow prepared analyses and other review materials for both the article and the news release.

Other BEA staff who made significant contributions to the revision are listed below by area of expertise.

Personal consumption expenditures: Michael Armah, Clinton P. McCully, Teresita D. Teensma. *Goods:* Tony Choi, Harvey L. Davis, Jr., Yukun Fung, Everette P. Johnson, Richard E. Kane, Matthew D. Tschetter. *Services:* Brendan J. Leary, Kyle J. Brown, Robert D. Carlson, Robert N. Ganz III.

Investment and foreign transactions: Paul R. Lally. *Inventories, foreign transactions, and prices:* Jennifer A. Ribarsky, John W. Drewry, Harry Johnson, Jr., Kate L. Shoemaker, Enrico Tan. *Structures, equipment, and software:* Jeffrey W. Crawford, Aya Hamano, Velma P. Henry, Todd P. Siebeck, Linden L. Webber.

Federal government: Pamela A. Kelly, Peter G. Beall,

Monica D. Carpio, Andrea L. Cook, April L. Downs, Raymen G. Labella, Mark S. Ludwick, Benjamin A. Mandel, Farah Naz, Michael D. Randall, Michelle D. Robinson, Mary L. Roy, Benyam Tsehaye, Andrew E. Vargo, Bryan A. Williams.

State and local government: Bruce E. Baker, Karla Allen, Steven J. Andrews, Benjamin D. Cowan, Michelle Grier, Erin M. Ludlow, Sean M. Puckett.

Computer systems and operations: Michael J. Boehm, Scott G. He, Douglas J. Klear, Sung H. Lee, Ethan C. Lincoln, Ross F. Metzger, Michael J. Ocasio, Andrew J. Pinard, James J. Raley III, Michael D. Randall, Karl V. Rohrer, Andrew G. Schmidt.

Personal income: Kurt Kunze, Dennis R. Weikel. *Employee compensation:* Janet H. Kmitch, Jennifer R. Mykijewycz, James E. Rankin, Martin L. Simmons, Elijah Slack, Brian J. Smith. *Business income:* Howard I. Krakower, Andrew W. Hodge, M. Greg Key, Charles S. Robinson, Jerry L. Stone, Garth K. Trinkl. *Property income:* Michael N. Hayes, Denise A. McBride, Clark F. Schier, Andrew G. Schmidt, Gregory J. Shotwell.

Consumption of fixed capital: Private: David B. Wasshausen, Michael T. Cusick, Michael D. Glenn, Bonnie A. Retus, Nadia F.P. Sadee. *Government:* Charles Ian Mead, Charlotte Anne Bond, Debasis Chaudhuri, Christopher B. Mbu.

NIPA information: Virginia H. Mannering, Lisa S. Mataloni.

Secretarial and program assistance: Esther M. Carter, Katherine Dent, Angela P. Pointer.

Finding information on BEA's Web site just got easier...

BEA's Web site now includes a powerful new search engine that can help you locate information quickly and efficiently.

Its features include the following:

Clustered Searching

Search results are automatically grouped into a unique set of meaningful categories that can be further explored.

Clustered Results	
▶ GDP (51)	
⊕ ▶ Industry (13)	
⊕ ▶ NIPA, Historical series (8)	
⊕ ▶ Bureau of Economic Analysis (10)	
⊕ ▶ Growth (6)	
▶ Revision, National Income and Product Accounts (8)	
⊕ ▶ Current-Dollar (6)	
▶ FAQ, National Economic Accounts (2)	
▶ Glossary (2)	
▶ Expenditures, Measures (2)	
▶ Other Topics (6)	

Search Within a Search

After an initial search, you can locate specific terms within your search results.

Find in clusters:

Advanced Search

This feature allows you to search by keywords or exact phrases, sort the results by relevance or by date, and choose the number of results returned.

National Income and Product Accounts Tables

This set of tables presents the results of the annual revision of the national income and product accounts (NIPAs) released beginning July 31, 2008. The tables present revised annual estimates for 2005–2007, revised quarterly estimates for the first quarter of 2005 through the first quarter of 2008, revised monthly estimates for January 2005 through May 2008, and “advance” estimates for the second quarter of 2008 and for June 2008. For additional information, see the article “Annual Revision of the National Income and Product Accounts” in this issue. The estimates for all currently released NIPA series for 1929 forward are available on BEA’s Web site at <www.bea.gov>.

A few tables from the annual revision will be published in upcoming issues of the SURVEY OF CURRENT

BUSINESS. Tables 3.15–3.17, 5.9, and 7.15 are scheduled for publication in the September 2008 issue. Tables 3.18B–3.21, 8.3, and 8.4 are scheduled for the October 2008 issue. Tables 2.9 and 7.20 will be published in the November 2008 issue.

As was announced in the May 2008 issue of the SURVEY, the revision and the publication of the estimates in tables 7.19, 8.1, 8.2, 8.5, and 8.6 have been suspended because of budget constraints. Estimates through 2004 for these tables will continue to be available on BEA’s Web site at <www.bea.gov>.

The historical estimates of gross domestic product (GDP) are presented in “GDP and Other Major NIPA Series, 1929–2008:II” in this issue.

Summary Tables

A.	Summary National Income and Product Accounts, 2007	30
1. Domestic Product and Income		
1.1.1.	Percent Change From Preceding Period in Real Gross Domestic Product	32
1.1.2.	Contributions to Percent Change in Real Gross Domestic Product	32
1.1.3.	Real Gross Domestic Product, Quantity Indexes	33
1.1.4.	Price Indexes for Gross Domestic Product	33
1.1.5.	Gross Domestic Product	34
1.1.6.	Real Gross Domestic Product, Chained Dollars.....	34
1.1.7.	Percent Change From Preceding Period in Prices for Gross Domestic Product.....	35
1.1.8.	Contributions to Percent Change in the Gross Domestic Product Price Index.....	35
1.1.9.	Implicit Price Deflators for Gross Domestic Product	36
1.1.10.	Percentage Shares of Gross Domestic Product	36
1.2.1.	Percent Change From Preceding Period in Real Gross Domestic Product by Major Type of Product	37
1.2.2.	Contributions to Percent Change in Real Gross Domestic Product by Major Type of Product.....	37
1.2.3.	Real Gross Domestic Product by Major Type of Product, Quantity Indexes	38
1.2.4.	Price Indexes for Gross Domestic Product by Major Type of Product	38
1.2.5.	Gross Domestic Product by Major Type of Product	39
1.2.6.	Real Gross Domestic Product by Major Type of Product, Chained Dollars.....	39
1.3.1.	Percent Change From Preceding Period in Real Gross Value Added by Sector	40
1.3.3.	Real Gross Value Added by Sector, Quantity Indexes	40
1.3.4.	Price Indexes for Gross Value Added by Sector	40
1.3.5.	Gross Value Added by Sector	41
1.3.6.	Real Gross Value Added by Sector, Chained Dollars.....	41

1.4.1.	Percent Change From Preceding Period in Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers.....	41
1.4.3.	Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers, Quantity Indexes.....	42
1.4.4.	Price Indexes for Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers	42
1.4.5.	Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers.....	42
1.4.6.	Relation of Real Gross Domestic Product, Real Gross Domestic Purchases, and Real Final Sales to Domestic Purchasers, Chained Dollars	42
1.5.1.	Percent Change From Preceding Period in Real Gross Domestic Product, Expanded Detail	43
1.5.2.	Contributions to Percent Change in Real Gross Domestic Product, Expanded Detail	44
1.5.3.	Real Gross Domestic Product, Expanded Detail, Quantity Indexes	45
1.5.4.	Price Indexes for Gross Domestic Product, Expanded Detail	46
1.5.5.	Gross Domestic Product, Expanded Detail.....	47
1.5.6.	Real Gross Domestic Product, Expanded Detail, Chained Dollars.....	48
1.6.4.	Price Indexes for Gross Domestic Purchases.....	49
1.6.7.	Percent Change From Preceding Period in Prices for Gross Domestic Purchases	50
1.6.8.	Contributions to Percent Change in the Gross Domestic Purchases Price Index	51
1.7.1.	Percent Change From Preceding Period in Real Gross Domestic Product, Real Gross National Product, and Real Net National Product.....	52
1.7.3.	Real Gross Domestic Product, Real Gross National Product, and Real Net National Product, Quantity Indexes	52
1.7.4.	Price Indexes for Gross Domestic Product, Gross National Product, and Net National Product.....	52
1.7.5.	Relation of Gross Domestic Product, Gross National Product, Net National Product, National Income, and Personal Income.....	53
1.7.6.	Relation of Real Gross Domestic Product, Real Gross National Product, and Real Net National Product, Chained Dollars	54
1.8.3.	Command-Basis Real Gross National Product, Quantity Indexes.....	54
1.8.6.	Command-Basis Real Gross National Product, Chained Dollars	54
1.9.3.	Real Net Value Added by Sector, Quantity Indexes.....	55
1.9.4.	Price Indexes for Net Value Added by Sector	55
1.9.5.	Net Value Added by Sector	55
1.9.6.	Real Net Value Added by Sector, Chained Dollars	55
1.10.	Gross Domestic Income by Type of Income	56
1.11.	Percentage Shares of Gross Domestic Income.....	56
1.12.	National Income by Type of Income	57
1.13.	National Income by Sector, Legal Form of Organization, and Type of Income.....	58
1.14.	Gross Value Added of Domestic Corporate Business in Current Dollars and Gross Value Added of Nonfinancial Domestic Corporate Business in Current and Chained Dollars	59
1.15.	Price, Costs, and Profit Per Unit of Real Gross Value Added of Nonfinancial Domestic Corporate Business	60
1.16.	Sources and Uses of Private Enterprise Income.....	60

2. Personal Income and Outlays

2.1.	Personal Income and Its Disposition	61
2.2B.	Wage and Salary Disbursements by Industry.....	62
2.3.1.	Percent Change From Preceding Period in Real Personal Consumption Expenditures by Major Type of Product.....	62
2.3.2.	Contributions to Percent Change in Real Personal Consumption Expenditures by Major Type of Product.....	63
2.3.3.	Real Personal Consumption Expenditures by Major Type of Product, Quantity Indexes.....	63
2.3.4.	Price Indexes for Personal Consumption Expenditures by Major Type of Product	64
2.3.5.	Personal Consumption Expenditures by Major Type of Product	64

2.3.6.	Real Personal Consumption Expenditures by Major Type of Product, Chained Dollars.....	65
2.4.3.	Real Personal Consumption Expenditures by Type of Product, Quantity Indexes.....	66
2.4.4.	Price Indexes for Personal Consumption Expenditures by Type of Product.....	67
2.4.5.	Personal Consumption Expenditures by Type of Product	68
2.4.6.	Real Personal Consumption Expenditures by Type of Product, Chained Dollars	69
2.5.3.	Real Personal Consumption Expenditures by Type of Expenditure, Quantity Indexes.....	70
2.5.4.	Price Indexes for Personal Consumption Expenditures by Type of Expenditure	71
2.5.5.	Personal Consumption Expenditures by Type of Expenditure	72
2.5.6.	Real Personal Consumption Expenditures by Type of Expenditure, Chained Dollars.....	73
2.6.	Personal Income and Its Disposition, Monthly.....	74
2.7B.	Wage and Salary Disbursements by Industry, Monthly.....	77
2.8.1.	Percent Change From Preceding Period in Real Personal Consumption Expenditures by Major Type of Product, Monthly.....	78
2.8.3.	Real Personal Consumption Expenditures by Major Type of Product, Monthly, Quantity Indexes	79
2.8.4.	Price Indexes for Personal Consumption Expenditures by Major Type of Product, Monthly	80
2.8.5.	Personal Consumption Expenditures by Major Type of Product, Monthly.....	81
2.8.6.	Real Personal Consumption Expenditures by Major Type of Product, Monthly, Chained Dollars.....	82
2.9.	Personal Income and Its Disposition by Households and by Nonprofit Institutions Serving Households.....	*

3. Government Current Receipts and Expenditures

3.1.	Government Current Receipts and Expenditures	83
3.2.	Federal Government Current Receipts and Expenditures.....	84
3.3.	State and Local Government Current Receipts and Expenditures.....	85
3.4.	Personal Current Tax Receipts	86
3.5.	Taxes on Production and Imports	86
3.6.	Contributions for Government Social Insurance	86
3.7.	Government Current Transfer Receipts.....	87
3.8.	Current Surplus of Government Enterprises	87
3.9.1.	Percent Change From Preceding Period in Real Government Consumption Expenditures and Gross Investment.....	87
3.9.2.	Contributions to Percent Change in Real Government Consumption Expenditures and Gross Investment	88
3.9.3.	Real Government Consumption Expenditures and Gross Investment, Quantity Indexes	88
3.9.4.	Price Indexes for Government Consumption Expenditures and Gross Investment	89
3.9.5.	Government Consumption Expenditures and Gross Investment.....	89
3.9.6.	Real Government Consumption Expenditures and Gross Investment, Chained Dollars	90
3.10.1.	Percent Change From Preceding Period in Real Government Consumption Expenditures and General Government Gross Output	91
3.10.3.	Real Government Consumption Expenditures and General Government Gross Output, Quantity Indexes	92
3.10.4.	Price Indexes for Government Consumption Expenditures and General Government Gross Output	93
3.10.5.	Government Consumption Expenditures and General Government Gross Output.....	94
3.10.6.	Real Government Consumption Expenditures and General Government Gross Output, Chained Dollars.....	95
3.11.1.	Percent Change From Preceding Period in Real National Defense Consumption Expenditures and Gross Investment by Type.....	96
3.11.3.	Real National Defense Consumption Expenditures and Gross Investment by Type, Quantity Indexes.....	97
3.11.4.	Price Indexes for National Defense Consumption Expenditures and Gross Investment by Type	98
3.11.5.	National Defense Consumption Expenditures and Gross Investment by Type	99
3.11.6.	Real National Defense Consumption Expenditures and Gross Investment by Type, Chained Dollars	100

* This table is scheduled to be published in an upcoming issue. Please see the introduction.

3.12.	Government Social Benefits	101
3.13.	Subsidies	101
3.14.	Government Social Insurance Funds Current Receipts and Expenditures.....	101
3.15.1.	Percent Change From Preceding Period in Real Government Consumption Expenditures and Gross Investment by Function.....	*
3.15.2.	Contributions to Percent Change From Preceding Period in Real Government Consumption Expenditures and Gross Investment by Function	*
3.15.3.	Real Government Consumption Expenditures and Gross Investment by Function, Quantity Indexes.....	*
3.15.4.	Price Indexes for Government Consumption Expenditures and Gross Investment by Function	*
3.15.5.	Government Consumption Expenditures and Gross Investment by Function.....	*
3.15.6.	Real Government Consumption Expenditures and Gross Investment by Function, Chained Dollars	*
3.16.	Government Current Expenditures by Function.....	*
3.17.	Selected Government Current and Capital Expenditures by Function	*
3.18B.	Relation of Federal Government Current Receipts and Expenditures in the National Income and Product Accounts to the Budget, Fiscal Years and Quarters.....	*
3.19.	Relation of State and Local Government Current Receipts and Expenditures in the National Income and Product Accounts to Bureau of Census <i>Government Finances</i> Data, Fiscal Years	*
3.20.	State Government Current Receipts and Expenditures	*
3.21.	Local Government Current Receipts and Expenditures	*

4. Foreign Transactions

4.1.	Foreign Transactions in the National Income and Product Accounts.....	102
4.2.1.	Percent Change From Preceding Period in Real Exports and in Real Imports of Goods and Services by Type of Product.....	103
4.2.2.	Contributions to Percent Change in Real Exports and in Real Imports of Goods and Services by Type of Product.....	104
4.2.3.	Real Exports and Imports of Goods and Services by Type of Product, Quantity Indexes.....	105
4.2.4.	Price Indexes for Exports and Imports of Goods and Services by Type of Product.....	106
4.2.5.	Exports and Imports of Goods and Services by Type of Product	107
4.2.6.	Real Exports and Imports of Goods and Services by Type of Product, Chained Dollars	108
4.3B.	Relation of Foreign Transactions in the National Income and Product Accounts to the Corresponding Items in the International Transactions Accounts	109

5. Saving and Investment

5.1.	Saving and Investment.....	110
5.2.3.	Real Gross and Net Domestic Investment by Major Type, Quantity Indexes	111
5.2.5.	Gross and Net Domestic Investment by Major Type	111
5.2.6.	Real Gross and Net Domestic Investment by Major Type, Chained Dollars.....	112
5.3.1.	Percent Change From Preceding Period in Real Private Fixed Investment by Type	113
5.3.2.	Contributions to Percent Change in Real Private Fixed Investment by Type.....	114
5.3.3.	Real Private Fixed Investment by Type, Quantity Indexes.....	115
5.3.4.	Price Indexes for Private Fixed Investment by Type	116
5.3.5.	Private Fixed Investment by Type	117
5.3.6.	Real Private Fixed Investment by Type, Chained Dollars	118
5.4.1B.	Percent Change From Preceding Period in Real Private Fixed Investment in Structures by Type	119
5.4.2B.	Contributions to Percent Change in Real Private Fixed Investment in Structures by Type	119
5.4.3B.	Real Private Fixed Investment in Structures by Type, Quantity Indexes	120
5.4.4B.	Price Indexes for Private Fixed Investment in Structures by Type	120

* This table is scheduled to be published in an upcoming issue. Please see the introduction.

