## GROSS NATIONAL PRODUCT: SECOND QUARTER 1988 (PRELIMINARY) CORPORATE PROFITS: SECOND QUARTER 1988

Real gross national product -- the nation's output of goods and services -increased 3.3 percent, or $\$ 32.0$ bilion, in the second quarter of 1988 , according to preliminary estimates released by the Commerce Department's Bureau of Economic Analysis. In the first quarter, real GNP increased 3.4 percent, or $\$ 33.1$ billion.

Losses in crop and livestock output resulting from this year's drought conditions reduced the second-quarter increase in real GNP by 1.0 percentage point. Losses for the entire year are expected to total $\$ 14.3$ billion in 1982 dollars. Of this amount, $\$ 2.4$ billion at a quarterly rate has been allocated to the second quarter. The remaining losses will reduce GNP in the third and fourth quarters. These estimates are subject to further revisions as more information becomes available.

The GNP price index (fixed weights) increased 4.7 percent in the second quarter, compared with 3.5 percent in the first. The step-up in the rate of price increase was due to prices of goods and services purch ased by consumers.

Real personal consumption expenditures increased $\$ 17.4$ billion in the second quarter, compared with an increase of $\$ 28.1$ billion in the first. Durable goods purchases increased $\$ 8.2$ billion, compared with $\$ 13.5$ billion. Nondurable goods purchases were unch anged in second quarter; in the first quarter, they increased $\$ 2.2$ billion. Services expenditures increased $\$ 9.3$ billion, compared with an increase of $\$ 12.3$ billion.

Real nonresidential fixed investment increased $\$ 18.2$ billion in the second quarter, compared with an increase of $\$ 8.6$ billion in the first. Nonresidential structures increased $\$ 3.6$ billion, in contrast to a decrease of $\$ 8.1$ billion. Producers' durable equipment purchases increased $\$ 14.7$ billion, compared with an increase of $\$ 16.7$ billion.

NOTE.--Quarterly estimates are expressed, unless otherwise specified, at seasonally adjusted annual rates. Quarter-to-quarter dollar changes are differences between these rates; quarter-to-quarter percent changes are annualized. "Real," or constantdollar, estimates are in 1982 dollars.

Real residential investment increased $\$ 0.5$ billion in the second quarter, in contrast to a decrease of $\$ 3.2$ billion in the first.

Real net exports of goods and services increased $\$ 18.9$ billion in the second quarter, compared with an increase of $\$ 17.0$ billion in the first. Exports increased $\$ 13.5$ billion, compared with $\$ 27.0$ billion. Imports decreased $\$ 5.4$ billion, in contrast to an increase of $\$ 9.9$ billion.

Real federal government purchases of goods and services increased $\$ 3.2$ billion in the second quarter, in contrast to a decrease of $\$ 19.9$ billion in the first. National defense purchases decreased $\$ 1.4$ billion, compared with a decrease of $\$ 3.6$ billion. Nondefense purchases increased $\$ 4.6$ billion, in contrast to a decrease of $\$ 16.3$ billion. The decrease in the first quarter was due to net purchases of farm products by the Commodity Credit Corporation, which decreased $\$ 18.2$ billion; CCC purchases increased $\$ 2.3$ billion in the second quarter. Excluding CCC purchases, nondefense purchases increased $\$ 2.3$ billion in the second quarter and $\$ 1.9$ billion in the first. State and local government purchases increased $\$ 3.6$ billion, compared with an increase of $\$ 3.8$ billion.

Real final sales, the sum of the above expenditure components, increased 6.5 percent, or $\$ 62.0$ billion, in the second quarter, compared with an increase of 3.6 percent, or $\$ 34.2$ billion, in the first. The smaller increase in the first quarter reflected a large decrease in CCC purchases. Excluding CCC purchases, final sales increased 6.2 percent, or $\$ 59.6$ billion, in the second quarter and 5.6 percent, or $\$ 52.5$ billion, in the first. Of the several measures of aggregate economic activity regularly shown in table 2 in this release, this measure is the one least affected by the drought losses.

Real business inventories increased $\$ 36.0$ billion in the second quarter, following increases of $\$ 66.0$ billion in the first quarter and $\$ 67.1$ billion in the fourth. Thus, the change in inventory investment, which subtracted $\$ 1.1$ billion from the first-quarter change in real GNP, subtracted $\$ 30.0$ billion from the second-quarter change. Nonfarm inventory investment decreased $\$ 20.8$ billion, compared with a decrease of $\$ 16.3$ billion. Farm inventory investment decreased $\$ 9.1$ billion, in contrast to an increase of $\$ 15.2$ billion. The second-quarter decrease reflected a $\$ 9.5$ billion (annual rate) reduction in crop and livestock output associated with drought conditions.

## Gross domestic purchases

Real gross domestic purchases -- the nation's purchases of goods and services -increased 1.3 percent, or $\$ 13.1$ billion, in the second quarter, compared with an increase of 1.6 percent, or $\$ 16.1$ billion, in the first. The substantially smaller increases in gross domestic purchases than in GNP in both quarters reflected sharp increases in net exports.

Current-dollar GNP
Current-dollar GNP -- the market value of the nation's output of goods and services -- increased 8.3 percent, or $\$ 95.2$ billion, in the second quarter. In the first quarter, current-dollar GNP increased 5.4 percent, or $\$ 61.7$ bilion.

