# SIXTEENTH ANNUAL REPORT <br> OF THE FEDERAL RESERVE BOARD 

COVERING OPERATIONS<br>FOR THE YEAR 1929

## THE FEDERAL RESERVE BUARD

DECEMBER 31, 1929

## ex officio members

A. W. Mellon, Secretary of the Treasury, Chairman.
J. W. Pole,

Comptroller of the Currency.

Roy A. Young, Governor. Edmund Platt, Vice Governor. Adolph C. Miller.
Charles S. Hamlin.
George R. James.
Edward H. Cunningham.

Walter L. Eddy, Secrelary.
E. M. McClelland,

Assistant Secretary.
J. C. Noell, Assistant Secretary.

Chief, Division of Examination, and Chief Federal Reserve Examiner. Walter Wyatt, General Counsel. W. M. Imlay, Fiscal Agent.
E. A. Goldenweiser,

Director, Division of Research and Statistics.
Carl E. Parry,
Assistant Director, Division of Research and Statistics.
E. L. Smead,

Chief, Division of Bank Operations.

## CONTENTS

TEXT OF REPORT
Page
First quarter ..... 1
Retrospect, 1922-1928 ..... 4
Second quarter ..... 7
Third quarter ..... 7
Last quarter ..... 8
Improvement in credit conditions ..... 12
Federal reserve bank credit in 1929 ..... 13
Earnings, expenses, and volume of work of the Federal reserve banks. ..... 16
Building operations of Federal reserve banks ..... 19
Branches and agencies of Federal reserve banks ..... 20
Changes in membership in the Federal reserve system ..... 20
Bank examinations ..... 21
Bank suspensions ..... 21
Branch banking ..... 24
Chain and group banking ..... 26
Bank mergers ..... 29
Banks on the par list ..... 31
Trust activities of national banks ..... 32
Progress of the gold standard ..... 32
Changes in the board's regulations ..... 32
Amendments to the Federal reserve act ..... 33
The Clayton Antitrust Act ..... 33
Discretion of board in approving the organization of foreign banking cor- porations ..... 34
Discretion of Federal reserve system regarding matters relating to credit policies ..... 34
Legislation recommended ..... 37
Meetings of the Federal Advisory Council ..... 41
Conferences held by the Federal Reserve Board ..... 41

No. 34. Average rates earned by Federal reserve banks on bills and securities, 1916-1929 ..... 92
No. 35. Open-market rates in New York City, by months, 1925-1929_ ..... 93
No. 36. Open-market rates in New York City, by weeks ..... 94
No. 37. Money rates in New York City-Prevailing rates charged customers, by months, 1925-1929 ..... 95
Foreign Rates:
No. 38. Discount rates at central banks in foreign countries-Changes from January 1, 1923, to December 31, 1929 ..... 96
No 39. Open-market rates in foreign countries, by months, 1925- 1929 ..... 97
MEMBER AND NONMEMBER BANK CREDIT
All Banks in the United States:
No. 40. Loans and investments of member and nonmember banks, 1914-1929 ..... 101
No. 41. Deposits of member and nonmember banks (exclusive of interbank deposits), 1914-1929 ..... 102
All Member Banks:
No. 42. Resources and liabilities of national and State bank members_ ..... 103
No. 43. Resources and liabilities of reserve city and country banks_- ..... 104
No. 44. Classification of member bank loans and investments on call dates ..... 105
No. 45. Principal resources and liabilities on call dates, 1914-1929 ..... 106
No. 46. Deposits subject to reserve, reserves required, reserves held, and borrowings at Federal reserve banks, by months ..... 108
No. 47. Reserve balances, by months, 1918-1929 ..... 109
No. 48. Borrowings at Federal reserve banks, by months, 1914-1929_ ..... 109
Reporting Member Banks in Leading Cities:
No. 49. Loans, investments, deposits, reserves, and borrowings at Federal reserve banks, by months, 1919-1929 ..... 110
No. 50. Principal resources and liabilities, by weeks ..... 112
No. 51. New York City banks-Principal resources and liabilities, by weeks ..... 114
No. 52. Banks outside New York City-Principal resources and liabilities, by weeks ..... 116
No. 53. Bankers' balances, by weeks: Total, New York City, other leading cities ..... 118
Brokers' Loans:
No. 54. Loans to brokers and dealers, secured by stocks and bonds, made by reporting member banks in New York City, by weeks ..... 119
No. 55. Brokers' borrowings, 1926-1929, as reported by New York Stock Exchange ..... 120
Bankers' Acceptances and Commercial Paper Outstanding: Page.
No. 56. Bankers' acceptances and commercial paper outstanding-. - ..... 121
No. 57. Bankers' acceptances outstanding, by classes ..... 121
No. 58. Distribution of bankers' acceptances outstanding, by months. ..... 122
Bank Debits:
No. 59. Debits to individual accounts by banks in 141 principal cities, by months, 1920-1929 ..... 122
Bank Suspensions:
No. 60. Banks suspended and reopened, by years, 1921-1929 ..... 123
No. 61. Bank suspensions, by months, 1925-1929 ..... 124
No. 62. Bank suspensions: Number, classified according to capital stock, 1921-1929 ..... 125
No. 63. Bank suspensions: By size of town or city, 1921-1929 ..... 125
Changes in Membership in the Federal Reserye System:
No. 64. Summary of changes, by years, 1925-1929 ..... 126
No. 65. Changes, by class of member, 1928 and 1929 ..... 126
Earnings, Expenses, and Dividends of Member Banks, 1923-1928:
No. 66. Earning assets, capital funds, and profits ..... 127
No. 67. Ratios of earnings, expenses, etc., to average earning assets. ..... 127
No. 68. Earnings, expenses, and dividends ..... 128
BANKING CONDITIONS IN FEDERAL RESERVE DISTRICTS AND STATES
Condition of Each Federal Resehve Bank:
No. 69. Bills discounted for member banks-Holdings, by months, 1925-1929 ..... 131
No. 70. Discounted bills-Holdings on December 31, 1929, by classes ..... 132
No. 71. Discounted bills-Holdings on December 31, 1929, by maturities ..... 132
No. 72. Principal resources and liabilities, by weeks ..... 133
Volume of Operations of Each Federal Reserve Bank:
No. 73. In principal departments ..... 145
No. 74. In branches ..... 146
Gold Settlement Fund:
No. 75. Summary of transactions through the fund, by districts ..... 147
Federal Reserve Agents' Gold Fund:
No. 76. Summary of transactions through the fund, by districts.... ..... 147
Membership in Par Collection System:
No. 77. Number of banks on par list and not on par list, by dis- tricts ..... 148
No. 78. Number of banks on par list and not on par list, by States, December 31, 1928 and 1929 ..... 149
Earnings and Expenses of Each Federal Reserve Bank:
No. 79. Gross and net earnings and disposition made of net earnings, 1914-1929 ..... 150
No. 80. Earnings and expenses in detail ..... 154
Condition of All Banks in Each District, 1923-1929:
No. 81. Total loans and investments ..... 156
No. 82. Total loans ..... 157
No. 83. Investments ..... 158
No. 84. Deposits (exclusive of interbank deposits) ..... 159
Condition of All Banks, by States, 1924-1929: Page
No. 85. Total loans and investments ..... 160
No. 86. Total loans ..... 161
No. 87. Investments ..... 162
Condition of All Member Banks in Each District:
No. 88. Principal resources and liabilities, on call dates, 1921-1929 ..... 163
No. 89. Net demand and time deposits, by months ..... 175
No. 90. Reserve balances, by months, 1927-1929 ..... 176
No. 91. Borrowings at Federal reserve banks, by months, 1928 and 1929 ..... 177
No. 92. Number of member banks discounting paper at Federal reserve banks, 1923-1929 ..... 177
No. 93. Classification of loans and investments on call dates ..... 178
Condition of All Member Banks, by States:
No. 94. Total loans and investments, 1927-1929 ..... 180

## LETTER OF TRANSMITTAL

## Federal Reserve Board, <br> Washington, April 7, 1930.

## To the Speaker of the House of Representatives:

Pursuant to the requirements of section 10 of the Federal reserve act, I have the honor to submit the sixteenth annual report, prepared by direction of the Federal Reserve Board covering operations during the calendar year 1929.

Yours respectfully,
R. A. Young, Governor.

## ANNUAL REPORT 0F THE FEDERAL RESERVE B0ARD

The year 1929 can be divided, from the point of view of credit developments, into two periods of unequal duration. The first 10 months of the year, taken as a whole, witnessed a further increase of demand for credit originating in the security market; a high level of money rates; aninflow of gold from abroad; and continuation of a firmmoney policy by the Federal reserve system. At the end of October the drop in security prices was accompanied by a subsidence in the demand for credit from the stock exchange; a drastic liquidation of security loans; outflow of gold; and an easing credit policy by the Federal reserve system. Industrial activity was in exceptionally large volume until the middle of the year, but began to recede in July and declined rapidly in November and December. Industrial profits were in record volume in the first three quarters of the year; factory payroll disbursements were in large amount, and the income of farmers was on about the same level as in other recent years. As a consequence, consumers' demand for commodities up to October was in larger volume than in 1928, but it receded in the last two months. During the earlier months of the year a considerable volume of gold imports resulted in a decrease of reserve-bank credit outstanding. Sales of securities by the Federal reserve banks, however, and a reduction in their portfolio of open-market bills, kept discounts for member banks at a high level until midsummer. In the latter part of the year large purchases of acceptances by the Federal reserve banks, followed in the last two months by purchases of Government securities, enabled member banks to reduce their borrowings, and by the end of the year discounts were in the smallest amount for nearly two years; this low level of indebtedness of member banks was an important factor in the easier condition of the money market.

## FIRST QUARTER

The year 1929 opened with total reserve-bank credit outstanding in larger volume than in any year since the postwar crisis. Security loans of member banks and brokers' loans had attained new peaks. Collateral indications derived principally from the intense activity of the securities markets and the unprecedented rise of security prices gave unmistakable evidence of an absorption of the country's
credit in speculative security operations to an alarming extent. There was nothing in the position of commercial credit or of business to occasion concern. The dangerous element in the credit situation was the continued and rapid growth of the volume of speculative security credit.

The measures taken by the Federal reserve banks in the year 1928 to firm-money conditions by sales of open-market investments and by successive increases of discount rates from $3 \frac{1 / 2}{2}$ per cent at the opening of the year to 5 per cent by midyear had not proved adequate. The second half of the year 1928 witnessed an aggravation of the conditions that had called forth the firm-money policy of the Federal reserve banks in the first half of the year.

The credit situation confronting the Federal reserve system at the opening of the year 1929, therefore, still stood in need of correction. The problem was to find suitable means by which the growing volume of security credit could be brought under orderly restraint without occasioning avoidable pressure on commercial credit and business. With the system portfolio of Government securities practically exhausted by the sales made in the first half of the year 1928, the main reliance in a further firming of money conditions must have been further marking up of Federal reserve discount rates, unless some other expedient could be brought to bear in the situation.

The board was not disposed to regard favorably further increases of the discount rate as the appropriate method of dealing with the situation presented, and particularly as the Federal reserve system was related to it; the board, therefore, did not approve the discount rate advances voted by some of the Federal reserve banks. It set forth its views of how the Federal reserve banks would best proceed in the circumstances in a letter to them under date of February 2, which was later supplemented by a statement further elaborating its position, issued to the public February 7 and reading as follows:
"The United States has during the last six years experienced a most remarkable run of economic activity and productivity. The production, distribution, and consumption of goods have been in unprecedented volume. The economic system of the country has functioned efficiently and smoothly. Among the factors which have contributed to this result, an important place must be assigned to the operation of our credit system and notably to the steadying influence and moderating policies of the Federal reserve system.
"During the last year or more, however, the functioning of the Federal reserve system has encountered interference by reason of the excessive amount of the country's credit absorbed in speculative security loans. The credit situation since the opening of the new year indicates that some of the factors which occasioned untoward developments during the year 1928 are still at work. The volume of speculative credit is still growing.
"Coming at a time when the country has lost some $\$ 500,000,000$ of gold, the effect of the great and growing volume of speculative
credit has already produced some strain which has reflected itself in advances of from 1 to $1 \frac{1}{2}$ per cent in the cost of credit for commercial uses. The matter is one that concerns every section of the country and every business interest, as an aggravation of these conditions may be expected to have detrimental effects on business and may impair its future.
"The Federal Reserve Board neither assumes the right nor has it any disposition to set itself up as an arbiter of security speculation or values. It is, however, its business to see to it that the Federal reserve banks function as effectively as conditions will permit. When it finds that conditions are arising which obstruct Federal reserve banks in the effective discharge of their function of so managing the credit facilities of the Federal reserve system as to accommodate commerce and business, it is its duty to inquire into them and to take such measures as may be deemed suitable and effective in the circumstances to correct them; which, in the immediate situation, means to restrain the use, either directly or indirectly, of Federal reserve credit facilities in aid of the growth of speculative credit. In this connection, the Federal Reserve Board, under date of February 2 , addressed a letter to the Federal reserve banks, which contains a fuller statement of its position:
"'The firming tendencies of the money market which have been in evidence since the beginning of the year-contrary to the usual trend at this season-make it incumbent upon the Federal reserve banks to give constant and close attention to the situation in order that no influence adverse to the trade and industry of the country shall be exercised by the trend of money conditions, beyond what may develop as inevitable.
"'The extraordinary absorption of funds in speculative security loans which has characterized the credit movement during the past year or more, in the judgment of the Federal Reserve Board, deserves particular attention lest it become a decisive factor working toward a still further firming of money rates to the prejudice of the country's commercial interests.
"'The resources of the Federal reserve system are ample for meeting the growth of the country's commercial needs for credit, provided they are competently administered and protected against seepage into uses not contemplated by the Federal reserve act.
"'The Federal reserve act does not, in the opinion of the Federal Reserve Board, contemplate the use of the resources of the Federal reserve banks for the creation or extension of speculative credit. A member bank is not within its reasonable claims for rediscount facilities at its Federal reserve bank when it borrows either for the purpose of making speculative loans or for the purpose of maintaining speculative loans.
"'The board has no disposition to assume authority to interfere with the loan practices of member banks so long as they do not involve the Federal reserve banks. It has, however, a grave responsibility whenever there is evidence that member banks are maintaining speculative security loans with the aid of Federal reserve credit. When such is the case the Federal reserve bank becomes either a contributing or a sustaining factor in the current volume of speculative security credit. This is not in harmony with the intent of the

Federal reserve act nor is it conducive to the wholesome operation of the banking and credit system of the country.'"

It is not for the Federal Reserve Board to estimate the general expediency or the larger public consequences of its intervention by "direct pressure" in the complex situation existing at the time the above statement was called forth. It may be remarked, however, that the course adopted by the board resulted in a substantial conservation of the credit resources of the banking system of the country, and particularly of the Federal reserve banks, for essential needs which arose later in the year.

The protection of Federal reserve credit against diversion into channels of speculation constitutes the most difficult and urgent problem confronting the Federal reserve system in its effort to work out a technique of credit control that shall bring to the country such steadinoss of credit conditions and such maintenance of economic stability as may be expected to result from competent administration of the resources of the system. Whatever method, or combination of methods, of securing these results may eventually win the sanction alike of successful practice and of public opinion, the recent outstanding experience of the Federal reserve system in demonstrating the practicability of "direct pressure" has clarified the problem and advanced its solution.

Although the Federal reserve system did not resort to advances in discount rates, it continued throughout the first quarter, in addition to pursuing the policy of direct pressure, to exert its influence toward firmer money conditions. The reserve banks' buying rates for bills were advanced in the early months of the year from $4 \frac{1}{2}$ to $5 \frac{3}{8}$ per cent on short maturities, a rate higher than the 5 per cent rate on discounts, with the consequence that funds arising from a considerable inflow of gold from abroad in the early months of the year were utilized for the liquidation of the system's acceptance holdings, rather than of discounts for member banks. After the first three weeks in January, at the end of the seasonal return flow of currency, discounts began to rise rapidly, and this growth was further accelerated by sales of United States securities out of the system's portfolio. In the spring discount, rates at the four western reserve banks, which had held their rates at $4 \frac{1}{2}$ per cent, were raised to the 5 per cent level prevailing at the other reserve banks.

## RETROSPECT: 1922-1928

The growth in security loans, which since November, 1927, had caused the Federal reserve system to pursue a policy of increasing firmness, was the outcome of developments that began in the spring of 1922. At that time the liquidation of the postwar boom had run its course and member bank discounts were at a relatively low point. Gold
was coming into this country in large volume and was no longer absorbed, as it had been in 1920 and 1921, in liquidating the indebtedness of member banks. This inflow of gold, continuing with only short interruptions to May, 1927, provided a basis for credit expansion by member banks without increasing their requirements for reserve-bank credit. Another important factor was the fact that on the liability side bank-credit expansion was represented in large part by a growth of time deposits, against which under the law only a 3 per cent reserve is required. The growth of member-bank credit, therefore, especially in 1925 and 1926, gave rise to less increase in member-bank reserve requirements than would otherwise have been the case. The entire period from 1922 to 1927 was consequently characterized by a relatively low level of money rates and an abundance of funds. In these circumstances, banks sought investment in securities and increased their loans on collateral, and more particularly their loans in the call-money market. A factor that contributed to the growth of security loans was a change in the methods of financing industry. Favorable conditions in the capital market caused many corporations to issue a large volume of securities, in many cases in excess of immediate financial requirements, and with part of the proceeds to pay off loans. Purchasers of the securities, in turn, in many cases borrowed a part of the purchase price and pledged the securities as collateral. As a result, bank loans directly to industrial and commercial enterprises were relatively diminished, while loans on securities increased. Such loans, which had constituted approximately 18 per cent of total loans and investments of member banks at the opening of 1922 , represented 28 per cent of member-bank credit at the opening of 1929.

