## U.S. International Transactions, Fourth Quarter and Year 2018

### Current-Account Balance, Fourth Quarter

The U.S. **current-account deficit** increased to \$134.4 billion (preliminary) in the fourth quarter of 2018 from \$126.6 billion (revised) in the third quarter of 2018, according to statistics released by the Bureau of Economic Analysis (BEA). The deficit was 2.6 percent of current-dollar gross domestic product (GDP) in the fourth quarter, up from 2.5 percent in the third quarter.

The \$7.8 billion increase in the current-account deficit mainly reflected increases in the deficits on goods and on secondary income and a decrease in the surplus on services.

### Current-Account Transactions, Fourth Quarter (tables 1-5)

#### Exports of goods and services and income receipts

Exports of goods and services and income receipts increased \$4.1 billion in the fourth quarter to \$934.3 billion.

- Primary income receipts increased \$5.6 billion to \$271.9 billion, primarily reflecting increases in portfolio investment income and in other investment income. A decrease in direct investment income partly offset the increases. For more information on direct investment income, see the box [“Effects of the 2017 Tax Cuts and Jobs Act on Components of the International Transactions Accounts.”](#)
- Services exports increased \$2.1 billion to \$209.3 billion, mostly reflecting increases in other business services, primarily professional and management services, in travel (for all purposes including education), primarily personal travel, and in financial services.
- Goods exports decreased \$3.7 billion to \$416.1 billion, mainly reflecting a decrease in foods, feeds, and beverages, mostly soybeans.

#### Imports of goods and services and income payments

Imports of goods and services and income payments increased \$11.8 billion in the fourth quarter to \$1.1 trillion.

- Primary income payments increased \$5.5 billion to \$211.5 billion, mainly reflecting increases in other investment income and in portfolio investment income.
- Services imports increased \$3.4 billion to \$143.2 billion, mostly reflecting increases in travel (for all purposes including education), primarily personal travel, and in transport, primarily sea freight transport and air passenger transport.
- Secondary income payments increased \$3.0 billion to \$64.8 billion, mostly reflecting an increase in U.S. government grants.

### Effects of the 2017 Tax Cuts and Jobs Act on Components of the International Transactions Accounts

In the international transactions accounts, income on equity, or earnings, of foreign affiliates of U.S. multinational enterprises consists of a portion that is repatriated to the parent company in the United States in the form of dividends and a portion that is reinvested in foreign affiliates. At times, repatriation of dividends exceeds current-period earnings, resulting in negative values being recorded for reinvested earnings. In 2018, dividends exceeded earnings, reflecting the repatriation of accumulated prior earnings of foreign affiliates of U.S. multinational enterprises by their parent companies in the United States in response to the 2017 Tax Cuts and Jobs Act (TCJA), which generally eliminated taxes on repatriated earnings. Dividends were \$664.9 billion while reinvested earnings were -\$141.6 billion (see table below). The reinvested earnings are also reflected in the net acquisition of direct investment assets in the financial account (table 6).

**Direct Investment Earnings Receipts**  
Billions of dollars, quarters seasonally adjusted

	2017				2018				Annual	
	I	II	III	IV	I <sup>r</sup>	II <sup>r</sup>	III <sup>r</sup>	IV <sup>p</sup>	2017	2018 <sup>p</sup>
<b>Direct investment earnings</b>	<b>114.1</b>	<b>114.4</b>	<b>120.3</b>	<b>128.9</b>	<b>128.0</b>	<b>132.8</b>	<b>131.7</b>	<b>130.8</b>	<b>477.7</b>	<b>523.3</b>

### **Effects of the 2017 Tax Cuts and Jobs Act on Components of the International Transactions Accounts (Continued)**

For more information, see [“How does the 2017 Tax Cuts and Jobs Act affect BEA's business income statistics?”](#) and [“How are the international transactions accounts affected by an increase in direct investment dividend receipts?”](#)

In addition to the repatriation of accumulated earnings, some companies made other changes to their business practices in reaction to the TCJA. For example, some insurance companies changed how they operate in response to the base erosion and anti-abuse tax (BEAT) provision of the TCJA. BEAT is a tax on certain payments from a U.S. company to a related foreign party, which can include premium payments for reinsurance. In response to the new tax, many U.S. insurance companies terminated these intracompany reinsurance contracts. As a result, premiums paid by U.S. insurers to foreign insurers in 2018 were \$98.8 billion, down from \$129.9 billion in 2017 (table 3). Similarly, insurance services imports in 2018 were \$38.2 billion, down from \$50.7 billion in 2017.