5.4.5B. Private Fixed Investment in Structures by Type.....	121
5.4.6B. Real Private Fixed Investment in Structures by Type, Chained Dollars.....	121
5.5.1. Percent Change From Preceding Period in Real Private Fixed Investment in Equipment and Software by Type	122
5.5.2. Contributions to Percent Change in Real Private Fixed Investment in Equipment and Software by Type.....	122
5.5.3. Real Private Fixed Investment in Equipment and Software by Type, Quantity Indexes.....	122
5.5.4. Price Indexes for Private Fixed Investment in Equipment and Software by Type.....	122
5.5.5. Private Fixed Investment in Equipment and Software by Type	123
5.5.6. Real Private Fixed Investment in Equipment and Software by Type, Chained Dollars	123
5.6.5B. Change in Private Inventories by Industry	124
5.6.6B. Real Change in Private Inventories by Industry, Chained Dollars.....	124
5.7.5B. Private Inventories and Domestic Final Sales by Industry	125
5.7.6B. Real Private Inventories and Real Domestic Final Sales by Industry, Chained Dollars	126
5.7.9B. Implicit Price Deflators for Private Inventories by Industry	126
5.8.3B. Real Gross Government Fixed Investment by Type, Quantity Indexes.....	127
5.8.4B. Price Indexes for Gross Government Fixed Investment by Type	127
5.8.5B. Gross Government Fixed Investment by Type	128
5.8.6B. Real Gross Government Fixed Investment by Type, Chained Dollars.....	128
5.9. Changes in Net Stock of Produced Assets (Fixed Assets and Inventories)	*
5.10. Capital Transfers (Net)	129

6. Income and Employment by Industry

6.1D. National Income Without Capital Consumption Adjustment by Industry	130
6.2D. Compensation of Employees by Industry	131
6.3D. Wage and Salary Accruals by Industry.....	132
6.4D. Full-Time and Part-Time Employees by Industry	133
6.5D. Full-Time Equivalent Employees by Industry.....	134
6.6D. Wage and Salary Accruals Per Full-Time Equivalent Employee by Industry	135

Table A. Summary National Income and Product Accounts, 2007

[Billions of dollars]

Account 1. Domestic Income and Product Account

Line			Line		
1	Compensation of employees, paid	7,819.4	15	Personal consumption expenditures (3-3)	9,710.2
2	Wage and salary accruals	6,362.8	16	Durable goods	1,082.8
3	Disbursements (3-12 and 5-11)	6,369.0	17	Nondurable goods	2,833.0
4	Wage accruals less disbursements (4-9 and 6-11)	-6.3	18	Services	5,794.4
5	Supplements to wages and salaries (3-14)	1,456.6	19	Gross private domestic investment	2,130.4
6	Taxes on production and imports (4-16)	1,015.5	20	Fixed investment (6-2)	2,134.0
7	Less: Subsidies (4-8)	52.3	21	Nonresidential	1,503.8
8	Net operating surplus	3,386.0	22	Structures	480.3
9	Private enterprises (2-19)	3,393.9	23	Equipment and software	1,023.5
10	Current surplus of government enterprises (4-26)	-7.9	24	Residential	630.2
11	Consumption of fixed capital (6-13)	1,720.5	25	Change in private inventories (6-4)	-3.6
12	Gross domestic income	13,889.0	26	Net exports of goods and services	-707.8
13	Statistical discrepancy (6-19)	-81.4	27	Exports (5-1)	1,662.4
			28	Imports (5-9)	2,370.2
			29	Government consumption expenditures and gross investment (4-1 and 6-3)	2,674.8
14	GROSS DOMESTIC PRODUCT	13,807.5	30	Federal	979.3
			31	National defense	662.2
			32	Nondefense	317.1
			33	State and local	1,695.5
			34	GROSS DOMESTIC PRODUCT	13,807.5

Account 2. Private Enterprise Income Account

Line			Line		
1	Income payments on assets	3,769.6	19	Net operating surplus (1-9)	3,393.9
2	Interest and miscellaneous payments (3-20 and 4-21)	3,605.0	20	Income receipts on assets	3,214.6
3	Dividend payments to the rest of the world (5-14)	95.6	21	Interest (3-20)	2,705.4
4	Reinvested earnings on foreign direct investment in the United States (5-15)	68.9	22	Dividend receipts from the rest of the world (5-6)	213.2
5	Business current transfer payments (net)	100.2	23	Reinvested earnings on U.S. direct investment abroad (5-7)	296.0
6	To persons (net) (3-24)	31.9			
7	To government (net) (4-24)	61.4			
8	To the rest of the world (net) (5-19)	6.9			
9	Proprietors' income with inventory valuation and capital consumption adjustments (3-17)	1,056.2			
10	Rental income of persons with capital consumption adjustment (3-18)	40.0			
11	Corporate profits with inventory valuation and capital consumption adjustments	1,642.4			
12	Taxes on corporate income	450.4			
13	To government (4-17)	426.3			
14	To the rest of the world (5-19)	24.1			
15	Profits after tax with inventory valuation and capital consumption adjustments	1,192.0			
16	Net dividends (3-21 and 4-22)	788.7			
17	Undistributed corporate profits with inventory valuation and capital consumption adjustments (6-10)	403.4			
18	USES OF PRIVATE ENTERPRISE INCOME	6,608.5	24	SOURCES OF PRIVATE ENTERPRISE INCOME	6,608.5

Account 3. Personal Income and Outlay Account

Line			Line		
1	Personal current taxes (4-15)	1,492.8	10	Compensation of employees, received	7,818.6
2	Personal outlays	10,113.1	11	Wage and salary disbursements	6,362.0
3	Personal consumption expenditures (1-15)	9,710.2	12	Domestic (1-3 less 5-11)	6,359.0
4	Personal interest payments (3-20)	265.4	13	Rest of the world (5-3)	3.0
5	Personal current transfer payments	137.5	14	Supplements to wages and salaries (1-5)	1,456.6
6	To government (4-25)	81.2	15	Employer contributions for employee pension and insurance funds	991.9
7	To the rest of the world (net) (5-17)	56.3	16	Employer contributions for government social insurance	464.7
8	Personal saving (6-9)	57.4	17	Proprietors' income with inventory valuation and capital consumption adjustments (2-9)	1,056.2
			18	Rental income of persons with capital consumption adjustment (2-10)	40.0
			19	Personal income receipts on assets	2,000.1
			20	Personal interest income (2-2 and 3-4 and 4-7 and 5-5 less 2-21 less 4-21 less 5-13)	1,214.3
			21	Personal dividend income (2-16 less 4-22)	785.8
			22	Personal current transfer receipts	1,713.3
			23	Government social benefits (4-4)	1,681.4
			24	From business (net) (2-6)	31.9
			25	Less: Contributions for government social insurance (4-19)	965.1
9	PERSONAL TAXES, OUTLAYS, AND SAVING	11,663.2	26	PERSONAL INCOME	11,663.2

Account 4. Government Receipts and Expenditures Account

Line			Line		
1	Consumption expenditures (1-29)	2,212.0	14	Current tax receipts	2,948.5
2	Current transfer payments	1,721.3	15	Personal current taxes (3-1)	1,492.8
3	Government social benefits	1,685.0	16	Taxes on production and imports (1-6)	1,015.5
4	To persons (3-23)	1,681.4	17	Taxes on corporate income (2-13)	426.3
5	To the rest of the world (5-18)	3.6	18	Taxes from the rest of the world (5-18)	14.0
6	Other current transfer payments to the rest of the world (net) (5-18)	36.3	19	Contributions for government social insurance (3-25)	965.1
7	Interest payments (3-20)	411.1	20	Income receipts on assets	129.5
8	Subsidies (1-7)	52.3	21	Interest and miscellaneous receipts (2-2 and 3-20)	126.6
9	Less: Wage accruals less disbursements (1-4)	0.0	22	Dividends (3-21)	2.8
10	Net government saving (6-12)	-218.9	23	Current transfer receipts	142.6
11	Federal	-229.3	24	From business (net) (2-7)	61.4
12	State and local	10.4	25	From persons (3-6)	81.2
13	GOVERNMENT CURRENT EXPENDITURES AND NET SAVING	4,177.8	26	Current surplus of government enterprises (1-10)	-7.9
			27	GOVERNMENT CURRENT RECEIPTS	4,177.8

Account 5. Foreign Transactions Current Account

Line			Line		
1	Exports of goods and services (1-27)	1,662.4	9	Imports of goods and services (1-28)	2,370.2
2	Income receipts from the rest of the world	861.7	10	Income payments to the rest of the world	759.3
3	Wage and salary receipts (3-13)	3.0	11	Wage and salary payments (1-3)	10.0
4	Income receipts on assets	858.8	12	Income payments on assets	749.3
5	Interest (3-20)	349.6	13	Interest (3-20)	584.8
6	Dividends (2-22)	213.2	14	Dividends (2-3)	95.6
7	Reinvested earnings on U.S. direct investment abroad (2-23)	296.0	15	Reinvested earnings on foreign direct investment in the United States (2-4)	68.9
			16	Current taxes and transfer payments to the rest of the world (net)	113.2
			17	From persons (net) (3-7)	56.3
			18	From government (net) (4-5 and 4-6 less 4-18)	25.9
			19	From business (net) (2-8 and 2-14)	31.0
			20	Balance on current account, national income and product accounts (7-1)	-718.6
8	CURRENT RECEIPTS FROM THE REST OF THE WORLD	2,524.1	21	CURRENT PAYMENTS TO THE REST OF THE WORLD AND BALANCE ON CURRENT ACCOUNT	2,524.1

Account 6. Domestic Capital Account

Line			Line		
1	Gross domestic investment	2,593.2	8	Net saving	235.6
2	Private fixed investment (1-20)	2,134.0	9	Personal saving (3-8)	57.4
3	Government fixed investment (1-29)	462.8	10	Undistributed corporate profits with inventory valuation and capital consumption adjustments (2-17)	403.4
4	Change in private inventories (1-25)	-3.6	11	Wage accruals less disbursements (private) (1-4)	-6.3
5	Capital account transactions (net) (7-2)	1.8	12	Net government saving (4-10)	-218.9
6	Net lending or net borrowing (-), national income and product accounts (7-3)	-720.4	13	Plus: Consumption of fixed capital (1-11)	1,720.5
			14	Private	1,431.1
			15	Government	289.4
			16	General government	241.4
			17	Government enterprises	48.0
			18	Equals: Gross saving	1,956.0
			19	Statistical discrepancy (1-13)	-81.4
7	GROSS DOMESTIC INVESTMENT, CAPITAL ACCOUNT TRANSACTIONS, AND NET LENDING	1,874.6	20	GROSS SAVING AND STATISTICAL DISCREPANCY	1,874.6

Account 7. Foreign Transactions Capital Account

Line			Line		
			2	Capital account transactions (net) (6-5)	1.8
			3	Net lending or net borrowing (-), national income and product accounts (6-6)	-720.4
1	BALANCE ON CURRENT ACCOUNT, NATIONAL INCOME AND PRODUCT ACCOUNTS (5-20)	-718.6	4	CAPITAL ACCOUNT TRANSACTIONS (NET) AND NET LENDING, NATIONAL INCOME AND PRODUCT ACCOUNTS	-718.6

NOTE: Numbers in parentheses indicate accounts and items of counterentry in the accounts. For example, line 5 of account 1 is shown as "Supplements to wages and salaries (3-14)"; the counterentry is shown in account 3, line 14.

1. Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
 2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
 3. Some components of final sales of computers include computer parts.

2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.

3. Some components of final sales of computers include computer parts.

Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.

2. Equals gross domestic business value added excluding gross farm value added.

3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.

4. Equals compensation of general government employees plus general government consumption of fixed capital.

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.
 2. Equals gross domestic business value added excluding gross farm value added.
 3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.
 4. Equals compensation of general government employees plus general government consumption of fixed capital.
 Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.

2. Gross national income deflated by the implicit price deflator for gross national product.

3. Net domestic income deflated by the implicit price deflator for net domestic product.

Note. Except as noted in footnotes 1, 2 and 3, chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Estimates for financial corporate business and nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
 2. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.
 3. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100.
 4. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NOTE: Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Table 2.4.3. Real Personal Consumption Expenditures by Type of Product, Quantity Indexes

[Index numbers, 2000=100]

1. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series.

Note: The figures in parentheses are the line numbers of the corresponding items in table 2.5.5.

Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Table 2.5.3. Real Personal Consumption Expenditures by Type of Expenditure, Quantity Indexes

[Index numbers, 2000=100]

Workers' compensation (s.) ¹⁷	59	129.578	137.245	139.782	133.471						

1. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.

2. Includes luggage.

3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.

4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.

5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.

6. Consists of transient hotels, motels, other traveler accommodations, clubs, schools, and other group housing.

7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.

8. Includes such house furnishings as floor coverings, picture frames, mirrors, art products, portable lamps, clocks, blinds, shades, drapery hardware, and telephone equipment. Also includes writing equipment and hand, power, and garden tools.

9. Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.

10. Consists of repair and maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and parcel delivery charges, premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles), and miscellaneous household operation services.

11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.

12. Consists of offices of physicians, HMO medical centers, and freestanding ambulatory surgical and emergency centers.

13. Consists of chiropractors, optometrists, mental health practitioners (except physicians), physical, occupational and speech therapists, and audiologists, podiatrists, all other miscellaneous health practitioners, ambulance services, kidney dialysis centers, family planning services, outpatient mental health and substance abuse centers, all other outpatient care centers, blood and organ banks, all other miscellaneous ambulatory health care services, home health furniture and equipment rental, medical and diagnostic laboratories, and home health care.

14. Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.

15. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.

16. Consists of premiums less benefits for income loss insurance.

17. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.

18. Consists of (1) operating expenses of commercial life insurance carriers and fraternal benefit life insurance and (2) administrative expenses of private noninsured pension plans and publicly administered government employee retirement plans. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies. For

pension and retirement plans, excludes services furnished without payment by banks, credit agencies, and investment companies.

19. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.

20. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle insurance.

21. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, airport bus fares, and limousine services.

22. Consists of admissions to professional and amateur athletic events and to racetracks.

23. Consists of current expenditures (including consumption of fixed capital) of nonprofit clubs and fraternal organizations and dues and fees paid to proprietary clubs.

24. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; skiing facilities; marinas; sightseeing; private flying operations; casino gambling; recreational equipment rental, and other commercial participant amusements.

25. Consists of lotteries, pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video rentals, internet access fees, and recreational services, not elsewhere classified.

26. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.

27. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.

28. Consists of (1) fees paid to business schools and computer and management training, technical and trade schools, other schools and institutions, and educational support services, and (2) current expenditures (including consumption of fixed capital) by nonprofit research organizations and by grantmaking foundations for education and research.

29. For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious organizations, child day care services (excluding educational programs), social advocacy organizations, human rights organizations, civic and social organizations, residential mental health and substance abuse facilities, homes for the elderly, other residential care facilities, social assistance services, political organizations, museums, libraries, and grantmaking and giving services. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and exclude relief payments within the United States and expenditures by grantmaking foundations for education and research. For proprietary and government institutions, equals receipts from users.

30. Beginning with 1981, includes U.S. students' expenditures abroad.

31. Beginning with 1981, includes nonresidents' student and medical care expenditures in the United States. Beginning with 1986, includes migratory worker and foreign professional expenditures in the United States.

Note. Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

Workers' compensation (s.) ¹⁷	59	95.747	110.743	117.348	123.814						

1. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.

2. Includes luggage.

3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.

4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.

5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.

6. Consists of transient hotels, motels, other traveler accommodations, clubs, schools, and other group housing.

7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.

8. Includes such house furnishings as floor coverings, picture frames, mirrors, art products, portable lamps, clocks, blinds, shades, drapery hardware, and telephone equipment. Also includes writing equipment and hand, power, and garden tools.

9. Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.

10. Consists of repair and maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and parcel delivery charges, premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles), and miscellaneous household operation services.

11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.

12. Consists of offices of physicians, HMO medical centers, and freestanding ambulatory surgical and emergency centers.

13. Consists of chiropractors, optometrists, mental health practitioners (except physicians), physical, occupational and speech therapists, and audiologists, podiatrists, all other miscellaneous health practitioners, ambulance services, kidney dialysis centers, family planning services, outpatient mental health and substance abuse centers, all other outpatient care centers, blood and organ banks, all other miscellaneous ambulatory health care services, home health furniture and equipment rental, medical and diagnostic laboratories, and home health care.

14. Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.

15. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.

16. Consists of premiums less benefits for income loss insurance.

17. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.

18. Consists of (1) operating expenses of commercial life insurance carriers and fraternal benefit life insurance and (2) administrative expenses of private noninsured pension plans and publicly administered government employee retirement plans. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies.

19. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.

20. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle insurance.

21. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, airport bus fares, and limousine services.

22. Consists of admissions to professional and amateur athletic events and to racetracks.

23. Consists of current expenditures (including consumption of fixed capital) of nonprofit clubs and fraternal organizations and dues and fees paid to proprietary clubs.

24. Consists of billiard parlors, bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; skiing facilities; marinas; sightseeing; private flying operations; casino gambling; recreational equipment rental, and other commercial participant amusements.

25. Consists of lotteries, pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video rentals, internet access fees, and recreational services, not elsewhere classified.

26. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.

27. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.

28. Consists of (1) fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services, and (2) current expenditures (including consumption of fixed capital) by nonprofit research organizations and by grantmaking foundations for education and research.

29. For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious organizations, child day care services (excluding educational programs), social advocacy organizations, human rights organizations, civic and social organizations, residential mental health and substance abuse facilities, homes for the elderly, other residential care facilities, social assistance services, political organizations, museums, libraries, and grantmaking and giving services. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and exclude relief payments within the United States and expenditures by grantmaking foundations for education and research. For proprietary and government institutions, equals receipts from users.

30. Beginning with 1981, includes U.S. students' expenditures abroad.

31. Beginning with 1981, includes nonresidents' student and medical care expenditures in the United States. Beginning with 1986, includes migratory worker and foreign professional expenditures in the United States.

Note: Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

1. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.

2. Includes luggage.

3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.

4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.

5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.

6. Consists of transient hotels, motels, other traveler accommodations, clubs, schools, and other group housing.

7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.

8. Includes such durable house furnishings as floor coverings, picture frames, mirrors, art products, portable lamps, clocks, blinds, shades, drapery hardware, and telephone equipment. Also includes writing equipment and hand, power, and garden tools.

9. Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.

10. Consists of repair and maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and parcel delivery charges, premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles), and miscellaneous household operation services.

11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.

12. Consists of offices of physicians, HMO medical centers, and freestanding ambulatory surgical and emergency centers.

13. Consists of chiropractors, optometrists, mental health practitioners (except physicians), physical, occupational and speech therapists, and audiologists, podiatrists, all other miscellaneous health practitioners, ambulance services, kidney dialysis centers, family planning services, outpatient mental health and substance abuse centers, all other outpatient care centers, blood and organ banks, all other miscellaneous ambulatory health care services, home health furniture and equipment rental, medical and diagnostic laboratories, and home health care.

14. Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.

15. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.

16. Consists of premiums less benefits for income loss insurance.

17. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.

18. Consists of (1) operating expenses of commercial life insurance carriers and fraternal benefit life insurance and (2) administrative expenses of private noninsured pension plans and publicly administered government employee retirement plans. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies. For pension and retirement plans, excludes services furnished without payment by banks, credit agencies, and investment

companies.

19. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and other personal business services.

20. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle insurance.

21. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, airport bus fares, and limousine services.

22. Consists of admissions to professional and amateur athletic events and to racetracks.

23. Consists of current expenditures (including consumption of fixed capital) of nonprofit clubs and fraternal organizations and dues and fees paid to proprietary clubs.

24. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; skiing facilities; marinas; sightseeing; private flying operations; casino gambling; recreational equipment rental, and other commercial participant amusements.

25. Consists of lotteries, pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video rentals, internet access fees, and recreational services, not elsewhere classified.

26. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.

27. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.

28. Consists of (1) fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services, and (2) current expenditures (including consumption of fixed capital) by nonprofit research organizations and by grantmaking foundations for education and research.

29. For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious organizations, child day care services (excluding educational programs), social advocacy organizations, human rights organizations, civic and social organizations, residential mental health and substance abuse facilities, homes for the elderly, other residential care facilities, social assistance services, political organizations, museums, libraries, and grantmaking and giving services. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and exclude relief payments within the United States and expenditures by grantmaking foundations for education and research. For proprietary and government institutions, equals receipts from users.

30. Beginning with 1981, includes U.S. students' expenditures abroad; these expenditures were \$0.3 billion in 1981. 31. Beginning with 1981, includes nonresidents' student and medical care expenditures in the United States; student expenditures were \$2.2 billion and medical expenditures were \$0.4 billion in 1981. Beginning with 1986, includes migratory worker and foreign professional expenditures in the United States; migratory worker expenditures were \$1.0 billion and foreign professional expenditures were \$0.1 billion in 1986.

Note: Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

1. Consists of purchases (including tips) of meals and beverages from retail, service, and amusement establishments, hotels, dining and buffet cars, schools, school fraternities, institutions, clubs, and industrial lunchrooms. Includes meals and beverages consumed both on- and off-premise.
 2. Includes luggage.
 3. Consists of watch, clock, and jewelry repairs, costume and dress suit rental, and miscellaneous personal services.
 4. Consists of rent for space and for heating and plumbing facilities, water heaters, lighting fixtures, kitchen cabinets, linoleum, storm windows and doors, window screens, and screen doors, but excludes rent for appliances and furniture and purchases of fuel and electricity.
 5. Consists of space rent (see footnote 4) and rent for appliances, furnishings, and furniture.
 6. Consists of transient hotels, motels, other traveler accommodations, clubs, schools, and other group housing.
 7. Consists of refrigerators and freezers, cooking ranges, dishwashers, laundry equipment, stoves, room air conditioners, sewing machines, vacuum cleaners, and other appliances.
 8. Includes such house furnishings as floor coverings, picture frames, mirrors, art products, portable lamps, clocks, blinds, shades, drapery hardware, and telephone equipment. Also includes writing equipment and hand, power, and garden tools.
 9. Consists largely of textile house furnishings, including piece goods allocated to house furnishing use. Also includes lamp shades, brooms, and brushes.
 10. Consists of repair and maintenance services for appliances and house furnishings, moving and warehouse expenses, postage and parcel delivery charges, premiums plus premium supplements less normal losses and dividends paid to policyholders for insurance on personal property (except motor vehicles), and miscellaneous household operation services.
 11. Excludes drug preparations and related products dispensed by physicians, hospitals, and other medical services.
 12. Consists of offices of physicians, HMO medical centers, and freestanding ambulatory surgical and emergency centers.
 13. Consists of chiropractors, optometrists, mental health practitioners (except physicians), physical, occupational and speech therapists, and audiologists, podiatrists, all other miscellaneous health practitioners, ambulance services, kidney dialysis centers, family planning services, outpatient mental health and substance abuse centers, all other outpatient care centers, blood and organ banks, all other miscellaneous ambulatory health care services, home health furniture and equipment rental, medical and diagnostic laboratories, and home health care.
 14. Consists of (1) current expenditures (including consumption of fixed capital) of nonprofit hospitals and nursing homes, and (2) payments by patients to proprietary and government hospitals and nursing homes.
 15. Consists of premiums less benefits for health, hospitalization, and accidental death and dismemberment insurance.
 16. Consists of premiums less benefits for income loss insurance.
 17. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for privately administered workers' compensation.
 18. Consists of (1) operating expenses of commercial life insurance carriers and fraternal benefit life insurance and (2) administrative expenses of private noninsured pension plans and publicly administered government employee retirement plans. For commercial life insurance carriers, excludes expenses for accident and health insurance and includes profits of stock companies and services furnished without payment by banks, credit agencies, and investment companies. For pension and retirement plans, excludes services furnished without payment by banks, credit agencies, and investment companies.
 19. Consists of current expenditures (including consumption of fixed capital) of trade unions and professional associations, employment agency fees, money order fees, spending for classified advertisements, tax return preparation services, and

other personal business services.
 20. Consists of premiums plus premium supplements less normal losses and dividends paid to policyholders for motor vehicle insurance.
 21. Consists of baggage charges, coastal and inland waterway fares, travel agents' fees, airport bus fares, and limousine services.
 22. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series.
 23. Consists of admissions to professional and amateur athletic events and to racetracks.
 24. Consists of current expenditures (including consumption of fixed capital) of nonprofit clubs and fraternal organizations and dues and fees paid to proprietary clubs.
 25. Consists of billiard parlors; bowling alleys; dancing, riding, shooting, skating, and swimming places; amusement devices and parks; golf courses; skiing facilities; marinas; sightseeing; private flying operations; casino gambling; recreational equipment rental, and other commercial participant amusements.
 26. Consists of lotteries, pets and pet care services, cable TV, film processing, photographic studios, sporting and recreation camps, video rentals, internet access fees, and recreational services, not elsewhere classified.
 27. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and less expenditures for research and development financed under contracts or grants. For government institutions, equals student payments of tuition.
 28. For private institutions, equals current expenditures (including consumption of fixed capital) less receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures. For government institutions, equals student payments of tuition. Excludes child day care services, which are included in religious and welfare activities.
 29. Consists of (1) fees paid to business schools and computer and management training, technical and trade schools, other schools and instruction, and educational support services, and (2) current expenditures (including consumption of fixed capital) by nonprofit research organizations and by grantmaking foundations for education and research.
 30. For nonprofit institutions, equals current expenditures (including consumption of fixed capital) of religious organizations, child day care services (excluding educational programs), social advocacy organizations, human rights organizations, civic and social organizations, residential mental health and substance abuse facilities, homes for the elderly, other residential care facilities, social assistance services, political organizations, museums, libraries, and grantmaking and giving services. The expenditures are net of receipts—such as those from meals, rooms, and entertainments—accounted for separately in consumer expenditures, and exclude relief payments within the United States and expenditures by grantmaking foundations for education and research. For proprietary and government institutions, equals receipts from users.
 31. Beginning with 1981, includes U.S. students' expenditures abroad.
 32. Beginning with 1981, includes nonresidents' student and medical care expenditures in the United States. Beginning with 1986, includes migratory worker and foreign professional expenditures in the United States.
 Note: Consumer durable goods are designated (d.), nondurable goods (n.d.), and services (s.).

Population (midperiod, thousands) ³	32	303,670	303,866	304,068	304,287	304,521	304,776

1. Consists of nonmortgage interest paid by households.

2. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.

3. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of the estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates.

NOTE: Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.

5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
 2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
 3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
 4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
 5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

Table 3.11.4. Price Indexes for National Defense Consumption Expenditures and Gross Investment by Type

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.

5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.

5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Consists of payments for medical services for dependents of active duty military personnel at nonmilitary facilities.
 2. Consists of mustering out pay, terminal leave pay, and adjusted compensation benefits.
 3. Consists largely of payments to nonprofit institutions, aid to students, and payments for medical services for retired military personnel and their dependents at nonmilitary facilities.
 4. Consists of general medical assistance and state child health care programs.
 5. Consists of aid to families with dependent children and, beginning with 1996, assistance programs operating under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.
 6. Consists of expenditures for food under the supplemental program for women, infants, and children; foster care; adoption assistance; and payments to nonprofit welfare institutions.
 7. Consists largely of veterans benefits, Alaska dividends, and crime-victim payments.
 8. Consists of federal government social benefits to the rest of the world.

1. Exports and imports of gold in the NIPAs differ from those in the ITAs. ITA gold exports (line 2) and imports (line 19) are excluded from the NIPAs; imports of gold in the NIPAs (line 21) is the excess of the value of gold in gross domestic purchases over the value of U.S. production of gold.

2. Consists of statistical revisions to the ITAs that have not yet been incorporated into the NIPAs and statistical revisions to the NIPAs that have not yet been incorporated into the ITAs.

3. Consists of transactions between the United States and its territories, Puerto Rico, and the Northern Mariana Islands. The treatment of U.S. territories, Puerto Rico, and the Northern Mariana Islands in the NIPAs differs from that in the ITAs. In the NIPAs, they are included in the rest of the world; in the ITAs, they are treated as part of the United States. The adjustment to unilateral current transfers, net (line 42) consists only of transfer payments from persons, because transfer payments, subsidies, and grants-in-aid from the federal government to residents of U.S. territories, Puerto Rico, and the Northern Mariana Islands are excluded from NIPA transfer payments to the rest of the world.

4. Beginning with 1988, the ITAs classify certain military grants as services that the NIPAs do not. In the NIPAs, these transactions are excluded from exports and included in transfer payments from government.

5. In the ITAs, income transactions between parents and affiliates are recorded on a net basis. In ITA exports, U.S. parents' receipts from foreign affiliates for interest are net of such payments by U.S. parents to foreign affiliates. In ITA imports, U.S. affiliates' payments to foreign parents for interest are net of such receipts by U.S. affiliates from foreign parents. In the NIPAs, these transactions are recorded on a gross basis. The amount of the adjustment is identical in income payments and in income receipts and, thus, does not affect NIPA net income receipts or balance on current account.

ITAs International transactions accounts

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; change in inventories is included in government consumption expenditures.
NOTE: Chain-type quantity indexes for net investment are computed from chained (2000) dollar estimates of net investment by scaling the chained-dollar estimates to 100 in the reference year (2000). Chained (2000) dollar estimates of net investment appear in table 5.2.6.

1. Gross government investment consists of general government and government enterprise expenditures for fixed assets; change in inventories is included in government consumption expenditures.

NOTE: Most chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. Chained (2000) dollar estimates of net investment are calculated by subtracting consumption of fixed capital from gross investment.

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
 2. Excludes software "embedded" or bundled, in computers and other equipment.
 3. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
 4. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
 5. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
 6. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.

2. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1.