Between 1922 and 1927 total loans and investments of all banks in the United States increased by nearly 40 per cent, or about $\$ 15,000,000,000$, the larger part of the increase being in the form of loans on securities and of investments. The corresponding growth in deposits was reflected in an increase of about $\$ 500,000,000$ in the reserve balances of member banks. This increase in the reserve requirements of member banks, together with a growth of $\$ 350,000,000$ in the demand for money in circulation, was met out of the increase of $\$ 750,000,000$ in the country's stock of monetary gold, together with a considerable increase in the volume of currency based on Treasury credit, chiefly in the form of silver certificates issued to take the place of retired Federal reserve bank notes. As a consequence of the growth in the gold stock and in Treasury credit, member banks were able to meet the demand for currency and for reserve balances without increasing their use of reserve-bank credit,
which actually showed a decrease of about $\$ 50,000,000$ during the 5 -year period.

A table bringing into comparison the volume of reserve-bank credit in use in 1922 and 1927, and showing the factors making for increases or for decreases in this volume over the period is presented below:

Reserve-Bank Credit and Factors in Changes: 1922-1927
[Annual averages of daily figures. In millions of dollars]

|  | 1022 | 1927 | Change |
| :---: | :---: | :---: | :---: |
| Reserve-bank credit | 1,226 | 1, 174 | -52 |
| Monetary gold stock | 3,801 | 4,564 | +763 |
| Treasury currency adjusted. | 1,603 | 1, 774 | +171 |
| Money in cireulation | 4,534 | 4,892 | +358 |
| Member bank reserve balances | 1,781 | 2, 290 | $+509$ |

This analysis indicates that gold imports were one of the principal factors in the credit situation between 1922 and 1927. The peak in the country's gold stock was reached in May, 1927, when a condition of ease in the money market in this country, encouraged by Federal reserve policy, resulted in an increase in the volume of flotation of foreign securities. Increased foreign borrowings in the United States and the much higher level of money rates abroad compared with the level in the United States caused a reversal of the gold movement, with the consequence that between the middle of May, 1927, and June, 1928, the country's gold stock was reduced by $\$ 600,000,000$. The firming effect of these exports of gold on the domestic credit situation was at first offset by the Federal reserve system through the purchase of securities, but a continuous growth of loans on securities in the United States caused the system in the early part of November, 1927, to discontinue these purchases. During the remainder of 1927 the gold exports were allowed to have their usual firming effect on the credit situation. Beginning with January, 1928, the system adopted a positive firm-money policy expressed through the sale of Government securities and through advances in discount rates in the course of 1928 from $31 / 2$ per cent to a level of 5 per cent at eight of the reserve banks, and to $4 \frac{1}{2}$ per cent at the four western banks. Buying rates for bills also were advanced.

This policy of firm money by the Federal reserve system resulted in a halt in the growth of bank credit beginning with the spring of 1928. The stock-market demand for credit, however, continued to grow, and the possession of considerable cash balances by corporations, derived from large issues of securities in a favorable market and from substantial earnings, made it possible for the market to
obtain funds directly from these corporations. So-called brokers' loans could, therefore, increase very rapidly, as they in fact did, although there was no growth in bank credit. Loans to brokers by nonbanking lenders, altbough they do not directly involve member banks, have nevertheless an effect on the banking situation, both because the banks are aware of the necessity of taking over such loans in case an emergency develops and because their existence and employment results in a much more active use of bank deposits. Greater activity of bank deposits reflected also the cessation in the middle of 1928 in the growth of time deposits, which had been increasing rapidly up to that time and which have a much slower rate of turnover than demand deposits.

## SECOND QUARTER

Credit policy of the Federal reserve system in 1929 was in continuation of its policy begun more than a year earlier. For eight weeks following the issuance of the board's statement on February 7, security loans fluctuated irregularly without definite trend, but in the first part of April they turned definitely downward and continued to decline until the end of May. During June, July, and August, however, speculation in securities once more became active, and the demand for security loans increased rapidly as stock prices advanced by about 25 per cent. At the end of the fiscal year there was also a large volume of rights issued to holders of securities entitling them to purchase additional shares of stock on favorable terms, and there was a consequent demand for credit to finance the purchases made in the exercise of these rights. During June this increased demand for security loans was supplied largely by banks, but in July, August, and September, the growth in stock-exchange loans was derived entirely from nonbanking lenders.

## THIRD QUARTER

At midyear, with the crop-moving season approaching, the business and credit situation was clearly defined. Industrial production was proceeding at an extraordinarily rapid rate, factory employment and pay rolls were at a high level, earnings of corporations were in record volume, capital issues were numerous and large, and prices of securities were rising. Bank credit, after showing no growth for about a year, began to increase rapidly in June. Rates charged by banks on loans to commercial customers had constantly advanced in leading cities since the beginning of 1928 and were in July, 1929, on a 6 per cent level, more than 1 per cent higher than 18 months earlier and higher than at any other time since 1921. Loans to brokers and

$$
90182-30-2
$$

dealers in securities in the New York market were increasing rapidly. In these circumstances, the discount rate at the Federal Reserve Bank of New York was advanced from 5 to 6 per cent, a level consistent with the rates prevailing in the open market, and calculated to exercise a restraining influence at the center of speculative activity. Discount rates at the other reserve banks remained at 5 per cent.

The advance in the New York discount rate, which became effective on August 9, was accompanied by a reduction in the reserve banks' buying rates for bills purchased in the open market. Acceptances outstanding generally increase in volume in the autumn months, when they are issued to finance the movement of crops to market in the United States and abroad. In 1929 the increase in acceptances began earlier in the year than usual. Notwithstanding the larger volume of acceptances issued, the demand for bills was strong, and there was a tendency for dealers' selling rates to become easier. In accordance with the reserve system's customary policy of facilitating the financing of crop movements, the reserve banks reduced their buying rates on open-market bills from a range in March of from $53 / 8$ to $53 / 4$ per cent, according to maturity, to one from $5 \frac{1}{4}$ to $5 \frac{1}{2}$ per cent on July 12 and from $5 \frac{1}{8}$ to $5 \frac{1}{2}$ per cent on August 9.

As a consequence of these changes in the rate structure, rates on bills, which from the early part of the year to August 9 had been above the discount rate, were after that date on a considerably lower level. Offerings of bills to the reserve banks consequently increased rapidly, and the system's holdings of acceptances, which at the beginning of August had been at the lowest level in five years, increased by $\$ 300,000,000$ in the following three months. This growth was considerably in excess of the seasonal demand for reservebank credit, which arises chiefly from increased currency requirements of the harvesting period. Discounts for member banks, therefore, decreased rapidly and were in the third week of October $\$ 230,-$ 000,000 below their level at the beginning of August. This decline in discounts for member banks, particularly at the banks in New York City, was reflected in pronounced easing of rates in the callloan market.

## LAST QUARTER

By the middle of October the situation had undergone a marked change from that prevailing in midsummer. Industrial production, which in June had reached the highest level on record, had shown some recession. Security prices were showing some decline from the record levels reached early in September. Bank credit was showing seasonal growth, while brokers' loans were increasing with unusual rapidity, the funds being supplied almost entirely by nonbanking lenders. These loans for nonbanking lenders had remained at a
fairly constant level in April, May, and June, but increased by about $\$ 1,000,000,000$ in the following four months. It would appear that a large part of this increase was supplied by investment trusts and trading companies, which were being organized extensively at that time. The issues of investment securities by investment trusts and similar organizations were, in fact, the principal factor in the growth of security issues in the autumn of 1929 and were an important source of brokers' loans for account of nonbanking lenders. These companies, having obtained funds from the public through the sale of their own securities, used portions of these funds in the call-loan market. The continued growth of brokers' loans up to the beginning of October, when security prices were tending downward, reflected also the effect of sales by outright owners or holders on relatively large equities to purchasers on credit whose equities were considerably smaller.

In September and October, therefore, recession in industry, reports of smaller corporate earnings, continued growth of brokers' loans, indicating a movement of securities from stronger to weaker hands, and many other factors were weakening the position of the security market. There was an important failure of a finance company in England, which resulted in a loss of confidence by British investors and some withdrawals of foreign funds from the New York market. On September 26 the Bank of England, which for several months had been losing reserves, raised its discount rate from $5 \frac{1}{2}$ to $6 \frac{1}{2}$ per cent. This series of events culminated in the last week in October in a break of unprecedented severity in stock prices, which by the middle of November were, on the average, 40 per cent below their maximum. Notwithstanding some recovery in the latter part of the year, the average of 404 common stocks stood at the end of December 35 per cent below the level of the middle of September.

Changes in the banking situation in the last two months of the year were largely in the nature of readjustments accompanying and following the drop in security prices. At first the changes were reflected primarily in the position of member banks in New York City. The growth of speculative activity had given the large banks in New York City a good deal of concern for several years. They had liquidated a part of their investments and had avoided a growth in their own loans to brokers, the volume of such loans in the middle of October being at about the same level as the average for the preceding four years. When the abrupt liquidation began these banks were therefore in a position to take care of the situation. During the week ending October 30 they increased their own loans and investments by $\$ 1,400,000,000$, largely because they took over loans of outside lenders, both out-of-town banks and others, who withdrew a large part of their loans from the market, leaving the

New York banks under the necessity of taking over, at least temporarily, a large volume of these loans. This resulted in the most rapid growth of bank credit on record in this country and in a proportionate increase in member bank reserve requirements. The reserve funds necessary to meet these increased requirements were supplied by the New York reserve bank, which loaned freely to member banks and also purchased $\$ 150,000,000$ of United States securities in the open market. As the liquidation of brokers' loans continued in November, it was reflected in a reduction of loans of this character by the New York banks for their own account. During the following eight weeks brokers' loans of New York banks declined by $\$ 1,200,-$ 000,000 and, just prior to the temporary end-of-year advance, these loans were at a level about $\$ 200,000,000$ below that on October 23, the last report date before the stock-market break.

Outside New York City the first few weeks after the break were also characterized by an increase in demand for bank credit, but later the outside banks also felt the relaxation of the credit demand from the security market. At the end of December loans and investments of all member banks showed an increase of $\$ 250,000,000$, or seven-tenths of 1 per cent for the entire year 1929, compared with a rate of growth of 4 per cent in 1928, 8 per cent in 1927, and $6 \frac{1}{2}$ per cent on the average for the years 1922 to 1927.

During the last three months of the year the net liquidation of loans on securities, by banks and by other lenders, may be estimated in the aggregate at $\$ 3,900,000,000$. Loans directly to brokers in New York declined by $\$ 4,500,000,000$, but this amount was offset in part by an increase of $\$ 600,000,000$ in security loans by banks to borrowers other than New York brokers. Even after allowance is made, therefore, for the fact that about one-eighth of the liquidation of brokers' loans represented a shift to other borrowers, the net decline in security loans for the period indicates liquidation on an unprecedented scale.

This liquidation was accompanied by a reversal of the credit policy of the Federal reserve system. Over a period of about two years increase in the volume of credit utilized in the security market had been the principal consideration determining the firm money policy of the system; and the diminution in the demand for such credit was followed by a reversal of the system's policy. During the first week of liquidation, when the member banks were taking over in large volume loans previously carried by nonbanking lenders, the reserve banks bought $\$ 150,000,000$ of United States Government securities, thereby reducing for member banks the necessity of borrowing at the reserve banks. The reserve banks continued this policy of openmarket purchases throughout November and the larger part of December, with the consequence that member banks were able to
meet the seasonal demand for currency, as well as considerable withdrawals of gold for export, and at the same time to decrease their indebtedness to the reserve banks. During the last week of the year the average volume of reserve-bank credit outstanding was about $\$ 150,000,000$ less than at the end of 1928 , the decrease corresponding to the net increase for the year in the country's stock of monetary gold. Decrease in the total volume of reserve-bank credit was accompanied by material changes of composition. Holdings of Government securities had increased by $\$ 250,000,000$ over the year, acceptances had decreased ${ }^{\circ}$ by $\$ 125,000,000$, and discounts by $\$ 300,000,000$. This decrease in discounts for member banks, which on the last day of December were at $\$ 630,000,000$, the lowest level since early in 1928 , indicates the extent to which the general credit situation had been eased during the year. The discount rate at the New York bank was reduced from 6 to 5 per cent on November 1 and to $4 \frac{1}{2}$ per cent on November 15. Reductions to $4 \frac{1}{2}$ per cent followed in the rates at Boston, Chicago, San Francisco, Atlanta, Kansas City, and (in January, 1930) Philadelphia. Buying rates on bills also were correspondingly reduced. Reserve system policy, therefore, during the last two months of the year, in contrast to the two preceding years, was exerted in the direction of easier money conditions.

This reversal of policy, made possible by diminution in the demand for credit in the security markets, appeared desirable also in view of the sharp reduction in business activity. Industry, which had been operating in record volume up to June, and notwithstanding some recession had remained at an exceptionally high level in the following four months, declined abruptly in November and still further in December. At the end of the year the volume of industrial production and of factory employment and pay rolls had been reduced to the lowest levels since November, 1927, when the recession of that year was at the lowest point. This change in the business situation was in part a reaction from the exceptionally large output in certain industries early in the year; it was also in part a consequence of the rapid rise and subsequent drop of security prices. The rapid rise in stock prices had in various ways stimulated business activity. Industrial enterprises had been encouraged by favorable conditions in the market to finance programs of expansion through the issue of common stocks; and financial houses, assured of a market for new issues, had been encouraged to launch new enterprises, as well as combinations and mergers of existing undertakings. A large amount of time and savings deposits was drawn out by the depositors and used for the purchase of securities, and funds that ordinarily would have been added to savings deposits were used for the same purpose, with the consequence that in 1929, in contrast with previous years, there was a decrease in the total volume of savings accounts. The large volume
of security issues had given rise to increased building operations for plant expansion and enlargement of existing facilities. During the period of rising stock prices, profits taken out of the market by successful traders in stocks had been an important factor in consumers' demand for many services and industrial products, particularly of the luxury type. To a certain extent these purchases of luxury goods were financed through the use of funds withdrawn from savings accounts by purchasers of securities. With the drop in stock prices, these influences were reversed. Investment houses found themselves with large blocks of unmarketed securities, and the public no longer offered a broad market for common stocks, with the consequence that the volume of new security issues diminished rapidly and was confined largely to high-grade bonds. Losses incurred in the break in stock prices reduced the demand of consumers for commodities, and especially for luxury goods, and this had an effect on industry, and especially on those lines of activity that had developed most rapidly in the spring and summer, such as the automobile and the iron and steel industries.

## IMPROVEMENT IN CREDIT CONDITIONS

Liquidation of bank credit in the last two months of 1929 and the easing policy of the reserve system were reflected 'in a decline of money rates in the United States, and particularly of open-market rates on call and short-time money. The decline of money rates and the diminished attractiveness of the security market as a field of investment caused the withdrawal of foreign funds, which had flowed to the United States in large volume during the period of high money and rising stock prices. In the last two months of the year there was an outflow of funds from this country and a withdrawal of gold for export. The country's stock of monetary gold, which had increased by $\$ 250,000,000$ during the first 10 months of 1929, declined by about $\$ 100,000,000$ in November and December. Foreign central banks, which had been obliged to advance their discount rates during the period when they were losing gold, were enabled to reduce these rates when gold began to flow back from the United States. Open-market rates abroad also became easier. It was apparent at the close of 1929, therefore, that the liquidation of security loans, which took place in the last two months of the year and resulted in an improvement in the credit situation in the United States, had also exerted an important favorable influence on worldcredit conditions.

## DETAILS OF OPERATION

In the preceding pages there has been presented a brief discussion of business and banking developments in 1929 and of the policies pursued by the Federal reserve system during the year. In the following sections of this report there is given a more detailed account of the operations of the Federal reserve banks and branches and of administrative matters with which the Federal Reserve Board has dealt during 1929.

## FEDERAL RESERVE BANK CREDIT IN 1929

Fluctuations in reserve-bank credit during 1929, as in other recent years, reflected largely changes in the movement of gold into and out of the country, in the demand of the public for currency, and in the demand of member banks for reserve balances. During the last month of the year, when seasonal demands were at a peak, the total volume of reserve-bank credit outstanding at $\$ 1,643,000,000$ was $\$ 181,000,000$ below December, 1928, but somewhat larger than in December, 1927. The chart shows the course of reserve-bank credit for the last five years and the major factors which are responsible for changes in its volume. The line at the top of the chart, which shows total reserve-bank credit and monetary gold stock combined, fluctuated over much the same range during 1929 as in the three preceding years. This indicates that since 1926 fluctuations of reserve-bank credit outstanding, after adjustment for the effect of gold movements, have been largely seasonal in character, and that there has been little net change in the aggregate for the past four years.

The most important factor of decrease in the demand for reservebank credit in 1929 was an inflow of gold from abroad during the first 10 months of the year equivalent in volume to the loss of gold during 1928. Part of this gold, however, was lost toward the close of the year when the liquidation of foreign holdings of American securities and the decline in money rates in the United States resulted in a considerable export movement of gold.

Seasonal fluctuations in the public demand for currency continued during 1929 to constitute the most important single factor in month-to-month changes in the demand for reserve-bank credit. During the greater part of the year the demand for currency was smaller than in the corresponding months of 1928, and for the year as a whole the average volume of currency in circulation was the lowest since 1922. This gradual decline in currency demand as compared with preceding years began in 1927, and in every month from February of that year until June, 1929, the volume of money in circu-
lation averaged lower than in the corresponding month of the preceding year. The table shows that this decline was small in the first quarter of 1927 , rose to a maximum of $\$ 132,000,000$ in the first quarter

of 1928, and decreased during the remainder of that year. In 1929 the volume of money in circulation in the first quarter averaged $\$ 21,000,000$ less than in the corresponding period of 1928 , and in the
second quarter, $\$ 46,000,000$ less. In the third quarter of 1929 , however, when the Treasury introduced new small-size notes into circulation, the demand for currency was increased temporarily to a level above the preceding year. The effect of this special demand for currency disappeared by the end of the third quarter, and in the fourth quarter the total volume of money in circulation again aver-

Volume of Money in Circulation, by Quarters, 1926-1929

| October-December. | 5,046 | 4,973 | 4,901 | 4,866 | -73 | -72 | -35 |

aged below the level of the preceding year. During the latter part of October and the first part of November the demand for currency appears to have been increased temporarily by the extraordinary turnover of bank funds which accompanied the break in the security market. During December the sharp recession in industrial pay rolls and employment resulted in a reduction of currency demand compared with the same period in 1928. The month of December as a whole, consequently, showed the largest drop from the preceding year of any month in 1929.