For more information on the estimation methods used to compile insurance services, see the insurance section in [“U.S. International Economic Accounts: Concepts and Methods.”](#)

### **Capital Account, Fourth Quarter (table 1)**

Capital-transfer receipts were \$8.9 billion in the fourth quarter. The transactions reflected receipts from foreign insurance companies for losses resulting from the wildfires in California. For information on transactions associated with natural disasters, see [“What are the effects of hurricanes and other disasters on the international economic accounts?”](#)

### **Financial Account, Fourth Quarter (tables 1, 6, 7, and 8)**

Net U.S. borrowing measured by financial-account transactions was \$168.3 billion in the fourth quarter, an increase from net borrowing of \$36.8 billion in the third quarter.

#### **Financial assets**

Net U.S. acquisition of financial assets excluding financial derivatives increased \$93.6 billion to \$172.0 billion.

- Net U.S. acquisition of other investment assets was \$223.2 billion following net U.S. liquidation of \$52.0 billion in the third quarter. This change mostly reflected net U.S. acquisition of currency and deposits and net U.S. provision of loans to foreign residents following net withdrawal of U.S. deposits from foreign banks and net foreign repayment of loans in the third quarter.
- Net U.S. sales of portfolio investment assets were \$149.6 billion following net U.S. purchases of \$70.1 billion in the third quarter. This change reflected net U.S. sales of both equity and debt instruments following net U.S. purchases in the third quarter.

- Net U.S. acquisition of direct investment assets increased \$35.8 billion to \$96.2 billion. For more information on recent transactions in direct investment assets, see the box [“Effects of the 2017 Tax Cuts and Jobs Act on Components of the International Transactions Accounts.”](#)

## Liabilities

Net U.S. incurrence of liabilities excluding financial derivatives increased \$217.3 billion to \$320.2 billion.

- Net U.S. incurrence of other investment liabilities was \$244.9 billion following net U.S. repayment of \$12.3 billion in the third quarter. This change primarily reflected net foreign provision of loans and net U.S. incurrence of currency and deposits following net U.S. repayment of loans and net foreign withdrawal in the third quarter.

## Financial derivatives

Transactions in financial derivatives other than reserves reflected fourth-quarter net borrowing of \$20.1 billion, a \$7.8 billion increase in net borrowing from the third quarter.

### Statistical Discrepancy, Fourth Quarter (table 1)

The statistical discrepancy was  $-\$42.8$  billion in the fourth quarter following a statistical discrepancy of  $\$89.2$  billion in the third quarter.

### Updates to Third Quarter 2018 International Transactions Accounts Aggregates

Billions of dollars, seasonally adjusted

	Preliminary estimate	Revised estimate
<b>Current-account balance</b>	<b>-124.8</b>	<b>-126.6</b>
Goods balance	-227.0	-229.5
Services balance	68.4	67.5
Primary-income balance	59.4	60.3
Secondary-income balance	-25.6	-24.9
<b>Net lending (+)/borrowing (-) from financial-account transactions</b>	<b>-31.3</b>	<b>-36.8</b>
<b>Statistical discrepancy</b>	<b>93.0</b>	<b>89.2</b>

### Current-Account Balance, Year 2018

The current-account deficit increased to \$488.5 billion (preliminary) in 2018 from \$449.1 billion in 2017. The deficit was 2.4 percent of current-dollar GDP in 2018, up from 2.3 percent in 2017.

The \$39.3 billion increase in the deficit reflected an increase in the deficit on goods that was partly offset by increases in the surpluses on primary income and on services and a decrease in the deficit on secondary income.

## Current-Account Transactions, Year 2018 (tables 1-5)

### Exports of goods and services and income receipts

Exports of goods and services and income receipts increased \$268.5 billion in 2018 to \$3.7 trillion.