3. Excludes software "embedded," or bundled, in computers and other equipment.

4. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.

5. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.

6. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.

7. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

Note: Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Consists of office buildings, except those constructed at manufacturing sites and those constructed by power utilities for their own use. Includes all financial buildings. Medical buildings are included in health care.
 2. Includes buildings and structures used by the retail, wholesale and selected service industries. Consists of auto dealerships, garages, service stations, drug stores, restaurants, mobile structures, and other structures used for commercial purposes. Bus or truck garages are included in transportation.
 3. Consists primarily of railroads.
 4. Includes water supply, sewage and waste disposal, public safety, highway and street, and conservation and development.
 5. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

1. Consists of office buildings, except those constructed at manufacturing sites and those constructed by power utilities for their own use. Includes all financial buildings. Medical buildings are included in health care.
2. Includes buildings and structures used by the retail, wholesale and selected service industries. Consists of auto dealerships, garages, service stations, drug stores, restaurants, mobile structures, and other structures used for commercial purposes. Bus or truck garages are included in transportation.
3. Consists primarily of railroads.
4. Includes water supply, sewage and waste disposal, public safety, highway and street, and conservation and development.
5. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

1. Consists of office buildings, except those constructed at manufacturing sites and those constructed by power utilities for their own use. Includes all financial buildings. Medical buildings are included in health care.
 2. Includes buildings and structures used by the retail, wholesale and selected service industries. Consists of auto dealerships, garages, service stations, drug stores, restaurants, mobile structures, and other structures used for commercial purposes. Bus or truck garages are included in transportation.
 3. Consists primarily of railroads.
 4. Includes water supply, sewage and waste disposal, public safety, highway and street, and conservation and development.
 5. Excludes net purchases of used structures and brokers' commissions on the sale of structures.
 Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Residual	37	-9.6	-12.9	-30.0	-54.5

1. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.5.2 and real growth rates are shown in table 5.5.1.

2. Excludes software "embedded," or bundled, in computers and other equipment.
NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines. n.e.c. Not elsewhere classified

1. This series is derived from the Census Bureau series "current cost inventories."

2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

Note: Estimates in this table are based on the North American Industry Classification System (NAICS).

Note: Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2000) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and space rent for owner-occupied housing. It includes a small amount of final sales by farm and by government enterprises.

Note: Estimates in this table are based on the North American Industry Classification System (NAICS).

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.
 2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and space rent for owner-occupied housing. It includes a small amount of final sales by farm and by government enterprises.
 Note: Estimates in this table are based on the North American Industry Classification System (NAICS).
 Chained (2000) dollar inventory series are calculated to ensure that the chained (2000) dollar change in inventories for 2000 equals the current-dollar change in inventories for 2000 and that the average of the 1999 and 2000 end-of-year chain-weighted and fixed-weighted inventories are equal.

1. Consists of general government and government enterprise expenditures for fixed assets.
 2. Structures and software include compensation of government employees engaged in new own-account investment and related expenditures for goods and services.
 3. Consists of Department of Defense new structures, except family housing.
 4. Consists of lodging, religious, communication, sewage and waste disposal, water supply structures, and manufacturing.
 5. Consists of lodging, communication, and manufacturing.
- Note. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Less: Migrants' transfers received by persons (net) ⁵	13	-1.7	-1.8	-2.1	-2.2

1. Beginning with October 2002, consists of payments to the Uniformed Services Retiree Health Care Fund to amortize the unfunded liability.

2. Consists of forgiveness of debts owed by foreign governments to the U.S. Government, and the December 1999 transfer to the Republic of Panama of the U.S. Government's assets in the Panama Canal Commission.

3. Consists of federal government investment grants for highways, transit, air and water transportation, and water treatment plants.

4. Consists of maritime construction subsidies paid by the federal government.

5. Consists of immigrants' transfers from the rest of the world, net of emigrants' transfers to the rest of the world.

1. NAICS crop and animal production.
 2. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.
 3. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
 4. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
 5. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
 6. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.
 7. Includes Coast Guard.
 8. Employees of Indian tribal governments are classified in state and local government.
 9. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.
 Note: Estimates in this table are based on the 1997 North American Industry Classification System (NAICS).

1. NAICS crop and animal production.

2. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.

3. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.

4. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.

5. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.

6. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.

7. Includes Coast Guard.

8. Employees of Indian tribal governments are classified in state and local government.

9. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

Note: Estimates in this table are based on the 1997 North American Industry Classification System (NAICS).

1. Full-time equivalent employees equals the number of employees on full-time schedules plus the number of employees on part-time schedules converted to a full-time basis. The number of full-time equivalent employees in each industry is the product of the total number of employees and the ratio of average weekly hours per employee for all employees to average weekly hours per employee on full-time schedules.

2. NAICS crop and animal production.

3. Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.

4. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.

5. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.

6. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.

7. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.

8. Includes Coast Guard.

9. Employees of Indian tribal governments are classified in state and local government.

10. Includes estimates of foreign professional workers and undocumented Mexican migratory workers employed temporarily in the United States.

Note. Estimates in this table are based on the 1997 North American Industry Classification System (NAICS).

Consists of furniture and home furnishings stores; electronics and appliance stores; building material and garden equipment and supplies dealers; health and personal care stores; gasoline stations; clothing and clothing accessories stores; sporting goods, hobby, book, and music stores; miscellaneous store retailers; and nonstore retailers.
 3. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.
 4. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.
 5. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.
 6. Consists of offices of bank and other holding companies and of corporate, subsidiary, and regional managing offices.
 7. Includes Coast Guard.
 8. Employees of Indian tribal governments are classified in state and local government.
 Note: Estimates in this table are based on the 1997 North American Industry Classification System (NAICS).

1. NAICS crop and animal production.

2. Consists of scenic and sightseeing transportation; transportation support activities; and couriers and messengers.

3. Intangible assets include patents, trademarks, and franchise agreements, but not copyrights.

4. Consists of accounting, tax preparation, bookkeeping, and payroll services; architectural, engineering, and related services; specialized design services; management, scientific, and technical consulting services; scientific research and development services; advertising and related services; and other professional, scientific, and technical services.

5. Consists of bank and other holding companies.

6. Consists of (1) receipts by U.S. residents of dividends from foreign corporations, plus (2) earnings distributed by unincorporated foreign affiliates to their U.S. parents.

7. Consists of (1) payments by U.S. corporations of dividends to foreign residents, plus (2) earnings distributed by unincorporated U.S. affiliates to their foreign parents.

NOTE: Estimates in this table are based on the 1997 North American Industry Classification System (NAICS).

Addenda:																							
Final sales of motor vehicles to domestic purchasers.....	43	507.0	525.5	529.6	514.0	526.8	515.5	534.8	554.2	497.7	529.1	526.2	533.1	529.9	524.1	513.3	511.1	507.4	487.2	441.4			
Private fixed investment in new autos and new light trucks.....	44	154.8	168.5	182.0	183.4	166.1	157.5	163.9	178.5	174.2	190.1	175.9	179.8	182.1	182.7	178.9	189.0	182.9	175.0	149.6			
Domestic output of new autos ²	45	91.5	101.6	103.4	100.0	94.5	99.8	98.5	101.6	106.3	108.3	102.1	102.5	100.5	98.4	96.7	101.8	102.9	102.7	96.6			
Sales of imported new autos ³	46	91.1	92.4	101.4	104.7	94.4	88.7	90.4	95.6	95.0	99.2	100.3	102.5	103.6	104.4	106.1	104.2	103.9	98.2	107.0			

1. Consists of used light trucks only.

2. Consists of final sales and change in private inventories of new autos assembled in the United States.

3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

NOTE: Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

Table 7.3.5. Farm Sector Output, Gross Value Added, and Net Value Added

Proprietors' income.....	25	-0.6	-0.7	-0.7	-0.8

1. Except for farm proprietorships and partnerships (line 15) and other private business (line 19), the capital consumption adjustment is calculated in two parts. The adjustment for consistent accounting at historical cost converts depreciation, based on the service lives and depreciation schedules applied by firms when filing their income tax returns, to consistent service lives and empirically based depreciation schedules. The adjustment for current-cost valuation converts the historical-cost series with consistent accounting to a series valued at current cost. For farm proprietorships and partnerships and for other private business, the historical-cost series is based on consistent service lives and empirically based depreciation schedules, so the adjustment reflects only a conversion to current-cost valuation.

Table 7.7. Business Current Transfer Payments by Type
[Billions of dollars]

	Line	2004	2005	2006	2007

						Personal interest income (92+100+101) or (32+61+65)	102	895.1	1,022.0	1,125.4	1,214.3

1. Excludes interest paid or received by government enterprises, which is included in the government sector.
 2. Consists of interest paid on the deposit liabilities of commercial and mutual savings banks, savings and loan associations, and credit unions.
 3. Consists of nonmortgage interest paid by households.
 4. Interest received by nonfinancial sole proprietorships and partnerships is considered interest received by persons and is included in line 32.
 5. Beginning with October 2002, includes the Uniformed Services Retiree Health Care Fund.
 6. Includes nonprofit institutions primarily serving households.

NOTE: In this table, imputed interest paid (line 41) is the sum of (1) premium supplements paid to property and casualty insurance carriers by households and institutions, governments, domestic business, and the rest of the world as a measure of imputed services provided to these sectors by the property and casualty insurance providers, (2) the difference between the property income received by financial intermediaries from the investment of depositors' or beneficiaries' funds and the interest paid by them to business, households and institutions, governments, and the rest of the world, and (3) the imputed services provided to these sectors in the role of borrowers of financial services; these services are included as negative amounts paid by the borrowers and received by the financial intermediaries.

General government consumption of fixed capital ¹⁰	181	192.4	207.5	223.7	241.4						
Gross government investment ¹¹	182	372.8	397.8	426.7	462.8						

1. Residential dwellings owned and used by nonprofit institutions serving households are included in owner-occupied housing categories.

2. Includes services furnished without payment by financial intermediaries except life insurance carriers to government employee retirement plans.

3. Classified as a service in exports, and as an income payment to the rest of the world.

4. Classified as a service in exports, and as an income receipt from the rest of the world.

5. For general government employees, recorded as compensation of employees (wages and salaries) and as a sale; does not affect government consumption expenditures. Similar payments for employees of government enterprises are not included in government consumption expenditures; they are deducted in the calculation of the surplus of government enterprises.

6. Health insurance premiums paid by employers are included in the calculation of the "health insurance" category of personal consumption expenditures (PCE); life insurance premiums paid by employers are included in the calculation of the "expenses of handling life insurance and pension plans" category of PCE.

7. Consists of the programs for which a social insurance fund is imputed, and for which contributions are set equal to benefits paid. These payments are funded directly out of the current budget. The specific programs consist of workers' compensation, unemployment insurance, and medical services for the dependents of active duty military personnel at nonmilitary facilities. Source data are not available for the corresponding treatment for similar state and local government programs. Similar payments for employees of government enterprises are not included in government consumption expenditures; they are deducted in the calculation of the surplus of government enterprises.

8. Consists of owner-occupant purchases of new single-family dwellings, including manufactured homes, expenditures on improvements, and payments of commissions on new and existing residential dwellings, less sales of dwellings to government. The series is calculated from the investment data prepared as part of BEA's capital stock estimates. It differs from the investment data shown in table 5.4.5 because the series shown in that table reflect total purchases by private business.

9. Excludes investment by nonprofit institutions serving households in residential properties, which is included in owner-occupant investment (see footnote 1) and in sales of existing structures to governments. The series is calculated from the investment data prepared as part of BEA's capital stock estimates. It differs from the investment data shown in table 5.4.5 because the series shown in that table reflect total purchases by private business.

10. The consumption of fixed capital (CFC) of government enterprises is not included in government consumption expenditures; it is deducted in the calculation of the current surplus of government enterprises and is recorded as part of total government CFC.

11. Includes gross investment of government enterprises.

Note. "Imputations" are transactions recorded in the national income and product accounts that are not transactions of the market economy. In this table, the imputations shown in the "specific imputations" section are those that affect gross domestic product (GDP). In table 7.11, "imputed" interest paid by life insurance carriers (line 46) consists of the property incomes earned on life insurance and pension reserves. These incomes are considered to be incomes received by persons and not by the insurance carriers; this reclassification is not considered an imputation for purposes of table 7.12, because it does not affect GDP.

1. Consists of intangible assets that the IRS allows to be amortized.

2. Consists of depreciation or amortization of the following items: Breeding, dairy, and work animals; motion picture films; rental videocassettes; and rental clothing.

3. Consists of depreciation of employees' motor vehicles reimbursed by business and depreciation of business motor vehicles charged to current expense.

4. Beginning with 1981, included in IRS depreciation (line 1).

5. Consists of depreciation of assets owned by Federal Reserve banks, Federally sponsored credit agencies, credit unions, and nonprofit institutions serving business; depreciation of interest paid by public utilities for own-account investment prior to 1987 (beginning with 1987, included in line 1).

6. Consists of depreciation or amortization of rental videocassettes and rental clothing.

Earnings of U.S. residents remitted by their unincorporated foreign affiliates	36	6.5	6.3		
Equals: Net corporate dividend payments, NIPAs	37	539.5	577.4	702.1	788.7

1. Consists largely of an adjustment to expense all meals and entertainment, of oilwell bonus payments written off, of adjustments for insurance carriers and savings and loan associations, of amortization of intangible assets, and of tax-exempt interest income.

2. Consists of the Farm Credit System and the Federal home loan banks.

3. Consists of nonprofit organizations serving business and of credit unions.

4. Includes the imputed financial service charge paid by corporations to domestic securities dealers who do not charge an explicit commission.

5. Beginning with 1984, the investment tax credit is included in other tax credits (line 26).

6. Consists largely of an adjustment to remove capital gains distributions of regulated investment companies.

1. Consists of interest paid by nonprofit organizations serving business and by credit unions.

2. Consists of construction interest capitalized on tax returns, interest reported on tax returns in cost of goods sold, and interest passed through to shareholders by small business corporations.

3. Consists of nonprofit organizations serving business, of credit unions, and of other tax-exempt interest received by commercial banks and nonlife insurance carriers.

4. Consists of interest received by credit agencies and finance companies reported as business receipts on tax returns and of interest passed through to shareholders by small business corporations.

NOTE: Total interest received by financial proprietorships and partnerships is not separately identified by the IRS.

IRS Internal Revenue Service

1. Total annual wages of workers covered by State unemployment insurance (UI) laws and by the Unemployment Compensation for Federal Employees program. Data for the most recent year are preliminary.

2. Consists of unreported wages and salaries paid by employers and of unreported tips.

3. Consists of voluntary contributions by employees. Prior to 1985, employers were not required to report these contributions. In 1985, reporting requirements were enacted by over one half of the States; by 1990, the requirement had been enacted by almost all States.

4. Consists of the difference between estimates from more comprehensive source data (excluding the adjustments in lines 2 and 3) and BLS wages and salaries.

5. Consists of wages and salaries for insurance agents classified as statutory employees, for students and their spouses employed by public colleges or universities, for nonprofit organizations not participating in the UI program, for judicial fees paid to jurors and witnesses, for compensation of prison inmates, for marriage and license fees paid to justices of the peace, and of other coverage adjustments.

BLS Bureau of Labor Statistics

GDP and Other Major NIPA Series, 1929–2008:II

The historical series from the national income and product accounts (NIPAs) have been updated to present revised estimates from the 2008 annual revision and the “advance” estimates for the second quarter of 2008.

Table 1 presents current-dollar estimates of gross domestic product (GDP) and its components. Table

2A presents estimates of real GDP and its components in chained dollars, and table 2B presents estimates of real GDP and its components in chain-type quantity indexes. Table 3 presents price indexes. Table 4 presents national income and personal income.

The estimates are available on BEA's Web site at <www.bea.gov>.