Changes in reserve-bank credit during the year also reflected changes in the demand of member banks for reserve balances. During the first half of the year member-bank reserve balances decreased somewhat; in the third quarter they showed a moderate increase reflecting a seasonal growth of bank credit, especially at the larger city member banks; and during the fourth quarter the demand for reserve balances was augmented sharply by developments in the call-loan market. Toward the end of October, nonbanking lenders withdrew funds in large volume from the call-loan market, and the larger New York City member banks, with whom these funds were deposited, took over the call loans from which they had been transferred. Subsequently these loans and deposits were liquidated, but in the interval reserve-bank credit was increased sharply by the larger demands of member banks for reserve balances against their increased deposit liabilities.

During the month of December the total volume of reserve-bank credit outstanding was $\$ 181,000,000$ less than in December, 1928, the decrease being wholly accounted for by a net increase in monetary gold stock of $\$ 183,000,000$ during the year. The following table
presents a complete analysis of all of the factors in changes in reservebank credit and indicates that the factors other than gold and currency approximately offset each other for the year. The demand for reserve-bank credit was decreased by the falling off in the demand for currency to the extent of $\$ 65,000,000$, by an increase in Treasury currency of $\$ 7,000,000$, and a decrease in nonmember balances of $\$ 2,000,000$, but the effect of these factors was offset by an increase in member-bank reserve balances amounting to $\$ 28,000,000$, and an increase in the unexpended capital funds of the reserve banks to the extent of $\$ 48,000,000$. This large increase in unexpended capital funds in 1929 followed upon a similar large increase in 1928, the increase in both years reflecting large increases in the capital of the reserve banks in consequence of growth in member-bank capital funds, and in addition relatively large earnings of the reserve banks available for increase of surplus.

EARNINGS, EXPENSES, AND VOLUME OF WORK OF THE FEDERAL RESERVE BANKS

Gross earnings of the Federal reserve banks in 1929, amounting to $\$ 70,955,000$, were the largest of any year since 1921. As compared with 1928 , earnings increased $\$ 7,000,000$, a falling off of $\$ 54,000,000$ in average holdings of bills and securities being more than offset by a rise in the rate of earnings thereon from 4.24 per cent in 1928 to 4.86 per cent in 1929. The increase in the average rate of return on total bills and securities was due both to a higher rate of return on each class of earning assets and to the fact that holdings of United States Government securities, having a yield lower than the discount rate, constituted a somewhat lower proportion of total assets than
in 1928. Holdings of discounted bills averaged $\$ 950,580,000$ daily during 1929 as compared with $\$ 839,942,000$ in 1928 , and the average return on discounted bills was 5.03 per cent as compared with 4.56 per cent in 1928. The increase in the amount of member-bank borrowings from Federal reserve banks together with the higher rate of return resulted in an increase in earnings on discounted bills from $\$ 38,334,000$ in 1928 to $\$ 47,791,000$ in 1929. Average daily holdings of bills bought in open market, $\$ 241,399,000$, were $\$ 86,407,000$ below those of 1928, and average daily holdings of United States Government securities, $\$ 207,659,000$, were $\$ 89,840,000$ below those of 1928 . Average daily holdings of bills and securities, earnings thereon, and annual rates of return for each of the past five years are given in the following table:

Average Holdings of Bills and Securities and Earnings Thereon

| Earnings: |  |  |  |  |  |
| 1925. | 39,986 45,460 | 17,680 22,552 | 9,104 10,003 | 12,783 12,589 | 419 |
| 1927 | 40,482 | 17,011 | -9, 207 | 14, 206 | 58 |
| 1928 | 62,275 | 38,334 | 13,02] | 10, 828 | 92 |
| 1929 | 68, 634 | 47,791 | 12,064 | 8,165 | 614 |

Total operating expenses of the Federal reserve banks, exclusive of the cost of Federal reserve currency, aggregated $\$ 26,592,000$ in 1929 as compared with $\$ 26,099,000$ in the year 1928. The cost of printing Federal reserve notes, including the cost of shipping charges to the Federal reserve banks and the cost of redeeming mutilated Federal reserve notes, was $\$ 3,099,000$ in 1929, compared with $\$ 806,000$ in 1928. Owing to reduced printings in 1928 in anticipation of the issuance of the new smaller size currency and the need in 1929 to provide ample reserve stocks of the new currency in addition to replacing the old size notes, the number of notes printed increased from $\$ 54,900,000$ in 1928 to $\$ 367,000,000$ in 1929.

While the average number of employees decreased from 10,095 in 1928 to 9,995 in 1929, there was again a substantial growth in the
volume of work handled in the principal departments of the banks, as will be noted from the following table showing the work handled in the principal departments during 1929 and the three preceding years:

Volume of Operations in Principal Defartments

In consequence of the increase in gross earnings, current net earnings for 1929 , which amounted to $\$ 41,264,000$, exceeded those of 1928 by $\$ 4,116,000$. With the approval of the Federal Reserve Board the banks charged their current net earnings with $\$ 1,952,000$ for depreciation on bank premises, with $\$ 538,000$ for furniture and equipment purchased during the year, with $\$ 633,000$, net, for reserves for probable losses on paper of failed banks, and with $\$ 1,788,000$ for reserves for self-insurance. After making these charges and other deductions, including a net loss of $\$ 75,000$ on the sale of United States securities, there was a balance of $\$ 36,402,741$ available for dividends, surplus, and franchise taxes. The 6 per cent dividend to member banks on their paid-in capital stock of the Federal reserve banks amounted to $\$ 9,583,913$, and of the remainder $\$ 22,535,597$ was transferred to surplus accounts in accordance with section 7 of the Federal reserve act, and $\$ 4,283,231$ was paid to the Government as a franchise tax. Section 7 provides that all net earnings of the Federal reserve banks, after payment of the 6 per cent dividend, shall
be transferred to their surplus accounts until such accounts amount to 100 per cent of their subscribed capital and that thereafter 10 per cent of the net earnings shall be paid into surplus accounts and 90 per cent to the Government as a franchise tax. At the end of 1929 the Federal Reserve Banks of Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, and Dallas all had surplus accounts in excess of subscribed capital and, therefore, each paid a franchise tax to the United States Government. As the surplus accounts of the five other Federal reserve banks were less than their subscribed capital, all of their net earnings remaining after the payment of dividends were transferred to surplus account. Notwithstanding the resulting increase in the surplus accounts of these five banks, the excess of their subscribed capital over surplus at the end of 1929, except in the case of Cleveland and San Francisco, was substantially greater than at the end of 1928, the member banks in these districts having subscribed to additional stock in their Federal reserve banks following increases during the year in their own capital accounts. The total subscribed capital of the Federal reserve banks on January 1, 1930, amounted to $\$ 341,951,000$ and the surplus accounts to $\$ 276,936,000$.

Gross and net earnings during the year and the distribution of net earnings of each Federal reserve bank are shown in the following table:

Financlal Results of Operations of the Federal Reserve Banks During 1929

| Federal reserve bank | Gross earnings | Net earn- ings | Dividends paía | Transferred to surplus | $\underset{\text { tax }}{\text { Franchise }}$ |

BUILDING OPERATIONS OF FEDERAL RESERVE BANKS
The building for the use of the Memphis branch, construction of which was begun in 1928, was completed in 1929, and was occupied on June 3. Construction of a building for the use of the Los Angeles branch, plans for which were in preparation at the end of 1928, was begun early in 1929, and was nearing completion at the end of the year. In May, 1929, the old building in Baltimore, formerly used by the Baltimore branch as a banking house, was sold by the Federal Reserve Bank of Richmond.

## BRANCHES AND AGENCIES OF FEDERAL RESERVE BANKS

The 25 branches and 2 agencies of the Federal reserve banks which were in operation at the end of 1928 continued to function throughout 1929. The volume of work handled by the branches and agencies in their principal operating departments has continued to increase, as may be seen by the following comparisons for $1926,1927,1928$, and 1929:

Volume of Operations of Federal Reserve Bank Branches and Agencies

|  | 1926 | 1927 | 1928 | 1929 |
| :---: | :---: | :---: | :---: | :---: |
| Checks handled: |  |  |  |  |
| Number of items.. | 240, 818,000 | 253, 322, 000 | 268, 814,000 | 277, 778, 000 |
| Amount | \$64, 716, 081, 000 | \$64, 724, 395, 000 | \$68, 273, 066,000 | \$72, 034, 805, 000 |
| Currency received and Number of pieces. | 492, 936, 000 | 497, 795, 000 | 535, 352,000 | 594, 449, 000 |
| Amount .-.-.-...- | \$2, 893, 286, 000 | \$2, 801, 165, 000 | \$2, 939, 837, 000 | \$3, 259, 688,000 |
| Coin received and coun | 416, 936, 000 | 441,072,000 | 453, 200, 000 | 466, 152,000 |
| Amount........ | \$66, 361, 000 | \$63, 450, 000 | \$67, 949,000 | \$76, 227,000 |

Current expenses during 1929 of the branches and agencies in operation during the year were $\$ 5,996,000$, as compared with $\$ 5,770,000$ in 1928.

## CHANGES IN MEMBERSHIP

During 1929 the number of member banks declined from 8,837 to 8,522 , or by 315 . Membership at the end of 1929 included 1,119 State banks, which was 89 less than a year earlier, and 7,403 national banks, which represented a decrease of 226 for the year. As in other recent years, the decline in the number of member banks resulted largely from mergers between member banks, suspensions, and absorptions by nonmember banks.

Additions to membership during the year include 71 newly organized national banks, 24 nonmember State banks which converted into national banks, and 27 State banks admitted to membership with State charters. There were also 5 member banks which, having previously suspended operations, reopened during the year. The total of 127 banks added to membership during the year does not, however, include 77 nonmember banks that were absorbed by member banks, although the assets of member banks were, of course, increased thereby.

Mergers between member banks account for a decrease of 171 in the number of such banks in 1929, as compared with 108 in 1928, but these mergers resulted in no corresponding decrease in the assets of member banks. Suspensions account for a loss of 82 in the number of member banks, as compared with 72 in 1928. A total of 144 member banks were lost to membership through conversion into or absorption by nonmember banks; there were 42 voluntary with-
drawals of State banks from membership, 1 compulsory withdrawal, and 3 instances in which the existence of member banks was terminated through voluntary liquidation.

In the following table changes in membership for the year 1929 are summarized, by class of member bank.

Changes in the Number of National and State Bank Members During 1929

| Procedure effecting change | Number of member banks |  |  |
| :---: | :---: | :---: | :---: |
|  | Total | National | State |
| Active member banks, Dec. 31, 1928 | 8,837 | 7,629 | 1,208 |
| Additions to membership: |  |  |  |
| Organization of national banks --........- | 71 | 71 |  |
| Conversion of nonmember bank to national | 24 | 24 |  |
| Resumption following suspension | 5 | 3 | 2 |
| Conversion within the system. |  | ${ }^{1} 6$ | ${ }^{6}$ |
| Total additions. | 127 | 104 | 35 |
| Losses to membership: |  |  |  |
| Merger between member banks- | 132 | 109 | 33 |
| Intraclass | 139 | 25 | 14 |
| Voluntary liquidation (terminal) | 3 | 3 |  |
| Suspension and insolvency | 82 | 65 | 17 |
| Absorption of member banks by nonmembe | 95 | 79 | 16 |
| Conversion of member bank to nonraember | 49 | 43 | 6 |
| Withdrawal of State bank....- | 42 |  | ${ }^{2} 42$ |
| Conversion within the system. |  | 16 | 16 |
| Total losses. | 442 | 330 | 124 |
| Net decrease. | 315 | 226 | 89 |
| Active member banks, Dec. 31, 1929. | 8,522 | 7,403 | 1,119 |

1 Conversions between the 2 classes of member banks, without effect on total membership in system.

- Including 1 compulsory withdrawal.

## BANK EXAMINATIONS

The board, through its division of examinations, conducted at least one examination of each Federal reserve bank during the year; one of the reserve banks was examined twice.

The one corporation operating under the provisions of section 25a of the Federal reserve act, generally referred to as the Edge Act, providing for banking corporations authorized to do foreign banking business, was also examined during the year.

Three other banking corporations operating under an agreement with the board, as provided for in section 25 , two of which are domiciled in Boston and one in New York City, were also examined.

## BANK SUSPENSIONS

A total of 642 member and nonmember banks, with aggregate deposits of $\$ 235,000,000$, suspended operations during 1929. The number of bank suspensions was 151 more than in 1928, while deposits of the banks that suspended in 1929 exceeded by $\$ 100,000,000$ the aqgregate deposits of banks that suspended the year before, and
were larger than in any other year except 1926, when both the number and deposits of suspended banks were the largest on record. During the year 58 banks with deposits of $\$ 26,000,000$, which had previously suspended operations, reopened for business. Member banks, which constitute about one-third of the total number of banks in the country, account for 81 of the suspensions, or about one-eighth of the total number of banks suspended during the year. Deposits of all member banks are approximately three-fifths of the aggregate deposits of all banks in the country, while the deposits of the member banks that suspended in 1929 were about one-fourth of the aggregate deposits of all suspended banks.

During the 9 -year period 1921-1929 a total of 5,642 banks were reported as having suspended operations either temporarily or permanently on account of financial difficulties, and of this number 659 have since been reopened. Deposits of the banks suspended during the 9 -year period were about $\$ 1,720,000,000$ and of the reopened banks $\$ 240,000,000$. Member banks suspended during the nine years numbered 994 and nonmember banks 4,648, while deposits of suspended member banks aggregated approximately $\$ 490,000,000$ and of suspended nonmember banks $\$ 1,230,000,000$.

The number and deposits of suspended banks are shown in the following table for the past nine years, by class of banks:

Bank Suspensions, 1921-1929

| Year | Number of suspensions |  |  | Deposits (in millions of dollars) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Member banks | Nonmember banks | Total | Member banks | Nonmember banks |
| 1921. | 1501 | 70 | ${ }^{1} 431$ | ${ }^{1} 196$ | 43 | 1154 |
| 1922. | 354 | 57 | 297 | 111 | 24 | 86 |
| 1923. | ${ }^{1} 648$ | 124 | ${ }^{1} 524$ | 189 | 51 | 138 |
| 1924. | 1776 | 159 | ${ }^{1} 617$ | 213 | 74 | 139 |
| 1925. | 612 | 146 | 466 | 173 | 67 | 106 |
| 1926. | 956 | 160 | 796 | 272 | 69 | 204 |
| 1927 | 662 | 124 | 538 | 194 | 66 | 128 |
| 1928 | 491 | 73 | 418 | 139 | 42 | 96 |
| 1929 | 642 | 81 | 561 | 234 | 57 | 177 |
| Total | 5,642 | 994 | 4,648 | 1,722 | 493 | 1,228 |

${ }^{1}$ Revised figures
The largest number of bank suspensions in 1929, as well as the largest increases compared with the previous year, are shown for the Atlanta and Kansas City Federal reserve districts. For the 9 -year period the largest number of suspensions were reported by the Minneapolis and Kansas City districts, in which 2,500 banks suspended. The number of suspensions in each district during 1929 and during the 9 -year period 1921-1929 are shown in the accompanying table:

Nomber of Bank Suspenstons, by Federal Reserve Districts, Durina 1929 and 1921-1929

| Federal reserve district | Total |  | Member banks |  | Nonmember banks |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1929 | 1921-1929 | 1929 | 1921-1929 | 1929 | 1921-1929 |
| All districts...---------- | 642 | 5,642 | 81 | 994 | 561 | 4,648 |
| Boston. |  | 15 |  | 3 |  | 12 |
| New York | 6 | 30 |  | 5 | 6 | 25 |

| Minneapolis | 84 | 1,481 | 12 | 273 | 72 | 1,208 |
| Kansas City | 193 | 1,019 | 6 | 124 | 187 | 895 |
| Dallas.- | 11 | 411 | 3 | 110 | 8 | 301 |
| San Francisco. | 16 | 242 | 4 | 95 | 12 | 147 |

The States for which the principal increases were reported in the number of bank suspensions for 1929 as compared with the preceding year are Nebraska, Florida, Oklahoma, and Illinois, the aggregate increase for these four States being 154 banks. Minnesota, Texas, and Kansas show substantial decreases in the number of suspended banks. In Nebraska, where 149 banks suspended in 1929, the increase is due principally to the fact that the guaranty fund commission ceased to operate in May, at which time it turned over to the State banking department, for liquidation through receivership, those banks which the commission had itself been operating in accordance with the guaranty fund law. In Florida, the suspensions were due largely to the inability of the banks to realize on slow assets acquired in prior years, apparently aggravated by heavy withdrawals brought about by the disturbance in the fruit industry resulting from the destruction wrought by the Mediterranean fruit fly. In Oklahoma the suspension of a chain of 12 banks accounts for the increase in the number of suspended banks. The following table shows the number and deposits of the banks that suspended operations in these and other selected States, both for 1929 and the 9-year period 1921-1929:

Bank Suspensions in Selected States During 1929 and 1921-1929

|  | State | Number of suspensions |  | Deposits (in millions of dollars) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1929 | 1921-1929 | 1929 | 1921-1929 |
| Iowa |  | 34 | 528 | 9 | 170 |
| North Dakota. |  | 36 | 429 | 4 | 70 |
| Minnesota.. |  | 31 | 411 | 9 | 117 |

| Total |  | 642 | 5, 642 | 235 | 1,722 |

Bank suspensions in 1929, as in earlier years, were most numerous among small banks located in relatively small centers. The following table gives a classification of banks suspended during the 9-year period 1921-1929, according to size of center in which located:

Bank Suspensions, 1921-1929, Classified According to Size of Bank and Size of Centers in Which Located

| Banks with cepital of- | Number suspended | Per cent of all suspensions | Banks located in centers with population of - |  | Per cent of all suspensions |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Less than $\$ 25,000$. | 2, 204 | 39.1 | Less than 500. | 2, 278 | 40.4 |
| \$25,000. | 1,310 | 23.2 | 500 to 1,000 | 1,133 | 20.1 |
| \$25.001 to $\$ 50,000$ | 485 | 8.6 | 1,000 to 1,500 | 567 | 10.1 |
| \$50,000 to \$100,000 | 985 | 17.4 | 1,500 to 2,500 | 537 | 9.5 |
| \$100,000 to \$200,000 | 404 | 7.2 | 2,500 to 5,000 | 413 | 7.3 |
| \$200,000 to \$600,000, inclusive. | ${ }^{1} 144$ | 2.6 | 5,000 to 10,000 | 239 | 4. |
| Figures not available....... | 110 | 1.9 | 10,000 and over | 475 | 8.4 |
| Total | 5,642 | 100.0 |  | 5,642 | 100.0 |

${ }^{1}$ Includes 1 bank with capital of $\$ 750,000,7$ banks with capital of $\$ 1,000,000,1$ with capital of $\$ 1,225,000$, and 1 with capital with $\$ 1,309,000$.