- Primary income receipts increased \$132.2 billion to \$1.1 trillion, led by increases in portfolio investment income and in direct investment income.
- Goods exports increased \$118.9 billion to \$1.7 trillion, led by an increase in industrial supplies and materials, primarily petroleum and products.
- Services exports increased \$30.7 billion to \$0.8 trillion, led by an increase in other business services.

### Imports of goods and services and income payments

Imports of goods and services and income payments increased \$307.8 billion to \$4.2 trillion.

- Goods imports increased \$202.8 billion to \$2.6 trillion, led by increases in industrial supplies and materials, in capital goods, and in consumer goods.
- Primary income payments increased \$109.7 billion to \$0.8 trillion, led by an increase in other investment income.

## Capital Account, Year 2018 (table 1)

Capital-transfer receipts were \$9.4 billion in 2018. The transactions reflected receipts from foreign insurance companies for losses resulting from Hurricane Florence and the wildfires in California. For more information, see [“What are the effects of hurricanes and other disasters on the international economic accounts?”](#)

## Financial Account, Year 2018 (tables 1, 6, 7, and 8)

Net U.S. borrowing measured by financial-account transactions was \$519.6 billion in 2018, an increase from net borrowing of \$331.9 billion in 2017.

### Financial assets

Net U.S. acquisition of financial assets excluding financial derivatives decreased \$881.1 billion to \$301.6 billion.

- Net U.S. withdrawal of direct investment assets was \$50.6 billion following net U.S. acquisition of \$379.2 billion in 2017. The net withdrawal of direct investment assets reflected U.S. parent repatriation of previously reinvested earnings in response to the TCJA. For more information, see the box [“Effects of the 2017 Tax Cuts and Jobs Act on Components of the International Transactions Accounts.”](#)

- Net U.S. purchases of portfolio investment assets decreased \$376.4 billion to \$210.3 billion, mostly reflecting a decrease in net U.S. purchases of foreign debt securities.
- Net U.S. acquisition of other investment assets decreased \$81.6 billion to \$136.9 billion. This change mostly reflected net foreign repayment of loans following net U.S. provision in 2017.

### Liabilities

Net U.S. incurrence of liabilities excluding financial derivatives decreased \$736.8 billion to \$800.9 billion.

- Net foreign purchases of portfolio investment liabilities decreased \$479.2 billion to \$320.0 billion, mostly reflecting a decrease in net foreign purchases of U.S. bonds.
- Net U.S. incurrence of other investment liabilities decreased \$169.8 billion to \$213.8 billion, mainly reflecting a decrease in net U.S. incurrence of currency and deposits.
- Net U.S. incurrence of direct investment liabilities decreased \$87.7 billion to \$267.1 billion, mainly reflecting net U.S. repayment of debt liabilities following net U.S. incurrence in 2017.

### Financial derivatives

Transactions in financial derivatives other than reserves reflected net borrowing of \$20.3 billion in 2018 following net lending of \$23.1 billion in 2017.

### Statistical Discrepancy, Year 2018 (table 1)

The statistical discrepancy was -\$40.5 billion in 2018 following a statistical discrepancy of \$92.5 billion in 2017.

#### Notice of Upcoming Update to the U.S. International Transactions Accounts

The annual update of the U.S. international transactions accounts will be released along with preliminary estimates for the first quarter of 2019 on June 20, 2019. A preview of the annual update will appear in the April 2019 issue of the [Survey of Current Business](#).

## Additional Information

### Resources

- Stay informed about BEA developments by reading the BEA [blog](#), signing up for BEA's [email subscription service](#), or following BEA on Twitter [@BEA\\_News](#).
- Historical time series for these estimates can be accessed in BEA's [interactive data application](#).
- Access BEA data by registering for BEA's data [application programming interface](#) (API).
- For more on BEA's statistics, see our monthly online journal, the [Survey of Current Business](#).
- BEA's [news release schedule](#).
- More information on these international transactions statistics will be provided next month in the [Survey of Current Business](#).
- More information on the international transactions accounts (ITAs) and a description of the estimation methods used to compile them is provided in [U.S. International Economic Accounts: Concepts and Methods](#).

### Definitions

The **current account** consists of transactions between U.S. residents and nonresidents in goods, services, primary income, and secondary income.