Table 1. Gross Domestic Product—Continues
[Billions of dollars; quarterly estimates are seasonally adjusted at annual rates]

See the note at the end of the table.

NOTE. Chain-type estimates provide the best available method for comparing the level of a given series at two points in time. Chained-dollar estimates are obtained by multiplying the chain-type quantity index for an aggregate by its value in current dollars in the reference year (currently 2000) and dividing by 100. For an analysis of changes over time in an aggregate or in a component, the percentage changes calculated from the chained-dollar estimates and the chain-type quantity indexes are the same. Thus, chained-dollar estimates can be used to compute "real" (that is, inflation-adjusted) rates of growth. However, comparisons of two or more different chained-dollar series must be made with caution, because the prices used as weights in the chained-dollar calculations usually differ from the prices in the reference period, and the resulting chained-dollar values for detailed GDP components usually do not sum to the chained-dollar estimate of GDP or to any intermediate aggregate. A measure of the extent of such differences is provided in most chained-dollar tables by a "residual" line, which indicates the difference between GDP (or another major aggregate) and the sum of the most detailed

components in the table.

It is usually best to make comparisons of aggregate series in current dollars or to use BEA's estimates of contributions to percent change. Measures of the contributions of components to the percentage change in real GDP and to the percentage change in other major aggregates are provided in NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, 5.3.2, 5.4.2A, 5.4.2B, and 5.5.2. In general, the use of chained-dollar estimates to calculate component shares or component contributions may be misleading for periods away from the reference year; component shares of GDP are provided in table 1.1.10. In the November 2003 SURVEY, the article "Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" discussed the advantages of using chain-weighted indexes and the challenges of using chained dollars. To assist users in undertaking historical analysis, BEA provides supplemental tables that present estimates for selected timespans in chained 1937, 1952, 1972, and 1982 dollars (see tables 1.1.6A, 1.1.6B, 1.1.6C, and 1.1.6D).

U.S. Affiliates of Foreign Companies

Operations in 2006

By Thomas Anderson

THE current-dollar value added of majority-owned U.S. affiliates of foreign companies grew 12 percent in 2006—the fastest rate of increase since 2000, when affiliate value added was boosted by record levels of new foreign direct investment, according to preliminary statistics derived from the Bureau of Economic Analysis' most recent annual survey of foreign direct investment in the United States. The 2006 increase, which was driven mostly by expansion of existing affiliate operations, was roughly double the growth rate of current-dollar value added for the U.S. economy as a whole; as a result, the affiliate share of total U.S. private industry value added rose from 5.8 percent in 2005 to 6.1 percent in 2006.

The 12 percent increase in value added by majority-owned nonbank U.S. affiliates ("U.S. affiliates") in 2006—from \$550 billion to \$615 billion—was substantially higher than the 7 percent increase in 2005 (table 1).¹ In comparison, total U.S. current-dollar value added in nonbank private industries increased 6 percent in 2006, following an increase of 7 percent in 2005. As a result of the faster growth by affiliates in 2006, the share of U.S. nonbank private industry value added accounted for by U.S. affiliates rose from 5.8 percent in 2005 to 6.1 percent in 2006, the highest affiliate share since 1988 (the earliest year for which estimates of the value added of majority-owned affiliates are available) (chart 1).

Much of the 2006 increase in affiliate value added reflected expanded production by existing affiliates, particularly in pharmaceuticals manufacturing, securities brokerage services, insurance services, and support activities for oil and gas extraction. New

1. This article focuses on the operations of nonbank U.S. affiliates that are majority-owned by foreign direct investors. The Bureau of Economic Analysis (BEA) also collects annual data on the operations of nonbank U.S. affiliates that are owned 50 percent or less by foreign direct investors; however, beginning with the 2002 benchmark survey, the data for these affiliates are less extensive than those for majority-owned affiliates. (Data on the operations of bank affiliates have been collected only in benchmark survey years. BEA has proposed to collect these data annually, beginning with 2008 data.) Selected data on the operations of all (majority-owned and minority-owned) nonbank U.S. affiliates are presented in tables that can be accessed on BEA's Web site at <www.bea.gov/international/di1fdiop.htm>. Majority-owned companies account for much of the foreign direct investment in the United States. In 2006, majority-owned nonbank U.S. affiliates accounted for 92 percent of the employment of all nonbank U.S. affiliates.

investments by foreign multinational companies—including acquisitions of U.S. companies by existing U.S. affiliates—were an important but secondary factor in the increase in affiliate value added and were partly offset by the effect of foreign sales or liquidations of

Notes: For improved comparability with U.S.-affiliate value added, U.S. private industry value added was adjusted to exclude value added in depository institutions and private households, imputed rental income from owner-occupied housing, and business transfer payments.

For the latest estimates of U.S. private industry value added, see Brian M. Lindberg and Justin M. Monardo, "Annual Industry Accounts: Advance Statistics on GDP by Industry for 2007" SURVEY OF CURRENT BUSINESS 88 (May 2008): 38–50.

For improved comparability with U.S.-affiliate employment, U.S. private industry employment was adjusted to exclude employment in depository institutions and private households.

For consistency with the coverage of the data on U.S. private industry employment, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate totals when the employment shares were computed.

affiliates or of their subsidiary units.²

Employment by majority-owned U.S. affiliates rose 2.5 percent in 2006, following an increase of 1.4 percent in 2005, the first increases in affiliate employment since 2000. Total U.S. employment in private industries rose 1.8 percent in 2006; as a consequence, the share of U.S. employment in private industries ticked up from 4.5 percent to 4.6 percent.³ The increase in affiliate employment was largely due to acquisitions by existing affiliates, especially in manufacturing and food services and drinking places (restaurants). Entry into the United States by new affiliates also contributed to the growth in employment. Despite these increases, the share of employment accounted for by affiliates remained below the 5.0 percent peak recorded in 2000.

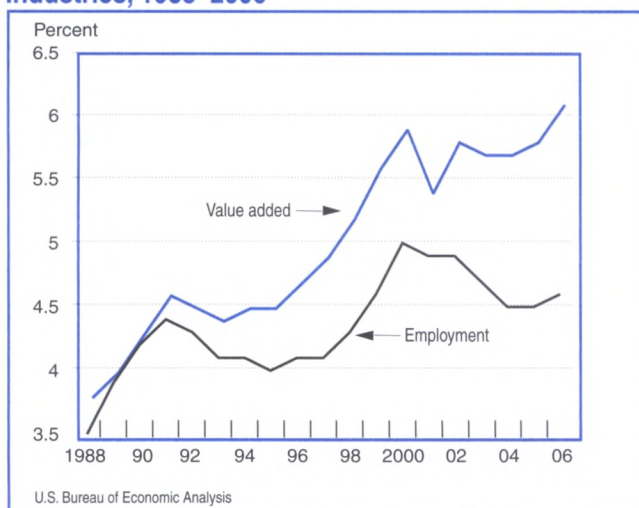

The following are additional highlights of the operations of U.S. affiliates in 2006:

- The United Kingdom continued to be the largest investing country in terms of value added, followed by Japan and Germany.
- Affiliates' shares of U.S. employment by industry were highest in mining and manufacturing.
- Affiliates' shares of employment by state were high-

2. According to data from BEA's survey of new foreign investments, outlays by foreign direct investors to acquire or establish businesses in the United States increased substantially, from \$91 billion in 2005 to \$165 billion in 2006, but they were still below the levels reached in each of the years in 1998–2000 (when outlays for new investment ranged from \$215 billion in 1998 to \$336 billion in 2000); see Louise Ku-Graf, "Foreign Direct Investment in the United States: New Investment in 2007," *SURVEY OF CURRENT BUSINESS* 88 (June 2008): 32–39.

3. Because U.S. affiliates tend to be concentrated in industrial sectors with relatively high value added per employee (such as manufacturing, mining, and wholesale trade) their share of U.S. employment has consistently been lower than their share of U.S. value added.

Chart 1. Majority-Owned Nonbank U.S.-Affiliate Share of U.S. Value Added and Employment in Private Industries, 1988–2006

est in South Carolina and Connecticut.

- Affiliates continued to account for a large share of both U.S. imports and U.S. exports of goods—26 percent of imports and 19 percent of exports.
- Research and development (R&D) spending by U.S. affiliates rose 10 percent to \$34.3 billion.

This article examines changes in value added, employment, exports and imports of goods, and R&D activity of U.S. affiliates of foreign companies in 2006. For each of these measures, changes are examined both in the aggregate and for each major investing country. For value added, changes are also examined by industry of affiliate and industry of the foreign owner. For employment, changes are examined by industry of affiliate and by state. Several additional measures of U.S.-affiliate operations are presented in tables at the end of this article.

Value Added

In 2006, the current-dollar value added of majority-owned nonbank U.S. affiliates increased 12 percent, to \$615 billion, while total U.S. current-dollar value added rose 6 percent. As a consequence, the share of value added in private industry accounted for by U.S. affiliates rose to 6.1 percent.

Reduction in Data Available for U.S. Affiliates

In order to align its programs with the available resources, BEA is reducing the detail and modifying the reporting criteria on the annual survey of the operations of U.S. affiliates of foreign multinational companies. Effective with the data year 2008, some data items will be dropped from the survey, reporting thresholds will be raised, and statistical sampling will be expanded. In conjunction with these changes, the level of detail published by country and by industry will be reduced to ensure that the published statistics continue to meet standards for statistical quality. Although statistics on U.S. affiliates will become less comprehensive, key data series will be maintained, including those on employment, value added, trade in goods, R&D expenditures, and sales of services.

These changes are part of a larger group of programmatic changes that BEA is making in order to align its work with current funding levels. In the international area, BEA also plans cutbacks in its annual survey of U.S. multinational companies, and it will eliminate its survey of new foreign direct investments, following the collection of data on transactions in 2008. Information on the Bureauwide program reductions is available at www.bea.gov/agency/availability_and_quality_of_data.htm.

By country of ownership

In 2006, seven major investing countries—Canada, France, Germany, Japan, the Netherlands, Switzerland, and the United Kingdom—accounted for more than three-fourths of the value added of majority-owned nonbank affiliates (table 2 and chart 2). In 2006, as has been the case for many years, affiliates with ultimate beneficial owners (UBOs) in the United Kingdom accounted for the largest share of affiliate value added (see the box “Key Terms”). British-owned affiliates accounted for slightly less than 20 percent of affiliate value added and for about 1 percent of total U.S. value added in private industries. Japanese-owned affiliates accounted for the second-largest share of affiliate value added (12 percent), and German-owned affiliates accounted for the third-largest share (11 percent).

Among the seven largest investing countries, Swiss-owned affiliates recorded the largest increases in affiliate value added in both dollar and percentage terms. Their value added rose by \$13.4 billion, or 37 percent. The increase was due largely to new investment and expansions in existing affiliate operations in “finance (except depository institutions) and insurance” and in pharmaceuticals manufacturing.⁴ In finance (except

banks) and insurance, the increase reflected both expansions in business activity (particularly by affiliates in the securities brokerage industry) and affiliate acquisitions of U.S. firms. In pharmaceuticals, Swiss-owned affiliates increased production significantly. As a result of these increases, Switzerland moved from seventh- to sixth-largest investing country in terms of value added, exchanging places with the Netherlands.

Value added by French-owned affiliates rose a substantial 18 percent, driven by acquisitions and expansion of existing affiliates in manufacturing and food services. Value added by Canadian-owned affiliates also rose 18 percent, driven by increased productivity among mining affiliates and the entry of new affiliates in finance.

For German- and Netherlands-owned affiliates, growth in value added was more modest. Value added by German-owned affiliates rose 4 percent, as increases in finance (except banks) and insurance were largely offset by decreases in manufacturing. Value added by Netherlands-owned affiliates rose 3 percent, as increases in wholesale and retail trade were largely offset by declines in insurance.

Among other investing countries, value added increased substantially for affiliates with UBOs in Denmark (52 percent), the United Kingdom Islands, Caribbean (48 percent), and Ireland (46 percent). Value-added growth by Danish-owned affiliates was

4. In the remainder of this article “banks” refers to “depository institutions,” which is the industry title that appears in the tables.

Chart 2. Investing-Country Shares of Value Added of U.S. Affiliates, 2006

driven largely by increases in transportation and warehousing and in wholesale trade. The increase by affiliates with UBOs in the United Kingdom Islands, Caribbean was mainly due to increases in finance and in support services for oil and gas extraction. The growth in value added by Irish-owned affiliates reflected acquisitions, including acquisitions of U.S. affiliates from foreign investors in other UBO countries. Value added also rose substantially for affiliates with UBOs in Israel, Bahrain, Kuwait, and the United Arab Emirates (included in "Other" under Middle East in table 2), partly as a result of new investments. Value added of affiliates with UBOs in Sweden fell 12 percent in 2006 because of selloffs of subsidiaries by several affiliates.

By industry of UBO

In 2006, affiliates whose UBOs were private entities accounted for over 97 percent of total U.S. affiliate value

added (table 3). The remaining 3 percent was accounted for by affiliates owned by government or government-related enterprises. Of the affiliates owned by private entities, those whose UBOs were businesses accounted for 88 percent of total affiliate value added, and those whose UBOs were individuals, estates, or trusts accounted for 9 percent.

By industry of affiliate

In 2006, manufacturing continued to account for the largest share of affiliate value added (43 percent); however, the share was down slightly from 2005 (45 percent) and continued a downward trend that began in the late 1990s (table 4). Wholesale trade, which includes several affiliates that also have substantial secondary operations in manufacturing, accounted for the second-largest share of affiliate value added (17 percent) and was also down slightly from 2005 (from 18 percent).⁵ Among other sectors, the share of affiliate

5. Each U.S. affiliate is classified in the industry that accounts for the largest portion of its sales; however, many large affiliates are involved in a variety of business activities. Changes in the mix of these activities may result in changes in an affiliate's industry classification.

Data Availability

This article summarizes the preliminary statistics from the 2006 annual survey of foreign direct investment in the United States. More detailed statistics will be posted this fall in files that can be downloaded at no charge from BEA's Web site at <www.bea.gov>. Revised estimates will be released in 2009.

Detailed statistics on U.S. affiliate operations for 1977–2006 are also available on BEA's Web site.

For more information on these products and how to access them, see the guide to BEA information on direct investment at <www.bea.gov>.

value added accounted for by affiliates in finance (except banks) and insurance increased the most, from 5 percent in 2005 to 7 percent in 2006.

Value added by manufacturing affiliates rose 8 percent in 2006, from \$246.2 billion to \$266.9 billion. More than half of the increase was in computers and electronic products and in chemicals. In computers and electronic products, value added grew 26 percent, driven largely by acquisitions. In chemicals, value added grew 19 percent, driven largely by expanded production by existing affiliates.

Outside of manufacturing, value added growth was

strong in finance (except banks) and insurance (41 percent), real estate and rental and leasing (27 percent), and information (16 percent). In finance (except banks) and insurance, the increase was largely attributable to securities and insurance affiliates. In real estate and rental and leasing, the increase was mostly accounted for by affiliates in commercial real estate. In information, the increase was accounted for by existing affiliates and the reclassification of some affiliates from other industries into information due to changes in the industry composition of their sales.

Employment

In 2006, employment by affiliates rose 2.5 percent, to 5,331,000 employees, following an increase of 1.4 percent in 2005. The increase in 2005 was the first since 2000. Despite these increases, employment by affiliates in 2006 was still 326,000 employees below the peak level of 5,657,000 reached in 2000. Total U.S. employment by nonbank private enterprises also rose in 2006 but at a slightly slower pace, 1.9 percent. As a consequence, the share of U.S. private industry employment accounted for by affiliates edged up from 4.5 percent in 2005 to 4.6 percent in 2006. Like the level of employment, the share of U.S. employment accounted for by affiliates remained below the 5.0 percent peak recorded in 2000.