## BRANCH BANKING

Considerable extensions of branch-banking systems were effected during 1929 in individual instances through reorganizations, merger procedures, and purchases and conversions into branches of independent banks. The more important changes of this character, however, were restricted to a few States and urban communities, within what has come to be known as the branch-banking area, composed of States which permit State banking institutions to establish branches either freely or under specific statutory limitations with respect to number and location of branches and capital requirements of parent banks.

Developments during the year were generally in line with changes in other recent years. In each of the periods of approximately equal duration of 2 years and 8 months preceding and of 2 years and 10 months following the passage of the McFadden Act modifying Federal statutory provisions regulatory of branch banking under national charters and within the Federal reserve system, the number of banks in the country decreased from year to year (by 2,023 in the earlier and by 2,343 in the latter of the two periods), the number of banks operating branches increased slightly (by 65 and 43 in the two periods, respectively), and the number of branches increased gradually (by 607 and 647). As a result of these changes the proportion of branch offices in the total banking offices serving the public increased from 7 per cent in June, 1924, to 10 per cent in February, 1927, and to 13 per cent in December, 1929. In California, however, the number of branch offices was nearly double the number of independent banks,
and in several other States the proportion of branches exceeded one-third.

In the period following the passage of the McFadden Act to the end of 1929, 163 of the banks which were operating branches on February 25, 1927, discontinued branch banking, including cases of merger and suspension of parent bank and of discontinuance of all branches; 206 of the banks operating branches at the end of December, 1929, had initiated branch banking since February 25, 1927, giving the net increase of 43 for the period in number of banks operating branches. The increase of 647 shown for the period in the number of branches in operation covered 871 branch offices newly established during the period de novo as branches or by conversion of independent banks into branches following purchase or merger, and 224 cases of discontinuance of branches. About 1,000 of the 3,547 branches in operation on December 31, 1929, had been involved in merger procedures since the passage of the McFadden Act, many of these branches having been operated under several different head offices in succession. These changes involved numerous reclassifications of individual branches as operated by national, State member, or nonmember banks, as located in or outside the home city of the parent bank, and as embraced in small or large systems.

The area within which banks were operating branches on December 31 was composed of 29 States and the District of Columbia. In 8 of these States any further extension of branch banking has been prohibited by State law. State-wide branch banking is permitted in 9 States, and in 12 States the establishment of branches is restricted to the home city of the parent bank or territory nearly contiguous thereto, and in the District of Columbia to the district.

One-fourth of all branch offices in operation on December 31 were located in California, and over two-thirds of such offices were in the five States-California, New York, Michigan, Ohio, and Pennsylvania. Nearly one-half of the total increase in number of branches since February, 1927, has been reported for two of these StatesNew York and California. Two-thirds of all branches in operation on December 31 were home-city branches, and the increase in number of branches of member and nonmember banks in recent years had been largely in offices of this character. Moreover, recent developments of branch banking had been largely those reported for a relatively small number of urban communities, nearly one-sixth of all branches in the country- 580 out of 3,547 offices--being, for example, located in New York City, and more than 300 of the 439 branches reported for the State of Michigan in the city of Detroit.

Consolidations resulting in the building up of branch systems had been consummated very generally in several States. In California,
for example, one State system operating 160 branches in December represented largely purchase of independent banks for conversion into branches and mergers of smaller branch systems, including one which in February, 1927, was operating 34 branches. Another California system of 139 branches in December represented a merger with a national bank of two State systems which in February, 1927, were operating 98 and 49 branches, respectively. One Detroit system of 94 branches in December represented the merger of two systems which were operating 46 and 45 branches in February, 1927, and several New York City systems had been built up largely by merger of smaller systems.

A large proportion (nearly two-fifths) of all branch offices in the country on December 31 were embraced in 18 systems of more than 30 branches with head offices in six cities- 2 in San Francisco, 4 in Los Angeles, 7 in New York, 1 in Buffalo, 3 in Detroit, and 1 in Cleveland. It was, however, true in December, as on earlier dates for which data have been compiled, that a large majority of the banks operating branches were operating only 1 or 2 branches each-in December 448 of the 822 banks operating branches were operating only 1 branch each, 150 were operating 2, and 124 were operating 3 to 5 branches.

More than one-half of the 1,115 branches located outside the home city of the parent bank were located in places of less than 2,500 population. In New York, Michigan, and several other States in which the development of branch banking has been considerable, however, banks are not permitted to establish branches outside the city of the parent bank.

## CHAIN AND GROUP BANKING

Reports to the board by Federal reserve agents covering chain and group banking developments listed 287 banking chains or groups of three or more banks each as being in operation at the end of December. These chains and groups comprised a total of 2,103 banks ( 802 national and 1,301 State institutions), some of which were operating extensive branch systems. Loans and investments of these chains and groups totaled at the end of the year approximately $\$ 11,200,000,000$, or nearly one-fifth of total loans and investments of all banks in the country. The number of national and State banks in chains and groups as reported for June and December is given in the accompanying table. Banks classified in this table as not in chains or groups include some banks closely affiliated with other banks, since, as noted above, only banks in groups of three or more institutions are classified as operating in such systems.

Banks in Chains or Groups

| Class of bank | Number of banks |  |  | Loans and investments ${ }^{\text {a }}$ |  |  |

${ }^{1}$ Figures for chain and group banks are*based largely on condition figures published in July, 1929.
Comparison of figures for June with those for December indicates a considerable extension of chain and group banking during the second half of 1929, although no material increase is shown for these six months in the number of chains and groups in operation. The number of banks operating in chains or groups increased by 282 , while the number of banks not in chains or groups decreased by 762; and loans and investments reported for chain and group system banks were larger by some $\$ 2,900,000,000$ at the end than at the beginning of the period, and for other banks smaller by some $\$ 2,900,000,000$.

This extension of chain and group banking, it appears on detailed analysis of the figures, was largely confined to certain States, and represented in large measure the rapid expansion of a few groups. Two Minneapolis systems increased, one from 20 banks in June to 92 banks in December, and one from 12 to 78 banks. One Detroit group not in existence in June comprised 35 banks in December. Banks operating in chains and groups increased in Minnesota from 261 in June to 308 in December; in Michigan from 86 to 135; in North Dakota from 100 to 114. In each of these three States more than one-half of total loans and investments of all banks in the State were reported for banks operating in chain and group systems. More than one-third of the loans and investments of California's 437 banks were reported by the 49 banks operating in chains and groups, and nearly one-third of the loans and investments of Illinois' 1,765 banks were reported by 84 members of chain and group systems. The proportion in chain and group systems was high also in Washington, South Dakgta, Idaho, Florida, and Georgia.

One group system in December comprised 92 banks, this being the maximum number of banks comprised in any single system. Of these 92 banks 46 were located in Minnesota, the remaining 46 institutions being located in 7 other Western and Central States. In many other instances, also, these systems extended beyond State boundaries. A classification of chains and groups by number of banks comprised in each chain or group follows:

| Size of chain or group: |  |
| :---: | :---: |
| 3 banks.-.-- | -- 64 |
| 4 banks | - 56 |
| 5 banks. | - 39 |
| 6 to 9 banks. | - 86 |
| 10 to 19 banks | - 32 |
| 20 to 25 banks. | - 5 |
| 35 banks. | -. 1 |
| 66 banks. | - 1 |
| 71 banks. | 1 |
| 78 banks. | 1 |
| 92 banks | 1 |
| Total | 287 |

While chain and group systems were found operating in a large majority of the States, developments of this character were relatively more considerable in certain States which have prohibited or imposed restrictions upon the establishment of branch offices. Chain, group, and branch banking may, however, interlock and supplement each other in States which permit branch banking, as in California, where State-wide branch banking is permitted. Other branch-banking States, in which chain and group banking developments have been considerable, include Michigan, New York, New Jersey, and Massachusetts. In these States branch banking is restricted to the home city of the parent bank, and systems of local branches have been supplemented by chain or group banking developments. One Michigan group comprised in December 35 banks with 74 home-city branches and another group in this State comprised 21 banks with 213 branches. A majority of the banks operating in chains or groups were, however, located in States which do not permit branch banking.

Of the larger chain or group systems in operation on December 31, however, a very considerable number comprised one or more banks operating branches, and while in a majority of instances the banking offices of these systems, including head offices of banks with their branches, were located in the same State as the offices of the controlling agencies, in some instances banks and branches of a single system were located in several States. One Minneapolis system controlled banks located in eight States and in four Federal reserve districts, and one group system with head office in New York City, with aggregate doans and investments in excess of $\$ 1,400,000,000$, comprised two
extensive branch systems in California, one of 287 and one of 160 branch offices, and one branch system of 34 branches located in New York City. The system having the second largest aggregate of loans and investments comprised 5 banks with 179 branch offices located in three States-New York, California, and Pennsylvania. ${ }^{1}$

On the basis of reports to the board three types of banking chains or groups may be distinguished: (1) Those in which control is exercised by a holding corporation, generally formed by interests connected with one or more of the principal banks belonging to the chain; (2) those in which control is held or exercised by the principal bank of the group, through ownership of stock either by such bank or by its stockholders or directors; and (3) those in which control is exercised by an individual, family, or group of individuals through ownership of a substantial or controlling interest in a number of banks. Of the 287 chains or groups in operation in December, 53 were classified as being of the first type, 44 of the second, and 190 of the third. Chains and groups of the third type, which generally comprise small banks, are more numerous, but the recent expansion has been almost entirely in the building up of groups of the first or holding-company type, which appears to be the type that most easily lends itself to expansion.

## BANK MERGERS

Merger procedures during 1929 involved in individual instances large aggregates of banking resources, and effected in many communities far reaching realignments of banking control. The number of mergers involving member banks of the Federal reserve system, and resulting net changes in the classification of these banks during the past five years are shown in the accompanying table.

During these years progressive integration of banking control has in its larger aspects clearly reflected-although it has followed rather than preceded-a similar integration of control which has been in process throughout industry generally. Consolidation has gone less far in the field of banking than in many lines of manufacturing, marketing, and public utility operation, and much less far in the United States than in other countries. Banking in the United States is conducted under the diverse statutory banking codes of 48 States and the Federal Government. These codes and administrative policies formulated under them in the States have been generally restrictive of concentration of banking control. While, however, protection of the small, independent unit bank has been a traditional policy in a majority of the States, it is true, nevertheless, that policies

[^0]Mergers Affecting Member Banks: 1925-1929

| Merger of State with national.--- | 6 | 9 | 52 | 26 |  |

favorable to the merging of small banks under certain conditions have been consistently followed by some State banking authorities. Partly as a result of such procedures the number of independent banking units has been steadily decreasing in recent years. A reduction of some $5,500^{1}$ in the number of banks in the United States has occurred during the past eight years (from $30,812^{2}$ in 1921 to $25,330^{2}$ in June of 1929), during which period banking resources have increased approximately from $\$ 50,000,000,000$ to $\$ 72,000,000,000$, or by $\$ 22,000,000,000$. In this period the average size of the bank (as measured by total resources) has increased, in round numbers, from $\$ 1,600,000$ to $\$ 2,850,000$. This decrease in number of banking institutions in a period characterized by rapid accumulation of banking resources has reflected a merging of these resources and a corresponding centralization of corporate banking control. As further evidence of extensive merging of banking resources in large aggregates, it may be noted that in June, 1929, approximately one-half of the banking resources of the country were reported by 1 per cent of the 25,330 banking institutions in the country.

[^1]In the months immediately following the passage of the McFadden Act early in 1927 the drift away from the national system through mergers of National with State institutions which had been in evidence for several years was temporarily stopped, but during the past year in a large majority of instances of important mergers involving National and State institutions national charters were surrendered, with resultant withdrawal of resources in large volume from the national system. In almost all of these important instances, however, the merger has involved a State bank or trust company already a member of the Federal reserve system and the consolidated institution has continued to be a member of the Federal reserve system.

## BANKS ON PAR LIST

At the end of 1929 there were 24,321 incorporated banks other than mutual savings banks in the United States. Of this number, 20,567 , or 84.6 per cent, were on the Federal reserve par list, which comprises all member banks and such nonmember banks as have agreed to pay, without deduction of exchange charges, such checks drawn upon them as are presented or forwarded for payment by the Federal reserve banks. During the year the number of nonmember banks on the par list declined by 598, owing in part to suspensions and consolidations. Of the 3,754 banks not on the par list at the end of 1929, 2,101 were located in the Southern and 1,557 in the North Central States. As will be seen from the following table, all of the banks in the Boston, New York, and Philadelphia districts and all but nine in the Cleveland district were on the Federal reserve par list:

Number of Banks on Par List and Not on Par List at End of 1929 and 1928

| Federal reserve district | Member banks |  | Nonmember banks |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

1 Incorporated banks other than mutual savings banks.

## TRUST ACTIVITIES OF NATIONAL BANKS

The Federal Reserve Board in 1929 approved 165 original and 25 supplementary applications by national banks for permission to exercise fiduciary powers under the provisions of section $11(k)$ of the Federal reserve act.

Since the first fiduciary permit was granted by the board to a national bank on February 25, 1915, continuous growth has been shown each year until, at the close of $1929,2,461$ had authority to administer trusts, representing 33 per cent of the number and 75 per cent of the capital of all banks in the national banking system.

A list of national banks holding permits to exercise trust powers on December 31, 1929, will be found on pages 270-294.

## PROGRESS OF THE GOLD STANDARD

Several countries returned to the gold standard or made arrangements to return during the year 1929. On February 7 Rumania adopted a new par for the leu ( 10 milligrams of gold nine-tenths fine equivalent to $\$ 0.00598$ ) and obligated the National Bank to redeem its notes in gold coin, gold bullion, or gold exchange at this rate. On November 27 Czechoslovakia fixed the par of the Czechoslovak crown at 44.58 milligrams of fine gold (\$0.02963) and obligated the National Bank to redeem its notes at this rate in gold coin or gold bullion, or in gold exchange at the rate of the day quoted on the Prague Bourse. Although the obligation in this form is not to come into force until some date to be determined by the Government in agreement with the National Bank, a general obligation has been laid upon the bank to maintain the exchange value of its notes at the legal rate. Inasmuch as the National Bank has been under legal obligation since April 1, 1926, to maintain the relation of the crown to undepreciated foreign gold currencies at the level of the preceding two years, the law adopted in 1929 merely renders more precise a previously established obligation.

In November the Japanese Minister of Finance announced that the embargo on the export of gold, which had been in effect since September, 1917, would be removed on January 11, 1930. Since the Bank of Japan has been under technical obligation throughout the period of the embargo to redeem its notes in gold coin, the country is now once more upon the full gold standard.

## CHANGES IN THE BOARD'S REGULATIONS

The board made only one change during the year in its regulations applicable to member banks. This was an amendment to that part of the board's Regulation J which prescribes the terms upon which checks will be handled by Federal reserve banks for collection. It had been provided that where checks are sent by Federal reserve
banks direct to banks on which they are drawn, such banks would be required to remit or pay therefor at par in cash or bank draft acceptable to the collecting Federal reserve bank, or at the option of such Federal reserve bank to authorize the Federal reserve bank to charge their reserve accounts or clearing accounts, with a proviso, however, that any Federal reserve bank might reserve the right in its check collection circular to charge such items to the reserve account or clearing account of any such bank at any time when in any particular case the Federal reserve bank deemed it necessary. By an amendment effective February 1, 1929, the proviso stated was stricken out, the remainder of the paragraph, however, being unchanged.

## AMENDMDNTS TO THE FEDERAL RESERVE ACT

In the year 1929 no statute was enacted which by its terms specifically amends any particular section of the Federal reserve act. The act of Congress of June 17, 1929, however, in effect amends several provisions of the Federal reserve act. This act of Congress authorizes the Secretary of the Treasury to issue a new form of Treasury obligation to be known as "Treasury bills," and provides that wherever the words "bonds and notes of the United States" or similar phrases are used in the Federal reserve act they shall include such Treasury bills and also certificates of indebtedness. The effect of this qualification of the Federal reserve act is to authorize Federal reserve banks to rediscount notes secured by Treasury bills or certificates of indebtedness; to make short-term advances to member banks on their promissory notes so secured; and to purchase in the open market Treasury bills and certificates of indebtedness. Prior to the enactment of this statute certificates of indebtedness of the United States were considered eligible for the purposes stated and in this respect the new law is merely a specific statutory confirmation of the existing practice.

THE CLAYTON ANTITRUST ACT
Section 8 of the Clayton Antitrust Act, which prescribes certain prohibitions with reference to interlocking bank directorates, was amended by the act of Congress approved March 2, 1929, so as to except from the provisions thereof joint-stock land banks and other banking institutions which do no commercial banking business.

The Federal Reserve Board received and considered 406 applications for permits authorizing interlocking bank directorates during the year 1929. Eighteen alleged violations of section 8 of the Clayton Act were reported to the board by the Comptroller of the Currency. The board investigated these and, where violations of the law were found to exist, required the persons involved to comply therewith.

## DISCRETION OF BOARD IN APPROVING THE ORGANIZATION OF FOREIGN BANKING CORPORATIONS

The board's last annual report contained a statement with reference to a case pending in the courts involving the authority of the Federal Reserve Board to exercise its discretion in the matter of approving the organization of corporations, pursuant to the provisions of section 25 (a) of the Federal reserve act, to engage in international or foreign banking, or international or foreign financial operations. The facts of this case, United States ex rel. Apfel et al. $v$. Mellon et al., may be briefly reviewed here.