**Goods** are physical items with ownership rights that can be exchanged among institutional units through transactions.

**Services** transactions consist of transactions arising from productive activities that change the condition of the consumer or that facilitate the exchange of products and financial assets.

**Primary income** transactions include investment income and compensation of employees. Investment income is the return on holdings of financial assets and includes direct investment income, portfolio investment income, other investment income, and income on reserve assets. Compensation of employees is income for the contribution of labor inputs to the production process.

**Secondary income** consists of current transfers between residents and nonresidents. Unlike an exchange, a transfer is a transaction in which a good, service, or asset is provided without a corresponding return of economic value. Secondary income receipts and payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

The **capital account** consists of capital transfers between residents and nonresidents and the cross-border acquisition and disposal of nonproduced nonfinancial assets. Capital transfers include debt forgiveness and certain disaster-related nonlife insurance claims. Nonproduced nonfinancial assets include natural resources and contracts, leases, and licenses. Capital-account transactions are distinguished from current-account transactions in that capital-account transactions result in a change in the assets of one or both parties to the transaction without affecting the income or savings of either party.

The **financial account** consists of transactions between U.S. residents and nonresidents for direct investment, portfolio investment, other investment, reserves, and financial derivatives other than reserves.

**Direct investment** is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise resident in another economy. Ownership or control of 10 percent or more of the enterprise's voting securities is the threshold for separating direct investment from other types of investment. Direct-investment transactions in the financial account include transactions in equity (including reinvestment of earnings) and debt instruments.

**Portfolio investment** transactions consist of cross-border transactions involving equity and investment fund shares and debt securities, excluding those included in direct investment or reserve assets.

**Other investment** is a residual category that includes cross-border financial instruments other than those included in direct investment, portfolio investment, financial derivatives, and reserve assets. Other-investment transactions consist of transactions in currency and deposits, loans, insurance technical reserves, trade credit and advances, and, for liabilities, special drawing rights allocations.

**Reserve assets** are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes such as maintaining confidence in the currency and the economy and serving as a basis for foreign borrowing. The major published components are monetary gold, International Monetary Fund (IMF) special drawing rights (SDRs), reserve position in the IMF, and other reserve assets.

**Financial derivatives other than reserves** consist of financial contracts that are linked to underlying financial instruments, commodities, or indicators. Transactions in financial derivatives consist of U.S. cash receipts and payments arising from the sale, purchase, periodic settlement, or final settlement of financial derivatives contracts. Transactions in financial derivatives are only available as a net value equal to transactions for assets less transactions for liabilities. A positive value represents net cash payments by U.S. residents to foreign residents from settlements of derivatives contracts (net lending) and a negative value represents net U.S. cash receipts (net borrowing).

The **statistical discrepancy** is the difference between net acquisition of assets and net incurrence of liabilities in the financial account (including financial derivatives) less the difference between total credits and total debits recorded in the current and capital accounts. The statistical discrepancy can also be calculated as the difference between net lending (borrowing) measured from financial-account transactions and net lending (borrowing) measured from current- and capital-account transactions.

The **current-account balance** is the difference between credits (exports and income receipts) and debits (imports and income payments) in the current account. The balance is a net measure of current-account transactions between the United States and the rest of the world. A positive balance indicates a current-account **surplus**. A negative balance indicates a current-account **deficit**.

**Net lending (borrowing)** measures the balance of funds supplied to the rest of the world. Net lending means that, in net terms, the U.S. economy supplies funds to the rest of the world. Net borrowing means the opposite. Net lending (borrowing) can be measured by current- and capital-account transactions or by financial-account transactions. Conceptually, the two measures are equal. In practice, the two measures differ by the statistical discrepancy.

## Release and update cycle

Preliminary quarterly statistics for the ITAs are released in March, June, September, and December approximately 80 days after the end of the reference quarter. These statistics are updated the following quarter to incorporate new source data. Quarterly statistics are open for revision for at least the prior three years in annual updates released in June. Preliminary annual statistics are released in March along with statistics for the fourth quarter of the previous year. These annual statistics are open for revision for at least the prior three years in subsequent annual updates.