By industry

As has been the case for many years, the U.S. affiliate share of employment at the sector level in 2006 was

Acknowledgments

The 2006 annual survey of foreign direct investment in the United States was conducted under the direction of Patricia E. Abaroa. Charles R. Gravitz supervised the processing of the survey. The following staff contributed to the processing and editing of the survey reports: George M. Bogachevsky, Chester C. Braham, Polly Y. Cheung, Karen M. Dennison, Constance T. Deve, Lonnie Hunter, Nazre Jamil, Julie A. Lampe, Marites R. Lucero, Emelia A. Marfo-Sarbeng, Demetria A. McCormick, Gregory L. McCormick, Sreedhar Pidathala, Makia M. Riley, Ronald L. Ross, Clarence D. Smith, John R. Starnes, and Christopher J. Stein.

Computer programming for data estimation and for the generation of tables was provided by Tara L. O'Brien, Neeta B. Kapoor, and Karen E. Poffel.

Table 4. Value Added of Majority-Owned Nonbank U.S. Affiliates by Industry of Affiliate, 2001–2006

	Millions of dollars						Percentage of all-industries total						Addendum: Percent change in affiliate value added, 2006
	2001	2002	2003	2004	2005	2006	2001	2002	2003	2004	2005	2006

D Suppressed to avoid disclosure of data of individual companies.

highest in mining (13.9 percent) (table 5).⁶ Affiliates also accounted for a relatively high share of employment in manufacturing (12.0 percent) and wholesale trade (7.9 percent). In contrast, affiliates accounted for very small shares of employment in service-oriented industries such as educational services (0.3 percent) and health care and social assistance (0.7 percent).

In manufacturing, the U.S. affiliate share edged up for a second consecutive year, from 11.9 percent to 12.0 percent, as affiliate employment in manufacturing rose in the face of a decrease in total U.S. manufacturing employment. The share of employment accounted for by affiliates rose in several manufacturing industries, notably nonmetallic mineral products, primary metals, and other transportation equipment. In non-metallic mineral products, the share rose from 25.2 percent in 2005 to 26.9 percent in 2006, partially as a

result of expansion by existing affiliates in the cement industry. In primary metals, the share rose from 16.7 percent to 17.6 percent, because of both the expansion of existing affiliates and the entry of new affiliates into the iron and steel industry. In other transportation equipment, the share rose from 9.4 percent to 10.3 percent, largely because of expansions by existing affiliates in aerospace product and parts manufacturing.

Outside of manufacturing, affiliate shares of employment also increased in several sectors. In wholesale trade, the share rose from 7.3 percent to 7.9 percent because of the entry of new affiliates and the acquisitions of U.S. companies by existing affiliates. In transportation and warehousing, the share grew from 4.8 percent to 5.1 percent, because of expansions by existing affiliates and the entry of several new affiliates in the transit and ground passenger transportation industries. In accommodation and food services, the share rose from 2.8 percent to 3.2 percent as a result of acquisitions by existing affiliates in food services. In professional, scientific and technical services, the share rose from 3.7 percent to 3.8 percent, continuing a several years long trend. The largest increases in this industry were among affiliates in computer system design and related services.

6. The estimates of U.S.-affiliate employment shares are derived from data on affiliate employment broken down by industry of sales, a basis which approximates the establishment-based disaggregation of the corresponding data for all U.S. businesses. See the box "Using Employment Data to Estimate Affiliate Shares of the U.S. Economy by Industry." Because employment by industry of sales more precisely reflects the industrial composition of affiliate business activities than data by industry of affiliate, the industry presentation in this section is more detailed than that presented in the section on value added by industry of affiliate.

Using Employment Data to Estimate Affiliate Shares of the U.S. Economy by Industry

The data on employment are used to estimate affiliate shares of the U.S. economy by industry on the basis of the North American Industry Classification System (NAICS) because these data can be disaggregated by industry of sales, a basis that approximates the disaggregation of the data for all U.S. businesses by industry of establishment.¹ Thus, using the data on affiliate employment, the affiliate shares of the U.S. economy can be calculated at a greater level of industry detail than is possible using the value-added estimates or other data, which can only be disaggregated on the basis of industry of affiliate.²

1. The data for all U.S. businesses used to compute the affiliate shares of employment by NAICS industry are from the national income and product accounts (see table 5, footnote 1).

2. Establishment-level data from a joint project of BEA and the Census Bureau can be used to calculate affiliate shares at an even greater level of detail. For affiliate shares based on establishment data for six-digit manufacturing and five-digit nonmanufacturing NAICS industries for 2002, see *Foreign Direct Investment in the United States: Establishment Data for 2002*. Similar data on a NAICS basis are available for 1997, and data on a Standard Industrial Classification basis are available for 1987 and 1992. Data for manufacturing industries only are available for 1988–91. These publications and SURVEY articles that analyze these data are available on the BEA's Web site at <www.bea.gov>, under "Operations of Multinational Companies" and then under "Product Guide for Foreign Direct Investment in the United States."

In the classification by industry of sales, the data on affiliate employment and sales are distributed among all of the industries in which the affiliate reports sales. As a result, employment classified by industry of sales should approximate that classified by industry of establishment (or plant), because an affiliate that has an establishment in an industry usually also has sales in that industry.³

In contrast, in the classification by industry of affiliate, all of the operations data (including the employment data) for an affiliate are assigned to that affiliate's "primary" industry—that is, the industry in which it has the most sales.⁴ As a result, any affiliate operations that take place in secondary industries will be classified as operations in the primary industry.

3. An exception is the case where one establishment of an affiliate provides all of its output to another establishment of that affiliate. For example, if an affiliate operates both a metal mine and a metal-manufacturing plant and if the entire output of the mine is used by the manufacturing plant, all of the affiliate's sales would be in metal manufacturing, and none, in metal mining. Thus, when the affiliate's employment is distributed by industry of sales, all of it would be classified in manufacturing, even though some of the employees work in an establishment in mining.

4. An affiliate's primary industry is based on a breakdown of the affiliate's sales by BEA's NAICS-based International Surveys Industry classification.

In mining, the affiliate share of employment fell from 15.0 percent to 13.9 percent, continuing a downward trend. In 2005 and 2006, affiliate employment in mining increased; however, total U.S. employment in this industry rose at an even faster pace. The share of employment accounted for by U.S. affiliates also fell in utilities and in administration, support, and waste management, in both cases largely because of selloffs by affiliates of subsidiary units.

By state

The states with the largest shares of private industry employment accounted for by majority-owned U.S. af-

filates in 2006 were Connecticut and South Carolina. In both states the share was 7.1 percent (table 6). Other states with a relatively high affiliate shares of employment include Delaware, New Hampshire, and New Jersey; each state had a 6.6 percent share. Among regions, New England's 6.0 percent share was the highest.

In Connecticut and South Carolina, about four-fifths of affiliate employment was accounted for by European-owned affiliates. Affiliates with UBOs in the Netherlands accounted for the largest share of affiliate employment in Connecticut. German-owned affiliates accounted for the largest share in South Carolina. Manufacturing employees accounted for about one-half of

n.a. Not applicable

1. The data on U.S. employment in private industries that were used in calculating these percentages are classified by industry of establishment. They are from table 6.4D of the "National Income and Product Account (NIPA) Tables." The total for U.S. employment in nonbank private industries is equal to employment in private industries less the employment of depository institutions and private households. The U.S. private-industry employment totals used to calculate the affiliate shares in "all industries" in this table differ from the U.S. employment totals used to calculate affiliate shares in table 6; the latter are from BEA's Regional Economic Information System. The estimates in table 6, unlike those used for this table, include employment in depository institutions. In addition, the estimates for table 6, unlike those used for this table, exclude U.S. residents temporarily employed abroad by U.S. businesses. They may also differ from NIPA estimates used for "all industries" in this table because of different definitions and revision schedules.

2. For consistency with the coverage of the data on U.S. employment in private industries, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate employment total when the percentage shares on this line were computed. Data needed to make this adjustment are not available for individual industries.

3. Total affiliate manufacturing employment and the shares of all-U.S.-business manufacturing employment accounted for by affiliates shown in this table differ from those shown in table 7. In this table, employment is classified by industry of sales, and the total for manufacturing includes some nonmanufacturing employees (see the box "Using Employment Data to Estimate Affiliate Shares of the U.S. Economy by Industry"), whereas

in table 7, affiliate manufacturing employment consists only of employees on the payrolls of manufacturing plants. Data on the latter basis are not available for the industries within manufacturing shown in this table. In addition, the total for manufacturing in this table includes oil and gas extraction, which is excluded from the total in table 7.

4. For both U.S. affiliates and all U.S. businesses, includes oil and gas extraction. (See note below.)

5. This line includes employment for which U.S. affiliates did not specify an industry of sales when they filed out their survey forms. Affiliates that filed the long form (that is, affiliates with assets, sales, or net income or loss greater than \$100 million in 2001 and greater than \$125 million in 2002–2006) had to specify only their 10 largest sales categories, and affiliates that filed the short form had to specify only their 4 largest sales categories.

NOTES: A significant portion of U.S.-affiliate employment in petroleum and coal products is accounted for by integrated petroleum companies that have, in addition to their manufacturing employees, substantial numbers of employees in petroleum extraction; because these employees cannot be identified separately, they are included in petroleum and coal products manufacturing. For consistency, employees of affiliates classified in the "oil and gas extraction without refining" industry and employees of all U.S. businesses in oil and gas extraction are also included in petroleum and coal products manufacturing rather than in mining.

The following ranges are given in employment cells that are suppressed: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

the employment by affiliates in South Carolina but accounted for only about one-fourth of the employment by affiliates in Connecticut (table 7).

About four-fifths of the states recorded gains in employment by affiliates in 2006, notably Florida, Illinois, and New Jersey. In Florida, affiliate employment rose by 17,300, or 8 percent, mainly as a result of acquisitions by existing U.S. affiliates in cement manufacturing and wholesale trade. In New Jersey, employment rose by

16,100, or 8 percent, largely as a result of acquisitions by affiliates in manufacturing and finance. In Illinois, employment rose by 14,500, or 6 percent, mainly as a result of acquisitions made by existing affiliates in manufacturing.

Employment by affiliates declined in a few states. The largest declines were in Oregon and Rhode Island. In Oregon, employment by affiliates fell 6,700, or 13 percent, largely as a result of cutbacks in employment

1. The data on employment in private industries used to calculate the shares shown in this table are from BEA's Regional Economic Information System. The totals are equal to employment in private industries less employment of private households. The U.S. employment totals used to calculate affiliate shares in this table differ from those used for tables 1 and 5, which are from tables 6.4D of the "National Income and Product Accounts (NIPA) Tables." They differ from the NIPA estimates of employment because they include depository institutions, and, by definition, they exclude U.S. residents temporarily employed abroad by U.S. businesses.

They also may differ from the NIPA estimates because of different definitions and revision schedules.

2. For consistency with the coverage of the private-industry employment data, U.S.-affiliate employment in Puerto Rico, in "other U.S. areas," and in "foreign" was excluded from the U.S.-affiliate employment total when the percentage shares on this line were computed.

3. Consists of the U.S. Virgin Islands, Guam, American Samoa, and all other outlying U.S. areas.

4. Consists of employees of U.S. affiliates working abroad.

by manufacturing affiliates and the selloff of subsidiaries by affiliates in utilities. In Rhode Island, employment by affiliates fell 4,700, or 19 percent, due to the selloff of subsidiaries by affiliates.

In manufacturing, affiliate shares of employment were highest in the District of Columbia (33.4 percent), South Carolina (21.8 percent), and New Hamp-

shire (21.7 percent) (table 7). The high affiliate share in the District of Columbia reflects the District's lack of total manufacturing.⁷ In South Carolina, most

7. Employment data from the BEA's Regional Economics Information System indicate that there were only 1,800 manufacturing employees in the District of Columbia in 2006; about half of these employees were in the printing and food manufacturing industries.

1. The data on employment in manufacturing used to calculate the shares shown in this table are from BEA's Regional Economic Information System. The U.S. manufacturing employment totals used to calculate shares in this table differ from the NIPA data for manufacturing used for table 5 (see footnote 1 to table 5).

2. Total affiliate manufacturing employment and the shares of all-U.S.-business manufacturing employment accounted for by affiliates in this table differ from those shown in table 5 (see footnote 3 to table 5). For consis-

tency with the coverage of the employment data for all U.S. manufacturing plants, U.S. affiliate employment in Puerto Rico, in "other U.S. areas" and in "foreign" was excluded from the U.S.-affiliate total when the percentage shares on this line were computed.

3. Consists of the U.S. Virgin Islands, Guam, American Samoa, and all other outlying U.S. areas.

4. Consists of employees of U.S. affiliates working abroad.

Note: The following ranges are given in employment cells that are suppressed: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

manufacturing employment was by European-owned affiliates, especially German- and French-owned affiliates, with Japanese-owned affiliates also contributing. In New Hampshire, most employment was also by European-owned affiliates: British-owned affiliates accounted for the largest share.

Manufacturing employment by affiliates rose in slightly more than half of the states. The largest increases

were in California and Illinois. In California, manufacturing employment by affiliates rose 8,200, or 7 percent. The increase was driven by the expansion of existing affiliates in pharmaceuticals and the entry of new affiliates in machinery manufacturing. In Illinois, manufacturing employment rose 4,800, or 8 percent, largely as a result of acquisitions by existing affiliates in food processing and machinery manufacturing.

Data on Foreign Direct Investment in the United States

BEA collects three broad sets of data on foreign direct investment in the United States: (1) financial and operating data of U.S. affiliates, (2) data on U.S. businesses newly acquired or established by foreign direct investors (new investment data), and (3) international transactions (balance of payments) and direct investment position data. This article presents the financial and operating data. The new investment data were published in "Foreign Direct Investment in the United States: New Investment in 2007" in the June 2008 issue of the SURVEY OF CURRENT BUSINESS. The international transactions and direct investment position data were published in the articles "The International Investment Position of the United States at Yearend 2007," "U.S. International Transactions: First Quarter of 2008," and "Direct Investment Positions for 2007: Country and Industry Detail" in the July 2008 SURVEY.

Each of the three data sets focuses on a distinct aspect of foreign direct investment. The financial and operating data provide a picture of the overall activities of the U.S. affiliates; the new investment data provide information about U.S. businesses that are newly acquired or established by foreign direct investors, regardless of whether the invested funds were raised in the United States or abroad; and the international transactions and direct investment position data cover foreign investors' transactions with, and positions in, both new and existing U.S. affiliates.¹

Financial and operating data of U.S. affiliates. The data on the overall operations of U.S. affiliates are collected in BEA's annual and benchmark surveys of foreign direct investment. Benchmark surveys are BEA's most comprehensive surveys of foreign direct investment in terms of

both coverage of companies and subject matter, and they are conducted every 5 years. The data cover U.S. affiliates' balance sheets and income statements, employment and compensation of employees, trade in goods, research and development expenditures, sources of finance, and selected data by state. In addition, the value added of affiliates is estimated from data reported in these surveys.

Except in benchmark survey years, these data, unlike the new investment data, cover only nonbank affiliates.² The financial and operating data for affiliates are on a fiscal year basis. They cover the entire operations of the U.S. affiliate regardless of the percentage of foreign ownership.

New investment data. The data on outlays by foreign direct investors to acquire or establish affiliates in the United States are collected on a calendar year basis in BEA's annual survey of new foreign direct investment. In addition, the surveys of new investment collect selected data on the operations of the newly acquired or established affiliates. For newly acquired affiliates, these data are for (or as of the end of) the most recent fiscal year preceding the acquisition, and for newly established businesses, they are projected for (or as of the end of) the first year of operation. The data cover the entire operations of the business irrespective of the percentage of foreign ownership.