Certain individuals had filed with the Federal Reserve Board the articles of association and organization certificate of a proposed foreign banking corporation to be organized under section 25 (a) of the Federal reserve act and had requested the board to approve these organization papers and to issue to the organizers a preliminary certificate to commence business. After investigation, the board reached the conclusion that the experience and business qualifications of the organizers of the proposed corporation were not such as to hold promise of the successful conduct of such a corporation and that it would not be in the public interest to approve the organization papers and to issue a preliminary permit for the proposed corporation to commence business. Upon the refusal of the board to approve the organization papers and to issue the preliminary permit, the organizers filed a petition for a writ of mandamus in the Supreme Court of the District of Columbia to compel the board to take the action requested. The board filed an answer and the petitioners then demurred to the answer of the board. The demurrer was overruled by the lower court, as set forth in the last annual report.

Upon appeal of this case, the Court of Appeals of the District of Columbia rendered a decision on June 3, 1929, affirming the decision of the lower court and thus upholding the authority of the Federal Reserve Board in the premises. The opinion of the Court of Appeals will be found on pages 221-224. Following this decision of the Court of Appeals, a petition for a writ of certiorari was filed in the Supreme Court of the United States by the complainants in the case, but the Supreme Court on October 21 denied this petition. This refusal of the Supreme Court of the United States to review the decision of the Court of Appeals concludes the case and leaves as the final expression of the courts on the subject the decision of the Court of Appeals of the District of Columbia upholding the board's authority.

## DISCRETION OF FEDERAL RESERVE SYSTEM REGARDING MATTERS RELATING TO CREDIT POLICIES

In the board's annual report for 1928 there was set forth a description of a suit which had been brought against the Federal Reserve Digitized for Banderof New York testing its authority and the authority of the

Federal reserve system generally to exercise discretion in raising or lowering the discount rate and in performing other functions relating to the credit policies of the Federal reserve system.

This suit was brought in the United States District Court for the Southern District of New York by one Frank G. Raichle in his capacity as a private citizen. The only party defendant named in the suit was the Federal Reserve Bank of New York. The bill of complaint alleged, however, that the Federal Reserve Bank of New York and the Federal reserve system generally had spread propaganda concerning an alleged money shortage and increase in the volume of collateral loans, set about to restrict the supply of credit available for investment purposes by engaging in open-market transactions through the sale of its securities, raised the rediscount rate for its member banks in order to reduce the volume of security loans, and coerced member banks to call collateral loans by declining to rediscount eligible commercial paper for such member banks. It was further alleged that all of these actions had injured complainant by causing the market price of stocks and bonds owned by him to decline, and also that all such courses of action were beyond the corporate and legal powers of the Federal reserve bank and resulted in depriving the complainant of his property without due process of law. The court was asked to grant an injunction restraining the defendant from spreading propaganda concerning an alleged money shortage and an alleged credit stricture in the United States, from doing any act or thing calculated to curtail the credit resources of the United States, from engaging in unwarranted and excessive openmarket operations and removing a large amount of cash and its incidental credit from the use of the investing public, from controlling or interfering with the member bunks in the free and unrestricted use of their own independent resources in all legitimate banking activities, including the making of collateral loans, and from further arbitrarily and unreasonably raising the rediscount rate. The court was also asked to grant a mandatory injunction directing the Federal reserve bank to fix a reasonable rediscount rate and a prohibitory injunction restraining the defendant from taking any action for the purpose of forcing the liquidation of brokers' loans.

On motion of defendant and after argument of counsel, the United States district court dismissed the bill of complaint on the ground that it stated no cause of action against the Federal reserve bank.

During the year 1929 the case was appealed by the complainant to the United States Circuit Court of Appeals for the Second Circuit which, after discussing the merits of the case at some length, ruled that the Federal Reserve Board was a necessary party to the suit, modified the decree so as to dismiss the bill because of failure to join the members of the Federal Reserve Board as indispensable parties, Digitized forand affirmed the decree as so modified.

The three principal questions considered by the circuit court of appeals were the following:
(1) Are the alleged acts, irrespective of the alleged purpose to reduce the volume of brokers' loans, within the power of the Federal reserve bank?
(2) If the acts are generally speaking lawful, are they rendered unlawful because the purpose was to reduce the volume of brokers' loans?
(3) Is the Federal Reserve Board a necessary party to the action? The court held, in substance, that-
(1) Irrespective of a purpose to reduce the volume of brokers' loans, (a) it was lawful to engage in open-market transactions by the sale of securities, since purchases and sales in the open market are specifically authorized by the Federal reserve act; (b) it was for the Federal reserve bank, subject to the supervision of the Federal Reserve Board, to determine what would be a reasonable rediscount rate; (c) it was lawful for the Federal reserve bank to decline to rediscount eligible paper, since the power to rediscount eligible paper is, under the terms of the Federal reserve act, wholly permissive; and (d) the charge of spreading propaganda is without legal significance; but, in view of the provisions of the Federal reserve act for detailed reports on the condition of the Federal reserve banks and for communications between the Federal Reserve Board and the Federal Advisory Council regarding the general affairs of the Federal reserve system, " it is most unlikely that statements as to the condition of affairs can not be made public by the board, the council, and the banks. The provisions for reports, representations, and recommendations seem to imply public information and, when the situation warrants it, public warning."
(2) The Federal reserve bank, under the supervision of the Federal Reserve Board, must determine whether there is danger of financial stringency and whether the credit available for "commerce and business" is sufficient or insufficient; and, if it proceeds in good faith through open-market operations and control of discount rates to bring about a reduction of brokers' loans, it commits no legal wrong.
(3) The Federal Reserve Board is an indispensable party to the suit, because it is given power to exercise general supervision over the Federal reserve banks and is specifically empowered to regulate open-market transactions, to review and determine rates of discount, and to make reports as to conditions in the Federal reserve system. "In such circumstances, the bank is, as to the matters complained of here, a governmental agency under the direction of the Federal Reserve Board."

The opinion of the circuit court of appeals, the full text of which will be found on pages 224 to 229 , is of unusual importance, because
it contains the first recorded judicial interpretation of those provisions of the Federal reserve act dealing with the discretion of the Federal reserve banks and the Federal Reserve Board with respect to the fixing of the rediscount rate, the rediscounting of paper for member banks, the power to engage in open-market operations, and other powers with respect to general credit policies. It also contains an interesting review of the fundamental purposes of the Federal reserve act and the reasons for the creation of the Federal reserve system.

## LEGISLATION RECOMMENDED

The board desires to renew the recommendations made in its annual reports for the years 1927 and 1928 that the following amendments concerning detailed matters which have arisen in the administration of the Federal reserve system be enacted:
(1) An amendment to section 9 of the Federal reserve act to permit State member banks of the Federal reserve system to have foreign branches.
(2) An amendment permitting the cancellation of Federal reserve bank stock held by member banks which have gone out of business without a receiver or liquidating agent having been appointed therefor.
(3) An amendment making it discretionary with the Federal Reserve Board to assess the costs of examining member banks against the banks examined.
(4) An amendment exempting Federal reserve banks from attachment or garnishment proceedings before final judgment in any case or proceeding.
(5) An amendment to the Judicial Code restoring to the United States district courts jurisdiction of suits by and against Federal reserve banks.
(6) An amendment to section 9 of the Federal reserve act authorizing the Federal Reserve Board, in its discretion and upon such conditions as it may prescribe, in individual cases to waive the six months' notice now required by law before a State member bank may voluntarily withdraw from the Federal reserve system.
(7) Another change which the Federal Reserve Board has recommended in its last two annual reports is an amendment to section 13 of the Federal reserve act increasing from 15 to 90 days the maximum maturity of advances made by Federal reserve banks to member banks on their promissory notes secured by paper eligible for rediscount by Federal reserve banks but not increasing the maximum maturity of advances on such promissory notes secured by bonds or notes of the United States. The board wishes again to call attention to the desirability of this amendment, and in this connection also wishes to recommend that debentures of Federal intermediate
credit banks be made eligible as security for advances by Federal reserve banks to member banks on promissory notes for a period not exceeding 15 days. Such debentures, subject to certain limitations, are now eligible for purchase by Federal reserve banks and are secured by paper which frequently is eligible for rediscount by Federal reserve banks, and there would seem to be no reason why these obligations when meeting the requirements for purchase, should not also be eligible as security for short-term advances to member banks.
(8) The board has also recommended in its last two annual reports the enactment of an amendment to section 4 of the Federal reserve act to permit an officer, director, or employee, of a mutual savings bank to serve as a class B director or a class C director of a Federal reserve bank. The board desires again to recommend the enactment of an amendment to this section of the Federal reserve act to permit an officer, director, or employee of a mutual savings bank to serve as a class B director of a Federal reserve bank, but, upon further consideration of this matter, is of the opinion that an amendment permitting an officer, director, or employee of a mutual savings bank to serve as a class C director of a Federal reserve bank is not desirable.

In addition to the above amendments heretofore proposed in its annual reports, the board recommends the enactment of the following amendments to the Federal reserve act:
(9) An amendment to section 9 of the Federal reserve act authorizing the Federal Reserve Board, after hearing, to require a State member bank to surrender its stock in the Federal reserve bank and to forfeit its membership where it appears to the board that such bank has failed to comply with the provisions of the banking laws of the State in which it is located. Under the present law the Federal Reserve Board is authorized to forfeit the membership of a State member bank only where it has failed to comply with the provisions of section 9 of the Federal reserve act or the regulations of the Federal Reserve Board made pursuant thereto. It sometimes happens that a State member bank is acting in violation of some provision of State law and yet is complying with all the provisions of section 9 of the Federal reserve act and of the board's regulations. In such cases, notwithstanding the fact that the bank is guilty of unsound and improper practices at variance with the State law, the board is without authority to require the bank to give up its membership. The board is of the opinion that legislation authorizing the forfeiture of membership in such cases would be effectual in minimizing the resort by State member banks to bad banking practices illegal under State law but not prohibited by the Federal law or regulations.
(10) An amendment to section 13 of the Federal reserve act so as to make the limitation on the rediscount of paper of one borrower conform more closely to the limitations prescribed by section 5200 of
the Revised Statutes upon loans to one person by a national bank. Under the numerous exceptions to the limitation of section 5200 , national banks are now permitted to make loans to a single borrower in liberal amounts exceeding 10 per cent of their capital and surplus on certain classes of paper; but under section 13 of the Federal reserve act a Federal reserve bank may not rediscount for any one bank the paper of a single borrower in amounts exceeding 10 per cent of such bank's capital and surplus, with the one exception that this restriction does not apply to the discount of bills of exchange drawn in good faith against actually existing values. The fact that Federal reserve banks must decline to rediscount as much paper of a single borrower as national banks may acquire under the provisions of section 5200 is a cause of much confusion and dissatisfaction upon the part of national banks offering paper for rediscount. Officers of member banks are inclined to regard the refusal of Federal reserve banks in such cases as technical and unnecessary. The Federal Reserve Board deems it proper and desirable that the limitations on the rediscount by Federal reserve banks of the paper of one borrower should be made to conform as closely as may be to the provisions of the statute limiting loans by national banks to a single borrower.
(11) An amendment to section 4 of the Federal reserve act to clarify the meaning of the phrase "electors voting" in that part of the statute providing the method of counting ballots in elections of class A and class B directors of Federal reserve banks. The existing law provides that the voting member banks shall indicate their first, second, and other choices and if no candidate have a majority of first-choice votes, the second-choice votes shall be added to the first-choice votes and then if any candidate have a majority of the "electors voting," he shall be declared elected; if not, first, second, and other choice votes shall be added and the candidate then having the highest number of votes shall be declared elected. In a recent election of a director at one of the Federal reserve banks, no candidate had a majority of first-choice votes, and it was accordingly necessary to add together the first-choice and second-choice votes; when this was done several candidates had a majority of "electors voting" and the question became material whether the candidate having the highest number of first and second choice votes combined should be declared elected or whether in such cases the first, second, and other choice votes should be added together and the candidate then having the highest number of combined votes declared elected. The proper answer to this question under the terms of the present law is open to serious question; and, in order to remove any doubt as to which candidate has been lawfully elected in such cases, it is desirable that the law be amended so as to provide that, when first and second choice votes have been added together, the candidate then having a "ma-
jority of the electors voting and the highest number of combined votes" shall be declared elected.
(12) An amendment to section 22 of the Federal reserve act making it a Federal offense punishable through the Federal courts to burglarize or rob any Federal reserve bank or any member bank of the Federal reserve system. Certain crimes, such as embezzlements, making false entries, and other similar offenses are by the present law made offenses punishable through the Federal courts; but there is no provision of Federal law making such crimes as burglaries or robberies committed against Federal reserve banks or their member banks Federal offenses, and neither the Department of Justice nor the Federal courts have jurisdiction over such crimes. Acts of violence of this kind, however, may be equally as injurious to the member banks and to the Federal reserve system as embezzlements and other fraudulent acts committed by officers or employees of the banks which are now made Federal offenses, and the board recommends that such crimes be prohibited by the Federal statute and made punishable through the Federal courts. Bank robberies and burglaries have become a serious problem, and to enable Federal officers to pursue the offenders from one State to another and bring them to trial without the necessity of extradition proceedings would greatly facilitate their apprehension and conviction. In this connection attention is called to the fact that the United States Supreme Court has held substantially that it is within the power of Congress to enact such legislation as Congress deems appropriate and necessary for the protection of national banks and State banks which are members of the Federal reserve system. (Westfall $v$. United States, 274 U. S. 256.)
(13) An amendment to section 22 (a) of the Federal reserve act making it clear that the prohibition against examiners' accepting loans or gratuities from member banks applies to State bank examiners. A decision of a United States district court on this question has held that the law is not applicable to State bank examiners. It is believed that Congress intended the prohibition upon the acceptance of loans or gratuities by bank examiners to apply to State bank examiners as well as to national bank examiners and that the ambiguity now existing in the statute should be eliminated, in order to carry out the intention of Congress. The board feels, however, that the broad provision of the present law prohibiting a member bank from making loans or granting gratuities to any bank examiner should be restricted so as to apply only to the making of loans or the granting of gratuities to examiners who may examine such bank.
(14) An amendment to section 11 (k) of the Federal reserve act to permit a national bank which has been granted a permit by the Federal Reserve Board to act in trust capacities to surrender such permit voluntarily with the consent and approval of the Federal

Reserve Board. The law requires that national banks deposit with the State authorities securities for the protection of private or court trusts whenever the State laws make such a requirement of corporations acting in fiduciary capacities. A national bank which has made such a deposit and which thereafter ceases to exercise trust powers naturally desires to regain the securities so deposited with the State authorities, but in some instances the State authorities have been unwilling to surrender the securities because altbough the national bank has ceased to exercise trust functions it still has a permit from the Federal Reserve Board authorizing it to do so. It is a very doubtful question of law whether the Federal Reserve Board is authorized to cancel or consent to the surrender of the rights acquired under such a trust permit even when voluntarily requested to do so by a national bank, and the board feels that it is desirable that it be given explicit authority for this purpose.

A number of proposals have been advanced recently, both in and out of Congress, providing for increased participation by member banks in the earnings of Federal reserve banks. This subject is one which in the judgment of the Federal Reserve Board might well have the consideration of Congress in connection with any legislation affecting the status of member banks of the Federal reserve system; but the problem involves certain practical difficulties, and the board desires to study the subject further before recommending any specific amendment for this purpose.

## MEETINGS OF FEDERAL ADVISORY COUNCIL

Five meetings of the Federal Advisory Council were held in Washington during 1929 on the following dates: February 15, April 19, May 21, September 17, and November 19.

## CONFERENCES HELD BY THE FEDERAL RESERVE BOARD

The Federal Reserve Board, as usual, conferred with the Federal Advisory Council on the occasion of its meetings during the year.

The governors of the Federal reserve banks met in Washington on April 1-4, and the governors of the Federal reserve banks and Federal reserve agents conferred, separately and jointly, on December 11-12. At both conferences special sessions were held at which the board was in attendance.

## ORGANIZATION, STAFF, AND EXPENDITURES

On November 30, 1929, Mr. James F. Herson resigned as chief, division of examination, and chief Federal reserve examiner. No other changes took place in the organization or official staff of the Federal Reserve Board during the year.

The total cost of conducting the work of the board during the year 1929 was $\$ 770,716.66$. Two assessments were levied against the Federal reserve banks aggregating $\$ 781,644.33$, or approximately onefifth of 1 per cent of their average paid-in capital and surplus for the year.

${ }^{1}$ All of the inderes given in the table (except that for prices) are those of the Federal Reserve Board. Descriptions of these indexes, and of revisions made from time to time, have been published in the Federal Reserve Bulletin as follows: Indexes of industrial production, production of manufactures, production of minerals, February and March, 1927 (certain revisions, March, 1929); indexes of factory employment and factory pay rolls, November, 1929; indexes of building contracts awarded and freight-car loadings. August, 1927 (certain revisions, March, 1929); index of wholesale distribution, December, 1927 (certain revisions, March, 1929); indexes of department-store sales and department-store stocks, February, 1928 (certain revisions, March, 1929).
${ }^{2}$ Adjusted to allow for seasonal variations.
${ }^{3}$ Without seasonal adjustment.
4 Index of the U.S. Bureau of Labor Statistics; $1920=100$, base adopted by bureau. For a description of this index see Bulletins of the U.S. Burean of Labor Statistics, Numbers 453, 473, and 493, and the Federal Reserve Bulletin for October, 1927.

## APPENDIX

# RECOMMENDATIONS OF THE FEDERAL ADVISORY COUNCIL TO THE FEDERAL RESERVE BOARD 

## OFFICERS AND MEMBERS OF THE FEDERAL ADVISORY COUNCIL FOR THE YEAR 1929

OFFICERS
President, F. O. Wetmore. Vice President, B. A. McKinney Secretary, Walter Lichtenstein.

EXECUTIVE COMMITTEE
F. O. Wetmore.
B. A. McKinney.
W. C. Роtter.
L. L. Rue.

Harris Creech.
W. W. Smith.