## Related statistics

The ITAs constitute one part of a broader set of U.S. international economic accounts that, taken together, provide a comprehensive, integrated, and detailed picture of U.S. international economic activities.

The [international investment position \(IIP\) accounts](#) are released quarterly. Financial transactions that are reported in the ITAs are one type of change in position recorded in the IIP accounts.

Statistics on [direct investment and multinational enterprises](#) (MNEs) include annual statistics on the activities of MNEs, detailed annual and quarterly statistics on direct investment, and annual statistics on new investment in the United States.

Statistics on [international services](#), released annually, include detailed annual information on trade in services and on services supplied through the channel of direct investment by affiliates of MNEs.

[U.S. international trade in goods and services](#), released by BEA and the U.S. Census Bureau, provides monthly statistics on trade in goods and services.

---

p Preliminary r Revised n.a. Not available (\*) Transactions are between zero and +/- \$500,000

1. All travel purposes include 1) business travel, including expenditures by border, seasonal, and other short-term workers and 2) personal travel, including health-related and education-related travel.

2. Secondary income (current transfer) receipts and payments include U.S. government and private transfers, such as U.S. government grants and pensions, fines and penalties, withholding taxes, personal transfers (remittances), insurance-related transfers, and other current transfers.

3. Transactions for financial derivatives are only available as a net value equal to transactions for assets less transactions for liabilities. A positive value represents net U.S. cash payments arising from derivatives contracts, and a negative value represents net U.S. cash receipts.

4. The statistical discrepancy, which can be calculated as line 109 less line 108, is the difference between total debits and total credits recorded in the current, capital, and financial accounts. In the current and capital accounts, credits and debits are labeled in the table. In the financial account, an acquisition of an asset or a repayment of a liability is a debit, and an incurrence of a liability or a disposal of an asset is a credit.

5. Current- and capital-account statistics in the international transactions accounts differ slightly from statistics in the national income and product accounts (NIPAs) because of adjustments made to convert the international transactions statistics to national economic accounting concepts. A reconciliation between annual statistics in the two sets of accounts appears in [NIPA table 4.3B](#).

6. Net lending means that U.S. residents are net suppliers of funds to foreign residents, and net borrowing means the opposite. Net lending or net borrowing can be computed from current- and capital-account transactions or from financial-account transactions. The two amounts differ by the statistical discrepancy.

Notes: Details may not add to totals because of rounding. See international transactions accounts table 1.3 at [apps.bea.gov/itable/index\\_ita.cfm](https://apps.bea.gov/itable/index_ita.cfm) for geographic detail.

p Preliminary r Revised

1. Primarily withholding taxes received and fines levied by U.S. government agencies.

2. Primarily insurance-related transfers; pensions and benefits received from Canada, Germany, and the United Kingdom; antitrust-related class-action lawsuits; and personal transfers received by U.S. residents.

3. Nonmilitary and military assistance provided to foreigners in the form of goods, services, or cash under programs enacted by the U.S. Congress.

4. Primarily U.S. government social security and retirement benefits paid to former U.S. residents who reside abroad and contributions to international organizations and commissions to meet the financial obligations of membership and to fund United Nations peacekeeping operations.

5. Personal transfers (sometimes called remittances) from U.S. resident immigrants to foreign residents.

6. Primarily insurance-related transfers; withholding taxes paid by U.S. companies; and charitable donations by U.S. entities.

Note: Details may not add to totals because of rounding.

p Preliminary r Revised (D) Suppressed to avoid the disclosure of data of individual companies.

1. Financial transactions on an asset/liability basis are organized according to whether the transactions relate to an asset or a liability. Net U.S. acquisition of direct investment assets relates to U.S. parent and U.S. affiliate acquisition of claims (assets). Net U.S. incurrence of direct investment liabilities relates to U.S. affiliate and U.S. parent incurrence of liabilities.

2. Financial transactions on a directional basis are organized according to whether the transactions relate to outward investment (U.S. direct investment abroad) or inward investment (foreign direct investment in the United States).

Transactions for outward investment relate to transactions for U.S. parent claims and liabilities. Transactions for inward investment relate to transactions for U.S. affiliate liabilities and claims.

Note: Details may not add to totals because of rounding.