International transactions and direct investment position data. These data are collected in the quarterly surveys of foreign direct investment. The data cover the U.S. affiliate's transactions and positions with its foreign parent and with other members of its foreign parent group, so these data focus on the foreign parent's share, or interest, in the affiliate rather than on the affiliate's overall size or level of operations. The major items included in the U.S. international transactions (balance of payments) accounts are direct investment financial flows, and direct investment income.

1. For a more detailed discussion of the differences between these three sets of data, see Alicia M. Quijano, "A Guide to BEA Statistics on Foreign Direct Investment in the United States," SURVEY 70 (February 1990): 29-37; <www.bea.gov/bea/mp_international.htm>.

For a comparison of the data on affiliate operations with the data on new investment, see the appendix "Sources of Data" in Mahnaz Fahim-Nader and William J. Zeile, "Foreign Direct Investment in the United States: New Investment in 1994 and Affiliate Operations in 1993," SURVEY 75 (May 1995): 68-70; <www.bea.gov/scb/index.htm>.

2. Beginning with survey year 2008, the BEA plans to extend the coverage of the annual survey to include U.S. affiliates that are banks in order to close a gap in its data on multinational companies.

Trade in Goods

Majority-owned U.S. affiliates of foreign-owned companies continued to account for large shares of total U.S. exports and imports of goods—19 percent of exports and 26 percent of imports in 2006 (table 8). These shares are much larger than the affiliate shares of either value added or employment, reflecting both the general international orientation of foreign-owned companies and their production and distribution ties to their foreign parents. Much of the trade in goods by affiliates—nearly 50 percent of exports and about 80 percent of imports—was accounted for by intrafirm transactions between the affiliates and their foreign parents or other member companies of their foreign parent groups (see the box “Key Terms”). The intrafirm trade of majority-owned U.S. affiliates has generally accounted for 8–10 percent of U.S. exports and for 20–25 percent of U.S. imports.⁸

8. A portion of the remaining trade, trade between U.S. parent companies and their majority-owned foreign affiliates, is also intrafirm trade.

For further information and analysis on intrafirm trade see William J. Zeile, “Trade in Goods Within Multinational Companies: Survey-Based Data and Findings for the United States of America” (paper prepared for the Organisation for Economic Co-Operation and Development Committee on Industry and Business Environment Working Party on Statistics, Session on Globalisation, Paris, November 3 and 4, 2003); <www.bea.gov/papers>.

^p Preliminary
^r Revised

Note: The data on U.S. exports and imports of goods used to compute the affiliate shares in this table are from the U.S. Census Bureau, and are on a Census Bureau basis.

Since the early 1990s, imports by U.S. affiliates have usually been at least twice as high as their exports, and the gap in earlier years was even larger. This trade gap for affiliates is substantially more pronounced than the gap between total U.S. imports and exports. The gap for affiliates is largely accounted for by wholesale trade affiliates, many of which were established to facilitate importing of goods manufactured abroad by their foreign parents. Since the late 1980s, the imports of wholesale trade affiliates have been two to four times as large as their exports, and these affiliates have consistently accounted for more than two-thirds of the total import-export gap of U.S. affiliates.⁹ Most of the remaining gap is accounted for by manufacturing affiliates, some of which have secondary activities in wholesale trade and some of which import parts and components produced by their foreign parents.

Exports

Exports of goods by U.S. affiliates rose 12 percent in 2006, to \$195.3 billion, following a 12 percent increase in 2005. Growth in total U.S. exports of goods in 2006 was 14 percent. As a result, the share of U.S. goods exports accounted for by affiliates fell slightly, from 19.2 percent in 2005 to 18.8 percent in 2006.

Most of the increase in exports by affiliates was accounted for by affiliates in manufacturing and wholesale trade. Within manufacturing, there were substantial increases in exports by affiliates in electrical equipment and transportation equipment. There was also a substantial increase in exports by affiliates in mining, especially metal ore mining.

In 2006, as has been the case for several years, the largest share of affiliate exports was accounted for by Japanese-owned affiliates (26 percent), followed by German-owned affiliates (22 percent) (table 9).

More than two-thirds of the increase in exports by affiliates was accounted for by German-, Japanese-, and Netherlands-owned affiliates. Among German-owned affiliates, most of the increase was by affiliates in electrical equipment and transportation equipment manufacturing. Among Japanese-owned affiliates, much of the increase was in affiliates in the various durable-goods wholesaling industries.

9. Although wholesale trade affiliates have consistently accounted for a dominant share of the affiliate import-export gap, their shares of both affiliate exports and imports have declined since the late 1980s. Their share of affiliate exports declined to 40 percent in 2006 from 66 percent in 1987, and their share of affiliate imports declined to 61 percent in 2006 from 78 percent in 1987. One reason for this change is the reorientation of some wholesale trade affiliates from importing manufactured goods for sale in the United States to manufacturing goods at U.S. facilities.

Key Terms

The following key terms are used to describe U.S. affiliates of foreign companies and their operations.

U.S. affiliate. A U.S. business enterprise in which there is foreign direct investment—that is, in which a single foreign person owns or controls, directly or indirectly, 10 percent or more of the voting securities (if the U.S. business enterprise is incorporated) or an equivalent interest (if the U.S. business enterprise is unincorporated). Person is broadly defined to include any individual, corporation, branch, partnership, associated group, association, estate, trust, or other organization, and any government (including any corporation, institution, or other entity or instrumentality of a government). A “foreign person” is any person that resides outside the United States—that is, outside the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and all U.S. territories and possessions.

Majority-owned U.S. affiliate. A U.S. affiliate that is owned more than 50 percent by foreign direct investors.

Foreign parent. The first person outside the United States in a U.S. affiliate’s ownership chain that has a direct investment interest in the affiliate.

Ultimate beneficial owner (UBO). That person, proceeding up a U.S. affiliate’s ownership chain, beginning with and including the foreign parent, that is not owned more than 50 percent by another person. Unlike the foreign parent, the UBO of an affiliate may be located in the United States. The UBO of each U.S. affiliate is identified to determine the person that ultimately owns or controls

the U.S. affiliate and that therefore ultimately derives the benefits from ownership or control.

Foreign parent group. Consists of (1) the foreign parent, (2) any foreign person, proceeding up the foreign parent’s ownership chain, that owns more than 50 percent of the person below it, up to and including the UBO, and (3) any foreign person, proceeding down the ownership chain(s) of each of these members, that is owned more than 50 percent by the person above it.

Value added. The contribution to U.S. gross domestic product, which is the market value of the goods and services produced by labor and property located in the United States. Value added can be measured as gross output (sales or receipts and other operating income plus inventory change) minus intermediate inputs (purchased goods and services). Alternatively, it can be measured as the sum of the costs incurred (except for intermediate inputs) and the profits earned in production. The value-added estimates for U.S. affiliates were prepared by summing cost and profit data collected in the annual and benchmark surveys of foreign direct investment in the United States. The estimates are measures of gross value added rather than measures of net value added because they are calculated without the deduction for the consumption of fixed capital used in production.

The estimates of value added of U.S. affiliates are conceptually consistent with BEA’s estimates of U.S. value added by industry.

Table 9. U.S. Trade in Goods by Majority-Owned Nonbank U.S. Affiliates by Selected Country of Ultimate Beneficial Owner, 2001–2006

D Suppressed to avoid disclosure of data of individual companies.

NOTE: Affiliates of the eight countries listed in this table accounted for the largest shares of affiliate trade in 2001–2006.

Among Netherlands-owned affiliates, petroleum wholesalers accounted for much of the increase.

Imports

Imports of goods by U.S. affiliates rose 7 percent in 2006, to \$482.4 billion, following an increase of 14 percent in 2005. Total U.S. imports grew 11 percent in 2006. As a consequence, the share of U.S. imports accounted for by affiliates fell to 26.0 percent in 2006 from 26.8 percent in 2005, continuing a long-term downward trend. Much of the increase in imports by affiliates in 2006 was accounted for by wholesale trade affiliates, especially those in motor vehicles, electrical goods, and machinery. Imports by manufacturing affiliates, especially transportation equipment manufacturers, also rose substantially.

Japanese-owned affiliates continued to account for the largest share of affiliate imports (33 percent). However, Japanese-owned affiliates' share declined in 2006, continuing a trend from the late 1990s, when Japanese-owned affiliates accounted for more than 40 percent of affiliate imports. As in previous years, the majority of imports by Japanese-owned affiliates were by wholesale trade affiliates, including affiliates that have significant secondary operations in transportation equipment manufacturing.

The largest increases in affiliate imports in dollar terms were by Japanese- and German-owned affiliates. The increase by Japanese-owned affiliates—from \$150.6 billion to \$159.4 billion—was largely in motor vehicle and motor vehicle parts and supplies wholesalers. The increase in imports by German-owned affiliates—from \$61.7 billion to \$68.3 billion—was mostly in electrical equipment and transportation equipment manufacturing. Imports by affiliates from smaller trading countries (those included in “Other” in table 9) increased substantially in 2006 and represented 20 percent of affiliate imports, up from 14 percent in 2001. Among these smaller countries, Venezuelan- and Saudi Arabian-owned affiliates accounted for about half of the increase in imports by affiliates in 2006. Imports by Canadian-owned affiliates fell 26 percent, largely as a result of decreased imports by affiliates in wholesale trade.

Research and Development

In 2006, expenditures for research and development (R&D) performed by U.S. affiliates totaled \$34.3 billion, up 10 percent from 2005 (table 10). In 2005, the

most recent year for which data for R&D spending by all U.S. businesses are available, U.S. affiliates accounted for 14 percent of the total R&D performed by all U.S. businesses, a share notably higher than the affiliate shares of U.S. private industry value added or employment.

Table 10. Research and Development Performed by Majority-Owned Nonbank U.S. Affiliates and All U.S. Businesses, 1997–2006

n.a. Not available

¹ Data are from the National Science Foundation's Web site at <www.nsf.gov/statistics/infbrief/nsf07335>.

Affiliates of the seven largest investing countries in terms of value added accounted for more than 80 percent of the R&D performed by affiliates (table 11). The largest shares of affiliate R&D spending were by British- and German-owned affiliates, each of which accounted for just under 20 percent. R&D spending by British-owned affiliates was predominantly by manufacturing affiliates, notably those in chemicals and computers and electronic products. R&D spending by German-owned affiliates was also concentrated in manufacturing affiliates, especially affiliates in chemicals and transportation equipment.

In 2006 as in previous years, manufacturing affiliates accounted for a dominant share of R&D performed by affiliates (73 percent). Within manufacturing, affiliates in chemicals and transportation equipment accounted for the largest shares of R&D spending.

By country of ownership, the largest increases in R&D expenditures by affiliates were among British- and Swiss-owned affiliates. Among affiliates of both countries the increases were mostly by existing affiliates in pharmaceuticals.

U.S. affiliate R&D intensity—defined as R&D expenditures divided by value added—was highest in three manufacturing industries: chemicals (22 percent), computers and electronic products (15 percent), and transportation equipment (11 percent). By

country, R&D intensity was highest among Swiss- and German-owned affiliates (10 percent each), reflecting the prominence of affiliates of these countries

n.a. Not available.
D Suppressed to avoid disclosure of data of individual companies.
1. Source: National Science Foundation.

2. Because of differences in industry classification, BEA data for U.S. affiliate R&D and NSF data for R&D by all U.S. businesses may not be compatible for all individual industries. Because this lack of compatibility may be particularly great for "other industries," the affiliate share of all R&D by U.S. businesses has not been computed for this industry category.

in R&D-intensive industries such as pharmaceuticals.

In 2005, the latest year for which data are available for all U.S. R&D performing companies, affiliates accounted for more than 20 percent of U.S. R&D spending in such manufacturing industries as basic chemicals and pharmaceuticals (table 12). The high shares are due both to the strong presence of U.S. affiliates in these industries and to the use of the United States by many foreign multinational companies as a center for conducting R&D. In contrast, in professional, technical, and scientific services, the U.S. affiliate share of private R&D spending was just 5 percent, reflecting the relative lack of foreign direct investment in that industry.

Revisions

The estimates of U.S. affiliate operations in 2006 are preliminary. The estimates for employment, sales, and expenditures for property, plant, and equipment supersede the advance summary estimates for majority-owned affiliates that were released on April 17, 2008 (BEA news release 08-15). From the advance estimates to the preliminary estimates, the estimates of employment and sales were each revised up 1.1 percent, and the estimate of capital expenditures was revised up 13.5 percent.¹⁰

The final estimates of U.S.-affiliate operations in 2005 are also presented. The final estimates for employment, sales, and expenditures for property, plant, and equipment supersede the advance summary estimates for majority-owned affiliates from the April release and the preliminary estimates that were released in August 2007.¹¹ From the estimates released in April to these final estimates, the estimate of employment was revised up 0.4 percent, the estimate of sales was revised up 0.6 percent, and the estimate of capital expenditures was revised up 11.9 percent. From the preliminary estimates to the final estimates, the estimate of employment was revised up 2.3 percent, the estimate of sales was revised up 0.6 percent, and the estimate of capital expenditures was revised up 8.5 percent.

10. The revision to the estimates for capital expenditures was large because in their initial reports to BEA, some U.S. affiliates excluded their spending for equipment that they leased or rented to others. Consequently, these expenditures were omitted from the April 2008 advance estimates. BEA worked with respondents to obtain these data, and they are now included in the estimates in this report.

11. See Thomas Anderson, "U.S. Affiliates of Foreign Companies: Operations in 2005," SURVEY 87 (August 2007): 194-211.

BEA Current and Historical Data

A selection of estimates from the national, industry, international, and regional accounts of the Bureau of Economic Analysis (BEA) are presented in this section. BEA's estimates are not copyrighted and may be reprinted without BEA's permission. Citing the SURVEY OF CURRENT BUSINESS and BEA as the source is appreciated.

More detailed estimates from BEA's accounts are available on BEA's Web site at <www.bea.gov>. These estimates are available in a variety of formats. In addition, news releases, articles, and other information, including methodologies and working papers, are available.

The tables present annual [A], quarterly [Q], and monthly [M] data.

International Data

F. Transactions tables

- F.1 U.S. international transactions in goods and services [A, M] D-2
- F.2 U.S. international transactions [A, Q] D-3
- F.3 U.S. international transactions by area [Q] D-4
- F.4 Private services transactions [A] D-7

G. Investment tables [A]

- G.1 U.S. international investment position D-8
- G.2 USDIA: Selected items D-9
- G.3 Selected financial and operating data of foreign affiliates of U.S. companies D-10
- G.4 FDIUS: Selected items D-11
- G.5 Selected financial and operating data of U.S. affiliates of foreign companies D-12

H. Charts

- The United States in the international economy D-13

Regional Data

I. State and regional tables

- I.1 Personal income [Q] D-14
- I.2 Personal income and per capita personal income [A] D-15
- I.3 Disposable personal income and per capita disposable personal income [A] D-16
- I.4 Gross domestic product by state [A] D-17

J. Local area table

- J.1 Personal income and per capita personal income by metropolitan area [A] D-18

K. Charts

- Selected regional estimates D-23

Appendixes

A. Additional information about the NIPA estimates

- Statistical conventions D-25
- Reconciliation table [A, Q] D-26

B. Suggested reading D-27

As a result of the annual revision of the national income and product accounts (NIPAs), the tables in sections A, B, C, and E and the NIPA charts in section D are not included in this issue. See "National Income and Product Accounts Tables" and "GDP and Other Major NIPA Series" in this issue.

International Data

F. Transactions Tables

Selected U.S. international transactions tables are presented in this section. For BEA's full set of detailed estimates of U.S. international transactions, visit BEA's Web site at <www.bea.gov>.

p Preliminary
r Revised

1. Reflects adjustments necessary to bring the Census Bureau's component data in line with the concepts and definitions used to prepare BEA's international and national accounts.