MEMBERS
A. M. Heard, Federal Reserve District No. 1. W. C. Potter, Federal Reserve District No. 2. L. L. Rue, Federal Reserve District No. 3. Harris Creech, Federal Reserve District No. 4. John Poole, Federal Reserve District No. 5. J. P. Butler, Jr., Federal Reserve District No. 6. F. O. Wetmore, Federal Reserve District No. 7. W. W. Smith, Federal Reserve District No. 8. Theodore Wold, Federal Reserve District No. 9. P. W. Goebel, Federal Reserve District No. 10. B. A. McKinney, Federal Reserve District No. 11. F. L. Lipman, Federal Reserve District No. 12.

## RECOMMENDATIONS OF THE FEDERAL ADVISORY COUNCIL

## FEBRUARY 15, 1929

Topic No. 1.-Is an acceptance credit, based on the retail sale of automobiles in foreign countries on installment notes, a proper acceptance credit?

Recommendation.-This would be inconsistent with facilities accorded to similar business in this country and the council therefore answers the query of the board in the negative.

Topic No. 2.-What procedure could be adopted by the banks of the United States to discourage and possibly eliminate the practice of corporations, foreign banks and others of "window dressing" at the end of the year, which results in a concentration of borrowing in the New York market at that time?

Recommendation.-The Federal Advisory Council knows of no possible way of preventing the practice of so-called "window dressing," to which the Federal Reserve Board refers. It may be well to
point out that in many States the system of taxation is such as to provide an incentive for depositors to convert cash into nontaxable investments at the close of the year.

Topic No. 3.-Letter from Federal Reserve Board to chairmen of Federal reserve banks, dated February 2, 1929.

Recommendation.-The Federal Advisory Council approves the action of the Federal Reserve Board in instructing the Federal reserve banks to prevent, as far as possible, the diversion of Federal reserve funds for the purpose of carrying loans based on securities. The Federal Advisory Council suggests that all the member banks in each district be asked directly by the Federal reserve bank of the district to cooperate in order to attain the end desired. The council believes beneficial results can be attained in this manner.

APRIL 19, 1929
On February 15, 1929, the Federal Advisory Council adopted the following resolution:

The council believes that every effort should be made to correct the present situation in the speculative markets before resorting to an advance in rates.

The council in reviewing present conditions finds that in spite of the cooperation of member banks the measures so far adopted have not been effective in correcting the present situation of the money inarket. The council, therefore, recommends that the Federal Reserve Board permit the Federal reserve banks to raise their rediscount rates immediately and maintain a rate consistent with the cost of commercial credit.

$$
\text { MAY } 21,1929
$$

Recommendation.-The Federal Advisory Council has reviewed carefully the credit situation. It continues to agree with the view of the Federal Reserve Board expressed in its statement of February 5, 1929, that "an excessive amount of the country's credit has been absorbed in speculative security loans." The policy pursued by the Federal Reserve Board has had a beneficial effect, due largely to the loyal cooperation of the banks of the country. The efforts in this direction should be continued. The council notes, however, that while the total amount of Federal reserve credit being used has been reduced, "the amount of the country's credit absorbed in speculative security loans" has not been substantially lowered.

Therefore, the council recommends to the Federal Reserve Board that it now grant permission to raise the rediscount rates to 6 per cent to those Federal reserve banks requesting it, thus bringing the rediscount rates into closer relation with generally prevailing commercial money rates. The council believes that improvement in financial conditions and a consequent reduction of the rate structure will thereby be brought about more quickly, thus best safeguarding commerce, industry, and agriculture.

SEPTEMBER 17, 1929
The Federal Advisory Council, after consideration of Governor Young's explanation of the open-market policy adopted following the fixing of the New York Federal Reserve Bank rate at 6 per cent,
believes that the increasing of the New York bank rate to 6 per cent and the reduction in the buying rate for bills in the open market have worked satisfactorily thus far and have the approval of the council.

The council concurs in the thought that the Federal reserve banks should buy acceptances to such an amount as may be necessary to avoid any greater burden on commercial business and suggests that these purchases should be made only as the need develops.

## NOVEMBER 19, 1929

Topic No. 1.-Discount rates, bill rates, and open-market operations. No recommendation.
Topic No. 2.-Developments in branch, chain, and group banking, with particular reference to the effects of bank-stock ownership by investment trusts and holding corporations.

Recommendation.-The Federal Advisory Council recommends that the Federal Reserve Board appoint a committee to study the merits of the branch banking system as practiced in this and other countries (conditions in Canada being apparently more comparable with our own), the group or chain banking system as developed in this country and elsewhere, and the unit banking system of this and other countries, and, further, the effect of ownership of bank stocks by investment trusts and holding corporations, in order that the Federal Reserve Board may be in possession of accurate and authoritative information on this important subject.

Topic No. 3.-Desirability of liberalizing the requirements of the Federal reserve act as to paper eligible for rediscount by Federal reserve banks.

Recommendation.-It is the feeling of the Federal Advisory Council that consideration could well be given to liberalizing the provisions of section 13 of the Federal reserve act, pertaining to eligibility of paper, in a manner not inconsistent with the proper functioning of the Federal reserve system.

Topic No. 4.-Desirability of changing distribution of earnings of Federal reserve banks as proposed in S. 5723, introduced by Senator Glass.

Recommendation.-The Federal Advisory Council approves of the provisions of Senate bill 5723, relating to the distribution of earnings of Federal reserve banks, with an amendment providing that the earnings of all 12 Federal reserve banks accruing thereunder to member banks shall be pooled and divided among all member banks in proportion to their respective capital contributions and their average annual reserve requirements.

## AMENDMENT TO REGULATION J

Effective February 1, 1929, the Federal Reserve Board amended paragraph (4) of Section V of its Regulation J, Series of 1928, by striking out that provision authorizing a Federal reserve bank to reserve the right in its check-collection circular to charge checks to the reserve account, or clearing account, of a drawee bank at any time, when in any particular case the Federal reserve bank deems it necessary to do so. The paragraph referred to, as amended, reads as follows:

Checks received by a Federal reserve bank on its member or nonmember clearing banks will ordinarily be forwarded or presented direct to such banks, and such banks will be required to remit or pay therefor at par in cash or bank draft acceptable to the collecting Federal reserve bank, or at the option of such Federal reserve bank to authorize such Federal reserve bank to charge their reserve accounts or clearing accounts.

## STATUTE AUTHORIZING THE ISSUANCE OF TREASURY BILLS AND IN EFFECT AMENDING THE FEDERAL RESERVE ACT

[Public-No. 11-71st Congress]
[H. R. 1648]
AN AOT To amend section 5 of the Second Liberty Bond Act, as amended.
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5 of the Second Liberty Bond Act, as amended (United States Code, title 31, section 754), is hereby amended to read as follows:
"Sec. 5. (a) That in addition to the bonds and notes authorized by sections 1 and 18 of this Act, as amended, the Sceretary of the Treasury is authorized to borrow from time to time, on the credit of the United States, for the purposes of this Act, to provide for the purchase or redemption before maturity of any certificates of indebtedness or Treasury bills issued hereunder, and to meet public expenditures authorized by law, such sum or sums as in his judgment may be necessary, and to issue therefor (1) certificates of indebtedness of the United States at not less than par and at such rate or rates of interest, payable at such time or times as he may prescribe; or (2) Treasury bills on a discount basis and payable at maturity without interest. Treasury bills to be issued hereunder shall be offered for sale on a competitive basis, under such regulations and upon such terms and conditions as the Secretary of the Treasury may prescribe, and the decisions of the Secretary in respect of any issue shall be final. Certificates of indebtedness and Treasury bills issued hereunder shall be in such form or forms and subject to such terms and conditions, shall be payable at such time not exceeding one year from the date of issue, and may be redeemable before maturity upon such terms and conditions as the Secretary of the Treasury may prescribe. Treasury bills issued hereunder shall not be acceptable before maturity in payment of interest or of principal on account of obligations of foreign governments held by the United States of America. The sum of the par value of such certificates and Treasury bills outstanding hereunder and under section 6 of the First Liberty Bond Act shall not at any one time exceed in the aggregate $\$ 10,000,000,000$.
"(b) All certificates of indebtedness and Treasury bills issued hereunder (after the date upon which this subdivision becomes law) shall be exempt, both as to principal and interest, from all taxation (except estate and inheritance taxes) now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority; and the amount of discount at which Treasury bills are originally sold by the United States shall be considered to be interest within the meaning of this subdivision.
"(c) Wherever the words 'bonds and notes of the United States,' or 'bonds and notes of the Government of the United States,' or 'bonds or notes of the United States' are used in the Federal Reserve Act, as amended, they shall be held to include certificates of indebtedness and Treasury bills issued hereunder."

# AMENDMENT TO CLAYTON ANTI-TRUST ACT 

[PUBlic-No. 1007-70TH Congress]

[S. 4030]
AN AC'T To exempt joint-stock land banks from the provisions of section 8 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first proviso of the second paragraph of section 8 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended (United States Code, title 15, chapter 1, section 19), is amended to read as follows:
"Provided, That nothing in this section shall apply to mutual savings banks not having a capital stock represented by shares, to joint-stock land banks organized under the provisions of the Federal Farm Loan Act, or to other banking institutions which do no commercial banking business."

Approved, March 2, 1929.

## COURT OPINION AS TO DISCRETION OF FEDERAL RESERVE BOARD IN APPROVING THE ORGANIZATION OF FOREIGN BANKING CORPORATIONS

The following is the opinion of the Court of Appeals of the District of Columbia, rendered June 3, 1929, in the case of Apfel et al. v. Mellon et al. (33 F. (2d) 805), upholding the authority of the Federal Reserve Board to exercise its discretion in the matter of approving or disapproving the organization of corporations, pursuant to the provisions of section 25 (a) of the Federal reserve act, to engage in international or foreign banking or international or foreign financial operations. A petition to the Supreme Court of the United States for a writ of certiorari in this case was denied on October 21, 1929.

## COURT OF APPEALS OF THE DISTRICT OF COLUMBIA

> Charles L. Apfel, Stephen B. Gibbons, Bertrand A. Unger, Joseph Sheldon, Henry Green, Henry M. Susswein, Edmund J. Horwath, and Milo Ogden Frank, appellants
> $v$.
> Andrew W. Mellon, J. W. McIntosh, Roy A. Young, Edmund No. 4837 Platt, Adolph C. Miller, Charles S. Hamlin, Edward H. Cunningham, and George H. James, as Members of the Federal Reserve Board, appellees

## Appeal from the Supreme Court of the District of Columbia

Before Martin, Chief Justice, and Robb and Van Orsdel, Associate Justices
This is an appeal from a final order of the lower court dismissing the appellants' petition for a writ of mandamus upon the allegations of the petition and answer.

The case arises under the act of Congress of December 24, 1919 (41 Stat. 378), commonly known as the "Edge Act," first enacted as section 25 (a) of the Federal reserve act. (See Title XII, sections 611 to 631, U. S. C. A.)

The act provides that corporations may be organized for the purpose of engaging in international or foreign banking or other international or foreign financial operations, and may be formed by any number of natural persons not less than five; that such persons shall enter into articles of association which shall specify in general terms the objects for which the association is formed, and shall execute an organization certificate which shall set out the name assumed
by the corporation, the place or places where its operations are to be carried on, the place in the United States where its home office is to be located, the amount of its capital stock and the number of shares into which it shall be divided, the names and places of business or residence of the persons executing the certificate and the number of shares to which each has subscribed, and the fact that the certificate is made to enable the subscribers and their successors to avail themselves of the advantages of the act. It provides also that no corporation shall be organized under the act with a capital stock of less than $\$ 2,000,000$, one-quarter of which shall be paid in before the corporation may be organized to begin business; that the persons signing the organization certificate shall duly acknowledge the execution thereof, and forward it to the Federal Reserve Board, and that after the articles of association and an organization certificate are duly made and filed, and "after the Federal Reserve Board has approved the same and issued the permit to begin business, the association shall become and be a body corporate," with certain specified powers including in general the right to engage in international or foreign banking or other financial operations. The act provides "that except such as is incidental and preliminary to its organization no such corporation shall exercise any of the powers conferred by this section until it has been duly authorized by the Federal Reserve Board to commence business as a corporation organized under the provisions of this section." It also provides that such a corporation may establish and maintain branches or agencies in foreign countries at such places as may be approved by the Federal Reserve Board and under such rules and regulations as the board may prescribe.

In the instant case the appellants, as relators below, filed their petition against the appellees as members of the Federal Reserve Board, alleging that the relators had duly executed and filed with the respondents a certificate for the organization of a corporation under the foregoing act for the purpose of engaging in international or foreign banking under the name "Foreign Financing Corporation," and that the certificate fully conformed with the requirements of the act; but that the respondents nevertheless had wrongfully refused to approve of the same or to issue a permit to relators to begin business as a body corporate under the act. The relators prayed for a writ of mandamus to compel the respondents acting as the Federal Reserve Board to approve the articles of incorporation and the organization certificate aforesaid, and to permit relators to begin business as a body corporate under the name "Foreign Financing Corporation," in accordance with the provisions of the act.

The respondents filed their answer admitting that the articles of association and organization certificate filed with the board by relators were in proper legal form, but stating that the board had refused to approve the same on the following grounds:
"That the Federal Reserve Board as a board, and the respondents as members thereof, deem it their duty carefully to inquire into the qualifications of the organizers of such proposed corporations and to refuse to approve the articles of association and organization certificates of such proposed corporations and to issue a permit for such proposed corporations to do business, unless after investigation said board is of the opinion that the financial responsibility, experience, training, and other qualifications of the organizers of such proposed corporations are such as may reasonably be calculated to hold promise of the financial soundness, reliable and competent management, and proper and successful operation of such proposed corporation."
"* * * that relators do not possess the qualifications reasonably necessary to assure the financial soundness, reliable and competent management, or the proper or successful operations of a corporation organized under section 25 (a) of the Federal reserve act to engage in the highly technical activities of international or foreign banking or other international or foreign financial operations and that it would be detrimental to the public interest to approve such articles of association or organization certificate and to issue a preliminary permit for such proposed corporation to commence business; and that, therefore, the said board refused to approve the articles of association and the organization certificate and refused to issue a permit to said proposed corporation to begin business. Respondents say that this determination by the Federal Reserve Board was unanimous; that it was adopted after impartial investigation and full and impartial consideration of all the facts; and that respondents believed then and now believe that it would be contrary to public policy and contrary to the duty of respondents as public officers to approve said articles of association and said organization
certificate or to issue a preliminary permit to the relators to begin business as a body corporate."

The relators filed a demurrer to the answer of respondents. The lower court overruled the demurrer, and, relators electing to stand upon their demurrer, the court dismissed the petition, and the relators appealed.

It is contended by appellees that the statute imposes the duty upon the Federal Reserve Board of exercising its judgment and discretion with respect to the approval or disapproval of the articles of association and organization certificates made and filed under the act, and that the board's action in this instance is within the limits of that authority. On the other hand, appellants contend that "Congress has not undertaken to delegate to the board the discretion it has assumed to exercise."

We agree with the contention of the appellees. The statute provides that an association formed under the act shall not become a body corporate until after the articles of association and organization certificate have been duly made and filed, and after the Federal Reserve Board has approved the same and issued a permit to it to begin business. The word "approved" naturally imports the exercise of judgment and discretion; and the power to approve ordinarily implies a power to disapprove.

To "approve" or give "approval" is in its essential and most obvious meaning to confirm, ratify, sanction, or consent to some act or thing done by another. The word "approve" does not, ex vi termini, necessarily import the exercise of discretion, but from the connection in which the term is used it often involves the idea of discretion and adjudication, and is seldom construed as requiring a mere ministerial act. (4 C. J. 1464.)

In the case of State ex rel. Dodd v. Hill, Banking Commissioner ( $84 \mathrm{~W} . \mathrm{Va}$., 468), the Supreme Court of West Virginia dealt with a statute which provided that "hereafter no charter shall be issued to any bank to do business in this State until the application therefor has been approved in writing by the commissioner of banking." Acting under this statute the commissioner of banking had refused to issue such a charter to the appellants, upon the ground that, for the protection of the public, he had carefully considered the proposed location of the bank, the territory contributory thereto, its possibilities and probabilities from a banking standpoint, and other questions connected therewith, and that in the exercise of his best judgment as an officer he had arrived at the conclusion that the application should not be approved. In denying a writ of mandamus to compel the commissioner to issue a charter the court held that the statutory provision aforesaid vested in the commissioner discretionary power to approve or reject such an application, and that the commissioner's decision was not subject to judicial review unless it clearly appeared that he had "willfully and arbitrarily disregarded his duty, or that his decision was due to caprice, passion, partiality, or corruption."

In the People ex rel. Schweder $v$. Brady, Auditor of Public Accounts (268 Ill. 192), the Supreme Court of Illinois held in relation to similar legislation, that a statute authorizing the State auditor to withhold the final certificate of organization of a bank when he is not satisfied as to the personal character and standing of the officers or directors or when he has reason to believe that the bank is organized for any purpose other than that contemplated by the act, is not unconstitutional on the ground that it confers judicial or legislative power on the auditor. (See First National Bank v. Union Trust Co., 244 U. S. 416.)

In the instant case it is clear that Congress was providing a means for conferring special and important privileges upon such corporations as should be organized under the Edge Act. An abuse by any corporation of the powers thus granted to it might involve grave consequences to our public service. It is reasonable to believe that Congress intended that a careful investigation should be made by the Federal Reserve Board concerning the character and competency of the incorporators of such an enterprise, as one of the means of determining whether to grant or withhold their approval of the application for incorporation. Moreover it should be noted that the act repeatedly provides for an "approval" by the board as a prerequisite to proceedings authorized thereunder, and in all such instances the term plainly implies the exercise of consideration, judgment, and discretion by the board. The act provides inter alia that any such corporation may at any time within the two years next previous to the date of the expiration of its corporate existence, by a vote of the shareholders owning two-thirds of its stock, apply to the Federal Reserve Board for its approval to extend the period of its corporate existence for a term of not more than 20 years, and upon certi-
fied approval of the board such corporation shall have its corporate existence for such extended period. The board, accordingly, may exercise its judgment and discretion with respect to what is practically a renewal of the corporate charter. This fact is significantly consistent with the view that the board possesses a similar power over the granting of the first charter.