## Revisions

The preliminary estimate of the second-quarter increase in real GNP is 0.2 percentage point larger than the advance estimate issued a month ago. The largest upward revisions were in federal government purchases ( $\$ 5.7$ billion), personal consumption expenditures ( $\$ 3.0$ billion), and in producers' durable equipment ( $\$ 2.4$ billion). The largest downward revision was in inventory investment ( $\$ 9.0$ billion).

The increase in the GNP price index (fixed weights) is the same as the estimate issued a month ago.

## Corporate profits

Corporate profits from current production increased $\$ 15.8$ billion in the second quarter to a seasonally adjusted annual rate of $\$ 332.0$ billion, according to preliminary estimates. In the first quarter, profits increased $\$ 0.1$ billion. Cash flow from current production -- the internal funds available to corporations for investment -- increased $\$ 9.9$ billion in the second quarter, compared with an increase of $\$ 3.6$ billion in the first.

Domestic profits of nonfinancial corporations increased $\$ 5.7$ billion in the second quarter, compared with an increase of $\$ 12.2$ billion in the first. In the second quarter, both real gross corporate product and profits per unit of real product increased. The increase in unit profits reflected larger increases in the prices corporations received than in the unit costs they incurred.

In the second quarter, profits increased in the transportation and public utilities group, durable manufacturing, and other nonmanufacturing. Trade and nondurable manufacturing decreased. Widespread decreases within nondurable manufacturing more than offset an increase in petroleum profits.

Domestic profits of financial corporations increased \$2.1 billion in the second quarter, in contrast to a decrease of $\$ 0.8$ billion in the first.

The foreigr component of profits increased $\$ 8.0$ billion, in contrast to a decrease of $\$ 11.2$ billion. This component measures receipts by U.S. residents of dividends and reinvested earnings of foreign affiliates of U.S corporations, less corresponding payments to foreign residents. The second-quarter increase in this component reflects both an increase in receipts and a decrease in payments.

|  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | I I I | IV | I | I I |
|  | (perce qua | chan <br> $r$ at | om ter | ceding rate) |
| Corporate profits from current production... | 5.5 | -1.8 | 0 | 5.0 |
| Profits before tax........................... | 5.7 | -2.6 | 1.5 | 8.6 |
| Profits after tax............................ | 6.0 | -2.5 | 2.5 | 11.5 |
| Current-production cash flow................. | 2.9 | -0.1 | 0.9 | 2.6 |

Profits before tax increased $\$ 24.5$ billion to $\$ 310.7$ billion in the second quarter. This measure of profits does not reflect, as does profits from current production, the capital consumption and inventory valuation adjustments; these adjustments convert depreciation and inventories reported by business to those used in the national income and product accounts. The capital consumption adjustment decreased $\$ 1.0$ billion (from $\$ 49.4$ billion to $\$ 48.4$ billion). The inventory valuation adjustment decreased $\$ 7.7$ billion (from $-\$ 19.4$ billion to $-\$ 27.1$ billion).

Profits tax liability increased $\$ 7.2$ billion to $\$ 144.1$ billion in the second quarter. Profits after tax increased $\$ 17.2$ billion to $\$ 166.6$ billion. Dividends increased $\$ 1.8$ billion to $\$ 103.1$ billion, and undistributed profits increased $\$ 15.4$ billion to $\$ 63.5$ billion.

Definitions of measures of price change, the implicit price deflator, and of corporate profits and cash flow appeared in the May news release.

Additional estimates appear each month in the Survey of Current Business, a monthly journal of the Bureau of Economic Analysis.

The Survey of Current Business is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. First class mail: annual subscription $\$ 46.00$ domestic. Second class mail: annual subscription $\$ 18.00$ domestic, $\$ 22.50$ foreign; single issue $\$ 6.50$ domestic, $\$ 8.13$ foreign.

Four telephone lines carry short recorded messages providing BEA estimates immediately upon their release, usually at 8:30 A.M. Eastern time:
(202)-898-2450 Leading indicators

2451 Gross national product
2452 Personal income and outlay
2453 The most recently released of the following quarterly series:
Merchandise trade, balance of payments basis; or Summary of international transactions; or Plant and equipment expenditures.

This and other news releases are available electronically at the time of public release through the Commerce Department's Economic Bulletin Board at a nominal charge to users. For information, call (202) 377-1986.

Next release -- September 20 at 8:30 A.M. EDT for: Gross National Product: Second Quarter 1988 (Final)
Corporate Profits: Second Quarter 1988

## Reliability of the Estimates

For each quarter, there is a sequence of estimates for GNP. Advance estimates are based on data for most of the quarter and are released in the first month after the end of the quarter. As more comprehensive and revised data become available, additional GNP estimates are released. The preliminary estimates, such as shown in this release, and the final estimate are released in the following 2 months. The GNP estimates also are revised in each of the following 3 years, usually in July, and in comprehensive (benchmark) revisions, usually every 5 years.

The table below provides summary measures of the amount of revision in past years in quarterly percent changes in current-dollar GNP and real GNP. These measures provide some guidelines in assessing the likely size of revisions in estimates for the current quarter. For example, two-thirds of the revisions between the quarterly change in the preliminary estimate of real GNP and that in the latest estimate have been within a range of -1.4 to +1.9 percentage points. Thus, based on past experience, it is likely that the second-quarter change in real GNP, now estimated at 3.3 percent at an annual rate, will not be revised below 1.9 or above 5.2 percent.

Revision in Quarter-to-Quarter Percent Changes at Annual Rate

NOTE.-- Measures are based on the period from 1974 to 1983.
