BUREAU OF
ECONOMIC ANALYSIS

FOR RELEASE WEDNESDAY, JANUARY 26, 1972

BEA 72-6

Robert B. Bretzfelder: 343-8663

PERSONAL INCOME ROSE IN ALL BUT SIX STATES IN THE THIRD QUARTER OF 1971

Personal income rose in 44 States and in all eight regions in the third quarter of 1971, the Bureau of Economic Analysis reports in the January issue of the Survey of Current Business. The Bureau of Economic Analysis is an agency of the Social and Economic Statistics Administration of the U. S. Department of Commerce.

The States with the largest third quarter income gains -- ranging from 6 percent to 3 percent -- were Kansas, Colorado, Nebraska, New Mexico, Kentucky, Virginia, Idaho, and Arkansas. Large gains in farm income were important in nearly all of these States. Manufacturing wage and salary payments supplied the major thrust in Virginia and Colorado. (See table.)

Income was little changed in North Dakota, the District of Columbia, and Ohio. There were declines ranging from about one-half of one percent to four percent in Tennessee, Wyoming, Delaware, and Alaska. The declines in North Dakota, Tennessee, and Wyoming reflected sharp drops in farm income. Federal Government wage and salary payments were off a little in the District of Columbia, and manufacturing payrolls were down in Ohio and Delaware.

For the United States as a whole, personal income rose 1-1/2 percent from the second to third quarter. With consumer prices up about 1 percent, real income expanded in 34 States and five regions.

Further detail appears in the January Survey of Current Business. The magazine is available from field offices of the Department of Commerce, or from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402, at an annual subscription price of \$9, including weekly supplements; single copy, \$1.

Total Personal Income, by States and Regions
(Millions of dollars, seasonally adjusted at annual rates)

Note:-- Quarterly totals for the State personal income series will not agree with the personal income measure carried in the national income and product accounts for two reasons. The State numbers for 1971 are based on the unrevised national totals of personal income. In addition, the State series excludes and the national series includes the income disbursed to Government personnel stationed abroad.