An examination of congressional legislation with regard to banking since 1864 shows that Congress has consistently used various forms of the word "approve" in the sense of conferring discretion upon the Comptroller of the Currency, the Secretary of the Treasury, or the Federal Reserve Board. Such a consistent use of the term in statutes in pari materia is persuasive. (Marks $v$. United States, 161 U. S., 297.)

The statutes relating to the organization of national banks are analogous to those now in question. It is therefore proper to mote that the Comptroller of the Currency has prescribed the following as one of the regulations governing the investigations to be made by the examiners relating to applications for national bank charters:
"In making this investigation the examiner is instructed to give full consideration to all factors entering into the proposition. Among other matters to be considered are: First, the general character and experience of the organizers and of the proposed officers of the new bank; second, the adequacy of existing banking facilities and the need of further banking capital; third, the outlook for the growth and development of the town or city in which the bank is to be located; fourth, the methods and banking practices of the existing bank or banks, the interest rates which they charge to customers, and the character of the service which as quasi public institutions they are rendering to their community; fifth, the reasonable prospects for success of the new bank if efficiently managed." Instructions No. 4 of the Comptroller of the Currency, Regulations Promulgated June 31, 1927, Digest of Rulings of the Federal Reserve Board with Appendices (1928), pages 394-395. (See McCormick v. Market Bank, 165 U. S., 538, 551-552.)

In the present case mandamus will not lie to control the exercise of the board's discretion.
"It is a frequently asserted and universally recognized rule that mandamus only lies to enforce a ministerial act or duty; in this sense a ministerial duty may be briefly defined to be some duty imposed expressly by law, not by contract or arising necessarily as an incident to the office, involving no discretion in its exercise, but mandatory and imperative. The distinction between merely ministerial and judicial and other official acts is that where the law prescribes and defines the duty to be performed with such precision and certainty as to leave nothing to the exercise of discretion or judgment, the act is ministerial; but where the act to be done involves the exercise of discretion or judgment, it is not to be deemed merely ministerial." ( 18 R. L. C. 116.)

The judgment of the lower court is affirmed with costs.
(Signed) George E. Martin, Chief Justice, Court of Appeals of the District of Columbia.

## COURT OPINION AS TO DISCRETION OF FEDERAL RESERVE SYSTEM IN MATTERS RELATING TO CREDIT POLICIES

The following is the opinion of the United States Circuit Court of Appéals for the Second Circuit, rendered July 15, 1929, in the case of Frank G. Raichle v. Federal Reserve Bank of New York (34 F. (2d) 910), interpreting those provisions of the Federal reserve act which deal with the discretion of the Federal reserve banks and the Federal Reserve Board in fixing rediscount rates, engaging in open-market operations, and in other matters relating to credit policies:

# UNITED STATES CIRCUIT COURT OF APPEALS FOR THE SECOND CIRCUIT 

Frank G. Ratchle, appellant<br>against

Federal Reserve Bank of New York, appellee

Before L. Hand, Swan and Augustus N. Hand, Circuit Judges

Appeal from the United States District Court for the Southern District of New York. Bill in equity by
Frank G. Raichle to restrain the Federal Reserve Bank of New York from doing various acts in derogation of plaintiff's alleged rights. Upon motion by the defendant, in the nature of a demurrer, the bill was dismissed by the District Court, and plaintiff appeals
This is an appeal from a decree dismissing a bill in equity upon the merits. The defendant moved to dismiss the bill on the ground-

1. That it appears on the face of the complaint by plaintiff's own showing that he is not entitled to the relief prayed for by this complaint against the defendant, nor to any relief arising from the facts alleged in said complaint.
2. That it appears on the face of said bill of complaint that this court has no jurisdiction to hear and determine this suit.
3. That it appears on the face of said bill of complaint that said complaint is wholly without equity.

The bill alleges the incorporation of the defendant, which we shall hereinafter call the bank, under the act of Congress called the Federal reserve act. It alleges that this act was passed to "furnish an elastic currency, to afford means of discounting commercial paper and to establish a more effective supervision of banking in the United States"; that the bank "is a unit in the Federal reserve system, and as such has certain powers conferred upon it by the Federal reserve act and performs certain functions under the control of its board of directors and the Federal Reserve Board"; that the "Federal Feserve Board is by law vested with limited control over Federal reserve rediscount facilities and the defendant Federal Reserve Bank of New York is vested with limited control over its own rediscount facilities."

After setting forth that the United States have for six years experienced great prosperity, that business conditions are good and getting better, that employment and wages are satisfactory, that the signs usually consulted indicate a continued improvement and that accordingly large numbers of people have invested in stocks and bonds of various industrial and railroad corporations, the bill goes on to say that the plaintiff owns various securities outright and has borrowed money to purchase others.

It further alleges that there is an abundance of credit readily available for the needs of industry and agriculture, as well as investment, but that the bank reports that brokers' loans have increased in volume and commercial loans have decreased. Such a condition is said to be due to the tendency of banks to charge high rates of interest and to make loans callable on demand and, by reason of these circumstances, it is said to have been found desirable to borrow money from the public through security offerings in order to eliminate banks as middlemen.

The bill then goes on to say that the credit available in the United States is in excess of fifty billion dollars and that the total of brokers' loans approximates only $61 / 2$ per cent of this amount, so that the claim that too much of available credit is involved in collateral or brokers' loans is not justified.

The bill then sets up the wrongful acts on which the plaintiff founds his cause of action. It says that the bank during the year 1928 illegally engaged in a course of conduct, which it is still continuing, that had for its object an arbitrary reduction of brokers' loans and a general reduction of security prices. The course of conduct consisted of the following acts:
(1) "This defendant and the Federal reserve system generally, * * * wrongfully * * * spread propaganda concerning an alleged money shortage and expressed alarm over the increasing volume of collateral loans, whereas no shortage exists other than one of their own making which is technical in its nature and artificial in its essence."
Many persons induced by this propaganda have sold securities thereby contributing to a decline in market prices and to plaintiff's damage.
(2) "The defendant, $*_{*}^{*} *_{*}$ and the Federal reserve system generally, have * * * wrongfully * * * set about to restrict the supply of credit available for investment purposes and cause a general liquidation of security doans with a resultant reduction in quoted security prices. In this connec-
tion the defendant, * * * and Federal reserve system generally, have engaged in an open market operation, as the term is generally used by those concerned in this practice, but not for the purpose contemplated by the use of the term in the Federal reserve act. The defendant and other Federal reserve banks have sold quantities of securities aggregating many millions of dollars * * * for the sole purpose of taking money and its attendant credit out of the market and removing the same from use, thus curtailing credit and causing an artificial money shortage to the plaintiff's damage and injury. This conduct ${ }^{*}{ }^{*}$ * is not justified by any economic circumstances, and if continued and unabated will lead to serious consequences, and to the damage of this plaintiff."
(3) The defendant has on three different occasions "arbitrarily and unreasonably raised" the rediscount rate which it charges to its member banks.
"for the purpose and with the effect of raising interest rates generally and call money rates on the New York Stock Exchange in particular."
Through this action interest rates have become unreasonable and plaintiff has been damaged by being obliged to pay such rates for borrowed money and by having the value of his securities depreciated through the sale of securities by persons unwilling or unable to pay these rates.
(4) "the defendant has wrongfully controlled and seeks to further control the action of member banks in dealing with their own resources by coercing them to call collateral loans made to their customers by said banks on account of their own resources and not rediscounted with defendant or any other Federal reserve bank. On various occasions the said Federal reserve bank, * * * has denied rediscount facilities to certain member banks pending a liquidation of certain other collateral loans and thus occasioned liquidation of securities and reduction of prices due to inability on the part of borrowers to renegotiate their loans."
The bill finally alleges that by the defendant's acts plaintiff's securities have depreciated and he has been damaged in more than the sum of $\$ 3,000$; that the defendant seeks further to control its member banks in the matter of collateral loans and threatens further to raise the rediscount rate.
(Frank G. Raichle, solicitor for appellant in person; Frank G. Raichle, Robert L. Owen, Carlos C. Alden, and Ethan W. Judd, counsel.)
(Newton D. Baker and Walter S. Logan, solicitors and counsel for appellee.)

## Augustus N. Hand, Circuit Judge:

The wrongs charged against the bank are (a) spreading propaganda concerning an alleged money shortage and increasing volume of collateral loans, (b) setting about to restrict the supply of credit available for investment purposes by engaging in open market transactions through the sale of its securities, (c) raising the rediscount rate for its member banks in order to reduce the volume of security loans, (d) coercing member banks to call collateral loans by declining to rediscount eligible commercial paper for such member banks.

Three principal questions must be considered:
(1) Are the foregoing acts, irrespective of the alleged purposed to reduce the volume of brokers' loans, within the power of the Federal reserve bank?
(2) If the acts are generally speaking lawful, are they rendered unlawful because the purpose was to reduce the volume of brokers' loans?
(3) Is the Federal Reserve Board a necessary party to the action?

The Federal reserve act marked the end of a long struggle and was thought to afford the solution of many difficulties. When the independent treasury bill was passed in 1846, the effect was completely to divorce the Government from all connection with the money market by making it its own banker and by keeping Government funds in the vaults of independent treasury office banks. The public then had to depend on State banks for currency and credit, with a result that in times of financial stress is well known.

To meet the necessities of the Civil War, national banks were established. They became the official depositaries of the Government and furnished an enlarged currency because of their ability to issue circulating notes against Government bonds deposited with the Treasurer of the United States. They were required to maintain reserves in certain cities based upon a percentage of their deposits. As the Government debts of the Civil War became liquidated, the means for issuing currency lessened, though the business requirements of the country were expanding. In such a situation business prosperity inevitably promoted monetary stringency. Moreover, as the reserves were deposited in relatively few banks in the metropolitan centers, when financial stringencies arose, pressure always came on the banks, their deposits would be withdrawn,
the rates for call loans would advance and a liquidation of collateral and depreciation of values would ensue.

While the national banking system was a great inprovement over what went before, it provided no central regulating force and furnished no adequate means for controlling interest rates or preventing or lessening financial stringencies and panics. The usual method of furnishing funds needed for business was for the Treasury to deposit moneys from its vaults in the national banks and to withdraw these deposits if they were used too much in speculation. This was a rather ineffectual way of dealing with complicated and difficult situations. It was dependent too much upon the determination of a single official and lacked the information and guidance that a scientific Federal banking system would afford.

To remedy the difficulties we have mentioned, the Federal reserve act was passed. The Federal reserve banks have national charters and their stockholders are member banks. Each Federal reserve bank has nine directors, three chosen from the member banks, three selected as representatives from industry and three designated by the Federal Reserve Board-a central body consisting of the Secretary of the Treasury, the Comptroller of the Currency and six other members appointed by the President with the consent of the Senate. This board is given, by law, the power to exercise general supervision over Federal reserve banks. It is in terms empowered to examine the affairs of each Federal reserve bank and to publish weekly a statement showing the condition of each bank as well as a consolidated statement of all the banks in the system. It is also specifically empowered to permit or, in certain cases, to require Federal reserve banks to rediscount the discounted paper of other reserve banks and to suspend, for a limited time, reserve requirements, and it is empowered to review and determine rates of discount to be charged by Federal reserve banks "which shall be fixed with a view of accommodating commerce and business."

Furthermore, a Federal Advisory Council is created by the act with a delegate member from each Federal reserve bank. This council is authorized to confer with the Federal Reserve Board on general business conditions, to make oral or written representations concerning matters within the jurisdiction of the board and to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various districts, the purchase and sale of gold and securities by reserve banks, open-market operations by these banks and the general affairs of the reserve banking system.

The foregoing outline shows the broad purposes of the act and the wide powers of supervision and control given to the Federal Reserve Board over the whole reserve system. The congressional report of Senator Glass stated the objects of the act as follows:
"1. Establishment of a more nearly uniform rate of discount throughout the United States, and thereby the furnishing of a certain kind of preventive against overexpansion of credit which should be similar in all parts of the country.
" 2 . General economy of reserves in order that such reserves might be held ready for use in protecting the banks of any section of the country and for enabling them to go on meeting their obligations instead of suspending payments, as so often in the past.
" 3 . Furnishing of an elastic currency by the abolition of the existing bond-secured note issue in whole or in part, and the substitution of a freely issued and adequately protected system of bank notes which should be available to all institutions which had the proper class of paper for presentation.
"4. Management and commercial use of the funds of the Government which are now isolated in the Treasury and subtreasuries in large amounts.
" 5 . General supervision of the banking business and furnishing of stringent and careful oversight.
"6. Creation of market for commercial paper."
To carry out the purposes of the act, Federal reserve banks, subject to the supervision of the Federal Reserve Board, are authorized to act as Government depositaries and fiscal agents; to receive and maintain the legal reserves of member banks; upon indorsement of member banks to discount notes, drafts and bills of exchange arising out of actual commercial transactions but not "notes, drafts or bills covering merely investments or issued for the purposes of carrying or trading in stocks, bonds or other investment securities, except bonds and notes of the Government of the United States"; to make advances to member banks on their promissory notes for not more than 15 days at rates to be established by the Federal reserve banks subject to the review and determination of the Federal Reserve Board provided such promissory notes are secured by eligible paper, or by bonds, or notes of the United States, to receive Federal reserve notes
upon deposit of eligible paper, or gold, or gold certificates, provided a gold reserve of not less than 40 per cent of such notes is maintained. (U. S. C. A., Title 12, ch. 3, secs. 341-361.)

Federal reserve banks may also, under rules and regulations prescribed by the Federal Reserve Board, engage in "open-market operations," that is to say, purchase and sell in the open market at home or abroad cable transfers and bankers' acceptances and bills of exchange of the kinds and maturities eligible for rediscount. They may deal in gold coin and bullion at home and abroad; buy and sell, at home and abroad, bonds and notes of the United States and bills, notes, revenue bonds and warrants with a maturity from date of purchase of not exceeding six months, issued by any State, county, district, political subdivision or municipality in the United States, such purchases to be made in accordance with regulations prescribed by the Federal Reserve Board. They may purchase from member banks and sell, bills of exchange arising out of commercial transactions and may "establish from time to time, subject to review and determination by the Federal Reserve Board, rates of discount to be charged by the Federal reserve bank for each class of paper, which shall be fixed with a view of accommodating commerce and business." They may establish accounts with other Federal reserve banks with the consent and upon the order and direction of the Federal Reserve Board and, under regulations to be prescribed by said board, may open accounts and establish agencies in foreign countries for the purpose of purchasing, selling and collecting bills of exchange. They may purchase and sell in the open market either from or to domestic banks, firms, corporations or individuals, acceptances of Federal intermediate credit banks and of national agricultural credit corporations whenever the Federal Reserve Board shall declare that the public interest so requires. (U. S. C. A., Title 12, ch. 3, secs. 353-357.)

The foregoing provisions enable the Federal reserve banks without waiting for applications from their member banks for loans or rediscounts to adjust the general credit situation by purchasing and selling in the open market the class of securities that they are permitted to deal in. The power "to establish from time to time, subject to review and determination by the Federal Reserve Board, rates of discount to be charged by the Federal reserve bank" appears in the act with the open-market powers. The two powers are correlative and enable the Federal reserve banks to make their rediscount rates effective. The sale of securities does not lessen the total amount of credit available but, by necessitating payment to the Federal reserve banks, increases available credit in their hands "with a view of accommodating commerce and business" as provided by the act. (U. S. C. A., Title 12, ch. 3, sec. 357.)

Such being an outline of the powers of the Federal Reserve Board, the Federal Advisory Council and the Federal reserve bank, it is necessary to consider whether any of the acts which the bill says were performed by the Federal Reserve Bank of New York were in themselves, irrespective of a purpose to reduce the volume of brokers' loans, unlawful.

Certainly it was lawful to engage in open-market transactions by the sale of securities, to fix the rediscount rate and to decline to rediscount eligible paper. Purchases and sales in the open market are specifically authorized by the act. (U.S. C. A., Title 12, ch. 3, secs. 353-356.) Likewise the act in terms empowers "every Federal reserve bank * * * to establish from time to time subject to review and determination of the Federal Reserve Board rates of discount to be charged by the Federal reserve bank for each class of paper, which shall be fixed with a view of accommodating commerce and business." While it is alleged in the bill that the rediscount rate "has been arbitrarily and unreasonably raised," it was for the defendant, subject to the supervision of the Federal Reserve Board, to determine what would be a reasonable rediscount. It is not contended that the provision for fixing rates of discount is unconstitutional, nor would it seem even reasonable to argue that it is after such decisions as First National Bank v. Union Trust Co. (244 U. S. 416) and Westfall $v$. United States (274 U. S. 256), as well as The Legal Tender case (110 U. S. 421), Farmers' \& Mechanics National Bank v. Deering (91 U. S. 29), and McCulloch v. Maryland (4 Wheat. 316).

The act being constitutional, we are asked to hold that the bank may not sell its own securities and fix the rates at which it will discount or rediscount paper when it is given the power by the specific terms of the Federal reserve act to do all of these things. It is important to note that it is not under any compulsion to rediscount eligible paper for the words of the act in respect to rediscounting are wholly permissive. The act provides that:
"Any Federal reserve bank may, subject to regulations and limitations to be prescribed by the Federal Reserve Board, discount notes, drafts and bills of exchange * * *." (U.S. C. A., Title 12, ch. 3, sec. 348.)

But it is alleged that the bank and the Federal reserve system generally have wrongfully "spread propaganda concerning an alleged money shortage and expressed alarm over the increasing volume of collateral loans, whereas no shortage exists other than one of their own making which is technical in its nature and artificial in its essence."

As we have already said, the act requires the Federal Reserve Board to examine the books and affairs of each Federal reserve bank, to require such statements as it may deem necessary and to publish each week a statement showing the condition of each bank and a consolidated statement for all the banks. These statements shall show in detail the assets and liabilities and shall furnish full information regarding the character of the money held as reserve and the amount, nature, and maturities of the paper and other investments held. The Federal Advisory Council shall also have power to confer with the Federal Reserve Board on general business conditions, make oral or written representations concerning matters within the jurisdiction of the board and call for information and make recommendations as to discount rates, rediscount business, reserve conditions, the purchase and sale of gold or securities by reserve banks, open-market operations, and the general affairs of the reserve banking system.

