

## News Release

EMBARGOED UNTIL RELEASE AT 8:30 A.M. EDT, FRIDAY, SEPTEMBER 29, 2017

BEA 17-52

Technical: James Rankin (Personal Income) (301) 278-9087 [piniwd@bea.gov](mailto:piniwd@bea.gov)  
 Harvey Davis (PCE) (301) 278-9086 [pce@bea.gov](mailto:pce@bea.gov)  
 Media: Jeannine Aversa (301) 278-9003 [Jeannine.Aversa@bea.gov](mailto:Jeannine.Aversa@bea.gov)

### Personal Income and Outlays: August 2017

**Personal income** increased \$28.6 billion (0.2 percent) in August according to estimates released today by the Bureau of Economic Analysis. **Disposable personal income** (DPI) increased \$14.9 billion (0.1 percent) and **personal consumption expenditures** (PCE) increased \$18.0 billion (0.1 percent).

**Real DPI** decreased 0.1 percent in August and **Real PCE** decreased 0.1 percent. The **PCE price index** increased 0.2 percent. Excluding food and energy, the PCE price index increased 0.1 percent.

| Chained (2009) dollars                   | 0.1                                    | 0.3  | 0.1  | 0.2  | -0.1 |
| Price indexes:                           |  |      |      |      |      |
| PCE                                      | 0.2                                    | -0.1 | 0.0  | 0.1  | 0.2  |
| PCE, excluding food and energy           | 0.2                                    | 0.1  | 0.1  | 0.1  | 0.1  |
|  | Percent change from month one year ago |      |      |      |      |
| Price indexes:                           |  |      |      |      |      |
| PCE                                      | 1.7                                    | 1.5  | 1.4  | 1.4  | 1.4  |
| PCE, excluding food and energy           | 1.6                                    | 1.5  | 1.5  | 1.4  | 1.3  |

The increase in personal income in August primarily reflected an increase in government social benefits to persons and compensation of employees (table 3).

Real PCE spending in August decreased \$8.4 billion due to a decrease of \$20.2 billion in spending for goods that was partially offset by a \$9.2 billion increase in spending for services (table 7). Within goods, spending on new motor vehicles was the leading contributor to the decrease. Within services, healthcare spending was a leading contributor to the increase. Detailed information on monthly real PCE spending can be found on [Table 2.3.6U](#).

**Personal outlays** increased \$16.8 billion in August (table 3). **Personal saving** was \$522.9 billion in August and the **personal saving rate**, personal saving as a percentage of disposable personal income, was 3.6 percent (table 1).

### Updates

Estimates have been updated for April through July. The change from the preceding month for current-dollar personal income and for current-dollar and chained (2009) dollar DPI and PCE -- revised and previously published -- are shown below for June and July.

### Hurricane Harvey

The August estimates of personal income and outlays reflect the effects of Hurricane Harvey that made landfall in southeastern Texas on August 25<sup>th</sup>. BEA cannot separately quantify the total impact of the storm on personal income and outlays because most of the source data used to estimate the components of personal income and outlays do not separately identify storm impacts. BEA made adjustments to estimates where source data were not yet available or did not fully reflect the effects of the storm.

For more information on the treatment of disasters within the national income and product accounts, see [“How are the measures of production and income in the national accounts affected by a natural or man-made disaster?”](#)

### Definitions

**Personal income** is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses.

**Disposable personal income** is the income available to persons for spending or saving. It is equal to personal income less personal current taxes.

**Personal consumption expenditures** (PCE) is the value of the goods and services purchased by, or on the behalf of, "persons" who reside in the United States.

**Personal outlays** is the sum of PCE, personal interest payments, and personal current transfer payments.

**Personal saving** is personal income less personal outlays and personal current taxes.

The **personal saving rate** is personal saving as a percentage of disposable personal income.

**Current-dollar estimates** are valued in the prices of the period when the transactions occurred—that is, at "market value." Also referred to as "nominal estimates" or as "current-price estimates."

**Real values** are inflation-adjusted estimates—that is, estimates that exclude the effects of price changes.

**List of Personal Income and Outlays News Release Tables**

For more definitions, see the [Glossary: National Income and Product Accounts](#).

### Statistical conventions

**Annual rates.** Monthly and quarterly values are expressed at seasonally-adjusted annual rates (SAAR). Dollar changes are calculated as the difference between these SAAR values. For detail, see the FAQ "[Why does BEA publish estimates at annual rates?](#)"

**Month-to-month percent changes** are calculated from unrounded data and are not annualized.

**Quarter-to-quarter percent changes** are calculated from unrounded data and are displayed at annual rates. For detail, see the FAQ "[How is average annual growth calculated?](#)"

**Quantities and prices.** Quantities, or "real" volume measures, and prices are expressed as index numbers with a specified reference year equal to 100 (currently 2009). Quantity and price indexes are calculated using a Fisher-chained weighted formula that incorporates weights from two adjacent periods (quarters for quarterly data and annuals for annual data). "Real" dollar series are calculated by multiplying the published quantity index by the current dollar value in the reference year (2009) and then dividing by 100. Percent changes calculated from real quantity indexes and chained-dollar levels are conceptually the same; any differences are due to rounding.

**Chained-dollar values** are not additive because the relative weights for a given period differ from those of the reference year.

p Preliminary

r Revised

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

r Revised

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

6. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual and quarterly estimates are averages of the monthly estimates.

p Preliminary

r Revised

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

r Revised

1. Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

2. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

3. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

4. Consists of nonmortgage interest paid by households.

5. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

p Preliminary

r Revised

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

p Preliminary

r Revised

1. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

2. Consists of gasoline and other energy goods and of electricity and gas services.

3. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.