2. Contains goods that cannot be separately identified.

Source: U.S. Bureau of Economic Analysis and U.S. Census Bureau.

p Preliminary

(1) Transactions are less than \$500,000 (+/-)

1. Details not shown separately; see totals in lines 56 and 63.

2. Details not shown separately are included in line 69.

3. Estimates of financial derivatives for Mexico are included in Latin America and Other Western Hemisphere; and for China and India, in Asia and Pacific. Estimates for the Middle East are combined with estimates for Asia and Pacific.

^p Preliminary

1. Royalties and license fees and "other private services" by detailed type of service include both affiliated and unaffiliated transactions.

2. Includes royalties, license fees, and other fees associated with intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.

3. Includes royalties, license fees, and other fees associated with copyrights, trademarks, franchises, rights to broad-

cast live events, software licensing fees, and other intellectual property rights.

4. Other services receipts (exports) include mainly film and television tape rentals and expenditures of foreign residents temporarily working in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.

5. These reflect the amount of premiums explicitly charged by, or paid to, insurers and reinsurers.

p Preliminary

r Revised

* Less than \$500,000 (+/-)

..... Not applicable

1. Represents gains or losses on foreign-currency-denominated assets and liabilities due to their revaluation at current exchange rates.

2. Includes changes in coverage due to year-to-year changes in the composition of reporting panels, primarily for bank and nonbank estimates, and to the incorporation of survey results. Also includes capital gains and losses of direct investment affiliates and changes in positions that cannot be allocated to financial flows, price changes, or exchange-rate changes.

3. Financial flows and valuation adjustments for financial derivatives are available only on a net basis, which is shown on line 2; they are not separately available for gross positive fair values and gross negative fair values of financial derivatives. Consequently, columns (a) through (d) on lines 4, 5, and 24, 25 are not available.

4. Data are not separately available for the three types of valuation adjustments; therefore, the sum of all three types is shown in column (d). Price changes result from changes in the value of derivatives contracts due to changes in the value

of their underlying assets or reference rates, which may arise from movements in interest rates, stock prices, commodity prices, or other variables. Exchange-rate changes result from the revaluation of foreign-currency-denominated derivatives contracts at current exchange rates. "Other changes" can result when data on investment positions that had accumulated in prior periods are covered by a new or more complete survey.

5. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

6. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.

7. Also includes paid-in capital subscriptions to international financial institutions and outstanding amounts of miscellaneous claims that have been settled through international agreements to be payable to the U.S. government over periods in excess of 1 year. Excludes World War I debts that are not being serviced.

8. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

9. Primarily U.S. government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

THE U.S. IN THE INTERNATIONAL ECONOMY

U.S. Bureau of Economic Analysis

Regional Data

I. State and Regional Tables

The tables in this section include the most recent estimates of state personal income and gross domestic product by state. The sources of these estimates are noted.

The quarterly and annual estimates of state personal income and the estimates of gross domestic product by state are available online at <www.bea.gov>. For information on state personal income, e-mail <reis.remd@bea.gov>; write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5360. For information on gross domestic product by state, e-mail <spread@bea.gov>; write to the Regional Economic Analysis Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5340.

1. Per capita personal income was computed using midyear population estimates of the Census Bureau.

2. Percent change was calculated from unrounded data.

NOTE: The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the

methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 2 in "State Personal Income: Fourth Quarter of 2007 and Annual Estimates for 2007" in the April 2008 SURVEY OF CURRENT BUSINESS.

Table I.3. Disposable Personal Income and Per Capita Disposable Personal Income by State and Region

Area	Disposable personal income							Per capita disposable personal income ¹							Rank in United States

1. Per capita disposable personal income was computed using midyear population estimates of the Census Bureau.

2. Percent change was calculated from unrounded data.

Note: The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the

methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 3 in "State Personal Income: Fourth Quarter of 2007 and Annual Estimates for 2007" in the April 2008 SURVEY OF CURRENT BUSINESS.

Table I.4. Gross Domestic Product (GDP) by State for Industries, 2007

Note: Totals shown for the United States differ from the national income and product account estimates of gross domestic product (GDP) because GDP by state excludes and national GDP includes the compensation of Federal civilian and military personnel stationed abroad and government consumption of fixed capital for military structures located abroad

and for military equipment, except office equipment. Also, GDP by state and national GDP have different revision schedules.

Source: This table reflects the GDP-by-state estimates for 2007 that were released on June 5, 2008.

1. Per capita personal income was computed using Census Bureau midyear population estimates.

2. Percent change calculated from unrounded data.

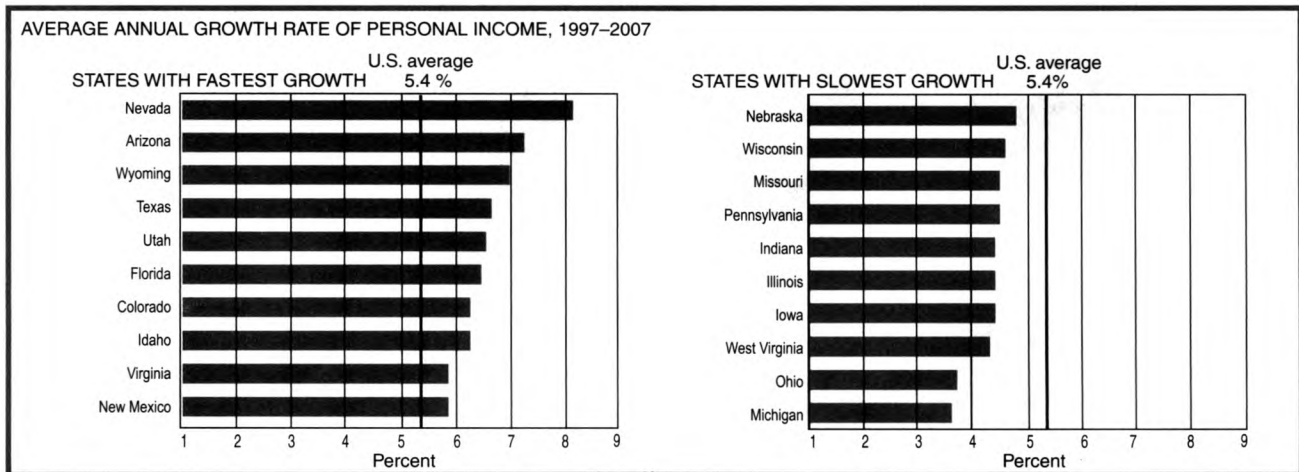

3. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

4. The metropolitan area definitions used by BEA for its personal income estimates are the new county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released February 2004, March 2005, December 2005, December 2006, and November 2007) for federal statistical purposes.

A. Additional Information About the NIPA Estimates

Statistical Conventions

Current-dollar GDP is a measure of the market value of goods, services, and structures that are produced in the economy in a particular period. The changes in current-dollar GDP can be decomposed into quantity and price components. Quantities, or “real” measures, and prices are expressed as index numbers with the reference year—at present, the year 2000—equal to 100.¹

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP for 2001–2002 uses prices for 2001 and 2002 as weights, and the 2001–2002 annual percent change in the GDP price index uses quantities for 2001 and 2002 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula. These annual changes are “chained” (multiplied) together to form time series of quantity and price indexes. The percent changes in the Fisher indexes are not affected by the choice of the reference year.

BEA also publishes implicit price deflators (IPDs), which are calculated as the ratio of the current-dollar value of a component to the chained-dollar value of the component, multiplied by 100. The values of an IPD are very close to the values of the corresponding “chain-type” price index.

The measures of real GDP and its major components are also presented in dollar-denominated form, designated “chained (2000) dollar estimates.” For most series, these estimates are computed by multiplying the current-dollar value in 2000 by a corresponding quantity index number and then dividing by 100. For example, if a current-dollar GDP component equaled \$100 in 2000 and if real output for this component increased by 10 percent in 2001, then the chained (2000) dollar value of this component in 2001 would be \$110 (\$100 × 1.10). The percent changes calculated from the chained (2000) dollar estimates and from the quantity indexes are the same; any differences will be small and due to rounding.

The chained-dollar values for the detailed GDP components will not necessarily sum to the chained-dollar estimate of GDP (or to any intermediate aggregate) in a table, because the relative prices that are used as weights for any period other than the reference year differ from those of the reference year. A measure of the effect of such

differences is provided by a “residual” line—the difference between the chained-dollar value of the main aggregate in the table and the sum of the most detailed components in the table. For periods close to the reference year, when the relative prices that are used as weights have usually not changed much, the residuals tend to be small, and the chained-dollar estimates can be used to approximate the contributions to growth and to aggregate the detailed estimates. For periods further from the reference year, the residuals tend to be larger, and the chained-dollar estimates are less useful for analyses of contributions to growth. In particular, for components for which relative prices are changing rapidly, the calculation of contributions based on chained-dollar estimates may be misleading even just a few years from the reference year. Thus, contributions derived from quantity indexes provide a better measure than contributions derived from chained-dollar estimates; contributions based on quantity indexes are shown in selected NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, and 5.3.2.

For quarters and months, NIPA estimates are presented at annual rates, which show the value that would be registered if the rate of activity that is measured for a quarter or for a month were maintained for a full year. Annual rates are used so that periods of different lengths—for example, quarters and years—may be more easily compared. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

For most quarterly NIPA estimates, *percent changes* in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_0} \right)^{m/n} - 1 \right] \times 100$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_0 is the level of activity in the earlier period; m is the periodicity of the data (for example, 1 for annual data, 4 for quarterly data, or 12 for monthly data); and n is the number of periods between the earlier periods and the later periods (that is, $t - 0$).

Quarterly and monthly NIPA estimates are seasonally adjusted if necessary. Seasonal adjustment removes from the time series the average effects of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

B. Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. Most of this information is available on BEA's Web site at <www.bea.gov>; see "Methodology Papers" and the SURVEY OF CURRENT BUSINESS under "Publications."

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of fixed assets and consumer durable goods.

National income and product accounts (NIPAs). This series of papers documents the conceptual framework of the NIPAs and the methodologies that have been used to prepare the estimates.

An Introduction to National Income and Product Accounts (2007)

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (2002)

Government Transactions (1988)

Measuring the Economy: A Primer on GDP and the National Income and Product Accounts (2007)

Personal Consumption Expenditures (1990)

The methodologies described in these papers have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPAs.

The following SURVEY articles describe the upcoming 2009 comprehensive revision of the NIPAs.

"Preview of the Revised NIPA Estimates for 2002: Effects of Incorporating the 2002 Benchmark I-O Accounts and Proposed Definition and Statistical Changes" (March 2008)

Preview of the 2009 Comprehensive NIPA Revision
New Classifications for Personal Consumption Expenditures (May 2008)

The following SURVEY articles describe the most recent comprehensive revision of the NIPAs.

"Improved Estimates of the National Income and Product Accounts for 1929–2002: Results of the Comprehensive Revision" (February 2004)

Preview of the 2003 Comprehensive NIPA Revision
New and Redesigned Tables (August 2003)
Statistical Changes (September 2003)

"Measuring the Services of Commercial Banks in the NIPAs: Changes in Concepts and Methods" (September 2003)

"Measuring the Services of Property-Casualty Insurance in the NIPAs: Changes in Concepts and Meth-

ods" (October 2003)

In addition, see the following articles.

"Annual Revision of the National Income and Product Accounts" (August 2008) presents revisions and describes any changes in the data and the methods that are used to prepare the estimates.

"Updated Summary NIPA Methodologies" (November 2007) describes the source data and the methods that are used to prepare the current-dollar and real estimates of GDP.

"Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" (November 2003) discusses the advantages of using chain-weighted indexes and the challenges of using chained dollars.

"Reliability of the NIPA Estimates of U.S. Economic Activity" (February 2005) evaluates the principal NIPA estimates by examining the record of revisions to them.

"Gross Domestic Product: Revisions and Source Data" (February 2006) describes the categories of data that are used for the advance, preliminary, and final quarterly estimates of GDP.

Fixed assets and consumer durable goods. *Fixed Assets and Consumer Durable Goods in the United States, 1925–97* (2003) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1925–2002" (May 2004) describes the improvements that were incorporated into these estimates as part of the most recent comprehensive NIPA revision.

"Fixed Assets and Consumer Durable Goods for 1997–2006" (September 2007) provides estimates that reflect the incorporation of the most recent annual NIPA revision.

Satellite accounts. These accounts extend the analytical capacity of the NIPAs by focusing on the effects of a particular aspect of economic activity on GDP.

"Research and Development Satellite Account"

For 1959–2002 (December 2006)

For 1959–2004 (October 2007)

Mission Statement and Strategic Plan

The mission statement of the Bureau of Economic Analysis and its most recently updated strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at <www.bea.gov> under "About BEA."

Industry accounts

The industry accounts consist of the annual industry accounts (the input-output accounts and the gross-domestic-product-by-industry accounts), the benchmark input-output accounts, and one satellite account.

Annual industry accounts. “Improved Annual Industry Accounts for 1998–2003” (June 2004) describes the comprehensive revision of the annual input-output accounts and the GDP-by-industry accounts that features the integration of the two sets of accounts.

“Annual Industry Accounts” (February 2008) presents the annual revision of these accounts and describes the source data and any changes in the methods that are used to prepare the estimates.

“Preview of the Comprehensive Revision of the Annual Industry Accounts: Integrating the Annual Input-Output Accounts and the Gross-Domestic-Product-by-Industry Accounts” (March 2004) provides the details about the comprehensive revision.

Benchmark input-output accounts. “Preview of the Benchmark Input-Output Accounts for 2002” (September 2005) includes the proposed new sectors that are based on the 2002 North American Industry Classification System.

“U.S. Benchmark Input-Output Accounts, 2002” (October 2007)

Satellite accounts. These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

“U.S. Travel and Tourism Satellite Accounts”

For 2001–2004 (June 2005)

For 2002–2005 (June 2006)

For 1998–2006 (June 2007)

For 2004–2007 (June 2008)

International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts. *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (1990) describes the methodologies used to prepare the estimates in the ITAs and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the international transactions accounts.

The annual revisions of the international transactions accounts are described in a series of articles, the latest of which was published in the July 2008 SURVEY.

Direct investment. *International Direct Investment: Studies by the Bureau of Economic Analysis* (1999) is a collection of previously published articles on U.S. di-

rect investment abroad and foreign direct investment in the United States. It includes “A Guide to BEA Statistics on U.S. Multinational Companies,” which is also available in the March 1995 SURVEY, and “A Guide to BEA Statistics on Foreign Direct Investment in the United States,” which is also available in the February 1990 SURVEY.

In addition, the updated methodologies are available in *U.S. Direct Investment Abroad: Final Results From the 1999 Benchmark Survey* (2004) and in *Foreign Direct Investment in the United States: Final Results From the 2002 Benchmark Survey* (2006).

International services. *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis* (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

“Selected Issues in the Measurement of U.S. International Services” (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services and explores possible actions to address these issues.

Regional accounts

The regional accounts include estimates of personal income and gross domestic product. The following methodologies are available on BEA’s Web site at <www.bea.gov/regional/methods.cfm>.

Personal income. Estimates of personal income are prepared for states and for local areas.

State Personal Income (2007) describes the improvements in the methodology that are used to prepare the estimates.

Local Area Personal Income (2007) describes the detailed methodology that is used to prepare the estimates for counties, metropolitan divisions and areas, micropolitan areas, and BEA economic areas and regions.

Gross domestic product. Estimates of gross domestic product (GDP) are prepared for states and metropolitan areas.

Gross Domestic Product by State (2006) describes the sources and the methods that are used to prepare the estimates.

“Gross Domestic Product by State” (July 2008) presents the most recent annual revision.

“Introducing New Measures of the Metropolitan Economy: Prototype GDP-by-Metropolitan-Area Estimates for 2001–2005” (November 2007) describes the potential uses of the estimates and the methodology used to prepare them.