In view of such provisions for detailed reports on the condition of the banks and for intercommunication between the board and the council regarding the general affairs of the reserve banking system, we think it most unlikely that statements as to the condition of affairs can not be made public by the board, the council, and the banks. The provisions for reports, representations, and recommendations seem to imply public information and when the situation warrants it, public warning. What particular conditions may warrant is necessarily left to those clothed with responsibility for acting. Warning before taking action would seem to be a safer practice than sudden and perhaps drastic action without warning. Plaintiff's assertion that the banks have spread false propaganda regarding a money shortage is inaccurate. It apparently is based on the allegation of the bill that "no shortage exists other than one of their own making, which is technical in its nature and artificial in its essence." This is an argumentative and obscure allegation of no value in a pleading. If it means that the Federal reserve banks exercised their right to sell in the open market and refused to rediscount eligible paper, it should have said so; but if such were the fact the banks would still have been within their rights and the plaintiff would have gained nothing by the allegation. We, therefore, deem the charge of spreading propaganda without legal significance.

But the plaintiff chiefly relies on his charge that the defendant has engaged in "a course of conduct * * * which has had for its object and purpose an arbitrary reduction in the volume of collateral or brokers' loans." It is nowhere said that the bank has acted in bad faith or has aimed to injure the defendant. But it seems to be thought that it may be said that the acts of the bank were likely to cause damage to the plaintiff, in fact caused such damage, and therefore gave rise to a cause of action unless some legal justification can be shown.

This general theory of liability was suggested by Justice Holmes in an article entitled "Privilege Malice and Intent," published in Volume VIII of the Harvard Law Review, as long ago as 1894 . At the time, it was regarded as a somewhat startling generalization by a profession which had viewed all liabilities in tort under the categories of forms of action. But while courts have differed as to when justification exists, the above generalization of Justice Holmes reiterated in XVIII Harvard Law Review by Professor Ames has been more and more used as a convenient means of approaching problems in torts. (Aiken $v$. Wisconsin, 195 U. S. at p. 204.) In many cases such as libel and slander and malicious prosecution, a malevolent motive destroys the privilege, while in cases affecting the use of land, the privilege has frequently been held absolute. No hard and fast rule can be laid down as to when the privilege exists. Indeed, it was said in Aikens $v$. Wisconsin, supra, that what will be considered a justification depends upon "principles of policy." (See also Green v. Victor Talking Mach. Co., 24 Fed. (2d) 378.) The plaintiff has seized upon the opinion of Justice Holmes in American Bank \& Trust Co. v. Federal Bank (256 U. S. 350), to support his contention that a purpose to reduce the volume of brokers' loans destroys the defendant's ordinary right to sell its own securities, fix the rates for extending credit and warn the public against inflation. But there a Federal reserve bank was charged with accumulating checks of country banks and presenting them in large quantities in order to compel these banks to become members of the reserve bank, or, at least, to open a nonmember clearing account with it. In such circumstances Justice Holmes said that the "United States did not intend by * * * statute to sanction this sort of warfare." In the case at bar the
"principles of policy" point the other way. It would be an unthinkable burden upon any banking system if its open-market sales and discount rates were to be subject to judicial review. Indeed, the correction of discount rates by judicial decree seems almost grotesque when we remember that conditions in the money market often change from hour to hour and the disease would ordinarily be over long before a judicial diagnosis could be made.

Nor is the plaintiff aided by his charge that the defendant has wrongfully controlled member banks by coercing them to call collateral loans made to their customers, for the only method of coercion suggested is the refusal to rediscount eligible commercial paper. Such a refusal was not a wrong because no provision of the act requires the bank to discount unless so ordered by the board.

We can see no basis for the contention that it is a tort for a Federal reserve bank to sell its securities in the open market, to fix discount rates which are unreasonably high, or to refuse to discount eligible paper, even though its policy may be mistaken and its judgment bad. The remedy sought would make the courts, rather than the Federal Reserve Board, the supervisors of the Federal reserve system and would involve a cure worse than the malady. The bank, under the supervision of the board, must determine whether there is danger of financial stringency and whether the credit available for "commerce and business" is sufficient or insufficient. If it proceeds in good faith through openmarket operations and control of discount rates to bring about a reduction of brokers' loans, it commits no legal wrong. A reduction of brokers' loans may best accommodate "commerce and business." (U. S. C. A., title 12, ch. 3. sec. 357. )

Defendant's counsel have made a persuasive argument that upon the facts alleged the questions raised are political and not justiciable. We have not discussed it because without it the defendant's position seems to be unassailable.

It is contended that the bill must in any event be dismissed because of the failure to join the members of the Federal Reserve, Board as parties. The "defendant and the Federal reserve system generally" are charged with spreading propaganda. The Federal reserve system must include the board. The board by the act is given power to exercise general supervision over Federal reserve banks. (U. S. C. A., title 12, ch. 3, sec. 248 (j).)

It is specifically empowered to regulate open-market transactions, to review and determine rates of discount and to make reports as to conditions in the Federal reserve system. In such circumstances, the bank is, as to the matters complained of here, a governmental agency under the direction of the Federal Reserve Board. If the plaintiff prevailed in his contention the bank would be enjoined from fixing a discount rate which the board had presumptively directed. Such a situation under familiar principles renders the Federal Reserve Board an indispensable party to the suit. (Alcohol Warehouse Corp. v. Canfield, 11 Fed. (2d) 214.)

But the plaintiff contends that such cases as Gnerich v. Rutter (265 U. S. 388) and Webster $v$. Fall ( 266 U. S. 507) differ from the present because the Federal reserve banks are independent units and in that respect differ from agents like the Prohibition Director, who is created under a regulation of the department of internal revenue and is subject to the orders of the commissioner. Moreover, the plaintiff calls attention to the fact that in American Bank \& Trust Company v. Federal Reserve Bank ( 256 U. S. 350) the Supreme Court maintained jurisdiction without suggesting that the Federal Reserve Board was a necessary party, although the bill there alleged that the wrongs done by the bank were done in pursuance of a policy "accepted by the Federal Reserve Board." But in American Bank \& Trust Company v. Federal Reserve Bank, supra, the point that the Federal Reserve Board was an indispensable party was not raised, so that we must regard Gnerich v. Rutter and Webster v. Fali, supra, as controlling. In the last case the argument was made that in other suits brought against subordinate officials without joining the superior, the court had proceeded to determine the merits, but Justice Sutherland said that-
"Questions which merely lurk in the record, neither brought to the attention of the court nor ruled upon, are not to be considered as having been so decided as to constitute precedents."
We have discussed the merits in case our decision should be reviewed and our opinion that the Federal Reserve Board is a necessary party should be thought erroneous.

The decree is modified so as to dismiss the bill because of failure to join the members of the Federal Reserve Board who are indispensable parties and, as so modified, is affirmed.

## FIDUCIARY POWERS GRANTED TO NATIONAL BANKS

Under section $11(\mathrm{k})$ of the Federal reserve act as amended, the Federal Reserve Board has authorized the national banks listed below to exercise one or more fiduciary powers as follows:
(1) Trustee.
(2) Executor.
(3) Administrator.
(4) Registrar of stocks and bonds.
(5) Guardian of estates.
(6) Assignee.
(7) Receiver.
(8) Committee of estates of lunatics.
(9) Any other fiduciary capacity in which State banks, trust companies, or other corporations which come into competition with national banks are permitted to act under the laws of the State in which the national bank is located.
The numerals opposite the name of each bank, which refer to the list given above, indicate the power or powers it is authorized to exercise.

[^0]:    ${ }^{1}$ For each of the 287 chain or group systems the number, location, and loans and investments of national, State member, and nonmember banks comprised in these systems on December 31, 1929, are printed on pages 163-184 in Part 2 of Volume I of the hearings on branch, chain, and group banking before the House Committee on Banking and Currency.

[^1]:    ${ }^{1}$ Partly offiset by the establishment of branches, as is noted elsewhere in this report.
    ${ }^{2}$ Includes private banks not under State supervision, and all banks in Alaska, Hawaii, and island pos. essions; figures taken from annual reports of Comptroller of the Currency.

[^2]:    1 Uncollected items (exclusive of Federal reserve notes of other Federal reserve banks)in. JexcessIofldeferred availability items.

[^3]:    ${ }^{1}$ Figures for nonmember banks not on par list not available.
    2 Reduction from preceding months due largely to exclusion of member banks carried on capital-stock records, but not in actual operation; on this date (March 31, 1925) the number of such banks was 108.
    Note.-Nonmember banks not on par list comprise all incorporated banks, other than mutual savings banks, that have not agreed to pay, without deductions for exchange, such checks drawn upon them as are presented for payment by the Federal reserve banks.

[^4]:    ${ }^{1}$ Gold coin and bullion (including foreign coin) held by United States Treasury and Federal reserve banks (including gold held under earmark abroad) and United States gold coin in circulation. Amounts held abroad under earmark (end of month figures) as follows: 1917, June-December, $\$ 52,500,000 ; 1918$, January-May, $\$ 52,500,000$; June, $\$ 16,271,000 ;$ July, $\$ 11,630,000$; August-December, $\$ 5,829,000 ; 1919$, Jan-uary-March, $\$ 5,829,000$; August, $\$ 107,119,000$; September, $\$ 159,618,000 ;$ October, $\$ 149,166,000$; November, $\$ 135,694,000$; December,' $\$ 131,320,000$; 1920, January, $\$ 114,322,000$; February, $\$ 112,822,000$; March- $\Lambda$ pril, $\$ 112,780,000$; May-July, $\$ 111,530,000$; August-September, $\$ 111,458,000$; October, $\$ 16,536,000$; NovemberDecember, $\$ 3,300,000 ; 1921$, January-February, $\$ 3,300,000$; 1927, May, $\$ 59,548,000 ;$ June, $\$ 23,300,000$.
    ${ }^{2}$ Averages of daily flgures.

[^5]:    ${ }^{1}$ Money outside Treasury and Federal reserve banks (prior to November, 1914, money outside Treasury)
    ${ }_{2}$ Figures prior to June 21, 1917 (when legislation became effective changing reserve requirements of member banks), while comparable with one another, are not strictly comparable with those for succeeding dates; the transfer to the Federal reserve banks of that part of legal reserves of member banks formerly held in own vaults reduced the volume of money outside Treasury and Federal reserve panks (see note 1). The increasing membership of State banks in the Federal reserve system after June, 1917, had a similar effect upon the figures.

[^6]:    ${ }^{1}$ These rates are monthly averages of daily quotations for the month.
    r Revised.
    2 Stock exchange 90 -day time loans.
    Stock exchange call loans; new and renewal rates.
    4 Second, third, and fourth 41/4 per cent Liberty bonds.
    8 Three issues- $38 / 4$, 4, and $41 / 4$ per cent: yields calculated on basis of last redemption dates-1956, 1954, and 1952.
    ${ }^{6}$ Based, at least in part, on certificates of $6-9$ months maturity.
    Back fiqures.-See Annual Reports for 1928 (Table 39), and 1927 (Table 28).

[^7]:    1 Stock exchange 90 -day time loans.
    ${ }^{2}$ Stock exchange call loans new and renewal rates.
    ${ }^{3} 3$ issues $-33 / 4,4$, and $41 / 4$ per cent; yields calculated on basis of last redemption dates-1056, 1954, and 1952.
    ${ }^{4}$ Change of issues on which yield is computed.
    Back figures.-See Annual Reports for 1928 (Table 40), 1927 (Table 29), 1920 (Table 107), and 1925 (Table

[^8]:    ${ }^{1}$ Rate charged on bills payable in stable values; the rate charged on bills payable in paper marks remained 90 per cent until discoutinued Jan. 29, 1924.

[^9]:    ${ }^{1}$ All figures are monthly averages. For sources used and detailed explanation of methods of quotation, see Federal Reserve Bulletin for November, 1926, April, 1927, and November, 1929.
    ${ }_{2}$ Revised series; see Federal Reserve Bulletin for July, 1929.

[^10]:    ${ }^{1}$ Includes member and nonmember banks (25,110 altogether in June, 1929) as follows: National banks, State commereial banks and trust companies, mutual and stock savings banks, and all private banks under State supervision (about 265 in June, 1929).
    ${ }^{2}$ Dates of reports of member banks; figures for nonmember banks are as of nearest available date.
    ${ }^{3}$ National banks.

    - Nonnational banks.

[^11]:    I Includes member and nonmember banks (25,110 altogether in June, 1929) as follows: National banks, tate commercial banks and trust companies, mutual and stock savings banks, and all private banks under tate supervision (about 265 in June, 1929).
    ${ }_{2}$ Dates of reports of member banks; figures for nonmember banks are as of nearest available date.
    ${ }^{3}$ National banks.

    - Nonnational banks.

[^12]:    ${ }^{1}$ Member banks only; i. e., exclusive of national banks in Alaska and Hawaii.
    ${ }^{2}$ Exclusive of acceptances of other banks and bills of exchange or drafts sold with indorsement, now sbown separately.
    r Revised.
    Back figures.-For principal items see Table 45, also Annual Report for 1926 (Tables 77-78: Separate figures for national and State members); for details see (1) Member Bank Call Report Nos. 35-46; (2) Annual Reports for 1928 (Table 46), 1927 (Table 84), 1926 (Table 79), 1925 (Tables 78-80), 1924 (Tables 78-80); (3) Federal Reserve Bulletins.

[^13]:    ${ }^{1}$ Excludes acceptances of other banks and bills of exchange or drafts sold with indorsement, now shown separately.
    $r$ Revised.

[^14]:    1 Subject to reserve requirements of 13 per cent for central reserve city banks, 10 per cent for reserve city banks, and 7 per cent for banks outside central reserve and reserve cities (so-called country banks).
    2 Subject to reserve requirements of 3 per cent.

[^15]:    Note.-Figures include a small amount of borrowing by intermediate credit banks, etc. (See Table 12.)

[^16]:    1 For corresponding data by weeks for 1927 and 1928, see Annual Report for 1928 (Table 54). Weekly figures for earlier years (revised series) are available back to 1919, but have not been published; they may be had on request.
    2 Not available.

[^17]:    ${ }^{1}$ For corresponding data for 1927 and 1928 see Annual Report for 1928 (Table 54). Weekly figures for earlier years (revised basis) are available back to 1919, but have not been published; they may be had

[^18]:    r Revised.

[^19]:    1 Not including nonmember banks absorbed by member banks without effect on the number of banks in system.
    ${ }^{2}$ Including withdrawals which were incidental to the absorption of member banks by existing nonmember banks as follows: 1925, 42; 1926, 44; 1927, $55 ; 1928,59 ; 1929,95$.
    ${ }^{9}$ Net loss owing to withdrawals.
    Back figures.-See Annual Report for 1925 (Table 93).

[^20]:    ${ }^{1}$ Conversions between two classes of member banks, without effect on the number of banks in the system.
    ${ }_{3}^{2}$ Includes 3 compulsory withdrawals.
    ${ }^{3}$ Includes 1 compulsory withdrawal.
    Back figures.-See Annual Reports for 1927 (Table 117), 1926 (Table 97), and 1925 (Table 03).

[^21]:    ${ }^{1}$ Figures are averages of amounts for call dates during year.
    ${ }^{2}$ For explanation of these ratios, see Federal Reserve Bulletin for December, 1928, pp. 826-828.
    ${ }^{3}$ Capital, surplus, and undivided profits including, in 1923 and 1924 only, reserves for taxes, interest, etc., acerued.

[^22]:    ${ }^{1}$ Includes 'other securities' and foreign loans on gold.

[^23]:    1 Includes "other securities" and foreign loans on gold.

[^24]:    ${ }^{1}$ Includes "other securities" and foreign loans on gold.

[^25]:    Back figures.-See Annual Reports for 1928 (Table 77), 1927 (Table 60), 1924-1926 (Part II, Table 6)

[^26]:    : Incorporated banks other than mutual savings banks.
    Back figures.-See Annual Reports for 1928 (Table 81), 1927 (Table 71), 1926 (Table 64), 1925 (Table 65) 1924 (Table 71), 1923 (Table 71), 1922 (Table 73), 1921 (Table 71), 1920 (Table 63), 1919 (Table 55), and 1918 (Table 48).

[^27]:    ${ }^{1}$ Incorporated banks other than mutual savings banks.
    Back figures.-See Annual Reports for 1928 (Table 82), 1926 (Table 65), and 1924 (Table 70).

[^28]:    ${ }^{1}$ Dates of reports of member banks; figures for nonmember banks are from reports of nearest available date.
    Note.-Table covers following classes of banks: Nationsl banks, State commercial banks and trust companies, mutual and stock savings banks, and private banks under State supervision.

[^29]:    ${ }^{1}$ Dates of reports of member banks; figures for nonmember banks are from reports of nearest available date.

    Note.-Table covers following classes of banks: Natlonal banks, State commercial banks and trust Digitized focompanges, mutual and stock savings banks, and private banks under State supervision.

[^30]:    ${ }^{1}$ Dates of reports of member banks; figures for nonmember banks are from reports of nearest available date.
    Note-Table covers following classes of banks: National banks, State commercial banks and trust companies, mutual and stock savings banks, and private banks under State supervision.

[^31]:    ${ }^{1}$ Member banks only, i. e., exclusive of national banks in Alaska and Hawaii.

[^32]:    Back figures.-See Federal Reserve Bulletin for March, 1929 (for revised monthly data back to January, 1923, and for March, 1927 (for monthly data back to January, 1919).

[^33]:    ${ }^{1}$ For directors elected in December, 1929, for the 3-year term beginning Jan. 1, 1930, see Federal Reserve Bulletin for January, 1930.

[^34]:    1 Includes 16 banks with capital in excess of $\$ 10,000,000$ ，as follows：New York， 11 with capilal of $\$ 250$ ， 600,000 and deposits of $\$ 5,494,630,000$ ；Ohio， 2 with capital of $\$ 36,650,000$ and deposits of $\$ 587,750,000$ ；1llinoin， 2 with capital of $\$ 87,000,000$ and deposits of $\$ 990,303,000 ;$ Michigan， 1 wilh capital of $\$ 11,000,000$ and deposits of $\$ 256,763,000$ ．

[^35]:    1 Population Jan. 1, 1920; decrease 1910 to 1920; no estimate made.
